When a Government enters into contract with an individual, it deposes as to the matter of the contract, its constitutional authority, and exchanges the character of legislator for that of a moral agent, with the same rights and obligations as an individual. Its promises may be justly considered as excepted out of its *power to legislate*, unless in aid of them. It is, in theory, impossible to reconcile the two ideas of a *promise which obliges* with a *power to make a law which can vary the effect of it*. This is the great principle that governs the question, and abridges the general right of the Government to lay taxes, excepting out of it a species of property which subsists only in its promise.

There are persons who, admitting the general rule, conceive a distinction to exist between a tax upon the funds, which must be paid at all events, and a tax upon alienations of them, which will only be paid when they are transferred from one to another. The latter they think justifiable, because it is in the option of the creditor to avoid the tax, by avoiding the alienation. But the difference between the two cases is only a difference in the degree of violation.

The stock, in its creation, is made transferable. This quality constitutes a material part of its value, and the existence of it is a part of the contract with the Government, which has undertaken, itself, to conduct the operation of transferring by its own officers, and consequently at its own expense. It is as completely a breach of contract to derogate from this quality, in diminution of the value of stock, by encumbering the transfer with a charge or tax, as it is to take back, in the same shape, a portion of the principal or interest. It is obvious, too, that this may be carried so far as essentially to destroy the transferable capacity. But what is a tax upon transfers, other than the faculty of taking away from the actual proprietor of stock a portion of his principal, whenever his interests or his necessities demand a transfer, in derogation from the full enjoyment of the right to transfer, and from the express

promise of the Government to pay to him or his alienee? For it is upon the seller, not upon the buyer, that such a tax will fall. And where is the substantial difference, on the ground of contract, between this and a direct tax upon the fund itself? The value of it is as certainly impaired by the one as by the other.

But shall the proprietor of money in the funds, then, be exempt from his proportion of the burthens which other citizens bear?

This will not be the consequence of the principle. As a consumer, of which his income is the instrument, he will pay his proportion of the taxes on consumption. As a holder of any other species of property procured by that income, or otherwise, which is liable to a tax, he must also contribute his proportion.

But, without undue refinement, the lender of money to the public may be affirmed to have paid his tax when he lends his money.

Relying upon the engagement of the Government, express or implied, that he will receive what is promised him, without defalcation, he is content with a less interest than he would take if subject to any such defalcation, and especially if it was to be arbitrary as to its extent. In this lower rate of interest he may be truly said to pay his tax, or to purchase an exemption from it.

Here, also, we find what is decisive on the point of expediency.

If the Government had a right to tax its funds, the exercise of that right would cost much more than it was worth. The money lender would exact exorbitant premiums, not only as an indemnification for the use which the Government might probably make of its right, and which, in practice, would be likely to be qualified by some regard to equality of contribution, but as an equivalent for insurance against the risk or possibility of a more extensive use. Hence the Government would be likely to pay much more in premiums upon its loans, than it would draw back in taxes; and the former being supposed but equal to the latter, there would be no advantage in exercising the right.

But it will be, perhaps, more safe to affirm, that there would be no borrowing at all upon such terms. The first precedent of a tax upon the funds might be expected to compel the Government to an express renunciation of the right in every future loan. Solid capitalists would not be much inclined to adventure their money upon so precarious a footing as is implied in a power of taxing their credits.

These reflections lead readily to an estimate of the impressions which would be produced by the example of an imposition on the funds. Regarded either as a positive breach of contract, or as a deviation from the sound maxims of credit, the effect upon it would be nearly equally fatal. Whatever might be excused to a time of revolution, to a defect of means, or to some extraordinary peculiarity of situation, no excuse would be admitted for a deliberate departure from principles, at a time, too, of national prosperity, in a flourishing state of the finances, after the foundations of a regular system had been laid. The departure would argue an incorrectness, an instability, or a depravity of views, calculated to give a lasting shock to public credit.

The United States must, henceforth, tread with the most cautious steps.

A renunciation of the right, in future, might not speedily heal the wound which an example of its exercise had given. Durable suspicions might fasten on the wisdom or the integrity of the Government, which might occasion to it no inconsiderable loss and embarrassment, before a course of contrary experience would obliterate them.

The right of a Government to sequester or confiscate property, in its funds, in time of war, involves considerations analogous to those which regard the right of taxing them. Whether the foreigner be, himself, the original lender, or the proprietor of stock, in its constitution *transferable without discrimination*, he stands upon equal ground with the citizen. He has an equal claim upon the faith of the Government.

In the second case, as the substitute of the original lender, the promise made attaches immediately upon him. Indeed, the certificates which issue upon every transfer, and which may be called the public bonds, designate him as the creditor, and expressly invest him with the correspondent rights.

To sequester or confiscate the stock, is as effectually a breach of the contract to pay, as to absorb it by a tax. It is to annihilate the promise, under the sanction of which the foreigner became a proprietor.

But, does not the general right of war, to seize and confiscate enemy property, extend to the property of the citizens of one nation in the funds of another—the two nations being at war with each other?

Resorting to principle as the guide, this question may, on solid grounds, be answered in the negative.

The right to seize and confiscate individual property, in national wars, excludes all those cases where the individual derives his title from the enemy sovereign or nation: for the right to property always implies the right to be protected and secured in the enjoyment of that property; and a nation, by the very act of permitting the citizen of a foreign country to acquire property within its territory, whether to lands, funds, or to any other thing, tacitly engages to give protection and security to that property, and to allow him as full enjoyment of it as any other proprietor—an engagement which no state of things between the two nations can justly or reasonably affect. Though politically right, that, in wars between nations, the property of private persons, which depend on the *laws of their own country*, or on *circumstances foreign to the nation with which their own is at war*, should be subject to seizure and confiscation by the enemy nation; yet it is both politically and morally wrong, that this should extend to property acquired under the faith of the Government, and the laws of that enemy nation.

When the Government enters into a contract with the citizen of a foreign country, it considers him *as an individual in a state of nature, and contracts with him as such*. It does not contract with him as *the member of another society*.

The contracts, therefore, with him, cannot be affected by his political relations to that society. War, whatever right it may give over his other property, can give none over that which he derives from those contracts. The character in which they are made with him, the faith pledged to him personally, virtually exempt it.

This principle, which seems critically correct, would exempt as well the income as the capital of the property. It protects the use as effectually as the thing. What, in fact, is property, but a fiction, without the beneficial use of it? In many cases, indeed, the *income or annuity* is the property itself. And, though general usage may control the principle, it can only be as far as the usage clearly goes. It must not be extended by analogy.

Some of the most approved publicists, admitting the principle, qualify it with regard to the income of lands, which they say may be sequestered "to hinder the remittance of it to the enemy's country."

But the same authority affirms, that a State at war "does not so much *as touch* the sums which it owes to the enemy. *Every where*, in case of a war, funds credited to the public, are exempt from confiscation and *seizure*." These expressions clearly exclude sequestration as well as confiscation.

The former, no less than the latter, would be inconsistent with the declarations that a state at war does not *so much as touch* the sums which it owes to the enemy, and, that funds credited to the public are exempt from *seizure*. And, on full inquiry, it is believed that the suggestion, thus understood, is founded in fact.

Usage, then, however it may deviate in other particulars, in respect to public funds, concurs with principle in pronouncing, that they cannot rightfully be sequestered in time of war.

The usages of war, still savor too much of the ferocious maxims of the times, when war was the chief occupation of man. Enlightened reason would never have pronounced, that the persons or property of foreigners, found in a country at the breaking out of a war between that country and their own, were liable to any of the rigors which a state of war authorizes against the persons and goods of an enemy. It would have decreed to them, an inviolable sanctuary in the faith of those permissions and those laws, by which themselves and their property had come under the jurisdiction where they were found. It would have rejected the treachery of converting the indulgences, and even rights of a previous state of amity, into snares for innocent individuals.

Happily, however, the practice of latter times has left several of those maxims little more than points of obsolete doctrine. They still retain their rank in theory; but usage has introduced so many qualifications, as nearly to destroy their operation.

This appears from the acknowledgment of writers, from the barrenness of modern history in examples of the application of those doctrines, from the opinions known to be generally current in Europe, and from a variety of articles which are constant formulas in treaties of the present century.

The United States are every way interested in the mitigation of the rigor of the ancient maxims of war. They cannot better demonstrate their wisdom, than by their moderation in this respect. Particularly interested in maintaining, in their greatest purity and energy, the principles of credit, they cannot too strictly adhere to all the relaxations of those maxims which favor the rights of creditors. No temporary advantage can compensate for the evils of a different course of conduct.

Credit, public and private, is of the greatest consequence to every country. Of this, it might be emphatically called the invigorating principle. No well informed man can cast a retrospective eye over the progress of the United States, from their infancy to the present period, without being convinced that they owe, in a great degree, to the fostering influence of credit, their present mature growth. This credit has been of a mixed nature, mercantile and public, foreign and domestic. Credit abroad was the trunk of our mercantile credit, from which issued ramifications that nourished all the parts of domestic labor and industry. The bills of credit emitted, from time to time, by the different local governments, which passed current as money, co-operated with that resource. Their united force, quickening the energies and bringing into action the capacities for improvement of a new country, was highly instrumental in accelerating its growth.

Credit, too, animated and supported by the general zeal, had a great share in accomplishing, without such violent expedients, as, generating universal distress, would have endangered the issue, that Revolution, of which we are so justly proud, and to which we are so greatly indebted.

Credit, likewise, may, no doubt, claim a principal agency in that increase of national and individual welfare since the establishment of the present Government, which is so generally felt and acknowledged, though the true causes of it are not as generally understood. It is the constant auxiliary of almost every public operation; has been an indispensable one in those measures by which our frontiers have been defended; and it would not be difficult to demonstrate, that, in a recent and delicate instance, has materially contributed to the safety of the State.

There can be no time, no state of things, in which credit is not essential to a nation, especially as long as nations in general continue to use it as a resource in war. It is impossible for a country to contend, on equal terms, or to be secure, against the enterprises of other nations, without being able equally with them to avail itself of this important resource; and to a young country, with moderate pecuniary capital, and not a very various industry, it is still more necessary than to countries more advanced in both. A truth not less weighty for being obvious, and frequently noticed.

Public credit has been well defined to be, "a faculty to borrow, at pleasure, considerable sums on moderate terms; the art of distributing, over a succession of years, the extraordinary efforts, found indispensable in one; a mean of accelerating the prompt employment of all the abilities of a nation, and even of disposing of a part of the overplus of others."

This just and ingenious definition condenses to a point the principal arguments in favor of public credit, and displays its immense importance.

Let any man consult the actual course of our pecuniary operations, and let him then say whether credit be not eminently useful. Let him imagine the expense of a single campaign in a war with a great European Power; and let him then pronounce whether credit would not be indispensable. Let him decide whether it would be practicable, at all, to raise the necessary sum by taxes within the year, and let him judge what would be the degree of distress and oppression, which the attempt would occasion to the community. He cannot but conclude, that war, without credit, would be more than a great calamity—would be ruin.

But credit is not only one of the main pillars of the public safety; it is among the principal engines of useful enterprise and internal improvement. As a substitute for capital, it is little less useful than gold or silver, in agriculture, in commerce, in the manufacturing and mechanic arts.

The proof of this needs no labored deduction. It is matter of daily experience in the most familiar pursuits. One man wishes to take up and cultivate a piece of land; he purchases upon *credit*, and, in time, pays the purchase money out of the produce of the soil improved by his labor. Another sets up in trade; in the credit founded upon a fair character, he seeks, and often finds, the means of becoming, at length, a wealthy merchant. A third commences business as manufacturer or mechanic, with skill, but without money. It is by credit, that he is enabled to procure the tools, the materials, and even the subsistence of which he stands in need, until his industry has supplied him with capital; and, even then, he derives, from an established and increased credit, the means of extending his undertakings.

Among the circumstances which recommend credit, and indicate its importance in the whole system of internal exertion and amelioration, it is impossible to pass, unnoticed, its unquestionable tendency to moderate the rate of interest—a circumstance of infinite value in all the operations of labor and industry.

If the individual capital of this country has become more adequate to its exigencies than formerly, it is because individuals have found new resources in the public *credit*—in the funds to which that has given value and activity. Let public credit be prostrated, and the deficiency will be greater than before. Public and private credit are closely allied, if not inseparable. There is, perhaps, no example of the one being in a flourishing, where the other was in a bad, state. A shock to public credit, would, therefore, not only take away the additional means which it has furnished, but, by the derangements, disorders, distrusts, and false principles, which it would engender and disseminate, would diminish the antecedent resources of private credit.

The United States possess an immense mass of improveable matter; the development of it, continually making, may be said to enlarge the field of improvement as it progresses; and, though the active capital of the country has, no doubt, considerably increased, it is probable that it does not bear, at present, a much greater proportion to the objects of employment than it has done at any former period. Credit, upon this hypothesis, of every kind, is nearly as necessary to us now, as it ever was. But, at least, it may be affirmed, with absolute certainty, that, to a country so situated, credit is peculiarly useful and important.

If the United States observe, with delicate caution, the maxims of credit, as well towards foreigners as their own citizens, in connexion with the general principles of an upright, stable, and systematic administration, the strong attractions which they present to foreign capital will be likely to ensure them the command of as much as they may want, in addition to their own, for every species of internal amelioration.

Can it be doubted, that they would derive from this, in a course of time, advantages incomparably greater than any, however tempting, that could partially result from a disregard of those maxims, or from the exercise of a questionable right, which should even appear to derogate from them?

Credit is an *entire* thing. Every part of it has the nicest sympathy with every other part; wound one limb, and the whole tree shrinks and decays.

The security of each creditor is inseparable from the security of all creditors. The boundary between foreigner and citizen would not be deemed a sufficient barrier against extending the precedent of an invasion of the rights of the former to the latter. The most judicious and cautious would be most apt to reason thus, and would only look for stronger shades of apparent necessity or expediency to govern the extension. And, in affairs of credit, the opinion of the judicious and cautious may be expected to prevail. Hence the Government, by sequestering the property of foreign citizens in the public funds, at the commencement of a war, would impair, at least, if not destroy, that credit which is the best resource in war.

It is in vain to attempt to disparage credit, by objecting to its abuses. What is there not liable to abuse or misuse? The precious metals, those great springs of labor and industry, are also the ministers of extravagance, luxury, and corruption. Commerce, the nurse of agriculture and manufactures, if overdriven, leads to bankruptcy and distress. A fertile soil, the principal source of human comfort, not unfrequently begets indolence and effeminacy. Even liberty itself, degenerating into licentiousness, produces a frightful complication of ills, and works its own destruction.

It is wisdom, in every case, to cherish whatever is useful, and guard against its abuse. It will be the truest policy of the United States, to give all possible energy to public credit, by a firm adherence to its strictest maxims; and yet, to avoid the ills of an excessive employment of it, by true economy and system in the public expenditures; by

steadily cultivating peace; and by using sincere, efficient, and persevering endeavors to diminish present debts, prevent the accumulation of new, and secure the discharge, within a reasonable period, of such as it may be, at any time, matter of necessity to contract. It will be wise to cultivate and foster private credit, by an exemplary observance of the principles of public credit, and to guard against the misuse of the former, by a speedy and vigorous administration of justice, and by taking away every temptation to run in debt, founded in the hope of evading the just claims of creditors.

As an honorable evidence of this disposition, and with a view to quiet the alarms which have been excited, and to silence, forever, a question which can never be agitated without serious inconvenience, the Secretary of the Treasury, in the last place, respectfully submits:

That there be an express renunciation, by law, of all pretension of right to tax the public funds, or to sequester, at any time, or on any pretext, the property which foreign citizens may hold therein.

This will be particularly essential to the success of the plan for converting the foreign into domestic debt; as the present contracts for the Amsterdam and Antwerp debt contain an equivalent stipulation, and there is no prospect that the creditors would consent to a change, but upon the condition of a like stipulation.

In the commencement of this report, it was the intention to submit some propositions for the improvement of the several branches of the public revenue; but it is deemed advisable to reserve this part of the subject for a future communication.

All which is respectfully submitted.

ALEXANDER HAMILTON, *Secretary of the Treasury.*

A.

Statement of the Domestic Debt of the United States, on December 31st, 1794.

	Amount of principal of unfunded debt.	Six per cent. Stock.	Deferred Stock.	Three per cent. Stock.	Total amount.
Funded domestic debt, exclusive of balances due to creditor States, and the amount of said stock which had been purchased or redeemed on the last day of December, 1794,	- -	\$17,912,138 01	\$8,538,228 97	\$12,275,347 55	\$38,725,714 53
Funded domestic debt, to the credit of States, in pursuance of the act of Congress of May 31st, 1794,	- -	2,345,056 00	1,172,528 00	703,516 80	4,221,100 80
Funded domestic debt, purchased and redeemed to the last of December, 1794,	- -	668,700 38	752,190 64	415,415 66	1,836,306 68
Total of funded domestic debt,	- -	20,925,894 39	10,462,947 61	13,394,280 01	
Funded assumed debt, exclusive of what had been purchased or redeemed on the last day of December, 1794,	- -	7,908,374 19	3,940,608 96	5,994,115 70	17,843,098 85
Funded assumed debt, which had been purchased or redeemed on the last day of December, 1794,	- -	212,462 04	119,808 88	96,444 97	428,715 89
Total of funded assumed debt,	- -	8,120,836 23	4,060,417 84	6,090,560 67	
Total of funded domestic debt on the last day of December, 1794,	- -	29,046,730 62	14,523,365 45	19,484,840 68	63,054,936 75
Debt due to foreign officers, for the payment of which provision has been made, and which will pass to the credit of the Sinking Fund:					
Principal, being	186,988 23				
Interest from January 1, 1788, to December 31, 1790,	22,438 58				
Registered debt, on the books of the treasury, on which dividends have been made,		167,816 40	111,877 60	30,806 95	198,623 35
Do. on which no dividends have been made,		42,231 69	28,154 46	17,737 31	59,969 00
Do. on the books of loan officers,		4,394 85	2,929 90	1,464 95	6,434 20
Credit on the books of the treasury,		44,920 95	29,947 30	14,973 65	56,846 59
Loan office certificates, bearing interest on a capital of \$43,500, the specie value being no more than		27,935 00	18,623 34	9,311 66	36,765 00
Loan office certificates, bearing interest on the specie value,		305,859 51	203,906 34	101,953 17	360,914 22
Final settlement certificates, payable to bearer, of all kinds,		126,091 00	84,060 67	42,030 33	148,787 38
Indents of interest, of all kinds,		83,805 00	-	83,805 00	83,805 00
Unliquidated claims, as estimated,		381,269 00	254,179 34	127,089 66	610,030 40
Estimated amount of the domestic debt, at the close of 1794, and of the stock which will be produced when the whole debt has been funded,	\$1,184,323 40	\$29,967,397 80	\$14,890,204 90	\$19,967,936 00	\$64,825,538 70

COMPTROLLER'S OFFICE, January 9, 1795.

OLIVER WOLCOTT, Junr. Comptroller.

Amount of one year's interest on the Dutch and Antwerp loans,	1,435,250	574,100	00
Which, at 40 cents per guilder, is			
<i>Livres. s. d.</i> 12,188,040 12 2 balance due to the French Government, <i>a</i> 4.706 per cent. per annum, being an average of interest payable on the French loans when obtained, <i>livres.</i> 573,569 3 9			
Which, at 18.15 cents per livre, is		104,102	80
Amount of one year's interest on the foreign loans, as due on the 31st of December, 1794,		<u>\$678,102</u>	<u>80</u>

Statement of Interest payable on the Domestic Debt.

1st. Interest payable by the existing contracts on the debt as it stood on the last day of December, 1794:			
On six per cent. stock,	\$29,046,730	62	
On the original capital of the debt to foreign officers,	186,988	23	
			29,233,718 85, <i>a</i> 6 per ct. \$1,754,023 13
On three per cent. stock,	19,484,840	68	
On the interest of the capital due to foreign officers to Dec. 31, 1790,	22,438	58	
			19,507,279 26, <i>a</i> 3 per ct. 585,218 37
On the unfunded debt, per statement,	1,184,323	40	
From which deduct indents of interest which bear no interest,	83,805	00	
Unfunded debt bearing interest,			1,100,518 40, <i>a</i> 6 per ct. 66,031 10
Total of interest payable annually by the contract existing at the close of the year 1794,			<u>\$2,405,272</u> 60
2d. Interest payable after the year 1800, on the principles of the contract existing at the end of 1794:			
On the deferred stock existing at the end of 1794, being	14,523,365	45, <i>a</i> 6 per ct.	871,401 92
On the six per cent. stock, as stated above,	29,233,718	85, <i>a</i> 6 per ct.	1,754,023 13
On the three per cent. stock, as stated above,	19,507,279	26, <i>a</i> 3 per ct.	585,218 37
On the unfunded debt, as stated above,	1,100,518	40, <i>a</i> 6 per ct.	66,031 10
Total of interest which would be payable after the year 1800, on the whole domestic debt, on the principles of the existing contract, at the end of 1794,			<u>3,276,674</u> 52
3d. Interest which would be payable if the whole domestic debt was subscribed to the loan:			
On six per cent. stock,	29,967,397	80, <i>a</i> 6 per ct.	1,798,043 86
On three per cent. stock,	19,967,936	00, <i>a</i> 3 per ct.	599,038 08
Annual interest till the close of the year 1800,			2,397,081 94
Interest on deferred debt, which becomes six per cent. stock after the year 1800,	14,890,204	90, <i>a</i> 6 per ct.	893,412 29
Total interest which would be payable annually, after the year 1800, if the whole debt was subscribed,			<u>\$3,290,494</u> 23

E.

View of Sinking Fund, according to plan proposed in the Report.

Present annual amount of sinking fund, supposing the investment of the residue of the surplus of revenue to the end of 1790, and of the arrears of interest on the debt to foreign officers, in the purchase of six per cent. stock, at par, and exonerating the fund from the charge to which it is subject by the last section of the act making provision for the reduction of the public debt, viz:

Interest for a year on stock actually purchased and redeemed, to the last of December, 1794, and carried to the credit of the fund,	\$68,225	55
Interest for a year on the principal and arrears of interest, to the end of 1790, on the debt to foreign officers,	11,892	44
Interest for a year on subsequent arrears of interest, not included in the above,	1,547	05
Interest for a year on \$411,659 49, being the unexpended balance of surplus to the end of 1790,	24,699	56
	<u>\$106,364</u>	<u>60</u>
Interest for a year on the loan office certificates, bearing interest on the nominal principal which (those certificates being paid off as proposed) would accrue to this fund,	1,911	00
Add this sum, to be appropriated out of the revenue from imports and tonnage, for the redemption of stock, bearing a present interest of six per cent. according to the 5th proposition in the report,	408,134	64
The amount of two per cent. on \$25,820,512 20, being the amount of stock <i>unredeemed</i> , bearing a present interest of six per cent. exclusive of State balances,	\$516,410	24

Dividends on bank stock, deducting interest on such instalments of the loan of the bank as had not accrued in the year 1794,	\$62,500 00
Sum to be paid in addition thereto, on the 1st of January, 1796, out of the revenue from imports and tonnage, for reimbursement of the 4th instalment of the above loan,	137,500 00
Amount of annual instalments of \$2,000,000, had of the Bank of the United States, pursuant to the 11th section of the act of incorporation,	<u>\$200,000 00</u>

The surplus of the dividends on bank stock will increase each year \$12,000; the interest, liberated by payment of each annual instalment of principal, and the sum to be paid out of the revenue, will annually decrease in the same ratio.

It will be, after the first year—

On the 1st of January, 1797,	\$125,500
On the 1st of January, 1798,	113,500
On the 1st of January, 1799,	101,500
On the 1st of January, 1800,	89,500
On the 1st of January, 1801,	77,500
On the 1st of January, 1802,	65,500

The yearly average of the sums successively payable out of the revenue from imports and tonnage, towards reimbursing the two million loan, will be	\$101,500 00
And the whole loan being discharged on the 1st of January, 1803, the annual dividend on bank stock will be liberated from the future payment of interest on the loan, and will thenceforth yield to the <i>sinking fund</i> an annuity liable to the redemption of the deferred stock,	152,500 00
Two per centum of \$12,478,837 93, the amount of <i>unredeemed</i> stock which, on the 1st of January, 1801, will bear interest at six per centum per annum, exclusive of State balances, and which will be payable on the 1st of January, 1802, is	249,576 75
Yearly interest, which, on the 1st of January, 1801, will begin to accrue to the <i>sinking fund</i> , in the deferred stock standing to its credit, is \$52,319 97. Further sum necessary for payment of the above two per centum,	197,256 78
	<u>\$249,576 75</u>

This sum of \$197,256 78 will, in the years 1802, 1803, be payable out of the revenues from imports and tonnage.	
But the yearly dividends on bank stock, free from charge after the 1st of January, 1803, being	\$152,500 00
The sum thenceforth payable out of the revenues from imports and tonnage, for payment of said two per centum, will be	44,756 78
Which, together with the yearly interest on deferred stock, being	52,319 97
Is equal to the amount of redeeming annuity of deferred stock, being	<u>\$249,576 75</u>

Hence the permanent appropriations out of the revenue from imports and tonnage, for the redemption of the whole of the *unredeemed* funded stock, which now bears, and hereafter will bear, an interest of six per centum per annum, exclusive of the stock standing to the credit of certain States, pursuant to the report of the commissioners, is,

For that bearing a present interest,	\$408,134 64
For that bearing a future interest,	44,756 78

Total annual extra appropriation to sinking fund, out of the revenues, exclusive of bank dividends,	<u>\$452,891 42</u>
The whole of the stock bearing a present rate of interest, will, by this fund, be redeemed in something less than twenty-three years, and the interest then set free (to wit) in the year 1818, will be	\$1,631,259 72
To which add the further appropriation towards principal, as above,	408,134 64
	<u>\$2,039,394 36</u>

This annuity, applied to payments or purchases of the foreign debt, on a calculation of five per cent. interest, would, by the 1st of January, 1824, extinguish that debt, and yield a surplus of	\$122,502 29
The whole of the stock bearing a future interest of six per cent. will, by the fund to be applied to it as above, be also redeemed in something less than twenty-three years from the time of commencing the redemption, that is, by the year 1824, and the interest then set free on that stock, will be	\$801,050 24
The sum appropriated towards the redemption then also set free, is	197,256 78
To which, add the sum liberated by the redemption of the present six per cent. stock,	2,039,394 36
And the interest on \$13,745,379 35, being the amount of the foreign debt extinguished as above,	638,480 58

There will, therefore, be an annuity of

Thus will the whole of the foreign debt be extinguished by the year 1824, and the sinking fund will then possess an annuity of	\$3,676,181 96
And a sum, in gross, of	122,502 29
Together,	<u>\$3,798,684 25</u>

Which, in two years, would more than pay off the whole of the balances to creditor States, and the whole of the unfunded debt, if not sooner discharged.

So that, supposing the proceeds of the Western lands to be sufficient, by the same time, to redeem the three per cent. stock, the whole of the present debt of the United States, foreign and domestic, funded and unfunded, may be redeemed by the operation of the provision proposed by the fifth proposition, by the year 1826; and there would revert to the United States a yearly revenue of \$4,435,320 89.

ALEXANDER HAMILTON.

TREASURY DEPARTMENT, *January 17th, 1795.*

NOTE.—The calculations in this statement would require, to assure their perfect accuracy, a revision; but it is certain, that any errors it may contain, will be too inconsiderable to affect any important result.

F.

Comparative view of annual current Revenue and Expenditure.

		Permanent revenue.	
CURRENT REVENUE.			
Nett duties on imports and tonnage, as ascertained 1793, per account of receipts and expenditures for that year,	\$6,087,546 26		
Add product of additional duties on imports laid by the acts of the 5th and 7th of June, 1794, computed on the importations of 1793,	1,091,872 32		
		\$7,179,418 58	
Deduct for extra drawbacks, which would become payable after the year 1793, in consequence of extra importations of certain articles in that year, which were re-exported,	1,500,000		
Deduct amount of temporary duties on imports,	1,479,626 91		
		2,979,626 91	
Permanent duties on imports and tonnage,	-	4,199,791 67	
Duties on spirits distilled within the United States, and upon stills,	-	400,000	
Nett duties on postage of letters, as ascertained in 1793,	-	29,722 16	
Patent fees, as they accrued in the same year,	-	660	
Dividends of bank stock beyond the interest payable to bank in 1793,	38,500		
Add interest of two instalments, which, being paid off, will increase the dividend,	24,000		
		62,500	
Total permanent revenue,			\$4,692,673 83
		Temporary revenue.	
Duties on imports, as stated above,	-	\$1,479,626 91	
Estimated product of duties on snuff manufactured, and sugar refined within the United States, carriages for the conveyance of persons, licences for selling wines and spirits at retail, sales at auction,	-	380,000	
Total temporary revenue,			1,859,626 91
Total annual current revenue,			\$6,552,300 74
CURRENT EXPENDITURE.			
Interest on foreign debt as stated,	\$678,102 80		
Deduct interest on instalments of foreign debt for 1795, to be paid out of the proceeds of foreign loans	39,622 22

			\$6,552,300 74

ALEXANDER HAMILTON, *Secretary of the Treasury.*TREASURY DEPARTMENT, *January 17th, 1795.*

SUPPLEMENT TO STATEMENT F.

View of the probable produce of the additional duties on imports laid by the act of June 7th, 1794.

Articles on which duties are laid by the act of June 7th, 1794.	Amount imported in 1792.	Amount imported in 1793.	Rates.	Amount of duties calculated on importation of the two years.	
				1792.	1793.
Coffee, pounds,	8,566,441	34,458,178	At 1 cent,	\$85,664 41	\$344,581 78
Cocoa, "	520,169	1,455,408	At 2 cents,	10,403 38	29,108 16
Refined sugar, "	225,680	400,000	At 5 cents,	11,284 00	20,000 00
Clayed sugar, "	91,237	3,739,775	At 1 cent,	912 37	37,397 75
Miscellany, being smaller enumerated articles,			Various,	31,424 18	31,424 18
Articles to which 5 per cent. is added, value,	\$4,832,118 51	\$4,832,118 51	5 per cent.	241,605 92	241,605 92
Articles to which 2½ per cent. is added, value,	15,510,183 81	15,510,183 81	2½ per cent.	387,754 59	387,754 59
				\$769,048 85	\$1,091,872 32

Difference between 1792 and 1793, is \$322,833 47, which may be justly considered as an extra importation, depending on peculiar and known circumstances of the war in Europe, and which, in all probability, will be wholly drawn back on exportation.

The proceeds of these duties may therefore be thus stated:

Amount computed on the importation of 1792,	\$769,048 85
Deduct for usual drawbacks on exportation and expenses of collection, 10 per cent.	76,904 88
Probable nett annual product of additional duties,	<u>\$692,143 97</u>

It is to be observed, however, that the considerable additions made upon the miscellaneous articles, and upon refined sugar, will probably have prohibitory effect, and that the items relative to them cannot be much counted upon.

A. H.

Result, in the year 1796, according to fifth proposition.

Surplus of revenue brought forward,	-	\$1,070,456 90
Increased interest on foreign debt,	\$67,291 89	
Interest on new emission,	4,528 70	
Ten per cent. of arrears of unfunded interest, including indents,	48,309 53	
Yearly instalment on account of \$1,000,000 loan for foreign intercourse,	200,000 00	
<i>Appropriations for Sinking Fund, viz.</i>		
Dividends of bank stock,	\$62,500 00	
Sum payable out of imports and tonnage for redemption of six per cent. stock,	408,134 64	
Sum payable on the 1st of January, 1796, towards reimbursing of bank loan,	137,500 00	
	608,134 64	928,264 76
Balance, being excess of revenue beyond expenditure,	-	<u>\$142,192 14</u>

It appears by statement E, that these extra appropriations will, in the progress of the operation, be reduced; and that, including a provision for the redemption of the deferred debt, the permanent charge on the revenue (exclusive of bank dividends) for the sinking fund, will be no more than \$452,891 42.

A. H.

ACCOUNTS AND BALANCES UNDER THE LATE GOVERNMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 26, 1795.

Mr. HEATH, from the Committee appointed to inquire and report what progress has been made in the settlement of the accounts of the former Government; what are the unpaid balances on the settled accounts, together with the measures taken for recovering payment of the same; whether any, and what, steps have been taken to compel persons to whom public money was entrusted, to settle their accounts; and whether any further measures are necessary on that subject, made the following report:

That, on the most diligent inquiry into, and information from, the Treasury Department, they find that the statements required must be lengthy, and that no precise time can be fixed when they can be completed. Two clerks of the Comptroller's office are wholly occupied in the work, under directions to prosecute the business with the closest attention and assiduity; and the committee are assured that the statements will be completed during the present session of Congress.

Your committee are of opinion, that a statement of the old accounts, by means of a general institution of suits at law, would be found impracticable; and the attempt would certainly subject the United States to great loss and expense; it therefore appears to your committee, that it has not been the practice of the treasury to institute suits, except in cases where a balance appeared to be clearly due to the public, or where special circumstances seemed to render this course expedient; which but in few instances have been exercised.

Your committee, therefore, conceive that great difficulties, in the progress of their settlement, might be obviated, if a more adequate provision by law, than the present, could be made; wherefore, the committee submit the following resolutions to the consideration of the House of Representatives:

1st. *Resolved*, That further and more adequate provision should be made by law, for the recovery of debts due from individuals to the United States.

2d. *Resolved*, That the Comptroller of the Treasury be authorized to issue a notification to any person who has received moneys for which he is accountable to the United States, or to the executor or administrator of such person, if he be deceased, requiring him to render to the Auditor of the Treasury, in a reasonable time, not less than ——— nor more than ——— months, all his accounts and vouchers, for the expenditure of the said moneys, comprehending a schedule of all claims of credit; or, in default thereof, to be barred of rendering the said accounts, and to remain charged with the moneys so advanced, as an absolute debt, to be collected by process in the district courts, and no appeal to be allowed.

3d. *Resolved*, That the marshals of the respective districts be authorized to serve the said notifications on the parties therein named, by leaving copies thereof at their respective dwellings, or usual places of abode; and that the return of the notifications to the Comptroller's office, with the marshal's certificate thereon, that service has been made, be deemed legal evidences, in the district courts, of the proceedings, and of the bar to credits before proposed, in case no accounts are rendered.

4th. *Resolved*, That, in cases where accounts shall be rendered to the Auditor of the Treasury, within the time limited in the notifications to the Auditor, he shall immediately proceed to liquidate the credits to be passed for the said accounts, and report the same to the Comptroller, with a particular list of any claims for credit which shall have been disallowed by him.

5th. *Resolved*, That the Comptroller of the Treasury immediately proceed to the examination of the credits allowed by the Auditor, and if the same be approved by him, that he cause credit therefor to be passed on the public books.

6th. *Resolved*, That a list of such credits as shall have been claimed and not admitted by the Comptroller, be made out and transmitted to the marshal of the district where the claimant resides, and that a copy thereof be left at the dwelling or last usual place of abode of such claimant, with notice of the time assigned by the Comptroller for the final hearing of the account; of which proceedings the marshal to transmit an official return to the Comptroller.

7th. *Resolved*, In case of an omission or neglect, on the part of the claimant, to assign reasons, in writing, to the Comptroller, within the time limited, why the suspended credits should be admitted, all future claims therefor to be barred.

8th. *Resolved*, In case the claimant appear, and assign in writing his reasons why the suspended credits should be admitted, the Comptroller to be directed to consider the same, and decide thereon, according to principles of equity, and the usages of the Treasury Department.

9th. *Resolved*, In cases where the decision of the Comptroller shall be against the claimant, he to be allowed a trial at law, in the district court of the district where he resides; to be confined, however, solely to an inquiry respecting the particular articles and questions which shall have been previously stated, and considered by the Comptroller; and no appeal to be allowed from the district Judge.

10th. *Resolved*, In cases where the final decision of the Comptroller shall have been against the claimant, and where he shall have voluntarily, within ——— months, submitted his claim to the equitable decision of the Secretary of State, the Secretary of the Treasury, and the Attorney General, in preference to a decision at law, the said officers to be vested with authority to hear the claimant, and pronounce an award, which shall be final and conclusive to all concerned; and which award, so pronounced, shall have the force of a judgment, and may be collected in a summary way.

IMPROVEMENT OF THE REVENUE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 2, 1795.

The Secretary of the Treasury respectfully makes the following report to the House of Representatives:

According to the present laws, imposing duties on articles imported into the United States, not much short of one-third of the whole amount of the duties is derived from articles rated *ad valorem*.

In other nations, where this branch of revenue, as with us, is of principal or very considerable consequence, and where no peculiarity of situation has tended to keep the rates of duty low, experience has led to contract more and more the number of articles rated *ad valorem*, and of course to extend the number of those rated specifically, that is, according to weight, measure, or other rule of quantity.

The reason of this is obvious. It is to guard against evasions which infallibly happen, in a greater or less degree, where duties are high. It is impossible for the merchants of any country to have manifested more probity than those of the United States, on this subject; and it is firmly believed, that there never was one in which illicit practices, to the disadvantage of the revenue, have obtained so little as hitherto in this; yet, it would be a delusive expectation, that, with duties so considerable as those which now exist, a disposition will not be experienced, in some individuals who carry on our import trade, to evade the payment of them, and this to an extent sufficient to make it prudent to guard with circumspection, and by every reasonable precaution, against the success of such attempts. It is needless to repeat, that this will contribute as much to the interest of the fair trader, as to that of the revenue.

It is believed that, in our system, the method of rating *ad valorem* could, with convenience, be brought within a much narrower compass; and it is evident that, to do so, will contribute materially to the security of the revenue.

The Secretary has not hitherto had leisure to digest the details of a plan for this purpose; but, if the idea is approved, it can be carried with due accuracy into effect, at a future session, by an order upon the head of this Department to prepare, in the mean time, a tariff proportioned to the actual rates of duty.

It may also be found expedient, with a similar view, to adjust anew the proportional rates of duty, of different kinds or qualities, of certain articles. This observation is believed to apply, with particular force, to teas. It would be, in the opinion of the Secretary, advisable to throw them into three classes; to raise somewhat the lowest rate, and to diminish considerably the higher rates. A persuasion is entertained, founded partly upon observation of the course of importations, that a regulation of this kind would benefit the revenue. The same thing might be conveniently extended to some other articles.

Advantages will also accrue from a re-adjustment of the rates, in certain cases, by combining several rates on the same articles, established by different acts, into one rate, and by dismissing inconvenient fractions, which serve to perplex the calculation of the duties. Some alteration in the terms of credit for duties may, it is conceived, be made with advantage. Where four months are allowed, three and six months may be substituted; and three, six, nine, and twelve, or even three, six, nine, twelve, and fifteen, to the cases of six, nine, and twelve months. This will apportion the course of receipts more according to the course of payments, and prevent inconvenient pressures at particular junctures.

The compensations to inspectors, especially in the ports where the expense of living is great, and to collectors and surveyors in the less productive ports, urgently demand revision, in order to an increase of them.

The security of the revenue, in every branch, turns (it will not be too strong to say) principally upon the officers of the lowest grade. Hence, it is a policy no less mistaken than common, to leave those officers without such compensations as will admit of a proper selection of character, and prevent the temptation, from indigence, to abuse the trust. It is certain that, in many places, the present allowance to inspectors, on the most liberal application of it, is inadequate to those important ends.

A similar reasoning will apply to those officers of the principal grades, who, being in districts which produce little, are ill compensated by the emoluments to which they are at present entitled. It cannot escape, that the safety of the revenue must depend on equal fidelity and due vigilance in all the districts; else it may become, in many cases, worth the while to resort to particular districts, because there is a deficiency of the one or the other. Besides, that it is in itself just and proper, that all who are in the public service should receive adequate rewards for their time, attention, and trouble.

The aggregate expense of collecting the duties on impost and tonnage, is at present truly moderate—a circumstance which facilitates the extension of allowances where they are necessary. The system of the revenue cutters needs revision. The utility of every institution depends on the competency of the agents who are to execute it. The present compensations to officers and men, compared with what may be obtained in other similar employment, unaided by collateral motives, creates a degree of embarrassment which very much impairs the usefulness of the thing. It would have been, in the judgment of the Secretary, a great mean of rendering it competent to its object, if, as was early suggested by him, the officers of the customs had had rank in the navy of the United States.

With regard to that branch of revenue which is constituted by the duties upon spirits distilled within the United States, and upon stills, it is believed that it would be an improvement, and one which could be now made without inconvenience, to abolish the option to pay by the gallon, of the spirits distilled, in the cases where the duties are charged on the stills. This will leave the alternative of paying by the year, or for less periods, upon licences, at the choice of the party; an alternative which affords sufficient accommodation to the difference of circumstances. The option to pay by the gallon, of the spirits distilled, according to an account to be rendered on the oath of the party, though expedient in the first experiment of the law, is objectionable, as a permanent regulation, in a double view.

The additional discretionary latitude given to compensations to the officers concerned in the collection of those duties, is restricted to a term which will expire at the end of the next session of Congress. It will be essential to extend it, or to fix the compensations which shall have been allowed. It is believed that further experience will still be useful towards a definitive legislative adjustment.

Embarrassments are experienced from the want of a concurrent authority in these officers, similar to that of the officers of the customs, to make seizures within each other's surveys or divisions. On the borders of such as are adjacent, the officers are exposed to hazard in making seizures, and better opportunities are afforded of escaping detection.

The revenue to result from the act of the last session, laying duties upon licences to retailers of wines and distilled spirits, may be improved, favorably to proportional equality, by changing the form.

One licence, for selling one or more kinds of wines, puts the greatest and the smallest dealer upon the same footing, and is so far inequitable. To class wines into a few obvious and strongly marked discriminations, and to render a licence necessary for each class, with a duty upon each licence, would favor a just distribution of the tax among great and small dealers, and would, at the same time, benefit the revenue. The classes may be as follow: 1st. Madeira wine. 2d. Sherry wine. 3d. Port wine. 4th. Other wines.

To secure the effect of the discrimination in favor of small dealers, who may be in the practice of selling and sending out different kinds of wines in small quantities, it may be provided that not more than one licence shall be necessary to any dealer, who never sells or sends out at one time more than three gallons. And suitable penalties may be annexed to guard the condition of the exemption.

Similar observations are applicable to licences to retailers of spirituous liquors. These may be thrown into three classes: 1st. Spirits distilled from the grape, commonly called brandy. 2d. Spirits distilled from the produce of the sugar cane, commonly called rum. 3d. Other distilled spirits: and there may be a like provision in favor of dealers who never sell or send out more than three gallons at one time.

Distillers may be put, in this respect, as to the spirits they distil, upon the same footing with importers; that is, they may be exempt from the licence duty; but it would seem proper to annex these conditions to the exemption, that they shall not sell and send out a less quantity, in one cask, vessel, or package, than ten gallons; and that they shall not deal in the selling at retail of any other spirits than those they themselves distil.

Or another rule may be adopted, for proportioning the tax to the extent of the dealing; which is, to add to the present rate of the licence certain supplemental rates, according to the yearly rent or yearly value, by appraisement of the house or building in which the retailers of wines or spirituous liquors shall carry on the business.

This has been found, in practice, a convenient, and, upon the whole, an equitable rule of proportion; evidently more so than one licence with the same duty to all dealers indiscriminately.

It is a general and a wise national policy, to make these articles of wine and spirits as contributory to the revenue as they can be made; which can only be effected by subdividing the duties upon them in the different stages of their passage to the consumer. The branch under consideration might be an important one. As it is now regulated, it is feared that it may prove of inconsiderable consequence. The confining of the licences for selling spirituous liquors to foreign spirits, must give great facility to evasions. And it has an unequal operation upon different portions of the community.

It would promote the object of the act, which imposes duties on sales at auction, to allow two and a half per centum to each auctioneer, in lieu of the one per centum allowed by the ninth section of that act. It is believed that the present allowance is insufficient to defray the expense of clerkship incident to a compliance with the requisitions of the law, which cannot be rendered less particular or exact without prejudice to the revenue.

The tax upon snuff, according to a rate per pound, will be liable to very great evasions, without regulations for a close inspection of the course of the business. Dispensing with these, it seems advisable to modify the tax upon a different plan. The proposition to lay it upon the mortar is as good a substitute as has occurred. It appears, upon evidence which is credited, that a snuff mill usually works about one half the year; that is, one hundred and fifty-six working days in a year; and yields, per mortar, of the whole number of mortars contained in a mill, an average of forty-five pounds of snuff per day. It follows, that five hundred and sixty-one dollars and sixty-six cents per mortar, per annum, is the equivalent of the present duty of eight cents per pound. There are objections to this form of the tax; but, as it appears to be generally desired by the manufacturers, it seems advisable to forego them; especially as the present plan demands far more rigorous precautions for the effectual collection of the duty than now exist, or than would be deemed expedient.

A similar difficulty attends the tax upon refined sugar; but a proper substitute for the present plan is not perceived. It will fortify the revenue, and produce no undue inconvenience to the manufacturer, if he be required to annex a ticket or tickets to each loaf of sugar, specifying the weight in pounds; and to each cask, barrel, keg, box, or other package of refined sugar, specifying the contents and weight in pounds, corresponding certificates or tickets to accompany imported refined sugar. The kinds of tickets to be furnished by the respective supervisors, and accounted for to them. The observance of this regulation to be secured by proper penalties.

The act which lays a duty on carriages for the conveyance of persons, exempts from the duty carriages *usually* and *chiefly* employed in husbandry, and in carrying commodities. It is a material defect in this act, as has been already experienced, that it provides no summary mode for determining what carriages are within the exempting description. Now, every disputed case must be the subject of a suit in all the legal forms; which is equally objectionable on the score of delay and expense. It is not perceived, that any insurmountable difficulty lies in the way of providing a remedy consistently with a due reference, in the last resort, to the judiciary authority.

In revenue laws, too much is as great a fault as too little simplicity. It leaves them unprovisional; incapable of execution in a manner convenient either to the public or to individuals. The acts imposing duties on licences for selling wines and spirituous liquors at retail, and upon sales at auction, authorize allowances not exceeding two and a half per cent. for compensation to officers, and for incidental expenses. The acts laying duties upon carriages for the conveyance of persons, and upon snuff and refined sugar, make no provision for such compensations, or other expenses of collection. It is the opinion of the Secretary that the rate of two and a half per cent., in the two first mentioned acts, is inadequate—that it ought to be extended to five per cent., and that an equal provision should be made for the expense of collection, under the two last mentioned acts.

The restrictions upon officers of the customs, and upon the supervisors and other officers of inspection, with regard to the public funds, appear to the Secretary unnecessary and inconvenient: unnecessary, because those officers, having no concern whatever with any branch of public business that respects the management of the funds, can have no official influence upon the policy or execution of the measures which regard them, further than by a punctual collection of the revenues; inconvenient, because it deprives them of a mean of investing any little sums they may save or acquire, in a mode very convenient to men who, from situation, are less liable to avail themselves of other opportunities. If the being stock-holders can have any influence upon them as officers, it must be of a kind favorable to the public service, by increasing their personal interest in the exact collection of the revenue. If the idea which dictated the restrictions was, that they might use the public money in speculations in stock, the answer is, that this is not in their power, from the rapidity with which it is transferred to the treasury; and if it were practicable for them to divert the public money, and a disposition to do it should, in any case, exist, it might operate through other channels. In lieu of the restrictions concerning the funds, the employment of public money for private purposes, may, if thought necessary, be still further guarded against by penalties. Those restrictions in reference to the immediate officers of the Treasury Department, and the Commissioners of Loans, are entirely proper, and ought to be maintained; but it is believed, that it is not only useless, but injurious, to give them greater extension. The multiplication of restrictions on the public officers will render greater compensations necessary, and be a source of expense to the public.

All which is respectfully submitted.

TREASURY DEPARTMENT, *Jan. 31, 1795.*

ALEXANDER HAMILTON,
Secretary of the Treasury.

NOTE. Since the conclusion of this report, the Secretary has learnt that a bill (the progress of which his peculiar situation had prevented his observing) has actually passed the two Houses, for changing the terms of six, nine, and twelve months, into eight, ten, and twelve. This bill, besides interfering disadvantageously with arrangements of the treasury, founded upon the existing provisions of the laws, will, it is apprehended, tend to increase an inconvenience which the above suggestions were meant to lessen—the too great concentration of mercantile payments. Any accidental derangement of the mercantile body, from overtrading, or other cause, would, in this situation, endanger consequences to the treasury, which it might be difficult to meet by other expedients; whereas, a subdivision into shorter and more numerous periods, by diminishing the effect, would admit, in such cases, of an easy substitute. The merchants themselves are particularly interested in this question: for the re-action upon them, of any embarrassment of the treasury, might render that a general and lasting mischief, which might otherwise have been only a partial and transient disorder.

No. 78.

[2d SESSION.]

LOAN.

COMMUNICATED TO CONGRESS, FEBRUARY 4, 1795.

*Gentlemen of the Senate
and of the House of Representatives:*

I lay before Congress for their consideration, a letter from the Secretary of State, upon the subject of a loan, which is extremely interesting and urgent.

GEO. WASHINGTON.

DEPARTMENT OF STATE, *February 4, 1795.*

SIR:

I do myself the honor of submitting to your consideration, a letter from the late Secretary of the Treasury, on the subject of an act passed on the twentieth of March last, appropriating to our intercourse with foreign nations, an additional million of dollars. He refers to a report, in which he has brought into view the necessity of some further provision, and transmits an extract of a letter from our commissioners at Amsterdam, conveying the painful intelligence that reliance cannot be had on the success of the measures, heretofore taken, for procuring the loan there. Although all the necessary powers and instructions have been given for carrying into execution the principal object of that law, I am apprehensive that the business will be stagnated, unless the most prompt expedients should be adopted. Congress are the sole authority which can remove the difficulties; and I therefore take the liberty of suggesting the propriety of laying the matter before them.

I have the honor to be, sir, with the highest respect, your most obedient servant,

EDM. RANDOLPH.

The PRESIDENT of the *United States.*

TREASURY DEPARTMENT, *January 25, 1795.*

SIR:

I have received your letter of the fifth instant. You will find by the enclosed extract of a letter from our commissioners at Amsterdam, that reliance cannot be had on the success of the measure taken for procuring the loan at Amsterdam.

It is more than possible that subsequent events may have enhanced the difficulty.

New expedients must be adopted; but, in order to these, it is conceived to be very material that further provision should be made by law. There is no express appropriation for reimbursing the loan, which may be made, and the specific fund pledged for the interest is of very temporary duration; which may not only render the obtaining of a loan for the entire sum, difficult, but may expose the public credit, if one should be made.

These circumstances have, in a late report, been brought into the view of Congress.

It is hoped a further provision will be speedily made.

With great respect, I have the honor to be, sir, your obedient servant,

ALEXANDER HAMILTON.

The Secretary of State.

Extract of a letter from Wilhem and Jan Willink, N. & J. Van Staphorst, and Hubbard, 26th September, 1794.

SIR:

"Since our last respects of 1st instant, we have received your very esteemed favor of 7th July, enclosing the necessary powers, in good order, and your directions to us, to make a loan on behalf of the United States, for two millions of guilders, on the application of Mr. Humphreys for that object.

"Our zeal is always devoted to the interest of the United States, and does not stand in need of quickening, when it is possible to execute the orders you give us, of which the circumstances of the last loan are an undeniable proof. Seeing, then, how desirous you are to have money ready to consolidate the treaty your minister at the Court of Portugal is authorized to conclude with Algiers, you cannot doubt our readiness to meet and fulfil your wishes on that head, in so far as circumstances will admit.

"But, sir, the situation of this country is such, at present, that it is impossible, at this moment, to foresee when the period will arrive, that we may be able to negotiate another loan for the United States; and the same cause will prevent the success of any temporary arrangement to supply the money, until the loan can be completed; indeed, such would, in all times, be extremely difficult, if not impracticable, for sums of that amount.

"As the avails of a loan that has been undertaken, come in but by instalments, permit us to suggest to you, that the only probable means of having moneys here, to make good the object you wish to provide for, is to direct us to open a loan for the purpose, whenever circumstances will allow our doing it with success. This, we allow, is subjecting the United States to a certain expense for a matter that is entirely contingent, and may not at all occur; but, at same time, it ought to be considered, that the distance between our two countries, and the nature of the loan business, renders the assumption of risks of this sort, sometimes, inevitable; and that, at all events, the proceeds of such a loan might be applied to the payments of the large amounts of interest, and reimbursements of the loans of the United States, successively to be made in Amsterdam."

To ALEXANDER HAMILTON, *Secretary of the Treasury.*

3d CONGRESS.]

No. 79.

[2d SESSION.]

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 9, 1795.

Mr. GOODHUE, from the Committee to whom were referred the memorials of sundry manufacturers in Boston, Newport, and Providence, praying for a drawback of the duties on imported hemp, when made into cordage and exported, made the following report:

That, in order to give a further encouragement to the manufacture of hemp, the petitioners pray that Congress would either discontinue the allowance of a drawback of the duty on foreign cordage, upon its exportation, or allow a drawback upon the exportation of home-made cordage, equal to the duty imposed on hemp.

The committee, in considering the subject, are of opinion, that the duty of 180 cents per hundred, imposed on foreign cordage, must, in its operation, almost entirely exclude the use of foreign made cordage in the United States, and that nothing farther is necessary to secure to our manufactures an employment equal to that extent. That, if no drawback was allowed on the exportation of foreign cordage, it would be contravening the general principles of our revenue laws, and the effect would be, an annihilation of the importation, as well as exportation of that article; and it is extremely doubtful, if the high price of labor in the United States is not such at present, and probably may continue so for some time, as to prevent (even if there was no duty on hemp) the manufacture of cordage at so cheap a rate, in this country, as to enable us, from that source, to furnish foreign markets.

An allowance of a drawback of the duty on hemp, upon the exportation of home-made cordage, is unquestionably, in itself, simply considered, perfectly reasonable; but the difficulties that would attend such a measure, in distinguishing cordage made of foreign hemp, from that made of hemp the growth of the United States, and the little effect it would have, in case it was adopted, of extending the manufacture (while labor continues so high in this country) to a degree of cheapness, that would enable its being sent to foreign markets on equal terms with cordage of other countries, have induced the committee, although impressed with the general policy of promoting the manufactures of the United States, to be unanimously of opinion, in relation to the manufacture of hemp, that, under the existing circumstances, it would be unwise for Congress to take any measures upon the subject of the petitions.

3d CONGRESS.]

No. 80.

[2d SESSION.]

LOAN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 9, 1795.

Mr. SEDGWICK, from the Committee to whom was referred the message from the President of the United States, of the 4th instant, enclosing a letter from the Secretary of State, relative to a loan for the maintenance of the intercourse of the United States with foreign nations, made the following report:

That, to carry into effect the benevolent intention of the Legislature, in authorizing the loan of one million of dollars, by an act of the last session of Congress, for purposes of foreign intercourse, eight hundred thousand dollars may be required, which is the whole of what now remains unapplied thereof.

That there is, in the opinion of the Secretary of State, reason to believe that the suffering citizens of America, now prisoners in Algiers, might be released from slavery, and the commerce of the United States securely extended, by a seasonable application of the last mentioned sum.

The committee, anxious to effectuate objects so interesting to humanity, and so important to the public welfare, would have been happy to have any means of accomplishing those desirable ends without having recourse to the disagreeable expedient of loans; but, after having made the necessary inquiries, they are convinced that there is not, at present, any money which can be diverted to those purposes, from current and indispensably necessary demands. As, then, recourse must be had to loans, the committee are of opinion that adequate measures ought to be adopted for their speedy and effectual reimbursement; they, therefore, submit the following resolutions:

Resolved, That adequate provision ought to be made, by law, for re-imbursing, before the year ———, any loan which may, hereafter, be made under the authority of the President of the United States, in virtue of an act of the last session of Congress, entitled "An act making further provision for the expenses attending the intercourse of the United States with foreign nations, and further to continue in force the act, entitled 'An act providing the means of intercourse between the United States and foreign nations.'"

Resolved, That, for the purpose mentioned in the foregoing resolution, the proceeds of the duties upon carriages, for the conveyance of persons; on licences for selling wines and foreign distilled spirituous liquors, by retail; on snuff and refined sugar; and on property sold at auction; imposed by acts passed at the last session of Congress, and which may be further continued the present session, and which are not already appropriated, ought to be appropriated for the reimbursement, before the year ———, of any loans which may be, hereafter, made in virtue of the act aforesaid, and that the faith of the Government *ought* to be pledged to make good any deficiency.

3d CONGRESS.]

No. 81.

[2d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 9, 1795.

Mr. BOUDINOT, from the Committee appointed to examine and report on the state of the mint, and what further measures are necessary to render the institution more beneficial, made the following report:

That, having attended at the several departments of the mint, and carefully examined into the present state of the institution, the committee beg leave to make a statement of the effect of their inquiries, under the following heads:

- 1st. The officers of the institution, and their actual duties.
- 2d. The present state and progress of the works.
- 3d. The expense attending the institution to this time.
- 4th. The improvements yet necessary to render the institution beneficial to the United States.
- 5th. The stock now on hand.
- 6th. The quantity of coin that may be produced when the works are complete.
- 7th. The keeping of the accounts, with the checks necessary to prevent speculation.

1st. *As to the Officers of the Mint, and their actual duties.*

The DIRECTOR, whose duties, besides those contained in the act instituting the mint, are the general superintendance of the whole business, in all its various departments, the making or approving of all contracts and purchases, relative to the institution, determining on the expediency of all improvements, buildings, machines, and whatever may be thought necessary for promoting the utility of the mint, and lastly, to inspect all receipts and issues of the mint, with the accounts of the expenditure, and to draw warrants for the same.

The ASSAYER. He assays all metals brought to the mint, and reports their respective qualities to the treasurer, for his direction. He attends and inspects the melter and refiner, and has charge of the bullion, jointly with the treasurer and chief coiner. He has, hitherto, also had the care of the melting and refining all the precious metals that have come to the mint.

The CHIEF COINER prepares all the necessary machines, belonging to the different branches of coining the several metals directed by law; works all the ingots, received from the melter and refiner, into a proper state for coining, and, when completed, delivers them over to the treasurer, and lastly, oversees all the different workmen employed in the coinage, and keeps them in their duty.

The ENGRAVER, whose actual duties are the raising and furnishing all punches that are requisite for the completion of the dies, the engraving and sinking all original dies, and raising all hubbs that are struck out of them. He has an assistant, occasionally, as the business is urgent.

The TREASURER, whose duty it is to take charge of all bullion, received or deposited in the mint, for coinage. He delivers it out, as wanted, for working, and receives, in return, all the coins, as they are completed, from the chief coiner. He registers all the qualities of the metals, as reported by the Assayer, and pays out all the coins, when completed, on the warrants of the Secretary of the Treasury and Director, makes all payments on account of the mint, and renders his account every three months to the treasury of the United States.

The CLERKS. At present, there are three clerks, one of them performs all writings, relative to the mint, required of him by the director and assayer, makes out all orders of the Director, and keeps regular entries of the same. He keeps an account of all bullion, received and delivered by the assayer, acting in the capacity of refiner, and does such out of door business, for the use of the mint, as is required of him by director or assayer. He also keeps an account of the workmen employed, pays them their wages, and procures the necessary materials.

One other is clerk to the chief coiner, whose duty it is to keep an account how much, and what, metal is received by the chief coiner, from the treasurer, and of the sum returned in coin. He weighs out, daily, the several metals to the proper workmen, and receives it back at night, by weight of which, he keeps the proper entries. He makes out the pay rolls, for the Director's inspection, on which warrants on the treasurer are issued. He is present at the payment of the workmen, and takes their receipts. He also keeps the accounts of the contingent expenses attending the institution.

The remaining clerk belongs to the treasurer, and keeps all accounts relative to his receipts, issues, and expenditures, whether of bullion, coin, or payments. He also weighs the bullion, in the first instance, registers the quantity of alloy, and counts the coin issued from the mint. Each clerk receives a salary of five hundred dollars per annum, except the treasurer's, who receives from the Director, out of his own salary, an addition of two hundred dollars per annum.

2d. *The present state and progress of the works.*

The houses are built on three lots of ground, in Seventh street, between Market and Arch streets, the fee simple of which is vested in the United States, and one in the Northern Liberties, taken by the Director, on a lease for five years, at the trifling rent of five shillings per annum.

The works consist of two rolling machines, one for hot and the other for cold metal, worked by four horses, and require five hands constantly to attend them, while in operation. There is a third, nearly completed, to be appropriated to the smaller coinage. A drawing machine for the purpose of equalizing the strips for cutting the planchettes, and are worked by the same hands as are last mentioned. Three cutting presses for the planchettes of larger and smaller coins, which are worked by one man each. A milling machine, which is intended to be worked by the horse mill, but, at present, requires one hand. Three coining presses, with the improvement for supplying and discharging themselves by machinery. Six hands will attend three, if in one room. A fourth, for dollars and medals, in particular, will be finished in about three months. Two turning lathes for dies, and a boring machine for making holes in the large frames, screws for presses, stakes, rollers, and an infinite variety of instruments and tools, necessary to carry on the coinage.

There are, besides three annealing and one boiling furnace, with two forges; the assay, melting, and refining furnaces.

The nett produce of these works, from the establishment of the mint to this time, consists of one million and eighty-seven thousand five hundred cents, paid into the treasury of the United States, equal to ten thousand eight hundred and seventy-five dollars; in silver coins delivered, thirty-five thousand one hundred and sixty-five dollars. The future produce, it is said, will be about two hundred thousand cents per month.

The treasurer has received, in gross silver bullion, from depositors, one hundred and sixteen thousand seven hundred and eighty-three ounces thirteen pennyweights, containing alloy, below the standard of the United States, of twenty-four thousand five hundred and seventy-eight ounces, seven pennyweights.

Your committee have made a strict inquiry into the causes, why the product has not been greater in so long a time as two years and an half from its institution, and find that, in general, the difficulties attending all establishments, that are, in their formation and operation, new and uncommon, and which, therefore, require experiments to be made in every step of their progress, have attended this institution. No works of this kind, requiring equal force and equal precision, ever having been made in this country, workmen, those expected to be obtained from Europe, by some means, having failed in the different branches, were hard to be got, and many, when engaged, were not masters of their business; the materials were difficult to be obtained, and often proved insufficient for the force required—even bar iron, from the large size required, as well as the castings, caused great delay before they could be had; oftentimes, when the machinery was finished and set to work, it gave way, and all was to be done over again. All the tools, necessary to make the machines, were first to be made themselves. Not only the whole machinery, in all its parts, but all the tools necessary for their formation have been executed at the mint. This could not be effected by an union of all the proper artizans, each a complete workman in his own department, but, from necessity, was confined to the principal officer of the coining department, who could only proceed from theoretic principles, with the assistance of such workmen as could be procured, to whom most of the machines, however common in Europe, were entirely new. Add to this, that mere theoretic knowledge has produced greater complexity in the system, and, of course, greater delay and expense than full practical knowledge would have found necessary.

The mints in Europe have been gradual in their improvements, and have been of many years standing. This has had every difficulty to struggle with, and was to be brought to perfection at once, lest our coins should not bear a comparison with those of other nations. Those lately executed are superior to any made in Europe.

The buildings were all to be completed before the works could be begun. The lots on which the same are built, from a principle of economy, were so restricted in size, that they are now found to be much too small, and so insufficient as greatly to hinder the several operations, and delay the business. It was also a considerable time before an engraver could be engaged, during which, the chief coiner was obliged to make the dies for himself, and yet the dies are subject to frequent failures by breaking. Great delays have also taken place for want of a refiner and melter, provision for such an office having been wholly omitted in the law instituting the mint, by which, the present stock of copper remains useless and unproductive.

Your committee have been convinced by these facts, as well as from actual observation, that there are substantial reasons exculpatory of the officers of the mint, for the delay attending this undertaking; but they are happy in observing, that most of these difficulties are now surmounted, and the future product of the coinage must be very considerable.

3d. *The expense attending the institution has been very great, from the necessity and difficulties above alluded to.*

It amounted, on the thirtieth day of September last, to the following sums, including the standing capital, and copper to be coined into money:

Lands purchased,	- - - - -	\$4,266 66
Buildings, apparatus, machines, &c.	- - - - -	22,720 45
Purchase of copper,	- - - - -	15,815 51
Salaries to officers,	- - - - -	15,591 99
		<hr/>
		\$58,394 61

4th. *The improvements yet necessary.*

It would be a very important saving to the public, as well as add great expedition to every part of the machinery, if they could be put in motion by water, or steam, instead of manual labor, or that of horses. At present, water is out of the question, without removing the works out of the city, to which there are many solid objections; but in case the projected canal, between the Schuylkill and Delaware, should be accomplished, the heavy expense of this institution would be greatly reduced.

It has already been mentioned, as one cause of delay, the omission in the law, of provision for a refiner and melter, whose duty it should be to take charge of all metals delivered out by the treasurer, after they have been assayed and refined, and melt them into bars and ingots fit for the rolling machine, when they are to be delivered over to

the chief coiner. This is a necessary and essential improvement. The law originally contemplated the assayer as the only officer necessary in this part of the business.

In the European mints, all metals deposited for coinage, are first brought to the proper standard at the expense of the owner, and by private professional workmen established in that country, independent of the mint, and therefore no such officer belongs to those institutions; but in this country, for want of such a private establishment, it becomes a necessary department of the mint. And, although your committee are of opinion that the assayer might, in point of labor, execute this office, his time not being wholly taken up in his proper department, yet the propriety of positive checks, throughout the whole of the business of the mint, absolutely forbids it. Such an officer must, therefore, be appointed, or the former delays will necessarily accrue. Those would have been greater than they have been, had not the Director employed an occasional workman to assist in that part of the operation.

As it is the practice, in all the mints of Europe, for the owners of bullion to have it refined to the legal standard, at their own expense, your committee are of opinion that a reasonable sum, from every deposite, should be retained by the treasurer of the mint, as a compensation for refining and melting. This will appear the more reasonable when it is known that the bullion, already lodged in the mint, has cost the United States at least five hundred pounds for refining.

Your committee further find, that the standard fineness of silver directed by law, in the opinion of the officers of the mint, contains too great an alloy, and will expose the coin to wear black; and, therefore, that the alloy should be reduced.

The English standard of silver coin is eleven ounces two pennyweights of pure silver in the pound Troy.

Spanish coins ought to contain ten ounces fifteen pennyweights.

French crowns, of the late Government, ten ounces seventeen and a half pennyweights.

A mean of both is ten ounces sixteen and a quarter pennyweights.

One tenth part alloy, which is the standard of the present Government of France, established as a mean between both, leaves ten ounces sixteen pennyweights.

But the standard of the United States is ten ounces fourteen pennyweights, and nineteen one hundred and four parts. This extreme fractional part of our standard for silver, produces great inconvenience, without any advantage, that your committee could discover; and they are, therefore, of opinion, that the mean of ten ounces sixteen pennyweights should be adopted. It has also appeared to your committee that the price of copper is very fluctuating, and may so increase, as, in some degree, it has done since the law for ascertaining the weight of cents, that, when coined and issued, coppersmiths may work them up to considerable advantage. To prevent this growing evil, provision should be made, by law, in time to check it. Great complaints are made throughout the United States, of the difficulty of obtaining cents when coined. The practice, hitherto, in pursuance of the requisition of the law, has been for the treasurer of the mint to pay them over to the treasurer of the United States, who distributes them among the banks in this city. This will produce a supply, in time, for the States in the neighborhood of the mint, but will not give satisfaction to the distant parts of the Union, who pay their equal share of the expense.

Your committee, therefore, are of opinion, that it would be a valuable improvement to make provision, by law, for a more general distribution of the cents as they are coined.

5th. *The stock of Metal,*

Now on hand, uncoined, amounts to upwards of fifteen tons of copper, most of which requires refining, and the whole melting into ingots, preparative to rolling. There also yet remains about thirty-five thousand five hundred and seven ounces of silver bullion deposited for coining, which must also go through the hands of the refiner and melter, before it can be coined; and large quantities are ready to be brought, when the mint is ready for the receipt of it.

6th. *The produce of the works when complete.*

The rolling machines, for large coin, will roll from twelve to fifteen thousand ounces per day; that for small coin, about half that quantity.

The drawing machine, for strips, can execute, daily, the produce of one rolling machine.

The three cutting presses will each cut from fifteen to eighteen thousand planchettes per day, and the milling machine will also pass them through at the same time, when worked by horses; but, in the present state, will mill about ten thousand.

The three coining presses, when complete, will strike from eight to twelve thousand of the smaller kinds of coin per day; so that, on an average, ten thousand cents, equal to one hundred dollars, may be coined in a day by each press, if all are worked.

7th. *The accounts of the Mint.*

These are kept by the treasurer, according to the directions, and in the manner pointed out by the Secretary of the Treasury, and appear to your committee to be fully checked, for the security of the public, against every avenue of deception.

All moneys appropriated for the use of the mint, and advanced by the treasury of the United States, are granted in the name of the treasurer of the mint, on warrants from the President of the United States on the Secretary of the Treasury, and from him in favor of the treasurer of the mint, and are deposited in the Bank of the United States, to the credit of the treasurer of the mint, in a separate account.

He receives all claims upon the mint, in the first instance, and gives them his approbation before they can pass. These are under the heads of

Salaries to officers and clerks.

Wages of laborers.

Incidental and contingent expenses.

Copper purchased for coinage.

The account is then presented to the Director, who examines the same, and issues his warrant on the treasurer of the mint for payment. These accounts are rendered quarterly by the treasurer to the treasury, where they are subject to their final decision, as well respecting the ordinary expenses of the mint, as the accounts of bullion and coinage.

The bullion is received by the treasurer of the mint, in the first instance, who gives receipts therefor, dated and numbered, progressively, distinguishing, by a different series, those given for silver from those for gold.

These receipts are entered in a register containing two accounts, one for each of the precious metals.

All bullion is inspected by the assayer, and a few grains of every parcel given him to be assayed, and his certificate of the pure gold, or silver, in each deposite, is returned, to be entered in the register; the treasurer then computes the value of the deposite in coin of the United States, which is entered in the register.

The bullion is then delivered to the chief coiner, on the warrant of the Director, to the treasurer of the mint, who takes his receipt thereon. When coined, the chief coiner pays them over, on a like warrant, to the treasurer of the mint, and he again to the Treasurer of the United States, on a warrant from the Secretary of the Treasury.

By this system, established by the Treasury Department, all bullion is to be lodged in the vaults of the mint, and secured under two locks, the keys of which are kept by the treasurer and assayer.

When bullion is in the custody of the chief coiner, it is to be constantly subject to the inspection of the assayer, he being responsible for the standard purity of the respective coins; and when the bullion is not in use, it is to be kept under two locks, the keys of which are kept by the assayer and chief coiner.

From every mass of coins the treasurer takes three pieces, in presence of the assayer, which are secured by him under cover, with seal of the assayer thereon, for the purpose mentioned in the law.

All coins made on account of individuals, are paid by the treasurer, on the warrant of the Director.

In addition to these checks, all receipts of bullion, and delivery of coins, are entered in a regular set of books, kept for that purpose.

All the forms of the documents requisite for common use, are printed, bound, and issued under indented checks, for the greater public security.

Your committee having thus given a concise state of the mint, beg leave to recommend the following resolutions:

1st. *Resolved*, That provision ought to be made, by law, for the appointment of a refiner and melter in the mint of the United States, whose duty it shall be to take charge of all copper, and silver, and gold bullion, delivered out by the treasurer of the mint, after it has been assayed, and reduce it into bars or ingots for the rolling mills, and then to deliver them to the coiner or treasurer, as the director shall judge expedient, and to do and perform all other duties belonging to the office of refiner and melter, or which shall be ordered by the Director of the mint.

2d. *Resolved*, That provision ought to be made, by law, authorizing the treasurer of the mint to retain two cents per ounce from every deposite of silver bullion below standard, and four cents per ounce for every deposite of gold bullion below the standard, unless the same shall require the operation of the test; then six cents, as a compensation for refining and melting the same.

3d. *Resolved*, That gross bullion, brought for deposite and coinage to the mint, shall not be received in smaller quantities than two hundred ounces of silver, and twenty ounces of gold.

4th. *Resolved*, That the standard for silver coin, as now established by law, be altered, and made to consist of nine equal ten parts of pure silver, and one-tenth part of pure copper, being equal to ten ounces sixteen pennyweights of pure silver in one pound Troy.

5th. *Resolved*, That the President of the United States be authorized to reduce the weight of the copper coin, at his discretion, provided such reduction shall not exceed two pennyweights in each cent, and in proportion in each half cent, of which he shall give notice, by proclamation, and report the same to the next session of Congress.

6th. *Resolved*, That the Treasurer of the United States be authorized, by law, to distribute, at the public expense, all cents received from the treasurer of the mint, by sending them to some one bank in each State, where any are established, and where not, to the principal collector of such State, in proportion to the number of inhabitants of the State, to be by them paid out, for cash, to any person requesting the same, in sums not less than ten dollars value.

7th. *Resolved*, That provision ought to be made, by law, enabling the Director and treasurer of the mint to give a preference to bullion brought to the mint, already of or above the standard of the United States, so as not to be prevented coining and issuing the same, although bullion below the standard, and not yet refined, may have been deposited for coinage before it; any thing in any law heretofore passed to the contrary notwithstanding.

[2d SESSION.

DUTY ON TYPES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 16, 1795.

Mr. MURRAY, from the Committee to whom was referred the petition of Isaiah Thomas, praying for a repeal of the duty on imported printing types, made the following report:

That, from a due regard to the advancement of the manufacture of types, and the real interests of the printing business in the United States, the prayer of the said petition ought not to be granted.

3d CONGRESS.]

No. 83.

[2d SESSION.

SPIRITS, DOMESTIC.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 2, 1795.

Mr. GILES, from the Committee to whom were referred the letter from the Secretary of the Treasury, of the 25th ultimo, enclosing a statement exhibiting a number of officers employed in the management of the revenue from stills, and spirits distilled within the United States, and a letter from the Commissioner of the Revenue, on the subject of compensation to the said officers, made the following report:

That they have had verbal communications with the Secretary of the Treasury and Commissioner of the Revenue, on the subject of reference, and have been informed by them, that, from certain irregularities and delays in the returns of the revenue arising upon spirits distilled within the United States, and upon stills, it would not be practicable, in the course of the present session of Congress, to state, with precise accuracy, the productiveness of the revenue, and the expense of collection; nor the number nor names of the officers employed in the collection.

That the statements made, in conformity with the order of the House of Representatives, in the course of the present session, have been founded, partly upon actual returns, and partly upon estimates, which, it is believed, will not vary, very materially, from the actual results. These statements have had reference to two periods; the first respects the revenue which accrued during the year 1792, from which, it appears that the gross amount of duties upon spirits distilled from foreign materials, was three hundred and fifty thousand nine hundred and fifty-eight dollars and eighty-four cents. The gross amount of duties on spirits distilled from domestic materials, and on country stills, one hundred and fourteen thousand three hundred and thirty four dollars and forty cents. The gross amount of duties on spirits distilled from foreign and domestic materials, four hundred and sixty-five thousand two hundred and ninety-three dollars and twenty-four cents; the amount of drawbacks allowed, one hundred and thirty-four thousand four hundred and twenty-eight dollars and twenty cents. The total expenses of collection, forty-two thousand and seven hundred dollars and thirty-nine cents. Nett amount of the whole duties, two hundred and eighty six thousand two hundred and forty dollars and thirty cents.

The second period respects the revenue which accrued during the year 1793, from which, it appears that the gross amount of duties on spirits distilled from foreign materials was, two hundred and twenty-nine thousand seven

hundred and ninety-seven dollars and thirteen cents; the gross amount on spirits distilled from domestic materials, and on country stills, one hundred and seventeen thousand five hundred and fifty-six dollars and ninety-seven cents; the gross amount of spirits distilled from foreign and domestic materials, three hundred and forty-seven thousand three hundred and fifty-four dollars and ten cents; the gross amount of drawbacks allowed, eighty-nine thousand and fifty-one dollars and seventy cents; the total expense of collection, forty-two thousand and fifty-seven dollars and forty eight cents; the whole nett amount of duties, two hundred and seventeen thousand two hundred and eighty-five dollars and eight cents.

The other statement respects the number of officers employed in the collection of the aforesaid revenue, which has reference to a date within the same periods of time.

It is presumed that the number of officers employed in that service, has varied materially since that time to which the report relates, but there are no documents, at this time, in the treasury, from which the precise number can be ascertained at the present time. It is, however, in the contemplation of the treasury, to direct a return of the number and names of all the officers employed in that service, on some certain day between this time and the next meeting of Congress.

The committee are of opinion that more accurate information upon the subject of the internal revenue will be important to future legislative proceedings, and, therefore, recommend the following resolution:

Resolved, That the Secretary of the Treasury be directed to lay before the next Congress, such a statement of the internal revenue as will ascertain, with precision, the nett product thereof, and the expense of collection; and that he also report a list of all the officers employed in that service, and the compensations allowed to each of them.

4th CONGRESS.]

No. 84.

[1st SESSION.]

MINT.

COMMUNICATED TO THE SENATE, DECEMBER 14, 1795.

DEPARTMENT OF STATE, *December 14th, 1795.*

SIR:

By the direction of the President of the United States, I have the honor to enclose, to be laid before the House of Representatives, the reports of the late and present Director of the mint; exhibiting the state of that establishment, and shewing the necessity of some further legislative provisions, to render it more efficient and secure; and am, most respectfully,

Sir, your obedient servant,

TIMOTHY PICKERING.

The SPEAKER of the House of Representatives of the United States.

MINT OFFICE, *October 27th, 1795.*

DEAR SIR:

The law, establishing this office, having placed it more immediately under your guidance, I deem it a duty to lay a state of its past operations and actual situation before you, at the moment of my resigning its direction. The enclosed document, marked A, will shew the quantity of copper which has been coined and sent into circulation, from the mint. The whole of this coinage was accomplished by my predecessor, Mr. Rittenhouse. The enclosed documents, marked B and C, will shew the quantity of the precious metals which have been worked up and coined; partly under the direction of Mr. Rittenhouse, partly under mine. The gold, wholly under mine.

It may, possibly, appear to those who have not taken pains to inform themselves of the difficulties to be encountered in the formation of new establishments, that little has been done; but a short review of the embarrassments which occurred, will shew, that as much has been done as could reasonably be expected, in the infancy of this establishment. In the first instance, it was exceedingly difficult to procure workmen, in any degree acquainted with the various kinds of work to be performed. Indeed, most of the workmen have been formed in the mint, and have only recently attained that skill and facility in their several walks, which practice alone can give, but which is essential to the despatch of business. Much difficulty occurred in obtaining the very tools and implements necessary for the operations of the mint; and most of them have been prepared under the immediate direction of the officers, and particularly Mr. Voight, the coiner.

Great delays were incurred in obtaining the heavy iron-work, particularly the rollers; and these were not always fit for use, when obtained. Those which are now in use being almost worn out, I have been striving to replace them with the fine Andover iron.

One unsuccessful attempt has been made for us at an air furnace; and yet it remains to be tried, for it can be accomplished without recurring to the tedious and expensive method of making them of wrought iron converted into steel.

More than once, as I have been informed, the operations have been suspended, for want of dies, which the industry of the engraver could not supply fast enough for the presses. A happier selection of steel, aided by more skill in hardening the dies, has remedied this evil, and the engraver is now enabled to supply the mint with dies of every kind, in advance. To these causes of delay, must be added, that the greatest part of the bullion which has been brought to the mint for coinage, has been below our standard, and required the tedious operation of refining; or the precious metals have been brought melted up together, and required the more tedious operation of separation; operations which, I understand, are never performed at any other mint, and which the diminutive scale on which ours is formed, but illy qualified it to perform. These are some of the difficulties which occurred. Most of them had been vanquished by the judgment of my able and very respectable predecessor, whose mechanical genius and powers of calculation, seem to have been essential to the organization of the establishment. The remainder, I have endeavored to subdue; and I am now free to say, that the mint, even on its present contracted scale, if regularly supplied with the precious metals, of the legal standard, will be adequate to the coinage of 1,500,000 dollars, annually, in silver, and as much in gold; and, that a small increase of the labor and expense, will produce as much of the copper coinage, as will be requisite for the use of this country. I venture this assurance, upon my view of its operations upon a late deposit of silver, vigorously urged for a few weeks. The gold coinage was carried on at the same time, to a small amount, and might have been to a much larger, if there had been any bullion in a state fit for coinage. All the gold, and almost all the silver, within a mere trifle, in a state actually fit for immediate coinage, has been coined and delivered.

It will be proper for me to state to you, what I have before stated to the late Secretary of State, and the present Secretary of the Treasury, that there is no copper in the mint fit for coinage. There are, indeed, considerable quantities of clippings of the copper, which are reducible into ingots, and would, when rolled, be fit for use; but the mint is so illy prepared for these operations on that metal, whilst occupied in the coinage of the precious metals, that it

would be advisable for the Government to apply these clippings, and some other masses of copper in possession of the mint, to some other purposes, and to exchange therefor, some of the sheet copper it possesses, or to purchase sheet copper for the coinage. The price of copper having risen considerably, from causes which, it is said, will be operative for some length of time, if not permanently, it has been suggested that it would be useful to diminish the weight of the cent, as the copper would, thereby, be brought nearer to its proportionate value to silver, and might prevent its being worked up by the copper smiths. The law seems to have contemplated the possibility of such an arrangement being proper, by giving you the power to make the alteration.

It is important to inform you of what I have before mentioned to the heads of Departments above named, that the standard of the silver coin, in use at the mint, differs from the standard fixed by law. The law establishing the mint, fixes that the silver coinage should contain 1485 parts of fine silver to 179 parts alloy, or 10 oz. 14 dwt. 5 gr. of fine silver, to 1 oz. 5 dwt. 19 gr. alloy.

Before my operations commenced under this law, it was supposed by the best informed men that this standard was too low; would debase the coin too much; and was inconvenient in other respects; and it was presumed that an alteration would be made, which was recommended by its propriety and correctness. The alteration contemplated went to the establishment of a standard, which required that nine parts in ten should be fine silver, the other tenth alloy, or, 10 oz. 16 dwt. fine to 1 oz. 4 dwt. alloy, in the pound Troy. Upon the presumption of such an alteration, I understand the coinage was commenced in October, 1794, and the matter was submitted in the winter to a committee of Congress, who reported on the propriety of the alteration. By some means, that part of the report on the mint, which related to the standard, after passing one branch of the Legislature, did not pass the other. Still, however, the coinage was continued on the principle it was commenced. It being represented to me, when, soon after my coming into office, I observed the fact, that some mistake alone had prevented the change by the Legislature, I did not feel myself qualified to alter the standard which I found in use in the mint, under the weighty sanctions of Mr. Rittenhouse's authority, and the report of a committee of the Legislature. I am thus particular in stating this business, as it is of high importance that the law should be altered, or that the standard should be accommodated to the law.

Permit me, sir, to suggest the necessity of protecting laws for the coinage. I understand that none of the laws of Congress have provided any penalties for the various offences which may be committed against the coinage. In most countries, strict laws are enacted, prohibiting the interference of individuals in this attribute of the sovereignty; and, in some, the very possession of dies, or presses, or other implements essential in the coinage, is made criminal. In this country, mints are said to be boldly erected at Baltimore, and elsewhere, professedly to imitate the coins of foreign countries, and to furnish a debased gold coin for the West India markets; and so much of the gold bullion which would be brought to the national mint, is carried to these private establishments, which degrade our national character. Encouraged by this negligence of Government, men have carried their ideas farther; and there is too much reason to fear, that a recent attempt on our dies and other implements was made with nefarious views.

Amongst the unpleasant circumstances which attend the contracted scale on which the mint has been erected, there is one of very serious import. The owner of a small lot adjoining the mint, has a right of passage through the interior of the lots of the mint. This exposes the works to improper intrusion, and prevents that complete control over the workmen, which is essential to the well ordering of the business. A small sum of money would have purchased that lot some time ago. I believe it may still be had, reasonably.

I feel it a duty to warn the Government of the propriety of putting itself in a situation to replace the assayer, if that measure should become necessary. The time of his engagement with Mr. Pinckney has almost expired, and he is forming works, in connexion with other persons, for carrying on business on his private account. Probably, he may not choose to remain in the public service at the expiration of that time. Possibly, it might be inexpedient to allow the assayer of the mint to be connected in works which bear some relation to the coinage, or to the preparation of the metals for coinage. At least, some check should be provided.

Permit me to suggest, that it might be useful to publish a short statement of the operations of the mint, and of its actual prepared state to carry on the coinage of the precious metals, to a considerable amount. It might satisfy the public mind, and might, also, lead to the production of considerable quantities of bullion, which are said to be in the hands of individuals in the United States, who are unadvised of the facility and certainty with which they may now have bullion coined.

I must entreat your pardon for intruding so long on your time. It appeared to me important to lay this information before you.

I am now prepared to deliver up the direction of the mint to my successor. It only remains for me to thank you, in all sincerity, for your confidence in the unsolicited bestowal of this office on me, and to assure you that I have endeavored to deserve it.

Allow me to hope that you will be persuaded that I am, sir, with the truest and most affectionate attachment and respect, your obedient servant,

HENRY WM. DE SAUSSURE.

The PRESIDENT of the United States.

MINT OF THE UNITED STATES, December 3, 1795.

The Director of the mint, in obedience to the President's commands, makes the following report relative to the mint of the United States hoping that the short time of one month, which he has had to make himself acquainted with the present state of it, will apologize for any inaccuracies that appear therein.

On entering on this service, the Director found that the united exertions of the several officers had been engaged to complete as many coins of the precious metals as circumstances would permit, by which the state of their accounts relative to deposits had been delayed. It became a prudent measure on the part of the new Director, and one absolutely necessary to the future conducting the department with propriety, to insist on an immediate close of all accounts relative to the precious metals, from the first establishment of the mint.

The many difficulties attending this process put a stop to any farther coinage, excepting as to what was then in hand. The accounts of those metals are now nearly brought up, and in a few days will be finished.

Every previous step was preparing for a vigorous and systematic renewal of the coinage, when the sudden and unexpected death of the assayer, Mr. Albion Cox, on Friday last, by an apoplectic fit, deprived the mint of an intelligent officer, essentially necessary to the future progress in the coinage of the precious metals. Until this officer is replaced, the business at the mint must be confined to striking cents only.

The Director has endeavored to avail himself of the temporary cessation of full business, to prepare a system of rules for conducting the mint in future, in all its branches, which shall be reported to the President in a few days, and which will be, hereafter, carried into execution, if it should meet with the President's approbation. Future experience will improve it, by such additions and alterations as practice will discover to be necessary.

The issues of the mint, from its first establishment to this day, as collected from the register kept for that purpose, consist of

Eagles,	-	-	-	-	-	-	-	-	-	2,795
Half Eagles,	-	-	-	-	-	-	-	-	-	8,707
Dollars,	-	-	-	-	-	-	-	-	-	204,791
Half dollars,	-	-	-	-	-	-	-	-	-	323,144
Half Dimes,	-	-	-	-	-	-	-	-	-	86,416
Cents,	-	-	-	-	-	-	-	-	-	1,066,033
Half Cents,	-	-	-	-	-	-	-	-	-	142,534
Total in Dollars,	-	-	-	-	-	-	-	-	-	453,541 80

There are not, to the knowledge of the Director, any protecting laws yet enacted, securing the coinage, by proper penalties, against those (other than persons concerned in the mint) who may counterfeit, debase, clip, or otherwise lessen the value thereof, with intent to defraud.

The interference of individuals with so necessary a branch of the Executive Government as that of coining money, by setting up coining presses for imitating foreign coins, should be prevented by law, if either the national honor, or the success of the mint, are to be objects of public attention: the one is injured in foreigners being imposed upon by an imitation of foreign coins of a reduced weight, and, perhaps, wanting in standard purity; the other may be deprived of all the bullion thus wrought up at these irregular presses.

The stealing of the dies, hubbs, milling-stamps, screws, presses, or other instruments used in the coinage, as well as the taking, receiving, adulterating, or secreting, the metals kept in, or belonging to, the mint, call for special provision from the Legislature of the United States. The Director is sorry to say, that his observations are justified by facts that have already happened at the mint. The laws of the several States are not particularly adapted to these objects, so as to guard against these evils—a mint having never been taken into their contemplation.

This opportunity ought not to be lost, of urging the propriety of prohibitory laws against any person concerned in the mint, either as an officer or workman, being engaged, directly or indirectly, in buying or selling of bullion, gold, or silver, or a mixture of either with other metals, on his or their private account. The checks provided for security against imposition, will be in vain, if the property of the precious metals assayed and coined at the mint may be vested in the persons who have the charge thereof, in its passage through the mint.

The same reasoning will equally show the impropriety of any officer or workman, engaged in the mint, being allowed, by himself, or in company with others, to be concerned, directly or indirectly, in works of a similar nature, on their private account, or in any such works wherein metals are melted, refined, rolled, or otherwise prepared, so as to be fit for coining.

To remedy some of these evils, it would be a measure highly advantageous to the United States, and very beneficial to depositors, if some proper person was authorized to purchase, on public account, all small quantities of silver and gold, brought to the mint, at the best market price, to be coined for the public treasury.

It has been the opinion of former officers of the mint that the legal standard for silver should be reconsidered; and the Director, on coming into office, found, that, for some special reasons, the standard of coins, heretofore completed, varied, in a small degree, from that established by law. Whatever force those reasons may have with the Legislature, the Director did not think himself justifiable in permitting so important a measure to be continued, without legislative sanction; he has, therefore, issued orders, that, in future, the precise terms of the act of Congress, in this respect, should be observed; but as the coinage is, at present, in a state of suspense, it may be a proper time to review the alloy directed by law, as the alteration, if found necessary, could now be adopted, without injury to any one.

The act of Congress directs that the alloy of gold shall be of silver and copper, not exceeding half silver. The practice, at the mint, has been to form the alloy of copper, with the smallest portion of silver, so as barely to comply with the words of the law. The silver contained in the law is an entire loss to every body, without answering the least valuable purpose. It is said not to mix so intimately and freely with gold as copper does, neither will it equally add to the hardness of the coin; at the same time, it is a heavy increase of the annual expenses of the mint. This regulation of part silver in the alloy of gold, it is said, may be repealed with great propriety.

These appear to the Director to be the principal points relative to the mint, demanding the President's immediate attention. As to the practice in detail, whatever has been found by experience to need checks, or alterations, and has come to the Director's knowledge, and which he could remedy, without troubling the President, he has endeavored to incorporate into the system of rules herein before referred to.

All which are respectfully submitted.

ELIAS BOUDINOT, *Director.*

4th CONGRESS.]

No. 85.

[1st SESSION.]

ESTIMATES FOR 1796.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 14, 1795.

TREASURY DEPARTMENT, *December 14th, 1795.*

SIR:

I have the honor to present, herewith, a report and estimates of the appropriations which appear to be necessary for the service of the year 1796, and for other purposes; also, statements in relation to the expenditure of certain sums, heretofore appropriated.

I have the honor to be, with perfect respect, sir, your most obedient servant,

OLIVER WOLCOTT, Jr. *Secretary of the Treasury.*

The Hon. the SPEAKER of the House of Representatives.

The Secretary of the Treasury respectfully reports to the House of Representatives:

That, for the service of the year 1796, and for making good deficiencies in former grants, the following appropriations, as detailed in the estimates herewith transmitted, appear to be necessary:

For the civil list, or the support of Government, including the incidental and contingent expenses of the several departments and offices, the sum of		\$485,971 12
For the payments of annuities and grants,		3,157 73
For the support of the mint establishment,		52,464 00
For the support of light houses, beacons, buoys, and public piers,		24,000 00
For satisfying certain miscellaneous claims and expenses,		33,672 09
For the Department of War, comprising the following general objects of expenditure:		
The support of the army, including the expenses in the clothing, hospital, ordnance, quartermaster, and Indian departments, the defensive protection of the frontiers, contingencies, and the improvement and completion of sundry fortifications,	\$1,480,247 00	
The naval department,	73,934 00	
The payment of military pensions,	85,098 00	
Total estimate for the War Department,		\$1,639,279 00
Amounting, together, to		\$2,238,543 94

In addition to the said estimates, the following sums are stated, on the presumption that laws authorizing the expenditure will be passed, during the present session of Congress:

For defraying the expenses of the intercourse of the United States with foreign nations,	\$40,000 00
For defraying the contingent expenses of the Government of the United States,	20,000 00
For the compensation of clerks in the several loan offices, and for books and stationary,	14,000 00
Amounting to	\$74,000 00

The funds out of which appropriations may be made for the purposes before mentioned, are, 1st. The sum of six hundred thousand dollars of the proceeds of duties on imports and tonnage, which will accrue in the year 1796, which sum is annually reserved for the support of Government, by the act, entitled "An act making provision for the debt of the United States;" and 2d. The surplus of revenue and income which will accrue to the end of the year 1796, after satisfying the objects for which appropriations have been heretofore made.

Subjoined to this report, is a statement, marked A, which exhibits a prospective view of the revenue and expenditure of the United States, for the ensuing year, by which it satisfactorily appears, that the proceeds of the duties on imports and tonnage, and on domestic distilled spirits, and on stills, will be adequate to the discharge of the appropriations already made, including the reimbursement of the domestic stock, bearing a present interest of six per cent.; and also, to the payment of the sums contained in the estimates, now presented, for the current service.

But, as a great proportion of the revenue arising from imports, is subject to long credits, the customary anticipations, by means of loans, will continue to be necessary.

In addition to the sums charged upon the revenue, arising from imports and tonnage, and domestic distilled spirits, and stills, there are other debts of the United States which will fall due in the year 1796, and for which provision is necessary.

The following are of this description:

A loan had of the Bank of New York, pursuant to an act passed on the 20th of March, 1794, for -	\$200,000 00
An instalment of a loan of 800,000 dollars had of the Bank of the United States, pursuant to the same act,	200,000 00
Amounting, together, to	\$400,000 00

The interest of the loans before mentioned is fully secured by the existing revenues, but there is no authority to reimburse the principal, except from the proceeds of the duties upon carriages for the conveyance of persons, licences for selling wines and foreign distilled spirits, snuff mills, refined sugar, and property sold at auction. The present state of these revenues does not justify a reliance that they will be sufficiently productive, in the year 1796, to admit of the reimbursement of the debts with which they are charged. The alternative which offers, is, therefore, either an appropriation of other revenues, or a payment from the proceeds of new loans.

If it were certain that the exigencies of the United States would not require appropriations beyond the sums at present contemplated, and that the revenue would equal the estimates, a sum sufficient to cover any deficiency of the appropriated revenues, might be safely charged upon the duties arising from imports and tonnage; but, in the actual state of uncertainty which necessarily exists, it is deemed expedient to keep in view the auxiliary resource provided by the tenth section of the act, entitled "An act making provision for the support of public credit, and for the redemption of the public debt."

The following sums will, moreover, be required, in the year 1796, for the payment of which, the laws contemplate no provision, except the proceeds of certain loans, which are authorized by the act last recited.

1st. An instalment of one million of guilders, which will fall due in Amsterdam, on the 1st of June ensuing, to pay which, with the charges thereon, according to the course of exchange which has lately obtained, there will be necessary, the sum of	\$414,100 00
2d. An instalment of the loan of two millions, had of the Bank of the United States, for stock of said bank, held by the United States, which instalment will fall due on the last day of the present year,	200,000 00
3d. An instalment of the same loan, which will fall due on the last day of December, 1796,	200,000 00
Amounting to	\$814,100 00

There are other loans detailed in the annexed statement, which will also fall due to the Bank of the United States in the course of the ensuing year; but, as they are merely anticipations of the revenue, for refunding which, there exist legal provisions, they are introduced to shew the course of receipt and expenditure, and the extent to which future anticipations will be requisite.

The view, now presented, of the expenditure and revenue for the year 1796, authorizes the following conclusions:

1st. That, after making a liberal allowance for unforeseen demands which may require appropriations, and for deficiencies, the revenue will be adequate to the annual reimbursement of the six per cent. stock, bearing a present interest; to the payment of the interest on the foreign and domestic debt; and to the discharge of the sums estimated for the current service.

2d. That the anticipations of the revenue which may exist at the close of the present year, must be continued for the year-ensuing.

And, 3d. That the instalment of the foreign debt, which will fall due on the 1st of June next, and certain instalments of domestic loans, before mentioned, must be re-loaned, or satisfied out of the proceeds of new revenues.

On this statement, the Secretary takes the liberty to observe, that the act of the last session, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," contains the following provisions:

1st. A proposal for re-loaning the whole of the foreign debt, and converting the same into a funded domestic stock, transferable at the treasury, and the respective loan offices; the principal stock to be redeemable at the pleasure of the United States, and the interest to be payable quarter-yearly, with an additional interest of one half per centum per annum to the rates of interest secured by former contracts.

2d. A power to the commissioners of the sinking fund to borrow, with the approbation of the President of the United States, any sums requisite for the payment of any instalments, or parts of principal, as the same shall become due. It is, however, provided, that the interest of any loan so made, shall not exceed six per centum per annum, and that the principal shall be liable to reimbursement, at the pleasure of the United States.

Agreeably to the proposal first mentioned, the accounts subsisting between the United States and France have been finally adjusted to the satisfaction of an authorized agent of the French republic; the instalments which fell due in the present year, have been paid at the treasury, and the remainder of the debt has been subscribed to the proposed loan, and converted into funded domestic stock, bearing interest at five and one half and four and one half per centum per annum.

By this operation, the debt, as due under former contracts, to the republic of France, may be considered as discharged.

Measures have been, moreover, taken for ascertaining whether the residue of the foreign debt, due in Amsterdam and Antwerp, could be re-loaned with the consent of the creditors. The experiment cannot yet be considered as fully made; but the prospect of success is not encouraging. The objections against a mutation of the contracts in the manner proposed, which have been stated, are, generally, 1st. That the proposed new stock will be redeemable at the pleasure of the United States, by which condition the Government will possess the power of reducing the rate of interest, or refunding the capital at periods when the reimbursement may be difficult, or disadvantageous to the creditors. 2d. That the proposed addition of one half per centum per annum to the rates of interest, does not afford an equivalent for the expenses of agency, loss upon the exchange, and the risk of remittances from America. And, 3d. That the facilities which attend the negotiation of bonds payable to bearer, over funds which can only be transferred at the treasury or loan offices in the United States, render the obligations of foreign debt, in their present form, particularly eligible for foreign creditors.

It is not yet ascertained, that these objections will be conclusive in the minds of the creditors against the proposed re-loan, and circumstances are not unlikely to happen, which may, in some degree, abate their force. Nevertheless, as the object of converting the foreign debt into domestic stock, is of real importance to the United States; as unprecedented difficulties attend remittances at present; as similar difficulties will always exist, in a greater or less degree, in time of war; and, as in proportion to their operation, they must endanger the public credit; the Secretary respectfully submits it to the House of Representatives, to consider and determine whether some modification of the existing proposal be not expedient.

Considering the actual state of Holland, and the restrictions upon our intercourse with that country, it was deemed for the interest of the United States to propose a postponement of the instalment which fell due in the present year. It has, however, been conclusively ascertained, that no additional loans can be obtained in Holland; of course, that the United States must be provided to make the reimbursements, stipulated in their contracts.

The measures adopted by this Department, to effect a reimbursement, were seasonable, and such as promised to be effectual; but, owing solely to the war, and the stagnation of credit occasioned by the Revolution, the instalment which fell due on the first of June, had not been paid at the date of the last advices in August.

The causes of the delay were, however, well understood by the creditors; and as they neither originated with, nor could be controlled by, the United States, and as the interest has been paid, the public credit has yet suffered no blemish.

It being rendered certain, that funds to meet the instalments of the foreign debt, now annually falling due, must be remitted from the United States, measures have been taken for ascertaining whether the powers vested by law in the commissioners of the sinking fund, contain an adequate resource. As before mentioned, these powers limit the rate of interest upon any loan to six per centum per annum, and, moreover, provide, that the capitals borrowed shall be redeemable at the option of the Government.

Though the rate of six per centum per annum may be justly considered as a liberal compensation for the use of money, in ordinary times, yet, at the present moment, when the demand for American funds is greatly limited by the operation of the war in Europe, and when a variety of new objects are presented for the profitable employment of capital in this country, it is found that the redeemable quality of the stock which the commissioners of the sinking fund are authorized to constitute, will so far derogate from its value, as to defeat the intention of the law.

The Secretary is confident, that the House of Representatives will appreciate fully all the arguments in favor of an augmentation of the revenue, for the purpose of reimbursing the foreign debt; and he, therefore, omits to make any comments on the statement of facts now presented. But, it is his duty to observe, that, if it shall be determined to confine the reimbursement of the public debt to the scale now established by law, it will be necessary to enlarge the powers granted to the commissioners of the sinking fund, in such manner as that there may exist a certainty of obtaining the necessary funds, with that strict punctuality which it is necessary to observe in whatever relates to the delicate concerns of public credit.

The annexed statement, marked B, exhibits a summary view of the receipts and expenditures at the treasury, from the 1st of January to the 30th of September, 1795; and those marked C and D shew, in detail, the expenditure of two sums granted by an act of Congress, passed on the 2d of January, 1795, for discharging such demands on the United States, not otherwise provided for, as should be ascertained and admitted at the treasury, and of a nature, according to the usages thereof, to require payment in specie.

The prolonged time for receiving on loan the unfunded domestic debt of the United States, will expire on the last day of the present year; this debt, including what remains to be liquidated, computed according to the principles which have governed former estimates, amounted, on the 30th of September, 1795, to 1,382,837 dollars 37 cents, for which some provision will be necessary.

All which is humbly submitted.

OLIVER WOLCOTT, Jr, *Secretary of the Treasury.*

TREASURY DEPARTMENT, December 14, 1795.

A.

An Estimate of the Expenditures and Revenue of the United States, for the year 1796.

ESTIMATED EXPENDITURES FOR THE YEAR 1796, VIZ:			
<i>For the Interest on the Foreign Debt.</i>			
One year's interest on 29,500,000 guilders, being the debt due in Amsterdam and Antwerp, supposing the instalment for 1795 to have been paid, calculated according to the different contracts, bearing interest at four, four and one half, and five per centum per annum, is, guilders, - - - - -	1,385,250 00		
Commissions to the bankers for making the payments, at one per centum, - - - - -	13,852 10		
	1,399,102 10		
Which sum of guilders, 1,399,102 10, calculated at 40 cents per guilder, is equal to - - - - -		\$559,641 00	
But, supposing the exchange to be at 41 cents per guilder, which is likely to be the case, there will be necessary to effect remittances the further sum of - - - - -		13,991 02	
			573,632 02
<i>For the interest on the Domestic Debt, including the annuity necessary for redeeming the six per cent. stock, bearing a present interest, viz:</i>			
Interest and redeeming annuity, for one year, on the six per cent. stock, subscribed on the 30th September, 1795, calculated on the principle of the act of March 3d, 1795, supposing no part of the balances, due to certain States, to be subject to reimbursement, - - - - -		2,274,624 13	
But supposing the balances due to certain States to be transferred, agreeably to the act authorizing transfers thereof, an additional annuity, to redeem the same, will be necessary, amounting to - - - - -		46,901 12	
			2,321,525 25
For the interest on the three per cent. stock, subscribed on the 30th of September, 1795, calculated for one year, - - - - -			587,097 28
For the interest on the stock bearing interest at 5½ per cent, created by a subscription of a part of the debt lately due to France, calculated for one year, - - - - -			101,689 50
Interest on the stock bearing interest at 4½ per centum per annum, created by a subscription of the residue of the debt lately due to France, calculated for one year, - - - - -			7,920 00
Estimated amount of one year's interest on the whole unfunded debt, receivable on loan till the close of the present year, calculated upon the principles which have governed former appropriations, - - - - -			71,029 44
<i>Estimated expenditures for the year 1796, agreeably to the documents herewith transmitted, viz:</i>			
For the civil list, - - - - -		485,971 12	
For the payment of annuities and grants, - - - - -		3,157 73	
For the mint establishment, - - - - -		52,464 00	
For the military department, - - - - -		1,480,247 00	
For the naval department, - - - - -		73,934 00	
For the payment of military pensions, - - - - -		85,098 00	
For the support of light houses, - - - - -		24,000 00	
For the payment of miscellaneous claims, - - - - -		33,672 09	
			2,233,543 94
But, in addition to the said estimates, the following sums are stated, on the presumption that laws authorizing the expenditure will be passed, viz:			
For defraying the expenses of the intercourse of the United States with foreign nations, - - - - -		40,000 00	
For the contingent expenses of Government, - - - - -		20,000 00	
For the compensation of clerks in the several loan offices, and for books and stationary, - - - - -		14,000 00	
			74,000 00
<i>Interest on Domestic Loans, for the payment of which provision has been made by law, viz:</i>			
On 1,400,000 dollars of the loan of 2,000,000 dollars had of the Bank of the United States, for stock of said bank, held by the United States, at six per cent., payable out of the dividends in favor of the United States, - - - - -		84,000 00	
On 3,300,000 dollars borrowed of the Bank of the United States, pursuant to several laws authorizing anticipations of the revenue on imports and tonnage, and on distilled spirits and stills, to the close of 1795, and remaining uncollected, calculated according to existing contracts, at five per cent. and six per cent. per annum. - - - - -		175,000 00	
On 1,000,000 of dollars borrowed on the credit of, and to be refunded from, the product of the duties on carriages, licences for selling spirits and wines, snuff mills, refined sugar, and sales at auction, the interest of which is secured by the revenues arising from imports and tonnage, and on distilled spirits and stills, of which 200,000 dollars was borrowed at five per cent. and the remainder at six per cent. - - - - -		58,000 00	
In addition to the loans above mentioned, a further sum of 500,000 dollars will be necessary at the close of the present year, the interest of which is calculated at six per cent. - - - - -		30,000 00	
			347,000 00

For the reimbursement of Domestic loans, payable out of the proceeds of the revenue on imports and tonnage, &c. viz:

Instalment of a loan of 400,000 dollars, had of the Bank of the United States, pursuant to an act passed on the 2d of May, 1792, entitled "An act for raising a further sum of money for the protection of the frontiers, and for other purposes therein mentioned,"

300,000 00

Instalment of a loan had of the Bank of the United States, pursuant to the act passed on the 18th day of December, 1794, entitled "An act authorizing a loan of two millions of dollars,"

2,000,000 00

Instalment of loans had of the Bank of the United States, pursuant to the act entitled "An act making further provision for the military and naval establishments, and for the support of Government," passed on the 3d of March, 1795,

1,000,000 00

3,300,000 00

For the reimbursement of Domestic Loans, the payment of which is charged by law upon the proceeds of the revenue from duties upon carriages, licences for selling distilled spirits and wines, upon snuff mills and refined sugar, and upon sales at auction, viz:

A loan had of the Bank of New York, pursuant to an act passed on the 20th of March, 1794, making provision for the expenses attending the intercourse of the United States with foreign nations,

200,000 00

Instalment of a loan of 800,000 dollars had of the Bank of the United States, for the same purpose,

200,000 00

400,000 00

For the reimbursement of loans, Foreign and Domestic, payable out of the proceeds of loans authorized by law to be made on the credit of the United States, viz:

Instalment of one million of guilders which will become due in Amsterdam on the 1st of June, 1796, pursuant to a contract dated June 11th, 1782, calculated at 40 cents,

400,000 00

Commissions thereon, at 1 per cent,

4,000 00

Expenses of remitting the above sum, in case the exchange shall be at the rate of 41 cents per guilder,

10,100 00

Instalment of two millions had of the Bank of the United States, for stock of said bank, which will fall due on the last day of December, 1795,

200,000 00

Instalment of the said loan, which will fall due on the last day of December, 1796,

200,000 00

814,100 00

Balance, reserved in this estimate, to cover any deficiencies in the product of the revenue, and to satisfy any unforeseen demands which may require appropriations,

10,336,537 43

420,883 94

\$11,257,421 37

RECEIPTS.

From duties on imports and tonnage.

The actual receipts from the duties on imports and tonnage, during the three first quarters of the year 1795, as credited by the Treasurer, amounted to

4,234,046 26

The product of the fourth quarter of 1795, may be estimated at

1,445,372 32

\$5,679,418 58

Which sums may be safely estimated as the probable product of the revenue from imports and tonnage, in the year 1796.

From internal revenues.

The duties on domestic distilled spirits, have been estimated in former years, at 400,000

400,000

The duties on snuff mills, refined sugar, sales at auction, licences to retail spirits and wines, and on carriages, have also been calculated at 380,000

380,000

780,000

Though these revenues have never produced in the treasury, the sums at which they have been estimated, yet, as the deficiency has been produced by causes which have prevented a regular and punctual collection, and which may be obviated by more efficient measures, the former estimate is continued.

From the postage of letters, founded on an estimate of the Postmaster-General,

35,000

From fees on letters patent, estimated at

660

From dividends on stock of the Bank of the United States,

160,000

From the proceeds of the sinking fund, calculated on the stock actually purchased, and redeemed on the 30th of September, 1795, appropriated to the redemption of the 6 per cent. stock,

88,242 79

The principal of the foreign debt and of domestic loans, which will fall due before the year 1797, is estimated at \$4,514,100, which sum may be continued on loan, in the following manner, viz:

From the proceeds of a loan to be negotiated in the year 1796, pursuant to the first section of the act, entitled "An act making further provision for the support of the public credit, and for the redemption of the public debt," to be applied to the purpose therein mentioned,

1,000,000

From the proceeds of a loan to be negotiated in the year 1796, pursuant to the tenth section of the last recited act, to be applied as follows, viz:

To the payment of the instalment of the foreign debt, which will fall due in 1796,

414,100

To the payment of two instalments of the loan of two millions, had of the Bank of the United States, for stock,

400,000

To the payment of the instalments due on the loans obtained for defraying the expenses of foreign intercourse, in case the appropriated revenues should not prove sufficiently productive during the year 1796, not exceeding, however, the sum of

400,000

1,214,100

To be applied to the discharge of such sums as shall be appropriated for the current service, the said loan to be reimbursed out of the proceeds of any revenues of the United States, not otherwise appropriated, which shall accrue during the year 1796, not exceeding

2,300,000

Dollars, 11,257,421 37

4th CONGRESS.]

No. 86.

[1st SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, DECEMBER 18, 1795

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That, pursuant to the act, entitled "An act supplementary to the act making provision for the debt of the United States," and in conformity to resolutions agreed upon by them, and severally approved by the President of the United States, they have caused purchases of the said debt to be made through the agency of Samuel Meredith, Esq. Treasurer of the United States, subsequent to their report, dated the 18th day of November, 1794, to the amount of forty-two thousand six hundred and thirty-nine dollars and fourteen cents, for which there have been paid, including a sum of one hundred and sixty dollars, allowed for commissions on purchases, formerly made and reported, the sum of thirty-seven thousand six hundred and twelve dollars and thirty-seven cents, in specie.

That the documents accompanying this report, marked A, B, C, shew the aforesaid purchases generally, and in detail, including the places where, the times when, the prices at which, and the persons of whom, the purchases were made.

That the purchases now and heretofore reported, amount, together, to two millions three hundred and seven thousand six hundred and sixty-one dollars and seventy-one cents, for which there have been paid, in specie, one million six hundred and eighteen thousand nine hundred and thirty-six dollars and four cents, as will more particularly appear from the document marked A.

That there remains at this time, in the hands of their said agent, the sum of seventy thousand nine hundred and sixty-eight dollars and fifteen cents, arising from dividends subsequent to the first day of April last, on stock heretofore purchased and redeemed, which sum, with the dividends to be made thereon at the close of the present year, and other funds appropriated by law, will be applied, on the first day of January ensuing, to the reimbursement of the six per cent. stock, bearing a present interest, pursuant to the directions contained in the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt."

On behalf of the Board.

JOHN ADAMS.

December 18, 1795.

No. 6,497.

TREASURY DEPARTMENT, *Auditor's Office, February 18, 1795.*

I hereby certify that I have examined and adjusted an account between the United States and Samuel Meredith, agent to the commissioners named in the acts of Congress, passed on the 12th of August, 1790, and 8th May, 1792, for reducing the domestic debt, for purchases of said debt, made by him, from the 23d January, to the 7th of February, 1795, inclusive, and find that he is chargeable on said account:

To funds assigned for the extinguishment of the public debt, for amount of warrant, No. 4,339, drawn in his favor, being for interest due in the quarter ending 31st December, 1794, on stock standing to the credit of the commissioners for the reduction of the public debt, per statement, \$18,657 18

I also find that the following purchases have been made by the said agent, within the period abovementioned, viz:

In funded six per cent. stock, domestic debt, bearing interest from 1st January, 1795, purchased at nineteen shillings and eight pence on the pound,	\$400 00
Do. bearing interest from same date, purchased at nineteen shillings and eleven pence on the pound,	3,048 69
In funded six per cent. stock, assumed debt, bearing interest from same date, purchased at nineteen shillings and eleven pence on the pound,	10,793 21
In six per cent. deferred stock, domestic debt, purchased at thirteen shillings and four pence on the pound,	5,985 81
In six per cent. deferred stock, assumed debt, purchased at thirteen shillings and four pence on the pound,	733 63
	<u>\$20,961 34</u>

For which purchases the said agent has paid in specie, agreeably to a particular statement herewith, the sum of \$18,657 18

As will appear from the statement and vouchers herewith transmitted for the decision of the Comptroller of the Treasury thereon.

4th Congress.]

No. 87.

[1st Session.]

PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JAN. 4, 19, AND FEB. 3, 1796.

TREASURY DEPARTMENT, December 31st, 1795.

SIR:

Agreeably to what was proposed by the committee of the House of Representatives at the conference with them on the 26th instant, I have now the honor to present a statement of the debts of the United States, with a view of the sums which will be annually requisite for discharging them.

1st. Of the debts due in Amsterdam and Antwerp, for loans obtained under the late and present Governments. The amount of these loans, exclusive of certain premiums with which one of them is charged, amounted, on the first of January, 1795, to thirty millions and five hundred thousand guilders, equal, at the exchange of forty cents per guilder, to \$12,200,000.

The annexed statement, marked A, shews, in detail, the several loans which constitute this description of debt, the rates of interest payable thereon, and the sums which, according to existing contracts, are reimbursable in each year. It is to be observed, however, that the sums stated in dollars, are calculated at par, or forty cents per guilder; the sums which may be really necessary to effect reimbursements, cannot be ascertained, and will vary, from time to time, according to the course of exchange.

2d. Of the domestic funded debt, bearing a present interest of six per centum per annum.

This debt, on the 31st of December, 1794, amounted to \$29,046,730 62, but, by subscriptions under the supplementary funding act, passed on the 28th of January, 1795, it had increased, on the 30th of September, 1795, to \$29,310,856 86.

In this last capital is included the sum of \$1,167,164 58, which has been purchased or redeemed; the interest of which is vested in the commissioners of the sinking fund; also the stock created by funding the balances due to certain States, in consequence of the report of the late board of commissioners in their favor; which balances originally amounted to \$2,345,056.

By the act of the last session, providing for the redemption of the public debt, the commissioners of the sinking fund are instructed to commence the reimbursement of the six per cent. stock, bearing a present interest on the first of January ensuing, and to continue the same annually, until the said stock is fully redeemed. The sum placed to the credit of the sinking fund, and the balances standing to the credit of certain States, in consequence of the report of commissioners in their favor, are, however, excepted by the law from reimbursement.

The annexed statement, marked B, shews the annuity necessary to complete the payment of the stock subscribed on the 30th of September; other subscriptions, though not to any great amount, have been, and will continue to be, made, until the close of the present year.

The interest and redeeming annuity, exclusive of the sum funded in favor of certain States, will require

\$2,274,624 13
But to reimburse the said balances to States, there would be necessary the further sum of 46,901 12
Amounting to <u>\$2,321,525 25</u>

It is proper, however, to observe, that, by a law passed on the 2d of January, 1795, the balances due to States are, on certain conditions, not now controllable by the United States, subject to be transferred, at any time before the 2d of January, 1797, and that said balances, when so transferred, are subject to reimbursement.

As the redeeming annuity is, therefore, unsusceptible of calculation at present, and may, with the interest, amount to \$2,321,525 25, this last sum is assumed, in the general statement which is annexed, as the annual charge upon the revenue.

This annuity will be necessary for the object before stated, until the end of the year 1817. During the year 1818 it will decline to \$1,862,501 63, and will then be liberated by the extinguishment of the debt.

3d. Of the funded domestic debt, bearing interest of six per centum per annum, after the year 1800.

This debt, on the 31st of December, 1794, amounted to \$14,523,365 45; but on the 30th of September, 1795, it had increased by additional subscriptions to \$14,561,934 41.

In the capital last mentioned, is included the sum of \$929,220 14, which has been placed to the credit of the sinking fund, and a sum of \$1,172,528, arising from balances due to certain States, in consequence of the report of the late board of commissioners in their favor.

The interest on this debt will commence on the first of January, 1801; the first reimbursement of principal is to be made on the first of January, 1802; the credit to the sinking fund, and the balances due to certain States, which may remain untransferred, are not subject to reimbursement.

The interest and redeeming annuity, exclusive of the balances originally funded in favor of certain States, will require

\$1,122,919 78
And to redeem the balances originally credited to certain States, the further annuity of 23,450 56
Amounting to <u>\$1,146,370 34</u>

It being very uncertain whether any part of the balances due to States will remain untransferred till the year 1802, and there being important reasons in favor of a reimbursement of the whole debt on uniform principles, the sum last stated is assumed as what will probably be the annual charge upon the revenue.

This annuity will continue from the year 1801 to the year 1823; during the year 1824, it will fall to \$924,020 76, and will then be liberated.

4th. Of the domestic funded debt, bearing interest at 3 per centum per annum.

This debt, on the last day of December, 1794, was \$19,484,840 68; on the 30th of September, 1795, it had increased by new loans to \$19,569,909 63.

The sum purchased or redeemed, and passed to the credit of the sinking fund, was \$607,097 27.

Notwithstanding this debt is redeemable at the pleasure of the United States, and though funds are, by the act of March 3d, 1795, eventually destined for that purpose, yet, as the appropriation is conditional and revocable by Congress, nothing more is stated as a charge upon the revenue, than the annual interest, being \$587,097 28.

5th. Of the domestic funded debt, bearing interest at five and one half per centum per annum.

This debt has lately been created by a subscription at the treasury, of that part of the loans obtained of France during the late war, which remained unpaid, and which bore interest at five per centum per annum, and amounts to \$1,848,900.

This species of debt is liable to be increased by subscriptions of the debt due in Holland, bearing five per cent. interest; but any increase will operate an equivalent reduction of the foreign debt; the interest is payable quarterly, from and after the first of January, 1796, the annual sum requisite for this object is \$101,669 50.

6th. Of the domestic funded debt, bearing interest at 4½ per centum per annum.

This, like the debt last mentioned, has been produced by a subscription of a part of the sum due to France, and arises from the loans which bore an interest of 4 per centum; the amount is \$176,000.

To discharge the interest, there will be required annually the sum of \$7,920.

7th. Of the unfunded debt, contracted during the late war.

This debt is composed of loan office and final settlement certificates, indents of interest, certificates of the Register of the Treasury, credits on the public books, and unliquidated claims. The amounts cannot be precisely ascertained, but, on the principles of former estimates, which cannot be materially erroneous, the principal is stated at

And the arrearages of interest, prior to 1791, at	\$984,811 09
	398,026 28
Amounting to	<u>\$1,382,837 37</u>

Agreeably to the contracts expressed in the certificates of unfunded debt, the principals bear an interest of 6 per centum per annum; the arrearages of interest, prior to the year 1791, on being subscribed to the loan opened for the domestic debt, become 3 per cent. stock.

As yet, however, the acts of Congress have contained no provision for the payment of interest on this debt, except on that part which has been registered at the treasury, and then only for a payment on account of interest, equivalent to what would be payable in consequence of a subscription to the loan.

On the principles which have governed former appropriations, there would be necessary, until, and including, the year 1800, the sum of \$51,333 22, and after the year 1800, the sum of \$71,029 44.

As, however, the amount of the unfunded debt is uncertain, and as no principles for the reimbursement thereof have been established, the sum last stated is assumed as the annual charge proper to be estimated for this object.

8th. Of the domestic loans, obtained under authority of the present Government.

The annexed statement, marked C, shews, in detail, the several loans which had been obtained on the 30th of September, 1795, amounting to \$5,700,000. A further sum of \$500,000 will be obtained at the close of the present year, which will increase this description of debt to \$6,200,000.

In this sum is included one million four hundred thousand dollars, being the amount of the instalments which remain unpaid of two millions, had of the Bank of the United States, for an equal sum of the capital stock of the said bank; according to contract, this loan bears an interest of six per centum per annum, and is reimbursable in instalments of \$200,000 at the close of the years, from 1795 to 1801 inclusive.

There is also included in the aggregate amount before stated, the sum of one million of dollars, borrowed of the Bank of the United States and the Bank of New York, for expenses incident to the intercourse of the United States with foreign nations; four hundred thousand dollars of this loan will fall due in the year 1796, and the remainder at the close of the years 1797, 1798, and 1799, in equal instalments of two hundred thousand dollars each.

The other loans, with that to be made at the close of the present year, will require provision in the course of 1796.

It being evident that these loans, especially those which will fall due in the course of the ensuing year, must be continued by new contracts, the annual interest only is introduced into the general statement which is annexed; this interest, for reasons which will be developed in a subsequent part of this communication, is calculated at 6 per centum, or three hundred and seventy-two thousand dollars.

The several sums before stated have been brought into an aggregate view in the annexed table, marked D, the last column of which exhibits the sums which are estimated as being necessary to be provided in addition to the ordinary expenses of Government.

If a revenue adequate to the payment of the sums included in this estimate were to be established, the following reductions of the public debt might be effected.

At the close of the year 1809, the whole foreign debt, amounting to twelve millions two hundred thousand dollars, would be discharged, and an annuity of \$573,632 02, now required for the payment of interest, would revert to the public.

At the close of the year 1818, the funded domestic debt, bearing a present interest of 6 per cent., would be discharged. This debt amounts to \$29,310,856 86 the annuity then liberated would be \$2,321,525 25.

At the close of the year 1824, the funded 6 per cent. stock, bearing a future interest, amounting to \$14,561,934 41, would also be reimbursed, when a further annuity of \$1,146,370 34 would be liberated.

The act of the last session provides fully for the fulfilment of the two last mentioned objects, by an absolute appropriation of revenue.

After the reimbursement before mentioned, there would still remain the following sums of the existing debt:

The stock bearing 3 per cent. interest, being	\$19,569,909 63
The stock bearing 5½ per cent. interest	1,848,900 00
The stock bearing 4½ per cent. interest	176,000 00
The capital of the present unfunded debt, with the arrearages of interest prior to 1791, estimated at	1,382,837 37
And the capital existing in loans of the Bank of the United States and Bank of New York,	6,200,000 00
Amounting, in the whole, to	<u>\$29,177,647 00</u>

But, if a revenue were to be established, equal to what will be requisite to satisfy the public engagements upon the scale of expenditure which will be necessary in the year 1801, the whole of the public debt might be extinguished, by payment or purchase, at or before the close of the year 1824, as also a very considerable additional debt, if any such should arise, out of future contingencies.

This view of the public engagements will, it is presumed, demonstrate to the committee, that, in the arrangements which have been hitherto made, an attention has not been wanting to secure a right of reimbursing the debt, fully, if not more than equal, to what the United States can exercise, and that the unforeseen events which have lately happened in Europe, render it necessary to combine some efficacious plan for obtaining loans, with any augmentation of the revenue which it may now be judged expedient to establish.

After a full consideration of different expedients, it has appeared to me most eligible to propose a commutation of the whole debt due to the Bank of the United States, into a funded domestic stock, bearing interest at six per centum per annum, transferable at the treasury and loan offices, respectively, and irredeemable for such a period as will invite purchases at par.

Considering the great capitals which will soon be demandable, or which are in a train of reimbursement in consequence of the act of the last session, it is evident that, if the proposed new stock were to be declared irredeemable for a period of twenty or twenty-five years, still the purchase or redemption of the remaining debt would be sufficient for the employment of any revenues which can readily be acquired. It will also appear, from the table marked D, that such an arrangement would leave it in the power of the United States to reimburse the proposed new stock at a favorable period, by the application of revenue which will then be liberated, in consequence of the final reimbursement of the 6 per cent. stock, bearing a present interest.

The utility of the proposed measure can, I presume, receive but little illustration, beyond that afforded by a naked exhibition of the public engagements.

It is, indeed, very probable that the final payment of the public debt, instead of being postponed by any existing stipulations which forbid reimbursements, will, in fact, be rendered additionally burdensome, if it be not somewhat retarded by those conditions which require repayments at fixed periods.

The difficulties which are now experienced, in respect to the foreign debt, effectually demonstrate the impolicy of unnecessarily contracting engagements which cannot be satisfied directly from the proceeds of the revenue. At no time will those who negotiate loans for the public be able to calculate the value of money, or the probability of an increase or reduction of the rate of interest, with greater precision than those who lend. At all times must the borrower be exposed to certain expenses, risks, and embarrassments, for which no equivalent can be obtained.

Among the reasons which recommend a commutation of the temporary debt due to the Bank of the United States, the following deserve notice:

1st. That this debt was contracted for the very beneficial consideration of an equal sum of the capital stock of that institution, or, it consists of sums advanced for the public service, in anticipation of the revenue. In these respects the debt due to the bank may be fairly considered as first in merit and importance.

2d. That the proposed commutation will enable the bank to grant such further loans as the public exigencies may require, without exposing the United States to certain expenses which are always incident to loans had of individuals.

3d. That, through the agency of the bank, sales of stock can be made to the best possible advantage, and the benefit of any premium which can be obtained, be secured to the United States.

This last consideration is of much importance: for, though the proposed stock might not, in the present moment of commercial enterprise, command a premium, yet there can be but little doubt that it would bear a price considerably above par, at no distant period. While, therefore, any present exigencies would be supplied on the most favorable terms, a certainty would remain, that the real value of the stock would accrue to the public.

I have the honor to be, with perfect respect, sir, your obedient servant,

OLIVER WOLCOTT, Jun. *Secretary of the Treasury.*

To the Hon. WILLIAM SMITH, Esq.
*Chairman of the Committee of Ways and Means
of the House of Representatives.*

A.

A general statement of the foreign debt of the United States on the 31st December, 1795, with a schedule of the parts of principal which, by the terms of the several loans, became annually payable, together with the interest, premiums, gratifications, and commissions, thereon, until its final extinction in the year 1809.

PRINCIPAL OF THE FOREIGN DEBT.	Guilders.	Guilders.	Dolls. at 40 cts. per guilder.
Loan of 5,000,000 guilders, effected at Amsterdam by the late Government, per contracts of 11th June, 1782, at 5 per cent. interest per annum, remaining unpaid on the 31st December, 1795,	3,000,000		
Loan of 2,000,000 ditto, per contract of March 9th, 1784, at 4 per cent. per annum,	2,000,000		
Loan of 1,000,000 ditto, per contract of June 1st, 1787, at 5 per cent. per annum,	1,000,000		
Loan of 1,000,000 ditto, per contract of March 13th, 1788, at 5 per cent. per annum,	1,000,000		
Total amount of loans effected by the late Government, -		7,000,000	2,800,000
Loans effected by the present Government, viz:			
<i>At Amsterdam.</i>			
Loan of 3,000,000, per contract of February 1, 1790, at 5 per cent. interest per annum,	3,000,000		
Loan of 2,500,000, per contract of March 2, 1791, at 5 per cent. interest per annum,	2,500,000		
Loan of 6,000,000, per contract of December 14, 1791, at 5 per cent. interest per annum,	6,000,000		
Loan of 3,000,000, per contract of December 24, 1791, at 4 per cent. per annum,	3,000,000		
Loan of 3,000,000, per contract of August 9, 1792, at 4 per cent. per annum, whereof only received -	2,950,000		
Loan of 1,000,000, being a reloan of the first instalment due on the 1st June, 1793, on the loan of 5,000,000, per contracts of 11th June, 1782, at 5 per cent. per annum, -	1,000,000		
Loan of 3,000,000, per contract, dated 10th April, 1794, at 5 per cent. per annum, -	3,000,000		
<i>At Antwerp.</i>			
Loan of 3,000,000, per contract, dated 30th November, 1791, of which loan 950,000 have been suppressed, at 4½ per cent. interest per annum, -	2,050,000		
Total amount of loans effected under the present Government, -		23,500,000	9,400,000
Total amount of the principal of the foreign debt unpaid on the 31st December, 1795, exclusive of 467,500 guilders, being the premiums and gratifications on the loan of March 9, 1784, -		30,500,000	12,200,000

STATEMENT A—Continued.

2d.

Schedule of the annual sums requisite to discharge the interest and principal of the debt bearing six per cent. interest.

The debt bearing a present interest of six per cent. exclusive of the balances originally credited to certain States, amounted, on the 30th September, 1795, to 25,798,636 dollars and 28 cents, on which an annuity of 8 per cent. per annum is payable, from the close of the year 1795 to the close of the year 1817, inclusive; and, during the year 1818, an annuity of 6.369 per cent. which will complete the reimbursement: Therefore,

	8 per cent. on 25,798,636 28	is	2,063,890 90
The sinking fund, - - - - -	1,167,164 58, at 6 per cent.		70,029 87
The balances originally credited to certain States, - - -	2,345,056 00 do.		140,703 36
Annual sum necessary, on the principles above stated, from the year 1795, to the year 1817, inclusive, and, according to the act of March 3d, 1795, supposing no part of the balances, due to States, to be transferred, - - - - -			2,274,624 13
Annuity of 6.369 per cent. necessary to complete the reimbursement in the year 1818, on the principles before stated, - - - - -			1,853,848 37
But, to redeem the balances placed to the credit of certain States, an additional sum of \$46,901 12, will be necessary, from the year 1795 to 1817, inclusively, making the whole annuity, during the said period, equal to - - - - -			2,321,525 25
And, during the year 1818, when the said annuity would decline to 6.369 per cent. on the whole capital, exclusive of the sinking fund, a sum of - - - - -			1,862,501 63

3d.

Schedule of the annual sums requisite to discharge the interest and principal of the debt bearing six per cent. interest, from the close of the year 1800.

The debt bearing interest at six per cent. from the close of the year 1800, exclusive of the balances originally credited to certain States, amounted, on the 30th September, 1795, to 12,460,186 dollars and 27 cents; on which an annuity of 8 per cent. per annum is payable, from the close of the year 1801, to the close of the year 1823, inclusive, and, during the year 1824, an annuity of 6.369 per cent., which will complete the reimbursement: Therefore,

	8 per cent. on 12,460,186 27	is	996,814 90
The sinking fund, - - - - -	929,220 14, at 6 per cent.		55,753 20
The balances originally credited to certain States, - - -	1,172,528 00 do		70,351 68
Annual sum necessary, on the principles above stated, from the year 1801 to the year 1823, inclusive, and according to the act of March 3d, 1795, supposing no part of the balances due to States to be transferred, - - - - -			1,122,919 78
Annuity of 6.369 per cent. necessary to complete the reimbursement in the year 1824, on the principles before stated, - - - - -			919,694 14
But, to redeem the balances placed to the credit of certain States, an additional sum of \$23,450 56, will be necessary from the year 1801, to 1823, inclusive, making the whole annuity, during said period, equal to - - - - -			1,146,370 34
And, during the year 1824, when the said annuity would decline to 6.369 per cent. on the whole capital, exclusive of the sinking fund, a sum of - - - - -			924,020 76

4th.

OF THE THREE PER CENT. DEBT.

Annual sum necessary to discharge the interest on \$19,569,909 63, 3 per cent. stock, is - - - - - 587,097 28

Funded domestic debt, subscribed before the 30th September, 1795, under the act of March 3d, 1795, providing for the support of public credit, and for the redemption of the public debt, viz:

5th.

Arising from subscriptions of that part of the debt due to France, which bore an interest at 5 per cent. and which has been converted into stock, bearing interest at 5½ per cent. - - - - - 1,848,900 00
Annual interest on the 5½ per cent. stock, from and after 1st January, 1796, - - - - - 101,689 50

6th.

Arising from subscriptions of that part of the debt due to France, which bore an interest at 4 per cent. and which has been converted into stock, bearing interest at $4\frac{1}{2}$ per cent.	-	-	176,000 00
Annual interest on the $4\frac{1}{2}$ per cent. stock, from and after 1st January, 1796,	-	-	7,920 00

7th.

UNFUNDED DEBT.

This debt consists in certificates issued by the Register of the Treasury, loan office and final settlement certificates, indents of interest, credits at the treasury, and unliquidated claims, estimated, on the first of January, 1795, as follows, viz:

Debt due to foreign officers, for which an appropriation has been made, and which, of course, has been vested in the sinking fund. the principal being.	-	-	186,988 23
And the interest, to the end of 1790,	-	-	22,438 58
The registered debt, and other objects before mentioned,	-	-	1,184,323 40
The arrearages of interest, to the end of the year 1790, which become 3 per cent. stock, on being funded,	-	-	376,851 74
			<u>209,426 81</u>
			1,561,175 14
			<u>1,770,601 95</u>
But this debt has, by subscriptions, and conversions into funded debt, between the 1st January and the 30th September, 1795, been diminished the sum of	-	-	387,764 58
Leaving the unfunded debt, on the 30th of September, 1795, on the principles of former estimates, the sum of	-	-	<u>1,382,837 37</u>
This sum, on being subscribed to the loan, would, according to former estimates, produce—			
Funded 6 per cent. stock, bearing present interest,	-	-	656,540 71
Funded 6 per cent. stock, bearing interest after 1800,	-	-	328,270 38
Funded 3 per cent. stock, bearing present interest,	-	-	398,026 28

If the unfunded debt were all subscribed on the principles before stated, the following annuities would be requisite:

To discharge the interest on the 6 per cent. stock, bearing a present interest,	-	-	39,392 44
To discharge the interest on the 6 per cent. stock, bearing interest after 1800,	-	-	19,696 22
To discharge the interest on the 3 per cent. stock, bearing a present interest,	-	-	11,940 78
			<u>\$71,029 44</u>

TREASURY DEPARTMENT, 31st December, 1795.

C.

A statement of the domestic loans on the 30th September, 1795, shewing the periods at which the same become redeemable according to contracts.

\$1,400,000, Remaining unpaid of \$2,000,000 borrowed under the act, entitled "An act to incorporate the subscribers to the Bank of the United States," bearing interest at six per cent. per annum, payable by instalments on the 31st December, of the several years 1795 to 1801, inclusive, of \$200,000 each.			
300,000, Remaining unpaid, of \$400,000 borrowed under the act, entitled "An act for raising a further sum of money for the protection of the frontiers, and for other purposes therein mentioned," bearing interest at 5 per cent. per annum, and payable by instalments.			
	On the 1st November, 1795,	\$100,000	
	1st December, 1795,	100,000	
	1st January, 1796,	100,000	
			<u>\$300,000</u>
1,000,000, Borrowed under the act authorizing the loan of \$2,000,000, bearing interest at 5 per cent. per annum, payable on the 1st January, 1796.			
200,000, Borrowed of the Bank of New York, under the act of the 20th March, 1794, bearing interest at 5 per cent., payable on the 8th June, 1796.			
1,000,000, Borrowed under the act authorizing the loan of \$2,000,000, bearing interest at 5 per cent. per annum, payable on the 1st April, 1796.			
800,000, Borrowed under the act, entitled "An act for the reimbursement of a loan authorized by an act of the last session of Congress," bearing interest at 6 per cent. per annum, and payable by instalments on the			
	31st December, 1796,	\$200,000	
	31st December, 1797,	200,000	
	31st December, 1798,	200,000	
	31st December, 1799,	200,000	
			<u>\$800,000</u>
500,000, Borrowed under an act making further appropriations for the military and naval establishments, and for support of Government, passed 3d March, 1795, bearing interest at 6 per cent. per annum, from 1st April, 1795, payable 1st April, 1796.			
500,000, Borrowed under the aforesaid act of 3d March, 1795, bearing interest at 6 per cent. per annum, payable 1st October, 1796.			
<u>\$5,700,000</u>	Amount of domestic loans on the 30th September, 1795.		

NOTE.—An additional loan, of \$500,000, will be made at the close of the year 1795.

TREASURY DEPARTMENT, 31st December, 1795.

D.

An aggregate statement of the sums which will be requisite for the payment of interest, and certain reimbursements of the public debt, from the year 1795, to the year 1824, inclusive.

In the year	(1.) Sums required for principal and interest of the foreign debt.	(2.) Sums required for the principal and interest of the 6 per cent. stock, bearing a present interest.	(3.) Sums required for the principal and interest of the 6 per cent. stock, bearing a future interest.	(4.) Sums required for the interest of the 3 per cent. stock.	(5.) Sums required for the interest of 5½ per cent. stock.	(6.) Sums required for the interest of the 4½ per cent. stock.	(7.) Sums required for the interest of the unfunded debt.	(8.) Interest on the domestic loans as proposed.	Total sums requisite in each year, on the principle of this statement.
1795	1,032,321	2,321,525 25	- - -	587,097 28	101,689 50	7,920	71,029 44	372,000	4,338,972 97

[Presented to the House of Representatives, February 3, 1796.]

TREASURY DEPARTMENT, 26th January, 1796.

SIR:

The object of this communication is to represent to the Committee of Ways and Means that certain additional provisions appear to be advisable, in order to a due execution of the act, passed during the last session of Congress, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt."

The eleventh section of the recited act directs, *that the commissioners of the sinking fund shall cause to be paid yearly, such sums as, according to the right for that purpose reserved, may rightfully be paid for and towards the reimbursement or redemption of the debt or stock, bearing or to bear an interest of six per centum per annum.*

In respect to the stock bearing a present interest, it was directed that the reimbursement should commence on the first day of January, 1796. Upon the stock which will bear interest after the year 1800, the reimbursement is to continue on the first day of January, 1802.

The sum which may rightfully be paid in one year, is eight per centum per annum, upon the original capital debt or stock.

As the injunctions of the law upon the commissioners of the sinking fund are unconditional, and as permanent funds have been vested and appropriated, it is conceived that a successive reimbursement annually, of the debts before mentioned, has become an irrevocable stipulation with the creditors. The stock bearing a present interest has, therefore, by the act of the last session, been converted from an annuity of six per centum per annum, for an indefinite period, into an annuity of eight per centum per annum, for a period of somewhat less than twenty-four years, commencing with the year 1795.

The stock upon which interest was to commence in 1801, is a like annuity from that period.

But a stipulation in the fourth section of the act, entitled "An act making provision for the debt of the United States," requires a *quarterly* payment of interest, and this stipulation remains in force; a distribution of the annuity of eight per centum per annum, into four quarterly yearly dividends, is, therefore, necessary to satisfy the contract with the creditors.

If the dividends on the last days of March, June, and September, in each year, were to be confined to a simple payment of interest upon the *unredeemed capital*, the contract would be strictly satisfied; the fourth quarterly dividend, or that to be made on the last day of December, annually, might, in this case, be calculated at such a rate, as would complete the sum of eight per centum, for each entire year; this appears to have been the design of the law, in contemplating a distinction between the payments on account of *principal* and those on account of interest.

The effect of such a distribution of the annuity of eight per centum, is exhibited in the annexed table, which shews the dividends of interest, for the first three quarters of a year, in a decreasing ratio, proportioned to the reduction of *capital* by reimbursement; while the dividends to be made at the end of the year, for *principal and interest*, are represented as increasing by the amount of liberated interest; the dividends for the entire year being uniformly eight per centum upon the original capital.

Upon this statement, it may be observed, that it has been the established practice at the treasury and loan offices, to suspend all transfers for fourteen days preceding the expiration of each quarter; that time being found by experience to be indispensably necessary for the purposes of balancing the books, and calculating the dividends upon the stock held by individual creditors: a view of the annexed table will, however, prove, that the labor of stating the dividends must be immensely increased, if a distinction between the payments on account of interest and those on account of principal is to be preserved. But the trouble and expense which would be created in the public offices, would not be the only or greatest inconvenience. Such a system of reimbursement would, after a few years, render it necessary to accumulate in the treasury, and suspend from circulation, very considerable sums; the effects of such an accumulation might be inconvenient to commerce, and could not be materially advantageous to the public. As the rates of the dividends would vary from year to year, the true value of the stock could only be ascertained by intricate calculations, to which many of the creditors would be incompetent. Moreover, the rates of the dividends, for interest for several of the last years, would, upon small sums, be too inconsiderable to induce the creditors to a cheerful compliance with certain forms which have been established with reference to the public security, and the responsibility of the public officers. This last objection is very important; as every degree of loss and vexation to the creditors, would not fail to produce a corresponding injury to the public credit.

Notwithstanding it is believed that the powers granted by the seventeenth section of the act of the last session might be justifiably construed in such a manner as would obviate some, if not all the inconveniences which have been stated, yet, in a matter of importance like the present, the decision of the Legislature is desirable. It is, therefore, proposed, that the rates of the quarterly dividends, until the final reimbursement of the six per cent. stock, bearing interest at present, and after the year 1800, be now declared and established by law.

Two propositions are submitted for consideration:

1st. That, in respect to the stock bearing a present interest, it be declared, that there shall be dividends made on the last days of March, June, and September, from the present year to the year 1818, inclusive, at the rate of one and one half per centum upon the original capital; that there be dividends made on the 1st days of December, from the present year to the year 1817, inclusive, at the rate of three and one half per centum upon the original capital, and that a dividend be made, on the last day of December, in the year 1818, of one dollar eighty six cents and nine mills per centum, upon the original capital, in full of said stock.

Or, 2d. That, in respect to said stock, bearing a present interest, the following dividends be established, namely: from the present year to the year 1806, inclusive, a dividend of one and one half per centum, on each of the last days of March, June, and September, upon the original capital; and upon each of the last days of December, during the said period, a dividend of three and one half per centum upon the original capital; from the year 1807, to the year 1818, inclusive, a dividend of one per centum, on each of the last days of March, June, and September, upon the original capital; from the year 1807, to the year 1817, inclusive, on each of the last days of December, a dividend

of five per centum, and upon the last day of December, in the year 1818, a dividend of three dollars, thirty-six cent s and nine mills per centum, upon the original capital, in full of said stock.

If either of these propositions shall be adopted, in respect to the stock bearing a present interest, it will be proper to establish the same rule for reimbursing the stock upon which interest will commence after the year 1800.

Either of the plans proposed will admit of an easy execution in the public offices, and either of them may be adopted consistently with the public engagements. The first proposition would be most favorable to an equal and regular circulation of the public revenue, and would serve to impress upon the stock the most uniform value. It is liable, however, in a greater degree than the second, to what may be deemed an objection common to both; namely, that of requiring an expenditure of money before the time actually stipulated for payment, by the existing contract. The considerations of public utility, which have been stated, will, however, it is presumed, more than counterbalance the objection.

It is further proposed, as an amendment to the act of the last session, that provision be made for reimbursing the balances, bearing and to bear interest at six per centum, due to certain States, which were funded in consequence of an act passed May 31st, 1794. These balances, at present, constitute a part of the domestic funded debt, and unless they shall be reimbursed in course with the residue of said debt, it is apprehended that a degree of complexity will be introduced into the public accounts, unfavorable to a regular and satisfactory administration of the business of the treasury.

In deciding on the manner of executing the law, it has been judged inexpedient to renew the certificates in consequence of the annual reimbursements. It was, indeed, doubted, whether the operation would be practicable; at any rate, the expense to the public, and the trouble which would be produced to the creditors, were deemed insuperable objections. Accordingly, the creditors have been notified, that their certificates will not be recalled, and that transfers will be continued upon the original capital stock. The value of the stock will, therefore, be hereafter a matter of calculation, depending on the term for which the annuity of eight per centum per annum is to continue.

To guard purchasers against deception, an intimation of the arrangement which has been adopted, is expressed in the certificates which have been issued since the commencement of the present year.

It is, however, essential to the preservation of order in the public accounts, and to the security of negotiations of this description of stock, that all the certificates which may, at any time, be in a course of transfer, should possess a uniform character and value. That this uniformity will, in fact, be preserved, cannot be rendered sufficiently certain, unless the whole debt is subject to a regular reimbursement. It is now ascertained, that a considerable portion of the balances due to States, will not be transferred within the time limited by the act of January 2, 1795. Unless, therefore, a provision is made for reimbursing these balances in their present form, one of two consequences must follow: the United States must, hereafter, refuse to permit transfers to be made, however pressing the emergencies of the creditor States may be; or, two new denominations of funded stock must be admitted into circulation. It is conceived, that neither the magnitude of these debts, nor any objects of public utility, require that the exemption from reimbursement, contained in the act of the last session, should be continued. If, however, the proposition now made should be adopted by Congress, it will be proper that an option should be reserved to the States to receive or reject, at their pleasure, a reimbursement equivalent to that made on the residue of the six per cent. stock, at the commencement of the present year. It may, however, be safely presumed that each of the creditor States will readily comply with a measure obviously tending to produce an accommodation to the Government.

It is conceived to be a true construction of the law, that the annual reimbursement upon any stock, which may be in a state of transition to, or from, the loan offices or treasury respectively, and, on that account, not in a state to be included in a dividend at the usual period, may be lawfully made at the end of the ensuing quarter, at the office where the stock may then remain.

This construction is necessary to a due and regular execution of the law, and is supposed not to be inconsistent with the limitation which forbids the reimbursement of a greater sum than eight per centum, on account of principal and interest, in one year. It would be unreasonable if an act of the creditor were to be construed to preclude the right of the public to discharge the annuity at the regular period. If, however, any doubt should exist, as to the powers of the treasury upon this point, a legislative explanation will be advisable.

The trusts vested in the commissioners of the sinking fund, in respect to the reimbursement of the public debt, and for other purposes, are, at present, of high responsibility and importance, and such as will require frequent decisions upon representations from the Treasury Department. It is, in every sense, proper, that the documents received by the commissioners, and their determinations thereon, should be fully recorded, and carefully preserved, by some confidential person, to be appointed by them. An annual provision, of a sum not exceeding two hundred and fifty dollars, for the services of a secretary, will be sufficient for the object, and is advisable.

It is already known to the committee, that the proposal for converting the foreign debt into a funded domestic stock, has not been accepted by the creditors in Amsterdam and Antwerp. It was foreseen, that the trouble of maintaining a distant correspondence, the necessity of employing agents in this country, the chances of exchange, and the charges of insurance and commissions, would powerfully operate to deter the creditors from acceding to any commutation of their contracts, on the principles proposed. The additional interest of one half per centum was intended to counterbalance these inconveniences, which were, accordingly, estimated on a scale liberal for the creditors; whether the allowance will be considered by them as an adequate compensation, is uncertain. As, in accomplishing the object of a re-loan, the United States will necessarily have to oppose many interests, and some prejudices, it is desirable to render the proposal of the Government free from all *real* objections; that which has been urged with the most force, arises from the redeemable quality of the new stock.

The documents in the possession of the committee contain data, upon which an opinion is now expressed, that a renunciation of the right of redemption, until the year 1819, would be attended with no inconvenience to the United States, by prolonging the existence of the public debt.

Considering the great amount of the debt in Holland, the unsettled state of that country, and the extensive operations which either a re-loan or direct reimbursement must occasion, it is conceived to be advisable that a discretionary power, of appointing a commissioner or agent to superintend the foreign expenditures, should be vested in the President.

Though it is not certain that such an appointment will be necessary, yet there are sufficient grounds to recommend a provision for such a contingency.

I have the honor to be, with perfect respect, sir, your most obedient servant,

OLIVER WOLCOTT, Jun. *Secretary of the Treasury.*

The Hon. WILLIAM SMITH,

Chairman of the Committee of Ways and Means of the House of Representatives.

Statement exhibiting the operation of the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," in respect to the reimbursement of the six per cent. stock, bearing a present interest.

Term, being the close of the year	Rates per centum, due on the original capital in each year, after the payments made, to the end of the preceding years, are deducted.			Rates per centum, due for interest in the 1st, 2d, and 3d quarters of each year.		Rates per centum, payable at the end of the 4th quarter of each year, on account of principal and interest.

TREASURY DEPARTMENT, January 26th, 1796.

4th CONGRESS.]

No. 88.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 11, 1796.

Mr. GOODHUE, from the Committee on Commerce and Manufactures, to whom were referred the petitions of John Devereux, of William and Archibald McNeal, of Moses Myers, and of Wright White, severally praying for a remission of the duties on certain imported articles, which were afterwards destroyed by fire, and other casualties, made the following report:

Wright White states, that, in September last, he imported into New York, in the brig Polly, a quantity of sugar, from the West Indies, which was there landed, and the duties secured according to law; and that, afterwards, he re-shipped the said sugars, in the said brig, coastwise, from New York to Fairfield, and on the passage she was overset by a sudden squall, and the sugar nearly all lost; he, therefore, prays for a remission of the duties on the same.

John Devereux states, that he imported into the port of Newbern, in May last, a quantity of salt, which was landed, and the duties thereon secured according to law; and that, in August following, the whole of the said salt was destroyed by a violent storm; he, therefore, prays for a remission of the duties on the same.

William and Archibald McNeal, state, that they imported into Boston, in November, 1793, a quantity of hemp, which was landed, and the duties thereon secured according to law; that, in the July following, their ropewalk, together with the said hemp, was destroyed by fire; they, therefore, pray for a remission of the duties on the same.

The object, and ground of application, in those three petitions, being similar, the Committee would observe, that, however our feelings of compassion may be interested, in affording relief to the unfortunate, it becomes impracticable, if, to attain it, we must have recourse to principles which may lead us into endless difficulties and embarrassments; and, upon inquiring into the equity of claims of this nature, and the consequences that might follow, should they be admitted, the Committee are led to the following reflections:

That, whatever duty is imposed on an imported article, the duty becomes incorporated into the price or value of that article, after it is landed, and in the possession of the owner, in degree equally as much, as its first purchase money; and whether the duty be actually paid, or only secured, can make no difference; and if so, there seems to be no reason why the United States should be held, in cases where such goods are afterwards lost by accident, to remit the duty, any more than they should be to reimburse the amount of the first purchase: for, in no respect, ought the United States to be considered in the light of insurers of private property; and should the principle of accountability, on the part of the United States, be admitted in the case of those petitioners, who were the importers, there appears no reason why it should not extend to all cases of such loss, be the time ever so long from the time of importation, or the changes of ownership of such goods ever so frequent: besides, the evidence of the amount of such losses could not, from the nature of the circumstances usually attending them, be such as to secure the public from innumerable impositions. The Committee, therefore, (though with reluctance) are compelled to declare, as their opinion, that the prayer of the petitions of Wright White, John Devereux, and William and Archibald McNeal, cannot be granted, and that they respectively have leave to withdraw the same.

Moses Myers states, that he imported into the port of Norfolk, a quantity of coffee, of a very inferior quality; he, therefore, prays for an abatement of the duty, on that account.

The Committee would observe, that provision is already made by law, where goods have received damage, during the voyage, for an abatement of the duty; but no provision is made, nor ever ought to be made, for an abatement of any specific duty, on account of the article being of an inferior quality; they, therefore, are of opinion, that the prayer of the petition of Moses Myers cannot be granted, and that he have leave to withdraw the same.

[1st SESSION.]

PUBLIC CREDIT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 4, 1796.

Mr. WILLIAM SMITH made the following report:

The Committee of Ways and Means, to whom it was referred to report, whether further measures are necessary to reinforce the existing provisions for the public debt, having considered a letter from the Secretary of the Treasury, of the 26th of last month, on the subject of additional provisions, in order to a due execution of the act of the last session, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," recommend the following resolutions, viz:

1st. *Resolved*, That, in respect to the funded stock of the United States, bearing a present interest of six per cent., there shall be dividends made on the last days of March, June, and September, from the present year to the year 1818, inclusive, at the rate of one and one half per centum upon the original capital; that there be dividends made on the last days of December, from the present year to the year 1817, inclusive, at the rate of three and one half per centum upon the original capital; and that a dividend be made on the last of December, in the year 1818, of one dollar eighty-six cents and nine mills per centum, upon the original capital, in full of said stock.

2d. *Resolved*, That provision ought to be made for reimbursing, in the same proportions as the other six per cent. stock, the balances bearing and to bear interest, at six per centum, due to certain States, which were funded, in consequence of an act, passed May 31st, 1794.

3d. *Resolved*, That the commissioners of the sinking fund be authorized to appoint a secretary, for the purpose of recording and preserving their proceedings and documents; and that a sum, not exceeding two hundred and fifty dollars, be annually allowed the said secretary, for his services.

4th CONGRESS.]

No. 90.

[1st SESSION.]

DRAWBACK AND REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 8, 1796.

Mr. GOODHUE, from the Committee on Commerce and Manufactures, to whom were referred the several petitions of Israel Loring, sundry merchants of the cities of Philadelphia and New York, Joze Roiz Silva, Nehemiah Somes, and James Strange, made the following report:

Joze Roiz Silva states, that, in June, 1793, he imported into New York, in the brigantine Mary, from the island of Graciosa, one hundred and ninety-seven pipes and seven quarter casks of wine, subject to a duty of forty per centum ad valorem; that the said wine was duly inspected, and bonds given for the payment of the duties; but that the amount of duties could not then be ascertained, for want of an invoice, which, by some mistake, did not accompany the said wine.

That, about eleven months afterwards, the invoice arrived from Graciosa, which he presented to the collector of the district of New York, for the ascertainment of the amount of the duties payable thereon, but was informed by the said collector, that, in the statements of his accounts to the treasury of the United States, he had rated the duty on the said wines at twenty cents per gallon; and, although it appeared he had overrated the duties, inasmuch as he had transmitted his accounts to the treasury, the same must be discharged, and that he must look for relief from Congress. Accordingly, he paid the amount of duties thus overrated. In doing which, he states, that he paid two thousand five hundred and twenty-one dollars and sixty cents more than he ought to have paid, had the duties been estimated by the invoice, agreeably to law. He, therefore, prays for a reimbursement of the same.

The committee, under a persuasion that no fraud was intended by the petitioner, and the collector of the district of New York having certified that he should have corrected the error complained of, if application had been made to him therefor, before the transmission of his accounts to the treasury, as stated in the petition, do recommend the following resolution:

Resolved, That the collector of the district of New York be authorized, at any time within sixty days, to receive from Joze Roiz Silva, of the city of New York, merchant, invoices and other proofs respecting the value of a cargo of wines by him imported into the said district, in, or about the month of June, 1793, in the brig Mary, William Hopper, master, from the island of Graciosa; and if it shall appear, to the satisfaction of the said collector, that the said cargo, or any part thereof, was subject to a less duty than that charged to, and paid by, the said Joze Roiz Silva, therefor, then, and in such case, the said collector is hereby required to allow or refund to the said Joze Roiz Silva, such excess or sum as shall appear to have been overcharged and paid on the same, in like manner as if such invoices and proofs had been produced in due time.

James Strange and Nehemiah Somes, each, state, that they have lost a quantity of salt, the former on board of a vessel going from Norfolk to Richmond, by a violent gust of wind; and the latter in a store which was consumed by fire. They therefore pray for a remission of the duties on the same.

The committee having adopted principles in their report upon the petitions of Wright White and others, which were agreed to by the House, and which embraced these two cases, do, in conformity thereto, report, that the prayer of the petitions of James Strange and Nehemiah Somes ought not to be granted, and that they have leave to withdraw the same.

Israel Loring states that, in July, 1794, he imported into the port of New York, in the brig Diana, a quantity of Indigo, from New Orleans, on which the duties were secured according to law, and that, in August following, he re-shipped the said indigo, on board the brig Lydia, John H. Shackerly, master, for Amsterdam, under the inspection of one of the officers of the port, and his return was duly made to the custom house; and that, in the transaction of this business, every requisite was complied with, except that of giving bond and taking the oath prescribed by law, that the indigo should not be re-landed in the United States; that the omission was in consequence of the great number of persons who were in the office at the time he went to give bond and take the oath; and that the hurry of business he was then engaged in, and also conceiving that it might be done as well, at any other time; by means of which omission, the drawback on the exportation is not allowed, notwithstanding he has all the necessary proofs to show that the said indigo was, bona fide, landed and sold at Amsterdam.

He, therefore, prays for the interposition of Congress, and that the drawback on the said indigo may be allowed.

The committee, in considering this case, where proof is brought that the goods shipped underwent the inspection of the proper officer, before the shipment, and they were actually landed in a foreign port, are of opinion that relief ought to be granted to the petitioner, and, for that purpose, recommend the following resolution:

Resolved, That the collector of the district of New York be authorized to allow the drawback upon such a quantity of indigo as was imported into New York, from New Orleans, on the 10th of July, 1794, by Israel Loring, in the brigantine Diana, Allen Hill, master, and which was, on the 19th of August following, entered for exportation, on board the brig Lydia, John H. Shackerly, master, for Amsterdam, notwithstanding bonds were not given, and an oath was not taken, at the time of exportation: *Provided*, That every other requisite has been complied with, relative thereto, which, by law, is required, to entitle him to the same.

Sundry merchants of Philadelphia and New York, represent, by their petitions, that they are owners of ships entitled to the benefits or privileges of ships or vessels of the United States, and that registers have been obtained for them, agreeably to law; but that those registers have become invalid, in consequence of all the owners not having taken the oath required by the act concerning the registering and recording of ships or vessels, and transmitted the same, within ninety days, to the collector granting such registers, agreeably to the terms of the fifth section of the said act; by which means, their ships and cargoes are subject to the same duties as though their ships were foreign, and that such omissions were, in some cases, unavoidable, from the absence of some of the owners; in others, from ignorance of any such requisite; but in none, from wilful negligence. They, therefore, pray for relief from the very heavy extra duty, which, from that cause, they are subjected to.

The committee, taking into consideration the applications that have heretofore been made, as well as those now made, for relief, in the cases of invalid registers, are of opinion, that the several omissions, have, in a great measure, proceeded from this circumstance: that the former registering law had no such requisite as the present one has, and that this has been the chief source of the errors. They, therefore, willing to give relief, and, at the same time, to avoid a repetition of acts which have already been passed, for granting relief in similar cases, recommend the following resolution:

Resolved, That the Secretary of the Treasury be empowered to allow to such vessels and their cargoes, whose registers have already, or that may, before the close of the present session of Congress, become invalid, by reason of a non-compliance with the terms of the fifth section of the act concerning the registering and recording of ships or vessels, the same privileges and benefits they would have been entitled to, if no such invalidity had taken place: *Provided*, It shall appear to him that such non-compliance did not proceed from wilful negligence, or an intention of fraud.

4th CONGRESS.]

No. 91.

[1st SESSION.

INTERNAL REVENUES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 23, 1796.

Mr. WILLIAM SMITH made the following report:

The Committee of Ways and Means having taken into their consideration the subject of Internal Revenues, and the provisions requisite for improving the same, and for more effectually securing the collection thereof, recommend to the House the following resolutions viz:

1st. *Resolved*, That it will be expedient to abolish the tax laid on spirits distilled from materials of the growth or produce of the United States, at any other place than a city, town, or village, or at any distillery in a city, town, or village, at which there shall be one or more stills, which, singly, if only one, or together, if more than one, shall be of less capacity than four hundred gallons; and to collect this branch of the revenue from a tax on the capacity of the stills.

2d. *Resolved*, That the officers of the revenue ought to be authorized, by law, to require of the city distillers, and the refiners of sugar, the verification on oath of their books, once a quarter, and that it ought to be made the constant duty of such distillers and refiners, to exhibit their books if required.

3d. *Resolved*, That a time ought to be limited, within which the exporter of spirits, distilled within the United States, shall be entitled to a drawback; and that the drawback ought not to be granted, unless where the exportation is from the district or State where the same are distilled, or the next adjoining district or State.

4th. *Resolved*, That it would be expedient to modify the act imposing duties on licences to retailers of liquors, so as that the said retailers should pay in proportion to the amount of sales, so far as to divide them into three or four classes.

5th. *Resolved*, That it would be expedient, after demand made of any tax, (except on goods imported) and a neglect or refusal to pay, to authorize a collection thereof by distress.

6th. *Resolved*, That it would be expedient, after demand made of any such tax, and a neglect or refusal to pay, to allow the officer employed to collect the same, a certain mileage for his travel out to collect such tax, over and above the commission which he may be entitled to by law.

7th. *Resolved*, That provision ought to be made for allowing drawbacks upon spirits exported (via Mississippi) in vessels of less than thirty tons.

4th CONGRESS.]

No. 92.

[1st SESSION.

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 4, 1796.

Mr. GOODHUE, from the Committee on Commerce and Manufactures, to whom was referred the petition of Henry Messonnier, praying to be refunded a sum of money erroneously paid as duties on a quantity of coffee imported by him, made the following report:

Henry Messonnier states that, in February 1794, he made an entry at the port of Baltimore, of two hundred and sixty six hogsheads of coffee, imported in the French ship Paccareau, Captain Latour, of which quantity there were two hundred and fifty-two hogsheads on his own account, and the remaining fourteen hogsheads for account of

Champayne and Deyme; that the said Champayne and Deyme, by mistake, bonded for fourteen hogsheads of the wrong marks, in the amount of six hundred and fifty-five dollars and ninety cents; but, on finding their error, they gave a new bond for seven hundred and seven dollars and forty-three cents, being the amount of duty arising on the fourteen hogsheads of coffee, actually their own property, but omitted to cancel the former bond; that those bonds bear the same date, and were given to Otho H. Williams, then collector for the port of Baltimore; that, when the same became due, Mr. Robert Purviance had become collector, and had no power to grant relief to the petitioner.

The Committee, under the persuasion that duties have twice been paid on the same fourteen hogsheads of coffee, do recommend the following resolution:

Resolved, That the collector for the port of Baltimore do pay to Henry Messonier six hundred and fifty-five dollars and ninety cents, being the amount of duties paid on fourteen hogsheads of coffee, more than was imported, in the ship Paccareau, Captain Latour, in February, 1794.

[1st SESSION.]

INTERNAL REVENUE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 7, 1796.

TREASURY DEPARTMENT, *March 5th, 1796.*

SIR:

I have the honor to transmit, herewith, certain statements, which have been prepared by the Commissioner of the Revenue, in pursuance of the resolutions of the House of Representatives, passed on the 2d day of March 1795, and the 26th day of February 1796, with a report explanatory thereof, by that officer.

I have the honor to be, &c.

OLIVER WOLCOTT, *Jun. Secretary of the Treasury.*

The Honorable the SPEAKER of the House of Representatives.

A report of the Commissioner of the Revenue, required by the order of the House of Representatives of the 2d day of March, 1795, concerning the internal revenues of the United States.

TREASURY DEPARTMENT, *Revenue Office, February 29th, 1796.*

The order of the House of Representatives having been made at the expiration of its last term, a report could only be made to the present House. On the day following the receipt of the order, circular letters, communicating the substance thereof, were transmitted to the supervisors. These letters contained also explicit and particular instructions, intended to ensure the requisite attention to punctuality and to the necessary details, as will appear from the annexed copy. With a view to expeditious and easy communications from the supervisors to the inspectors, printed copies were transmitted to the former, for all of the inspectors of surveys as well as for themselves. As circumstances immediately preceding the order of the House had convinced those who had to pay the tax, that the revenue laws would be executed in future, and had removed some of the difficulties which had impeded and greatly disordered the antecedent business; it appeared expedient to reinforce, by the influence of this legislative call, the injunctions which had been previously given to settle and return, as far as was then possible, all that remained in arrear. To prevent inconvenience from accidents, and to increase impression, duplicates of those letters were also transmitted.

One of the acts concerning snuff and snuff mills, requiring an annual report of the revenue from that object to be made to Congress, a special circular letter upon that subject was transmitted to the supervisors, shortly after the circular communication above mentioned, and nearly six months before the expiration of the first year of the operation of the snuff tax.

Immediately before the time when the five new duties would have existed an entire year, other letters were transmitted to the supervisors, calculated to promote their attention to the objects required by the House, and requesting them immediately to furnish, for legislative and executive use, anticipated estimates of what each of the internal revenues might be expected to produce in the year 1796.

Other letters, partially circular, have been transmitted, at different times, to those supervisors who continued to be most in arrear as to these and their other returns. Besides which, special letters, as frequent, and in terms as urgent, as circumstances required and admitted, have been addressed to some of the supervisors, and indeed to other officers of the revenue, who, from considerations of weight, cannot be instructed immediately from the treasury on ordinary occasions.

But, although a perfect respect to the order of the House, and the proper duties of this office, have produced these early and repeated communications to the supervisors, it is not intended to convey the idea, that they, or the other officers of the revenue, have made less exertions than any other description of persons in the public service. For, it is believed, that a comparative view of their services and duties would produce different impressions. It is, however, true, that the embarrassments and difficulties of the revenue business have been met by inadequate exertions in some instances. These cases have been the subjects of explicit communications with the proper officers. But it is doubted whether a complete remedy can be applied without transferring the tax upon spirits to the stills.

When the order of the House was received at this office, the reflection occurred, that the first year of the five internal revenues established in 1794, would not terminate until the 30th of September, 1795; and that the revenues from both kinds of domestic distilled spirits and from stills, would have their nearest annual period on the 30th of June, following the receipt of the order. It was only on the same 30th of June, that the existing arrangement of officers and compensations would have been in operation for an entire year in relation to all the revenues which are considered as parts of the system of internal taxation. It appeared desirable, therefore, and indeed necessary, to make preparation for statements, which should respectively terminate on those two days of June and September 1795, and a return of officers and compensations, as of the first of those days being the middle of the year. When, however, it is remembered, that the statements of the familiar and unembarrassed business of the customs, concentrated as they are, in each instance, in a single port and post-town, cannot be conveniently made up at the treasury, for any year, until near the close of the year following, much longer time will appear necessary in the case of the internal revenues. Some of these are new, one litigated, and the largest of them has been the subject of forcible opposition and coercion. They are, moreover, so scattered, that one or the other of them accrues in every county, and in almost every township of the United States.

The following statements, A, B, C, D, E, F, and G, contain an exhibition of all the returns, whether formal or irregular, which have been yet received at the treasury. To those papers are added such supplementary estimates as we possess materials to justify. The paper H contains a list of the officers, with their compensations. The paper I is a copy of the act of the President, establishing those compensations. The paper K is the general statement of those revenues, with all the expenses of collection. The drawbacks are inserted in the particular statements of the several revenues, so far as they are ascertained. These statements are accompanied with some remarks, which may contribute to place the subject within the view of the Legislature.

1. *The gross revenue from spirits distilled from domestic materials and from stills* appears, by the accompanying statement and estimate A, to amount to 218,036 dollars and 16½ cents, for one year, ending on the 30th of June, 1795.

The two earliest and largest estimates of that branch of the spirit tax, which were made in December 1790, resulted in a gross amount of \$270,000

But, since the passing of the law of 1791, which was predicated on those estimates, the duty on spirits from domestic materials has been reduced from nine to seven cents, being two-ninth parts of the whole; for which, of course, there is to be deducted from the estimate, \$60,000

The yearly duty upon the capacity of the still has also been reduced, from sixty to fifty-four cents, since the passing of the act of 1791. This difference, taken upon only one fifth part of the whole 270,000 dollars, gives the sum of 5,400

Since that year, monthly licences, not contemplated by the estimates, have been allowed by law, and an opinion is held at the treasury, grounded on a report made upon experiments by distillers, that, in consequence of that allowance, the duty, in the case of stills employed on grain, may be easily reduced from seven cents to four cents and one half, and in the case of fruit, from seven cents to four cents per gallon. If this be taken at the minimum of two cents and one half per gallon, it will justify a deduction of 37,500

102,900

And the sum of

\$167,100

will be left as the just and true residuum, after thus deducting from the original estimate, the aggregate of those excisions from this duty, which have been actually made by the law of 1792. Instead of that sum, there can be no doubt, from the face of the statement A, that a larger amount has accrued and will be collected. And if the statutes concerning this branch of the revenue had not been greatly frustrated by the unavoidable want of a law officer, to prosecute the pleas of the United States in a productive district, a confident belief is entertained, that it would have yielded a sum nearly one third larger than the residuum above stated.

To collect, with an effect really equal to previous estimates, so very small a revenue, over the face of an extensive and sparsely-peopled country, under the disadvantages of necessarily imperfect and untried laws, of prejudice, and even opposition, will be considered as favorable to the general character of the revenue officers in the districts. It is, moreover, to be remembered, that there are some occasional circumstances, which might have been expected to produce a defalcation of the duties upon spirits from domestic materials. The excessive prices of grain, of marketable and exportable fruit, and of cider, have deprived the distillers of a very large portion of the means to employ their stills. In all places, the inducements to distil have been greatly diminished by the increased competition of the miller and merchant for every species of grain. It might have been supposed, too, that the great additional importations of foreign spirits*, of low priced wines†, and of malt liquors‡, with the multiplication and extension of the manufactories of the latter, concurring with those circumstances, would have reduced the revenue on spirits from domestic materials, far below all former expectation. Yet this does not appear to be the case. It is worthy of remark here, that, on a calculation predicated upon the premised facts, *the quantity* of spirits, from fruit and grain only, which have been subjected to the revenue, in the United States, in the reported year, appears to be greater than the average of the same branch in England, during the last thirty years, notwithstanding the more strict and rigorous nature of their laws. If these objects have produced there a greater sum, it is because the duty is much higher. A comparison with the same revenue, under the laws of certain of the States, would be still more favorable to the operation by the United States. Pennsylvania, for example, collected, in the year 1790, from an excise of eight cents and eight ninths, upon *foreign and domestic* spirits and upon *all kinds of wine*, much less than is now collected from spirits made from *domestic materials only*, though her territory is crowded with emigrants consuming her produce, and she contributed very largely to the supply of the Western and militia armies out of the crop of 1794.

2. The tax upon spirits distilled from foreign materials appears, by the same accompanying statement A, to amount to 141,989 dollars 15½ cents, for one year, ending likewise on the 30th day of June, 1795.

The estimates of 1790, already referred to, resulted, in regard to the tax on spirits from molasses, in the gross, amount of \$385,000 00

But, since the passing of the first law, in 1791, which was predicated on those estimates, the duty on this kind of spirits has been reduced from eleven to nine cents per gallon. Wherefore, there are to be deducted two eleventh parts of 385,000 dollars, being 70,000 00

315,000 00

Allowances for leakage and for prompt payment were also made, for both of which there is yet to be deducted about 6,662 50

\$308,337 50

The revenue from spirits distilled from foreign materials, in the year ending with June, 1795, was, according to statement and estimate A, \$141,989 15. The defalcation of this branch of the revenue appears, therefore, \$166,348 35. But the importation of molasses, in the year 1794, was less than that in 1791, by 3,700,000 gallons. Allowing something extraordinary for the portion which would not have been used in distillation, the duties on the remainder, at nine cents per gallon, would more than counterbalance that sum. To this deficiency in the supply of molasses, it is probable that something might be added for the increased consumption of it in substance, on account of the high price of sugar. These circumstances not only explain the defalcation of the tax on spirits distilled in the United States from *foreign* materials, but afford ground of conviction, that a great revenue from this source has been prevented *only* by the extraordinary nature of the war in the West Indies. As to the future course of the business, there appears little uncertainty in the expectation that the restoration of the molasses trade, the reduction of the prices of grain abroad and at home, and the increase of fruit, or even the two latter, should molasses continue to fail, will render the revenue from domestic spirits highly valuable, especially if further modified by the Legislature.

The estimates of *the duties on sales at auction, snuff and snuff mills, refined sugar, carriages, and licences to retail wines and foreign distilled spirits*, were formed upon grounds which are unknown at the treasury, having been made by a committee of the House of Representatives. It appears highly probable, however, that any informa-

* The quantity of foreign distilled spirits, imported in the year ending on the 30th September, 1790, was 3,678,199 gallons. That in 1794, was 5,699,369 gallons.

† The quantity of wines, other than those of Madeira, imported in the year ending on the 30th of September, 1790, was 607,561 gallons: That in 1794, was 1,336,076 gallons.

‡ The quantity of beer, ale, and porter, imported in the year ending on the 30th September, 1790, was 70,564 gallons. That in 1794, was 331,458 gallons.

tion which could have been attainable at that time, must have been very imperfect and uncertain, and it is to be remembered, that alterations in the bills, which produced diminutions in the product, were made during their passage through the Legislature. On these five duties, the following observations occur:

1. *The auctioneers' tax*, according to the statement B, amounts to 31,593 dollars 23½ cents, and falls considerably short of the estimate referred to. It is conceived, that the numerous and extensive exemptions in the proviso to the first section of the law; the very increased agency of brokers, instead of auctioneers, in the business of the seaport towns, and the multiplication of the various objects, which now form our circulating medium, have greatly affected this revenue.

2. *The taxes on snuff and snuff mills* amount, according to the statements C and D, to 9,511 dollars 8½ cents, and have proved apparently the least conformable with the committee's estimate, though it is not known what proportion they expected from manufactured tobacco. This article, which is of much greater consumption than snuff, was not subjected to duty, as proposed by the committee. An opinion prevails, and it is believed on just grounds, that the existing law, relative to this branch of the public revenues, is either constructed upon wrong principles, or is very defective in its provisions. It is understood, also, that the productiveness of this tax has been diminished by extraordinary, though very natural exertions of the manufacturers of snuff to increase the stock on hand, before the operation of the duty; and it is represented, that, since the alteration of the principle of the law, the larger mills, with great powers of water and capital, have been able to make snuff, by licence, so as to reduce the contribution on the pound of the manufactured commodity to a much less rate than eight cents.

3. *The refined sugar tax* amounts to 34,527 dollars 86 cents, and appears also, by the statement E, to fall short of the original estimate; but additions will be made when all the returns shall be received. The defalcation may be owing not more to the imperfection of the materials, which the committee could obtain, to govern their opinions, than to the increased use of the fine Muscovadoes and of the clayed and powdered white sugars, which are understood to have been imported in a greater degree than formerly. These have facilitated a prudent economy, to which the prices of many of the necessaries of life have invited the consumer.

4. *The tax upon carriages for the conveyance of persons* appears, by the statement F, to have produced 41,421 dollars 17 cents. The members of the Legislature are generally informed, that a question has been raised, in an extensive State, about the constitutionality of the law which imposes it. That circumstance is conceived not only to have diminished the revenue in that district, but in some other places. As it was, for obvious reasons, highly desirable to have this point immediately settled, every exertion was made, short of precipitating the decision, to bring it early before the district court. The judges of that tribunal were divided, and the case was carried by appeal to the Supreme Court of the United States. It was endeavored, on the part of the Government, to have the question finally argued in August last, but, from circumstances on the side of the defendant, it became necessary to acquiesce in a postponement, until the February term. It is understood that the revenue of the current year will be farther diminished by the unavoidable delay of a decision.

5. The statement G exhibits the gross revenue from licences to retail wines and foreign distilled spirit, at 54,731 dollars and 54 cents, so far as returns have been received at the treasury. It was to be expected that the amount would fall considerably below the original estimate, because the spirit licences were confined to the retailers of foreign spirits, contrary to what seems to have been the first intention of the committee. This not only diminished greatly the number of licences, but is supposed to have facilitated evasions of the law. It is not doubted, that the occurrence of the month of entry (September) so soon after the passing the licence act, may have prevented that timely promulgation of it, which was necessary to the perfect collection of this tax. A similar reflection arises with greater force in regard to the carriage tax; and, indeed, the arrangements necessary to carry into execution the several laws concerning the five new duties, required more time than intervened between the beginning of June and the month of September.

The paper H contains the names of nearly all the officers employed in the business of the internal revenues throughout the United States. Judging by a comparison with facts in the scene most adjacent to the seat of Government, these are less numerous than the corresponding officers of the States. *The collectors*, alone, of the revenues of the State of Pennsylvania, all of which are of course internal, are believed to be very many more in number, as well in fact as in proportion to the respective aggregates of the taxes, than all the officers of every description employed in that district to superintend and collect the six duties of the United States, which are the subjects of this communication. Throughout the eastern parts of the Union it is understood that there is a collector of their taxes in every township, which must give a number greater, in that quarter alone, than that of all the officers of the internal revenues of the United States. In the other parts of the Union, it is believed that there is considerably more than the proportion of one collector of the State dues in each county, on a medium. It is certain that the internal revenue officers of every class, upon the federal establishment, are fewer in number, although one description of them (the auxiliary officers) has been appointed for the sole purpose of bringing conveniently near to the payers of certain of the taxes, an office of entry and application.

The apparent emoluments of the officers, and the expenses of collection, though not higher than has been expected, if accurately considered, must be taken in conjunction with several connected circumstances.

Some of the supervisors and inspectors have allowances for preparing or signing certificates for foreign distilled spirits, wines, and teas, which, not being conveniently separable, appear, in their general mass of charges, on the internal revenues. They are, however, not considerable. For the important service of checking, on land, the great import duties on those three articles, these revenue officers receive no other than the very small allowance which is just referred to. A puncheon of spirits, worth one hundred dollars, yields to some one of them, in a district, no more than two cents and one half; and a cask of wine, worth forty dollars, yields, in like manner, but a single cent. The supervisors and inspectors' office rent, fuel, and clerk hire, the value, or hire, of the collectors' horses, and their keeping, together with their own expenses when on the road, are deductions from their emoluments. The postages of letters and packets, which greatly contribute to swell the incidental expenses, are all returned into the public treasury, except the allowances to the post officers. Most of the supervisors, and several of the inspectors, perform necessary and important duties, auxiliary to some of the officers of the several Executive departments, on terms very far, indeed, below what would be accepted by any special agent, public or private.

The statements and estimates accompanying this report, contain the substance of all the returns and documents concerning the internal revenues for the year to which they relate. Such papers as may be received during the course of the session, are proposed to be digested into a supplementary statement.

FENCH COXE, *Commissioner of the Revenue.*

[CIRCULAR.]

TREASURY DEPARTMENT, REVENUE OFFICE, *May 16th, 1795.*

GENTLEMEN:

I have been obliged to postpone, until this day, a communication to you concerning a resolution of the House of Representatives of the 2d of March last. It did not reach my hands till yesterday afternoon. The resolution requires, that there be laid before the next Congress, "such a statement of the internal revenues as will ascertain, with precision, the nett product thereof, and the expense of collection;" also, "a list of all the officers employed in that service, and the compensations allowed to each of them."

Completely to effect these several objects, and as the basis of the relative observations and explanations which should accompany the statements from the treasury, it is necessary that early and particular attention be paid to the following points:

1. The completion of all the returns and abstracts relative to retailers' licences, sales at auction, carriages, refined sugar, and snuff and snuff mills, until the 30th of September next, on which day the first year of those revenues will end.
2. The completion of all the returns and abstracts relative to the distillation in cities, towns, and villages, and from foreign materials, from the first day of July, 1791, until the 30th day of September, 1795, the return for each quarter, now unreturned, to be transmitted to the treasury, as soon as completed.
3. The completion of all the returns and abstracts relative to the distillation from domestic materials, in places other than cities, towns, and villages, and to stills, as far as the same can, by every exertion in your power, be completed. From the first day of July, 1791, to the last day of December, 1794, they should be made up by the close of the current quarter, the 30th of June next. These, also, should be immediately sent forward, as each shall be completed. I recommend, too, such exertion as will possess the treasury of the abstract, relative to the half year, now current, by the close of the year 1795.
4. The completion of the quarterly accounts current, with the proper accompaniments, from July 1st, 1791, to the 30th day of September, 1795, and the transmission of each of them, which is, at this time, incompleated, as soon as it shall be made up.
5. A complete list of all the inspectors of surveys, inspectors of the revenue for the ports, collectors of the revenue, auxiliary officers, and deputies of the inspectors of the revenue for the ports, as the same shall stand in the month of June, 1795, exhibiting the salary allowed to each, and an estimate of the commissions, fees for marking stills, &c. &c.; also the surveys, divisions, and counties. To these you will prefix a similar exhibition of all the emoluments of the supervisors.

Should any thing further occur, likely, in your opinion, to give to the Legislature a perfect view of the revenue service, and of its results, you will be pleased to add such information.

I am, gentlemen, very respectfully, your most obedient servant,

TENCH COXE, *Commissioner of the Revenue.*

The Supervisors of the Revenue.

A.—A Statement of the Revenue arising from stills, and from spirits distilled in the United States during one year, commencing on the first day of July, 1794, and ending on the thirtieth day of June, 1795, so far as returns have been received at the Treasury, with an estimate of such as are deficient.

In what District.	Supervisors' names.	Number of gallons distilled in cities, towns, and villages.		Number of gallons distilled from domestic materials, in the country.	Whole number of gallons distilled in each district.	Gross amount of duties in cities, towns, and villages, from foreign and domestic materials.	Gross amount of duties on spirits distilled in the country from domestic materials, and on stills.	Total gross amount of duties.	Abatements for leakage, at two per cent.	Discount allowed for prompt payment.	Amount of duty collected in each district.	Drawbacks allowed on spirits from foreign materials.	Drawbacks allowed on spirits from domestic materials.	REMARKS.
		Foreign materials.	Domestic do.

Ohio, -	1	1	-	-	(c.) 3,840 00
Tennessee, -	1	-	-	-	-
North Carolina, -	1	4	38	5	7,580 23
South Carolina, -	1	2	14	6	4,554 67
Georgia, -	1	-	8	5	1,261 22
Total,	16	22	(a.) 236	63	\$77,978 59½

(a.) Of this number fourteen are also officers of the revenues of impost and tonnage.

(b.) The amount of salaries in this district is ascertained. The commissions are on estimate in this office.

(c.) This sum would be the utmost expense if the whole revenue was collected. But the collected product and the expenses of the revenue in Ohio, will fall very short of the statements.

TREASURY DEPARTMENT, *Revenue Office, March 3d, 1796.*

TENCH COXE, *Commissioner of the Revenue.*

I.

An Act of the President of the United States, to consolidate and establish the allowances of compensations, and for contingent expenses in the revenue service.

Section 1. Whereas the Legislature of the United States has made further provision for services and expenses in the collection and securing the revenues thereof, and it has, therefore, become necessary to revise and enlarge some of the allowances heretofore made for the same: it is hereby declared and established by the President of the United States, that the following compensations shall be granted and paid to the several officers employed in the supervision, inspection, and collection of the revenues accruing upon spirits distilled in the United States, and upon stills, retailers' licences, sales at auction, refined sugar, carriages, snuff, and mills for the manufacturing the same; and that the following expenses and charges shall be allowed thereon, from and after the first day of July, one thousand seven hundred and ninety-four:

Sec. 2. There shall be allowed to the several supervisors, the following annual salaries, viz:

To the Supervisor of New Hampshire, the sum of	-	-	-	-	500 dollars.
To the Supervisor of Massachusetts,	-	-	-	-	1,000 dollars.
To the Supervisor of Rhode Island,	-	-	-	-	600 dollars.
To the Supervisor of Connecticut,	-	-	-	-	700 dollars.
To the Supervisor of Vermont,	-	-	-	-	500 dollars.
To the Supervisor of New York,	-	-	-	-	1,000 dollars.
To the Supervisor of New Jersey,	-	-	-	-	600 dollars.
To the Supervisor of Pennsylvania,	-	-	-	-	1,200 dollars.
To the Supervisor of Delaware,	-	-	-	-	500 dollars.
To the Supervisor of Maryland,	-	-	-	-	1,000 dollars.
To the Supervisor of Virginia,	-	-	-	-	1,350 dollars.
To the Supervisor of Ohio,	-	-	-	-	700 dollars.
To the Supervisor of Tennessee,	-	-	-	-	500 dollars.
To the Supervisor of North Carolina,	-	-	-	-	1,000 dollars.
To the Supervisor of South Carolina,	-	-	-	-	1,000 dollars.
To the Supervisor of Georgia,	-	-	-	-	500 dollars.

Sec. 3. There shall also be allowed to the supervisors of the revenue in New Hampshire, Massachusetts, Rhode Island, New York, New Jersey, Pennsylvania, Maryland, Virginia, and South Carolina, a commission of one per centum on the gross amount of the revenue, collected in their several districts, from spirits distilled therein from foreign materials. To the supervisors of the revenue in Connecticut and North Carolina, one and one-half per centum on the same; and to the supervisors of the revenue in the other existing districts of the United States, two per centum on the same.

Sec. 4. There shall be allowed to the supervisors of the revenue in the districts of New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, Virginia, Ohio, North Carolina, and South Carolina, a commission of one and one-half per centum upon the gross revenue from spirits distilled in the United States from domestic materials, and from stills, collected in their several districts. To the supervisors of Vermont, Delaware, Georgia, and Tennessee, a commission of two per centum on the same.

Sec. 5. There shall be allowed to each of the supervisors of the revenue, a commission of one-half per centum on the gross revenue collected within their respective districts, from retailers' licences, sales at auction, refined sugar, and carriages, snuff, and mills for manufacturing the same.

Sec. 6. There shall be allowed to the supervisors of the revenue, for preparing, stamping, and distributing, among the inspectors, or procuring to be so prepared, stamped and distributed, the sum of one per cent. for every certificate to accompany foreign and domestic distilled spirits, wines, or teas, which shall be actually issued in the surveys and ports of their respective districts.

Sec. 7. There shall be allowed to each of the inspectors of the revenue, in the districts of Massachusetts, Pennsylvania, Maryland, Virginia, North Carolina, and South Carolina, (not being also supervisors) a salary of five hundred dollars per annum; and to the inspector of the second survey of the district of Ohio, a salary of four hundred and fifty dollars per annum.

Sec. 8. There shall also be allowed to the inspectors, as aforesaid, a commission of one per centum upon the gross revenue arising from spirits distilled in the United States from foreign materials, except the inspectors of the first and second surveys of North Carolina, to each of whom there shall be allowed a commission of two per centum thereon.

Sec. 9. There shall likewise be allowed to each of the inspectors of the revenue, as aforesaid, a commission of one and one-half per centum on the gross revenue arising from spirits distilled within their respective surveys, from domestic materials and from stills, excepting the inspectors of the first and second surveys of North Carolina, to each of whom there shall be allowed a commission of two per centum thereon.

Sec. 10. There shall also be allowed to each of the inspectors of the revenue, as aforesaid, a commission of one-quarter per centum on the gross revenue, collected within their respective surveys, from retailers' licences, sales at auction, refined sugar, and carriages, and from snuff, and mills for manufacturing the same.

Sec. 11. There shall be allowed to the supervisors of the revenue, acting as inspectors of surveys, and to the inspectors of surveys, the sum of two cents and one-half for each and every certificate to accompany domestic distilled spirits, signed by them; and one cent for every certificate to accompany foreign distilled spirits signed by them, and issued in the surveys under their inspection, respectively, or in the ports within the same.

Sec. 12. The supervisors may allow to such of the collectors of the revenue, as, for the execution of the public service, it shall appear to them really necessary so to compensate, a yearly sum, to be apportioned at discretion, over and above their other emoluments, not exceeding the medium sum of eighty dollars, nor, in the districts, respectively, the following limited number of collectors, that is to say:

In New Hampshire, - - - -	three	-	-	-	-	-	collectors.
In Massachusetts, - - - -	thirteen	-	-	-	-	-	ditto.
In Rhode Island, - - - -	two	-	-	-	-	-	ditto.
In Connecticut, - - - -	six	-	-	-	-	-	ditto.
In Vermont, - - - -	three	-	-	-	-	-	ditto.
In New York, - - - -	eight	-	-	-	-	-	ditto.
In New Jersey, - - - -	eight	-	-	-	-	-	ditto.
In Pennsylvania, - - - -	sixteen	-	-	-	-	-	ditto.
In Delaware, - - - -	three	-	-	-	-	-	ditto.
In Maryland, - - - -	fifteen	-	-	-	-	-	ditto.
In Virginia, - - - -	forty-two	-	-	-	-	-	ditto.
In Ohio, - - - -	eight	-	-	-	-	-	ditto.
In Tennessee, - - - -	three	-	-	-	-	-	ditto.
In North Carolina, - - - -	twenty-five	-	-	-	-	-	ditto.
In South Carolina, - - - -	eighteen	-	-	-	-	-	ditto.
In Georgia, - - - -	six	-	-	-	-	-	ditto.

Sec. 13. There shall also be allowed to the collectors of the revenue, the following commissions, viz: On the gross revenue collected by them, respectively, from spirits distilled from foreign materials, three per centum; on the gross revenue from spirits from domestic materials and from stills, six per centum; on the gross revenue from retailers' licences, and from sales at auction, one and three-quarters per centum; and on the gross revenue from carriages and refined sugar, and on snuff, and mills for manufacturing the same, four per centum. There shall likewise be allowed, the sum of sixty cents for measuring and marking, according to law, every still of less than one hundred gallons in capacity; and seventy-five cents for every still of the capacity of one hundred gallons, or more; two cents and one-half for marking every cask of domestic distilled spirits, and for countersigning and issuing every certificate to accompany the same; and six cents for every cask thereof, which they shall respectively gauge. And the same allowance shall be made to any other person, not being a collector, for every cask of domestic distilled spirits gauged by him.

Sec. 14. The supervisors may allow to such number of auxiliary officers, as, for the execution of the public service, it shall appear to them really necessary so to compensate, a yearly sum, to be apportioned at discretion, over and above the other compensations and emoluments which are, or may be allowed to them, not exceeding the medium rate of thirty dollars; nor in the districts, respectively, the following limited numbers of such officers, that is to say:

In New Hampshire,	six	auxiliary officers.
In Massachusetts,	fourteen	ditto.
In Rhode Island,	three	ditto.
In Connecticut,	four	ditto.
In Vermont,	six	ditto.
In New York,	fifteen	ditto.
In New Jersey,	six	ditto.
In Pennsylvania,	eleven	ditto.
In Delaware,	three	ditto.
In Maryland,	ten	ditto.
In Virginia,	forty-three	ditto.
In Ohio,	five	ditto.
In Tennessee,	three	ditto.
In North Carolina,	twenty-six	ditto.
In South Carolina,	thirty	ditto.
In Georgia,	six	ditto.

Sec. 15. There may be allowed, for the extraordinary expenses necessary for the procuring of printed forms, certificates, and other papers, and for the expediting and distribution of the same, in some of the districts, not exceeding three, if actually incurred, an aggregate sum, not exceeding two hundred dollars per annum.

Sec. 16. There may be allowed, for extraordinary law fees, costs, and charges, if the same shall be found really necessary in some of the districts, not exceeding three, an aggregate sum, not exceeding two thousand dollars per annum.

Sec. 17. There may be allowed to such of the inspectors of surveys as shall be desirous, and shall be found really able, punctually and effectually to perform, in addition to their other duties, those of a collector, in any division of not more than two counties, all the emoluments of such a collectorship.

Sec. 18. There may also be allowed to such of the supervisors of the revenue as may be desirous, and as shall be really able, punctually and effectually, to perform, or to procure to be performed, by the persons employed in their service, respectively, in addition to their other duties, those of a collector of a division, of not more than two counties, all the emoluments (except the salary) of such collectorship.

And whereas it may be found, on examination, or experience, that the apportionment of salaries, as aforesaid, among the collectors and auxiliary officers, may be modified by the supervisors, with advantage to the public service, it is hereby allowed, that such and so many officers of each, or either of the said denominations, may be paid out of the aggregate amount of the two allowances of eighty dollars, and thirty dollars, in each district, and at such different rate of salary, as, in the judgment of the supervisor thereof, shall be deemed expedient.

Sec. 19. There shall be allowed to the inspectors of the revenue for the ports, the sum of one cent and one-half for every certificate to accompany foreign distilled spirits; and two cents and one-half for every certificate to accompany wines and teas, issued within their ports, respectively. To the deputies of such inspectors, the sum of two cents and one-half for every cask or package of foreign distilled spirits, wines or teas, by them legally marked, and returned to their respective principals.

Sec. 20. And lastly, there shall be allowed for the gauging of wines, whereon the impost is payable, according to the value thereof, the sum of six cents for every cask thereof which shall be actually gauged for that purpose.

Given under my hand, at Philadelphia, this ninth day of April, in the year one thousand seven hundred and ninety-five.

GEO. WASHINGTON.

K.

A General Statement and Estimate of the Internal Revenues of the United States, exhibiting the nett amount thereof, for one year, so far as returns and documents have been received at the Treasury.

IN WHAT DISTRICT.	NAMES OF SUPERVISORS.	AMOUNT OF REVENUE, PAYABLE IN EACH DISTRICT, ARISING FROM								Total amount of all the internal revenues payable in each district. DOMESTIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 11, 1796.

TREASURY DEPARTMENT, *March 8th, 1796.*

SIR:

I have the honor to transmit herewith, four statements, exhibiting the sums necessary to discharge one hundred dollars of six per cent. stock, upon the principles assumed in the following propositions, transmitted to me by the committee.

First. Supposing one and one half per cent. to be paid on the last days of March, June, and September, and three and one half per cent. on the last day of December of every year, till the annuity is redeemed.

Second. Supposing one and a half per cent. to be paid on the last days of March, June and September, 1796, and three and one half per cent. on the last day of December, 1796, and that, from the last day of March, 1797, inclusive, till the annuity is redeemed, two per cent. shall be paid every quarter.

Third. Supposing one and one half per cent. to be paid on the last days of March, June, September, and December, 1796, and from the last day of March, 1797, inclusive, till the annuity is redeemed, two per cent. shall be paid every quarter.

Fourth. Supposing that one and a half per centum be paid on the last days of March, June, and September, 1796, and from thence forward two per cent. per quarter.

To discharge one hundred dollars, principal stock—

Agreeably to the first proposition, there would be wanted	-	-	-	\$188,526 00
Agreeably to the second proposition,	-	-	-	186,541 79
Agreeably to the third proposition,	-	-	-	191,725,448 00
Agreeably to the fourth proposition,	-	-	-	190,548,336 00

Upon the principles assumed in the communications, which I had the honor to make to the committee on the 26th January, 1796, the reimbursement of one hundred dollars principal, would require \$190,369 00.

It now remains to determine the true meaning of the public stipulation with the creditors, as expressed in the act making provision for the debt of the United States, passed on the fourth day of August, 1790.

The contract is expressed in these words: "The subscriber shall be entitled to a certificate, purporting that the United States owe to the holder a sum to be expressed therein, bearing an interest of six per centum per annum, payable quarterly, and subject to redemption by payments, not exceeding in one year, on account of both principal and interest, the proportion of eight dollars upon a hundred of the sum mentioned in such certificate."

The general principle assumed in the communication, submitted by me to the committee, was this; that the capital due at the commencement of any given year, is fixed during the whole of the said year, and that the public, by including in the quarterly dividends sums exceeding those actually due for interest, do not acquire a right to have the same applied to the reduction of the principal, until the commencement of the succeeding year. In other words, my idea is this: that the dividends for interest must, for every quarter of a given year, be uniform, in order to satisfy the contract.

The propositions transmitted by the committee proceed upon a supposition that a new principle, upon which to calculate interest, may be fixed, quarter yearly, and, of course, that, in case greater sums are included in the quarterly dividends than those actually due for interest, the public may immediately apply then to the diminution of the capital, and thus arrest the growth of future interest.

I continue to be of opinion that the construction last mentioned cannot be supported, and my reasoning upon the subject is as follows:

The stock, as created by the act of August 4th, 1790, can be no otherwise defined than as an annuity of six per centum per annum, for an indefinite term, convertible, at the pleasure of the United States, into an annuity of eight per centum per annum of equivalent value.

The stock supposed by the propositions may be properly defined to be an annuity for an indefinite term of one and half per centum for every three months, convertible into an annuity of two per centum for every three months.

The results presented in the calculations, now transmitted, shew that these descriptions of stock are not of the same value, the latter being susceptible of extinguishment with a lesser sum of money than the former.

That the definition, assumed in the propositions transmitted by the committee, is inapplicable to the stock created by the act of August, 1790, is, in my opinion, evident, from the following considerations:

First. The act of August 4th, 1790, speaks of a capital bearing an interest of six per centum per annum, subject to redemption by payments not exceeding in one year the proportion of eight dollars upon a hundred, and as these words are descriptive of the contract, they must be construed to support some precise meaning.

Second. The construction assumed in the propositions, defeats and renders nugatory those expressions in the contract which relate to a yearly rate of interest, and yearly payments.

Third. The construction taken by the treasury avoids this difficulty, by assigning to every part of the contract, some definite sense, to wit: that, though the interest is required to be adjusted quarter yearly, the payments, on account of the principal, are to be estimated only in reference to an entire year.

Fourth. That, admitting the meaning of the contract to be doubtful, which, however, does not appear to be the case, the construction most beneficial to the creditors is to be preferred.

If, however, the Legislature should overrule the construction which has been given, it is conceived that the first proposition is the most eligible of the four which have been mentioned, and for the following reasons:

First. Many of the public creditors may be presumed to have formed arrangements under an expectation of receiving one and one half per centum, quarter yearly; by continuing this dividend, these arrangements will be less disturbed than in either of the other modes.

Second. It is possible that the public exigencies may render it necessary to have recourse to loans; if this should be the case, it will be more convenient, as well as economical, to borrow the whole sum wanted at one time, than at different times in the same year.

A draught of a bill, pursuant to certain resolutions of the House of Representatives, is herewith transmitted.

I have the honor to be, with perfect respect, sir, your most obedient servant,

OLIVER WOLCOTT, Jr. *Secretary of the Treasury.*

The Honorable WILLIAM SMITH, Esq.

Chairman of the Committee of Ways and Means of the House of Representatives.

PROPOSITION I.

Statement of the sums required to discharge one hundred dollars of six per cent. stock, supposing one and a half per cent. to be paid on the last days of March, June, and September, and three and a half per cent. on the last day of December of every year, till the annuity is redeemed.

Term, being the close of the year		Rates per centum due on the original capital in each year, after the payments made to the end of the preceding year are deducted.	Amount of interest due 31st of March.	Amount of interest due 30th of June.	Amount of interest due 30th of September.	Amount of interest due 31st of December.	Amount of principal redeemed each year.

			22 45.541	22 23.116	22 02.456	21 81.487	100
Loss by fractions,						.480	Dolls. Parts.
Principal,							100
Total interest payable on the 31st of March, in every year,							22 45.541
Do. do. 30th of June,							22 23.116
Do. do. 30th of September,							22 02.456
Do. do. 31st of December,							21 81.487
Sum required as above, for payment of one hundred dollars principal, and interest thereon, of the six per cent. stock,							188 52.600

Thus it appears, that, by dividends of one and a half per cent. on the original capital, on the last days of March, June, and September, and three and a half per centum on the last day of December, annually, until the 31st of December, 1817, inclusively, and by dividends of one and a half per cent. on the last days of March, June, and September, in the year 1818, and a dividend of .026 on the last day of December, in the said year 1818, the original capital would be extinguished, on the principles of this statement.

PROPOSITION II.

Statement of the sums required to discharge one hundred dollars of six per cent. stock. Supposing $1\frac{1}{2}$ per cent. to be paid on the last days of March, June, and September, 1796, and $3\frac{1}{2}$ per cent. on the last day of December, 1796, and that, from the last day of March, 1797, inclusive, till the annuity is redeemed, two per cent. shall be paid every quarter, when will the annuity be redeemed, and what will be the amount of the concluding payment?

Years.		Amount of principal.	Amount of interest paid first quarter.	Amount of interest paid second quarter.	Amount of interest paid third quarter.	Amount of interest paid fourth quarter.	Amount of principal paid in each year.

No. 95.

[1st SESSION.

INCREASE OF REVENUE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 17, 1796.

Mr. WILLIAM SMITH made the following report:

The Committee of Ways and Means, having taken into their consideration, the state of the receipts and expenditures of the United States, and the existing and approaching exigencies, for which provision will be requisite, make the following report:

1st. That, in their opinion, the proceeds of the duties on imports and tonnage, and of the internal revenues, which will be received in the treasury, during the year 1796, will be adequate to discharge the current expenditures of the said year, upon the scale of expense stated in the estimates transmitted with the report of the Secretary of the Treasury, dated 14th of December, 1795, including the payment of the interest on the public debt, and the reimbursement of the annuity due on the domestic stock, bearing a present interest of six per cent. But that they will be insufficient to repay either the anticipations heretofore obtained on the credit of the revenue, already accrued from imports and tonnage, but remaining uncollected, amounting to three millions eight hundred thousand dollars, or the instalments of the foreign debt and domestic loans, which fall due during the present year, amounting to one million two hundred thousand dollars, and that there is, therefore, a sum of five millions of dollars to be provided for, either by continuing the present anticipations, or by obtaining loans upon other terms.

2d. That, in like manner, the probable receipts into the treasury, for the years 1797, 1798, 1799, and 1800, will, respectively, defray the current expenditures of the same years, supposing the public expenses not to be increased; but will prove insufficient to discharge the instalments of foreign debt, or of domestic loans, which will fall due during those years.

3d. That, from and after the year 1801, the current expenditure will be increased by a sum of \$1,146,370 34, which will be required to discharge the annuity that will then become due, and payable on the deferred stock.

4th. That, exclusive of the anticipations mentioned in the first paragraph of this report, the instalments of the domestic loans, which will fall due after the present year, amount to one million six hundred thousand dollars; the whole of which will fall due before, and during the year 1801.

5th. That the whole of the foreign debt, exclusive of the instalment which falls due in the current year, amounts to 11,400,000 dollars; the whole of which fall due before, and during the year 1809; and that there is but little expectation that the holders of the said debt will convert the same into domestic debt, upon any reasonable terms, or that, in the present circumstances of Europe, the instalments that will become due within a short period, can be discharged by obtaining a reloan of the same, upon similar terms with those on which the original loans were obtained.

6th. That no means are provided, on the present scale of revenue and expenditures, either to discharge the domestic loans and instalments of the foreign debt above mentioned, or to pay the additional expenditure of \$1,146,370 34 arising from and after the year 1800.

7th. That, in order to discharge the anticipations, domestic loans and instalments of foreign debt, it will be necessary, either to provide further revenues, or to adopt such measures as will vest in the proper officers an efficient power to obtain loans, on such terms as they can now be obtained; but that, so far as relates to the additional expenditure of \$1,146,370 34, accruing after the year 1800, an adequate additional revenue must be provided after that year.

8th. That, if an additional revenue of one million two hundred thousand dollars be raised from and after the present year, it will not only be sufficient to discharge the annuity, which will become due and payable after the year 1800, but will also reimburse four millions eight hundred thousand dollars, in part of the anticipations, domestic loans, and foreign debt, before mentioned, antecedent to the year 1801, and the whole amount of the said loans and anticipations before the year 1807; leaving then a redeemed annuity, which is calculated at 396,000 dollars, to be applied to the reimbursement of the foreign debt.

9th. That, if an additional revenue of two millions, instead of 1,200,000 dollars, be raised, for a term of twelve years, it will, within that period, discharge, besides the accruing annuity arising from the deferred debt, and the domestic loans and anticipations aforesaid, the whole of the foreign debt; and the new domestic stock bearing an interest of five and a half and four and a half per centum, and that, at the end of the said period of twelve years, an annuity will be redeemed, which is calculated at 1,113,930 dollars; which, with the revenues now established, will be sufficient to meet all demands against the Government, upon the principles before assumed.

The committee having contemplated the various resources of the United States, which may be resorted to in the present exigency, and having, in the first instance, turned their attention to the subject of indirect taxes, were not able to agree upon objects suitable for that kind of taxation, from which an adequate revenue could be obtained, without great inconvenience and embarrassment. On recurring to objects of direct taxation, they are of opinion, that those are alone competent to yield such a revenue as appears necessary; the subject being, however, of a new impression, and presenting various difficulties, which, although of a nature to be overcome, yet are such as prevent the completion of a proper system, during the present session, the committee have concluded to go no further, at this time, than to report a resolution preparatory to that object.

The committee are, moreover, of opinion, that some further revenues, in addition to the improvements of the present internal revenues already, and hereinafter proposed, may, during this session, be obtained from an extension of the system of indirect taxation; and, therefore, submit certain resolutions to that effect.

But, inasmuch as the actual receipts into the treasury will be inadequate to discharge the current expenses of the Government, and the loans had of the Bank of the United States, which fall due in the course of the present year, and as future loans and anticipations may become necessary, the committee are of opinion that a loan, to the amount of five millions of dollars, ought to be opened, for the purpose of discharging the said debt to the Bank of the United States.

As the result of their deliberations on the important subjects referred to their consideration, the committee, therefore, recommend the following resolutions:

1st. *Resolved*, That the Secretary of the Treasury be directed to prepare, and report to the House of Representatives, at the next session, a plan for raising the sum of two millions of dollars, by apportionment among the several States, agreeably to the rule prescribed by the constitution; adapting the same to such objects of direct taxation, and such modes of collection, as may appear, by the laws and practice of the States, respectively, to be most eligible in each.

2d. *Resolved*, That a duty of two per centum ad valorem ought to be imposed on all testamentary dispositions, descents, and successions to the estates of intestates, excepting those to parents, husbands, wives, or lineal descendants.

3d. *Resolved*, That the following duties ought to be imposed by means of stamps, viz.:

On Letters patent, two dollars.

Exemplification thereof, one dollar.

Awards, twenty cents.

Bottomry and respondentia bonds, fifty cents.

- On Indentures of apprenticeship, thirty cents.
 Certificates of debentures for drawbacks, twenty cents.
 Bills of lading coastwise, except those from one district to another, within the same State, ten cents.
 For bills of lading, forty cents.
 Bonds, bills, or notes, for the security of money, according to the following scale:
 Above 50, and not exceeding 100 dollars, ten cents.
 Above 100, and not exceeding 500 dollars, twenty cents.
 Above 500, and not exceeding 1,000 dollars, thirty cents.
 Above 1,000 dollars, fifty cents.
 Provided, That if any bonds or notes shall be payable at, or within sixty days, such bonds or notes shall be subject to only one-fourth part of the duty aforesaid.
 Notarial acts, twenty-five cents.
 Letters of attorney (except for invalid pensioners,) twenty-five cents.
 Policies of insurance, viz:
 From one district to another in the United States, ten cents.
 To and from the United States, to any foreign country, for any sum more than 500 dollars, and less than 1,000 dollars, twenty-five cents.
 For 1,000, and less than 2,000 dollars, thirty cents.
 For every sum of 2,000 dollars, and above, fifty cents.
 For all deeds, for the conveyance of houses or lands, twenty-five cents.
 For every other deed and specialty not enumerated, ten cents.
- 4th. *Resolved*, That there ought to be an addition of fifty per cent. to the duties now payable by law on carriages for the conveyance of persons.
- 5th. *Resolved*, That the sum of five millions of dollars ought to be obtained to discharge the debt due to the Bank of the United States, by creating a stock, bearing an interest of six per cent., and irredeemable for ——— years; the redemption thereof to commence thereafter, and to be payable in ——— yearly instalments.

Statement of the sums which will fall due after the year 1796, on account of instalments of the foreign debt, and domestic loans, till the year 1801, inclusive:

1797. Instalment of the loan of two millions, had of the Bank of the United States, for stock,	\$200,000	
Instalment of \$800,000, had of said bank, for expenses of foreign intercourse,	200,000	
Instalment of foreign debt, which will fall due in this year,	400,000	\$800,000
1798. Instalment of the loan of two millions, had of the Bank of the United States, for stock,	200,000	
Instalment of \$800,000, had of said bank for expenses of foreign intercourse,	200,000	
Instalment of foreign debt, which will fall due in this year,	80,000	480,000
1799. Instalment of the loan of two millions, had of the Bank of the United States, for stock,	200,000	
Instalment of \$800,000, had of said bank, for expenses of foreign intercourse,	200,000	
Instalment of foreign debt, which will fall due in this year,	160,000	560,000
1800. Instalment of the loan of two millions, had of the Bank of the United States, for stock,	200,000	
Instalment of foreign debt, which will fall due in this year,	400,000	600,000
1801. Instalment of the loan of two millions, had of the Bank of the United States, for stock,	200,000	
Instalment of foreign debt, which will fall due in this year.	500,000	700,000

4th CONGRESS.]

No. 96.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 5, 1796.

Mr. GOODHUE, from the Committee of Commerce and Manufactures, to whom were referred the several memorials and petitions of Joshua Johnson, of Gurdon Backus, and David Meade Randolph, of William Rotch and Sons, of David Pearce, and others, of Moses Myers, of Philip Finney, and of Samuel Brown, made the following report:

Joshua Johnson, consul of the United States, in London, states that, in March, 1795, he purchased, in London, of British merchants residing there, a certain brigantine that was built in Philadelphia, in 1789, and which had, prior to his purchase, been condemned in a British admiralty court, as lawful prize; that he sent the said brigantine to the United States, and, for want of proper American papers, he has been obliged to pay the tonnage, and other duties, as by law are required of foreign ships or vessels. He, therefore, prays for a reimbursement of the excess of the duties, which he has thus paid; and that he may be authorized to have a register granted for the said brigantine, whereby she may, in future, be entitled to the privileges of a ship or vessel of the United States.

The Committee, in conformity to a principle, which has heretofore been adopted by Congress, in a like case, viz: That an American vessel, once becoming the property of a foreigner, never ought to be restored to her former privileges, report, that the prayer of the petition ought not to be granted, and that leave be given to withdraw the same.

Gurdon Backus and David Mead Randolph state, that they were owners of a certain vessel, which, in the year 1792, was sold upon the coast of Africa, and that the register of the said vessel was stolen from the master; by which means they are subject to a penalty for not returning the said register into the office from which it issued, as is required by an act for registering and recording ships or vessels. They, therefore, pray, under those circumstances, that the penalty might be remitted.

The Committee, under a persuasion that great caution ought always to be had, to prevent foreigners from benefiting themselves, by getting possession of American registers, and though, in this case, it does not appear but that

the petitioners have been perfectly blameless; yet, by some of the papers accompanying the petition, there is reason to suppose the register was not stolen, but sold to a foreigner by the master, or some other person belonging to the said vessel: and the Committee, conceiving, that the owners of a vessel ought, generally, to be responsible for the misconduct of the master, are of opinion, in this case, where they were his sureties, that the prayer of the petition ought not to be granted, and that leave be given to withdraw the same.

William Rotch and Sons state, that they were the owners of two ships, that sailed from Nantucket, in the years 1787 and 1789, with registers, agreeably to the laws of Massachusetts; that they were employed abroad, in foreign countries, in the whaling business, till the year 1794, when they returned to New Bedford, where the collector demanded of them foreign tonnage and duties, inasmuch as they were not registered in conformity to the act concerning the registering and recording of ships or vessels, which had been passed by the present Government during their absence, and which confines the privileges of American ships to such only as are registered agreeably thereto. They further state, that the said ships were, bona fide, their sole property, during their absence, and that they sailed under no other papers but those they were possessed of, at the time they left the United States, till their return. They, therefore, pray for a reimbursement of the excess of duties, which they have paid on the return of those two ships into the United States, in consequence of their not having such registers as would have entitled them to the privileges and benefits of ships or vessels of the United States.

The committee, satisfied with the truth of the facts, as set forth in the petition, by the papers accompanying the same, and seeing no reason why the relief so prayed for should not be granted, recommend the following resolution:

Resolved, That the collector of the district of New Bedford, be authorized and required to refund, to William Rotch and Sons, owners of the ship Maria, Owen Hillman, master, and of the ship Diana, Timothy Long, master, which ships were entered in his office, in the month of April, 1794, such excess of duties as was paid upon the said ships and their cargoes, beyond what would have been demandable, had they been registered at that time, agreeably to the act concerning the registering and recording of ships or vessels.

David Pearce and others state, that they have had several vessels, that took on board considerable quantities of salt, on which the duties had been paid, and which salt was expended in salting the fish caught on the banks of Newfoundland; from whence the said vessels proceeded directly to France, with their fish. They, therefore, pray for the interposition of Congress, to remit the duty paid on such salt, inasmuch as the act, entitled "An act concerning certain fisheries of the United States, and for the regulation and government of the fishermen employed therein," does not embrace the cases mentioned in the petition.

The committee, while they admit the general principle, that there ought to be a remission of the duty paid on any imported article, upon the exportation of the same, are, nevertheless, sensible that the system of drawbacks, though absolutely necessary in a commercial country, ought, from the liability of impositions, to be guarded with as much precision as possible, and the cases of the petitioners, they conceive, do not admit of such a degree of certainty as would render it proper for the interposition of Congress.

They, therefore, are of opinion, that the prayer of the petition ought not to be granted, and that leave be given to withdraw the same.

Moses Myers states, that he had a quantity of goods on board the French ship of war Jean Bart, of seventy-four guns, lying in Hampton roads.

That the ship not being destined for any port of delivery in the United States, but being in the waters of the district of Norfolk and Portsmouth, the said Moses Myers entered, at the custom house in Norfolk, twenty-three bales, cases, and trunks of merchandise, and paid, or secured to be paid, the duties on the goods contained in the packages aforesaid.

That the said Moses Myers employed a certain James Dunlavy, master of a schooner called the Quantico, to convey the entered goods from the ship of war Jean Bart, to Norfolk.

That the said schooner did receive the goods from on board the ship, and was proceeding to Norfolk, when she was overtaken by a violent wind, which overset and sunk the said schooner, by which accident, the goods were in the water several hours, and thereby sustained considerable damage.

On account of the said accident, a regular protest was entered by the master of the said schooner, and one of the crew, before the notary public of Norfolk. The committee, therefore, submit the following resolution:

Resolved, That the collector of the customs for the port of Norfolk and Portsmouth be, and he is hereby, authorized to have ascertained, the rate of damage sustained by Moses Myers, on the goods contained in the twenty-three bales, cases, and trunks of merchandise, unladen from on board the French ship of war the Jean Bart, and which were damaged by the oversetting of the schooner Quantico, and remit to the said Moses Myers, the duties, in proportion to the damage sustained on the goods damaged as aforesaid.

Philip Finney states, that he is the owner of a fishing vessel, that was employed in the fishing business for more than four months, in the last year; but that, from a want of some formality in shipping the crew, he is unable to avail himself of the allowance which he otherwise by law would have been entitled to. He, therefore, prays that he may be entitled to it notwithstanding.

The committee would observe that it does not appear, that the fish caught on board the said vessel were actually divided among the crew, in proportion to what was caught by each person, as is required by law, in order to entitle them to the allowance prayed for.

They are, therefore, of opinion, that the prayer of the petition cannot be granted, and that leave be given to withdraw the same.

Samuel Brown states, that he was the owner of a fishing vessel, that was employed in the fisheries, for more than four months, in the year 1792; but, from some informality in the agreement made with the crew, that the fish should be divided among them, in proportion to the fish respectively caught, he has not been able to avail himself of the allowance which the law contemplates.

The committee are of opinion that, though there was a deficiency in the agreement, yet, inasmuch as it appears by evidence accompanying the petition, that the fish were actually divided in the manner prescribed by law, that it would be reasonable to grant the relief prayed for; and, therefore, recommend the following resolution:

Resolved, That the collector of the district of Newport be authorized and directed to make the same allowance to Samuel Brown, for his schooner Betsey, employed in the fishing business, in the year 1792, as he would have been entitled to if the terms of the written agreement, relative to the distribution of the fish caught on board the said schooner, had been such as are required by law.

[1st SESSION.]

BANK LOANS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 3, 1796.

Mr. WILLIAM SMITH, from the Committee of Ways and Means, to whom it was referred to inquire whether the Bank of the United States is willing to continue the loans made by it to Government, in anticipation of public revenue, or any part thereof, by new loans, on terms similar to those on which the said anticipations are obtained, reported that the committee have made the inquiry directed, and have received from the President and Directors of the Bank the answer and information following:

The committee appointed to confer with the Committee of Ways and Means, on the subject of continuing, to a more remote period, the loans made to the United States, having reported:

The Board took into consideration the most essential points that had relation to the present subjects, viz: the great increase in the price of all alienable property, which requires a corresponding addition of circulating medium to represent it; the necessity of placing this institution in a more respectable situation, in point of available funds, which will enable it to promote, more generally, the interests of commerce and manufactures, and afford the means of facilitating the financial operations of Government, by temporary loans, whenever the fiscal administration may require such a resource, as well as the more immediate advantages of the stockholders and customers of the bank, as both intimately connected with the active employment of a larger specie capital: Whereupon,

Resolved, that the United States be requested to extinguish the loans that are already due to the bank, as well as to make provision for those which may become payable in the course of the present year.

BANK OF THE UNITED STATES, *April 21st*, 1796.THOMAS WILLING, *President*.Attest, G. SIMPSON, *Cashier*.

No. 98.

[1st SESSION.]

BANK DEBT.

COMMUNICATED TO THE SENATE, MAY 11, 1796.

BANK OF THE UNITED STATES, *May 11th*, 1796.

SIR:

The Board of Directors of the Bank of the United States have viewed with great disquietude and alarm, the ineffectual tendency of a bill which has passed the House of Representatives, and is now submitted to the Senate, which purports to be for their relief, but which, by the modification of a provisionary clause, will probably defeat the object it was intended to promote.

You must be sensible, from experience, that the disposition of the bank to aid the financial operations of the Government, by temporary loans, in anticipation of its revenues, or when under the pressure of sudden unprovided exigencies, has been uniformly favorable, and at least commensurate with its available means.

Its advances have, at length, accumulated to the amount of six millions of dollars, four millions and four hundred thousand of which are already due, or payable, within the course of the present year—the detention of which must naturally be very oppressive on its resources.

It is needless to exhibit to your view the necessity that exists, under the present state of moneyed operations, connected with the advanced price of all alienable property, to bring into activity a greater portion of their specie capital, which the general interests of the community, the prosperity and reputation of our institution, and the immediate advantages of their constituents, absolutely require.

In discharge, therefore, of their duty, in their various relationships, the Board is compelled to press upon your attention the payment of the instalments that are now due upon the loans made by the bank to the United States.

They cannot but flatter themselves, that a Government uniformly attached to the support of public credit, on the purest principles, will furnish its administration with ample means to prevent a violation of its faith. They are more inclined to cherish this impression, at the present moment, when the country exhibits such prominent marks of prosperity under the influence of such a system; and more especially when the provision to be made regards an institution, whose uniform services to the Government, upon the most disinterested principles, have, hitherto, pressed hard upon its faculties, and whose extensive circulation of paper has so essentially benefitted the community, by multiplying its moneyed resources, and by facilitating the payment of the public contributions.

But, if the Government should provide no other means to liquidate their claims, than by the sale of stock at par, they apprehend a violation of the public faith will be the necessary consequence.

Public funds, like other property, are exposed to feel the impression which contingent circumstances operate upon its value; a stipulation, therefore, that it shall not be sold, but at a given price, in order to extinguish the debts contracted with the bank, is an illusory provision, and places the demands of the institution on a very unsafe and unsatisfactory footing; it is likewise opposed to the practice of all nations habituated to the support of public credit, under the operation of a funding system. They, therefore, cannot but view a conditional arrangement, by which the bank may be compelled to wait an indefinite period of time for payment, as an infraction of a contract, and incompatible with the justice of their country. In bank operations, where punctuality is so essential, and, therefore, so strictly observed, there is but little difference betwixt a delay and a refusal of payment.

As an additional grievance, they are, in the present case, deprived of an alternative: for, if pressed by their necessities, they were disposed to make a sacrifice, by receiving the stock at par, as a composition for, or extinction of their debt, thereby risking an eventual loss to their constituents. Their charter precludes them from making such a commutation, there being an express prohibitory clause therein, as relative to the purchase of stock.

The bill, therefore, by depriving them of all option, operates upon them as a compulsory proceeding, by forcing them to wait for a liquidation of their just demands, until a combination of circumstances, over which they have no control, will produce the required result, that of raising this stock to par. Under these impressions, the Board are urged, by a sense of duty to their country and their constituents, to make this application to you, in language of the most serious concern, hoping that, through your intervention, that justice, which is so amply due to them, may be speedily and effectually obtained.

I have the honor to be, sir, for the President, Directors, and Company of the Bank of the United States,
your obedient,

THOMAS WILLING, *President*.The Hon. OLIVER WOLCOTT, Jun. Esq. *Secretary of the Treasury*.

4th CONGRESS.]

No. 99.

[1st SESSION.]

INCREASE OF REVENUE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 18, 1796.

TREASURY DEPARTMENT, May 6th, 1796.

SIR:

I have the honor to present, herewith, a statement of the probable receipts and expenditures of the United States, in the course of the current year, comprising the appropriations already made, and those which appear to be contemplated by bills now depending in Congress, the result of which shews, that the sum of one million three hundred and ten thousand six hundred and five dollars and thirty cents must be obtained from loans, or new revenues.

In this estimate, the sums due to the Bank of the United States and the Bank of New York are omitted, being considered as provided for by the bill for funding those debts; the instalment of the foreign debt is, however, included, as the fund must be raised in the United States.

In other respects, this statement essentially agrees with that which accompanied my report to the House of Representatives, on the 14th of December, 1795, except that the following additional estimates are introduced, for which appropriations have been made, or are depending, viz:

For the Indian trade,	\$158,000 00
For extraordinary expenses, incident to the intercourse of the United States with foreign nations,	301,132 00
For expenses incident to the treaties lately negotiated,	134,491 00
For completing the building of three frigates,	296,917 82
Additional interest, which will be payable in consequence of funding the debts due to banks, and a sum equal to the instalment of the foreign debt, which will become due in the present year,	25,000 00
Amounting to	<u>\$915,540 82</u>

Thus, it appears, that, though the bill for funding a part of the debt due to the Bank of the United States, and that due to the Bank of New York, will relieve the treasury from the payment of certain instalments, which were included in the former estimate, yet, the additional appropriations which are contemplated will require some other provision than has been hitherto made.

As the payment of the interest on the foreign and domestic debts, the annual reimbursements of the six per cent. stock, and the expenses of Government, are secured by the priority of the appropriations for those objects, the committee will perceive, that any deficiency will, of course, fall upon the appropriations for other and more recent services.

The authorities to borrow, now existing, are contained in the first and tenth sections of the act, passed on the 3d of March, 1795, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," and they contemplate, merely, a provision for the payment of interest, or a reimbursement of the principal of the public debt; it will, therefore, be proper that the appropriations for the Department of war, should be accompanied with a power of anticipation, in the usual form.

It being known to the committee, that no loans can, at present, be negotiated in Europe, and that the high profits which reward commercial enterprise, though beneficial to the community, are obstacles to the success of domestic loans, beyond a limited amount, I cannot, consistently with my duty, omit expressing it as my opinion, that some effectual measures, for improving and extending the revenue, ought to be adopted during the present session of Congress.

I have the honor to be, very respectfully, sir, your obedient servant,

OLIVER WOLCOTT, Jr. *Secretary of the Treasury.*

The Hon. WILLIAM SMITH, Esq.
Chairman of the Committee of Ways and Means,

An estimate of the Expenditure and Revenue of the United States, during the year 1796.

EXPENDITURES.	
Interest on the foreign debt,	\$573,632 02
Interest on the funded domestic debt, including the reimbursement of the 6 per cent. stock,	3,018,232 03
Interest on the unfunded debt,	51,333 22
Interest on the debts due to the banks, proposed to be funded at 6 per cent.	372,000 00
	<u>\$4,015,197 27</u>
Reimbursement of an instalment of 1,000,000 guilders, in Holland, in June, 1796,	414,100 00
Appropriation for the civil list, mint establishment, annuities and grants, light houses, and miscellaneous expenses, in 1796, per act of 5th February, 1796,	568,064 94
Appropriation for the military department, per act of March 12th, 1796,	500,000 00
Appropriation for trade with the Indians, per act of April 18th, 1796,	158,000 00

Additional appropriations, which will be required, under the following heads, viz:

<i>Civil List.</i> For additional compensation to attorneys, marshals, jurors, witnesses, &c.	10,000 00	
Clerks in loan offices, and stationary,	14,000 00	
		<u>24,000 00</u>
<i>War Department.</i> The estimate exhibited December 14th, 1795, was for	1,480,247	
Of which, there has been appropriated,	500,000	
The residue of the estimate will be required, in consequence of the rise of provisions, and the extra expense of maintaining new posts, being		<u>980,247 00</u>
<i>Naval Department.</i> Being the sum included in the former estimate,		73,934 00
<i>Military Pensions.</i> Being the sum included in the former estimate,		85,098 00
<i>Contingent expenses of Government.</i> Being the sum included in the former estimate,		20,000 00

<i>Diplomatic Department.</i>	Ordinary estimate,	-	-	-	-	40,000 00		
	Extraordinary,	-	-	-	-	301,132		
							341,132 00	
<i>Expenses incident to treaties.</i>	With Great Britain,	-	-	-	-	80,808 00		
	Spain,	-	-	-	-	18,683 00		
	Algiers,	-	-	-	-	24,000 00		
	Indian tribes,	-	-	-	-	11,000 00		
							134,491 00	
<i>Naval Department.</i>	The sum unexpended, of former appropriations, including the sum granted for galleys, being re-appropriated by an act, passed April 20th, 1796, for building three frigates, is estimated as the sum which will be required under this head, in 1796, being							296,917 82
								<u>\$7,611,182 03.</u>

RECEIPTS, EXPECTED FROM

Duties on imports and tonnage,	-	-	-	-	-	5,679,418 58	
Internal revenues, calculated to be equal to the receipts, in 1795,	-	-	-	-	-	337,255 36	
Postage of letters,	-	-	-	-	-	35,000 00	
Letters patent,	-	-	-	-	-	660 00	
Dividends on bank stock,	-	-	-	-	-	160,000 00	
Proceeds of the sinking fund,	-	-	-	-	-	88,242 79	
							6,300,576 73
Sum to be borrowed, or otherwise provided, in 1796,	-	-	-	-	-	-	1,310,605 30

No. 100.

[2d Session.]

DIRECT TAXES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 14, 1796.

TREASURY DEPARTMENT, *December 14, 1796.*

SIR:

In obedience to the resolution of the House of Representatives, of the 4th of April, 1796, I have the honor to transmit a report, containing a plan for laying and collecting direct taxes, by apportionment among the several States, agreeably to the rule prescribed by the constitution.

I have the honor to be, with perfect respect, sir, your obedient servant,

OLIVER WOLCOTT, Jr.

The Honorable the SPEAKER of the House of Representatives.

The Secretary of the Treasury has, during the recess of Congress, directed his attention to collect such information as appeared necessary to enable him to comply with the resolution of the House of Representatives, passed on the fourth day of April, 1796; and though, from the importance and complexity of the subject, more time and leisure would have been desirable, yet, in obedience to the said resolution, he most respectfully submits the following report:

The duty enjoined is to "report a plan for laying and collecting direct taxes by apportionment among the several States, agreeably to the rule prescribed by the constitution; adapting the same, as nearly as may be, to such objects of direct taxation, and such modes of collection, as may appear by the laws and practice of the States, respectively, to be most eligible in each."

The amount of the proposed tax not being specified in the resolution, the Secretary presumes it to have been the intention of the House that the sum to be apportioned should be sufficient to consummate the system which was established in March, 1795, for the reduction of the present debt of the United States, and commensurate to the probable exigencies of the Government.

This construction has appeared the more reasonable, because necessary to prevent the measures, then adopted, from producing effects in some degree opposite to what were intended. The public faith having been pledged to reimburse a great portion of the debt, which lately rested in permanent loans, sufficient revenues for this object, and all necessary expenses of Government, must be provided, or recourse had to a continued system of borrowing. If this last expedient should be resorted to, the public burdens, though the debts may change their form, will remain substantially the same. The Government will, moreover, be liable to certain risks and expenses, which inevitably attend extensive contracts; and unless it shall be found practicable to obtain new loans, on terms at least as favorable as those to be extinguished, the public debts will be somewhat increased, by the inefficacy of the measures which were intended to reduce them.

It will not escape the attention of the House, that the causes which at present most favor the prosperity of the United States, and consequently increase the ability of the people to pay taxes, are such as oppose obstacles to the negotiation of new loans, or, at least, render their terms peculiarly burdensome and expensive. But, while it would be improper to encourage an expectation that the affairs of this extensive and enterprising country can be successfully conducted without an occasional application to this resource, it ought to be a fixed principle to establish a permanent revenue, adequate to every permanent expense, and sufficient to discharge, in a reasonable time, all loans arising from extraordinary and unforeseen contingencies. This principle has already been recognised by the act of March 3d, 1795, which has solemnly pledged the public faith for the reimbursement of the debt now existing; it, therefore, only remains to embrace the present period, as the most auspicious which has yet occurred, and as favorable as any which may be expected, for establishing and maturing such systems as will efficaciously fulfil the intentions of the Legislature.

As necessarily connected with the question, how far additional revenues are requisite, the Secretary has deemed it to be proper, though not enjoined by the resolution of the House, to present a concise statement of the finances. The period selected for this purpose is the first day of July, of the present year, at which time the debts of the United States were of the following descriptions and amounts:

1st. The foreign debt, consisting of loans obtained by the late and present Government, in Amsterdam and Antwerp, amounting to twenty-nine millions five hundred thousand guilders; equal, at forty cents per guilder, to	\$11,800,000 00
2d. The six per cent. domestic stock, now in a course of reimbursement,	29,344,752 98
3d. The six per cent. domestic stock, upon which reimbursements are to commence in the year 1801,	14,578,882 39
4th. The three per cent. domestic stock,	19,597,545 93
5th. The five and a half per cent. domestic stock,	1,848,900 00
6th. The four and a half per cent. domestic stock,	176,000 00
7th. The unfunded registered debt, exclusive of arrearages of interest prior to the year 1791,	179,953 16
8th. The debts due to the Bank of the United States and the Bank of New York,	6,200,000 00

The sums before enumerated are precisely ascertained by the records of the treasury, and amount to

83,726,034 46

There are, however, in circulation, various descriptions of certificates, the amount and value of which are not exactly ascertained, which, with the balances of certain unliquidated accounts and arrearages of interest, may possibly rise to

1,124,404 24

The entire amount of all those capitals, upon which an expenditure is incurred, and for which provision is necessary, may, therefore, be estimated at

84,850,438 70

To reconcile this representation with reports heretofore made from the treasury, and to prevent erroneous opinions from being entertained respecting the real amount of the public debt, it appears proper to represent that the following sums are indisputable off-sets against the capitals before enumerated:

1st. Six per cent. stock, bearing a present interest, already purchased or redeemed, and vested in the commissioners of the sinking fund,	1,170,232 13
2d. Six per cent. stock, on which interest will accrue after the year 1800,	930,753 91
3d. Three per cent. stock, also purchased or redeemed,	610,757 94
4th. Stock of the Bank of the United States, sold by the United States, estimated at par,	2,000,000 00
5th. The sum reimbursed at the close of the year 1795, on the six per cent. stock,	544,066 54

Amounting, in the whole, to

\$5,255,810 52

The particulars and amount of the expenditure required by the public contracts, in relation to the capitals first enumerated, calculated on an average of the respective years for which each description of debt is to continue, are as follow:

1st. The debts due in Amsterdam and Antwerp, as before stated, amount to eleven millions eight hundred thousand dollars. The contracts respecting them require annual reimbursements in unequal portions, until the year 1809, when the last payment is to be made. The whole sum required for principal and interest, on an accurate calculation, and supposing the utmost punctuality to be maintained on the part of the United States, is sixteen millions seven hundred and seventy thousand four hundred and forty-four dollars.

The average sum which will be required, during the fourteen years, which this debt is to continue, is, therefore,

\$1,197,888 84

This calculation, however, supposes the practicability of such a punctual provision for the payment of interest and principal, as will entirely supersede the use of temporary credits in Europe; and it moreover supposes that remittances can be uniformly made at the par of exchange. As neither of these suppositions will be, in fact, realized, there is to be added to the foregoing sum the estimated expense of remittances above par, and for interest on temporary advances to the United States, to ensure punctuality; this expense will not, probably, be less than five per centum on the annual payments, and being calculated on the average annual demand above stated, will, at this rate, amount to

59,537 30

\$1,257,426 14

Upon the principles herein assumed, the average sum to be provided, until the year 1809, inclusive, for the extinguishment of the Dutch debt, will be one million two hundred and fifty-seven thousand four hundred and twenty-six dollars fourteen cents.

It is proper, however, to state, that the foregoing estimate is founded on a presumption that some systematical plan will be adopted for satisfying the existing contracts, by direct payments from the treasury. In every degree in which recourse may be had to new loans, the expense of reimbursement will be finally increased by at least the charges of negotiation; these, upon such loans as may be hereafter obtained in Holland, cannot be estimated at less than six or seven per centum upon the capitals which may be borrowed.

2d. The six per cent stock, now in a course of reimbursement, exclusive of the sum passed to the credit of the sinking fund, is twenty-eight millions one hundred and seventy four thousand five hundred and twenty dollars eighty-five cents, upon which the annuity of eight per centum amounts to

2,253,961 66

The capital passed to the credit of the sinking fund is one million one hundred and seventy thousand two hundred and thirty-two dollars thirteen cents; upon which the accruing interest of six per centum per annum is

70,213 92

Amounting to

\$2,324,175 58

This sum, last mentioned, will be annually required until the close of the year 1817. During the year 1818, the demand for the object will decline to about one million eight hundred and sixty-five thousand dollars, and will then cease by the extinguishment of the debt.

3d. The six per cent stock, on which reimbursements will commence in the year 1801, amounted, on the first of July 1796, to thirteen millions six hundred and forty-eight thousand one hundred and twenty-eight dollars forty-eight cents, exclusive of nine hundred and thirty thousand seven hundred and fifty-three dollars ninety-one cents, passed to the credit of the sinking fund. The annuity on the first sum, at eight per centum, amounts to

1,091,850 28

And on the latter sum, at six per centum, to

55,845 23

Being, together,

\$1,147,695 51

Which last sum will be required, from the year 1801 to the year 1823, inclusive. During the year 1824, the charge will be reduced to about nine hundred and twenty-five thousand dollars; and, after that period, will wholly cease, with the reimbursement of the debt.

4th. The funded three per cent stock, exclusive of the credit to the sinking fund, amounts to eighteen millions nine hundred and eighty-six thousand seven hundred and eighty-seven dollars ninety-nine cents; on which the annual interest is

569,603 63

The stock of the sinking fund is six hundred and ten thousand seven hundred and fifty-seven dollars ninety-four cents; and the interest thereon,

18,322 73

Amounting to

\$587,926 36

The duration of this annuity may be considered as indefinite: for, though funds for the redemption of the capital stock are eventually appropriated by the act, entitled "An act, making further provision for the support of public credit and for the redemption of the public debt," yet, by a proviso to the twelfth section of the said act, the power of diverting the appropriation to other objects, is reserved to the Government.

5th. The interest on the stock bearing interest at five and a half per centum per annum, (being one million eight hundred and forty-eight thousand nine hundred dollars) will require one hundred and one thousand six hundred and eighty-nine dollars fifty cents.

6th. The interest on the stock bearing interest at four and a half per centum, being one hundred and seventy-six thousand dollars, will be annually seven thousand nine hundred and twenty dollars:

7th. The unfunded debt is of two descriptions, viz:

That which is registered, being	\$179,953 16
And that not registered, estimated at	1,124,404 24

Amounting to

\$1,304,357 40

For this debt no provision has been made by law, except a partial grant from year to year, on account of interest. So far as the debt has been liquidated, the public are bound, by contract, to pay an interest of six per centum per annum. Similar engagements will be expressed in the certificates hereafter to be issued; to discharge which interest, there will be annually required the sum of seventy-eight thousand two hundred and sixty-one dollars forty-nine cents.

8th. The debts due to the Bank of the United States and Bank of New York amount to six millions two hundred thousand dollars; though a part of this sum was borrowed at five per centum per annum, yet, as the existing contracts are expected to be satisfied from the proceeds of new loans, at six per centum, the annuity chargeable upon the revenue is calculated at this last rate, being three hundred and seventy-two thousand dollars.

The annuities before recited comprise all the demands which will be made upon the treasury, in consequence of the present debt of the United States; and being reduced to aggregate sums, and classed according to the epochas for which the said annuities are to continue, they will require a provision of revenue as follows:

1. From the year 1796, until the end of the year 1800, when the annuity on the deferred six per cent. stock will begin to accrue, four millions seven hundred and twenty-nine thousand three hundred and ninety-eight dollars and ninety-nine cents.

2. From the year 1801, to the year 1809, inclusive, when the present foreign debt will be extinguished, five millions eight hundred and seventy-seven thousand ninety-four dollars fifty cents.

3. From the year 1810, to the year 1818, inclusive, when the annuity on the six per cent. stock, bearing a present interest, will be extinguished, four millions six hundred and nineteen thousand six hundred and sixty-eight dollars thirty-six cents.

4. From the year 1819 to the year 1824, inclusive, when the annuity on the deferred six per cent. stock will be extinguished, two millions two hundred and ninety-five thousand four hundred and ninety-two dollars seventy-eight cents.

5. After the year 1824, supposing the debt above mentioned to be extinguished, and the other debts of the United States to remain in their present situation, one million one hundred and forty-seven thousand seven hundred and ninety-seven dollars twenty-seven cents.

By the establishment of a revenue adequate to the current expenses of Government, in addition to the foregoing estimate, during the periods above recited, the following reductions of debt might be effected:

1. At the close of the year 1809, the entire amount of present foreign debt, being	\$11,800,000
2. At the close of the year 1818, the six per cent. stock, bearing a present interest,	29,344,752 98
3. At the close of the year 1824, the deferred six per cent. stock,	14,578,882 39

Amounting, together, to

\$55,723,635 37

After the reimbursement of the foregoing sums, there would still remain, of the present debt,

1. The three per cent. stock, being	\$19,597,545 93
2. The five and a half per cent. stock,	1,848,900
3. The four and a half per cent. stock,	176,000
4. The unfunded and unliquidated debts,	1,304,356 97
5. The debts due to banks, or the stock which may be substituted therefor,	6,200,000

Amounting, in the whole, to

\$29,126,802 90

If, however, the United States can establish a revenue equal to the scale of expenditure which will be necessary in the year 1801, the whole debt may be extinguished by payment or purchase, on or before the end of the year 1824; as also a considerable additional debt, if such should accrue from future contingencies.

The foregoing calculations being founded on existing contracts, are liable to but little uncertainty; it is necessary, however, to form an estimate of the probable expenses of those establishments which the United States must at all times maintain. On this subject there exist no data, from past experience, which afford a satisfactory ground for an opinion; it is believed, however, that it will be unsafe and deceptive to calculate the current expenses of Government at less than the following estimate:

For the support of the civil list,	\$ 486,000
For expenses of intercourse with foreign nations,	100,000
For the mint establishment,	40,000
For light houses,	25,000
For expenses of the loan offices,	12,000
For miscellaneous objects and contingent expenses of Government,	37,000
For the military and naval departments, including pensions,	2,000,000

Amounting, in the whole, annually, to

\$2,700,000

If it shall be found that the expenses of the military and naval departments cannot be reduced below the above estimate, which, though much to be desired, is far from certain, the foregoing calculation will fall short of the real expense; it being morally certain, that the expenses of civil government, will, hereafter, considerably increase.

Assuming it, however, as a principle, that the expenses of the public establishments will amount to two millions seven hundred thousand dollars, and no more, it follows that, to preserve the United States from the necessity of recurring to future loans, it is requisite to establish a revenue, to continue until the close of the year 1800, of seven millions four hundred and twenty-nine thousand three hundred and ninety-eight dollars ninety-nine cents. And from the year 1801 to the year 1809, inclusive, a revenue of eight millions five hundred and seventy-seven thousand ninety-four dollars fifty cents.

It is a further consequence of the foregoing data, that, though a revenue upon this last scale would be more than sufficient to discharge the whole public debt, on or before the year 1824, yet that the absolute engagements of the United States will not require, after the year 1809, more than seven millions three hundred and nineteen thousand six hundred and sixty-eight dollars thirty-six cents; which last sum is less than the annual expenditure required by existing contracts and arrangements.

Having thus presented a view of the probable expenditures of the United States, it remains to shew how far the revenues, already established, afford an adequate resource; the particulars and amount of these revenues are as follows:

Duties arising on imports and tonnage, calculated upon the actual receipts during the year 1795,	\$5,588,961 26
Duties on domestic distilled spirits and on stills, on refined sugar, sales at auction, licences to retail spirits and wines, and on carriages for the conveyance of persons, calculated upon the receipts of 1795,	337,255 36
Revenue from the post office,	35,000
Dividends on bank stock, calculated with reference to certain sales, the proceeds of which will be applied to the payment of part of the debt due to the Bank of the United States,	150,000
Interest on stock purchased and redeemed, and vested in the sinking fund,	88,636 65
Duties on patents and contingent receipts, (uncertain)	746 73
Estimated annual current revenue,	\$6,200,600 00

The revenue from imports and tonnage was, in the beginning of the year 1795, calculated at five millions six hundred and seventy-nine thousand four hundred and eighteen dollars fifty-eight cents; being about ninety thousand dollars more than the present estimate. Fluctuations in the amount of this revenue are to be expected; what the product of the present year will be, cannot be yet known; although it is certain that it will exceed, considerably, that of the year 1795.

As the present design is to ascertain, as accurately as possible, the extent in which confidence may be reposed in the existing revenues, it becomes interesting to consider what effects a termination of the present war in Europe is likely to produce. A consideration of all the causes which may contract or extend the future commerce of the United States, would be evidently premature and unprofitable; it may, however, be safely affirmed, that the unexampled prices which the exports of the United States have lately borne, must have stimulated the demand for, and consumption of, foreign manufactures and productions. A certain proportion of this demand will cease, when the temporary causes, by which it has been produced, are removed. Whatever cause diminishes the consumption of imported articles, will produce a corresponding decrease of the revenue from foreign commerce. There is ground, however, to hope that the unfavorable effects in regard to revenue, which are to be expected from a depression of the present prices of some of our articles of export, will be counterbalanced by an increase in their quantities; by the superior value which others of them are daily acquiring, in consequence of improvements in their manufacture; by the extension of our commerce to new markets, and by the increasing demand for imported articles, which must result from progressive wealth and population.

The sum stated as the product of the internal revenues, will also be considerably exceeded by the receipts of the present year, and is believed to be much below what might be obtained under a different modification of the act imposing duties on distilled spirits and stills, aided by provisions for ensuring a more energetic and punctual collection in some districts. It may also be remarked, that some of the causes which may diminish the revenue from importations, will tend to increase that derived from internal objects. It appears, therefore, to be safe to calculate, permanently, upon the collective amount of the sums which have been stated, as the probable future product of both branches.

The revenue from the post office is likely to increase, if the expenses of that institution are not greatly enhanced by the establishment of new post roads.

In respect to the income from bank stock held by the United States, it is proper to observe, that dividends have been, for some time, declared, at the rate of eight per centum per annum; on the supposition that the stock would not be alienated, it has been customary to estimate this item of revenue at one hundred and sixty thousand dollars. In consequence of the authority contained in an act of the last session, sales have, however, been commenced, for the purpose of reimbursing a part of the debt due to the bank.

To extinguish an annuity due to the bank, equivalent to that received from the dividends, it would have been necessary to sell the bank stock at an advance of thirty-three and one-third per centum upon the original capital. This, however, was not practicable; the best terms which could be obtained, were twenty-five per centum. With reference to the effect which sales, at this rate, will have upon the statement of revenue and expenditure, now presented, the proceeds of the bank dividends are calculated at one hundred and fifty thousand dollars.

The fund arising from stock purchased or redeemed, will be increased by the interest on such sums of stock as may hereafter accrue to the sinking fund, but will, in no event, be diminished. Though this income is vested in the commissioners of the sinking fund, it has been thought proper to present it as an object of public revenue, being, with other funds, appropriated for the redemption of the public debt.

It results, from what has been stated, that the following sums must be provided by the United States, in addition to the revenue already established.

1st. From the present time until and during the year 1800, one million two hundred and twenty-eight thousand seven hundred and ninety-eight dollars ninety-nine cents.

2d. From the year 1801 to the year 1809, inclusive, two millions three hundred and seventy-six thousand four hundred and ninety-four dollars fifty cents.

3d. From and after the year 1809, until the time when the present debt may be extinguished, which will be before the year 1824, one million one hundred and nineteen thousand sixty-eight dollars thirty-six cents.

To provide the sums annually required until the year 1801, without imposing an inconvenient burden on the people, is evidently within the power of the United States; to reimburse the whole of the foreign debt, before the year 1809, by direct payments from the proceeds of revenue, may be practicable. It is, however, most probable that occasional loans, with a view of postponing the final reimbursement of the whole or some part of the said debt, until after the year 1818, will be judged advisable.

From a general view of the operation of the systems of taxation, established in the several States, it appears that, in apportioning a direct tax, to be collected under the authority of the United States, an allowance ought to be made for a defalcation of fifteen per centum, on account of abatements to indigent and unfortunate persons, for erroneous assessments or calculations, and for charges and expenses of collection.

Assuming these data, it is proposed that there be laid upon the United States a direct tax of one million four hundred and eighty-four thousand dollars; and that the same be apportioned to the several States, in the following manner:

To the State of Vermont,	\$28,000
To the State of New Hampshire,	56,000
To the State of Massachusetts,	196,000
To the State of Rhode Island,	28,000
To the State of Connecticut,	98,000
To the State of New York,	140,000
To the State of New Jersey,	70,000
To the State of Pennsylvania,	182,000
To the State of Delaware,	14,000
To the State of Maryland,	112,000
To the State of Virginia,	266,000
To the State of Kentucky,	28,000
To the State of North Carolina,	140,000

To the State of Tennessee, - - - - -	14,000
To the State of South Carolina, - - - - -	84,000
To the State of Georgia, - - - - -	28,000
	Amounting to \$1,484,000
From which, there being deducted for abatements, erroneous assessments, and charges of collection, fifteen per cent., or, - - - - -	222,600
	There will remain the estimated nett proceeds of the proposed tax, being \$1,261,400

An account of the systems of taxation at present prevailing in the several States, and information on various points, connected with the subject under consideration, is next proposed.

OF VERMONT.

The taxes imposed in this State, whether for the use of the State, or of counties, towns, societies, or other subordinate communities, are levied by one rule, that is, in proportion to a general list of ratable objects, composed of the following particulars:

Polls, of male persons from twenty-one to sixty years of age, are rated at six pounds each.

Lands, after being improved two years, either for pasture, ploughing, or mowing, or stocked with grass, and within enclosure, at ten shillings per acre:

Oxen, four years old and upwards, at three pounds each.

Other neat cattle, three years old and upwards, at two pounds.

Neat cattle of two years old, at one pound ten shillings.

Neat cattle of one year old, fifteen shillings.

All horse kind, except stud horses of three years old and upwards, at four pounds.

Horse kind, of two years old, at two pounds.

Horse kind, of one year old, at twenty shillings.

Stud horses; of two years old and upwards, at twenty pounds.

Money, on hand or due, or obligations for goods or produce over and above all debts due by the individual creditors, at twenty per centum of the amount, to be exhibited on oath, if required; to which may be added,

Assessments proportioned to the profits of all lawyers, traders, and owners of mills, according to the judgment and discretion of the listers or assessors.

Exemptions from the assessment on polls are allowed in favor of settled ministers of the Christian religion, the president and tutors of colleges, constant schoolmasters, students of colleges, until three years after receiving their first academical degrees; as, also, in favor of persons disabled by sickness or infirmity. The ratable estates of settled ministers, and the president of the college, lying in the towns where they live, and not exceeding five hundred pounds in value, are also exempted, together with all lands sequestered and improved for schools and other public, pious, and charitable uses. An exemption from taxation, for ten years, is, moreover, allowed for lands properly cleared and tilled for orchards, and planted with apple trees, and containing not less than forty trees upon an acre.

Lists of the ratable estates of individuals, are collected in the following manner: At the annual town meetings in March, the inhabitants of each town elect a number of officers, styled *listers*, who are sworn to a faithful discharge of their office. In the month of May, annually, the inhabitants are warned to exhibit, before the 10th day of July following, lists, or written accounts, of the ratable polls and estates of which they are respectively possessed, on the twentieth day of June: To these lists, as exhibited by individuals, the listers add such sums as they judge reasonable, in cases where the law requires assessments to be imposed on professions and occupations.

Lands are, in all cases, rated in the towns where the lands lie; but cattle on farms, not under the management of a tenant, are rated in the towns where the owners live. No warning by the listers is required beyond the limits of a town.

The sums total of the ratable property, in each town, are returned by the listers to the General Assembly, in October, with certificates that they have been sworn to a faithful discharge of their trust; in case of omission or neglect, the listers become liable to a penalty, and the town, in respect to which the omission happens, becomes subject to be assessed at the discretion of the General Assembly.

The possession of ratable articles, on the 20th of June, is, by law, declared to be presumptive evidence of property, and, if not included in the list of the possessor, he becomes liable to a two-fold assessment; on proof being made to the listers, at any time before the 25th of September, that the articles omitted to be returned, were, on the 20th of June, the property of some other person than the possessor or occupant, relief may, however, be obtained.

The compensation allowed for the services of listers, arises from the taxes on two-fold assessments, one half of which accrue to their benefit.

When individuals are aggrieved by the decisions of listers, either in respect to two-fold assessments, or by assessments on the profits of certain professions and occupations, an appeal is allowed to a justice of the peace, and two selectmen of the town, who, after notifying two or more of the listers, may proceed to make a final decision.

The first constables are collectors of taxes, and are chosen by the inhabitants of the respective towns, which are responsible for their conduct; when a tax is granted by the State, a warrant is issued by the treasurer, directed to the collector, declaring the rate or proportion of the tax, the sum due by the town, and the time prescribed for payment into the treasury. It then becomes the duty of the selectmen to apportion the said tax among the inhabitants of the town, according to their respective lists, and to deliver a statement thereof to the collector, by which to regulate his demands upon individuals; a time and place is then appointed by the collector for receiving the tax, which the inhabitants are bound to observe; on failure of payment at the time and place appointed, the collector may, afterwards, distrain the goods and chattels of delinquents for the amount of the tax, with an addition thereto of one twelfth part, for extra trouble and expenses. Where no goods or chattels can be found or are tendered, the person of the delinquent may be committed to prison. If the delinquent abscond, and no goods or chattels can be found, the lands of the delinquent become liable, of which a sufficient quantity for the payment of the tax, and necessary charges, may be sold at public auction. Prior to the sale of lands, notice of the proposed sale must, however, be given for three weeks in the town in which the land lies, and in two adjoining towns; as, also, in one or more of the newspapers printed in the State. Lands sold for the payment of taxes, may, however, be redeemed at any time within one year after the sale, by the payment or tender of the sum advanced by the purchaser, with interest at the rate of twelve per centum per annum.

When a collector is delinquent in collecting and paying over a tax entrusted to his management, it becomes the duty of the treasurer to issue a warrant, directed to the sheriff of the county, commanding him to collect the sum unpaid, by distraining the goods, chattels, and estate, of such collector. In case a sheriff omits to execute the warrant of the treasurer, against a delinquent collector, the treasurer is empowered to issue a like warrant against the sheriff, directed to a constable of the town in which the sheriff lives; and if a constable, in such case, should omit to collect the tax from the sheriff, he, in turn, becomes liable, and the treasurer may commit the collection of the sum unpaid to any other person, at his discretion.

When a collector of a tax becomes insolvent, the treasurer may issue his warrant against the selectmen of the town, directed to the sheriff of the county, who, in this case, become liable for the arrearages due by the insolvent collector. The selectmen may, however, indemnify and reimburse themselves, by assessing a sufficient tax upon the town, for collecting which, the warrant of any one justice of the peace is a sufficient authority.

Though the office of collector is, by law, attached to that of first constable, which depends upon an annual election by the people, yet, in respect to unpaid taxes, the powers of the collector continue until a final collection and settlement can be effected; and, in case of the death of a collector, his powers and responsibility, while living, descend to his executors or administrators. If, however, a collector remove out of the State, or die, and his estate is found to be insolvent, the people of the town may proceed to the choice of a new collector.

All persons employed in the collection of taxes possess the usual power and authority of sheriffs, and may command any assistance necessary to the performance of their duty.

OF NEW HAMPSHIRE.

The constitution of this State directs, that a valuation of all estates shall be made, at least, once in five years, under *regulations* to be prescribed by the General Court or Legislature. The last valuation was made by the selectmen of the several towns, in 1793, and confirmed by law, in February, 1794. In taking said valuation, the proportions of the different articles of ratable property were estimated in the following ratio:

Polls of male persons, from eighteen to seventy years of age, at eight shillings each.

Orchard land, accounting for an acre, a sufficient quantity to produce, on an average of several years, ten barrels of cider or perry, at one shilling and six-pence per acre.

Arable land, accounting for an acre, a sufficient quantity to produce, on an average of several years, twenty-five bushels of Indian corn, or other grain equivalent, at one shilling per acre.

Mowing land, accounting for an acre, a sufficient quantity to produce, on an average of several years, one ton of English hay, or other hay equivalent, at one shilling per acre.

Pasture land, accounting for four acres, a sufficient quantity to support, on an average of several years, one cow, at five pence each acre.

Unimproved lands, and all buildings, whether owned by inhabitants or non-residents, at one half of one per cent. of the real value.

Stud horses, two years old and upwards, at one pound ten shillings.

Other horse kind, four years old and upwards, at three shillings.

Oxen, four years old and upwards, at three shillings.

Cows, four years old and upwards, at two shillings.

Other neat cattle, three years old and upwards, at one shilling and six pence.

Other neat cattle, two years old, at one shilling.

Other neat cattle, one year old, at six pence.

All stock or property of tanners, curriers, blacksmiths, or other tradesmen, employed in the business of their trades, at one half of one per centum.

All stock in trade of merchants, shopkeepers, or other traders, reckoning the same at the average value thereof for a year, at one half of one per centum.

All money on hand, or at interest, more than the owner pays interest for, and all property in public funds, estimated at its real value, at three-fourths of one per centum.

Mills, wharves, and ferries, at one-twelfth part of their yearly nett income, after deducting repairs.

The polls and ratable property returned from the different towns, with the assessments upon such towns as did not comply with the act prescribing a valuation, amounted, in 1794, to forty-two thousand and ninety-nine pounds six shillings and four pence, on one hundred and forty thousand three hundred and thirty-one dollars and five cents. In proportion as the lists of the several towns contributed to this amount, their quotas were established by law, to continue until a new valuation may be made. The quantities of the different kinds of ratable property, of which the list was composed, will be seen by reference to an annexed document, A.

When a tax is granted by the State, the quotas of the several towns are calculated according to the rule above mentioned; warrants are then issued by the treasurer of the State, directed to the selectmen, requiring them to assess the said quotas upon the inhabitants. The assessments upon individuals are governed by the principles of the rule by which the quotas of towns are determined. The selectmen are, therefore, empowered to require, annually, inventories of the polls and ratable property of the inhabitants. The time for taking these inventories, is the first day of April in each year. Those who omit to exhibit inventories, or refuse to verify the same on oath, when required, may be doomed or assessed by the selectmen, as they judge equitable. In cases where it is discovered that there has been a fraudulent concealment of ratable property, by an individual, the selectmen are empowered to increase the assessment to four times the amount at which the concealed property would otherwise have been rated.

The selectmen are empowered to abate taxes, and to correct erroneous assessments. Individuals who are aggrieved, may, within nine months after notice of an assessment, apply by petition to the court of sessions of the peace for the county, whose judgment is conclusive.

To prevent trouble and expense from repeated collections during the same year, the selectmen may include, in one tax bill, the taxes granted by the State, the county, and the town, with an addition of five per centum to cover defalcations arising from abatements or other causes; the surplus of which, if any is found to remain, accrues to the treasury of the town.

Collectors of taxes are either chosen by the inhabitants, or they may be appointed or employed by the selectmen, from whom they receive tax bills, with warrants to collect the sums therein expressed. The selectmen are directed to cause their proceedings, in assessing taxes, to be recorded by the town clerks, and to make returns to the treasurers of the State, county, and town, of the sums assessed to be paid to them respectively, with the names of the collectors, the dates of their warrants, and the time therein prescribed for the settlement of the taxes entrusted to them for collection.

In cases where the selectmen neglect to assess a tax pursuant to a warrant from the treasurer, their persons and estates become liable to the payment of the tax, which may be taken and distrained for the same. When the name of the collector is not returned to the treasurer, pursuant to warrant, the selectmen also become liable, and are, moreover, precluded from any remedy against the town for any costs and expenses attending the collection, exceeding the quotas mentioned in the treasury warrant. If the estates of the selectmen are found to be insufficient, or their persons cannot be taken and imprisoned, the treasurer may issue his warrant against the inhabitants of the town generally, who, in this case, become, jointly and severally, responsible.

The collectors of taxes are required to give fourteen days' notice of the sums assessed upon individuals, before they proceed to collect the same by distress; and in no case is it lawful to take by distress the tools or implements necessary to the trade or occupation of any person, nor his arms; or the necessary household furniture of a family.

For want of goods or chattels whereon to make distress, the person of the individual indebted may be taken and committed to prison.

When no personal estate can be found whereon to levy by distress, and the person of the delinquent cannot be taken, real estate may be taken and sold for the payment of taxes, under certain prescribed regulations, calculated to give publicity to the sale. On the sale of real estate, according to law, the collectors may execute conveyances, defeasible within one year, by the payment or tender of the sum advanced, with interest and costs.

The powers of collectors continue until the taxes committed to their management are finally adjusted. Their compensations are various, and depend upon agreements with the selectmen of the several towns; on a medium calculation, they are estimated from four to five per centum on the amount of the taxes. It is customary to require bonds, to secure the towns against their delinquencies.

The time commonly prescribed for collecting and paying a tax into the treasury, is one year. In what degree the requirements of law, in this respect, have been fulfilled, is not ascertained. It is to be inferred, from the infor-

mation received, that delays beyond the prescribed term frequently occur, and that, when heavy taxes have been imposed, arrears have remained uncollected for several years, which have been afterwards entirely remitted. The principles of the system of taxation, now established, have been generally approved by the people of the State.

The existing debt of the State is inconsiderable, and is likely to be entirely discharged in a short time. The whole expense of supporting civil government, paid by the State, is estimated at about twenty-eight thousand six hundred dollars per annum. The aggregate amount of county, town, and parochial taxes, is known to be more considerable, though not ascertained.

OF MASSACHUSETTS.

The constitution of this State provides, that, while the public charges of Government, or any part thereof, shall be assessed on polls and estates, in the manner practised prior to the establishment of the said constitution, there shall be a valuation of estates taken, once in ten years, and as much oftener as the General Court or Legislature shall direct.

The valuation under which taxes are, at this time, assessed, was taken in pursuance of an act passed on the 22d of February, 1792.

By this act, the assessors of the different towns, districts, and plantations, (officers always existing) were directed to take and lodge in the office of the Secretary of State, on or before the 10th day of October, 1792, true and perfect lists of all male polls, including negroes and mulattoes, sixteen years old and upwards, whether at home or abroad; distinguishing the polls of persons from sixteen years to twenty-one years of age, from those of persons twenty-one years of age and upwards, and also distinguishing the polls of persons exempted from taxation. Also, particularly mentioning dwelling-houses, with shops within the same, or adjoining thereto, shops separate from dwelling-houses, tan houses, slaughter houses, sugar houses, pot and pearlsh works, ware houses, wharves, grist mills, fulling mills, saw mills, iron works and furnaces, bake houses, and all other buildings and edifices of the value of five pounds and upwards; the number of tons of vessels, and small craft of every kind, upwards of five tons burthen, whether at home or abroad; the amount of each person's whole stock in trade, including all goods, wares, and merchandise, at home or abroad, paid for or not paid; also, those in their hands by factorage; government securities of all kinds, distinguishing those of the United States; all moneys placed out at interest, exceeding the sums due on interest by the individual creditors; moneys on hand, including moneys deposited with an agent, or in any bank; stock owned by stockholders in any bank; ounces of plate of all kinds; horses and neat cattle, of three years old and upwards; and swine of six months old and upwards.

In rendering lists of lands, the assessors were directed to distinguish the improvements thereon by the following criteria: The number of acres of pasture land, with the number of cows which the grass of each entire farm would support, together with the number of barrels of cider produced, on an average of several years, upon each farm; the number of acres of tillage land, with the number of bushels of grain or corn, of all sorts, usually produced; the number of acres of salt marsh, with the tons of hay usually produced; the number of acres of English upland and fresh meadow, mowing land, with the tons of hay of each sort usually produced; the number of cows, let out, according to a custom, by which a proportion of their increase is reserved to the owners; the number of enclosed acres of woodland; also of lands unimproved, owned by individuals and by towns; of lands unimprovable, or used for roads, or covered with water; distinguishing each by estimate.

In making up the returns above mentioned, provision was made for exempting from valuation the polls of the president, fellows, professors, tutors, librarian, and students of Harvard college; of settled ministers, of grammar school-masters, and masters of the several incorporated academies, with their estates, under their own actual occupation and improvement, and also all the estates belonging to Harvard college, and the said academies.

The object of this minute detail of the different species of property possessed by the inhabitants, was to obtain information of the sources of the revenue or income of the whole State, and thereby to establish an equitable ratio of contribution for the several counties and towns. It was specially declared in the act, that the enumeration of the articles of the produce of the lands should not be taken into consideration in forming the valuation, for any other purpose than for ascertaining the relative value of lands in different districts. In collecting and making up the returns, the assessors were under oath faithfully to execute their trust; and they had power to require of individuals, a verification, on oath, of the lists of property by them respectively exhibited. In cases of neglect to exhibit written lists of property subject to valuation, or of refusal to attest the same on oath or affirmation, the assessors were authorized to *doom* or assess the individuals so neglected or refusing, according to a conjectural estimate of their property.

The result of the returns taken, according to the act before mentioned, is annexed, (B.) In determining the quotas of towns, all property, except unimproved lands, was estimated at six per centum of its supposed real value; and unimproved lands at two per centum of the real value. At these rates, the wealth of the whole State was found to be nine hundred and thirty-seven thousand six hundred and ninety-eight pounds, four shillings and two-pence half-penny, lawful money; upon which sum, in combination with an assessment on polls, hereafter mentioned, the quotas of the several counties, towns, and plantations, in a tax of one thousand pounds upon the State, were established, and by these quotas, taxes are now imposed. The number of taxable polls returned, was one hundred and six thousand one hundred and sixty-seven; which were assessed one half-penny each, or two-ninth parts of a tax of one thousand pounds upon the State.

The proportions of taxes payable by counties and towns, being thus settled by a rule which may continue for ten years, unless changed in consequence of a new valuation, they are assessed upon individuals, and collected under the following regulations:

In the month of March or April, annually, when other town officers are chosen, the inhabitants of the respective towns, severally, elect three, five, seven or nine assessors, who are sworn to a faithful discharge of their duty. A person chosen to be an assessor, and refusing to take the oath, becomes liable to a fine of five pounds; which may, however, be remitted by the court of the general sessions of the peace, at their discretion.

If a town omits to choose assessors, or they refuse to serve, the selectmen become assessors, of course. If a town omits to choose either assessors or selectmen, or if they omit to do their duty, assessors may be appointed by the court of the general sessions of the peace for the county; who, in addition to their other duties, may be authorized to assess a fine upon the town, not exceeding one hundred pounds, nor less than thirty pounds, as may be determined by the court. The compensation allowed to assessors chosen by the towns, is four shillings per diem, while employed in service; and to assessors appointed by the court of general sessions, ten shillings per diem, payable, in both cases, out of the town treasuries.

When a tax is granted by the State, the treasurer issues his warrant, directed to the assessors, commanding them to assess the proportion or quota of the town; the sum to be assessed on each poll is always expressed in the treasurer's warrant, and is, as nearly as may be, one half-penny for each thousand pounds of the tax laid upon the State. The tax on polls being uniform, is assigned to each individual; a sufficient sum to secure a collection of the remainder of the town quota, is then apportioned upon estates. In this apportionment the assessors are directed by the treasurer's warrant, in which reference is had to the objects of taxation, and rules of estimating the same, which governed in fixing the last valuation. In making out the assessments upon individuals, the assessors are required to distinguish the proportions assessed for polls, for real estates, and for personal estate and income; also the number of acres of unimproved land for which a tax is assigned to a non-resident proprietor, and the value at which the same is estimated; also the tax assessed to any person upon property held in trust for others. The warrant moreover directs, that, when the list is completed and signed by a majority of assessors, it shall be delivered to the collector of the town, with a warrant and direction for collecting the sums therein expressed, and paying the quota of the town

over to the treasurer, by a certain day. It also prescribes a day for rendering a return to the treasurer, of the name of the collector.

If, for any reason, there be no assessors to execute the treasurer's warrant before mentioned, or if they neglect to perform the duties enjoined on them, for the space of five months, it becomes the duty of the treasurer to issue a warrant, directed to the sheriff of the county, commanding him to collect the amount of the tax by distress and sale of the estates, real and personal, of any of the inhabitants of the delinquent town. On receiving this warrant, it becomes the duty of the sheriff forthwith to transmit an attested copy thereof to the selectmen or town clerk of the delinquent town; if, however, within sixty days, the sheriff receive a certificate, that the taxes required by the warrant have been assessed, he may return the same unsatisfied, to the treasurer.

The process pursued in executing the treasurer's warrant to assessors, is similar to that before described for taking a valuation; that is, a time is prescribed by notification to the inhabitants, for exhibiting lists of their polls and ratable property; such as omit a compliance, or as refuse to verify their lists on oath, when required, are liable to be doomed or assessed, at discretion.

Persons aggrieved by erroneous or excessive assessments, may obtain relief by application to the court of general sessions of the peace for the county.

It is a general rule to make a list for every tax which is granted; but, when county or town taxes are so small as to render a separate assessment inconvenient, they may be combined with other taxes, and collected together. To cover defalcations arising from abatements, and for the purpose of avoiding inconvenient fractional divisions, the assessors may apportion, beyond the sums proposed to be raised, a surplus or addition of five per centum; provided, that such addition does not exceed forty pounds in the whole, for any town. When the assessors have completed an assessment, copies of their proceedings are lodged in the office of the clerk or register of the town.

The collectors of taxes are chosen by the inhabitants of towns, at their annual meetings, and are sworn to a faithful and diligent discharge of their trust; if no collectors are chosen, the constables are collectors, of course; in towns where no constables are chosen, the taxes are collected by the sheriff of the county, or his deputies.

The towns agree with the collectors, upon the sums which they are to receive for collecting taxes, and their compensations are paid by the towns respectively; these compensations vary from three to five per centum on the sums collected; when the collections are made by the sheriffs or their deputies (in consequence of omissions to choose collectors or constables) they are allowed to take a commission of five per centum, of such persons as voluntarily pay the sums assessed upon them, within thirty days after a public and general notification and demand; those individuals who neglect to pay their proportions for a longer term, become liable to the charges incident to a levy and collection by distress.

The powers of collectors are derived from warrants granted by the assessors or selectmen; these warrants accompany the lists of assessments upon individuals, and specify the quota payable by a town, the time when it is to be settled with the treasurer, and the duties of the collectors.

Unless there is reason to suspect that a person from whom a tax is due, is about to abscond, no collection by distress can be made until twelve days after a demand; after twelve days, goods and chattels, sufficient to satisfy the tax, may be taken. The goods and chattels, so taken, must, however, be kept four days at the risk and charge of the owner, after which, and a public notification of the proposed sale, during two days, they may be sold at public auction. If goods and chattels, sufficient to satisfy the tax, are not presented by the debtor, his person may be taken and committed to prison, there to remain until discharged according to the usual course of law; or, in consequence of an abatement of the tax, by the assessors. It is not lawful to make distress of the tools or implements of a trade or occupation, beasts of the plough necessary for the cultivation of improved lands, arms, or the household utensils, or apparel, necessary for a family. When a person removes from a town, leaving a tax unpaid, the collector may pursue him and take his goods by distress, or his person, in any part of the State where he may be found.

When no person appears to pay the taxes on unimproved lands of non-resident proprietors, or improved lands of proprietors living out of the State, the collectors are to advertise the same for three weeks successively, in the newspaper printed by the printer to the State; as also, in the town where the lands lie, and in three adjacent towns; describing particularly the said lands, and mentioning the taxes remaining unpaid, and the time proposed for a sale. If the taxes be not paid in consequence of such advertisement, a quantity of the lands, sufficient to pay the taxes and incidental charges, may be sold by the collectors, who may grant conveyances therefor, defeasible in two years, by the payment of the sums for which the sale was made, and intervening charges, with interest at the rate of ten per centum per annum. The purchaser is, in the meantime, however, restrained from committing any waste or destruction of the timber on the lands so purchased. When the owners of improved lands, or other real estates, remove from the towns where they resided when taxes were assessed, leaving the same unpaid, and no personal property to satisfy the said taxes, can be found, the collectors may, after three months, proceed to sell the same, under the provisions and conditions before mentioned. To prevent the sale of lands without due notice, it is, however, provided, that, when non-resident proprietors shall have authorized, in writing, agents or attorneys, dwelling in the towns where the lands lie, to pay the taxes accruing thereon, and shall have caused their written authorities, for this purpose, to be recorded in the offices of the town clerks, the collectors shall not proceed to advertise for sale the lands of such non-resident proprietors, until the expiration of two months after a personal or written demand of such agents or attorneys, and a failure of payment.

When taxes are made payable at two different periods, and a person assessed is about to remove from the town, the whole of the tax, although the same may not have become due, may be demanded at one time, and, if necessary, be collected by distress. The powers of collectors continue until the taxes committed to them are fully settled, although the time for which they were elected be expired; and if they are hindered, or obstructed, in the execution of their duty, they may, both within and without the limits of their respective towns, command assistance, under a penalty of fine or imprisonment, if such assistance be not afforded. Personal property of a tenant, found on lands, at any time within nine months after a tax bill is committed to a collector, is liable to be distrained for the taxes assessed on the lands in his occupancy; the proprietor of the land is, however, in this case, answerable for the value of the property distrained. If the collector forbears to levy the tax, during nine months, he may not afterwards proceed, except against the person of the proprietor, or by sale of the lands in the manner before described. When persons indebted for taxes abscond, or conceal their property, collectors of taxes are allowed the same remedies against their agents, factors, or trustees, as other creditors have for the recovery of their debts.

When a collector is delinquent in collecting or paying over the sums expressed in his rate bills, it becomes the duty of the treasurer to issue a warrant, directed to the sheriff of the county, returnable in ninety days, commanding him to levy the sums in arrear, by distress and sale of the real or personal estate of the delinquent collector; and, for want of estate, to commit his body to prison. If the sheriff fail to execute the warrant, or to pay the sums collected, a like warrant, directed to the coroner of the county, may be issued against the real and personal estate of the sheriff.

When no estate of a delinquent collector can be found by the sheriff, or his estate is insufficient, or when the person of the collector cannot be taken, or, being taken and committed to prison, the tax remains unsatisfied, for the term of three months, the town becomes responsible, and liable to a new assessment for the deficiency. It then becomes the duty of the treasurer to notify the assessors of the town of the failure and delinquency of their collector, and to require them to reassess the deficiency, and to commit the collection thereof to a new collector. On failure of compliance for more than three months, the assessors become liable to be proceeded against, in the same manner as against delinquent collectors. The property of delinquent collectors, at any time acquired, is held responsible for sums reassessed upon towns, in consequence of their neglect, and for all damages occurring thereby. When collectors die, their executors and administrators are responsible for all sums actually collected, to the full amount of all assets in their hands; and if they fail, for more than two months after the decease of the collector, to make up and settle their accounts with the assessors, they become, in like manner, responsible for any sums remaining uncollected.

When a warrant of distress is directed by the treasurer, against a delinquent sheriff, deputy sheriff, or collector, and lands or real estate are taken, fourteen days' notice of a proposed time of sale must be given, in at least two public places in the town where the estate lies, and also in two adjoining towns; after which, the officer executing the warrant may proceed to make sale of the estate at public auction, and may execute a valid conveyance therefor. If the estate taken is insufficient to satisfy the warrant and the charges of sale, the treasurer may issue an *alias* warrant or execution, which may be levied on the person of the delinquent deputy sheriff, or collector.

When a collector has been taken by a warrant from the treasurer, or is supposed to be about to remove out of the State, the assessors or selectmen may require a surrender of the tax bill in his hands, with the evidences of the sums by him collected; and may convene the inhabitants of the town, for the purpose of electing a new collector. If a collector abscond or secrete himself, for one month, the selectmen or assessors may proceed, by a declaration, filed in the supreme judicial court, to obtain judgment of outlawry: if, however, the collector afterwards surrender himself, and pay the taxes by him due, and all costs of the process against him, and cause the settlement thereof to be recorded in the supreme judicial court, such record will operate, and be a full reversal of the judgment of outlawry.

When the estate of an inhabitant, not being an assessor, is taken by a warrant of the treasurer, issued against the inhabitants of a town generally, the inhabitant whose estate is so taken, is entitled to an action against the town, to recover the full value of the estate taken, with costs and interest, at the rate of twelve per centum per annum.

There are, at present, in Massachusetts, seventeen counties, and about three hundred and eighty towns or districts, liable to be assessed for the payment of taxes. Some towns elect but one collector, others three or four, as is judged most economical or convenient. In the treasurer's books one account is opened with each town or collection district, for the whole amount of the tax; if there be more than one collector, the sums which each is to pay are separately detailed. All payments are passed to the credit of the town generally, expressing, however, by whom made.

The regulations and provisions before mentioned, have been found sufficient to ensure the final payment into the treasury of the taxes hitherto imposed by the State. The degrees of punctuality with which settlements have been effected, are understood to have been various; according as the taxes have been more or less burdensome. Of a tax of about one hundred and fifty thousand dollars, granted in June, 1794, and directed to be paid into the treasury by the 1st day of April, 1795, about eleven thousand dollars were paid by the time prescribed; seventy-one thousand dollars, including the payment first mentioned, within three months; eighty-eight thousand dollars within six months; one hundred and nine thousand dollars within nine months; one hundred and thirty-one thousand dollars within twelve months; and one hundred and forty-five thousand dollars within fifteen months, after the time limited. As this was a tax of ordinary magnitude, and one of the last which has been imposed, it is supposed to afford a fair illustration of the operation of the revenue system, under which it was collected.

The debt of the State is estimated at two millions three hundred and fifty thousand dollars, bearing an interest of five per centum, per annum, or	\$117,500
The funds out of which this interest is paid, are the dividends on stock of the Union Bank, held by the State, estimated at	\$34,300
Interest on the debt due by the United States, on the settlement made by commissioners,	57,518
Amounting to	91,818

The deficiency, being	\$25,682
is supplied by an annual tax on polls and estates.	

The annual expenses of supporting the government of the State are estimated at about one hundred and twenty thousand dollars; consequently, the annual taxes cannot be less than one hundred and forty-five thousand dollars. (C.)

The proceeds of certain lands are by law appropriated, in the hands of commissioners, to the purchase of the debt due by the State, with the interest of debt so purchased; by the operation of this fund, about three hundred thousand dollars have been already redeemed.

It is understood that the county and corporation taxes very considerably exceed those imposed by the State.

OF RHODE ISLAND.

The mode of assessing and collecting taxes in this State, is understood to have been essentially the same as at present, from an early period of its settlement: for, though various alterations have been made, none of them have been of a nature to affect the principles of the system.

At present, taxes are assessed on polls and on the collective mass of property, owned by the inhabitants of the State, both real and personal. The only exceptions which appear, in an act passed in June, 1795, for taking a general estimate of ratable property, are household furniture, excepting plate, farming utensils, the tools of mechanics, and one quarter part of all property at sea. The last exception is understood to have been made merely in consideration of the risks incident to commerce.

The towns are the only collection districts; they are responsible to the State treasury for the proportions of taxes assigned to them by the Legislature. These proportions are ascertained by general valuations, which are from time to time directed to be taken, when an increased population, advanced improvements, or accumulations of wealth from commercial business, or other causes, are found to have changed the relations of wealth which subsisted at the time of taking a former valuation; the three last valuations were taken in the years 1767, 1778, and 1795. (D.)

The estimate according to which the quotas of the different towns are at present determined, was taken in the following manner:

An act was passed by the Legislature, in June, 1795, directing the towns to elect committees in the month of August following, to consist of not less than three, or more than five persons; which committees were directed to call upon the inhabitants of their respective towns, and to require them to render, on oath or affirmation, true and perfect accounts of all their property, real and personal, with the exceptions before mentioned.

The committees were directed, in the next place, from the lists of property exhibited by individuals, the former valuation lists of the towns, and such other information as they might be able to obtain, to make out just estimates of the whole property of their respective towns; in performing which duty they were to be under oath.

By the act of the Legislature above mentioned, a committee of ten persons was appointed, who were directed to visit all the towns in the State, and after requiring the committees of towns to appear before them, with their estimates, and the lists exhibited by individuals, they were empowered, on the best information which they could obtain, to fix the quotas of the several towns, and to report a general estimate of the ratable property of the State.

It was provided that, if any person should refuse to exhibit a list of his property to the committee of the town, it should be in the power of the committee of the State to fix such a valuation as they should judge proper; according to which, the delinquent individual should be liable to two-fold taxation; a like provision was also made for assessing and taxing a town, in case of an omission to elect a town committee, or of a general omission of the inhabitants to exhibit lists of their property.

By the valuation taken in the year 1767, the ratable property of the State was found to be seven millions three hundred and seventy one thousand one hundred and eighty-six dollars seventy-seven cents. By the valuation taken in 1778, including that of the insular towns in Newport county, which was not taken till 1783, ten millions nine hundred and seventy-seven thousand nine hundred and nine dollars sixteen cents. And by the valuation taken in

1795, fifteen millions five hundred thousand dollars. Of the valuation taken in 1767, about three fourths of the aggregate estimate appears to have arisen upon real, and one fourth part on personal property. Of the valuation taken in 1778, but little more than one sixth part was estimated for personal property. No certain data have been obtained for ascertaining the proportion in which personal property contributed to the valuation in 1795. It however appears that the increase in the estimate has been principally owing to real or supposed accumulations in the commercial towns of the State, some of which have complained of undue assessments.

According to a principle established by long usage, the poll tax is uniformly six-pence on each poll, for every thousand pounds of a tax upon the State. Assuming as data, which cannot be materially erroneous, that there are twelve thousand ratable polls in the State, and that one fourth part of the general valuation taken, in 1795, was founded on personal property, it will follow that taxes are assessed on real and personal property and on polls, in the following proportions:

On polls, by an uniform rate,	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	\$300	
On personal property, ad valorem,	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	175
On real estates, ad valorem,	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	525
Whole amount of a supposed tax,	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	\$1,000

But, notwithstanding the general rule is supposed to be nearly as is above stated, it is understood that the individual towns are not necessarily confined thereto. By a vote of the freemen of Providence, the poll tax has been abolished, in respect to that town, where it has been resolved that all taxes shall be raised by an assessment on estates only.

The exemptions from taxation are in favor of the estates belonging to Rhode Island college, houses dedicated to public worship, and the polls of settled ministers of the Christian religion.

The apportionment of taxes upon individuals is performed by assessors, who are annually chosen by the inhabitants of the respective towns. When a town omits to choose assessors, it becomes liable to a fine of fifty pounds, recoverable by the treasurer of the State, by an action of debt against the treasurer of the delinquent town. Notwithstanding the obligation upon towns to choose assessors annually, it has, however, been usual to authorize new appointments, whenever a tax is granted by the State.

Prior to the assessment of a tax, the inhabitants are required to exhibit, on oath or affirmation, lists or accounts of their estates. Those who omit or refuse, are assessed at the discretion of the assessors, and are, moreover, precluded from any remedy by abatement. The value of the property exhibited in the lists of individuals, is determined by the judgment of the assessors. The court of general sessions of the peace of the county may, however, relieve against excessive valuations, and may award the payment of costs out of the town treasury.

When the valuations of property are ascertained, the sum to be raised by the uniform poll tax, before described, is apportioned, and the remainder of the tax is then distributed by a poundage rate, in proportion to the lists of property possessed by individuals. The completed tax bills are then delivered to the town-clerk, by whom a copy is made and certified to the treasurer of the State, with the name of the collector for the town.

Collectors are chosen by the inhabitants of towns, which are responsible for their conduct; they are authorized to proceed, in collecting taxes, by warrants from the treasurer of the State, affixed to the copies of tax bills, transmitted to him by the town clerks. As a security against the delinquencies of collectors, it has become an universal practice for the towns to require sureties for their fidelity.

The collectors may distrain goods or chattels for the payment of taxes, and for want thereof may commit delinquents to prison. When goods and chattels are not to be found, the lands of persons living out of the limits of the State may be sold and conveyed by a collector; due notice being previously given by advertisement in the newspapers printed within the State.

When collectors were delinquent, it was formerly the practice, authorized by law, for the treasurer of the State to issue warrants of distress against their goods and chattels, and for want thereof, to commit their bodies to prison. Of late, a different rule has obtained; when the quota of a town is not paid into the treasury, by the day prescribed, a warrant is issued by the treasurer of the State, against the treasurer of the delinquent town, who may proceed in a summary manner against the delinquent collector and his sureties. All charges incident to a warrant against a town treasurer, may, in addition to the original tax, be collected of the individuals who remained delinquent at the time of issuing the said warrant. The towns are responsible for interest on the sums not paid into the State treasury by the time prescribed, which interest may be collected of the individuals in arrear.

All expenses of assessing and collecting taxes, are paid by the towns respectively; when the rule of compensation is not varied by special agreement, the assessors are entitled to one and three quarters per centum, for apportioning, and the collectors to five per centum, for collecting a tax. The actual expense of collection is various, but, in consequence of competitions for the office of collector, which have been encouraged by the towns, this expense has been reduced to three and three quarters per centum, and, in some instances, as low as two and an half per centum.

The taxes lately imposed have been moderate, and have been well collected. Of a tax for twenty thousand dollars, granted in October, 1794, payable on the first of February, 1795, two thirds were paid in three months, and the whole in nine months after it became due.

The expenses of the State Government are annually about five thousand dollars, exclusive of the expenses attending the erection of state houses and prisons, which, for several years past, have averaged about eight thousand three hundred dollars more. The amount of country and town taxes cannot be ascertained.

The State is indebted about ninety-eight thousand dollars, for discharging which, no resource is known to exist except revenue from taxation.

OF CONNECTICUT.

Taxes are imposed in this State according to a system which has obtained from an early period, without any radical change or alteration.

The objects specifically enumerated in the law now in force, are polls, lands, and the stock of farms, with certain exemptions; houses, carriages for the conveyance of persons, plate, clocks and watches, credits on interest, exceeding the debts due on interest by the individual creditors, excepting loans to the State and the United States; to which may be added *assessments* proportioned to the estimated gains or profits arising from any, and all, lucrative professions, trades, and occupations, excepting compensations to public offices, the profits of husbandry, and common labor for hire. The proportions in which taxes were imposed on the several ratable objects, in the year 1795, will appear from the annexed document (E.)

The distribution, assessment, and collection, of taxes upon these objects, are performed in the following manner:

In the month of December, annually, the inhabitants of the respective towns are convened, pursuant to a permanent law, for the choice of town officers. A description of officers is then chosen, denominated *listers*; the number of these officers, in each town, is determined by the inhabitants; previously to entering on their duties, the listers are sworn to a faithful and diligent execution of their trust. In the month of July, annually, the listers, by notification at some public place, in each society of their respective towns, require the inhabitants to exhibit, on, or before the tenth day of September, following, lists or inventories, of the ratable property by them respectively owned, on the *twentieth day of August*, which day is assigned by law for taking the lists of ratable property throughout the State.

Immediately after the tenth day of September, the lists or inventories of ratable property, returned by the inhabitants, are, by the listers, collected and arranged; of these, an aggregate list or statement is formed, exhibiting the quantities and ratable value of the differet taxable objects, as, also, the particular sums assessed upon trades and professions. From the list of polls, the listers then, in conjunction with the civil authority and selectmen, abate or deduct the polls of persons disabled by sickness or other infirmity; it is, however, provided, that such abatements

or deductions may not exceed one tenth of the number of polls borne on the list of the town; the aggregate list of the town, after the abatement of polls is made, is then returned to the General Assembly, at their annual session in October.

After the return of the aggregate list to the General Assembly, the listers meet, and enter upon a scrutiny of the lists exhibited by the individual inhabitants, which continues from time to time, as circumstances require, until the close of the year. During this period, inquiries are made respecting ratable property, which may have been omitted, and such as is discovered to have been omitted through fraud or neglect, is assessed four-fold. The additions to the list, in consequence of accidental omissions, and the amounts subjected to four-fold taxation, are then arranged and reduced to a new aggregate, which is returned to the General Assembly, in May following. In case of an omission to make up and transmit to the General Assembly the aggregate list, in October, or the additions and four-fold assessments in May, together with a certificate that the listers have taken the oath prescribed by law, they become subject to a fine, and the town in which the omission happens, is, moreover, liable to be doomed or assessed, at the discretion of the General Assembly.

The amounts of ratable property, in each town, and the proportions in which it is possessed by individuals, being definitively settled for the year, by the result of the scrutiny ending on the last day of December, the listers are required by law, some time in the month of January, to make out lists or statements, containing, in alphabetical order, the names of the inhabitants, their ratable property, and the amount of the lists of each individual. In these lists or statements, the inhabitants are classed according to the societies or religious corporations to which they respectively belong. When the lists are completed, they are delivered to the town clerk, or register, and form a part of the records of the town.

By means of the aggregate lists returned to the General Assembly, a general statement of the ratable property possessed in the State, and in each county and town, is annually framed; and by a reference to the offices of the town clerks, the list of any society, or individual, may at any time be known.

According to these annual lists of ratable property, all taxes are imposed, whether for the use of the State, or for the use of any county, town, or society. When a sum of money is required, a calculation is made of the rate or proportion necessary to be imposed, on the aggregate list, and by knowing the rate or proportion of the tax granted on the aggregate list, every individual can readily ascertain the sum with which he is charged.

Errors in the aggregate lists, which affect the proportions of towns, are rectified by the treasurer, on receiving satisfactory certificates from the listers, pointing out the causes of such errors. When individuals are affected by errors or over charges, they may receive redress by applying to the listers; but, if the listers refuse relief, an appeal is allowed to a tribunal, consisting of two justices of the peace, and three selectmen of the town, who, after notifying two or more of the listers, may proceed to a final decision. All applications, by individuals, for relief against errors or overcharges, must, however, be made on, or before, the twentieth of April next, after the error or overcharge occurred.

The property of non-residents is taxed in the same manner as that of inhabitants. The exemptions from taxation are in favor of settled ministers of the Christian religion, and the president of Yale college, whose polls and their estates, lying in the society or town in which they dwell, together with all lands or buildings sequestered for schools, or other public or pious uses, are exempted.

The listers are, by law, entitled to receive, from the town treasuries, a compensation of thirteen cents upon every thousand pounds of the sums included in the lists of the respective towns; besides which, one half of all the taxes collected upon four-fold assessments accrue to their benefit.

The collectors of taxes are chosen by the towns, respectively, which are responsible for their delinquencies; in some cases bonds, with sufficient sureties, are required, as a condition of appointment; in all cases, the selectmen have a controlling power over the conduct of collectors.

When a tax is granted by the State, the treasurer, without special direction, but as a matter of course, issues his warrants directed to the collectors, requiring each of them to collect a certain sum, which is always a poundage rate upon the lists of the several towns; of the sums expressed in the warrants, the civil authority and selectmen are, however, authorized to abate one eighth part, which is never collected, but applied to the relief of indigent or unfortunate persons; by means of this provision, the operation of a general rule of taxation is reconciled with equity, in particular cases.

There is, also, allowed annually, out of the taxes granted by the State, the sum of two dollars upon every thousand dollars of the aggregate lists of the several towns, as a partial support for public schools; this allowance, in a fiscal view, is equivalent to an additional abatement or deduction from the annual taxes.

The collectors have the usual powers of sheriffs, and may execute their warrants, by distress and sale of goods and chattels; when these are not to be found, they may attach real estate, or, for want thereof, they may commit delinquents to prison. They are required, however, to warn the inhabitants to pay their proportions, and may not proceed to make distress until after such warning, and a consequent non-compliance, nor until two months before the day assigned for paying the tax into the treasury.

When the person of a delinquent is committed to prison, the town becomes liable to the collector for the amount of the tax, which if necessary, may be recovered of the selectmen, by a warrant from the treasurer, in favor of the collector; to charge the town, it is, however, necessary, that the commitment be made within eight months after the tax became payable. The warrants of collectors run throughout the State, and may be levied wherever persons indebted for taxes can be found. If a collector die, after the year for which he was appointed be expired, his powers, while living, survive to his executors or administrators; but if the collector die during the year, it becomes the duty of the town to proceed to make a new appointment. When real estate is taken, it is necessary that the proposed time of sale should be advertised for three weeks, in a public newspaper, at least six weeks prior to the sale. Lands sold for taxes may, during twelve months after the sale, be redeemed, on payment of the purchase money, and costs, with interest, at the rate of twelve per centum per annum. Creditors of persons whose lands have been sold, may avail themselves of the right of redemption; in which case, the lands remain pledged, in nature of a mortgage, until the sums advanced are refunded, with twelve per cent. interest. All taxes due by an individual, remain as a lien upon his real estate, for one year after they become payable.

The powers of collectors terminate at the expiration of three years from the dates of their respective warrants, except in respect to persons who may have removed from the State, with their property. The powers of executors and administrators of collectors continue for two years after being capacitated as such, in respect to taxes which were demandable by the collector while living.

When a collector is delinquent for more than four months after the time limited for a settlement with the treasurer, a warrant of distress is issued against his person and estate, returnable in sixty days. If the collector, or sufficient estate, are not to be found, or if he be committed to prison, and the tax remain unpaid, a second warrant is issued against the estates of the selectmen; if no, or insufficient, estates, of the selectmen can be found, and a return is accordingly made, a third warrant is issued, against the goods and chattels of the inhabitants of the delinquent town, indiscriminately.

The issuing of the two warrants first described, is frequently found, in practice, to be attended with no coercive effect, except that arising from a sense of the accumulated expenses, which must be finally borne by the town on issuing the third warrant. This circuitous process was, therefore, inefficacious, when, as during and for some time subsequent to the late war, taxes were really burdensome.

When the goods and chattels, of selectmen or inhabitants, are taken by distress, a warrant is issued by a justice of the peace, directing an appraisement, for which, with reasonable costs and damages, the town is made responsible, and for the reimbursement of which, a tax may be assessed by the selectmen.

The compensations of collectors are a commission of two and one half per centum on the sums collected and paid over, besides travelling fees when they settle their accounts. These allowances are paid by the State; when taxes are collected by distress, extra fees are allowed, which are paid by the delinquents.

The moderate taxes lately imposed by the State, have been well collected. Of a tax of one penny on the pound, or about twenty-three thousand dollars, made payable on the first day of December, 1795, nearly one half was paid into the treasury in three months, and almost the whole of the remainder in six months after it became due. The taxes granted by the people themselves, as members of legal corporations, such as cities, towns, ecclesiastical and school societies, are supposed to exceed, on an average, ten times the sums lately granted by the State.

The ordinary expense of supporting Government has been about forty thousand dollars per annum; but, in consequence of a temporary addition to the compensations and fees, heretofore established, the present expense may be estimated at about fifty thousand dollars per annum.

After liquidating the debt incurred, during the late war, there will belong to the State about three hundred and fifty thousand dollars, of the balance which was found due on the settlements of the accounts of the late war.

OF NEW YORK.

No general or direct tax has been levied by this State, since the year 1788; no objects of taxation are defined in the laws, nor any principles of valuation prescribed. The amount of a tax upon the State being declared, the Legislature determines the quotas to be paid by counties, the supervisors of counties determine the quotas of towns, which last are apportioned to individuals by assessors; no provision has been made for requiring a disclosure of the property owned by individuals; of course, all assessments by the Legislature, by supervisors, and assessors, are determined by a discretionary estimate of the collective and relative wealth of corporations and individuals.

The process by which taxes are assessed and collected, and the manner in which the responsibility of officers and collection districts are secured, are, however, to be explained.

In the month of April, annually, the freeholders and inhabitants of the several towns elect one supervisor, not less than three, nor more than seven, assessors, and one or more collectors of taxes. Vacancies occasioned by deaths, removals, or any other cause, may be filled by new elections, to continue during the remainder of the year; when towns neglect to elect, and continue in office, supervisors and assessors, they may be appointed by three justices of peace of the county. Persons refusing to serve in the offices to which they may have been elected or appointed, are subject to a fine. When the assessors have been qualified by taking an oath faithfully to discharge their trusts, it becomes their duty to meet for the purpose of estimating the value of all real and personal estates in their respective towns; in the first place a list is made of the names of all resident freeholders and inhabitants, and of all persons living elsewhere, possessed of any property lying in the town: against the name of each person, the assessors place such sums as they judge to be the true value of real and personal estates owned by individuals, distinguishing the value of real from that of personal estates; these lists, with the assessments to each person, signed by a majority of the assessors, are then delivered to the supervisors of the county, or their clerk, on or before the last Tuesday of May, annually. If the assessors omit to perform their duty, they become severally liable to a fine of twenty-five pounds, recoverable for the use of the county.

On the day last mentioned, the supervisors of the respective counties meet at the court house of each county, and afterwards at such times and places as they can agree. When a tax has been granted by the State, the quota of the county is by them apportioned to the several towns, according to their best discretion; to which is added a sum sufficient to defray the expenses of the county during the year; and a further sum for the maintenance of the poor of each town. The sums thus assigned to each town, are then apportioned by a poundage rate, to individuals, according to their proportions, as exhibited in the lists transmitted by the assessors.

The lists, with the sums payable by individuals, are then transmitted to the collectors of the several towns, with the warrants of the supervisors of the county annexed. Of the sums first collected, the amount of the assessments for the maintenance of the poor are paid to the overseers of the poor in each town; the remainder, including the sum assessed for the use of the State, is made payable to the treasurer of the county.

The treasurers of counties are appointed by the supervisors, and are required to give bonds, with sufficient sureties, for the faithful discharge of their trusts. The collectors of towns are responsible to the county treasurers, which last are responsible to the supervisors and to the treasurer of the State.

The warrants of the supervisors to collectors authorize them to proceed by distress and sale of the goods and chattels of the persons indebted for taxes; when goods and chattels are not to be found, the taxes accruing upon real estates may be collected by a sale at public auction of a sufficient quantity of the timber, wood, or grass, growing thereon; a notice of such intended sale, for six weeks, and an advertisement, for six days, at two or more public places in the town where the estate lies, are, however, required.

When a collector is delinquent, the county treasurer is required to issue his warrant, returnable in thirty days, directed to the sheriff of the proper county, commanding him to levy the sum in arrear of the lands and tenements, or goods and chattels, of the collector, and for want thereof, to confine his person in prison. Of the sums assigned to collectors, they may, however, discharge themselves, in all cases where no goods or chattels of individuals are to be found whereon to levy, by rendering an account of deficiencies to the county treasurer, on oath, prior to the time assigned for the settlement of the tax. If the collector omits to exonerate himself by rendering an account of deficiencies by the time prescribed, he becomes liable for the whole sum assigned to him for collection; such accounts of deficiencies as are rendered by the collectors, are, by the county treasurers, laid before the supervisors, at their next meeting.

When taxes have been granted by the State, the county treasurers are required, annually, before the month of March, to pay the sums by them received, to the treasurer of the State, at the same time exhibiting accounts on oath of all warrants issued against delinquent collectors, expressing the amount of each; where a county treasurer has omitted to pay over the sums by him received, within the time prescribed, or to exhibit, on oath, an account as above mentioned, or has neglected to issue his warrants against delinquent collectors, it becomes the duty of the treasurer of the State to proceed against the county treasurer, in the manner before described, with respect to delinquent collectors.

It is the duty of the supervisors of counties, at their annual meetings, previously to ascertaining and assessing the county tax for the year, to examine the accounts of deficiencies exhibited by the collectors to the county treasurers, during the former year; when, in the judgment of the supervisors, the taxes are collectible, notwithstanding the return of the collectors, they are authorized to issue new warrants for collecting the same, under the same formalities and conditions as though a new tax had been assessed; when the deficiencies are found to proceed from insolvencies, or want of goods, or other property, whereon a levy might have been made, or from the insolvency of a collector, the deficiencies are added to the quota of the town in which they arose, to be collected with the new tax. In cases where towns are charged with deficiencies, the first payments thereafter made are applied by the county treasurers on account thereof.

The compensations of the supervisors and their clerks, as also of assessors, are determined by the supervisors, and included with the annual taxes upon the county.

The collectors are allowed to retain, from the sums collected by them, a commission of five per centum; the fees of sheriffs for levying moneys of delinquent collectors are two and one half per centum; the compensation of the county treasurers is a commission of one and three quarters per centum upon the sums received and paid over; the whole expense of assessing and collecting a tax has been estimated at from fifteen to twenty per centum of the sums collected from the people.

The last State tax, granted in 1788, was for sixty thousand dollars, of which three-fourths was paid into the treasury in one year, the residue was not entirely paid in two years. The expenses of supporting civil government are annually about seventy-five thousand dollars; the annual grants to the university, college, schools, hospital, and for contingencies, somewhat exceed this amount. The outstanding debts of the State are about two hundred and twenty-five thousand dollars, a principal part of which consists of bills of credit issued since the late war. The credits

and funds of the State are ample, and their product sufficient to supersede the necessity of taxation except for county and other local purposes.

OF NEW JERSEY.

The objects of taxation enumerated in the laws of this State, are lands, whether improved or unimproved; houses, with lots adjoining, not exceeding ten acres; horses and neat cattle, furnaces, forges and mills of several kinds; tan-yards, ferries, fisheries, vessels, carriages for the conveyance of persons, including sleighs; personal taxes on shop-keepers, single men who keep horses, single men who do not keep horses, and on slaves.

Each of the taxable objects before enumerated, is, by the Legislature, assessed, from time to time, at a certain value; the assessments on lands, and on houses and lots, are graduated according to an equitable scale, with reference to the relative fertility and local advantages or disadvantages of the several counties. The quantities of taxable property, the rates at which they were assessed in the year 1794, and the quotas of the several counties in a tax of thirty thousand pounds, appear in an annexed document (F.)

It appears that the quotas of *counties* are determined by their lists of ratable property, according to the valuations from time to time made by the Legislature; the quotas of *townships* and individuals are assessed pursuant to the following regulations:

At the annual town meetings, there are chosen, within each township, ward, and precinct, two freeholders, three commissioners of appeals, one assessor, and one collector of taxes. In case of neglect in any township to make elections of assessors and collectors, or of the disability of the persons chosen, two justices of the peace of the county may appoint a town meeting, at which elections may be made by a plurality of the voices present; in case of a refusal or neglect to make elections in this mode, two justices of the peace may make the necessary appointments.

The assessors, after being qualified, by taking an oath or affirmation faithfully to discharge their trusts, are required, between the twentieth day of July and the twentieth day of August in each year, to apply to the inhabitants of their several townships for an account of all their property, real and personal, then ratable by law; of the property disclosed, correct and particular lists are taken in writing by the assessors.

Such of the inhabitants as refuse to disclose a true state of their taxable estates, are liable to be assessed, at the discretion of the assessors, double the amount of the sums for which they would otherwise be liable in the opinion of the assessors.

In making assessments, lands, houses, and lots, are estimated *ad valorem*, not exceeding certain rates, which are prescribed by law; horses and neat cattle are assessed uniformly throughout the State; the assessments on all other objects of taxation are specific, not exceeding certain prescribed rates; the objects of specific taxation are styled *certainties*, of which particular and distinct accounts are taken.

Four months before a tax is made payable into the treasury, the assessors of the several townships meet at the court-house of the county, with the lists of ratable property collected in the several townships. After the lists have been arranged, and the quantities of each description of taxable objects have been ascertained, a calculation is made of the proportion of the tax which can be raised on the *certainties* or objects of specific taxation; the remainder is then apportioned to the several townships, at the discretion of a majority of the assessors present; so, however, that the rates of valuation, prescribed by law, be not exceeded in assessing the quota of any township: when the quotas of the townships have been ascertained, an abstract is formed of all the *certainties* and other property subject to taxation in the county, distinguishing the amount in each township, which, being signed by the assessors, is delivered to the collector of the county.

Within ten days after the quotas of the townships are settled, the assessors are required to make out duplicates of the assessments upon individuals, containing an account of the *certainties*, the sums estimated for other property, with the taxes assigned to each person, one of which duplicates is delivered to the collector of the proper township, ward, or precinct, and the other to the collector of the county, who is required to lay the duplicates, being the assessments on townships and persons, with the abstract thereof for the county, before the General Assembly, in October, annually.

Though, in assigning the proportions of individuals, the assessors appear to be confined to the objects of taxation prescribed by law, and are not allowed to exceed certain rates of valuation, of which the limits are designated, yet, as within these limits a wide latitude of discretion may be exercised, provision has been made for an appeal where the assessments are deemed excessive. With a view to this subject, the constitution has prescribed that the townships shall annually elect three or more judicious freeholders to hear and finally determine all appeals relative to unjust assessments, who are directed to sit at suitable times, to be by them appointed, and made known to the people by advertisements.

In conformity with this provision, the law directs that, within four days after the duplicate assessment, or tax bill, is received by the township collector, he shall, by advertisement, give public notice that a tax has become payable, therein mentioning the time when a return of delinquents will be made in manner hereafter mentioned, and the time when the meeting of the commissioners of appeals is to be holden. In case the commissioners of appeals see fit to allow a deduction from any assessment, a transcript of their decision becomes a voucher in favor of the collector to whom it is directed.

The township collectors are responsible to the collectors of counties, who are appointed by the justices and freeholders of the counties, respectively. The county collectors are responsible to the treasurer of the State.

Within twenty-five days after receiving the duplicate assessments, the collectors of townships are required to demand the taxes due by individuals, either by personal application, or by notice at their respective dwellings, mentioning, at the same time, the session of the commissioners' appeal. In case of non-payment, until within one month and fifteen days before the time prescribed for payment into the treasury, it becomes the duty of the collector to make a return, on oath, to some justice of the peace of the county, therein specifying the names of the delinquents and the sums due from them, respectively, for which return, the justice of the peace may be required to grant his receipt or acknowledgment. Prior to the time prescribed for settlement with the county collector, the collectors of townships must pay over the sums by them collected; in which case, they cease to be chargeable for such assessments as have been returned to a justice of the peace, in manner before mentioned. When a township collector omits to make a return of delinquents, or pay over the sums by him collected, he becomes liable to a fine of twelve pounds, collectible by the county collector, for the use of the State.

Within three days after a return of delinquents to a justice of peace, it becomes his duty to issue warrants, directed to some constable of the county, requiring him to levy the sums in arrear, with costs, by distress and sale of the goods and chattels of the delinquents, or for want thereof, to commit them to prison; the warrants, moreover, require the constable to pay the taxes so collected by distress, to the township collector, within thirty days, and to make a special return to the justice of the peace of the sums collected, of the sums not collectible, and, generally, of the manner in which the warrants have been executed. If a justice of the peace refuse to perform the duties before mentioned, he becomes subject to a fine of twelve pounds, recoverable, with costs, for the use of the State, by the county collector. If a constable omit to execute the warrants of the justice of the peace, he becomes liable to a like fine, for the use of the county and the township collector, jointly; as also, for all the taxes entrusted to him for collection, recoverable by distress, on a summary process, before any one of the judges of the court of common pleas for the county.

On the receipt of moneys from any constable, the township collector is required to pay the same to the county collector, and to account for all outstanding deficiencies. If the township collector omits his duty in this respect, for ten days, it becomes the duty of the county collector to apply to one of the judges of the court of common pleas for the county, who is required to issue a summons to the township collector, and thereupon to hear and determine the cause, in a summary manner. In such case, the township collector is held responsible for all the taxes entrusted to him for collection, except such as may appear uncollected by the return of the constable, on the war-

rant of distress, issued by a justice of the peace. For the remainder, with any fines received, and interest thereon, from the time payment ought to have been made, judgment may be given, recoverable, with costs, by a warrant of distress, directed to the sheriff of the county.

The collectors of counties are required to pay over to the treasurer of the State, all assessments and forfeitures by them received from township collectors, for which, the receipts of the treasurer operate as a discharge, after having been entered in the office of the State auditor. When a county collector omits or refuses to pay over such assessments and forfeitures, and to account for the deficiencies remaining uncollected, for twenty days after the time prescribed for a settlement of the tax, it becomes the duty of the treasurer to report the defaulter to a judge of the supreme court, who is required to institute a summary inquiry. The county collectors, in this case, are held responsible for the quotas assessed upon the counties, except so far as they can exonerate themselves by shewing that the sums remain uncollected, in the hands of township collectors or constables, in respect to whom, the requirements of law, before mentioned, have been enforced. For such sums as the county collectors are found delinquent, on the principles above stated, the judge of the superior court may issue a warrant of distress, directed to any sheriff of the State. In addition to the unpaid taxes before mentioned, a delinquent county collector is liable to pay a fine of ten pounds, for the use of the State.

If a sheriff, to whom a warrant of distress, against a county collector, is directed, neglect or refuse to execute the same, or omit to pay to the treasurer the sums collected, within thirty days after receiving the warrant, he becomes liable to forfeit double the sum therein expressed, collectible by the treasurer, agreeably to the process prescribed in respect to delinquent county collectors.

The counties are responsible to the State for all delinquencies of county collectors; and the townships are, in like manner, responsible to the counties, for the delinquencies of their collectors and constables, respectively. When a county collector is found to be delinquent, the sum due by him is, by the treasurer, added to the quota of the county, in the next tax. If the assessors omit or refuse to assess the deficiency, or any tax granted by the State, they severally forfeit twelve pounds, recoverable by the overseers, for the use of the poor.

The county collectors are required to attend the meetings of the assessors in the several counties, and to lay before them accurate accounts of the deficiencies, in the several townships, precincts, and wards; the amount of which are required to be re-assessed with the future taxes of the townships, precincts, and wards, in which such deficiencies arose.

Tenants, or persons residing on, or having the care of lands or tenements, are responsible for the taxes assessed thereon, as also, their goods and chattels. The amount of such taxes may, however, be deducted out of future rent, or recovered of the landlord; but in such manner, as not to affect any subsisting contract or agreement.

In default of payment of the taxes assessed on unimproved or untenanted lands, the owners of which do not reside in the townships where such lands are situated, warrants may be issued by a justice of the peace of the county, authorizing a distress and sale of timber, wood, herbage, or other saleable property, found on the premises.

Township collectors and constables are responsible to the chosen freeholders of their respective townships for all moneys received by them, or for which they may be accountable, above the sums paid to the county collectors.

The general rule of compensation for assessors, has been a commission of one and three quarters per centum, upon the sums assessed, with a like commission to the collectors of townships, both of which compensations were included in the assessment of taxes. By an act, passed in the year 1794, for raising fifteen thousand pounds, the assessors were allowed four pence for assessing the tax of each person, and the collectors, a like sum for each collection. It is not known whether this has operated as an increase or reduction of the compensation before established. The commissioners of appeals are allowed one dollar per diem for their services. In addition to each tax, constables are allowed to collect two shillings and six-pence for each distress, and six-pence for each name mentioned in the warrant of a justice of the peace, both of which sums are payable by the delinquents. County collectors are allowed one penny in the pound, of the sums received of township collectors and paid over to the treasurer, besides six-pence per mile, for travelling to settle their accounts.

Of a tax of fifteen thousand pounds, granted in December, 1794, payable into the treasury on the last day of December, 1795, the whole, except a trifling balance from one county, was paid before and during the month of May, 1796.

The outstanding debt of the State amounted, in April last, to forty-five thousand pounds, or one hundred and twenty thousand dollars, for the discharge of which, in four equal annual payments, appropriations have been made; the payment of the first instalment is supposed to have been, before this time, completed. The arrears of certain taxes, funds belonging to the treasury, and the proceeds of an annual tax of forty thousand dollars, are represented as sufficient to liberate the State from debt, within the time proposed.

The expenses of supporting the State government and contingent charges, are annually about twenty-seven thousand dollars; the amount of county and other taxes, is not known.

OF PENNSYLVANIA.

In the year 1785, an act was passed, providing a revenue for funding and paying the interest of debts of the State, and also, the State quota of the interest accruing on the debts of the United States. In aid of other revenues which were then appropriated, an annual tax of seventy-six thousand nine hundred and forty-five pounds seventeen shillings and six pence was directed to be assessed and collected on persons and real and personal estate. This tax was continued from 1785 to 1789, inclusively, since which time, no general tax has been imposed.

The tax above mentioned was apportioned to the several counties by the Legislature; the quotas of townships were determined by county commissioners, and assessed upon individuals by township assessors.

The objects of taxation were, the time of servitude of all bound servants above fourteen years of age; negro and mulatto slaves, above the age of twelve years; horses and horned cattle, above three years old; wrought plate; travelling or pleasure carriages; lands generally, houses, ground rents, mills of all kinds, furnaces, forges, bloomeries, distilleries, sugar houses, malt houses, breweries, tan yards, and ferries; all of which were made taxable *ad valorem*.

Personal taxes, not exceeding thirty shillings, nor less than ten shillings, were assessed upon single freemen above twenty-one years of age, who had been free from apprenticeship nine months; all offices and posts of profit, trades, occupations, and professions, (ministers of the gospel, mechanics, manufacturers, and school masters excepted) were rated at the discretion of the assessors, with reference to their respective profits.

By a proviso to the act, which still remains in force, the lands granted to any officers or soldiers of the line of the State, for their services, were declared to be exempted from taxation, during the lives of the grantees, respectively, unless the same should be transferred or alienated.

It would be difficult to ascertain the precise degree of punctuality with which these taxes have been collected; the delays are, however, known to have been considerable; on account of arrearages of taxes, it appears that fourteen thousand five hundred and sixty-five dollars were received in the year 1795.

The system of taxation at present in force is contained in an act passed in April, 1795, to regulate the mode of assessing and collecting county rates and levies.

The officers for assessing taxes, are county commissioners and township assessors; three commissioners are elected by the people, in each county, for three years; their offices are annually vacated in succession, one commissioner being elected in every year.

Every three years, commencing with October, 1795, the freemen of every ward, township, or district, in the city or county of Philadelphia, and in the other counties, respectively, elect one assessor, and two assistant assessors, for the purpose of making triennial assessments of taxable property; in years other than those in which the triennial assessments are made, only one assessor is elected.

The assessors and assistant assessors are required, every three years, to state and return to the commissioners of their respective counties, within six weeks from the day of their election, a list, setting forth the names and places of residence, if known, of the owners of all the lands occupied and inhabited; of all unseated lands, and of all the houses and lots of ground, in the wards, townships, or districts, to which they belong; with a description of all the buildings, erections, and improvements, appertaining to the same; the amount of all ground rents charged thereon; and also, a list of the mechanics or tradesmen, tavern keepers, shop keepers, persons retailing goods, wares, or merchandise, brokers, bankers, merchants, lawyers, and physicians, freemen who do not follow any profession, occupation, or calling, and persons of professions or occupations not above described; persons held as slaves, under forty-five years of age; horses and horned cattle, above four years old, with a just and faithful valuation of the estate and interest of each of the owners respectively, in the real and personal taxable property before mentioned.

In every year in which the triennial assessments of property are made, the county commissioners are required to meet on the first Tuesday in January, to examine and compare the returns made to them by the assessors and assistant assessors, with full power to revise, alter, and adjust, the valuations in such returns; provided they do not change or vary the relative valuations of property in the same township, ward, or district. The proportional assessments upon individuals, thus equalized by the commissioners, in respect to counties, constitute a general rule or criterion, by which taxes on property are regulated for three years ensuing.

The amount of each county tax is determined by the county commissioners, under the limitation, however, that not more than one per centum can, at any time, be raised on the valuation of lands. When the commissioners deem it necessary to levy a tax equal to one per centum, upon the value of property, as by them adjusted, they are directed to order the following taxes on persons and professions, to be collected. From every freeman of no profession or calling, not more than ten dollars, nor less than fifty cents; from every mechanic or tradesman, not more than two dollars, nor less than thirty cents; from every tavern keeper, shop keeper, or other person, retailing goods, wares, or merchandise, not more than five dollars, nor less than fifty cents; from every broker, banker, merchant, lawyer, or physician, not more than ten dollars, nor less than one dollar; from persons of professions or occupations, not before described, not more than eight dollars, nor less than twenty-five cents; and from the holder of any person held as a slave, one dollar for every such slave. Whenever the tax on real property is below one per centum of the valuation, the taxes on occupations, professions, and personal property, are directed to be proportionally reduced; no article of property can be assessed, which is not enumerated in the law.

When the commissioners have declared the amount of a tax, and the proportions to be assessed on real estates, and on persons and occupations, they issue warrants to the assessors, requiring them to take an account of all persons and effects subject to the tax, and to make returns, in thirty days, of the names and sums, with which, in their judgment, each person ought to be charged, distinguishing the sums assessed for real property from those assessed for personal estates, professions, or occupations; the assessors are, moreover, required to notify each individual of the amount wherewith he is charged, and of the time and place, when and where, the county commissioners will meet, to hear and decide on appeals.

The county commissioners are authorized, on the appeals of individuals, to alter the assessments on persons or professions, or to abate them entirely, in cases where they judge the appellants unable to discharge the same; it is declared, however, that the commissioners shall not vary the assessments on real property, except where lands have been divided, or where houses or buildings, valued in the triennial assessments, have been destroyed or damaged by accidents; in which cases alone, the commissioners may apportion the assessments between the owners of the property so divided, or may make abatements in proportion to the damages sustained.

The tenant in possession of lands or tenements, belonging to an owner residing in a township, ward, or district, other than that in which the lands or tenements are situated, is, jointly with the owner, liable for the taxes thereon, and his goods or chattels may be distrained therefor; but the tenant may retain the sums paid, out of the rents due or to become due, or may recover the same, with costs, by action of debt against his landlord, unless prevented by the conditions of some prior contract.

The deputy surveyors of counties or districts are required, on the application of the county commissioners, to make returns of all lands surveyed, and of all warrants or orders of survey, to them directed and not executed, therein describing the number of acres in each survey, the names of the original warrantees, the waters on which situated, the lands contiguous thereto, and the townships where the same lie; all unseated lands are directed to be taxed, returned, advertised, or sold, in the name of the original warrantee, until notice has been given to the commissioners that the said lands have been alienated to some other person.

Within three months after a tax has been laid on unseated lands, the commissioners are directed to transmit a transcript of the assessor's return, and of the tax imposed, to the sheriff of the county, in case the owner resides therein; or if the owner do not reside in the county, but has previously filed with the commissioners, an account of his abode and occupation, then to the sheriff of the county in which such owner is resident; in either of which cases, it is made the duty of the sheriff to serve a copy of such transcript on the owner, or to leave a copy thereof at his usual place of abode.

When the owner of unseated lands cannot be found, and any tax has remained unpaid for three years after the assessment thereof, the county commissioners having first advertised the same in seven different public places, within the county, are directed to proceed, on the first Tuesday of August next, after the expiration of the three years, to sell so much of the said lands as may be necessary to satisfy the taxes remaining unpaid, with interest, at the rate of twelve per centum per annum, from the time the taxes became due. Persons who occupy lands which were unseated previously to such occupancy, are liable for taxes in the same manner as though they were original owners; as also purchasers of unseated lands, who shall have recorded their deeds, or in any other manner acquired titles to the same, and may be proceeded against in like manner as though they were original owners.

The county treasurers, and collectors for townships, are appointed by the county commissioners; the collectors are accountable to the county treasurers for the taxes entrusted to them for collection, except for taxes on unseated lands, and may distrain and sell the property of delinquent individuals. When collectors are delinquent, their goods and property may be distrained and sold by the county treasurers.

The county commissioners, assessors, assistant assessors, and county treasurers, are severally required, before entering on the duties of their offices, to take and subscribe an oath or affirmation, faithfully and impartially to execute the duties of their respective offices.

When townships omit to elect assessors or assistant assessors, or when vacancies happen from any cause, the county commissioners may proceed to make the necessary appointments.

The compensation allowed to county commissioners, is one dollar and one third for each day they are employed, and to the assessors, one dollar. Upon an average, the expense of assessing county taxes through the State, may be estimated at ten thousand dollars per annum. The commission allowed to collectors, is generally about five per centum on the amount of the taxes; the county treasurers are allowed one dollar upon each hundred pounds received and paid by them, respectively.

The townships are responsible to the counties, and the counties are, in like manner, responsible to the State, for the amount of all assessments. No State tax having been laid for several years, it has been found impossible to collect an account of the value of taxable property in the several counties.

The annual expenses of maintaining government may be estimated at one hundred and thirty thousand dollars; the revenues of the State exceed this amount; of course, there is a probability that the State will continue to be exempted from the necessity of taxation, except for county purposes.

OF DELAWARE.

Taxes have been hitherto collected on the estimated annual income of the inhabitants of this State, without reference to specific objects.

For about twenty years past, the quotas of the counties, in a general tax, have been uniform; every tax has been divided into twenty-one parts, of which eight parts have been assigned to the county of New Castle, seven to the county of Kent, and six to the county of Sussex.

The counties are divided into hundreds, in each of which, an assessor is annually chosen, on the 15th of September. After their election, they are furnished with lists of all taxable persons, by the constables of the hundreds; to these lists, the assessors, in a general meeting for the county, affix estimates of the supposed income of each inhabitant, according to their best discretion, subject only to the following restrictions: 1st. That unsettled tracts of land, persons under twenty-one years of age, and persons who have not been six months free from servitude or apprenticeship, are to be exempted. 2d. That assessments upon poor persons, having a charge of children, are to be assessed with reference to this expense, but in no case, less than eight pounds. 3d. That single men, having no visible property, are to be assessed not less than twelve nor more than twenty-four pounds.

It appears to have been a rule established by the assessors, and confirmed by long usage, to assess all persons at one-fifth part of their annual income; no account of the general amount of income, upon which taxes have, at any time been imposed, has been obtained.

When the assessors have completed their assessments, lists of their proceedings are published in the several hundreds, with notice of the time appointed for holding the levy court and court of appeals for the county.

The commissioners of the levy court and court of appeals are elected for three years, by the people of the respective counties; one third part of the court is renewed annually; they are empowered to hear and decide on all appeals respecting erroneous or excessive assessments, for which purpose, they may require the attendance of all necessary witnesses.

Of late years, the collectors of State taxes have been appointed by the treasurer, who is responsible for all losses occasioned by their delinquencies, or the insufficiency of their sureties; with the bonds of collectors, powers of attorney, for obtaining judgment, are required.

The collectors of taxes are allowed a commission of seven and one-half per centum on their collections; the commissioners of the levy court and court of appeals and assessors receive one dollar and one third per diem, during the time they are employed.

It does not appear that the State is burthened with debt; the expenditures from the treasury, during the year 1795, amounted nearly to seventeen thousand dollars; the receipts of the treasury exceeded twenty thousand dollars, including the proceeds of certain sales of vacant lands, and taxes granted before and during the year 1794. No certain information has been obtained respecting the ordinary expense of supporting Government, or the degree of energy with which collections have been enforced.

To remedy the inconveniences and inequality which have been experienced from arbitrary assessments, an act has been passed during the present year, providing for the valuation of real and personal estates. Though the new system has not yet been reduced to practice, an exposition of its principles has been deemed necessary.

It has been declared that all real and personal property shall be taxed, except property belonging to the United States, to the State, or to any county, religious society, college, county school, or corporation for charitable purposes, provisions for a family, tools and implements of a trade or profession, household furniture (plate excepted) the produce of land, apparel, money, bonds, and securities, imported merchandise, and such carriages as are already taxed; provision is, however, made for ascertaining the stock of merchants, traders, mechanics, and manufacturers, for the purpose of regulating assessments upon such persons, proportioned to their gains and profits.

The Governor is empowered to constitute a board of commissioners in each county, to consist of six persons, who are to remain in office for three years. One third part of the commissioners are to be appointed annually; no person may receive two successive appointments.

Assessors appointed as formerly, are required to take an accurate account of the lands in their respective hundreds, specifying the names of the owners, what part is improved or unimproved, with the buildings and improvements thereon, and the value of each tract, in ready money. The assessors are also to ascertain the number of lots and houses in cities, boroughs, and villages, their value, and the rents annually paid,

Real property, and rents arising therefrom, are to be estimated in the following manner:

Ground rents, at one hundred pounds for every eight pounds of rent. Lands subject to ground rent, according to the actual value, after deducting one hundred pounds for every eight pounds rent; rents of houses and lots in cities, towns, and villages, at one hundred pounds for every twelve pounds of rent reserved: houses and lots of the above description, at the true value, after deducting at the rate of one hundred pounds for every twelve pounds of the rent annually secured.

Certain articles of personal property are to be valued as follows:

Male and female slaves, from eight to fourteen years of age, not less than ten, nor more than forty pounds.

Male slaves from fourteen to forty-five years of age, any sum above twenty and not exceeding seventy pounds; female slaves, over fourteen and not exceeding thirty-six years of age, any sum above fifteen and not exceeding thirty-five pounds; male and female slaves, under eight years of age, male slaves above the age of forty-five years, and female slaves above the age of thirty-six years, at rates proportioned to those before mentioned. Male slaves who are tradesmen are to be assessed according to the value of their labor. Plate is to be assessed at eight shillings and four pence per ounce; all other articles of personal property, not specially exempted, are to be estimated according to their value in ready money, at the discretion of the assessors.

Every free man, above twenty-one years of age, in addition to the assessment upon his property, is chargeable with a personal assessment, not exceeding two hundred nor less than fifty pounds, subject to abatement in whole or in part, at the discretion of the levy court and court of appeals. Provision is made for requiring a disclosure of the taxable property possessed by individuals; persons who omit to make returns when required, are subject to a penalty, and may be assessed at discretion.

The assessors, in performing the duties before mentioned, are subject to the control and direction of the county commissioners; when the valuations or assessments have been completed, they are to be published in each hundred; after which, the commissioners are to hear and determine the complaints of individuals, subject, however, to the final decision of the levy court and court of appeals for the county.

It will be seen that, by the new system, taxes are to be imposed upon the mass of property, real and personal; and that certain limits are assigned to the powers of assessors, although a wide field will still remain for the exercise of discretion.

OF MARYLAND.

All property is, in this State, subject to taxation, except property belonging to the State or the United States; houses for public worship, burying grounds, or property belonging to any county, college, or county school; the crop and produce of lands in the hands of the person whose lands produced the same; provisions necessary for the use and consumption of persons and families for the year; plantation utensils; the working tools of mechanics and manufacturers, actually and constantly employed in their respective occupations; wearing apparel; goods, wares, and merchandise, imported; home made manufactures in the hands of manufacturers; stills, and ready money.

Taxes are, therefore, imposed on the mass of property in general, in conformity to an article in the declaration of rights, agreed to by the State convention in November, 1776, which asserts, "That the levying of taxes by the poll is grievous and oppressive, and ought to be abolished; that paupers ought not to be assessed for the support of Govern-

ment, but that every other person ought to contribute his proportion of the public taxes for the support of Government, according to his actual worth in real or personal property."

The following specific taxes are collected, viz: Of every attorney at law, for admission to the bar of each county court, three pounds, and a like sum, annually, during his continuance to practise. On licences to retail spirituous liquors, six pounds; on licences to keep taverns, three pounds; on licences for marriage, twelve shillings and six pence. There are, moreover, certain taxes collected on process issuing from the county courts; on orders issued by the judge of the land office; or final adjudications, on caveats, and on proceedings and seals in the court of chancery.

The produce of these taxes, with the incidental revenue accruing from fines and forfeitures, and from ameracements on persons failing in their suits at law, and the interest accruing on funds belonging to the State, have been found sufficient to supersede the necessity of any general State tax, since the year 1786. County taxes are assessed and collected pursuant to two acts passed in 1785 and 1792, prescribing rules for ascertaining the value of property; from the last mentioned acts, and the act by which the tax was granted in 1786, the following is inferred to be the mode of assessment and collection in this State.

The lands in each county have received an average valuation by the Legislature, at various rates, chiefly between thirty-three shillings and nine pence, and twenty-two shillings and three pence, but in one instance as low as four shillings by the acre. Slaves, from eight to fourteen years of age, are valued at fifteen pounds; male slaves, from fourteen to forty-five years of age, at forty-five pounds; female slaves, from fourteen to thirty-six years of age, at thirty pounds; male and female slaves, under eight years of age, male slaves above forty-five years of age, female slaves above thirty-six years of age, and slaves who are tradesmen, are directed to be valued by assessors, in proportion to the rates above mentioned; when slaves are infirm, the assessors may allow a reasonable abatement. Silver plate is valued by law at eight shillings and four pence per ounce.

In estimating the value of ground rents in towns, eight pounds rent is considered as an equivalent to a capital of one hundred pounds; of the rents of houses in towns, sixteen pounds are estimated as equivalent to one hundred pounds; in respect to limited estates carved out of estates in fee simple, it is prescribed as a general rule, that a right of possession for fifteen years, without payment of rent, is equivalent to one half of the value of the fee simple. In all cases, estates and property are estimated at their full value in money, in the first instance; after which, a computation is made of the value of any particular estates or interest, arising therefrom, in order to a just apportionment between the parties: where the law has not prescribed a rule of valuation, assessments are made at discretion.

When a tax is to be granted, five persons, in each county, and in Baltimore town, are named by the Legislature, in the supply bill, as commissioners of the tax; the commissioners are sworn to a faithful and impartial discharge of their duty; they meet on a fixed day, at the usual place for holding the county courts, and, after appointing their clerks, they proceed to divide their counties into convenient districts; to appoint an assessor for each, who must be a person worth two hundred pounds; to instruct the assessors in their duty, and to prescribe a time when they are to appear with written returns of their several valuations of property.

The assessors are directed to inform themselves, by all lawful ways and means, of all real and personal property in their districts, and for this purpose they may require of all persons owning or having the care of slaves, an account of them, under the penalty of paying a double tax for every slave omitted, or whose age is wilfully misrepresented in the account. Every person is also bound to give, upon the assessors' requisition, a true account of all other property, real and personal, belonging to him, or under his care and management, or simply in his possession, under the penalty of paying a double assessment, in the case of refusal to give in such account, or where a partial one is rendered, of forfeiting the value of the property omitted. In respect to property concealed or omitted in the accounts of individuals, the assessors affix a discretionary valuation.

In ascertaining the quantities of lands, the commissioners, and, under them, the assessors, are governed by former valuation lists, lists of alienations received from the clerks of courts, and by information which may be required of the proprietors on oath; this last security is, however, rarely resorted to, in any instance. When the quantity of land in a county has been ascertained, its value is first computed according to the average prescribed by law; the aggregate amount is then apportioned to individuals, according to the relative value of their respective portions of lands and their interests therein, on the principles before mentioned. The mode of recovering penalties or forfeitures incurred by concealment or fraud, in the disclosure of property, is by presentment in a court of justice; the occasions for this, are, however, represented to have but rarely occurred.

Erroneous or excessive assessments may be corrected by application to the commissioners of the tax for the county, who may examine the parties or other persons on oath, and finally determine as shall appear equitable.

When the assessments upon individuals have been completed, the assessors are required to report to the commissioners for the county, alphabetical lists of all persons whose property has been valued, with a specification of the number and value of slaves of each description, the weight of plate, with the value thereof; also the particulars of real and personal estates as designated by law, and the value of each description. When the owner of any property is not known, it is directed to be so returned.

Owing to the long time since any general tax has been laid, it has been found difficult, to ascertain the quantities of taxable property now existing in the State. The annexed document G on this subject, so far as it is founded on returns, is entitled to full confidence; the estimate of certain objects is derived from an intelligent source, and is believed to be free from material error.

The collectors of taxes are appointed by the commissioners of counties, and give bond with sureties for the sums intrusted to them for collection; they account with one of the State treasurers, of which one is appointed for the counties eastward, and the other for the counties westward, of the Chesapeake.

Persons who were appointed under the last act, to the office of collector, and who refused to accept the office or to give bond, were subject to a fine of fifty pounds.

It has been a general usage to appoint the sheriffs of counties to be collectors of taxes, who, with the consent of the commissioners, have been allowed to appoint deputies for one or more hundreds in said counties; for the conduct of their deputies, the collectors or sheriffs have been held responsible.

The collectors under the last act, were subject to the general control and superintendence of the commissioners of the tax, and might be compelled to disclose the sums actually collected, for the purpose of being required to pay the same to the State treasurer.

All goods and chattels found on lands chargeable with taxes, were liable to be taken by distress; if no goods or chattels were to be found, the lands remain chargeable with the tax and interest thereon, at six per centum per annum.

When it was discovered by a collector that a person charged with a tax resided in some other county, it became his duty, under a penalty of twenty pounds, to transmit an account of said tax to the commissioners of such other county, to be collected under their direction.

About two months after the time prescribed for the payment of the last tax, the collectors were required, under a penalty of two hundred pounds, to present their accounts for adjustment, to the commissioners of their counties. In this adjustment the commissioners were authorized to allow the collectors a commission of four per centum, and to pass to their credit such sums as appeared to be uncollectible; it appears to have been the object of these settlements, to define and fix the sums for which the collectors were to be finally responsible; two copies of each settlement were made, one of which was transmitted to the clerk of the house of delegates, and the other to the proper treasurer, by which to hold the collectors accountable.

Delinquent collectors and their sureties were liable to be proceeded against by a summary process; delinquent deputy collectors might be compelled to account, by warrants from the commissioners, authorizing the sheriffs to levy the sums due, on the lands, goods, chattels, or persons, of the delinquents.

The commissioners and their clerks were allowed, each, ten shillings per diem, during the time their services were required; the assessors a sum at the discretion of the commissioners, not exceeding twenty-five pounds each;

and the collectors as beforementioned, a commission of four per centum; the expense of collecting the last tax, exclusive of loss, occasioned by delay and other incidents, amounted to twelve and one half per centum.

The State tax assessed in 1786 amounted to twenty shillings upon each hundred pounds of property, according to the valuation; the collection was several times partially or wholly suspended by the Legislature, on applications from the collectors.

In the year 1786, there was paid	£5,037	4	0
In the year 1787,	37,610	6	2
In the year 1788,	22,898	2	11
In the year 1789,	33,478	7	7
In the year 1790,	5,060	7	3
In the year 1791,	2,084	14	4
Amount of the tax,	£106,169	2	3

A small part of the above statement is founded on estimate.

A principal part of the delay which attended the settlement of this tax, arose from the indulgences granted by the Legislature, and it may be doubted, on reverting to the state of the country at the time, whether the tax was not in some degree excessive; it will not, therefore, be proper to consider the proceedings under this act as affording a correct exhibition of the general operation of the State system. It is understood, however, that, on other occasions, the collection of State taxes has been inefficient and defective, owing to the want of a more energetic control than has been afforded by the boards of county commissioners, and to the practice of entrusting the collection of taxes to sheriffs and their deputies.

The ordinary expenses of maintaining the State Government, are estimated at about twenty-five thousand pounds per annum; a small debt remains unliquidated; but the means already possessed by the State are supposed to be more than competent to its discharge.

Taxes are collected in Baltimore town for town purposes, on riding carriages, wagons, carts, riding horses, tavern keepers, sales at auction, billiard tables, and on the play house; besides a general tax on property. All these taxes may amount, during the present year, to thirty shillings on each hundred pounds of property, according to the usual mode of valuation. The annual county taxes are estimated, on an average, at eight shillings upon a hundred pounds of property. The proceeds are applied to the maintenance of county police, the building and repairing of court houses, tobacco warehouses, bridges, repairs of roads, the support of the poor, and other local objects.

OF VIRGINIA.

Lands in this State have received a permanent valuation, agreeably to which all taxes are imposed.

In pursuance of an act passed in November, 1781, the justices of each county appointed three commissioners, who were sworn to make an impartial valuation of lands in their respective counties. These commissioners had power to require of all proprietors an account of their lands lying within the county, distinguishing lots lying in any town. In forming their estimates, the commissioners were required to ascertain, according to their best judgment, the average price, per acre, for which each tract or parcel of land might be sold, for immediate payment in specie, excluding from valuation all reference to buildings or other improvements. Lands under a lease for years, were directed to be valued, in the first instance, without regard to the rent; but where such valuation exceeded twenty years' purchase, computed upon the rent reserved, the landlord was assessed for the amount of twenty years' purchase, and the remainder was apportioned to the tenant; the returns of the valuations were made to the auditors of public accounts.

As was to have been foreseen, the valuations made by the commissioners of counties, though they might be, and doubtless were, just and accurate in respect to the relative value of different tracts of land within the same county, were found to be exceedingly unequal when compared with the valuations of other counties. This inequality, the unavoidable consequence of assessments by commissioners, whose proceedings were independent of each other, and uncontrolled by any common standard of opinion, rendered a revision indispensable. To effect a general equalization of the assessments, an act was passed in October, 1782, by which the different counties of the State were arranged into four districts; in this classification of counties, reference was had to their soil and situation, with the view of obtaining a general and equitable standard of value for the lands of the several counties. This standard or average value was declared by the Legislature to be, for lands lying in the first district, ten shillings per acre; in the second district, seven shillings and six pence per acre; in the third district, five shillings and six pence per acre; and in the fourth district, three shillings per acre. To give effect to this declaration, two commissioners were appointed, who were directed to examine the county returns, and after ascertaining the average value of the lands in each county, agreeably to the assessments made pursuant to the act of November, 1781, and after comparing the same with the standard or average value for the district, to apply the difference by adding or deducting the same, *pro rata*, to the assessment of each individual.

Upon the assessments thus made, pursuant to the act of November, 1781, equalized according to the act passed in October, 1782, all taxes on lands, except on lots in towns, have been since apportioned by a poundage rate; this rate has, of late years, been five shillings on each hundred pounds, or one-fourth of one per centum, *ad valorem*.

The tax on lots and houses in towns, is annually assessed by the commissioners of the revenue, who are authorized to require of every tenant or proprietor, to disclose, on oath or affirmation, the amount of rent paid or received by them respectively; in cases where houses or lots are in the occupation of the proprietors, the yearly rent is ascertained on a comparison of their value with other houses or lots actually rented; the tax lately assessed has been sixteen shillings and eight pence, or five-sixths of one per centum of the ascertained or estimated yearly rent or income, arising from this species of property.

The other revenues of the State arise from specific taxes on the following objects:

On every slave, above twelve years of age, except such as are exempted by the county or corporation courts, on account of age or infirmity, at one shilling and eight pence each.

On stud horses and jack asses, at various rates; on other horses, and on mules, at four pence each.

On every ordinary licence, two pounds.

On every billiard table, fifteen pounds.

On every four wheel riding carriage, except phaetons, and stage wagons, six shillings per wheel.

On every phaeton and stage wagon, four shillings per wheel.

On every riding carriage with two wheels, two shillings per wheel.

Certain taxes are, moreover, imposed on legal proceedings in the superior courts; on transfers of surveyors' certificates for lands; on the instruments and attestations issued and taken by public notaries; on certificates issued by the county and corporation courts; and on certificates issued under the seal of the State.

An occasional revenue sometimes accrues, from the duties collected at the public warehouses on the inspection of tobacco, exceeding the expenses incident to those establishments.

All property belonging to the State, or to any county, town, college, or seminary of learning, and houses dedicated to public worship, are exempted from taxation. Persons may be exempted, for age or infirmity, by judgments of the county or corporation courts. Artizans, mechanics, and tradesmen, who migrate into the State, are exempted from all taxes except on lands, for five years after their migration, if, during that time, they continue to exercise their occupations.

The tax on lands, and on houses, and lots in towns, taken collectively for the year 1794, amounted to	\$57,636 58
The tax on slaves to	47,007 78
The tax on horses and mules is estimated to have produced	15,154 95
The taxes on carriages, ordinary licences and billiard tables, by estimate	9,954 73
<hr/>	
Total amount of the taxes of 1794, collected by sheriffs, under the apportionments of county commissioners of the revenue, H.	\$129 755 04

From the foregoing gross amount of revenue, there ought to be deducted the following defalcations and expenses, incident to the assessment and collection:

Compensations of commissioners of the revenue paid in 1794	\$11,931 60
Commissions to sheriffs for collection, five per cent.	6,487 75
Allowances for insolvencies and errors, five per cent.	6,487 75
<hr/>	
Total charges of assessment and collection	\$24,907 10

In addition to the commission of five per centum, which is the ordinary allowance for collection, a premium of two and one half per centum is allowed to sheriffs, who settle their accounts with strict punctuality.

The taxes on law process and official papers are collected by the clerks of courts, and by the officers by whom the papers are issued; the general taxes are assessed and collected pursuant to the following regulations:

Every county and corporation court in the State is required annually, in the months of September or October, to appoint one or more discreet and reputable persons to be commissioners of the revenue; in some counties, the law requires the appointment of three commissioners, in others two, and in others one. Sheriffs, deputy sheriffs, and collectors of taxes, who have not finally settled their accounts, as also certain other officers, are declared incapable of serving as commissioners: in cases where the law requires the appointment of more than one commissioner to a county, the limits of their several districts are defined by the court having the right of appointment.

The commissioners, after being qualified, by taking an oath faithfully and impartially to execute their trusts, receive from the commissioners of the preceding year, the books containing the permanent valuations of lands in their respective counties. In these books, all alterations, alienations, divisions, and additions, which occur in the county or district of a commissioner, are, from time to time, noted and recorded.

That the commissioners may be informed of the changes of individual property, the clerks of the general, district, county, and corporation courts, and the register of the land office, are required to furnish statements of all alienations, partitions, and grants, during the preceding year; in respect to alienations of entire tracts, the commissioners debit the purchaser and credit the seller for the tax transferred; in respect to lands which have been divided, the former tax is equitably apportioned between the proprietors. Lands recently granted are assessed at a price equal to other lands in the same district, similar in soil and situation.

In respect to taxable property, other than land, the commissioners are directed to commence a scrutiny on the 10th of March annually, to continue until the service is completed.

Each person, on the requisition of a commissioner, must furnish a written list of their taxable property, possessed on the 9th of March, and verify the same on oath or affirmation. Persons who omit or refuse to exhibit verified lists, or who are guilty of concealments of taxable property, are subject to a fine and triple tax, on conviction before the next county court.

When the lists of taxable property have been taken, they are reduced to an abstract, according to a form prescribed by law, exhibiting the dates of receiving the lists, the names of the persons chargeable, and the articles subject to specific taxation. Of this abstract four copies are made, one for the use of the commissioner, and to be transmitted to his successor; one for the clerk of the county, by which to regulate county taxes and poor rates; one for the sheriff or collector of the tax; and a fourth for the auditor of the State, by which to hold the sheriff accountable.

At the time of rendering the abstracts before mentioned, which is directed to be on or before the last day of May annually, the commissioners are required to deliver to the clerks of their counties, and to the auditor of the State, correct copies of the state of the land tax, adjusted according to such alterations, alienations, and partitions, as are found to have occurred during the preceding year: by these returns, the accounts of the State, and of the counties, are, from year to year, regulated. The commissioners, moreover, deliver to the sheriffs lists of the sums for which each person is chargeable on account of the land tax, by which to proceed in their collections.

Each commissioner is entitled to receive from the public treasury, one dollar per diem, for such a period as is judged requisite for the performance of his duties, by the county court; besides a fee of forty-two cents, for recording every alteration in the land tax, payable by the party claiming an exoneration.

The counties are collection districts, of which there are eighty-eight in the State; the sheriffs are, ex-officio, collectors of taxes; they are appointed annually by the Governor, with the advice of his council, from a list of three justices of the county, nominated by the county courts; they cannot be appointed more than two years successively.

It has been the usual practice for the county courts to nominate the justices in rotation, and for the Governor and council to commission the first in nomination. If all the justices of the county refuse to accept the office, the county courts may nominate three freeholders, from whom an appointment may be made. In case of the disability, or refusal, of a sheriff, to collect the public taxes, the Executive may appoint a collector.

Sheriffs and collectors, before entering on the duties of their offices, are required to enter into bonds, with sufficient sureties, before the justices of the county courts, in the sum of thirty thousand dollars, to secure a due collecting, and accounting, for the taxes imposed on their respective counties.

Persons who pay taxes, may require a fair and distinct account of the articles upon which the same accrue, and also receipts from the sheriffs or collectors for the sums paid; if payment be not made on or before the first day of May, of all taxes due on the 31st day of December preceding, the sheriff or collector may distrain any slaves, goods, or chattels, found on the lands or in the possession of the person indebted, notwithstanding such slaves, goods, or chattels, are comprised in a deed or mortgage. All goods, taken by distress, must be kept five days, after which time they may be sold for ready money, sufficient to discharge the taxes and incidental charges. Slaves cannot be distrained, except for want of goods or chattels; no distress can be made after two years from the time when taxes become due.

In cases where effects sufficient to satisfy a tax are not to be found, on the lands charged therewith, or where the persons indebted are insolvent, a list of such lands and insolvent persons may be rendered by the sheriff or collector to the county or corporation court, and if the court be satisfied with the truth thereof, they may admit the sheriff to make oath to such list, which, being certified, to the auditor of public accounts, will entitle the sheriff or collector to a credit on settlement. Where it appears to the auditor that the persons indebted possess slaves or personal property in some other county, the taxes returned as uncollectible must be transmitted to the sheriff of such county, for collection, with the taxes of the ensuing year. In case the said taxes are not collected during the ensuing year, it becomes the duty of the treasurer to publish, for three weeks successively, in the newspaper of the printer to the State, the names of the delinquents, with the quantity of land, the situation thereof, and the taxes due thereon; in case the taxes, on any tracts of land, not belonging to infants, insane persons, or married women, are not paid in three years, the right to such land becomes forfeited to, and vested in, the State; in favor of the persons above described, an exemption from liability to forfeiture is allowed, until the expiration of three years after their legal disabilities are removed.

The principles of the system of taxation, before described, have been, generally, approved. Some objections have been made against the supposed inequality of the land tax, and against the mode of assessing houses and lots in towns. The duties of the county and corporation courts, have, generally, been well executed; the successive pretensions of justices to the primary office of sheriff, have, however, not unfrequently occasioned defalcations, which

might have been avoided, by appointments with a sole reference to the qualifications proper for collectors of the revenue. The precise degree of punctuality with which taxes have been lately collected, is not known; of the tax for the year 1793, ten thousand dollars, and, of the tax for the year 1794, eleven thousand dollars, remained unpaid, in August, 1796.

The expenses of supporting the State Government, and for contingencies and grants, in the year 1793, amounted to one hundred and twenty-seven thousand four hundred and forty dollars thirty cents.

The same expenses, in 1794, were, one hundred and fifty-seven thousand two hundred and one dollars seventeen cents.*

The whole revenue of the year 1793 was one hundred and thirty-two thousand nine hundred and seventy-eight dollars thirty-one cents.

And that of the year 1794, one hundred and fifty-nine thousand two hundred and sixty-nine dollars thirty cents.†

It is supposed that the statement for the year 1793 exhibits the most correct view of the usual annual expenditures.

The debt of the State is inconsiderable, and the arrearages of old taxes are considered as sufficient, when collected, for its extinguishment.

The amounts of the several articles, which were subject to specific taxes, in the years 1786 and 1795, will appear in an annexed statement.‡

OF KENTUCKY.

The objects of taxation are as follow:

Lands, except town lots, which are divided into three classes, by entire tracts. The first class is taxed at half a dollar per hundred acres, the second class at one fourth of a dollar, and the third class at one eighth of a dollar, per hundred acres. *Horses*, other than stud horses, at one twelfth of a dollar, which last are taxed at various rates. *Neat cattle*, at one forty-eighth part of a dollar. *Slaves*, at one fourth part of a dollar. Ordinary licences, at ten dollars, each. *Coaches and chariots*, at one dollar per wheel; other four wheel carriages, except those used for purposes of agriculture, two thirds of a dollar per wheel; riding two wheel carriages, at one dollar per wheel. Billiard tables, and retail stores, at thirty-three and one third dollars, each. Taxes are, moreover, imposed on each original writ or *subpoena*, in the court of appeals, at one dollar; on like writs or *subpoenas*, in other courts, half a dollar; on each appeal to the court of appeals, two dollars; on each writ of error, subpoena, or certiorari, from the court of appeals, one dollar. On each record of a deed for land, half a dollar. On every paper issued under the seal of the State, one dollar; and, under the seal of any court, half a dollar.

In addition to the specific taxes before enumerated, town lots are taxed, *ad valorem*, at the rate of half a dollar upon every three hundred and thirty-three dollars and one third; the value to be ascertained without regard to improvements.

For the assessment and collection of these taxes, the following regulations have been provided:

The county courts divide the counties into districts, for each of which a commissioner of taxes is appointed, whose duty it is to collect lists or returns of the taxables belonging to individuals; these returns are taken on the oath of the party, between the 10th of March and 1st of July, in every year. The commissioners, severally, determine to what class, lands in their respective districts shall be referred, on the following principles. Where the greater part of a tract is superior, in quality, to second rate land, it is placed in the first class; where the greater part of a tract is inferior to first rate, and superior to third rate, it is classed as second rate; where the greater part of a tract is inferior to second rate, it is placed as third rate; and, where the commissioner has no knowledge of the quality, he may take information, on oath, of the owner of the land, or of any other person; if no information can be obtained, the land is assessed as second rate.

When the returns of individuals are collected, they are digested, in alphabetical order, by the commissioners, and returned to the county courts; of the general list for the county, three copies are made, of which, one, certified by the clerk of the county court, is transmitted to the auditor of public accounts; a second is delivered to the sheriff of the county; the third is retained for the use of the commissioners.

The county courts have power to correct mistakes in the lists, and to relieve persons aggrieved by erroneous or excessive assessments.

Persons who omit to include the whole of their taxable property in their lists, are subject to a fine, and to the payment of treble taxes; if lands are omitted, the party forfeits his right and title thereto; non-resident proprietors may return their lands directly to the auditor, and pay the taxes thereon to the treasurer.

The sheriffs are, generally, collectors of taxes; they are elected every three years, by the people of the respective counties; they are required to give bonds, with sufficient sureties, for the faithful discharge of their trusts. If a sheriff, in any case, cannot give bond to the satisfaction of the county court for the county, or, if he decline to collect the public taxes, the court may appoint a special collector, with the same powers, and like responsibility, in respect to the revenue, as are provided in the case of sheriffs.

The sheriffs may proceed to make collections, by personal demand, of individuals, from the first day of December to the first day of April. After the first day of April they may distrain goods and chattels, and, for want thereof, may sell lands for the payment of taxes; they are enjoined to settle their accounts by the first day of August in each year. In cases where there are interfering claims, and two or more persons pay the taxes for the same land, the person evicted is entitled to compensation from the treasury.

In cases where persons indebted are deemed insolvent, they may be reported to the county courts, and, being so adjudged, their taxes are certified to the auditor, and passed to the credit of the sheriff or collector. If either a sheriff or collector be delinquent, judgment against them may be obtained, on motion, with a penalty of twenty per centum, in addition to the sums remaining in arrear.

The compensation allowed to sheriffs, is, a commission of five per centum; that of commissioners, is one dollar per day, for the time they are actually employed, which last allowance is paid on the certificates of the county courts.

The debt of the State is inconsiderable. The expense of supporting Government may be estimated at thirty thousand dollars per annum. The amount of each species of taxable property, agreeably to the returns made by the commissioners of the several counties, in the year 1795, appears in a statement hereto annexed.‡

OF NORTH CAROLINA.

The revenues of this State are derived from taxes on the following objects:

On all patented lands, except lots in towns, without regard to quality or situation, and on all entries of land, whether disputed or not, eight pence per hundred acres.

On every hundred pounds value of town lots, with their improvements, two shillings.

On all white men of twenty-one years of age, and upwards, whether free, or bound to service; and on all slaves and indented servants of color, between twelve and fifty years of age, two shillings.

On stud horses, various rates, which may be averaged at ten shillings each.

On licenced ordinaries, and houses for retailing spirituous liquors in small quantities, forty shillings per annum.

* Appendix, H. † Appendix I. ‡ Appendix, K.

On every original writ, or leading process in equity, twenty shillings; in the superior courts, ten shillings; in the inferior courts, five shillings; and, on appeals from the inferior courts, eight shillings. On billiard tables, twenty pounds, each.

The taxes above mentioned are collected under the following regulations:

The county courts divide the counties into convenient districts, and appoint a justice of peace to receive the returns of taxables in each district. To facilitate the performance of this duty, it is usual for the captains of militia to advertise musters; to these musters the people repair, with written lists of their whole property subject to taxation, which are exhibited to the justices, on oath or affirmation. The period to which the lists refer, is the first day of April, annually. It is required, that each list should contain a specification of the particular tracts of land; the number of town lots, the counties and towns in which the same lie, and the number of white polls and taxable slaves; appertaining to the family of the person exhibiting the same. Persons who omit to disclose true statements of their taxable property, are liable to an amercement, and to the payment of a double tax.

The valuation of town property is effected by freeholders, three of whom are appointed, annually, in each town, for this purpose, by the county courts; they are sworn to estimate the true value of all lots, with their improvements.

The returns of individuals are, by the justices, exhibited to the county courts, with the names of the individuals who refused to comply with the law. Three transcripts of the returns, digested in alphabetical order, are then prepared; one is exposed publicly in the court-house, for the inspection and information of the people; another is delivered to the sheriff of the county, which constitutes a rule of collection; a third is transmitted to the comptroller of the accounts of the State, by whom the sheriff and his sureties are held accountable.

The sheriffs of counties are, *ex officio*, collectors of public taxes; they are appointed by the county courts, who are judges of the sufficiency of their sureties.

The sheriffs are authorized to collect not only the sums appearing on their lists, but also taxes from persons who omitted to make returns; from the latter they may collect a double tax, one half of which accrues to their own benefit. To secure an account for such collections as are not borne on the lists furnished by the county courts, each sheriff is chargeable, in addition to the amount of his list, with one hundred pounds, unless he exonerate himself from the whole, or some part thereof, by rendering on oath a particular account of all two-fold collections. This provision is, by experience, found sufficient to secure returns of all extra receipts.

The sheriffs are authorized to commence their collections after the first of January; they may not distrain until after the first of April, but they are required to settle their accounts, and pay the moneys into the State treasury, by the first day of October, annually.

The sheriffs obtain credit for such taxes as appear to the county courts to be due from insolvents, on being certified as such, to the comptroller. All taxes remain a lien upon lands, until discharged, and where goods and chattels cannot be found, may be sold for payment of taxes.

The compensation allowed to sheriffs is six per centum on the amount of their collections, and an allowance of six-pence per mile for travelling to and from the treasury, to settle their accounts. These compensations are both forfeited, if the sheriffs do not settle their accounts by the first day of October, in each year.

When sheriffs are delinquent, the treasurer is required to obtain the certificates of the comptroller of the sums due, including the extra charge of one hundred pounds, and thereupon to apply for judgment and execution against the delinquents. These judgments are granted of course, on motion by the treasurer, without notice to the sheriff, or any evidence other than the comptroller's certificates.

The clerks of courts account with the treasurer for all collections made by them, of taxes on law process, and fines on amercements:

The annual product of all the taxes before-mentioned, may be computed, at this time, to be between fifteen and sixteen thousand pounds, the charges of collection, and defalcations for insolvents, are estimated at fifteen per centum.

On account of the tax for the year 1794, the returns of lands amounted to fourteen millions three hundred and fifty nine thousand six hundred and seventy acres; and the number of free persons, servants, and slaves, subject to taxation, to one hundred and one thousand six hundred and five. The taxes on law process, houses for retailing spirits, gaming tables, and stud horses, are supposed not to have produced, at any time, more than one thousand pounds per annum. The land tax has greatly increased since the year 1794, owing to the many new entries since that period.

The following estimate of the proportions in which each class of taxable objects contributes to a nett tax, of between fifteen and sixteen thousand pounds upon the State, being founded on the foregoing data, cannot be materially erroneous.

Tax on lands, other than town lots, computed on fourteen millions three hundred and fifty nine thousand six hundred and seventy acres, at eight pence per hundred acres,	£1,786 10 0
Tax on white males, of twenty one years and upwards, and on all slaves and indented servants of color of both sexes, from twelve to fifty years of age, computed on one hundred and one thousand six hundred and five persons, at two shillings, each,	10,160 10 0
Estimated product of taxes on law process, houses for retailing spirits, gaming tables, and stud horses,	1,000 0 0
Estimated product of the tax on town lots and improvements, at two shillings in each hundred pounds,	1,000 0 0
Estimated increase of the tax on lands, since 1794, occasioned by new entries and grants,	1,500 0 0
Gross product of all taxes,	£18,447 0 0
Expenses of collection and defalcations, occasioned by insolvents, estimated at fifteen per centum,	2,767 0 0
Estimated nett receipts,	£15,680 0 0

There are fifty-eight counties, or collection districts, in the State; the whole revenue is collected by fifty-eight sheriffs, and seventy-four clerks of courts and masters in chancery.

The expenses of supporting government and contingent grants, vary from fifteen to twenty thousand pounds per annum; the deficiency of the State tax has been, hitherto, supplied from the proceeds of vacant lands; the debt of the State consists principally of paper bills of credit, of which about one hundred and fifty thousand pounds are estimated to be in the treasury and in circulation. The amount of the county taxes is supposed to be nearly the same, on an average, as the annual State tax.

OF TENNESSEE.

It is not known whether any law, for collecting a revenue, has been yet passed in this State.

OF SOUTH CAROLINA.

All the lands in this State are divided into districts, which are particularly described by law; within most of the districts, the lands are classed by general descriptions, indicative of their value, as resulting from natural fertility or situation; to each class a specific value is assigned, according to which all lands falling within a given class, are uniformly taxed: For instance, all tide swamps, not generally affected by the salts or freshes, of the first quality, are rated at six pounds per acre; of the second quality, at four pounds per acre; of the third quality, at two pounds per acre; all pine-barren land, adjoining such swamps, or contiguous thereto, with respect to the benefit of

water carriage, at ten shillings per acre; all prime inland swamp, cultivated and uncultivated, at an average of three pounds per acre; second quality, at two pounds per acre; third quality, at one pound per acre; pine-barren land, adjoining or contiguous thereto, at five shillings per acre; salt marsh, or inland swamp, proved to be incapable of immediate cultivation, at five shillings per acre.

In like manner, all the lands in the State are valued by districts or classes. The quantities of lands subject to taxation at each rate, and of all other articles of ratable property, as returned in consequence of the tax granted in the year 1794, are hereto subjoined.*

From the foregoing general rule of valuation, lands lying within the parishes of St. Philip and St. Michael, near Charleston, are excepted; these last, with lands, lots, and buildings, lying within any city, village, or borough, are assessed in detail, with reference to the local advantages and value of each separate lot or building, and in a relative proportion to lands in the country.

The tax on lands, lots, and buildings, has lately been ten shillings on every hundred pounds, or one half of one per centum *ad valorem*; a like tax has been imposed on every hundred pounds of stock in trade, factorage, employments, faculties, and professions; clergymen, mechanics, schoolmasters, and schoolmistresses, excepted. All slaves are taxed at four shillings and eight-pence per head; and free negroes, mulattoes, and mestizoes, at nine shillings and four-pence per head; a tax is collected on sales at auction, but the rate imposed is not certainly ascertained.

The assessors and collectors of taxes are the same persons; they are appointed by the Legislature; vacancies, which happen from deaths or resignations, are supplied by the Governor; the collectors hold their offices during the pleasure of the Legislature.

The collectors for the parishes of St. Philip and St. Michael are required to give bonds in the sum of ten thousand pounds; the other collectors are bound in the sum of one thousand pounds; before entering upon the execution of their offices, they are sworn to a faithful and impartial discharge of their trusts; in case of omission to take the said oath, before entering upon their offices, they forfeit the sum of fifty pounds.

Three weeks prior to the first Monday in September, annually, the collectors notify the inhabitants to prepare returns of their taxable property; in the parishes of St. Philip and St. Michael, the collectors are required to call once at the dwellings of the inhabitants; in other parishes, fixed places may be appointed for receiving the said returns; no person can, however, be compelled to attend at a greater distance than fifteen miles from his residence, either for the purpose of delivering a return, or making payment of a tax.

Every person possessed of any taxable property, either in his own right, or in the right of any other person, as guardian, executor, attorney, agent, or trustee, is required to exhibit, on oath, an account, containing an enumeration of each lot of land lying in any city, borough, or village, with the dimensions thereof, and improvements thereon; also of his lands in the country, with a particular account of the situation, quantity, and quality, of the same, and the number of his slaves, and all other objects of taxable property; these accounts are taken with reference to the first day of October, annually. Persons who conceal any part of their taxable property, are subject to quintuple taxation on such part as has been concealed; persons who neglect or refuse to exhibit their accounts, are declared to be defaulters, and may be doubly taxed, according to the best information which the collectors can obtain, of their taxable property.

When the accounts of taxable property have been collected, the collectors determine the class to which any lands shall belong; and in respect to other objects of taxable property, they annex such valuations as they judge equitable. The assessments on stock in trade, faculties, and professions, are founded on conjectural estimates, according to the best judgment of the collectors. These assessments are understood to be generally very moderate; in Charleston, they are graduated according to the circumstances of individuals, from five thousand to one hundred dollars.

When individuals judge themselves to be over rated, they are allowed to fix the quantum of their assessments, by declaring, on oath, the value of their property; their declarations, so made, become, in this case, a rule for the government of the collectors.

There are two treasurers in South Carolina, one residing in the upper and the other in the lower country. To these officers, the collectors of taxes account, by delivering two lists; the first containing a specification of all taxable property returned to them, with the names of the persons who returned the same, and the sums paid by individuals, respectively; the second containing an account of all taxable property which has come to the knowledge of the collectors, and which has not been returned. Collectors who refuse to render accounts, on oath, in the manner before mentioned, may be committed to prison, by warrants from the commissioners of the treasury.

Lists, containing the names and sums assessed upon individuals, are publicly exposed at the exchange in Charleston, or at some public place in the parishes where they reside, for ten days; after which time, if the taxes are not paid, warrants are issued by the collectors, directed to the nearest constable, or to the sheriff of the city of Charleston, commanding them to levy the taxes by distress and sale, of real and personal estate: if the defaulter neglect or refuse to point out lands, or to produce goods or effects, whereon the warrants may be levied, his person may be taken and committed to prison. Taxes are preferred to all securities, and must be paid out of the assets in the hands of executors, prior to any judgments, mortgages, or debts, whatsoever.

Lands and property, of persons residing out of the State, upon which the taxes are not paid, with interest thereon, within one year after public notice in the gazettes of the State, are forfeited to the use of the State, saving the rights of infants and married women, until two years after the removal of their legal disabilities.

The property of persons residing without the limits of the United States, except persons in the employment of the State, or of the United States, and young men sent abroad for their education, until they attain the age of twenty-three years, is subject to double taxation. Property belonging to religious or charitable societies, cities, or free schools, is altogether exempted. Individuals may elect in what parish to pay their taxes; the taxes paid in Charleston, of course, include assessments on property lying in all parts of the State.

The collectors are allowed a commission of five per centum on the sums accounted for by them, except those for the parishes of St. Philip and St. Michael, who are allowed only two and one-half per centum.

The balance found due from the United States, on the final settlement of the accounts of the late war, is understood to be nearly equal to the domestic debt of the State; a sum of about two hundred and ten thousand dollars remains due to certain foreign creditors, for the interest and reimbursement of which, an annual tax of one-fourth of a dollar per head, on slaves, is pledged and appropriated. The expenses of maintaining the State Government and contingent grants, are estimated, on an average, at one hundred and twenty thousand dollars. The expenses of the city of Charleston, are defrayed by local taxes; from September, 1795, to September, 1796, these expenses amounted to nearly fifty thousand dollars; the amount of parochial and other taxes in the country is not known.

The period during which a State tax has been usually in collection is not ascertained. It is inferred, however, from information which has been obtained, that the practice of combining the appointments of assessors and collectors in the same persons; the want of an efficient control over the accounts of the collectors, of which this association of duties has been a consequence; and the permission to individuals of electing the parish or county where their taxes shall be paid, have been causes of defalcations and delays, which would not otherwise have been experienced.

OF GEORGIA.

Lands in this State, as in South Carolina, are laid into districts or classes, to each of which a value is assigned by law. In the act granting a tax for the support of Government, for the year 1796; tide swamps of the first quality are rated at ten dollars and thirty-nine cents per acre, and pine-barren lands at twenty-one cents per acre. Lands of intermediate qualities are rated at various rates, according to their advantages either of soil or situation.

*Appendix, L and M.

On the value of lands, agreeably to the classification above mentioned, and on the value of all lots, wharves, and buildings, within the limits of any town, village, or borough, as ascertained by a particular assessment, a tax has been imposed of forty cents upon each hundred dollars.

On every hundred dollars' value, at prime cost, of the stock in trade of shop keepers, twenty cents.

On every hundred dollars' value of foreign wares, liquors, and merchandise, sold, bargained, or trafficked for, by factors and brokers, eighteen and three-quarter cents.

On every hundred dollars of the funded debt of the United States, fifty cents.

On all free white male persons, of the age of twenty-one years and upwards, and on all slaves under the age of sixty years, thirty-seven and a half cents.

On all male free negroes, mulattoes, and mustizoes, from the age of twenty-one years and upwards, over and above the taxable property they may be possessed of, fifty cents.

On all negroes brought into the State by sea, for settlement or sale, except such as are brought in by emigrants from any part of the United States, ten dollars.

On all professors of law or physic, and on all factors and brokers, four dollars.

On all billiard tables, fifty dollars.

The county courts have power to remit the poll tax in favor of indigent and infirm persons.

In every county there is appointed a receiver of tax returns, who is sworn to a faithful discharge of his duty. The receivers are required to give notice to each captain's district in their counties, by previous advertisements, for ten days, of the times and places where they will attend to receive returns of taxable property. They are required to attend three days in each district, which days must not be within seven days of each other. The commanding officer of each company must furnish the receivers with lists, on oath, of all persons in their districts liable to the payment of taxes.

All persons possessed of taxable property are required to exhibit, on oath, particular accounts thereof, to the receivers of tax returns, under a penalty of ten dollars for every hundred dollars value omitted or concealed, and a liability to the payment of double taxes, to be ascertained by three freeholders of the county.

When the returns of inhabitants have been collected, they are by the receivers digested into a general return, of which three copies are made, one for the use of the collector of the county, a second for the treasurer of the State, and a third for the county court of the county. Within one month after the returns are made, the receivers are required to publish, in the State gazette; the names of all defaulters.

The counties are collection districts. The collectors are required to give bond, with surety, according to the magnitude of the sums entrusted to them for collection, from twenty thousand to three thousand dollars; they are sworn to a faithful discharge of their offices; the sufficiency of their sureties is determined by the justices of the county courts. Receivers of tax returns and collectors are appointed by the Legislature; vacancies are supplied by the Governor.

The act granting the tax for the present year, was passed in the month of February. Individuals are allowed till the first of December to make their respective payments, after which their goods and chattels may be distrained and sold; if goods and chattels are not to be found, lands may be taken, sold, and conveyed by the collectors, notice for twenty days, being previously given in the public gazettes of the State. The collectors' accounts must be settled with the treasurer before the first day of February, 1797. Claims of collectors on account of taxes due by insolvents, are to be presented on oath, to the grand jurors of the respective counties, who are empowered to decide finally thereon.

The receivers of tax returns are allowed two and one half per centum on the taxes arising upon the property reported by them, beside six cents and one quarter on each return of a poll without property. The collectors are allowed five per centum on the sums accounted for by them, and certain fees in cases of distress, which are paid by the delinquents.

No information has been obtained of the quantities of taxable property in this State, of the amount of its debt, the usual expenses of maintaining Government, or the manner in which the revenue laws have been executed.

As an apology for the minuteness of the foregoing detail, the Secretary respectfully observes, that, fully conscious of the importance and difficulty of the subject under consideration, he has been anxious to prevent the consequences of any misapprehensions on his part, by a full exhibition of the data upon which his opinions have been formed. Owing to the great variety of acts and documents, which it has been necessary to consult, it is not to be presumed that the foregoing recital is perfectly accurate. It is hoped, however; that no errors will be discovered, which can embarrass or delay the deliberations of the Legislature.

In the expression of opinions respecting the best mode of imposing the proposed tax, the three following have been suggested.

1st. That an act of Congress should be passed, declaring the quotas of the different States; assigning a time for payment into the treasury, and prescribing, in cases of delinquency, that the said quotas should be assessed and collected by authority of the United States, upon the same objects of taxation, and pursuant to the same rules, by which the last taxes were assessed and collected by the respective States.

2d. That the act of Congress should direct that the proposed tax should be assessed and collected under authority of the United States, upon the same objects of taxation, and pursuant to the rules of collection by which taxes are collected in the States, respectively.

3d. That the act of Congress should define certain objects of taxation, and principles of assessment, according to which the proposed tax should be assessed in all the States, to be collected pursuant to uniform regulations.

The first of these propositions deserves but a momentary consideration. In the first place, it is obviously liable to every objection which can attend a reliance upon State contributions in any other and less exceptionable form. Secondly, it partakes of the system of requisitions upon the States, which utterly failed under the late confederation, and to remedy which, was one great object of establishing the present Government. Thirdly, it presupposes a possible necessity of recourse to the national authority, under circumstances of unavoidable collision with the State Governments.

It may, therefore, be safely affirmed, that, if this mode should be adopted, all certain expectation of a revenue from direct taxes will be destroyed; that discontents and jealousies between the different members of the Union will be excited; and that the constitutional power of the Government of the United States will be required to be exerted under unfavorable circumstances.

The second proposition is recommended by plausible, if not solid considerations; and as the resolution of the House countenances an expectation that a plan of this nature may be realized, its advantages and disadvantages have been maturely considered.

It appears, from the account already given of the fiscal systems of the several States, that, in many instances, they have been long established; that, in general, they are well approved by the people; that habit has rendered an acquiescence under the rules they impose, familiar. A presumption in favor of their intrinsic merit, arises from their having been enacted by Legislatures possessed of a minute and particular knowledge of the circumstances and interests of the respective States; and it may be conceded that, so far as the principles of the State systems can, with propriety, be adopted by Congress, the hazards of new experiments, and the delays incident to the organization of a new plan, will be avoided.

It is believed that the foregoing observations comprize the substance of all the arguments which can be urged in favor of the proposition to be considered. They are acknowledged to be of weight. According to first impressions on most minds, they will be pronounced almost irrefragable. It is, however, presumed, that a particular knowledge of the State systems, and attention to their operation, will produce a conviction, that the plan is liable to great, if not insuperable objections.

I. *The systems of the States are, in many instances, utterly different from each other, in respect to objects and principles of taxation.*

The truth of this proposition is demonstrated by the preceding part of this report, and by the documents which are hereunto annexed; it may be proper, however, to contrast some of the most important features of difference:

1st. *Uniform capitation taxes, or taxes on persons, without respect to property, professions, or occupations, are imposed in Vermont, New Hampshire, Massachusetts, Rhode Island, Connecticut, North Carolina, and Georgia. The proportion of taxes raised in this manner, in Vermont and Georgia, is not ascertained; in the other States above mentioned, the capitation taxes produce between two-ninth parts and somewhat more than one-third part of all the sums collected. In the other States, this tax is unknown, the taxes on professions, and certain classes of persons, and on slaves, not being considered as of this description.*

2d. *Taxes on horses and cattle, with certain exceptions, are imposed in Vermont, New Hampshire, Massachusetts, Connecticut, New Jersey, Pennsylvania, and Kentucky. Horses only, are taxed in Virginia. The whole stock of farms is included in the general valuations of property in Rhode Island, New York, Delaware, and Maryland. In all the other States, no part of the stock of farms is subject to taxation.*

3d. *Taxes are imposed on the mass of property, real and personal, with certain exceptions, in the States of Rhode Island, New York, Delaware, and Maryland. In the other States, specific objects are designated.*

4th. *Lands, including those unenclosed and uncultivated, are subject to taxation in all the States, except Vermont and Delaware. In the latter State, they will be hereafter taxed. Lands are uniformly taxed by the quantity, without reference to soil or situation, in North Carolina. They are divided into three classes, with reference to quality, in Kentucky, each of which is uniformly taxed. They are taxed uniformly, by districts, in South Carolina and Georgia, whether cultivated or uncultivated. They are taxed according to a permanent valuation, in Virginia. The relative value of lands in different counties or districts, is determined by law, in Maryland and New Jersey; within which districts, they are taxed ad valorem, not exceeding certain average rates. In Pennsylvania, lands are taxed ad valorem, according to triennial assessments. In Connecticut, except certain lands in two counties, they are taxed according to the mode of cultivation or condition, by a uniform rule, without reference to value. In Massachusetts and New Hampshire, they are taxed according to their produce or supposed annual rent or profit. In Vermont, enclosed and cultivated lands, with certain exceptions, are uniformly taxed, without reference either to value or profit.*

5th. *Stock employed in trade or manufactures, and moneys loaned on interest, are taxed on different principles, in different States. In some States, these objects are wholly exempted.*

6th. *Assessments at discretion, on the supposed property or income of individuals, are permitted in various degrees, and under different modifications, in some States. In other States, all taxes attach to certain defined objects, at prescribed rates.*

Other circumstances of discrimination might be noticed; those which have been mentioned, are, however, sufficient to shew that the State systems are utterly discordant and irreconcilable, in their original principles. It now remains to deduce the objections arising from this diversity of system.

It is assumed as a principle, that all the objects of income, whether consisting of skill, labor, or capital, bear certain relations to each other, which may be defined to be their natural value.

When a consumable article is taxed, the relations by which value was before determined, are immediately affected; the tax being an unavoidable expense attached to the article, enhances its value. But though the value of the article in this sense is enhanced, by being rendered the subject of taxation, it is well known that its price in money may still remain as before, or may be enhanced, or may even be depressed. Value, therefore, is determined by the degrees of labor, skill, and expense, necessarily bestowed on a subject; while price is determined by the correlative demand for money, and the articles for which money is exchanged.

Various causes may influence price, independent of, and unconnected with, taxes. The most useful of these, are the occasional plenty and scarcity of money, or its substitutes; or a redundant or deficient supply of exchangeable commodities. The vibrations of price, produced by these causes, are, however, always temporary; it being the constant tendency of free commerce, to restore that equilibrium which results from a coincidence between price and value.

Unless taxes are laid with a view to encourage certain objects, by giving a new direction to the public industry, it is proper that the natural relations of value should be regarded. When, notwithstanding a new tax, the price and value continue to be coincident; when no business or profession is either encouraged or discouraged, taxes may be said to be laid with perfect equity, and in exact proportion to the relative ability of individuals.

Various have been the devices of nations to attain this object; the regulations of the United States have been, hitherto, governed by the following maxims:

1st. *To tax the same subject, in all cases, by an uniform rule.*

2d. *To protect every taxed article by a proportional tax upon its competitor.*

3d. *To prevent disadvantageous competitions in foreign markets, by bounties or drawbacks, proportioned to the amount of the tax.*

There appears to be no good reason, why these principles, so far as circumstances will permit, should not be respected in a system of direct taxation for the United States; their application to the subject, and the objections which they form against the State systems, are obvious.

If an article is taxed in one State, and is entirely exempted or differently taxed in another State, the action of the tax upon the same subject must be different in these different situations; in the State in which the article is taxed, it must suffer, not only from the new and disadvantageous relation in which it will be placed in respect to other branches of industry, but it must also suffer from competitions of industry, similarly employed in other States. From the first mentioned disadvantage, relief will in time be obtained, by the operation of those causes which invariably conform all supplies to the state of demand; from the last, it can never be relieved, except by a change of situation. The tendency of opposite systems of taxation, in the same country, if the foregoing positions are true, must, therefore, be, to dislocate property, and to divert industry from those situations in which it might naturally have found employment.

The Secretary feels no disposition to magnify the force of this objection, and therefore he observes, that the influence of such a tax as is now proposed to be laid, may not be so considerable as to be immediately visible. An effect can only be proportioned to its cause; if, therefore, the theory should be admitted to be true, yet, if its application to practical purposes is only to be justified by speculative reasoning, and shall appear to be unfounded in probability, it may, with propriety, be discarded.

In speaking of the probable effects of collecting a general revenue, by diverse modes of taxation, it is, however, proper to notice, that the peculiar circumstances of the United States will justify an opinion, that even slight causes may produce great effects. Enterprise, in pursuit of wealth, is a characteristic of Americans; a part of our country is wholly unexplored, and the residue, susceptible of great meliorations; a free circulation of industry and wealth is patronized by our laws; capital is very equally divided; attachments and habits, favorable to particular employments, are but imperfectly formed; expensive manufacturing establishments exist but in few instances, and rarely accompanied with any peculiar local advantages.

It is believed that most of these circumstances favorably discriminate the United States from every other country; they are all of a nature to render the effects of any general system of taxation inoppressive, by facilitating a restoration of that proportional level between price and value, supply and demand, which taxes have a tendency to disturb; but, at the same time, they powerfully dissuade from systems of a local bias and operation.

It is no refutation of this objection to say, that the existing relations of property and industry have conformed to the State systems, and would be disturbed by a change. It is known that the State taxes have generally been very inconsiderable; that the most partial taxes, when very moderate, produce no sensible effects; that when, as

during the confederation, attempts were made to draw a considerable revenue from requisitions, insuperable difficulties were found to attend the collection of direct taxes, in every State; it will also be recollected, that these difficulties were, in a great measure, ascribed to the discordance and counteraction of opposite systems; experience, therefore, instead of refuting, affords a proof of the principles herein maintained.

II. *A second objection against adopting the laws of the States, arises from the diversity of the principles by which taxes are apportioned and collected.*

It appears from the preceding part of this report, that, in the States south of Delaware, including Kentucky, all taxes attach to persons or to individual property, and that the assessing and collecting officers are appointed by the Legislatures, State Executives, or by certain courts. In the States north of Delaware, taxes attached to corporations or districts, as townships or counties, in which the assessing and collecting officers are chosen by the people, who are ultimately responsible for their conduct. In the State of Delaware, taxes are apportioned to counties, but, as the collectors are appointed by the treasurer, the counties are not responsible.

It is of the utmost importance, that a strict responsibility should be maintained in every grade of the fiscal department; without real responsibility, the characters of those entrusted with the public revenues can never be protected against unjust suspicions, nor can abuses be long prevented.

To secure responsibility in the collection of a direct tax, it appears to be essential that the persons who assess the tax should be different from those who collect moneys from the people; in other words, no man ought to be allowed to prescribe the rule by which individuals are to contribute, and by which his own accounts are to be adjusted. If it shall be determined to impose a direct tax, in the mode prescribed by the laws of the several States, it is not perceived how the principle of rendering districts responsible for fixed quotas, can, in respect to certain States, be renounced.

Nothing is more certain, than that a new assessment will be necessary for every tax imposed on objects of a transitory nature; and that, in proportion to the variety of objects, will the details of assessment be rendered complicated, and susceptible of error.

To establish officers in every district, possessed of skill competent to institute and maintain a check on the collectors, would be attended with enormous expense; to allow the people to elect assessors in the manner now practised, and, at the same time, to renounce the idea of local responsibility, would be manifestly unsafe. Under such a system, there could be no security that local partiality would not lead to connivances for the suppression and concealment of property justly subject to taxation. Notwithstanding the temptation to practices of this kind is greatly diminished, by establishing quotas, yet the returns of taxable property, hereto annexed, exhibit, in some instances, most decisive indications of imperfection.

There is reason to believe, that an experience of the difficulty of obtaining accurate and impartial assessments, has dictated many of the late changes in the State systems; it being observable that, where the principle of local responsibility has not been adopted, the systems of taxation have been simplified, and more and more confined to visible and permanent objects.

But, though the principle of local responsibility appears to be a natural consequence of assessments, requiring a minute and frequent specification of taxable objects, yet it is to be observed, that a system of this nature is frequently dilatory, and sometimes may be found impracticable, owing to the intrinsic difficulties which must ever attend the coercion of communities.

In the States south of Pennsylvania, where taxes attach to persons or to individual property, the State regulations are more coincident with those by which the internal revenues of the United States have been hitherto governed, than in the northern section. The taxes are more specific, and are confined to fewer objects. Nevertheless, in some of these States, the assessment of a tax would necessarily require specifications of considerable extent and intricacy, in order to secure a due responsibility to the public.

If it should be determined that the rules by which taxes are collected in the several States shall form the basis of an act of the United States, still provisions would be necessary, in cases where the State laws are defective; in the States of New York and Pennsylvania, no taxes have for several years been imposed, except for county purposes; the quotas of the several counties, in respect to the last tax, would evidently be unsuitable at present; and even if the valuations by which county taxes are now assessed, were known, they would not afford a just criterion for apportionments; being designed merely to regulate the quotas of townships, and the proportions of individuals, no judgment of the relations of the several counties to each other, could be deduced from them.

In some of the States, all officers, in others, officers of certain descriptions, are disqualified by law from accepting appointments under the General Government; serious inconveniences have been experienced in the collection of the internal revenues already established, from this cause; they would be increased by an adoption of the State systems, to a degree which it is not easy to foresee or calculate.

To the objections which have been stated, and which relate to local and subordinate administration, it is proper to add those which would affect the treasury department, under the operation of a system predicated on the proposition now considered.

No extensive business can be conducted with security, except it be susceptible of plain, distinct, and invariable regulations. Cases will, indeed, arise, relative to which some degree of discretion must be exercised. Under a well organized plan, these cases may always be identified, to be judged of according to their particular circumstances and merits. In proportion to the complexity of any system, will be the number of doubtful or anomalous cases, and in the same proportion will the number of general rules, and the volume of details, be increased.

All causes which complicate business tend to produce error, to lessen responsibility, and to encourage and foster suspicions to the disadvantage of the Executive administration. It is believed that the laws relating to the fiscal department have been hitherto framed according to principles, and executed in a manner, which will admit of a satisfactory elucidation of every material transaction. Though the business of the treasury consists of several branches, yet each branch is governed by uniform rules; there has, therefore, as yet, been introduced, no other complexity than what unavoidably results from a variety of duties. To enforce one simple and uniform system of taxation throughout this extensive country, would considerably add to the labors of that department; the considerations which have been mentioned, oppose strongly that accumulation of duties which would result from a system founded on a diversity of principles.

The Secretary presumes that it has been evinced that there are weighty, if not insuperable objections, against an adoption of the State systems by the United States; the more difficult task of proposing a plan, not attended with difficulties of equal or greater magnitude, remains to be attempted. To this end, a review of the principal taxes collected in the several States, appears to be necessary.

1st. *Uniform capitation taxes, or taxes on persons, without reference to property.*

This species of tax is liable to fewer objections in the United States than in any other country; such is, and must be, the demand for labor, while lands are so easily attainable as at present, that there can be no danger of depressing the condition of laborers. A tax of this nature could, moreover, be easily adjusted, both to the rule of uniformity and to the rule of apportionment, by one of which, the constitution requires that all contributions shall be regulated.

But it cannot be doubted that capitation taxes tend to increase the price of labor, and of course to discourage manufactures, contrary to the policy of the United States. Moreover, by multiplying the objects of taxation, an undue proportion of the public burdens is thrown upon the class of middling farmers, whose interests appear to be disadvantageously affected by the operation of most of the State systems. This species of tax is decidedly opposed by public opinion in some States. A new assessment would be necessary for every tax, the expenses of which, and of maintaining a due check upon the collection, would be disproportioned to the revenue; and owing to migrations, a considerable part of every assessment would fail of being collected. On these grounds, capitation taxes are deemed inexpedient.

2d. *Taxes on the stock and produce of farms.*

Taxes of this kind are unequal, even when imposed according to uniform rates, as is the practice in most of the States. When they are not imposed according to uniform rates, they are necessarily arbitrary, and still more unequal. The same article, in different situations, being of very different value, a uniform tax on the stock of farms could not fail of producing various results in respect to the income of individuals. Taxes of this nature discourage improvements. Beasts employed in agriculture and common transportation, are, in no respect, more eligible objects of taxation than the tools and implements of a farm, or those of a trade or profession. A great proportion of the stock of middling farmers is of this description, upon whom a tax on the stock of farms would fall with undue weight. Such a tax would require minute specifications, and repeated assessments; the effects of which, towards increasing the expenses of collection, and diminishing the responsibility of the revenue officers, have been already noticed.

3d. *Taxes on stock employed in trade and manufactures, and on moneys loaned on interest.*

It is believed that direct taxes on these objects, except in extraordinary and temporary emergencies, are impolitic, unequal, and delusive. When taxes of this kind are so levied as not to be, in some form, reimbursed to the contributors, they tend to drive capital, commerce, and industry, from a country; in other cases, they operate as taxes on consumable commodities. They are either arbitrary, or they require an inquisition into the circumstances of individuals, to which free governments are incompetent. As it is practicable, in most cases, to arrive at the object proposed by taxes of this description, by means of uniform duties on consumable commodities, and on visible signs of expense, there appears to be no reason for recurring to a mode which constant experience has shown to be unequal and unproductive, and which is in its nature arbitrary.

4th. *Taxes on the profits resulting from certain employments.*

This head will comprise a variety of taxes collected in certain of the States, upon lawyers, physicians, and other professions, upon merchants, traders, and mechanics, and upon mills, furnaces, and other manufactories. In some States, these taxes are attempted to be proportioned to the gains and profits of individuals, in which cases they are both arbitrary and unequal; in other States, the taxes are uniform; in which cases they are only unequal.

It is presumed, that taxes of this nature cannot be considered as of that description which the constitution requires to be apportioned among the States; moderate taxes of this kind have been resorted to in most countries. It is impossible to render them exactly equal; that they are easy of collection, that their operation is indirect, and that they are capable of being rendered perfectly certain, are recommendations in their favor.

5th. *Taxes on lands.*

A direct tax, in the sense of the constitution, must necessarily include a tax on lands; it, therefore, only remains to determine on a mode of assessment, of which the principles shall be, as nearly as possible, certain, uniform, and equal.

The general principles, according to which lands are now taxed in the several States, have been already mentioned. Taxes on the quantity of lands, without respect to quality, situation, or improvements, are both certain and uniform; but they are so manifestly unequal, as to be altogether improper, except in countries very recently settled, and where the taxes are very moderate.

Uniform taxes on lands, with reference merely to districts or local situation, are certain; but when imposed on districts partially and unequally improved, they are exceedingly inequitable. If any considerable taxes should be imposed, according to this rule, on lands so circumstanced, it is believed that it would be perceived to be their tendency to accumulate landed property into few hands, and to discourage improvements.

Uniform taxes, with reference to the quality of lands, determined by a classification, are somewhat less certain, though more equal, than either of the modes beforementioned. During a certain period after the first settlement of a country, this mode of raising a moderate revenue appears to be liable to no considerable objection.

A uniform tax on all improved lands, would be sufficiently certain, though very unequal, except in a country the lands of which were nearly similar in quality, productions, and advantages, in respect to markets; this mode of taxation is, therefore, but illy adapted to the condition of any other than a small State and recent settlements.

A uniform tax on lands, with reference to their condition or mode of cultivation, would evidently be unsuitable, except in a small State, where the quality of the lands, and circumstances of the people, were nearly similar; the frequency of assessment which this mode of taxation requires, is of itself an insuperable objection against its adoption as a general rule.

Taxes proportioned to the value of improved lands, and taxes proportioned to their produce, or annual income, or rent, are nearly, if not entirely, alike in principle. In countries where lands are generally leased and cultivated by tenants, the annual rent affords a certain criterion of value; but in this country, where lands are generally held and cultivated under allodial tenures, the sums of money for which lands are commonly sold afford a more correct standard. As unimproved lands afford no rent, their value can be no otherwise determined than by the rule last mentioned.

The value of lands being assumed as the most eligible criterion of assessment, a question arises, how often will new assessments be necessary?

In a country generally peopled and cultivated, or, in other words, where the relative value of lands has been adjusted by settlements in every part, there appears to be no necessity for frequent valuations. On the contrary, taxation, by a permanent and invariable rule, would be most convenient for both the public and for the proprietors, until some cause had operated an essential change in the relative value of landed property.

Our country is, however, far removed from that fixed state which alone could justify an attempt to establish a permanent standard of taxation. It may be expected, that in some parts the value of lands will decline, in others, it will certainly increase. As no tax on lands, occupied for purposes of agriculture, can exceed the value of a certain proportion of its produce, it might follow, that the resources of the government would be unreasonably and improperly restricted by the establishment of a permanent rule. On the contrary, frequent valuations are discouraging to improvements, and necessarily occasion the expenses, incident to the assessment and collection of a revenue, to be excessive; such a mean between a permanent rule and annual valuations, therefore, appears to be advisable, as would, on the one hand, produce an apportionment, in a great measure corresponding with the actual value of lands, and, on the other, not discourage improvements, or inconveniently enhance the expenses of assessment. A period of not less than ten years, nor more than fifteen years, is suggested as a proper medium.

Temporary and perishable improvements, including buildings, do not appear to be proper objects of valuation in the assessment of a tax on lands.

The expediency of a tax on unimproved lands is at least doubtful; being absolutely unproductive, the capital advanced by the proprietors can only be considered as a species of loan, to be reimbursed at a future period; or as an expenditure for the purpose of commencing settlements. Large tracts of land are held by persons, whose only object, in making purchases, was the investment of capital with a view to security, and to the profit expected from future sales; perhaps equal quantities in the aggregate are held in small portions, which were purchased with a view to actual improvements.

It has been sometimes supposed, that taxes on new lands tend to encourage settlements, and to promote an equal division of landed property: this opinion has probably been founded on an observation, that wherever considerable taxes have been imposed, extensive alienations have followed. The vibrations of price, and consequent speculations and frauds which have been thereby occasioned, have been serious evils. Considering the immense quantities of new lands in this country, there is no hazard in affirming that monopolies, for any considerable time, are utterly impracticable; though, in particular places, proprietors of extensive tracts may counteract settlements, yet it will more frequently happen, that the competitions between sellers of lands will be decidedly favorable to purchasers; in general, proprietors will, from views of private interest, be active encouragers of new settlements.

The greatest obstacles to the vigorous and successful prosecution of new settlements, arise from the general

poverty of the first cultivators, and the hardships which they are obliged to encounter. It is the policy of individuals, who are desirous of promoting settlements, and who are able to command capital, to diminish these inconveniences as much as possible. Not unfrequently, the first improvements are made at the expense of proprietors, other than actual settlers. When this is not done, the necessity of an advance, which would diminish the stock of the cultivator, is obviated by sales of land on credit for a term of years. Taxes on new settlements create a demand for capital; their tendency must be disadvantageous to the poor, and favorable to the wealthy; they may, indeed, operate to the benefit of one description of capitalists, and to the injury of another, but it is believed that an impartial appeal to experience will demonstrate, that, wherever taxes have been imposed for other than local purposes, immediately beneficial to new settlements, they have produced an accumulation, not a division of landed property.

But, though it appears to be inexpedient to extend the proposed tax to unimproved lands generally, it will not be possible to exempt them, in all situations, without relinquishing that criterion for regulating the accounts of the revenue, which would result from an ascertainment of the quantities of lands within the districts to which the tax may be extended. As being a medium most consistent with equity, and the security of the revenue, it is proposed that the law should define the limits to which the sphere of taxation shall be extended, and that it should prescribe a maximum of value, above which unimproved and uninclosed lands shall not be valued, in certain districts, to be defined.

It appears to be proper, that all lands belonging to corporations or individuals, which are, or shall be, permanently exempted from taxation by the laws of the States, respectively, should also be exempted by the United States.

6th. Taxes on houses.

In a scientific view, a tax on houses can only be considered as a tax on expense, and in no sense as a tax on capital or revenue; whether a tax of this nature be imposed on the landlord, builder, or tenant, it must, under the operation of a permanent system, finally fall entirely upon the tenant. Permanency and immobility are the only properties which distinguish houses from those objects of taxation which are universally considered as manufactures and consumable commodities. It is, indeed, the tendency of these properties to protract a readjustment of the natural relations between price and value, supply and demand, whenever they happen to be varied by taxation, or any other cause; they are, however, deemed insufficient to change the definition and nature of the subject.

Houses, therefore, being, in respect to their occupants, unproductive objects, and, in a fiscal view, mere indices of expense, the expediency of subjecting them to direct taxation is somewhat questionable.

It is conceived that the houses and other buildings of the great body of farmers and laborers of a country ought to be regarded as objects of *necessary expense*, which are supported out of the profits of labor, or some other productive fund. Houses of this description are not, therefore, the most eligible objects of public revenue. If the tax were imposed by a uniform rule, its operation would not be materially different from an equal capitation: if imposed according to the value of the building, it would be very unequal, in respect to the revenue of individuals, and would, moreover, tend to discourage durable improvements.

Such houses, however, as exceed in value the average of those occupied by farmers and laborers, may be regarded as among the most suitable objects of taxation. Perhaps there is no single criterion by which the comparative expenses of individuals can be so fairly estimated as by their dwellings. The assessment of a tax upon certain descriptions of houses only, unless restrained by legal provisions, might, however, be attended with difficulties arising from the danger of prejudice and partiality on a subject where no sense of a common interest would operate to prevent abuses.

As a security against oppression, it is proposed that the law should declare, that houses, with the lots upon which they are erected, not exceeding two acres in any case, and not exceeding a certain value, to be defined in respect to each State, shall be wholly exempted.

It is further proposed, that all houses and lots, exceeding in value the description to be exempted, should be distributed into three classes, with reference to their value, to be taxed uniformly in each class, at specific rates, to be prescribed by law.

By this mode, all uncertainty in the assessment, except that of determining the class in which a house ought to be placed, would be obviated, and this, in respect to so small a number as four classes, would not be very considerable.

The Secretary is not possessed of sufficient information to be enabled to suggest limitations of value, by which it may be proper to define the proposed classes. This defect, it is presumed, can be readily supplied by the representatives of the respective States.

7th. Taxes on slaves.

It has been remarked that taxes on slaves are of a nature essentially different from capitation taxes on freemen, with which they are sometimes confounded. Among the strong circumstances of discrimination which confirm this position, it is barely necessary to mention that slaves are generally incapable of performing any other than the most simple operations of agricultural labor; that they exercise no volition or choice respecting the nature of their employments; and that their condition is neither depressed nor ameliorated by the operation of taxes, which fall invariably on their proprietors, in the same manner as taxes on the stock and produce of farms.

The circumstances alluded to, considered in connexion with the uncertainty and expense which repeated assessments would occasion, afford sufficient arguments to justify an exemption of slaves from taxation, were it not that they contribute very considerably to increase the quotas of several of the States. To exempt a species of property which enhances the proportions of several States, and thus to relieve one class of landed proprietors at the immediate expense of another, does not appear to be equitable. On this ground, such a tax on slaves as may be sufficient to correct what would otherwise be an inequality, appears to be advisable.

The Secretary is not sufficiently informed, to be able to express an opinion respecting a suitable rule of assessment; it is important, however, that the rule should be uniform, even though it should, on that account, be rendered somewhat unequal.

It does not appear expedient that the proposed direct tax should be extended to any other objects than have been mentioned. These are as follow:

1st. Lands, which it is proposed should be taxed *ad valorem*, but under limitations, to be prescribed by law, in respect to the estimated value of uninclosed and unimproved lands, in districts to be defined.

2d. Houses *exceeding in value those most generally occupied by farmers and laborers*; which are proposed to be distributed, in each of the States, into three classes, with reference to their value; to be taxed uniformly in each class, at specific rates, to be prescribed by law.

3d. Slaves in general, or of such descriptions as shall be determined by law, to be taxed at one uniform rate.

The particular exposition which has been given of the laws of the respective States, will, it is presumed, supersede the necessity of detailing, at length, a plan of assessment and collection. If it shall be determined to adopt the systems of the States, in respect to *objects of taxation*, there can remain but little doubt of the expediency of adopting their *modes of collection*. In this case, nothing more can, with safety, be attempted, than to re-enact the State laws, with suitable provisions for the appointment of officers, for defining their powers and duties, and securing their responsibility to the United States. To this general observation the following exceptions, however, occur:

1st. It will be necessary, either to apportion the quotas of counties, in the States of New York and Pennsylvania, by a conjectural estimate, or to provide for new valuations or assessments, by which to ascertain the said quotas.

2d. Instead of prescribing by law the specific rates at which different articles shall be taxed, as has been usual in the States southward of Pennsylvania and Delaware, it will, in respect to the said States, be necessary to vest a power for determining the proportional rates of each description of taxable articles, as soon as the quantities thereof shall have been ascertained, by assessing officers. The necessity of vesting such a power, arises from the impossi-

bility of otherwise determining what rates of taxation would be necessary, in order to produce the sums which may be apportioned.

3d. If it shall not be seasonably ascertained that the State of Tennessee has established some general rule of taxation, it will be necessary that suitable provision be made for assessing and collecting the sum which may be apportioned to that State.

If, on the other hand, it shall be determined to establish a *uniform mode of taxation for the United States*, it is conceived that an eligible plan of assessment can be easily extracted from the acts of New Hampshire, Massachusetts, Pennsylvania, Delaware, Maryland, and Virginia, of which a summary has already been given.

The principal objects to be attained are,

1st. *An impartial estimate of the relative value of the different tracts of land in each State.*

2d. *A correct register of the quantities of taxable lands in each collection district.*

The result being an ascertainment of *quantities and value*, would afford all the data necessary to ensure a faithful collection.

It is in respect to the *value of lands only*, that any real difficulties could arise; disputes with respect to the *quantity* being susceptible of certain adjustment.

No more eligible mode occurs, for obtaining a correct valuation and register of taxable lands, than by the appointment of commissioners for each State, with the power of appointing a suitable number of assessors, and of requiring a disclosure of the quantities of lands possessed by individuals.

As the constitution has established a rule of apportionment, there appears to be no necessity that the principles of valuation should be uniform in all the States. It is certain that the records and documents which are known to be attainable, would exceedingly facilitate the adoption of principles, for determining the relative value of lands in different districts of the same State. A provision for correcting errors in individual assessments, by some tribunal superior to the assessors, will be necessary.

The assessments on houses and on slaves, may, in like manner, be under the direction of commissioners in the first instance; but, as these objects are of a temporary and variable nature, it will be proper that the accounts should be kept distinct from those of lands.

The assessment of the proposed tax will necessarily be attended, in the first instance, with considerable difficulty and expense; the experience of the States proves, however, that the measure is by no means impracticable. It is certain that a rule of taxation for lands, at once uniform, and at least as equitable as the systems of the several States, may be established. If the necessity of repeated assessments for every tax can be avoided, the expenses of collection, after the first year, may probably be reduced to one-half of the sum estimated as the average defalcations incident to the State revenues.

The superintendence of the proposed tax, after the first valuations and assessments have been made, may be committed to the supervisors and inspectors of the existing internal revenues, under the direction of the treasury. The collection districts may be of the same extent as those already established in the respective States.

It is proposed that competent salaries should be established for the supervisors and inspectors, with suitable allowances for the hire of clerks. The compensations of collectors may be a certain per centage on the sums which they receive, except that, when moneys are collected by distress, it will be advisable to authorize the collection of fees and mileage from delinquents. An authority to demand a suitable fee for recording transfers and distributions of assessments on lands, appears to be a proper mode of compensating the persons entrusted with that service.

The power of appointing collectors, under suitable conditions for securing their accountability, may be committed to the supervisors; that of controlling the accounts of assessment, and regulating the distribution of taxes, in consequence of the alienation of property, may be entrusted to the inspectors of surveys and their deputies.

All which is respectfully submitted.

OLIVER WOLCOTT, Jr. *Secretary of the Treasury.*

TREASURY DEPARTMENT, December 13, 1796,

[DOCUMENTS REFERRED TO IN THE PRECEDING REPORT.]

A.

A return of the taxable property in the State of New Hampshire.

Counties.	Polls from 18 to 70 years of age.	LAND.				Horses.	Oxen.	Cows.	HORSES AND CATTLE.

Total of the annual expense of the Commonwealth of Massachusetts, -			\$145,530 98

D.
Rhode Island.

85 Estimate or valuation of the ratable estates in Rhode Island, taken in conformity to an act passed in June, 1767, and reported to the General Assembly in 1769, and then established as the rule for apportioning taxes in the several towns.

Estimate or valuation of the ratable estates in the several towns on the main, in the State of Rhode Island, taken in pursuance of an act passed in October, 1778, and established as a rule of taxation in November, 1780; also, of the ratable estates in the insular towns of Newport county, established in October, 1783.

Estimate or valuation of the ratable estates in the several towns in the State of Rhode Island, taken in pursuance of an act passed in June, 1795, and reported by the committee of ten, to the General Assembly, in June, 1796, and then established as the rule to ascertain the quotas of the said towns, respectively, in the assessment of taxes.

SINKING FUND.

COMMUNICATED TO THE SENATE, DECEMBER 16, 1796, AND JANUARY 26, 1797.

The Commissioners of the Sinking Fund respectfully report to Congress as follow:

That the purchases of the debt of the United States, as stated in their report of the eighteenth of December, 1795, amount to two millions three hundred and seven thousand six hundred sixty-one dollars and seventy-one cents, for which there have been paid in specie, one million six hundred eighteen thousand nine hundred thirty-six dollars and four cents, as will more particularly appear from the document marked A.

That, subsequent to their said report of the eighteenth of December, 1795, and in pursuance of the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," the commissioners of the sinking fund have caused the sum of five hundred forty-four thousand and sixty-six dollars and fifty-four cents to be applied towards the redemption of the six per cent. stock bearing a present interest, as will appear from the document marked B.

That there is, at this time, in the hands of the Treasurer of the United States, as their agent, the sum of sixty-seven thousand and twenty-five dollars and sixty-three cents, arising from dividends since the first of April last, on stock heretofore purchased and redeemed, and the sum of ten thousand two hundred and seventy-four dollars and thirty-eight cents, arising from payments into the treasury on account of debts due to the United States prior to their present constitution; which sums, with the dividends to be made at the close of the present year, and other funds appropriated by law, will be applied, on the first day of January ensuing, to a further reimbursement of the six per cent. stock, bearing a present interest, agreeably to the directions of the act in that case made and provided.

In pursuance of the first section of the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," a loan of five hundred thousand dollars was authorized by a resolution of the Board, passed on the twenty-eighth of December, 1795, approved by the President of the United States, which has been obtained of the Bank of the United States.

The measures adopted in pursuance of the act, entitled "An act making provision for the payment of certain debts of the United States," passed in the last session of Congress, being in a train for execution, and not completed, will be communicated in a future report.

December 16th, 1796.

On behalf of the Board.

JOHN ADAMS.

A.

Statement of the Purchases of Public Stock by the Agents to the Trustees named in the Act for the Reduction of the Public Debt.

	Six per cent stock.		Three per cent. stock.		Deferred stock.		Amount of the several species of stock.	Moneys expended in purchasing debt.	
	Proper.	Assumed.	Proper.	Assumed.	Proper.	Assumed.			
Total amount of stock purchased by the agents to the trustees, as per report to the House of Representatives, dated 21st November, 1795,	\$684,349 11	\$223,467 53	\$415,415 66	\$96,444 97	\$766,409 65	\$121,574 79	\$2,307,661 71	\$1,618,936 04	
<p>I do hereby certify, that the trustees named in the acts for the reduction of the public debt, have credit on the books of the several stocks at the Treasury of the United States, in the sums above stated, in the several columns of six per cent., three per cent., and deferred stock, proper and assumed; and the amount thereof, being public debt, extinguished by their purchases, is two millions three hundred and seven thousand six hundred and sixty-one dollars and seventy-one cents, for which the sum of one million six hundred and eighteen thousand nine hundred and thirty-six dollars and four cents, in specie, was paid from the public treasury, from the following funds, viz:</p>									
Surplus duties to the end of the year 1790,	\$957,770 65	amount purchased therewith,	326,500 13	112,515 99	348,498 40	52,574 50	588,791 54	42,995 32	1,471,875 88
Loan of \$2,000,000,	434,901 89	amount purchased therewith,	275,554 36	78,050 59	27,843 47	3,888 47	98,474 72	39,113 94	522,925 55

TREASURY DEPARTMENT, REGISTER'S OFFICE, November 30, 1796.

JOSEPH NOURSE, Register.

B.

Statement of the application of moneys drawn from the appropriations made by the acts of the 8th May, 1792, and 3d March, 1795, for the reduction of the 6 per cent. stock, bearing a present interest.

Moneys drawn by the agent to the trustees for the redemption of the public debt, pursuant to the act of the 8th May, 1792, for interest on the stock transferred to the United States, according to Auditor's statement, No. 7847, dated 21st April, 1796, - - - - -	\$94,261 93
Moneys drawn from the proceeds of duties on imports and tonnage, and on stills, and spirits distilled in the United States, pursuant to act of 3d March, 1795, - - - - -	449,804 61
Total amount applied in the payment of the first year's reimbursement of the 6 per cent. stock, } bearing a present interest,	} <u>\$544,066 54</u>

TREASURY DEPARTMENT, *Register's Office, November 30, 1796.*

JOSEPH NOURSE, *Register.*

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That, in pursuance of the powers committed to them by the act, entitled "An act making provision for the payment of certain debts of the United States," passed in the last session of Congress, they have authorized sales of a part of the capital stock of the Bank of the United States, belonging to the United States, the proceeds of which have been applied to discharge certain debts, according to law.

The particulars and amount of the said sales, and the measures authorized by the Board, for the execution of their trust, so far as the same have been completed, are represented in the report of the Secretary of the Treasury, dated the 24th instant, and in the proceedings of the accounting officers therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

JOHN ADAMS, *on behalf of the Board.*

January 25th, 1797.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund:

That, in pursuance of the act, entitled "An act making provision for the payment of certain debts of the United States," passed on the 31st day of May, 1796, and a resolution of the Board, passed on the 5th day of August last, he has caused two thousand one hundred and sixty shares of the capital stock of the Bank of the United States, belonging to the United States, to be sold, on a credit of sixty days, without interest, at the rate of five hundred dollars, or twenty-five per centum advance on the original capital.

The proceeds of the said sales, amounting to one million and eighty thousand dollars, have been received and placed in the treasury of the United States, as appears by the accounting officers of the treasury, herewith transmitted, shewing the dates and particulars of the said sales.

As the proceeds of the said sales were destined to reimburse a part of the debt due to the Bank of the United States, it was agreed with the bank that the moneys should be applied to the credit of the United States from the dates of the respective payments.

In addition to the proceeds of the said bank stock, the Secretary has obtained the sum of one hundred and twenty thousand dollars, on the credit of the six per cent. stock, authorized to be constituted by the act before mentioned, and has, moreover, taken eventual measures for reimbursing the debt due to the Bank of New York. When these measures shall have been executed and adjusted, they will be reported to the Board.

The fund of twelve hundred thousand dollars, obtained as above mentioned, has been applied to discharge the following debts due to the Bank of the United States, viz:

To the payment of the instalments due on a loan of 400,000 dollars, obtained pursuant to the act, entitled "An act for raising a further sum of money for the protection of the frontiers, and for other purposes," passed on the 2d day of May, 1792, - - - - -	\$300,000 00
To the payment of part of an instalment of a loan, obtained pursuant to an act authorizing a loan of two millions, passed on the 18th of December, 1794, - - - - -	300,000 00
To the payment of two instalments of the subscription loan for bank stock due on the last days of December, 1795, and 1796, - - - - -	400,000 00
To the payment of the first instalment of the loan of 800,000 dollars, obtained pursuant to an act passed on the 21st of February, 1795, - - - - -	200,000 00
Amounting, as above mentioned, to - - - - -	<u>\$1,200,000 00</u>

All which is respectfully submitted by

OLIVER WOLCOTT, Jr. *Secretary of the Treasury.*

TREASURY DEPARTMENT, *January 24th, 1797.*

No. 8,513.

TREASURY DEPARTMENT, *Auditor's Office, January 5, 1797.*

I have examined an account between the United States and the President, Directors, and Company, of the Bank of the United States, agents for the sale of bank stock, and find that they stand chargeable on said account as follows, viz:

To proceeds of two thousand one hundred and sixty shares of the capital stock of said bank, belonging to the United States, sold pursuant to instructions from the Secretary of the Treasury, founded on "An act making provision for the payments of certain debts of the United States," passed on the 31st May, 1796, amounting, per statement and account sales herewith, to - - - - -

\$1,080,000

I also find that the said President, Directors, and Company, are entitled to the following credit on said account:

By warrants, in favor of the Treasurer, for amount of warrant No. 206, on them, dated December 31, 1796, for - - - - -

\$1,080,000

The statement and vouchers, on which this report is founded, are herewith transmitted, for the decision of the Comptroller of the Treasury thereon.

R. HARRISON, *Auditor.*

To JOHN STEELE, Esq. *Comptroller of the Treasury.*

TREASURY DEPARTMENT, *Comptroller's Office, January 7, 1797.*

Admitted and certified.

DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 16, 1796.

TREASURY DEPARTMENT, *December 16, 1796.*

SIR:

In obedience to a resolution of the House of Representatives, passed on the 1st day of June, 1796, I have the honor to transmit a statement exhibiting the amount of drawbacks paid upon the dutiable articles exported from the United States, in the years 1793, 1794, and 1795, compared with the receipts of duties on similar articles during the same period.

I have the honor to be, with perfect respect, sir, your most obedient servant,

OLIVER WOLCOTT, Jr. *Secretary of the Treasury.*

The Honorable the SPEAKER *of the House of Representatives.*

A Statement exhibiting the amount of Drawbacks paid on the sundry dutiable articles exported from the United States, in the years 1793, 1794, and 1795, compared with the amount of Duties collected on the same, respectively.

NOTE TO THE PRECEDING TABLE.

To the amount of drawbacks paid in the year 1795, per this statement,	-	\$2,890,334 40
Must be added this sum, being drawbacks paid in Newburyport, by the present collector, on merchandise exported previous to his appointment, the particulars of which have not been received at the treasury,	-	8,731 39
Amount of drawbacks and debentures paid in the year 1795, per printed statement,	-	<u>2,898,765 79</u>

It is also to be observed, that, in some instances, the amount of duties received on particular articles, appear less than the drawbacks paid within the same period: this arises from exportations of merchandise imported in preceding years.

[2d SESSION.]

MINT.

COMMUNICATED TO THE SENATE, DECEMBER 20, 1796.

DEPARTMENT OF STATE, *December 19th, 1796.*

SIR:

By the direction of the President of the United States, I have the honor to enclose a report of the Director of the mint, suggesting the expediency of some alterations in its establishment, to render it less expensive to the public, and more accommodating to depositors. The report is accompanied with statements of the gold, silver, and copper coins issued from the mint from its commencement to the 24th of the last month; accounts of the gold and silver bullion which has been deposited; and an account of wastage and a deficit in the silver coinage, which require an appropriation of two thousand eight hundred and twenty dollars and seventy-one cents, to reimburse depositors.

I am, with great respect, &c.

TIMOTHY PICKERING.

The PRESIDENT of the Senate of the United States.

MINT OF THE UNITED STATES, *November 29, 1796.*

SIR:

I have the honor of enclosing, for the President of the United States, my annual report on the state of the mint, with the abstracts referred to therein.

With sentiments of esteem and respect, &c.

ELIAS BOUDINOT.

To the Secretary of State.

The Director of the mint of the United States respectfully reports to the President of the United States, on the state of the mint—

That, during the experience of twelve months, he has turned his attention (as far as has been in his power) to the institution under his care. He has seen, with regret, an opinion generally prevailing, that the establishment is unnecessarily expensive, and less productive than was rationally expected by its advocates and friends.

The Director, finding some foundation for the charge, has endeavored to discover the cause, as nothing appears, in the general nature of the institution, to warrant the idea.

The issue of the inquiry is, that the extraordinary expenses attending the mint are, in a great measure, owing to its original plan, and the principles on which it was established. Among others, the whole coinage, including the refinement of the precious metals, was directed by law to be executed at the public expense, the depositor being fully indemnified from all charges whatever. On this principle, not only the original cost of the works, and the salaries of the stated officers, fall on the public, but also the whole amount of the workmanship, with the alloy, wastage, and contingent losses.

The want of experimental knowledge in the business of the first establishment of the mint, prevented any tolerably precise estimate of the expenses necessarily attending the process; but, soon after the commencement of the business, it was found impracticable to proceed with propriety, unless an addition was made to the establishment, by the appointment of a melter and refiner.

This important and necessary officer is not known in foreign mints, as the precious metals are there generally deposited of the proper standard, or above it; or they are purchased by the mint, and become public property; there being professional refiners independent of the mints, whose business it is to purify metals under standard; but there being no such artists in this city, who follow the business, it became indispensably necessary to execute this service in the mint.

This circumstance was not foreseen, or, if foreseen, was considered as included in the duties of the assayer; but the necessity of so essential a check on that officer forbade this measure, had it been otherwise practicable. This added, considerably, to the annual expenses of the mint.

Formerly, the Director could not make any charge for this process against depositors; the whole expense, therefore, fell on the public. Thus, on assaying one deposit of about 96,000 oz. of silver bullion, it turned out near 24,000 oz. under standard; to refine which, it cost the United States upwards of £500; so that the depositor really gained that sum, by bringing his bullion to the mint. This operated very unequally among depositors. The citizen who brought bullion in this debased state to the mint, received as much coin for the standard silver therein, as he whose bullion was previously refined equal to the standard, and ready for coining at a very trifling expense.

Again, the institution of the mint, without any appropriation of capital, either to purchase the precious metals in bullion, anticipate payments due on deposits, or to coin for the public, has been another cause of very considerable expense. Depending upon depositors alone for the precious metals, it became necessary, for their encouragement and satisfaction, to coin every deposit, as soon as possible after it came into the treasury of the mint, to prevent its remaining unproductive to the depositor, by which means the clippings and grains were obliged to be melted and coined as they arose, often three or four times for one deposit.

Thus, the melting, refining, and coining a deposite of 200 oz. of silver, or 20 oz. of gold, would cost the public nearly as much as 1,000 oz. of either, and a much greater proportional wastage; whereas, could the bullion be purchased for the public at the market price, and kept in the vaults till a large quantity might be coined at once, or a capital of about ten thousand dollars be allowed to the mint, so as to anticipate the payments to depositors, without being obliged to an immediate coinage on every occasion, a very great public saving would take place, not only as to the wastage, but in the expenditure of the materials and labor used in the process, and no injury done to the United States, but in the loan of the money for a short time. In a word, the difference would be much the same as between the wholesale merchant and the huckster.

This measure would also have a tendency to fix the price of bullion, and indemnify the public for some part of the expense of coinage. The only question that would arise, is, whether, on the principles of political economy, it would be a prudent measure on the part of Government? Suppose the expenses of coinage, including wastage, to be fixed at three per centum to the depositor, while in foreign countries it costs nothing; the consequence would be, that bullion, in America, might vary its price three per cent. according to the balance of trade, while bullion, in those countries, must be supposed invariable in its price, let the balance of trade stand as it will. Bullion, then, in those countries, will always be at the highest price it ever can be at in America, since it is the price of coin; but in America it may be three per cent. lower. If, therefore, the United States, by coining free of all expense, contribute to keep the price of bullion higher than it is in countries where the coinage is paid for, a voluntary expense is created, of which there can be no just reason to complain.

A representation of some of these difficulties, with the dangerous situation of the mint, for want of protecting laws to secure the instruments of coinage, the metals, and the coin, as also to prevent counterfeits, has been heretofore made by the officers of the mint, with but little other success, than a resolution of Congress, enabling the Director to retain the expense of refining the precious metals under standard; but the wastage, alloy, and coinage, are still dead charges on the public treasury.

While, therefore, this policy, on the whole, is considered as beneficial to the United States, the complaints against the mint, for its heavy expenses to the public, are without solid foundation; as it is impossible to carry on an institution of this nature, under these circumstances, and which requires from fifteen to twenty workmen and laborers to attend it, without great expense. Add to this, that the alloy of silver and copper, with the loss by necessary wastage, must unavoidably rise to a considerable annual amount.

But, notwithstanding these and other difficulties attending an infant institution, especially the late great advance in the prices of materials and labor, the aggregate expenses of the mint are greatly reduced, either from the superior knowledge of the persons employed, gained by experience, or from new arrangements, found to be more advantageous than those made on the spur of the occasion. This will appear more evident, by a review of the progressive deduction of the contingent expenses in the quarterly accounts rendered in to the Treasury Department, and it is hoped that there will be a further progress in this desirable economy.

When the present Director entered upon the administration of the mint, there was no appropriation of money for the purchase of copper for the coinage of cents. This, he clearly foresaw, would prove a source of further expense, by often leaving the workmen without employ. He made application to Congress, by their committee, on this subject, but all that was obtained was thirteen thousand dollars, which was coined into cents, and returned into the public treasury, or remitted for the purchase of copper, before the rising of Congress, the last spring. No further appropriation was made, till it was too late to procure the necessary importation of copper for the summer's coinage, whereby much time has been lost, and some considerable expense of workmen has been added to the summer's account.

It is now hoped, from the present arrangement, no such inconvenience will arise hereafter, but a continual and ample supply of copper coinage be produced, adequate to the public wants.

As the laws relative to the mint now stand, the officers are obliged to pay to each depositor the coins arising from his deposite, in strict order, and to reserve three pieces of coin from each mass; yet no appropriation has been made to replace the reserves, or to make good the wastage. It is, therefore, impossible for the officers of the mint to comply with the law, and the depositors complain of being kept out of their property till provision is made by Congress for their relief.

By a number of new half johannes brought to the mint for assaying, said to have been coined in the United States, it appears that a coinage for that purpose is carried on in some State in the Union. Some of these are found to be under standard in their quality, and between two and three pennyweights less than their true weight. These are facts which the Director thinks it his duty to communicate to the President.

From the various experiments made since the establishment of the mint, it is found unnecessary to make use of silver in alloying of gold, unless it is for the purpose of beautifying the coin, in which case it should be composed at the proportion of one third silver to two thirds copper.

By the following abstracts of the bullion and coin received and issued from the mint, since its first establishment, may be seen, as well the nature of the deposites made, as the coins returned to the treasury, and the dates of the receipts and issues to this day, with the amount of the copper coinage.

From this, it appears that there is due for wastage, during that period, the quantity of fifteen hundred and ninety-nine ounces, sixteen pennyweights, and fifteen grains of silver, equal to eighteen hundred and forty-five dollars ninety-five cents and five mills. Besides a deficit of eight hundred and forty-four ounces, seventeen pennyweights, and five grains of silver, equal to nine hundred and seventy-four dollars seventy-five cents and five mills; making, in the whole, two thousand eight hundred and twenty dollars and seventy-one cents, for which an appropriation ought to be made by law, to satisfy a deficient deposite.

The Director thinks it necessary to mention, in exculpation of the former officers of the mint, that, by a report made on this subject, it appears that there is yet a considerable quantity of old pots and test bottoms, from which it is expected that nearly the amount of the deficient silver, as stated above, will be extracted.

ELIAS BOUDINOT.

MINT OF THE UNITED STATES, TREASURER'S OFFICE, NOVEMBER 24, 1796.

NICHOLAS WAY:

4th CONGRESS.]

No. 104.

[2d Session.]

DEBTS DUE FROM STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 26, 1796.

Mr. WILLIAM SMITH, from the Committee of Ways and Means, to whom was referred to report whether any, and, if any, what, measures ought to be taken relative to the balances found by commissioners for settling accounts between the United States and the individual States, to be due from certain States to the United States, made the following report:

That no application having yet been made to the several debtor States for the payment of the said balances, it appears proper that such application should be forthwith made, accompanied with a statement of interest on the sums respectively due from the said States, calculated on the same principles by which interest has been allowed and paid by the United States, on the correspondent sums by said commissioners found *due to*, certain States, to the intent that the said debtor States may make provision for paying the sums so found due from them, with interest, respectively, into the treasury of the United States, as soon as may be.

And that, as the United States have paid and allowed the said correspondent sums, with interest from the last day of December, 1789, to the 1st day of January, 1795, at four per cent. per annum, in certain proportions of six, three per cent., and deferred stock, provision ought to be made for allowing payment of the said balances, with interest to the 1st day of January, 1795, from the said last day of December, 1789, in like proportions of the said stock; the Committee, therefore, submit the following resolutions:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States be requested to give information to the several States who were, by the commissioners appointed to settle accounts between the United States and the individual States, found indebted to the United States, of the several sums in which they were so found indebted, accompanying such information with a statement of interest from the last day of December, 1789, to the 1st day of January, 1797, calculated on the same principles on which interest has been allowed and paid on the correspondent sums for which the United States were found, by the said commissioners, indebted to certain States; and with an earnest request that they will cause provision to be made, as speedily as may be, for paying the said sums, respectively, for which they were found indebted by the said commissioners, with interest, into the treasury of the United States.

Resolved, That payment of the said sums, respectively, found due from the said States, may be received in any of the six, three per cent. stock, or deferred stock of the United States, in the same proportions as the United States have paid and allowed for the correspondent sums in which they were found indebted to certain States, by the report of the said commissioners.

The Debts due from the debtor States, by the report of Commissioners, with interest at four per cent. per annum, from the 1st January, 1790, to the 1st January, 1797, are as follow:

STATES.	Principal due by debtor States.	Interest to 1st January, 1797.	Total.
New York, - - - - -	\$2,074,846	\$580,956 88	\$2,655,802 88

4th CONGRESS.]

No. 105.

[2d SESSION.

REMISSION OF FORFEITURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 27, 1796.

Mr. SWANWICK, from the Committee on Commerce and Manufactures, to whom were referred the petitions of Charles White, of David Scudder, of Eleazer Scudder, of Aaron Sheffield, of Legaré, Theus and Prioleau, and of Samuel Berrien, made the following report:

Charles White states, that he was owner of the schooner Neptune, commanded by Joseph Hughes, who arrived in this port about the twenty-ninth of May last, from Miraguane in Hispaniola; that the captain of the said vessel embezzled a part of the cargo, and run the same, with intent to defraud the revenue of the duties thereon; in consequence whereof, the said schooner was seized and condemned for a breach of the revenue laws. The said Charles White alleges, that he was ignorant of the fraud intended by the captain; that he gave intelligence of it to the revenue officers; and prays for relief in the premises.

Your committee observe, that, independently of the danger of any encroachment on the principle, which makes owners responsible for the conduct of their captains, it appears that Peter Ozeas, one of the revenue officers, had received some information of the ruining of the goods in question, before any intelligence thereof was received from Mr. White, in consequence whereof, the said Ozeas claims a part in the forfeiture aforesaid.

The committee are, therefore, of opinion, that no relief could, in this case, be granted, without establishing a principle highly dangerous to the faithful collection of the revenues in future; and, therefore, recommend to the House the following resolution:

Resolved, That the prayer of the petition of Charles White cannot be granted.

David Scudder states, that he was owner of the schooner Polly, employed out of the Commonwealth of Massachusetts, on the fishing business; that, before her sailing, it was agreed between the owner, master, and fishermen, for their several shares in the said voyage; but that, it not having been expressed in the agreement that each man should receive his share of the nett proceeds of the said voyage, in proportion to the number of fish he might obtain, the collector of the port of Barnstable refused allowing the bounty granted in such cases; he further states, that he hath paid the crew, notwithstanding, for the voyage and fish caught, as intended by the act, and prays relief in the premises.

Your committee are of opinion that, in all cases where bounties are allowed by law, the parties claiming the same ought strictly to comply with the forms required by the act; any omission whereof may lead to serious inconveniences and injurious precedents; wherefore, your committee recommend to the House the following resolution:

Resolved, That the prayer of the petition of David Scudder cannot be granted.

Eleazer Scudder, stating a similar case, with respect to the schooner Dolphin, your committee equally recommend the following resolution.

Resolved, That the prayer of the petition of Eleazer Scudder cannot be granted.

Aaron Sheffield states, that he was owner and master of the brig Rising Sun, with which he sailed from Newport, in Rhode Island, for Teneriffe, on the eighth day of February, 1795; that, being at that island, he sold to Mr. Sarmiento, who is stated to have been a citizen of the United States, and a partner in the house of Messieurs Sarmiento, Silva, and Wardlow, of New York, the whole of the said brig; that he did not recollect the condition of the bond he had signed, on his return, to deliver up the register to the custom house of the district; in consequence whereof, he hath been sued on the said bond, and execution is now issuable against him, for twelve hundred dollars penalty. He states that the brig has always been held by citizens of the United States, and hath since returned, with the register in question, to New York. On all which considerations, he prays relief from the penalty and costs of suit.

Your committee are of opinion that, as the sale of the register with the vessel, at Teneriffe, probably influenced considerably on her value; and it would be an alarming precedent to encourage captains, in foreign ports, to dispose of their registers, on pretext that they did not recollect the bond they had signed, in case of the sale of the vessel, to return it, your committee, therefore, recommend to the House to adopt the following resolution:

Resolved, That the prayer of the petition of Aaron Sheffield cannot be granted.

Legaré, Theus and Prioleau, of Charleston, South Carolina, state that they were owners of the ship General Washington, whereof Isaac Bigland was master; that, on her voyage from Ostend to Charleston, in the year 1791, some of the crew, without the knowledge of the captain, concealed and secreted, among the ballast, a few kegs of gin, some of which were landed, contrary to the laws of the revenue of the United States, without being reported by the master, who was, in consequence, sued for the penalty of five hundred dollars; in that case provided, for which the petitioners became bail or sureties. That application was made to the Secretary of the Treasury of the United States for relief in the premises, who refused to grant it; that the said Bigland is since removed from the State, and not expected soon to return, wherefore the petitioners claim the interference of Congress.

Your committee are of opinion that it is of great importance to the revenue that the masters of ships should be held to be vigilant over any shipments made by their crews, and to prevent the revenue being, thence, defrauded; and that the House ought not to interfere, where a decision hath been already against the remission of the forfeiture, except in very particular cases, which this does not appear to be; therefore, your committee recommend the following resolution:

Resolved, That the prayer of the petition of Messrs. Legaré, Theus, and Prioleau, cannot be granted.

Samuel Berrien and others, masters of certain coasting vessels, in the State of New York, state that they obtained licences as coasters, from the collector of the district of New York, which they were obliged, by law, to surrender, within three days after the expiration of the time for which they were granted, or to forfeit the sum of fifty dollars, and their vessel subject to alien duties, &c. That their licences being expired at a time when an epidemic fever raged at New York, which made it dangerous for them to apply, or at a season of the year when it was inconvenient or impossible, they request relief in the premises.

Your committee being of opinion that sufficient power is vested, in this case, by the act of mitigations, to afford the prayed for relief, it is not necessary for this House to interfere; wherefore, they recommend the following resolution to be adopted by the House.

Resolved, That the prayer of the petition of Samuel Berrien and others, masters of coasting vessels in the State of New York, cannot be granted.

4th CONGRESS.]

No. 106.

[2d SESSION.]

PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 29, 1796.

The Secretary of the Treasury, in obedience to a resolution of the House of Representatives, passed on the first day of June, 1796, respectfully reports:

1st. That the foreign and domestic debts of the United States, including the assumed debt, and the balances due to creditor States, as adjusted and funded, exclusive of the specie debts of the late Government, paid at the treasury, under the present Government, amounted, on the 1st day of January, 1790, as will more particularly appear from the statement A, to \$75,414,427 97.

2d. That the same debts amounted, on the 1st of January, 1791, as will appear from the statement marked B, to \$77,361,428 70.

3d. That the debts incurred by the late Government, and paid at the treasury, under the present Government, prior to the 1st day of January, 1796, amounted, as per statement C, to \$502,465 32.

4th. That the moneys paid in the treasury from the commencement of the present Government to December 31st, 1795, for balances found due on accounts which originated under the late Government, amounted, as per statement D, to \$30,163 98.

5th. And, therefore, that the entire debt of the United States, on the 1st day of January, 1791, including the assumed debt and the balances due to creditor States, as the same have been settled and funded, exclusive of the sum last mentioned, amounted to \$77,833,730 04.

6th. That the anticipations, or temporary loans, obtained by the present Government, including the proceeds of foreign loans transferred to the treasury, or applied to the payment of interest in Europe, and a loan had of the Bank of the United States, for an equal sum of the capital stock of the said bank, at the close of each year, from the year 1791 to the year 1795, inclusive, amounted, as will appear from the statement E, to the following sums, viz:

Balances remaining to be applied to replace the foreign fund.

At the close of the year 1791,	-	-	-	-	-	-	\$886,709 98
At the close of the year 1792,	-	-	-	-	-	-	1,675,308 65
At the close of the year 1793,	-	-	-	-	-	-	1,257,503 58
At the close of the year 1794,	-	-	-	-	-	-	644,167 60
At the close of the year 1795,	-	-	-	-	-	-	192,879 32

Balances of domestic loans remaining unpaid.

At the close of the year 1792,	-	-	-	-	-	-	2,556,595 56
At the close of the year 1793,	-	-	-	-	-	-	2,400,000
At the close of the year 1794,	-	-	-	-	-	-	4,500,000
At the close of the year 1795,	-	-	-	-	-	-	6,200,000

7th. That the funded and unfunded debts of the United States, including the sums purchased, redeemed, and vested in the sinking fund, the instalment of six per cent. stock reimbursed on the last day of December, 1795, and the domestic loans above mentioned, amounted, on the 1st day of January, 1796, as will appear from the statement marked F, to \$85,065,423 22.

8th. That the following sums of debt were extinguished by the operation of the sinking fund, at the close of the year 1795, as will appear from the statement G:

By the appropriation of the surplus duties to the end of the year 1790,	-	-	-	-	-	-	\$1,471,875 88
By the appropriation of moneys borrowed in Europe, pursuant to the act of August 12, 1790,	-	-	-	-	-	-	522,925 55
By the appropriation of the interest fund, constituted by the act of May 8th, 1792,	-	-	-	-	-	-	312,860 28
By payments into the treasury and transfers to the United States, under the act of the 8th May, 1792,	-	-	-	-	-	-	402,507 18

Amounting, in the whole, to \$2,710,168 89

9th. That the instalment of six per cent. stock reimbursed on the last day of December, 1795, amounted to \$544,066 55.

10th. That the stock of the Bank of the United States, held by the United States, on the last day of December, 1795, valued at par, amounted to \$2,000,000.

11th. That there remained to be received, on account of bonds for duties on imports, which had accrued and were uncollected on the last day of December, 1795, after deducting drawbacks and expenses of collection, calculated on a moderate estimate, as will appear from the statement H, the sum of \$4,000,000.

12th. That the debts purchased, redeemed, and reimbursed, including the stock of the Bank of the United States, held by the United States, and bonds remaining uncollected on the last day of December, 1795, amounted to \$9,254,235 43.

The amount of the foreign debt is stated, in the documents herewith transmitted, at one hundred and thirty-nine thousand dollars more than in a report made by the Secretary on the 13th day of December instant; this is occasioned by certain premiums being herein considered as part of the *capital debt*, which, in the report alluded to, are considered as a part of the *annual charge*; the different views taken of the same subject, do not, however, vary the results which have been given.

All which is respectfully submitted.

OLIVER WOLCOTT, Jr. *Secretary of the Treasury.*

December 28th, 1796.

A.

A Statement of the foreign and domestic debts of the United States, including the assumed debt, on the 1st January, 1790.

To Benjamin Hopkins, and other commissioners for treating with the Southern Indians, for a balance due to them under an act of Congress of 15th March, 1785, page 56, . . .	2,787 88	
To William Perry, one of the said commissioners, for his salary under the said act of the 15th March, 1785, page 56, . . .	299	
To Richard Howes, administrator to Elisha Caesar, deceased, late a boy on board the frigate Alliance, for said boy's proportion of prizes captured by the squadron under the command of John Paul Jones, page 56, . . .	36 25	
Arnold Wells, for a balance due on a bill of exchange in his favor, drawn by William Thompson, William Irvine, Christian Greene, and others, dated Quebec, August 5th, 1776, on Meredith & Clymer, . . .	594 50	
Thomas Harwood, agent for the late Maryland line, for the purpose of enabling him to discharge a balance of pay due to the non-commissioned officers and privates of said line, . . .	10,085 51	
	134,723 53	
The following payments were made in the year 1793, and appear in the annual accounts rendered for that year:		
Towards discharging debts contracted by Colonel Timothy Pickering, late Quartermaster General, page 46, . . .	2,675 56	
For satisfying a debt contracted by Abraham Skinner, late Commissary General of prisoners, . . .	46 42	
In discharging of a claim of Robert Fenner, agent for settling the accounts of North Carolina line, being the amount of his commission on sundry payments made by him to the officers of the late North Carolina line, in the years 1782 and 1783, page 58, . . .	169 05	
In discharge of a claim of Christopher Green, by his legal representatives, for principal and interest on moneys advanced to certain citizens of the United States, prisoners of war at Quebec, in the year 1776, page 59, . . .	401 96	
Paid the trustees of the public grammar school at Wilmington, in the State of Delaware, being for rent and for damages done to the same by the troops of the United States during the last war, page 59, . . .	2,553 64	

In discharge of bills of exchange drawn on the late commissioners for payment of interest due on loan office certificates,	196	
	6,042 63	
To which add, for the purpose of bills of exchange amounting to 100,000 current guilders remitted to W. & J. Willink, N. & J. Van Staphorst, & Hubbard, of Amsterdam, for the purpose of paying interest on the Dutch loans, per page 52, of the printed accounts for the year 1791,	35,087 71	41,130 34
The following payments were made in the year 1794, and appear in the annual accounts rendered for that year:		
For satisfying certain debts contracted by Colonel Timothy Pickering, late Quartermaster General, page 63,	162 45	
For paying bills of exchange drawn on the late commissioners at Paris, in discharge of interest due on loan office certificates, page 74,	36	
Paid James M'Ghan, late boy on board the frigate Alliance, for his proportion of prizes captured by the squadron under the command of John Paul Jones, in the North sea, page 76,	35 14	
To John White, late midshipman on board the frigate Bon Homme Richard, for his proportion of the prizes captured by the squadron under the command of John Paul Jones, in the North seas, page 76,	22 77	256 36
In the printed accounts for the year 1795, the following expenditures will appear, viz:		
For satisfying certain debts contracted by Colonel Timothy Pickering, late Quartermaster General,	61 59	
To Rumford and Abijah Dawes, attorneys for Edward Rutledge and Catharine Green, executors of the late General Nathaniel Green, for this sum, stated by the Auditor, on May 14, 1793, to be due to said Green,	27,504 15	
To Lieutenant Colonel Tousard, being so much granted him by an act of Congress of the 30th April, 1794, as an equivalent and in full discharge of his pension of \$360 for life,	3,600	
Paid Joseph Stretch, administrator to the estate of Joseph Wright, deceased, for said Wright's modelling a likeness and cutting two dies for a model of Henry Lee, Esq. in conformity to a resolution of Congress of the 24th September, 1779,	233 33	
To Peter Covenhoven, late sergeant in the militia, being the amount of compensation allowed him for certain costs attending the cure of a wound he received in an action near fort Schuyler, during the late war, per act of the 6th January, 1795,	408 26	
To F. W. Ast, by John Barely, his agent, for salary and rent of a room at L'Orient, allowed him for his services as a clerk employed by Thomas Barclay, late commissioner of accounts in France, to assist in arranging and stating the foreign accounts,	426 67	32,234
		\$502,465 32

TREASURY DEPARTMENT, *Register's Office*, 30th September, 1796.

JOSEPH NOURSE, *Register*.

D.

A General Statement of moneys paid into the Treasury of the United States, from the commencement of the present Government to the 31st December, 1795, being the balances found due on accounts which originated under the late Government.

In the printed accounts stated from the records of the treasury, commencing with the present Government and ending the 31st December, 1791, the following payments are stated, as per page 7:		
From Nathaniel Gilman, late receiver of continental taxes for the State of New Hampshire,	\$3,325 70	
From James Blanchard, paymaster to the second regiment of Hew Hampshire,	394 10

H.

An estimate of the sums expected to be received from the bonds which accrued from duties on imports, to the close of the year 1795, after deducting the drawback and expenses of collection.

The estimated amount thereof is four million of dollars, \$4,000,000

4th CONGRESS.]

No. 107.

[2d SESSION.]

ADDITIONAL REVENUES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 3, 1797.

Mr. WILLIAM SMITH made the following report:

The Committee of Ways and Means having taken into consideration the subject of further revenues, and the report of the Secretary of the Treasury thereon, recommend to the House the following resolution:

Resolved, That there ought to be apportioned, according to the last census, on the several States, the sum of _____, to be raised by the following direct tax, viz:
 A tax ad valorem, under proper regulations and exceptions, on all lands, with their improvements, including town lots, with the buildings thereon.
 A tax on slaves, with certain exceptions.

Mr. WILLIAM SMITH made the following report:

The Committee of Ways and Means having taken into consideration the provisions requisite for improving and more effectually securing the collection of the internal revenues, recommend to the House the following resolution:

Resolved, That it will be expedient to abolish the tax laid on spirits distilled from materials of the growth or produce of the United States, at any other place than a city, town, or village, or at any distillery in a city, town, or village, at which there shall be one or more stills, which, singly, if only one, or together, if more than one, shall be of less capacity than four hundred gallons; and to collect this branch of the revenue from a tax on the capacity of the stills.

4th CONGRESS.]

No. 108.

[2d SESSION.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 9, 1797.

Mr. SWANWICK, from the committee on Commerce and Manufactures, to whom were referred the petitions of Jacob Broom, of Robert Dawson, of William Crowley Jordan, of John Nicholson, and of sundry manufacturers of hats in the States of Massachusetts, New Jersey, Pennsylvania, Delaware, Maryland, and Virginia, made the following report:

Jacob Broom states, that he is proprietor of a cotton mill, erected on Brandywine Creek, for encouragement whereof, and of cotton manufactures in general, he prays the duty existing on raw cotton may be repealed, and an additional one imposed on cotton goods imported into the United States.

Your committee are of opinion that it is not expedient to repeal the duty on foreign cottons, as it operates to encourage the growth of that article in the United States; and that, as a duty of twelve and a half per cent, *ad valorem*, already exists on the importation of cotton goods, they think this sufficient for all purposes of fair competition; they, therefore, recommend to the House to adopt the following resolution:

Resolved, That the prayer of the petitioner cannot be granted.

Robert Dawson states, that he is a manufacturer of bolting cloths, at Wilmington, in Delaware, in which article, raw silk is a component part; that he has succeeded to make bolting cloths of better quality than those imported, and asks a repeal of the duties on raw silk, for his better encouragement.

Your committee are of opinion that the superiority of the workmanship of this manufacture will sufficiently recommend his article, without the proposed repeal, which could only tend to embarrass the revenue system: wherefore they recommend to the House to adopt the following resolution:

Resolved, that the prayer of the petitioner cannot be granted.

William Crowley Jordan states, that he is a silk manufacturer, desirous of establishing himself in the United States, provided Congress could, for his encouragement, afford him an addition to his capital.

Your committee are of opinion, that the finances of the country are not, at present, such as to render advances of the kind, expedient, did not even the high price of labor equally discourage undertakings of this kind, at present: wherefore, your committee recommend to the House to adopt the following resolution:

Resolved, that the prayer of the petitioner cannot be granted.

John Nicholson, and the proprietors of the glass manufactory of Boston, state, that, to encourage this branch of manufacture, additional duties on the importation of glass are requisite.

Your committee are of opinion that the high price of labor forms a greater obstacle, at present, than the defect of the system of duties, to the prosperity of manufactures, in general, and this is an evil which only time can cure.

They, therefore, recommend to the House the following resolution:

Resolved, That the prayer of the petitioners cannot be granted.

Sundry manufacturers of hats, in the United States, state, that their manufactures suffer, by the duties on hats imported not being sufficiently high to encourage their establishment.

Your committee are of opinion, that, in this case, as in the last stated, the high price of labor forms the chief obstacle, and that it is not expedient to make any alterations in the existing duties.

Wherefore, they recommend to the House to adopt the following resolution:

Resolved, That the prayer of the petitioners cannot be granted.

4th CONGRESS.]

No. 109.

[2d SESSION.]

ADDITIONAL REVENUES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 23, 1797.

IN THE HOUSE OF REPRESENTATIVES OF THE UNITED STATES,

Thursday, the 10th of January, 1797.

Resolved, That the Committee of Ways and Means be instructed to inquire into the propriety and expediency of laying a tax upon all theatrical exhibitions, and, also, to inquire whether any, and, if any, what, articles of foreign growth or manufacture, imported into the United States, or articles manufactured or used within the United States, will allow of an additional duty to be laid upon them, and to report thereon.

Mr. WILLIAM SMITH made the following report:

The Committee of Ways and Means having taken into consideration the resolution of the House of the 10th instant, and a letter of the Secretary of the Treasury on the subject therein contained, are of opinion—

That the only articles on which it will be expedient to impose an additional impost duty, are the following, viz: *brown sugar, bohea tea, and cotton goods*, not printed, stained, or colored: They accordingly submit the following resolutions:

Resolved, That there be paid an additional duty of one half cent per pound on brown sugar, imported into the United States.

Resolved, That there be laid an additional duty of two cents per pound on all bohea teas, imported into the United States:

Resolved, That there be laid an additional duty of two and a half per cent. ad valorem, on all cotton goods, not printed, stained, or colored, imported into the United States.

TREASURY DEPARTMENT, January 19th, 1797.

SIR:

I have now the honor to communicate my opinion upon the subject referred to the Committee of Ways and Means, by the resolution of the House of Representatives of the 10th of January, 1797.

If it shall be determined to increase the duties on importations, the following appear to be the most safe and productive objects of revenue:

1st. *Salt.*

The existing duty is twelve cents upon each bushel of fifty-six pounds, and is much lower than what is imposed in many countries. There is no article of which the consumption is more uniform, nor of which an evasion of the duties would be more difficult; the natural value being inconsiderable, the importation requires and employs but little capital. Owing to the bulky nature of most of our articles of export, compared with those imported, and to the use of salt in lieu of ballast, it is introduced with a moderate charge for freight. All these circumstances render salt a fit object of revenue. As illicit importations are not to be apprehended, the extent to which the duty is to be carried, can be best determined by the committee. One cent on each fifty-six pounds of salt, will produce nearly thirty thousand dollars.

It will, however, be proper to re-adjust the bounties on the exportation of salted fish and provisions, and the allowances to vessels employed in the cod fisheries, to any augmentation of the duties on this article.

2d. *Brown Sugar.*

The duties on sugars will hereafter require revision; the rates now imposed, are as follow: On brown sugar, one and one half cent per pound; clayed sugar, three and one half cents; lump sugar and refined, other than loaf sugar, six and one half cents; loaf refined sugar, nine cents. The duties are already so high, that most of the sugars, other than brown, which are imported, are also exported; the revenue is not, therefore, benefitted by the importations. On the contrary, the public are exposed to the risk of collection, and are responsible for the drawback. Illicit importations cannot be easily practised in respect to so bulky an article as sugar, and it is not likely that they have been practised, except in a small degree, with respect to loaf refined sugar, the duty on which appears to be more than necessary to protect the business of domestic refiners.

To induce the consumption of any considerable quantities of clayed sugars, a reduction of the duty is necessary; and it is probable, that some reduction would be favorable to the interest of the refiners. On this point, my information is, however, too imperfect to justify a positive opinion.

The present duty on brown sugar is less, in proportion to the value of the article, than that on most other West India productions. The average importations of brown sugar into the United States, during the years 1790, 1791, and 1792, were about twenty-two millions of pounds weight; which, therefore, may be considered as the quantity usually consumed in this country in each year. Since 1792, the quantities imported have been increasing. In the term of a year, prior to October 1st, 1795, the quantity imported exceeded sixty millions of pounds weight. During the greater part of the year 1796, sugar and coffee were the most beneficial, and, in point of value, equal to any articles exported from the United States; considering the great quantities of these articles which have been imported, exceeding what were required for domestic consumption, their prices must have been determined by the state of foreign demand. These prices cannot, therefore, be stationary, and their vibrations have a tendency to embarrass commerce. These circumstances, and the risk to which the revenue is exposed on the importation, and also on the exportation of these articles, strongly admonish against excessive duties, and even dissuade from the imposition of such a duty as, under other circumstances might be safe and proper; nevertheless, an additional duty of one half cent per pound on brown sugar, appears to be as eligible as any which can be suggested.

3d. *Teas.*

The duties are, at present, as follows: On bohea tea, ten cents per pound; on souchong, and other black teas, eighteen cents; on hyson, imperial, gunpowder, or Gomee tea, forty cents; and on other green teas, twenty-four cents. It has been stated, as the opinion of the Treasury, that the revenue would be probably benefitted by a reduction of the higher, and an increase of the lower rates of duty. An addition of two cents per pound to the duty on bohea tea, may be expected to produce twenty-five or thirty thousand dollars.

4th. *Cotton Manufactures, not printed, stained, or colored.*

These are in very general use, and are commonly imported in valuable vessels, and by established merchants; they are, for the most part, bulky in proportion to their value, and, with velvets and velverets, are subject only to the duty of ten per centum ad valorem. It may possibly be safe to place these articles in the class of merchandise subject to the duty of twelve and a half per centum ad valorem; but in this case, it is conceived that adequate provision ought to be made for the protection of the business of printing cotton goods, which has been commenced in this country.

A variety of modifications of the existing duties might be proposed; but as their principal object would be the improvement of the system of collection, by means of a new classification of the articles, without intending, thereby, to produce any considerable augmentation of the revenue, they are at this time omitted. Materials for a report on this subject are preparing, but it cannot be completed during the present session.

With respect to a general augmentation of the duties on imports, I conceive it to be my duty to observe, that the average rate already imposed, exceeds sixteen per centum *ad valorem*; that the last advance of the duties was made at a time when the commerce of the United States was far from being in a natural state; that the temptations to illicit trade will increase in proportion to any reduction of the general rate of mercantile profit; and that a considerable reduction of this general rate is to be expected, whenever the present war in Europe shall terminate. On these grounds, I conclude that present experience affords no certain data for an opinion respecting the permanent operation of the existing duties.

The domestic manufactures best established, are those of leather, iron, flax, potters' wares, including bricks, ardent spirits, malt liquors, cider, paper of all kinds, hats, stuff and silk shoes, refined sugars, spermaceti and tallow candles, copper, brass, and tin wares, carriages, cabinet wares, snuff, gunpowder, and salt.

I have the honor to be, with perfect respect, sir, your most obedient servant,

OLIVER WOLCOTT, *Secretary of the Treasury.*

The Hon. WILLIAM SMITH, Esq.
Chairman of the Committee of Ways and Means.

4th CONGRESS.]

No. 110.

[2d SESSION.]

REDUCTION OF DUTIES ON COCOA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 8, 1797.

Mr. SWANWICK, from the Committee on Commerce and Manufactures, to whom was referred a memorial of sundry manufacturers of chocolate, made the following report:

That the petitioners complain of a hardship under which their manufactory labors, in consequence of the high duty laid on cocoa, which is the chief article in the composition of chocolate, and for the drawback of which, on the exportation of the chocolate, no provision is made.

The committee conceive that it would be impracticable to provide a regulation for allowing a drawback of the duty paid on cocoa, upon the exportation of it, in chocolate, without exposing the revenue to great danger of fraud and imposition.

The duty on this article, first laid by an act of the fourteenth of July, 1789, was at the rate of one cent per pound. By an act of the tenth of August, 1790, when that on many other articles was altered, it was continued at the same rate. By an act of the second of May, 1792, two cents were laid on cocoa, in lieu of one; and, by an act of the 7th of June, 1794, the duty was raised to four cents a pound.

The committee are of opinion that as much revenue was received from the article, while at two cents, as has been derived from it since the duty was raised to four; the increased duty having operated, if not to discourage the importation, to produce this effect, by causing an export of it before manufactured; and that the manufactory has, in consequence, been unreasonably oppressed, without benefit to the public revenue.

The committee are aware that objections might arise to a proposition of repealing the additional duty, on the ground of its being, among others, pledged and appropriated to certain purposes, not yet effected by the act of March 3d, 1795; yet, presuming that the House of Representatives have it in contemplation to lay some further impost duties, at the present session, which might be deemed a substitute for this, they recommend that the House adopt the following resolution:

Resolved, That the additional duty of two cents per pound, on cocoa, laid by the act of June 7th, 1794, ought to be repealed, from and after the — day of — next.

No. 111.

[2d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 13, 1797.

Mr. HAVENS made the following report:

The Committee to whom it was referred to examine and report their opinion on the report of the Director of the Mint, communicated to the House by the Secretary of State, and suggesting the expediency of some alterations in its establishment, to render it less expensive to the public, and more accommodating to depositors, report:

That, by the act for the establishment of the mint, which was passed in April, 1792, no provision was made for purchasing gold and silver bullion, in behalf of the public, and replacing the capital that might be employed for that purpose, by the coins that might be produced from it, excepting that, in one case, it was provided that it should be optional for the depositors and the director of the mint to exchange coins of the United States for standard bullion, with a deduction of one half per cent. from the weight of the pure gold and silver that might be contained in the bullion, as an indemnification to the public for the loss that would be sustained by advancing the money for the time that would be necessarily required for coining it, and the Secretary of the Treasury was authorized to make the necessary advances for this purpose, whenever the state of the treasury would admit of it; but the great and continual demands upon the treasury for disbursements on other accounts, and the loss that would arise to the public by the delay that would frequently take place in coining, may be fairly assigned as the reasons why this provision in the law has never produced any effect, similar to that of purchasing bullion at its market price, and coining it in behalf of the public. It appears, however, by this act for regulating foreign coins, which was passed in February, 1793, that it was then intended to give some further employment to the mint, in coining the precious metals, than had before been provided for, at the time of its first establishment: for, this act provides that, at the expiration of three years next ensuing, the time when the coinage of gold and silver should commence at the mint, agreeably to the act for its establishment, which time should be announced by the proclamation of the President of the United

States, all foreign gold and silver coins, excepting Spanish milled dollars, and parts of such dollars, should cease to be a legal tender; and that, whenever any such coins should be received in payment for moneys due to the United States, after the said time, they should be coined anew, previously to their being issued in circulation. But as no such proclamation has ever been issued by the President, this provision in the law cannot be contemplated as giving any additional employment to the mint; the consequence, therefore, has been, that the mint, since its establishment, has had no other employment in coining the precious metals, than what has been occasionally given to it by individuals who have made deposits of bullion; which has, generally, been much below the standard, and has, therefore, required the slow process of melting and refining, before it could be coined; and as the business of melting and refining was not the employment of any private persons in this country, as is the case in foreign countries, it became necessary, soon after the establishment of the mint, to provide by law, that this business should be carried on there; which, at first, was done altogether at the public expense, until, by an act which was passed in the last session, it was provided that this should be a charge upon the depositors. The act for the establishment of the mint having made no positive provision for an immediate advancement of money, on the part of the public, to the depositors of bullion, according to the value of their respective deposits, it became necessary to provide, in the same act, in order to do equal justice to each depositor, that their respective deposits should be coined as speedily as possible, and that payment should be made in coins of the United States, in the order in which each deposit had been made; and the consequence has been, that it has frequently happened that the mint has been under the necessity of proceeding to coin a very small deposit, greatly to the disadvantage of the public, because the expense would be nearly the same in coining a small, as in coining a large quantity of bullion; and the law being positive, that each depositor shall be paid in strict order, the consequence has been, that the whole of the value of all the pieces, that are, by the same act, to be reserved from each mass of gold and silver, for examination, at the end of the year, will fall upon the last depositor, who must remain unpaid until the end of the year. These inconveniences have, however, been, in some degree, obviated, of late, by obtaining anticipations of the value of deposits, from the Bank of the United States, or from individuals. It further appears, by the same act for regulating foreign coins, that all the foreign gold and silver coins that usually pass current in the United States, are made a legal tender for the payment of debts; which must operate so as to prevent, rather than to induce the holders of them to bring them to the mint, for the purpose of receiving the stamp of the coins of the United States. From this review of the laws relative to the mint, the committee are, therefore, of opinion, that, unless a capital, to a moderate amount, can be provided from the treasury of the United States, to be employed in purchasing gold and silver bullion, and foreign coin, now in circulation, for the purpose of coining it anew, in behalf of the public, the mint will continue to be an expensive establishment, without being productive of any great public advantage, excepting what may be supposed to be derived from the coinage of copper, which, as it has been stated to the committee, produces some small profit to the public; the value of the cents and half cents, being somewhat more than the cost of the copper, and the expense of importation.

The Director has stated in his report, that there is due to the mint, for unavoidable wastage, which has arisen in coining the precious metals, the sum of 1,845 dollars 95 cents and 5 mills; and the further sum of 974 dollars 75 cents and 5 mills, for a deficiency which has arisen in consequence of the mismanagement of a former assayer; by which a quantity of silver became mixed with a quantity of ashes and broken crucibles, and a great part of which, it is expected, may be recovered: for these two sums, it will be necessary to make appropriations. With respect to the contingent expenses of the mint, for the present year, it will be sufficient only to observe, that they cannot be estimated at a less rate than what they have been stated at, in the estimate of the Secretary of the Treasury, for the present year. The committee would, therefore, recommend the following resolutions:

Resolved, That a sum, not exceeding _____ dollars, ought to be appropriated for the purpose of purchasing gold and silver bullion, and the foreign coin now in circulation, at its market price, or according to its real value; and that the bullion and coin so to be purchased, ought to be coined at the mint, and the moneys thence arising, to be continually placed in the treasury of the United States.

Resolved, That the further sum of 2,820 dollars and 71 cents ought to be appropriated to make good a deficiency that has arisen from wastage in coining gold and silver, since the commencement of the coinage of those metals at the mint; and to make good a further deficiency which has arisen by the loss of a quantity of silver.

4th CONGRESS.]

No. 112.

[2d SESSION.]

DRAWBACK AND REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 23, 1797.

Mr. SWANWICK, from the Committee on Commerce and Manufactures, to whom were referred the memorials and petitions of Pierre Joseph Flamend, in behalf of Louis le Guen; of North and Vesey, merchants, of Charleston, South Carolina; of the manufacturers of soap and candles, in Boston, New York, Philadelphia, and Baltimore; of the manufacturers of cordage, in Massachusetts, Rhode Island, and New York; and of Stephen Addington, callico printer, in Germantown, made the following reports:

[PIERRE JOSEPH FLAMEND.]

That the petitioner states that, on the sixteenth of September, 1795, William Macarty, Esquire, the consul of the United States, at the Isle of France, there shipped on board the brigantine Mary, Captain Robertson, of Philadelphia, twelve casks of indigo, consigned to George Latimer, Esquire, of Philadelphia, owner of the said brigantine, who was desired to deliver the same to the bearer of the shipper's order. That the said indigo arrived here in January, 1796, was duly entered at the custom house, and the duties paid by George Latimer, Esquire, who stored the same, waiting for orders to whom to deliver the same. That these orders were delayed, by accident of the sea, from arriving, till the last fortnight, when Louis le Guen received the same, and applied for the indigo to Mr. Latimer, who delivered the same, and confirms, on oath, all the facts above stated, as far as respect him; but, by the delay of the arrival of the letters of advice, and bills of lading, the time hath elapsed, in which the indigo might be exported and be entitled to drawback; wherefore, the petitioner prays for an extension of time, to export the said indigo, with the usual allowance of drawback on exportation. Your committee are of opinion that, as the loss of time arose only by the distance of the Isle of France, and accidents to letters, and not by any fault in the petitioner; and as there is no probability of any precedents of this kind frequently occurring, they think it but just and reasonable the prayer of the petitioner should be granted; and therefore recommend to the House to come to the following resolution:

Resolved, That a committee be appointed to bring in a bill in pursuance of the prayer of the petitioner.

[NORTH AND VESEY.]

That the petitioners state that they were agents for the French privateer Leo, Captain Hermand; that the said privateer sent into the port of Charleston, an English prize ship, called the Amity, with a cargo consisting of sugar

and rum, which was duly entered in the custom house, on the seventh of April, 1795; that they proceeded, on the twelfth of the same month, to the sale of the cargo, when they were prohibited from selling by a libel, issued from the court of admiralty; that, on the twenty-first of the same month, an injunction was granted by the district court to stop the sale altogether, as contrary to the treaty concluded with Great Britain; that the said ship *Amity* being in a very leaky condition, they obtained permission from the collector to land the cargo; that, by a survey afterwards held on the ship, she was condemned as not sea worthy; in consequence, application was made to the custom house, for leave to re-export the cargo, in neutral bottoms, as French property, which was at first refused, but afterwards granted; but that, in the mean time, by the fire which laid waste a great part of Charleston, the thirteenth of June last, fifty-two hogsheads and two tierces of sugar were totally consumed; whereupon, the collector ordered the rum part of the cargo of the ship *Amity* to be sold, to secure the duties on the sugars thus consumed by fire. The petitioners pray for relief, by a restoration of the duties thus collected from them.

Your committee are of opinion that this case must be considered as one for which no provision had been made by law, but as analogous to that of wreck; that the cargo was supposed to be landed only in consequence of the alleged disability of the ship; and that, as no sale of the cargo could be made within the United States, no duties ever could have been collected from it; so that the destruction of the sugar, by fire, not having altered the original ground on which they were suffered to be landed, to-wit: merely *in transitu*, until the ship could be repaired, or the goods re-exported, the duties ought to be refunded; whereupon, your committee recommend to the House to adopt the following resolution:

Resolved, That a committee be appointed to bring in a bill to grant relief to the petitioners, according to the prayer of their petition.

[MANUFACTURERS OF SOAP AND CANDLES.]

That the manufacturers of soap and candles complain, that they are under a disadvantage in preparing these articles for a foreign market, when they make use of imported tallow, on the account that no drawback is allowed on the exportation of the *manufacture*, of the duty paid on the importation of the *tallow*; while soap and candles, imported into the United States, may be exported with the benefit of the drawback.

Three modes only have occurred to the committee, by which the complaints of the memorialists might be removed:

1st. Taking off the duty on the importation of tallow.

2d. Refusing to allow a drawback on the exportation of imported soap and candles.

3d. Allowing a drawback of the duties paid on the importation of tallow, upon the exportation of the same in soap and candles.

As to the first mode, it is to be remarked, that this article is among the list of those which pay the lowest rate of duty, and although, on general principles, the importation of raw materials for manufactures, ought to be encouraged, that a small proportion only of this article, used in the manufactures of the United States, is imported, and the duty on the importation may be considered as answering a valuable purpose, by way of encouragement to the domestic production, which is rapidly increasing, and will *probably* be *soon* adequate to the full supply of the demand of the United States.

As to the second mode, no argument in its favor occurs to the committee, but the interest of the memorialists; and adopting it, would be a direct contradiction of all the principles in which the drawback system is established.

The third mode would appear to the committee reasonable and expedient, but for the extreme difficulty which would attend the establishing a system by which the drawback might be fairly ascertained.

They conceive, however, that none could be devised which would not be attended with such difficulty, and liability to fraud, in its execution, as to render it wholly inadmissible.

The present high price of labor, in the United States, is a circumstance that bears hard on our manufacturers, where they come in competition with those of foreign countries; yet, should it be deemed advisable to Congress, to yield them further protection and encouragement, it would seem prudent to omit it till a period when the price of labor was reduced to what might be supposed more nearly its natural state. The committee are of opinion that the prayer of this memorial ought not to be granted.

[MANUFACTURERS OF CORDAGE.]

The manufacturers of cordage complain of a similar hardship, under which their manufactory labors; as most of the objections occurring to the committee, against the interference of Congress on the memorial of the manufacturers of soap and candles, apply to this subject, the committee, taking leave to refer the House to their report on *that* memorial, submit it as their opinion that the prayer of *this* memorial ought not to be granted.

[STEPHEN ADDINGTON.]

Stephen Addington, callico printer, complains of a similar difficulty from foreign competition with his manufactory. The committee, taking leave to refer to their aforesaid report on the soap and candle manufactory, submit it as their opinion that the prayer of this memorial ought not to be granted.

4th CONGRESS.]

No. 113.

[2d SESSION.]

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 24, 1797.

Mr. SWANWICK, from the Committee of Commerce and Manufactures, to whom was referred the petition of John Brown, partner of the late house of Brown and Francis, made the following report:

That the said John Brown, as one of the partners of the late house of Brown and Francis, represents, that they exported, in the year 1791, from the port of Providence, to the East Indies, eight casks and seven hundred and sixteen cases of foreign Geneva, and three thousand nine hundred and fifty-four empty case bottles, on which a duty, to the amount of four hundred and twenty-six dollars and sixty-four cents had been secured on importation. That the said export was made with the precautions required by law, for articles on which the drawback of duty is claimed; and that the said Geneva and bottles were afterwards sold in the East Indies, as was also the vessel in which the export was made; and that the captain soon after died there, without furnishing the certificates and oaths required by law, to entitle exporters to the drawback; but that this petitioner has other sufficient proof of the actual sale and delivery, in the East-Indies, of the said Geneva and bottles.

The committee observe that, by an act passed in June, 1794, provision is made in all cases similar to the foregoing, respecting merchandise exported since the first day of July, 1792, and thereby, the Comptroller of the Treasury may direct the payment of a drawback, where, in failure of the proof required by law, other satisfactory proof can be produced. And your committee, being of opinion that Mr. Brown's case, though not in point of time with that provision, is, in equity, entitled to the same relief, beg leave to recommend this resolve:

Resolved, That provision ought to be made by law, for the relief of John Brown, and to entitle him to a drawback of duties paid, on certain gin and bottles, exported in the year 1791, by the house of Brown and Francis, on proof, to the satisfaction of the Comptroller of the Treasury, that the same were delivered without the limits of the United States.

4th CONGRESS.]

No. 114.

[2d SESSION.

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 24, 1797.

Mr. HARPER, from the Committee to whom were referred the following resolutions, viz:

"Resolved, That the Secretary of the Treasury be directed to lay before Congress, annually, until the year one thousand seven hundred and ninety-eight, a statement of the amount of duties and drawbacks for each year, from 1792, inclusive; and, after the year one thousand seven hundred and ninety-eight, similar annual statements, each to include, respectively, the six years immediately preceding the year in which it is made."

"Resolved, That, in the statements required by the foregoing resolution, the amount of duties and drawbacks, after the present year, on each of the enumerated articles, paying a rate of duty ad valorem, and also, on woollens, shall be separately stated; that woollens shall be distinguished into three classes; and that the said amount, on all unenumerated articles, paying such a rate of duty, (woollens excepted) shall be comprised in one item, containing, however, an enumeration of the articles of which that item may be composed."

Made the following report:

That the second of the said resolutions, if carried into effect, would be attended with considerable expense; and might also be liable to difficulty and embarrassment, in keeping the accounts in the custom house books. It is also probable, that, by the new classification of dutiable articles, contemplated by former resolutions of this House, and a report which is now preparing at the treasury, the objects of this resolution may be more conveniently obtained; they therefore are of opinion that it would be inexpedient to adopt the said resolution at present.

As to the first resolution referred to the committee, they conceive that it is proper in itself, but ought not to be extended to so great a number of years. A series of three years will, in their opinion, answer every valuable purpose. They do not think it advisable to include the year 1792, because the duties have been so much altered, since that time, that no very certain inference can be drawn from their amount then, as to the present or future operation of the revenue laws.

They therefore recommend that the said first resolution be altered so as to read as follows, and then be adopted, namely:

Resolved, That the Secretary of the Treasury be directed to lay before Congress, annually, a statement of the amount of duties and drawbacks on the several articles imported into the United States, and re-exported therefrom, each to include the three years, respectively, immediately preceding that year in which it shall be made.

[2d SESSION.

REMISSION OF TONNAGE DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 1, 1797.

Mr. SWANWICK, from the Committee on Commerce and Manufactures, to whom was referred the petition of James O'Brien and James Aylward, made the following report:

That the petitioners, with their families, in two small schooners, fled from Newfoundland, in October last, on the occasion of the attack of that island by the French, and, under conduct of a vessel belonging to Plymouth, took refuge in that port, in November last, in circumstances of extreme poverty and distress; and having no ability to discharge the duties of foreign tonnage, required by law, but by a sale of their vessels, which, under that disability, are of little value within the United States: wherefore, the committee recommend,

That provision be made by law, to remit to James O'Brien and James Aylward, distressed mariners, who took refuge in the port of Plymouth, in November last, the duties of tonnage due upon their vessels, namely: the schooner Endeavour, of the burthen of thirty-eight tons; and the schooner Fish Hawk, of the burthen of fifty-two tons.

[2d SESSION.

SINKING FUND.

COMMUNICATED TO THE SENATE, DECEMBER 4, 1797.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their last reports, of the 16th of December, 1796, and 25th of January, 1797, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the 30th of November, 1797, and in the proceedings of the accounting officers therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

On behalf of the Board.

JACOB READ, *President of the Senate, pro tempore.*

December 4th, 1797.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund:

That no purchases of the debt of the United States have been made, since the date of the last report to Congress, on the sixteenth day of December, one thousand seven hundred and ninety-six; and that the sums heretofore purchased amount to two millions three hundred and seven thousand six hundred and sixty-one dollars and seventy-one cents, for which there have been paid, in specie, the sum of one million six hundred and eighteen thousand nine hundred and thirty-six dollars and four cents, as will more particularly appear from the document hereto annexed, marked A.

That, exclusive of certain reimbursements to the Bank of the United States, which were reported to Congress on the 25th day of January, one thousand seven hundred and ninety-seven, the following sums have been applied towards the discharge of the principal debt of the United States, during the present year:

1st.	To the second instalment of the six per cent. stock, bearing a present interest, which, pursuant to the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," passed on the third day of March, one thousand seven hundred and ninety-five, and the act in addition thereto, passed on the twenty-eighth day of April, one thousand seven hundred and ninety-six, became payable on the first day of January, one thousand seven hundred and ninety-seven, the sum of	\$641,674 76
2d.	To the payment of a loan, obtained of the Bank of New York, pursuant to the act, entitled "An act making provision for the payment of certain debts of the United States," passed on the thirty-first day of May, one thousand seven hundred and ninety-six,	320,000 00
3d.	To the payment of part of a loan obtained of the Bank of the United States, pursuant to an act, entitled "An act making further appropriations for the military and naval establishments, and for the support of Government," passed on the third day of March, one thousand seven hundred and ninety-five,	260,000 00
4th.	To the payment of part of a loan had of the Bank of the United States, pursuant to an act, entitled "An act authorizing a loan of two millions of dollars," passed on the eighteenth day of December, one thousand seven hundred and ninety-four,	300,000 00
5th.	To the payment of premiums which fall due in the present year, on the loan of two millions of guilders, obtained in Holland on the ninth day of March, one thousand seven hundred and eighty-four, being two hundred thousand guilders, estimated at forty cents per guilder,	80,000 00
6th.	To the payment of the instalment of one million of guilders in Holland, which fell due the present year, pursuant to a contract, dated June the eleventh, one thousand seven hundred and eighty-two, estimated at forty cents per guilder,	400,000 00
	Amounting, in the whole, to	<u>\$2,001,674 76</u>

The Secretary has not yet received official information that the instalment last mentioned has been actually discharged, but he considers the fact as certain, as it is known that sufficient remittances had reached Amsterdam, and that the commissioners had engaged that the reimbursement should be effected on the first day of September last.

The payments before enumerated have been made out of the following funds:

1st.	The proceeds of six hundred and twenty shares of the capital stock of the Bank of the United States, belonging to the United States, which have been sold, in pursuance of the act, entitled "An act making provision for the payment of certain debts of the United States," the proceeds of which have been placed in the treasury, as appears from the proceedings of the accounting officers, herewith transmitted, marked B, shewing the dates and particulars of the said sales,	\$304,260 00
2d.	The proceeds of eighty thousand dollars of the six per cent. stock, authorized to be constituted by the act before mentioned, which have been sold and placed in the treasury, as will appear by the proceedings of the accounting officers of the treasury, herewith transmitted, marked C, shewing the dates and particulars of the said sales,	70,000 00
3d.	The interest fund, or the sums which accrued upon the stock purchased and vested in the commissioners of the sinking fund, in trust for the United States, as particularly stated in the documents hereto annexed, marked D,	89,159 57
4th.	The fund arising from the payment of debts, which originated prior to the present constitution of the United States, also particularly stated in the document marked D,	10,274 38
5th.	The funds arising from established revenues, and appropriated for the reduction of the debts of the United States, being for the period, and in reference to the objects, contained in this report,	1,527,980 81
	Making, in the whole, a sum equal to the reimbursements before mentioned,	<u>\$2,001,674 76</u>

The growing produce of the interest funds, the receipts for sales of lands in the Northwestern territory, together with the sums received and expected from established revenues, are estimated by the Secretary as sufficient for the reimbursement of two instalments of loans heretofore obtained of the Bank of the United States, which will fall due at the close of the present year, amounting to four hundred thousand dollars, and to the reimbursement of the third instalment of the six per cent. stock, bearing a present interest; a statement of the amount and application of the said funds will be exhibited to the Board with the next report.

All which is most respectfully submitted, by

OLIVER WOLCOTT, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *November 30th, 1797.*

TREASURY DEPARTMENT, Auditor's Office, July 20, 1797.

I have examined an account between the United States and the President, Directors, and Company, of the Bank of the United States, agents for the sale of bank stock, and find that they stand chargeable on said account as follows, viz:

To proceeds of 620 shares of the capital stock of said bank, belonging to the United States, sold pursuant to instructions from the Secretary of the Treasury, founded on "An act making provision for the payment of certain debts of the United States," passed on the 31st May, 1796, amounting, per statement and account sales herewith, to - \$304,260 00

I also find that the said President, Directors, and Company, are entitled to the following credit, viz:

By warrants in favor of the Treasurer, for amount of warrant No. 227, on them, dated June 30, 1797, \$304,260 00

The statement and vouchers, on which this report is founded, are herewith transmitted, for the decision of the Comptroller of the Treasury thereon.

R. HARRISON, Auditor.

5th CONGRESS.]

No. 117.

[2d SESSION.]

FOREIGN COINS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 11, 1797.

Mr. VENABLE, from the Committee to whom it was referred to inquire whether any, and what, alterations were necessary in the law, entitled "An act regulating foreign coins, and for other purposes," made the following report:

That it appears, from the best information they can obtain, that very little of the silver coin of the United States has circulated at any considerable distance from the mint, especially in the interior parts of the country.

That, by the operation of the law, which provided that, at the expiration of three years after the coinage of gold and silver should commence at the mint, all foreign silver coins, except Spanish milled dollars, and the parts of such dollars, should cease to be a legal tender, considerable embarrassments have been produced, and many losses sustained, as a very considerable quantity of foreign silver coins, other than Spanish milled dollars, and the parts of such dollars, was, at that time, in circulation.

Your committee also find, that, by the operation of the said act, all foreign gold coins will cease to be a legal tender, after the thirty-first day of July next; that a great quantity of it is now in circulation, and must necessarily continue so, until that period arrives, as it will be scarcely possible for the mint, on its present establishment, to coin a sufficient quantity to replace it.

Your committee are, therefore, of opinion, that provision ought to be made by law, authorizing and requiring the collectors of the revenue to receive, in discharge of all demands of the United States, foreign silver coins, other than Spanish milled dollars, and the parts of such dollars, at the rates, and under the regulations, by which they were receivable before the fifteenth day of October last; that this regulation should continue for two years, and until the end of the next session of Congress thereafter; and that so much of the said act, as relates to the circulation of foreign gold coins, be suspended for the like time.

[CIRCULAR.]

To the Collectors of the Customs and Supervisors of the Revenue.

TREASURY DEPARTMENT, *November 28th, 1797.*

SIR:

In consequence of the proclamation of the President of the United States, of the 22d of July, 1797, founded on the act of Congress, passed on the ninth day of February, 1793, entitled "An act regulating foreign coins, and for other purposes," all foreign silver coins, except Spanish milled dollars, and parts of such dollars, ceased to be a legal tender for the payment of any debts or demands, after the fifteenth day of October last.

The President and Directors of the Bank of the United States having, however, manifested their consent to receive French crowns, and other foreign silver coins, at the rates at which the same were current, and a legal tender, prior to the time mentioned in the President's proclamation, it has been deemed advisable to permit the said foreign coins to be received in payment of the revenues of the United States, on the terms and conditions prescribed in the act of Congress of February 9th, 1793, before mentioned.

To obviate inconveniences which may attend the negotiation of treasury drafts, the supervisors and collectors are, however, requested to specify, in their weekly returns to this Department, the sums which may, from time to time, remain in their possession, of foreign silver coins, which are not, by law, a tender in payment of debts; they are also requested to give information whether the said coins are, or are not, current, by common consent, to the end that such measures may be adopted, for the collection of the revenue, as circumstances shall be found to require.

I am, with consideration, sir, your obedient servant.

5th CONGRESS.]

No. 118.

[2d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 19, 1797.

The Director of the Mint, in obedience to the order of the House of Representatives of the United States of yesterday, begs leave to report:

The enclosed statements, Nos. 1, 2, 3, and 4, being those required by said order, it is thought prudent to take into the mint no more bullion than may be acted upon in one mass or deposit, when it comes from any of the banks of this city, from whence it can be had in a very short time, when wanted. It is for this reason that other deposits, which are ready to be made by the Bank of the United States, have not been lodged in the mint, but are waiting the completion of the coinage now in hand. The expected deposits from different banks in this city and New York, as far as the Director has been informed, may amount to above three hundred thousand dollars in French crowns. These are expected to be received into the mint by limited deposits, as fast as the prior ones are paid off. When there is a sufficient quantity of bullion to keep one press striking, this will be at the rate of about eighteen or twenty thousand dollars per week. The gold coinage increases in amount in proportion to its additional value.

ELIAS BOUDINOT, *Director.*

MINT OF THE UNITED STATES, *19th December, 1797.*

It should be remembered that the mint was shut up during the prevalence of the yellow fever in the city.

5th CONGRESS.]

No. 119.

[2d SESSION.]

DRAWBACK AND REDUCTION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES ON THE 2D OF JANUARY, 1798.

Mr. LIVINGSTON, from the Committee on Commerce and Manufactures, to whom were referred the petition of Peter Aupoix, and the memorial of William White, made the following reports:

[PETER AUPOIX.]

That he prays the allowance of a drawback upon a quantity of goods exported by him from the United States, at the port of New York, in the month of October, one thousand seven hundred and ninety-five.

On this application, the following facts appeared to the satisfaction of your committee:

That the goods in question were duly entered for re-exportation, in three parcels, and at three different days, at the custom house, in the said port of New York; that the necessary notice was given to the collector, with the description of the goods, and the names of the importers, and the places from whence, and vessels in which, the same were respectively imported; that proof was made by the respective importers, and persons through whose hands the said goods had passed, of the identity of the goods; that the same were regularly inspected by the officers of the revenue, and found to correspond with the description on which a permit was given by the collector, for the lading, which was performed under the superintendence of the officer who inspected the same. But that the exporter's oath of his intention to export the goods, and that he would not re-land them, was omitted in all the entries, and the bond in one of them.

Your committee further find, that the goods were really exported, and the proper certificates produced to prove their being landed in a foreign port.

Your committee also find, that these circumstances were submitted to the comptroller, by the late collector of the port of New York, and that his answer leaves the relief as a matter of discretion to the collector; but that the person now filling that office does not think fit to exercise any discretion on the subject, as the transaction took place in the time of his predecessor.

The committee have also been informed, that, as the time for taking the oath, and giving the bond, is not precisely fixed by law, the collectors of different ports have generally received them after the entry, and that this would, probably, have been done in the case of the petitioner, if he had not sailed in the vessel that carried his goods.

Though your committee are extremely loath to afford relief in cases of non-compliance with the regulations prescribed for the collection of the revenue, yet they think it essential to justice, and the interest of commerce, that such cases of unintentional omissions as can be relieved without opening a door to fraud, ought to be favorably heard. They deem this a case of that nature, and therefore recommend that the following resolution be adopted, to wit:

Resolved, That relief ought to be granted to Pierre Aupoix, according to the prayer of his petition.

[WILLIAM WHITE.]

That the memorialist seeks for a reduction of the duties on certain wines imported by him into the port of Boston, under the denomination of Sherry and San Lucar wines, but which are stated to have been about thirty per cent. below the usual value of wines of those denominations.

Though the fact is made to appear to the committee by the documents accompanying the memorial, yet they think the bad quality of an article which pays a specific duty not ad valorem, is no reason for reducing the duty, and that a contrary doctrine would go to place all the articles paying an enumerated duty, on a level with those paying duties ad valorem, which they presume was not intended by the Legislature.

The committee are therefore of opinion that the prayer of the memorial of the said William White ought not to be granted.

5th CONGRESS.]

No. 120.

[2d SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 8, 1798.

Mr. LIVINGSTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of Nathaniel Cutter, made the following report:

That the petitioner states, that he exported certain merchandise from the port of Boston, which had been imported, and paid duties there, but which were not entitled to an allowance of drawback.

That, after having been captured and recaptured very frequently in the West Indies, by the British and French cruisers, alternately, he, at length, arrived at Dominica, where he found his merchandise was not permitted to be sold, and was obliged to bring the same back with him to the United States, where it has paid duty a second time. It is from this second imposition of duties that he seeks to be relieved.

Your committee, however, cannot find any good reason for relieving him against the consequences of a risk which every exporter ought to calculate for himself.

They are, therefore, of opinion, that the prayer of the petition of Nathaniel Cutter ought not to be granted.

5th CONGRESS.]

No. 121.

[2d SESSION.]

FOREIGN COINS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 11, 1798.

The Secretary of the Treasury, in obedience to the resolution of the House of Representatives, of the 5th instant, respectfully reports:

That, in pursuance of the power vested in the Secretary of the Treasury, by the fourteenth section of the act, entitled "An act establishing a mint, and regulating the coins of the United States," authority was given to the Director of the mint, on the twelfth day of April, 1797, to receive from the President and Directors of the Bank of the United States, any sum not exceeding ten thousand dollars, in foreign gold and silver coins, except Spanish milled dollars and parts of such dollars; and also, on the re-payment of the whole or any part of the said sum, in coins of the United States, not less than three thousand dollars at one time, to receive an additional advance, in the said foreign coins, equal to such re-payment.

The authority aforesaid was given at the request of the Director of the mint, to enable him to pursue the business of coinage without interruption, and to prevent the inconveniences and expenses attending repeated meltings of deposited bullion, which were stated in his report of November 29th, 1796.

With respect to the third section of the act, entitled "An act regulating foreign coins, and for other purposes," the Secretary observes, that the receipts and payments of the treasury are made at the Bank of the United States, and that the revenue in distant ports has been, with very few exceptions, drawn into the treasury by the sale of bills on the collectors. No particular portions of the specie resting in the vaults of the bank have been deemed as the exclusive property of the United States; on the contrary, the sums of specie deposited, have ever been considered as an aggregate fund, in which all the creditors and stockholders of the bank were jointly interested.

This view of the subject has not, however, in the opinion of the Secretary, prevented the execution of the intention of Congress. The Directors of the Bank of the United States have ever been willing to co-operate in promoting the success of the mint establishment, and, on the requisition of the Secretary, would, at any time, have advanced such of the foreign coins in their possession as it might be for the interest of the United States to cause to be recoined. During the years 1795 and 1796, the sums in the bank, of foreign silver, other than Spanish dollars, were, however, very inconsiderable; and of the foreign gold coins in the bank, a very considerable proportion consisted of French and Spanish coins, for which there was a foreign demand, though they could not have been coined without a loss, which must have been borne by the United States. The state and prospects of the treasury, during the years 1795 and 1796, were, moreover, such as to dissuade the Secretary from advances not appearing to be of primary importance.

Since the promulgation of the proclamation of the President of the United States, dated the 22d July, 1797, the quantities of foreign silver coins, other than Spanish dollars, have very considerably increased; and the present prospect is, that, under the operation of existing arrangements, no difficulty will be found in supplying the mint with any sums to the coinage of which it may be found competent.

All which is respectfully submitted.

OLIVER WOLCOTT, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *January 10th, 1798.*

5th CONGRESS.]

No. 122.

[2d SESSION.]

COLLECTION OF DUTIES ON IMPORTS AND TONNAGE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 25, 1798.

The Secretary of the Treasury respectfully reports to the House of Representatives:

That, in obedience to their resolution, passed on the 2d day of February, 1797, he has prepared the system, herewith transmitted, for enabling the House more readily to comprise, in one act, the various laws now in force for regulating the collection of duties on goods, wares, and merchandise, imported in the United States; including, also,

a plan for the establishment of new districts on the rivers Ohio and Mississippi, and on the northern boundary of the United States, as required by the resolution of the 23d of May, 1796.

The proposed system includes or relates to the whole or some part of the following acts of Congress, viz:

An act to provide more effectually for the collection of the duties imposed by law on goods, wares, and merchandise, imported into the United States, and on the tonnage of ships or vessels, passed on the 4th day of August, 1790.

An act making further provision for the payment of the debts of the United States, passed on the 10th of August, 1790.

An act to provide for the unloading of ships or vessels, in cases of obstruction by ice, passed on the 7th of January, 1791.

An act giving effect to the laws of the United States within the State of Vermont, passed on the 2d day of March, 1791.

An act repealing, after the last day of June next, the duties heretofore laid upon distilled spirits, imported from abroad, and laying others in their stead; and, also, upon spirits distilled within the United States, and for appropriating the same, passed on the 3d March, 1791.

An act relative to the six dollar of Denmark, passed on the 3d of March, 1791.

An act making further provision for the collection of the duties by law imposed on teas, and to prolong the term for the payment of duties on wines, passed on the 3d of March, 1791.

An act concerning certain fisheries of the United States, and for the regulation and government of the fishermen employed therein, passed on the 16th of February, 1792.

An act for raising a further sum of money for the protection of the frontiers, and for other purposes therein mentioned, passed on the 2d of May, 1792.

An act concerning the duties on spirits distilled within the United States, passed on the 8th day of May, 1792.

An act regulating foreign coins, and for other purposes, passed on the 9th of February, 1793.

An act for repealing the several impost laws of the United States, so far as they may be deemed to impose a duty on useful beasts imported for breed, passed on the 27th of February, 1793.

An act supplementary to the act, entitled an act to provide more effectually for the collection of the duties imposed by law on goods, wares, and merchandise, imported into the United States, and on the tonnage of ships or vessels, passed on the 2d of March, 1793.

An act for extending the benefit of drawback and terms of credit in certain cases, and for other purposes, passed on the 4th day of June, 1794.

An act making further provision for securing and collecting the duties on foreign and domestic distilled spirits, stills, wines, and teas, passed on the 5th day of June, 1794.

An act laying certain duties upon snuff and refined sugar, passed on the 5th day of June, 1794.

An act laying additional duties on goods, wares, and merchandise, imported into the United States, passed on the 7th day of June, 1794.

An act supplementary to the several acts imposing duties on goods, wares, and merchandise, imported into the United States, passed on the 29th of January, 1795.

An act making further provision in cases of drawbacks, passed on the 29th of January, 1795.

An act relative to the compensations of certain officers employed in the collection of the duties of impost and tonnage, passed on the 14th of February, 1795.

An act supplementary to the act, entitled an act to provide more effectually for the collection of the duties on goods, wares, and merchandise, imported into the United States, and on the tonnage of ships or vessels, passed on the 26th of February, 1795.

An act making further provision relative to the revenue cutters, passed on the 6th of May, 1796.

An act in addition to an act, entitled An act supplementary to the act, entitled An act to provide more effectually for the collection of the duties on goods, wares, and merchandise, imported into the United States, and on the tonnage of ships or vessels, passed on the 27th of May, 1796.

An act relative to the compensations and duties of certain officers employed in the collection of impost and tonnage, passed on the 3d day of March, 1797.

An act for raising a further sum of money by additional duties on certain articles imported, and for other purposes, passed on the 3d of March, 1797.

An act laying additional duty on salt imported into the United States, and for other purposes, passed on the 8th day of July, 1797.

The Secretary observes, that, to obviate inconveniences which have been experienced, he has taken the liberty to introduce the forms of oaths, and of certain official documents necessary to be known or observed by merchants, consignees, and masters of vessels, and which it appears to be expedient to establish by law. Certain other amendments or additions to the laws now in force, which have appeared to be advisable, are written in the italic character, for the purpose of being more readily distinguished and particularly considered by the House.

That part of the resolution of February 2d, 1797, which requires the Secretary to report a tariff of duties, is in a course of execution, and will be transmitted as soon as possible.

All which is respectfully submitted by

OLIVER WOLCOTT, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *January 24th, 1798.*

[NOTE. The plan herein proposed is omitted in this compilation; being the same as the act of the 2d March, 1793, which was based upon this report.]

MILITARY AND NAVAL EXPENDITURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 7, 1798.

The Secretary of the Treasury, in obedience to three resolutions of the House of Representatives, passed on the 3d day of March, 1797, respectfully reports:

That the statement herewith transmitted, marked A, exhibits a general view of the sums advanced from the treasury, for the support of the military establishment, prior to the first day of January, 1797.

That the statement marked B exhibits a view, in detail, of the accounts of the several quartermasters, contractors, agents for the purchase of supplies, and, generally, of all receivers of public moneys, from the first of January, 1791, to the 1st of January, 1797, (the sums advanced to the treasurer for the War Department excepted.) Also, a view of the ultimate application, under various heads of expenditure, of the moneys paid as aforesaid, so far as the accounts thereof had been settled at the treasury, on the 1st day of January, 1797, with a list of the balances which remain to be accounted for on the said day.

That the statement marked C exhibits a view of the sums advanced prior to the 1st of January, 1797, and which then remained to be accounted for by agents for the military establishment, other than those immediately accountable to the Department of War, and the purposes for which the advances were made.

That the statement marked D exhibits a general view of the moneys advanced from the treasury, prior to January, 1797, for erecting and repairing fortifications at several ports and harbors of the United States.

That the statement marked E exhibits, in detail, the sums accounted for by the agents for erecting and repairing fortifications at the ports and harbors aforesaid, prior to the 1st of January, 1797.

That the statement marked F exhibits the balances which remained to be accounted for on the 1st of January, 1797, by the agents for erecting and repairing fortifications at certain ports and harbors of the United States.

That the statement marked G exhibits a summary view of the moneys advanced to the naval agents, and other persons employed in procuring supplies for the naval establishment, prior to the first day of January, 1797.

That the statement marked H exhibits, in detail, the sums accounted for, prior to the 1st of January, 1797, of the sums previously advanced on account of the naval establishment.

That the statement marked I exhibits the balances which remained to be accounted for on the 1st of January, 1797, of the sums previously advanced on account of the naval establishment.

That the statement marked K exhibits the sums advanced to agents for the payment of military pensions, from the 1st of January, 1790, to the first of January, 1797, the sums accounted for, and the balances remaining to be accounted for on the day last mentioned.

That the statement marked L exhibits, in detail, the sums advanced in pursuance of warrants issued by the Department of War, from the 1st of January, 1791, to the 1st of January, 1797, also, the sums accounted for, and the balances remaining to be accounted for, on the day last mentioned.

That the statement marked M exhibits an estimate of the probable application of the sums advanced by warrants issued by the Department of War, the accounts of which were not finally settled on the 1st of January, 1797.

That the statement marked N exhibits the ultimate application of moneys issued pursuant to warrants of the Department of War, for the military establishment, prior to the 1st of January, 1797, so far as the accounts have been finally settled.

That the statement marked O exhibits a summary view of the expenditures on account of the military establishment, by the Department of War, from the 1st of January, 1791, to the 1st of January, 1797.

That the statement marked P is an account of moneys advanced for the naval establishment, to the 1st of January, 1797, the accounts for which remained unsettled with the Department of War.

That the statement marked Q exhibits the ultimate application of moneys advanced by warrants of the Department of War, for the naval establishment, to the 1st of January, 1797, the accounts of which have been settled.

That the statement marked R exhibits a summary view of the expenditures on account of the naval establishment, by the Department of War, to the 1st of January, 1797.

That the statement marked S exhibits a continued view of the sums advanced from the treasury, on account of the naval establishment, during the year 1797, with a statement of the appropriation remaining unexpended at the close of the said year.

That the statement marked T exhibits a general view of the appropriations and expenditures for the military establishment, during the year 1797, with the appropriations remaining unexpended at the close of the said year.

The Secretary respectfully reports, that it appears by the estimates herewith transmitted from the Department of War, marked U, that the public service requires that the following sums be appropriated, namely:

For completing and equipping the frigates United States, Constitution, and Constellation,	\$115,744 53
For the pay of the officers and crews, together with their subsistence for twelve months,	216,678 20
For repairs and contingent expenses of all kinds,	60,000 00
For pay of persons having charge of the navy yards, rents, the purchase of cannon and howitzers, carriages for the same, and the transportation of live oak from Georgia,	29,726 00
Total estimate for the naval establishment,	\$422,148 73

And that the following sums are estimated deficiencies of former appropriations for the military establishment, to the close of 1797:

For the subsistence of the non-commissioned officers and privates of the army,	114,165 95
For the quartermaster's department, the Indian department, the defensive protection of the frontiers, bounties, and contingent expenses,	50,000 00
	164,165 95

Amounting, in the whole, to - - - - - \$586,314 68

The Secretary observes, that the deficiency of the former appropriation for subsistence is to be principally attributed to a late arrangement with the contractor, which requires that he should deposit six months provision in advance for the troops at all the ports upon the lakes, as well as at some other of the most distant ports.

All which is most respectfully submitted, by

OLIVER WOLCOTT, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *February 7, 1798.*

A.

A summary statement of the moneys received by Military Agents, from the 1st January, 1791, to 1st January, 1797, shewing the total amount of their expenditures during that period, and of the balances which remained to be accounted for by them, on the 1st January, 1797.

The payments made at the treasury, according to the annual printed accounts, were, viz:

From the institution of the Government to the 31st December, 1791,	\$623,804 03
Deduct payments 31st December, 1790,	201,161 06
	\$422,642 97
In the year 1792,	1,114,350 94
In the year 1793,	1,132,443 91
In the year 1794,	2,610,090 39
In the year 1795,	2,420,612 31
In the year 1796,	1,280,566 56
	Total,
	8,989,707 08

Deduct the payments which were made to the late paymaster and the present treasurer of the War Department:

To Joseph Howell, late paymaster, in 1791,	262,240 76
Ditto, in 1792,	329,595 56
Treasurer of the War Department in 1792,	303,240 00
Ditto, in 1793,	449,434 04
Ditto, in 1794,	930,661 93

Treasurer of the War Department in 1795,	-	-	1,130,377 42	
Ditto, in 1796,	-	-	520,125 42	
			<u>3,925,675 13(a.)</u>	
Deduct a payment to Willings and Francis, January 14, 1795, which they returned into the treasury, as per their account settled, No. 9377,			45,000 00	
Also a payment of 1,000 dollars to Edward Carrington, by John Davis, and for which Mr. Carrington has accounted, as supervisor of the district of Virginia,			1,000 00	
			<u>46,000 00</u>	
Leaves the true amount paid to military agents (moneys paid to the Treasurer of the War Department excepted) \$5,018,031 95, as above.				5,018,031 95
Amount transferred from the War Department, and accounted for by sundry military agents at the Treasury,				303,182 28
Transferred from the Naval Department, and accounted for herein,				250 01
Payments made at the treasury, in 1797, or credits given in account for expenditures, before the 1st January, 1797,				46,580 84
				<u>\$5,368,045 08</u>
<i>Expenditures, as per abstract B.</i>				
Quartermaster General's department,	-	-	-	1,333,835 78
Commissary General's do.	-	-	-	947,510 62
Military stores' do.	-	-	-	374,456 57
Clothing do.	-	-	-	580,252 48
Indian do.	-	-	-	239,463 80
Hospital do.	-	-	-	40,749 65
Ordnance do.	-	-	-	64,112 09
				<u>3,580,380 99</u>
Payments made to the latelines of Maryland, Virginia, and North Carolina, being their arrearages, payable in specie,				36,642 45
Transferred to the accounts of naval expenditures, and accounted for therein,				17,101 75
Transferred to the War Department, to be accounted for therein,				33,429 29
Balances which remained to be accounted for at the treasury, on the 1st January, 1797, as per statement C,				1,700,490 60
				<u>\$5,368,045 08</u>

TREASURY DEPARTMENT,

Register's Office, January 31st, 1798.

JOSEPH NOURSE, Register.

(a.) Note explanatory of the application of this sum of \$3,925,675 13, compared with the statements rendered by the War Department.

Sum paid to the War Department,	-	-	-	3,925,675 13
The treasurer of the War Department received, from 1st January, 1791, to 1st January, 1797, from sundry persons, for repayments,				22,502 82
He received, as treasurer of the War Department, for the use of the Navy,				33,500 00
There were moneys which remained to be applied on the 1st January, 1791, after deducting warrants which, at that time, were unsatisfied,				11,314 49
				<u>3,992,992 44</u>
Amount of warrants drawn on the paymaster and treasurer of the War Department by the Secretary of War, from 1st January, 1791, to 1st January, 1797, as per summary statement of the accountant of the War Department,				3,943,838 09
Amount of warrants drawn on the treasurer of the War Department, for the use of the Navy, as per said summary statement,				44,277 17
Balance in the hands of the treasurer of the War Department, on 1st January, 1797,			9,013 51	
Deduct warrants included in the amount of \$3,943,838 09, not then passed to the credit of the treasurer of the War Department,			4,136 33	
			<u>4,877 18</u>	
				<u>3,992,992 44</u>

B.

An Abstract of the Accounts of the several Quartermasters, Contractors, Agents for the Purchase of Supplies, and, generally, of all the receivers of the public moneys paid out of the Treasury, from the 1st January, 1791, to the 1st January, 1797, on account of the Military Establishment, (the sums advanced to the Treasurer for the War Department excepted) shewing the ultimate application, under various heads of expenditure, of the moneys thus paid; also, an Abstract of the Balances which remained to be accounted for at the Treasury, of the said moneys, on the 1st January, 1797.

NAMES.	Moneys paid at the treasury, from 1st January, 1791, to 1st January, 1797, according to the printed public accounts. 	Gurney and Smith, Naval Agents, on the settlement of their account, No. 7,403, obtained a credit for moneys advanced by them to John Snyder and William Clifton and son, for which Tench Francis, a purveyor, is held accountable in the treasury books, (c.) 2,775	188,175 00
John T. Morgan, superintendent of the woodcutters in Georgia.	He received of the treasury, in the year 1795, 600 00 He received of John Habersham, Naval Agent in Georgia, sundry sums paid to him and to his orders, from the 26th July, 1794, to 30th September, 1795, as per account No. 7,642, settled at the treasury, 8,098 50	8,698 50
Thomas Pinckney, Esq. late Minister of the U. States, at London.	This sum was remitted in bills of exchange, by the Treasurer of the U. States, for the purchase of certain articles for the frigates, (d.)	100,800 00
William Pennock, Naval Agent at Norfolk.	A balance was stated to be due by him to the United States, on the 31st December, 1796, as per treasury statement, No. 9,101, - Note. The treasury balance, July 28, 1797, is stated, \$2,161 02 Deduct a warrant issued the 15th March, 1797, - 1,000 00 As above, 1,161 02	1,161 02
Samuel and Joseph Sterrett, Naval Agents at Baltimore.	Balance due by them on the 31st December, 1796, as per settlement at the treasury, No. 9,011, (e.) -	11,945 75
Jacob Sheafe, Naval Agent at Portsmouth, New Hampshire.	Balance due by him, on 31st December, 1796, as per ditto, No. 8,976, (f.)	688 08
Daniel Stevens, Agent for procuring materials for the Naval Department.	Advanced the 31st December, 1794, for the purchase of materials for the naval department,	500 00
		\$344,632 87

(a.) He also received from the Purveyor of Public Supplies, the sum of \$47,160 84 cents, which will be embraced in the settlement of the purveyor's accounts.

(b.) Messrs. Bird, Savage, and Bird, acknowledge the receipt of this remittance, in an account rendered to the treasury, but not yet settled.

(c.) The accounts of the Purveyor of Public Supplies are exhibited at the treasury, to the first July, 1797, and are in a course of settlement; \$47,160 84 paid to Joseph Copperthwaite, as above noted, reduces this sum to \$140,014 16.

(d.) The remittances to Mr. Pinckney were placed in the hands of Messrs. Bird, Savage, and Bird, of London, who paid Mr. Pinckney's drafts for copper and other articles, ordered for the frigates.

(e.) Accounted for in the year 1797.

(f.) Of this sum \$306 22 were accounted for in the year 1797.

TREASURY DEPARTMENT, Register's Office, January 19, 1798.

Extract from the records.

JOSEPH NOURSE, Register.

K.

Abstract of the accounts of the Agents for paying Military Pensions, from the 1st January, 1790, to the 1st January, 1797, showing the amount received by them, respectively, from the Treasury of the United States, their payments on accounts settled at the Treasury, and balances due by them on the 1st January, 1797.

NAMES.	Sums received by them, according to the printed public acc'ts.		Payments to Invalids on settled accounts.		TRANSEERED.		Balances due on 1st January, 1797.

TREASURY DEPARTMENT, Register's Office, February 2, 1798:

JOSEPH NOURSE, Register.

L.

Abstract of the Accounts of the Receivers of Public Moneys paid out of the Treasury, on accounts unsettled, in pursuance of warrants issued by the Department of War, from the 1st of January, 1791, to the 1st of January, 1797, on account of the Military Establishment.

NAMES.	RANK.	Sums received.		Sums accounted for.		Balance remaining to be accounted for.	REMARKS.	
		Dolls.	Cts.	Dolls.	Cts.			Dolls.
David Allison,		16,667	32	4,743	59	11,923	73	Arising from money placed in his hands as paymaster, at Knoxville, under temporary appointment of the Secretary of War, for the purpose of paying the militia and regular troops in the State of Tennessee, in the years 1792, 1793, and 1794. He has sent forward his account and vouchers, (if they were admitted, there would remain in his hands a considerable balance) which have been suspended in consequence of information that they were improper. He has been written to on the subject.
Joseph Asheton,	Captain,	629	15			629	15	Received, in the year 1791, on account of his pay and subsistence, and for the recruiting service. Have wrote to him, and pointed out the necessity of closing his account, to which he has not replied.
William Armstrong,	Lieutenant,	132	00			132	00	Accounted for in the present year.
Joseph G. Andrew,	Surgeon's Mate,	436	91	406	91	30	00	Ditto.
Richard Allison,	Surgeon,	900	00			900	00	Ditto.
David Ames,	Superintendent military stores at Springfield,	17,310	40	7,989	23	9,321	17	Ditto.
Hamilton Armstrong,	Captain,	70	00			70	00	Ditto.
John Armstrong,	Lieutenant,	23,973	27	23,299	78	673	49	The balance received in the year 1791, for the recruiting service. He has an unsettled account in this office, which has been suspended for want of vouchers.
Absalom Baird,	Lieutenant of Washington county,	16,448	53	13,499	88	2,948	65	Received in the year 1795, for the pay of the scouts of Washington county, in the State of Pennsylvania. He has been requested to close his account, by producing vouchers, to which he has paid no attention.
William Blount,		1,000	00			1,000	00	Received in the year 1795, on account of the contingent expenses of the Indian department. He has been requested to produce vouchers for the expenditure, to which he has paid no attention.
Richard Butler, (killed)	Brigadier General,	1,130	96	930	96	200	00	Received in 1792, on account. It is possible this money has been expended for contingent expenses.
Charles Brown,	Surgeon's Mate,	137	04	107	04	30	00	Accounted for.
John Bowyer,	Lieutenant,	412	46	172	46	240	00	Ditto.
William Buchanan,	Ditto,	2,323	49			2,323	49	Received in 1792, for the pay of his company of levies, and for the recruiting service. He has accounted, in the present year, for \$1,630 66, and has been requested to produce the vouchers for the balance, which he has not yet done.
William Balch,	Ensign,	167	54			167	54	Received in the year 1792. He has accounted in the present year for \$94 75; the balance was intended for the recruiting service.
Edward Butler,	Captain,	34,788	33	25,542	00	9,246	33	He has accounted for this sum, except \$245 65, which he reserves for the purpose of enlisting recruits; and \$341 33, received in 1792, for the pay of levies under his command; vouchers for the expenditure of the latter sum have been lost. He has been requested to get his account certified.
Joseph Brock,	Captain,	3,478	09	216	20	3,261	89	Received in 1792, for the pay of himself and his company of levies, and for the recruiting service. He has been written to, and, in reply, says, that he delivered his vouchers to an officer in the army; they have not yet come to hand. He entered into bond to account for a considerable part of the amount, previous to the first June, 1792.
George Banton,	Ensign,	200	00			200	00	Received in the year 1793, on account of his pay and contingent expenses of the Indian department. His account has received a credit in the present year for \$154 95.
Sylvanus Bourne,		200	00			200	00	Accounted for in the present year.
Byrnes,	Serjeant-major,	1	33			1	33	Ditto.

L—Continued.

NAMES.	RANK.	Sums received.	Sums accounted for.	Balance remaining to be accounted for.	REMARKS.
Thomas Bodley	Ensign,	60 00	- -	60 00	Accounted for in the present year.
Daniel Bedinger,	Agent of fortifications,	2,198 00	- -	2,198 00	Ditto.
Charles Brown,	Supervisor, Georgetown,	250 00	- -	250 00	Ditto.
Thomas Barbee,	Lieut. Colonel militia,	72 60	- -	72 60	Ditto.
Thomas Butler,	Colonel,	136,410 15	131,799 33	4,610 82	The balance arising from moneys received between the years 1792 and 1796, for the pay of the troops stationed at Pittsburg and Carlisle, and for the recruiting service. He has unsettled accounts in this office, which will probably do away the greater part of this sum, but cannot immediately be acted upon, the vouchers being defective, and require explanation.
John Berrien,	Agent of fortifications,	500 00	- -	500 00	Accounted for.
George Balfour,	Surgeon's-mate,	1,781 03	1,601 03	180 00	Ditto.
John Betson,	Quartermaster, militia,	422 92	- -	422 92	Received in the year 1795, for the pay of a detachment of militia, called into service in order to detain the ship Le Jemeaux, an illicit privateer, and for his pay as quartermaster. He has been requested to send forward the vouchers for the payment of the money to the individuals, which he has not yet attended to.
Russell Bissell,	Captain,	6,356 25	4,555 02	1,801 23	This amount was for the pay of his company, for which vouchers have come forward.
William K. Blue,	Lieutenant,	877 87	866 27	11 60	Accounted for.
Daniel Britt,	Captain and paymaster to the 1st sub legion,	174,044 08	172,850 82	1,193 26	The balance remaining in his hands on final settlement of his account, to be accounted for by relinquishing thirty dollars, monthly, of his pay.
James Bruff,	Captain,	8,533 95	7,773 47	760 48	For the pay of his company at Niagara. His receipt rolls have come to hand, and have been entered to his credit.
James Bradford,	Captain,	240 64	- -	240 64	He was killed the 4th November, 1791. This sum will probably appear to be accounted for when all the accounts of Sinclair's expedition are finally closed.
John Bradshaw,	Ensign,	121 33	60 00	61 33	This sum will probably appear to be accounted for when all the accounts of Sinclair's expedition are finally closed.
Ross Bird,	Captain,	150 00	- -	150 00	Received in the year 1796, on account of his pay and subsistence, which will appear to be accounted for on rendering his receipt rolls.
John Bird,	Lieutenant,	45 00	- -	45 00	Accounted for.
G. M. Bedinger,	Major,	730 91	712 91	18 00	Arises from moneys placed in his hands in 1792, and that in settlements made by him with the late paymaster-general in that year. It is probable that a credit was omitted to be given him for that amount.
Charles Campbell,	Lieut. Colonel, militia,	12,125 84	459 16	11,666 68	Received between the years 1792 and 1795, for the pay of the militia of Westmoreland county. He has accounted in the present year for \$2,495 82, and promised to send other vouchers forward, which he has yet neglected to do, although frequently called upon for that purpose.
George Clendinen,	Lieut. Colonel, militia,	4,837 39	- -	4,837 39	Received in the year 1792, for the pay and rations of sundry detachments of militia, for services in the years 1790 and 1791, for the protection of Kenhawa county, Virginia. He has been written to, and requested to send forward vouchers, which has not yet been done.
James Collins, (of Reading)	- - -	4,400 00	2,800 00	1,600 00	Received in the year 1792, for supplies to be furnished to a part of the army at Reading. He has been frequently called upon to settle his account, which he has not yet done; and I am informed that he is now in a state of insanity.
James Cary,	Indian interpreter,	125 00	- -	125 00	Received in 1796, on account of his salary, which he was to account for with the agent at Tennessee.
John Clarke,	Major,	2,072 90	906 36	1,166 54	Received in the years 1791 and 1792, on account of pay, subsistence, and forage. He has been requested to close his account by producing vouchers, which he has not yet done.
John Cribb,	Captain,	319 00	210 53	108 47	He was killed on the 4th November, 1791. His account, consequently, is very much deranged; and it has been suspended for want of vouchers.

Henry Carberry,	-	Captain,	-	2,170 96	81 60	2,089 36	The greater part of this sum was advanced for the levy service; the vouchers for the expenditure of which, Captain Carberry asserts to have been taken by the Indians in the action of the 4th November, 1791. The balance he can account for by producing vouchers, and charging his pay.
J. F. Carmichael,	-	Surgeon's-mate,	-	49,780 28	49,531 46	248 82	Accounted for in the present year.
Leonard Covington,	-	Cornet,	-	944 12	926 12	18 00	Ditto.
John Cooke,	-	Captain,	-	1,147 10	397 10	1,050 00	Ditto.
Robert Craig,	-	Lieutenant,	-	369 60	-	369 60	Ditto.
Robert Miss Campbell,	-	Lieutenant,	-	1,606 60	277 86	1,328 74	Received in the years 1791 and 1792, for the pay of himself and detachment, and for contingent expenses, marching Captain Stake's troop to Pittsburg. He was killed by the Indians at fort Recovery, and the vouchers for the expenditure of this sum have never come to hand.
Samuel Cochran,	-	Lieutenant,	-	154 00	149 67	4 33	Balance remaining from settlement of his account in 1796.
Hugh Caperton,	-	Captain,	-	800 00	-	800 00	Received in the year 1792, for the recruiting service. He has been requested to close his account by producing vouchers, which he has hitherto neglected doing.
Thomas H. Cushing,	-	Major,	-	6,201 45	5,180 31	1,021 14	He has accounted in the present year for \$981 55.
John Crawford,	-	Captain and paymaster to sub legion,	-	110,643 66	105,684 75	4,958 91	Received in the years 1792, 1794, and 1796, for the recruiting service, and on account of pay and forage. He has accounted for \$3,561 07. The balance is to be accounted for agreeably to a regulation of the Secretary of War, by deducting half his monthly pension.
John Cummings,	-	Captain,	-	1,787 16	-	1,787 16	Received in the year 1792, for the pay of Captain Cribb's company of levies, and for the recruiting service. He has an unsettled account in the office, which is suspended for want of vouchers. He has been desired to furnish them, which has not yet been done.
Richard Call,	-	Major,	-	376 66	-	376 66	Accounted for.
James Cooper,	-	Captain,	-	249 70	-	249 70	Received in the year 1792, for the pay of himself and detachment. He has been called upon to transmit vouchers, which he has not yet attended to.
William G. Cobb,	-	Ensign,	-	44 26	-	44 26	Received in the year 1791, on account of his pay and subsistence, as a levy officer. When the company account is finally settled, it probably will appear that he has accounted for it.
James Clay,	-	Ensign,	-	132 10	-	132 10	Accounted for in the present year.
Jonathan Cass,	-	Major,	-	551 41	-	551 41	Ditto.
Israel Chapin,	-	Indian agent,	-	4,495 00	-	4,495 00	Ditto for 1250 dollars; the remainder received for the Indian Department.
John Chester,	-	Supervisor,	-	2,369 60	2,277 17	92 43	Ditto.
Arthur Coody,	-	Indian interpreter,	-	150 00	-	150 00	Received in the year 1794, on account of his salary; to account for the same with the agent at Tennessee.
John Chisholm,	-	Conductor of Indians,	-	3,457 48	257 48	3,200 00	Received in the years 1795 and 1796, on account of the expenses conducting Indians; he has not yet forwarded his account.
John Caldwell,	-	Lieut. Colonel militia,	-	521 70	-	521 70	Received in the year 1794, for the pay of the militia of Washington county, Virginia, for services in the year 1793. He has been requested to transmit the receipts of the individuals to whom he paid the money, to exonerate him from the charge, which has not yet been attended to.
John Carson,	-	Morgantown, N. C.	-	23,565 03	189 87	23,375 16	Received in the years 1794 and 1795, for the pay of certain scouts called out to protect the frontiers of North Carolina. The money was advanced him by the Secretary of War, for the purpose of paying them; although he has not rendered any vouchers, he has frequently been called upon to do it. Some vouchers received the 18th December, 1797, which are not yet examined.
John Conner,	-	-	-	46 00	-	46 00	Received in the years 1794 and 1795, on account of his pay while a prisoner with the Indians.
William Clarke,	-	Lieutenant,	-	300 00	294 00	6 00	Balance remaining on settlement of his account, being part of the money received for the recruiting service.
J. P. Duvall,	-	Lieut. Colonel militia,	-	1,013 02	-	1,013 02	Received in the year 1792, for the pay and rations of the rangers, called into service for the protection of Harrison county, Virginia. He has been called upon to close his account, which he has not done.
E. B. Drayton,	-	-	-	500 00	-	500 00	Accounted for.
William Darke,	-	Lieutenant Colonel,	-	1,000 25	-	1,000 25	Received in the year 1792, for the pay of Captain Darke's company of levies. In a letter received from him, dated 9th June last, he mentions his intention of being in Philadelphia, and would then produce the necessary vouchers for the expenditure thereof.
Frederick Dalcho,	-	Surgeon's mate,	-	370 80	168 00	202 80	Accounted for.
William Diven,	-	Lieutenant,	-	1,589 48	1,507 68	81 80	Ditto.
Henry De Butts,	-	Captain,	-	40,433 60	39,834 00	599 60	Ditto.

L—Continued.

NAMES.	RANK.	Sums received.	Sums Accounted for.	Balance remain- ing to be ac- counted for.	REMARKS.
Christian Dull, -	Ensign, -	69 34	- - -	69 34	Accounted for.
Horatio R. Dayton, -	Lieutenant, -	2,469 87	1,863 61	606 26	Ditto.
Amasa Davis, -	Agent of fortifications, -	500 00	- - -	500 00	Ditto.
Nicholas De Finiels, -	Temporary Engineer, -	1,221 80	741 80	480 00	Ditto.
Joseph Dickinson, -	Captain, -	244 07	- - -	244 07	Ditto.
James Dean, -	Indian interpreter, -	329 67	- - -	329 67	Ditto.
William Davidson, -	Lieutenant, -	932 60	- - -	932 60	Received in the year 1792, for the pay of himself and detachment, for the recruiting service and for contingent expenses. He has been requested to close his account, which he has not yet attended to.
Samuel Drake, -	Ensign, -	538 17	466 57	71 60	Received in the year 1792, on account of his pay, and for the recruiting service; for which he has not produced any vouchers.
George Demler, -	Captain, -	150 80	21 80	129 00	Received in the years 1791 and 1792, on account of his pay and subsistence. He has sent forward no account or vouchers, but it is probable it has been deducted from his subsequent pay.
James Denny, -	Quartermaster serjeant, -	1 08	- - -	1 08	Received in the year 1791, on account of pay.
Silas Dinsmore, -	Indian Agent, -	400 00	- - -	400 00	Received in the year 1796, on account of his salary; to account for the same with the agent at Tennessee.
Richard Duryee, -	Ensign militia, -	21 25	- - -	21 25	Received in the year 1795, for the pay of a guard placed on board the brig Chilcomb, an illicit prize. He has transmitted no receipts of the persons who were entitled to receive the same, to exonerate him from the charge on the books of this office.
James Dunham, -	Major, -	222 00	- - -	222 00	Received in the year 1795, for the pay of himself and the guard placed on prisoners in the late Western insurrection. He has not produced the proper vouchers to exonerate him from the charge.
William Dangerfield, -	Ensign, -	20 00	- - -	20 00	Received in the year 1795, being for one month's pay over-drawn by him.
Ebenezer Denny, -	Lieutenant, -	749 06	- - -	749 06	Advanced him in the year 1791, on account of his pay and subsistence and for the recruiting service. No vouchers have been produced to account for this amount, although he has been requested to send them forward.
George H. Dunn, -	Cornet, -	194 76	144 66	50 10	Advanced him in the year 1793, on account of his subsistence; which, on general settlement, will, probably, appear to be accounted for.
Thomas Doyle, -	Major, -	1,639 03	180 00	1,459 03	Received in the year 1791, on account of pay and subsistence, and for the recruiting service. He has unsettled accounts in this office, which will account for the expenditure of this sum.
John Doughty, -	Major, -	500 00	123 33	376 67	Advanced him in the year 1792, for the contingent expenses of this department, by a memorandum made by the late paymaster general, that he was entitled to a credit for this amount, having expended the same for secret purposes, and did not render any vouchers for the same.
Daniel Dessaussure, -	- - -	3,400 00	- - -	3,400 00	Received in the years 1794 and 1795, for mounting the artillery at Charleston, South Carolina. His account and vouchers are lodged in this office, and are now under examination.
Joseph Elliott, -	Captain, -	598 90	462 90	136 00	Accounted for in the present year.
William Eaton, -	Captain, -	5,385 65	2,769 85	2,615 80	Ditto.
Matthew Earnest, -	Lieutenant, -	9,670 68	9,550 68	120 00	Ditto.
Thomas Farley, -	Surgeon's mate, -	129 60	- - -	129 60	Ditto.
Richard Evans, -	Ensign, -	236 00	- - -	236 00	Received in the year 1791, on account of his pay and for the recruiting service. He has not sent on his account and vouchers for the same.
John Edwards, -	Lieut. Colonel militia, -	3,722 99	2,494 92	1,228 07	Advanced him in the year 1794, for the pay and rations of the militia of Kentucky. He has been requested to settle his account, by producing vouchers, which he has not yet done.
Theophilus Elmer, -	Lieutenant, -	382 60	142 13	240 47	Advanced him in the years 1794 and 1795, on account of his pay and subsistence, and for the recruiting service. He has been desired to settle his account with the paymaster general.

Elliott and Williams,	Contractors,	10 00	- - -	10 00	This amount was advanced in the year 1794, to a person who had been in their employ, and just returned from captivity from the Indians, to enable him to return to Pittsburg.
Andrew Ellicott,	- - -	200 00	- - -	200 00	Advanced him in the year 1795, to enable him to build a saw-mill at Presqu' Isle.
William Findley,	- - -	90 40	- - -	90 40	Being amount remaining on settlement of his account, in 1791. He has been requested to furnish the receipt of the person to whom he was to pay the amount, which he has not yet done. Refunded 30th December, 1797.
William Faulkner,	Captain,	2,604 96	463 04	2,141 92	Received in the year 1792, on account of his pay, and the pay and rations due a company of riflemen, in St. Clair's defeat, for rifles lost, and for the recruiting service. He has an unsettled account in this office, which cannot be acted upon for the want of vouchers.
Constant Freeman,	Major and Agent,	141,668 53	16,265 30	125,403 23	This amount was placed in his hands as temporary agent, for this department, in the State of Georgia, appointed by the Secretary of War, for the purpose of paying the militia and regular troops stationed in that State. He has accounted for this amount, in the present year, by paying it to temporary deputy-paymasters, who have sent forward the vouchers for the payment of a considerable part, to the individuals who were duly entitled to receive the same for their pay, &c.
Frederick Frye,	Captain,	2,103 53	1,603 03	500 50	Received by him on account of the recruiting service, which he is daily expending.
John Fitzgerald,	Agent of fortifications,	250 00	- - -	250 00	Received in the year 1794, for mounting the artillery at Alexandria, Virginia. In a letter received from him, dated the 6th December last, he promised to send vouchers for the expenditure of this amount, shortly. Refunded to the Treasurer, 29th December, 1797.
Peter Frothingham,	Ensign,	771 89	571 89	200 00	Received in the year 1795, on account of the recruiting service. He has an unsettled account in this office, which cannot immediately be acted upon, the vouchers being defective.
George Flemming,	Military store-keeper at West-Point,	36,308 09	3,413 22	32,894 87	He has accounted nearly for this sum, in the present year, by producing vouchers for expenditures in erecting buildings at West-Point, &c.
Nehemiah Freeman,	Temporary paymaster,	43,793 75	41,380 56	2,413 19	Accounted for in the present year.
Alexander Gibson,	Captain,	6,341 01	1,867 31	4,473 70	Ditto.
William Furguson,	Captain,	4,079 50	3,539 40	540 10	Received by him in the year 1791, on account of pay, subsistence, and forage; which will probably appear to have been accounted for, on general settlement of the troops in 1791.
Mahlon Ford,	Captain,	326 00	- - -	326 00	Received by him in the year 1791, for the recruiting service. He has not sent forward any account or vouchers.
William P. Gassaway, (dead)	Ensign,	310 00	54 66	255 34	Received in the year 1792, on account of the recruiting service; for the expenditure, no account and vouchers have been forwarded to this office.
Isaac Guion,	Captain,	3,541 23	1,935 03	1,606 20	Received in the years 1792 and 1796, on account of his pay and for the recruiting service. He has an unsettled account in this office, which will account for the greater part of this sum; it is suspended for want of vouchers; he has been requested to transmit them, which he has not yet done.
John Guthrie,	Captain,	749 58	- - -	749 58	Received in the year 1792, for the balance of pay due his late company of levies. He entered into bond, to close his account previous to the 1st January, 1793, but he has not, although called upon for that purpose.
Peter Grayson,	Lieutenant,	1,809 42	1,277 30	532 12	Received in the year 1794, for the pay of himself, and recruits at fort Randolph, and for the recruiting service. He has sent forward his account, but it is suspended for want of some necessary information.
Joseph Gough,	Ensign,	64 50	- - -	64 50	Received in the year 1792, on account of his pay, &c. It will probably appear on settlement of the levy accounts, that he has accounted for the same.
Barnard Gaines,	Captain,	125 00	- - -	125 00	Received in the year 1793, on account of his pay. He promises, in a letter dated the 13th June last, to close his account with the paymaster-general.
William S. Grayson,	Ensign,	228 00	- - -	228 00	Received in the years 1794, and 1797, on account of his pay, and for the recruiting service. He died without producing his account or vouchers.
Simon Geddis,	Lieutenant,	1,821 62	1,749 62	72 00	Accounted for in the present year.
James Gamble,	Captain,	1,811 65	1,572 58	239 07	Ditto.
William Greaves,	- - -	157 55	114 00	43 55	Ditto.
Joseph Grumpe,	Lieutenant,	110 61	179 61	331 00	Advanced him in the year 1796, on account of pay. He is now on furlough to Europe; on his return, this amount will be deducted from what may be due to him for pay and subsistence.
Jeremiah Gullion,	Lieutenant militia,	316 00	- - -	316 00	For the pay of a detachment of militia, for the protection of Scott and Woodford counties, on the Ohio, for services in 1794. He has not yet transmitted the account and vouchers.
Abraham Hunt,	- - -	9,600 00	1,600 00	8,000 00	Accounted for.

NAMES.	RANK.	Sums received.	Sums accounted for.	Balance remaining to be accounted for.	REMARKS.
Edward Hand,	-	1,000 00	-	1,000 00	Accounted for, except three dollars seventy-five cents.
Robert Hunter,	Ensign,	450 33	80 00	370 33	Accounted for.
Thomas Hunt,	Major,	1,339 09	401 52	937 57	Ditto.
J. G. Hopper,	Lieutenant,	80 00	-	80 00	Ditto.
David Hale,	Lieutenant,	2,239 23	2,135 51	103 72	Ditto.
Joseph Hillers,	Agent of fortifications,	250 00	-	250 00	Ditto.
Thomas Hart,	-	150 00	-	150 00	Ditto.
John Habersham,	Agent for supplying troops at Georgia,	2,513 84	182 00	2,331 84	Advanced him for the contingent expenses of this Department. He has transmitted accounts and vouchers, which are under examination.
Jonathan Haskell,	Major,	45,132 30	43,146 50	1,985 80	His account has been stated in the present year, and by allowance to him as a deranged officer, pursuant to an act of Congress of the 3d March last, there remains a small balance in his favor.
J. F. Hamtramck,	Major,	2,859 00	1,343 03	1,515 97	Received in the year 1792, for the recruiting service, &c. In a letter dated the 29th August last, he promised to send forward vouchers for expenditures, which he has not yet done.
Richard S. How,	Lieutenant,	468 00	-	468 00	He has accounted for the greater part of this sum, in the present year.
Thomas Hughes,	Captain,	3,597 03	3,565 67	31 36	Balance remaining in his hands on settlement of his account, the 10th November, 1794, with the paymaster-general.
Samuel Henley,	Deputy Commissary military stores,	279 10	-	279 10	He has been written to, and, in reply, he says he has accounted for the public moneys received by him, and requested a statement of the debits against him; which has been forwarded.
Charles Hyde,	Lieutenant,	1,048 25	433 13	615 12	Received in the year 1792, on account of his pay and subsistence. He has accounted for \$449 42.
Joseph Howell,	Late paymaster-general and commissioner of army accounts,	4,373 52	-	4,373 52	Balance remaining unaccounted for, out of moneys issued to him as paymaster-general and commissioner of army accounts, previous to the establishment of the accountant's office.
Horatio Hall,	Lieut. Colonel militia,	940 00	-	940 00	Received in the year 1794, for the pay of militia of Bourbon county, called into service in the year 1793. He has been requested to transmit the necessary vouchers, which he has not yet done.
William Hill,	Private,	20 00	-	20 00	Received in 1794 and 1795, on account of his pay due to him while in captivity among the Indians.
Edwin Harris,	Ensign,	80 00	-	80 00	Accounted for in the present year.
Andrew Hunter,	-	50 00	-	50 00	Advanced in the year 1795, for the board, &c. of H. Abeel, an Indian youth.
Michael G. Houdin,	Military store-keeper,	2,007 50	1,020 00	987 50	Advanced him in the years 1793 and 1795, on account of military-store department, at Albany. He has accounted for 525 dollars and 52 cents, in the present year.
Thomas Holt,	Keeper of stores,	25,511 46	-	25,511 46	This amount was advanced him in the years 1795 and 1796, for expenditures in the armory, New London, Virginia. A number of accounts have been forwarded, but no final settlement has taken place; but there is not a doubt but the greater part of this sum is applied to the use of the armory.
Benjamin Hawkins,	Indian commissioner,	800 00	-	800 00	This sum will be accounted for when the general settlement of his account, as commissioner appointed to run the boundary line between the United States and the Indians, takes place.
Stephen Hillis,	Deputy paymaster,	41,232 52	40,932 52	300 00	The balance advanced him on account of his pay as deputy-paymaster to the troops in Tennessee. The agent in that State has been directed to deduct the same.
Samuel Hodgdon,	Superintend. mil. stores,	7,717 29	6,467 29	1,250 00	Accounted for, except 75 dollars, received on account of D. Role, store-keeper.
Asa Hartshorne,	Captain,	337 73	225 00	112 73	Advanced him in the year 1791, on account of his pay. It will probably be accounted for on final settlement of the army accounts, for 1790.
David Henley,	Agent Tennessee,	245,558 70	910 00	244,648 70	This sum has been advanced to him from time to time, as agent to this department, (under temporary appointment of the Secretary of War) for the purpose of paying the militia and regular troops in the State of Tennessee. He has accounted for the money, by placing it in the hands of agents and paymasters appointed for paying these troops. Very large accounts have come to hand, but they are not yet finally examined.

Daniel St. Thomas Jenifer,	Ensign,	-	629 38	593 38	36 00	Accounted for.
Abraham Jones,	Chaplain,	-	2,282 59	2,182 59	100 00	Ditto.
George Ingersoll,	Captain,	-	950 00	-	950 00	Ditto.
Robert Johnson,	Lieut. Colonel militia,	-	433 98	-	433 98	Advanced in the year 1793, for the pay and rations for a company of rangers and scouts of Woodford county, for services in the year 1790; he has been requested to furnish vouchers for the expenditure of this amount; to which, have not received any reply.
John Jeffers,	Captain,	-	244 94	176 00	68 94	This sum will probably be accounted for on final settlement of accounts of the army in 1791.
Abraham Jones,	Lieutenant,	-	159 60	-	159 60	Received in the year 1792, and will probably appear to his credit on settlement of the accounts of the paymaster to the fourth regiment, who has been repeatedly called upon to forward his accounts.
Peter Jonnin,	Indian missionary,	-	150 00	-	150 00	Received in the year 1794, on account of his salary; deducted in his subsequent settlements with the paymaster-general.
William Kersey,	Major,	-	5,914 70	5,090 03	824 67	A great part of this amount was advanced him in the year —, on account of his pay, subsistence, and forage. It is probable that it will appear to his credit on general settlement of the accounts of the regiment to which he belonged.
Abraham Kirkpatrick	-	-	2,000 00	-	2,000 00	Received in the year 1793, for issuing provisions to the army of the United States. On application to him for settlement of his account, he answered that he had lodged his vouchers with Samuel Hodgdon, deputy quartermaster-general. Mr. H. informs me that he has endeavored to arrange the vouchers and put the account in train of settlement, in which he has not yet succeeded. I have wrote Mr. Kirkpatrick, and informed him thereof, to which he has not replied.
Michael Kalteisen,	Captain,	-	3,749 59	3,108 09	641 50	Accounted for in the present year.
William A. Lee,	Lieutenant,	-	1,226 60	296 27	930 33	Advanced him in the years 1792 and 1794, for the recruiting service. He is a cashiered officer, who has been repeatedly called upon to settle his account, but without effect.
Robert Lee,	Lieutenant,	-	59,630 31	59,624 31	6 00	Accounted for.
Cornelius Lyman,	Captain,	-	1,083 50	186 00	897 50	Ditto.
John M. Lovell,	Lieutenant,	-	400 04	161 22	238 82	Ditto.
William Lewis,	Captain,	-	1,361 76	661 76	700 00	Ditto.
Nicholas Long,	-	-	1,903 04	-	1,903 04	Ditto.
John Lowry,	Ensign,	-	435 11	206 00	229 11	Received in the years 1792 and 1793, on account of his pay and for the recruiting service.
Henry Lee,	Lieut. Colonel militia,	-	2,879 33	2,785 83	93 50	Received for the pay, &c. of Henry Cochran, for his military services: he has been requested to send forward a suitable voucher to exonerate him from the charge, to which I have received no reply.
Hartman Leitheiser,	Lieutenant,	-	64 07	-	64 07	He has accounted for 61 dollars 77 cents, in the present year.
William Lawton,	Surgeon's mate,	-	3,252 00	2,951 00	301 00	Cashiered for embezzling this sum, part of 3,000 dollars public money, put under his care to transmit to George Fleming, at West Point.
Joseph Lewis,	Lieut. Colonel militia,	-	514 00	-	514 00	Received in the year 1794, for the pay of sundry detachments of militia, of Neilson county, for services in 1793.
Benjamin Lockwood,	Captain,	-	1,307 50	1,301 50	6 00	On account of his pay. It will be deducted from the next settlement.
Meriwether Lewis,	Ensign,	-	80 00	-	80 00	Accounted for.
Elias Langham,	Shepherdstown,	-	8,043 78	7,809 49	234 29	Remaining in his hands on settlement of account, 29th December, 1796, for the use of the army at Shepherdstown.
Thomas Lewis,	Captain,	-	4,891 70	2,614 06	2,277 64	Received between the years 1792 and 1796, for his pay, subsistence, &c. and for the recruiting service; he has an unsettled account in the office, which is suspended for want of vouchers, which he has repeatedly promised to bring forward.
Howell Lewis,	Captain,	-	1,127 29	577 89	549 40	He has produced his account, which is suspended, some of the vouchers being defective. He has promised to send others, in which there will be a small balance due to him.
Samuel Lewis,	Clerk in the War Office,	-	4,050 00	-	4,050 00	850 00 for incidental and contingent expenses War Department. 2,000 00 for ditto, Indian ditto. 1,200 00 for the Ordnance Department.
					4,050 00 dollars.	Amount of warrants issued to him by the Secretary of War, in the years 1795 and 1796, for the above purposes. He has been called upon to account for the same, by producing vouchers, which he has not yet done.

NAMES.	RANK.	Sums received.	Sums accounted for.	Balance remaining to be accounted for.	REMARKS.
James Lanier, - - - - -	- - - - -	212 31	- - -	212 31	For balance remaining in his hands as paymaster to Hall's regiment of militia, being amount due to sundry soldiers of that regiment.
Andrew M'Clary, -	Lieutenant, - - -	30 00	- - -	30 00	Accounted for in the present year.
Andrew Marschalk, -	Lieutenant, - - -	323 50	208 00	115 50	Ditto.
Joseph Moorhead, -	Ensign, - - -	136 00	- - -	136 00	Ditto.
William M'Rea, -	Captain, - - -	1,072 80	849 94	222 86	Ditto.
Thomas Martin, -	Lieutenant, - - -	21 71	- - -	21 71	Ditto.
Benjamin Mifflin, -	- - - - -	1,048 80	944 60	104 20	Ditto.
Levi M'Lean, -	Ensign, - - -	200 00	- - -	200 00	Ditto.
Griffith J. M'Rea, -	Captain, - - -	120 00	- - -	120 00	Ditto.
William Morris, -	Lieutenant, - - -	215 38	137 38	78 00	Ditto.
Donald Grant Mitchell, -	Captain, - - -	289 68	209 68	80 00	Ditto.
Henry Muhlenberg, -	Lieutenant, - - -	949 47	607 30	342 17	Ditto, except \$8 17.
James Marshall, -	Lieut. Colonel militia, -	748 67	- - -	748 67	Received for the pay of militia of Washington county. In a letter received from him, dated the 27th November last, he promises to transmit the necessary vouchers for the expenditure of this sum, very soon.
Jacob Marcus Mills, -	Ensign, - - -	40 00	- - -	40 00	Received in the year 1792, on account of pay.
Ebenezer Massey, -	Lieutenant, - - -	1,489 20	407 79	1,081 41	Received in the year 1792, for the recruiting service. He has been requested to send forward vouchers for the expenditure thereof, which he has not yet done.
Jacob Melchor, -	Lieutenant, - - -	965 77	120 00	845 77	He has an unsettled account in this office, which will undergo the usual examination, and the amount passed to his credit.
William Miller, -	Ensign, - - -	70 00	- - -	70 00	Received in the year 1791, on account of the recruiting service, for which he has not sent any vouchers.
William M'Cormick, -	Captain, - - -	568 75	200 65	368 10	Received in the year 1792, for the recruiting service. He has been desired to transmit vouchers to close his account, which he has not yet done.
Peter Marks, -	Ensign, - - -	156 66	39 00	117 66	Received in the years 1792 and 1793, on account of pay and subsistence. He has been requested to settle his account with the agent in Tennessee.
Jeremiah Murray, -	Lieutenant, - - -	22 00	- - -	22 00	Received in the year 1791, on account of pay.
John Michael, -	Ensign, - - -	464 40	363 61	110 79	Received in the year 1792, for the recruiting service.
John Morgan, -	Ensign, - - -	611 71	437 11	174 60	Received in the year 1792, on account of his pay and subsistence.
Charles Martin, -	Ensign, - - -	4,235 61	3,799 72	435 89	He has accounted for this sum, except \$23 89, which he has promised to refund to the agent at Pittsburg.
William M'Mahon, -	Lieutenant, - - -	363 60	150 00	213 60	Received in the year 1792, on account of pay, subsistence, and forage.
Noel Bartho. Monvel, -	Lieutenant, - - -	291 00	191 00	100 00	Received in the year 1794, on account of his expenses inspecting and proving cannon; for which he has not rendered any vouchers.
John M'Clary, -	Ensign, - - -	3,950 67	3,240 95	709 72	Received in the year 1796, for the pay of himself and detachment, at forts Fayette and Franklin. He has not yet transmitted the vouchers for the payment of the same to the individuals of said detachment.
William M'Farlane, -	Lieut. Colonel militia, -	155 89	- - -	155 89	Received in 1795, for boarding and lodging a detachment of Cumberland county militia. He has been called upon for vouchers, which he has promised to transmit.
Return Jonathan Meigs, -	Indian Store-keeper, -	50 00	- - -	50 00	Received in the year 1795, on account of his pay and subsistence. He has been called upon to close his account, which has not yet been done.
Paul M'Dermott, -	Lieutenant, - - -	60 00	- - -	60 00	Accounted for in the present year.
William A. M'Crea, -	Surgeon's mate, -	800 43	677 43	123 00	He has accounted in the present year for \$54 80

Mark M'Pherson,	Captain,	-	480 84	-	-	480 84	Received in the year 1792, on account of his pay and subsistence. It is probable when the accounts of the regiment, to which he belonged, are finally settled, that he is entitled to a credit for this amount.
Edward Miller,	Captain,	-	4,617 30	4,000 71	616 68	Received for the recruiting service. He is frequently sending forward vouchers for the expenditure.	
John M'Kee,	Indian Agent,	-	1,145 00	-	1,145 00	Received in 1796, on account of his salary, and to defray the expenses of sundry Indians, of the Chickasaw nation, from Philadelphia to Knoxville.	
Alexander M'Gregor,	-	-	2,285 00	-	2,285 00	Received in the year 1795, for the pay of sundry detachments of Kentucky militia, for services between the years 1791 and 1795, and for supplies furnished. He has been called upon to produce vouchers, which he has not yet done.	
Jos. Montford, (killed,)	Captain,	-	1,949 00	-	1,949 00	Received in the year 1791, for three months of his company's pay, and for contingent expenses. He has an unsettled account in this office, which cannot be acted upon, the vouchers being defective.	
Staats Morris,	Captain,	-	764 71	-	674 71	Nearly accounted for this amount in the present year.	
Samuel Newman,	Captain,	-	1,532 47	-	1,532 47	Accounted for.	
A. Y. Nicholl,	Captain,	-	292 96	173 96	120 00	Advanced him in 1796, on account of pay. There is not a doubt but it has been deducted on subsequent settlements with the paymaster in Georgia.	
Presley Neville,	Paymaster Gen. militia,	-	504,889 14	1,000 00	503,889 14	Advanced him on account of pay, subsistence, and forage, of the militia, called out to suppress an insurrection in the western counties of Pennsylvania. He has placed the money in the hands of agents and paymasters, to pay the individuals, many of whom have advanced it to others. They have been called upon from this office to account for the same, by producing the necessary receipts; part have complied, others have requested indulgence to arrange their accounts.	
Presley Neville,	Lt. Col. Allegany co'ty.	-	9,477 13	-	9,477 13	Advanced him for the pay of the scouts of said county, for services between the years 1792 and 1795. He has produced vouchers for the expenditure of the greatest part of this sum in the present year.	
Joseph Philips,	Surgeon's mate,	-	727 59	591 99	135 60	Accounted for.	
John Pierce,	Captain,	-	300 00	-	300 00	Ditto.	
Piercy Pope,	Lieutenant,	-	500 00	-	500 00	Ditto.	
Robert Purdy,	Lieutenant,	-	483 52	163 01	320 51	Ditto.	
John Platt,	Lieutenant,	-	953 40	-	953 40	He has accounted for \$914 70, in the present year.	
Thomas Patterson,	Major,	-	895 97	-	895 97	Received in the year 1791, for the pay of himself, sundry officers and privates. He has been requested to transmit vouchers to close his account, which has not yet been done.	
William Preston,	Captain,	-	3,876 35	1,138 70	2,737 65	Received between the years 1792 and 1796, for pay of himself and the recruits under his command, and for the recruiting service. He has been called upon to produce vouchers, to enable me to pass to his credit the amount of his unsettled account, now in this office, which has not yet been done.	
William Piatt, (killed)	Captain,	-	1,129 64	226 31	903 33	Received in the year 1791, for the pay of himself and his company of levies. He has an unsettled account in this office, which cannot be acted upon for want of vouchers.	
Benjamin Price,	Captain,	-	5,157 18	411 46	4,745 72	Received between the years 1792 and 1795, for the pay of his company of levies, and for the pay of sundry detachments, and for the recruiting service. He has been repeatedly called upon to settle his account, which he has paid no attention to.	
John Paine,	Ensign,	-	932 75	-	932 75	Received in the year 1792, for balance of pay due Captain John Smith's company of levies. He has been requested to produce vouchers for the payment of the same to said company, which he has neglected to do.	
Thomas Proctor,	-	-	250 00	-	250 00	Received in the year 1793, for the contingent expenses of this Department. He has been called upon to settle his account; in reply, he says the public are indebted to him, and that he will shortly send forward his account.	
Andrew Pickens,	Brigadier General,	-	812 36	808 06	4 30	Remaining out of the moneys received in 1795, for the militia services in 1794.	
John Polhemus,	Lieutenant,	-	2,568 04	2,449 42	118 62	Received in the years 1792 and 1796, on account of pay and for the recruiting service. His account has received a credit, in the present year, for forty-seven dollars.	
Abner Prior,	Captain,	-	518 40	-	518 40	Received in the year 1793, for the expenses of transporting the Wabash chiefs, and on account of extra pay as surgeon's mate. He has been requested to close his account, by producing vouchers for the expenditure, which has not yet been done.	
Thomas B. Patterson,	Major,	-	93 28	-	93 28	Received in the year 1793, on account of pay and rations due a party of Alleghany county militia, for services in 1791.	
Thomas Posey,	Brigadier General,	-	22,455 47	22,005 47	450 00	Accounted for.	
Yelverton Peyton,	Ensign,	-	300 00	100 00	200 00	Ditto.	

Names.	Rank.	Sums received	Sums accounted for.	Balance remaining to be accounted for.	REMARKS.
Zebulon Pike, -	Captain, -	750 00	620 00	130 00	Advanced him in the years 1793 and 1794. It is probable he has settled his account, the advance being for two months' pay, and contingent expenses marching his men.
Bennet Pemberton, -	Major of militia, -	697 17	-	697 17	Advanced him in the year 1795, for the pay of the scouts of Woodford county, for services in 1793 and 1794. He has been requested to close his account, by producing the necessary vouchers, which has not yet been done. Accounted for the 28th December, 1797.
Joshua Potts, -	Agent of fortifications, -	250 00	-	250 00	Advanced him in the year 1795, for the purpose of mounting cannon on the fort on Cape Fear. In a letter dated 1st November last, he promises to refund the amount to the treasurer shortly.
William Peters, -	Major, -	1,599 61	1,410 28	189 33	Accounted for \$180 in the present year.
Thomas Pasteur, -	Captain, -	99 00	-	99 00	Advanced in 1793, on account of pay and subsistence.
John Pitchlyn, -	Indian interpreter, -	425 00	-	425 00	Advanced him in the year 1796, on account of his salary. He is to account for the same with the agent in Tennessee.
Benj. Price, sen. (killed)	Captain, -	137 66	-	137 66	Received in the year 1791, on account of pay and subsistence.
Jedediah Rogers, -	Captain, -	1,218 00	249 60	968 40	Accounted for.
John Randall, -	Agent of fortifications, -	250 00	-	250 00	Ditto.
Robert Rowan, -	Lieutenant, -	78 00	-	78 00	Ditto.
Jonathan Robeson, -	Lieutenant, -	1,132 73	319 06	813 67	Ditto, except \$5 64.
James Read, -	Coll ^t of Wilmington, -	1,544 33	1,360 00	184 33	Ditto.
Charles Rhodes, -	Surgeon's mate, -	36 00	-	36 00	Ditto.
Ebenezer Sprout, -	Lieut. Colonel of militia, -	43,326 28	26,107 77	17,218 51	Ditto.
John Reucastle, -	Captain, -	1,196 89	-	1,196 89	Received in the year 1792, for the pay of his company of levies. He gave bond to settle his account on or before the 1st January, 1793, which has not been done, although he has been frequently written to on the subject.
Charles Robertson, -	Ensign, -	18 00	-	18 00	Accounted for.
Michael Rudolph, -	Major, -	715 57	127 10	588 47	Accounted, in the present year, for \$381 33. The balance received in 1793 for the recruiting service.
James Richmond, -	Ensign, -	376 60	375 10	1 50	Remainder from the money received by him in 1794, on account of the pay of himself and recruits.
J. J. U. Revardi, -	Major, -	2,079 03	414 03	1,665 00	Received in the years 1794, '95, and '96, as temporary engineer, appointed by the Secretary of War, and on account of his pay, subsistence, and forage, as Major. His pay is stopped till this amount is accounted for.
Michael Roberts, -	Stationer, -	410 00	-	410 00	Accounted for.
John Francis Rivett, -	Indian missionary, -	150 00	-	150 00	Received in the year 1795, on account of expenses as an Indian missionary.
Jonathan Remington, -	Ensign, -	20 00	-	20 00	Received in the year 1795, on account of pay.
William Richard, -	Captain, -	1,000 00	-	1,000 00	Received in the years 1795 and '96, for the recruiting service. Accounted for.
James Ross, -	-	500 00	-	500 00	Received in the year 1796, on account of the Indian department.
John Rogers, -	Indian interpreter, -	309 00	284 00	25 00	Received in the year 1796, on account of ditto.
James Seagrove, -	-	68,007 63	51,407 63	16,600 00	Accounted for.
John Sellman, -	Surgeon's mate, -	482 96	439 76	43 20	Ditto.
John Stake, -	Captain, -	1,161 46	220 00	941 46	Ditto.
John Steele, -	Lieutenant, -	450 00	-	450 00	Ditto.
Theodore Sedgwick, -	Captain, -	475 07	403 07	72 00	Ditto.
William C. Smith, -	Lieutenant, -	22 00	-	22 00	Ditto.
Peter Shoemaker, -	Lieutenant, -	1,107 27	907 27	200 00	Ditto.
Patrick Shirkey, -	Lieutenant, -	25 86	-	25 86	Ditto.
Henry Shearman, -	Lieutenant, -	23 76	-	23 76	Accounted for in the present year.
James Steret, -	Lieutenant, -	425 93	175 93	250 00	Ditto.

Received in the year 1792, for the pay of a detachment of militia from Davidson and Summer counties. He has been requested to transmit vouchers, which he has not yet done.
Received in the years 1791 and 1792, for the pay and subsistence of his detachment, and for the recruiting service. He has an unsettled account in the office, which cannot be acted on for want of vouchers.
Received in the years 1794 and 1796, for the Indian Department. He has promised to send vouchers for a part of the money expended, and refund the remainder.
Received in the year 1791, for the recruiting service. In a letter dated the 1st April last, he says he has delivered to David Alljson, an account and vouchers to this amount, and that he will forward duplicates by the first conveyance.
Received in the years 1792, 1793, and 1795, on account of pay, and for the recruiting service. He entered into bond to account for this sum, on or before 1st August, 1796, but has not complied, although frequently called upon for that purpose.
Received in the year 1792, for the pay of his detachment, and for the recruiting service. Have wrote to his representatives, but have not received any answer.
Received in 1791 and 1792, for pay, and for the recruiting service. It appears by a certificate of D. Britt, late paymaster, that this sum was accounted for, previous to his resignation. The vouchers have not yet come to this office.
Received in the year 1792, for the pay of his company of levies. He has been called upon to settle his account, which he has not yet done.
Received in 1794 and 1795, for the pay of himself and recruits, and for the recruiting service. He has been called upon for vouchers, which he has not furnished.
Received in the year 1792, for his pay as quartermaster, by order of General St. Clair.
Received in the year 1794, for the pay of James Smith and George M'Culloch, scouts, of Ohio county, Virginia, for services in 1793.
Received in the year 1794, for the recruiting service.
Received in the year 1794, for three months' pay.
Accounted for.
Balance remaining on settlement of recruiting account, in 1796.
Received in the year 1796, for the pay of a detachment of militia of Russell county, for services in 1790.
Received in the years 1795 and 1796, on account of the annuity allowed to the Stockbridge Indians.
Received in the years 1791 and 1792, on account of the recruiting service, and for pay and subsistence. He has an unsettled account in this office, which cannot be acted upon for want of vouchers, which he has been called upon for.
Received in the year 1794, for the recruiting service.
Received in the year 1796, to defray the expenses of sundry Indian chiefs, from Philadelphia to their nation, northwest of the Ohio. He has not sent forward his account and vouchers.
Received in the year 1791, on account of his pay and subsistence.
Received in the years 1792, 1793, and 1796, for the pay and rations of the militia of Ohio county, for services between 1790 and 1793. He has been requested to produce the usual vouchers for the expenditure of this amount, which he has not yet done.
Received in the year 1791.

NAMES.	RANK.	Sums received.	Sums accounted for.	Balance remaining to be accounted for.	REMARKS.
Caleb Swan, - -	Paymaster-general, -	1,099,339 45	520,949 96	578,389 49	Balance of advances, and of bills drawn by him on account of the pay of the army, subsistence and forage of officers, and for recruiting. He has disbursed the greater part, by placing it into the hands of subordinate paymasters and officers, for recruiting, part of which have accounted therefor within the present year; the others have been called on to account without delay, and the accounts are daily coming in. They are of a very extensive nature, and will require a long time to examine them. Such as have accounted, are entered to the credit of the paymaster-general, but those who have not come forward, remain to his debit.
Samuel Tinsley, -	Captain, - -	2,891 40	1,870 69	1,020 71	Accounted for in the present year.
Peter Tallman, -	Lieutenant, -	254 60	202 60	52 00	Ditto.
Daniel Tilton, -	Lieutenant, -	657 48	509 44	148 04	Ditto.
James Taylor, -	Captain, - -	1,862 87	1,651 54	211 33	Ditto.
Alexander Thompson, -	Captain, - -	3,702 25	307 78	3,394 47	Ditto, except \$392 54, for the pay of his detachment, and for the recruiting service.
David Thompson, -	Ensign, - -	3,430 95	1,548 92	1,882 03	He has accounted for \$1,166 59 in the present year; the remainder received in the year 1795, for the recruiting service. For the expenditure, he has produced no account or vouchers.
Robert Thompson, -	Captain, - -	335 93	116 60	219 33	Received in the years 1793 and 1796, on account of his pay and subsistence. He has been requested to close his account, which he has not yet done.
John Tharpe, - -	Superin't of artificers, -	54 00	-	54 00	Received in the year 1791, on account of pay.
John Tillinghast, -	Ensign, - -	786 35	171 66	614 69	Received in the years 1791 and 1792, on account of pay, and for the recruiting service. He has an unsettled account in this office, which, for want of vouchers, it cannot be entered on the books thereof.
Henry B. Towles, (killed)	Lieutenant, - -	134 60	21 60	113 00	Received in the year 1792, on account of pay and subsistence, and for contingent expenses of marching his detachment to Pittsburg. No account and vouchers have been produced.
Samuel B. Turner, -	Ensign, - -	286 95	-	286 95	Received in the year 1792, on account of pay and subsistence. It is probable, when the army accounts for 1791 are finally settled, he will be entitled to a credit for this amount.
John Thomson, -	Indian interpreter, -	400 00	-	400 00	Received in the year 1794, on account of his salary, which sum he was to account for with the agent in Tennessee.
George Taylor, -	Captain, - -	320 00	-	320 00	This amount will be accounted for on settlement of his account of pay and subsistence.
Thomas Todd, -	Lieut. Colonel militia, -	152 00	-	152 00	Received in the year 1794, for the pay of a detachment of Kentucky militia; for services in 1792. He has been requested to close his account by producing vouchers, which he has not yet done.
John Toomy, - -	Serjeant Major, - -	1,599 33	1,477 89	121 41	Received in the year 1794, for the pay of himself and detachment. He has been requested to close his account, which he has not yet attended to.
John Thruston, -	Lieut. Colonel militia, -	2,080 00	-	2,080 00	Received in the year 1794, for pay of the scouts of Jefferson county, Kentucky, for services between the years 1792 and 1795. He has been requested to close his account by producing vouchers for the expenditure, which he has not yet attended to.
Edward Teele, - -	Express, - -	50 00	-	50 00	Received in the year 1794, on account of his compensation and expenses, as an express from Governor Blount to the Secretary of War.
Jonathan Taylor, -	Ensign and Paymaster, -	41,254 72	41,248 77	5 95	Part of moneys received by him in the year 1794, for the pay of the 4th sub legion.
Samuel Tredwell, -	Agent of fortifications, -	500 00	-	500 00	Received in the year 1794, for mounting cannon on the fort at Ocracock. He has produced his account; the vouchers for expenditures being defective, it is suspended till he answers my letter to him on the subject.
James Triplett, -	Lieutenant, - -	276 86	272 86	4 00	Balance of money received by him in 1796, for pay of himself and detachment stationed at fort Norfolk.
Daniel Torry, - -	Cornet, - -	137 52	44 66	92 86	Received in the year 1793, on account of his pay and subsistence.
Alexander Trueman, -	Major, - -	825 44	-	825 44	Received in the years 1792, and 1793, on account of pay and subsistence, and for contingent expenses.
Louis Tousard, -	Major, - -	1,497 35	1,027 35	470 00	He has accounted in the present year for \$416 84.
John Webb, - -	Cornet, - -	179 60	161 60	18 00	Accounted for in the present year.

Joseph Whipple,	- Agent of Fortifications,	250 00	- -	250 00	Ditto.
Richard Whiley,	- Lieutenant	52 00	- -	52 00	Ditto.
Jacob Westfall,	- Lieut. Colonel militia,	1,295 40	- -	1,295 40	Received in the year 1791, for pay and rations due the militia of Randolph county. He has been requested to produce the necessary vouchers to exonerate him from the charge, which he has not done.
William Winston,	- Captain,	1,351 40	54 00	1,297 40	Received between the years 1792 and 1794, on account of his pay and subsistence, and for the recruiting service. He has accounted for \$500, and has been requested to close his account.
John Wells, (dead.)	- Captain,	1,000 00	300 00	700 00	Received in the year 1792, for the recruiting service. He has an unsettled account in the office, which is suspended for want of vouchers.
Anthony Wayne, (dead.)	- Major General,	8,548 45	1,326 45	7,222 00	He has accounted for \$222, leaving \$7,000 to his debit. He has rendered an account for pay and expenses as sole commissioner for treating with the N. W. Indians, (in addition to his pay in the line) amounting to near \$8,000, crediting \$4,000 received in 1792, and 1794, claiming a balance of near \$4,000. I examined the account, and reported sundry objections, to the Secretary of War, which occurred to me, since which he has received an advance of \$3,000, on account, making in all \$7,000.
James Wilkinson,	- Brigadier General,	3,371 17	1,510 93	1,860 24	He alleges that this money was expended for secret services. The Secretary of War has admitted the account, in the expectation that General Wilkinson will make a statement to him of the expenditure of the money, which did not admit of vouchers.
John Whistler,	- Lieutenant,	3,776 00	3,738 68	37 32	Balance arising on settlement of account in 1796.
Winslow Warren,	- Lieutenant,	138 64	-	138 64	Received in the year 1791, on account of pay, and for the recruiting service. He has an unsettled account in this office, which is suspended for want of vouchers.
John Wade,	- Captain,	1,207 61	-	1,207 61	He has accounted for \$826 51, in the present year, leaving a balance of \$381 10, which he received in 1796, to defray the expenses of an Indian chief, and son, from Philadelphia to Knoxville, and on account of his pay.
William Wilson,	- Lieutenant,	744 84	598 84	146 00	Received in the year 1796, on account of pay. He is on furlough to the West Indies.
Aquilla Whitager,	- Major militia,	188 33	-	188 33	Received in the year 1794, for the pay of the scouts of Shelby county, Virginia, for services in 1793. He has been requested to produce vouchers for the expenditure of this amount, which he has not yet done.
John Wallace,	- Agent of Fortifications,	250 00	-	250 00	In a letter, dated 11th November last, he mentions having paid this sum to Jacob Blount, who had disbursed the same. Written to him, and told him the necessity of sending to this office the vouchers, previous to allowing him a credit for the same.
Solomon Van Rensellaer,	- Captain,	1,568 51	1,509 33	59 48	Accounted for in the present year.
Garrit Voorhis,	- Ensign,	224 00	-	224 00	Ditto.
Nanning J. Visscher,	- Lieut. and Paymaster,	2,724 43	26 00	2,698 43	Ditto.
Peter L. Van Alen,	- Lieutenant,	78 00	-	78 00	Ditto.
Samuel C. Vance,	- Lieutenant,	292 00	208 00	84 00	Ditto.
Isaac P. Youngusband,	- Ensign,	256 67	208 00	48 67	Received in the year 1792, on account of pay.
(dead.)	-	-	-	-	-
David Zeigler,	- Major,	401 63	-	401 63	Accounted for.
Henry Gaither,	- Major,	16,620 00	1,000 00	15,620 00	Ditto, except \$551 12.
Archibald Gray,	- Ensign,	269 33	109 33	160 00	Received in the year 1792, on account of the recruiting service. He has been requested to settle his account, which he has not yet done.
Isaac Craig	- At Pittsburg,	2,500 00	-	2,500 00	Accounted for.
Henry Boyer,	- Captain,	1,013 40	-	1,013 40	Ditto.
Patrick Brown,	- Lieut. Colonel militia,	677 33	-	677 33	Received in the year 1794, for the pay of the militia of Hardin county, for services in 1793. He has been requested to close his account, by transmitting the necessary vouchers, which he has not done.
		\$3,527,705 59	\$1,658,898 75	\$1,868,806 84	

The foregoing abstract includes only such accounts as were open on the books of this office, with individuals, in consequence of advances of money which remained unaccounted for; where payments have been made on accounts exhibited and settled, the sums paid have been charged to some general head of expenditure, namely:

The sums accounted for by the foregoing abstract, amounts to	1,658,898 75
But the sums charged to general heads of expenditures, amount, as per statement N, to	2,075,031 25
Of course, the payments made on accounts settled, must have amounted to	416,132 50
Amount of abstract N,	2,075,031 25
Balance remaining to be accounted for brought down,	1,868,806 84
Total amount of warrants drawn, per abstract O,	<u>\$3,943,838 09</u>

WILLIAM SIMMONS.

M.

Estimate of the probable application of the moneys not accounted for, arising from accounts which have not been finally settled, from the 1st January, 1791, to 1st January, 1797, on account of the Military Establishment.

Pay, subsistence, and forage of the army,	\$859,914 51
Bounties to soldiers, and expenses recruiting,	60,881 27
Incidental and contingent expenses of the War Department,	97,739 02
General account of militia for the protection of the frontiers,	261,147 97
Militia called out for the suppression of an insurrection in the western counties of Pennsylvania,	504,111 14
Ordnance Department,	2,522 26
Hospital Department,	2,000 00
Quartermaster's Department,	19,847 10
Indian Department,	50,815 57
Fortification of harbors,	9,328 00
	<u>\$1,868,806 84</u>

DEPARTMENT OF WAR, *Accountant's Office, December 23, 1797.*

It is impossible to note, with any precision, the probable application of the moneys unaccounted for. In stating the above estimate, I have noted the items for which the moneys were originally advanced; but from former settlements it may be ascertained that they are not always applied to the objects first intended.

WILLIAM SIMMONS, *Accountant Department of War.*

N.

Abstract of the ultimate application of the moneys expended for the Military Establishment, on accounts finally settled, in pursuance of warrants drawn by the Department of War, from the 1st of January, 1791, to the 1st of January, 1797.

Pay of the army, subsistence and forage of officers, to the 15th May, 1792,	\$153,275 73
Pay of the army,	586,073 66
Subsistence of officers,	41,683 88
Forage of officers,	12,382 61
Bounties to soldiers,	57,393 05
Expenses of recruiting,	10,005 59
Incidental and contingent expenses of the War Department,	187,970 63
Indian Department,	99,746 95
Commissary Department,	153 82
Ordnance Department,	29,125 23
Hospital Department,	8,116 04
Quartermaster's Department,	151,529 97
General account of militia,	535,477 05
Militia called to suppress an insurrection in the western counties of Pennsylvania,	398 19
Fortification of harbors,	29,731 69
Accounts transferred to the treasury for settlement,	155,441 52
Amount of moneys refunded to the Treasurer,	16,525 59

		3,376 90
<i>Military Stores.</i>		
28 12-pounders, weighing about 34 cwt. each,	\$6,378 80	
400 Muskets, (with accoutrements complete)	5,332	

The Secretary of War takes the liberty to suggest the following remarks:

That, to enable him to prepare the present estimate, as well as the former ones, for the naval armament, he required, from the persons employed in the construction of the frigates, statements of the articles and labor, and cost thereof, necessary to complete them.

It is upon these statements his estimates have been founded, but he will not pretend to say that the one now submitted is more correct than any heretofore presented.

That the estimate states a sum to provide against a probable deficiency in the appropriation of 1797, for "the Quartermaster's Department, Indian Department, defensive protection of the frontiers, bounties, and all the contingent expenses of the War Department." There was \$15,466 33, only, in the treasury of the United States, on the 27th of January, 1798, to meet all demands that have yet to appear, for expenditures that may have taken place in 1797, the amount of which cannot, at this time, be ascertained; it therefore became expedient to call for a further appropriation.

WAR OFFICE, 29th January, 1798.

JAMES M'HENRY, *Secretary of War.*

5th CONGRESS.]

No. 124.

[2d SESSION.]

DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 9, 1798.

TREASURY DEPARTMENT, *February 8, 1798.*

SIR:.

In obedience to a resolution of the House of Representatives, passed on the 3d of March, 1797, I have the honor to transmit, herewith, a statement exhibiting the amount of drawbacks paid upon the dutiable articles exported from the United States, during the years 1794, 1795, and 1796, compared with the duties on similar articles during the same period.

I have the honor to be, with perfect respect, sir, your obedient servant,

OLIVER WOLCOTT, *Secretary of the Treasury.*

The Honorable the SPEAKER of the *House of Representatives.*

A Statement exhibiting the amount of Drawbacks paid on the sundry dutiable articles exported from the United States, in the years 1794, 1795, and 1796, compared with the amount of the Duties collected on the same, respectively, during said period.

NOTE.—The accounts of Charleston, (South Carolina) are only settled to the 31st March, 1796.

It is to be observed, that, in some instances, the amount of duties received on particular articles, appears less than the drawbacks paid within the same period; this arises from exportations of merchandise imported in preceding years.

TREASURY DEPARTMENT, Register's Office, February 6, 1798.

JOSEPH NOURSE, Register.

No. 125.

[2d SESSION.

DUTY ON COAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 9, 1798.

Mr. LIVINGSTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of J. Heron, and others, proprietors and workers in the coal mines of the State of Virginia, made the following report:

That the petitioners pray for a prohibition of, or increase of, the duty on foreign coal; stating that the mines in which they are interested are abundantly sufficient for the supply of the United States; but that, as they lie at some distance from navigable water, and, when shipped, the coal is subject to a considerable freight, they cannot support a competition in the market with foreign coal, which is generally imported as ballast, and is not loaded with the expense of any land carriage.

Your committee, however, do not find that facts exactly correspond with the allegations in the petition: for, notwithstanding the disadvantages complained of, the price of the Virginia is less than the foreign coal, by an average of 33½ per cent. and the petitioners themselves state, that one hundred and fifty vessels are now employed in the trade. But, independent of this circumstance, as the article in question has become, in all great cities, and is daily becoming more extensively one of the first necessity, any prohibition or increase of duty would operate as a tax on the poorer class of citizens, for the emolument of a few. The duty on exportation, in England, is equal to the first cost of the article, and has been lately increased, and the present duty here, on foreign coal, is 5 cents per bushel, in American, and 5½ in foreign bottoms, which your committee do not think it advisable to increase; they are, therefore, of opinion, that the petitioners ought to have leave to withdraw their petition.

To the honorable the Congress of the United States,

The petition of the subscribers, proprietors and workers in the coal mines of the State of Virginia, humbly represents:

That, within eighteen miles and less of the city of Richmond, are situated a considerable number of coal mines, contained in extensive tracts of country, and owned by many different proprietors, whence no apprehension can exist, that monopoly or combination will be the result of national encouragement.

That the quantity of coal is probably inexhaustible, and certainly so abundant, as to supply, for centuries, the demand of the United States; and the only point to be considered is, whether any national regulation can convert this circumstance to the accomplishment of national advantages.

That an encouragement of the coal trade will constitute a nursery for seamen; will operate a saving of wood and timber, and prevent the money now paid for foreign coal, from going out of the country.

That a prohibition, or a duty upon foreign coal, is the only means of producing this encouragement, because such can be sold lower than the native, for the following reasons:

The foreign coal lies contiguous to navigation, whereas the native, being above the falls of James river, must suffer the expense of carriage in batteaux and wagons, before it can be delivered to a coasting vessel, which expense must be added to the freight.

The foreign coal is shipped in England as stores, and taken in as ballast, by which means the British duty is avoided, and the charge of freight saved; now, as the native coal must invariably pay freight, it is evident that the present inconsiderable duty imposed upon foreign coal does not compensate for this disadvantage.

That if, under these disadvantages, the consumption of coal can be introduced to a considerable degree, one effect will be a bounty upon so much thereof as is imported from foreign countries, because the quantity of imported coal must be limited to the quantity necessary for ballast—a limitation which demonstrates the insufficiency of this mode of acquiring coal to supply the national demand; whence it happens, that the existing state of things, patronizes a mode of getting coal from a source, limited and inadequate, to the discouragement of another, abundant and sufficient; and a little speculation of foreigners is encouraged at the expense of a great undertaking at home.

That the quantity of coal, daily raised, greatly exceeds the demand; and although one hundred and fifty coasting vessels are now occasionally employed in the coal trade, a very great surplus of coal remains undisposed of—circumstances which evince the reasonableness of an expectation that this trade may be made productive of national benefit.

Your petitioners, therefore, pray, that it may be sufficiently encouraged to effect an object so desirable, and they will pray, &c.

[2d SESSION.

FISHING BOUNTY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 13, 1798.

Mr. LIVINGSTON, from the Committee on Commerce and Manufactures, to whom was referred the petition of Silvanus Crowell, made the following report:

That the petitioner states that he is the managing owner of three schooners, employed in the cod fishery; that the said schooners were, in the spring of the year one thousand seven hundred and ninety-six, regularly cleared for a fishing voyage, and that, previous to the sailing of the said schooners, an agreement, in the form prescribed, by and between the said managing owner, and the several masters of the said vessels and their respective crews, was entered into; that the said vessels proceeded on their fishing voyages, and were employed therein for more than four

months, between the last day of February and the last day of November, in the year last aforesaid; and that, in an accidental fire, by which the store-house of the petitioner was consumed, in the month of December following, the said agreements between the owner, the masters, and crews, were lost and destroyed; for the want of which papers, the collector does not conceive himself authorized to allow the bounty on the fish taken in the said voyages, without a special direction by law, which the petitioner prays may be passed for his relief.

Your committee being satisfied, by a number of affidavits accompanying the report, that there is at least prima facie evidence of the truth of the facts stated in the petition, and being of opinion that relief may be given without incurring any danger of imposition in other cases, they recommend the following resolution to the House:

Resolved, That the prayer of the petition of Silvanus Crowell ought to be granted, and that the Committee of Commerce and Manufactures be directed to prepare and bring in a bill accordingly.

[2d Session.]

DUTIES ON SPIRITS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 14, 1798.

Mr. HARPER, from the Committee of Ways and Means, who were instructed to inquire and report, by bill or otherwise, whether any, and, if any, what, alterations are necessary in the several acts imposing duties on spirits distilled within the United States, so far as the said acts regard the entry of stills, having carefully considered the subject, submit to the House the following report:

The first provision respecting entries of this kind, is contained in the 25th section of the act of March 3d, 1791, for laying duties on spirits distilled within the United States; but that provision went no further than to require "that every distiller, within three days before beginning to distill, should make a particular entry, in writing, at the nearest office of inspection, if within ten miles, of every house, building, or place, and of each vault, cellar, and apartment, within the same, in which it should be intended to carry on the business of distilling, or to keep any spirits distilled;" and this entry was to be made on the first day of July, in that year, or three days after, by persons who might be distillers at that period.

The business remained in this situation no longer than till the 8th of May, 1792, when an act was passed, entitled "An act concerning the duties on spirits distilled within the United States," the second section of which provides that there shall be an office of inspection in every county, at which every person keeping a still shall make an annual entry of it, in the month of June, and every person bringing a still into the county, shall enter it within thirty days. This entry, beside describing each still, and its capacity, is to specify the place where, and the person in whose possession it is, and the purpose, whether use or sale, for which it is intended. Where a still is removed, the entry is also to specify the place from whence it is brought.

On this footing, the matter now stands. These annual entries are said to be complained of by the owners of stills, as very inconvenient; more especially in places where a considerable number of small stills are kept by the owners of orchards, merely for the purpose of distilling their own fruit, which frequently fails, so that the stills often remain unemployed for two or three years successively, and sometimes longer.

It has been ascertained, to the satisfaction of the committee, that inconveniences of this kind are felt and complained of in many parts of the country; and to remove them is understood to have been the object of moving the resolution which gives rise to this report. The committee were of opinion, that, if they could be removed, without endangering the revenue, it was desirable to do so.

With a view to obtain more perfect information on this subject, they had a conference with the Secretary of the Treasury, respecting the object of the provisions contained in the act of May the 8th, 1792, and the danger to the revenue that might be apprehended from such alterations as would obviate the inconveniences now said to exist. The result of the conference was a decided opinion, on the part of the Secretary, that no alteration ought to be made in the present regulations. The annual entry he considers as very important, and even essential, for enabling the Treasury Department to keep a proper check and control over the collectors of the revenue, who, being thus obliged to furnish a regular and full account of the stills in their respective districts, at a time when the money arising from the duties has not yet come into their hands, and when, consequently, they are under less temptation to fraud, may more easily be detected, should they afterwards attempt to practise it.

The committee, however, with due deference to so respectable an authority, are of opinion, that all the valuable objects of this regulation may be attained, without the annual renewal of entries. By directing that every still, upon being brought into a county, shall be entered, and that this entry shall be renewed as often as the still is removed, or its situation altered: and by requiring that these different entries shall state all such circumstances respecting the introduction, situation, or removal of the still, as may be judged important to be known, they suppose that the Treasury Department may be furnished with all the information that can be obtained by the present mode, while the inconveniences of making an annual entry may be avoided. They, therefore, pursuant to the power given them by the House, herewith report a bill, containing such alterations of the law, in this respect, as they have deemed it advisable to adopt.

5th CONGRESS.]

No. 128.

[2d Session.]

DUTIES ON STAMPS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 14, 1798.

Mr. HARPER, from the Committee of Ways and Means, who were instructed to inquire whether any, and what, alterations may be necessary in the law, entitled "An act laying duties on stamped vellum, parchment, and paper," having bestowed a further consideration on the subject, beg leave to present the following additional report:

Three amendments to the act in question have been deemed advisable by the committee; the first, relative to a deduction in favor of persons who may purchase stamps to a certain amount; the second, respecting the price of the paper directed to be stamped and distributed by the Treasury Department, and the third, relating to debentures and certificates for drawbacks.

The first of these amendments was suggested by the Secretary of the Treasury, in his letter to the committee, which is annexed to their former report on this subject. He recommends that the supervisors and inspectors of the revenue be authorized to make a deduction of ten per cent. in favor of persons who might purchase stamps to the amount of twenty dollars or upwards; and this provision, he supposes, would produce three good effects: First, to facilitate the distribution of stamps, by encouraging shop keepers and traders, in remote parts of the country, to purchase them for sale; secondly, to bring the revenue more speedily and more directly into the treasury, by encouraging the purchase of stamps, in considerable quantities, from the supervisors and inspectors immediately, instead of their being purchased one or two at a time, as they may be wanted for use, from the collectors, or their agents; and thirdly, to render the accounts more simple, by diminishing the number of agents which the Treasury Department may find it necessary to employ, for effecting a sufficient distribution of stamps.

The committee are of opinion that the prospect of these beneficial effects, from the measure proposed, is sufficiently certain to warrant its adoption; but they do not deem it necessary to make the deduction so great as the Secretary has recommended. A less sum than ten per cent. would, in their opinion, give sufficient encouragement to the purchase of stamps for retail. Seven and one-half per cent. is the sum which they have considered as most proper, in every view of the subject.

It has appeared to them, however, that the allowance ought not to be made to the officers employed in the collection of the revenue. It will be their duty to distribute stamps on account of the Government, and at the amount of the duty imposed by law. This distribution is absolutely necessary, in order to check the retailers, who might, otherwise, make a monopoly of the stamps in remote parts of the country, and compel the people to purchase them at a price far above the duty; and it would be liable to great impediments, and might, in many instances, be wholly defeated, if the persons employed in it were allowed to be retailers, at the same time, on their own account.

As to the power of making this deduction, the committee are of opinion that it ought to extend to the supervisors and inspectors, and no further. To extend it to collectors, who are very numerous, and must, moreover, be employed in distributing stamps on account of the Government, would expose it to great abuse; and to confine it to the supervisors alone, would render it almost nugatory.

And they are further of opinion, that the deduction should be extended to those who bring paper to be stamped, as well as to those who purchase paper already stamped. This will encourage persons, who, in the course of their business, have frequent occasion for stamps, to bring blank forms, and get them stamped; whereby, in addition to the general advantages expected from the measure, there will be a saving to the Government, of the expense of paper, in case the ideas of the committee, on the second head of amendments, should be adopted.

As to this second head, the amendment proposed by the committee applies to the sixteenth section of the act, which provides, that the Treasury Department "shall take care that the several parts of the United States shall, from time to time, be sufficiently furnished with vellum, parchment, and paper, stamped or marked as aforesaid, so that the citizens thereof may have it in their election to buy the same of the officers or persons employed in and about the execution of this act, at the usual or most common rates above the said duty, or to bring their own vellum, parchment, or paper, to be marked or stamped as aforesaid."

This expression, "the usual or most common rates above the said duty," must apply, as the committee conceive, to the price of the material on which the stamp is placed; which price, of consequence, the Secretary of the Treasury, according to the construction of the act, as it now stands, would be obliged to demand, in addition to the duty, from the individuals purchasing stamps. This they understand to be the construction put on it by the Secretary himself. They are, however, of opinion, that the apportionment of this price will be attended with much embarrassment and uncertainty; and that, as the price of paper, and consequently the price of stamps, must constantly fluctuate, its exaction may have a tendency to render the operation of the act disagreeable and inconvenient. These disadvantages, they suppose, cannot be counterbalanced by the mere saving of the price of paper. It would be far better, in their opinion, to consider this price as a charge against the Government, and to distribute the stamps without any addition to the rate of duty.

They do not, however, conceive that the amendment in question ought to be extended to other materials besides paper. The use of parchment and vellum, in stamps, will, probably, be very circumscribed; and persons who wish to use it, will, for the most part, be so situated, as to admit of their bringing their own materials to be stamped, without inconvenience.

Under the third and last head, the committee beg leave to remark, that the duty imposed by the act in question, on debentures and certificates of drawback, appears to them to be much too high, and to be laid in such a manner as to operate very unequally. All debentures or certificates for sums under five hundred dollars, pay one dollar on the stamp; all above five hundred, and under two thousand dollars, pay two dollars; and all above two thousand, pay three dollars. By the paper A, annexed to this report, and containing a list of the debentures granted at the custom house of Philadelphia, within a very short period, it appears that far the greatest number of debentures are for sums under 500 dollars, and that a very great proportion is for small sums; many being for five dollars, and a great number for less than twenty. To exact a duty of one dollar on a drawback of five or ten dollars, and to demand, at the same time, only three dollars for a person who receives a drawback of three, four, or five thousand, appears to the committee to be contrary to every just principle of taxation.

In considering of the best manner of applying a remedy to this defect in the law, two plans have been suggested: First, to adopt a new scale of stamps for debentures; and secondly, to authorize the collectors to retain an amount per centum, on drawbacks, in lieu of stamps.

To the first, it is objected, that, to increase the number of stamps, so as in any considerable degree to equalize the duty, would greatly increase the expense and delay of carrying the act into effect; while, after all that could be done, the object would be but imperfectly obtained. For these reasons, the committee are of opinion that the other mode is to be preferred.

By the papers marked B, C, D, and E, which are annexed to this report, and the three first of which were communicated to the committee by the Secretary of the Treasury, it appears that two-fifths per centum, in addition to the one per centum now retained by law, would probably be equal, or very nearly so, to the amount of duty to be expected from the stamps on debentures and certificates of drawback. The tax, in this way, would be perfectly equal in its operation, and would be collected with the utmost ease and exactness; in addition to which advantages, this regulation would free the merchants from the embarrassment and inconvenience of procuring stamps, and the Government from the expense of providing them.

In conformity with these views of the subject referred to them, and pursuant to the powers given by the resolution which makes the reference, the committee herewith present a bill containing the amendments recommended in this report.

B.

COLLECTOR'S OFFICE, Philadelphia, January 11th, 1798.

SIR:

Agreeably to your instructions to me on the 9th instant, I have ascertained the number of debentures issued from this office, in the year 1796, the result of which is as follows:

- 1st. The number of debentures issued in that year, under the sum of \$500, each, is - - - \$5,970
- 2d. The number of debentures issued during the said year, from 500 to 2,000 dollars, each, is - - - 669
- 3d. The number issued during said year, above the sum of \$2,000, each, is - - - 98

Total number of debentures issued, - - - - - \$6,737

I have also ascertained the number and the amount of those three descriptions of debentures, issued in the course of one month in that year, of which the following statement is the result:

- 502 Debentures under 500 dollars each, amounting to - - - - - \$46,136 42
- 59 Ditto, from 500 to 2,000 dollars each, amounting to - - - - - 62,563 35
- 9 Ditto, above two thousand dollars each, amounting to - - - - - 24,690 80

And in order to ascertain this last result, I have selected that month which would produce the average of the whole year.

Multiplying the above sums by twelve, gives for the whole year, the following amount:

- 6,024 Debentures, under 500 dollars, amounting to - - - - - \$553,632 71
- 708 Ditto, above 500 dollars, and under 2,000, amounting to - - - - - 750,756
- 108 Ditto, above 2,000 dollars, amounting to - - - - - 296,280

\$1,600,668

With great respect, I am, sir, your obedient servant,

OLIVER WOLCOTT, Esq. *Secretary of the Treasury.*

SHARP DELANEY.

1,252	Debentures under five hundred dollars, amounting to	-	-	-	-	\$190,740
305	Ditto, above five hundred and under two thousand dollars,	-	-	-	-	284,039
91	Ditto, above two thousand dollars,	-	-	-	-	313,623
<u>1,648</u>						<u>\$788,402</u>

COLLECTOR'S OFFICE, New York, January 13, 1798.

JOSHUA SANDS, Collector.

D.

Statement of debentures for drawbacks on merchandise exported, issued at Baltimore, during the year 1796.

2,154	Debentures under five hundred dollars,	-	-	-	-	\$180,667	24	
363	Ditto, above five hundred dollars, and under two thousand,	-	-	-	-	359,655	46	
84	Ditto, above two thousand,	-	-	-	-	276,270	46	
<u>2,601</u>	Debentures,					Total amount,	<u>\$816,593</u>	56

COLLECTOR'S OFFICE, Baltimore, 13th January, 1798.

R. PURVIANCE, Collector.

E.

Statement shewing the amount that would be collected from the stamped duties, as now laid on debentures, and certificates of drawback, in the ports of Philadelphia, New York, and Baltimore, for one year, according to the number and amount of debentures issued in those ports in the year 1796.

PLACE.	NUMBER OF DEBENTURES.			AMOUNT OF DITTO.	AMOUNT OF DUTY.
	Under 500 dollars each.	Above 500, and under 2,000 dollars each.	Above 2,000 dollars each.		
Philadelphia, - - -	6,024	708	108	1,600,668	7,764
New York, - - -	1,252	305	91	788,402	2,135
Baltimore, - - -	2,154	363	84	816,593	3,132
Total,	9,430	1,376	283	3,205,663	13,031
				Add for the 1-99th now retained	
				32,340	
				3,238,003	

The total amount of drawbacks, therefore, being \$3,238,003, it follows, that two-fifths per centum thereon, amounting to about \$12,952, would produce very nearly as much as can be expected from the stamp duties now laid on certificates and debentures, and which, though operating very heavily on small debentures, are almost imperceptible on large ones, and amount, in the whole, to no more than \$13,031.

5th CONGRESS.]

No. 129.

[2d SESSION.]

INTERNAL REVENUES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 23, 1798.

TREASURY DEPARTMENT, February 21, 1798.

SIR:

I have the honor to transmit, herewith, sundry documents prepared by the late Commissioner of the Revenue, to satisfy the resolution of the House of Representatives, passed on the 6th of January, 1797, by which the Secretary of the Treasury is required "to lay before Congress, within ten days after the commencement of each session, such a statement of the internal revenues as will ascertain, with precision, the nett product thereof, and the expense of collection; also, a list of all the officers employed in that service, and the compensations allowed to each of them."

These papers were received by me, within the time limited by the resolution of the House, and if I had been satisfied that the representations therein contained were accurate, they would have been immediately transmitted. In consequence, however, of an intimation which I have received, that the motives which occasioned the delay may not otherwise be understood, I have, on reflection, supposed it to be my duty to make the communication at this time, though in an imperfect form, and to avail myself of the occasion, through you, to assure the House of Representatives that, though it has not always been in my power punctually to execute their instructions, the omission has never been owing to any want of exertion, or perfect deference for their authority.

I have the honor to be, very respectfully, sir, your obedient servant,

OLIVER WOLCOTT.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Revenue Office, November 30, 1797.*

SIR:

The present session of Congress having commenced on the twenty-second instant, I have availed myself of the time which that circumstance afforded, to receive and procure additions of authentic information, which could be introduced into the following report, with the necessary certainty. It is now transmitted to you, in a form as perfect as it has been in my power to give to it. I have the most particular satisfaction in remarking, that the aggregate of the revenues under the superintendence of this office considerably exceeds the sum in the report and estimate of 1796, and that held out by my communications to you at the commencement of the late extraordinary session of the Legislature.

I am, sir, your most obedient servant,

TENCH COXE, *Commissioner of the Revenue.*

The Secretary of the Treasury.

TREASURY DEPARTMENT, *Revenue Office, November 29, 1797.*

A Report concerning the revenues arising from stills and spirits distilled in the United States; sales at auction, mills and machinery for manufacturing snuff, domestic refined sugar, carriages for the conveyance of persons, and licences to retail wines and foreign distilled spirits.

A circular instruction was transmitted to the supervisors of the revenue, immediately on the receipt of the order of the House of Representatives, of the sixth day of January last. The attention of those officers, respectively, was directed to the materials for a statement extending to the several details of that order, and they were made acquainted with the future annual duty of the like nature, which it created.* Copies of this instruction were also transmitted for all the inspectors of surveys in the several districts, *the next class of officers*, as is the practice in important cases. On the rising of the Legislature, a second notice was given in another circular letter.† The last communication was unnecessary in some of the districts, but it was indispensable in a few, and was expressed, for that reason, in very serious terms. Special communications were subsequently made, and particularly in one instance,‡ at the time when the President issued his proclamation of March last, convening the Legislature, in an extraordinary session.

It was conceived, in this office, that, in the resolution of the 6th day of January last, the House of Representatives contemplated only the ordinary sessions of Congress. Yet the early date of that order, the exertions which had been previously made by a great part of the revenue officers, and very urgent and serious applications to some, who had been unpunctual and irregular, had possessed the commissioner of a large proportion of materials for a general statement, at the commencement of the extraordinary session of the Legislature, on the 15th of last May. These materials affording sufficient certainty as far as they went, though in one or two instances very irregularly, it appeared proper to digest them into a report, which it was endeavored to render as complete, as circumstances admitted, within ten days of the first meeting of Congress, that the documents might not be delayed, if occasion should require them, and particularly if they should appear to be expected within the time prescribed by the order of the House. As soon as it was understood that the annual reports were not expected but at the ordinary sessions, occasion was taken to renew the applications for all the deficient returns, by a third circular letter to the supervisors, of the 27th of May, an extract from which is annexed.§ The substance of all the documents prepared at the last session, with additional materials received since, is contained in this report. It is proper to remark, that much the greater part of the amounts of revenue in the accompanying statements, I. to VIII. are abstracted from the returns of the supervisors, and nearly all the remainder are founded upon the official returns of the inspectors and collectors. The sources of information are equally certain, but the returns of the supervisors alone are regular in the treasury settlements. The small part, which is in any wise irregular, is particularly pointed out. No use, whatever, has been made of estimates of the gross product of the revenues, inserted in the columns of the statements I. to VIII. which are now transmitted.

In the last report concerning the internal revenues from this office, transmitted by the Secretary of the Treasury, on the 5th of March, 1796, to the House of Representatives, the statement of the tax upon spirits and stills, of the 3d of that month, was made up for the year ending with June, 1795; because, those for the other five internal taxes, which were originated in the year 1794, were confined, by necessity, to the year ending with September, 1795, that being the only complete year of these last five, which had then elapsed. The gross amount of all those six revenues, as appears in the 17th and 18th columns of the general statement K, at the end of that report, was 528,481 dollars and 31½ cents, including the *estimated* sums. It will be satisfactory to the Legislature to know that the supervisors' returns, with a few, as authentic, from inspectors and collectors, relative to that year, heretofore received or exhibited, have not only confirmed the full amount of the gross revenue, but have established it at 536,805 dollars and 33 cents. To elucidate this, a summary statement¶ is hereto subjoined. In addition to this excess, it is confidently believed that the United States, having now the assistance of a law officer in Kentucky, a further part of the sum expected from thence, will yet be received. A return from one valuable division, for both years, and some supplements of less importance in the district of Pennsylvania, are, likewise, yet to be obtained. This retrospect, by furnishing a more complete view of a former year, affords an opportunity of the comparison with the year now to be returned, and tends to exhibit the course which these revenues have now generally, though not universally taken. It is a matter of the most cordial satisfaction, that time has confirmed the aggregate sum, which was represented, by the last return of this office, as likely to arise from these taxes in 1794-5: for the public resources are not a subject on which to raise expectations, even innocently erroneous. It is, however, necessary to observe that there is, in some places, too much reason to affirm, that the public service was not well performed in that year. This conviction has led to the proper exertions for discovering deficiencies and collecting arrears.

The returns comprised in this report are,

- No. 1. Of the domestic spirit and still tax, for the year ending with June, 1796.
2. Of the auction tax for the year ending with September, 1796.
3. Of the snuff mill tax, for the year last mentioned.
4. Of the refined sugar tax, for the same year.
5. Of the carriage tax, for the same year.
6. Of the tax upon licences to retail wines and foreign distilled spirits, for the same year.
7. Being a collection of the respective amounts of the foregoing returns, in a general statement of those six revenues.
8. A list of the revenue officers, with their compensations, so far as the materials are possessed at the treasury.
9. Being a summary re-statement of the gross revenues, previously exhibited, in paper K of the report, transmitted in March, 1796, so far as then ascertained.

The gross revenue from spirits distilled in the United States, from domestic materials, and from stills, for the year ending with 30th June, 1796, agreeably to statement I, in this report, is 890,838 dollars and 67 cents, exclusively of the further sums yet to be received, which are principally from Ohio and Pennsylvania. It remains to be manifested, what will be the effect of law assistance in the Kentucky survey of the former district; but it has been confidently expected that it would produce material consequences, not only upon the revenue of the year now cur-

§ Paper D.

¶ Paper IX.

rent, but in regard to the arrears due, for the two preceding, to which this report and that of March, 1796, respectively relate. In consequence of the resignation of the late supervisor of Ohio, a new officer was appointed, who only received his commission in July last. Since that date, time sufficient to obtain returns, or certain information, from him, has not yet elapsed. It is believed, however, that the proper exertions are making by that officer. In the fourth or western survey of Pennsylvania, the inspector with his collectors have ascertained a gross revenue, for each of two years, superior to the estimates which have been last made. But though a considerable amount of duty has been also ascertained in other surveys of the district, and large sums of money have been paid,* yet there have been great deficiencies of regularity, punctuality, and exertion, even in the current year. A course of very strict and particular attention has been applied from this office, to effect the necessary amendment in the exceptionable points. Measures, of a nature so serious as to ensure much of that amendment, have been already adopted, and, however painful, will be steadfastly pursued, till the object shall be accomplished. It is, nevertheless, just and proper to observe, that a part of the evils which have occurred are to be ascribed, in some measure, to the late or present state of the laws; and to other causes not under the control of the revenue officers. The removals of delinquent collectors, suits against some, and a number of penalties for which proceedings have been terminated or instituted, have already had some effect in laying the foundation of a better execution, and in indemnifying the United States for loss of revenue.

The precariousness and excessive price of fruit, the continued high prices of grain, and the vast importations of wines, of foreign distilled spirits, and of beer, are very material to a just estimation of this part of the revenue service. They are necessary to a well informed judgment upon the due productiveness of the internal spirit tax, and they tend to shew the payers of the excise the great contributions of the domestic consumers of foreign liquors. Authentic notes of them, are, therefore, given.† It will be remembered, however, that there are considerable exportations of those commodities, with the benefit to drawback of all the duty but one per centum.

The importation of molasses, is, also, of considerable importance to an accurate view of this subject, being the sole raw material used by many great distillers. The insular and continental sugar colonies, which do not manufacture this article into distilled spirits, belonging to belligerent Powers, the citizens of the United States are almost the only purchasers that can offer for it. Hence, the quantity of molasses was increased in 1795, and the interference of spirits distilled in the United States, from that commodity, with spirits distilled from domestic materials, has been, proportionally, increased.‡

1. *The gross revenue arising from spirits distilled from foreign materials*, was, in the year ending with June, 1795, by the returns heretofore received, \$145,224 54½. For the following year, ending with June, 1796, which is now first returned, it proves to be \$227,346 22, according to the statement I. This augmentation appears to be principally owing to the increased importation of molasses, which has been already noticed. It is probable, too, that the very large importations of brown sugar and the near approach of the prices of molasses, and of that article; may have occasioned a proportion of molasses greater than common, to be used in distillation.

The drawbacks of the domestic spirit tax, allowed during the time of the statement I, are believed to relate, as well to exportations in the *preceding* year, as to those in 1795—6. By the postponements of drawback settlements, which regularly took place under the laws prior to January, 1795, they were always delayed till the return of the certificate of landing abroad; and the drawbacks after March, 1795, were settled by certificates of debenture, at the moment of exportation, under the act of January, 1795. Hence, the allowances of two years were brought, in a considerable degree, into the returns of one.

2. *The tax upon sales at auction*, for the first year of that revenue, ending with September, 1795, was \$36,285 and one-fourth of a cent, as now appears from all the supervisors' returns received at this time. No part of that sum is grounded upon estimate. The returns of the supervisors, for the second year of that tax, now to be reported, amount to \$43,169 49½. A single quarter of Massachusetts is not upon regular abstract, but upon an informal statement, which is defective in regard to one survey, the inspector not having made a return. It appears, therefore, that this tax has increased, and in a majority of the districts. The largest proportion of augmentation occurs in Pennsylvania. The fluctuations of commerce, it is believed, but perhaps some other causes, have diminished the auction tax in two of the districts. The business of both of these have been made objects of revisory scrutinies. Measures of that nature have, heretofore, produced additions to the amount of revenue. There are yet also to be received several quarterly returns from some of the least productive districts.

3. *The tax upon mills and machinery for the manufacture of snuff*, is placed, by the suspending act of June 1st, 1796, in such a situation as to render it less productive of gross revenue for the year ending with September, 1796, than it would otherwise have been, because entries, after that day, ceased to be required. A return, exhibiting all that has occurred under this head of revenue, will be found in this report. The apparent amount of that tax, for the year ending with September, 1796, will be perceived by the statement III to be \$17,124 80, which is the whole sum that it became regular to secure by bond. But, as the duty was suspended four months before the returned year expired, a proportionate deduction from the duty contained in the return, has been thought to require consideration, though there has not yet been made any legislative provision to that end. This deduction is introduced into a distinct column, precisely as it would be made, and the residue which it would leave, if authorized by law, is inserted in another column. By this mode of statement, the revenue which would have accrued without the suspension, and that which will have arisen, if an exoneration for the time after May, 1796, shall be authorized, are both exhibited. The former, being the amount of revenue from snuff mills, which has accrued, is introduced into the general statement VII. Nothing has yet been allowed, under the second section of the act of the 3d day of March, 1797, nor have there been more than two applications for the relief it provides.

There is, also, a small sum of duty on snuff manufactured in 1794—5, which was not demandable until the time of removal in 1795—6. It is added to the statement III.

4. *The tax upon sugar refined in the United States*, has increased in every district wherein the manufacture is established, but most in New York and Pennsylvania. It was only \$43,742 10, in the year ending with September, 1795, but returns of the supervisors, to the amount of \$63,752 30, have been rendered for the year ending with September, 1796, which is that now to be reported. It may be useful to state, that the importation of foreign loaf sugar amounted, in the year 1795, to no more than 43,233 pounds, and of foreign lump sugar, in the same year, it was only 405 pounds, yielding, together, a duty of \$3,918 51. The drawbacks allowed upon domestic refined sugar, during a year, ending with September, 1796, appear to be \$23,169 69, a considerable part of which is conceived to be for exportations made in the preceding year. From the mode then pursued in that operation, at the custom-houses, the drawback of the domestic refined sugar tax did not appear in the treasury settlements prior to February, 1796, to any greater amount than \$176 10, for the year ending with September, 1795. It is certain, therefore, that the drawbacks allowed in the year ending with September, 1796, as now stated, must have relation

* The supervisor of Pennsylvania has paid over to the treasury, within one year preceding the date of this report, \$88,479 and 10 cents, arising from all the six revenues. The further sum of \$5,000, is held ready for public drafts, making in all, \$93,479 19.

† The importations in 1795, were,

1. Of foreign distilled spirits,	5,204,802 gallons, paying a duty of	-	-	\$1,495,313 56
2. Of beer, ale, and porter,	364,499 gallons, duty	-	-	29,370 56
3. Of wines, paying, by the gallon,	2,716,857 gallons, duty	-	-	662,350 33
Of wines, paying by value,	499,259 dollars and 49 cents, duty at 40 per centum,	-	-	202,994 10

‡ The importation of molasses in 1795, was 4,237,965 gallons, paying a duty of \$127,770 36. In 1794, it was 3,476,906 gallons.

§ 59,507,723 pounds of brown sugar were imported in the year 1795.

to both years. The adjustment, by a certificate of debenture, was adopted in April, 1795. The estimate of this tax, made by a committee of the House of Representatives, in 1794, was only \$50,000. If the drawbacks be averaged upon the two years, there will appear, for 1795—6, a larger amount of revenue than was expected by that committee.

5. The tax upon carriages for the conveyance of persons, for the first year of that revenue, ending with September, 1795, has been established at 43,873 dollars and 67 cents, by returns actually received. No part of this sum depends upon estimate. But the returns of the supervisors for the second year of that tax, which is at the same rates of duty as the first, do not yet exceed 40,876 dollars. A defalcation, therefore, of nearly seven per cent. from the amount of the first year's revenue, appears at present. It will be observed, that much the greatest part of this defalcation has occurred in Maryland, Pennsylvania, Delaware, New Jersey, and New York—that is, in the Middle States; though Georgia has fallen off the most in proportion. Symptoms have occurred, in several quarters, of effects from this duty, of the nature of those produced by sumptuary taxes, which may assist in accounting for the difference. It is feared, however, that the collection was, in some places, defective. It is possible, that the measures which have been taken, to procure some additional returns, will produce information of more revenue, as was the case in regard to the preceding year. This, it is understood, will be the case in the first survey of Pennsylvania, but the inspector's supplementary return has not yet been rendered to the supervisor. It will be remembered, that, at the date of the return of March, 1796, the delay of the judiciary decision upon the carriage tax was expected to diminish that revenue for the year now returned; and although, contrary to that expectation, the produce of the tax is greater in Virginia and North Carolina, than in the preceding year, it is not so in Maryland, in part of which the constitutional question is understood to have excited some attention. In that district, there was a change of supervisor, a circumstance which always subjects the new officer to material disadvantage, for a time. Four quarterly returns of this tax are yet to be received from Ohio, and one from Tennessee and North Carolina. These two last will probably be small, and those from Ohio not considerable.

6. The tax upon licences to retail wines and foreign distilled spirits, is greater in its product than in the former year ending with September, 1795. It was, for that year, 58,683 dollars and 83 cents, but is augmented, by returns received at present, to 63,463 dollars and 68 $\frac{2}{3}$ cents, for the year ending with September, 1796, according to statement VI. No district would appear to have fallen off materially, if a proportionate estimate were to be added for North Carolina, from which one quarterly return is yet to be received. The increase is divided among several districts. The States which yield the least of this revenue, in proportion to their population, will be observed to be those, which, distilling considerably from fruit and grain, contribute most largely to the revenue from spirits, and have, at the same time, many counties so situated as not to be yet capable of obtaining foreign spirits by water carriage. The manufactory of malt liquors being the most extensive in some of those States, must also contribute there, to keep down the product of this tax. A quarterly abstract is also wanting from Tennessee, and four are deficient from Ohio. Irregular information, of additional revenue from this source, in the first survey of Pennsylvania, amounting to 760 dollars, has been received since the completion of statement VI.

7. *The gross amount of all those revenues* which have been noticed under the six preceding heads, for the year 1794—5, has been raised to \$536,805 33, as exhibited in statement IX, excluding estimates, and the sums yet expected from Ohio and Pennsylvania. The gross amount of the same revenues for the year 1795—6, now first returned in statement VII, considerably exceeds that of the year last reported, being \$647,065 70. To this will also be added, the moneys yet to be received for some of those taxes from both surveys of Ohio, from four divisions in the first, second, and third surveys of Pennsylvania, from three divisions of New Jersey, from one survey of Massachusetts, from Tennessee, and from North Carolina.

The contingent expenses of stationary, marking instruments, advertisements, and notifications, certain copies of, and extracts from, the laws, and postages of letters and packets, are grounded upon distinct supervisors' returns from New Hampshire, Connecticut, Maryland, Virginia, Tennessee, South Carolina and Georgia. For North Carolina they are taken at a medium of the two last years, which are returned, because the supervisor has made his report for 1796—7. For Vermont they are estimated, being so blended with other things in the supervisor's return, as not to be capable of distinct exhibition. For Massachusetts, New York, New Jersey, Pennsylvania, and Delaware, they are upon estimate. From Ohio there is so little information of the revenue arising, that a statement of the expenses cannot be made, the commissions being all at fixed rates per centum on the moneys actually collected. For Rhode Island district, they are obtained from the supervisor's accounts current.

The postages of packets and letters, among the revenue officers in the districts, form a very considerable part of the contingent expenses. Of the amount of *that charge*, the United States are ultimately the receivers, through the medium of the post-office, excepting the allowances to the officers of that department.

The present supervisors of several of the districts came into office so recently as to subject them, respectively, to material inconveniences and impediments. The same observation may be applied to several of the inspectors of surveys.

8. *The list of the officers of the revenue* exhibits, in most instances, the names of those persons who were employed in this branch of the public service on the 30th day of June, 1796. From a part of the districts the returns are for June of 1797. The names are taken from reports of the supervisors, except in the case of Ohio, whose collectors' names are obtained from other official documents.

The compensations of the officers are taken from the reports of the supervisors, so far as they have rendered them, excepting a few instances noted in the list VIII, as grounded on estimate. The supervisor of South Carolina has reported the salaries and the *rates* only of the commissions for collecting, and other compensations for specific services. He has omitted the total amount of each officer's compensation, that is, the value of the supervisorship inspectorship, and collectorships, respectively, which, it is conceived, the House of Representatives had in contemplation.* The supervisors of Pennsylvania and Ohio have not made any return whatever of the officers' compensations, nor does it appear that either of the inspectors of the former district have made a report upon that subject to him.

*The supervisor's return, in proper form, was received since this report was completed.

A.

[CIRCULAR.]

TREASURY DEPARTMENT, REVENUE OFFICE, *January 21st, 1797.*

GENTLEMEN:

A resolution of the 6th instant, has been communicated from the House of Representatives, by which this Department is directed to lay before the *next* and *every* succeeding Congress, within *ten* days after the commencement of each session, respectively, such a statement of the internal revenues as will ascertain, with precision—

First, the nett product thereof.

Second, the expense of collection.

Third, a list of all the officers employed in that service.

Fourth, the compensation allowed to each of them.

I hasten to communicate the same to you, for your information and government. So far as is necessary, copies of this letter will be enclosed for transmission, by you, to the inspectors of surveys.

I am, gentlemen, your most obedient servant,

TENCH COXE, *Commissioner of the Revenue.*

The Supervisors.

B.

TREASURY DEPARTMENT, REVENUE OFFICE, *March 8th, 1797.*

GENTLEMEN:

It was thought probable that some alteration would be made by the House of Representatives, in their order of the 6th January last, the objects of which were communicated to you on the 21st of that month. No alteration, however, has taken place. It, therefore, remains incumbent upon the supervisors, and *most seriously* incumbent upon such of those officers as have not been regular and punctual, and who are now in arrears, to make the most *early* and *effectual* exertions to comply with this positive injunction of the House. It will be perceived, too, that this duty lies equally upon the inspectors of surveys, the collectors, and the auxiliary officers. It is hoped, that none of them will risk the imputation of inattention to such a call.

In regard to the list or mere names of the officers, it will be most convenient, perhaps, to proceed upon the ground of the lists which were rendered by the supervisors, respectively, in 1795, and included in my report of the 29th day of February, 1796, of which a printed copy was sent to each supervisor. A correct and particular note or supplement thereto, may be forthwith sent, containing all the changes and additions of supervisors, inspectors, collectors, and auxiliary officers, which have taken place in the districts, respectively, from June, 1795, until the render of the proposed supplementary account of these alterations, with the dates of such alterations.

It is necessary that it be known and particularly remembered, that Congress are to meet on Monday, the 6th* day of November next, which is about a month earlier than common.

The five new revenues to September 30th, 1797, and the spirit and still taxes to the 30th of June, 1797, are the utmost that will be possible. The nearer to those times we can reach, in each of the two classes of revenue, the more satisfactory.

I am, gentlemen, your most obedient servant,

TENCH COXE, *Commissioner of the Revenue.*

The Supervisors.

C.

TREASURY DEPARTMENT, REVENUE OFFICE, *March 27th, 1797.*

SIR:

The President having deemed it expedient to convene the Legislature on the 15th of May, I have most earnestly to request that you will enable me to make up a return of the internal revenues, to as late a period as possible. Your endeavor should be to render the half yearly abstracts to the 31st December, and all the quarterly abstracts to the 31st instant.

I am possessed of all the accounts from some of the districts, to the last of December, 1796.

I am, sir, your obedient servant,

TENCH COXE, *Commissioner of the Revenue.*

HENRY MILLER, Esq. *Supervisor of Pennsylvania.*

D.

Extract of a letter from the Commissioner of the Revenue to the Supervisors, dated

TREASURY DEPARTMENT, REVENUE OFFICE, *May 27th, 1797.*

The supplements to the lists of officers and the account of the emoluments of each of them, together with some abstracts of duties and taxes, are yet to be received. The *particular* or *principal* object of this communication is, to request that, by the 1st day of October next, at the farthest, I may receive, from you, gentlemen, *all* the *abstracts* of duties and additions to, and variations in, the lists of *officers* and of their *emoluments*, within your districts, so far as they may be due from you, respectively. But, in order to facilitate the preparation of the extensive and important general statements, which are required from this office, and to give time for doing it with certainty and precision, I request that any abstract, statement, or other paper, may be transmitted as soon as it shall be completed. The rest can follow by different opportunities, as they also shall be prepared by you.

*This was altered by a law of the extraordinary session of May, 1797.

I.

A Statement of the Revenue arising from Stills, and from Spirits distilled in the United States, during one year, commencing on the 1st day of July, 1795, and ending on the 30th day of June, 1796, agreeably to official returns of the supervisors, inspectors, and collectors.

Total,		\$418,184 89½	\$43,169 49½	\$280 52	\$17,124 80	\$63,752 30	\$40,790 00	\$63,763 68½	\$647,065 70	\$81,533 50½	\$7,051 57½	\$88,585 8	\$558,480 62

(a) The returns of much the greater part of the revenue arising within the district of Ohio, and of the expenses of collection and contingencies, are yet to be received.

(b) This is on estimate, but the supervisor's return arriving after it was made, the officer's compensations appear, from his statement, to be \$340 13 less than this estimate, as will be seen by the statement VIII, which has been altered so as to conform with the late return. From this circumstance, and a trifling difference of \$2 46 in the contingent expenses of that State, the total charges of collection of all these revenues are reduced to \$88,242 49.

TREASURY DEPARTMENT, REVENUE OFFICE, November 29th, 1797.

TENCH COXE, Commissioner of the Revenue.

VIII.

A list of the Officers employed in the collection of the Internal Revenues of the United States, and in all other services relative thereto, on the first day of July, 1796, with their several denominations, and the compensations allowed to each of them, so far as the returns or other documents have been received at the Treasury.

† It is certain, that the deficient divisions of Pennsylvania have produced much more spirit and still tax, than \$4,192 08 (the difference between these two sums) in each of the two former years.

‡ Excess of this statement from actual returns over estimate and statement rendered in 1796.

TREASURY DEPARTMENT, Revenue Office, November 29th, 1797.

TENCH COXE, Commissioner of the Revenue.

INTERNAL REVENUES.

5th CONGRESS.]

No. 130.

[2d SESSION.]

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 2, 1798.

MR. LIVINGSTON, from the Committee on Commerce and Manufactures, to whom was referred the petition of Gazzam, Taylor, and Jones, made the following report:

That the petitioners shipped, in the year 1796, in the schooner Eagle, from the port of Philadelphia, a quantity of goods for St. Thomas's, in the West Indies; that the said goods had been imported into the United States, had paid duties, and were entitled to a debenture for the same, the said goods having been duly entered for re-exportation according to law; but that the said schooner having met with so much injury from the ice in the river Delaware, as to render her incapable of proceeding on her voyage, the said goods were re-shipped (by the advice of a number of captains of vessels then there) at Ready Island, in the brig Fame, for St. Croix. And that the merchandises so shipped as aforesaid, were duly landed in the island of St. Croix, and the certificates thereof, as required by law, produced to the collector of the port of Philadelphia; but, by reason of the re-shipment aforesaid, the collector does not conceive himself authorized to deliver the debenture, to which the petitioners would be, otherwise, entitled.

Your committee, conceiving that this is a case of accident, which the United States ought not to avail itself of to the injury of the petitioners, recommend the following resolution:

Resolved, That Gazzam, Taylor, and Jones, of the city of Philadelphia, merchants, ought to be relieved, according to the prayer of their petition, and that the Committee on Commerce and Manufactures be instructed to prepare and bring in a bill accordingly.

All which is respectfully submitted, by order of the committee.

5th CONGRESS.]

No. 131.

[2d SESSION.]

ADDITIONAL DUTIES ON IMPORTED SPIRITS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 19TH OF MARCH, 1798.

Mr. HARPER made the following report:

The Committee of Ways and Means, to whom was referred a petition of sundry distillers of spirits, in the town of Providence, and its vicinity, in the State of Rhode Island, have taken the matter of the said petition into consideration, and agreed to the following report thereon:

The petitioners state that they have expended considerable sums in the erection of distilleries, for the distillation of spirits from rye and molasses, and that, the rye being much cheaper in Holland than here, their manufacture from that grain cannot sustain a competition with the Holland geneva, unless heavier duties should be laid on the latter when imported in this country. As to molasses, they state that the difficulty and hazard which, from present circumstances, attend the obtaining a supply of it, have reduced so much the profit of their manufacture, that they must probably be forced to abandon it, unless Congress should interpose in its favor, by additional duties on imported rum.

The committee do not think it necessary, at present, to give any opinion on the expediency of additional duties on foreign and domestic spirits, which they understand to have been adjusted with a view to avoid, as much as possible, any preference to either. They do not conceive that sufficient information has yet been furnished by experience for judging whether this object has been completely attained, nor is that the question at present: for the petition seeks to alter the proposition, so as to secure a preference to the domestic manufacture, which would have the effect of taxing the consumers of imported spirits, for the benefit of home distillers.

From this view of the subject, the committee are of opinion that the prayer of the petition ought not to be granted.

5th CONGRESS.]

No. 132.

[2d SESSION.]

COMPENSATION OF OFFICERS OF THE REVENUE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 18, 1798.

The Secretary of the Treasury, in obedience to two resolutions of the House of Representatives, passed on the 28th of November and 11th of December, 1797, referring to his consideration the memorials of Jonathan Jackson, supervisor of the revenue for the district of Massachusetts, and Abel Whitney, collector of the revenue in the 14th division of the second survey, in the same district, respectfully submits the following report:

The memorialists represent that the compensations now allowed to them, under the acts of the President of the United States, are incompetent; and they severally pray that provision for a suitable augmentation may be made by Congress.

The Secretary has investigated the pretensions of the memorialists, and finds them to be highly meritorious; but he is unable to discover any principle by which they can, consistently with public policy, be discriminated from the claims of other officers of the revenue. Believing, however, that a revision of the compensations generally is expedient, he respectfully submits a succinct view of existing arrangements, respecting the internal revenue, the funds allowed by law for defraying the expenses of collection, and the principles by which compensations have been regulated in the acts of the President.

The several classes of officers for collecting the internal revenues of the United States have been denominated supervisors of the revenue, inspectors of surveys, collectors of divisions, and auxiliary officers.

The districts of the supervisors are co-extensive with the several States, except that the Northwestern territory and the State of Kentucky constitute one revenue district, by the name of Ohio district. The districts of New Hampshire, Rhode Island, Connecticut, Vermont, New York, New Jersey, Delaware, Tennessee, and Georgia, have not been divided into surveys of inspection. In all these districts, the duties of inspectors of surveys are performed by the supervisors.

In the district of Massachusetts, three surveys of inspection have been established; in Pennsylvania, four; in Maryland, three; in Virginia, six; in Ohio, two; in North Carolina, five; and in South Carolina, three. The duties of an inspector for one survey in each of the districts of Maryland, North Carolina, South Carolina, and Ohio, are, however, performed by the respective supervisors.

The supervisors of districts and inspectors of surveys are appointed by the President of the United States, with the advice and consent of the Senate.

The power of appointing collectors of the revenue and auxiliary officers, and of defining the extent of their divisions, has been committed to the supervisors. In the estimate for the distribution of compensations, the following number was contemplated for each district. The number actually employed, at present, is not accurately known; but, it is understood to be, in most of the districts, less considerable than was contemplated by the said arrangement, viz:

In New Hampshire, three collectors, and six auxiliary officers.
 In Massachusetts, thirteen collectors, and fourteen auxiliary officers.
 In Rhode Island, two collectors and three auxiliary officers.
 In Connecticut, six collectors, and four auxiliary officers.
 In Vermont, three collectors, and six auxiliary officers.
 In New York, eight collectors, and fifteen auxiliary officers.
 In New Jersey, eight collectors, and six auxiliary officers.
 In Pennsylvania, sixteen collectors, and eleven auxiliary officers.
 In Delaware, three collectors, and three auxiliary officers.
 In Maryland, fifteen collectors, and ten auxiliary officers.
 In Virginia, forty-two collectors, and forty-three auxiliary officers.
 In Ohio, eight collectors, and five auxiliary officers.
 In Tennessee, three collectors, and three auxiliary officers.
 In North Carolina, twenty-five collectors, and twenty-six auxiliary officers.
 In South Carolina, eighteen collectors, and thirty auxiliary officers.
 In Georgia, six collectors, and six auxiliary officers.

Making, in the whole, the proposed number of one hundred and seventy-nine collectors, and one hundred and ninety-one auxiliary officers for the United States. By a return presented to the House of Representatives, on the 21st of February last, it appears that, on the 1st of July, 1796, there were employed in all the districts, two hundred and fifty-one collectors, and sixty-nine auxiliary officers. No general return, to a later period, can be now prepared.

The officers before mentioned are compensated in the following manner:

1st. The supervisors are allowed the following annual salaries:

The supervisor of Virginia,	\$1,350
The supervisor of Pennsylvania,	1,200
The supervisors of Massachusetts, New York, Maryland, North Carolina, and South Carolina,	1,000
The supervisors of Connecticut and Ohio,	700
The supervisors of Rhode Island and New Jersey,	600
The supervisors of New Hampshire, Vermont, Delaware, Tennessee, and Georgia,	500

In addition to which salaries, the supervisors receive the following emoluments:

In New Hampshire, Massachusetts, Rhode Island, New York, New Jersey, Pennsylvania, Maryland, Virginia, and South Carolina, a commission of *one per centum* on the gross amount of the revenue collected in their several districts from spirits distilled therein from *foreign materials*. In Connecticut and North Carolina, *one and a half per centum*, and in the other districts *two per centum*, on the like revenue.

In the districts of Vermont, Delaware, Georgia, and Tennessee, a commission of *two per centum* upon the gross revenue from spirits distilled in the United States from *domestic materials* and from *stills*, and in the other districts a commission of *one and a half per centum* on the like revenue.

The supervisors of all the districts are allowed for preparing, stamping, and distributing, among the inspectors, *one cent* for every certificate to accompany foreign or domestic spirits, wines, or teas, actually issued in the surveys and ports of their respective districts, and a commission of *one half of one per centum* on the duties arising from retailers' licences, sales at auction, refined sugar, and carriages.

2d. The inspectors of surveys receive the following annual salaries:

In the districts of Massachusetts, Pennsylvania, Maryland, Virginia, North Carolina, and South Carolina, five hundred dollars each.

In the district of Ohio, four hundred and fifty dollars.

The said inspectors also receive a commission of *one per centum* on the gross revenue arising from spirits distilled in their surveys from *foreign materials*, except the inspectors of the first and second surveys of North Carolina, who receive a commission of *two per centum* on the like revenue. A commission of *one and a half per centum* on the gross revenue arising from spirits distilled from *domestic materials* and from *stills*, except the inspectors of the first and second surveys of North Carolina, who receive *two per centum* on the said revenue. All the inspectors receive a commission of *one quarter of one per centum* on the gross revenue arising in their surveys from retailers' licences, sales at auction, refined sugar, and carriages.

The inspectors of surveys, and such of the supervisors as perform the same duties, receive *two cents and a half* for each certificate signed by them, to accompany *domestic* distilled spirits, and *one cent* for each certificate to accompany *foreign* distilled spirits.

3d. The collectors of the revenue receive, on the gross revenue arising in their divisions, from spirits distilled from *foreign materials*, *three per centum*. On the gross revenue arising from spirits distilled from *domestic materials*, and from *stills*, *six per centum*, and on the revenue from retailers' licences and from sales at auction, *one and three quarters per centum*, and on the revenue from carriages and refined sugar *four per centum*. They are likewise allowed, for measuring and marking each still under the capacity of one hundred gallons, *sixty cents*, and for each still above one hundred gallons, *seventy-five cents*; for marking each cask of domestic distilled spirits, and for issuing and countersigning a certificate to accompany the same, *two and one half cents*, and for every cask which they respectively gauge, *six cents*.

The supervisors are authorized to distribute to a number of collectors, in their respective districts, not exceeding the number hereinbefore mentioned, a medium allowance of eighty dollars, yearly, in addition to their other emoluments.

4th. To the auxiliary officers, not exceeding in each district the number hereinbefore mentioned, the supervisors may allow, yearly, a medium sum of thirty dollars each. The allowances, under the head of *contingent expenses*, comprise printing, stationary, postage, and marking instruments. Nothing is allowed for clerk hire, office rent, fuel, or travelling expenses, except for journeys on special occasions, by the direction of the Treasury.

If the owners of carriages do not make entry and pay the duties thereon, the collectors may demand, for their own use, *twenty-five per centum*, in addition to the said duties, for the extra trouble of collection. No other fees or compensations are demandable of individuals by the officers of the revenue.

The acts of Congress provide the following funds, out of which the before mentioned compensations are made:	
By the act, entitled "An act concerning the duties on spirits distilled within the United States," passed on the 8th day of May, 1792, a sum not exceeding	\$70,000 00
By the act, entitled "An act making further provision for securing and collecting the duties on foreign and domestic distilled spirits, stills, wines, and teas," passed on the 5th of June, 1794, which act has been continued, and will remain in force until the end of the present session of Congress,	23,333 33
In addition to the general funds before named, the President is authorized to allow, for the expenses of collecting the duties on carriages, and on refined sugar, <i>five per centum</i> on the product of the said duties, which, being estimated on one hundred and four thousand five hundred and forty-two dollars and thirty cents, is	5,227 11
And of the duties on licences to retailers and sales at auction, <i>two and one-half per centum</i> , which, computed on one hundred and six thousand nine hundred and thirty-three dollars and seventeen cents, being the last estimated product of the said duties, is	2,673 32
Making, in the whole, the sum of	<u>\$101,233 76</u>
By the documents which were presented to the House on the 21st of February last, it appears that the compensations of the officers of the internal revenue, for one year, may be estimated at	\$85,033 37
And that the contingent expenses amounted to	7,051 57
Making, in the whole,	<u>\$92,084 94</u>

But, though it appears from this statement that the whole of the appropriated fund has not been expended, yet, as several of the items upon which the fund has been calculated, are uncertain, while a considerable proportion of the expense is permanent, it has been deemed unsafe to increase the scale of compensation, from an apprehension that the limitations prescribed by law might be exceeded.

The following is a view of the duties which are performed by the several classes of officers:

The *auxiliary officers* are generally appointed to aid such of the collectors whose *divisions* consist of more than one county. Their duties are principally to receive entries of stills and carriages, and to issue retailers' licences. Small sums, for duties on carriages and licences, pass through their hands to the collectors. In some of the districts, the supervisors have allowed the collectors to appoint the auxiliary officers, and to reward them out of their own compensations.

The collectors are, however, the principal receivers of the revenue from the people, which they pay over to the inspectors of surveys, or to the supervisors, in those districts which have not been subdivided into surveys of inspection. The accounts of the collectors follow the course of their remittances; their accounts are directed to be rendered in detail, exhibiting the names of the persons from whom, the objects upon which, and the sums collected.

The inspectors of surveys receive, examine, and state the accounts of the collectors, which they digest into general returns, and which are transmitted, with the moneys received from collectors, to the supervisors of the respective districts.

The supervisors correspond with the treasury, and with the inspectors and collectors of the districts; they alone account with the treasury, and their returns exhibit, in detail, all the particulars which are contained in the accounts of the collectors.

It is found requisite that the accounts should exhibit the course of business, even in minute particulars, as the subjects of revenue are continually varying in every district, survey, and division, and because the nature of the system admits of no other check than that arising from a connected series of accounts.

A general idea of the detail contained in the accounts of the internal revenue appears necessary to enable the House to decide on the subject of compensations.

1st. The duties on spirits distilled from *foreign* materials, and generally the duties on all spirits distilled in large stills, in cities, towns, and villages, are ascertained on the *quantities of spirits removed*, for which duties credits are allowed. The accounts, therefore, exhibit the names of the contributors, the quantities of spirits distilled and removed, the quantities remaining on hand, the amount of the duties which accrue at each distillery, and an account of the bonds taken, and the times when discharged.

2d. The duties on refined sugar are collected in the same manner as those on spirits, and a like detail is observed.

3d. The quantum and rates of the duties on stills employed in the country, according to existing laws, depend on the term for which they are licensed, except that a small number of stills will continue to be subject to the annual duty. The annual duty, when collected, is, however, payable in half-yearly instalments; of course, the accounts for this duty provide for a general description of each still, and for eight distinct modes of calculation; besides, entries must be made whenever licences are issued, however frequently they are repeated. Moreover, as none of the duties are paid in advance, the accounts to any given period must exhibit outstanding debts, to be accounted for in subsequent returns.

4th. The accounts of the duties on carriages embrace the names of the owners, and columns for the descriptions of carriages, subject to different rates of duties. For every carriage a certificate is given on the payment of the duty.

5th. The duties on licences to retailers are ascertained by abstracts, which exhibit the names of the persons for whom the blank licences are filled up, and whether for retailing foreign spirits or wines.

6th. The duty on sales at auction is chiefly confined to the principal towns, and is received from but a few persons; the accounts are easily rendered, but, to ascertain the duties, an examination of the voluminous entries of the auctioneers is requisite.

Although there is nothing in the system prescribed for keeping the accounts which is attended with uncommon difficulty, yet it will be seen that more than ordinary skill in clerkship is an indispensable qualification for the office of collector; and that the volume of accounts to be rendered by the supervisors and inspectors is too great to be accomplished without expenses for clerkship, which must form great deductions from their apparent emoluments.

It is also evident, that, though the whole time of the subordinate officers is not employed in the revenue service, yet the nature of their duties requires them to maintain permanent offices, to which the people may resort, and to engage occasional substitutes, while they are absent on journeys through their divisions for the collection of moneys, marking stills, and enforcing the laws against delinquents. Much of the delay which has attended the settlement of the accounts in some districts, is to be attributed to the want of skill in clerkship, of officers whose qualifications were, in other respects, unexceptionable. The difficulty of engaging suitable characters has, moreover, been greatly increased by impolitic restrictions, which, in several States, forbid State officers from holding appointments under the General Government.

The Secretary presumes that a review of the facts which have been stated will evince, that no greater number of persons have been employed in the revenue service than was absolutely necessary, and that the compensations of the officers of every grade, and for every specific service, are moderate in the extreme.

It is true that a considerable proportion of the gross amount of the internal revenues hitherto ascertained, has been consumed in expenses of collection; and hence, it has been inferred, that the arrangements were either defective in economy, or that the objects of taxation have been injudiciously selected. The first objection has been shown to be unfounded, and, it is believed, that the last is susceptible of a refutation.

It ought to be remembered, that a considerable part of what are stated as expenses of collection, consist of the salaries and commissions of the supervisors and inspectors. These are principally officers of control and general superintendance; under any system of revenue operating through the interior country, an equal number of officers of this description must be maintained; a reduction of the existing duties would produce but little diminution of this part of the expense; and with a small augmentation of compensations, and a provision for defraying the expenses of clerkship, the same officers would be adequate to the superintendance of the most extended system of revenue.

The Secretary is of opinion that the following arrangement would promote the public interests:

1st. To allow the following sums to the supervisors of districts, for clerk hire in the respective offices, viz:

To the supervisors of the districts of Massachusetts, New York, Pennsylvania, Maryland, Virginia, North Carolina, and South Carolina, eight hundred dollars per annum, each.

To the supervisors of the districts of New Hampshire, Rhode Island, Connecticut, New Jersey and Georgia, four hundred dollars per annum, each.

To the supervisors of the districts of Vermont, Delaware, Ohio, and Tennessee, three hundred dollars per annum, each.

To establish the commissions of all the supervisors at one and a half per centum on the product of all the internal revenues now established, in addition to their present salaries.

2d. To allow to each of the inspectors of surveys, for clerk hire in their respective offices, two hundred dollars per annum, each.

To establish the commissions of all the inspectors of surveys, at one and one half per centum on the product of all the internal revenues now established, and by them respectively received, in addition to their present salaries.

3d. To establish the commissions of the collectors of the revenue at seven per centum, on the product of the internal revenues now established, and by them respectively received, in addition to the fund authorized to be distributed to the collectors and auxiliary officers, as yearly compensations; except that, in the districts of Massachusetts and Rhode Island, the commissions on the revenue from spirits distilled from foreign materials in cities, towns, and villages, may be restricted to four per centum.

4th. To direct that all officers employed in the collection of the internal revenues shall give bonds, with sureties, for the faithful execution of their trusts, and to provide a summary mode for the recovery of money from delinquents.

It is proposed that the fees for granting certificates to accompany spirits, wines, and teas, and for marking and gauging casks and packages, should be continued as at present, and that reasonable charges for printing, stationary, and postage, should be allowed.

The sums proposed to be allowed for clerk hire, are less than the expenditures which the public service will require for this object in several districts, particularly in Massachusetts, Pennsylvania, and Virginia; it is believed, however, that the proposed addition to the rate of commissions will compensate for the deficiency. An uniform rate of commission to each grade of officers, except in Massachusetts and Rhode Island, where considerable sums are collected from large distilleries, is suggested, to obviate an inconvenient complexity, which, by occasioning errors, retards the settlement of the accounts.

It is believed that, if the compensations now proposed should be established, the expenses of collecting the internal revenues would but little exceed the average proportion which attends the collection of the revenue on imports in other districts than Boston, New York, Philadelphia, Baltimore, and Charleston. In this estimate the fees paid by merchants, which do not appear in the public accounts, are, however, included.

The Secretary submits it as his opinion, that an augmentation of compensation, such as is proposed, is necessary to prevent the greatest embarrassments. Such of the officers as have strictly and fully discharged their duties, have derived little or no emolument from their services. Though it is believed to be generally true that no instance can be mentioned where, in this country, services of equal difficulty and extent have been performed for so little emolument as by the officers of the internal revenue, yet, it is certain that the degrees of exertion have been unequal; that the accounts have, in some instances, remained too long without settlement, or have been imperfectly stated, in consequence of inability on the part of the officers to support, without personal sacrifices, such expenses, in relation to their offices, as the good of the service has required. Specific allowances for the expenses of clerkship will probably remedy an evil from which much loss and disorder are to be apprehended.

All which is most respectfully submitted, by

OLIVER WOLCOTE, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *April 17th, 1798.*

ADDITIONAL REVENUES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 1, 1798.

Mr. HARPER made the following report:

The Committee of Ways and Means, instructed to inquire whether any, and what, additional revenues will be wanted for the public service, having taken the subject into consideration, report:

That, in their opinion, it will be necessary to raise the sum of two millions of dollars by a tax on lands, houses, and slaves, to be apportioned among the several States, according to the constitutional rule, and on the basis of the last census; the mode of assessment and collection to be uniform throughout the United States.

This opinion they have founded on a view of the probable amount of the ordinary expenditure of the present year, and of revenue from the existing taxes, presented by certain statements from the Secretary of the Treasury, which, together with the letter of the committee to him on that subject, and his answer, are subjoined to this report.

From these statements it appears, that the ordinary expenditure of the present year, making an allowance of one hundred thousand dollars for occasional grants, and one hundred and thirty thousand for reimbursing the unfunded registered debt, and the payment of old accounts, will amount to six millions nine hundred and twenty-six thousand four hundred and sixty dollars.

And that the revenue from existing taxes, stating the impost and tonnage duties at seven millions of dollars, and the internal duties at seven hundred thousand dollars, will amount to eight million eleven thousand eight hundred and ninety-seven dollars.

The impost and tonnage are stated at something more than five hundred thousand dollars below the actual receipts of last year, which were seven million five hundred and forty-nine thousand six hundred and forty-nine dollars; an abatement which the Secretary has thought it prudent to make, on account of the effects likely to be produced on this great branch of the revenue by the depredations on our commerce. The internal revenues are stated higher, by a sum of one hundred and twenty five thousand dollars, than the actual receipts of the last year which

were five hundred and seventy-five thousand four hundred and ninety-one dollars; this increase the Secretary supposes may be expected from an improved mode of collection.

The stamp duties are stated at two hundred thousand dollars, annually; an estimate which the committee conceive to be sufficiently moderate.

Taking the total amount of revenue, from all the present branches of it, to be eight million eleven thousand eight hundred and ninety-seven dollars, as above stated, and deducting that of ordinary expenditure, taken at six millions nine hundred and twenty-six thousand four hundred and sixty dollars, there will be a clear surplus, in the present year, of one million eighty-five thousand four hundred and thirty-seven dollars, which, if left unappropriated, would go to the discharge of the public debt, but may be applied towards defraying the extraordinary expenses voted during the present session.

These expenses consist of the following items: Fortifications, three hundred and forty thousand dollars. Fabrication, or purchase of arms, cannon, and military stores, nine hundred thousand dollars. Naval armament, nine hundred and fifty thousand dollars. New regiment of artillery, one hundred and seventy-two thousand one hundred and forty-three dollars. Making an aggregate of two millions three hundred and sixty-two thousand one hundred and forty-two dollars.

To this it will be proper to add a sum, probably not exceeding forty thousand dollars, for quartermaster's and contingent expenses attending the new regiment of artillery; and, should the bill, now before the House, for providing galleys, be agreed to, an expense of eighty thousand dollars will be incurred on that account. These two sums, added to the former, will raise the aggregate of extraordinary expenses to two millions four hundred and eighty-two thousand one hundred and forty-two dollars.

The committee have not taken into view the expenses which may be incurred for the military defence of the country, either by a provisional army, or detachments of militia. It is certain, however, that, whichever of those modes may be preferred, a considerable expense, in case of actual service, must be incurred: it will be for the House to decide, how far a provision for this expense ought now to be contemplated.

Neither have the committee taken into their estimate a provision for the deferred debt; the interest and extinguishing annuity on which, amounting to one million one hundred and forty-six thousand three hundred and seventy dollars, will become payable in the year 1801; nor for the heavy instalments on the foreign debt, which will become due in the years 1802, 1803, and 1804. But they conceive it is of use to state, that those instalments, joined to the interest, which, in this year, are only six hundred thousand and forty-one dollars, will amount, in the year 1802, to one million nine hundred and one thousand nine hundred and thirty-one dollars; in the year 1803, to two millions six hundred and forty-one thousand four hundred and fifty-three dollars; and in the year 1804, to two millions fifty-two thousand six hundred and twenty-three dollars; after which, they decline to one million thirteen thousand two hundred and thirty-two dollars, in the year 1807; and to two hundred and fifty-four thousand five hundred and twenty dollars, in 1809, when the debt will be extinguished. Hence it appears that, in the year 1801, the ordinary expense will be increased one million one hundred and forty-six thousand three hundred and seventy dollars; and, in the year 1803, to the amount of three millions seven hundred and eighty-seven thousand eight hundred and twenty three dollars, being the sums payable in that year on the foreign and deferred debts; which sums it will be necessary to provide, in those years, above the amount of the present ordinary expenditure.

To meet the above mentioned extraordinary expenses, amounting to two millions four hundred and eighty-two thousand one hundred and forty-two dollars, Congress has no present funds, beyond the surplus already stated, and amounting to one million eighty-five thousand four hundred and thirty-seven dollars, which, being deducted from the aggregate of extraordinary expenses, leaves a balance of one million three hundred and ninety-six thousand seven hundred and five dollars to be provided by new revenue.

The committee would also observe, that two instalments on the debts to the Bank of the United States, amounting to four hundred thousand dollars, and not continued on loan, will become due on the 31st of December, in the present year. It will be for the House to consider how far provision for the discharge of those instalments ought now to be made. Should such provision be considered as necessary, it will raise the amount to be provided for by new revenues, to the sum of one million seven hundred and ninety-six thousand seven hundred and five dollars.

This sum, it will be observed, falls considerably short of the proposed tax; but, in the present situation of the country, with such probability of increased expenses, such possibility, not to say probability, of defalcation in the greatest branch of the present revenue, the impost and tonnage duty, and the certainty of a great augmentation in the ordinary expenses, by the deferred debt, and the increasing instalments of the foreign debt, the Committee do not think it safe to contemplate an additional revenue, from permanent sources of taxation, to a less amount than two millions of dollars.

On this view of the subject, they submit to the House the following resolutions:

1. *Resolved*, That it will be expedient to raise an additional revenue of ——— dollars, annually, by a direct tax.
2. *Resolved*, That the said tax ought to be laid, by uniform assessment, on lands, houses and slaves.
3. *Resolved*, That the apportionment of the said tax ought to be made among the several States, according to their respective number of inhabitants, as ascertained by the last census.

COMMITTEE ROOM, *April 21, 1798.*

SIR:

By desire of the Committee of Ways and Means, and for their use, I have the honor to request from you the following information, as speedily as circumstances may permit.

1. An account of receipts and expenditures for the last quarter of the last year, and of the surplus of revenue for the last year beyond the appropriations and actual expenditure.
2. A statement of the account between the United States, and the Bank, as it now stands; more especially with respect to the reimbursement of former loans.
3. The probability of obtaining from the bank, temporary loans, in anticipation of new revenue; suppose to the amount of 2,000,000 of dollars; the revenue to be raised by direct taxes.
4. The probability of obtaining from the banks, or individuals, permanent loans, for the current service of the year, on the basis of new revenues, with an efficient sinking fund. Suppose the loans to amount to 5,000,000 in irredeemable stock, at 6 per cent., and the sinking fund to 1,000,000, to be applied quarterly in the purchase of old and new stock, except the present six per cents; and aided by an adequate provision for supplying deficiencies in former revenue.
5. An estimate of the ordinary expense and revenue of the current year: meaning, by ordinary expense, all expenditures other than those for defence; and by ordinary revenue, that to arise from the present existing taxes of every kind.

With the greatest respect, I have the honor to be, sir, your very humble servant,

ROBERT G. HARPER.

Hon. Mr. WOLCOTT.

TREASURY DEPARTMENT, *April 27, 1798.*

SIR:

In compliance with the letter which you did me the honor to write on the 21st instant, I herewith transmit, for the use of the Committee of Ways and Means, the following statements:

- 1st. A prospective view of the revenue and expenditure of the United States for the entire year 1798, being an estimate of the ordinary expenditure of the United States, under existing laws, and the probable product of taxes of every kind.

2d. A statement of the actual receipts and expenditures of the United States, during the last quarter of the year 1797.

3d. A like statement of receipts and expenditures during the first quarter of the present year, which, though not finally adjusted, are presumed to be correctly exhibited.

4th. A statement of the balances which remained unexpended of certain appropriations for the current service, on the 30th of September, and 31st of December, 1797, and 31st of March, 1798.

5th. A statement of the loans obtained from the Bank of the United States, and the sums which remain unpaid.

The statements before mentioned comprise all the information required by the committee, and exhibit, in a connected series, the principal results of the operations of this Department, subsequent to those stated in the documents which accompanied my report of the 8th of December, 1797, to the first of the present month.

It is the duty of the commissioners of the sinking fund to apply to the reduction of the public debt all surplusses of the revenue of the United States, which remain at the end of any calendar year, beyond the amount of the appropriations charged upon the said revenues, and which, during the session of Congress next thereafter, are not otherwise appropriated, or reserved by law. In pursuance of this direction, upwards of one million and nine hundred thousand dollars were applied of the proceeds of revenue, to the reduction of the public debt, in the year 1797. The sums which remained in the treasury, were necessarily reserved for the current service; there cannot, therefore, be stated any surplus of revenue, for the last year, as a fund for new appropriations; the probable surplus of the present year above the sums which will be required for the foreign debt, the reimbursement of domestic six per cent. stock, and the support of existing establishments, is stated in the account numbered 1.

I entertain no doubt that the Bank of the United States will readily consent to continue the loans which they have made to the United States, and I feel entire confidence that funds can be obtained in anticipation of any solid revenues which can be established.

It is not easy to form a certain opinion of the sum, which can immediately be obtained on permanent loans, nor of the expense which will attend them. The United States are unquestionably entitled to credit on the most advantageous terms; the instalments in Holland, which became due prior to the present year, have been discharged; effectual remittances for the sums which will be payable before December next, have been assured; the sums of stock which are offered for sale are not considerable; there is no ground for distrusting the public ability or good faith; the present prices of stock are not considered as indications of distrust, but of the high value of money at the present time. Assurances have been received, from wealthy and influential men, that they will assist the United States with new loans, on reasonable terms. On these grounds, I conceive myself justifiable in expressing an opinion, that the public credit will afford resources adequate to any exigency which can be reasonably contemplated.

But to the success of new loans, and especially as a security against a too common abuse of the funding system, it is of the utmost importance to establish competent funds for the reimbursement, in a reasonable time, of any capitals which may be borrowed. The provision of a sinking fund, as mentioned in your letter, ought, therefore, to be considered as an indispensable requisite.

I have the honor to be, with perfect respect, sir, your obedient servant,

OLIVER WOLCOTT, *Secretary of the Treasury.*

The Hon. ROBERT GOODLOE HARPER, Esq.

Chairman of the Committee of Ways and Means.

<i>An estimate of the Expenditures of the United States, for the year 1798.</i>	Amount.	Total.
<i>For the Foreign debt, due in Amsterdam and Antwerp.</i>		
One year's interest on 27,500,000 guilders, calculated, according to the different contracts, at four, four and a half, and five per centum per annum, is	1,285,250	
First instalment of one million of guilders, obtained by a contract dated June 1st, 1784,	200,000	
Charges and commissions, estimated at	14,852 10	
	1,500,102 10	
Which sum of guilders, 1,500,102 10, estimated at 40 cents per guilder, amounts to		\$600,041 00
<i>For the domestic, funded, and unfunded debts.</i>		
Interest and reimbursement on \$29,430,423 61, of six per cent. stock, at 8 per cent.	\$2,354,433 88	
Interest on \$19,638,940 13, of three per cent. stock, at three per cent.	589,168 20	
Interest on \$1,848,900, of five and a half per cent stock, at five and a half per cent.	101,689 50	
Interest on \$176,000, of four and a half per cent. stock, at four and a half per cent.	7,920 00	
Interest on \$80,000, of new funded six per cent. stock, at six per cent.	4,800 00	
Interest on \$85,151 60, of the unfunded debt, being the amount on the first of Jan. 1798, calculated at six per cent.	5,109 09	
Amounting, in the whole, to		3,063,120 67
<i>For the interest on temporary loans.</i>		
On \$1,400,000, obtained of the Bank of the United States, at five per cent. per ann.	\$70,000	
On \$2,440,000, obtained of the said bank, at six per cent. per annum,	146,400	
		216,400 00
<i>Calculated upon the establishments which existed prior to the said year.</i>		
For the civil list,	\$460,227 41	
For the payment of annuities and grants,	1,863 33	
For the mint establishment,	11,700 00	
For diplomatic expenses,	103,650 00	
For the military establishment, viz:		
A sum equal to the expenditure of the year 1797,	\$1,069,247 03	
To which add the sum reported for deficiencies, on the 7th February, 1798,	164,165 95	
	1,233,412 98	
For military pensions,	93,400 00	
For the naval department, being a sum estimated for the pay and subsistence of the officers and men, and the repairs of the frigates, for one year,	373,645 00	
For the annual support of light-houses, and other establishments for the security of navigation, including the annual support of such new erections as are understood to be contemplated,	40,000 00	
For the annual expenditures required by the treaty with the Dey and Regency of Algiers, viz:		
The sum appropriated by the act of May 6th, 1796,	\$24,000	
To which is to be added, extra expenses incident to the purchase and transportation of certain articles, in consequence of the war in Europe, estimated at	48,000	
	72,000 00	
For Indian treaties,	11,000 00	
		2,400,898 72
<i>The following expenses, though not of a permanent nature, are necessary to be introduced into an estimate for the present year.</i>		
For the erecting new light-houses, beacons, buoys, and public piers,	\$40,000	
For the expenses incident to the treaties with Great Britain and Spain,	376,000	
For reimbursing the unfunded and registered debts, and the payment of old accounts, as proposed in the report of the Secretary of the Treasury, dated January 8, 1798,	130,000	
		546,000 00
For grants which may be made by Congress, and for deficiencies and errors in the general estimate now made, it appears proper to add at least,		100,000 00
Total expenditure,		\$6,926,460 39
Balance, being an estimated excess of revenue above the estimated expenditure for the year 1798, which will be applicable to the further reduction of the public debt, if not otherwise appropriated,		1,085,437 45
		\$8,011,897 84

<i>An estimate of the Revenue of the United States, for the year 1798.</i>				Dolls.	Cents.
<i>From duties on Imports and Tonnage.</i>					
The actual receipts during the three last years have been, viz:					
	Actual receipts in 1795.	Actual receipts in 1796.	Actual receipts in 1797.		
First quarter, from January 1, to March 31,	\$1,224,449 28	\$1,177,882 13	\$1,434,186 06		
Second quarter, from April 1, to June 30,	1,623,930 84	1,680,128 25	2,337,935 80		
Third quarter, from July 1, to September 30,	1,385,666 14	1,923,011 26	1,794,600 25		
Fourth quarter, from October 1, to December 31,	1,354,915 00	1,786,966 30	1,982,927 54		
	\$5,588,961 26	\$6,567,987 94	\$7,549,649 65		
The actual receipts, during the first quarter of 1798, amounted to				\$1,901,789 82	
From the foregoing data it is presumed that, notwithstanding captures, the revenue from duties on imports and tonnage, during the year 1798, may be calculated at					\$7,000,000 00
<i>From duties on domestic distilled spirits, stills, sales at auction, licences for selling foreign spirits and wines, by retail, refined sugar, and on carriages.</i>					
The actual receipts during the three last years have been viz:					
	Actual receipts in 1795.	Actual receipts in 1796.	Actual receipts in 1797.		
First quarter, from January 1, to March 31,	\$59,237 52	119,458 75	\$142,108 58		
Second quarter, from April 1, to June 30,	91,164 04	97,151 95	140,557 42		
Third quarter, from July 1, to September 30,	59,614 62	125,729 43	155,436 08		
Fourth quarter, from October 1, to December 31,	127,239 18	132,949 47	137,389 37		
	\$337,255 36	\$475,289 60	\$575,491 45		
The actual receipts, during the first quarter of the year 1798, amounted to				\$173,158 63	
It is probable that the internal revenues may be increased by measures for improving the collection; those above mentioned, for the year 1798, are calculated at				\$700,000	
To which may be added, for stamp duties, during six months,				100,000	
Making, in the whole,					800,000 00
From revenue on the postage of letters,					50,000 00
From fees on letters patent,					1,400 00
From the proceeds of that part of the sinking fund which consists of interest and stock, purchased as redeemed,					89,457 84
From dividends on 2,220 shares of capital stock of the Bank of the United States, belonging to the United States, calculated at thirty-two dollars per share,					71,040 00
Total revenue,					<u>\$3,011,897 84</u>

TREASURY DEPARTMENT, 27th April, 1798.

No. 134.

[2d Session.

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 19, 1798.

Mr. DWIGHT FOSTER, from the Committee of Claims, to whom was referred the petition of John Vaughan, made the following report:

That the petitioner states, that, between the 1st of January and 21st of November, 1795, he deposited in the mint of the United States, for coinage, a quantity of silver bullion, amounting to 230,888 oz. 10 dwts. of standard silver, as assayed and calculated by the then assayer of the mint, at the rate of nine parts fine to one part alloy, and received from the mint, in coined silver, the same quantity of silver, of the same standard; but that, by law, the said silver ought to have been assayed at the rate of 1485 parts fine to 179 parts alloy, and the coin delivered in exchange therefor, in the same proportion as by law established; and that, by reason of the superior fineness of the coin to the standard fixed by law, he has sustained a loss of two thousand two hundred and sixty dollars and thirty-two cents.

He further states, that the bullion which he deposited, was of fineness superior to the legal standard of the coins of the United States, which produced a great saving to the United States, by being mixed with bullion inferior to the standard, which had been previously deposited for coinage, and thereby saving the trouble, delay, and expense, of refining a quantity of bullion which was baser than the standard; that being obliged, however, to wait the coinage of the bullion deposited before his, he suffered great delays, and was long kept out of his money: Whereupon, he prays that he may be allowed interest on the same, after what he supposes a reasonable time for the coinage, until it was paid him.

The committee conceive, that, as the delay which Mr. Vaughan suffered, in obtaining his coin, took place only in the ordinary course of business, and without any fault of the United States, or of their officers, his claim for interest is wholly unfounded.

As to the other ground on which the petitioner claims, the committee find that, as stated by the petitioner, the standard, by law affixed for the silver coin, which has not been altered since the first establishment of the mint, is 1485 parts fine to 179 parts alloy; notwithstanding which, the coinage was commenced, and carried on, until the time when the present Director came into the management of the business, which was in the month of October, 1795, on an assumed standard of nine parts fine to one part alloy. The legal standard may be defined—ten ounces, fourteen pennyweights, five grains of fine silver, to one ounce, five pennyweights, nineteen grains of alloy; the assumed, or practical standard of the mint, until it has been changed by the present Director, ten ounces sixteen pennyweights fine, to one ounce and four pennyweights alloy. Hence, it followed, that the depositor of silver bullion, although he received coin which contained an equal quantity of fine silver with his deposit, did not receive that number of coins to which, by law, he was entitled; and coins finer than the legal standard being of no more value for circulation, than those exactly conforming to that standard, he was, of course, a loser by the difference. It should seem there could be no question but the depositor of bullion at the mint is entitled to receive its value in coins at the standard fixed by law, and that the public must be considered as contracting to this effect. The petitioner has not received the sum, in coin, which he ought to have received, by the amount of the difference caused by the variation of the assumed from the legal standard. The committee are, therefore, of opinion, that he is entitled to redress, and recommend to the House to adopt the following resolution:

Resolved, That the accounting officers of the Treasury allow to John Vaughan the amount of the difference in his favor, which would result from calculating the bullion by him deposited in the mint of the United States for coinage, at the rate of 10 oz. 14 dwt. 5 gr. fine, to 1 oz. 5 dwt. 19 gr. alloy, instead of 10 oz. 16 dwt. fine, to 1 oz. 4 dwt. alloy.

5th CONGRESS.]

No. 135.

[2d Session.

APPORTIONMENT OF DIRECT TAXES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 25, 1798.

TREASURY DEPARTMENT, May 25, 1798.

Sir:

Having been requested to exhibit a calculation of the quotas of the respective States, in a tax of two millions of dollars, proportioned to the number of free white persons, and three-fifths of the number of slaves, as ascertained by the census; also my opinion of what would be a proper rule for apportioning to individuals the proposed tax on lands, houses, and slaves, I respectfully submit the following results and observations:

The enumeration, or census, by which the tax must be apportioned, was taken with reference to the first Monday of August, 1790, when the number of persons in the United States was as follows:

Free white males of sixteen years and upwards, including heads of families,	- - -	813,365
Free white males under sixteen years,	- - -	802,127
Free white females, including heads of families,	- - -	1,556,682
Other free persons, exclusive of Indians,	- - -	59,511
Total number of free persons, exclusive of Indians,	- - -	3,231,631
Slaves 697,697, of which number three-fifth parts are taken, or,	- - -	418,619
Total, or representative number,	- - -	3,650,250

The following are the quotas of the respective States, in a tax of two millions of dollars, calculated according to their relative numbers of free persons, exclusive of Indians, and including three-fifths of the number of slaves, to wit:

The quota of New Hampshire,	- - - -	\$77,705 36.2
Massachusetts,	- - - -	260,435 31.2
Rhode Island,	- - - -	37,502 8.0
Connecticut,	- - - -	129,767 00.2
Vermont,	- - - -	46,864 18.7
New York,	- - - -	181,680 70.7
New Jersey,	- - - -	98,378 25.3
Pennsylvania,	- - - -	237,177 72.7
Delaware,	- - - -	30,430 79.2
Maryland,	- - - -	152,599 95.4
Virginia,	- - - -	345,488 66.5
Kentucky,	- - - -	37,643 99.7
North Carolina,	- - - -	193,697 96.5
Tennessee,	- - - -	18,806 38.3
South Carolina,	- - - -	112,997 73.9
Georgia,	- - - -	38,814 87.5
Total of the proposed tax,	- - - -	<u>\$2,000,000 00</u>

It is proposed that the direct tax be assessed to individuals in the following manner:

- I. On dwelling houses, to be distributed into nine classes, and taxed uniformly in each class.
- II. On slaves, to be taxed uniformly.
- III. On lands, to be taxed at such a rate ad valorem in each State, as, with the sums assessed on houses and slaves, will produce the entire amount of the sums apportioned to the respective States.

It being proposed to tax dwelling houses and slaves by uniform rules, an estimate of the sums which may be assessed on these objects appears to be important.

I. *Of Dwelling Houses.*—The number of free persons in the United States, in the year 1790, was 3,231,631. The number, at present, may be estimated at four millions. It is computed that there is a dwelling house for every seven persons—of course, that there are about five hundred and seventy thousand dwelling houses in the United States.

It is proposed by the bill, as reported, to exempt from specific taxation, all houses, with the lots on which they are erected, not exceeding two acres, in any case, of which the value is less than two hundred dollars. It is important to ascertain what would be the probable effect of an exemption of this nature, and it is much to be regretted that the public documents afford no certain data for a calculation. After a due consideration of information recently obtained, it, however, appears probable, that a much more considerable number of houses would be exempted than was contemplated by the committee. Owing to the great number of settlements which have been lately formed, and the moderate value of land, in large districts of the United States, it is not unlikely that two hundred and twenty thousand houses would be included in the exemption. As houses are believed to be the most certain and eligible objects of taxation to which resort can be had; as inconveniencies might arise from an exemption in favor of what probably is the most numerous description of houses in some parts of the country; and as, in new settlements, dwelling houses of small value ought not to be considered as indications of poverty, the following classification, which is somewhat different from that reported, is respectfully submitted, to wit:

1st Class. To comprise all houses and lots not exceeding two acres, on which the same are erected, exceeding eighty dollars in value, and not exceeding two hundred dollars.

2d Class. To comprise all houses and lots exceeding in value two hundred dollars, and not exceeding six hundred dollars.

3d Class. To comprise all houses and lots exceeding in value six hundred dollars, and not exceeding twelve hundred dollars.

4th Class. To comprise all houses and lots exceeding in value twelve hundred dollars, and not exceeding two thousand dollars.

5th Class. To comprise all houses and lots exceeding in value two thousand dollars, and not exceeding four thousand dollars.

6th Class. To comprise all houses and lots exceeding in value four thousand dollars, and not exceeding six thousand dollars.

7th Class. To comprise all houses and lots exceeding in value six thousand dollars, and not exceeding ten thousand dollars.

8th Class. To comprise all houses and lots exceeding in value ten thousand dollars, and not exceeding twenty-five thousand dollars.

9th Class. To comprise all houses and lots exceeding in value twenty-five thousand dollars.

Notwithstanding it is proposed to assess a tax on all houses exceeding the value of eighty dollars, yet a considerable number would still remain exempted. It is probable, however, that, if the above-mentioned rule of classification should be adopted, five hundred thousand houses would be included.

The following estimate of the number of houses of each class, and rate of assessment, are submitted to the committee:

1st class, 150,000 houses,	- - - -	at 50 cents each,	- - - -	\$75,000
2d class, 200,000 do.	- - - -	at \$1 50 do.	- - - -	300,000
3d class, 100,000 do.	- - - -	at 3 00 do.	- - - -	300,000
4th class, 30,000 do.	- - - -	at 6 00 do.	- - - -	180,000
5th class, 10,000 do.	- - - -	at 12 00 do.	- - - -	120,000
6th class, 5,000 do.	- - - -	at 20 00 do.	- - - -	100,000
7th class, 3,000 do.	- - - -	at 30 00 do.	- - - -	90,000
8th class, 1,500 do.	- - - -	at 60 00 do.	- - - -	90,000
9th class, 500 do.	- - - -	at 120 00 do.	- - - -	60,000
<u>\$500,000</u>				

Estimate of the product of the proposed tax on houses, - - - - \$1,315,000

II. *Of Slaves.*—A tax of two millions of dollars apportioned to the aggregate number of free persons in the United States, and to two-fifths of the number of slaves, according to the census, would be as follows:

Proportion of 3,231,631 free persons,	- - - -	1,770,635 43
Proportion of 418,619, being three-fifths of the number of slaves,	- - - -	229,364 57
Total,	- - - -	<u>\$2,000,000 00</u>

The number of slaves in the United States has probably increased since the time when the census was taken; but, as it will doubtless be deemed advisable to exempt certain descriptions, especially the aged and infirm, it will not be safe to calculate on a greater number than six hundred thousand taxable slaves. A tax of thirty-eight cents on

each slave, may be calculated to produce \$228,000. This sum nearly corresponds with the ratio of assessment to slaves, according to the constitution, which may be presumed to afford a rule equally equitable in respect to individuals.

III. <i>Of Lands.</i> —According to the preceding estimate, the tax on houses, as proposed, would produce	\$1,315,000
And the tax on slaves,	228,000
Leaving to be raised by an assessment ad valorem, upon lands, the sum of	457,000
Amount of the proposed tax,	\$2,000,000

The sum proposed to be assessed on lands, will be found to be less, in proportion to other objects, than would be payable in most of the States, if the State systems should be adopted. It must also appear to be a tax really moderate, when the immense value of that species of property in the United States is duly considered. The variety of the principles upon which the State assessments have been formed, precludes, however, the possibility of an estimate of the probable rate of assessment in the different States.

To facilitate the receipt of the tax into the treasury; to exemplify the operation of the law upon the different objects of taxation; to diminish the risk of collection; and render the burden as light as possible to individuals; it is proposed that the proportions to be laid on houses and slaves should be immediately assessed and passed to the credit of the respective quotas of States. While these parts of the tax are in a course of collection, arrangements can be made for taking a valuation of the lands, and apportioning the balances, to be collected as a second instalment of the proposed tax.

I have the honor to be, with perfect respect, sir, your obedient servant,

OLIVER WOLCOTT.

The Hon. ROBERT GOODLOE HARPER,
Chairman of the Committee of Ways and Means.

5th CONGRESS.]

No. 136.

[2d SESSION.]

EXPENDITURES OF THE EXECUTIVE DEPARTMENTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JULY 5, 1798.

Mr. HARPER made the following report:

The Committee appointed to inquire and report, by bill or otherwise, "whether any, and what, alterations are necessary in the various acts establishing the Executive Departments, so far as relates to the manner of distributing the moneys appropriated for each, and settling their accounts," having attentively considered the subject, and conferred with the heads of those Departments in which it was supposed that an alteration might be necessary, beg leave to present to the House, as the result of their inquiries, the following report:

The first of the now existing Executive Departments, established under the Government of the United States, was the Department of War. The act for erecting this Department, passed on the 7th of August, 1789, directs that the head of it, the Secretary, "shall perform and execute such duties as shall, from time to time, be entrusted to him by the President of the United States, agreeably to the constitution, relative to military commissions, or to the land or naval forces, ships or warlike stores of the United States, or to such other matters respecting military or naval affairs, as the President of the United States shall assign to the said Department;" but no provision was made, by this act, respecting the disbursement of moneys, for the use of this Department, or the settlement of its accounts.

On the 2d of September, 1789, the act for establishing the Treasury Department was passed. This Department, as established by the act in question, was solely a department of finance; a department for improving, superintending, and collecting the public revenue; adjusting the accounts of public expenditure, and paying out the public moneys, pursuant to appropriations by law. To the Secretary of the Department were assigned the duties of digesting and preparing plans for the improvement and management of the revenue, and the support of the public credit; of superintending the collection of the revenue; of deciding on the forms of keeping and stating accounts and making returns; of granting warrants for moneys to be issued from the treasury, pursuant to appropriations by law; of conducting the sale of public lands; of reporting to either House of Congress, on subjects referred to him, or appertaining to his office; and of performing all such services, respecting the finances, as he might be directed to perform. Under the superintendence of this chief officer, the duties incident to the general objects of the Department are divided into four classes, and assigned to the Comptroller, the Auditor, the Register, and the Treasurer.

The War Department being, therefore, a department solely of expenditure, and the Treasury a department of collection and account, it would seem to have been the natural and proper course, that all sums appropriated by law for the Department of War, should be drawn out of the treasury, by the head of that Department, and expended solely under his direction. He would then have remained exclusively responsible for the expenditure, not only as to its objects, but as to its amount; he would not only have judged what was necessary for the use of his Department, in every various branch of the service, but he would have procured all the supplies; and the accounts, in their minutest details, would have remained under his control. The Secretary of the Treasury would have had no concern with the War Department, further than to give warrants for the moneys appropriated for its use, and to take care that these warrants did not exceed the appropriations. The amount of those warrants being an acquittal to the Treasury Department, would have constituted a charge against the Secretary of War; and the accounts of their expenditure, made under his sole direction, and finally adjusted by the Auditor and Comptroller of the treasury, would have furnished his acquittal. Thus the responsibility of each department, as well as its operations and accounts, would have been distinct and entire.

This course, however, was not adopted. On the contrary, the duties of the two Departments, relative to the expenditure of moneys for the military and naval service, were blended together in practice; but the part allotted to each was not very precisely defined. It may, however, be generally stated, that all contracts for rations, clothing, and magazine supplies, were made at the treasury, while all expenditures for other objects remained under the direction of the Secretary of War.

On this footing the business continued till the 8th of May, 1792, when an act was passed "for making alterations in the Treasury and War Departments."

By this act, the office of "Accountant for the War Department" is created; and the Accountant is charged "with the settlement of all accounts relative to the pay of the army; the subsistence of officers; bounties to soldiers; the expenses of the recruiting service; and the incidental and contingent expenses of the Department."

The act then goes on to make provisions to the following effect:

1st. That all contracts and purchases for supplying the army with provisions, clothing, supplies in the quartermasters' department, military stores, Indian goods, and all supplies or articles for the use of the Department of War, be made under the direction of the Treasury Department.

2d. That all expenditures for the pay of the army; the subsistence of officers; bounties to soldiers; the expenses of the recruiting service; and the incidental and contingent expenses of the Department of War; shall be made in pursuance of warrants from the Secretary of War, out of moneys previously ordered for the use of the said Department, by warrants from the treasury.

Hence it results, that the expenditures for the War Department fall under two general divisions; those for supplies of all kind, and those for services and contingent expenses.

The expenditures of the first class, instead of being directed by the Secretary of War, and accounted for by him, are under the management of the Treasury Department, the Secretary of which is converted into an agent of the Department of War, for this purpose. The business is conducted in the following manner: The Secretary of War informs the Secretary of the Treasury, by letter, what supplies are necessary for the Department of War, of what nature, when wanted, and, in some instances, where to be delivered; and also furnishes the necessary samples, patterns, forms, and models. The Secretary of the Treasury is then bound to comply with the demand of the War Department, to the extent of the appropriations which have been made by law, and the purveyor of public supplies, whose office was instituted by a subsequent act, is the organ of execution, under his direction.

Two modes of procuring those supplies are in use at the treasury: contract and purchase.

Contracts are, also, of two descriptions: the larger, such as those for clothing and provisions, which are executed by the Secretary of the Treasury himself, and distinct accounts of which are opened in the public books; and the smaller, such as those for occasional supplies, which are concluded by the purveyor, and comprised in the general settlement of his accounts.

Purchases of supplies, when they can be effected at the seat of Government, are made by the purveyor; and this is his chief employment. For purchases in the country, and for procuring occasional supplies at military and recruiting posts, the Secretary of the Treasury employs the agency of the supervisors and the collectors of the customs.

The accounts of the purveyor and of all agents and contractors, for procuring or furnishing supplies, are settled at the treasury, without any agency or interference of the War Department. They pass first under the examination of the Auditor, who reports them to the Comptroller, and his decision on them is final.

When supplies are procured and delivered, according to the requisitions of the War Department, they become, from that time, subject to the disposal of the Secretary of War, and the duty and responsibility of the Secretary of the Treasury are at an end.

The second class of expenditures in the Department of War, those for services and contingent expenses, including the pay of the army, subsistence of officers, bounties, recruiting, protection of the frontiers, &c. are made under the sole direction of the Secretary of War. The money for these objects is drawn out of the treasury, in the following manner:

The Secretary of War addresses a letter to the Secretary of the Treasury, requesting an advance of money to the Treasurer of the United States, in his capacity as treasurer for the War Department. This letter specifies the sum wanted, and the head of appropriation under which it is to be applied. The Secretary of the Treasury complies with this request, to the extent of the appropriations which have been made by law. A warrant for the proper sum, signed by the Secretary, countersigned by the Comptroller, and recorded by the Register, is drawn on the Treasurer of the United States, in favor of himself, as treasurer for the War Department. The warrant being paid, the amount is charged to the War Department, in the books of the treasury, and from that time remains subject to the disposal of the Secretary of War, who draws it out, as occasions may require, by warrants signed by himself, and countersigned by the Accountant.

An account of all these warrants is kept by the Accountant, and to him all the accounts for the expenditure of the moneys drawn under them, are rendered in the first instance. He adjusts these accounts, and reports them, like all other accounts of public expenditure, to the Auditor of the Treasury. From him they pass to the Comptroller, whose decision on them is final.

In this last branch, therefore, of the expenditures for the Department of War, the agency, control, and responsibility of that Department, are complete, and the accounts are susceptible of a clear and distinct division and adjustment. The Secretary of War draws from the treasury the moneys appropriated by law, expends them, and accounts for them. In this expenditure and account, the Accountant of the Department is his agent, and his accounts being made up and stated by the Accountant, are submitted, with his vouchers, to the Auditor and Comptroller of the Treasury, and by them finally settled, like the accounts of all other persons entrusted with public money. The Secretary of the Treasury has no further concern in the business than to pay out, to the Secretary of War, the moneys appropriated by law for that Department. Here is a perfect and entire responsibility in each: in one, that the public money is paid out of the treasury, according to law; in the other, that, when paid out, it is expended according to law.

But in the other great branches of these expenditures, those which relate to stores and supplies of all kinds, for the use of the military department, there is a divided, and, consequently, an imperfect responsibility, and an incomplete interfering agency. The Secretary of War judges what supplies or stores are necessary; but, instead of directing them to be procured, and drawing money out of the treasury to pay for them, he informs the Secretary of the Treasury that they are wanted, and he must procure them. Thus the first officer is responsible for the necessity of the supplies, and the second for their price, quality, and due delivery. The moneys appropriated for the War Department are expended by the Secretary of the Treasury; and he is converted, as far as respects these expenditures, into a subordinate agent of the Department of War. The supplies are purchased for one purpose, and charged to the corresponding head of appropriation. When placed in the public stores, they are found useful for another purpose, and accounted for under another head. The Secretary of War, who uses them, does not know to what account they are charged; and the Secretary of the Treasury, who purchases and charges them, does not know for what purpose they are used. Hence must result an endless confusion and uncertainty in the accounts, and it becomes difficult, if not impossible, to ascertain what expenses are incurred for any particular branch of the military service. The Secretary of War cannot be responsible for the expenditure of the moneys appropriated for his Department, since he does not know at what rate the necessary supplies are procured. Neither can he be responsible for the due performance of the service, for it does not depend upon him to take care that the supplies are procured, either in due time, in the necessary quantities, or of a proper quality. On the other hand, the Secretary of the Treasury cannot be responsible for the due execution of the public service, since it does not depend upon him to cause the supplies which have been procured, to be properly used.

The Secretary of the Treasury, moreover, being thus employed in duties which belong to another department, may be prevented, by the burdensome nature of those duties, from applying himself, with proper effect, to the peculiar objects of his own; which are the superintendence, improvement, and collection, of the public revenue—duties sufficiently extensive and important to occupy, exclusively, the attention of any one person.

All the observations which have been made, with respect to the Department of War, apply with equal force to the Department of the Navy, the duties of which were originally committed to the War Department, and are still subject to the provisions of the Act of May 8th, 1792. The extensive operations which may be expected in this Department, and the great increase of public business which is likely to result, from the actual state of public affairs, will, it is apprehended, add greatly to the inconveniences resulting from the present organization.

These inconveniences the Committee suppose may be removed, or greatly obviated, by adopting a new arrangement, with respect to expenditures for supplies, and placing them on the same footing with the expenditures for services. They propose, also, to establish the office of Accountant in the Department of the Navy; to place the Purveyor of Public Supplies under the direction of the Navy and War Departments, and to direct that the moneys

appropriated for those Departments be accounted for, under such separate heads of appropriation, as will give a clear view of the amount expended in each branch of the public service.

In this manner the duties and the responsibility of each Department will be rendered distinct and entire, each will be confined within its proper sphere, and the accounts of public expenditure will be kept with order, precision, and clearness.

In conformity to these ideas, and pursuant to the power given to them by the House, the Committee herewith report a bill containing the regulations which they think it expedient to adopt.

5th CONGRESS.]

No. 137.

[3d SESSION.]

DUTIES RECEIVED FROM SPIRITS, STILLS, SALES AT AUCTION, REFINED SUGAR, CARRIAGES, AND LICENCES TO RETAILERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 13, 1798.

TREASURY DEPARTMENT, *December 13, 1798.*

SIR:

I have the honor to transmit, herewith, sundry statements, exhibiting the amount of duties upon domestic distilled spirits and stills, for the year ending the 30th of June, 1797; also, the amount of duties upon sales at auction, refined sugar, carriages, and licences to retailers, for the year ending the 30th of September, 1797, as ascertained from abstracts rendered by the supervisors of the respective districts; with a letter from the Commissioner of the Revenue, dated the 7th instant, explanatory of the same.

I have the honor to be, with perfect respect, sir, your obedient servant,

OLIVER WOLCOTT.

The Honorable the SPEAKER of the *House of Representatives.*

TREASURY DEPARTMENT, *Revenue Office, December 7, 1798.*

SIR:

The statements which are enclosed exhibit the amount of duties upon domestic distilled spirits and stills, for the year ending on the 30th June, 1797; also, the amount of duties upon sales at auction, refined sugar, carriages, and retailers' licences, for the year ending on the 30th September, 1797; all which have been ascertained by the officers employed in levying and collecting the same, as appears from abstracts rendered by the supervisors of the respective districts. A column annexed to the general statement shews the aggregate amount of salaries and commissions, to which the officers are entitled, in pursuance of the President's act of the 9th April, 1795. The other charges are disbursements for stationary, printing, and postage; allowances for signing and issuing certificates to accompany domestic distilled spirits, and for measuring and marking stills and gauging casks; but, as these cannot be correctly ascertained, until the accounts and vouchers from all the districts, for the period referred to, have passed inspection, and been decided on by the proper officers of the department, I have deemed it inexpedient to incumber this statement with them.

In further ascertaining the nett product of these revenues, the following considerations ought to be taken into view:

First. The difficulties and delays which proceed from authorized credits on some of the duties, and especially those on stills, expose the system to great irregularities and frequent losses in the collection.

Second. The insufficiency of the powers vested in the Treasury Department (prior to the passage of the act of July, 1798) for compelling the various classes of officers to render their accounts with due punctuality, and to pay over their respective balances, has, in some instances, occasioned embezzlement and delinquency.

The revenues of 1796-7 having been exposed to abuses from both these sources, it may be expected that some defalcation will be eventually experienced.

Although formal accounts of the state of the revenue have not yet been received from the district of Ohio, it is satisfactory to know, that, by the vigilance and exertion of the present supervisor, order has been introduced. The duties in this district, for the year ending June 30th, 1798, are estimated from thirty to forty thousand dollars; the aggregate amount ascertained for the three preceding years very little exceeds that sum.

In conformity to the 10th section of the act passed 11th July, 1798, the several officers employed in collecting the internal revenues have been instructed to keep accurate accounts of their official emoluments and expenditures, and to transmit the same annually, on the last day of December. As soon as they are received, I shall cause the necessary abstracts to be made out, in order that they may be laid before Congress.

I have the honor to be, very respectfully, your obedient servant,

WILLIAM MILLER, *Commissioner of the Revenue.*

The Honorable the Secretary of the Treasury.

A Statement of the duties upon domestic distilled Spirits and Stills, during the year ending on the 30th June, 1797.

In what District	Amount of duties arising on spirits distilled from foreign materials, and on spirits distilled from domestic materials in cities, towns, and villages, from stills of 400 gallons capacity and upwards.	Amount of duties arising on spirits distilled from domestic materials, in places other than cities, towns, and villages, and in cities, towns, and villages, from stills under 400 gallons capacity, and on stills.	Total amount of duties arising and payable in each district.

No. 138.

[3d Session.]

SINKING FUND.

COMMUNICATED TO THE SENATE, DECEMBER 17, 1798.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their report of the 4th of December, 1797, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the 12th of December, 1798, and in the proceedings of the accounting officers therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

JOHN LAURANCE, *President of the Senate pro. tem.*

December 15th, 1798.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That no purchases of the debt of the United States have been made since the date of the last report to Congress, on the 4th day of December, 1797; and that the sums heretofore purchased amount to two millions three hundred and seven thousand six hundred and sixty-one dollars and seventy-one cents, for which there have been paid, in specie, the sum of one million six hundred and eighteen thousand nine hundred and thirty-six dollars and four cents, as will more particularly appear from the document hereto annexed, marked A.

That the following sums have been applied towards the discharge of the principal debt of the United States, since the date of the last report to Congress, of the fourth of December, 1797.

1st. To the third instalment of the six per cent. stock, bearing a present interest, which, pursuant to the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," passed on the third day of March, one thousand seven hundred and ninety-five, and the act in addition thereto, passed on the twenty-eighth day of April, one thousand seven hundred and ninety-six, became payable on the first day of January, one thousand seven hundred and ninety-eight, the sum of.	\$638,016 3
2nd. To the payment of an instalment of the subscription for bank stock due on the last day of December, one thousand seven hundred and ninety-seven,	200,000 00
3rd. To the payment of the second instalment of the loan of 800,000 dollars, obtained of the Bank of the United States, pursuant to an act passed on the 21st of February, 1795,	200,000 00
4th. To the payment of the first instalment of a loan of one million of guilders, in Holland, which fell due the present year, pursuant to a contract dated the 1st June, 1787, estimated at forty cents per guilder,	80,000 00
	\$1,118,016 03

The payments before enumerated have been made out of the following funds:

1st. The interest fund on the sums which accrued upon the stock purchased and vested in the commissioners of the sinking fund, in trust for the United States, as particularly stated in the document hereto annexed, marked B,	88,912 87
2nd. The fund arising from the payment of the debts which originated prior to the present constitution of the United States, as particularly stated in the document marked C,	17,714 95
3rd. The fund arising from the sales of lands in the Northwestern territory, as particularly stated in the document hereto annexed, marked D,	88,376 73
4th. The funds arising from established revenues, and appropriated for the reduction of the debts of the United States, being for the period, and in reference to the objects, contained in this report,	923,011 48
Making, in the whole, a sum equal to the reimbursements before mentioned,	\$1,118,016 03

The growing produce of the interest funds, together with the sums received and expected from established revenues, are estimated by the Secretary as sufficient for the reimbursement of the fourth instalment of the six per cent. stock, bearing a present interest. A statement of the amount and application of the said funds will be exhibited to the Board with the next report.

All which is most respectfully submitted, by

OLIVER WOLCOTT, *Secretary of the Treasury.*

TREASURY DEPARTMENT, 12th of December, 1798.

A.

Statement of the Purchases of Public Stock by the Agents to the Trustees named in the Act for the Reduction of the Public Debt.

	Six per cent stock.	Three per cent. stock.	Deferred stock.	Amount of the several species of stock.	Moneys expended in purchasing debt.
Total amount of stock purchased by the agents to the trustees, as per report to the House of Representatives, dated 4th December, 1797,	\$907,816 64	\$511,860 63	\$887,984 44	\$2,307,661 71	\$1,618,936 04
<p>I do hereby certify, that the trustees named in the acts for the reduction of the public debt, have credit on the books of the several stocks at the treasury of the United States, for the sums above stated, in the several columns of six per cent., three per cent., and deferred stock; and the amount thereof, being public debt, extinguished by their purchases, is two millions three hundred and seven thousand six hundred and sixty-one dollars and seventy-one cents, for which the sum of one million six hundred and eighteen thousand nine hundred and thirty-six dollars and four cents, in specie, was paid from the public treasury, from the following funds, viz:</p> <p>Surplus duties to the end of the year 1790, \$957,770 65: amount purchased therewith, Loan of \$2,000,000, 434,901 89: amount purchased therewith, Interest on stock purchased and redeemed, 226,263 50: amount purchased therewith, \$1,618,936 04</p>	\$439,016 12	\$401,072 90	\$631,786 86	\$1,471,875 88

No. 139.

[3d SESSION.

VALUATION OF LAND AND DWELLING HOUSES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 21, 1799.

Mr. HARPER made the following report:

The Committee of Ways and Means, instructed, by a resolution of the 9th instant, to inquire and report, by bill or otherwise, whether any, and what, amendments are necessary to be made in the act, entitled "An act to provide for the valuation of lands and dwelling houses, and the enumeration of slaves within the United States," have attended carefully to that subject, and agreed to the following report; which they beg leave to submit to the consideration of the House:

The attention of the committee has been particularly directed to two parts of the act under which, as far as they have been able to learn, the difficulties yet standing in the way of its execution, have arisen: that which relates to the duty and compensation of assessors, and that respecting the description of dwelling houses.

As to the first, it appears that, although proper persons have, in several States, been prevailed on to act as assessors, at the present rate of compensation, yet instances have occurred in important and extensive districts, where it has been found impossible to procure proper assessors, on account of the smallness of the compensations, and that this difficulty may be apprehended, perhaps in an increased degree, in some States where the appointment of assessors, as far as is now known, has not yet been attempted. The committee have been able to perceive no other remedy for it, than to authorize the Secretary of the Treasury, under the direction of the President, to increase the compensations of assessors, in those cases where he may find it necessary—so, however, as that no assessor, principal or assistant, shall receive more than two dollars per day, in the whole; and this measure they recommend to the House.

It further appears, that difficulty and delay arise from the want of a provision for clerks to the principal assessors, whose duty, in the execution of the law, is very important, and must often require a degree of skill in accounts, not always possessed by persons otherwise perfectly well qualified for that office. The committee, therefore, conceive that a clerk ought to be allowed to each principal assessor, his compensation not to exceed one dollar per day while actually employed, and his accounts to be settled like those of the assessors, by the Board of Commissioners.

The committee also find, that some inconveniences have already been experienced from the shortness of time allowed to principal assessors for receiving appeals, and that more may be probably expected. This time, as fixed by the act, is fifteen days, and the commissioners have no power to extend it in any case. Such a power the committee suppose it would be proper to give them.

It has also been suggested, that the time allowed by the act for the assistant assessors to make their returns, which is thirty days, is too short, and ought to be extended; or, at least, that the commissioners ought to be vested with a power to extend it; but, this idea has been rejected by the committee, for reasons detailed in a letter from the Secretary of the Treasury, which is annexed to this report, and whereto they beg leave to refer.

Under the second head, the description of dwelling houses, the committee find that the provision of the law, which requires that the lists to be delivered by individuals to the assistant assessors, shall contain "the number and dimensions of windows" in every dwelling house, has given rise to much discontent in several parts of the country, and to considerable consequent embarrassment in obtaining the lists. This discontent has proceeded, in part, from the trouble which people find in measuring their windows, and in a much greater degree, from an apprehension, among the country people, that this return of windows was intended as the ground work of a window tax. Wholly unfounded as this apprehension is, it has produced already, embarrassing effects. The return of the number and dimensions of windows in each dwelling house was required in order to furnish the commissioners, who are to judge of the valuations in the last resort, with as many and as certain criterions as possible, for guiding their judgment, in respect to dwelling houses, which it is absolutely impossible for them to inspect individually; and it was conceived that the number and dimensions of the windows in a dwelling house, would, in general, afford a pretty just criterion of its value. But further inquiry and consideration have induced the committee to believe, that any information to be obtained from these returns, will be far less useful in guiding the judgment of the commissioners, than was at first supposed; since the number and size of windows varies so much, according to taste, situation, fashion, and other circumstances; while the inconveniences resulting from the measure are real and considerable. They are, therefore, of opinion, that so much of the act as requires that each list shall, in respect to dwelling houses, contain the "number and dimensions of windows," ought to be repealed.

Pursuant to these ideas, the committee have prepared a bill, which they herewith present to the House.

TREASURY DEPARTMENT, *January 18th, 1799.*

SIR:

On the subject of that part of your letter of the 11th instant, relating to the "Act providing for the valuation of lands and dwelling houses, and the enumeration of slaves," I have the honor to observe—

1st. That the appointments of commissioners and assessors, under the act above mentioned, appear not to have been accepted in any part of the United States with a view to emolument. By appealing to the patriotism of the country, men of talents and respectability have generally been found, who are willing to discharge the duties enjoined by the law. Some delays were experienced in consequence of the sickness in the cities, and by resignations of a number of the gentlemen who were first named as commissioners; the vacancies are now presumed to be all filled by persons who will serve; and great progress has been made in the valuations in most of the States. The greatest delays have arisen in the distant States of Kentucky, North Carolina, South Carolina, and Georgia.

So far as information has been received, the appointments of assessors are understood to have been well filled; but there are several parts of the country, though comparatively of small extent, where obstacles, apparently insurmountable, have been experienced from the insufficiency of the compensations. From the most Southern States, no information of the appointment of assessors has been yet received, and great difficulties are represented as likely to arise in that quarter. It, therefore, appears to be expedient to appropriate a sum of money, subject to the disposal of the President, to be applied in augmenting the compensations in such cases as he shall judge necessary and expedient.

2d. The period of thirty days will, in most cases, be sufficient for taking the lists of individuals, and delivering them to the principal assessors; and some time ought to be prescribed, within which the business should be performed. It is, however, understood, that the doings of the assessors will be valid, though not performed within thirty days; and that they will be entitled to compensation for such time as may be really necessary, and during which they may be diligently employed. The commissioners will judge, according to the circumstances of each case, whether the penalty imposed by the seventeenth section has, or has not, been incurred, and will be governed accordingly.

3d. The direction in the 9th section, requiring a particular description of dwelling houses, and other buildings, particularly in respect to the number and dimensions of windows, has occasioned considerable discontent; the unpopularity and labor occasioned by the necessity of this detail, has been already encountered in the Eastern States; but as much remains to be done in the Middle and Southern States, as the popular objections are represented to be very embarrassing to the assessors, particularly in Pennsylvania, it is respectfully suggested to be expedient to vary the law, so as to require no other than a general description of dwelling houses, and other buildings, with their value.

4th. The term of fifteen days appears to be sufficient, as a general rule, for the purpose of receiving appeals; and the time for determining them is conceived to be discretionary, under the direction of the commissioners. No objection, however, occurs against vesting an authority to prolong the time for receiving appeals in special cases.

I apprehend greater difficulties from the trouble and expense which will attend the calculation of the sums to be paid by individuals, according to the act imposing a direct tax, than from any cause whatever; and I fear that, in some quarters of the country, they will greatly retard the final execution of the law. If it shall be thought expedient to attempt a reconsideration and revival of the act, and it shall be agreeable to the committee, I will particularly explain my sentiments on this subject.

For the purpose of general information in respect to the details of the valuations, I have the honor to enclose copies of two circular letters to the commissioners, dated the 7th of August and 8th of September, 1798.

I have the honor to be, with perfect respect, sir, your obedient servant,

OLIVER WOLCOTT.

The Honorable ROBERT G. HARPER, Esq.

Chairman of the Committee of Ways and Means.

5th CONGRESS.]

No. 140.

[3d SESSION.]

MINT.

COMMUNICATED TO CONGRESS, JANUARY 31, 1799.

*Gentlemen of the Senate, and
Gentlemen of the House of Representatives:*

I have received a report from the Director of the Mint, on the state of the business committed to his superintendence, and a statement of the coinage of the mint of the United States, for the year 1798, which it is proper to lay before Congress.

January 31, 1799.

JOHN ADAMS.

To the President of the United States.

The Director of the Mint thinks it his duty to review his annual report on the state of the business committed to his superintendence, for the information of Government.

With pleasure he refers the President to the enclosed returns of issues of the several species of coin from the mint, since the first of January, 1798; during which time, the coinage has been stopped near three months, occasioned by the late calamitous fever, and the decay of some of the machinery. Yet, by these returns, it will appear that the coinage of gold amounts, in value, to 205,610 dollars; that of silver, to 330,291 dollars; and that of copper, to 9,797 dollars; in the whole, amounting to 545,698 dollars; exceeding, in value, nearly double what has ever been coined at the mint in any one preceding year, and increases the whole amount of the coinage, since the commencement of the business, in October, 1794, to 483,245 dollars, in gold; 792,643 dollars, 75 cents, in silver; and 41,004 dollars, 74 cents, in copper; amounting, in the whole, to 1,316,893 dollars 49 cents.

From information the Director has received, he has no doubt but there will be a full supply of silver bullion for the ensuing year, at the present establishment of the mint; and the frequent deposits of gold, give him encouragement to suppose a proportionate supply of that precious metal will be kept up. The present arrangement, with regard to copper coin, will enable the Director, during the course of the next summer, to supply any demand that is likely to be made for cents, and at present there are a considerable number on hand.

The Director cannot, with propriety, close this report, without mentioning, that, during the last summer, a scheme was discovered for robbing the mint, by persons out of it, in concert with one person employed in the mint; and although the offenders have been detected, prosecuted and punished, yet it fully justifies the observations heretofore offered to the President, on the unprotected state of the mint, to which the Director begs leave to refer.

All which is respectfully submitted to the President.

ELIAS BOUDINOT, *Director.*

MINT OF THE UNITED STATES, *Treasurer's Office, Jan. 3, 1799.*

BENJAMIN RUSH.

5th CONGRESS.]

No. 141.

[3d SESSION.

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 31, 1799.

TREASURY DEPARTMENT, *January 31st, 1799.*

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, dated the 30th instant, accompanied with certain statements, which have been prepared under the direction of that officer, in pursuance of the seventh section of the act passed on the 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States."

I have the honor to be, with perfect respect, sir, your obedient servant,

OLIVER WOLCOTT.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Comptroller's Office, January 30th, 1799.*

SIR:

In obedience to the seventh section of an act, passed the 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States," I have caused to be prepared certain statements, marked A, B, C, D, and E, which are herewith laid before you, for the purpose of being transmitted to the Legislature. In future, similar statements will be prepared, annually, as the law directs, and the manner of keeping and rendering the accounts of the mint, will be so modified as to shew, at proper periods, the exact loss or gain upon the coinage of copper.

I have the honor to be, sir, with perfect respect, your most obedient servant,

JOHN STEELE.

The Honorable OLIVER WOLCOTT, Esq.

A.

TREASURY DEPARTMENT, Register's Office, December 24th, 1798.

JOSEPH NOURSE, Register.

* In this amount of gold deposited, is included the amount gained by retaining fractions, together with an overplus, which arose in the chief coiner's department.

† In this amount of deposits is included \$17 50, in silver, and \$330 in gold coins, which were under the inspection of the commissioners, and delivered to the melter and refiner.

5th CONGRESS.]

No. 142.

[3d SESSION.]

EQUALIZATION OF THE DUTIES ON IMPORTS FROM INDIA.

COMMUNICATED TO THE SENATE, FEBRUARY 28, 1799.

The Secretary of the Treasury, to whom was referred, by order of the Senate of the United States, on the 24th of May, 1798, the petition of William Gray, Jr. and other merchants of the State of Massachusetts, respectfully submits the following report:

The petitioners are merchants concerned in trade between the United States and the British East Indies; the stock exported by them from the United States consisted principally of Spanish milled dollars; these dollars were invested, at Calcutta, in merchandise, at the rate and exchange of two hundred and fifteen sicca rupees for one hundred Spanish dollars. By the 40th section of the collection law, passed on the 4th of August, 1790, the *rupee of Bengal*, by which the *sicca rupee*, a coin of India, is supposed to have been intended, is valued at fifty-five and a half cents, in money of the United States.

The collector of the customs at Salem required the petitioners to exhibit the original cost of the merchandise imported by them, in *sicca rupees*, to which he added twenty per cent.; pursuant to the direction in the 39th section of the collection law, and upon this amount of rupees, reduced to money of the United States, at the rate of fifty-five and a half cents per rupee, the *ad valorem* duty of twelve and a half per cent. has been demanded.

The petitioners represent the value of the rupee, as declared in the collection law, to be excessive; and as the goods imported by them were in fact purchased with Spanish dollars, they request that they may be allowed to exhibit the cost of the said goods in dollars, and to pay duties accordingly. They further represent, that this indulgence has been granted in some ports of the United States, and that they have been injured by the unequal construction of the law, in different officers.

The Secretary has examined the subject, and is satisfied that the petition contains a candid statement of all the facts within the knowledge of the petitioners.

The following is an illustration of the mode of calculation adopted by the collector, and also of the proposed substitute.

1st. By the rule adopted by the collector, the Spanish dollars were reduced to rupees, at the current market value;	
or, as in the case stated in the petition, 100 dollars were valued, in rupees, at	R. 215 00
To which 20 per cent. was added, according to the 39th section of the collection law, or	43 00
	<u>R. 258 00</u>

The above sum of 258 rupees, reduced to money of the United States, at fifty-five and a half cents per rupee, is equal to	\$143 19
Upon which a duty of twelve and a half per cent. being computed, produced to the revenue, for the proceeds of 100 dollars, invested in merchandise, at the exchange of 215 rupees per 100 dollars, the sum of	17 90

2d. But the rule suggested by the petitioners would give the following result:

Original investment, in dollars,	100 00
To which add twenty per cent. according to the 39th section of the collection law,	20 00
	<u>\$120 00</u>

The rate of duty, at twelve and a half per cent. computed on 120 dollars, would give to the revenue only 15 00

The question under consideration is important, both to the revenue and to the merchants: for, if the principles assumed by the petitioners are correct, an excess, amounting to nearly one-fifth of the legal duties, has been demanded.

The Secretary, in the course of his inquiries on this subject, has ascertained the following facts:

1st. That *dollars* are not considered as *money* in Bengal, and that the price is variable; that, of late, dollars have been worth from 212 to 215 sicca rupees per 100 dollars.

2d. That there are various kinds of money known in India, under the general denomination of *rupees*; of which the sicca rupee, a real coin, is understood to be the standard.

3d. That, by assays at the mint of the United States, the extrinsic value of the sicca rupee, when compared with money of the United States, is found to be forty-seven cents.

4th. That the *current rupee* is an *ideal* money of *account*, the value of which is sixteen per cent. below that of the *sicca rupee*.

5th. That the accounts of the East India Company are kept in *current* rupees; that formerly, invoices sent to the United States were made out in the same currency, but that, latterly, invoices are made out in sicca rupees, it having been understood that the duties imposed by the laws of the United States were granted with reference to that description of money.

6th. That bills of exchange on London, payable from six to fifteen months after sight, have of late years been negotiated at Bengal, at various rates, from two shillings to two shillings and sixpence sterling, per *current* rupee.

7th. That the pagoda of India is valued, in the collection law, at one dollar and ninety-four cents, whereas, the intrinsic value of this coin is found, by assays at the mint, to be no more than one dollar and seventy cents.

The Secretary is of opinion that, notwithstanding the rupee and pagoda of India are estimated above their intrinsic value, when compared with coins of the United States, yet, that the rule now established cannot be *inequitable*, because it is from its nature *invariable*, and must at all times subject merchants, who purchase goods of the same quality, at one price, in India, to the payment of the same amount of duties in the United States. If these coins should be estimated at a less value than at present, no other consequence would follow than a reduction of the present established rates of duties, which, considering the nature of the trade, cannot be deemed excessive.

The rule suggested by the petitioners, of considering the value of *our money*, or *even of foreign money*, in the United States, as the criterion for determining the cost of merchandise in *foreign countries*, appears to be inadmissible; gold and silver, when exported, can be considered in no other light than as *merchandise*, without subverting that principle of the revenue laws which has established *foreign currencies*, or *moneys of account*, as the *criteria* for computing the duties *ad valorem*. The consequences of an abandonment of this principle might, on some occasions, exceedingly embarrass commerce, by causing a sudden exportation of the specie capital of the country; at any rate, the revenue would fluctuate with the course of exchange and the variations of the prices of our exports in foreign markets.

The Secretary finds that a few entries were admitted at New York, on which the invoice prices of India merchandise were computed in dollars; the mistake was, however, soon discovered, and corrected. As, therefore, the petitioners will, in future, have nothing to apprehend from an unequal operation of the law, the Secretary is of opinion that the interposition of the Legislature, in this case, is not expedient.

All which is respectfully submitted.

OLIVER WOLCOTT.

6th CONGRESS.]

No. 143.

[1st Session.

SINKING FUND.

COMMUNICATED TO THE SENATE, DECEMBER 11, 1799.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their report of the 15th of December, 1798, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the 10th of December, 1799, and in the proceedings of the officers of the treasury therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

SAMUEL LIVERMORE,
President of the Senate, pro tem.

December 11, 1799.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund:

That no purchases of the public debt of the United States have been made, since the date of the last report to Congress, on the 15th day of December, 1798; and that the sums of capital stock heretofore purchased and transferred, prior to the present year, in trust for the United States, the interest whereon is appropriated by law towards the reduction of the public debt, amount to two millions seven hundred and thirty-four thousand four hundred and seventy-nine dollars and forty-four cents, as will more particularly appear from the document hereto annexed, marked A.

That the following sums have been applied towards the discharge of the principal debt of the United States, since the date of the last report to Congress, of the 15th of December, 1798:

1st. To the fourth instalment of the six per cent. stock, bearing a present interest, which, pursuant to the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," passed on the 3d day of March, 1795, and the act in addition thereto, passed on the 28th day of April, 1796; became payable on the first day of January, 1799, the sum of	\$674,938 02
2d. To the payment of the seventh instalment of the subscription loan for bank stock, due on the first day of December, 1798,	200,000 00
3d. To the payment of the second instalment of a loan of one million of guilders, obtained in Holland, and which fell due the present year, pursuant to a contract, dated the 1st of June, 1787, estimated at 40 cents per guilder,	80,000 00
4th. To the payment of the first instalment of a loan of one million of guilders, obtained in Holland, and which fell due in the present year, pursuant to a contract, dated the 13th of March, 1788, estimated at 40 cents per guilder,	80,000 00
Amounting, in the whole, to	\$1,034,938 02

The payments before enumerated have been made out of the following funds:

1st. The interest fund on the sums which accrued upon the stock purchased, and vested in the commissioners of the sinking fund, in trust for the United States, as particularly stated in the document hereto annexed, marked B,	\$89,375 72
2d. The fund arising from the payment of debts, which originated prior to the present constitution of the United States, as particularly stated in the document marked C,	6,710 68
3d. The fund arising from the sales of lands in the Northwestern territory, as particularly stated in the document hereto annexed, marked D,	11,963 11
4th. The fund arising from dividends on the capital stock belonging to the United States, in the Bank of the United States, from the 3d of March, 1795, to the 30th of June, 1798, after deducting the interest paid on the subscription loan for the same period, as particularly stated in the document hereto annexed, marked E,	144,889 08
5th. The fund arising from a loan obtained of the Bank of the United States, pursuant to the 6th section of the act passed on the 3d of March, 1795, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," and agreeably to a resolution of the Board of Commissioners of the Sinking Fund, of the 15th December, 1798, approved by the President of the United States,	200,000 00
6th. The proceeds of the duties on goods, wares, and merchandise, imported; on the tonnage of ships or vessels, and on spirits distilled within the United States, and stills, appropriated by the 8th section of the act of March 3d, 1795, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," being for the period, and in reference to the objects, mentioned in this report,	581,999 43
	\$1,034,938 02

Making, in the whole, an equal amount to the reimbursement before mentioned.

There remained in the hands of the Treasurer of the United States, as agent of the Board of commissioners, on the first day of December instant, the sum of five hundred thousand seven hundred and eighteen dollars and fifty-five cents, which, with the growing produce of other appropriated funds, will be sufficient for the reimbursement, at the close of the present year, of the fifth instalment of the six per cent. stock, bearing a present interest, and the eighth instalment of the subscription loan for stock of the Bank of the United States, which reimbursements are required to be made by the 11th section of the act of Congress, passed on the 3d of March, 1795, herein before mentioned.

All which is most respectfully submitted, by

OLIVER WOLCOTT, Secretary of the Treasury.

TREASURY DEPARTMENT, December 10, 1799.

A.

A General Statement of the several stocks transferred to the United States, to the 31st December, 1798, inclusively; the interest upon which, by the acts of the 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

No. 144.

[1st SESSION.]

MINT.

COMMUNICATED TO CONGRESS, JANUARY 8, 1800.

Gentlemen of the Senate

and Gentlemen of the House of Representatives:

A report, made to me on the first day of this month, by the Director of the Mint, through the office of the Secretary of State, with the documents attending it, I transmit to both Houses of Congress, for their consideration.

JOHN ADAMS.

UNITED STATES, January 8th, 1800.

To the President of the United States.

The Director of the Mint respectfully reports, that there has been coined and issued from the mint, from the first day of January, to the thirty-first day of December, 1799, inclusive, the quantity of 213,285 dollars, in gold coin; 423,515 dollars, in silver coin; and 9,106 dollars and 68 cents, in copper cents; amounting to 645,906 dollars and 68 cents, or 1,365,681 pieces of coin; which, added to the former returns, makes the whole of the coinage, since the establishment of the mint, 696,530 dollars in gold, 1,210,158 dollars and 75 cents in silver, and 50,111 dollars and 42 cents in copper cents; making the amount of the whole coinage of the mint, 1,962,800 dollars and 17 cents; all which will more fully appear by the enclosed returns from the treasurer of the mint; as also, that the coinage of the last year has exceeded that of any former year, by 100,208 dollars 68 cents.

It is almost needless to observe, that the 50,000 dollars in copper coin, required by the second section of the act of Congress, passed on the 8th of May, 1792, being now completed, it becomes necessary for the Treasurer of the United States to comply with the provision of the said section, by giving the public notice therein mentioned.

The mint has been regularly supplied with bullion, both gold and silver, so as to keep it in constant operation, on the present establishment, during the year past, excepting two months, in which, the works were totally stopped, on account of the then prevailing fever; and there is a rational prospect that the supply will be continued for the present year.

From the late arrangements with regard to supplies of copper planchettes, for the coinage of cents, there is no doubt but that one press, equal to the coining of 14,000 per day, may be kept in constant operation.

It becomes necessary for the Director to draw the attention of the President to the act of Congress for the establishment of the temporary and permanent seat of the Government of the United States. By the original institution of the mint, it was established at the seat of Government. By the sixth section of the act of Congress, above referred to, it is enacted "that all offices, attached to the seat of Government, shall be removed to the permanent seat of the Government of the United States, by their respective holders, on the 1st day of December next." A question has arisen under this act, whether the department of the mint is included therein or not. If it is, without further provision by law, the mint must be removed, with the other departments, agreeably to the directions of that act; and if it is not, many necessary provisions must be made by law, applicable to the mint being carried on at a distance from the seat of Government. The doubtful consequences of a removal must strike every person acquainted with the business of the mint, as it is in a great measure supported by the bullion passing through the different banks of this city, and for want of which, it would frequently be without the means of coinage, while the expense would be nearly the same to the Government. The Director, therefore, thinks it his duty respectfully to submit to the President the propriety of bringing this subject before Congress, in the early part of the session; this step is rendered more obviously necessary, from the present state of the machinery of the mint. The works ought to be kept in perfect repair, unless they are so soon to be removed; in which case some parts, not worth the transportation to so great a distance, might be suffered to remain as they are, or barely kept in such repair as to answer for immediate use.

The Director is sorry to observe, that the practice of melting down the coin of the United States, by workmen in gold and silver, is, he fears, becoming too common, to the manifest loss of the United States. As there are not any laws prohibiting it, every one is left to his own discretion, which, from the certainty of the standard, becomes so great a convenience, if not a pecuniary advantage, as to render the prevalence of the practice almost beyond a doubt, if not prohibited by law.

All which is respectfully submitted to the President.

January 1st, 1800.

ELIAS BOUDINOT, *Director.*

MINT OF THE UNITED STATES, *Treasurer's Office, January 1st, 1800.*

6th CONGRESS.]

No. 145.

[1st SESSION.]

INTERNAL REVENUES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 5, 1800.

TREASURY DEPARTMENT, *February 4th, 1800.*

SIR:

I have the honor to transmit a report, with two statements, relating to the internal revenues of the United States, in obedience to the permanent resolution of the House of Representatives, passed on the 6th of January, 1797, and an act of Congress, passed on the 11th July, 1798.

I have the honor to be, with perfect respect, sir, your obedient servant,

OLIVER WOLCOTT.

The Honorable the SPEAKER of the House of Representatives.

A.

Statement showing the number of each description of officers actually employed in each district, during the year 1798, the amount allowed by law for salaries, &c. and the emoluments and expenditures, during the year ending on the 31st December, 1798.

Districts.	Supervisors.	Inspectors.	Collectors.	Auxiliary officers.	Provided by law for salaries to supervisors and Inspectors, and for annual allowances to collectors and auxiliary officers.	EMOLUMENTS.								EXPENDITURES.						
						Salaries and other annual allowances.	Allowance for clerk hire.	Commissions.	Signing, counting, and issuing certificates.	Gauging casks.	Measuring and marking stills.	Fines and penalties.	Stationary, printing, and postage.	Total amount.	Clerk hire.	Office rent and fuel.	Other official expenses.	Stationary, printing, and postage.	Total amount.	Balance in favor of the officers in each district.

The allowance to the supervisors and inspectors, for clerk hire, commenced on the 1st July, 1798; of course, only half the sum which they are to receive in future years, appears in this statement. The necessary expenses of procuring books, stationery, &c. are allowed the officers in the settlement of their accounts. They are introduced here on both sides merely to show the amount. Of the inspectors of surveys, two of them are also officers of the customs; and of the collectors, seventeen are, in like manner, officers of the customs.

*No return received.

§The collectors' sales, for one quarter, not included.

TREASURY DEPARTMENT, REVENUE OFFICE, December 31st, 1799.

WILLIAM MILLER, Commissioner of the Revenue.

6th CONGRESS.]No. 146.[1st SESSION.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 10, 1800.

TREASURY DEPARTMENT, *February 7th*, 1800.

SIR:

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit two statements, exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1795, 1796, 1797, and 1798.

I have the honor to be, with perfect respect, sir, your obedient servant,

OLIVER WOLCOTT.

The Hon. the SPEAKER of the *House of Representatives*.

A Statement exhibiting the amount of Drawback on the sundry articles exported from the United States, in the years 1795, 1796, and 1797, compared with the amount of Duties collected on the same, respectively.

NOTE.—The accounts for the first and second quarters from the district of Philadelphia, and the third and fourth from the district of Charleston, for the year 1798, have not been rendered to the treasury. The whole of the accounts from the district of Savannah, for the year 1798, are wanting.

TREASURY DEPARTMENT, REGISTER'S OFFICE, February 5, 1800.

JOSEPH NOURSE, Register.

6th CONGRESS.]

No. 147.

[1st SESSION.]

ESTIMATES FOR THE YEAR 1800.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 21, 1800.

Mr. HARPER made the following report:

The Committee of Ways and Means, to whom was referred the estimates for the public service during the present year, having taken them into consideration, and obtained from the different Departments such further information as they deemed necessary, beg leave to submit to the consideration of the House the following report on that subject:

The committee thought it proper, before they entered into the subject referred to them, to obtain from the Treasury Department a detailed estimate of the revenue and expenditure of the present year, according to the existing laws. For this purpose was written to the Secretary of the Treasury, the letter, of which a copy, No. 1, together with his answer, No. 2, and the estimate requested, No. 3, is subjoined to this report.

From this estimate it appears, that the whole sum required for the public service, during the present year, including the interest and reimbursement of the public debt, of every description, the civil list, army and navy, and every incidental charge, amounts to fifteen millions three hundred and ninety-three thousand and thirty-four dollars and eleven cents. But this sum includes the whole army estimate, which was founded on the supposition that the twelve regiments of infantry and six troops of horse, composing the additional army, would be immediately completed. The act, however, for suspending further enlistments, having passed one branch of the Legislature, the committee thought it proper to ascertain, as nearly as possible, what reductions in the expense of that army would result from this bill, should it pass into a law. For this purpose they wrote a letter to the Secretary of War, a copy of which, No. 4, with his answer, No. 5, and an estimate of the reduction in question, No. 6, they have annexed to this report. From this paper it appears that the reduction may be calculated at about one million of dollars: which, as the bill has now passed into a law, must be deducted from the former estimate of fifteen millions three hundred and ninety-three thousand and thirty-four dollars and eleven cents; and will leave a balance of fourteen millions three hundred and ninety-three thousand and thirty-four dollars and eleven cents, for the expenses of the year.

From this balance, however, the committee are of opinion that a further deduction of six hundred thousand dollars ought to be made. This sum is added to the navy estimate, as a further appropriation, during the present year, for the building of the six seventy-fours. But the committee, entertaining doubts whether it would be for the benefit of the public to press the building of those ships, so fast as to require this further appropriation, since they must, in that case, be built of timber far from sufficiently seasoned, wrote to the Secretary of the Navy requesting his opinion on this point. A copy of their letter, No. 7, together with his answer, No. 8, is hereunto subjoined. This answer, to which the committee beg leave to direct the attention of the House furnishes, in their opinion, very sufficient reasons for avoiding that degree of expedition, in building the seventy fours, which would require the further appropriation of six hundred thousand dollars. And they therefore think it proper to deduct that sum, also, from the general estimates of expenditure for the year, which will reduce that expenditure to the sum of thirteen millions seven hundred and ninety-three thousand and thirty-four dollars and eleven cents.

The whole estimated amount of revenue, to meet this expenditure, is nine millions three hundred and one thousand two hundred and fifty eight dollars and fifty one cents, as detailed in the statement No. 3, furnished by the Secretary of the Treasury, and above alluded to, which sum being deducted from the sum of thirteen millions seven hundred and ninety-three thousand and thirty-four dollars and eleven cents, which has been stated as the amount of expenditure, leaves a balance of four millions four hundred and ninety-one thousand seven hundred and seventy-five dollars and sixty-one cents.

The Government, however, possesses funds to cover this balance in part. From the above mentioned statement, No. 3, it appears that, on the thirty-first of December, one thousand seven hundred and ninety-nine, there remained in the treasury an unexpended balance of the last year's supplies, amounting to two millions one hundred and fifty-nine thousand three hundred and seventy-seven dollars and ten cents. A considerable part of this sum has since been paid, or will be required, for the discharge of contracts remaining due for the service of last year. It is not easy to ascertain, with precision, what portion of this balance will remain, after satisfying all demands of this description, to be applied to the service of the present year; but the Secretary of the Treasury, in his above mentioned statement, No. 3, estimates it at one million of dollars; an estimate which the committee have no reason for considering as too high. They, therefore, place this sum to the credit of the Government, which reduces the balance to be provided for by loan to three millions four hundred and ninety-one thousand seven hundred and seventy-five dollars and sixty-one cents—say three millions five hundred thousand dollars.

In proposing a loan to the House, the committee wish to call its attention to the propriety of providing, at the same time, permanent revenues equal to the interest of the debt to be incurred; and of making provision, also, for the gradual and timely extinguishment of the principal—a policy which, in their opinion, ought to be invariably adhered to, as the only mean of avoiding that constant accumulation of debt, which is the great evil of the funding system. The committee have turned their attention to this interesting part of the subject, and have little doubt of being able to propose such measures to the House, as, without materially increasing the public burdens, will add to the present revenues a sum adequate to the accomplishment of so desirable an object. But as they are not yet possessed of all the information necessary for maturing their plan, they reserve it for the subject of a further report.

In the mean time they beg leave to present, for the consideration of the House, the following resolution, viz:

Resolved, That it is expedient to authorize the President of the United States to borrow, for the service of the present year, a sum not exceeding three millions five hundred thousand dollars, upon such terms and conditions as he shall judge most advantageous for the United States: *Provided*, That no contract or engagement shall be entered into, which shall preclude the United States from reimbursing any sum or sums borrowed, at any time after the expiration of fifteen years from the date of such loan.

No. 1.

Letter to the Secretary of the Treasury.

COMMITTEE ROOM, Jan. 6th, 1800.

SIR:

In compliance with a resolution of the Committee of Ways and Means, I have the honor to request from you, for their use, the following information, as speedily as may accord with your convenience.

- 1st. An estimate of the expense and revenue of the current year, according to existing laws.
- 2d. A statement of the receipts and expenditures for the last quarter of the last year, as far as they can be at present ascertained from the accounts made up at the treasury.
- 3d. A statement of the account between the United States and the Bank, as it now stands, more especially with respect to the reimbursement of former loans.

With very great respect, I have the honor to be, sir, your obedient servant,

ROBERT G. HARPER.

The Honorable the Secretary of the Treasury.

No. 2.

*Letter from the Secretary of the Treasury.*TREASURY DEPARTMENT, *January 22d, 1800.*

SIR:

I have the honor to transmit, herewith, three statements, which have been prepared in compliance with the request of the Committee of Ways and Means.

1st. An estimate of the revenue and expenditures of the year 1800, according to existing laws.

2d. A statement of the receipts and expenditures of the United States, from the 1st of October to the 31st of December, 1799.

3d. A statement of the loans made by the Bank of the United States, exhibiting the sums remaining unpaid.

Various inquiries having been lately made respecting the public debt, I have judged it expedient to state the capitals of the different stocks, at the close of the last year.

The following debts have been incurred, and remain unpaid, in consequence of expenditures authorized by Congress, under the present constitution of the United States:

The balance due to the Bank of the United States, being	\$3,640,000 00	
From which deduct the cost of 2220 shares, which are held by the United States,	- 888,000 00	
		2,752,000 00
The amount of six per cent stock, issued pursuant to an act of Congress, passed on the 31st of May, 1796, the proceeds of which were applied towards the payment of a loan obtained of the Bank of New York,		80,000 00
The 8 per cent stock, issued in 1799, pursuant to an act passed on the 16th of July, 1798,		5,000,000 00
The 6 per cent navy stock, issued in 1799, pursuant to an act passed on the 30th June, 1798,		109,200 00
There will be issued, of 6 per cent navy stock, in payment for ships now preparing for service, which may be deemed a debt already incurred, though not liquidated, about		820,000 00
Amounting, in the whole, to		<u>8,761,200 00</u>

The following sums may be properly opposed to the debts above enumerated.

The sums of stock purchased and redeemed, the interest whereon is vested in the trustees of the sinking fund,		4,704,219 61
The sums reimbursed on the 1st of January 1800, of the principal of the 6 per cent stock, pursuant to the act of March 3d, 1795, computed at		2,540,641 90
Amounting to,		<u>\$7,244,861 50</u>

The principal debt of the United States has, therefore, increased, since the establishment of the present Government, the sum of one million five hundred and sixteen thousand three hundred and thirty-eight dollars and fifty cents.

I have the honor to be, with the greatest respect, sir, your obedient servant,

OLIVER WOLCOTT.

The Honorable ROBERT GOODLOE HARPER, *Esq. Chairman of the Committee of Ways and Means.*

No. 3.

A.

An estimate of the Expenditures and Revenue of the United States, during the year 1800.

EXPENDITURES.

For the foreign debt due in Amsterdam and Antwerp.

	Guilders.
One year's interest, on 26,900,000 guilders, calculated according to the different contracts, at four, four and a half, and five per centum, per annum, is	1,255,250 00
Second instalment of one million of guilders, per contract of March 13th, 1788,	200,000 00
Third instalment of ditto, per contract of June 1st, 1787,	200,000 00
First instalment of three millions, per contract, dated February 1st, 1790,	600,000 00
Charges and commissions, estimated at	22,552 10
<i>Guilders,</i>	<u>2,277,802 10</u>

Which sum of guilders, 2,277,802 10, estimated at forty cents per guilder, amounts to \$911,121 00

For the Domestic Funded Debt.

	Capital.	Dividends.	
Capital of the six per cent. stock, to the credit of individuals, December 31st, 1799, upon which dividends are made, on account of principal and interest, at 8 per cent.	\$28,246,042 96	2,259,683 43	
Of the three per cent. stock,	19,086,708 54	572,601 25	
Of six per cent. stock, per act of May 31st, 1796,	80,000 00	4,800 00	
Of five and a half per cent. stock,	1,847,500 00	101,612 50	
Of four and a half per cent. stock,	176,000 00	7,920 00	
Of six per cent. Navy stock,	109,200 00	6,552 00	
Of eight per cent. stock, 1799,	5,000,000 00	400,000 00	
Of deferred debt, bearing interest after January 1st, 1801,	13,682,944 18		
Funded debt to the credit of individuals, December 31st, 1799, and dividends payable thereon in 1800,	68,228,395 68	3,353,169 18	
Estimated amount of six per cent. Navy stock, to be issued in 1800,	820,000 00	49,200 00	
Sum required for the domestic debt, in 1800, exclusive of the sinking fund,	<u>69,048,395 68</u>		3,402,369 18

<i>Interest on stock purchased or transferred to the trustees of the sinking fund.</i>		
On six per cent. stock, - - - - -	1,841,607 09	110,496 42
On three per cent. stock, - - - - -	614,836 47	18,445 09
On five and a half per cent. stock, - - - - -	1,400 00	77 00
On foreign debt, redeemed at five per cent., - - - - -	1,280,000 00	64,000 00
Deferred debt on which interest will accrue after the year 1800, - - - - -	966,376, 04	
		\$193,018 51
Amount of the interest fund in 1800, - - - - -	<u>\$4,704,219 60</u>	
<i>For the Interest and Reimbursement of temporary Domestic Loans.</i>		
Interest on 1,400,000 dollars, obtained of the Bank of the United States, at five per cent. per annum, - - - - -		\$70,000 00
Interest on 2,240,000 dollars, obtained of the said bank, at six per centum, - - - - -		134,400 00
Reimbursement of the ninth instalment of the loan of two millions of dollars for stock of the said bank, pursuant to the 11th section of the act of March 3d, 1795, "making provision for the support of public credit and the redemption of the public debt" - - - - -		200,000 00
		404,400 00
<i>Expenditures for the service of the year 1800, calculated upon the principles of the estimates reported to the House of Representatives, on the 7th December, 1798.</i>		
For the civil list, - - - - -		562,275 95
For the payment of annuities and grants, - - - - -		953 33
For the support of the mint establishment, - - - - -		13,300 00
For the expenses of intercourse with foreign nations, per estimate, \$92,000 00		
Sum appropriated by the act of March 19th, 1798, - - - - -	40,000 00	132,000 00
For expenses incident to certain treaties, per estimate, - - - - -	244,000 00	
Sum appropriated in consequence of the treaty with Algiers, by the act of May 6th, 1796, - - - - -	24,000 00	268,000 00
For expenses incident to the valuation of dwelling houses and lands, - - - - -		215,000 00
For the military establishment, as per estimate, - - - - -	4,067,200 00	
Sum appropriated for payment of annuities to Indians, per act of May 6th, 1796, - - - - -	11,000 00	4,078 200 00
For the navy establishment, per estimate, - - - - -		2,482,953 99
For the payment of military pensions, - - - - -		93,000 00
For the fabrication of cannon and arms, and the purchase of ammunition, for the army and navy, and for the militia, per estimate, - - - - -	260,000 00	
The sum unexpended, October 1st, 1799, of the amount appropriated by the act of May 4th, 1798, - - - - -	344,202 12	
The sum granted by the act of July 6th, 1798, - - - - -	400,000 00	1,004,202 12
For the support of light-houses, &c., - - - - -		98,240 03
For miscellaneous claims, per estimate, - - - - -		34,000 00
		8,982,125 42
For building six 74 gun ships, as directed by the act of Congress, of the 25th of February, 1799, there will be required, if the business shall proceed in the manner suggested in the estimate of the Secretary of the Navy, the sum unexpended of the appropriation already made, being - - - - -		700,000 00
And a further appropriation of - - - - -		600,000 00
		1,300,000 00
For satisfying various demands upon the treasury, for which appropriations have already been made, it is necessary to reserve - - - - -		200,000 00
Estimated amount of expenditures, during the year 1800, - - - - -		\$15,393,034 11

Estimated Revenue for the year 1800, from duties on Imports and Tonnage.

The actual receipts during the three last years have been as follows:

Product of the several quarters.	In the years ending		
	Sept. 30th, 1797.	Sept. 30th, 1798.	Sept. 30th, 1799.
From October 1st to December 31st, - - - - -	\$1,786,966 30	1,982,927 54	1,683,568 61
From January 1st to March 31st, - - - - -	1,434,186 06	1,902,589 82	1,335,169 93
From April 1st to June 30th, - - - - -	2,337,935 80	1,700,378 32	1,868,661 34
From July 1st to September 30th, - - - - -	1,794,600 25	1,819,525 18	1,499,686 46
	7,353,688 41	7,405,420 86	6,437,086 34

The accounts for the quarter ending December 31st, 1799, are not settled, yet it is known that the receipts exceed 1,800,000 dollars. This branch of revenue may, therefore, it is believed, be safely estimated, for the year 1800, at \$7,000,000 00

From duties on domestic distilled spirits, and on stills, sales at auction, licences for selling foreign spirits and wines, by retail, refined sugar, carriages, and stamps.

The product of all the internal revenues during three years, has been as follows. The duties on stamps have been collected only since July 1st, 1798.

Product of the several quarters.	In the years ending		
	Sept. 30th, 1797.	Sept. 30th, 1798.	Sept. 30th, 1799.
From October 1st to December 31st, - - -	\$132,949 47	\$137,389 37	195,867 65
From January 1st to March 31st, - - -	142,108 58	174,399 79	165,183 04
From April 1st to June 30th, - - -	140,557 42	115,492 46	211,999 95
From July 1st to September 30th, - - -	155,436 08	158,598 05	200,512 12
<i>Dollars,</i>	571,051 55	585,879 67	773,562 76

The product of the internal revenue, during the quarter, ending December 31st, 1799, was about 200,000 dollars; and it is estimated that they will produce, in 1800, the sum of - \$800,000 00

From the Direct Tax.

The valuations have been completed, and directions issued for collecting the tax in the States of Vermont, New Hampshire, Massachusetts, Connecticut, New Jersey, Delaware, Kentucky, and Tennessee. In some of those States collections have been commenced. The returns of the valuations will be soon completed in the States of Rhode Island, New York, Pennsylvania, Maryland, and Virginia. Owing to the resignation of commissioners, and other causes, the requisite arrangements for commencing the valuations were considerably delayed in certain districts of the other States; a great part of the business is, however, understood to be completed, and all the returns are expected in a few months. Under these circumstances, it is difficult to form an opinion respecting the proportion of the tax which will reach the treasury in the course of the present year; a considerable part of sums, which will be assessed on new lands, must remain uncollected till the ensuing year; it is, however, expected that there will be received, during the year 1800, the sum of - \$1,200,000 00

From revenue on the postage of letters, - - -	-	-	-	36,000 00
From fees on letters patent, - - -	-	-	-	1,200 00
From dividends on bank stock, - - -	-	-	-	71,040 00
From the proceeds of that part of the sinking fund which consists of interest on the stock purchased or redeemed, and which is appropriated, with other funds, towards the reimbursement of the public debt, - - -	-	-	-	193,018 51
Estimated amount of revenue for 1800, - - -	-	-	-	9,301,258 51
The moneys which remained in the treasury, on the first of January, 1800, may be considered as a fund for defraying the expenses, herein before enumerated, to the extent of - - -	-	-	-	1,000,000 00
Leaving the balance to be provided for, about - - -	-	-	-	5,091,775 60
				6,091,775 60
				\$15,393,034 11

TREASURY DEPARTMENT, *January 22, 1800.*

OLIVER WOLCOTT, *Secretary of the Treasury.*

B.

Account of receipts and expenditures of the United States, from the 31st October, 1799, to 1st December following, so far as the accounts have been received at the Treasury.

RECEIPTS.

<i>1799, 1st October.</i>		
By balance in the treasury, this day, subject to warrants, - - -	-	\$2,422,783 38
By amount of receipts into the treasury, viz:		
For duties of merchandise and tonnage, - - -	-	1,854,931 58
For duties on spirits distilled within the United States, on stills, sales at auction, licences for selling wines, &c. by retail, carriages, refined sugar, and stamp duties, - - -	-	201,441 33
For postage of letters, - - -	-	20,000 00
For fees on letters patent, - - -	-	330 00
For cents and half cents, coined at the mint, - - -	-	2,613 50
For domestic loans received on account of 5 millions, at 8 per cent., - - -	-	1,000,912 50
For prizes arising from the sales of French armed vessels, - - -	-	4,231 75
For fines, recovered from sundry persons for breach of the laws of the United States, - - -	-	2,000 00
For re-payment made by individuals on settlement of their accounts at the treasury, viz:		
Joseph Williams, - - -	\$13 50	
Samuel & Jos. Sterret, - - -	172 58	
		186 58
		\$5,518,430 12

EXPENDITURES.

For civil department,	\$99,000 03	
Expenses of the valuation of lands and dwelling houses, and enumeration of slaves,	9,676 10	
		108,676 13
Military department,		670,529 53

Ditto,	1799, January 1.	6 per cent.	200,000	-	200,000	Reimbursable on the 1st of January, 1803.
			6,500,000	2,860,000	3,640,000	

OLIVER WOLCOTT, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *January 22d, 1800.*

No. 4.

COMMITTEE ROOM, *January 23d, 1800.*

As the bill, sir, for suspending enlistments, should it pass, will make a material variation in the army expenditures during the present year, and as the estimates now before the Committee of Ways and Means are predicated on the existing law, without any reference to that measure, it will be important for the committee to be informed, as speedily as possible, of the probable amount of those expenditures, in case the bill in question should be agreed to. I have, therefore, the honor of requesting, that you will be so good as to furnish me, as soon as circumstances may permit, with an estimate of the nature alluded to, for the use of the committee, and also with an abstract of the statements and returns whereon it may be founded.

I have the honor to be, sir, &c.

ROBERT G. HARPER.

The Honorable Secretary of War.

No. 5.

WAR DEPARTMENT, 30th January, 1800.

SIR:

I have the honor to enclose the copy of a letter from me to Major General Hamilton, the object of which is to provide, as far as practicable, against a waste of public moneys, in either of the events, of a suspension of enlistments being directed by law, or of the speedy settlement of our differences with the French republic.

I enclose, also, agreeably to your request, an estimate, intended to exhibit, as far as practicable, the probable amount of the military appropriations that will be required for the present year, in case the bill for suspending enlistments, now before the Senate, should pass into a law.

It must be supposed, that several impressive circumstances require to be weighed with due consideration, when deciding upon an appropriation, with either of the events mentioned in prospect.

1st. The time which must be consumed in transmitting orders to the officers at the different rendezvous, to dismiss their recruits or suspend further enlistments. There are in New Hampshire, four recruiting rendezvous, in Vermont, three, Rhode Island, three, Massachusetts, twenty, Connecticut, ten, New York, ten, New Jersey, six, Pennsylvania, thirteen, Delaware, one, Maryland ten, Virginia, twenty, North Carolina, nine, South Carolina, six, Georgia, two, Kentucky, two, and Tennessee, one.

2d. The time it will require for each officer and soldier to return home, and for which they are, by law, to be allowed pay and rations, or an equivalent in money.

3d. The time it will take to pay off the officers and men.

4th. The expense which will attend removing to the public depots, the several articles of clothing, tents, and camp equipage, which are widely scattered over a great extent of country.

5th. The expenses to contractors, on breaking up of the army, for transporting provisions from places where they have been ordered, to other places, where they can be consumed, conformably to the uniform provision of contracts.

The disbanding of an army, settlements with the individuals who composed it, and due attention to collect, and deposit safely, the various articles of public property it had in use, will always occasion considerable extra expenses, respecting which it is impossible to furnish precise and satisfactory items.

I am, sir, with great respect, your obedient servant,

JAMES M'HENRY.

ROBERT GOODLOE HARPER, *Esq.* Chairman of the Committee of Ways and Means.

Amount of estimate for the year 1800, as rendered, exclusive of military pensions,	-	-	\$4,077,200 00
From which deduct the pay, subsistence, and clothing, for 5,049 privates, being the number, per last return, wanted to complete the twelve additional regiments, viz:			
Pay,	-	302,940 00	
Rations, at 17 cents per ration,	-	313,290 45	
Clothing,	-	126,225 00	
			742,455 45
Deduct also the pay, subsistence, clothing, and forage, of the non-commissioned officers, musicians, and privates, of the six companies of cavalry, viz:			
Pay,	-	25,632 00	
Rations, at 17 cents per ration,	-	23,827 20	
Forage,	-	27,648 00	
Clothing,	-	9,600 00	
			86,707 20
Also, for the purchase of 150 horses, at 150 dollars each,	-	22,500 00	
From quartermaster general's and hospital department,	-	335,467 00	
			1,187,129 65
			<u>2,890,070 35</u>
N. B. The Secretary thinks it probable that, since the returns, there may have been enlisted about six hundred privates; the pay, rations, and clothing for whom, would amount to,	-	88,230 00	
And for quartermaster's and hospital department, agreeably to ratio,	-	36,776 00	
			<u>125,006 00</u>

WAR DEPARTMENT, 28th January, 1800.

JAMES M'HENRY, *Secretary of War.*

No. 7.

COMMITTEE ROOM, January 23d, 1800.

The Committee of Ways and Means, sir, having turned their attention to the amount of the supply which will be required for the various branches of the public service, during the present year, find, in the estimates which have been laid before them, an item of \$600,000 for the six seventy-four gun ships, ordered by an act of the last session. They also find, that, of the former appropriation for that object, amounting to \$1,000,000, there remained, at the beginning of this year, an unexpended balance of \$700,000. It appearing doubtful whether it will be expedient to hasten the building of those ships, so much as to require, for the present year, an expenditure beyond the amount of that balance, and, consequently, whether the good of the service will require any additional appropriation for that object, at this time, I have the honor of requesting that you will be so good as to furnish me, for the use of the committee, with your opinion on that point. I am persuaded that it would be gratifying to the committee to be favored, also, with a statement of the facts and reasons whereon that opinion may be founded.

I have the honor to be, with sentiments of very high respect, sir, your most obedient very humble servant,

ROBERT G. HARPER.

The Honorable the Secretary of the Navy.

No. 8.

NAVY DEPARTMENT, 8th February, 1800.

SIR:

The live oak frames for the six 74 gun ships will cost, delivered at the building places, \$300,000; the other timber will cost \$180,000. The necessary preparations at each yard, for building, not only these, but ships that may be hereafter authorized, securing the timber for seasoning, purchasing sufficient ground for capacious building yards, where the timber can be deposited in order, so as to avoid considerable expense in piling and unpling, to get at the particular pieces wanted, will cost 200,000—making \$680,000.

The greater part of these expenses are already incurred, and the whole must be incurred early in the spring. This amount added to the cost of the six small vessels to be built out of the appropriation of one million of dollars,

being \$300,000, will absorb nearly the million of dollars appropriated for these objects. The sums which have been advanced, and must be advanced for copper, will amount to more than the difference, but there may be a saving in the expense of preparing the yards.

It is for the wisdom of Congress to determine whether we shall stop here, or go on, rapidly, in building the six 74 gun ships. In the latter case, \$600,000 dollars will be wanted for these ships, in the present year. But, if we may safely wait until the timber for the ships is properly seasoned, they will be infinitely better, and more durable, by many years, than if they are now built with timber cut from the woods only in the present winter, and, consequently, in a very green state; and if we can so wait, this \$600,000 will not be wanted for the present year.

If we stop here, we shall always be in a situation to lay the keels, and to proceed with such rapidity in building the ships, as to afford ground to hope that they may be sent to sea in less than a year from the commencement of the building.

I have the honor to be, with real respect, sir, your most obedient servant,

BENJAMIN STODDERT.

HON. R. G. HARPER,
Chairman of the Committee of Ways and Means.

6th CONGRESS.]

No. 148.

[1st SESSION.]

MINT.

COMMUNICATED TO THE SENATE, MARCH 14, 1800.

Mr. HILLHOUSE, from the Committee to whom was referred the message of the President of the United States, of the 8th day of January, 1800, together with the report of the Director of the Mint, of the 1st of January last, made the following report:

That the existing law requires the removal of the mint to the permanent seat of Government; that such removal would, in many respects, be inconvenient; but the policy of keeping up that establishment, in a situation where its operations will not be under the immediate superintendency and direction of the principal officers of Government, is questionable.

It appears by official reports, that, on the 31st of December, 1799, there had been coined and issued from the mint, since its first establishment, 696,530 dollars in gold; 1,216,158 dollars and 75 cents in silver; and in copper, 50,111 dollars and 42 cents; amounting in the whole, to 1,962,800 dollars and 17 cents. That the expense, during the same period, has been 213,336 dollars and 2 cents, of which sum there has been reimbursed, by the payment of cents and half cents, into the treasury, 48,041 dollars 42 cents; leaving a balance of 165,294 dollars 60 cents—an expense, in the opinion of the committee, disproportionate to the advantage which has been derived from a circulation of the coins of the United States, which have been very limited, and mostly confined to places in the vicinity of the mint.

To furnish coin sufficient for a circulating medium, throughout the United States, would be impracticable, unless the powers of the mint should be greatly increased, and the practice of melting down the coin, and the exportation to foreign countries, prevented; which may be done by debasing the coin—a measure which the committee cannot recommend.

The providing a fixed and permanent standard, by which the value of property, contracts for money, and foreign coins, shall be regulated, is an object of great importance. This may be effectually done without the aid of a permanent mint establishment: for it is not an indispensable requisite, that the whole circulating medium should be of the coins of the United States. Wholly to exclude foreign coins from circulation, if not impracticable, would be attended with great inconvenience, especially in the extreme parts of the Union.

The banks afford the most effectual guard against the circulation of base coin; a regard to their own interest will induce caution, and such coin will not be there received for more than its intrinsic value; which will fix the rate at which it will have a currency. An authority might be, by law, vested in the bank, for ascertaining the intrinsic value of coins of a new impression, by assaying them at the expense of the United States: for these purposes the present mint establishment cannot be necessary.

Causes, in their nature temporary, have, hitherto, furnished a great proportion of the bullion which has been coined at the mint, and the committee do not discover any mode which can in future be relied on, for furnishing a regular and certain supply, but that of prohibiting the circulation of foreign coins, and converting them into bullion, which seems to have been the mode contemplated. In addition to the inconvenience attending this measure, the Committee are strongly impressed with an apprehension, that it will be ineffectual, unless the transporting bullion to the mint, and the replacing the value in coin, is to be at the risk and expense of the United States: for the difference in value, between bullion and coin, will be so small, that no individual would be induced to take upon himself the risk and expense. And the vast extent of the territory of the United States, the foreign commerce which is carried on from the various ports, almost wholly disconnected from, and independent of each other, and there being no place where the trade of this country is, or can be concentrated, will always make that risk and expense an object of no small importance.

The furnishing a supply of cents and half cents, sufficient for circulation, would, in the opinion of the committee, be a desirable object, but they are well satisfied that the mint, upon its present establishment, will not furnish such supply. The efforts of almost seven years have done very little towards it. Perhaps a more economical, and the most effectual mode, would be by contract.

Though the coining of gold and silver may, at times, be deemed expedient, there will still remain a doubt as to the propriety of keeping up the present mint establishment. And the Committee have no hesitation in declaring it as their opinion that a plan may be devised, which will be more eligible, and better comport with economy, and the interest of the United States, for securing every object of importance in relation to a national coin.

As the removal of the mint must be attended with expense, and probably a derangement of many of the officers, if a change of the system is to take place, the present is beyond a doubt the most convenient time for effecting it.

The Committee, therefore, recommend the following resolutions:

Resolved, That a committee be appointed to bring in a bill for repealing the first section of the act, entitled "An act establishing a mint, and regulating the coins of the United States," and such other sections and parts of sections of said act, and other acts, as relate to the establishment of a mint, and to provide for taking care of the materials and property appertaining to the mint, and which belong to the United States.

Resolved, That the Secretary of the Treasury be directed to report a plan for furnishing the United States with cents and half cents, and such other coins as shall be deemed necessary or expedient.

A general statement of the expense of the Mint establishment, from its institution, to the 31st December, 1799.

Incidental and contingent expenses and repairs of the mint, including purchase of ground and buildings thereon, in seventh street, Philadelphia.

From the institution of the mint to the 31st December, 1797,	\$73,773 96	
From 1st January to 31st December, 1798,	10,836 57	
	<u>84,610 53</u>	

Copper purchased for coinage.

From the institution of the mint to the 31st December, 1797, 135,498 $\frac{3}{4}$ lbs.	34,427 48	
From 1st January to 1st December, 1798, 22,829 lbs.	7,110 22	
	<u>41,537 70</u>	

Salaries of the officers.

From the institution of the mint to the 31st December, 1797,	46,494 15	
From 1st January to 31st December, 1798,	10,600 00	
Ditto ditto 1799,	10,600 00	
	<u>67,694 15</u>	

Wastage in the coinage of silver.

For this sum, applied to make good the wastage, as settled at the treasury,	2,820 71	
Amount of warrants drawn on the Treasurer of the United States, for the mint establishment, including purchase of copper for coinage, in the year 1799, and exclusive of the salaries of the officers, the account of the expenditure thereof not fully settled,	16,672 93	
	<u>\$213,336 02</u>	

The payments of cents and half cents into the treasury, from the institution of the mint to 31st December, 1799, have been	<u>\$48,041 42</u>

[1st SESSION.

SALT DUTY.

COMMUNICATED TO THE SENATE, APRIL 3, 1800.

TREASURY DEPARTMENT, *April 3, 1800.*

SIR:

In obedience to the order of the Senate, of the 1st instant, I have the honor to transmit, herewith, an account exhibiting the duty collected upon salt imported into each of the United States, from the years 1793 to 1798, inclusively; the amount of allowances made to fishing vessels; and of bounties on the exportation of salted provisions and pickled fish, in the said States, respectively, during the same period.

I have the honor to be, very respectfully, sir, your obedient servant,

OLIVER WOLCOTT.

The Honorable the PRESIDENT of the Senate of the United States.

A Statement exhibiting the Amount of Duty on Salt imported into the United States; of Allowances made to Vessels employed in the Fisheries; and of Bounties on Fish and Salted Provisions exported, annually, from the year 1793 to 1798, both inclusively.

STATES.	FOR THE YEAR 1793.			FOR THE YEAR 1794.			FOR THE YEAR 1795.			FOR THE YEAR 1796.			FOR THE YEAR 1797.			FOR THE YEAR 1798.		
	Duty on salt imported.	Allowances to vessels employed in the fisheries.	Bounties on fish and salted provisions exported.	Duty on salt imported.	Allowances to vessels employed in the fisheries.	Bounties on fish and salted provisions exported.	Duty on salt imported.	Allowances to vessels employed in the fisheries.	Bounties on fish and salted provisions exported.	Duty on salt imported. 6th CONGRESS.]

No. 150.

[1st Session.

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 25, 1800.

TREASURY DEPARTMENT, April 25, 1800.

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, of this date, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed on the second of April, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

OLIVER WOLCOTT.

The Hon. the SPEAKER of the House of Representatives of the United States.

TREASURY DEPARTMENT, Comptroller's Office, April 25th, 1800.

SIR:

The statements marked A, B, C, and D, which I now lay before you, have been prepared in obedience to the seventh section of an act of Congress, of the second of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." These, with the statements which accompanied my letter of the 30th of January, 1799, afford as complete a view of the principal transactions of that institution, as the settlements hitherto made at the treasury enable me to give. They contain, I hope, all the information expected by the Legislature.

I have the honor to be, sir, with very great respect, your obedient servant,

JOHN STEELE.

The Hon. OLIVER WOLCOTT, Esq. Secretary of the Treasury.

A.

Statement of appropriations made by law for the Mint establishment, for the year 1798, with the amount of warrants drawn by the Secretary of the Treasury on said appropriations.

Amount of warrants drawn on the Treasurer in favor of the mint, in the year 1798, - - - - -	\$7,000 00	Balance of the several appropriations for the mint establishment, unexpended on the 1st January, 1798, - - - - -	\$33,778 72

TREASURY DEPARTMENT, Register's Office, April 24th, 1800.

JOSEPH NOURSE, Register.

Summary Statement, exhibiting the value of the Coins made at the Mint; the amount of disbursements on account of that establishment; the amount allowed for wastage; the amount retained of deposites; and the amount gained on the coinage of Copper.

	Dollars.	Cts.	Dollars.	Cts.
Value of gold coins made at the mint of the United States, from the 18th of July, 1794, to the 30th of June, 1798, per former statement marked D, - - -	-	-	462,535	00
Ditto, of silver coins, made during the same period, per same statement, - - -	-	-	709,558	75
Ditto, of gold coins, made from the 1st of July, 1798, to the 30th of June, 1799, per statement marked D, now transmitted, - - -	-	-	101,155	00
Ditto, of silver coins, made during the same period, per same statement, - - -	-	-	340,270	00
Total value of gold and silver coins, made at the mint, to June 30, 1799, - - -	-	-	1,613,518	75
Ditto, of copper coins, made from the establishment of the mint, to the 31st of December, 1799, per statement marked C, now transmitted, viz:				
Amount paid to the Treasurer of the United States, - - -	48,041	42		
Ditto, on hand, - - -	2,070	00		
			50,111	42
Total value of gold and silver coins, made to the 30th of June, and of copper coins, made to the 31st of December, 1799, - - -	-	-	1,663,630	17
Amount of disbursements on account of the mint establishment, from its institution, to the 31st of December, 1797, per former statement marked B, - - -	-	-	154,695	59
Ditto, for the year 1798, per statement marked A, now transmitted, - - -	-	-	31,367	50
Ditto, for the year 1799, per statement marked B, now transmitted, - - -	-	-	37,293	10
Total amount of disbursements to the 31st of December, 1799, - - -	-	-	223,356	19
Amount of wastage in the coinage of gold, from the 18th of July, 1794, to the 30th of June, 1798, per former statement marked D, - - -	1,127	45½		
Ditto, in the coinage of silver, during the same period, per same statement, - - -	3,945	99		
Ditto, in the coinage of gold, from the 1st of July, 1798, to the 30th of June, 1799, per statement marked D, now transmitted, - - -	84	62½		
Ditto, in the coinage of silver, during the same period, per same statement, - - -	335	57		
Total amount allowed for wastage, to the 30th of June, 1799, - - -	-	-	5,493	64
Total amount of wastage to the 30th of June, and of disbursements to the 31st of December, 1799, - - -	-	-	228,849	83
Deduct the following sums, viz:				
Amount retained of deposites to the 30th of June, 1799, agreeably to the accounts of the mint, adjusted at the treasury, - - -	1,446	86		
Amount gained on the coinage of copper, from the establishment of the mint to the 31st of December, 1799, per statement marked C, now transmitted, - - -	17,725	69		
			19,172	55
Leaves this sum as a nett charge on the coinage of bullion, to the 30th of June, and on the coinage of copper, to the 31st of December, 1799, exclusive of the sum of \$2,253 40, paid to John Vaughan, under an act of Congress of the 11th of February, 1800, being the amount allowed him for the difference on silver bullion, deposited by him at the mint, for coinage, previous to the month of December, 1795, - - -	-	-	209,677	28

ADDITIONAL REVENUES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 30, 1800.

Mr. Harper made the following report:

The Committee of Ways and Means having, in a former report, (See No. 147) wherein they recommended a loan of three millions and a half for the service of the present year, adverted to the propriety of providing permanent revenues, equal to the interest of the debt to be incurred, and to the gradual and timely extinguishment of the principal, now beg leave to call the attention of the House again to that important subject; on which they submit the following report:

The first point which presented itself for the consideration of the committee, in examining this subject, was "the amount to which it would be proper to establish additional revenue at this time." This must depend on the present and future increase of permanent expenditure, compared with the probable amount of permanent revenue from existing taxes.

When Congress, in the year 1798, was compelled, by the continued aggressions of a foreign Power, to commence active and extensive preparations for defence, by sea and land, the ordinary expenditure of the Government, including the interest of the public debt, the payment on account of the principal, and an adequate allowance for occasional grants and incidental expenses, was something less than seven millions of dollars. No increase, of any consequence, has been made in this expenditure, since that time, except what was occasioned by the interest of the debt, which the measures necessary for the defence of the country forced Congress to contract. As this debt amounts to five millions, at eight per cent., the increase, on that account, is 400,000 dollars.

The continuation of those measures, for some time longer, having rendered it necessary, in the opinion of the House, to contract a further debt of three millions and a half, for the present year, that measure, if ultimately adopted, and carried into effect on the same terms with the former, which may perhaps be found unavoidable, will induce a further increase of 280,000 dollars in the ordinary expenditure of the Government, making, in the whole, an increase of 680,000 dollars for the interest of new loans.

It is known that, at the beginning of next year, a further addition of about 1,200,000 dollars must be made to the ordinary expenditure, for the interest and extinguishing annuity of the deferred debt: and that, in 1802, the payments on the foreign debt will be larger, by one million, than in the present year. In 1803 and 1804 those payments will be increased to two millions beyond their present amount; but, after that period, they will gradually diminish, and, in 1809, they will finally cease, by the extinguishment of the debt.

The committee, however, though they have thought it useful to extend their view to this more remote increase of expenditure, are of opinion that it is not necessary for Congress to make provision, now, on that subject. No part of this increase will take place till two years hence; and before that period arrives, Congress will have a better view of the political and financial situation of the country than at present, and will be better able to judge respecting the means of meeting the exigency. But yet, the certainty of this future increase proves the necessity of providing, as far as can be conveniently done, for that which has already taken place, or must soon happen; so that the burden may be divided between different periods, and as little as possible may be left to be done hereafter.

Neither do the committee think it necessary to make provision, during the present session, for the deferred debt. The political situation of the country is now far more uncertain, than, in all probability, it will be at the next meeting of Congress. Should it change for the better, as there is reason to hope, the augmentations now to be made, together with the increase of revenue which we may reasonably expect, from our present system, may be sufficient, with some small aids, for defraying this additional expense. If, on the contrary, our situation should remain the same, still we shall have more experience than we now possess of the operation of our present system, and of the effect of the war on our commerce and our revenue. The preparatory arrangements, moreover, for an amelioration and enlargement of our system, will then be completed, or in a much more advanced state than at present. We shall, consequently, be then in a better situation than we now are for judging whether a further augmentation will be necessary, to what extent it must be carried, and how it may best be made.

It is only for the interest of the loans of the present and last years, therefore, and for a sum equal to the reimbursement of the principal, within a convenient time, that the committee would propose to make provision, during the present session of Congress.

That interest, at the highest calculation, will amount to 680,000 dollars. It is known that an extinguishing annuity, or a sinking fund, equal to two per cent. on the principal of a debt, will, if steadily applied, extinguish it in about twenty-four years. This is the plan heretofore adopted by Congress for the extinguishment of the six per cent. stock; and the committee conceive that it may be safely adhered to, in all arrangements for a similar purpose: it appearing certain that, while adequate provision is made for the punctual discharge, within so short a period, of every new engagement, there can be but little reason to apprehend a dangerous or inconvenient accumulation of debt.

This annuity of two per cent. on the loans of the last and present years, admitting the latter to be fixed at 3,500,000 dollars, will amount to 170,000 dollars; and, added to the amount of interest, will produce an aggregate expenditure of 850,000 dollars, annually, for twenty-four years. As this annuity, however, by the terms of the former loan, which are likely to be found necessary in the present, also, cannot, until the end of ten years, be applied to the discharge of this particular debt, it must be employed, should Congress think fit to raise it, in the purchase of the public debt in general, by way of sinking fund. The committee are of opinion that every consideration of sound policy, and the best established principles of financial economy, are in favor of raising it.

At the period above referred to, the summer of 1798, the Government possessed a revenue of something more than eight millions of dollars, derived from the duties on imports and tonnage; the tax on domestic distilled spirits and stills, on retailers licences, on refined sugar, on carriages, and on sales at auction; the postage of letters; dividends of bank stock belonging to the United States; and some other less considerable branches of revenue. As the ordinary expenditure, at that time, was less than seven millions, there was a balance of a million and upwards in favor of the treasury.

Had the revenue continued equally productive in the subsequent year, 1799, there would have been no need of further provision at this time; since the above mentioned balance would have been more than sufficient to cover the increase of permanent expenditure. But that was not the case. The duties on imports and tonnage, which, in 1798, produced \$7,405,420, fell, in 1799, to \$6,437,886—a diminution of very nearly one million; and although the stamp duties, and perhaps the other branches of the internal revenue, were more productive in that year than in the former, yet that increase, amounting to only \$200,000, was far from sufficient to counterbalance the diminution in the imports and tonnage.

It is not, however, to be apprehended, in the opinion of the committee, that the diminution in question will be permanent. On the contrary, they suppose it to have resulted from two causes, of a temporary nature: first, the extensive depredations on our commerce, which took place in 1796, 1797, and 1798, especially the two former, the full effect whereof was not felt in the revenue, till 1799, because it was in that year that the duties on the imports of 1798 became payable; and secondly, the great re-exportation of foreign commodities in 1799, which amounted to 45,523,335 dollars, exceeding, by 12,000,000 dollars, those of any former year, and which drew from the treasury very great sums in drawbacks. As this branch of the revenue is bottomed on the consumption of the country, which, notwithstanding occasional fluctuations, has a constant progressive increase with the increase of population and wealth, the committee conceive that it may be expected soon to regain its former level, and gradually to augment. In proof of which they remark, that the first quarter of the present revenue year, the returns of which are before the House, exceeds in product the first quarter of the last year, or of 1797, and very nearly equals that of 1798.

This event, however, though highly probable, as it seems to them, being still uncertain, and the revenue, in its present state, being unequal to the increased scale of expenditure, resulting from the interest of this and the last year's loans, and to a reasonable provision for deficiencies, and for the extinguishment of the principal; the committee conceive it proper, and even indispensable, to provide, at present, for the additional sum of \$850,000, at the least. More, they think, will not now be necessary.

Having come to this conclusion, as to the amount of the sum which it would be expedient to provide for at this time, they next turned their attention to the ways and means of making the provision.

As the official situation of the Secretary of the Treasury gives him more exact and extensive information, on the subject of revenue, than any other person can be supposed to possess, and enables him to form the most correct opinions respecting the probable operation, and comparative merits, of different schemes of taxation, the committee thought it proper to address their inquiries, in the first instance, to him, and to wait for the result of his deliberations, before they should decide. For this purpose was written the letter, of which a copy, No. 1, is subjoined to this report.

In his answer, which, together with the statements therein referred to, No. 2, is also hereto annexed, the Secretary proposes to augment the duties on several kinds of wine; to raise those articles which now pay a duty of ten per centum ad valorem, to 12½ per centum; and to make a new arrangement respecting drawbacks on goods re-exported, the effect of which would be, to impose a tax from about 15 to about 18 per centum of their whole amount,

on the drawbacks now allowed. This effect would be produced, by refusing, altogether, the drawback on certain articles, which are enumerated in the paper C, accompanying the Secretary's letter, and by withholding a greater or less part of it on a variety of other articles, in the manner stated in the paper B, referred to in the same letter.

The Secretary has informed the committee that he expects, from these three measures, should they be adopted, an addition to the revenue of about \$900,000 annually. But he has not stated what part of this addition he expects from each measure separately. The two first he proposes to make perpetual. The third, the tax on drawbacks, he would continue no longer than during the present war in Europe.

When they proceeded to the examination of this plan, they found no difficulty as to that part of it which relates to the augmentation of duties.

Wines, indeed, are now highly taxed; but, being a mere luxury, which is consumed solely by people in affluent or easy circumstances, they appear to be a very proper object of revenue; and it is not apprehended that a moderate increase of the duty would diminish the consumption, or endanger smuggling. This reasoning, as the committee conceive, will be confirmed by a statement of the amount of duties on wines, which is annexed to this report, No. 3, and from which it appears that, from 1794 to 1797, inclusive, the nett product of those duties has increased from \$457,308 to \$524,135, although no additional duty has been laid during that period. The returns for 1798 are too incomplete to be taken into the calculation. During the latter part of that period, indeed, there has been a fall in this product, as in that of many other branches of the revenue; but it appears from the average, that this fall is more than counterbalanced by the rise in the former part, and the committee conceive that such fluctuations, arising from accidental and transient causes, are always to be expected, and that the average of a number of years can alone afford a safe criterion whereby to judge on subjects of this kind.

It is, moreover, to be observed, that the duties on wines have, hitherto, been injudiciously laid, so as to produce a strong temptation to enter high priced wines, which pay a very high duty, under the names of those of a low price, whereon the duty is comparatively low. There is reason to believe, as the committee are informed by the Secretary of the Treasury, that much loss to the revenue has already been experienced from this cause. The plan contained in his new tariff, the paper B, proposes to remove this cause, by a different adjustment of the duties in question.

As the average product of the duties on wines appears, by the statement No. 3, to be upwards of \$600,000, an addition of 20 per cent. on the amount of the present duty would produce \$120,000. This addition, it is conceived, might be safely made, in the manner proposed by the Secretary of the Treasury.

As to the articles paying a duty of 10 per cent. ad valorem, which are very numerous, and of great value, including all woollen goods, white cottons, and nankeens, with other articles of less importance, the committee are of opinion, with the Secretary of the Treasury, that an additional duty of two and a half per centum on the value of the article may safely be laid on them. The present duties on all articles paying a rate per centum, ad valorem, of which the ten per cent. constitute a great proportion, probably two thirds, were fixed in 1792, except a few, which were raised from 10 to 12½ per cent. in 1797; and they produced their full effect in 1793: from the end of which latter year, until the end of 1798, the nett product of those duties rose from \$2,319,817 to 2,717,657, as appears by a statement, No. 4, which is subjoined to this report. The increase, indeed, must probably have been greater, as the returns for the last mentioned year, 1798, are very incomplete—two quarters being wanting from Philadelphia, as many from Charleston, and four from Savannah; which deficiencies will, probably, be found to have produced a greater deduction from the product in 1798, than can have been made up for by the additional duties laid in 1797. This progressive increase, notwithstanding the intermediate fluctuation, appears to the committee to prove, satisfactorily, that the importation of the articles in question is not injuriously affected by the present duty; which may, therefore, be safely augmented to the amount proposed.

There is another consideration on this head, which is conceived to be of great weight. These articles are all imported from distant places, on general freight, and in ships of great value; which circumstances so much increase the difficulty and hazard of smuggling, as to leave little danger of its being attempted, under the operation of any duties that the consumption will bear. They are, moreover, in the same situation with many other articles, such as muslins, muslinets, and colored cottons, which now pay the proposed duty of 12½ per cent.

The average nett product of the ad valorem duties, from 1794 to 1798, inclusive, a period of five years, being \$3,181,173, as appears from the statement above mentioned, No. 4, it follows that, if the ten per cents be supposed to constitute two thirds of the whole mass, which is probably the case, the additional 2½ per cent. proposed to be laid on them would produce 600,000 dollars.

As to the third proposition of the Secretary, the tax on drawbacks, it appeared liable to more doubt.

In support of the plan, it was urged, that the great mass of our re-exportation consists in commodities, chiefly sugar and coffee, which we bring from the East and West Indies, and afterwards carry to Europe, for the consumption of France, Holland, and Germany; and in East India and China goods, wherewith we supply the people of the West Indies and of South America. That the commerce of France, Holland, and Spain, being annihilated by the events of the war, and that of Sweden and Denmark very inconsiderable, the carrying trade may be considered as almost exclusively possessed by the English and ourselves. That the English, being at war with France, Spain, and Holland, and thereby excluded from the ports of those nations in Europe, Asia, and America cannot enter into competition with us, in the business of supplying their possessions, especially those in South America and the West Indies, with East India and China goods; and that we, consequently, having the exclusive possession of this traffic, may lay what price we please on the goods re-exported; and, of course, may compel the consumers to repay to us the tax laid on those goods here, by the refusal of part of the drawback. That the same reasoning will apply, in a great degree, to the supply of Europe with sugar, coffee, and other East and West India commodities, because France, Holland, and Spain, being shut against the English, by the war, they cannot become our competitors for the direct supply of those countries. That, as to the indirect supply, through the ports of Germany and Portugal, especially the former, which are by far the most considerable, we can furnish it on better terms than they; because they are excluded from many of the countries where the commodities are produced, and because their trade with the north of Germany is exposed to great danger and interruption from the French and Dutch privateers. And finally, that the English are the less able to enter into a competition which we ought to dread, inasmuch as the monopoly of their East India trade, by a particular company, prevents individual enterprise and ingenuity from being excited in carrying it on, upon the best terms; and as the English Government itself has laid a duty on exports, during the war, equal to that proposed by the plan under consideration: so that her merchants and ours being on an equal footing, in that respect, they could not under-bid us in the foreign markets to which both resort.

From hence, it was concluded that, while the war in Europe, and the present state of things resulting from it, shall continue, a tax on drawbacks, such as that proposed, would be a tax, not on our own commerce or our own merchants, but on foreign nations, who, being the consumers of the re-exported commodities, whereon the tax would fall in the first instance, and being compelled, during the war at least, to purchase those commodities from us alone, would be under the necessity of repaying to us the tax, in addition to the price which we should otherwise demand.

To this it was answered, that the whole argument rests on the supposition of our being able to effect two things, both of which are of a very uncertain nature, namely, to monopolise the business of supplying the countries in question with East and West India and China commodities, and to compel those commodities to touch first at our own ports, before they are carried to the places where they are consumed: it being clear that if, by raising the price of the commodities, we should raise up competitors, who would under-bid us in the foreign markets; or should, by taxing them on their arrival in our own ports, render it the interest of our merchants to carry them directly from the places of their production, to the places where they are to be consumed, without landing them in this country; we should, in either case, lose the duty: in the first, by ruining altogether the trade, whereon it must depend; and in the second, by turning the trade away from our own ports, where alone the duty can be collected.

Whether we should be able to monopolise the business in question, to such an extent as to have it in our power to lay our own price on the commodities which compose it, was said to be very uncertain, for various reasons: First, because the English possess very far the greater part of those places, in the East and West Indies, where the va-

luable commodities consumed in Europe are produced, and their merchants can carry them directly from thence to the ports of Germany, or of Denmark and Sweden, from whence they would easily find their way into Holland and France. Secondly, because the duty on exports laid in England, may easily be avoided by her merchants, by means of going directly to the foreign markets, instead of first touching at home; and the danger of privateers is greatly lessened, by the convoy which she gives to her trade, and the great number of her squadrons and cruising frigates in those seas—circumstances whereby her trade is, probably, rendered more secure than ours. And thirdly, because, although her merchants cannot carry the East India and China goods, directly, to the French, Spanish, and Dutch possessions, in the West Indies and South America, they can, and do carry those goods, in immense quantities, to their own islands; from whence they are known to find their way, by means of an illicit trade, perhaps connived at by those employed to prevent it, into the places, of which we suppose ourselves to possess the exclusive supply.

As to the example of England, which is said to have laid our export duty, analogous to the tax or drawbacks now proposed, it was observed, in the first place, that the experiment in England has not been long enough made to enable us to judge of its success; secondly, that, so far as time has furnished information on that head, the experience of England is against the plan, her exports having diminished since the period when that tax was laid; and thirdly, that what is called a tax on exports in England, is, in fact, a premium paid for convoy, which the Government, in consideration of this premium, engages to furnish, and does furnish, to every ship sailing from her ports—an arrangement which enables shippers to obtain their insurance at a lower rate; so that the duty on exports, instead of being a tax on the trade of England, is merely a part of the premium of insurance, which the merchants pay to the Government, instead of paying it to the underwriters: whereas, in our case, as we give no convoy, it would be a mere tax on our trade, which our merchants must pay in the first instance, and might or might not, be able to get back from the consumers.

If they should prove unable to get it back from the consumers, by reason of the competition, which the augmentation of price, consequent to the duty, might create or increase, the trade must, in the end, be ruined; and with it must perish, not only a great portion of our revenue, and of our navigation, the basis of our future maritime strength, but also of the industry of our sea port towns, which is nourished and sustained by our navigation.

If, on the other hand, they should prove able to levy this tax, ultimately, on the consumers, still, it was urged, would the question remain, whether the tax would be sufficient to induce the merchants to avoid our own ports, and either to go directly to the consumers, from the places where the commodities are produced, or, where that cannot be done, to touch at some ports where no such duty is laid; in either of which cases, we should not only lose the revenue expected from this duty, but also affect, to a degree not easily foreseen, all those branches of industry, in our country, which are connected with the landing, storage, and re-shipment of goods, and the arrival, repair, and supply of ships.

The duty of two and a half per cent. on the amount of a valuable cargo, it was observed, is a premium sufficient to afford a very strong temptation to avoid our own ports. Men of small capital, who could only import parcels of goods on freight, might not be able to do this, and therefore, must pay the duty; while large capitalists, who import entire cargoes, in their own or in chartered ships, might be able to do it, and thus avoid the duty; whereby a monopoly would be created, to the very great detriment of our commercial interest—the prosperity of which depends far more on the mass of small capitalists than on the small number of great ones.

It was further urged, that this measure, so hazardous in itself, and the mischiefs whereof, should it prove unsuccessful, must always take place, and may have become irremediable, before they can be perceived, is by no means necessary, since the two first parts of the Secretary's plan, the additional duties on wines, and the ten per cent. articles, will afford an additional revenue of from six to seven hundred thousand dollars; to which might be added 200,000 dollars by a half cent per pound additional on brown sugar; and 50,000 dollars by a like addition, per pound, on coffee—making, in the whole, an additional revenue of at least 900,000 dollars; which is more, by 50,000 dollars, than the sum proposed to be raised.

It was shown, by a statement of the duties on brown sugar, for six successive years, which is annexed to this report, No. 5, that the nett product of that article, at a duty of one and a half cents per pound, from the beginning of 1793 to the end of 1797, a period of five years, increased from 646,715 dollars, to 735,671 dollars; and that the average nett product, for a period of six years, from 1793 to 1798, inclusive, was 586,292 dollars. It was contended that, although an addition of half a cent was made to that duty in 1797, and the product in 1798, nevertheless, appeared to be less than in former years, being only 630,791 dollars, as stated from the returns, yet no conclusion unfavorable to the duty could be drawn from thence; because the returns for that year, were very deficient; two quarters being wanting from Philadelphia and Charleston, and four from Savannah; which, probably, had reduced the apparent amount much more than the actual receipt had been augmented by the additional duty.

Hence, it was inferred, that the consumption and importation of brown sugar had not been injuriously affected by the former duty; and that the average nett product being at the rate of 200,000 dollars, for every half cent of duty, that sum might be expected from the proposed augmentation.

On the subject of coffee, it was shown, by a statement of the duties on that article, for six successive years, from 1793 to 1798, inclusive, which is also annexed hereunto, No. 6, that the average nett product of those duties, during the period in question, was 498,762 dollars, although the returns for the last year in the period were incomplete, as has been already stated, and no addition has been made to the duty since 1792. Hence, it was inferred that an additional half cent might safely be laid on that article also; which, as the present duty is five cents per pound, would produce 50,000 dollars.

Such were the arguments, for and against the proposed tax on drawbacks; and such the objects of revenue, which it was thought might, with more safety and propriety, be adopted in its stead.

The committee did not deem it their province to pronounce any decision on these points, but solely to bring them into the view of the House, and submit them to its consideration.

There was, however, one proposal made, which does not appear to them to be of a doubtful nature, and which they have, therefore, thought it proper to recommend.

In the act allowing drawbacks, there is a provision, that one per cent. on the whole amount of them shall be retained, in order to defray the expense of management. Afterwards, one quarter per cent. was added to this first deduction, in lieu of stamp duties on debentures. It has been suggested by the Secretary of the Treasury, that the sum thus retained is found insufficient to defray the expenses incident to the allowance of drawbacks; and the committee are of opinion that it will be proper to double it. In that case, the reduction made by the Government, for the expense of management, and in lieu of stamp duties on debentures, will amount to about 100,000 dollars annually, which, as the present amount does not exceed 50,000 dollars, will be a further addition to the revenue of 50,000 dollars.

Having thus brought the whole subject into view, as fully as seemed to them to be proper, the committee beg leave, in order to take the sense of the House, on the various matters stated in their report, to submit to its consideration the following resolutions.

1st. *Resolved*, That it is expedient to lay an additional duty of ——— per centum on the amount of the present duty upon wines imported into the United States.

2d. *Resolved*, That it is expedient to lay an additional duty of ——— per centum ad valorem on such goods, wares, and merchandises, imported into the United States, as are now subject to a duty of ten per cent. ad valorem.

3d. *Resolved*, That it is expedient to lay a tax on drawbacks allowed by law, for goods re-exported from the United States, according to the plan proposed in the letter of April the 10th, 1800, from the Secretary of the Treasury to the Committee of Ways and Means.

4th. *Resolved*, That it is expedient to lay an additional duty of ——— per pound on brown sugar and coffee imported into the United States.

5th. *Resolved*, That it is expedient to retain ——— per centum on all drawbacks allowed for goods re-exported from the United States, for the expenses incident to the allowance thereof, and in lieu of the stamp duties on debentures, in addition to the sums heretofore directed, by law, to be so retained for the aforesaid purposes.

No. 1.

COMMITTEE ROOM, *February 14th*, 1800.

The Committee of Ways and Means, Sir, conceiving it proper for Congress to establish, during the present session, permanent revenues equal to the interest of the loan which may be necessary to make this year, and perhaps, to that of last year also, the amount of which two charges will, probably, not fall short of six hundred and eighty thousand dollars, annually, have directed their attention to the inquiry, "from what sources this additional revenue may be drawn, with the least difficulty to the Government, and the greatest ease to the public." Before, however, they come to any final resolution on so important and difficult a subject, they wish to obtain your opinion on the following points:

1st. Admitting the necessity of providing for both loans, can the requisite sum, or any considerable part of it, be raised by an addition to the duties on certain articles imported? What are those articles, and to what amount may new duties be laid on them? The committee have thought of wines, spirits, brown sugars, and woollen cloths. Salt, also, has been suggested as an article on which a further duty might, perhaps, be laid.

2d. Admitting a further duty to be laid on wines, and spirits imported, will it not be necessary to make a corresponding augmentation on the tax on stills, and domestic distilled spirits? and can such augmentation be made, with due regard to the situation of remote parts of the country?

3d. What would be the policy of abandoning, altogether, the idea of augmenting the imposts, and resorting to an internal tax, by way of excise, on wines, spirits, coffee, teas, and sugars? or, would it be better to adopt both modes, in part?

4th. As a change will, probably, be made this year, in the mode of stamping, which will render it proper to call in and change the stamps, might not those duties be safely augmented, so as to raise a further sum of one hundred thousand dollars?

5th. Might not a national lottery be established, so as to raise from one hundred thousand to one hundred and fifty thousand dollars, annually? and how far would such a mode of taxation be advisable?

In addition to your opinion on these several points, Sir, the committee would be much obliged by the communication of any ideas which may have occurred to you on the subject in general. And as the interest and extinguishing annuity of the deferred debt will commence next year, they beg you to take into view the means of providing for those objects, likewise.

With the highest respect, I have the honor to be, Sir, &c.

ROBERT G. HARPER.

The Honorable the Secretary of the Treasury.

TREASURY DEPARTMENT, *April 10th*, 1800.

SIR:

I have, with the aid of the best information which I could obtain, deliberately considered the important questions, upon which, on behalf of the Committee of Ways and Means, you have been pleased to request my opinion.

Although, according to my view of the subject, the public debts have not hitherto, considerably increased, since the establishment of the existing Government, yet, as the expenditure, at the present time, considerably exceeds the stated income from duties and taxes, an augmentation of the revenue appears to be advisable.

The sources from which this revenue may be expected, with the greatest ease to the community, are believed to be the following:

1st. From an increase of duties on the importation, and a new arrangement of drawbacks, payable on the exportation of certain articles of foreign growth or manufacture.

2d. From a new modification of the duties on stills employed in the distillation of spirits from domestic materials.

3d. From a duty on the transfer of real property, to be collected by stamps.

The first mentioned subject being the most complex, and of great importance, considered both in relation to the interests of commerce and the revenue, is separately presented to the consideration of the committee.

The paper herewith transmitted, marked A, exhibits a view of the rates of duties, at present levied on imports; that marked B is respectfully offered as a substitute.

It is proposed to increase the duties on several kinds of wines, and generally to impose a duty of twelve and a half per centum ad valorem, on the merchandise at present subject to duties at ten per centum; a few articles only, of no great importance, are placed in the list of goods subject to rate of fifteen per centum.

It is known to the committee that the quantities of articles of foreign growth or manufacture, which are imported into the United States, for the purpose of being exported, have greatly increased, and are still increasing; the sum of one and one quarter per centum upon the duties, at present retained, is found, on calculation, to be hardly sufficient to defray the custom house expenses, occasioned by this branch of business. After a very close examination of the subject, it is my opinion that the revenue may be increased, and the manufactures of the country encouraged, by reducing the drawback in the mode proposed, without injury to commerce.

This opinion will, it is believed, receive a confirmation, from an examination of the commercial and financial systems, and actual situation of the countries, with which our commerce of importation and exportation is, at present, prosecuted; to guard, however, against the consequences of any mistake, it is respectfully proposed that the present rates of drawback shall be allowed, after the termination of the present war in Europe.

I have the honor to be, with the greatest respect, Sir, &c.

OLIVER WOLCOTT.

The Honorable ROBERT G. HARPER, Esq. Chairman of the Committee of Ways and Means.

TREASURY DEPARTMENT, *April 12th*, 1800.

SIR:

In compliance with your request, I have the honor to inform you that, if the tariff of duties and drawbacks, which accompanied my communication of yesterday, shall be established, the revenue will probably receive an addition of about nine hundred thousand dollars per annum.

I have added, at your request, a particular list of the articles upon which the duties are proposed to be increased or varied.

I have the honor to be, with respect, Sir, &c.

OLIVER WOLCOTT.

The Honorable ROBERT G. HARPER, Esq.

A.

Abstract of all the articles of merchandise which are subject to specific rates of duty, on their importation into the United States.

		IF IMPORTED IN	
		American ships or vessels.	Foreign ships or vessels.
		Cents.	Cents.
Ale, beer, and porter, in casks or bottles,	per gal.	8	8 $\frac{4}{5}$
Boots,	per pair	75	82 $\frac{1}{2}$
Cards, playing,	per pack	25	27 $\frac{1}{2}$
Ditto wool and cotton,	per doz.	50	55
Cables and tarred cordage,	per cwt.	180	198
Candles of tallow,	per lb.	2	2 $\frac{1}{2}$
Ditto, wax, or spermaceti,	do.	6	6 $\frac{3}{4}$
Cheese,	do.	7	7 $\frac{7}{10}$
Cocoa,	do.	2	2 $\frac{3}{10}$
Chocolate,	do.	3	3 $\frac{3}{10}$
Cordage and yarn untarred,	per cwt.	225	247 $\frac{1}{2}$
Coal,	per bush.	5	5 $\frac{3}{4}$
Coffee,	per lb.	5	5 $\frac{1}{2}$
Cotton,	do.	3	3 $\frac{3}{10}$
Glauber salts,	per cwt.	200	220
Hemp,	do.	100	110
Indigo,	per lb.	25	27 $\frac{1}{2}$
Lead and musket ball, (d.)	do.	1	1 $\frac{1}{10}$
All other manufactures of lead, or in which lead is the chief article,	do.	1	1 $\frac{1}{10}$
Malt,	per bush.	10	11
Molasses,	per gal.	4	4 $\frac{2}{5}$
Nails,	per lb.	2	2 $\frac{2}{5}$
Pack-thread and twine,	per cwt.	400	440
Pepper,	per lb.	6	6 $\frac{3}{5}$
Pimento,	do.	4	4 $\frac{2}{5}$
Salt weighing more than 56 lbs. per bushel, (a.)	per 56 lb.	20	22
Ditto weighing 56 lbs. per bushel, or less,	per bush.	20	22
Steel,	per cwt.	100	110
Spirits, distilled in foreign countries, from grain.			
First proof,	per gal.	28	30 $\frac{4}{5}$
Second do.	do.	29	31 $\frac{6}{10}$
Third do.	do.	31	34 $\frac{1}{10}$
Fourth do.	do.	34	37 $\frac{2}{5}$
Fifth do.	do.	40	44
Sixth do.	do.	50	55
From other materials.			
First proof,	per gal.	25	27 $\frac{1}{2}$
Second do.	do.	25	27 $\frac{1}{2}$
Third do.	do.	28	30 $\frac{4}{5}$
Fourth do.	do.	32	35 $\frac{3}{5}$
Fifth do.	do.	38	41 $\frac{4}{5}$
Sixth do.	do.	46	50 $\frac{3}{5}$
Spirits distilled in the United States, imported in the same ship or vessel in which they had been previously exported from the United States, from molasses. (c.)			
First proof,	per gal.	14	14
Second do.	do.	15	15
Third do.	do.	16	16
Fourth do.	do.	18	18
Fifth do.	do.	22	22
Sixth do.	do.	29	29
From materials of the growth and produce of the United States.			
First proof,	per gal.	7	7
Second do.	do.	8	8
Third do.	do.	9	9
Fourth do.	do.	11	11
Fifth do.	do.	13	13
Sixth do.	do.	18	18
Spikes,	per lb.	1	1 $\frac{1}{10}$
Shoes and slippers of silk,	per pair	25	27 $\frac{1}{2}$
Ditto other shoes and slippers for men and women, clogs, and goloshoes,	do.	15	16 $\frac{3}{5}$
Ditto other shoes and slippers, for children,	do.	10	11
Soap,	per lb.	2	2 $\frac{1}{2}$
Sugars, brown,	do.	2	2 $\frac{1}{2}$
Ditto, white clayed,	do.	3	3 $\frac{3}{10}$
Ditto, white powdered,	do.	3	3 $\frac{3}{10}$
Ditto, all other clayed or powdered,	do.	2	2 $\frac{1}{2}$
Ditto, lump,	do.	6 $\frac{1}{2}$	7 $\frac{3}{5}$
Ditto, loaf, (b.)	do.	9	9 $\frac{3}{5}$
Ditto, other refined,	do.	6 $\frac{1}{2}$	7 $\frac{3}{5}$
Sugar candy,	do.	9	9 $\frac{3}{5}$
Snuff, (b.)	do.	22	24 $\frac{1}{2}$

A—Continued.

		IF IMPORTED IN	
		American ships or vessels.	Foreign ships or vessels.
Teas from China, and India.			
Tea, bohea,	per lb.	12	17½
Ditto, souchong, and other black teas,	do.	18	27
Ditto, hyson, imperial, gunpowder, or Gomee,	do.	32	50
Other green teas,	do.	20	30
Teas from Europe.			
Tea, bohea,	do.	14	17½
Ditto, souchong and other black teas,	do.	21	27
Ditto, hyson, imperial, gunpowder, or Gomee,	do.	40	50
Other green teas,	do.	24	30
Teas from any other place.			
Tea, bohea,	do.	17	18 ⁷ / ₁₀
Ditto, souchong or other black teas,	do.	27	29 ⁷ / ₁₀
Ditto, hyson, imperial, gunpowder, or Gomee,	do.	50	55
Other green teas,	do.	30	33
Tobacco, manufactured, other than snuff, (b.)	do.	10	11
Wines, in casks, bottles or other vessels.			
Wine, London particular Madeira,	per gal.	56	61 ³ / ₁₀
Ditto, London market do.	do.	49	53 ³ / ₁₀
Ditto, other do. do.	do.	40	44
Ditto, Burgundy and Champagne,	do.		
Ditto, Sherry,	do.	33	36 ³ / ₁₀
Ditto, St. Lucar,	do.	30	33
Ditto, Lisbon and Oporto,	do.	25	27½
Ditto, Teneriffe, Fayal and Malaga,	do.	20	22
Ditto, all other wines, whenever 40 per cent ad valorem would be more than 30 cents per gallon in American, and 33 cents per gallon in foreign vessels, or less than 10 cents per gallon in American, and 11 cents in foreign vessels, are then subject, in the former case, to	do.	30	33
And in the latter case to	do.	10	11

NOTES.

(a.) The additional duty laid on salt by the act of July 8, 1797, is limited to the end of the present session of Congress.

(b.) The additional duties laid on *loaf sugar*, *snuff*, and *manufactured tobacco*, by the act of June 5, 1794, are limited (by the act of March 3, 1795) to March 1, 1801.

(c.) It is questionable whether spirits of this description can now be legally imported—Vide 12 sect. of the act of May 8, 1792, 4 sect. of the act of June 5, 1794, and 103 sect. of the collection law. The rates of duty, as exhibited in the last printed table of duties, are incorrect, being *one cent less* in each case than just, arising from the *additional duty of one cent* laid on molasses, by the act of March 3, 1797.

(d.) These articles, to wit: *lead* and *musket ball*, are exempted from duty (by the act of June 14, 1797, and continued by the act of April 7, 1798,) until the end of the present session of Congress.

Abstract of sundry articles of merchandise which are subject to ad valorem rates of duty, on their importation into the United States.

Teneriffe, Fayal, Malaga, St. George, and other Western Islands, - - - - -	ditto, 25	23
All other wines, when otherwise imported than in bottles or cases, - - - - -	ditto, 20	18

All goods, wares, and merchandise, imported in ships or vessels, not of the United States, to be subject to the several rates of duties herein before specified and enumerated; with an addition of ten per centum thereon, except in the cases in which an additional duty is specially laid on any goods, wares, or merchandise, which may be imported in such ships or vessels.

List of articles exempted from duty on their importation into the United States.

Bullion, or foreign gold or silver coin.

Tin, in pigs and plates,

Pewter, in pigs or bars,

Brass teutenage,

Iron and brass wire,

Copper, in plates, pigs and bars,

Lapis calimmaris,

Saltpetre.

Crude Sulphur.

Plaster of Paris.

Unmanufactured wool and wood,

Dying woods.

} When imported in cases or packages of not less than 300 weight each.

Dying drugs, viz. oil of vitriol, galls, roman vitriol, copperas, crude tartar, verdigris, alum.

Madder and wood.

Raw hides and skins,

Undressed furs of every kind, } When imported from the river Mississippi, or by land or inland navigation from the dominions of a foreign Power, immediately adjoining the United States.

Sea-stores of ships or vessels.

Philosophical apparatus, specially imported for any seminary of learning.

Wearing apparel, and other personal baggage, and the tools or implements of a mechanical trade only, of persons who arrive in the United States.

Horses, cattle, and other live stock, masts, timber, planks and boards, and generally all unmanufactured articles of the growth or product of the dominions of any foreign Power, immediately adjoining the United States, not being particularly enumerated as subject to duties, when directly imported from the river Mississippi, or by land or inland navigation, from the dominions of a foreign Power immediately adjoining to the United States.

All goods intended to be re-exported to a foreign port or place in the same ship or vessel in which they shall be imported, not having been previously landed in the United States.

All goods, wares, or merchandise, brought into the United States by ships or vessels which may arrive in distress, and which, being deposited in warehouses, under the direction of the proper officer of the customs, shall be exported in the ship or vessel in which the same arrived, or if such ship or vessel shall be lost, or condemned as unfit for repair, which shall be exported in some other ship or vessel, within three months after the arrival of such goods, wares, or merchandise, within the United States: provided, that the benefit of this provision shall not be extended to cases where the master and other officers of the vessel arriving in distress shall have failed to conform to the regulations prescribed by law, or shall have illicitly landed or concealed any goods, wares, or merchandise, which arrived in such vessel.

All articles of the growth or manufacture of the United States, upon which no drawback, bounty, or allowance, has been paid or admitted.

Note of the alterations of existing Duties proposed by the preceding Tariff.

Unsilvered plate glass is, at present, subject to duties at 20 per centum ad valorem. It is proposed to reduce the duty to 15 per centum, being the general duty on glass manufactures.

Spermaceeti, whale oil, and other oils of sea animals, *other than the produce of the American fisheries.* This is a new item in the tariff of duties; no revenue is expected, as no foreign fish oil is consumed in the United States.

The enumeration is made to settle a question which has arisen under the existing law.

Blank books,

Brushes,

Canes, walking sticks and whips,

Clothing, ready-made,

Writing and wrapping paper,

Laces, other than those used by upholsterers, coach-makers, and saddlers,

Brass, iron, or steel locks, hoes, hinges, anvils and vises,

Pasteboards, parchment, or vellum, saddles, or parts thereof.

Anchor,

Cambrics,

Gauzes,

Gunpowder,

Lampblack,

Linen manufactures not otherwise enumerated,

Pictures and prints,

Printing types,

Sail cloth,

Satins and other wrought silks,

Toys, not otherwise enumerated,

Woollen manufactures, not otherwise enumerated,

All goods not otherwise enumerated, and not specially exempted from duties.

Sufficient quantities of most of these articles are made in the country to supply the demands: the revenue from all of them is inconsiderable. Iron and brass manufactures, in general, are now subject to 15 per cent. duties. It is proposed to raise all these articles from 10 to 15 per centum, principally with the view of rendering the custom house business less complex.

All these articles are at present subject to 10 per cent. ad valorem. It is proposed to increase the duties to 12½ per centum ad valorem.

Specific Duties.

Ale, beer, porter, cider, or perry, in bottles.—The alteration in the duty from a charge on the gallon of ale, beer, and porter, to the dozen, is proposed merely to diminish the trouble of the officers; the duty is not increased.

Cochineal.—This has been a free article; but little is consumed in the United States. It is supposed to be proper to subject it to a small transit duty of 1½ cents per pound.

Ginger.—This is now subject to 15 per centum ad valorem. It is proposed to render the duty specific, at two cents per pound.

Playing cards.—The duty proposed to be reduced five cents per pack.

Spikes are now charged with one cent per pound. It is proposed to lay the same duty as on nails, with which spikes are frequently confounded.

Wines.—It is proposed to add *Malmsey Madeira* wine to the highest class, and to change the second and third qualities of *Madeira* wine at one and the same rate. It is found that but little wine is entered except of the first and third rates.

Rhenish and Tokay wines to be classed with burgundy and champagne, at 40 cents per gallon.

Sherry and St. Lucar wines to be charged with two cents per gallon additional duties.

Lisbon and Oporto wines to be charged with three cents additional duties.

Claret, and other wines not enumerated, when imported in *bottles* or *cases*, to form a new class, to be charged with 32 cents per gallon.

Teneriffe, Fayal, Malaga, St. George, and other Western Islands.—It is proposed that the duties on wines of these descriptions, be increased 3 cents per gallon.

Instead of the duty on *other wines*, which now vibrates between 30 and 11 cents per gallon, it is proposed to establish a specific duty of 20 cents per gallon.

The rates of drawback proposed to be allowed on each article are inserted in the tariff.

C.

List of articles on which it is proposed to allow no drawback.

- Coaches, chariots, phaetons, chairs, chaises, solos, or other carriages, or parts of either.
- Girandoles, or parts thereof.
- Looking-glass, mirrors, and all silvered plate glass.
- Spermaceti whale oil, and all other oils of sea animals, other than the produce of the fisheries of the United States.
- Fire and side arms, or parts thereof, not otherwise enumerated.
- Artificial flowers, feathers, and other ornaments for women's head dresses.
- Annisced.
- Brass cannon.
- Blank books.
- Bonnets, hats, and caps, of every kind.
- Brushes of all kinds.
- Cabinet wares, and generally all manufactures of wood.
- Canes, walking sticks, or whips.
- Cartridge, sheathing, writing, wrapping, and other paper of all kinds.

6th CONGRESS.]

No. 152.

[1st Session.]

PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 8, 1800.

Mr. GRISWOLD, from the committee who were appointed, on the twentieth of March, to examine the accounts of the United States, relating to the public debt, and to report the amount respectively incurred and extinguished, and, generally, such facts as relate to the increase or diminution of the same, since the establishment of the Government of the United States, under the present constitution, made the following report:

That, for the purpose of obtaining every statement from the treasury which could elucidate the subject of inquiry, they addressed a letter to the Secretary of that Department, on the twenty-fourth of March, a copy of which is subjoined to this report, and, on the twenty-ninth of April they received his answer, transmitting sundry statements, numbered from 1 to 9, inclusive, and exhibiting, in the most clear and satisfactory manner, the most important of the treasury operations in relation to the debt, from the commencement of the present Government. These statements, together with three letters from the Secretary, on this subject, are now submitted to the House; and, although it is certainly possible that some trivial errors may have taken place in the details which these documents contain, yet the committee are perfectly confident that the general results which they produce must be correct.

The statements numbers 1 and 2; contain an account of the receipt and expenditure of all public money, from the commencement of the Government, and, whilst they show the application of the revenue to the debt, they will present, at the same time, in one view, every expense with which the treasury has been charged, and enable the Legislature, with more accuracy, to decide how far those objects, or the amount of expense, in particular cases, may be diminished.

The order of the House having particularly directed the attention of the committee to the increase or diminution of debt, they have thought it their duty to bring into view the amount of debt with which the present Government commenced its operations, and to contrast the same with the balance of debt on the first of January, in the present year. In discharging this duty, it will become necessary to explain the principles on which these statements rest, which the committee will do, in as concise a manner as possible. But, before they enter upon this detail, they cannot forbear to express the satisfaction which they feel, in declaring that the documents which have been obtained from the treasury will, in their opinion, fully demonstrate the precision and ability with which the business of that Department has been conducted, and that, by the fiscal operations of the Government, the public debt has been diminished.

In ascertaining the amount of the old debt, two different principles have been taken by those who have made their calculations on this subject. The first has been to include only the interest upon the debt to the close of the year 1789, as the nearest convenient period to the day when the Government commenced its operations, and after deducting from the aggregate of debt, the amount of funds then in the power of the Government, to consider the balance as the amount of old debt. The second principle has been, to take the amount of debt as the same has been liquidated and funded, under various acts of Congress, and after deducting therefrom the funds acquired or possessed by the Government at the close of the year 1790, to consider the balance as constituting the true amount of old debt. The difference between these principles consists in this: by the last mode of computation, the interest which accumulated upon the debt, subsequent to the close of the year 1789, and until the debt was funded and provided for, by law, is considered as a part of the old debt, whereas, by the first mode of computation, that interest is totally excluded.

In consequence of a difference in opinion, which, it is understood, still exists on this point, the committee have thought proper to state the debt in both modes, that the results, in both cases, may be perfectly understood.

The nominal amount of debt, on the 1st of January, 1790, as appears by statement number 9, amounted to \$72,237,301 97

The funds then in possession of the Government, and to be deducted, were—	
Cash in the treasury, January 1, 1790,	\$28,239 61
Cash in the hands of collectors,	83,127 84
Bonds at the custom-houses,	590,468 60
Debts due to the United States, under contracts of the late Government, collected at sundry times,	62,586 74
Debts paid in specie, during the year 1789,	15,927 13
Proceeds of the sale of land to the State of Pennsylvania, made by the late Government,	151,392 41
	931,742 33
Amount of debt, January 1, 1790,	\$71,305,559 64

By the same document, it appears that the debt contracted by the late Government, as the same has been liquidated and funded by acts of Congress, amounts to \$76,781,953 14

That the funds possessed by this Government, on the 1st of January, 1791, and to be deducted from the debt, were as follow:	
Cash in the treasury, January 1st, 1791,	\$570,023 88
Cash in the hands of collectors,	225,786 95
Custom house bonds uncollected,	1,052,215 13
Money collected from the credits of the late Government, as in the preceding statement,	62,586 74
Debts paid in specie during the year 1789,	15,927 13
Sale of land to Pennsylvania,	151,392 41
Debts purchased and discharged during the year 1790,	518,424 08
	2,596,356 32
True amount of debt, January 1st, 1791,	\$74,185,596 82

By the same document, number 9, it appears that the debt, exclusive of temporary loans, on the first of January, 1800, amounted to \$76,651,820 30

Temporary loans, without deducting bank shares,	3,640,000 00
Nominal amount of debt, January 1st, 1800,	\$80,291,820 30

Funds acquired by the Government, and which may be applied to face the foregoing debt:			
Cash in the treasury, January 1st, 1800, deducting therefrom the amount of unclaimed registered debt, and debt due to foreign officers, which are to be considered, at all times, as a charge on the specie balance in the treasury,		\$2,061,683 49	
Remittances to Holland, beyond the sum necessary to meet all demands on the foreign debt, to the close of the year 1799,		548,955 84	
Cash in the hands of collectors and supervisors,		532,247 81	
Bonds uncollected at the custom houses, estimated at six millions, payable, on an average, at six months, deducting the interest for that term, leaves		5,826,214 00	
2,220 shares of bank stock, cost	\$888,000		
Advance, 25 per cent.	222,000		
Value,	1,110,000	1,110,000 00	
			10,079,101 14
True amount of debt, January 1st, 1800,			\$70,212,718 16

For the purpose of shewing the rapidity with which the public debt was diminishing, at the time when the hostility of France compelled the Government to incur those great and extraordinary expenses which appear in the treasury statements, and to enter upon that extensive system of defence, which has resulted in the security of our commerce, the committee have thought it necessary, in addition to the preceding statements, to present a view of the debt on the first of January, 1798, remarking, at the same time, that the reduction which at that time had been made, proves, in the most satisfactory manner, the ease with which the debt may be extinguished, whenever the Government shall be left unembarrassed by internal disorder, or foreign hostility.

The nominal amount of debt, on the 1st of January, 1798, was			\$76,366,618 82
Funds to be deducted, were—			
Cash in the treasury, January 1st, 1798,		\$1,021,889 04	
Cash in the hands of collectors,		265,369 03	
Cash in the hands of supervisors,		32,964 39	
Value of bonds uncollected at the custom houses, January 1st, 1798, estimated at		6,309,058 00	
Bank stock, at its value,		1,110,000 00	
			8,739,280 46
True amount of debt, January 1st, 1798,			\$67,627,338 36

From whence it results, that, if the amount of debt on the first of January, 1800, is contrasted with the debt on the first of January, 1790, it will appear that the debt has diminished by the sum of \$1,092,841 48, or, if it is compared with the debt of January 1st, 1791, the debt has diminished by the sum of \$3,972,878 66; so that, in either mode of stating the account, it clearly appears that the debt has, in fact, been diminished.

It is, perhaps, of little importance, whether the one or the other of the preceding views is taken of the public debt, as the result, in either case, will be highly favorable to the financial operations of the Government; the committee, however, have inclined to the opinion, that the debt, as it has been liquidated and funded by the Government, after deducting the amount of funds which arose prior to the first of January, 1791, ought to be considered as constituting the true amount of debt with which the present Government has been charged by the constitution.

It is perfectly clear, that no part of the national debt can, with propriety, be considered as new debt, which arose prior to the complete establishment of the present Government, and it is equally certain, that the funded debt originated from the contracts of the late Government, and although it is certain that the interest for a certain period after the present Government commenced its operations, was suffered to accumulate, and now composes a part of the capital of the debt, yet, it will be recollected, that the Government commenced its operations without revenue, without any system of finance, or funds of any description, to meet even the ordinary civil list expenditure; that every plan which was ultimately adopted, for the purposes of revenue, was to be devised, matured, and, finally, carried into execution, before any money could be brought into the treasury; that, from the nature of things, a considerable time must necessarily have elapsed before the Government could be considered as completely established, before any arrangements could be made, either for liquidating the debt, or providing the means of discharging the interest arising thereon, and that, during that period, the interest (as had been the case before the adoption of the constitution) did necessarily accumulate; but, the committee believe that this accumulation of interest is entirely chargeable to the imbecility of the late Government, and, of course, ought to be considered as composing a part of the old debt. It may, likewise, be remarked, that the sum which was lost by this accumulation of interest, was more than replaced by the terms on which the debt was funded.

The debt which had been contracted by the late Government, generally, bore an interest at six per cent., and the large arrearage of interest which had accumulated thereon, had been long due, and might have been demanded by the creditors in cash, but, by the terms of the new contracts with them, that interest was converted into a capital, bearing an interest at three per cent., and the difference between the value of that stock and specie, has been gained by the Government; so that, in whatever point of view this subject is considered, it appears, clearly, to the committee, that the old debt cannot be considered as composing a sum less than that at which it has been funded.

The committee would not have thought it necessary to explain the principles on which they have deducted, from the nominal amount of debt, at the various periods when they have stated the same, the amount of funds acquired or possessed by the Government at those periods, respectively, had not the propriety of those deductions been formerly questioned. It is, however, understood to be now admitted, that all the items composing those funds, form a proper deduction from the amount of debt, except the bonds remaining uncollected at the custom houses; this item alone, it has been said, ought to be excluded from the account.

The propriety of deducting these bonds, together with the other items, from the debt, has appeared to the committee so apparent, that they have found some difficulty in rendering a principle more intelligible, which to them appears self evident.

The object of every statement of this nature, must be to ascertain the balance of debt; and to do this, it is apparent that the debts and credits of the Government must be drawn into the account. The principle which applies to the accounts of an individual, applies in the same manner to the accounts of a nation: the amount of debt can, in neither case, depend on the amount of the accounts, but upon the balance which results from a comparison of debt and credit; that these bonds are the property of the Government, has not been controverted, and if there is any meaning in terms, they contain personal engagements for money, and must be credits; the obligation to pay these bonds could be no stronger, if they had been executed by individuals for money loaned, nor would the mode of collection be, in the least, varied; and whilst the effect is precisely the same with that of all credits, it remains for those who place them on different principles, to explain the grounds of distinction.

That they have been executed for duties is true, but the credit which is thereby given to the merchant is entirely for his accommodation; and such are the express provisions of the law, which requires that the duties on goods shall be paid or secured before they are landed, at the option of the importer. The duties are to be paid or secured, not upon the consumption, but upon the importation, and the bonds which have, at any given period, been ta-

ken for duties, and which remain uncollected, are to be considered as securities for the revenue of the preceding year; the Government has nothing to do with the goods on which duties have been secured after the bonds are taken; whether they are consumed or destroyed, neither increases or diminishes the obligation of the merchant to pay the contents of his bond. A further circumstance may be adverted to, which, if any thing can render this point more clear and certain, may, perhaps, produce that effect; it is the consideration, that a considerable amount of these bonds have already been pledged for the payment of a part of the debt. The temporary loans which appear in the preceding statements, have all been obtained in anticipation of the money arising from the bonds; and it would be a singular case indeed, if the pledge which is confessedly of greater value than the debt, and from the proceeds of which the debt must in fact be discharged, is to be totally excluded from a general account of debts and credits.

In reviewing the progress and present situation of the debt, the committee have been led to consider the causes which have hitherto retarded its extinguishment. The deranged state, or rather total want of funds and revenue, at the commencement of the Government, has been already noticed, and it cannot be necessary to add, that the delays which necessarily attend all financial operations, at their outset, must have prevented the Government, for a considerable time, from extending the revenue so far as convenience and policy might, afterwards, require; but the committee deem it important to add that the extraordinary expense which has arisen within a few years, has swallowed up large sums of the public wealth, and diverted the application of those moneys which might otherwise have gone to the extinguishment of debt, to objects connected with the honor, and, in some cases, with the immediate existence of the Government.

In this class of expense will be included a large sum occasioned by the Indian war, one million two hundred and fifty thousand dollars expended in quelling two insurrections in the State of Pennsylvania, more than one million and a half expended in our transactions with Algiers, and other Mediterranean Powers; together with a much larger expense occasioned by the unprovoked aggressions of France upon this country. Had it been possible, steadily to have applied those various sums to the purchase of debt, it is easy to conceive how rapidly the same might have been extinguished. The committee have, likewise, noticed the large sums which have been necessarily expended in the erection of light houses, repairing fortifications, in purchases for replenishing our military and naval arsenals, and in the building, purchase, and equipment of more than forty sail of ships and armed vessels, together with a considerable loan of money to the commissioners of the city of Washington. The money expended on these objects, it is well known, arise to a very large amount, and the property thus acquired by the Government, and which is now on hand, cannot be estimated, on the most moderate calculations, at a sum less than four millions of dollars. The value of this property might be considered as composing another item in the credit of the general account of debt, but the committee have not thought it necessary to include it, and have noticed it particularly at this time, for the purpose of exhibiting a more general view of the extraordinary expense incurred by the Government, and for the purpose of presenting all that information, in relation to the debt, which will enable the House accurately to appreciate the great and increasing resources of the country: and on this point the committee cannot forbear to remark, that the progress of the Government, in its financial operations, must afford the most flattering presages of its future success, if the same system is pursued which has hitherto proved so successful. It cannot certainly be unworthy of remark, that ten years have not, at this time, elapsed, since the Government fairly commenced its operations; that, during that period, it has been necessary to liquidate, to fund, and to provide for, a large capital of floating debt, which had grown out of the disorders of the Confederation; that, during the same short period, the Government has been compelled to contend with one expensive war on the frontier, with two insurrections in the centre of our own country, and with depredation and hostility from the nations of Europe; that these embarrassments have nevertheless been faced by the Government; most of the difficulties have been surmounted; the debt has been liquidated and diminished; and the nation has still continued to increase in wealth and population, beyond all former example; and although the contest in which we are now engaged may, for a short period, retard the further extinguishment of debt, or perhaps produce a small addition to that which already exists, yet it cannot be doubted that, whilst we maintain order at home, no exterior circumstances can exhaust or greatly diminish the increasing resources of the nation.

PHILADELPHIA, *March 24th*, 1800.

SIR:

I have the honor to enclose the copy of a resolution which passed the House of Representatives on the 20th instant.

The committee who have been appointed, in pursuance of this resolution, have directed me to request from you such a statement of the public accounts, relating to the debt, as will enable them, with the greatest facility and accuracy, to make a report on this subject.

The principal object contemplated, is to ascertain, with precision, how far the public debt has been increased or diminished since the establishment of the present Government.

With a view to this object, it will naturally occur that two general accounts are necessary.

1st. An account exhibiting the amount of debt incurred, under the Confederation, and with which the present Government has been charged by the constitution.

2d. An account of the existing debt, at the latest possible period, which it is presumed must be on the first day of January, 1800.

In respect to the first of these accounts, it is requested that the whole amount of the old debt, of every description, may be given, arranged under distinct and proper heads, as the same has been funded, assumed, liquidated, or otherwise ascertained, by acts of the Government, or settlement at the treasury. It is, however, desired, that the account may be so stated that the interest which accumulated after the commencement of the present Government, and which has, in any shape, been converted into capital, may distinctly appear. The interest herein particularly alluded to, has accrued upon the foreign debt, upon loan office certificates, together with other evidences of debt, prior to the 1st of January, 1791, on the assumed debt, prior to the 1st of January, 1792, distinguishing however, the interest which accumulated in the last year, and on the debt due to certain creditor States, to the close of the year 1794.

In respect to the account for exhibiting a view of the debt on the 1st of January, 1800, it will, of course, contain a complete statement of the old and new debt, together with the purchase and reimbursement of so much of the same as has been already discharged; but it is the wish of the committee that the payments in specie, which have been made, under authority of direct grants from the Legislature, may be particularly stated, and the aggregate brought into one view.

The committee likewise request an account of payments for military pensions, cash in the treasury, cash in the hands of collectors, and an estimate of the current bonds at the custom houses, deducting debentures and estimated drawbacks.

An estimate of the value of public property, acquired by the present Government, is likewise desired; including the capital employed in trading houses, light houses, and other public buildings, public ships, arsenals, with their contents, and fortifications.

The amount of extraordinary expense incurred by the Government, in consequence of events which it is hoped will not be repeated, is also requested. Under this head will be included the expense of treaties with the Mediterranean Powers; the two insurrections in Pennsylvania, and the war with the Indian tribes; together with the extraordinary expense incurred in the Military and Naval Departments, in consequence of the present disputes with France, exclusive of ships, and stores in the arsenals.

It will likewise be satisfactory to the committee to be informed whether the assumed debt, including the interest which accumulated on the same, to the close of the year 1791, was not charged to the particular States in the settlement with them, and whether the temporary loans which have been obtained from the bank, have not been obtained on the principle of anticipating the revenue.

A statement of the account with the bankers in Holland, on its latest adjustment, and a general account of debts contracted and debts discharged, annually, will gratify the wishes of the committee.

The committee do not wish that the statements from the treasury should be exclusively confined to the objects which have been particularly detailed; they submit to your judgment the propriety of furnishing any other statements which, in your opinion, will elucidate the object of inquiry. They take the liberty, however, to suggest, that, if the time can be spared at the treasury, it might be useful to obtain a general account of receipts and expenditures, from the commencement of the Government.

I have the honor to be, very respectfully, your obedient servant,

ROGER GRISWOLD.

The Honorable Mr. WOLCOTT, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *April 29, 1800.*

SIR:

I have the honor to transmit, herewith, sundry statements, numbered from 1 to 9, inclusive, which have been prepared in pursuance of your letter of March 24th, and which I trust will satisfy the inquiries of the committee appointed to report to the House of Representatives such "facts as relate to the increase or diminution of the public debt, since the establishment of the Government of the United States, under the present constitution."

I have every reason to believe that the general results of these statements are entirely correct, and am unconscious of any defect in the details required by the committee, except in respect to the sums expended on fortifications, ships, arsenals, and other buildings, and in the purchase of military and naval stores. The sums stated under these heads have been necessarily founded on estimates, as a precise account could only be obtained from an examination of the transactions of the agents employed by each of the Executive Departments, and a valuation of the property now remaining in the possession of the Government. I trust, however, that I am not mistaken in assuring the committee that the value of the public property has not been overrated.

If the documents now transmitted should, in the opinion of the committee, require elucidation, their commands shall be executed with alacrity; it being certain, that, whatever opinions may be entertained respecting the increase or diminution of the public debt, in consequence of expenditures which have been authorized by the present Government, there can be no difficulty in determining the true state of all the facts by which those opinions must be supported.

I have the honor to be, with perfect respect, sir, your most obedient servant,

OLIVER WOLCOTT.

The Honorable ROGER GRISWOLD, Esq., *Chairman of a Committee of the House of Representatives.*

A General Statement of the Annual Expenditures of the United States, from the commencement of the present Government to the 31st December, 1799.

HEADS OF EXPENDITURE.	To the close of 1791.	During 1792.	During 1793.	During 1794.	During 1795.	During 1796.	During 1797.	During 1798.	During 1799.	Amount.	Amount.
For the support of the civil list, under the present Government,	\$706,720 29	\$375,319 86	\$352,911 57	\$440,946 58	\$361,633 36	\$447,139 5	\$483,233 70	\$504,605 17	\$592,905 76	\$4,265,415 34	
For annuities and grants,	13,102 96	5,597 72	5,329 51	6,417 72	2,970 20	2,422 21	2,464 98	3,060 82	2,980 83	44,346 95	
+ For the mint establishment, exclusive of the salaries of the officers and clerks, charged under the head of civil list,				23,799 22	13,000 00	50,150 90	14,000 00	7,000 00	26,672 93	134,623 5	
For defraying the expenses of the enumeration of the inhabitants of the United States,	20,590 71	22,904 69	881 88							44,377 28	
For defraying the contingent charges of Government,	1,225 70	471 80	148 00	16,757 34	13,504 11	11,998 84	403 18	552 33		45,061 30	
For a loan for the city of Washington,								50,000 00	50,000 00	100,000 00	
For the purchase of vellum, &c.									3,083 60	3,083 60	
For satisfying miscellaneous claims in relation to the present Government,	10,314 59	6,498 51	4,788 48	5,573 15	32,253 04	18,435 46	14,109 80	32,377 12	22,745 25	147,095 40	
For the payment of demands for unclaimed merchandise,						50 78	358 45	234 00	120 05	763 28	
For the relief of certain inhabitants of St. Domingo, resident within the United States,				15,000 00						15,000 00	
For payments at the treasury, for building and support of revenue cutters, exclusive of payments by collectors, and charged by them as expenses of collecting the revenue,	570 00	53 02								623 02	
<i>Light House Establishment.</i>											
Expenditures for the purchase of ground and new erections,	22,591 94	38,976 36	12,061 68	37,496 36	29,861 30	35,207 48	48,174 47	52,906 18	70,433 26	95,773 16	251,935 87
For the support of light houses, &c.											
<i>For the support of the Army of the United States.</i>											
For the purchase of arms and military stores,	632,804 3	1,114,350 94	1,132,443 91	1,940,098 05	1,920,612 31	1,280,566 56	1,022,208 26	1,744,728 39	2,296,055 25	12,222,442 42	861,425 28
For expenses attending military expeditions in Pennsylvania, in 1794 and 1799,				669,992 34	500,000 00			80,007 66			
For the fortification of forts and harbors,				42,049 66	81,773 50	25,761 26	40,090 78	185,956 34	171,300 00		
For defraying the expenses of forts and harbors,											
For defraying the expense of treaties of peace with the Indians,	27,000 00		25,088 00					15,300 00	10,580 00		
For carrying into effect the treaty between the United States and Indian tribes northwest of the river Ohio,						9,500 00	9,500 00		9,500 00		
											\$4,800,38 22
											347,709 3
											13,083,867 70
											1,250,000 00
											546,931 54
											77,968 00

FINANCE.

The foregoing statement is formed from the accounts of the commissioners of the Dutch loans, as adjusted at the treasury, to the 31st December, 1798. That part thereof which relates to the year 1799, is taken from an account, kept at the treasury, of remittances made to said commissioners, and of moneys which became payable by them, in that year.

<i>Comparative state of the Treasury, with reference to the Public Debt, on the 1st day of January, 1790, and the 1st day of January, 1800.</i>		<i>Dolls. Cts.</i>
Cash in the treasury, January 1, 1800,	- - - - -	2,161,867 67
Remittances to Holland in 1799, exceeding a sum sufficient to satisfy all demands for principal and interest, which became due prior to January 1, 1800, being <i>Guilders</i> 1,372,389 11 15, equal to	- - - - -	548,955 84
		<u>2,710,823 51</u>
Cash in the treasury, January 1, 1790,	- - - - -	28,239 61
Cash received for debts due to the United States, contracted under the late Government at sundry times, prior to January, 1800,	- - - - -	62,586 74
Debts of the late Government paid in specie at the treasury, during the year 1789, and included in the amount of said debts, stated to have been discharged under the present Government,	- - - - -	15,927 13
Balances of registered debt for which appropriations have been made, yet unclaimed by individuals,	- - - - -	61,404 95
Balances due to foreign officers remaining unclaimed,	- - - - -	38,779 23
The excess of funds acquired by the present Government to the 1st January, 1800, above the sum in the treasury, on the 1st January 1790, the sums received for debts due to the late Government, and the unsatisfied appropriations above-mentioned, was, therefore,	- - - - -	2,503,885 85
		<u>2,710,823 51</u>
The amount of debts of the late Government discharged in specie at the treasury, during the year 1790, and included in the amount of said debts, stated to have been discharged by the present Government, is,	- - - - -	239,736 78
The sum of \$150,229 24 in specie of the product of revenue, was expended in the latter part of the year 1790, in the purchase of the domestic debt of the United States, which procured, in different stocks, a capital of	- - - - -	278,687 30
Amount of the debt of the late Government, extinguished in the year 1790,	- - - - -	518,424 8
<i>Estimate of the nett value of the bonds for duties on imports remaining uncollected at the close of the year 1799, deducting drawbacks and expenses of collection.</i>		
The gross amount of duties secured in 1796, amounted to,	- - - - -	12,581,167 12
Ditto, ditto. 1797,	- - - - -	12,866,984 69
Ditto, ditto. 1798,	- - - - -	11,402,185 17
The actual revenue of 1796, was	- - - - -	8,740,329 65
Ditto. 1797, was	- - - - -	8,758,780 99
Ditto. 1798, was	- - - - -	8,179,170 80
The bonds outstanding at the close of the year 1796, amounted to	- - - - -	6,484,907 20
Ditto, ditto. 1797,	- - - - -	10,126,052 12
Ditto, ditto. 1798,	- - - - -	9,349,527 29
The accounts of the last year have not been settled, it may, however, be presumed, that the bonds at the close of the year 1799, were equal to the amount stated for 1798, and from the foregoing data, that their value may be estimated at	- - - - -	6,000,000 00

TREASURY DEPARTMENT, *Register's Office, April 28th, 1800.*

I certify that the foregoing statements of the public debt of the United States, at sundry periods prior to, and on the 1st of January, 1800, are made from the records of this office.

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *May 6th, 1800.*

SIR:

I find that the bonds for duties on imports outstanding on the 1st of Jan. 1790, amounted to,	\$590,468 60
The cash in the hands of collectors,	83,127 84
The balance in the treasury,	28,239 61
Amounting to,	<u>\$701,836 05</u>
The outstanding bonds on 1st of January, 1791, amounted to,	1,052,215 13
The cash in the hands of collectors,	225,786 95
The balance in the treasury,	570,023 88
Amounting to,	<u>\$1,848,025 96</u>

It is impossible to ascertain precisely the debt, on the 1st of January 1800, for the current service; although, it is certain, that it did not amount to any considerable sum.

The Secretary of War informs me that the money advanced in 1799 is, by him, considered equal to the pay of the troops to the close of that year; that the advances to contractors for rations exceeded the supplies which had been actually furnished, and that the advances for clothing, for 1800, amounted to about 44,000 dollars.

The Secretary of the Navy estimates that there was due, on the 1st of January, 1800, to the officers and seamen of the navy, the sum of one hundred and fifty-four thousand one hundred and thirty-four dollars; but that the value of provisions on board the vessels of war, purchased and paid for in 1799, and which remained to be consumed in 1800, and the sums which remained unexpended in the hands of navy agents on the 1st of January, 1800, must have amounted to as much, at least, as the balance due for pay to the navy.

It has been my constant endeavor to prevent the increase of an unliquidated or floating debt, and, as the public supplies are generally purchased with cash, or furnished in pursuance of contracts, on which moneys are advanced, the existence of any considerable debt for the current service is impossible. If one hundred and fifty thousand dollars, in addition to the advances, prior to the present year, is allowed, it will, in my opinion, be sufficient to cover

every unliquidated demand against the Government, not heretofore stated. Though I cannot speak with certainty, yet I am inclined to believe, that the advances are, of themselves, equal to the aggregate amount of debts.

I have the honor to be, very respectfully, sir, your obedient servant,

OLIVER WOLCOTT.

The Honorable ROGER GRISWOLD, Esquire,
Chairman of a committee of the House of Representatives.

TREASURY DEPARTMENT, *May 7th, 1800.*

SIR:

The increase of the public debt, from the 1st of January, 1798, to the 1st of January, 1800, may, in my opinion, be correctly deduced from the statements heretofore transmitted to the committee, in the following manner:

DEBTS CONTRACTED.

A loan obtained of the Bank of the United States, in 1798, in pursuance of the act of March 3d, 1795, the proceeds of which were applied to discharge an equal amount due to the said Bank,	-	-	\$200,000
A loan obtained in 1799, at 8 per cent. interest,	-	-	5,000,000
Six per cent. stock issued, and to be issued, for ships built in 1798 and 1799,	-	-	929,200
Amount of debts contracted,	-	-	<u>\$6,129,000</u>

DEBTS DISCHARGED.

Two instalments due to the Bank of the United States, paid at the close of the years 1798 and 1799,	-	-	\$400,000 00
The reimbursement of six per cent. stock, paid at the close of 1798,	-	-	674,938 02
The reimbursement paid at the close of 1799,	-	-	716,880 02
Of the sums remitted from the treasury to Holland, in 1797, there was applied to the payment of an instalment which fell due in 1798, the sum of,	-	-	80,000 00
Of the remittances made to Holland in 1798 and 1799, there was applied to the payment of an instalment in 1799, the sum of,	-	-	160,000 00
Loan office certificates redeemed, per act of June 12, 1798,	-	-	82,745 44
Registered debt do.	-	-	86,561 34
Debts of the late Government, paid in specie, in the year 1798,	-	-	2,873 70
Amounting, in the whole, to	-	-	<u>\$2,203,998 52</u>
Which sum being deducted from the debts contracted in 1798 and 1799, will shew the increase of the public debt during those years, being	-	-	<u>3,925,201 48</u>
			<u>\$6,129,200 00</u>

Not knowing the principles which the committee will assume, I have stated the instalment of the Dutch debt, which was paid in 1798, although the fund was remitted in 1797, and is, accordingly, charged as an expenditure in that year. If it shall be thought proper to exclude this sum, the increase of the debt, in the years 1798 and 1799, will be,

The balance of cash in the treasury, at the close of the year 1797, was,	-	-	\$4,005,201 48
The balances in the hands of collectors of the customs, at the same period, deducting bills drawn by the Treasurer, debentures, &c.	-	-	1,021,889 04
The balances in the hands of supervisors, deducting bills of the Treasurer,	-	-	265,369 03
The uncollected bonds for duties on imports, amounted, at the close of 1797, to	-	-	32,964 39
			<u>10,126,052 12</u>

I have the honor to be, with great respect, sir, your most obedient servant,

OLIVER WOLCOTT.

The Honorable ROGER GRISWOLD, Esquire,
Chairman of a committee of the House of Representatives.

5th CONGRESS.]

No. 153.

[2d SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, NOVEMBER 23, 1800.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their report of the 11th of December, 1799, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the 27th of November, 1800, and in the proceedings of the officers of the treasury, therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

November 28th, 1800.

JOHN E. HOWARD,
President of the Senate pro tem.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund:

That no purchases of the debt of the United States have been made, since the date of the last report to Congress, of the 11th day of December, 1799; and that the sums of capital stock heretofore purchased and transferred, prior to the present year, in trust for the United States, the interest whereon is appropriated, by law, towards the reduction of the public debt, amounts to four millions seven hundred and four thousand two hundred and nineteen dollars and sixty cents, as will more particularly appear from the document hereto annexed, marked A.

That the following sums have been applied towards the discharge of the principal debt of the United States, since the date of the last report to Congress, of the 11th of December, 1799:

1st. To the fifth instalment of the six per cent. stock, bearing a present interest, which, pursuant to the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," passed on the 3d day of March, 1795, and the act in addition thereto, passed on the 28th day of April, 1796, became payable on the first day of January, 1800, the sum of	\$716,894 36
2d. To the payment of the eighth instalment of the subscription loan for bank stock, due on the last day of December, 1799,	200,000 00
3d. To the payment of the third instalment of a loan of one million of guilders, obtained in Holland, and which fell due the present year, pursuant to a contract, dated the 1st of June, 1787, estimated at 40 cents per guilder,	80,000 00
4th. To the payment of the second instalment of a loan of one million of guilders, obtained in Holland, and which fell due in the present year, pursuant to a contract, dated the 13th of March, 1788, estimated at 40 cents per guilder,	80,000 00
5th. To the payment of the first instalment of a loan of three millions of guilders, obtained in Holland, and which fell due in the present year, pursuant to a contract, dated first of January, 1790, estimated at forty cents per guilder,	240,000 00
Amounting, in the whole, to	<u>\$1,316,894 36</u>

The payments before enumerated have been made out of the following funds:

1st. The interest fund on the sums which accrued upon the stock purchased, and transferred to the commissioners of the sinking fund, in trust for the United States, as particularly stated in the document hereto annexed, marked B,	\$522,323 11
2d. The fund arising from the payment of debts, which originated prior to the present constitution of the United States, as particularly stated in the document marked C,	2,943 39
3d. The fund arising from dividends on the capital stock belonging to the United States, in the Bank of the United States, from the 1st of July, 1798, to the 30th of June, 1799, after deducting the interest on the subscription loan for the same period, as particularly stated in the document hereto annexed, marked D,	29,040 00
4th. The proceeds of duties on goods, wares, and merchandise, imported, on the tonnage of ships or vessels, and on spirits distilled within the United States, and stills, appropriated by the 8th section of the act of March 3d, 1795, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," being for the period and in reference to the objects mentioned in this report,	762,587 86
	<u>\$1,316,894 36</u>

Making, in the whole, an equal amount to the reimbursements before mentioned.

There remained in the hands of the Treasurer of the United States, as agent of the Board of commissioners, on the twenty-fifth day of the present month, one hundred and sixty-nine thousand and eighty-seven dollars and four cents, which, with the growing produce of other appropriated funds, will be sufficient for the reimbursement, at the end of the present year, of the sixth instalment of the six per cent. stock, bearing a present interest, and the ninth instalment of the subscription loan for stock of the Bank of the United States, which reimbursements are required to be made by the 11th section of the act of Congress, passed on the 3d of March, 1795, herein before mentioned.

All which is most respectfully submitted, by

OLIVER WOLCOTT, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *November 27, 1800.*

A.

A General Statement of the several stocks transferred to the United States, to the 31st December, 1799, the interest on which, by the acts of the 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

	6 per cent. stock.	3 per cent. stock.	Deferred stock.	5 per cent. stock.	5½ per cent. stock.	Amount of the several species of stock.

No. 154.

[2d SESSION.

INTERNAL REVENUES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 22, 1800.

TREASURY DEPARTMENT, December 19, 1800.

SIR:

I have the honor to transmit two statements relating to the internal revenues of the United States, accompanied with a letter from the commissioner of the revenue, explanatory thereof.

The statement marked A exhibits the official emoluments and expenditures of the officers employed in collecting the internal revenues of the United States, from the first of January, 1799, to the 31st of December following, and is rendered in pursuance of the act of Congress, passed on the 11th day of July, 1798.

The statement marked B exhibits the amount of duties upon domestic distilled spirits and on stills; the amount of duties upon sales at auction, refined sugar, carriages, and upon licences to retailers; and the amount of duties upon stamped vellum, parchment and paper, and which have accrued from the first of January, 1799, to the 31st of December following, and is rendered in pursuance of the resolution of the House of Representatives, passed on the 6th day of January, 1797.

I have the honor to be, very respectfully, sir, your obedient servant,

OLIVER WOLCOTT.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, Revenue Office, 16th December, 1800.

SIR:

The statements herewith enclosed, have been prepared in pursuance of a resolution of the House of Representatives, passed on the 6th day of January, 1797, and an act of Congress passed on the 11th day of July, 1798. They exhibit the amount of duties upon domestic distilled spirits and stills; sales at auction; refined sugar; carriages; licences to retailers; and stamps upon vellum, parchment and paper, for the year prior to the first day of January, 1800, as ascertained by abstracts rendered from the supervisor of the respective districts.

They also exhibit the official emoluments and expenditures of the officers employed in collecting the internal revenues of the United States for the same period.

To the statement of duties I have annexed an account of the sums received by the Treasurer, from each district, during the year to which these accounts refer.

As the progressive operation of the internal revenues to the 31st of December, 1798, has been already presented to Congress, they will now have a distinct view of the subject, from its commencement to the close of the last calendar year, the latest period to which accounts can be rendered with accuracy.

I have the honor to be, with perfect respect, your obedient servant,

WILLIAM MILLER, Jr. Commissioner of the Revenue.

The Honorable the Secretary of the Treasury.

A.

Statement showing the number of each description of officers actually employed in each district, during the year 1799, the amount allowed by law for salaries, &c. and the emoluments and expenditures, during the year ending on the 31st December, 1799.

	16	22	314	65	\$43,700 00	42,522 67	13,200	67,835 47 $\frac{1}{4}$	5,416 43 $\frac{3}{4}$	2,464 21	1,168 23	798 70	7,016 07 $\frac{3}{4}$	140,375 96	21,536 62	7,575 71	12,626 12	7,016 07 $\frac{3}{4}$	48,754 52 $\frac{3}{4}$	91,638 27 $\frac{3}{4}$

NOTE.—Two of the Inspectors, and nineteen of the Collectors, are likewise officers of impost and tonnage. No statement of official emoluments and expenditures has been received from the supervisor of Georgia. The amount of compensations and contingent expenses with which the United States stands charged in the accounts of the district, for the period to which this statement refers, is \$2,307 78 $\frac{1}{2}$.

The supervisors of Ohio and North Carolina, in the distribution of the fund allowed for collectors, &c. have exceeded the amount granted by law. They have been instructed to rectify the same, by a deduction in their next annual statement.

The allowance which supervisors are entitled to "for numbering, signing, and delivering to the Inspectors of ports, certificates, which are to accompany imported spirits, wines, and teas," is a charge upon the impost, and is, of course, paid by the collectors of ports, and included in their accounts. In the foregoing statement this branch of their compensations appears to have been comprehended by some of the supervisors; it will, therefore, be necessary to deduct the amount, in order to ascertain what may be fairly chargeable to the internal revenues.

By adding the several columns of emoluments together, they will produce a total of - \$140,421 80
But by the supervisors' returns, the total amount is only - 140,375 96

Making a difference of - \$45 84
This difference arises from the office of the inspector of the 2d survey of South Carolina being some time vacant, by reason of which, the supervisor charges the United States with less for clerk hire than is allowed by law. In like manner the several columns of expenditures being added together, will produce an aggregate amount of - 48,754 52 $\frac{3}{4}$

Which, being deducted from \$140,375 96, the amount of emoluments, would leave a balance due to the officers, of - 91,621 43 $\frac{3}{4}$
But, by the supervisors' returns, the balance in favor of the officers amounts to - 91,638 27 $\frac{3}{4}$
This difference is occasioned by the expenditures of one of the officers in the district exceeding his emoluments by \$16 84.

B.

A Statement of the duties upon domestic distilled Spirits and Stills, during the year ending on the 31st Dec. 1799.

IN WHAT DISTRICT.	Amount of duties arising on spirits distilled from foreign materials, and on spirits distilled from domestic materials in cities, towns, and villages, from stills of 400 gallons capacity and upwards. No. 155.

[2d Session.]

VALUATION OF LANDS AND DWELLING HOUSES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 30, 1800.

Mr. GRISWOLD made the following report:

The Committee of Ways and Means, who were instructed to inquire into the expediency of repealing the "Act to provide for the valuation of lands and dwelling houses, and the enumeration of slaves, within the United States," report—

That the valuation of lands and dwelling houses has not yet been completed in all the States; and, to repeal the law before that object is accomplished, would, in its effect, defeat the direct tax in those States where the valuation remains incomplete.

That one great object contemplated at the time of passing the law, and which, it is presumed, still exists, was to organize a system for laying direct taxes, to which the Legislature might resort if the exigencies of the Government should require more revenue than could conveniently be drawn from indirect taxes; and to relinquish this object, after the expense of accomplishing it has been incurred, might be a proof of instability, but not of wisdom.

That the expense of procuring the distribution and transfer of real estates, to be recorded in the surveyor's office, incurred by individuals, is, in the opinion of the committee, an object of little importance when opposed to the advantages arising from a public record of titles, and the more important advantages which the Government will derive from the system, if any event should render a direct tax necessary.

Although it is to be hoped that no further direct taxes will become necessary, yet, as it is impossible to pronounce, with certainty, that this will not be the case, the committee believe that it is highly expedient to pursue a system, which, in cases of emergency, may be used to draw into the treasury, with certainty and expedition, any reasonable sums which the public necessities may require.

The committee are therefore of opinion, that it is not expedient to repeal the act providing for the valuation of lands and dwelling houses, and the enumeration of slaves within the United States.

6th CONGRESS.]

No. 156.

[2d Session.]

MINT.

COMMUNICATED TO CONGRESS, JANUARY 21, 1801.

Gentlemen of the Senate,
and Gentlemen of the House of Representatives:

I have received from Elias Boudinot, Esq., Director of the Mint of the United States, a report, of the second of January instant, representing the state of it, together with an abstract of the coins struck at the mint, from the first of January to the thirty-first of December, 1800; an abstract of the expenditures of the mint, from the first of January to the thirty-first of December, 1800, inclusive; a statement of gain on copper coined at the mint from the first of January to the thirty-first of December, 1800, inclusive; and a certificate from Joseph Richardson, assayer of the mint, ascertaining the value of Spanish milled doubloons, in proportion to the gold coins of the United States, to be no more than 84 cents and $\frac{24}{100}$ parts of a cent, for one pennyweight or 28 grains and $\frac{24}{100}$ parts of a grain to one dollar. These papers I transmit to Congress for their consideration.

JOHN ADAMS.

UNITED STATES, January 17, 1801.

To the President of the United States.

MINT OF THE UNITED STATES, January 2, 1801.

The Director of the Mint respectfully informs the President that the enclosed abstract of the coin issued from the mint of the United States, and struck since the 31st of December last, shows the amount to be three hundred and seventeen thousand seven hundred and sixty dollars, in gold coins; two hundred and twenty-four thousand two hundred and ninety-six dollars, in silver coins; and twenty-nine thousand two hundred and seventy-nine dollars and forty cents, in copper cents and half cents; making up, in the whole, the quantity of five hundred and seventy-one thousand three hundred and thirty-five dollars and forty cents.

For the information of Government, the Director thinks it expedient to enclose a statement of the expenses and profits of the mint for the year past, which, from a number of concurring circumstances, has been full as expensive as may hereafter be expected, extraordinary supplies or repairs excepted.

The Director has a peculiar satisfaction in informing the President that there has been received from the test bottoms and ashes, accumulated before his administration of the mint, four hundred and twenty-eight dollars and forty-seven cents; which repays so much of the nine hundred and seventy-four dollars, heretofore allowed by Congress, as a deficiency in the former account of bullion, and that there is still a quantity of ashes remaining to be cleansed and refined.

The cents issued from the mint, amounting, now, to the sum of seventy-nine thousand three hundred and ninety dollars and eighty-two cents, the proclamation required by law ought to be issued, by which all other copper coin will be put out of circulation.

The late act of Congress, directing the mint to remain at Philadelphia, will expire in March next; some further legal provision will be necessary for its continuance here, or removal to the seat of Government. At all events, it will be necessary to provide some other mode of assaying the reserved pieces, set apart by direction of the act of Congress of the 2d of April, 1792, and required by that act to be done once in every year, under the inspection of the Chief Justice, the Secretary and Comptroller of the Treasury, Secretary for the Department of State, and the Attorney General, who are required to attend at the mint, for that purpose. As it will be impracticable for those officers to leave the seat of Government, to comply with this part of the law, and the year will expire on the second

Monday in February next, the Director respectfully submits to the President the propriety of recommending to Congress the necessity of a previous provision by law, to prevent a non-compliance with a positive injunction of an act of Congress.

The great rise in the price of copper, in Great Britain, has prevented so large an importation, and of course so large an issue of cents from the mint, as would, otherwise, have been done, the public being now tolerably well supplied with that species of small change.

The Director thinks it his duty to inform the President that, having had occasion, during the past year, to have accurate assays made of Spanish milled doubloons, it was found that their real value, compared with the standard of the United States, was rather less than eighty-five cents the pennyweight; whereas, by the act of Congress, of the 9th of February, 1793, they are made a legal tender, at about eighty-seven cents the pennyweight, or, in the language of the act, "at the rate of one hundred cents for every twenty-seven grains and two-fifths of a grain, of the actual weight thereof," which creates a loss, on the part of the citizens of the United States, of twenty-seven dollars and forty-two cents on one thousand pennyweight. The official certificate of the assayer is enclosed with this report.

All which is respectfully submitted to the President.

ELIAS BOUDINOT, *Director.*

The PRESIDENT of the United States.

	Retained on deposits below standard for refining, for the year 1800,	311 57

MINT OF THE UNITED STATES, 1st December, 1800.

For

BENJAMIN RUSH,
G. EHRENZELLER.

MINT OF THE UNITED STATES, 5th of 1st month, 1801.

At the request of the Director of the Mint, I do hereby certify, that, on carefully assaying a number of Spanish milled doubloons, of different dates and complexions, I found their degree of fineness corresponded with each other, to great exactness; but that their real value, in proportion to gold coins of the standard of the United States, was no more than 84 cents and $\frac{2}{3}$ parts of a cent for one pennyweight, or 28 grains and $\frac{2}{3}$ parts of grain to one dollar.

JOSEPH RICHARDSON,
Assayer to the Mint of the United States.

An abstract of the expenditures of the Mint of the United States, from the 1st of January to the 31st of December, 1800, inclusive.

MINT OF THE UNITED STATES, Treasurer's Office, 31st December, 1800.

For

BENJAMIN RUSH,
G. EHRENZELLER.

6th CONGRESS.]

No. 157.

[2d Session.]

CONDITION OF THE TREASURY DEPARTMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 28th OF JANUARY, 1801.

Mr. ORIS, from the Committee to whom was referred the letter from the Secretary of the Treasury, announcing his resignation, and who was instructed to examine into the state of the Department of the Treasury; into the mode of conducting the business thereof; and into the expenditure of public money; and to report such facts and statements as may conduce to a full understanding of the transactions of the Treasury, since the same has been under the superintendance of the officer now at the head of that Department, made the following report:

First, in relation to the general state of the Department, and the mode of directing the business thereof.

On the 22d day of May, in the year 1794, a report was made to the House of Representatives, by a committee appointed to examine the state of the Treasury; in which the manner of conducting the business of the Department was detailed with great accuracy, the duties of the various officers, and their mutual checks upon each other, explained;

and the rules and proceedings observed in the collection, keeping, and disbursement of the public moneys, and in accounting for the same, described, with minute precision. It does not appear that any objection has ever been made to the forms of doing business, specified in that report, or that the committee, after a most ample and elaborate investigation of the regulations adopted in the Department, entertained doubts of the judicious and competent nature of the arrangement and distribution of the powers and duties of the officers. The attention of the present committee was, in the first instance, occupied in comparing the present forms of proceeding at the Treasury, with those heretofore exhibited; and, upon a careful examination, they are satisfied that, while the principles of that system have been maintained and matured, a close adherence to established usage has been observed; and that the Department itself is so organized by law, and the mode of doing the business is so devised, as to afford the most perfect security to the nation, from the misapplication of the public moneys.

These moneys do not, in any instance, pass through the hands of the Secretary of the Treasury; he merely authorizes the receipts and disbursements by warrants in favor of, and upon the Treasurer; these warrants are all signed by the Secretary, countersigned by the Comptroller, and registered by the Register. The Treasurer is the medium of the receipts and disbursements of the public moneys. Those who collect these moneys can only discharge themselves by warrants in favor of the Treasurer. The Treasurer can only obtain credit for payments from the Treasury, by warrants on himself. All moneys received by the Treasurer are deposited by him in the Bank of the United States, and other banks; and the actual amount of moneys in the custody of the Treasurer, may be, at any time, ascertained, independently of his own returns, by the statements which are constantly made and transmitted to the Secretary, by those who collect and receive public moneys into their custody in the different parts of the Union. His accounts must be rendered quarterly, and oftener, if required, to the Comptroller, and annually to Congress.

Secondly, in relation to receipts and expenditures.

It is the uniform course of business at the Treasury, immediately after the close of each session of Congress, to enter into a book, kept for that purpose in the office of the Secretary, the various objects for which appropriations of money have been made by law, and to credit each head with the whole amount of the sums appropriated to it. The same proceeding is observed in the offices of the Comptroller and Register. No disbursements are made by the Treasury, but in pursuance of laws authorizing the expense; and all warrants for the disbursement of moneys are, forthwith, entered to the debit of their respective heads of appropriation. These books are open to the daily inspection and revision of the officers of the Department; and, by means thereof, the expenditures may be promptly compared with the appropriation. In no instance does it appear to the committee, that the expenditures have exceeded the legal appropriations. They have not, however, presumed it to be within the meaning of their instructions, that they should exhibit a detailed statement of the receipts and expenditures at the Treasury: for these they refer to the annual and other periodical statements which are enjoined by law, and which have been regularly submitted to Congress; and especially to a report of the committee of the House of Representatives, of the 8th of May last, in which the sum total of the receipts and expenditures of the present Government, from its commencement to the end of the year 1799, is exhibited at one view.

By the constitution of the Treasury Department, the Secretary superintends the collection of the revenue, and grants all warrants for moneys issued from the Treasury, in pursuance of appropriations made by law; but he is not responsible for the application of moneys issued from the Treasury for the use of other departments. When, for example, appropriations are made for the Departments of State, of War, or of the Navy, the Secretary of the Treasury, as also the Comptroller, are bound to prevent the advances from exceeding the appropriations. The disbursements and application of the moneys so advanced, to the various objects of public service, are necessarily made under the immediate superintendence of the other departments, subject to a revision and final settlement by the Comptroller of the Treasury. But as, from the nature of the public business, it becomes indispensably necessary, in most cases, that advances should precede the services for which the moneys are destined; as these services are of great magnitude, branched out into a variety of details, and performed by numerous agents, it results that, while voluminous accounts are in a train of settlement, sums to a great amount must, at all times, appear debited to individuals, to be accounted for in course, although they are known to have applied the same according to law, and although, in many instances, they may have exhibited sufficient vouchers for their discharge.

The foregoing inquiries embrace the principal duties of the Secretary of the Treasury; in the discharge of which, the Department is regulated by positive laws and established forms. In certain cases, a limited discretion is either given or implied in the nature of transactions performed under his agency. This has happened chiefly in three instances: first, in contracts for the loan of money for the public service; secondly, in providing and remitting to Europe funds for the discharge of the foreign debt; thirdly, in measures adopted to enforce punctuality on the part of public agents and officers, in the payments of moneys into the Treasury.

First, in regard to loans of money.

On the 1st of February, 1795, being the day when the late Secretary of the Treasury was commissioned, the temporary loans to the United States, by the Bank of the United States, and by the Bank of New York, exclusive of five hundred thousand dollars in stock, purchased on credit, as hereinafter mentioned, amounted to four million nine hundred thousand dollars; at the same time, the United States were, however, possessed of five thousand shares of the capital stock of the Bank of the United States, purchased with part of the proceeds of the said loans.

The following loans have been negotiated by the late Secretary:

1st. Under the act, entitled "An act for the reimbursement of a loan authorized by the last session of Congress," past on the 21st day of February, 1795, the sum of eight hundred thousand dollars.

The above loan was obtained of the Bank of the United States, at six per cent. interest, and was declared to be repayable by instalments of two hundred thousand dollars each, on the last days of December, in the years 1796, 1797, 1798, and 1799.

2d. Under the act, entitled "An act making further appropriations for the military and naval establishments, and for the support of Government," passed on the third of March 1795, the sum of five hundred thousand dollars.

3d. And under the same act, the further sum of five hundred thousand dollars.

The two last mentioned loans were obtained of the Bank of the United States, at six per cent. interest; on the first, from April the first, 1795; and on the second, from October the 1st, 1795; repayable in one year from the dates of the respective advances.

4th. Under the act, entitled "An act making further provision for the support of public credit and for the redemption of the public debt," the sum of five hundred thousand dollars.

The above loan was obtained of the Bank of the United States, at six per cent. interest, from January the 1st, 1796, repayable on or before the 1st of January, 1797.

5th. Under the act, entitled "An act making provision for the payment of certain debts of the United States," passed on the 31st of May, 1796, there was obtained of the Bank of New York, at six per cent. interest, the sum of three hundred and twenty thousand dollars.

6th. Under the act, entitled "An act making further provision for the support of public credit and for the redemption of the public debt," there was obtained of the Bank of the United States, on the last day of December, 1798, at six per cent. interest, repayable on or before the 1st day of January, 1803, the sum of two hundred thousand dollars.

The six loans abovementioned amount to two millions eight hundred and twenty thousand dollars.

The first loan of eight hundred thousand dollars was negotiated for the purpose of effecting a treaty of peace with Algiers. On the 4th of February, 1795, the subject was submitted to the consideration of Congress, in a message from the President. This message was referred to a committee of the House of Representatives, consisting of Mr. Sedgwick,

Mr. Madison, Mr. Baldwin, Mr. William Smith, and Mr. Giles. The Secretary of the Treasury was desired, by the committee, to ascertain in what manner the proposed loan could be obtained; and it is stated by him that the specific terms on which the contract was afterwards concluded, were presented to the committee; who, after being informed of the causes which rendered any other mode of remitting so considerable a sum to Europe, at that time, either impracticable or highly inexpedient, approved of the proposal of receiving the amount of the desired loan in six per cent. stock, and of remitting the same to London, to be sold on account of the United States. Being fully apprised of the manner in which the law would be executed, the committee reported certain resolutions on the 9th, which were adopted, in a bill, by the House of Representatives, on the 11th and 12th of February, without opposition.

The house of Messrs. Baring & Co. of London, were, on the suggestion of the Secretary of the Treasury, designated, by the then Secretary of State, to negotiate sales of the stock, and hold the proceeds subject to the disposal of the minister of the United States at Lisbon. The Secretary of the Treasury is considered in no manner responsible for the subsequent disposition of the fund; though, by this remark, the committee do not intend to suggest that the management has been improper—which they have no reason to suspect.

The necessity of negotiating the second and fourth loans, of five hundred thousand dollars each, was evinced by an examination of the state of the treasury, of the 1st of April, 1795, and 1st of January, 1796. The third loan, of five hundred thousand dollars, negotiated on the 1st of October, 1795, appears to have been, in like manner, justifiable; with this additional circumstance in favor of the transaction, that an equal sum was applied, on the same day, to the payment of the six per cent. stock, purchased by the first Secretary of the Treasury, and remitted to Amsterdam, under circumstances hereinafter detailed.

Of the fifth loan, of three hundred and twenty thousand dollars, obtained of the Bank of New York, the sum of one hundred and twenty thousand dollars was immediately applied to satisfy part of a loan obtained of the Bank of the United States, in the year 1792; the remaining two hundred thousand dollars operated merely as a prolongation of a loan made by the Bank of New York, in the year 1794. The same observation is applicable to the sixth loan of two hundred thousand dollars, obtained of the Bank of the United States.

The different capitals of the temporary loans made of the Bank of the United States were, at the close of the year 1800, reduced to three millions four hundred and forty thousand dollars; at which time the United States remained possessed of two thousand two hundred and twenty shares of the capital stock of the said bank. The total amount of Dutch debt extinguished since the 1st day of January, is four millions nine hundred and twenty thousand dollars; and no new foreign debt has been contracted by the Secretary of the Treasury.

In consequence of the failure of the attempt to negotiate sales of six per cent. stock, on terms advantageous to the public, the Secretary of the Treasury was authorized by the Commissioners of the Sinking Fund, with the consent of the President, which was duly obtained, to negotiate sales of a part of the shares of the Bank of the United States, belonging to the United States. In pursuance of which authorities, two thousand seven hundred and eighty shares were sold for one million three hundred and eighty-four thousand two hundred and sixty dollars; which sum was applied towards satisfying the demands of the banks, and the proceedings duly reported to Congress, according to law.

The foregoing representation contains a detail of all the loans which were negotiated by the late Secretary of the Treasury, prior to the year 1799, the causes of which, so far as they produced an increase of debt, existed in the unexpected and pressing expenses of the year 1794, of which the insurrection in Pennsylvania may be considered as the principal; and in the necessity which existed, early in the year 1795, of providing a fund for defraying the expenses of effecting a treaty of peace with Algiers; for neither of which objects adequate revenues had been, or could be provided.

The only loans negotiated by the present Secretary of the Treasury, which have not been before enumerated, are, a sum of five millions of dollars, obtained in 1799, in pursuance of an act passed on the 16th day of July, 1798, entitled "An act to enable the President of the United States to borrow money for the public service," for an equal amount of stock, bearing interest at eight per centum per annum, until the last day of December, 1808; and thereafter at like interest, during the pleasure of Congress, until the said stock shall be redeemed; also, a further sum of one million five hundred and sixty-five thousand two hundred and twenty-nine dollars and twenty-four cents, obtained in pursuance of an act of Congress, passed on the 7th of May, in the year 1800, by the sale of one million four hundred and eighty-one thousand seven hundred dollars of stock, bearing a like interest, and subject to the same terms of reimbursement. The necessity of these loans is well known to have been occasioned by the military and naval preparations lately directed.

The principles upon which these loans were negotiated, have been considered by the committee, and must be familiar to the House. The situation of the country was new and embarrassing; the prospect of a war was threatening; a reliance on public credit was necessary; the aids which could be afforded by the banks were limited, and could only be considered as resources which might be rendered auxiliary to more extensive and permanent negotiations. No loan had been previously negotiated by the Government, of individuals in the United States. A reliance upon loans in foreign countries appeared to be improvident and dangerous, from its tendency to diminish the confidence of the country in its internal resources. The market rate of interest in the United States was known to be at least eight per centum per annum; and it was certain, moreover, that the demand for money, which would be occasioned by a considerable loan, would tend to increase the then common rate of interest.

The first loan of five millions was obtained by subscription, and without attempting to dispose of the stock above par. Under the second contract, the loan may be extended to three millions and a half of dollars, if the Government should have occasion to raise that sum. No more than one million five hundred and sixty-five thousand two hundred and twenty-nine dollars and twenty-four cents have yet been borrowed; for which, the sum of one million four hundred and eighty one thousand seven hundred dollars in stock, has been issued. No sales have been made for less than five per cent. advance in money, upon the nominal amount of the stock, being the mean value in the market, at the time the contract was published. In every instance the most favorable terms for the public were preferred. The highest price offered was eight per cent. advance in money, at which rate only a small amount in stock was issued; and the committee see no reason to doubt, that these loans were negotiated upon the best terms that could be procured, and with a laudable view to the public interest.

Secondly, in regard to remittances.

Remittances to the bankers of the United States in Amsterdam, for the purpose of providing for the payment of the principal and interest of the foreign debt, have been effected in the three following modes:

1st. By purchasing six per cent. funded stock, and authorizing the bankers to sell the same in Europe, on account of the United States.

2d. By bills of exchange on Amsterdam, Rotterdam, Hamburg, and London.

3d. By contracts with merchants in the United States, for cargoes consisting principally of West India produce, the proceeds of which were directed to be placed to the credit of the United States, in Amsterdam.

In relation to the first object, it is observed, that the first Secretary of the Treasury, in January, 1795, purchased of the Bank of the United States, five hundred thousand dollars of six per cent. stock, at par, payable by instalments. The late Secretary of the Treasury purchased, in April, 1795, an additional sum of one hundred and sixty thousand dollars of like stock, for which immediate payment was made in money, to the Bank of the United States.

In respect to the terms at which the stock was purchased, they were conformable to the current prices of stock at the periods when the purchases were made.

A necessity of purchasing the first mentioned sum of five hundred thousand dollars *on credit*, was created by the heavy and unexpected expenses already alluded to. These had greatly exhausted the treasury, and incapacitated the bank from increasing its loans to the Government.

It appears from the correspondence of the treasury, with the bankers in Holland, which the committee have carefully examined, that an expectation was entertained that the stock would be sold at par, including interest; or, that the instalment of principal due in Holland, for the payment of which the stock was intended to provide, would be continued on loan by a new contract. Although both of these expectations were disappointed, in consequence of the unfortunate situation of Holland at that time, yet it clearly appears to the committee, that every measure within the power of the Secretary, was adopted, to render the remittance as productive as possible.

The second mode of remittance, in bills of exchange, is that which has most usually been resorted to. The rates of exchange at which bills were purchased, have, it is believed, been the most favorable which circumstances would permit; at no time exceeding forty-two cents per guilder, and frequently, and for very considerable sums, as low as thirty-six cents per guilder. No loss has been sustained by the public, except in one instance, of a bill for one hundred and twenty thousand guilders, drawn by Pragers & Co. of Philadelphia, endorsed by Peter Blight, which was purchased by the cashier of the Bank of the United States, at the request of the Secretary, at the rate of thirty-six cents per guilder, and remitted in October, 1799. The drawers and endorser of the bill, at the time of purchase, were in high credit. It is, moreover, stated by the Secretary, as his opinion, that a part of the debt arising from the protest, will be eventually secured to the public.

The third mode of remittance, by purchasing the proceeds of cargoes, has been found effectual, and has, in no instance, occasioned any loss to the public. By the terms of the contracts the public have been secured for all advances, by assignments of the policies of insurance, and by the bonds of the shippers. No commercial risks have ever been assumed by the Government, who have had no concern with the market, paying only for the nett amount passed to their credit—in other words, these shipments have been merely a collateral security, for the replacing, in foreign countries, the advances made by the treasury.

Thirdly, in regard to provisions made for enforcing punctuality on the part of public agents and receivers.

It is the immediate duty of the Comptroller to superintend the adjustment of the public accounts, and to direct prosecutions for all delinquencies of officers of the revenue, and for debts due to the United States, though the Secretary, in virtue of his authority as superintendent of the collection of the revenue, would be also responsible for the permission of any negligence or abuse of trust in the officers of the revenue, and receivers of public money, after the same should come to his knowledge. In the collection of an immense revenue, through an extensive country, losses by the fraud, negligence, and insolvency of individuals, are unavoidable.

When the Secretary of the Treasury has obtained, and presented to the President, the best information in respect to characters recommended by him for appointments to office; when he has established those official forms and checks which are best calculated to convey a true state of the accounts of the public agents, and of the money in their hands; when, on just grounds, for suspicion of improper management, the Secretary has preferred to the President of the United States, his complaints against those who are disqualified for office, and the Comptroller has directed prosecutions for delinquencies, it is conceived that these officers have respectively discharged their duty in this particular. Instances, therefore, might naturally be expected, of public defaulters to a very considerable amount, while no blame could attach to these officers of the treasury; but, on the contrary, if the number of persons of this description, and the amount due from them, are found to be comparatively inconsiderable, the inference is fair and plain, that due caution has been observed in the appointments, and diligence in the superintendence of the subordinate officers.

Upon this subject the committee have been solicitous to acquire such information as might be satisfactory to the House, and having examined the particular cases of delinquency which appear on the books of the treasury, and the proceedings adopted by the Secretary and Comptroller, respectively, are convinced that the utmost loss arising from the delinquency of those concerned in the collection of the revenue from duties on imports and tonnage, for six years, will not exceed one hundred thousand dollars; being somewhat less than one-seventh of one per cent. on the whole amount collected and secured.

The loss sustained in the management of the internal revenue, will exceed this ratio: for reasons of which, some are incident to the nature of the duties and mode of collection; and others, which happened at an early period, attributable to the novelty of the system. This loss by officers commissioned by the President, is estimated at fifteen thousand dollars.

The committee have also examined, with attention, the statements of moneys advanced to individuals, on account of current services. This amount is always apparently considerable, and the details are too voluminous to be annexed to this report. No inference can be drawn from them of the balances actually due from the public agents, as the sums advanced always appear to their debit, while the accounts of their expenditures, and their vouchers, which may absorb the whole amount, are either not rendered, or are in a train of settlement in the public offices. It does not appear to the committee, that there is any foundation to conjecture that those persons who have been principally entrusted with considerable sums of money, will be found in arrear. The accounts of the late Secretary of State, Secretary of War, and Purveyor of Public Supplies, have been duly exhibited, and are in their course of settlement in the offices. These accounts have been so far examined as to satisfy the accounting officers of the treasury that no balance will be found due from them. On the whole, after such an examination as they have been enabled to make, the committee beg leave to express their opinion, that the business of the Treasury Department has been conducted with regularity, fidelity, and a regard to economy. That the disbursements of money have been always made pursuant to law; that every attention, consistent with the nature of the business, has been bestowed in removing delinquents from office; in compelling them to account; in securing moneys due from them, and in preventing an improper and unreasonable accumulation of moneys in the hands of public agents: That the loans effected on account of Government, have been procured upon the most advantageous terms for the public; that the most eligible modes of remittance to Europe have been devised; and, generally, that the financial concerns of the country have been left by the late Secretary in a state of good order and prosperity.

6th CONGRESS.]

No. 158.

[2d Session.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 2, 1801.

Mr. SAMUEL SMITH, from the Committee on Commerce and Manufactures, to whom were referred the several memorials and petitions of sundry mechanics and manufacturers of New York; of the Providence association of mechanics and manufacturers; of the asylum company of journeymen printers of Philadelphia; and of John Davies, of Alexandria, praying for further encouragement to be given to the manufactures of the United States, by extending the duties on importation, reported:

That, in their opinion, it would be inexpedient, at the present time, further to increase the duties on imported articles.

To the Senate and House of Representatives of the United States, in Congress assembled, the memorial of the subscribers, mechanics and manufacturers, in the city of New York, respectfully sheweth:

Your memorialists, with deference to the superior discernment of Congress, entreat permission to call their attention to the subject of manufactures within the United States.

While the prosperity of agriculture and commerce are deservedly objects of national solicitude, the interest of the manufacturer is entitled to a share of attention.

It appears to your memorialists to be a principle of the most obvious policy, that the capital and labor of a State should be directed towards objects most conducive to the public prosperity.

A country so extensive as the United States, and comprehending such varieties of soil and climate, must, necessarily, afford a proportionable variety and quantity of materials for the purposes of manufacture. Wool, cotton, flax, iron, indigo, and numberless other articles, can, with care, be furnished in the greatest abundance; the addition of labor, only, is wanted, to convert them into valuable fabrics. Labor can be considerably facilitated by machinery, and the American genius is particularly adapted to mechanics.

Your memorialists do further respectfully represent, that the prosperity of a State is not only evidenced by its population, but that it likewise consists in the industry of its inhabitants; their usefulness to each other, and their independence of foreign Powers.

While destitute of manufactures, and dependent upon Europeans for a supply of those articles which nature or habit have classed among the necessities of life, we hold some of our principal blessings upon a precarious tenure, of which war or shipwreck may deprive us.

So long as we remain a nation of farmers and merchants merely, we shall be tributary to the Europeans; we shall lavish upon them the wealth that may be retained at home, and pay to them a tax, which is multiplied in every hand through which it passes.

The value of the raw material frequently bears an inconsiderable proportion to that of the manufactured article. The iron, which costs a single cent, is worth an eagle when moulded by the ingenuity of the artisan of Birmingham or Sheffield. To reward the labor of foreign artificers would be generous; but it would be just to remunerate the industry and ingenuity of our own countrymen and citizens.

With submission, your memorialists represent, that the introduction of manufactures would not militate against the interest of the American merchant. The manufactures of Britain constitute the foundation of her commerce. Should any branch of manufacture, when fostered by the protecting hand of Government, rise superior to our internal necessities, we should trust to its excellence to furnish it with a market. Should any branch of commerce be affected by the origin of domestic manufactures, the activity and enterprise of the merchant will not fail to discover a new employment for his capital. The increasing population and wants of our country will prevent a diminution of foreign commerce, for a long time; while the introduction of manufactures will support a domestic commerce, equally advantageous to the merchant, because it will employ his capital at much less hazard; more beneficial to the community, because its profits will be distributed among our own citizens; more conducive to the prosperity of the Government, because the internal intercourse it will occasion, will tend to assimilate and strengthen the empire.

It is not on a sudden that manufactures can be established; they must be pursued with persevering diligence, and nursed by guardian care. They will have many obstacles to encounter, and will be opposed by those Europeans, whose interest it is to render us their perpetual tributaries. But this is a stage through which manufactures must inevitably pass. The weakness of infancy must precede the maturity and vigor of manhood; and unless a commencement is made, we shall have nearly the same obstacles to combat in the next century, that are opposed to us in the present. It appears, therefore, to your memorialists, to be the true interest of the United States to lay the foundation of infant manufactures, and to commence with such articles as can best be supported. When countenanced by the protection of the Government, they will gradually increase, and a new source of opulence and prosperity be opened to our country.

Nations the most polite and enlightened have ever bestowed the utmost attention upon manufactures; they have even cherished valuable fabrics by premiums and bounties, though your memorialists require not these inducements to call forth their enterprise and industry.

Your memorialists beg leave further to represent, that, by some fatal inattention, the breed and numbers of our sheep are now on the decline, and with deference submit to the consideration of Congress, whether suitable measures should not be taken to encourage the raising and importation of these valuable animals.

And your memorialists do pray that Congress, by imposing protecting duties, and by such other measures as they, in their wisdom, may suggest, will afford encouragement to such manufactures and fabrics as may be most useful and most likely to succeed in the United States. Your memorialists take the liberty of suggesting, in a schedule, hereto annexed, such particular manufactures as they consider may be most successfully established, and your memorialists pray that such encouragement may be extended toward them, as, in the opinion of Congress, may be deemed proper and necessary.

And your petitioners, as in duty bound, will ever pray.

Mr. GRISWOLD, from the Committee of Ways and Means, to whom was referred the petition of Asa Benjamin, reported:

That the petitioner is a manufacturer of cordage, and states that, in consequence of the high price of labor, the manufacturers of that article are not able to afford cordage at so moderate a price as foreign cordage is sold at, in our own markets; and he prays that an additional duty may be laid on imported cordage.

The committee highly appreciate the importance of the cordage manufacture, and fully believe that, if any serious danger existed of the loss of this important branch of business, it would be expedient that Government should immediately extend its patronage to it; but, from the best information the committee can collect, they are persuaded that no such danger exists.

And when it is recollected that imported cordage is already subjected to a high duty; that duties upon foreign goods must, in their nature, operate to give a bounty to the home manufacture of the same articles, and must be paid by the consumer, it is believed that the home manufacturers have not, at this time, any reasonable ground of complaint; and that an increase of duty, at this time, merely to increase the price of the article, would be unreasonable, as it respects the consumer.

The committee, therefore, report, that it is not expedient to grant the prayer of this petition.

6th CONGRESS.]

No. 159.

[2d SESSION.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 10, 1801.

TREASURY DEPARTMENT, *February 9, 1801.*

SIR:

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement, exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1797, 1798, and 1799.

I have the honor to be, very respectfully, sir, your obedient servant,

SAMUEL DEXTER

The Hon. the SPEAKER of the House of Representatives.

A Statement exhibiting the amount of Drawback on the sundry articles exported from the United States, in the years 1797, 1798, and 1799, compared with the amount of Duties collected on the same, respectively.

TREASURY DEPARTMENT, Register's Office, February 6, 1801.

JOSEPH NOURSE, Register.

6th CONGRESS.]

No. 160.

[2d SESSION,

BALANCES DUE FROM STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 19, 1801.

Mr HILL, from the Committee appointed to inquire into the expediency of extinguishing the claims of the United States for certain balances, which, by the commissioners appointed to settle the accounts between the United States and the several States, were reported to be due from several of the States to the United States, made the following report:

That the commissioners aforesaid, on the liquidation of the accounts, reported that there were due from several of the States, certain balances, that is to say:

From the State of New York, two million and seventy-four thousand eight hundred and forty-six dollars.
 From the State of Pennsylvania, seventy-six thousand seven hundred and nine dollars.
 From the State of Delaware, six hundred and twelve thousand four hundred and twenty-eight dollars.
 From the State of Maryland, one hundred and fifty-one thousand six hundred and forty dollars.
 From the State of Virginia, one hundred thousand eight hundred and seventy-nine dollars.
 From the State of North Carolina, five hundred and one thousand and eighty-two dollars.

That Congress, by an act, passed on the fifteenth day of February, 1799, engaged that any State so reported against, might discharge itself from the claim by an engagement, in the form of a legislative act, to be passed before the first of April, 1800, to pay, at the treasury of the United States, within five years, the amount of the sum assumed by the United States in the debt of such State, or by expending moneys to the like amount, within the time aforesaid, in the erection of fortifications. And the said act of Congress provides further, that any payment or expenditure aforesaid, shall be credited at the treasury, to the amount of stock which said payment or expenditure is equal to the purchase of, at the market prices of stock. That the State of New York passed, within the time limited, the legislative act required by the act of Congress aforesaid, and has already received credit at the treasury, for the sum of \$222,810 06, for having previously expended, in fortifications, the sum of \$136,533 82. That no other State has acceded to the terms offered by the said act of Congress.

The committee further report, that, by the immediate operation of the said act of Congress, and of the Legislature of the State of New York, that State was exonerated and released from a very considerable part of the balance reported, to wit: the sum of eight hundred and ninety-one thousand one hundred and twenty-nine dollars and thirty-one cents, the balance reported against the State, being to that amount more than the sum subscribed on the assumption of the United States, in the debt of that State. The sum so subscribed amounts to one million one hundred and eighty-three thousand seven hundred and sixteen dollars sixty-nine cents. That the sum of eight hundred and ninety-one thousand one hundred and twenty-nine dollars and thirty-one cents exceeds the whole amount of the balance reported to be due from any one of the States, and the aggregate amount of the whole of the balances, with the exception of the balance reported to be due from the State of Delaware.

The Committee, without entering into a discussion of the principles whereon the settlement of the accounts by the commissioners was founded, remark, that, as none of the States but the State of New York has manifested any disposition to pay the balances reported against them, whether the terms, offered by the said act of Congress, operate favorably or not, and none of them have assented to the justice or equity of the claim of the United States, and no means exist of exacting payment, it seems unwise to keep alive a claim which cannot be enforced, and may have the effect of producing irritation, and exciting discontent. And as the act of Congress has already released the State of New York from so large an amount, and enabled that State, with ease and advantage, to discharge the residue of the balance, reported to be due from that State, the Committee are of opinion that a release of the balances due from other States is expedient, and for this purpose report a bill, which is submitted.

6th CONGRESS.]

No. 161.

[2d SESSION.

MINT.

COMMUNICATED TO CONGRESS, FEBRUARY 20, 1801.

*Gentlemen of the Senate, and
 Gentlemen of the House of Representatives:*

I transmit to Congress a report, received this morning, from Elias Boudinot, Esquire, Director of the Mint, dated February 13, 1801, which will require the attention and decision of Congress, before the close of the session.

JOHN ADAMS.

UNITED STATES, February 20, 1801.

The Report of the Director of the Mint.

MINT OF THE UNITED STATES, February 13, 1801.

The Director considers it his duty to inform the President, that Monday last was the day, directed by law, on which the assays of the reserved pieces of coin should be made, in the presence of the Secretary of State, the Secretary of the Treasury, the Comptroller of the Treasury, the Chief Justice, and Attorney General; but none of those officers have attended, nor could indeed have been expected; and the Director has not been informed of any other provision, yet made by law, to accomplish the same purpose. By this means not only the check established by law on the coin of the United States, is frustrated, but the reserved pieces are still locked up, and the depositors complain of being thus deprived of the use of their property. The design of bringing this subject before the President, is, that the Director may be instructed what steps to take on this occasion.

It is also necessary to inform the President, that, by the act of Congress of the 16th of July, 1790, all offices attached to the seat of Government shall be removed to the district accepted for the seat of Government of the United States, by the said act, by their respective holders, on the first Monday in December, 1800, and shall, after the

said day, cease to be executed elsewhere; but, by an act of the last session of Congress, the mint is to remain at Philadelphia till the fourth day of March next, any thing in the said act to the contrary notwithstanding. This act expires on the fourth day of March next, and unless some other provision is made by law before that day, it will be difficult to ascertain the duty of the Director, except to prevent any further operation of the mint at Philadelphia. He wishes, therefore, for instructions from the President, as to his conduct with regard to the mint, in case further provision, by law, should not be made; at all events, the public property here should be attended to.

All which is respectfully submitted to the President.

ELIAS BOUDINOT, *Director.*

6th CONGRESS.]

No. 162.

[2d SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 23, 1801.

Mr. SAMUEL SMITH, from the Committee on Commerce and Manufactures, to whom was referred the petition of sundry merchants of the town of Providence, in the State of Rhode Island, made the following report:

That the petitioners deposited, under the care of the officers of the customs, in the manner prescribed by law, a quantity of teas imported by them from China. That, on the twenty-first of January last, the said goods were destroyed by fire, and the petitioners pray that they may not be compelled to pay the duties accruing on the same.

Your committee are of opinion, that, as the goods were under the care of the officers of the customs, at the time they were consumed by fire, and not subject to the control of the owners, and that, as granting relief in this case, cannot establish a precedent dangerous to the revenue, the prayer of the petition ought to be granted.

They, therefore, submit the following resolution, viz:

Resolved, That the Committee of Commerce and Manufactures be instructed to report a bill to exonerate the petitioners from the payment of duties on such goods as were deposited, under the care of the officers of the customs, at the time they were consumed by fire.

6th CONGRESS.]

No. 163.

[2d SESSION.]

STATE BALANCES.

COMMUNICATED TO THE SENATE, MARCH 3, 1801.

Mr BLOODWORTH, from the Committee appointed to inquire whether any, and what, further measures it is expedient to adopt with respect to the balances reported by the commissioners appointed to settle the accounts between the United States and several States, made the following report:

That, as no disposition has been evinced by any of the States, against whom balances were reported by the aforementioned commissioners, except by the State of New York, to subscribe to the terms offered by Congress, a further continuance of the demand against those States, the justice and equity of which they do not admit, and for effecting the payment of which no measure of coercion can ever be resorted to, is not likely to answer any useful purpose, but, on the contrary, is calculated to occasion perpetual disquiet, as well to the creditor as to the debtor States: Under this, and every other view of the subject that they have been able to take, the committee are impressed with an opinion that it is advisable to extinguish the claim of the United States for the balances of those States who have declined accepting the terms of payment proposed by the act of Congress, passed on the 15th day of February, 1799.

7th CONGRESS.]

No. 164.

[1st Session.

SINKING FUND.

COMMUNICATED TO THE SENATE, DECEMBER 17, 1801.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their report of the 28th of November, 1800, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the 14th of the present month, and in the proceedings of the officers of the treasury, therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

ABR. BALDWIN, *President of the Senate pro tem.*
 J. MARSHALL, *Chief-Justice of the U. States.*
 JAMES MADISON, *Secretary of State.*
 ALBERT GALLATIN, *Secretary of the Treasury.*
 LEVI LINCOLN, *Attorney U. S.*

CITY OF WASHINGTON, December 16th, 1801.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund:

That no purchases of the debt of the United States have been made, since the date of the last report to Congress, of the 28th day of November, 1800; and that the sums of capital stock heretofore purchased and transferred, prior to the present year, in trust for the United States, the interest whereon is appropriated, by law, towards the reduction of the public debt, amount to four millions seven hundred and thirty-eight thousand three hundred and sixty-seven dollars and eighty-three cents, as will more particularly appear from the document hereto annexed, marked A.

That the following sums have been applied towards the discharge of the principal debt of the United States, since the date of the last report to Congress, of the 28th of November, 1800:

1st. To the sixth instalment of the six per cent. stock, bearing a present interest, which, pursuant to the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," passed on the 3d day of March, 1795, and the act in addition thereto, passed on the 28th day of April, 1796, became payable on the first day of January, 1801, the sum of	\$760,650 13
2d. To the payment of the ninth instalment of the subscription loan for bank stock, due on the last day of December, 1800,	200,000 00
3d. To the payment of the first instalment of a loan of two million of guilders, obtained in Holland, and which fell due the present year, pursuant to a contract, dated the 9th of March, 1784, estimated at 40 cents per guilder,	100,000 00
4th. To the payment of the fourth instalment of a loan of one million of guilders, obtained in Holland, and which fell due in the present year, pursuant to a contract, dated the 1st of June, 1787, estimated at 40 cents per guilder,	80,000 00
5th. To the payment of the third instalment of a loan of one million of guilders, obtained in Holland, and which fell due in the present year, pursuant to a contract, dated 13th March, 1788, estimated at 40 cents per guilder,	80,000 00
6th. To the payment of the second instalment of a loan of three millions of guilders, obtained in Holland, and which fell due in the present year, pursuant to a contract, dated first of January, 1790, estimated at forty cents per guilder,	240,000 00
Amounting, in the whole, to	\$1,460,650 13

The payments before enumerated have been made out of the following funds:

1st. The interest fund on the sums which accrued upon the stock purchased, and transferred to the commissioners of the sinking fund, in trust for the United States, as particularly stated in the document hereto annexed, marked B,	\$192,568 52
2d. The fund arising from the payment of debts, which originated prior to the present constitution of the United States, as particularly stated in the document hereunto annexed, marked C,	7,704 79
3d. The funds arising from a dividend on the capital stock belonging to the United States, in the bank of said States, from 1st of July, to 31st December 1799, after deducting the interest on the subscription loan for the same period, as particularly stated in the document hereunto annexed, marked D,	17,520 00
4th. The proceeds of the duties on goods, wares, and merchandise, imported, on the tonnage of ships or vessels, and on spirits distilled within the United States, and stills, appropriated by the 8th section of the act of March 3d, 1795, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," being for the period and in reference to the objects mentioned in this report,	1,242,856 82
	\$1,460,650 13

Making, in the whole, an equal amount to the reimbursements before mentioned.

There remained in the hands of the Treasurer of the United States, as agent of the Board of commissioners, on the twelfth day of the present month, four hundred and forty-nine thousand and sixty-nine dollars and thirty-one cents, which, with the growing produce of other appropriated funds, will be sufficient for the reimbursement, at the close of the year, of the seventh instalment of the six per cent. stock, the first instalment of the heretofore deferred stock, now bearing an interest of six per cent. and the tenth instalment of the subscription loan for stock of the Bank of the United States, which reimbursements are required to be made by the 11th section of the act of Congress, passed on the 3d of March, 1795, herein before mentioned.

All which is most respectfully submitted, by

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, December 14, 1801.

A.

A General Statement of the several stocks transferred to the United States, to the 31st December, 1800, the interest on which, by the acts of the 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

	6 per cent. stock.	3 per cent. stock.	Deferred stock.	5 per cent. stock.	5½ per cent. stock.	Amount of the several species of stock.

D.

Statement of moneys arising from dividends on the capital stock belonging to the United States, in the bank of said States, from 1st July, to 31st December, 1799, after deducting the interest on the subscription loan for the same period, being the amount drawn by the agent to the trustees for the redemption of the public debt, pursuant to the act of 3d March, 1795, and agreeably to a statement made at the Treasury, No. 12,237, dated the 22d May, 1801.

1800, November 19. Warrant No. 1,324, in favor of said agent,	\$17,520
---	----------

TREASURY DEPARTMENT, *Register's Office, November 11, 1801.*

JOSEPH NOURSE, *Register.*

7th CONGRESS.]

No. 165.

[1st Session.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, DECEMBER 21, 1801.

TREASURY DEPARTMENT, *December 18th, 1801.*

SIR:

I have the honor to enclose a report prepared in obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department."

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the PRESIDENT of the Senate.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

The permanent revenues of the United States, according to the laws now in force, consist of, 1st, duties on merchandise and tonnage; 2d, internal duties on stills and domestic distilled spirits, refined sugar, licences to retailers, sales at auction, and pleasurable carriages; 3d, proceeds of the sales of public lands; 4th, duties on postage; 5th, dividends on shares in the Bank of the United States; 6th, incidental, arising from fees, fines, and penalties, repayments in the treasury, and sales of public property other than lands.

1. *Duties on merchandise and tonnage.*—The receipts in the treasury, arising from that source, have amounted, for the year ending on the 30th September, 1801, to \$10,126,213 92. If to this sum be added the drawbacks paid by collectors on the exportation of domestic distilled spirits and refined sugar, which are a charge on the internal revenues; and that part of the additional duties, laid in the year 1800, which did not operate during the year to which those receipts refer, the sum which would have been received at the present rate of duties, cannot be estimated at less than \$10,500,000. The amount of duties secured on the 30th September last, and falling due in the course of the year 1802, compared with that of preceding years, justifies an opinion, that, had the importations and exportations continued in the same proportion, those duties would have brought in the treasury, during the year 1802, near \$11,000,000.

How far this branch of revenue may be affected by the restoration of peace in Europe, is rather a subject of speculative conjecture than of calculation. That it will be liable to sudden and considerable fluctuations, cannot be doubted; and, for that reason, a greater degree of correctness may be obtained, by forming an estimate for a number of years, than for any one year. The period for which such an estimate should be made, being arbitrary, so far as relates to the revenue, that of the eight years, 1802 to 1809, is selected, principally in reference to the payments to be made on account of the public debt—the whole of the foreign debt being actually due within that term of years, and the eight per cent. stock becoming redeemable the last year of the period. The best data on which the estimate may be predicated, seem to be the actual consumption of imported articles during former years, and the ratio of increase of population as ascertained by the census.

With a view to the first object, the statements A to H have been abstracted from the records in the treasury. They exhibit the value or quantities of imported articles on which duties have been actually paid, for each calendar year, from 1790 to 1800, deducting from the gross amount imported, each year, the value or quantities of articles re-exported during the same year, which were entitled to drawback.

Those statements do not, however, show correctly, principally for the last years, the actual annual amount of consumption; because, 1st, exportations to a considerable, but not precisely ascertained amount, have taken place, under such circumstances as did not entitle the articles exported to a drawback; and 2d, the amount of foreign articles remaining on hand at the close of the year 1800, was much greater, in proportion to the respective population, than that on hand at the commencement of the year 1790. Those causes, which affect, to an inconsiderable degree, the years 1790 to 1792, and but partially those immediately succeeding, would, however, render any deduction drawn from those documents, in relation to the years 1799 and 1800, altogether fallacious. The preceding nine years may be divided into two distinct periods; the first, from the 1st day of January, 1790, to the 31st day of December, 1792, includes the three years which immediately preceded the European maritime war; the second includes the six first years of that war, viz. from the commencement of 1793 to the close of 1798.

In order to obtain a distinct view, for each of those two periods, of the annual average consumption of foreign articles, and of the annual average revenue which, at the rate of the present duties, would have accrued thereon, the table L has been prepared, which shows that the nett annual revenue which would, at the present rate of duties, have accrued during each of those two periods, amounts, on an average, for the years 1790 to 1792, to \$6,163,000; and for the years 1793 to 1798, to \$8,350,000. These sums constitute not the receipts in the treasury, but the revenue which would have accrued during the respective years to which they refer. The first may be considered as the revenue accruing during the year 1791; the last, as that accruing during the year ending 30th June, 1796; and as, on account of the credit given for the payment of duties, the revenue accruing during one year constitutes nearly the receipts of the year ending nine months later, those two sums, and the receipts of the year ending on the 30th of September, 1801, as above stated, may, without material error, be considered as the receipts of three distinct years, four years and a half distant each from the other, viz:

For the year ending 30th September, 1792,	-	-	-	\$6,163,000
For the year ending 30th March, 1797,	-	-	-	8,350,000
For the year ending 30th September, 1801,	-	-	-	10,500,000

The ratio of increase, during the whole period of nine years, exceeds seventy per cent., whilst that of population, during the same time, was hardly more than thirty per cent. The ratio of increase, during the first period of four years and a half, is near 35½ per cent., and, during the last, more than 25½ per cent., whilst that of population, for each period, was only at the rate of 14 per cent.

The greater ratio of increase, during the first, than during the last period of four years and a half, is owing to the comparison in the first, being between a period of European peace and a period of European war; and, in the last, between two periods of European war.

The ratio of increase of population being ascertained, by the census, to be at the rate of 34 per cent. for ten years; if the increase of consumption shall be supposed to be, hereafter, precisely the same as that of population, the annual receipts of the eight years, 1802 to 1809, may be estimated at nearly fifty per cent. greater than those of the years 1790 to 1792, or at a sum of near \$9,250,000, if that period be assumed as the basis on which to predicate the estimate. But if the calculation shall be grounded on the revenue of the years 1793 to 1798, the annual receipts of the years 1802 to 1809 should be estimated as about 30½ per cent. greater than those of that period, or at about \$10,900,000.

It seems that those two respective sums may reasonably be considered as the two extremes, which the average annual receipts of the eight ensuing years will not exceed. The first calculation, of \$9,250,000, appears to be below the probable result; since, being predicated on the consumption of the three years preceding the European maritime war, without any other addition than that resulting from the ascertained increase of population, it rests on the supposition that the permanent wealth of the United States has not, during that war, increased in any greater proportion than their population; and that the whole of the external commerce acquired during the same period, must necessarily be lost by the return of peace amongst foreign nations.

Although, therefore, it be presumable, that the receipts of some of those years will, from temporary causes, fall below that sum, it is believed that, taking the whole period of eight years, the duties on merchandise and tonnage may safely be averaged at a sum not less than \$9,500,000.

As a minute investigation of the several rates of duty, now paid by the several species of foreign merchandise, may perhaps suggest some advantageous modifications, a table of those rates is annexed to this report.

Without any view to an increase of revenue, but in order to guard, as far as possible, against the value of goods being underrated in the invoices, it would be eligible to lay specific duties on all such articles, now paying duties ad valorem, as may be susceptible of that alteration. Amongst such, the following have been suggested: fruits and spices, pickled and dried fish, oil, glue, several species of drugs, watches, gunpowder, and cigars.

Legislative provisions seem necessary, in order better to define the restrictions under which the intercourse with the adjacent British and Spanish possessions shall be carried on, in conformity with treaties; under which the articles of the growth or manufacture of the United States may be imported, free of duty, by the way of New Orleans, from the western parts of the Union, to the ports of the Atlantic States, and from these to the interior districts of collection on the Western waters, and under which drawbacks shall be allowed on the exportation of foreign articles.

2. *Permanent internal duties.*—The annual statement, prepared by the commissioner of the revenue, and which will be completed in a few days, precludes the necessity of exhibiting, here, all the details pertaining to this branch of revenue. The statement M is an abstract of its amount, for the year 1800; during which, the duties on spirits and stills, refined sugars, licences to retailers, sales at auction, and pleasurable carriages, produced a nett sum of 576,888 dollars and 80 cents. The duties on stamps, which, as, under the existing laws they will cease after the 4th day of March, 1803, are not included amongst the permanent revenues, amounted, for the same year, to 209,853 dollars and 32 cents. Both together constitute an item of \$786,742 12. The receipts in the treasury from all the internal revenues, have amounted, for the year ending on the 30th September, 1801, to 919,719 dollars and 16 cents. Deducting from this sum 65,000 dollars, being the estimated amount of drawbacks paid during that year, out of the proceeds of the external revenue, on the exportation of domestic distilled spirits and refined sugar, leaves a nett sum of about 854,000 dollars, and an increase of near 70,000 dollars beyond the revenue of 1800.

The accounts of the last nine months being yet but partially rendered, it is not practicable to ascertain to what class of duties the increase belongs, nor particularly to discriminate between the increase of the revenue arising from stamps, and that of the permanent internal revenues. Yet it is believed that these, exclusively of the stamp duties, may safely be estimated, for the average of the years 1802—1809, at an annual sum not less than 650,000 dollars.

In order, however, to secure that amount, a revision of the system, so far as it relates to country stills, is essentially necessary. Whilst the owners of small distilleries, in some parts of the Union, complain of the operation of a tax raised on the capacity of their stills, that same regulation has enabled all those whose capitals are larger, and local situation more advantageous, especially in the Middle States, to reduce the actual duty on the quantity of spirits distilled from grain to about three cents per gallon. But improvements have lately been introduced, which, by accelerating the process of distillation, will, according to the estimate of the commissioner of the revenue, reduce the duty on stills to about three-fifths of a cent per gallon of spirits distilled. The effect of these, on the revenue, has already been sensibly felt, in one of the most productive districts of the United States; and, unless it shall be counteracted, either by restricting laws, or by an increase of the duty on the capacity of the stills, or by a change of the subject of taxation, a considerable defalcation must be expected.

Whatever mode may be adopted, it is respectfully submitted whether the revenue may not be benefitted, and just grounds of complaint removed, by a repeal or modification of the clause which compels a yearly entry of stills, in the month of June, under a penalty of 250 dollars, by a permission to persons who take short licences, to continue distilling beyond the time limited in their licences, on paying a proportionate duty; and by reducing into one act all the laws in relation to duties on stills and domestic distilled spirits.

It will appear, by the same statement M, that, whilst the expenses of collection on merchandise and tonnage, which are defrayed out of the revenue, do not exceed 4 per cent., those on the permanent internal duties amount to almost 20 per cent. This, however, is an inconvenience, which, on account of the great number of individuals on whom the duties are raised, and of their dispersed situation throughout the whole extent of the United States, must, more or less, attach to the system of internal taxation, so long as the wants of Government shall not require any considerable extension, and the total amount of revenue shall remain inconsiderable.

3. *Sales of public lands.*—The only data on which to calculate the annual revenue, which may probably be derived, for the ensuing eight years, from those sales, are the quantity of land at the disposal of Government, compared with the probable annual demand, and the actual sales which have taken place since the several land offices have been opened.

The precise quantity cannot be ascertained, all the surveys not being yet completed, and the western boundary line of the Virginia reservation, from the head spring of the Little Miami northward, being neither surveyed, nor even the principle on which its course must depend, determined by the terms of cession accepted by Congress.

The estimate N may, however, be considered so far correct, as to render it certain that the quantity of public lands northwest of the Ohio, within the Indian boundary line, and not yet disposed of, amounts to very near nine millions of acres. A general map of those lands, including the Virginia reservation and the grants to the Ohio Company and to John C. Symmes, which has been compiled from the survey of the Indian boundary line and from the draughts returned to the Treasury Department, will be transmitted to Congress, and will more clearly explain their relative situation than could be done by any written description.

The statement O shows the actual sales which have taken place in the several land offices, to the 31st day of October last. By this it appears that 398,646 acres have been sold, for 334,887 dollars; of which sum, 248,461 dollars have been paid, and 586,426 dollars remain due, being payable under the law in instalments, bearing interest from the date of sales, and which will become due in the years 1802 and 1805, in the proportions exhibited in the statement.

The quantity of land sold, either at the public sales of the three land offices of Marietta, Chillicothe and Cincinnati, or at private sale at Steubenville, when the land office was first opened, cannot afford any just data, on which to predicate an estimate of the probable annual sales; as they may be supposed to have been greater when the lands were first offered for sale than at subsequent periods.

Rejecting, therefore, the result of the whole of the public sales, and that of the first two months private sales, at Steubenville, it appears that there have been sold, at private sale, 122,673 acres, at Steubenville, during a period of fourteen months, ending the 31st day of October last—64,205 acres at Chillicothe, during a period of five months, ending on the same day—42,656 acres at Cincinnati, during a period of six months, ending on the same day; and 1,544 acres at Marietta, during a period of sixteen months, ending on the same day—which gives, in the whole, a result of 345,000 acres, annual sales, in all the land offices.

The reservations in the grants to the Ohio company, and to John C. Symmes, and in the townships formerly sold at New York; the surplus of the tract appropriated for military bounties, after the same shall have been satisfied; and a tract of near one million of acres, lying north of Symmes' patent, and contained between the Great Miami and the Virginia reservation, are not embraced in this general result. The reservations and the military tract are not yet disposable by any existing law; and the tract lying between the Great Miami and the Virginia lands, has been only partially offered for sale, under the act of Congress giving a right of pre-emption to certain purchasers under J. C. Symmes. The result of the operation of this act has not yet been ascertained. It is, however, known, that under it a number of tracts have been sold, and some payments already made. The remainder of the tract will, afterwards, according to law, be surveyed, and offered for sale on the same terms as other lands.

Taking in consideration the probable sales in those several tracts, the total amount of annual sales might fairly be estimated at 400,000 acres, if the periods during which the land offices have been opened had been sufficiently long to form a safe basis for calculation. To estimate them at 250,000 acres a year, for the ensuing eight years, is equally justifiable, by the actual sales, by the known usual demand, and by the quality and superior safety of title of the public lands.

The nominal price of those lands is two dollars per acre; but, on account of the provisions which relate to interest and discount, they may be obtained, within a fraction, at the rate of one dollar and eighty-four cents, if the whole purchase money is paid at the time of sale; and may bring in the treasury two dollars and twenty-seven cents per acre, if the purchaser shall avail himself of the terms of credit given by law.

If the proceeds of the whole sales shall be estimated only at the rate of \$1 84 per acre, it will allow 24 per cent. for losses on account of non-payments on the three last instalments; and, after the year 1805, give, on an annual sale of 250,000 acres, an annual income of 460,000 dollars. But as, on account of the credit given by law, the whole of this sum will not, till after the year 1805, be annually receivable in payment of lands sold after the 1st of January next, whilst, on the other hand, the sums due for lands, sold before the end of this year, will become payable during the four next ensuing years; it will be found that, making the same deduction of 24 per cent. for losses on the sums already due, the whole sum receivable, for lands already sold, or to be sold, during the eight years 1802—1809, will, for those eight years, on an average, amount annually to 400,000 dollars.

Some legislative provisions seem necessary to ascertain the western boundary of the Virginia lands: to define in what manner the seven first ranges of townships shall be subdivided into sections, without interfering with the claims of former purchasers; and, perhaps, in relation to the lands claimed by purchasers under John C. Symmes. But the most important object, in order to secure and improve this valuable branch of revenue, is to provide against the progress of intrusions on the public lands, and especially to devise some efficient and prompt mode of giving quiet possession to every person purchasing under the law.

4. *Postage, dividends on bank shares, incidental.*—The annual proceeds of the duties on postage may not be estimated at less than 50,000 dollars.

The dividends on bank shares, at the rate of 8 per cent. dividend, amount to 70,040 dollars. But, as the shares themselves may eventually be wanted as a resource to meet certain contingent demands against the United States, those dividends, although constituting a part of the revenue, unless it shall be found necessary to sell the stock and the incidental or temporary revenues, shall be omitted in this estimate of the permanent revenues.

These, therefore, are estimated in the whole at 10,600,000 dollars, viz:

Duties on merchandise and tonnage,	-	-	-	\$9,500,000
Internal duties, (stamps excepted)	-	-	-	650,000
Proceeds of the sales of public lands,	-	-	-	400,000
Duties on postage,	-	-	-	50,000

The other temporary resources of the United States are—

1st. The proceeds of stamp duties, for fourteen months from the 1st of January, 1802, to the 4th March, 1803, which, under the existing law, limits their continuance, 260,000 dollars.

2d. The balance due on the direct tax. The amount paid in the treasury to the 1st instant, so far as the same can be ascertained, was 1,245,000 dollars, leaving an outstanding sum of 755,000 dollars; but, as this last sum is chargeable with all the expenses of collection, estimated at the rate of seven per cent., at 140,000 dollars, the real balance is only about 615,000 dollars; and as delays, and perhaps an eventual loss may be expected, on the last part of the collection, it would not be safe to estimate the amount which will probably be paid in the treasury, at more than 450,000 dollars.

3d. The proceeds of sales of public vessels. Fifteen vessels have been sold under the act of last session of Congress, for 275,767 dollars and 73 cents; of which sum, 86,412 dollars and 83 cents had been paid, on the 30th of September last, leaving an outstanding balance of 189,354 dollars and 90 cents.

4th. The excess of specie in the treasury, beyond the sum which it is prudent to keep there, may be estimated at about one million of dollars.

5th. The shares of the Bank of the United States, owned by the United States, are, at 33 $\frac{1}{3}$ per cent. advance, worth 1,184,000 dollars.

Those several items, exclusively of several balances due by individuals, and a part of which will eventually be received in the treasury, constitute a sum exceeding three millions of dollars; and may, for the present, be considered as resources, sufficient to meet the demands against the United States, which may be eventually payable on account of the sixth article of the treaty with Great Britain, and of the ——— article of the convention with France.

The permanent expenditures of the United States relate either to the current expenses of Government, domestic or foreign, civil and military, or to the payment of the interest and principal of the public debt.

The estimates of appropriations for the ensuing year, amounting to 3,448,147 dollars and 18 cents, include all the expenses of Government, other than those in relation to the public debt, with the exception of those incident to the intercourse with the Barbary Powers—estimated, after the ensuing year, by the Secretary of State, at 70,000 dollars; of those which may be incurred for the purchase of arms—estimated, by the Secretary of War, at 55,000 dollars; and of a part of the Indian annuities, amounting to 11,000 dollars: these items having been omitted, in the estimates of the ensuing year, because the balances of unexpended appropriations have been considered as sufficient for those objects, by the Secretaries of State and War, respectively. On the other hand, a sum of about 70,000 dollars, in relation to the census and quarantine laws, which is included in those estimates, is a temporary expense.

The particular sums, which, under existing laws, seem necessary to defray each particular authorized expense, being detailed in the annual estimates, will not be repeated here; and it appears sufficient to recapitulate the gross amount of the general heads of expenditure, viz.

For all domestic expenses of a civil nature, including the civil department, and all the miscellaneous items of the light houses and mint establishments, of the surveying department, of pensions, claims and contingencies,	\$780,000
For all the expenses of intercourse with foreign nations, including those of the diplomatic department, those incident to the prosecution of claims, and to the protection of seamen in foreign countries, and those in relation to the Barbary Powers.	200,000
For the military establishment, including all the expenses in relation to the army, to arsenals and magazines, to the fabrication and purchase of arms and military stores, to fortifications, and to the Indian Department,	1,420,000
For the Navy Department, including all the expenses in relation to the ships kept in commission, or laid up in ordinary, to the building of new ships, and to dock yards.	1,100,000
Making altogether, three millions and five hundred thousand dollars,	<u>\$3,500,000</u>

Which sum, deducted from the estimated revenue of ten millions and six hundred thousand dollars, leaves a sum of seven millions and one hundred thousand dollars, annually applicable to the payment of interest and redemption of the principal of the public debt.

It must be further observed, that the sums assigned to each head of expenditure, being deduced from the estimates of appropriations necessary for the ensuing year; and these having been calculated before the re-establishment of peace in Europe was known, they are predicated, for every item which relates to supplies, on the then existing prices; a considerable reduction will take place in every item, which depends on the price of provisions, freight, transportation, and even wages. Although the saving, thence arising, cannot yet be correctly ascertained, it may not be estimated at less than 200,000 dollars annually. It is therefore believed, that, after defraying every expense necessary to support every civil, military, or naval establishment, to the extent now authorized by law, the annual surplus, applicable to the debt, may be confidently estimated at seven millions and three hundred thousand dollars.

The statement P exhibits the amount of the unredeemed principal of the public debt, as it will be on the 1st of January next, and of the annual interest and charges payable thereon, including the annual reimbursement on the six per cent. and deferred stocks.

By the printed statements of receipts and expenditures for the year 1800, transmitted to Congress the first week of the present session, it appears that the unredeemed principal of the public debt, (exclusively of the sums passed to the credit of the Commissioners of the Sinking Fund, which are only a nominal debt due by the United States to themselves; and after deducting the reimbursement of the principal of the six per cent. stock, operated by the annual payment of eight per cent. on the nominal amount of that stock) amounted, on the 1st of January, 1801, to 80,161,207 dollars and 60 cents. By the statement P, it appears that the unredeemed principal will, on the 1st of January, 1802, amount to 77,881,890 dollars and 29 cents; the difference of 2,279,317 dollars and 31 cents being the amount of principal paid during the year 1801; during the same year 1801, more than eight hundred thousand dollars shall have been remitted to Holland, in part of the interest and instalments on the Dutch debt, falling due next year, which sum is not included in the amount of principal thus stated to have been paid during the present year. The sums which, on the 1st of January, 1801, had been remitted to Holland, in part of the interest and instalments due, in the course of this year, and which were not deducted from the amount of public debt on the 1st of January, 1801, did not exceed five hundred thousand dollars. The amount of debt actually paid, or for the payment of which provision shall have been made during the present year, will not, therefore, be less than two millions five hundred thousand dollars. And it is believed, though it cannot at present be precisely ascertained, that the balance of specie in the Treasury, which, on the 1st of January, 1801, was 2,557,395 dollars and 38 cents, will not be diminished on the 1st of January, 1802.

The Treasury accounts being settled to the 30th day of September last, the amount of public debt paid during the half year commencing on the 1st of April, and ending on the 30th September, 1801, as well as the comparative view of the Treasury at the commencement and end of that period, may be precisely stated. The payments in part of the principal of the debt made during those six months, exclusively of certain parts of the unfunded debt which have been reimbursed, have been—

1st. To the Commissioners of the Sinking Fund, and to be by them applied, on the 1st of January next, to the reimbursement of the six per cent. stock,	\$129,048 83
2d. To the Bank of the United States, on account of the principal of sundry temporary loans, formerly obtained from that institution,	500,000 00
3d. For remittances to Holland, on account of the Dutch debt, 782,665 dollars and 79 cents; from which, deducting 245,980 dollars and 50 cents, being the interest and commissions for one-half of the year 1801, on that debt, leaves, paid on account of the principal,	536,685 29
4th. Evidences of public debt paid for lands,	21,282 66

Amounting altogether to one million one hundred and eighty-seven thousand and sixteen dollars and seventy-eight cents, \$1,187,016 78

The balance of specie in the treasury amounted, on the 1st of April, 1801, to 1,794,044 dollars and 85 cents, and on the 1st of October, 1801, to 2,946,038 dollars and 73 cents; making a difference, in favor of the treasury, of 1,151,993 dollars and 88 cents; which last sum, added to the above stated payments on account of the principal of the debt, makes an actual difference, in favor of the United States, of 2,339,010 dollars and 66 cents, during those six months.

The principal of the public debt, unredeemed on the 1st January, 1802, is, in the statement P, arranged under four heads, viz:

1st. The six per cent and deferred stocks. The nominal amount of this debt is \$41,879,525 23, and the eight per cent annuity, applicable to its interest and reimbursement of principal, amounts to 3,350,362 dollars and 1 cent. As, by the effect of this annuity, 5,027,740 dollars and 57 cents of the principal shall have been reimbursed on the 1st of January, 1802, the unredeemed principal of that debt will, on that day, be only 36,851,784 dollars 66 cents. The interest, at the rate of six per cent., on which sum, is, \$2,211,107 dollars 08 cents. The part of the eight per cent annuity, at present applicable to the redemption of the principal, is, therefore, 1,139,254 dollars and 3 cents, and increasing each year, at compound interest, shall, without any further provision, have discharged the whole of the six per cent. in the year 1818, and the whole of the deferred debt in the year 1824.

2d. Three per cent. stock amounts to	\$19,079,705 63
And the interest on the same to	572,391 16

No provision has been made for its redemption, occasional payments for lands excepted.

3d. All the other domestic debts created, under the present Government of the Union, in order either to discharge other debts, or to meet certain extraordinary expenses. These include the five and half, four and half, navy six, 1796 six, and eight per cent. stocks, and the temporary loans obtained from the bank; and amount, altogether, to

The interest on all these constitutes an item of	-\$828,350 50
--	---------------

4th. The foreign debt due in Holland and at Antwerp, amounts, including premiums and gratifications, to	\$9,915,000
---	-------------

The interest on which, commissions and charges included, is, for the year 1802,	\$476,931
---	-----------

This last debt being payable in instalments, at certain fixed dates, and it being necessary to purchase remittances in America, near six months before the payments are made in Holland, the statement R has been added to show the payments, both on account of principal and interest, which become annually due in Holland, until the final redemption of the debt in 1809, and the sums which it will be necessary, every year, to provide in America, in order to meet those payments.

The greater part of this debt becomes due in the course of the five next ensuing years; and the annual payments, on account of principal and interest for that period, exceed, on an average, two millions of dollars. The inconvenience and difficulty of procuring remittances to that amount, and the real injury arising from such heavy disbursements abroad, render an extension of the terms of payment, by partial re-loans, a desirable object; and measures have been taken to ascertain its practicability. All that seems wanted, is, that the gross amount of payments, which are to take place during the eight next years, should be more equally apportioned amongst those years; and any greater surplus of revenue which might be freed by that operation, would be applicable to the redemption of those species of the domestic debt which it may be thought most eligible to reimburse.

Whether this operation shall be effected or not, no difficulty is apprehended, from want of resources, to discharge every instalment as it shall become due; the sum payable in 1803, in which year the largest payments must be made in Holland, amounting, including both those and all other actually due, on account of the interest and reimbursement of the domestic debt, to only \$7,100,000, or to \$200,000 less than the annuity of \$7,300,000, which has been estimated as the surplus of revenue applicable to that object.

If that surplus does exist, and if it will be sufficient to meet all the engagements of the United States, as they become due, the only remaining objects of inquiry seem to be: What impression will, during the next eight years, to which these estimates refer, be made on the public debt, by the annual application of that surplus? In what time would the same annuity discharge the whole of the public debt?

The statement S exhibits the effect produced at the end of the year 1809 on the debt, by the annual application of that sum, (\$7,300,000,) to the payment of both principal and interest, and shows that, at the end of those eight years, it shall have paid the whole of the Dutch debt; of the temporary loans due to the bank; of the navy six per cent; and of the five and a half per cent. stocks; \$5,525,300 and 38 cents of the eight per cent. stock; \$150,387 and 26 cents of the four and a half per cent. stock; and \$11,399,263 and 6 cents of the principal of the six per cent. and deferred stocks: amounting, altogether, to thirty-two millions two hundred and eighty-nine thousand one hundred and fifty dollars and seventy cents.

The public debt would, therefore, on the 1st January, 1810, be reduced to \$45,592,739 and 59 cents, viz: \$954,899 and 62 cents of the eight per cent. stock; \$25,612 and 74 cents of the four and a half per cent. stock; (both of which would be discharged during the four first months of the year 1810;) \$80,000 of the 1796 six per cent stock; \$25,452,521 and 60 cents of the six per cent. and deferred stocks; and the \$19,079,705 and 63 cents three per cent. stock.

It is true that this statement is predicated on the supposition, that the whole of the remittances to Holland may be purchased at par, which is not probable; but, on the other hand, it is calculated on the principle of a yearly, instead of a quarter yearly payable annuity; or as if all the payments made in one year, on account of the principal of the debt, took place only at the end of the year, instead of being made, as will be the case, in the course of the year, and stopping the interest from the end of the quarter in which they may be made. The supposed extra cost of bills on Holland is at least partly covered by that difference, and cannot materially affect the general result.

If in the same manner be shown, that the same annual sum of \$7,300,000, applied to the payment of the principal and interest of the public debt, would, on the supposition that the whole of the six per cent. and deferred stocks may be redeemed at par, and that the whole of the three per cent. stock should be reimbursed at its nominal value, discharge the whole of the public debt in seven years and a half, after the year 1809, or within the year 1817.

The only part of the preceding estimates which is liable to any material error, is what relates to the probable annual revenue derived from the impost and from the sales of land. Should these prove to have been correct, it will result that the present revenues of the Union are sufficient to defray all the expenses, civil and military, of Government, to the extent authorized by existing laws; to meet all the engagements of the United States; and to discharge, within eight years, thirty-two millions of dollars of the principal, and, within fifteen years and a half, the whole of the public debt; that any increase of expense will, probably, either render an increase of taxes necessary, or retard the ultimate payment of the debt; and that any reduction in the present rate of expenditure may permit a reduction of the present taxes, or be the means of accelerating the redemption of the public debt.

All of which is most respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, 18th December, 1801.

Table of duties paid on Merchandise, imported in American vessels, in the United States.

Goods, wares, and merchandise, imported in the United States, unless free of duty, pay either duties according to their value, or specific duties according to their quantity.

I. Articles free of duty are—

All articles of American growth, produce, or manufacture, spirits excepted.

Bullion, copper, old pewter, tin, teutenague, wire, plaster of paris, saltpetre, sulphur, lapis caliminaris, dying drugs and woods, wood, wool, furs, raw hides, sea stores, wearing apparel, personal baggage, and implements of trade belonging to emigrants; philosophical apparatus imported for the use of seminaries of learning.

II. *Articles paying duties ad valorem*, pay either 20, 15, or 12½ per cent. on their respective value, which value is calculated by adding to their prime cost (all charges included) ten per cent. if imported from countries this side, and 20 per cent. if imported from countries beyond the Cape of Good Hope.

Articles paying twenty per cent. ad valorem are—

- Carriages, and parts of do.
Manufactures of glass, other than window glass, and black quart bottles.

Articles paying fifteen per cent. ad valorem are—

- 1st. All manufactures of metal,* earth and stone,† and leather,‡
All fruits and spices,
All painters' colors and medicinal drugs,§ } not otherwise enumerated.
2d. Cabinet wares, hair-powder, starch, and wafers; oil, anniseed, glue, essences, washes, perfumes, dentrifice and cosmetics; paperhanging, cartridge and sheathing paper; carpets, carpeting, floor cloths and mats; bonnets, hats, caps, gloves and mittens, and stockings; fringes and tassels for saddlers, upholsterers, and coachmakers; buttons, millinery, artificial flowers, feathers, ornament dresses, dolls, and fans.

Articles paying twelve and a half per cent. ad valorem.

- 1st. The following manufactures of metal, viz: anchors, locks, hinges, hoes, anvils, vises, and printing types.
2d. Gunpowder, black quart bottles, saddles and parts of do., whips and canes, toys, lampblack, parchment and vellum, clothing ready made.
3d. All wares, goods, and merchandise, not otherwise enumerated, consisting principally of manufactures of wool, cotton, silk, hemp and flax, and wood.

III. *Articles paying specific duties.*

(a.) From the annual importations are deducted the annual exportations, both of molasses and of domestic spirits distilled from molasses. See Statement B.

(b.) The non-enumerated wines paid 40 per cent. ad valorem, but not exceeding 30, nor less than 10 cents per gallon. The quantities which, by that regulation, paid precisely either 10 or 30 cents are ascertained. The quantities which paid the duty ad valorem, viz: from 10 to 30 cents per gallon, are estimated as having paid, on an average, 20 cents per gallon. This column shows, from the year 1793, those three kinds distinctly, from wines paying specific duties, viz: Madeira, Sherry, and St. Lucar; Burgundy and Champaign; Lisbon and Oporto; Teneriffe, Fayal, and Malaga. See Statement C.

(c.) From the annual importations are deducted not only the exportations of salt, but, also, the quantities which did not pay duties on account of the bounties upon the exportation of salted fish and provisions, and of the allowances to fisheries; the quantities thus deducted being calculated as if the bounties and allowances had been during the whole period at the same rate as established by the now existing laws. See Statement D.

(d.) Excess of exportations over importations.

TREASURY DEPARTMENT, Register's Office, December 12, 1801.

JOSEPH NOURSE, Register.

B.
Statement exhibiting the quantities of Molasses annually imported, of Domestic Spirits annually distilled from Molasses, and of both Molasses and Domestic Spirits distilled from Molasses, annually exported and consumed for each calendar year, from 1790 to 1800.

JOSEPH NOURSE, Register.

L.

A Statement exhibiting the value and quantities, respectively, of dutied articles, (consisting of the difference between articles paying duty imported, and those entitled to drawback re-exported) supposed to have been annually consumed during the three years, 1790—1792, and the six years, 1793—1798; and, also, the annual revenue, which, after deducting drawbacks, bounties, and allowances, would have accrued during each period, at the present rate of duties, drawbacks, bounties, and allowances.

	Quantities.		Average present rate of duty.	Amount of duties, at present rate.	
	1790 a 1792.	1793 a 1798.		1790 a 1792.	1793 a 1798.
Merchandise paying duties ad valorem, dollars,	19,310,801	27,051,440	13.1 pr. ct.*	\$2,530,000	\$3,543,000
Spirits, - - - - - gallons,	4,108,802	5,176,811	28½ cts.*	1,171,000	1,475,000
Molasses, - - - - - do.	5,423,122	3,822,351	5 cts.	271,000	191,000
Wines, - - - - - do.	1,091,478	2,164,346	35—33 cts.†	382,000	714,000
Teas, - - - - - pounds,	2,215,749	2,175,694	15*	332,000	326,000
Coffee, - - - - - do.	3,836,391	7,351,665	5	192,000	367,000
Sugar, - - - - - do.	22,379,370	36,149,665	2½‡	560,000	903,000
Salt, - - - - - bushels,	1,475,033	2,210,942	20	295,000	442,000
All other articles paying specific duties, per statement H, - - - - -	-	-	Various,	256,000	352,000
Extra duty of ten per cent. on the duties on goods imported in foreign vessels, (d) - - - - -	-	-	-	236,000	113,000
Extra duty arising from its not being returned as drawback, on re-exportation of such goods, (f) - - - - -	-	-	-	4,000	43,000
Two and a half per cent. detained on all drawbacks since 1st July, 1800, (e) - - - - -	-	-	-	3,000	86,000
Tonnage duties, per statement I, - - - - -	-	-	-	155,000	99,000
Passports and clearances, (g) - - - - -	-	-	-	6,000	9,000
Gross revenue, - - - - -	-	-	-	\$6,393,000	\$8,663,000
Deduct expenses of collection, at 3.62 per cent. - - - - -	-	-	-	231,000	313,000
Nett average annual revenue for each period, - - - - -	-	-	-	\$6,163,000	\$8,350,000

* Average duty deducted from statements E, F, G.

† Average duty, thirty-five cents per gallon, for the first, and thirty-three cents for the second period, deducted from statement C.; the average duty on wines being lower, during the last period, on account of the greater proportion of low priced wines imported.

‡ The white powdered sugars, which pay three and a half cents per pound, not being distinguished from brown, the average duty is stated only at two and a half cents per pound, the price paid by the last, which is something below the actual duty.

(d) Deducted from the proportion of foreign tonnage to the whole amount of tonnage employed in foreign trade, as per statement K, on a supposition that the value and quantities of goods imported in foreign vessels, were in proportion to the amount of tonnage of those vessels.

(e) Deducted from statement I; the drawbacks, which would have been paid at the present rate of duties, being supposed to bear the same proportion to the drawbacks actually paid; as the duties which would have been collected, according to this statement, at their present rate, bear to the duties actually accrued.

(f) Deducted from statements I and K, by combining the principles on which the two last items have been estimated.

(g) Deducted from statement I, for last period, and for the first from the amount of American tonnage, respectively employed in foreign trade, during each period.

No. 166.

[1st SESSION.]

INTERNAL REVENUES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 21, 1801.

TREASURY DEPARTMENT, *December 21, 1801.*

SIR:

I have the honor to transmit two statements relating to the internal revenues of the United States, accompanied with a letter from the commissioner of the revenue, explanatory thereof.

The statement marked A exhibits the names, official emoluments, and expenditures, of the officers employed in collecting the internal revenues of the United States, from the first of January, 1800, to the 31st of December following, and is rendered in pursuance of an act of Congress, passed on the 11th day of July, 1798.

The statement marked B exhibits the amount of duties upon domestic distilled spirits and on stills; the amount of duties upon sales at auction, refined sugar, carriages, and upon licences to retailers; and the amount of duties upon stamped vellum, parchment, and paper, and which have accrued from the first of January, 1800, to the 31st of December following, and is rendered in pursuance of the resolution of the House of Representatives, passed on the 6th day of January, 1797.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Revenue Office, December 21, 1801.*

SIR:

I have the honor to enclose two statements relating to the internal revenues of the United States, which have been prepared pursuant to a resolution of the House of Representatives, passed on the 6th day of January, 1797, and an act of Congress passed on the 11th day of July, 1798.

These statements exhibit the amount of duties upon *domestic distilled spirits and stills; sales at auction; refined sugar; carriages; retailers' licences, and stamps upon vellum, parchment, and paper*; also, the *official emoluments and expenditures* of the officers employed in collecting the same, for the year prior to the first day of January, 1801, as ascertained from abstracts rendered by the supervisors of the respective districts.

In order to show the progress of remittances, during the period for which these accounts are made up, I have annexed a note of the sums which were paid into the treasury, and covered by warrant, on account of the internal revenues, and on account of the direct tax, by the several supervisors.

I have the honor to be, with perfect respect, your obedient servant,

WILLIAM MILLER, Jr. *Commissioner of the Revenue.*

The Honorable the Secretary of the Treasury.

A.

Statement showing the number of each description of officers actually employed in each district, during the year 1800, the amount allowed by law for salaries, &c. and the emoluments and expenditures, during the year ending on the 31st December, 1800.

No. 167.

[1st Session.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 7, 1802.

TREASURY DEPARTMENT, January 5, 1802.

Sir:

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement, exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1798, 1799, and 1800.

I have the honor to be, very respectfully, sir, your most obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

Statement exhibiting the amount of Drawbacks paid on sundry articles exported from the United States, in the years 1798, 1799, and 1800, compared with the amount of duties collected on the same, respectively.

TREASURY DEPARTMENT, Register's Office, January 5, 1802.

JOSEPH NOURSE, Register.

7th CONGRESS.]

No. 168.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 25, 1802.

Mr. SAMUEL SMITH, from the Committee of Commerce and Manufactures, to whom was referred the petition of Lyon Lehman, made the following report:

That it appears to your committee, that the said Lyon Lehman, being a citizen of the United States, residing in the city of New York, did, in the month of October, 1799, import into the United States, 3500 rifles and carabines, without bayonets, and 287 pair of pistols.

That, at the time of the said importation, there existed in force an act of Congress, entitled "An act prohibiting, for a limited time, the exportation of arms and ammunition, and for encouraging the importation thereof," passed on the 14th of June, 1797, which was continued by a subsequent act, passed the 7th of April, 1798. That, by one of the provisions of the said act, "all mnskets and firelocks, with bayonets suited to the same," imported into the United States, during the continuance of the said act, were to be admitted duty free. And that, by another provision of the same act, it is declared "not to be lawful to export from the United States, any cannon, muskets, pistols, bayonets, swords," &c. but the exportation of all the aforesaid articles is, thereby, expressly prohibited.

It further appears to your committee that, by the construction given to the said act by the collector of the port of New York, the petitioner was compelled to pay the full duties on the importation of the said 3500 rifles and carabines, amounting to 1684 dollars, and was also obliged to enter into recognizance not to export the said rifles and carabines to any port out of the United States.

It further appears to your committee, that the petitioner, in the first instance, offered the said rifles and carabines to Government, at first cost and charges of importation, which, as appears from the letter of the then Secretary of War, was refused; that the petitioner afterwards made several attempts to dispose of his said rifles and carabines, at private sale; and in one of the said attempts incurred a loss of the whole expense of freight and insurance from New York to Charleston, and back again, amounting to one thousand and forty dollars; and that, finally, being distressed, and otherwise unable to make good the heavy expenses of the duties, freight, insurance, and storage of the said rifles and carabines, he was compelled to expose them to sale, at public vendue, in the city of New York, and thereby incurred an actual loss of fifty per cent. on the first cost of the said rifles and carabines, additional to his other losses thereupon.

Under a full view of all the circumstances, and considering the great loss and injury sustained by the petitioner, together with the doubtful construction of term, muskets, by which, under the act of Congress aforesaid, he was refused permission to export the said rifles and carabines, your committee are of opinion, that the prayer of the petitioner to be refunded the amount of duties which he paid on the importation of the said rifles and carabines ought to be granted.

Wherefore, your committee recommend to the House the following resolution:

Resolved, That the prayer of the petition of the said Lyon Lehman is reasonable, and that the said petitioner ought to be refunded the sum of one thousand six hundred and eighty-four dollars, being the amount of the duties he paid on the importation of 3500 rifles and carabines, and 287 pair of pistols, into the United States, in the year 1799.

7th CONGRESS.]

No. 169.

[1st SESSION.]

DUTY ON COAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 4, 1802.

Mr. RANDOLPH, from the Committee of Ways and Means, to whom was referred the petition of John Graham, and others, praying that an additional duty may be laid on foreign coal imported into the United States, made the following report:

That the object of the petitioners, as set forth in their petition, is not to enhance the price, but to increase the consumption of native coal, thereby enabling the petitioners, who are interested in the coal pits of Virginia, by enlarging their capital in trade, and by substituting machinery for manual labor, to afford an adequate, and eventually, cheaper supply to the increasing demand, within the United States, for the article in question.

The committee are of opinion that a compliance with the prayer of the petition, granting that it should not have the effect of enhancing the price of coal at the shipping yards at Richmond, would, by discouraging the importation from Europe, and the difficulty and price of freight coastwise, tend exorbitantly to increase the price of this necessary article, in the more distant parts of the United States, and, perhaps, entirely to deprive some portions of the Union of their accustomed supply.

The committee are likewise of opinion, that it is not consonant with the principles of a wise policy to lay duties, (not for the purpose of raising revenue to the Government) but to operate as a bounty on any particular species of labor, at the expense of the community in general, on whom the tax is levied. They, therefore, submit the following resolution:

Resolved, That the prayer of the petition ought not to be granted.

[1st Session.]

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 10, 1802.

Mr. SAMUEL SMITH, from the Committee of Commerce and Manufactures, to whom were referred the petitions of the manufacturers of gun powder, of hats, of types, of brushes, and of stone ware, made the following report:

That, in the opinion of your committee, such manufactures as are obviously capable of affording to the United States an adequate supply of their several and respective objects, ought to be promoted by the aid of Government. Two modes of administering this aid have presented themselves to your committee: The one, to permit, free of duty, the importation of such gross articles as are essential to those manufactures. The other, to impose higher duties on such articles (on importation) as can be supplied by our own citizens to advantage. That, at the present juncture, our infant manufactures peculiarly demand and merit the protection of Government. Exempt as the foreign manufactures will now be, from the charges of war freight and war insurance, the manufacturing interest of the United States will not be capable of entering into a competition with them on equal terms, without the friendly interposition of Government. The committee, therefore, recommend the following resolutions:

Resolved, That the following articles, (in addition to those already free) be admitted free of duty, on importation, viz: burr stones unwrought, bristles, regulus of antimony, saltpetre, sulphur, and rags.

Resolved, That it is expedient to impose a duty, in future, of twenty per cent. ad valorem on fur hats, brushes, stone ware, printing types, saddles, cannon, ball, glass bottles and glass ware of all kinds; on gun powder, five cents per pound; on glue, three cents per pound; on tarred cordage, two cents per pound; on untarred cordage, or yarns, two and a half cents per pound; on soap, three cents per pound; on candles of tallow, three cents per pound; on window glass, ten by twelve, or under, two dollars per hundred feet; on all above that size, three dollars per hundred feet; on anchors, two cents per pound; on spikes and bolts of iron, two cents per pound; on cut, slit, or rolled iron, one cent per pound.

Resolved, That in future there be imposed a duty, on importation from any foreign nation, of one dollar per barrel on all pickled fish, and one dollar per quintal on all dried fish.

7th CONGRESS.]

No. 171.

[1st Session.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 12, 1802.

Mr. SAMUEL SMITH, from the Committee on Commerce and Manufactures, to whom was referred the petition of Ebenezer Stevens, made the following report:

That your committee have carefully examined the papers submitted by the petitioner, and others, furnished from the Treasury Department, and find that the petitioner became possessed of an American ship called the *Bellona*, by a purchase made by his agent at Saint Jago de Cuba; that, on her arrival at New York, she was known to have belonged to certain merchants of that city; that the officers of the customs had just grounds to suspect that the said ship had been employed, by her former owner, in contravening the "Act to suspend the commercial intercourse between the United States and France, and the dependencies thereof;" that they had commenced their inquiry, and were fully satisfied of the fact, when the petitioner offered his aid and assistance in procuring the necessary proof.

That the said ship was libelled and condemned in the district court of New York; that she was sold by the marshal of the said district, for the sum of five thousand dollars, and that the half, due to the officers, had been distributed, and the other half paid into the treasury. The petitioner states that he was in nowise concerned in the act which contravened the law; that he was an innocent purchaser of a ship that had been fraudulently employed, and of which fraud his agent could have had no knowledge; that he had given every assistance in his power to prove the fraud had been committed; and, therefore, prays that the half of the proceeds paid into the treasury may be refunded to him.

The committee are of opinion, that a sale abroad, of a vessel abroad, which had incurred a forfeiture, ought not to release her from the penalty; and, therefore, recommend that the prayer of the petitioner ought not to be granted; and that he have leave to withdraw his papers.

[1st SESSION.

MINT.

COMMUNICATED TO CONGRESS, FEBRUARY 18, 1802.

Gentlemen of the Senate,
and of the House of Representatives:

I lay before both Houses of Congress, for their information, the report from the Director of the Mint now enclosed.
February 17th, 1802.

TH. JEFFERSON.

MINT OF THE UNITED STATES, January 1st, 1802.

SIR:

I have the honor of enclosing the annual report upon the present state of the mint, for the information of Government,

And am, very respectfully, your obedient humble servant,

ELIAS BOUDINOT.

The PRESIDENT of the United States.

MINT OF THE UNITED STATES, January 1st, 1802.

The Director of the Mint respectfully reports to the President, the amount of the coin issued from the mint of the United States, from the 31st day of December, 1800, to the 31st day of December, 1801, inclusive, as particularised in the following abstract:

GOLD COINS.

	Eagles.	Half Eagles	Dollars.	Totals.
Quarter ending 31st March, 1801, - - - - -	3,558	8,522	78,190	
Do. do. 30th June, do. - - - - -	2,931	10,725	82,935	
Do. do. 30th Sept. do. - - - - -	11,110	-	111,100	
Do. do. 31st Dec. do. - - - - -	11,655	6,759	150,345	
	29,254	26,006		\$422,570 00

SILVER COINS.

	Dollars.	Half Dollars	Dimes.	Half Dimes	Dollars Cts.	Totals.
Quarter ending 31st March, 1801, - - - - -	34,406	-	9,260	16,100	36,137 00	
Do. do. 30th June, do. - - - - -	8,500	-	-	-	8,500 00	
Do. do. 30th Sept. do. - - - - -	10,786	8,160	8,120	3,960	15,876 00	
Do. do. 31st Dec. do. - - - - -	762	22,129	17,260	13,850	14,245 00	
	54,454	30,289	34,640	33,910		\$74,758 00

COPPER COINS.

	Cents.	Dollars. Cts.	Totals.
Quarter ending 30th Sept., 1801, - - - - -	505,000	5,050 00	
Do. do. 31st Dec. do. - - - - -	857,837	8,578 37	
	1,362,837		\$13,628 37

Total amount of coins issued by the mint, from 1st January to the 31st of December, 1801, \$510,956 37

The Director esteems it his duty to mention that the greatest part of the gold bullion was received in ingots and lumps, imported from foreign ports, which, had it not been for the mint, would have been exported as remittances to Europe, but has now become an addition to the current coin of the United States.

It becomes necessary for the Director again to mention, that the amount of cents issued from the mint have long since exceeded the sum of 50,000 dollars, amounting now in the whole to \$93,019 19. The law requires that, after the expiration of six calendar months from the time when there shall have been paid into the Treasury, by the Director, in cents and half cents, a sum not less than \$50,000, which time shall, forthwith, be announced by the Treasurer of the United States, in at least two newspapers published at the seat of Government, no copper coin, whatever, except the cents and half cents, shall pass current in the United States. If this has been, heretofore, done, it has not come to the Director's knowledge.

All which is respectfully submitted to the President,

by his very obedient humble servant,

ELIAS BOUDINOT, Director of the Mint.

To the PRESIDENT of the United States.

7th CONGRESS.]

No. 173.

[1st Session.]

PROTECTING DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 18, 1802.

Mr. SAMUEL SMITH, from the Committee of Commerce and Manufactures, to whom was referred the petition of Thomas Wallace and others, citizens of Kentucky, praying that additional protecting duties may be laid on hemp, cordage, and sail duck, imported from foreign nations, made the following report:

That your committee have, in a former report, recommended additional duties on tarred and untarred cordage and yarns, so that the duty payable hereafter, may be two cents per pound on tarred, and two and a half cents per pound on untarred cordage. That the present duty on hemp is twenty-two dollars and forty cents per ton; on sail duck, twelve and a half per cent. ad valorem. That the duty on hemp is about twenty per cent. on its prime cost in Europe, which is equal to any protecting duty heretofore laid by law, or now recommended by your committee. The committee are apprehensive that the laying of higher duties on those articles would have a tendency to induce our ship owners to equip their ships in foreign countries, to the great injury of the petitioners, and such other citizens of the United States as may have engaged in the culture of hemp, or its manufacture into cordage or sail duck. The committee are, therefore, of opinion, that it would not be expedient to impose further duties on hemp or sail duck.

To the Honorable the Speaker and the other members of the House of Representatives in the Congress of the United States:

The petition of the subscribers, inhabitants of the State of Kentucky, humbly sheweth, that, in consequence of the termination of the war in Europe, (an event at which, however injurious to their interests, they can but rejoice) those articles which have, hitherto, been most usually exported from this State, flour and tobacco, have experienced the common fall in price, which has attended them throughout the continent. But this decrease is, perhaps, no where so sensibly felt in America, as in the Western country. While other parts of the Union are so situated as to be able to command the earliest information of the state of the market, and the best prevailing prices for their commodities, the people of the West are compelled to descend two of the longest, and one, for navigation, of the most difficult rivers in the Universe. And when they have overcome these natural obstacles, they have only gained, in point of commercial advantage, that position from which their Eastern brethren set out. But the expense and other obvious disadvantages, the consequences of their remote situation, burthen their flour and tobacco so much, that, when, at length, they reach the market, the nett sum produced (if a loss, but too often the case, is not sustained) illy rewards the toil of the husbandman, and the enterprise of the merchant. It becomes, therefore, necessary to abandon these unprofitable articles, and to resort to some other, more likely to give encouragement to industry and commerce. In doing this, your petitioners acknowledge the kindness of nature, which, though she has thought fit to remove us far from the ocean, has, nevertheless, bestowed other blessings upon us, which, under a wise Government, fully counterbalance this disadvantage. Hemp has, heretofore, formed a considerable object of attention to the cultivator. That article, however, neither in its raw nor manufactured state, has been exempted from the general effects of peace. And the citizens of this State, who have, hitherto, derived from the sales of it, great aid in enabling them to meet the demands of their Governments, will, henceforth, lose this valuable resource, without the interposition of Congress. Your petitioners beg leave to state, that their country, both as to soil and climate, is well adapted to the raising of hemp; sufficiently so, not only to supply the consumption of America, but to yield a surplus for foreign markets. But, whether from the effects of despotic governments, the cheapness of labor, a more improved cultivation, or a more bountiful soil, the Northern States in Europe are able to undersell us in the article of hemp. Your petitioners, therefore, pray that Congress will lay a duty on hemp, cordage, and sail duck, imported from abroad, adequate to prevent or lessen the importation of it, and to give encouragement to the husbandmen and manufacturers of our own country, the present duty being insufficient for those purposes. Your petitioners need not remark, that it has been the policy of all nations to give such a preference to the productions of their own countries, as might enable them to form a successful competition with those of foreigners. But, they cannot omit declaring, that, since the value of land depends upon the value of its produce, the lands both of Congress and individuals will be benefitted by the measure proposed, which will attract the attention and reward the industry of the cultivator, and demonstrate that the General Government is not more unmindful of the interests of their citizens, than the Governments of other countries.

[1st Session.]

DRAWBACK.

COMMUNICATED TO THE SENATE, FEBRUARY 19, 1802.

Mr. TRACY, from the committee to whom was referred the bill passed by the House of Representatives, entitled "An act to allow a drawback of duties on goods exported to New Orleans, and therein to amend the act, entitled "An act to regulate the collection of duties on imports and tonnage," made the following report:

That the original design of the laws of the United States for raising a revenue on importation, seems to be that of taxing consumption; and the system of drawbacks is, undoubtedly, meant to favor trade, by releasing from the payment of duties all goods exported for the want of consumers in this country.

In March, 1799, Congress revised the laws regulating the collection of duties on importation and tonnage; and as experience had taught that goods exported to ports or places within foreign dominions, which joined immediately to the United States, were easily returned into them, and consumed duty-free by our citizens, the law respecting drawbacks was altered so as to meet and remedy that evil.

The 75th section of that law is in the words following: "*And be it further enacted, That a drawback of duties, as prescribed by law, shall be allowed and paid on all goods, wares, or merchandise, imported into the United States, in respect to all such goods, wares, and merchandise, whereupon the duties have been paid or secured to be paid, as, within twelve calendar months after payment made or security given, shall be exported to any foreign port or place, other than the dominions of any foreign State immediately adjoining to the United States,*" &c. The words in italics were added in this revisal; by which it will be discerned, that New Orleans, being in the Spanish province of Louisiana, which immediately adjoins the United States, was clearly within the prohibiting words of the law, and that, of course, no drawback was to be allowed on any exportation to that port. For the purpose of giving time for a full understanding of this law, by a clause within it, it was not to go into operation till the first of July next following its passage, which was March 2d, leaving nearly four months for its promulgation.

At this time, and until the peace in Europe of 1801, there were extensive exportations from many of the ports in the United States to New Orleans: and from the 10th of July, 1799, to the 5th of February next following, there were about 240 debentures for drawbacks given by the collector of the port of New York, for duties paid or secured to be paid on goods exported to New Orleans, amounting to more than 60,000 dollars, of which somewhat more than 14,000 are paid, and the payment of the residue suspended by order of the Treasury Department.

The excuse of the collector for giving these debentures is, that, from pressure of business, he had not taken notice of the prohibitory clause of the new law, which began its operations on the first of July, and that his neglect is imputable to the removal of his principal and other clerks by the epidemic, which unhappily prevailed in New York, the latter part of the summer and autumn of that year.

There were, likewise, similar debentures given by the collector of Salem and Beverly, in Massachusetts, from October 29th, 1799, to February 3d next following, for the sum of about 2,500 dollars, nearly 1000 dollars of which is paid, and the payment of the residue suspended by order of the Treasury Department. Your committee are not informed of any particular causes for issuing these last mentioned debentures, but they suppose the officer had not paid attention to the alterations of the law.

This mistake, it is probable, has not occurred in any other ports, as the period of payment must have arrived before this time, and a discovery of them would have been made.

On the 5th of April, 1800, Congress passed an act allowing a drawback of duties on goods to be exported to New Orleans, after the 10th of said month of April, at the passage of which there was an attempt made to give the law a retrospective operation, to cover all exportations to New Orleans after the last day of June 1799, but it was refused by both Houses. Your committee have not been able to obtain correct information of the amount of exports from the several ports in the United States to New Orleans, during the time from July 1st 1799, to April 10th 1800; but it is well known it must be very considerable: none of the exporters of which, it is presumed, for the reasons mentioned above, received debentures for drawbacks, but those of New York and Salem and Beverly. Your committee are unable to distinguish, in point of principle, between the claims of those who exported in obedience to existing laws, without receiving debentures, and those who, by a mistake of the public officers, received debentures.

If payment of the debentures is allowed, the equity of the case in favor of those who did not receive debentures is strong, as their competitors in the market were allowed by the public, from 5 to 15 per cent. advantage over them, without any merit to entitle them to it, and entirely owing to a mistake and violation of the law by the public officers.

Upon these facts, the committee report the following amendment, to be inserted at the close of the bill, in a new section, viz:

SEC. 2. *And be it further enacted, That all persons who have exported goods, wares, or merchandise, to New Orleans, from any port in the United States, after the 30th day of June, 1799, and before the 11th day of April, 1800, and who would have been entitled to a drawback if their exportations had been made to any foreign port or place, other than the dominions of a foreign State, immediately adjoining the United States, upon proof of such exportation and actual delivery in New Orleans, shall receive from the proper officer of the port from which such exportation was made, a debenture or debentures for such drawback, for the same sums, respectively, and payable in the same time, after delivery, as the debentures would have been, had they been delivered at the time of such exportation: Provided, That such proof of exportation and delivery shall, in every case, be produced, as shall be satisfactory to the officer who shall issue the debenture; and when such proof shall be produced, such officer shall immediately transmit the whole proof, with his opinion thereon at large, to the Secretary of the Treasury, and if the proof shall, in the opinion of the Secretary of the Treasury, be satisfactory, and he shall so signify his opinion in writing to such officer, then he may, and is hereby authorized to, issue a debenture or debentures for drawback, as described above: And provided also, That all such proof shall be complete before such officer, within _____ after the passing of this act.*

7th CONGRESS.]

No. 175.

[1st SESSION.]

BALANCES DUE FROM STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 5, 1802.

Mr. THOMAS, from the Committee appointed to inquire into the expediency of extinguishing the claims of the United States, for certain balances, which, by the commissioners appointed to settle the accounts between the United States and the individual States, were reported to be due from several of the States, to the United States, made the following report:

That the following balances were, by the said commissioners, reported to be due from the States hereinafter mentioned, *to wit*: From the State of New York, two millions seventy-four thousand eight hundred and forty-six dollars; from the State of Pennsylvania, seventy-six thousand seven hundred and nine dollars; from the State of Delaware, six hundred and twelve thousand four hundred and twenty-eight dollars; from the State of Maryland, one hundred and fifty-one thousand six hundred and forty dollars; from the State of Virginia, one hundred thousand eight hundred and seventy-nine dollars; and from the State of North Carolina, five hundred and one thousand and eighty-two dollars.

[That, as none of these States has evinced a disposition to pay any part of those balances,] except the State of New York, who has been credited, on the books of the treasury, for two hundred and twenty-two thousand eight hundred and ten dollars and six cents, for money expended in erecting fortifications, pursuant to an act of Congress, passed the 15th of February, 1799; but, as it would be unequal to ask a further payment from that State, exclusively, and, as it does not appear that any measures of coercion can ever be resorted to, a further continuance of the demands against those States, the justice and equity of which they do not admit, will, in the opinion of the committee, answer no useful purpose; but, on the contrary, is calculated to occasion perpetual irritation and disquiet, as well to the creditor as to the debtor States.

The committee are, therefore, of opinion, that it is expedient to extinguish the claims of the United States for those balances, and for that purpose report a bill, which is herewith submitted.

[NOTE.—The words embraced by brackets were expunged by a subsequent report, and others substituted. See No. 178.]

7th CONGRESS.]

No. 176.

[1st SESSION.]

PROTECTING DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 8, 1802.

Mr. SAMUEL SMITH, from the Committee on Commerce and Manufactures, to whom were referred the memorials and petitions of sundry manufacturers of umbrellas, in the city of Philadelphia, and its vicinity, and of sundry manufacturers of paper, in the States of New Jersey, Pennsylvania, and Delaware, made the following report:

That your committee have already recommended that rags, being the gross article of which paper is made, should, in future, be imported free of duty; that this encouragement, added to the twelve and a half per cent. now imposed on the importation of foreign made paper, it is hoped, and expected, will be sufficient for the manufacture of that article.

The committee are of opinion that paper is the gross article made use of by our printers of all kinds. It would be extremely injurious to that useful branch, and inexpedient, to increase the duty on imported paper.

Your committee recommend that the duty, in future to be imposed on starch, may be three cents per pound; on hair powder, four cents per pound; and umbrellas, fifty cents each.

7th CONGRESS.]

No. 177.

[1st SESSION.]

INTERNAL DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 8, 1802.

Mr. RANDOLPH, from the Committee of Ways and Means, who were instructed to inquire into the expediency of repealing the laws laying duties on stills and domestic distilled spirits, on refined sugars, licences to retailers, sales at auction, pleasurable carriages, stamped vellum, parchment, and paper, and postage on newspapers, made the following report:

That the whole amount of revenue arising from those duties, exclusive of postage on newspapers, as appears by the statements laid before the House, by the Secretary of the Treasury, in the early stage of the session, did not exceed, for the year 1800, 925,000 dollars, after deducting the amount of drawbacks, paid on the exportation of domestic distilled spirits and refined sugar, during that year, which sum is chargeable with an expense of collection, equal to 137,000 dollars, exclusive of the expenses of the officers of inspectors of survey, which have been abolished.

The nett revenue arising from those duties may, therefore, be estimated at 792,000 dollars; but if from this sum be deducted the duties accruing on stamps, which, as, under the existing laws, they will cease to be collected after the fourth of March next, cannot be enumerated among the permanent internal duties, the whole nett revenue produced from those duties may be estimated at a sum not exceeding 710,000 dollars, chargeable with an expense of collection equal to 120,000 dollars. To produce, therefore, into the treasury, somewhat less than 600,000 dollars, an expense must be incurred more than equal to a fifth of that sum; and upwards of four hundred revenue officers, exclusive of the inspectors, must be maintained at the public charge. The continuance of a revenue drawn from the people on such terms, can, in the opinion of your committee, be justified only by an imperious necessity—a necessity which, in their estimation, does not at present, and is not, hereafter, likely to exist.

Of the proceeds of those duties, more than 500,000 dollars arise from the tax on distillation; 372,000 dollars of which are paid by 22,000 country stills, scattered over the immense territory of the United States: 65,000 other dollars are the product of 13,000 retailers' licences. These facts demonstrate the difficulty, and even the impossibility, of materially lessening the expenses of collection, so long as the subjects from which the revenue is to be drawn are so thinly dispersed over this widely extended country; and the annexed communication from the Commissioner of the Revenue will explain the deficiency which is likely to occur, on the most productive branches of those duties, unless provisions are adopted, which, by laying the tax on the quantity actually distilled, will require additional officers, to the augmentation of the present heavy charges of collection, and a multiplication of oaths, thereby lessening the security of that sanction, and endangering the public morals. The abolition of one class of these duties, by materially diminishing their product, without effecting, in the same degree, the expense of collection, would be a strong additional argument for the abrogation of all; and when it is recollected that some of those which it might be the most desirable to retain, are, even now, subjects of taxation in the several States, the committee perceive no substantial objection to releasing entirely to the States, objects of revenue, which to them may be equally desirable and productive; since, to them, the collection can be attended with little additional charge, and since, to the Federal Government exclusively belongs the most fruitful source of revenue which the Union affords. A wise policy, it is believed, will, therefore, induce the United States to abstain, wherever practicable, from exercising the right of taxation, on those subjects over which the individual States possess a concurrent right. Other reasons concur in producing an opinion favorable to the repeal of those duties. They consist—

1st. In the vexation and oppression of many of them, some of which are peculiarly obnoxious to our citizens.

2d. In the nature of excise, which is hostile to the genius of a free People.

3d. In their tendency to multiply offices, and increase the patronage of the Executive. This effect alone would forbid the retention of the internal taxes, and a reduction, to an equal amount, of the impost on articles of the first necessity: since, by that measure, not one of the host of officers employed in their collection would be reduced.

None of the foregoing considerations, however, could have induced your committee to recommend a repeal of these taxes, was it apprehended that, by the measure, the punctual compliance with the public engagements could be endangered. But, believing additional taxes to be unnecessary for defraying the annual charges of Government, at the present rate of expenditure, they conceive that a reduction of that expenditure will justify a proportionate reduction of the public burthens. A contrary doctrine would imply an urgent necessity for an increase of the existing taxes, should no retrenchment be made in the permanent public expenditure. By the annexed letter of the Secretary of War, it will appear that a sum exceeding 400,000 dollars will be saved on the army alone. By the estimate of the Secretary of the Navy, the expenditure for the current year is estimated at 200,000 dollars less than that of the year 1801. Of this sum, not more than six hundred thousand dollars are applicable to objects of permanent expense. It follows, therefore, that a sum exceeding the whole amount of the internal duties will be saved in the permanent expenditure of those two Departments alone, even should future circumstances compel us to keep up our armament in the Mediterranean.

On the subject of the postage on newspapers, the committee are of opinion that it would be unadvisable to take off that tax, inasmuch as it is insignificant in amount, and is the means of ensuring the safe delivery of newspapers to their respective subscribers.

From these various considerations, the committee respectfully submit the following bill, to repeal the laws laying duties on stills and domestic distilled spirits; on refined sugar; licenses to retailers; sales at auction; pleasurable carriages; and stamped vellum, parchment, and paper.

7th CONGRESS.]

No. 179.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 22, 1802.

Mr. SAMUEL SMITH, from the Committee of Commerce and Manufactures, to whom was referred the petition of John Holland, Jr. of Boston, made the following report:

That it appears, from the proofs submitted, that the petitioner arrived in the port of Boston, in the schooner Hannah, on Sunday, the twentieth of September, one thousand eight hundred and one; that on Monday, the twenty-first, he entered the said schooner at the custom house, being himself the owner and commander; that, on the night of the same day, his schooner caught fire below the cabin floor, and the fire increasing, the said schooner was scuttled, by order of the fire wards, and sunk; by which the cargo suffered great damage.

The petitioner, therefore, prays a remission of duty, on the said cargo, in proportion to the damage sustained.

The committee are of opinion that, as no part of the cargo had been landed, the prayer of the petitioner ought to be granted; and recommend the following resolution:

Resolved, That the collector of the customs for the port of Boston and Charlestown be, and he is hereby, authorized to have ascertained the rate of damage sustained by John Holland, Jr., on the goods which were on board the schooner Hannah, when she caught fire, and remit to the said John Holland, Jr., the duties, in proportion to the damage sustained by the goods damaged as aforesaid.

7th CONGRESS.]

No. 180.

[1st SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 24, 1802.

TREASURY DEPARTMENT, March 22, 1802.

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, of this date, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed on the second of April, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives of the United States.

TREASURY DEPARTMENT, Comptroller's Office, March 22d, 1802.

SIR:

The statements marked A, B, C, D, and E, which I now lay before you, have been prepared in obedience to the seventh section of an act of Congress, of the second of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." The Legislature will obtain from these statements all the information concerning the principal operations of the mint, which the settlements made at the treasury enable me to give.

I have the honor to be, sir, with great respect, your obedient servant,

JOHN STEELE.

The Hon. ALBERT GALLATIN, Esq.

A.

Statement of appropriations made by law for the Mint establishment, for the year 1800, with the amount of warrants drawn by the Secretary of the Treasury on said appropriations.

Amount of warrants drawn on the Treasurer in favor of the mint, for the services for the year 1800, \$30,981 43	Balance of the several appropriations made by law for the mint establishment, unexpended on the 1st January, 1800, - - - - - \$31,202 79
Amount carried to the surplus fund, on 31st December, 1799, not included in statement for that year, - - - - - 105 79	Acts respecting the mint, dated 27th May, 1796, and 24th April, 1800:
Balance unexpended on 1st January, 1801, 50,333 89	For amount of cents and half cents paid into the treasury in the year 1799, but not included in the statement for that year, - - - - - \$9,386 68

									1,953 03 06				
Balance, being the amount gained on copper coinage, -	-	495,248 08 15	135,896 75										
			19,234 43										
		495,248 08 15	155,131 18						495,248 08 15	155,131 18			

It will be observed, that the quantity of copper unaccounted for on this statement, is two hundred and sixteen pounds five ounces five pennyweights less than that exhibited by the former statement marked C, and is supposed to arise from the cents being lighter than seven pennyweights.

* Any part of this sum that may be recovered will be an addition to the gain on copper coinage.

† This amount includes the sum of two thousand and seventy dollars, being the value of cents and half cents which were on hand on the 31st of December, 1799.

D.

Ditto, ditto, for the year 1801, per statement B, now transmitted, -	54,699 10	
Add this sum paid at the treasury to T. Pinckney, being for so much advanced by him in London, to Albion Coxe, for the purchase of assay scales and weights, &c. -	154 44	54,853 54
Amount of wastage in the coinage of gold and silver, from the 1st of July, 1799, to the 31st of December, 1801, per statement now transmitted, marked D, -	7,009 39	
Deduct this sum, retained of deposites from the 1st of July, 1799, to the 31st of Dec. 1801, agreeably to the accounts of the mint, adjusted at the treasury, -	703 12	6,306 27
Total amount of wastage and of disbursements, to the 31st of Dec. 1801, -	- -	1298,465 84
Amount gained on the coinage of copper, from the commencement of the institution to the 31st of December, 1801, per statement now transmitted, marked C, -	19,234 43	
Deduct this sum, gained to the 31st of December, 1799, per statement marked C, which accompanied the Comptroller's report of the 25th of April, 1800, -	17,725 69	
Leaves this sum, as gain on such coinage, from the 1st of January, 1800, to the 31st of December, 1801, to be deducted, -	- -	1,508 74
Nett charge on the coinage of gold, silver, and copper, to the 31st of December, 1801, including the cost of copper purchased for coinage, lots, buildings, machinery, &c. -	- -	<u>\$296,957 10</u>

7th CONGRESS.]

No. 181.

[1st SESSION.

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 30TH OF MARCH, 1802.

To the Honorable the Representatives of the United States, in Congress assembled, the memorial of a large number of citizens, from the counties of Morris, Sussex, and Bergen, in the State of New Jersey, who are concerned in the manufacturing of bar, cast iron, rolled iron, nail rods, and nails, humbly sheweth:

That, at a meeting held by them at Morristown, in the county of Morris, on the 17th day of March, 1802, John Cobb, Esq. was chosen chairman, and Silas Dickerson, secretary. Your memorialists then thought it expedient to make known to you the situation in which they find themselves placed, in regard to prosecuting these branches of manufactures, since the late establishment of peace in Europe, many of whom, with a view to render those manufactures a permanent source of wealth and independence to this country, and a profitable employment to themselves, have recently purchased large tracts of woodland, as necessary appendages thereto, at high prices, under an expectation that our Government, following (in this instance) the policy of European nations, would extend a fostering hand, not only to this, but to all other manufactories of our country; that, since that event, so favorable to humanity, such large quantities of foreign bar iron have been imported, as to cause a serious decline in the prices of our own.

Under these discouragements, we presume to look with confidence to our Government, as the only source from whence we can hope for relief. As our country abounds with many yet unimproved sites for those manufactories, large forests of timber, and inexhaustible mines of (perhaps) the best iron ore in the world, which, in our opinion, if protected by such additional duties on foreign iron, as would tend, in a measure, to discourage future importations, would enable us to progress in those branches with renewed vigor, and, thereby, enable the United States, not only

to supply themselves, at present, but, shortly, to furnish large quantities for exportation, and prevent the necessity of sending, annually, large sums of money to countries from whence it never returns, for the purchase of such articles as, with proper encouragement, we could more than supply ourselves.

We have taken the liberty to accompany this with an estimate of the number of furnaces, forges, rolling and slitting mills, in this State, which, on examining, we presume, you will find nearly correct; in which we have likewise stated the probable quantity of iron annually manufactured into nails.

Your memorialists, therefore, request your honorable body will take the foregoing into consideration, and afford such encouragement in the premises, by increasing the duties on imported iron, as, in your better wisdom, you may think most proper.

Signed in behalf of the meeting.

Attest, SILAS DICKERSON, *Secretary.*

JOHN COBB, *Chairman.*

ESTIMATE.

In the State of New Jersey, there are, at least, one hundred and fifty forges now actually carried on, which, on a moderate calculation, will produce twenty tons of bar iron, each annually amounting to three thousand tons. There are, also, seven blast furnaces now carried on, which yield, on an average, five hundred tons each, annually, amounting to thirty-five hundred tons. There are, likewise, six other blast furnaces, in good situations, which are not at present carried on, besides many situations unimproved, equal to any in the State. There are, also, a great number of forges, and situations for forges, in the like condition. About one hundred and twenty of the above mentioned forges are in the counties of Morris, Sussex, and Bergen, besides three blast furnaces, all of which are actually going. The State of New Jersey, on a moderate calculation, is capable of furnishing, annually, five thousand tons of bar iron, and seven thousand tons of cast iron. There are four rolling and slitting mills, which roll and slit, on an average, each, two hundred tons, one half of which is manufactured into nails.

The above estimate is made with as much accuracy as in our power, from the best information we have been able to obtain.

Attest, SILAS DICKERSON, *Secretary.*

JOHN COBB, *Chairman.*

[1st Session.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 2, 1802,

With a bill to repeal so much of the acts, the one, entitled "An act establishing a Mint, and regulating the coins of the United States;" and the other, an act, entitled "An act supplementary to the act establishing a Mint, and regulating the coins of the United States," as relates to the establishment of the Mint.

TREASURY DEPARTMENT, *March 9th, 1802.*

SIR:

I have the honor to enclose copies of two letters on the subject of the mint, and to be, with great respect,
Sir, your most obedient servant,

ALBERT GALLATIN.

Hon. Mr. GILES, *Chairman, &c.*

PHILADELPHIA, *February 27th, 1802.*

SIR:

In answer to your letter which I had the honor of receiving by this day's post, I must inform you, that, having met with great difficulties the two last years, in obtaining a full supply of copper, from various causes attending the means of payment, I wrote to Mr. Boueton, early in the Fall, to send me out, by the first Spring ships, from 20 to 25 tons of planchettes, and to repeat it every Spring and Fall, promising to make my remittances, during the winter, for the next shipment. There will be due him on such shipment, about twelve or fifteen thousand dollars, which I am striving to provide for, by finishing the cents as fast as possible.

This contract is obligatory on us, and must be paid for; but I shall be able to prevent any further shipment, at any time before the first of May, by which, I hope, we shall know the mind of the Legislature on the subject of the mint.

We have near twenty tons of planchettes on hand, and which will keep us employed during the winter, but the expected shipment will remain for the summer's work, if the coinage of copper is continued.

I shall, therefore, expect your warrant, as requested, and shall push the finishing the planchettes on hand, as fast as possible, to make good the residue of the payment.

As to importing the cents complete from Europe, it can certainly be done for a trifling sum above the price of the planchettes, say about £20 sterling per ton, did the policy of Government admit of it. Of this, I would not venture to determine, the Legislature, alone, being competent to that purpose. I once stated it to a committee of both Houses, but they determined that it would be a dangerous measure, and would not hearken to it.

An importation of cents, complete, would not diminish the security of having good copper, but it would hazard the running of a flood of cents, lighter than allowed by law, into the United States, and the difficulty of preventing the evil would be very great. It would be a greater security to Government to have the coinage of copper executed here by contract, which might be done without expense to the Union, provided Government would take the cents.

I have the honor to be, with great respect, sir, your obedient humble servant,

ELIAS BOUDINOT.

The Hon. the Secretary of the Treasury, Washington.

MINT, PHILADELPHIA, *March 4th, 1802.*

SIR:

The probability of the abolition of the mint establishment, induces me, thus early, to state to you, that, if the Legislature should not be disposed altogether to abandon the copper coinage, or might be willing, after repealing the laws establishing the mint, to allow of a copper coinage, provided it may be done without any expense to the public, I would solicit your interests and influence to promote a proposition of that kind, which I do not presume on, only so far as you may deem it to consist with the public good; in connexion with which, I flatter myself you will not be wanting, independent of any other claim I may have, or pretension to public patronage.

However, I need not omit informing you, that, on the first establishment of the mint, I relinquished a profession, at least equally productive and beneficial as that of the engraver's place in the mint, which I have filled, and I believe without reproach, ever since; by the loss of which, I shall be left without resource, being so long out of the

practice of my former profession, that I feel an incapacity to prosecute it with any more effect. I, therefore, submit the following proposition to your consideration, to the consideration of Congress, or to the Department where it may properly belong:

That I may be vested with the exclusive privilege, according to law, of coining cents of the United States, as well from abroad as within the realm, under such restrictions and provisions, either with respect to time or quantity, as Congress, in their wisdom, may deem proper; that the cents shall be of the present weight and quality, and that they shall be coined free of all expense to Government, excepting that of receiving them when coined, and paying the nominal amount.

Should the above propositions meet with your approbation or otherwise, I should still be happy to know your determination to forward them or not; if the former, I would beg to know the most proper mode of introducing it to Congress, whether by petition, and how conceived, or otherwise.

I am, sir, with the highest respect, your most obedient servant.

ROBERT SCOT.

ALBERT GALLATIN, Esq. *Secretary of the Treasury,*
City of Washington,

TREASURY DEPARTMENT, *March 26th, 1802.*

SIR:

I have the honor to enclose a letter received from the Director of the Mint, and to be, with perfect respect, sir, your most obedient servant,

ALBERT GALLATIN.

Hon. Mr. GILES, *Chairman of the Committee on the subject of the Mint.*

MINT OF THE UNITED STATES, *Philadelphia, March 22, 1802.*

SIR:

I am honored with your letter of the 10th instant, and hasten to give you the best answer that I can, with regard to the real and personal estate of the mint establishment, &c. This consists of—

Two lots on Seventh street, between Market and Arch streets, 20 feet each on Seventh street, and extending back about 100 feet, with a dwelling house on the north lot, and a shell of a house on the south lot, which last lot widens on the rear to about 60 feet, on which the stable stands. These lots pay a ground rent of \$27 50 per annum.

A lot on Sugar alley, at the rear of the above, 20 feet front on the alley, and about 100 feet deep.

A frame building, improved for a large furnace, in the commons at the north end of Sixth street, of little value, the ground being merely loaned to us.

As to personal estate, this consists wholly of the copper planchettes on hand, amounting to about 22 tons.

Three horses, good for little but for the use of the mint. The machinery of the mint, of no value but for the use of the mint.

Five striking presses with machinery.

Three cutting presses.

One milling machine.

Five pair of rollers, great and small.

One drawing machine.

Three pair of smith's bellows.

A set of blacksmith's tools.

A large number of hubs and dies, on hand, of different denominations.

Carpenter's tools.

Seven stoves.

One turning lathe.

Six scale beams, scales, and weights.

Two sets assay scales, and sundry adjusting scales.

Furniture in the clerk's rooms.

Various implements used in the several departments.

About 2,000 bushels of charcoals.

Engraver's tools, pots, bottles, &c.; an old horse, cart, and gears.

About 2,000 fire brick; a considerable quantity of old iron.

It is impossible to ascertain the value of these articles, as most of them are of but little consequence, except for the use of the mint, or to persons who may intend to put them to the like uses; and if sold at public sale, probably will not bring half their real value. The machinery of the mint may last a year longer, with small repair, but, after that, will cost about three hundred dollars, to put it in good repair. The horses may, also, last another year, but must then, at farthest, be replaced by others.

If it should be thought best to continue the mint, the establishment should be rendered permanent, and the machinery should be moved by steam instead of horses, which would, in some measure, reduce the annual expenses of labor, as almost the whole of it could be carried on with the same original force. Our lots are much too small, by which we are greatly cramped as to room. They are now very valuable, being in the heart of the city; their price would purchase a very advantageous lot in a less public place, and buildings might be now planned, so as to reduce the expenses of a mint. But I am perfectly satisfied, that no modification of the mint could be contrived to lessen them below seventeen or eighteen thousand dollars per annum; though if a larger quantity of bullion could, by any means, be provided, a greater quantity of coin could be annually made with the same expense, although I am, individually, of opinion, that its present issue, of about five hundred thousand dollars annually, in addition to the current coin of the Union, is sufficient for the present welfare of the United States.

It is the absolute necessity of strict and regular checks, throughout the whole establishment, that makes the expense of the mint so great, and this cannot be dispensed with, under any modification that can be proposed. I verily believe, that, under no given circumstance, can the necessary coin of the United States be produced with safety to the Government, at a much less expense than it is at present; and I believe, that, in the consideration of the subject, it would not be safe to estimate the expense, at any rate, much under twenty thousand dollars.

In the above estimate of expenses, it should be remembered that the copper cents may produce a profit of five thousand dollars per annum, that ought to be credited against the expenditures of the mint in future, which reduces the amount considerably.

I have the honor to be, very respectfully, sir, your obedient humble servant,

ELIAS BOUDINOT, *Director.*

The Hon. the Secretary of the Treasury, Washington.

Two gentlemen, in Philadelphia, of respectable character, have requested me to submit the following propositions on the subject of the mint.

They will engage to coin on the following terms, and will give ample security for the performance of the contract:

Copper for the difference in weight,	} on the value.
Small silver for three per cent.	
Dollars for two and a half,	
Gold for one and a half,	

Provided, the United States will give them such part of the present machinery, belonging to the mint, as they may want, with the use of the building.

No. 183.

[1st Session.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 2, 1802.

Mr. RANDOLPH, from the Committee of Ways and Means, who were instructed to "inquire into the expediency or inexpediency of authorizing the Secretary of the Treasury to remit the duties, in all cases, which have accrued, or may accrue on spirits distilled, and on stills, within the United States, upon satisfactory proof being made to the said Secretary, that such stills, or distilling materials, have been accidentally destroyed by fire, rendered useless by an inundation of water, or other unavoidable casualty," made the following report:

That, in a variety of individual cases, the principle has been settled, that the Government ought not to become the ensurer of any person: That the adoption of a contrary doctrine, should it be extended to commercial cases, might prove infinitely dangerous to the revenue of the United States. The Committee, therefore, respectfully recommend the adoption of the following resolution:

Resolved, That it is inexpedient to authorize the remission of the duties which have accrued, or may accrue, on distillation, in any case whatever.

7th CONGRESS.]

No. 184.

[1st Session.]

PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 9, 1802.

Mr. RANDOLPH made the following report:

The Committee of Ways and Means having taken into consideration the subject of the public debt, and the provisions requisite for effecting its ultimate redemption, thereupon respectfully report:

The propriety of pursuing efficient measures for the final extinguishment of the public debt, is a position too obviously true, in the opinion of your committee, to require any illustration from them. The unexampled prosperity of our country, the flourishing state of our finances, and the restoration of peace among the European Powers, all contribute to render the present period peculiarly auspicious to this important undertaking. Should, however, the United States neglect to avail themselves of a peace which promises to be of no short duration, if the length and destructive effects of the preceding war, form any criterion by which to estimate the time necessary to invigorate the exhausted belligerent parties; should a season of great and increasing financial prosperity be suffered to pass away without a vigorous exertion to exonerate the Union from its present incumbrances, every hope may be conceded that a nation shall ever be found to discharge the principal of a debt which she has once funded: and the United States must rest content to encounter, with embarrassed resources, any emergency which may, hereafter, arise. A just confidence is, however, entertained, that every description of persons, as well those who advocate extensive war-like establishments, as those who are desirous of lessening the public contribution, will unite in support of a measure, which, by liberating the revenues of the Union from their present heavy incumbrances, can alone enable its Government to launch into expensive naval preparations, or to reduce the duties on imports.

That no effectual provision for the final redemption of the whole present debt of the United States does, at this time, exist, a recurrence to the letter of the Secretary of the Treasury, hereunto annexed, will readily demonstrate. To the measures which have already been adopted in relation to this subject, their complexity forms an objection inferior only to their insufficiency. To establish a plan as simple as the nature of the existing system, on which it is necessarily engrafted, will permit, and altogether adequate in its operation, has been the design of the committee. To appropriate, permanently, so much of the annual revenue as may be requisite, appeared the only measure calculated to effect this last and principal purpose. This sum does not exceed the probable excess of the annual receipts beyond the current expenditure of the Government. In making the necessary appropriation to the sinking fund, instead of leaving to it only such surplus as the Government might not choose to employ on any other object, an adherence to economy is secured, whilst the resources of the country to meet any extraordinary emergency, remain unimpaired. Nothing less than the regular operation of a permanent system, can induce the rational expectation that the debt will ever be extinguished. Care, at the same time, has been taken, that such portion of the sum appropriated as the commissioners may be unable annually to apply to the redemption of the debt, shall be returned into the public treasury. Various other provisions have also been adopted, for an explanation of which, the committee beg leave to refer to the annexed letter of the head of that Department; and to submit the following bill, making provision for the redemption of the whole public debt of the United States.

TREASURY DEPARTMENT, *March 31st*, 1802.

SIR:

In compliance with your letter of the 18th instant, requesting that a precise statement of the existing provisions for the redemption of the public debt should be prepared and transmitted to you, I beg leave to submit the following details, and to suggest, at the same time, in what respect it seems necessary to explain or to reinforce those provisions.

I. The funds appropriated for the redemption of the debt, are,

1st. So much of the duties on tonnage and merchandise (and spirits and stills) as shall be equal to the interest annually accruing on the principal of any part of the public debt, which has been, or, from time to time, may be discharged, by payment, purchase, or any other means.

2d. So much of the same duties as, together with the preceding item, shall be equal to the payment of the eight per cent. annuity on the six per cent. stock, until the final redemption of said stock in the year 1818; after which redemption, this appropriation shall cease; and the appropriation described by the preceding item, including therein, the interest on the whole amount of six per cent. stock thus redeemed, shall, thereafter, be applicable to the redemption or purchase of any other part of the public debt, existing on the 3d March, 1795; (including any loans since contracted for the reimbursement of any part of the same) which may remain unpaid at that time.

3d. The dividends on the shares in the Bank of the United States, owned by the United States, now released by the payment of the subscription two millions loan from the appropriation of that object.

4th. So much of the duties aforesaid, as, together with the said dividends, shall be equal to the payment of the eight per cent. annuity on the deferred stock, until the final redemption of the said stock in 1824; after which redemption, this appropriation shall cease, and only so much of the said duties as shall be equal to the interest on the deferred stock thus redeemed, shall remain appropriated, and be applicable to the same objects as the amount of interest on the other public debts redeemed, heretofore mentioned.

5th. The nett proceeds of the sales of the Western lands.

6th. The amount of moneys received in the treasury, on account of debts due to the United States, by reason of any matter prior to the present constitution.

7th. The surplus of revenue to the end of the year 1790, specially appropriated to the purchase of the debt.

8th. All surplusses of the revenues of the United States, which shall remain, at the end of any calendar year, beyond the amount of the appropriations charged upon the said revenues, and which, during the session of Congress next thereafter, shall not be otherwise specially appropriated or reserved by law.

All the moneys accruing by virtue of the preceding provisions, are vested, in trust, in the commissioners of the sinking fund, to be applied, according to the provisions hereafter stated, to the reimbursement and redemption of the public debt, until the whole of the debt existing on the 3d March, 1795, including loans thereafter made for redeeming or reimbursing the said debt, shall be discharged; and the faith of the United States is pledged, that the said moneys or funds shall thus remain, inviolably vested and appropriated, until the said redemption or reimbursement shall have been effected: Provided, however, that if, after the whole of the other species of the said debt shall have been redeemed, any part of the three per cent. stock shall remain unredeemed, Congress may, nevertheless, divert the said funds to other purposes. Exclusively of the preceding provisions, the commissioners of the sinking fund are further authorized to raise money in the following manner:

1st. By borrowing, with the approbation of the President of the United States, at an interest not exceeding six per cent. and to be reimbursed at the will of the United States, any sums requisite for the payment of any instalments, or parts of the public debt, which may become due.

2d. By borrowing, with the same approbation, a sum not exceeding five millions of dollars, at a rate not exceeding six per cent., irredeemable till after the year 1819; and selling not more than one half of such six per cent. stock below par; the proceeds to be applied to the payment either of any part of the debt, due to the Bank of the United States, and which was demandable before or during the year 1796, or of any instalment of the foreign debt.

3d. By selling, instead of effecting the preceding loan, so many of the shares of the Bank of the United States as they may think proper, to be applied as aforesaid.

In addition to the preceding funds, the following appropriations have been made, but the moneys arising from the same have not been specially vested in the commissioners, nor the faith of the United States pledged that the appropriation should not be changed, viz:

1st. The additional duties laid by the act, entitled "An act for raising a further sum of money by additional duties on certain articles imported, and for other purposes," passed 3d March, 1797, are solely appropriated—first, for the payment of the principal of the then existing foreign debt; secondly, for the payment of the principal of the debt then due by the United States to the Bank of the United States.

2d. So much of the duties on tonnage and merchandise, as may be necessary, is appropriated for the payment of the loans obtained from the Bank of the United States.

3d. So much of the surplus of the duties on tonnage and merchandise, beyond the permanent appropriations, as may be necessary, is appropriated for discharging the two eight per cent. loans, authorized by the laws of July 16th, 1798, and of May 7th, 1800, according to the terms and conditions of such loans.

4th. The additional duties laid by the act, entitled "An act to lay additional duties on certain articles imported," passed 13th May, 1800, are solely appropriated for the discharge of the interest and principal of the debts of the United States, theretofore contracted, or to be contracted during the year 1800.

Finally, in relation to the interest on any part of the public debt, other than the six per cent. and deferred stock, as much of the duties on tonnage and merchandise as may be necessary, is appropriated, and the commissioners of the sinking fund are authorized to borrow, annually, with the approbation of the President of the United States, one million of dollars, at a rate not exceeding six per cent. and to be reimbursed within one year from the time of each loan, in anticipation of the said duties, to be applied to the payment of the interest on the public debt.

II. *Of the manner of applying the moneys appropriated.*

So far as relates to funds vested in the commissioners of the sinking fund, the law contains two distinct provisions; one, specifying the funds vested in the manner already stated; the other designating, and, in one instance, absolutely directing the manner in which the funds thus vested shall be applied: and in this the law is similar to all others which relate to the expenditure of public money, and which must also include the two distinct provisions, of authorizing the expense, and of appropriating the money necessary to defray the same. The preceding provisions are only appropriation clauses, designating, and, in relation to the sinking fund, vesting certain funds applicable to the payment of the debt. The manner in which the funds vested in the commissioners of the sinking fund shall be applied, is provided as followeth. They are directed—

1st. To pay, annually, the eight per cent. annuity on the six per cent. and deferred stocks; and in this respect, no discretion is left with them—the injunction being absolute.

2d. To cause to be applied all such surplus of the sinking fund as may at any time exist, after paying the said annuity, towards the further redemption or purchase of the debt of the United States, existing on the 3d March, 1795, including loans for the reimbursement thereof, until the said debt shall be completely reimbursed or redeemed. And the application of this surplus is left to their discretion, provided that the purchases thus to be made, shall be at the lowest price, either by open purchases, or by receiving sealed proposals; and shall not be made at a higher rate than the market price, or value of the debt.

So far as relates to the appropriations not vested in the sinking fund, no provision, other than what results from the appropriations themselves, has been made, directing or even authorizing the application of the moneys appropriated, or, in other words, authorizing the expense. The only exception is that of the additional duties of 1797, in relation to which, the provision that they shall be *solely* appropriated for a certain object, may be considered as an injunction to apply their amount, if it can be ascertained, to that object; and a difficulty would even arise, as to the manner in which that amount could be applied. The law of 3d March, 1795, having provided that all payments of the principal of the debt shall be made under the direction of the commissioners of the sinking fund; and that which appropriates those additional duties, having omitted to vest their proceeds in the said commissioners.

III. *Operation of the preceding provisions.*

1st. The effect of the four first appropriations in favor of the commissioners of the sinking fund, is, at present, simply an annual payment out of the duties on tonnage and merchandise, of a sum, which, together with the bank dividends, shall be equal to the eight per cent. annuity on the six per cent. and deferred stocks, for the discharge of the said annuity; and those provisions will continue to operate only in that manner until after the redemption of the six per cent. stock in 1818, or, until after the whole amount of interest accruing on the principal of public debt discharged, other than the six per cent. and deferred stocks, shall exceed the amount of the eight per cent. annuity on the six per cent. stock. In the last case, so much of the duties on tonnage and merchandise as shall be equal to the surplus of such interest beyond the said annuity, and, after the redemption of the six per cent. stock, in 1818, the whole of the interest accruing on the debt thus discharged, including therein the said six per cent. stock, shall be applicable to the discharge of any other part of the public debt, existing on the 3d March, 1795, which shall then remain unpaid. But those two events are too remote to be now taken into consideration. The eight per cent. annuity on the deferred and six per cent. stocks, to be thus paid annually, amounts to 3,350,362 dollars and 1 cent; of which, 70,040 dollars, at the rate of eight per cent. dividend on the bank shares, are paid out of the said dividends; and the balance of 3,280,022 dollars and 1 cent, out of the duties on tonnage and merchandise.

2d. The proceeds of the sales of lands, and of old debts recovered, the amount of which is uncertain, and has been estimated as yielding on an average of the eight succeeding years, an annual sum of 400,000 dollars, must be annually applied to the payment or purchase of any part of the public debt, excepting only the eight per cent. loans

and navy six per cent. stocks, neither of which existed at the time of passing, or is embraced by the provisions of the law of 3d March, 1795; and, under present circumstances, these proceeds will naturally be applied to the reimbursement of the Dutch debt, so far as they can operate towards that object; but, as the instalments due on that debt, amount annually for this and the five ensuing years, to a sum which varies from 920,000 to 2,220,000 dollars, and which averages, for each of the said six years, almost 1,600,000 dollars a year, it is evident that that appropriation is inadequate for that object.

From thence it results that, for the faithful discharge of about three-fourths of the Dutch debt, no other provision is made, exclusively of the authorities to borrow or to sell bank shares, except that which may result from the surplusses of revenue, or from the additional duties laid by the act of 3d March, 1797; that no provision, until the Dutch debt shall have been discharged, nor, after its payment, any other but the above mentioned proceeds of lands and old debts, is made for the purchase and redemption of any other of the debts existing on the 3d March, 1795, or embraced by its provisions, (and which consist of the five and half, four and half, three, and 1796 six per cent. stocks) except the above mentioned surplusses of revenue; and that, for the redemption of the two eight per cent. loans, and navy six per cent. stocks, no efficient provision has been made; the general appropriation of the acts authorizing the two eight per cent. loans, being discretionary and not imperative; and that of the act of the 13th May, 1800, being rendered nugatory so far as relates to the principal, by being applicable to the payment of any part of the interest of the public debt.

3d. The amount of the sums which, by virtue of the appropriation of the surplusses of revenue, should vest in the commissioners of the sinking fund, has never yet been ascertained; and several difficulties occur in attempting to determine the true construction of the law, by which to fix that amount. It is uncertain whether, by the law of the 3d March, 1795, the surplusses of the years preceding that year are vested; whether it was intended, by that law, to vest in the sinking fund the surplus of each calendar year, in which such surplus did exist, without making any deduction for the years where the appropriations exceeded the revenue, or, only the real aggregate amount of surplusses, deducting the deficiencies for those years, from the surplusses of revenue for the years where the same did exist; whether the proceeds of loans should be included in the revenue; and whether the payments on account of the principal of the debt should be charged to that revenue. It does not appear that an uniform construction has prevailed in this department in relation to the two last points. Taking, however, the accounts as they now stand on the treasury books, and which, until a minute investigation shall have taken place, are the only evidences of those surplusses, it appears by the statement A, hereunto annexed, that, instead of a surplus, those books exhibit a deficiency of 930,128 dollars and 64 cents, on the aggregate revenue, from the establishment of the present Government to the close of the year 1799, resulting from the appropriations charged to the revenue, having, during that period, exceeded, by that sum, the total amount of revenue, whether collected or outstanding, as it stands entered on those books. From that very result, I am strongly inclined to suspect that some entries have been made or omitted, on erroneous principles; but, it is not less evident that, for the present, this appropriation of surplusses cannot be resorted to, in order to cover the deficiency stated in the preceding item.

4th. The proceeds of the additional duties laid in March, 1797, the only remaining resource for that object, not only are not by law vested in the sinking fund, but no steps whatever have yet been taken to ascertain their annual amount; and, although it may be practicable, hereafter, to do it, so far as they consist of specific duties, the amount of that part which consists of a two and a half per cent. additional duty on certain cotton goods, specified in the law, could not, without a total alteration in the manner in which duties are ascertained, by the officers of customs, be distinguished from the proceeds of the duties on other goods paying the same rate of duty ad valorem. The total amount, however, even if it could be ascertained, cannot be estimated at a greater annual sum than \$500,000, and this, added to the proceeds of lands and old debts, would fall far short of the sum annually wanted to pay the instalments of the Dutch debt. Those instalments have, heretofore, been paid out of the duties on tonnage and merchandise, generally, and charged to the revenue of the year in which they were paid, without paying any attention to the complex and inefficient provision made by law. It does not require any comment to prove, that provisions which leave no option between an irregular and unauthorized mode of payment, and a failure in the public engagements, are eminently defective.

The appropriations made subsequent to the 3d of March, 1795, which are not vested in the commissioners of the sinking fund, are also liable to the general objection, that, for want of that investiture, and not being made in the nature of a contract with the creditors, they are not permanently inviolable, but, like any other ordinary law, may, without any breach of faith, be repealed at the will of the Legislature, and afford, therefore, no security for the eventual discharge of the debt. The appropriation of the surplusses of the revenue, though vested in the commissioners of the sinking fund, is substantially liable to the same objection: for, as only the surplus of revenue, beyond all the appropriations charged to the same, is applicable to the payment of the debt, nothing more is necessary to defeat that provision, than large appropriations for other objects.

Not only are those provisions for the public debt difficult to be executed, uncertain in their amount, dependent on the will of the Legislature, and, at all events, inadequate to the object; but, it is ultimately a matter of discretion with the Secretary of the Treasury, to carry them into effect, even in the case of surplusses ascertained and vested in the sinking fund.

All payments must be made out of moneys in the treasury. An appropriation authorizing and directing the annual payment of a certain sum, as in the case of the eight per cent. annuity, on the six per cent. and deferred stocks, must be satisfied each year out of those moneys. An appropriation, designating, for a certain object, all moneys arising from a certain source, as in the case of the proceeds of the Western lands, and of old debts, is equally efficient, as those moneys cannot be applied to any other object. But the other appropriations for the redemption of the public debt, are neither accompanied with an imperative clause directing their application, nor, the 1797 additional duties excepted, bottomed on a distinct source of revenue, solely applicable to that object; and they rest, in common with all the appropriations for the civil, military, and naval expenses of Government, partly on moneys in the treasury, and principally on the outstanding uncollected revenue. The aggregate of all these several kinds of appropriations, uniformly exceeds the moneys in the treasury, and it remains always optional with the Secretary of the Treasury which of them he will satisfy; and where the law does not direct, in express terms, the payment of a debt, it is left to his discretion whether he shall pay it or not.

The object of the law of the 3d of March, 1795, seems to have been to make an efficient provision for the gradual reimbursement of the six per cent. and deferred stocks, by payment of eight per cent. a year, and to pave the way for a future, though distant payment of the foreign debt, by giving to the sinking fund the unascertained resources which might be derived from the sales of lands, and from the surplusses of revenue, and after the respective redemption of the six per cent. and deferred stocks, in 1818 and 1824, a sum equal to the interest accruing on the debt thus redeemed.

This last fund being too distant, and the other too uncertain, to rest, upon either, the payment of the foreign debt, the same act contemplated either its conversion into a domestic debt, redeemable at will, but not demandable at certain fixed periods, or its redemption by the proceeds of the sales of a stock of the same nature. It might have been unsafe at that time, and in the then existing situation of the revenue, to have attempted more. But although the proposition for thus converting the foreign debt, was accepted for that portion which remained due to the Government of France, and two millions of dollars in a domestic five and half and four and half per cent. stock, which remains unredeemed, were thus substituted to an equal amount of foreign debt, the plan was rejected by the Dutch creditors; and from recent information obtained in that quarter, no expectation remains of its being accepted under any modification whatever. The appropriations made since 1795, instead of being, by an investiture in the sinking fund, engrafted on the plan then commenced, have been made in a detached and unconnected manner, have proven altogether inefficient, and do not seem to have produced any other effect, than that of rendering still more complex, a system in its nature sufficiently intricate. The heavy instalments of the Dutch debt are, in the meanwhile, becoming due, and require an immediate and efficient provision: the exorbitant interest paid on the eight per cent. loans, both of which are irredeemable till the year 1809, renders it necessary that such measures should be adopted

as may at least ensure the certainty of their reimbursement, as soon as, by their terms, Government may do it; and both with a view to that object, and on account of their being at all times demandable, it is of importance that the temporary loans obtained from the Bank of the United States should be discharged as soon as the situation of the treasury will permit it. Nothing more seems necessary for those several objects than to make for the debts, which are intended to be discharged, as adequate a provision as is made by the act of 3d March, 1795, for the payment of the eight per cent. annuity on the six per cent. and deferred stocks; by vesting in the commissioners of the sinking fund, in addition to the other funds already vested in them, such annual sum, to be out of the duties on tonnage and merchandise, as will be equal to the proposed redemption, and by directing the commissioners to apply the same to the redemption of such debts. This provision will be determinate in its amount, simple in its execution, certain in its effect; it will neither derange nor alter a single existing appropriation or payment, in relation to the sinking fund, for which the public faith is pledged, but will leave to all the other uncertain funds of that fund, and especially to the surplusses of the revenue, their legitimate operation.

The annual sum of 7,300,000 dollars was designated in the report made by this Department to Congress, at the commencement of this session, as applicable to the payment of both principal and interest of the public debt. The interest and the eight per cent. annuity on the six per cent. and deferred stocks, amount, for the present year, to 5,228,000 dollars; which would leave something less than 2,100,000 dollars, applicable to the redemption of the principal of all the other debts.

Of this sum it may be estimated that about 900,000 dollars are produced by the proceeds of lands, and of the additional duties of 1797. The actual additional appropriation, on the principles of that report, would not exceed 1,800,000 dollars.

In proposing that sum, I was guided, not by any abstract or arbitrary principles, but by the amount which was actually wanted during the present and the two ensuing years, in order to meet the payments on account of the Dutch debt.

It is necessary, for those three years, to provide to that amount; and as, in the ordinary course of things, the receipts in the treasury must be effected by recent events, to a much greater extent during the two ensuing years than afterwards, it appeared that, if it was intended to make an impression on the debt, no reason could be alleged why the provision necessary for these two arduous years should not be extended to the full redemption of the whole debt, or at least to the reimbursement of every part which was not effectually provided for, by the law of the 3d March, 1795. The ability of the United States, with their present revenues, to apply *annually* that sum to that object, rests on the correctness of the estimates annexed to the report.

These will not be affected by the repeal of the internal taxes, provided that the retrenchments made in the expenditure shall have been equal to the annual sum of 650,000 dollars, for which credit was taken in the estimate of revenue on account of those taxes. But in order to run no risk on that ground, I would suggest the propriety of a modification in the manner of making the appropriation, which will effectually guard us, should the annual amount of the nett receipts in the treasury be more affected by the restoration of peace than has been expected.

It will be recollected that, on the principles of that report, provision was made, independent of the permanent revenues, to meet the probable demands which might arise under the convention with France, or the sixth article of the treaty with Great Britain. The resources, estimated at three millions of dollars, which were suggested as sufficient, for the present, to discharge those eventual demands, were the surplus of specie in the treasury, an eventual sale of the bank shares belonging to the United States, the arrearages of the direct tax, and the proceeds of duties on the stamps. The deficiency arising from the repeal of those duties will be more than balanced by the arrears which shall remain outstanding on the internal duties, on the 30th day of June, and which will not fall short of one million of dollars; and the amount of specie in the treasury was greater, by 500,000 dollars, on the first day of January last, than had been estimated: for, it is proper here to state that that specie which, on the first day of April, 1801, amounted only to 1,794,044 dollars and 85 cents, had increased, on the 31st December last, to the sum of 3,089,761 dollars and 78 cents.

Those estimated three millions may therefore be safely relied on, in addition to the permanent revenues; and the modification which I would suggest, consists in making the payment of the eventual demands which may become due to foreign nations, conditionally payable out of the proposed appropriation, of 7,300,000 dollars for the debt, with a proviso that both those demands, and the temporary loans, might be paid out of other moneys, if the situation of the treasury should permit it. The effect of this modification would be eventually to draw the three millions reserved, to assist the current revenues, if these should fall short of the estimates.

If the receipts of the treasury should be equal to the sums at which they have been rated, the effect of the appropriation would be precisely that exhibited in the report, namely, that it would be applied to the payment of the public debt, including therein the loans obtained from the bank; and that the demands which may become payable to foreign nations would be discharged out of the reserved three millions.

If those receipts should fall short of the estimated sum, the appropriation of 7,300,000 dollars would be applicable both to the payment of the debt, and temporary loans, and of the demands arising under treaties.

If the revenues should exceed the sum at which they have been rated, the 7,300,000 dollars would be applied exclusively to the payment of the debt proper; and both the temporary loans and demands payable to foreign nations, might be discharged out of the surplus moneys thus received in the treasury.

By adopting that mode, we would be safe under every ordinary contingency; the only difference which would result from a greater or less revenue than has been estimated, being, that the ultimate redemption of the debt would be accelerated or retarded in the same proportion.

Having answered the inquiry proposed in your letter, with as much precision as the subject seems to admit, permit me to suggest some other arrangements, which, though of less magnitude, are not altogether unimportant.

The inconvenience of paying the large instalments of the Dutch debt, which fall due this and the ensuing years, is much increased by the obligation of discharging them abroad, both on account of the injury arising from such considerable portion of the circulating capital of the United States being thus drawn abroad, and of the difficulty and risk which attach to the purchase of so large an amount of remittances. Although those difficulties must be met, if they cannot be obviated, it seems proper to adopt every measure which may diminish them. The plan, contemplated by the act of the 3d March, 1795, of converting that debt into a domestic debt, has heretofore been found impracticable, and, from the latest advices, the event of peace absolutely precludes any expectation of its being carried into effect.

It is, however, possible, though very doubtful, that the terms of payment of a part of that debt may be extended by re-loans, so as to equalize on the eight ensuing years the payments which fall principally on this and the four succeeding years. Should that operation be effected so as to reduce the annual payments in Holland from two millions of dollars to one million, the other million might be applied with more advantage in the payment of the loan obtained from the bank, or of any other part of the debt payable and held in America.

For this purpose it would be necessary to give an express authority to the commissioners of the sinking fund, and, in order to enable them to transact, in the most advantageous manner, both that and every other business relative to that debt, it would be eligible to give them a power, if they shall find it necessary, to employ a special agent in Holland. The usefulness of that arrangement had been some years ago suggested by this Department, and its necessity is now much increased by the increased extent of the payments and transactions in Holland relative thereto.

The difficulty and risks attaching to the purchases of remittances, which can only be obtained at a distance from the Treasury Department, and without any immediate control of any officer of the Government, may not perhaps be obviated by any means. If it shall be found practicable to treat for that object with one of the banks, making a fixed allowance for every uncertain variation in the rate of exchange, and loss in the purchase of bills, it will be considered a beneficial operation to the United States. But, although this may be considered as fairly within the power of the commissioners of the sinking fund, it would be desirable to obtain a previous express authorization from Congress.

I have the honor to be, respectfully, sir, your obedient servant.

HON. JOHN RANDOLPH, Jr. *Chairman Committee Ways and Means.*

TREASURY DEPARTMENT, REGISTER'S OFFICE, March 31, 1802.

Stated from the records of this office.

JOSEPH NOURSE, Register.

7th CONGRESS.]

No. 185.

[1st Session.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 28, 1802.

The Secretary of the Treasury, to whom was referred the petition of Ferdinand Mullenheim, by his agent, Anthony Lamarlere, respectfully reports:

That the petitioner, a native subject of Denmark, and resident at St. Thomas, was the owner of the schooner Nymph, and of the greater part of a cargo, consisting of 48,676 lbs. (French weight) of coffee, 13,817 lbs. of brown sugar, and 317 pieces of logwood, which was laden at Port de Paix, on the 13th day of April, 1799, by the said A. Lamarlere. That William Smith, the commander of the said vessel, which was bound from Port de Paix to St. Thomas, ran away with the said vessel, and, having entered the Chesapeake, tid land and sell, at Norfolk, a part of the cargo, consisting of the whole of the sugar, and 6,682 lbs. of coffee, on which the duties were paid, and afterwards attempted, with the assistance of David Porter and others, to smuggle the remainder of the cargo. That, having been detected therein, the vessel and part of the cargo were seized, libelled, condemned, and sold for seven thousand seven hundred and seventy dollars and ninety-five cents; from which, deducting six hundred and eighty-two dollars and seven cents costs, left a sum of seven thousand and eighty-eight dollars and eighty-eight cents for the nett proceeds of the sale.

That a certain Lascamela having laid claim to a part of the said cargo, a sum of two thousand two hundred and seventy-five dollars and three cents, part of the nett proceeds above mentioned, were, by order of the court, retained by Jacob Graybill, then marshal of the district of Maryland, until a decision had taken place on the said claim; and that, by a subsequent decree of the court, the said claim was set aside.

Under those circumstances, the petitioner applied, under the provisions, and in the manner directed by law, for a remission of the said forfeitures; whereupon, the Secretary of the Treasury being of opinion that the said forfeitures were incurred in consequence of the barratry and fraud of William Smith, master of the schooner Nymph, and sundry mariners, and without intention of fraud or wilful negligence on the part of the owners of the said schooner and her cargo, did, on the 27th day of December, 1800, decide, that, "deducting the duties on the merchandise shipped at Port de Paix for the Island of St. Thomas, (which merchandise was presumed to have been brought to the United States) and all costs, the proceeds of the sales of the vessel and cargo, which had been forfeited, and which have or may be recovered, be restored to the respective owners."

The duties on the coffee shipped at Port de Paix amount to two thousand nine hundred and ninety-eight dollars and forty-four cents, of which sum three hundred and sixty-seven dollars and fifty-one cents were paid on account of the parcel landed at Norfolk, leaving a sum of two thousand six hundred and thirty dollars and ninety-three cents for the amount of duties, which, in pursuance of the Secretary's decision, being deducted from the sum of seven thousand and eighty-eight dollars and eighty-eight cents, nett proceeds of the sales of the vessel and cargo, leaves, for the whole amount which might have been claimed by the petitioner, a sum of four thousand four hundred and fifty-seven dollars and ninety-five cents. He has already received three thousand four hundred and nineteen dollars and seventy-five cents, and there has been paid into the treasury, on account of the duties, five hundred and thirty-four dollars and seventy-seven cents. The balance due to the petitioner is - - - \$1,038 20

That due to the United States for duties, - - - - - 2,096 16

Making, altogether, - - - \$3,134 36

Which sum has not yet been recovered, the late marshal of Maryland, who had no sureties, having died insolvent, without having paid the sum of two thousand two hundred and seventy-five dollars and three cents, left in his hands; and the balance, of eight hundred and fifty-nine dollars and thirty-three cents, being still in the possession of the informer, to whom it had been paid, as his legal share, before the Secretary had remitted the forfeiture.

From that statement of facts, it is evident that the petitioner has no just claim, unless the Secretary's decision should be supposed not to have been sufficiently favorable.

In the opinion of the present Secretary, that decision is grounded on just principles. However unfortunate the barratry and subsequent conduct of his captain may have proven to the owner of the vessel, he, and not the United States, must bear the loss resulting from that misconduct.

The duties on the whole cargo, consumed within the United States, are justly due to them, whether the merchandise was smuggled or entered according to law; and nothing more can be required from them, than a restoration of what may be recovered, after deducting the amount of those duties. It also appears, that the manner in which the former Secretary's decision has been carried into effect, is more liberal than the petitioner had, strictly, a right to expect, as the duties ought, perhaps, to have been deducted from the specie on hand, leaving him the chance of recovering what he could from Mr. Graybill's estate and from the informer. Against this last, a suit has been instituted, and the amount, if recovered, will be paid to the petitioner. But the eventual loss of the sum which was left in the hands of the late marshal, although it arises from the act of one of the owners, will fall, almost exclusively, on the United States.

From a view of all the circumstances of the case, the petitioner does not seem to be entitled to any legislative relief.

All which is most respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, April 26, 1802.

7th CONGRESS.]

No. 186.

[1st Session.]

APPLICATION OF PUBLIC MONEY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 29, 1802.

Mr. NICHOLSON made the following report:

The committee appointed "to inquire and report whether moneys drawn from the treasury have been faithfully applied to the objects for which they were appropriated, and whether the same have been regularly accounted for; and to report, likewise, whether any further arrangements are necessary to promote economy, enforce adherence to legislative restrictions, and secure the accountability of persons entrusted with public money;" submit the following report:

In order to ascertain, generally, in what manner and under what checks, moneys were drawn from the Treasury of the United States, and were afterwards expended and accounted for, the committee applied to the Secretary of the Treasury, stating the several objects to which they intended to direct their inquiry; his answers, under date of the second of March and the ninth of April, are annexed to this report; to which, as well as to the statements of the accountants of the War and Navy Departments, on the same subject, they beg leave to refer.

The committee deem it sufficient to state, here, that all public moneys are drawn from the treasury in virtue of warrants signed by the Secretary of the Treasury, and countersigned by the Comptroller, and are paid to the officers or agents, to whom the same are due, or who are entrusted with their application; or, when relating to the War or Navy Departments, they are placed in the hands of the Treasurer, as agent for those Departments, who disburses them on warrants drawn by the Secretary of the Department, and countersigned by the respective accountants.

For the general construction heretofore given by the Treasury Department to the various appropriation laws, the committee refer to the communication made to them by the Secretary of the Treasury, on the second of March, and more particularly, for the construction given to the annual appropriations for the support of the navy and army, respectively, they refer to a report made by the late Secretary of the Treasury, on the — day of May, one thousand seven hundred and ninety-six, to the Committee of Ways and Means. From both of these, it appears that the appropriations for the army and navy, respectively, have been considered as constituting but one general fund for each of these objects, although, in most of the laws making appropriations, a variety of heads of expenditure were distinctly specified. If the general construction be correct, it may, perhaps, be said that, in most instances, moneys have been drawn from the treasury in the manner prescribed by law. Some irregularities are stated to have occurred, where moneys have been advanced upon the simple application of the Secretary of the Treasury, by letter, without the formality of a warrant, and, sometimes, even without a previous appropriation; but, in these cases, the irregularity has been afterwards covered by subsequent warrants and appropriations, and the committee do not discover that it has been productive of an injurious consequence to the United States. The Secretary of the Treasury, in his communication of the second of March, having expressed a doubt whether the moneys advanced on account of the removal of the seat of Government from Philadelphia to Washington, had been authorized by any previous law, the committee directed their attention to that object, and now offer the result.

The law establishing the permanent and temporary seat of Government (passed on the sixteenth of June, in the year seventeen hundred and ninety) provided, "that all offices attached to the seat of Government, should be removed to this district on the first day of December, in the year one thousand eight hundred, by their respective holders," and declared that the necessary expenses of such removal should be defrayed out of the duties on imposts and tonnage. This appropriation is indefinite in its nature, and, perhaps, some contrariety of opinion may exist, as to the extent of the expense it was intended to cover; but the committee conceive that a strict adherence to the letter of the law would confine the appropriation to the expenses actually incurred in removing the books, papers, records, and furniture, of the respective offices. From the document marked G, hereto annexed, it appears that the sum of fifteen thousand two hundred and ninety-three dollars and twenty three cents were paid for the transportation of the books, papers, records, and furniture, of the several offices and the furniture of the President; and the sum of thirty-two thousand eight hundred and seventy-two dollars and thirty-four cents for expenses incurred by the officers and clerks, for the removal of themselves and families. In general, the vouchers produced in support of these last mentioned expenses, are the stated accounts, and the declarations of the officers and clerks, to whom the same were allowed. Transcripts of the accounts of the officers only, are annexed, those of the clerks being too numerous to be detailed. From these accounts (which are marked G 1 to G 12, inclusive) it will be seen that the charges consist of travelling expenses, losses on the sale of articles thought too inconvenient to remove, packing, breakage, and transportation of furniture, house rent in Philadelphia, and *extra* expenses after their arrival at the city of Washington. As all the officers and clerks were, at the time, in the service and pay of the Government, and received the full amount of their salaries, exclusive of these extraordinary allowances, and as the act of June, 1790, provided only for defraying the expenses incident to the removal of the offices, the committee are of opinion that this sum of \$32,872 34 was drawn from the treasury and expended without any legal authority.

The manner in which moneys drawn from the treasury, under previous appropriations, have been afterwards applied, presents a subject of inquiry of more difficulty and importance.

The expenses in relation to the civil list, being chiefly for salaries, are not otherwise liable to abuse, than in cases where moneys advanced to agents have not been applied to the objects for which the advance was made, and have not been, afterwards, regularly accounted for. Amongst the subordinate agents, to whom moneys have been advanced for miscellaneous objects, of a civil nature, some appear to be delinquents, and some not to have rendered their accounts, as will be seen by a reference to the document marked D, herewith reported.

The moneys necessary to defray the expenses incident to the intercourse with foreign nations, have, till lately, been paid to the Secretary of State, who used to disburse the same. The accounts of Messrs. Jefferson, Marshall, and Madison, who have, at various periods, filled that appointment, have been settled, and no balance is due thereon. A suit, not yet decided, has been instituted against Mr. Randolph, formerly Secretary of State, for a balance unaccounted for by him. The accounts of Mr. Pickering are not yet finally settled. He remains charged with a sum of \$3,383 20, erroneously paid by him for the freight of a vessel supposed to have been employed by the consul at Tripoli, and with another sum of \$3,289 50, being the balance of an advance made to Samuel Hodgdon, for the purpose of being remitted to Mr. Humphreys, at Madrid, in part of his salary, which Mr. Humphreys did not receive. Both these sums, it is believed, may, and will be recovered from the persons to whom they were respectively advanced. But the principal reason which appears to have prevented an ultimate settlement with him, arises from the circumstance of his not having applied the whole of the money drawn by him from the treasury, to the specific objects for which it was appropriated by law. For the extent and result of this misapplication, the committee refer to the statement marked C, accompanying the communication of the Secretary of the Treasury, under date of the 2d of March. From this statement it appears, that Mr. Pickering drew from the treasury, under the appropriations made "for defraying the expenses incident to the intercourse with foreign nations, for negotiating treaties with the Barbary Powers, and for the contingent expenses of Government," the sum of \$63,999 57 more than he applied to those several objects, which, together with the sum of \$14,588 54, gained by him on the purchase of bills of exchange for the use of the Government, form an aggregate of \$78,588 11. The same statement C will show that the whole of this sum was expended by him on objects of a public nature, (as far as the committee can

ascertain the fact) but this expenditure having been made from appropriations designed for other objects, by law, the misapplication of the money has prevented the Comptroller of the Treasury from settling his accounts.

Although the committee will not say that there are no cases in which a public officer would be justified in applying moneys appropriated to one object, to expenditures on another, yet they are of opinion that, in every deviation, the necessity for the application ought to be for some obvious benefit to the United States, and, in every such case, a disclosure thereof to Congress ought to be made, at the next session which should immediately thereafter ensue.

The moneys which have been advanced to the several Secretaries of State, have been remitted by them principally to ministers, consuls, and other agents abroad, whose accounts are not yet rendered, (although many of them are of an old date) and the committee cannot say how, or in what manner, the money has been expended.

The advances necessary for defraying the expenses of the military and naval establishments, were formerly made, in part, to individuals who have accounted directly with that department; but since the law of the 16th July, 1798, the whole of the moneys have been paid to the Treasurer, as agent for these two departments, and have been subject to the drafts of the respective Secretaries. The letter of the Secretary of the Treasury, under date of the 9th of April, —, accompanied by sundry abstracts, (marked from A 1 to A 6, inclusive) together with the statements of the two accountants (E, E 1, E 2, E 3, and F, respectively) herewith reported, exhibit the amount advanced, settled, and remaining unaccounted for, in each department. From these it appears, that, from the 1st day of January, 1797, to the end of the year 1801, the advances made by the treasury on account of the War Department, have amounted (exclusively of a sum in the hands of the Treasurer) to \$9,846,963 29.

Of which, there have been paid to individuals who have accounted with, or are accountable to, the treasury, a sum of	\$1,390,238 22
And there have been paid, by virtue of the warrants of the Secretary of War, or to individuals accountable to the War Department, the sum of	8,456,725 07
Making an aggregate equal to the above sum, of	9,846,963 29
To which is to be added, a balance remaining unaccounted for, on the books of the accountant, of the 1st of January, 1797,	1,756,391 36
Making, in the whole, a sum chargeable to the War Department, from the year 1797 to 1801, (both inclusive) of	10,213,116 43
Of which, the accountant has settled and rendered to the treasury, accounts to the amount of \$6,335,923 93; leaving a balance of \$3,877,192 50 unaccounted for, or not yet settled.	\$6,335,923 93
The moneys advanced to the Navy Department, from its establishment in 1798, to the 31st March, 1801, exclusively of the sum paid by the treasury to individuals, amount to	\$9,981,313 73
Of which sum, accounts have been settled by the accountant, and rendered to the treasury, to the amount of	5,810,661 98
Leaving an unaccounted for, or unsettled balance, of	4,170,651 75

These sums differ in amount, nominally, from those contained in the statement annexed to the letter of the Secretary of the Treasury, of the 2d March, but the difference is explained, and the actual amount proved to be the same in the letter and statements of the 9th of April.

The statements of the accountants, although they exhibit balances apparently unaccounted for, to a large amount, will, likewise, show that accounts have been rendered for a considerable portion, which are in a train of settlement, but not finally closed.

The late hour at which the voluminous documents accompanying this report were received by the committee, (upon the 9th of April) and the labor necessary to investigate such a mass of accounts, and of advances unaccounted for, particularly in the War and Navy Departments, embracing an expenditure of twenty million of dollars, have rendered it impossible for the committee, consistently with their attention to their other duties, to form an opinion as to the manner in which this sum has been expended. But, from the partial view which they have taken, they beg leave to present some facts and principles, which they believe to be worthy of the notice of Congress.

There are two previous requisites which are necessary to justify the expenditure of public money, and, without which, no legal expenditure can be made: First, that the expenditure for the object to which it is applied, should be authorized by law; and, secondly, that an appropriation should have been made to cover that authorized expense. In the War and Navy Departments, this rule does not appear to have been strictly adhered to in all cases; but, for the reasons above assigned, the committee have been unable to ascertain how far it has been departed from. The most prominent instances which have yet presented themselves, are, herewith, stated.

By an act passed on the 25th day of February, in the year 1799, an authority was given to the President of the United States to cause to be built six ships of war, to be armed with, and carry not less than, seventy-four guns each, and to build or purchase six sloops of war, to be armed with eighteen guns each. In part of the necessary expenditures for these objects, a sum not exceeding one million of dollars was appropriated by the same law. And by another act, passed on the same day, it was declared that two docks should be erected, in suitable places, under the direction of the President of the United States, for the convenience of repairing the public ships, and the sum of fifty thousand dollars was appropriated for that purpose; and by another act, passed on the same day, the sum of two hundred thousand dollars was appropriated to be laid out in the purchase of growing or other timber, or of lands on which timber is growing, suitable for the navy, and to cause the proper measures to be taken to have the same preserved for the future uses of the navy. Under this authority, only, the then Secretary of the Navy expended the sum of one hundred and thirty-five thousand eight hundred and forty-six dollars and ninety-two cents, in the purchase of six navy yards, at Portsmouth, Charlestown, (Mass.) New York, Philadelphia, Gosport, (Va.) and the city of Washington. For this expenditure, the committee conceive that no authority was given, by law, nor any appropriation made, except for the two docks above mentioned, as the sum of one million of dollars was appropriated by the act of 1799, for building or purchasing the ships only, and the sum of two hundred thousand dollars for the purchase of timber. As public ships of war had been before built under a similar authority, for the use of the United States, at private yards, and as Congress did, at the same time that they authorized the building or purchasing the ships, provide for the erection of two docks only, the committee are of opinion that four of the navy yards were purchased without authority, and the money misapplied which was paid for them.

In the War Department, there likewise appears to have been a transaction equally unauthorized. In the year —, a pile of buildings was commenced, under the directions of the then Secretary of War, on the banks of the Schuylkill, near the city of Philadelphia, which have since been carried on in a manner highly expensive. These buildings have been called a *Laboratory*, and, although yet in an unfinished state, have already cost the United States one hundred and fifty-two thousand six hundred and eight dollars and five cents, which sum has been paid out of the appropriations heretofore made for the quartermaster's department. The committee are of opinion that this expenditure of money could not be justified at any time, but more particularly at a moment when the United States were borrowing money, at a high rate of interest, to meet objects which the Legislature considered as necessary, and had sanctioned by law.

The committee beg leave, likewise, to refer to an important principle formerly settled by the Executive, and actually practised upon in the War Department, in relation to the expenditure of public money, which they deem improper, in a Government like ours, where taxes cannot be imposed but by public consent, and where moneys arising from those taxes, cannot be disbursed but upon the authority of a law previously passed by the Representatives of the nation. By an act, passed on the 9th of February, in the year 1793, the President is directed to cause the moneys drawn from the treasury, for the purpose of intercourse with foreign nations, to be settled, by causing the same to be accounted for, specifically, in all cases wherein the expenditure thereof may, in his judgment, be

made public; and by making a certificate or certificates, or causing the Secretary of State to make a certificate or certificates of the amount of such expenditure, as he may think it advisable not to specify; and such certificates are to be taken as sufficient vouchers for the sums expressed to have been expended. The policy of this law, the committee do not intend to question, but it is clear that it extends only to cases of compensation, for what are usually termed "secret services" that may be rendered to the United States in their intercourse with foreign nations. The section above recited has been engrafted into two laws, passed in the respective years of 1798 and 1800, but in every law on the subject, it has been expressly confined to foreign intercourse, and in the act of 1800, is farther limited to the *contingent* expenses only of foreign intercourse. It has not, therefore, been without considerable surprise that the committee have seen the same principle applied to the expenditures of the War Department.

In the instructions given by the Secretary of War to the Accountant of the War Department, in his letter of the 28th of December, 1797, herewith reported and marked L, a rule is positively laid down, that expenditures for secret services, rendered in relation to the duties of the War Department, are to be admitted. And on the 20th day of December, in the year 1799, the Secretary of the Treasury made a report on this subject to the President of the United States, (subjoined and marked M) in which the principle is again recognised as applicable to the Departments of State, War, and Navy. On the subsequent day the President accordingly signed two certificates as vouchers for moneys said to have been expended in relation to the duties of the War Department, which certificates are annexed to this report, and are marked N and O. The committee entertain no doubt as to the illegality of this measure, as it is authorized by no law whatsoever, and they had flattered themselves that the Federal Government required no services of any nature which ought to be concealed from the officers of the treasury, or from the Legislature. They consider these facts as coming properly under the head of expenditures not authorized by law.

Two other cases of exceptionable expenditure in the War Department have been sufficiently examined to warrant a report upon them. The first relates to an appointment conferred by the late President on Uriah Tracey, Esq. in the summer of the year 1800, while he was a member of the Senate of the United States: The second relates to a payment made, from the contingent fund of the War Department, to Mrs. Ariana French of Georgetown, in the month of July, 1800. Neither of these are very extensive in amount, but both deemed important for the precedents they may hereafter furnish.

It appears, from a document herewith exhibited, and marked P, that Mr. Tracey was appointed "to visit and examine into the actual state of the garrisons, Indian trading houses, factories, &c. in the Northwestern territory, on the Mississippi, and on the frontiers of Tennessee and Georgia," and that Mr. Tracey received for this service the sum of one thousand nine hundred and eighty-five dollars and five cents; seven hundred and fifty-three dollars and five cents being for travelling and other incidental expenses, and twelve hundred and thirty-two dollars for his compensation, from the sixteenth of June to the sixteenth of November, in the year one thousand eight hundred, at eight dollars per day. (From the account exhibited by Mr. Tracey for his expenses, it will be seen that, during these five months, he visited Pittsburgh, Presqu' Isle, Niagara, Detroit, and Michillimackinack, but did not fulfil the other objects of his mission.

The committee cannot forbear to remark, that Mr. Tracey's acceptance of this appointment has the appearance, at least, of inconsistency with that part of the constitution which provides that "no person holding an office under the United States shall be a member of either House of Congress." Mr. Tracey was, at the time of receiving the appointment, during the whole of its continuance, and has ever since been, a member of the Senate of the United States; and, from an inspection of the pay roll of the Senate, the committee find that, for the last seventeen days of the five months of his service, under the above appointment, he not only had his expenses borne by the public to a considerable amount, and received likewise eight dollars per day, but that he had at the same time received, as a member of the Senate, six dollars per day for travelling from Litchfield, in Connecticut, to the seat of Government—a distance of three hundred and forty-four miles—twenty miles being allowed for travelling one day.

James M'Henry, Esq. former Secretary of War, resigned that office, it is believed, in the month of May, 1800, and the document marked R, hereto annexed, shews that, in the month of April preceding, Mrs. Ariana French leased a house to him for one year, to commence from the first of June following; that an award was made between the parties, by which it was declared that Mr. M'Henry should pay to Mrs. French two hundred and eight dollars and ninety-five cents, for damages sustained by her by reason of his not occupying her house agreeably to the contract; and that, in conformity to the opinions of the Secretary of the Treasury and the Secretary of the Navy, and by the direction of the Secretary of War, this sum was paid to Mrs. French, out of the fund for defraying the contingent expenses of the War Department.

Upon the whole, the Committee are of opinion, that considerable sums of public money have been greatly misapplied, and that much expense has been incurred without any legal authority; but, for the reasons before assigned, it has been impossible for them to make a complete investigation. Nor do they believe that an investigation entirely satisfactory can be made, unless the House should think proper to appoint a committee for this purpose, to sit during the recess, with directions to make a report to the next session of Congress.

The committee deem it their duty to observe, that appropriations for the contingencies of the War and Navy Departments are, at all times, liable to abuses, not only from, the very large sums usually appropriated therefor, but, also, from the impracticability of specifying by law, the precise objects to which such sums are applicable; and the committee are of opinion, that giving publicity to the accounts of the expenditures of moneys appropriated for contingencies, would have the most direct tendency to correct the latitude of construction formerly exercised in that respect, by the heads of those Departments, to promote economy in, and attach a proper degree of confidence to, the future proceedings in those Departments. And the committee can discern no possible inconvenience in a disclosure of that nature, since they believe that there is no necessity nor propriety for applying the principle of secret service money to either of those Departments; and at least, it ought to be so considered, until it should be otherwise determined by law.

The committee are, therefore, of opinion, that a clause to this effect ought to be inserted in the bill already reported by them, respecting the accountability of public officers.

For other arrangements which appear to be necessary "to promote economy, enforce adherence to legislative restrictions, and secure the accountability of persons entrusted with public money," they refer to the bill reported by them during the present session, to provide for the due application of public money, and to secure the accountability of persons entrusted therewith, and also to the communication of the Secretary of the Treasury, made to them on the 2d of March last.

All which is respectfully submitted.

January 21, 1802.

SIR:

I this morning submitted to the committee, appointed to investigate the state of the Treasury Department, &c. a proposition that the committee should direct their inquiries to the several particular objects contained in the annexed statement. This proposition was agreed to, and I have been desired by the committee to enclose it to you, for the purpose of obtaining from you such information as you may be able to furnish, in answer to these inquiries. It may not, perhaps, be in your power *immediately* to give the whole information required, but it is expected that you will transmit it, from time to time, as it can be prepared, keeping in view, the necessity of all possible despatch. In the interim, it is the intention of the committee to call at the treasury office, at convenient periods, in order to inspect the books of the Department, and the accounts of those persons who have been entrusted with the expenditure of public money.

I have the honor to be, sir, with high consideration, your obedient servant,

JOSEPH H. NICHOLSON, *Chairman of the Committee.*

The Honorable ALBERT GALLATIN, Esquire, *Secretary of the Treasury.*

Objects of inquiry submitted by the chairman, and agreed to by the committee appointed "to inquire and report whether moneys drawn from the treasury have been faithfully applied to the objects for which they were appropriated, and whether the same have been regularly accounted for, and to report, likewise, whether any further arrangements are necessary to promote economy, enforce adherence to legislative restrictions, and secure the accountability of persons entrusted with public money."

OBJECTS OF INQUIRY GENERALLY.

1. How are moneys drawn out of the treasury?
2. How are they expended?
3. How are they accounted for?

MORE PARTICULAR OBJECTS OF INQUIRY.

1. Under what checks, founded either on law or usage, are moneys paid out of the treasury?
2. To whom are these moneys paid?
3. Under whose control, and under what checks, are moneys drawn out of the treasury—expended by the agents or departments to whom the same may have been advanced?
4. What construction has been given to the appropriation laws by the Treasury Department, and by the several agents or departments to whom moneys have been advanced?
5. Have moneys always been paid by the treasury, and applied by the agents or departments in conformity to the laws authorizing expenses and making appropriations for the same?
6. To whom, and in what manner, are the receivers of public moneys accountable?
7. In what situation are the accounts of persons at this time, who have received moneys from the treasury, and where any of those accounts remain unsettled, what are the causes?
8. What is, particularly, the situation of accounts for moneys advanced to the Secretary of State, or to the War and Navy Departments?
9. Are the checks, under which public moneys are expended, sufficient to enforce a due application to the objects for which they are advanced?
10. Can any mode be devised by which more efficient checks, in relation to the public expenditure, may be adopted, and the accountability of those who receive moneys from the treasury be more effectually secured, without embarrassing the public service?

TREASURY DEPARTMENT, *March 2, 1802.*

SIR:

I have the honor to enclose an answer to the queries proposed in your letter of the 21st January last. The statement of balances due by individuals had been prepared as they stood on the 30th June last; but, having been enabled to obtain them, since, as they stood on the 31st December last, that statement is delayed for two or three days longer, in order to give time to transcribe several marginal notes.

I have the honor to be, most respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Honorable JOSEPH H. NICHOLSON, *Chairman of the Committee of Investigation.*

In pursuance of the request of the Committee of Investigation, contained in the letter of their chairman, of the 21st day of January last, the Secretary of the Treasury respectfully submits to the consideration of the Committee, the following facts, observations, and statements:

By the constitution it is provided that "no money shall be drawn from the treasury but in consequence of appropriations made by law." By the act to establish the Treasury Department it is enacted that the Secretary of the Treasury shall grant, under certain limitations, all warrants for moneys, to be issued from the treasury, in pursuance of appropriations by law; and that the treasurer shall disburse the moneys of the United States, "upon warrants drawn by the Secretary of the Treasury, countersigned by the Comptroller, recorded by the Register, and not otherwise."

Although the construction given by the Treasury Department to appropriation laws, may not have been universally uniform, yet it seems to have been generally understood, that the whole of the moneys, appropriated for the annual support of the army and navy, respectively, were to be considered as making but one general appropriation for each of those two objects; and that the sums, thus appropriated, were indiscriminately applicable to every distinct object of expenditure embraced under those two general heads.

The appropriations for the Indian department, and those made generally for fortifications, have, also, been mostly blended with those of the War Department. But it seems, though it is difficult to reduce the practice, heretofore established, to any uniform and certain rule, that the appropriations, in relation to the purchase of cannon, arms, ammunition, and military stores, to the purchase or leasing of foundries and armories, and to the fortifications of certain designated harbors, and, also, those in relation to the purchase of land with growing timber, or of timber, to the erecting of two docks, to the purchase or building of twelve vessels, to building and equipping three ships, not less than thirty-two guns, to the building of ten galleys, to the building six sloops of war, and six seventy-four gun ships, to the safe keeping of French prisoners, as well as those respectively made during the last session of Congress, for completing six seventy-four gun ships and the public navy yards, docks, and wharves, and for erecting marine barracks, have been considered as distinct from each other, and from all other made in relation to the army and navy, respectively.

The appropriations made in relation to the public debt, to the civil department, to domestic expenses of a miscellaneous nature, (such as the mint establishment, light-houses, census, &c.) and to foreign expenses, have been generally considered as constituting, for each distinct object of expenditure, embraced under each of those general heads, a specific distinct appropriation, the amount of which was applicable only to that specific object for which it was appropriated.

If the construction of appropriation laws, adopted by the Treasury Department, shall be considered as having been correct, it is believed that moneys may be said to have been drawn from the treasury in the manner prescribed by law, only in consequence of appropriations made by law. The only object of expenditure within the knowledge of the Secretary, which may, perhaps, be excepted, is that which relates to the removal of the seat of Government. An examination of the appropriation books, kept in the offices of the Secretary and Comptroller, will give complete information on that part of the inquiry. But the Secretary here begs leave to state, that, having thought it his duty not to innovate in the usual practice, except in cases where the laws appeared to him not to admit of any doubt, his having conformed, in doubtful cases, to the construction heretofore adopted, is not to be considered as expressing an opinion in favor of the correctness of such constructions; but a custom had, till lately, prevailed, to pay moneys out of the treasury, on a simple letter, addressed from the Secretary to the Treasurer, which payments have, afterwards, been covered by warrants, instead of being grounded, according to law, on those warrants. And, in some instances, moneys have been thus informally paid by the Treasurer, or advanced by the Bank of the United States,

before an appropriation had been made, by law, to cover the expense for which the money had thus been advanced. In every such instance, the payment has been authorized by a subsequent appropriation, and covered by a warrant, grounded on the appropriation. It must, also, be observed, that, in some instances, moneys are advanced by the collectors of the revenue, out of the public moneys in their hands, and before the same have been drawn in the treasury. The two principal objects of expenditure, to which this exception to the general rule applies, are the expenses incident to the courts of the United States, other than those for salary, namely, those for jurors, witnesses, fees, safe-keeping of prisoners, and contingencies, which are advanced by the collectors of the customs, to the marshals, and those incident to the ordinary support and repairs of light-houses, buoys, and piers, which are, also, generally defrayed out of the public moneys, in their hands, by those collectors, or other revenue officers, under whose superintendence those establishments are placed. In those instances warrants issue as if the moneys expended had been previously drawn into the treasury, and, afterwards, paid out of the same, to the revenue officers, in order to enable them to defray the expense.

All warrants regularly granted by the Secretary of the Treasury, on the treasurer, for the disbursement of public moneys, issue, either in payment of a balance actually due, or in advance; in the first case, they are drawn in pursuance of a settled account, certified by the comptroller; in the last case, they rest on the authorization of that particular department who has the control of the object of expenditure to which they refer.

The payments on account of the compensations of the members of the Senate, and of the contingent expenses of that body, are made, on his requisition, to the Secretary of the Senate; those on account of the compensation of the members of the House of Representatives, on his requisition, to the Speaker of the House; those on account of the contingent expenses of the House, in the same manner, to the Clerk of the House.

The payments on account of the official contingent expenses of the several Departments, are made at the requisition, and are, afterwards, under the control of the head of each Department, respectively; those on account of the expenses relative to the courts of the United States, other than those for salary, are made on the requisition of, and to, the marshals.

The payments on account of the mint are made to the treasurer thereof, on the requisition of the Director; those on account of invalid pensions, to the several commissioners of loans, or other agents, on the requisition of the Secretary of War.

The greater part of all other payments, in relation to the civil list, and to miscellaneous domestic expenses of a civil nature, as they are made only after the amount has become due, and the account has been settled, never can be liable to abuse. All other payments, whatever, are, generally, made in advance, and in the following manner:

1. Those on account of the interest on the whole of the public debt, of the annual reimbursement of the principal of the six per cent. and deferred stocks, and of the instalments of the Dutch debt, are made by the Secretary of the Treasury, as follow, viz: Those on account of the interest and principal of the Dutch debt, to the commissioners of the United States, at Amsterdam; those on account of the interest and reimbursement of the domestic debt, standing on the books of the treasury, to the Bank of the United States; those on account of the interest and reimbursement of the same debt, standing on the books of the several commissioners of loans, to the said commissioners, respectively.

The advances to the commissioners in Holland are made, from time to time, by remittances, purchased, heretofore, by the several cashiers of the Bank of the United States; and the commissioners render their accounts, annually, to the treasury. Those to the bank and commissioners of loans, are made quarterly, and to the amount ascertained to be due to the creditors, on the respective books of the treasury, and commissioners. The commissioners of loans render their accounts to the treasury, quarterly; and as the dividends, which remain unclaimed for nine months, are payable only at this treasury, such unclaimed amount is quarterly deducted from the advances which, otherwise, should be made to the commissioners, and is paid to the bank. From this arrangement it results, that the accounts of the commissioners of loans uniformly exhibit a considerable apparent balance charged to them, and which consists, partly, of the dividends paid by them during the six preceding months, and not yet accounted for, and partly of the sums necessary to pay the outstanding dividends. The accounts with the Bank of the United States, for advances and payments of interest and reimbursement of the domestic debt, not having been settled since the year 1797, they exhibit an apparent balance against the bank of more than six millions of dollars, the whole of which, however, has been paid by them, with the exception of the accumulated unclaimed dividends, the amount of which is not ascertained.

It is here proper to add, in relation to the other payments on account of the public debt, that those for interest on the temporary loans obtained from the bank, are made as the same become due, quarterly or semi-annually, in pursuance of accounts settled and certified by the comptroller; those for the principal of the same loans, occasionally, and at the discretion of the Secretary of the Treasury, as the situation of the treasury may permit; and that those for purchase of the public debt, or in payment of any part of the same, which may be payable at the will of the United States, but is not actually demandable by the creditors, are under the exclusive control of the commissioners of the sinking fund.

No abuse is supposed to have taken place, in relation to the expenditure of the advances made, for the purpose of paying either the interest or principal of any part of the public debt. All the agents are immediately accountable, and generally account regularly, to the treasury. The whole amount of balances, due on that account, to the United States, for moneys not accounted for, is only 3,393 dollars and 49 cents.

2. The advances for the War and Navy Departments are uniformly made on the requisition of the Secretaries of War and of the Navy, respectively, to the Treasurer of the United States, who becomes thereby treasurer of each department, and disburses the moneys, thus placed in his hands, according to law, on warrants signed by the Secretary, and countersigned by the accountant of each Department, respectively. The moneys thus advanced by the treasury, are charged, in fact, to the proper department, in accounts, opened in the names of the accountants of the same. Individuals who receive moneys from the treasurer, by virtue of warrants of either of those two Departments, are accountable to the accountants, who settle provisionally those subordinate accounts, and account themselves, quarterly, to the treasury. The credits they claim, embrace, therefore, all those to which individuals, accountable to them, were entitled, and the whole is ultimately adjusted and settled by the auditor and comptroller, in the same manner as all other accounts.

3. The advances for all expenses incident to the intercourse with foreign nations, including the diplomatic establishment, the moneys expended in relation to the Barbary Powers, those applied to the relief of seamen abroad, those advanced in the prosecution of claims, for property captured by the belligerent Powers, the salaries of agents, and other officers abroad and at home, appointed under, or in relation to, certain articles of treaties with foreign nations, as well as all other expenses, incidental to the execution of those treaties, are made on the requisition of the Secretary of State, who has that class of expenditures under his control. The moneys thus advanced are paid partly to the purveyor of supplies, and to some other agents, who are accountable to the treasury; but, they have, till lately, been made principally to the Secretary of State himself, who disbursed the same, and became personally accountable for the amount. The individuals, to whom he advanced the money, used to render their accounts to him; and his account, in some instances, embraced those subordinate accounts, but generally exhibited only the disbursements made by him to those individuals, who were thereupon charged with the proper amount, and became accountable to the treasury. But, by an arrangement made in the month of June last, the Secretary of State no longer receives any money; the sums required for that part of the public service are paid immediately by the treasury, to the agents or other individuals, to whom they were formerly advanced by him; and these are at once charged and made accountable to the treasury. Those agents are, principally, the purveyor of public supplies, at Philadelphia, and bankers in England and Holland.

From this statement, it is evident that the branches of the public expenditure, which have been most liable to abuse, are those under the control of the three last mentioned Departments—the discretion of the head of the Department having been the only check, in relation both to the legality of the expense, and to the amount expended under

each appropriation, and the accountability of the receivers of public moneys being too remote from the comptroller, who, by law, can, alone, ultimately settle and decide upon all accounts whatever. It has not been the duty of the Secretary, nor would the attention due to the business immediately entrusted to his care, have permitted him to investigate the accounts, relative to past transactions, in either of the War or Navy Departments. It is, however, believed that the most easy mode of investigation will be, by a recurrence to the books and accounts of the accountants themselves; and, in order to facilitate the inquiries of the committee, an account, marked A, is annexed, which exhibits the sums advanced to each of those two Departments, from the first day of January, 1797, to the 31st day of December, 1801, under each head of appropriation, for which a distinct account has been opened in the books of the Secretary and Comptroller of the treasury, and by virtue of which, the warrants granted by them, for the moneys thus advanced, have been issued.

In relation to the accounts under the control of the Department of State, those of Mr. Jefferson have been settled since the 31st December, in the year 1793, and no balance is due thereon. Those of Mr. Randolph have been adjusted, and a suit instituted ever since the year 1797, for a balance of about 51,000 dollars, which, notwithstanding the strenuous efforts of the Comptroller, to bring it to issue, has not yet been decided. The difficulty to recover balances due to the United States, being one of the great impediments to the public service, extracts of the correspondence of the district attorney of Virginia, on that subject, marked B, are annexed. The accounts of Mr. Marshall have been rendered, but are not yet settled. Those of the present Secretary of State, for the short time during which he received public moneys, are settled, and no balance is due thereon. Those of Mr. Pickering have been rendered, and his general account has been stated by the auditor. By this it appears, that, with the exception of two items suspended for want of vouchers, or disputed by the parties, he has accounted for all the public moneys received by him, so far as to show that the whole has been applied for public purposes. But as he has only designated the persons to whom the moneys were advanced by him, without specifying, under the respective appropriations, the objects for which they were thus advanced, it is not practicable to state with precision, how much has been paid by him, under each distinct head of expenditure. It is, however, evident, from the account itself, and from a sketch stated by Mr. Kimbal, late clerk in his department, that, although he drew the moneys from the treasury, under distinct appropriations, he did not sufficiently attend to these, in the application of the money, but has, in many instances, applied the sums drawn under one head, to another head of expenditure, and has, therefore, in some cases, spent less, and in others more, than was authorized by law. The statement C shows the excess, which it appears has thus been expended, so far as the same can be ascertained. The greater part of the sums, thus expended for certain objects, beyond the sums he had drawn from the treasury, for those objects, is covered by appropriations, made principally after the expenditure had taken place; and in order to enable the Comptroller to pass the whole of the accounts, some further appropriations are still necessary. In relation to accounts of every description, the statement D is annexed, which exhibits the balances which appeared due on the 31st day of December last, on the treasury books, by all the receivers of public moneys, arranged under distinct classes, and accompanied with notes, in order to distinguish those cases where the balance is merely nominal, from those where it is either ascertained, or expected to be actually due.

The most apparent defects in the present arrangement, seem to be, in relation to the drawing public moneys from the treasury, a want of specification in the several appropriations, defined by law with such precision, as not to leave it in the power of the Secretary of the Treasury to affix an arbitrary construction, and to blend together objects, which might be kept distinct, without any inconvenience; in relation to the expenditure of moneys, drawn from the treasury, the want of a proper check in the War and Navy Departments, which might prevent the expenditure of money, either for an object unauthorized by law, or beyond the sums appropriated by law; and in relation to the accountability of persons entrusted with public moneys, the delay and other inconveniences arising from the manner in which the moneys advanced for those two Departments are now accounted for.

The following provisions are respectfully submitted as necessary and sufficient for those several objects, viz:

In relation to the first:

1st. That the accumulated balances of appropriations for the War and Navy Departments, made before the present year, and remaining unexpended, shall, henceforth, cease and determine, except so much thereof as may be necessary to defray any expense, incurred before the present year.

2d. That it be enacted, by a general law, that every distinct sum, appropriated by any law, for an object distinctly specified in the law, shall be applicable only to that object; but as laws can be executed only so far as they are practicable, and unavoidable deviations will promote a general relaxation, it will be expedient, in the several appropriation laws, especially for the War and Navy Departments, not to subdivide the appropriations, beyond what is substantially useful and necessary.

In relation to the two last objects, it is proposed, generally, to place the expenses which relate to the War and Navy Departments, precisely on the same footing now established for those under the control of the Department of State, and that the arrangement now existing for these last, be made permanent. This may be done by providing,

1st. That the moneys to be paid, on account of the expenses, under the control of those three Departments, shall neither be paid to the head of the Department, nor placed, subject to his drafts or warrants, in the hands of the treasurer, or any other agent, but shall be paid, like all other public moneys either to the individuals to whom the same may be due, or to the proper agents, or contractors, who are to be accountable for the same. The moneys paid in advance, to continue, as usual, to be disbursed by the treasury, on the requisition only of the head of the proper department.

2d. That the individuals to whom moneys may be advanced, on account of any of the abovementioned expenses, shall, hereafter, as all other receivers of public moneys, be accountable immediately to the accounting officers of the Treasury Department; that it shall be the duty of every receiver of public moneys to apply the same only to the object for which they shall have been advanced, and to render quarterly accounts, if residing within the United States, and at least annually, if abroad, of his expenditures, to the accounting officers.

3d. That the offices of accountant of the War and Navy Departments be abolished, and, in lieu thereof, an additional auditor be substituted, whose duty it shall be to examine, and state all the accounts, generally, of receivers of public moneys, other than those of persons employed in the collection of revenue; the said accounts to be, as usual, settled and finally decided upon by the Comptroller, or, (if it shall be thought more eligible to trust to actual experience, for a proper and equal distribution of duties between the two auditors) that the said additional auditor shall examine and state accounts of such description as shall be assigned to him by the Secretary of the Treasury.

4th. That no credit shall be allowed by the accounting officers, in the settlement of the accounts of individuals, except for expenses authorized by law, and to the amount appropriated for the same.

5th. That it shall be the duty of the auditors, respectively, to state, quarterly, all accounts rendered to them, so far as the same can be supported by vouchers, making, at the end of each quarter, a new statement in relation to any account on which a new debit or credit may be charged or allowed.

Respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, *March 1st, 1802.*

A 2.

Statement of all moneys drawn out of the Treasury, on account of the Naval Department, from the year 1797 to the year 1801, both inclusive; specifying the particular accounts to which the same have been charged in the books of the Secretary of the Treasury.

PARTICULAR ACCOUNTS.

1. For finishing frigates United States, Constitution, and Constellation, in 1797,	\$379,912 95	
Do. do. do. do. 1798,	136,492 96	\$516,405 91
2. Purchase, &c. of 12 vessels in 1798,	-	950,000
3. Building and equipping 3 vessels, of not less than 32 guns, in 1798,	110,286 57	
Do. do- do. 1799,	489,713 43	600,000
4. Building and equipping 10 galleys in 1798,	14,000

B.

Extracts and copies of letters from Thomas Nelson, Esq. Attorney of the United States for the district of Virginia, to the Secretary and Comptroller of the Treasury.

JUNE 10, 1797.

"In consequence of your letter to Mr. Randolph, dated May 13, 1797, a copy of which I received from you, I permitted him to peruse the papers referred to in that letter; and on Monday last, I moved for judgment in pursuance of the act of Congress, passed the 3d of March, 1797, "to provide more effectually for the settlement of accounts between the United States and receivers of public money," when Mr. Randolph, in conformity to the third section of that act, tendered an affidavit, and moved for a continuance, which was granted by the court."

DECEMBER 3, 1797.

"On the first day of the circuit court of the United States in this district, I was informed by Mr. Randolph, that he should be ready for the trial of the cause of the United States against him. On the day on which I was proceeding to move for judgment, he came forward with an affidavit made by himself, one made by Mr. Beckley, and a letter from Mr. Pinckney, both received the preceding night, copies of which I have directed to be made out, to be forwarded to you. Upon these he founded a motion for a continuance, averring an inability, not proceeding from himself, but from causes not to be controlled by him, to avail himself of any benefit from the former continuance. This I opposed, upon the following grounds:

"That the only subject to be considered by the court would be either the credits which Mr. Randolph claimed as having been presented to the accounting officers of the treasury, for their examination, and by them disallowed, or those only which he had expressly specified in his former affidavit. That I would shew the court, by the papers then before me, which contained a descriptive list of the disallowed credits, that not one item so claimed and disallowed could in any manner depend upon the testimony of either of those persons named by Mr. Randolph, as persons whose depositions were material to his defence; that amongst those credits there was not one claimed by, through, or in the name of, either of those persons; that credit had been allowed to the full amount of the moneys stated by him to have been paid for bills of exchange to either or all of those persons. That, if the defence were confined to points expressly specified in the first affidavit, which must be done according to the proper and sound construction of the law of Congress, full credit being allowed for transactions with those persons to the amount stated by himself, those depositions must be certainly unnecessary. That a proper activity in procuring those depositions was not shewn to have been observed on his part; that an attention to the late period at which the commission had been taken out, would shew the contrary. That the act of Congress, which must govern this case in its progress, did not allow a second continuance. That the act being made for the benefit of the United States, to effect expedition in obtaining moneys due to the United States, from receivers of public money, ought to be so construed as most effectually to ensure that end. That the law not being made for the benefit of a defendant, he should have any indulgence which may be reserved to him thereby, only as it is expressly given; that an indulgence by continuance was allowed to a defendant *once*, upon terms, that the act, not being silent as to continuance, but having provided for it, the court had no discretion in such cases; it had not a power of granting continuances, otherwise than as is therein expressly prescribed; that a continuance from the return term to the succeeding term only, was therein prescribed or allowed; that the defendant had been allowed one continuance, and was not entitled to a second, as it was not provided by the act. The court took time to consider the subject, and on the next day Judge Paterson pronounced the opinion of the court, nearly in these terms: "This motion depends upon the sound construction of the third section of the act of Congress. It is contended that a continuance can be granted once only, and that upon the terms contained in the third section of the act of the Congress. Suppose no declaration were filed in the cause at the return term; but in this case the writs hath been duly returned, and the declaration duly filed. Suppose the defendant should die the day before the return day. These are cases which may happen. By the law the court is to try the cause and give judgment at the return term, unless the defendant shall comply with certain terms; this he has done; in which case he shall be entitled to a continuance to the next or succeeding term; this has been done also. The law is perfectly silent after this; it does not prohibit a further continuance. The case must therefore stand upon common law principles. The defendant makes affidavit that he has been unable to procure material testimony necessary to his defence. This, upon common law principles, will entitle him to a continuance. The cause must be continued upon terms. The defendant must give special bail, and the cause must peremptorily be tried at the ensuing term."

JUNE 4, 1798.

"The failure of Mr. Chase to attend at Richmond at the time appointed by law for holding the circuit court of the United States in this district, has caused a delay of obtaining a judgment in behalf of the United States, against Edmund Randolph. Mr. Randolph said something to me a few days since, about writing to you with a proposition to account and settle finally with the Auditor, previous to the next term. What he means, he did not fully explain, and I do not understand."

DECEMBER 16, 1798.

"After many attempts to bring on the cause of the United States against Edmund Randolph, which the court thought fit to lay over several times, I obtained a trial on the Tuesday before the last, which continued four days, and the court pronounced an opinion in the case on Friday last only, the day preceding the last day of the term. I have the mortification to inform you, that, in pronouncing that opinion, they have given no judgment, by reason whereof, the cause is continued to the next term. Judge Cushing, who pronounced the opinion, declared that the court differed upon some points, and agreed in others; that they differed as to the credit of 9,000 dollars, claimed through Mr. Short; that Judge Griffin considered Mr. Randolph as an agent of Mr. Short, and answerable to him only; that he himself did not, that he considered him altogether as the officer of the United States throughout the whole transaction; that, not having done what such an officer ought to have done, he was still accountable to the United States. At the trial, Mr. Randolph endeavored to support this credit by shewing that he had assigned a judgment to Mr. Jefferson, as the agent of Mr. Short, and that he had made a payment of £500, Virginia, currency, part of the same judgment, which payment was made to a person in this city on the 21st day of the last month, the day immediately preceding the day on which the court commenced its term. Judge Cushing thought that this did not support the credit. As to the credit of the nine hundred and ninety-five dollars, paid to Skipwith, the court seemed to think that it ought to be allowed, because there was no warrant issued from the treasury for it; that it must be considered as an affair between the bank and Mr. Randolph. As to the bills of Osmont and Le Maigre, that Edmund Randolph must be considered as an endorser, and therefore not liable, in this action, but liable by action upon the bills only. That he was not entitled to credit for the moneys said to be advanced to Heissel, &c. As to all the rest, Judge Cushing said the court could not make up their minds without further lights; that such had been the confused state of Europe, during the transactions, that the court could not have all the information which the case seemed to admit of, and therefore continue the cause."

JUNE 5, 1799.

"I have to inform you, that the cause of the United States, against Randolph was continued from day to day of the present term, until Saturday last, in consequence of the absence of Judge Griffin, who did not attend the court until that day, when a motion was made for a continuance of the cause until the ensuing term, founded upon the order of court, made at the last term, for taking depositions, and the impossibility of procuring them by this time. After an opposition to the motion, the court took time to consider of it, and this morning pronounced their opinions, granting the motion."

DECEMBER 3, 1799.

"I have again to inform you, that the cause of the United States against Randolph, is continued. Chance seems to have wrought what design could scarcely have effected. I had supposed that the various untoward circumstances, which have heretofore caused the delay of a termination of the suit, were unquestionably at an end; but fortune, which seems really to have chosen Mr. Randolph as a favorite, has again extended to him the hand of respite. Judge Washington, when at the bar, had been retained by Mr. Randolph, as counsel, and therefore he refused to sit on the trial of the cause. I endeavored to prevail on the Judge to take it up, stating to him, that Mr. Randolph had not, probably, communicated to him the merits of the cause; that he had heretofore appeared only on a collateral point, on a motion for a continuance, and, therefore, that he probably had received no impression, which might make it improper for him to try the cause; but he could not be prevailed on to sit in it."

JUNE 8, 1800.

"I have deferred writing a few days, because I was uncertain whither to direct my letter. I have now to inform, that, to my very great astonishment, the cause of Randolph, at the suit of the United States, is again continued. The court being informed by Mr. Randolph, that he expected daily from Philadelphia, certain papers which were essential to his defence, suffered the cause to lie, from day to day, until within a few days of the end of the term. Mr. Randolph then stated, that, being unable to procure testimony from Europe, whither he had sent depositions more than twelve months past, and being disappointed in receiving the papers which he expected from Philadelphia, he was unprepared to make such defence as he could have made, but for these untoward circumstances; that he must, therefore, submit to judgment for a considerable part of the claim of the United States; that he did not mean to ask for a continuance of the cause, but would go into a trial as to certain items of credit, which did not depend upon the foreign testimony, or the papers which he had expected; that he wished it to be annexed as a condition to the judgment, that the operation of it should be suspended, and no execution issued thereon, until September next, until which time he wished to be allowed to establish further credits at the treasury; that, if this proposition were not acceded to, he should be under the necessity of asking for a continuance. The court thought this a fair proposition, but did not think that they could annex any condition to the judgment without the consent of the United States. I did not think myself at liberty to consent. I did not know what might be Mr. Randolph's designs. I felt satisfied that he did not expect to be able to establish further credits. I thought that he wished to excite a belief abroad, that the United States had obtained a judgment against him, not from the justice of the case, but from certain circumstances, which he could not control, bearing hard upon him, and that the court and myself thought so, otherwise we would not have granted him this indulgence; I believed that he wished to confirm an impression, which he has endeavored to make, that the suit was a vindictive prosecution, rather than a just pursuit, all which would appear otherwise, when, in despite of all the delay which he has obtained and might further obtain, a judgment without concessions and against all exertions on his part shall be obtained. These considerations, and my belief that I was not authorized to consent in such a case, induced me to withhold it; indeed I did not suppose it possible, that, under any circumstances, another continuance could be granted. But the court thought otherwise: for, an affidavit being filed by Mr. Randolph, as was required by the court, the cause was, in spite of all my exertions to the contrary, continued to the next term. Judge Chase, who presided, refused to take up the case upon motion, and said that the cause must be tried by a jury, which mode of trial was specially preserved by the ninth article of the amendments to the constitution; and that so much of the act of Congress of the third of March, 1797, as affected this mode of trial, was unconstitutional."

DECEMBER 2, 1800.

"I am again to tell the oft told tale; the cause of the United States against Edmund Randolph is continued to the next term of the circuit court. The motion for the continuance was founded upon, and supported by, an affidavit of Mr. Randolph. Sundry reasons were assigned, but the one mostly relied on by Mr. Randolph, and alone regarded by the court, was this: that it appeared, from the account of Bird, Savage, and Bird, bankers, with whom Mr. Pinckney deposited usually the bills received by him from the Department of State, that four bills, amounting to £1,600 sterling, were credited to Mr. Pinckney, which did not, in any manner, appear to be placed to Mr. Randolph's credit in his account at the treasury; and Mr. Randolph insisted that he was entitled to be credited with the amount of these bills, which must have been remitted by him to Mr. Pinckney, as might be shewn by Mr. Pinckney's department account, if he could procure a copy of it, which copy he had exerted himself to procure, by application to Mr. Pinckney, and to the Secretary of State, without success. He produced a copy of a letter, which he stated to have been written to Mr. Pinckney, requesting such copy of the account, but which, either from miscarriage, or some other casualty, had not been answered. He also produced a letter from General Marshall, informing him that Mr. Pinckney had taken all his accounts out of the office of the Department. The motion was strongly opposed, upon various grounds; as to this particular point, Mr. Pinckney's deposition was stated to be perfectly decisive; it was also stated that Mr. Bayard's letter was fully explanatory of the circumstances of that £1,600 sterling. Mr. Randolph, however, exhibited an affidavit, in which he swears that he verily believes that Mr. Pinckney hath rendered to the Department of State an account other than such as he had been furnished with, annexing, at the same time, to the affidavit, copies of accounts furnished him by Mr. Pinckney. The judge, with much reluctance, then continued the cause."

MAY 3, 1801.

"I have again to inform you that the suit of the United States against Edmund Randolph, is continued to the next term. Mr. Randolph satisfied the court that he had used due diligence, without effect, in endeavoring to procure Mr. Pinckney's deposition, for which the cause had been continued at the last term; in consideration of which, and of the circumstance of the term commencing earlier than was calculated upon, the court continued the cause."

DECEMBER 22, 1801.

"I have to inform you, that the suit of the United States against Edmund Randolph has been tried in the fourth circuit, and the court finished its term yesterday. The judges thought themselves not authorized to take upon themselves the trial; but they decided that it was properly triable by a jury, and they ordered one to be impanelled for the purpose. The argument of the cause engaged four days; after which, the jury retired, and continued in their retirement during the whole term, and have not agreed upon a verdict, so that the cause still remains undecided.

"I believe the difficulty was not in regard to the accounts, but was founded upon, and related to, the act of Congress of March, 1797, concerning evidence in such cases."

DECEMBER 28, 1801.

"Since writing to you on the subject of the suit of the United States against Edmund Randolph, I have received from that gentleman a letter upon that subject, a copy of which I now enclose to you, to enable you to take such measures as may seem to you right, in regard to the subject of it. I have not, as yet, given Mr. Randolph any answer."

I do not understand, as Mr. Randolph seems to do, that the cause is not to be tried at the next term, because of his having obtained commissions to take depositions. I recollect that, at the time of moving for commissions, Mr. Randolph said something of the probability of their not being returned in time for the trial of the next term. I stated to the court that, if delay was to be the consequence of the motion, it was highly improper that it should be granted. The court, at that time, took no determination, and if afterwards they granted commissions, they certainly must have intended that no delay should be produced thereby."

C.

Statement of the sums which appear to have been expended by Timothy Pickering, Esquire, late Secretary of State, beyond the sums drawn by him from the treasury, under the several appropriations to which they respectively refer.

EXPENDED BEYOND APPROPRIATIONS.		
<i>Prize causes.</i> —Amount accounted for under that head, per Mr. Kimball's statement, -	67,235 59	
Balance due from him, per report No. 11,356, -	54,003 76	\$13,231 83
<i>British treaty.</i> —Amount accounted under that head, per same statement, -	79,923 31

It is believed that the Secretary of the Treasury may, with the consent of the Secretary of State, draw warrants in favor of T. Pickering, to be paid out of unexpended balances of appropriations, which will cover the whole of the above expenditure, the following sums excepted, for which new appropriations will be wanted, viz:		
Prize causes, -	-	8,231 82
Spanish treaty, -	-	1,020 63
General Lafayette, -	-	5,509 57
		<u>14,762 02</u>

TREASURY DEPARTMENT, *April 9th*, 1802.

SIR:

I have the honor to enclose the statement, marked D, of the balance standing charged to individuals in the treasury books, on the 31st December, 1801, and amounting to \$29,167,638 65.

These might be arranged under two general classes, viz: those which result from advances made to officers or agents, no longer in service, or whose agency has expired; and those made to officers and agents still in service; but, in order to give a clearer view of the subject, the first class has been subdivided into three distinct classes.

The first comprehends all settled accounts, where the balances actually due have been ascertained, amounting to \$256,108 98.

The second includes all the accounts of persons no longer in service, which have been rendered in whole or in part, but which are not yet definitively settled, and amounts to \$3,129,863 34.

The third includes all the advances made to persons no longer in service, and for which no accounts have yet been rendered, amounting to \$599,268, (exclusively of the specie in the treasury, which is arranged under this head.)

The fourth embraces all the accounts current of officers and agents, now in actual service, and amounts to \$21,887,007 33; but the balances there exhibited must be considered as nominal, as it is presumable that the whole has been or will be applied and accounted for.

It is probable that a great part of the balances exhibited in the second and third class will, in a similar manner, be accounted for, and it is not practicable, until a final settlement shall take place, to ascertain in what cases a real balance will actually be due to the United States.

Each of those classes is arranged under the several heads of the civil list, miscellaneous, foreign intercourse, military establishment, naval establishment, and public debt; and marginal notes have been added to such particular balances as seemed to require explanation.

To my letter of the 21st of January last, were annexed three statements, marked A, exhibiting the amount of moneys drawn from the treasury on account of the military and naval establishments, from the 1st of January, 1797, to the 31st of December, 1801. In order to shew more clearly the connexion between these and the accounts which appear on the books of the accountants of those two Departments, several auxiliary statements marked A 1 to A 9, are herewith transmitted.

The statement A 1 shews the moneys paid to the Treasurer, as agent of the War Department, and consisting of the following items, viz:

1st. Warrants included in statement A, annexed to letter of 21st January last,	-	\$7,400,563 01
2d. Payments on account of Indian treaties,	-	44,380 00
3d. Payments charged in books of the Secretary of the Treasury to the appropriations of naval department, but accounted for by the Treasurer, as agent for the War Department,	-	38,250 00
4th. Repayments by individuals to the Treasurer, as agent for the War Department,	-	60,482 83
		<u>\$7,543,675 84</u>

The statement A 2 exhibits the moneys advanced on account of the military establishment to individuals other than the Treasurer, and amounting to

Which, added to the first above stated item of payments to the Treasurer,	-	\$2,464,333 40
	-	7,400,563 01
		<u>\$9,864,896 41</u>

Constitutes the amount stated in statement A, annexed to the letter of the 21st of January last, as drawn out of the treasury, on account of the military department.

The statement A 3 is the Treasurer's account as agent for the War Department, for the same period of five years, in which he is charged with the above stated sum of	-	\$7,543,675 84
And, with a balance in his hands on the 1st January, 1797,	-	4,877 18
		<u>\$7,548,553 02</u>
Total debit,	-	<u>\$7,548,553 02</u>

And in which he is credited for the following items, viz:

1st. Paid to sundry individuals on warrants of the Secretary of War, and charged to the general account of "accountant of the War Department,"	-	\$7,451,270 86
2d. Paid for remittances to Europe for purchase of salt-petre and arms, and not charged to the accountant's account,	-	74,471 86
Leaving a balance in his hands, on the 31st December, 1801, subject to the warrants of the Secretary of War,	-	22,810 30
		<u>\$7,548,553 02</u>

The accountant of the War Department stands charged with the following sums, viz:

1st. The amount of advances made to individuals prior to, and remaining unaccounted for on, the 1st January, 1797, amounting to	-	\$1,756,391 36
2d. The amount of warrants drawn on the Treasurer, as per above,	\$7,451,270 86	
To which add warrants drawn on, but not presented for payment to the Treasurer,	-	505 09
		<u>7,451,775 95</u>
3d. Transfers from his books to those of the treasury, being advances made to the War Department, by individuals who had previously received moneys from the treasury, and whose credits, resulting from those advances, have been carried to their treasury accounts, and amounting, per statement A, to	-	59,351 89
4th. Transfers from the treasury books to those of the accountant, being advances made by the treasury to individuals who have applied the same for the use of the War Department, and whose debits, resulting from those advances, have been carried to their accounts in the books of the accountant, to whom they have become accountable for the same, and amounting, per statement A 5, to	-	945,350 51
5th. Interest and sundry variations,	-	246 72
		<u>\$10,213,116 43</u>

And the accountant accounts for that amount—

1st. By the aggregate of accounts of individuals settled by him, and rendered to the treasury,	\$6,335,923 93
2d. By the amount of balances still charged in his books, to individuals, who either owe the same on a settlement, or whose accounts have not been rendered to the accountant, or are under examination in his office,	3,877,192 50
	<u>\$10,213,116 43</u>

The statement A 6 shews the moneys advanced to the Treasurer, as agent for the Navy Department, amounting to

The statement A 7, those advanced on same account to other individuals,	-	\$8,933,389 09
	-	1,243,494 64
		<u>\$10,176,883 73</u>

The statement A, annexed to the letter of 21st January last, exhibited as the amount advanced to that Department, both to the Treasurer and to individuals,

To which adding a warrant for a certain advance made by Sharp Delany, and not included in that statement,	-	\$10,214,123 73
	-	1,010 00
		<u>\$10,215,133 73</u>

And deducting the sum as above stated, accounted for by the Treasurer, as agent for the War Department, viz.

	-	38,250 00
		<u>\$10,176,883 73</u>

The statement A 8 is the Treasurer's account as agent for the Navy Department, in which he is charged with,

1st. The amount advanced to him, by the Treasurer, as per statement A 6,	-	\$8,933,389 09
2d. Repayments made to him by individuals, on account of Navy Department,	-	9,477 71
		<u>\$8,942,866 80</u>

And in which he is credited for the amount of moneys paid by him on warrants drawn on him by the Secretary of the Navy,	\$8,920,642 45
Leaving a balance in his hands, on the 1st of January, 1802, of	22,224 35
	\$8,942,866 80

The accountant of the Navy Department stands charged with the following sums, viz:

1st. Amount of warrants paid by the Treasurer, as per above,	\$8,920,642 45
Do. drawn, but not yet presented to the Treasurer for payment,	620 25
	8,921,262 70
2d. Accounts transferred from the books of the accountant of the War Department,	17,293 55
3d. Accounts transferred from the treasury books, amounting, per statement A 9,	330,967 12
4th. Navy six per cent. stock, given in payment of sundry vessels,	711,790 36
Amounting altogether to	\$9,981,313 73

For which he accounts in the following manner, viz:

1st. Aggregate of individual accounts settled by him and rendered to the treasury,	\$5,810,661 98
2d. Balances charged on his books to individuals, on 31st December, 1801,	4,170,651 75
	\$9,981,313 73

This amount is such as it stood on the 1st day of this year, and will, therefore, be found to differ, in several particulars, from that furnished by the accountant to the committee, as this last extends to the 1st day of March, 1802; and the balances stated by both the accountants, as charged on their books to individuals, differ from those stated in statement D, of balances on the treasury books, there being several quarterly accounts rendered by the accountants, and not yet settled at the treasury, nor entered on the books of this Department.

As connected with this subject, and showing in what manner the respective duties of the Secretary of War and of the accountant seem to have been understood, the transcript of a letter from the Secretary to the accountant, written on the 28th December, 1797, an official copy of which is in this office, is, herewith, transmitted.

On this letter it appears necessary for me explicitly to state, that I consider one of the principles there assumed as altogether inadmissible. The paragraph to which I allude is this: "And for expenditures of such a nature as are not to be made public, the President will, from time to time, direct certificates to be made, which are to serve in lieu of the vouchers ordinarily required in the settlement of accounts."

A similar power is, by law, given to the President, in relation to the expenses of intercourse with foreign nations; but this is the only object for which moneys may be accounted for in that manner.

The law does not, in any other instance, recognise or appropriate for secret service; nor is there any power vested in the President to substitute, in the settlement of a war or any other account, (foreign intercourse excepted) his certificate to the act of the Legislature necessary to authorize the expense, and to the vouchers requisite to substantiate the charge.

A contrary opinion having been formed by the former Secretary of the Treasury, his report to the President, dated 20th December, 1799, is also transmitted.

Sensible as I am that the committee could not enter into a regular and methodical investigation of the objects of their appointment, unless they were previously furnished with the general information supplied by the accounts which are now enclosed, I regret that they have necessarily been delayed to this time; but correctness was considered as essentially necessary, and it has not been practicable, under the pressure of other business, to complete a revision of the whole at an earlier period.

I have the honor to be, respectfully, sir, your most obedient servant,

ALBERT GALLATIN.

Hon. JOSEPH H. NICHOLSON, Esq., *Chairman of the Committee of Investigation.*

D.

Balances due on personal accounts, in the Books of Receipts and Expenditures of the United States, on the 31st of December, 1801.

FIRST CLASS,

Including all settled accounts, where the Balances actually due have been ascertained.

ADVANCES ON ACCOUNT OF THE CIVIL LIST.

Names.	Capacity.	Amount.	
Michael Payne, - - -	Late marshal N. Carolina,	\$1,059 54	Accounted for. Do. This will probably be a total loss, as the debtor is believed to have died insolvent.
Jabez G. Fitch, - - -	do. Vermont,	1,125 08	
Isaac Huger, - - -	do. S. Carolina,	100 00	
John Hall, - - -	do. Pennsylvania,	7,382 16	
William Nichols, - - -	do. do.	1,469 53	He has claims of various kinds, amounting to about \$4,500. Pending before Congress.
David M. Randolph, - - -	do. Virginia,	853 02	
		\$11,989 33	He has some claims on account of taking the census, though he has requested to be sued for the balance here stated to be due from him, in order that the question of his liability therefor (which he denies) may be decided.

Domestic Expenditures of a Miscellaneous Civil nature:

John Halstead, - - -	Late agent for paying invalids in New Jersey.	\$1,005 66	Accounted for, excepting about the sum of \$180, which will soon be paid.
William Skinner, - - -	do. N. Carolina,	1,660 05	
Noah Smith, - - -	do. Vermont, -	275 05	Judgment has been obtained, though it is not known that the money has yet been collected.
Republic of France, - - -	Their suspense account in relation to moneys advanced for relief of certain inhabitants of St. Domingo.	15,000 00	
Gustavus Scott, and others, -	Commissioners of the city of Washington.	110,000 00	\$100,000 of this money compose a loan made by the United States; the remaining \$10,000 were appropriated and advanced for making footways in the city of Washington, the accounts of which have been stated by the Auditor.
William Shannon, and others,	- - -	5,156 65	
		\$133,097 41	This debt is amply secured by real property in Georgetown.

Foreign Intercourse.

Nathaniel C. Higginson, -	Late agent to the British West Indies.	\$8,833 00	In suit, though its issue is uncertain. In suit since the year 1797, but not yet determined.
Edmund Randolph, -	Late Secretary of State, -	51,077 89	
Thomas Appleton, -	Late consul, Leghorn, -	182 20	
		\$60,093 09	

FIRST CLASS—Continued.

Military Establishment.

Names.	Capacity.	Amount.	
John Wilkins, jr. and others,	Their account of bonds, -	\$14,000 00	This was a debt originally due by Scott and Ernest, but afterwards secured by three bonds, the first of which has been paid.
Richard Edwards, and others,	Contractors for cannon ball,	161 63	In suit, though its issue is uncertain.
Theodosius Fowler, -	Late contractor for supplying troops.	10,799 29	Ditto.
George & J. Gilbert, -	Late contractors for clothing,	1,972 69	Accounted for.
David Poe, - -	Contractor for supplying troops at Baltimore.	78 74	Ditto.
William Skinner, - -	Late agent for paying the late North Carolina line.	1,685 43	Judgment has been obtained, though it is not known that the money has yet been collected.
Peyton Short, - -	Agent for purchases, Kentucky.	517 85	In suit, though its issue is uncertain.
Ephraim Blaine, - -	Late assistant quartermaster of militia.	3,065 74	In suit. No apprehension of loss is entertained.
Joseph Howell, - -	Late acting paymaster general.	3,390 95	This will probably be a total loss, as the debtor is believed to have died insolvent.
Benjamin Lincoln, & others,	Late commissioners for negotiating a peace, (a peace with the Indians.)	1,901 79	These accounts are involved in some difficulty, but attempts will be made, upon the return of Mr. Humphreys, (one of the commissioners) to the United States, to have them finally settled and closed.
Do.	Their account of Indian goods.	8,280 14	
Potts and Gibbs, - -	Contractors for supplying the troops at Wilmington, North Carolina.	100 00	They have been lately written to, to refund this money.
John Ragan, - -	Ditto, at Hagerstown.	100 00	In suit.
		\$46,054 25	

Naval Establishment.

John Blagge, - - -	Late naval agent, N. York.	\$1,480 91	In suit, though a recovery is somewhat doubtful, from the circumstances of the debtor.
--------------------	----------------------------	------------	--

Public Debt.

William Skinner, - -	Late agent for paying interest in North Carolina.	\$2,047 48	Judgment has been obtained, though it is not known that the money has yet been collected.
Robert Rowan, - -	Ditto. Ditto.	400 00	This it is expected will shortly be paid.
Thomas Smith, - -	Ditto, Pennsylvania.	946 51	It is alleged that his estate is entitled to further credits.
		\$3,393 99	

SECOND CLASS,

Including the accounts of all persons no longer in office, or whose agencies have ceased, and which have been rendered in whole, or in part, but are not yet settled.

ADVANCES ON ACCOUNT OF THE CIVIL LIST.

Names.	Capacity.	Amount.	
Jacob Graybill, - -	Late Marshal, Maryland.	\$3,593 64	This money, it is supposed, has all been applied to public purposes.

Domestic Expenditures of a Miscellaneous Civil nature.

John Marshall, - -	Late Secretary of State, his account in relation to expenses of exploring copper mines on Lake Superior.	\$1,500 00	It appears by the report of the auditor, that this money was paid over to Rich. F. Cooper, who will be debited therefor. Accounts rendered, but not finally settled. Accounted for.
Timothy Pickering, - -	Late Secretary of State, agent for paying the contingent expenses of Government.	8,986 07	
Edward Blake, - -	Superintendent of light houses in South Carolina.	175 55	
Stephen N. Bayard, - -	Agent for the Board of Commissioners, New York.	15,000 00	
Cornelius Howard, - -	Ditto in Maryland.	7,700 00	
Jacob Radcliff, - -	Ditto in New York.	20,871 00	
Thomas Turner, - -	Ditto in Maryland.	10,500 00	
James White, - -	Ditto in Tennessee.	5,472 83	
James Watson, - -	Ditto in New York.	1,128 35	
Paul Zantzinger, - -	Ditto in Pennsylvania.	45,010 58	
		\$116,344 38	

Foreign Intercourse.

John Dawson, - -	Agent for carrying despatches to the French republic.	\$1,000 00	Services have been rendered, which it is supposed will balance this account.
John Marshall, - -	Late Secretary of State, his account in relation to the diplomatic department.	50,568 76	
Ditto, - -	His account in relation to the British treaty.	4,520 00	Accounts rendered, but not finally settled.
Ditto, - -	Ditto, Algerine treaty.	53,389 95	
Ditto, - -	Ditto, relief, &c. American seamen.	15,000 00	
Ditto, - -	Ditto, Spanish treaty.	1,235 51	
Ditto, - -	Ditto, treaties with Mediterranean Powers.	6,424 00	
Ditto, - -	Ditto, prize causes.	43,999 99	
Timothy Pickering, - -	Late Secretary of State, his account of foreign expenditures.	911,712 28	Accounts rendered, but not finally settled.
Ditto, - -	Ditto, prize causes.	54,003 76	
John and Francis Baring, of London, - -	- - - -	800,000 00	Accounted for.
Andrew Ellicott, - -	Late commissioner for running the line between the United States and Florida.	622 10	
		\$1,942,476 35	

SECOND CLASS—Continued.

Military Establishment.

Names.	Capacity.	Amount.	
Thomas Carneal, - -	Agent for purchasing spirits,	\$6,000	The accounts rendered are so imperfect, as to have hitherto prevented any attempt at a settlement.
George Gale, - -	Late agent for military supplies, - - -	36,000	
Ditto, - - -	Ditto, for paying the Maryland militia in 1794, - -	5,758 16	These accounts have been examined in the auditor's office, but, for want of a few additional vouchers, no report upon them has yet been made. The balance, whether in favor of, or against the public, will be inconsiderable.
Josiah Harmar, - -	- - -	250	
Samuel Hodgdon, - -	Late Quartermaster General,	280 42	
Henry Miller, - -	Ditto do. of militia, -	162,111 68	
		\$210,400 26	Accounted for. Ditto.

Naval Establishment.

Joseph Copperthwaite, -	Late agent for procuring materials for the frigates, -	\$19,540 19	
John T. Morgan, - -	Late superintendent of woodcutters,	14,837 30

From which deduct this sum accounted for by him to the War Department in	-	-	-	-	1797	11,250	38,250 00
ditto,	-	-	-	-	1798	27,000	
Leaves the amount advanced to the Treasurer, as <i>agent for the Naval Department</i> ,	-	-	-	-	-	-	8,933,389 09
per Register's statement,	-	-	-	-	-	-	

A 7.

Statement of moneys paid to individuals on account of the Naval Department, from the year 1797 to the year 1801, both inclusive, specifying the particular accounts to which the same have been charged in the books of the Secretary of the Treasury.

<i>Particular Accounts.</i>							
For finishing frigates United States, Constitution, and Constellation,	-	-	-	-	1797	\$372,662 95	\$494,714 62
ditto,	-	-	-	-	1798	122,051 67	
Purchase, &c. of twelve vessels,	-	-	-	-	1798	-	520,561 00
Building and equipping three vessels of not less than thirty-two guns,	-	-	-	-	1798	-	6,125 57
Building and equipping ten galleys,	-	-	-	-	1798	14,000	26,510
ditto,	-	-	-	-	1799	12,510	
Wear, losses, and contingent expenses of the Navy Department,	-	-	-	-	1798	1,804 48	5,659 31
ditto,	-	-	-	-	1799	3,854 83	
Pay and subsistence of officers and crews of the frigates,	-	-	-	-	1798	-	101,363 11
Support of navy,	-	-	-	-	1799	555 01	88,561 03
ditto,	-	-	-	-	1800	69,191 03	
ditto,	-	-	-	-	1801	18,814 99	
							\$1,243,494 64
Amount advanced to Treasurer, per above statement,	-	-	-	-	-	-	8,971,639 09
ditto ditto to individuals ditto,	-	-	-	-	-	-	1,243,494 64
							\$10,215,133 73
Amount advanced, per former statement, transmitted to the committee of investigation,	-	-	-	-	-	10,214,123 73	10,215,133 73
To which add, amount of warrant No. 2,505, then omitted,	-	-	-	-	-	1,010	

NOTE.—The warrant No. 2,505, for \$1,010, mentioned at foot of the statement as having been omitted in former statement, is the warrant issued to cover a payment made by Sharp Delany. It was not *actually* issued till after the former statement was made out, though, as it bears date 31st December, 1801, it is necessary that it should be included in the statement for that year. This is the reason why it was not included in the former statement.

Dr. { *A Summary Statement, shewing the amount charged in the printed public accounts as advanced to the Treasurer of the Naval Department, on account of the building and purchasing ships of war, pay and subsistence of the officers and seamen, and contingencies thereof, from the institution of the Department of the Navy, to the 31st December, 1801, compared with the accounts of the Treasurer and Accountant of said Department, for the same period.* } Cr.

TREASURY DEPARTMENT,

Register's Office, April 5, 1802.

JOSEPH NOURSE, Register.

The amount of navy stock, as exhibited by the accountant of the navy, agrees with the amount stated upon the books of the treasury of the United States, - - - - - \$711,790 00

E.

Balances due the United States on the 31st December, 1801, on the Books of the Accountant for the Department of War.

Ledger Folio.	Names.	Rank.	Dolls. Cts.	REMARKS.
185	David Allison,	- -	4,765 49	Balance of moneys remaining to be accounted for; the greater part were advanced in the year 1792, and of which \$468 64 is secured by bond; all applications made to Mr. Allison to account for the balance, were ineffectual, and he has died without leaving any means for paying it.
302	William Armstrong,	Lieutenant,	132 00	Received in 1792, on account of pay and for recruiting service, on a final settlement of Captain John Smith's company of levies, to which Lieutenant Armstrong was annexed; a balance will be found due to him after accounting for this sum.
840	Hamilton Armstrong,	Ensign,	56 00	Balance due on settlement of his account in October, 1799,
856	John Adair,	Capt. Militia,	4,971 33	Received in 1792, for pay of mounted militia for services in 1792, on the frontiers of Kentucky; Captain Adair has not produced receipts, but it is probable that the money has been duly applied, as the services rendered were by persons all living in his neighborhood.
1,043	Samuel Annin,	Paymaster and store keeper,	7,574 40	Balance remaining in his hands out of moneys advanced on account of expenditures at the armory at Harper's Ferry, per settlement, 20th December, 1801, to be accounted for quarterly. This sum will, accordingly, be accounted for in the quarter ending the 31st March, 1802.
1,051	Samuel Allinson,	Ensign,	134 00	Received in 1798 and 1800, on account of the recruiting service, which has been accounted for with the paymaster; the vouchers not having come forward to this office for examination, no credit has been given.
1,079	John B. Armistead,	Capt. Cavalry,	100 00	Received in 1799, on account of pay; accounted for on settlement of the paymaster of cavalry's account.
1,084	Jonathan L. Austin,	Agent Fortifications,	58,022 45	Received in 1791, on account of the fortifications erecting for the defence of Boston, and for the purchase of cannon; his accounts were settled on the 10th March, 1802, for expenditures to the end of the year 1801, and a balance found due the United States, of \$17,891 36, which will be charged in next settlement.
1,373	James Armstrong,	Captain,	150 00	Received in 1794, on account of the recruiting service; not accounted for, no vouchers having been transmitted to this office.
1,372	Matthew Arbuckle,	Lieutenant,	174 00	Received in 1800, on account of the recruiting service; no vouchers have been forwarded to account for the expenditure of this money.
204	William Blount,	Governor,	1,000 00	Received in 1795, on account of contingent expenses of the Indian Department; frequent applications have been made to bring him to a settlement, but without effect.
221	Richard Butler,	Brigadier Gen.	200 00	Advanced in 1791, on account of pay; he was killed in action, and no vouchers have been received to account for this money.
254	John Bowyer,	Lieutenant,	1,540 40	\$270 received in 1798, on account of the recruiting service, and for pay, \$1270 40 in 1799 and 1800, on account of pay, subsistence, &c. of the army; the paymaster general has been directed to call him to account, and to stop his pay until he complies.
257	William Buchanan,	Captain,	880 63	Remaining out of moneys received in 1792, for balance of pay due his company of levies; he has not produced the receipts necessary to exonerate him from, although he has been written to and requested to close his accounts.
258	Buchanan's company,	- -	450 88	This amount is chargeable to pay of the army; the vouchers are retained in this office as evidence, until the payments are complete, therefore, has not been carried to the head of expenditure.
279	William Balch,	Ensign,	72 79	Balance remaining out of moneys received in 1791, on account of the recruiting service; he was killed on the 4th November, 1791.
299	Joseph Brock,	Captain,	274 80	Balance remaining on settlement of his account 5th October, 1801; he has been frequently called upon to account for this sum, but without effect.
331	— Byrnes,	Sergeant Major,	1 33	Missing on the 4th November, 1791, received on account of pay; he will have a balance due him on general settlement of the levies.
348	Lewis Bond,	Ensign,	603 60	Received in 1793, for the pay of himself and detachment to the 31st December, 1792; accounted for in January, 1802.
368	George Baynton,	- -	45 05	Balance remaining on settlement of his account 18th August, 1797, to the day of his death.
393	Thomas Bodley,	Ensign,	560 00	\$60 received in 1794, on account of three months' pay, \$500 in 1795, on account of the recruiting service, from the paymaster general, ascertained from the settlement of his account; he has been called upon to liquidate his account.
442	Patrick Brown,	County Lieut.	677 33	Advanced in 1794 for the pay of the scouts of Harden county, for their services in 1793—has not produced the receipts of the individuals who performed the service.
464	Thomas Barbee,	Ditto.	481 86	Advanced in 1793 for the pay of the scouts of Mercer county, for their services in 1790 and 1793—has not produced the receipts of the individuals who performed the service.
472	John Betson,	Quartermaster Militia,	422 92	Received in 1795, for supplies furnished a detachment of militia, called out to seize and detain the ship Le Jemeaux. This money, no doubt, has been applied for the purposes intended; but though Mr. Betson has been called upon to produce the receipts of the individuals, not any have been ever received.

558	Daniel Britt,	Captain,	1,138 26	This amount arises on settlement as paymaster; he has been under stoppages for many years past to cover it, which stoppages, to the 23d October, 1799, the day he died, fully balance his account.
820	Richard Butler,	Lieutenant,	76 00	Remaining out of moneys placed in his hands in 1797, on account of the recruiting service, and since refunded to Captain Isaac Guion.
823	James Bradford,	Captain,	240 64	Received of Daniel Britt, on account of pay and subsistence. Accounted for since the 1st January, 1802.
825	John Bradshaw,	Ensign,	61 33	Received of Daniel Britt, on account of pay and subsistence.
836	John Bird,	Ensign,	117 00	Received in 1793, for pay and subsistence from the 1st January to the 30th April, 1792. His account has been closed since the 1st January, 1802.
851	Thomas Butler,	Lieut. Colonel,	90 99	Balance remaining on settlement of his account, 25th February, 1800. Accounted for in 1802.
856	Joshua Barbee,	Capt. Militia,	800 00	Received in 1792, for pay of mounted militia of Kentucky, for services in 1792. He has frequently been called upon to produce the receipts of the individuals who performed the service, but without effect.
898	Russell Bissell,	Captain,	28 14	Received in 1791, for his subsistence, from the 4th March to the 31st December, 1791. Accounted for.
903	John Barry,	Temporary Surgeons' Mate,	60 00	Received in 1798, on account of pay. Accounted for.
929	Rich. Scott Blackburn,	Captain,	119 00	Balance of moneys placed in his hands on account of the recruiting service. Accounted for.
959	Edward Butler,	Captain,	1,029 67	\$1,000 received in 1799, on account of expenses in returning with Indians from Philadelphia to Tennessee. Accounted for with David Henley, agent Department of War in Tennessee.
967	William R. Boote,	Lieut. & Paymaster.	20,257 00	\$18,525, advanced by Caleb Swan, paymaster general, for the pay, &c. of the troops on the Mississippi, to February, 1800. He has forwarded his accounts to the paymaster general, which are not yet examined, but, no doubt, his expenditures will equal the sum received.
	Richard Baldwin,	Lieutenant,	60 00	Received in 1799 on account of pay. Accounted for.
984	Joseph Bohannan,	Capt. Militia,	496 69	Advanced by Edward Carrington, for services on the Western expedition, in 1794. He has not produced the receipts of the individuals, who performed the service, to exonerate him from the charge.
988	George Benn,	Major ditto,	215 07	Advanced by ditto for ditto. He has not produced the receipts of the individuals who performed the service.
995	Lemuel Bent,	Paymaster,	79,154 57	Advanced in 1799 and 1800, on account of pay and subsistence of the 8th regiment, and on account of the recruiting service. He has rendered his accounts to the paymaster general, which have not yet been examined. He will, from their appearance, account for all public moneys placed in his hands.
1004	Daniel Bradley,	Major,	250 56	Advanced in 1796, on account of the recruiting service. The paymaster general has been directed to make stoppages on his next settlement, to cover this amount.
1014	Jared Brooks,	Lieutenant,	123 45	Balance remaining on settlement of his account as paymaster, 31st March, 1801; reported to the paymaster general, to be stopped from his pay, on the next settlement of his account.
1020	James Bruff,	Captain,	757 01	\$608 56 received in 1800 for the pay of his company, and for contingent expenses; this sum will be accounted; \$148 45 accounted for.
1056	Philemon C. Blake,	Paymaster,	4 00	Balance remaining on settlement of his account, on re-examination at this office.
1060	James V. Ball,	Capt. Cavalry,	1,227 78	\$170 received of Captain Smith, on account of the expenses of a detachment of dragoons from Knoxville to Philadelphia; \$230 received for recruiting, and for expenses marching a detachment of troops; \$827 78 ditto, on account of pay, subsistence, and forage. Captain Ball's account will be closed prior to leaving the service; he was deranged by an act of Congress, passed the 12th March, 1802.
1070	James Barnett,	County Lieut.	754 50	Advanced in 1793, for pay of scouts of Madison county, for their services in 1790 and 1792. He has produced no receipts from the individuals, who performed the service, to exonerate him from the charge.
1071	Alexander S. Bullet,	County Lieut.	682 16	Advanced in 1793, for pay of scouts of Jefferson county, for their services in 1790. He has not produced any receipts from the individuals who performed the service.
1072	Daniel Bryan,	Hospital store-keeper,	341 56	Advanced in 1794, for the pay of the nurses of the general hospital, for their services in 1793 and 1794; the receipts of the nurses are only wanting to close this account.
1367	John Braham,	Lieutenant,	150 00	Advanced to him in 1801, on account of the recruiting service; accounted for, since the 1st January, 1802.
	Robert Bell,		80 00	Balance of moneys remaining in his hands, out of advances, on account of the recruiting service; accounted for in the year 1802.
1376	George Barron,	Teacher at West Point.	300 00	Advanced in 1801, on account of his salary, as teacher of mathematics at West Point. Accounted for since the 1st January, 1802.
186	Charles Campbell,	County Lieut.	10,216 66	} Balance, for which no receipts have been forwarded, is \$6,038 33; he has been repeatedly called upon for the vouchers to account for the expenditure thereof, and appearances are now in favor of a final settlement.
	George Clendinen,	County Lieut.	5,521 08	
			4,837 39	Advanced to him in 1792, for the pay of the militia and scouts of Kenhawa county, for their services in 1790 and 1791; this amount was advanced upon full evidence that the service was performed, and all that is wanting are the receipts of the individuals, who performed the service, to close his accounts.
191	James Collins,		1,600 00	Advanced in 1792, on account of the recruiting service, and on account of supplies to the troops at Reading; no accounts have ever been rendered to this office for the expenditures thereof; it is probable that great part of the money has been expended, but, owing to the situation of Mr. Collins, no hopes are entertained of ever receiving any evidence thereof.

E—Continued.

Ledger folio.	Names.	Rank.	Dolls. Cts.	REMARKS.
206	James Carey,	Indian interpreter,	1,325 00	Advanced in 1796, 1797, and 1798, on account of the Indian department; accounted for with David Henley, agent for the Department of War.
228	John Clarke,	Major,	866 91	Received of Major William Ferguson, in 1791, on account. Accounted for.
232	John Cribb,	Captain,	90 47	Balance remaining out of advances to him by Colonel Gibson, on account of pay, and for the recruiting service; this amount will be accounted for, on a general settlement of the levy accounts.
	Cribb's company of levies,	-	208 26	This amount is chargeable to pay of the army; the vouchers are retained in this office, as evidence, until the payments are complete; it has not, therefore, been carried to the head of expenditure.
243	Henry Carberry,	Captain	1,274 50	\$425 34 advanced in 1792, on account of pay. \$750 00 ditto, in ditto, for the pay of his company of levies. \$ 99 16 ditto, in 1791, on a bill of exchange drawn on account.
	Ditto,	-	646 86	\$500 00 advanced, in 1792, on account of the pay of his company of infantry. \$ 46 86 ditto, in 1792, for balance of his pay and subsistence to 1st of August, 1792. Mr. Carberry has been frequently called upon to settle his account; he states that his vouchers were lost, and that, from his officers, he can make it appear that all the moneys were properly applied, and a considerable balance is now due to him.
248	Robert A. Campbell,	Lieut. Cavalry,	1,328 74	\$500 00 advanced him in 1792, on account of the recruiting service. \$828 74 advanced him in 1792, on account of pay, subsistence, and forage, and for contingent expenses. He was killed on 25th August, 1794, before any of his vouchers had been rendered; it is, however, probable that a greater part of this money has been duly expended.
270	Samuel Cochran,	Lieutenant,	4 33	Balance due on settlement of his account.
291	John Crawford,	Captain,	1,022 00	Accounted for, in the present year.
292	John Cummings,	Lieutenant,	787 16	Advanced in 1792, for the balance of pay due to Captain Cribb's company of levies.
	Ditto,	-	1,000 00	Advanced in 1792, on account of the recruiting service. Mr. Cummings has accounted for the above \$1,787 16, except a balance of \$325 11.
311	Richard Call,	Major,	476 66	Received in 1791 and 1792, on account of his pay, forage, &c. Accounted for, except 100 dollars, advanced on account of contingent expenses, for which no vouchers have been produced.
320	James Cooper,	Captain,	249 70	Advanced in 1791, on account of pay of his company, and for bounties to thirty-two recruits; no vouchers have ever been produced for the expenditure of this amount.
322	Conway's company of levies,	-	360 95	This amount is chargeable to pay of the army; the vouchers are retained in the office, as evidence, until the payments are complete; therefore, it has not been carried to the head of expenditure.
361	William G. Cobb,	Ensign,	44 26	Advanced in 1791, on account of pay and subsistence; accounted for \$40.
362	James Clay,	Ensign,	6 50	
404	Arthur Coody,	Indian interp'tr.	150 00	Advanced in 1794, on account of his compensation as Indian interpreter; accounted for with David Henley, agent Department of War.
411	John Chisholm,	Conductor of Indians.	5,700 00	By accounts rendered, he claims a balance of \$738 35, but many of the vouchers being illegal, a balance is found due by him of \$806 24, to the United States.
441	John Caldwell,	County Lieut.	521 70	Advanced in 1794, for the pay of the militia and scouts of Washington county, for their services in 1793, duly authorized; the receipts of the individuals who performed the service, have not yet been transmitted, to exonerate him from the charge.
448	John Carson,	N. Carolina,	23,375 16	Advanced in 1794, and 1795, for the pay of the scouts, for their services on the frontiers of North Carolina, in 1794 and 1795, on muster and pay rolls. He was directed to proceed thence and make the payments, and was furnished with receipt rolls in blank, to have them signed by individuals who performed the service; but on returning the rolls, many of the signatures appear to have been written by one person, and the rolls are generally so irregular, that I have not considered myself authorized to admit any part to his credit.
455	John Conner,	Private,	46 00	
505	John G. Coffin,	Surgeon's mate,	218 82	Accounted for.
671	John Chester,	Supervisor,	25 34	Ditto.
706	Isaac Craig,	Pittsburg,	1,122 76	Balance remaining on settlement of his account, the 9th October, 1801, as paymaster to the troops in the vicinity of Pittsburg; will be accounted for, on next settlement.
736	Edward Carrington,	Supervisor,	5 44	Accounted for.
837	William Clark,	Lieutenant,	6 00	Balance remaining on settlement, December, 1796.

847	Thomas A. Claiborne,	Surgeon's mate,	90 00	Advanced in 1797, on account of pay; accounted for on settlement of the paymaster's accounts.
851	John Crawford,	Captain,	275 70	Accounted for since the 1st January, 1802.
859	Howell Cobb,	Ensign,	164 00	Received of Archibald Lee, paymaster, on account of the recruiting service; accounted for, but the vouchers not having come forward from the paymaster, the money could not be entered to his credit.
881	Samuel Crutchfield,	Ensign,	170 00	Advanced in 1797, and 1798, on account of pay; accounted for.
884	Richard Chandler,	Paymaster,	15,473 38	Accounted for, except \$8,361 85; the balance remains out of moneys placed in his hands, as paymaster to the 4th regiment; he died lately, and has left no means of paying the balance.
915	John Carmichael,	Surgeon,	59 06	Advanced in 1793, for the pay of the matrons of the hospital; accounted for. He states that he is in possession of the receipts, and will forward them immediately to this office.
945	Israel Chapin,	Indian agent,	3,395 00	Accounted for since the 1st January, 1802, on settlement of the accounts of the Six Nations of Indians, for the last year.
957	William Crafts,	Agent fortifications.	2,438 20	Balance of moneys remaining in his hands as agent of fortifications at Charleston, South Carolina, on settlement, dated 25th November, 1801, since which time no vouchers have been received.
977	Joseph C. Cornwell,	Surgeon's mate,	108 00	Advanced in 1799, on account of his pay and forage; accounted for, on settlement with the paymaster.
988	William Clark,	Ensign militia,	420 00	Advanced by Edward Carrington, for pay of militia, for services on the Western expedition in 1794. No receipts from the individuals have come forward to account for the application, although there is no doubt but the whole, or the greatest part, has been applied for purposes advanced for.
990	Edward Carter,	Captain,	402 50	Ditto, for ditto. No receipts from the individuals who performed the service have been transmitted to exonerate him from the charge.
991	Peter Carr,	Lieutenant,	459 34	Ditto, for ditto. No receipts from the individuals who performed the service; there is no doubt the money has been properly applied.
1023	Ferd. L. Claiborne,	Lieutenant,	280 00	Advanced in 1800, on account of the recruiting service; accounted for with the paymaster-general, since the 1st January, 1802.
1015	Cringen and Adams,	-	417 00	Advanced in 1799 and 1800, on account of medical services to the troops in Richmond, Virginia; accounted for per settlement, dated 1st January, 1802.
1062	Archibald Crary,	Agent fortifications.	1,811 06	Balance remaining on settlement, 10th September, 1801, out of moneys advanced on account of the fortifications at Newport, on statement, dated 2d February, 1802. A balance was found due the United States of \$1,003 92. Mr. Crary states a balance due himself, of \$698 55, arising from inadmissible and suspended claims.
1071	William Casey,	County Lieut.	836 66	Advanced in 1794, for the pay of the scouts of Green county, for their services in 1793. This money was advanced on muster and pay rolls, duly authenticated, and Mr. Casey was held accountable to produce the receipts of the parties who performed the service, which have not yet been sent to this office.
1072	John Callender,	Ensign,	216 00	Advanced in 1796, on account of the recruiting service; accounted for.
1076	William Colfax,	Contractor,	44,898 94	Advanced in 1801, on account of his contract for supplies to the troops of the United States. From the accounts lately rendered, it appears this money will be accounted for.
1090	Dodridge Crocker,	Contractor,	7,376 28	Advanced in 1781, on account of supplies to the troops of the United States, in the State of South Carolina, by accounts settled since the 1st January, 1802, and others lately received; he states a balance in his favor.
1353	Joseph Clarke & Co.	Contractors,	4,355 00	Transferred from the treasury books for settlement at this office, in 1801, being advanced on account of their contract for fabricating small arms; accounted for on settlement, 12th March, 1802.
1354	Chipman Crafts & Co.	Do.	12,395 00	Ditto, ditto; accounted for on settlement since the 1st January, 1802.
1361	Nath. & Henry Cobb,	Do.	2,680 00	Ditto, ditto; accounted for on settlement since the 1st January, 1802.
1361	Samuel Clinton,	Lieutenant,	120 00	Advanced on account of recruiting. He has not transmitted any vouchers for the expenditure of this money.
1362	William Carson,	Do.	30 00	Advanced by Captain Heth, on account of the recruiting service. He has not transmitted any vouchers for the expenditure of this money.
1362	Walter Crocker,	County Lieut.	2,083 91	This sum was advanced for the pay and rations of militia and rangers of Wythe county, Virginia, for the year 1791, on duly authenticated muster and pay rolls; he was accountable to produce the receipts of those who performed the service; he has forwarded receipts except for a balance of \$154 49, due the United States.
247	William Davidson,	Lieut. Cavalry,	932 60	\$566 advanced in 1792, on account of the recruiting service. \$366 60, do. on account of pay, subsistence and forage, and for contingent purposes. Of the above sums, it is probable that \$432 60 has been duly applied; for the balance, no vouchers have ever been received, or in all probability ever will be received, from the situation of the officer.
261	Samuel Drake,	Ensign,	50 00	Advanced in 1792, on account of the recruiting service. No vouchers have ever been received for the expenditure of this money.
280	George Deimler,	Paymaster,	19,717 71	Advanced in 1795 and 1796, on account of pay and forage, and for recruiting one battalion of artilleryists and engineers. His accounts are lodged with the paymaster-general for examination. It is probable that the whole amount has been duly applied.
297	William Divan,	Lieutenant,	871 80	\$420 received in 1799 and 1800, on account of the recruiting service. \$370 ditto, in 1799, for ditto. Balance arises from a running account. No vouchers have been produced for the application of the money due by him, he having gone to Georgia without effecting a settlement.
333	James Denny,	Q'r. M. Surgeon	1 33	Advanced on account of pay.

E—Continued.

Ledger Folio.	Names.	Rank.	Dolls. Cts.	REMARKS.
479	James Dunham,	Major militia,	222 00	Advanced in 1795, for pay of a guard on prisoners, on their way from Bedford to Philadelphia. On settlement of the general militia account of the Western insurrection, this money will be entered to the credit of Major Dunham, it having been duly applied.
508	William Dangerfield,	Ensign,	20 00	This sum was over-paid him, and not discovered by the paymaster, who made the payment, until after his death.
822	Ebenezer Denny,	Lieutenant,	509 00	Advanced by Daniel Britt, late paymaster, on account of pay and subsistence; accounted for, and will be entered to his credit.
825	George H. Dunn,	Cornet,	50 10	Advanced by Daniel Britt, late paymaster, on account of pay and subsistence; accounted for, and will be entered to his credit.
829	Thomas Doyle,	Captain,	100 00	Transferred from the treasury books, in 1800, for settlement at this office. No vouchers have been transmitted to account for the expenditure of this money.
835	Joseph Dickinson,	Lieutenant,	360 19	Remaining due by him on settlement of his account, the 31st December, 1801. He states that he paid this balance over to an officer of the army, who, on application, refuses to acknowledge it. Lieutenant Dickinson is dead, and the probability is, that this money will never be recovered.
865	Larkin Dickinson,	Ensign,	200 00	Advanced by Captain Alexander Gibson, on account of expenses in marching a detachment from Staunton, Virginia, to Knoxville, Tennessee; accounted for on settlement, made since the 1st January, 1802.
925	George W. Duncan,	Lieutenant, -	7 59	Balance remaining out of advances in 1798, on account of the recruiting service.
930	William Deveaux, -	Lieutenant, -	200	Advanced in 1798, on account of the recruiting service. No accounts have been rendered for the application of this money, although it is probable that it has been duly applied, Lieutenant Deveaux having enlisted a number of men.
989	Elisha C. Dick, -	Capt. Militia, -	641 41	Advanced by Edward Carrington on account of the pay of militia on the Western expedition in 1794. No receipts from the individuals who performed the service, have been sent to this office to exonerate him from the charge; but, in all probability, the money has been duly applied.
994	Robert Duncan, -	Paymaster, -	11,601	Advanced in 1799 and 1800, on account of pay of the 14th regiment and for the recruiting service; in accounts rendered to the Paymaster General, there appears a balance due by him of \$12,900 45; out of this he has probably expended about \$10,000, for which no vouchers have been received. He has repeatedly been applied to, and lately, he has promised to send forward his vouchers immediately.
1,010	James Dill, -	Lieutenant, -	140	Advanced by Captain John Heth on account of the recruiting service. He has not transmitted any vouchers for the expenditure.
1,083	Dwight & Byers, -	Contractors, -	1,000	Advanced in 1801 on account of their contract for supplies to the armorers at Springfield, Massachusetts. Accounted for in settlement since the 1st January, 1802.
346	Richard Evans, -	Ensign, -	236	Advanced in 1791 for two months' pay on account of the recruiting service—\$36 accounted for, for the balance no vouchers have been rendered; but, from its being an advance to pay a certain number of recruits, it is probable they were all enlisted before he received the money.
392	John Edwards, -	County Lieut.	528 07	Advanced for the pay of the militia of Kentucky for their services in 1791. He states, on being applied to for a settlement, that a person in his employ had made payment, and lost the vouchers. He has been written to, and the supervisor of the State has been directed to urge a settlement, or that suit would be commenced.
419	Theophilus Elmer, -	Lieutenant, -	134 23	\$24 73, balance due by him on settlement the 18th June, 1799; \$109 50 advanced in 1800, on account of pay. The above sums have been accounted for, but the paymaster's accounts have not yet been transmitted.
445	Elliott & Williams, -	- - -	10	
494	Andrew Ellicott, -	- - -	200	Advanced in 1795, for the purpose of erecting a saw mill at Presqu' Isle, for the use of the garrison. The mill has been erected, but no account of the expenditures thereof; it is probable that nearly the whole amount has been applied in effecting that object.
996	Solomon Ellis, -	Contractor, -	51,646 60	\$21,383 77, advanced in 1799 and 1800, on account of supplies to the troops of the United States in Georgia; \$30,262 83, advanced in the Treasury Department, transferred for settlement at this office in 1801. His accounts are in a train for settlement.
1,077	Daniel Elam, -	Ditto, - -	9,433 56	Advanced in 1800, on account of his contract for supplying the troops in Georgia with rations. This amount has been assumed by Solomon Ellis, whose accounts are in a train for settlement.
1,354	Owen Evans, -	Contractor, -	13,043 20	Advanced in the Treasury Department, on account of his contract for the fabricating small arms, transferred to the books of this office in 1800.
1,363	Thomas Eastland, -	Lieutenant, -	160 40	Advanced in 1799, on account of pay and subsistence—accounted for.
	John Evans, -	Capt. Militia, -	231 60	Advanced him for the pay of a company of militia of Monongalia county, Pennsylvania, for which he was accountable to produce the receipts of the individuals; but none have ever been received, though it is probable the money has been duly applied.

303	William Faulkner, -	Captain, -	2,141 92	\$1,000 received in 1792, on account of the recruiting service; \$1,141 92 ditto in 1792, for the pay of himself and company of riflemen, and for contingent expenses. He has rendered accounts for the expenditure of the above money, but, from the irregularity of some of the vouchers, they have not been entered; it is probable the whole amount has been duly applied, and, accordingly, on a revision of the account with the additional vouchers, since received, the amount will be entered to his credit.
425	Peter Frothingham, -	Ensign, -	200	Received in 1795, on account of the recruiting service. This amount will be accounted for in accounts rendered by the heirs of the deceased, for his pay and subsistence to the day of his death.
716	Nathaniel F. Fosdick, -	Collector, -	219 16	Accounted for.
857	James Flinn, - -	Ensign, -	2,649 50	\$698 received in 1792, for the pay of mounted militia for services in 1792. \$1,951 50 received in 1794, for pay of ditto for services in 1794. He has been frequently called upon by the paymaster general, and often promised to produce receipts. It is probable the money has been duly applied, as the parties entitled to the same, were his neighbors, and no complaint has ever been heard, on that score.
868	Constant Freeman, -	Major, -	980	Advanced in 1800, on account of the recruiting service. No accounts have been rendered for the expenditure, but there is no doubt but that the money will be duly accounted for.
943	Mahlon Ford, -	Major, -	200	Advanced in 1799, on account of pay. Accounted for, and will be entered to his credit on settlement of the accounts of the regimental paymaster.
958	John Ward Fenno, -	Printer, -	500	Advanced in 1799, on account of printing a system of artillery for the War Department. On being called upon, he states that the work has been performed and delivered, and that the sum charged was allowed for doing that duty.
1,031	John J. Feasch & Co.	Contractors, -	12,714 66	Advanced in the Treasury Department, on account of their contract for the fabrication and delivery of cannon, transferred for settlement at this office. On being called upon, they allege that they have complied with their contract on their part, but it is discovered that the shot will not bear inspection; it will, therefore, rest with the Secretary of War to decide on the subject.
1,079	Samuel R. Franklin,	Paymaster, -	69,978 21	Advanced in 1799 and 1800, on account of pay, forage, and subsistence of the 10th regiment, and for the recruiting service. The greatest part has, no doubt, been duly applied; but, although repeatedly called upon for his accounts, none have yet been received. He has promised a long time since to forward them, but shows no disposition to comply.
1,345	Henry Foxall, - -	Contractor, -	10,000	Advanced in 1801, on account of his contract for furnishing cannon, which are now casting; and this money will, no doubt, be duly accounted for on settlement of his account.
254	Archibald Gray, -	Ensign, -	160	Advanced in 1792, on account of the recruiting service. Accounted for \$89; leaving a balance due the United States of \$71, for which no vouchers have been received.
256	Henry Gaither, -	Lieut. Colonel,	4,215 01	Of this sum, \$2,891 01 has been admitted to his credit. The balance he claims, but the vouchers are not complete, and some of his charges are deemed inadmissible. A final settlement will, very shortly, take place, and the whole be accounted for.
258	William P. Gassaway,	Ensign, -	351 39	\$250 advanced in 1792, on account of the recruiting service. \$96 05 ditto to him by Captain William Buchanan. \$5 34 balance on account of pay. This officer was killed in a duel in March, 1793—there are no vouchers to account for the balance due by him.
287	John Guthrie, -	Captain, -	749 58	Advanced in 1792, on account of pay due to his late company of levies; he was held accountable to produce the receipts of the individuals, and entered into bonds to that effect, but, although frequently called upon, none have yet been produced. It is very probable that the greater part of the money has been duly applied.
	Guthrie's company of levies, - -	- -	191 05	This amount is chargeable to pay of the army; the vouchers are retained in this office till the payments are all complete; it has not, therefore, been carried to that head of expenditure.
348	Joseph Gough, -	Ensign, -	64 50	\$36 advanced in 1792, on account of pay. 28 50 ditto in 1792, on account.
394	William S. Grayson,	Ehsign, -	228	The above has been accounted for, and a considerable balance will be found due to him, on general settlement of levy accounts. \$78 advanced in 1794, for three months' pay. \$150 ditto in 1796, by Captain Richard Scott Blackburn, on account of the recruiting service. Of the above sum, \$78 have been accounted for—no vouchers for the balance.
401	Simon Geddis, - -	Lieutenant, -	72	Accounted for.
438	Peter Grayson, -	Lieutenant, -	490	Advanced in 1799 and 1800, on account of the recruiting service. This sum will be accounted for, as he has a considerable balance to receive, by the late arrangement of the army, he being deranged, and entitled to arrears of pay.
473	Jeremiah Gullion, -	Lieut. Militia,	316	Advanced in 1795, for the pay of the militia in Scott and Woodford counties, for their services in 1794, for which he was to produce the receipts of the individuals who performed the service, which has not been done. In those cases, it is generally understood that the money has been applied, but no receipts taken.
847	Richard H. Greaton,	Captain, -	24 22	Balance due by him on settlement of his account in 1799, which will be accounted for, and entered to his credit.

E—Continued.

Ledger folio.	Names.	Rank.	Dolls. Cts.	REMARKS.
857	Joh Gano, - -	Major militia,	\$1,152 59	Advanced in 1792, for the pay of the militia of Hamilton county, for their services in 1791. This money was paid by the Paymaster General, on duly authenticated muster and pay rolls; no receipts have ever been received, showing its application, but there can be no doubt of the money having been properly disbursed.
903	Elisha Greenlie, -	P. S. Mate, -	60	Advanced in 1798, on account of pay. This money has been accounted for, and will be entered to his credit.
916	Lemuel Gates, -	Captain, -	1,172 54	Advanced by Caleb Swan, Paymaster General, for the pay of his company for June and July, 1799. The receipt roll has not yet been received; the money has, doubtless, been applied as directed.
924	Henry Glenn, -	Agent for transportation,	10,000	\$750, advanced in 1798, \$420 in 1799, \$8,830, transferred from the treasury books in 1799. Accounts have been rendered, on which he claims a balance, but from the incorrectness of the vouchers, (which he promises to rectify) and inadmissible claims, a balance is found due by him, on a late statement, of \$3,350 32.
981	Robert Grey, -	Lieutenant, -	100	Advanced in 1801, on account of the recruiting service. This money has been accounted for since the 1st January, 1802.
1041	Rufus Graves, -	Lieut. Colonel,	39 90	Balance due on settlement of his account, the 4th September, 1800. In the accounts rendered, he claimed a balance of \$28 30, from which deductions were made, amounting to \$68 20, leaving the above balance due the United States.
1073	Aaron Gregg, -	Lieutenant, -	3,369	Advanced in 1795, on account of the recruiting service. Mr. Gregg has been in so remote a situation since he received this money, that he has not rendered his vouchers, but there is no doubt that the whole has been applied, and will be duly accounted for.
1090	George Gaines, -	Agent for fortifications,	4,500	Advanced in 1801, on account of the fortifications erecting at Portsmouth, New Hampshire. Mr. Gaines was appointed agent in 1801; his accounts are not yet rendered. On being applied to, he states that he has a number of accounts to pay, and that he has applied to the Secretary of War for funds, which will enable him to settle his accounts immediately, to the end of 1801.
251	John F. Hamtramck,	Major, -	2,815 97	\$1,000, advanced in 1793, on account of the recruiting service; \$250, advanced in the Treasury Department, transferred to this office; \$1,565 97, do. in 1797, on account of the recruiting service. Colonel Hamtramck, in a letter, dated 1st December last, says, that he is ready to account with any person I may appoint; he having only one set of vouchers, is afraid to transmit them. He has been directed to forward them by the first safe conveyance.
354	William H. Harrison,	Lieutenant, -	37	Balance remaining on settlement of his recruiting account, 21st August, 1800. Captain Harrison, when at this office, stated that he had a contingent claim, which would more than balance this amount; he left the seat of Government without producing it, and has lately been written to for a settlement.
360	John G. Hopper, -	Lieutenant, -	23 50	Advanced in 1791, on account of pay and subsistence. This sum has been accounted for, and will be entered to his credit.
440	Horatio Hall, -	County Lieut.	1,375 20	Advanced in 1793, and 1794, for the pay of the scouts of Bourbon county, for their services in 1792, and 1793. No receipts have been transmitted to this office, to account for the application of this money; it was advanced on duly authenticated muster and pay rolls; and although the parties are held accountable to produce receipts, few comply.
445	William Hill, -	Private, -	20	Advanced by the Secretary of War, on account of pay, while a prisoner with the Indians. He left the Seat of Government, and never after applied for a settlement.
509	Andrew Hunter, -	- - -	50	Advanced in 1795, on account of the board, &c. of H. Abeel, an Indian youth. The money, no doubt, has been applied, but for want of vouchers could not be entered to his credit.
741	Jedediah Huntingdon,	Collector, -	26 40	Accounted for.
812	David Henley, -	Agent Tennessee,	286,553 65	Mr. Henley's accounts have lately been examined at this office, and a balance of \$17,558 6 due by him. In addition to the claims then admitted, he has others to the amount of about \$7,500, which are in dispute, and for want of proper evidence of their correctness, cannot be admitted. If the whole sum is allowed, there will be an ultimate balance due the United States of \$10,000.
817	Stephen Hillis, -	Paymaster, -	300	Accounted for in settlement with David Henley, agent for the Department of War.
850	John Harris, -	Military store-keeper,	96 51	Advanced in 1801, to enable him to reimburse the factory at Georgia. The same amount paid out of the funds thereof, for books purchased in London, for the use of the War Department. This amount will be entered to his credit in the year 1802.
864	Thomas Hunt, -	Major, -	1,624 83	\$1,179 26 remains to be accounted for, being advances in 1795, and on account of the recruiting service; the balance accounted for. Major Hunt will receive a credit for the \$1,624 83, the same having been accounted for per settlement dated in March 1802.
872	John Heth, -	Captain, -	16 16	Balance remaining, on settlement of his account, 18th August, 1801, and which will be accounted for on next settlement.
908	John Hancock, -	Lieutenant, -	40 64	Balance remaining out of moneys placed in his hands for the pay of his recruits. Lieutenant Hancock has a balance of pay due to him, which will cover this amount.

100

+

913	Benjamin Hawkins,	Indian Commissioner,	33,214 96	For bills of exchange drawn in 1796, 1797, 1798, 1799, 1800, and 1801, on account of the Indian department. Mr. Hawkins has rendered accounts to the 1st June, 1801, showing expenditures made under his agency; but owing to the risk of sending vouchers through the Indian country, he has not sent them. The amount, therefore, cannot be entered to his credit, but no doubt exists as to the application of the money.
954	Samuel Hodgdon,	Superintendent of military stores,	75	Advanced in 1796, for pay due Daniel Ball, for his services as store-keeper at Manchester, in Virginia. The only thing wanting to enable me to pass the amount to Mr. Hodgdon's credit, is the receipt of Daniel Ball. On application to Mr. Hodgdon, he says he was directed to disburse the money, but has lost the letter on the subject.
966	James House,	Paymaster,	65,083 43	Advanced in 1801, on account of pay, subsistence, and forage, of the artillerists and engineers, and for the recruiting service. Mr. House has rendered accounts up to the 1st June, 1801, showing expenditures made by him, and which have not yet undergone an examination by the Paymaster General; but there is no doubt but all the money has been duly applied, and will be accounted for on settlement.
1078	Isaac Heiskell,	- - - -	87 50	Balance remaining out of advances to him for the pay of Captain Ross Bird's company, to the 31st May, 1800; which balance I have not been able to collect.
1088	J. W. Hooker,	- - - -	20 84	Being the amount of rations issued to him in 1799, by James O'Hara, contractor, which is accounted for, on a statement of his account, as Indian factor at Tellico, Tennessee, not yet settled.
1091	Joshua Henshaw,	Contractor,	50,030	Advanced in 1801, on account of his contract for fabricating small arms, dated September 7, 1798. Accounted for since the 1st January, 1802.
1347	Harris, Buckner, & Co.	Contractors,	400	Advanced in the Treasury Department, on account of their contract for manufacturing cannon ball, transferred for settlement at this office in 1801. They have not rendered any vouchers showing the application of this money.
1370	Daniel Hughes,	Lieutenant,	56	Advanced in 1801, on account of the expenses of marching a detachment of troops to Pittsburg. Mr. Hughes has not rendered any vouchers for the expenditures of this money; he probably expended the greater part, if not the whole, for the purpose for which it was advanced, and will account therefor, on settlement.
274	Richard S. Howe,	Lieutenant,	97 73	Balance due on settlement of his account, 13th February, 1797.
	Thomas Hughes,	Captain,	31 36	Balance due on settlement of his account, which will be accounted for.
333	Howe's Company,	- - - -	494 25	Chargeable to pay of the army. The vouchers are retained in this office as evidence, until the payments are complete; therefore, it has not been carried to the head of expenditure.
336	Charles Hyde,	Paymaster,	2,616 48	Balance due by him on settlement of his account, 31st May, 1801. Some part of it will be accounted for by his pay and subsistence to the day he will be deranged; but a large balance will be finally due the United States, which I have not been able to collect, although repeated applications have been made to him for that purpose.
307	Dan. St. Thos. Jenifer,	Ensign,	47 77	Balance of advances to him by Captain Benjamin Price, on account of pay and subsistence.
391	Abraham Jones,	Cornet,	659 60	\$159 60, advanced by James O'Hara, in 1792, on account. \$500 advanced by Caleb Swan, in 1795, on account of the recruiting service. For this amount no vouchers have been furnished by him; and it is probable that the money has not been applied; the \$159 60 being on account of pay, subsistence, and forage, may be considered as accounted for.
638	Jonathan Jackson,	Supervisor,	570 81	Accounted for.
887	George Izard,	Captain,	84	Balance remaining out of advances in 1800, for pay of his company. The Paymaster General has been directed to make stoppages to balance his account.
1088	William Irvine,	Superintendent of military stores,	8,771 60	Advanced in 1801, as superintendent of military stores at Philadelphia, being for pay of laborers, &c. and on account of the Quartermaster department. On a statement made of his account, on the 10th January, 1802, a balance was found due the United States of \$792 09, which will be accounted for on next settlement.
262	Jacob Kreemer,	Lieutenant,	265 36	\$230, advanced in 1798, on account of the recruiting service.
833	Whitmore Knaggs,	Indian interpreter,	40 00	\$35 36 ditto, by Lieutenant Charles Hyde, on account of pay. He has not produced any vouchers for the expenditure of this money.
895	Jacob Kingsbury,	Captain,	696 00	Advanced in 1798, on account of his pay as Indian interpreter. This sum is accounted for, and will be entered to his credit in the present year.
1067	Hanson Kelly,	Contractor,	1,000 00	Advanced in the year 1798, on account of his pay and forage. Accounted for, except six dollars, which arose from an error in paying his account by the paymaster.
1083	Geo. W. Kirkland,	Lieutenant,	100 00	Advanced in 1801, on account of his contract for supplies to the troops in North Carolina. This amount was accounted for on the 19th January, 1802.
248	William A. Lee,	Lieut. Cavalry,	430 33	Advanced by C. Swan, on account of the recruiting service. Accounted for since the 1st January, 1802.
				Advanced in 1792, on account of the recruiting service. He has not rendered any vouchers for this amount, although repeatedly called upon for that purpose.
283	Howell Lewis,	Captain,	188 03	Balance remaining due by him on settlement of his account, the 30th September, 1801.

E—Continued.

Ledger folio.	Names.	Rank.	Dolls. Cts.	REMARKS.
294	John Lowry,	Ensign,	298 11	\$21 11 advanced in 1791 on account. \$200 advanced in 1792, on account of the recruiting service. \$77 advanced in 1792, on account of the recruiting service. The balance remaining due the United States, the day he died, is 156 dollars and 85 cents.
381	Henry Lee,	County Lieut.	1,540 12	\$93 50 advanced by Daniel Britt, on account. \$1,156 66 advanced in 1793, for pay of scouts of Mason county, for their services in 1792. He has not rendered any vouchers for the above sums.
424	William A. Lee,	Captain,	500	\$389 96 advanced in 1797, for pay of ditto, for their services in 1795. Accounted for. Advanced in 1794, on account of the recruiting service. He was dismissed from service without ever rendering any vouchers for the expenditure of this money, and he could not, ever after, be brought to a settlement. The probability is, that no part has been applied as intended.
437	William Lawton,	Surgeon's Mate,	301 00	Balance of money entrusted to his care, embezzled, and for which he was cashiered.
442	Joseph Lewis,	County Lieut.	1,971 50	\$1,457 50 advanced in 1793, for pay of the scouts of Nelson county, for their services in 1792. \$514 advanced in 1794, for the pay of ditto, for services in 1793. He has not produced the necessary vouchers, although it is probable the money has been duly applied.
508	Jesse Lukins,	Lieutenant,	302 00	Advanced in 1797, on account of pay, and for the recruiting service. The probability is, that this money will be accounted for—the officer is dead, and one has been appointed to settle his affairs, who will, doubtless, attend to this sum.
713	Sam. Lewis, senior,	Clerk War Off.	2,613 30	This balance was reported to Congress, and an act passed on the 25th of February, 1801, to liberate him from confinement.
834	James Lanier,	Paymaster Militia,	212 31	Balance of pay remaining in his hands due to sundry militia, for which he has not produced the necessary vouchers to exonerate him from the charge.
974	John Leybourn,	Lieutenant,	90 00	Advanced in 1799, on account of his pay. Accounted for with the paymaster.
980	Lane and Salter,	Contractors,	2,300 00	Accounted for on settlement since the 1st January, 1802.
1019	Bezaleel Latimer,	Contractor,	38 97	Balance due by him on settlement of his account, the 26th November, 1799, out of moneys advanced on account of supplying the troops of the United States with rations, arising from deductions made for imperfect vouchers rendered by him.
1058	Thomas Lee,	Lieutenant,	612 00	Advanced in 1800, on account of the recruiting service. He has not rendered any vouchers for the expenditure of this money.
1068	Merriwether Lewis,	Lieutenant,	100 00	Accounted for since the 1st January, 1802.
1075	John Logan,	County Lieut.	1,030 65	Advanced in 1793, for the pay of the scouts of Lincoln county, for their services in 1790 and 1792, by the paymaster general, ascertained from his accounts—accounts entered in March, 1801. Mr. Logan has not produced the receipts of the individuals, who performed the service, to exonerate him from the charge.
1359	William Lyman,	Indian Agent,	300 00	Advanced in 1801, on account of his pay as temporary Indian agent in the Indiana territory. This money will be accounted for on settlement of his account.
1364	Cornelius Lyman,	Captain,	49 07	Accounted for with the paymaster general.
1374	Ezra Lunt,		300 00	Accounted for in the present year.
494	Benjamin Lockwood,	Lieutenant,	10 00	Balance due on settlement of his account in December, 1796, and will be accounted for on the next settlement.
976	Thomas Lewis,	Indian Agent,	400 00	Advanced in 1799, on account of Indian department. He was directed by a letter from the Secretary of War, dated the 5th November, 1801, to render his account, which he has not complied with.
188	James Marshall,	County Lieut.	450 76	Advanced in 1792, for the pay and rations due the militia of Washington county, for their services in 1791. Mr. Marshall has rendered receipts shewing the due application of the money, but owing to the informality of a part, of which he has been informed, entry has been suspended till the whole were complete.
261	Jacob M. Mills,	Ensign,	40 00	Advanced by Lieutenant Colonel Gaither, for two months' pay. Accounted for, and will be entered to his credit in the present year.
263	Ebenezer Massay,	Captain, dead,	1,369 20	Advanced, \$1,289 20, in 1792, on account of his pay and subsistence, and for the recruiting service. Balance remaining arises on a running account; he is entitled to credit for \$520, for pay due to the day he died.
273	Jacob Melchor,	Lieutenant,	138 92	Balance of moneys advanced to him by Daniel Britt, late paymaster, which could never be recovered.
275	William Miller,	Ensign,	70 00	Advanced in 1791, on account of the recruiting service; and for the due application thereof he has not rendered any vouchers.

307	William M'Cormick,	Captain,	-	368 10	Advanced in 1791, on account of pay and for the recruiting service. Capt. M'Cormick has rendered an account without vouchers, in which he claims a balance of \$267, but a number of charges are included which cannot be admitted; his pay will cover \$250 of the above amount; no other part of the charges are admissible.
319	Jeremiah Murray,	Lieutenant,	-	22 00	Advanced by Lieut. Col. Gaither, for pay. Accounted for, and will be entered to his credit.
325	M'Cormick's Com- pany.	-	-	248 39	Chargeable to pay of the army. The vouchers are retained in this office, as evidence until the payments are complete, therefore has not been carried to the head of expenditure.
328	John Michael,	Ensign,	-	110 79	Advanced in 1792, on account of the recruiting service. The sum of \$14 40 has been accounted for, the balance of \$96 39 arises on settlement of his recruiting account, which he has been called upon to refund to the United States, which he has not yet done.
362	Thomas Martin,	-	-	352 00	Advanced in — on account of the recruiting service. His account has been settled, and the balance paid him by the paymaster; the statement has been received, but no vouchers; the amount cannot be entered to his credit, till they come forward, and the paymaster has been requested to forward them.
369	John Morgan,	Ensign,	-	120 60	Advanced by Daniel Britt, on account of his pay. He was cashiered and left the army without accounting for this money, and never could be brought to a settlement.
371	Daniel M'Lane,	Lieutenant,	-	1,024 08	\$314 08, advanced by Lieutenant Colonel Gaither, on account of pay; \$710 ditto, in 1792, on account of the recruiting service. \$314 08 of the above was for the double payment of his pay by an agent of the War Department, and the late account: for the balance no vouchers have been rendered.
451	N. B. Monvill,	-	-	100 00	Advanced in 1794, on account of the expenses attending the proving cannon under appointment from the Secretary of War. He left the service without rendering any accounts for the expenditure, but it is thought the whole may, with propriety, be admitted to his credit.
479	Alexander M'Gregor,	-	-	797 27	Advanced in 1795, for the pay of Kentucky militia, for their services in 1794 and 1795, on authenticated muster and pay rolls; he was held accountable to produce the receipts of the individuals who performed the service, which has not been done.
489	Return Jona. Meigs,	Milit' st. keeper,	-	50 00	Advanced in 1795, on account of his pay and subsistence. Accounted for and will be entered to his credit.
503	Paul M'Dermott,	Cornet,	-	272 00	Advanced in 1795, 1796, and 1797, on account of his pay, and for the recruiting service. Has accounted for \$164. For the balance of \$108, advanced for the recruiting service, no vouchers have been received, although he has been repeatedly urged to send them forward.
506	William A. M'Crea,	Surgeon's Mate,	-	68 20	This amount will be covered and accounted for, by pay due him on the day he died.
669	Return Jona. Meigs,	Agent War De- partment.	-	3,051 02	For bills of exchange drawn by him as agent for the Department of War in Tennessee, in 1801. He is directed to render his accounts quarterly, when this money will, no doubt, be duly accounted for.
823	Mark M'Pherson,	Captain,	-	480 84	Advanced by Daniel Britt, late paymaster, on account of his pay and subsistence. Accounted for, and will be entered to his credit.
841	Malcolm M'Ghee,	Indian interpr.	-	300 00	Accounted for with David Henley, agent for the Department of War in Tennessee.
855	John M'Clary,	Ensign,	-	1,043 72	\$316 72 advanced in 1796, for the pay of himself and detachment. 577 00 ditto in 1797, by Andrew Ellicott, on account. 150 00 ditto in 1798, on account of the recruiting service. The paymaster general has been directed to call him to account, and to stop his pay until he complies. The money will, in all probability, be accounted for.
872	Andrew Marschalk,	Lieutenant,	-	191 38	Balance due by him on settlement of his account, 18th June, 1801, being part of moneys on account of the recruiting service, and for pay of his recruits. This sum has been accounted for in the present year.
883	Charles Martin,	Lieutenant,	-	260 00	Advanced in 1797 and 1798, on account of the recruiting service. He has been lately written to for his vouchers.
884	Edward Miller,	Captain,	-	2,297 79	\$999 76, advanced in 1799, on account of the pay of himself and company, and for the recruiting service.
902	Francis Mentges,	Agent fortifica- tions,	-	1,913 37	1,298 03, advanced in 1799, on account of pay of his company for 1799. His recruiting account was suspended, from the appearance of fraud in the musters, and the case reported to the Secretary of War. He has left the service, and a balance will be found against him. Balance of moneys remaining in his hands out of advances on account of the fortifications at fort Mifflin, per settlement dated 22d December, 1801. He has been called upon, but he has not yet refunded the balance.
920	William Mizell,	Indian interpre- ter,	-	370 00	Advanced in 1798 and 1799, on account of his compensation as Indian interpreter. Accounted for by his pay and subsistence, and will be entered to his credit.
979	John G. M'Whorter,	Paymaster,	-	26,611 39	Advanced in 1799 and 1800, for pay, subsistence, and forage, of the eleventh regiment, and on account of the recruiting service. He has rendered his accounts to the paymaster general, and, on an examination, a balance is found due by him of \$6,040 17, which he has been called upon to refund, by letter dated 15th February, 1802, which is not yet done.
996	Calvin Morgan,	Paymaster,	-	49,981 37	Advanced in 1799 and 1800, for the pay, subsistence, and forage, of the seventh regiment, and on account of the recruiting service. He has rendered accounts to the paymaster general, which have not yet been examined. The paymaster general reports, that, from appearance, he will account for all the moneys placed in his hands.
1048	John M'Kie,	Indian interpre- ter,	-	6,811 50	For bills of exchange, drawn in 1798, 1799, 1800, and 1801, on account of his salary, and on account of expenditures in the Indian Department. He is now out of service. He has rendered accounts, and will have an opportunity of attending personally to their settlement.

E—Continued.

Ledger Folio.	Names.	Rank.	Dolls. Cts.	REMARKS.
1054	Raleigh Morgan,	Lieutenant,	142 00	Advanced in 1792, on account of his pay and subsistence; accounted for, and a balance will be found due him on settlement of the levy accounts.
1055	Michael M'Kewan,	Contractor.	4,144 79	Advanced in 1801, on account of his contract for supplying the troops of the United States with rations. He has rendered accounts to the 31st December, 1801, on which there is a balance due the United States of \$852 47, which will be accounted in his accounts for the present year.
1058	Samuel M'Guire,	Lieutenant,	48 35	Advanced in 1800 and 1801, on account of his pay and for travelling expenses. This amount will be accounted for, when an explanation is given to an account for travelling expenses.
1070	John Miller,	County Lieut.	160 00	Advanced in 1793 for the pay of the scouts of Madison county, for their services in 1792. He has not produced the receipts of the individuals who performed the service, to exonerate him from the charge.
1080	William Macrea,	Major,	135 34	Balance due on settlement of his account the 30th November, 1801, and will be accounted for on next settlement.
1373	William M'Crosky,	Surgeon,	4 18	
1371	Joseph Morgan,	Inspector,	400 00	
	Andrew M'Currie,	Agent War Department,	3,000 00	Advanced in 1801 for the purchase of wood, and on account of the expenditures on the fortifications at Newport, Rhode Island. There is no doubt but this money will be applied as directed by the Secretary of War; he has been called upon to render his accounts.
1372	M'Kewan & Harragan,	Contractors,	6,000 00	Advanced in 1801, on account of their contract for supplying the troops of the United States with rations; they are directed to furnish their accounts quarterly.
189	Presley Neville,	County Lieut.	532 19	Advanced in 1793 for pay of militia of Alleghany county, for their services in 1792. Receipts, for this amount, are now under examination.
504	Ditto,	Paym. General militia,	981 60 388,253 95	Ditto, ditto, ditto. Advanced in 1794, 1795, and 1796, for the pay of the militia called out to suppress an insurrection in the western counties of Pennsylvania, in 1794. He has rendered his accounts; some vouchers, he states, are not yet rendered. From those received, there appears a balance due by him of \$27,000; those received have been examined, but, owing to his having advanced the money contrary to the spirit of his instructions, though in conformity to the orders of the commanding general, they could not be entered to his credit, until the sums he advanced are finally accounted for.
534	Abimael Y. Nicholls,	Captain,	188 00	Accounted for.
969	Daniel Newman,	Lieutenant,	179 50	Balance remaining out of advances in 1800, on account of the recruiting service; thirty dollars refunded, and the balance deducted by the paymaster from his pay and subsistence.
978	Simeon North,	Contractor,	4,499 33	Advanced in 1800, on account of his contract for manufacturing pistols for the United States. Accounted for since the 1st Jan. 1802.
1357	Jonathan Nicholls,	Ditto,	1,000 00	Advanced in the Treasury Department, on account of his contract for the fabrication of small arms, transferred for settlement at this office in 1801. Accounted for since the 1st January, 1802.
453	William Nicholson,	Paymaster militia,	1,506 60	Advanced for the purpose of paying off two companies of militia for services in 1794. Mr. Carrington, by whom the money was advanced, has been requested to use every means to effect settlements, and, doubtless, every exertion will be made.
1052	Alexander D. Orr,	Contractor,	14,343 84	Advanced in 1800 and 1801, on account of his contract for supplying the troops of the United States with rations. Accounts have been rendered, time after time, but owing to the dispersed situation of the troops he had to supply, his returns have not yet all come to hand; the money will, in all probability, be accounted for.
1375	Noble Orr,	Inspector,	200 00	Advanced in 1801, on account of his compensation as inspector of small arms. This money will be accounted for on settlement of his account for salary.
218	John Platt,	Lieutenant,	236 40	Advanced in 1791, on account of pay and subsistence. Accounted for with the paymaster, and will be entered to his credit.
224	Thomas Patterson,	Major,	895 97	Advanced in 1791, on account of his pay and subsistence, and that of sundry officers. This amount is, in all probability, accounted for, and will, it is presumed, be entered to his credit on settlement of the levy accounts.
259	Moses Porter,	Captain,	360 00	Advanced in 1797, on account of the recruiting service. Major Porter is stationed at Niagara, and has lately been called upon to account for this sum.
266	Piercy Pope,	Lieutenant,	73 00	Advanced in 1797, on account. Mr. Pope is dead; the officer who administered on his effects has not rendered any accounts.
271	William Preston,	Captain,	2,235 97	Balance due by him on settlement made 6th May, 1800, being part of advances to him for the recruiting service, and for pay of his recruits. He has been called upon, but he has neither sent forward any other vouchers or refunded any part of the balance.
284	Robert Purdy,	Lieutenant,	30 00	Advanced in 1797, on account of pay. This amount has been accounted for, and will be entered to his credit.

285	William Piatt,	Captain,	903 33	Advanced in 1791 and 1792, on account of pay and subsistence of his company, and for the recruiting service. He was killed on the 4th November, 1791, and all his papers were lost; it is likely he applied the money as intended, but no certainty can be said until the levy accounts are all settled; many of the officers having been killed, and their papers lost, make settlements the more difficult.
287	Benjamin Price,	Captain,	3,000 21	Balance remaining on settlement of his account, 30th September, 1801, out of moneys placed in his hands for pay of the fourth sub-legion, and for the recruiting service. He has been repeatedly called upon to close his account, but every application has proved ineffectual.
300	John Paine,	Ensign,	813 15	Advanced in 1792 for the pay of captain John Smith's company of levies. He died in 1793, and never sent on vouchers; it is likely a part of this money has been applied for the purposes intended, but the balance will never be accounted for.
308	Thomas Proctor,	- - -	250 00	Advanced in 1793, on account of contingent expenses of the War Department. On application to Mr. Proctor for a settlement, he states that he expended the money for the purposes intended, which were understood by the Secretary of War who employed him.
136	Andrew Pickens,	Brigadier Gen.	4 30	Balance due a militia soldier, for whom Mr. Pickens received the money; he has not shewn its application, but he will no doubt either do that or refund the money.
339	Edward Patterson,	Lieut. levies,	22	Advanced in 1792, on account of pay; he received this money from the paymaster general, ascertained on settlement of his account the 31st March, 1801; in a settlement made with Mr. Patterson, in 1793, he omitted to credit this money.
341	John Polhemus,	Ensign,	2 28	Balance remaining on settlement of his account 28th March, 1798.
345	Thomas B. Patterson,	Captain militia,	93 28	Advanced in 1793, for the pay of Alleghany militia, for their services in 1791; this sum he received on duly authenticated muster and pay rolls, but no receipts have been transmitted to exonerate him from the charge, but it is likely the money has been duly applied.
379	Pike's comp'y of levies,	- - -	793 06	Chargeable to pay of the army; the vouchers are retained in this office as evidence, until the payments are complete, therefore has not been carried to the head of expenditure.
426	Yelverton Peyton,	Lieutenant,	152	Balance due on settlement of his recruiting account, 17th August, 1801.
427	Zebulon Pike,	Captain,	833 46	\$800, advanced in 1795 and 1797, on account of the recruiting service; \$33 46 ditto, on account of pay, &c. He has not rendered any vouchers for the expenditure, owing, it is supposed, from his remote situation; he will now be called upon to account with the regimental paymaster.
446	Piatt's company,	- - -	852 97	Chargeable to pay of the army; the vouchers are retained in this office as evidence, until the payments are complete, therefore has not been carried to the head of expenditure.
818	Andrew Pickens,	Indian commis- sioner,	2,782 80	\$782 80, advanced in 1798, on account of his compensation as Indian commissioner; \$2,000 ditto in 1798, on account of expenses running the boundary line; accounts have been rendered shewing the application of \$782 80, but none for the balance; but it will doubtless be duly applied and accounted for.
840	Thomas Pasteur,	Captain,	2,158 22	\$1,658 22, balance due on settlement 6th May, 1800, being part of advances to him for pay of the troops at Fort Knox, and on account of the recruiting service. \$500 advanced in 1798, for the recruiting service. Mr. Pasteur has been called upon to render his accounts without delay.
842	John Pitchlyn,	Indian interpr.	825	Accounted for.
844	Robert Parkinson,	Lieutenant,	758	\$120 advanced in 1797, on account of his pay; \$638 ditto in 1798, on account of the recruiting service. He has rendered accounts shewing the application of \$338; the balance he will be obliged to account for, previous to his receiving his pay as an officer discharged.
863	Wylie Pope,	Paymaster,	1,752 22	Accounted for.
867	John Pierce,	Captain,	330	Advanced in 1797, 1798, and 1799, on account of his pay, the Indian department, and for the recruiting service. Accounted for with the paymaster of the regiment on settlement of his accounts; this money will be entered to the credit of Captain Pierce.
965	Garret Pendegrift,	Surgeon's mate,	170	Advanced in 1799, on account of pay and forage. There is no doubt but this amount has been accounted for.
1022	Samuel Parker,	Paymaster,	8,920	Advanced in 1799, and 1800, for pay, forage, and subsistence, of the 16th regiment, and for the recruiting service. He has received large sums of money of the paymaster general, in addition, and has rendered accounts to him for settlement; on examination, a balance is found due by him of \$8,333 38, which he has been directed to refund, or cover by vouchers.
1080	George Peters,	- - -	142	Balance remaining on settlement of his recruiting account 4th September, 1801. He has not rendered any vouchers for the expenditure thereof, but he has lately been written to, requesting him to close his accounts.
1082	James Powell,	Collector,	15 65	Advanced in 1801, on account, by Ebenezer Jackson, late agent for the Department of War, being balance of moneys remaining in his hands unexpended.
1364	William Piatt,	Lieutenant,	60	Advanced in 1801, on account of the recruiting service. He has not rendered any accounts for the expenditure thereof, but he has been requested to settle his account without delay.
290	John Rucastle,	Captain,	1,196 89	Advanced in 1792, for pay due his company of levies, for which his bond, jointly with Jonathan Dayton, is on file in this office. Some receipts have been lodged, and Mr. Dayton states his having filed a number of receipts, which are not to be found, and declares himself ready to make good any deficiency, after crediting the account with the proper amount.
326	Charles Robinson,	- - -	18	This amount will be entered to his credit on settlement of the levy accounts.
340	John Reed,	Lieutenant,	209 21	Advanced in 1795, on account of the recruiting service, being part of the sum of \$500; the remainder was found at his death, and taken possession of by Capt. Wade. What part of the \$209 21 has been applied, is unknown, as no vouchers have yet come forward.

E—Continued.

Ledger folio.	Names.	Rank.	Dolls. Cts.	REMARKS.
350	Michael Roberts,	Stationer,	410	This amount was paid to him for stationary for the War office, for which an account has been rendered and mislaid. The money has no doubt been accounted for, but for want of vouchers, cannot be entered to his credit.
397	James Richmond,	Lieutenant,	13,274 10	Accounted for in the present year.
446	Rucastle's company of levies,	- - -	32 41	Chargeable to pay of the army. The vouchers are retained in this office as evidence, until the payments are complete; therefore, has not been carried to the head of expenditure.
460	Benjamin Rand,	Ensign,	160	Advanced in 1797, on account of the recruiting service; and for the expenditure thereof, he has not produced any vouchers.
468	Jonathan Remington,	Ditto,	20	Advanced in 1795, on account, and will be entered to his credit, it being for one month's pay.
483	Stephen Rochfontaine,	- - -	304 81	This amount will be accounted for by pay and subsistence due him at the end of his service.
490	Jonathan Robeson,	Lieutenant,	5 64	Balance remaining, on settlement of his account 2d February, 1797. This amount has been directed to be deducted by the paymaster general.
513	James Read,	Late Collector,	12	Balance of moneys remaining out of advances for the pay of the troops at Wilmington, North Carolina. Mr. Read has a claim for commissions, which will more than balance this account.
842	John Rogers,	Interpreter to Indians,	625	Accounted for with David Henley, agent for the Department of War, and will be entered to his credit, when those of said Henley are, which have lately undergone an examination.
907	James Read,	Captain,	111 18	Balance of moneys remaining on settlement of his account 12th August, 1799. This amount, the paymaster general has been directed to deduct from his pay.
1027	Jos. Ruggles & Co.	Contractors,	969 59	Balance remaining, on settlement of their account 30th April, 1801, being part of advances on account of their contract for supplying the troops of the United States with rations. They have produced claims for upwards of \$2,000; but it being for money paid officers in lieu of fuel, it cannot be admitted, being contrary to the regulations of the Secretary of War.
1029	William A. Rogers,	Contractor,	8,810 18	Advanced in 1799, and 1800, on account of his contract for supplying the troops at Norfolk, Virginia, with rations. Accounts have been sent to this office, and on examination, it was discovered, that many of the charges were not supported by proper vouchers, and others over charged, so as to make it improper to admit them; they are therefore suspended.
1063	Robert R. Richardson,	Contractor,	2,000	Accounted for in the present year.
1346	John Rippey,	Surgeon's mate,	40	Advanced in 1799, on account of pay. It does not appear by the pay rolls of the troops at Fort Pickering, that this money has been deducted, and the paymaster has been informed to that effect, and the money will no doubt appear on the next settlement, accounted for.
1369	James Rhea,	Lieutenant,	50	Advanced in —, on account of expenses marching a detachment of troops to Pittsburg. He has not transmitted any vouchers for the expenditure thereof; in all probability this money has been applied for the purposes intended.
1378	Ruggles & Smith,	Contractors,	6,000	Advanced in 1801, on account of their contract for supplying the troops of the United States with rations, in the year 1802; they are bound to render their accounts quarterly.
986	George Rives,	Lieut. militia,	695 03	Advanced for pay of militia, called out to suppress an insurrection in the western counties of Pennsylvania, in 1794. He has not forwarded the receipts of the individuals who rendered the service; Mr. Carrington, who made the advance, has been directed to obtain them.
161	Caleb Swan,	[partment, Agent War De-	146 19	
189	David Shepherd,	County Lieut.	4,722 36	\$1,883 73 advanced in 1792, for pay of militia of Ohio county, for services in 1791 and 1792; the balance advanced for ditto for services in 1790, 1792, and 1793, on duly authenticated muster and pay rolls; but no receipts have ever been received, shewing its proper application.
191	David Smith,	Captain militia,	371 70	Advanced in 1792, for pay and subsistence of militia, called out to protect the frontiers south of the Ohio, on duly authenticated muster and pay rolls, but no receipts have been received, shewing the proper application.
216	Joseph Shaylor,	Captain, -	\$1,096 41	Advanced in 1791 for pay, subsistence, &c. of his company, and for the recruiting service; his accounts have long since been rendered and examined, and owing to some of the vouchers being irregular, the account has been suspended for explanation, which has not been given, as he is out of service. A decision will immediately take place.
217	Arthur St. Clair,	Major General,	1,050	\$750 advanced in 1794 on account of the Indian department. 300 ditto in 1796, 1799, and 1800, on account of ditto. He has been called upon for an account of the expenditures, and as he is now at the seat of Government, he will doubtless account for the money.

220	John Sevier,	- Brig. General,	1,602 73	Balance remaining out of advances in 1791 for the recruiting service, and for one month's pay to sundry officers and soldiers. On being applied to, he states that he rendered accounts to David Allison; that a balance is due him, and by the first safe conveyance, he would send an evidence of these facts.
233	Jacob Slough.	- Capt. Infantry,	1,344 50	He entered into bonds in 1792 for the application of this money, and previous to his resignation he also gave bonds to settle his public accounts on or before the 1st August, 1796; but although repeatedly called upon, and every opportunity given him to shew the application of the money, he cannot be prevailed upon to settle his account.
253	Ditto Ballard Smith,	- Capt. Levies, - Captain,	613 50 586 5	Advanced in 1792 for balance of pay due his late company of levies.
268	James Stevenson,	- Captain,	1,918 35	Balance of advances in 1792 for pay and subsistence of the officers and men of his company; accounted for with the paymaster of the regiment, and will be entered to his credit accordingly.
280	Theodore Sedgwick,	Captain,	430	Advanced in 1792 on account of the recruiting service, for pay and subsistence, and for contingent purposes. On being applied to, Captain Stevenson has produced full evidence of having accounted with the paymaster for all the moneys he received; but the vouchers have never come to hand, except a few previous to this information. The paymaster states, that all the papers he had were filed in this office.
289	Jonathan Snowden,	- Captain,	1,202 45	\$180 advanced in 1797 on account of the recruiting service. 250 ditto in 1800 on account of ditto. He has transmitted vouchers for the expenditure of the 180 dollars; he will account for the balance on leaving the service on the 1st April, 1802.
295	Richard Sparkes,	- Captain,	1,339 43	\$1,132 58 advanced in 1792, for balance due his late company, of levies. 69 87 ditto in 1795, for advances by Jos. Howell to sundry men of his company. He entered into bond to account for this money on or before the 1st January, 1793, which has not been done. He states that he was in the habit of making advances to his company; that the evidence thereof, together with a number of discharges which he bought, contained in a trunk, have been lost.
	Sparkes' Company of Levies,	- - -	253 40	\$718 93 advanced in 1794 and 1795, on account of the recruiting service, and for pay of his recruits; 620 50 advanced at sundry times by Lieut. Col. Butler, for the recruiting service. Capt. Sparke's accounts have long since been examined, and a balance found against him of \$276 03; he claims a balance of nearly \$100: the difference arises from imperfect vouchers, for which reason his account has been suspended.
327	Joseph Strong,	- Surgeon's Mate,	199 74	Chargeable to pay of the army. The vouchers are retained in this office as evidence, until the payments are complete; therefore, has not been charged to the head of expenditure.
331	John Sullivan,	- Quartermaster,	72	He has an unsettled account in this office, which will very nearly cover this amount.
337	Patrick Shirkey,	- Ensign,	25 86	Advanced in 1791 and 1792 on account of his pay as cornet and quartermaster. Accounted for by his pay to the end of his service, and a balance found due to him.
355	Henry Sheerman,	- Lieutenant,	23 76	Accounted for, and will be entered to his credit.
358	Smith's Company of Levies,	- - -	30 87	Accounted for, and will be entered to his credit.
370	Smith's Comp. Inf'try,	- - -	1,741 90	Chargeable to pay of the army. The vouchers are retained in this office as evidence, until the payments are complete; therefore, has not been carried to the head of expenditure.
378	Slough's Company of Levies,	- - -	304 75	Ditto ditto ditto.
395	John Smith, junr.	- - -	75	Chargeable to pay of the army. The vouchers are retained in this office as evidence, until the payments are complete; therefore, has not been carried to the head of expenditure.
396	Mathias Slough,	- Cornet,	200	Advanced in 1794 for the pay of the scouts of Virginia, for their services in 1794, to be paid by him to D. Shepherd, but he has not sent forward any receipt to exonerate him from the charge.
409	William B. Smith,	- Lieutenant,	60	Advanced in 1794 on account of the recruiting service. He left the service and died previous to rendering any vouchers for the expenditure of this money.
481	Henry Smith,	- Lieut. militia,	92 33	Balance of moneys advanced on account.
514	John Sergeant,	- Indian missn'ry	270	Advanced in 1795 for the pay of militia of Russell county, for their services in 1790. He has not rendered any accounts, or the receipts of the individuals who performed the service, to do away the charge.
535	Cornelius R. Sedam,	- Captain,	785 85	Advanced on account of the annuity of the Stockbridge nation of Indians, and which is chargeable to that account.
767	Caleb Swan,	- Paymaster Gen.	548,683 49	He is entitled to a credit of \$339 07, leaving a balance of \$446 78 due the United States. He has been called upon, and promises to attend to a settlement; he also states, that he has lost a number of vouchers, and claims an allowance for them.
818	William Steele,	- Surgeon's Mate,	192	The paymaster general's accounts are rendered to the first January, 1802, but they have not been examined; his statement shews a balance of upwards of 30,000 dollars in his hands unapplied.
824	David Strong,	- Captain,	400	Accounted for, and will be entered to his credit in the present year.
827	Elijah Strong,	- Ensign,	60	Advanced in 1798 on account of the recruiting service. He has not rendered any vouchers for the expenditure, but the amount will be accounted for on settlement of his account for pay and subsistence, to the day of his death.
				Advanced in —, on account of the recruiting service. He has not rendered any vouchers to account for the expenditure of this sum.

E—Continued.

Ledger folio.	Names.	Rank.	Dolls. Cts.	REMARKS.
832	Barthol. Shaumburg,	Captain,	- 1,514	\$1,200 advanced in 1797 on account of the recruiting service; 250 ditto in 1798 on ditto of ditto, and for conducting Indians; 64 ditto in —, on ditto of ditto. Mr. Shaumburg has been in a remote situation, and on being applied to, has promised to settle his accounts immediately, and that a balance will be due him.
833	William P. Smith,	Ensign,	- 645	Advanced in 1797 and 1798, on account of his pay and for the recruiting service; 145 dollars of this money has been accounted for, the balance of 500 dollars remains to be accounted for; he died in service, and his effects were taken possession of by the commanding officer, who has not yet settled his accounts.
876	Stephen G. Simmons,	Paymaster,	- 12,163 81	His accounts have been rendered, showing a balance due to the United States of \$1,028 93, agreeably to the accounts examined by the paymaster general, and which have not been examined at this office; he states that he has further claims to exhibit.
879	John Steele,	Indian Comm.	1,150	Accounted for with David Henly, agent for the Department of War.
921	James Stille,	Captain,	- 5	Balance remaining out of advances in 1799 for the pay of his company.
901	George W. Stall,	Lieutenant,	- 169 57	\$100 advanced in 1798 on account of the recruiting service; 69 57 remaining out of advances in 1798, for the pay of Captain Miller's company. Mr. Stall has not rendered any vouchers to exonerate him from the above charges.
938	Nathan Starr,	Contractor,	- 18,300	Advanced 1798, 1799, and 1800, on account of his contract for fabricating swords and belts. Mr. Starr has rendered accounts, and after accounting for this sum, he claims a balance of \$102 17.
970	James Smith,	Paymaster,	- 29,388 15	Advanced in 1799 and 1800 on account of pay of the 13th regiment, and for the recruiting service. He has rendered his accounts to the paymaster general, by which there appears a balance unaccounted for of \$9,596 74, which he has been repeatedly urged by the paymaster general and his deputy to account for, but without effect.
974	Samuel Seton,	Quartermaster,	10	Advanced on account of the quartermaster department.
980	Winthrop Sergeant,	" "	620	Advanced him on account of his pay as adjutant general under Gen. St. Clair. The law did not recognise any such officer; but after the service was rendered, an appropriation passed by Congress for the amount; but this was not deemed sufficient to pass the money to his credit.
	John Sharpe,	Paymaster,	- 14,368 74	Advanced in 1799 on account of pay, subsistence, and forage, of the 10th regiment, and for the recruiting service. He was killed while in service. On examination of his accounts, a balance of \$1,371 88 is found due by him; he entered into bonds, and the sureties are liable for the money.
986	Lyne Shackleford,	Lieut. militia,	712 93	Advanced for the pay of the militia called out to suppress an insurrection in the western counties of Pennsylvania, in 1794. He has not produced any vouchers shewing the expenditure of the money. Mr. Carrington, by whom the advance was made, has been directed to call upon him for a settlement.
987	John Stewart,	Captain militia,	494 00	Advanced for the pay of the militia on the above service. He has not produced any receipts. Mr. Carrington has been directed to effect a settlement.
990	James Sutton,	Captain militia,	761 29	Advanced on account of the pay of militia called out to suppress an insurrection in the western counties of Pennsylvania, in 1794. He has not produced any receipts for the application of the money. Mr. Carrington, by whom the advance was made, has been called upon to effect a settlement.
992	Hugh Scott,	Surgeon,	1,250 00	Advanced for the purchase of medicine, &c. for militia called out on the above expedition. He has not produced any receipts. Mr. Carrington has been requested to effect a settlement.
	Thomas Shelton,	Major militia,	100 00	Advanced on account of his pay for services on said expedition. This amount has been accounted for, but the roll on which he is made up is not yet entered.
1002	William Swann,	Paymaster,	12,041 00	Advanced in 1799 and 1800 on account of pay, &c. of the 15th regiment, and on account of the recruiting service. He has rendered accounts, which, on examination, there is found a balance due by him of \$1,259 97, which he has been requested, by letter of the 17th instant, to refund to the treasurer of the United States.
1037	Abraham Shepperd,	- -	951 98	Balance due by him out of the advances made on account of expenditures at the armory at Harper's Ferry. On settlement of his account in the present year, a balance is found due by him of \$229 54, which he has been requested to refund to the treasurer of the United States.
1054	Campbell Smith,	Captain,	608 92	Advanced in 1800 on account of his pay, and for the recruiting service. Has accounted for \$400, which will be entered to his credit, the balance, the paymaster general has been directed to deduct from his first settlement.
1055	Ebenezer Stevens,	Agent War De-	1,000 00	Accounted for since the 1st January, 1802.
1073	Thomas Swaine,	Lieutenant,	180 00	Advanced in 1796 on account of the recruiting service. No vouchers have been received showing the application of this money

1074	George Strother,	Ensign,	180 00	Advanced in 1796 on account of the recruiting service. No vouchers have been received, showing the expenditure of this money.
1089	Joseph Smith,	-	3,675 00	Advanced in 1801 on account of the fortifications erecting for the defence of the town and harbor of Baltimore, and for the purchase of wood for the garrison of fort M'Henry. In a statement rendered by Mr. Smith, he shows the application of this money, and will forward vouchers as soon as he has completed the payments.
1363	Benjamin Smith,	Contractor,	9,666 65	Advanced on account of his contract for erecting or repairing the works at fort Johnston, North Carolina, which were to have been completed on the 31st December, 1800, when the balance was to have been paid. All operations were suspended in 1801, and measures will be taken to ascertain what part of this money he is entitled to receive a credit for.
306	William C. Smith,	Lieutenant,	66 00	Advanced in — on account of his pay. Of this sum 44 dollars has been accounted for on settlement of his account; the balance he has not credited.
230	Lemuel Prescott,	Major,	44 16	Accounted for, and will be entered to his credit in the present year.
236	Robert Thompson,	Lieutenant,	219 33	\$139 19 advanced by Daniel Britt, late paymaster, on account of his pay and subsistence. \$80 advanced in 1796 on account of pay. The above money has been accounted for, and will be entered to his credit.
240	Elijah Tisdale,	Surgeon's mate	25 68	Balance of advances in 1791 on account of pay. Accounted for, and will be entered to his credit in the present year.
250	James Taylor,	Captain cavalry,	114 00	Accounted for with the paymaster, who has not yet sent forward his recruiting vouchers.
252	John Tharpe,	Sup. artificers,	166 00	Accounted for, and will be entered to his credit in the present year.
325	Tipton's company,	-	512 14	Chargeable to pay of the army. The vouchers are retained in this office as evidence, until the payments are complete; therefore, has not been carried to the head of expenditure.
342	Henry B. Towle,	Lieutenant,	35 00	Advanced in 1792 on account of expenses marching his detachment of troops to Pittsburg. He has not produced any receipts showing the expenditure of this money, but no doubt the money has been expended for the purposes intended.
354	Samuel B. Turner,	Ensign,	286 95	Advanced in 1792 on account of pay and subsistence. Taken a prisoner by the Indians on the 4th November, 1791. Of this sum \$226 95 was for a draft to effect his liberation from captivity, which, to the time he arrived at the seat of Government, will be more than covered by his pay and subsistence.
403	John Thompson,	Indian interpreter,	400 00	Advanced in 1794, on account of his compensation as Indian interpreter, and accounted for with David Henly, agent for the Department of War.
417	George Taylor,	Captain,	320 00	This amount is nearly covered by pay and subsistence due to him at the date of his resignation.
427	Thomas Todd,	Colonel militia,	487 00	Advanced in 1793 and 1794 for pay of the Kentucky militia for their services in 1792. He has not produced the receipts of the individuals who performed the service, although it is likely the money has been duly applied.
438	John Toomy,	Sergeant major,	121 41	Balance of moneys advanced by Isaac Craig, on account of pay of the troops of the United States at Beaver block house, and for which no receipts have been transmitted.
458	Edward Teele,	-	50 00	Accounted for with David Henly, agent for the Department of War.
474	Jonathan Taylor,	Ensign,	5 95	Balance remaining on settlement of his account in June, 1796, as paymaster to the 4th regiment.
492	Samuel Tredwell,	Agent fortifications,	500 00	Advanced in 1794 on account of expenses mounting cannon at Ocracock fort. Accounted for by paying the amount over to Jos. Blount, who has rendered accounts.
518	John W. Thompson,	Ensign,	300 00	\$140 advanced in 1798, on account of the recruiting service; \$160 ditto in —. The above money will be entered to his credit when the vouchers are transmitted by the paymaster.
822	Alexander Trueman,	Major,	1,016 19	Of this sum \$564 96, being for his pay and subsistence, is accounted for; the balance was advanced him when ordered on a special mission to the Indians, by whom he was killed.
824	Daniel Torry,	Ensign,	92 86	Advanced by Daniel Britt, late paymaster, on account of pay and subsistence. Accounted for on settlement to the day he left the service.
858	David Thompson,	Ensign,	800 74	Balance arises out of moneys placed in his hands as paymaster to the regiment previous to his death. He entered into bond, and his securities will be accountable.
874	William Tharpe,	Lieut. cavalry,	758 88	Advanced in 1797 and 1798 on account of pay, and for expenses in marching a detachment of Captain Ball's troop from Washington to Tennessee. No vouchers have been rendered for the expenditure of this money. He is called upon, and will settle finally before he receives the balance of his pay, being deranged under the act of the 12th March, 1802.
929	Lewis Tousard,	Lieut. Colonel,	2,250 00	He has accounted for this money on settlement, dated 30th March, 1802.
959	Edward D. Turner,	Captain,	55 54	Balance remaining on settlement of his account in October, 1801, out of moneys placed in his hands for pay of himself and company, and which will be deducted on next settlement by the paymaster general.
987	John Turner,	Captain,	662 13	Advanced for pay of militia for their services on the western expedition in 1794, and for which no receipts of the party have been produced to do away the charge.
989	William Taylor,	Paymaster mil.	2,824 66	Advanced for pay of militia on said expedition. He has transmitted no receipts for the expenditure of this money.
1016	Charles M. Thruston,	Contractor,	19,616 92	Advanced in 1799 and 1800 on account of his contract for supplying the troops in Virginia with rations. He has been repeatedly urged to produce vouchers and settle his account, which he has frequently promised to do, but he has not yet complied.

101

+

E—Continued.

Ledger folio.	Names.	Rank.	Dolls. Cts.	REMARKS.
1049	James Taylor,	Captain,	3,800 00	Advanced in 1800 and 1801 on account of expenditures at the works on Beacon Island. He has rendered accounts showing a balance, unexpended, of \$571 98, but, for want of information to some of the charges which he has been directed to furnish, the account remains suspended.
1059	Edward Thomson,	Contractor,	123,500 00	Advanced in 1800 and 1801 on account of his contract of supplying the army with rations. He has rendered his accounts, which are now under examination, for supplies under his contract for 1800. Thirty thousand dollars of this sum was advanced on his contract for 1801, for which no vouchers have been rendered.
1089	Tousey and Chipman,	Contractors,	2,000 00	Accounted for since the 1st January, 1802.
854	Samuel Tinsley,	Captain,	50 00	Advanced in 1797 on account of pay. Accounted for, and will be entered to his credit.
1375	Francis S. Taylor,	-	500 00	Advanced in 1801, on account of the quartermaster department, being for the purchase of wood for the troops at Norfolk. He has not rendered any accounts shewing the application of this money.
	Joseph Torrance,	County Lieut.	452 15	He has not produced any receipts for the expenditure of this money, which was advanced to him in 1792, for the pay and rations of Captains Williams, Convels, and B. Bowell's companies of militia, in the service of the United States.
284	John Tillinghast,	Ensign,	614 69	Advanced in 1791, on account of pay and subsistence of himself and sundry officers and privates of the 2d regiment. He has rendered accounts, but the vouchers not being perfect, and many wanting, a settlement could not be effected; he claims a balance, which cannot be allowed, from those circumstances.
249	Sol. Van Rensselaer,	Major Cavalry,	100 00	Advanced in —, on account of the recruiting service. On being called upon, he states that he has vouchers in the Western country, which will cover this sum, and close his account.
925	Samuel C. Vance,	Deputy Paymaster General,	122,753 98	Captain Vance has rendered his accounts to the paymaster general, by whom they have been examined, and this money appears to have been duly applied.
190	Jacob Westfall,	County Lieut.	1,295 40	Advanced in 1791, for pay of scouts of Randolph county. He has produced no receipts from the individuals who rendered the service, to exonerate him from the charge.
246	William Winston,	Major,	75 00	Balance due on settlement of his account, in March, 1801.
250	John Webb,	Capt. Cavalry,	918 00	Advanced on account of the recruiting service in —. He has rendered a statement of charges, wherein he claims a considerable balance; but the vouchers have not been received, therefore no settlement can take place.
265	James Wells,	Captain,	700 00	Advanced in 1792, on account of the recruiting service. No settlement could be effected, owing to his sudden death; some part of the money has doubtless been applied, but to what amount cannot be ascertained.
315	Anthony Wayne,	Major Gen.	7,820 15	Of this sum 820 15 dollars has been accounted for; the balance of \$7000, was advanced on account of the contingencies of the War Department and for the Indian department. His account rendered, contained a charge for pay as commissioner for treating with Indians, for a much longer period than he was entitled to; deducting the whole of his charge from the account, will leave a considerable balance to his debit.
334	John Whistler,	Lieutenant,	1,220 67	\$37 32 due on settlement of his account, December, 1796—1183 35, advanced in 1798, on account of the recruiting service, and for pay and subsistence of the army. He has not rendered the necessary receipts to exonerate him from the charge.
347	Winslow Warren,	Lieutenant,	138 64	Advanced in 1791, on account of his pay and subsistence. Accounted for by his pay, to the day he was killed, and will be entered to his credit on settlement of the accounts of the regiment to which he belonged.
356	Charles Wright,	Ensign,	200 00	Advanced in 1797, on account, and has been accounted for with David Henley, agent for the Department of War.
390	John Wade,	Lieutenant,	8,661 76	\$8,132 66, advanced in 1798, for pay due the troops at Walnut Hill, Mississippi, and for the recruiting service—\$529 10 advanced in 1796 and 1797, on account of his pay, for the recruiting service, and for expenditures in the Indian Department. No accounts could be procured from this officer, although repeatedly called upon; he is now deranged, and will be obliged to settle before any arrearages will be allowed.
443	Acquilla Whitagar,	County Lieut.	188 33	Advanced in 1794, for the pay of the scouts of Shelby county, for their services in 1793, and for which no receipts of the individuals who performed the service have been rendered, to exonerate him from the charge.
492	John Wallace,	Agent fortifications,	250 00	Advanced in 1794, on account of expenses mounting cannon on Beacon island. Accounted for and chargeable to Jos. Blount, contractor for fabricating gun carriages.
633	James Wilkinson,	Indian Commis.	500 00	Advanced in 1801, on account of his expenses, as commissioner for holding treaties with Indians, in which capacity he is now acting.

762	John Wilkins, Jr.	Quartermaster General.	880,452 97	Advanced in 1798, 1799, 1800, and 1801, on account of expenditures in the Quartermaster's department. He has rendered accounts, which have been examined, but, owing to the want of certain statements, and particularly the sales of the public property sold by him and his deputies, and which he has been called upon to furnish, they cannot be entered. On being called upon relative to the state of his accounts, and the sums at his debit, he states that he will duly account therefor.
833	William Wells,	Indian Interpr.	150 00	Accounted for since the 1st January 1802.
838	John Whitney,	Conductor of military stores, Brigadier Gen.	200 00	Advanced in 1798, on account of his pay as conductor of military stores. He died without settling his account; the arrearages of his pay will, in all probability, cover this sum.
848	James Wilkinson,		5,809 68	Advanced on account of the Indian and other departments, for which some accounts have been rendered, but the vouchers are not in a state for entry.
871	Resin Webster,	Lieutenant,	3,140 57	Advanced in 1798, on account of the recruiting service, and for pay of two companies of the 1st regiment infantry. He has not produced any receipts for the application of this money.
879	Edward Wright,	Milit. st. keepr.	250 00	This amount has been accounted for with David Henly, agent for the War Department.
887	James Winchester,	Indian Commissioner	1,131 42	Advanced in 1797, on account of his salary as Indian commissioner for running the boundary line between the United States and certain Indians. Accounted for.
922	Decius Wadsworth,	Major,	6,110 00	Accounted for since the 1st January, 1802.
924	Charles Wolstonecraft	Paymaster,	38,955 55	Advanced for the pay, subsistence, and forage, of the 2d regiment of artillerists and engineers, for 1800, and on account of the recruiting service. He has not rendered all his accounts, but he will doubtless account for all the moneys received by him.
954	James Wilson,	Lieutenant,	60 00	Advanced in 1800, on account of paying his expenses on an order by the inspector of artillery. He has not rendered any vouchers showing the application.
960	William W. Wands,	Ensign,	75 00	Advanced on account of his pay. Accounted for, and will be entered to his credit in the present year.
975	Benjamin Williamson,	Deputy Paymaster General,	235,266 68	Advanced in —, for the pay, subsistence, and forage, of that part of the army under the immediate command of Major General Hamilton. He has rendered accounts to the paymaster general, which are not yet examined, but it appears by his statement, that the whole sum has been duly applied.
985	Robert Walters,	Lieut. Militia,	150 55	Advanced for the pay of militia, called out to suppress an insurrection in the western counties of Pennsylvania, for services in 1794. No receipts have been rendered, shewing the application of this money. Mr. Carrington, who made the advance, has been directed to effect a settlement.
	John Woodroof,	Ditto.	165 74	Advanced for the pay of ditto, for their services on the said expedition. No receipts have been received at this office, shewing the application of this money. Mr. Carrington has been directed to effect a settlement.
1004	Leonard Williams,	Lieutenant,	60 00	Advanced in 1799, on account of pay, and which has been accounted for on settlement of his pay account.
1025	Jonathan Williams,	Aid-de-Camp,	400 00	Advanced in 1799, by order of General M'Pherson, on the expedition to suppress an insurrection in Northampton county, State of Pennsylvania. He has rendered accounts, but they are deemed inadmissible, being for expenses of General M'Pherson, over and above the allowance by law.
1048	Israel Whelan,	Purveyor,	72,022 19	Advanced in 1801, on account of supplies to the army of the United States. Has rendered his accounts to the 31st December, 1801, in which a balance is stated to be in his hands of \$5,499 51, to be carried to new account.
1074	John Wallington,	Lieutenant,	2 00	Balance due on settlement of his account in October, 1801, and which is to be deducted on next statement.
1078	Joseph Williams,	Paymaster and Storekeeper,	11,008 65	Advanced in 1801, on account of expenditures at the armory at Springfield, Massachusetts. His accounts have been rendered and settled to the 31st December, 1801, by which appears a balance due the United States of \$2,432 58, which will be charged in next settlement.
1352	Eli Whitney,	Contractor,	35,000 00	\$30,000 amount of advances in the Treasury Department, transferred for settlement at this office, in 1801, \$5,000 advanced in 1801, on account of his contract, for fabricating small arms. He has rendered vouchers for the delivery of five hundred muskets on account, leaving a balance of \$28,300 due by him, for which he has yet to produce vouchers, for arms manufactured.
1368	Eli Williams,	Contractor,	3,000 00	Advanced in the Treasury Department on account of his contract, for the fabrication of small arms, transferred for settlement at this office in 1801, for which he has not rendered any accounts.
1362	Benjamin Wallace,	Lieutenant,	60 00	Advanced in 1801, on account of the recruiting service, and for the application, no vouchers have been rendered.
1368	Charles Wilkins,	Contractor,	30,000 00	Advanced in 1801, on account of his contract for supplying the army with rations in the year 1802; he is requested to furnish his accounts quarterly or half yearly.
1370	{ Wilkinson, Hawkins, & Pickens, for holding treaties with Indians,	} Commissioners,	1,398 46	Advanced in 1801, on account of their expenses, and for supplies to them as commissioners for treating with Indians, and is reserved for final adjustment, until all their accounts are complete.
844	Richard Whiley,	Lieutenant,	104 00	Advanced in 1797, on account of pay; accounted for, and will be entered to his credit in the present year.
858	Thomas J. Vandyke,	Lieutenant,	210 00	Advanced in 1797 and 1798, on account of his pay; accounted for, and will be entered to his credit.
1349	Daniel Vertner,	Contractor,	7,500 00	Advanced in 1801, on account of his contract for supplying the troops of the United States with rations in the present year, for which he is to account quarterly or half yearly.

Abstract of Balances to the debit of individuals, on the books of this office, March 1st, 1802.

	To the debit of Navy Agents now in service.	To the debit of Purser and other officers now in service.	To the debit of agents and officers not now in service.	To the debit of indivi- duals on ac- count of contracts.	TOTAL.	
William Amory, lieut'ant marines,	-	\$72 32	-	-	\$ 72 32	Accounts received and examined; statement preparing; balance will be in his favor.
John Archer, lieutenant,	-	-	150	-	150	
Benjamin Alline, purser,	-	590 06	-	-	590 06	
Moses Allen, purser,	-	1,063 48	-	-	1,063 48	
Samuel Anderson, surgeon,	-	-	40	-	40	Accounts rendered to the whole amount; examined, and found deficient in vouchers, of which he has been advised.
Caleb Allen, midshipman,	-	-	57	-	57	
John Adams, captain,	-	-	2,969 76	-	2,969 76	
Samuel Allen, midshipman,	-	76 47	-	-	76 47	Accounts received to Nov. 1, 1801, amounting to \$204,581 15, and now under examination.
W. W. Burrows, lt. col. com'dt. M.C.	-	216,374 47 ⁵ / ₈	-	-	216,374 47 ⁵ / ₈	
John Brown, capt. Diligence cutter,	-	-	167	-	167	Credited in the purser's account, now under examination; statements of which are preparing.
Samuel Barron, captain,	-	12,299 38	-	-	12,299 38	
William Burt,	-	-	4,500	-	4,500	To purchase pork; imperfect accounts received and returned.
Silas Butler, purser,	-	602 51	-	-	602 51	Dead.
Ebenezer Bushnel, purser,	-	-	1,501 25	-	1,501 25	
James Barron, captain,	-	671 50	-	-	671 50	To pay Navy pensioners.
Richard C. Beale, lieutenant,	-	-	250	-	250	
John Barry, captain,	-	120	-	-	120	On account of a contract for timber.
Jabez Bowen,	-	140 25	-	-	140 25	
William S. Butler, midshipman,	-	38	-	-	38	Of the General Green, in ordinary; accounts received.
Moses Bates, midshipman,	-	100	-	-	100	
Robert Brent,	-	-	-	1,400	1,400	Accounts received to 1st March, 1802; balance in his favor, \$5,493 77.
Richard B. Brandt, master,	-	742 20	-	-	742 20	Dead.
Samuel Brown,	184,978 20	-	-	-	184,978 20	Dead.
James Boush, lieutenant,	-	-	100	-	100	Advanced on account of French prisoners; accounts received, and a balance claimed by him.
Nathaniel Bosworth, lieutenant,	-	-	300	-	300	For his bill in favor of T. T. Gantt, agent at St. Kitts, drawn as commander of the Eagle, for supplies, and will probably be settled in the purser's account.
Philip N. Bradley, marshal,	-	-	10,300	-	10,300	For slops delivered him as master of the Congress, in ordinary; it is probable they have been delivered at the Navy store at Washington, or to his successor.
M. Simonnes Bunbury, lieutenant,	-	-	9,209 50	-	9,209 50	
Henry Bernard, surgeon,	-	55	-	-	55	Advanced on account of French prisoners.
James Burns, lieutenant,	-	-	993 84	-	993 84	
Christian Carpenter, sheriff Lancaster county,	-	-	103 25	-	103 25	Accounts received, agreeably to which there is a balance due him.
William Crafts,	-	-	100,293 61 ¹ / ₂	-	100,293 61 ¹ / ₂	Accounts received, in which there is a credit for money received of Mr. Habersham, late collector at Savannah, in pursuance of directions from the Treasury Department, but of which sufficient data have not been received to authorize a settlement; balance in his favor.
Daniel Carmick, captain marines,	-	36 96	-	-	36 96	
Michael B. Carroll, midshipman,	-	151 75	-	-	151 75	
Hugh G. Campbell, captain,	-	25,240 24	-	-	25,240 24	

F—Continued.

Abstract of balances to the debit of individuals, on the books of this office, March 1st, 1802.

	To the debit of Navy Agents now in service.	To the debit of Purser and other officers now in service.	To the debit of agents and officers not now in service.	To the debit of individu- als on ac- count of contracts.	TOTAL.	
Buller Cocke, purser, -	-	19,957 05	-	-	19,957 05	Accounts received, examined, and office statements preparing; will shortly be settled.
Jonathan Church, lieut'nt marines, -	-	-	13 72	-	13 72	
David M. Clarkson, St. Kitts, -	-	-	79,928 21	-	79,928 21	Accounts received, but a dispute relative to the exchange on bills, prevents a settlement; a considerable balance is claimed by him.
Archibald Campbell, -	-	-	42,598 94	-	42,598 94	Accounts received, and the balance due by his statement paid to his successor.
George Cross, captain, -	-	-	25,559 70	-	25,559 70	Of the John Adams. Purser, in his account received, credits the amount.
William Campbell, midshipman, -	-	70	-	-	70	
Samuel I. Cox, purser, -	-	-	30,520 23	-	30,520 23	Lost in the Insurgente; imperfect accounts received.
John H. Carr, purser, -	-	10,061 52	-	-	10,061 52	Of the Constellation; imperfect accounts received.
William Cowper, Captain, -	-	-	5,529 26	-	5,529 26	Accounts received; very imperfect.
William Cammick, lieut. marines, -	-	832	-	-	832	Advanced on account of recruiting marines at Norfolk.
Thomas I. Chew, purser, -	-	177 82	-	-	177 82	
John Caldwell & Co. -	-	-	30,000	-	30,000	To purchase beef; no accounts received; beef delivered.
Philip Craig, midshipman, -	-	10	-	-	10	
Isaac Chauncey, lieutenant, -	-	68	-	-	68	
William Crane, midshipman, -	-	38	-	-	38	
Matthew Clarkson, -	-	-	104 43	-	104 43	To pay navy pensioners.
Christopher S. Carpenter, midship'n, -	-	30	-	-	30	
Samuel Conant, midshipman, -	-	-	19 98	-	19 98	
George W. Coffin, midshipman, -	-	-	18 93	-	18 93	
Samuel Cassin, lieutenant, -	-	-	498	-	498	Advanced to him as recruiting officer for the Philadelphia.
George Cox, lieutenant, -	-	4,612	-	-	4,612	Advanced him as recruiting officer for the Maryland.
John Donaldson, -	-	-	1,350	-	1,350	On account of cannon said to be delivered to the War Department, and applied to the navy; an imperfect account received.
Richard Dale, captain, -	-	7,021 20	-	-	7,021 20	Accounts received; balance claimed by him.
Stephen Decatur, Jr. lieutenant, -	-	11,550	-	-	11,550	Advanced to him as recruiting officer for the frigate United States; it is alleged that the vouchers were forwarded to the accountant by the pilot boat; not received.
Laurence A. Dorsey, capt. of cutter, -	-	-	100	-	100	
William A. Duer, midshipman, -	-	-	270	-	270	
Henry Farby, purser, -	-	4,954 43	-	-	4,954 43	Of the Eagle; accounts received; balance in his favor.
John Dorsey, -	-	-	-	3,000	3,000	On account of a contract for anchors.
David Deacon, midshipman, -	-	38	-	-	38	
Shubael Downs, master, -	-	-	250	-	250	Accounts received; balance in his favor.
George Davis, surgeon, -	-	100	-	-	100	
James Dunham, carpenter, -	-	-	109 28	-	109 28	Settled.
John L. D. Duboze, midshipman, -	-	-	49 21	-	49 21	
John F. Elsworth, midshipman, -	-	-	80	-	80	
Ashbel Fenton, purser, -	-	3,306 75	-	-	3,306 75	Accounts received; balance due him.
Tench Francis, purveyor, -	-	-	6,173 48½	-	6,173 48½	Accounts received; agreeably to which, a considerable balance is due to him.

Patrick Fletcher, Captain,	-	-	3,833 78 $\frac{1}{2}$	-	3,833 78 $\frac{1}{2}$	Lost in the Insurgente; accounts received; balance in his favor.
Thomas Fitzsimons,	-	-	192,531 07	-	192,531 07	Chairman of a committee for building the Philadelphia; accounts received, examined, and found deficient in vouchers to a small amount, of which he was advised, but no answer has been returned.
T. W. Francis, & Geo. Harrison,	-	-	19,300	-	19,300	Advanced to them as executors of Tench Francis, on account of a balance, as stated to be due said Francis, in his accounts received.
Thomas Fowler, captain of galley,	-	-	100	-	100	On account of a contract for cannon.
Henry Foxall & Co.	-	-	-	2,000	2,000	Ditto ditto.
Henry Foxall,	-	-	-	18,000	18,000	
Joseph Field, midshipman,	-	-	38	-	38	
Edward Field, surgeon's mate,	-	-	31 50	-	31 50	
John Foote, lieutenant,	-	-	100	-	100	
+ Peter Garts, purser,	-	-	24,529 99	-	24,529 99	Of the Maryland; no account received, but an imperfect pay roll, from which it may be presumed the Department may lose from 3,000 to 4,000 dollars.
Gibbs and Channing,	-	-	-	98,001 57 $\frac{1}{2}$	98,001 57 $\frac{1}{2}$	Accounts received, and the balance due by their statement, paid into the bank at Newport.
Isaac Garretson, purser,	-	-	122,703 21	-	122,703 21	Accounts received, examined, and found deficient in vouchers for transactions at St. Kitts. Mr. Clarkson, the agent who furnished the supplies, has been written to, but no answer received. If proper vouchers can be obtained, a balance will be due to him.
John Gault, midshipman,	-	-	57	-	57	Advanced on account of French prisoners.
Joseph Gantt, midshipman,	-	-	38	-	38	Of the Patapsco. Imperfect accounts received and examined, agreeably to which there will be a balance of between two and three thousand dollars against him.
Robert Gilmore,	-	-	00 05 $\frac{1}{3}$	-	00 05 $\frac{1}{3}$	Lost in the Insurgente.
Aquila Giles, marshal New York District,	-	-	945 76 $\frac{1}{2}$	-	945 76 $\frac{1}{2}$	
Henry Geddes, captain,	-	-	17,196 99	-	17,196 99	To pay navy pensioners.
Richard Gantt, midshipman,	-	-	54 80	-	54 80	Accounts received, examined, and office statements now preparing, agreeably to which there is a balance due to them.
Thomas Gordon, midshipman,	-	-	35 26	-	35 26	Advanced on account of French prisoners; accounts received amounting to \$3,226 90.
George G. Grubb, midshipman,	-	-	38 00	-	38 00	Consul at Havana; no accounts received.
John Goodwin, midshipman,	-	-	38 00	-	38 00	On account of a contract for cannon.
William Gardner,	-	-	448 30	-	448 30	Accounts received; balance in his favor.
Christopher Gadsden, midshipman,	-	-	38 00	-	38 00	Lost in the Pickering.
Royal Gurty, midshipman,	-	-	38 00	-	38 00	Accounts received; balance in his favor.
Stephen Higginson, & Co.	-	-	629,559 24	-	629,559 24	Accounts received to 1st March, 1802; balance in his favor 1,031 dollars.
Robert Hamilton, marshal Del.	-	-	2,830 60	-	2,830 60	To purchase beef; accounts received; balance in their favor.
Daniel Hawley, consul Havana,	-	-	213 37	-	213 37	Advanced for expenses of prizes to the Experiment; no accounts received.
Daniel Hughes,	-	-	80 00	-	80 00	
Samuel Hughes,	-	-	-	13,645 68	13,645 68	Settled previous to 1st March, 1802.
Thomas Hardenburgh, midshipman,	-	-	57 00	-	57 00	To pay navy pensioners.
Robert Harris, surgeon's mate,	-	-	580 00	-	580 00	
Edward Hall, lieutenant marines,	-	-	68 14 $\frac{1}{2}$	-	68 14 $\frac{1}{2}$	
Benjamin Hiller, M. C. Pickering,	-	-	14,278 18	-	14,278 18	
Samuel Hayward, Lieutenant,	-	-	7,189 21	-	7,189 21	
George Harrison,	400,319 50	-	-	-	400,319 50	
Howland & Allyn,	14,500 00	-	-	-	14,500 00	
Benjamin Hodgson,	-	-	287 78	-	287 78	
William Hartigan, midshipman,	-	-	57 00	-	57 00	
Isaac Hull, lieutenant,	-	-	4 71	-	4 71	
Lewel Handy, midshipman,	-	-	17 08	-	17 08	
John A. Hazard, purser,	-	-	5,911 35	-	5,911 35	
John Hopkins,	-	-	74 32	-	74 32	
Thomas Hoit, lieutenant marines,	-	-	489 11	-	489 11	
James Haight, midshipman,	-	-	38 00	-	38 00	

F—Continued.

	To the debit of Navy Agents now in service.	To the debit of Pursers and other officers now in service.	To the debit of agents and officers not now in service.	To debit of individuals on account of contracts.	TOTAL.

Of the Philadelphia, now in the Mediterranean.

On account of a contract for timber.

On account of marine barracks.

Dead.

Accounts received; balance in his hands, \$483 30.
Lost in the Pickering.

Advanced to him as commander of the Conquest of Italy, prize to the Insurgente, employed as a cruiser. Imperfect accounts received.
Accounts received; balance in his hands, \$1,944 92.

Of the frigate United States; accounts received, in which there is a credit for supplies received previous to the establishment of this department, but of which sufficient data have not been received to justify a settlement; balance against him, agreeably to his statement, \$417 73.
Accounts received; balance against them.

On account of French prisoners.

Accounts received to the amount.
Consul at the Havana; very imperfect accounts received, and returned.

On account of a contract for timber.

F—Continued.

A Statement showing the aggregate of advances on account of this Department, from August, 1798, to 1st March, 1802, and how far they have been accounted for.

Advances to be accounted for from August, 1798, to 1st of January, 1800, the time the business was under the direction of Mr. Winder, the former accountant, viz:

Balances transferred from the War Department,	-	-	-	-	\$17,293 55	
Ditto from the Treasury Department,	-	-	-	-	330,967 12	
Navy six per cent. stock,	-	-	-	-	109,200 00	
Warrants on the Treasurer,	-	-	-	-	3,418,501 50	
						<u>\$3,875,962 17</u>
Accounted for in accounts settled,	-	-	-	-	\$546,918 07	
Balance to the debit of individuals, 1st January, 1800,	-	-	-	-	3,329,044 10	
						<u>\$3,875,962 17</u>

Advances to be accounted for from 1st January, 1800, to 1st March, 1802, the time the business has been under the direction of the present accountant:

Balances to the debit of individuals, 1st January, 1800,	-	-	-	-	\$3,329,044 10	
Navy six per cent. stock,	-	-	-	-	602,590 36	
Warrants on the Treasurer,	-	-	-	-	5,672,004 75	
						<u>\$9,603,639 21</u>
Accounted for in accounts settled,	-	-	-	-	\$5,505,127 54	
Balance to the debit of individuals, on the 1st of March, 1802, per foregoing abstract,	-	-	-	-	4,098,511 67	
						<u>\$9,603,639 21</u>

Amount of warrants drawn on the Treasurer, from August, 1798, to the 1st January, 1799,	-	-	-	-	-	\$570,314 24
1st quarter, 1799,	-	-	-	-	\$448,212 52	
2d ditto, do.	-	-	-	-	644,460 87	
3d ditto, do.	-	-	-	-	904,820 35	
4th ditto, do.	-	-	-	-	850,693 52	
						2,848,187 26
1st quarter, 1800,	-	-	-	-	700,732 99	
2d ditto, do.	-	-	-	-	766,124 21	
3d ditto, do.	-	-	-	-	806,597 59	
4th ditto, do.	-	-	-	-	1,111,885 69	
						3,385,340 48
1st quarter, 1801,	-	-	-	-	867,034 50	
2d ditto, do.	-	-	-	-	726,467 48 $\frac{1}{2}$	
3d ditto, do.	-	-	-	-	307,738 96 $\frac{1}{2}$	
4th ditto, do.	-	-	-	-	179,179 77	
						2,117,420 72
To the 1st of January, 1802,	-	-	-	-	-	8,921,262 70
From the 1st of January, to the 1st of March, 1802,	-	-	-	-	-	169,243 55
						<u>\$9,090,506 25</u>

NAVY DEPARTMENT, *Accountant's Office,*

THOMAS TURNER, *Accountant.*

Specification of expenditures, as accounted for in accounts settled from August, 1798, to 1st January, 1802.

Cost and equipment of vessels,	-	-	-	-	-	1,776,376 74
Pay of the navy,	-	-	-	-	-	876,281 05
Subsistence of the navy,	-	-	-	-	-	529,452 75
Contingent expenses of the navy,	-	-	-	-	-	447,161 19
Recruiting expenses,	-	-	-	-	-	16,517 56
Ordnance,	-	-	-	-	-	177,514 18
Hospital department,	-	-	-	-	-	47,861 27
Pay of naval constructors, clerks, and store-keepers,	-	-	-	-	-	33,020 44
Navy yards and docks,	-	-	-	-	-	100,252 74
Prisoners,	-	-	-	-	-	26,253 83
Prizes, (this account was raised in the year 1799; it should have been charged under contingent expenses,)	-	-	-	-	-	81 32
Extra pay of the navy,	-	-	-	-	-	21,354 00
General store,	-	-	-	-	-	1,102,267 23
Marine corps,						
Pay,	-	-	-	-	\$11,603 74	
Subsistence,	-	-	-	-	51,063 61	
Clothing,	-	-	-	-	30,005 41	
Military stores,	-	-	-	-	1,009 87	
Quartermaster's stores,	-	-	-	-	11,278 68	
Forage,	-	-	-	-	31 40	
Barracks,	-	-	-	-	4,297 10	
						109,349 61
						<u>\$5,263,743 91</u>

A list of balances, of which the foregoing abstract is a copy, was ascertained and made out for the Secretary of the Navy, previous to the application of the Committee of Investigation; and to have made out another to, the 1st of January, would have required time and much labor. The difference, however, in the amount of expenditures here specified, and the amount stated to be accounted for in foregoing statement, arises in the advances, and the amount accounted for since the 1st of January.

NAVY DEPARTMENT, *Accountant's Office,* March 17, 1802.

THOMAS TURNER, *Accountant*

G.

G 6.

John Steel's account of extra expenses.

1800.							
May 24th.	Samuel Salter, and others,	-	-	-	-	-	No. 1. \$55 75
29th.	Insurance Company of Pennsylvania,	-	-	-	-	-	2. 21 00
June 16th.	Thomas Lorrain and son,	-	-	-	-	-	3. 27 45
25th.	John Hall, and others,	-	-	-	-	-	4. 15 10
July 16th	Thomas Lorrain and son, and others,	-	-	-	-	-	5. 25 00
	Travelling expenses. <i>as far on my journey as the Potomac, in which are included sundry small sums expended previous to my departure from Philadelphia, too inconsiderable to be vouched or placed under any other head,</i>	-	-	-	-	-	110 00
							<u>\$254 30</u>

NOTE.—I received from the bank, on the above accmpt, an advance of \$300; the balance of which I am now ready to return; and considering that I did not remove my family to Washington, but to Carolina, it is my particular desire, that the auditor will be so good as to consult the Secretary of the Treasury, as to the effect that circumstance should produce. If both, or either of them should be of opinion that I am precluded by it from any allowance whatever, I will most cheerfully acquiesce, and return immediately to the bank the whole sum received.

JOHN STEELE.

The above account is, in my opinion, stated on proper principle.

OLIVER WOLCOTT.

NOTE.—The difference between three hundred dollars, received by Mr. Steele, and two hundred and fifty four dollars thirty cents, as above stated, was returned.

JOSEPH NOURSE, *Register*.

G 7.

THE UNITED STATES, *To Richard Harrison,* *Dr.*
For amount of the following expenses, incurred by him, in removing his family and furniture from Philadelphia to the District of Columbia, viz:

Cases, cords, &c. including packing and portorage, at Philadelphia,	- - - - -	\$69 79
Wharfage and portorage of furniture, at Georgetown,	- - - - -	6 00
Unpacking, repairing, and fixing furniture, at do.	- - - - -	24 05
Expenses of myself and servant from Philadelphia to Georgetown, in the public stage,	- - - - -	37 62
Do. of Mrs. Harrison and three servants, to do. in private carriage,	- - - - -	43 25
Dead rent paid in Georgetown, previous to the 11th June, when I gave up my house in Philadelphia,	- - - - -	93 06
Loss and damage of furniture. This cannot be ascertained with precision; but as a variety of articles of value are known to be actually lost or broken, others injured, and some, to avoid the expense of packing and freight, were left behind, or sold much below their cost, I estimate this item under the true amount, in fixing it at	- - - - -	100 00
		<u>\$373 95</u>

October 3d, 1800.

R. HARRISON.

G 8.

THE UNITED STATES, *To Joseph Nourse, Register of the Treasury,* *Dr.*
For his expenses in consequence of the removal of the Government of the United States, to the city of Washington.

For his expenses from Philadelphia to Georgetown, for the purpose of making arrangements for the removal of himself and family,	- - - - -	\$60 00
For expenses of packing up:		
804 feet of boards,	- - - - -	9 89
20 lbs. nails,	- - - - -	2 10
22 lbs. ditto,	- - - - -	3 22
1328 feet boards,	- - - - -	25 66
John Hall, himself and hands, in making boxes,	- - - - -	32 86
Boards,	- - - - -	3 08
Nails,	- - - - -	9 08
Twine, cords, and brandy to the men,	- - - - -	9 00
Packing looking glasses, china, and furniture, in Philadelphia,	- - - - -	24 00
Portorage, and sundry expenses, ditto,	- - - - -	20 00
Ditto, do. in Georgetown,	- - - - -	20 00
Unpacking furniture, at Georgetown, and expenses,	- - - - -	12 50
		<u>171 39</u>
For the hire of two carriages, for the conveyance of myself, Mrs. Nourse, children, and servants,	- - - - -	150 00
For the expenses of myself and family on the road, including three white and two black servants,	- - - - -	100 00
Paid Barrett and Shoemaker, as per their receipts, for the premium of insurance on my furniture, shipped at Philadelphia, on board the schooner Experiment, as per invoice and policy, 4,000 dollars, at 2 per cent.,	- - - - -	80 00
Paid Thomas Cuthbert, rent in Philadelphia, at 300 dollars per annum, from 1st April, 1800, my rent commencing on the same day at Georgetown,	- - - - -	60 80
My extra expenses in Philadelphia, after quitting my house, including servants and horses, from Friday to Tuesday, deducting my common expenses,	- - - - -	40 00
My extra expenses in Georgetown, including myself and horses, at a tavern, and other expenses previous to fixing my family,	- - - - -	17 50
From the breakage of glass and china ware, injury sustained by my furniture, loss of sundry articles in removing from my house in Philadelphia to the vessel, and from the vessel at Georgetown wharf to my house; I am at a loss to fix the compensation therefor, but, taking the aggregate value of the whole at \$4,000, I charge three per cent. for said damages and losses,	- - - - -	120 00

Paid Accountant's travelling expenses from Philadelphia to Georgetown, - - - - -	38 50
	<u>\$124 51½</u>

WASHINGTON, August 4, 1800.

L.

Letter from the Secretary of War, containing instruction to the Accountant of the War Department.

WAR DEPARTMENT, December 28, 1797.

SIR:

The President of the United States has maturely considered the questions relative to your official powers and duties, arising out of the facts stated to you in my letter of the 11th November ultimo, with your explanations, and has directed me to communicate, for your government, his decision therein.

1. The Secretary of War is the sole judge of the time and manner of making disbursements of moneys advanced to the Treasurer of the United States, by warrants from the Department of the Treasury, but the said Secretary of War is responsible that all disbursements shall be for objects justly chargeable under the heads of appropriations for which the advances have been made.

2. The Accountant of the War Department is, in no respect, comptroller of the disbursements ordered by the Secretary of War. The power of countersigning the warrants of the Secretary was given for the purpose of subjecting the said disbursements to a regular course of examination and settlement, and not for the purpose of restraining advances.

3. The Accountant of the War Department is a sub-auditor; his duties are confined to the *settlement of accounts*; in the exercise of which duties he is not subject to the control of the Secretary of War.

4. The Secretary of War, under such restrictions as are prescribed by the President of the United States, and understood by the said Secretary, is authorized to determine the rules of compensation and allowance for services of an incidental nature, where no rule has been established by Congress; and, for expenditures of such a nature as are not to be made public, the President will, from time to time, direct certificates to be made, which are to serve in lieu of the vouchers ordinarily required in the settlement of accounts.

5. The Accountant of the War Department is responsible, in the first instance, to the Auditor, and, finally, to the Comptroller of the Treasury, for observing proper rules and principles, in the settlement of accounts; in cases where a diversity of opinion is found to exist, the opinion of the Comptroller of the Treasury is to prevail, and be conclusive.

Persons charged with public moneys, and held accountable in the books of your office, are to be allowed to appeal from your decisions, to the officers of the treasury, in the course above prescribed.

I am, sir, your most obedient servant,

JAMES M'HENRY.

WILLIAM SIMMONS, Esq.

M.

Report of the Secretary of the Treasury to the President of the United States.

TREASURY DEPARTMENT, December 20, 1799.

The Secretary of the Treasury, in obedience to the command of the President of the United States, has considered the letter of the Secretary of War, dated November 27th, 1799, and, thereupon, most respectfully submits the following report:

That, by an act of Congress, passed on the 9th of February, 1793, it is declared "that, in all cases where any sum or sums of money have been issued, or shall hereafter issue from the treasury, for the purposes of intercourse or treaty with foreign nations, in pursuance of any law, the President shall be, and he is hereby, authorized to cause the same to be duly settled, annually, with the accounting officers of the treasury, in manner following, that is to say: by causing the same to be accounted for, specifically, in all instances wherein the expenditure thereof may, in his judgment, be made public, or by making a certificate or certificates, or causing the Secretary of State to make a certificate of the amount of such expenditures as he may think it advisable not to specify; and every such certificate shall be deemed a sufficient voucher for the sum or sums therein expressed to have been expended."

The foregoing express provision, by law, contains, as is believed, a safe and proper rule for controlling the expenditure of all moneys disbursed for secret purposes; it is impossible to conduct the business of the Departments of State, War, and Navy, without sometimes incurring expense, the precise objects of which cannot be safely disclosed; and it is, however, at the same time necessary, that such expenditures should be made in a manner best calculated to shield the officers of Government from odium or suspicion.

To reconcile these objects, in the best manner possible, and to preserve the means of ascertaining the aggregate amount of secret disbursements, on account of the Government, it is respectfully submitted, as the opinion of the Secretary, that all such expenditures ought to be ascertained to the satisfaction of the President, and certified according to the form hereto annexed.

All which is respectfully submitted, by

O. W.

By ———, *President of the United States.*

It is hereby declared that, by the representation of the Secretary of the Department of ———, it appears, to my satisfaction, that ——— have been disbursed for objects in relation to the duties of the said Department, and to promote the interest of the United States; the specification of which disbursements, at this time, is deemed inexpedient.

This certificate is, therefore, granted to serve as a voucher for the sum aforementioned, which is (here insert the words "to be paid," or the words "to be passed to the credit of," also the name) by the proper officer or officers of the Government of the United States.

In witness whereof, I have signed these presents, this ——— day of ———, and caused the same to be countersigned by the Secretary of ———, and the seal of said Department to be annexed.

N.

Certificate of the President, directing five hundred dollars to be passed to the credit of James Ross, Esq. applied to secret services.

By JOHN ADAMS, *President of the United States.*

It is hereby declared that, by the representation of the Department of War, it appears, to my satisfaction, that five hundred dollars have been disbursed for objects in relation to the duties of the said Department, and to promote the interests of the United States, the specification of which disbursements, at this time, is deemed inexpedient. This certificate is, therefore, granted to serve as a voucher for the sum mentioned, which is five hundred dollars, to be passed to the credit of James Ross, Esq. by the proper officer or officers of the Government of the United States.

In witness whereof, I have signed these presents, this twenty-first day of December, 1799, and caused the same to be countersigned by the Secretary of War, and the seal of the said Department to be annexed.

JOHN ADAMS.

By command of the President:

[L. s.] JAMES M'HENRY, *Secretary of War.*

O.

Certificate of the President, directing one thousand three hundred and twenty dollars to be passed to the credit of Samuel Lewis, Sen., applied to secret service.

By JOHN ADAMS, *President of the United States.*

It is hereby declared that, by the representation of the Department of War, it appears, to my satisfaction, that one thousand three hundred and twenty dollars have been disbursed for objects in relation to the duties of the said Department, and to promote the interest of the United States, the specification of which disbursements, at this time,

is deemed inexpedient. This certificate is, therefore, granted, to serve as a voucher for the sum aforementioned, which is one thousand three hundred and twenty dollars, to be passed to the credit of Samuel Lewis, Sen. by the proper officer or officers of the Government of the United States.

In witness whereof, I have signed these presents, this twenty-first day of December, and caused the same to be countersigned by the Secretary of War, and the seal of the said Department to be annexed.

JOHN ADAMS.

By command of the President:

[L. S.] JAMES M'HENRY, *Secretary of War.*

WAR DEPARTMENT, *April 23d, 1802.*

SIR:

In compliance with your request of this day, I herewith enclose a statement of the amount of the expenses on the two objects referred to in your note.

With respectful consideration, I am, sir, your humble servant,

H. DEARBORN.

Hon. JOSEPH H. NICHOLSON,
Chairman of the Committee of Investigation.

Amount of expenses in establishing what is called the laboratory, on the Schuylkill, near Philadelphia, \$152,608 05.

April 23d, 1802.

SIR:

Presuming that a more particular statement of Mr. Tracey's expenses might be wished by the committee, I have directed the enclosed copy of his account to be made, to which is annexed the charges exhibited by the quartermaster general, for transportation, &c.

H. DEARBORN.

Mr. NICHOLSON.

DR.

Uriah Tracey, in account current with the United States.

CR.

1800. June 26.	To warrants on the Treasurer: For warrant No. 5,117, in advance, on account of his compensation for services under an appointment from the President of the United States, to visit and examine into the actual state of the garrisons, Indian trading houses, or factories, &c. in the North Western Territory, on the Mississippi, and on the frontiers of Tennessee and Georgia, - - - - - 100 28. For warrant No. 5,118, in advance on account of his compensation for services under an appointment from the President of the United States, to visit and examine into the actual state of the garrisons, trading houses, or factories, &c. in the North-western Territory, on the Mississippi, and on the frontiers of Tennessee and Georgia, - - - - - 1,000 To balance due Uriah Tracey, - - - - -	1,100 730 32 <hr/> \$1,830 32	By incidental and contingent expenses: For amount of his account of expenses of himself and servant, and sundry articles purchased for his use in traveling from Litchfield, Connecticut, to Detroit, and back to Litchfield, under an appointment by the President of the United States, - - - - - 598 32 His compensation from 16th June to 16th November, 154 days, at 8 dollars per day, - - - - - 1,232 <hr/> 1,830 32 <hr/> \$1,830 32
	To which add the following sums paid by the quartermaster general, on account of the expenses of Mr. Tracey: Paid Mr. Morrow, for tavern bill at Pittsburgh, in June, 1800, - - - - - \$7 23 Paid Captain Peter Currie, for sundries on his passage from Presqu' Isle to Detroit and Michillimackinack and back, from August to October, 1800, including subsistence for his servant, - - - - - 52 50 Paid Doctor Nathaniel Bedford for boarding Uriah Tracey, Esq. and servant, medical attention, &c. from 20th July to 18th August, 1800, at Pittsburgh, - - - - - 95 00 <hr/> \$154 73		NOTE.—The whole allowed by Samuel Dexter, acting Secretary of War, in conformity to the understanding before Mr. Tracey's departure on the journey above mentioned. See Mr. Dexter's note to that effect on the account rendered by Mr. Tracey.

DEPARTMENT OF WAR, *Accountant's Office, February 27, 1801.*

	To the wages of a servant from June 16 to November 16, inclusive, at 10 dollars per month, 50	
		<u>\$598 22</u>

I certify that the above account, amounting to five hundred ninety-eight dollars and thirty-two cents, is a just and true account of my expenditures in a journey performed at the request of the Secretary of War.

URIAH TRACEY.

WASHINGTON, 23d February, 1801.

To my daily wages at \$8 per day, from 16th June to 16th November, inclusive, 154 days, - - - - - \$1,232

URIAH TRACEY.

The Hon. MR. DEXTER, *Acting Secretary of War.*

Allowed: it being in conformity to the understanding as to compensation that took place before Mr. Tracey's departure on the journey abovementioned.

SAMUEL DEXTER.

The above is a copy of Mr. Tracey's account on file in this office.

WILLIAM SIMMONS.

DEPARTMENT OF WAR, *Accountant's Office, April 23, 1802.*

R.

GEORGETOWN, *April, 1800.*

It is agreed, by and between Ariana French of Georgetown, of the one part, and James M'Henry of Philadelphia, of the other part, that he, the said James M'Henry, is to give eight hundred dollars a year for one year's rent of the house which she the said Ariana French, now occupies, the rent to commence from the 1st day of June next, and to be paid quarterly; but it is optional with Mrs. French to have the rent paid in advance, deducting interest. The following repairs are to be made, viz. The four unfinished rooms are to be plastered and painted, and as much of the garret as is seen from the second floor will be finished, the two rooms on the first floor, on the left hand side as you

enter the door, will be painted and whitewashed, the windows whole, locks and keys sufficient, and the premises to be left by Mrs. French in the same repair that Mr. Caldwell saw it on the 15th day of April, 1800.

Mr. M^cHenry is to leave the house, enclosures, garden, &c. in the same order as he received them.

Witness our hands, this 22d day of April, 1800.

ARIANA FRENCH, [L. s.]
JOHN CALDWELL, for [L. s.]
James M^cHenry.

Witness,
GEORGE FRENCH.
JOHN B. EVANS.

A state of expenditures by Mrs. French, in consequence of renting a house to Mr. M^cHenry, being laid before us, the time another house was kept idle to receive Mrs. French and her family, and all circumstances being taken into consideration, we agree in opinion that Mr. M^cHenry pay to Mrs. French two hundred and eight dollars and ninety-five cents.

Given under our hands, this 12th July, 1800.

FRANCIS DEAKINS,
URIAH FORREST.

We are of opinion that the demand of Mrs. Ariana French of Georgetown, for her house, leased to James M^cHenry, Esq. late Secretary of War, amounting to two hundred and eight dollars and ninety-five cents, ought to be paid out of the fund for defraying the contingent expenses of the Department of War.

OLIVER WOLCOTT,
BENJAMIN STODDERT.

July 18, 1800.

JULY 18, 1800.

The Accountant for the Department of War is informed that the Secretary of that Department, in compliance with the above opinion, allows the aforesaid claim of Mrs. French, and the Accountant will please to settle the same accordingly.

SAMUEL DEXTER.

GEORGETOWN, July 21, 1800.

I authorize and empower Mr. Newman to receipt and receive for me the amount of the award of Messrs. Deakins and Forrest in my favor.

ARIANA FRENCH.

Received, July 21, 1800, of William Simmons, Accountant, a warrant No. 5145, issued by the Secretary of War, for two hundred and eight dollars and ninety-five cents, which sum is due to Mrs. Ariana French, for her house, leased to James M^cHenry, Esq. late Secretary of War, agreeably to award of Francis Deakins and Uriah Forrest, dated 12th July, 1800, and admitted, in compliance with the opinion of the Secretary of the Treasury and the Secretary of the Navy, and expressed in their certificate, dated 18th July, 1800, on file.

JOHN NEWMAN.

\$208 95

I certify that the above and foregoing are copies of papers filed as vouchers for warrant No. 5145, charged to the contingent expenses of the War Department.

WILLIAM SIMMONS, *Accountant Department of War.*
