- "POSTAGE STAMPS."—A boy in my form one day showed me a collection of from 300 to 400 different postage stamps, English and foreign, and the same time stated that Sir Rowland Hill told him that at that time there might be about 500 varieties on the whole. This seems a cheap, instructive, and portable museum for young persons, and yet I have seen no notices of catalogues or specimens for sale, such as there are of coins, eggs, plants, plants, etc. and no articles in periodicals. A cheap facsimile catalogue with nothing but names of respective states, periods of use, value, etc., would meet with attention. If there be a London shop where stamps or lists of them could be procured, its address would be acceptable to me, and to a score young friends."
