No. 165.

[1st SESSION.]

## STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, DECEMBER 21, 1801.

TREASURY DEPARTMENT, *December 18th, 1801.*

SIR:

I have the honor to enclose a report prepared in obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department."

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the PRESIDENT of the Senate.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

The permanent revenues of the United States, according to the laws now in force, consist of, 1st, duties on merchandise and tonnage; 2d, internal duties on stills and domestic distilled spirits, refined sugar, licences to retailers, sales at auction, and pleasurable carriages; 3d, proceeds of the sales of public lands; 4th, duties on postage; 5th, dividends on shares in the Bank of the United States; 6th, incidental, arising from fees, fines, and penalties, repayments in the treasury, and sales of public property other than lands.

1. *Duties on merchandise and tonnage.*—The receipts in the treasury, arising from that source, have amounted, for the year ending on the 30th September, 1801, to \$10,126,213 92. If to this sum be added the drawbacks paid by collectors on the exportation of domestic distilled spirits and refined sugar, which are a charge on the internal revenues; and that part of the additional duties, laid in the year 1800, which did not operate during the year to which those receipts refer, the sum which would have been received at the present rate of duties, cannot be estimated at less than \$10,500,000. The amount of duties secured on the 30th September last, and falling due in the course of the year 1802, compared with that of preceding years, justifies an opinion, that, had the importations and exportations continued in the same proportion, those duties would have brought in the treasury, during the year 1802, near \$11,000,000.

How far this branch of revenue may be affected by the restoration of peace in Europe, is rather a subject of speculative conjecture than of calculation. That it will be liable to sudden and considerable fluctuations, cannot be doubted; and, for that reason, a greater degree of correctness may be obtained, by forming an estimate for a number of years, than for any one year. The period for which such an estimate should be made, being arbitrary, so far as relates to the revenue, that of the eight years, 1802 to 1809, is selected, principally in reference to the payments to be made on account of the public debt—the whole of the foreign debt being actually due within that term of years, and the eight per cent. stock becoming redeemable the last year of the period. The best data on which the estimate may be predicated, seem to be the actual consumption of imported articles during former years, and the ratio of increase of population as ascertained by the census.

With a view to the first object, the statements A to H have been abstracted from the records in the treasury. They exhibit the value or quantities of imported articles on which duties have been actually paid, for each calendar year, from 1790 to 1800, deducting from the gross amount imported, each year, the value or quantities of articles re-exported during the same year, which were entitled to drawback.

Those statements do not, however, show correctly, principally for the last years, the actual annual amount of consumption; because, 1st, exportations to a considerable, but not precisely ascertained amount, have taken place, under such circumstances as did not entitle the articles exported to a drawback; and 2d, the amount of foreign articles remaining on hand at the close of the year 1800, was much greater, in proportion to the respective population, than that on hand at the commencement of the year 1790. Those causes, which affect, to an inconsiderable degree, the years 1790 to 1792, and but partially those immediately succeeding, would, however, render any deduction drawn from those documents, in relation to the years 1799 and 1800, altogether fallacious. The preceding nine years may be divided into two distinct periods; the first, from the 1st day of January, 1790, to the 31st day of December, 1792, includes the three years which immediately preceded the European maritime war; the second includes the six first years of that war, viz. from the commencement of 1793 to the close of 1798.

In order to obtain a distinct view, for each of those two periods, of the annual average consumption of foreign articles, and of the annual average revenue which, at the rate of the present duties, would have accrued thereon, the table L has been prepared, which shows that the nett annual revenue which would, at the present rate of duties, have accrued during each of those two periods, amounts, on an average, for the years 1790 to 1792, to \$6,163,000; and for the years 1793 to 1798, to \$8,350,000. These sums constitute not the receipts in the treasury, but the revenue which would have accrued during the respective years to which they refer. The first may be considered as the revenue accruing during the year 1791; the last, as that accruing during the year ending 30th June, 1796; and as, on account of the credit given for the payment of duties, the revenue accruing during one year constitutes nearly the receipts of the year ending nine months later, those two sums, and the receipts of the year ending on the 30th of September, 1801, as above stated, may, without material error, be considered as the receipts of three distinct years, four years and a half distant each from the other, viz:

For the year ending 30th September, 1792,	-	-	-	\$6,163,000
For the year ending 30th March, 1797,	-	-	-	8,350,000
For the year ending 30th September, 1801,	-	-	-	10,500,000

The ratio of increase, during the whole period of nine years, exceeds seventy per cent., whilst that of population, during the same time, was hardly more than thirty per cent. The ratio of increase, during the first period of four years and a half, is near 35½ per cent., and, during the last, more than 25½ per cent., whilst that of population, for each period, was only at the rate of 14 per cent.

The greater ratio of increase, during the first, than during the last period of four years and a half, is owing to the comparison in the first, being between a period of European peace and a period of European war; and, in the last, between two periods of European war.

The ratio of increase of population being ascertained, by the census, to be at the rate of 34 per cent. for ten years; if the increase of consumption shall be supposed to be, hereafter, precisely the same as that of population, the annual receipts of the eight years, 1802 to 1809, may be estimated at nearly fifty per cent. greater than those of the years 1790 to 1792, or at a sum of near \$9,250,000, if that period be assumed as the basis on which to predicate the estimate. But if the calculation shall be grounded on the revenue of the years 1793 to 1798, the annual receipts of the years 1802 to 1809 should be estimated as about 30½ per cent. greater than those of that period, or at about \$10,900,000.

It seems that those two respective sums may reasonably be considered as the two extremes, which the average annual receipts of the eight ensuing years will not exceed. The first calculation, of \$9,250,000, appears to be below the probable result; since, being predicated on the consumption of the three years preceding the European maritime war, without any other addition than that resulting from the ascertained increase of population, it rests on the supposition that the permanent wealth of the United States has not, during that war, increased in any greater proportion than their population; and that the whole of the external commerce acquired during the same period, must necessarily be lost by the return of peace amongst foreign nations.

Although, therefore, it be presumable, that the receipts of some of those years will, from temporary causes, fall below that sum, it is believed that, taking the whole period of eight years, the duties on merchandise and tonnage may safely be averaged at a sum not less than \$9,500,000.

As a minute investigation of the several rates of duty, now paid by the several species of foreign merchandise, may perhaps suggest some advantageous modifications, a table of those rates is annexed to this report.

Without any view to an increase of revenue, but in order to guard, as far as possible, against the value of goods being underrated in the invoices, it would be eligible to lay specific duties on all such articles, now paying duties ad valorem, as may be susceptible of that alteration. Amongst such, the following have been suggested: fruits and spices, pickled and dried fish, oil, glue, several species of drugs, watches, gunpowder, and cigars.

Legislative provisions seem necessary, in order better to define the restrictions under which the intercourse with the adjacent British and Spanish possessions shall be carried on, in conformity with treaties; under which the articles of the growth or manufacture of the United States may be imported, free of duty, by the way of New Orleans, from the western parts of the Union, to the ports of the Atlantic States, and from these to the interior districts of collection on the Western waters, and under which drawbacks shall be allowed on the exportation of foreign articles.

2. *Permanent internal duties.*—The annual statement, prepared by the commissioner of the revenue, and which will be completed in a few days, precludes the necessity of exhibiting, here, all the details pertaining to this branch of revenue. The statement M is an abstract of its amount, for the year 1800; during which, the duties on spirits and stills, refined sugars, licences to retailers, sales at auction, and pleasurable carriages, produced a nett sum of 576,883 dollars and 80 cents. The duties on stamps, which, as, under the existing laws they will cease after the 4th day of March, 1803, are not included amongst the permanent revenues, amounted, for the same year, to 209,853 dollars and 32 cents. Both together constitute an item of \$786,742 12. The receipts in the treasury from all the internal revenues, have amounted, for the year ending on the 30th September, 1801, to 919,719 dollars and 16 cents. Deducting from this sum 65,000 dollars, being the estimated amount of drawbacks paid during that year, out of the proceeds of the external revenue, on the exportation of domestic distilled spirits and refined sugar, leaves a nett sum of about 854,000 dollars, and an increase of near 70,000 dollars beyond the revenue of 1800.

The accounts of the last nine months being yet but partially rendered, it is not practicable to ascertain to what class of duties the increase belongs, nor particularly to discriminate between the increase of the revenue arising from stamps, and that of the permanent internal revenues. Yet it is believed that these, exclusively of the stamp duties, may safely be estimated, for the average of the years 1802—1809, at an annual sum not less than 650,000 dollars.

In order, however, to secure that amount, a revision of the system, so far as it relates to country stills, is essentially necessary. Whilst the owners of small distilleries, in some parts of the Union, complain of the operation of a tax raised on the capacity of their stills, that same regulation has enabled all those whose capitals are larger, and local situation more advantageous, especially in the Middle States, to reduce the actual duty on the quantity of spirits distilled from grain to about three cents per gallon. But improvements have lately been introduced, which, by accelerating the process of distillation, will, according to the estimate of the commissioner of the revenue, reduce the duty on stills to about three-fifths of a cent per gallon of spirits distilled. The effect of these, on the revenue, has already been sensibly felt, in one of the most productive districts of the United States; and, unless it shall be counteracted, either by restricting laws, or by an increase of the duty on the capacity of the stills, or by a change of the subject of taxation, a considerable defalcation must be expected.

Whatever mode may be adopted, it is respectfully submitted whether the revenue may not be benefitted, and just grounds of complaint removed, by a repeal or modification of the clause which compels a yearly entry of stills, in the month of June, under a penalty of 250 dollars, by a permission to persons who take short licences, to continue distilling beyond the time limited in their licences, on paying a proportionate duty; and by reducing into one act all the laws in relation to duties on stills and domestic distilled spirits.

It will appear, by the same statement M, that, whilst the expenses of collection on merchandise and tonnage, which are defrayed out of the revenue, do not exceed 4 per cent., those on the permanent internal duties amount to almost 20 per cent. This, however, is an inconvenience, which, on account of the great number of individuals on whom the duties are raised, and of their dispersed situation throughout the whole extent of the United States, must, more or less, attach to the system of internal taxation, so long as the wants of Government shall not require any considerable extension, and the total amount of revenue shall remain inconsiderable.

3. *Sales of public lands.*—The only data on which to calculate the annual revenue, which may probably be derived, for the ensuing eight years, from those sales, are the quantity of land at the disposal of Government, compared with the probable annual demand, and the actual sales which have taken place since the several land offices have been opened.

The precise quantity cannot be ascertained, all the surveys not being yet completed, and the western boundary line of the Virginia reservation, from the head spring of the Little Miami northward, being neither surveyed, nor even the principle on which its course must depend, determined by the terms of cession accepted by Congress.

The estimate N may, however, be considered so far correct, as to render it certain that the quantity of public lands northwest of the Ohio, within the Indian boundary line, and not yet disposed of, amounts to very near nine millions of acres. A general map of those lands, including the Virginia reservation and the grants to the Ohio Company and to John C. Symmes, which has been compiled from the survey of the Indian boundary line and from the draughts returned to the Treasury Department, will be transmitted to Congress, and will more clearly explain their relative situation than could be done by any written description.

The statement O shows the actual sales which have taken place in the several land offices, to the 31st day of October last. By this it appears that 398,646 acres have been sold, for 334,887 dollars; of which sum, 248,461 dollars have been paid, and 586,426 dollars remain due, being payable under the law in instalments, bearing interest from the date of sales, and which will become due in the years 1802 and 1805, in the proportions exhibited in the statement.

The quantity of land sold, either at the public sales of the three land offices of Marietta, Chillicothe and Cincinnati, or at private sale at Steubenville, when the land office was first opened, cannot afford any just data, on which to predicate an estimate of the probable annual sales; as they may be supposed to have been greater when the lands were first offered for sale than at subsequent periods.

Rejecting, therefore, the result of the whole of the public sales, and that of the first two months private sales, at Steubenville, it appears that there have been sold, at private sale, 122,673 acres, at Steubenville, during a period of fourteen months, ending the 31st day of October last—64,205 acres at Chillicothe, during a period of five months, ending on the same day—42,656 acres at Cincinnati, during a period of six months, ending on the same day; and 1,544 acres at Marietta, during a period of sixteen months, ending on the same day—which gives, in the whole, a result of 345,000 acres, annual sales, in all the land offices.

The reservations in the grants to the Ohio company, and to John C. Symmes, and in the townships formerly sold at New York; the surplus of the tract appropriated for military bounties, after the same shall have been satisfied; and a tract of near one million of acres, lying north of Symmes' patent, and contained between the Great Miami and the Virginia reservation, are not embraced in this general result. The reservations and the military tract are not yet disposable by any existing law; and the tract lying between the Great Miami and the Virginia lands, has been only partially offered for sale, under the act of Congress giving a right of pre-emption to certain purchasers under J. C. Symmes. The result of the operation of this act has not yet been ascertained. It is, however, known, that under it a number of tracts have been sold, and some payments already made. The remainder of the tract will, afterwards, according to law, be surveyed, and offered for sale on the same terms as other lands.

Taking in consideration the probable sales in those several tracts, the total amount of annual sales might fairly be estimated at 400,000 acres, if the periods during which the land offices have been opened had been sufficiently long to form a safe basis for calculation. To estimate them at 250,000 acres a year, for the ensuing eight years, is equally justifiable, by the actual sales, by the known usual demand, and by the quality and superior safety of title of the public lands.

The nominal price of those lands is two dollars per acre; but, on account of the provisions which relate to interest and discount, they may be obtained, within a fraction, at the rate of one dollar and eighty-four cents, if the whole purchase money is paid at the time of sale; and may bring in the treasury two dollars and twenty-seven cents per acre, if the purchaser shall avail himself of the terms of credit given by law.

If the proceeds of the whole sales shall be estimated only at the rate of \$1 84 per acre, it will allow 24 per cent. for losses on account of non-payments on the three last instalments; and, after the year 1805, give, on an annual sale of 250,000 acres, an annual income of 460,000 dollars. But as, on account of the credit given by law, the whole of this sum will not, till after the year 1805, be annually receivable in payment of lands sold after the 1st of January next, whilst, on the other hand, the sums due for lands, sold before the end of this year, will become payable during the four next ensuing years; it will be found that, making the same deduction of 24 per cent. for losses on the sums already due, the whole sum receivable, for lands already sold, or to be sold, during the eight years 1802—1809, will, for those eight years, on an average, amount annually to 400,000 dollars.

Some legislative provisions seem necessary to ascertain the western boundary of the Virginia lands: to define in what manner the seven first ranges of townships shall be subdivided into sections, without interfering with the claims of former purchasers; and, perhaps, in relation to the lands claimed by purchasers under John C. Symmes. But the most important object, in order to secure and improve this valuable branch of revenue, is to provide against the progress of intrusions on the public lands, and especially to devise some efficient and prompt mode of giving quiet possession to every person purchasing under the law.

4. *Postage, dividends on bank shares, incidental.*—The annual proceeds of the duties on postage may not be estimated at less than 50,000 dollars.

The dividends on bank shares, at the rate of 8 per cent. dividend, amount to 70,040 dollars. But, as the shares themselves may eventually be wanted as a resource to meet certain contingent demands against the United States, those dividends, although constituting a part of the revenue, unless it shall be found necessary to sell the stock and the incidental or temporary revenues, shall be omitted in this estimate of the permanent revenues.

These, therefore, are estimated in the whole at 10,600,000 dollars, viz:

Duties on merchandise and tonnage,	-	-	-	-	\$9,500,000
Internal duties, (stamps excepted)	-	-	-	-	650,000
Proceeds of the sales of public lands,	-	-	-	-	400,000
Duties on postage,	-	-	-	-	50,000

The other temporary resources of the United States are—

1st. The proceeds of stamp duties, for fourteen months from the 1st of January, 1802, to the 4th March, 1803, which, under the existing law, limits their continuance, 260,000 dollars.

2d. The balance due on the direct tax. The amount paid in the treasury to the 1st instant, so far as the same can be ascertained, was 1,245,000 dollars, leaving an outstanding sum of 755,000 dollars; but, as this last sum is chargeable with all the expenses of collection, estimated at the rate of seven per cent., at 140,000 dollars, the real balance is only about 615,000 dollars; and as delays, and perhaps an eventual loss may be expected, on the last part of the collection, it would not be safe to estimate the amount which will probably be paid in the treasury, at more than 450,000 dollars.

3d. The proceeds of sales of public vessels. Fifteen vessels have been sold under the act of last session of Congress, for 275,767 dollars and 73 cents; of which sum, 86,412 dollars and 83 cents had been paid, on the 30th of September last, leaving an outstanding balance of 189,354 dollars and 90 cents.

4th. The excess of specie in the treasury, beyond the sum which it is prudent to keep there, may be estimated at about one million of dollars.

5th. The shares of the Bank of the United States, owned by the United States, are, at  $33\frac{1}{2}$  per cent. advance, worth 1,184,000 dollars.

Those several items, exclusively of several balances due by individuals, and a part of which will eventually be received in the treasury, constitute a sum exceeding three millions of dollars; and may, for the present, be considered as resources, sufficient to meet the demands against the United States, which may be eventually payable on account of the sixth article of the treaty with Great Britain, and of the ——— article of the convention with France.

The permanent expenditures of the United States relate either to the current expenses of Government, domestic or foreign, civil and military, or to the payment of the interest and principal of the public debt.

The estimates of appropriations for the ensuing year, amounting to 3,448,147 dollars and 18 cents, include all the expenses of Government, other than those in relation to the public debt, with the exception of those incident to the intercourse with the Barbary Powers—estimated, after the ensuing year, by the Secretary of State, at 70,000 dollars; of those which may be incurred for the purchase of arms—estimated, by the Secretary of War, at 55,000 dollars; and of a part of the Indian annuities, amounting to 11,000 dollars: these items having been omitted, in the estimates of the ensuing year, because the balances of unexpended appropriations have been considered as sufficient for those objects, by the Secretaries of State and War, respectively. On the other hand, a sum of about 70,000 dollars, in relation to the census and quarantine laws, which is included in those estimates, is a temporary expense.

The particular sums, which, under existing laws, seem necessary to defray each particular authorized expense, being detailed in the annual estimates, will not be repeated here; and it appears sufficient to recapitulate the gross amount of the general heads of expenditure, viz.

For all domestic expenses of a civil nature, including the civil department, and all the miscellaneous items of the light houses and mint establishments, of the surveying department, of pensions, claims and contingencies,	\$780,000
For all the expenses of intercourse with foreign nations, including those of the diplomatic department, those incident to the prosecution of claims, and to the protection of seamen in foreign countries, and those in relation to the Barbary Powers.	200,000
For the military establishment, including all the expenses in relation to the army, to arsenals and magazines, to the fabrication and purchase of arms and military stores, to fortifications, and to the Indian Department,	1,420,000
For the Navy Department, including all the expenses in relation to the ships kept in commission, or laid up in ordinary, to the building of new ships, and to dock yards,	1,100,000
Making altogether, three millions and five hundred thousand dollars,	<u>\$3,500,000</u>

Which sum, deducted from the estimated revenue of ten millions and six hundred thousand dollars, leaves a sum of seven millions and one hundred thousand dollars, annually applicable to the payment of interest and redemption of the principal of the public debt.

It must be further observed, that the sums assigned to each head of expenditure, being deduced from the estimates of appropriations necessary for the ensuing year; and these having been calculated before the re-establishment of peace in Europe was known, they are predicated, for every item which relates to supplies, on the then existing prices; a considerable reduction will take place in every item, which depends on the price of provisions, freight, transportation, and even wages. Although the saving, thence arising, cannot yet be correctly ascertained, it may not be estimated at less than 200,000 dollars annually. It is therefore believed, that, after defraying every expense necessary to support every civil, military, or naval establishment, to the extent now authorized by law, the annual surplus, applicable to the debt, may be confidently estimated at seven millions and three hundred thousand dollars.

The statement P exhibits the amount of the unredeemed principal of the public debt, as it will be on the 1st of January next, and of the annual interest and charges payable thereon, including the annual reimbursement on the six per cent. and deferred stocks.

By the printed statements of receipts and expenditures for the year 1800, transmitted to Congress the first week of the present session, it appears that the unredeemed principal of the public debt, (exclusively of the sums passed to the credit of the Commissioners of the Sinking Fund, which are only a nominal debt due by the United States to themselves; and after deducting the reimbursement of the principal of the six per cent. stock, operated by the annual payment of eight per cent. on the nominal amount of that stock) amounted, on the 1st of January, 1801, to 80,161,207 dollars and 60 cents. By the statement P, it appears that the unredeemed principal will, on the 1st of January, 1802, amount to 77,881,890 dollars and 29 cents; the difference of 2,279,317 dollars and 31 cents being the amount of principal paid during the year 1801; during the same year 1801, more than eight hundred thousand dollars shall have been remitted to Holland, in part of the interest and instalments on the Dutch debt, falling due next year, which sum is not included in the amount of principal thus stated to have been paid during the present year. The sums which, on the 1st of January, 1801, had been remitted to Holland, in part of the interest and instalments due, in the course of this year, and which were not deducted from the amount of public debt on the 1st of January, 1801, did not exceed five hundred thousand dollars. The amount of debt actually paid, or for the payment of which provision shall have been made during the present year, will not, therefore, be less than two millions five hundred thousand dollars. And it is believed, though it cannot at present be precisely ascertained, that the balance of specie in the Treasury, which, on the 1st of January, 1801, was 2,557,395 dollars and 38 cents, will not be diminished on the 1st of January, 1802.

The Treasury accounts being settled to the 30th day of September last, the amount of public debt paid during the half year commencing on the 1st of April, and ending on the 30th September, 1801, as well as the comparative view of the Treasury at the commencement and end of that period, may be precisely stated. The payments in part of the principal of the debt made during those six months, exclusively of certain parts of the unfunded debt which have been reimbursed, have been—

1st. To the Commissioners of the Sinking Fund, and to be by them applied, on the 1st of January next, to the reimbursement of the six per cent. stock,	\$129,048 83
2d. To the Bank of the United States, on account of the principal of sundry temporary loans, formerly obtained from that institution,	500,000 00
3d. For remittances to Holland, on account of the Dutch debt, 782,665 dollars and 79 cents; from which, deducting 245,980 dollars and 50 cents, being the interest and commissions for one-half of the year 1801, on that debt, leaves, paid on account of the principal,	536,685 29
4th. Evidences of public debt paid for lands,	21,282 66

Amounting altogether to one million one hundred and eighty-seven thousand and sixteen dollars and seventy-eight cents, \$1,187,016 78

The balance of specie in the treasury amounted, on the 1st of April, 1801, to 1,794,044 dollars and 85 cents, and on the 1st of October, 1801, to 2,946,038 dollars and 73 cents; making a difference, in favor of the treasury, of 1,151,993 dollars and 88 cents; which last sum, added to the above stated payments on account of the principal of the debt, makes an actual difference, in favor of the United States, of 2,339,010 dollars and 66 cents, during those six months.

The principal of the public debt, unredeemed on the 1st January, 1802, is, in the statement P, arranged under four heads, viz:

1st. The six per cent and deferred stocks. The nominal amount of this debt is \$41,879,525 23, and the eight per cent. annuity, applicable to its interest and reimbursement of principal, amounts to 3,350,362 dollars and 1 cent. As, by the effect of this annuity, 5,027,740 dollars and 57 cents of the principal shall have been reimbursed on the 1st of January, 1802, the unredeemed principal of that debt will, on that day, be only 36,851,784 dollars 66 cents. The interest, at the rate of six per cent., on which sum, is, \$2,211,107 dollars 08 cents. The part of the eight per cent annuity, at present applicable to the redemption of the principal, is, therefore, 1,139,254 dollars and 3 cents, and increasing each year, at compound interest, shall, without any further provision, have discharged the whole of the six per cent. in the year 1818, and the whole of the deferred debt in the year 1824.

2d. Three per cent. stock amounts to	\$19,079,705 63
And the interest on the same to	572,391 16

No provision has been made for its redemption, occasional payments for lands excepted.

3d. All the other domestic debts created, under the present Government of the Union, in order either to discharge other debts, or to meet certain extraordinary expenses. These include the five and half, four and half, navy six, 1796 six, and eight per cent. stocks, and the temporary loans obtained from the bank; and amount, altogether, to

\$12,035,400 00	- \$828,350 50
-----------------	----------------

4th. The foreign debt due in Holland and at Antwerp, amounts, including premiums and gratifications, to	\$9,915,000
---	-------------

The interest on which, commissions and charges included, is, for the year 1802,	\$476,931
---	-----------

This last debt being payable in instalments, at certain fixed dates, and it being necessary to purchase remittances in America, near six months before the payments are made in Holland, the statement R has been added to show the payments, both on account of principal and interest, which become annually due in Holland, until the final redemption of the debt in 1809, and the sums which it will be necessary, every year, to provide in America, in order to meet those payments.

The greater part of this debt becomes due in the course of the five next ensuing years; and the annual payments, on account of principal and interest for that period, exceed, on an average, two millions of dollars. The inconvenience and difficulty of procuring remittances to that amount, and the real injury arising from such heavy disbursements abroad, render an extension of the terms of payment, by partial re-loans, a desirable object; and measures have been taken to ascertain its practicability. All that seems wanted, is, that the gross amount of payments, which are to take place during the eight next years, should be more equally apportioned amongst those years; and any greater surplus of revenue which might be freed by that operation, would be applicable to the redemption of those species of the domestic debt which it may be thought most eligible to reimburse.

Whether this operation shall be effected or not, no difficulty is apprehended, from want of resources, to discharge every instalment as it shall become due; the sum payable in 1803, in which year the largest payments must be made in Holland, amounting, including both those and all other actually due, on account of the interest and reimbursement of the domestic debt, to only \$7,100,000, or to \$200,000 less than the annuity of \$7,300,000, which has been estimated as the surplus of revenue applicable to that object.

If that surplus does exist, and if it will be sufficient to meet all the engagements of the United States, as they become due, the only remaining objects of inquiry seem to be: What impression will, during the next eight years, to which these estimates refer, be made on the public debt, by the annual application of that surplus? In what time would the same annuity discharge the whole of the public debt?

The statement S exhibits the effect produced at the end of the year 1809 on the debt, by the annual application of that sum, (\$7,300,000,) to the payment of both principal and interest, and shows that, at the end of those eight years, it shall have paid the whole of the Dutch debt; of the temporary loans due to the bank; of the navy six per cent; and of the five and a half per cent. stocks; \$5,525,300 and 38 cents of the eight per cent. stock; \$150,387 and 26 cents of the four and a half per cent. stock; and \$11,399,263 and 6 cents of the principal of the six per cent. and deferred stocks: amounting, altogether, to thirty-two millions two hundred and eighty-nine thousand one hundred and fifty dollars and seventy cents.

The public debt would, therefore, on the 1st January, 1810, be reduced to \$45,592,739 and 59 cents, viz: \$954,899 and 62 cents of the eight per cent. stock; \$25,612 and 74 cents of the four and a half per cent. stock; (both of which would be discharged during the four first months of the year 1810;) \$80,000 of the 1796 six per cent stock; \$25,452,521 and 60 cents of the six per cent. and deferred stocks; and the \$19,079,705 and 63 cents three per cent. stock.

It is true that this statement is predicated on the supposition, that the whole of the remittances to Holland may be purchased at par, which is not probable; but, on the other hand, it is calculated on the principle of a yearly, instead of a quarter yearly payable annuity; or as if all the payments made in one year, on account of the principal of the debt, took place only at the end of the year, instead of being made, as will be the case, in the course of the year, and stopping the interest from the end of the quarter in which they may be made. The supposed extra cost of bills on Holland is at least partly covered by that difference, and cannot materially affect the general result.

It may in the same manner be shown, that the same annual sum of \$7,300,000, applied to the payment of the principal and interest of the public debt, would, on the supposition that the whole of the six per cent. and deferred stocks may be redeemed at par, and that the whole of the three per cent. stock should be reimbursed at its nominal value, discharge the whole of the public debt in seven years and a half, after the year 1809, or within the year 1817.

The only part of the preceding estimates which is liable to any material error, is what relates to the probable annual revenue derived from the impost and from the sales of land. Should these prove to have been correct, it will result that the present revenues of the Union are sufficient to defray all the expenses, civil and military, of Government, to the extent authorized by existing laws; to meet all the engagements of the United States; and to discharge, within eight years, thirty-two millions of dollars of the principal, and, within fifteen years and a half, the whole of the public debt; that any increase of expense will, probably, either render an increase of taxes necessary, or retard the ultimate payment of the debt; and that any reduction in the present rate of expenditure may permit a reduction of the present taxes, or be the means of accelerating the redemption of the public debt.

All of which is most respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, 18th December, 1801.

*Table of duties paid on Merchandise, imported in American vessels, in the United States.*

Goods, wares, and merchandise, imported in the United States, unless free of duty, pay either duties according to their value, or specific duties according to their quantity.

**I. Articles free of duty are—**

All articles of American growth, produce, or manufacture, spirits excepted.

Bullion, copper, old pewter, tin, teutenague, wire, plaster of paris, saltpetre, sulphur, lapis caliminaris, dying drugs and woods, wood, wool, furs, raw hides, sea stores, wearing apparel, personal baggage, and implements of trade belonging to emigrants; philosophical apparatus imported for the use of seminaries of learning.

II. *Articles paying duties ad valorem*, pay either 20, 15, or 12½ per cent. on their respective value, which value is calculated by adding to their prime cost (all charges included) ten per cent. if imported from countries this side, and 20 per cent. if imported from countries beyond the Cape of Good Hope.

*Articles paying twenty per cent. ad valorem are—*

- Carriages, and parts of do.
- Manufactures of glass, other than window glass, and black quart bottles.

*Articles paying fifteen per cent. ad valorem are—*

- 1st. All manufactures of metal,\* earth and stone,† and leather,‡ } not otherwise enumerated.
- All fruits and spices,
- All painters' colors and medicinal drugs,§
- 2d. Cabinet wares, hair-powder, starch, and wafers; oil, anniseed, glue, essences, washes, perfumes, dentrifice and cosmetics; paperhanging, cartridge and sheathing paper; carpets, carpeting, floor cloths and mats; bonnets, hats, caps, gloves and mittens, and stockings; fringes and tassels for saddlers, upholsterers, and coachmakers; buttons, millinery, artificial flowers, feathers, ornament dresses, dolls, and fans.

*Articles paying twelve and a half per cent. ad valorem.*

- 1st. The following manufactures of metal, viz: anchors, locks, hinges, hoes, anvils, vises, and printing types.
- 2d. Gunpowder, black quart bottles, saddles and parts of do., whips and canes, toys, lampblack, parchment and vellum, clothing ready made.
- 3d. All wares, goods, and merchandise, not otherwise enumerated, consisting principally of manufactures of wool, cotton, silk, hemp and flax, and wood.

III. *Articles paying specific duties.*

Average annual amount of the 3 years, 1790 & 1792,	19,310,801	5,423,122½	4,108,802	5,423,122½	1,091,478		2,215,749	3,836,391½	22,379,370	1,475,033
Total amount of the six years, 1793 & 1798,	162,308,641	22,934,107	31,060,865	22,934,107	9,014,418	3,971,658	13,054,164	44,109,990	216,897,988	18,265,653
Average annual amount of the 6 years, 1793 & 1798,	27,051,440	3,822,351½	5,176,810½	3,822,351½	1,502,403	661,943	2,175,694	7,351,665	36,149,664½	2,210,942

(a.) From the annual importations are deducted the annual exportations, both of molasses and of domestic spirits distilled from molasses. See Statement B.  
 (b.) The non-enumerated wines paid 40 per cent. ad valorem, but not exceeding 30, nor less than 10 cents per gallon. The quantities which, by that regulation, paid precisely either 10 or 30 cents are ascertained. The quantities which paid the duty ad valorem, viz: from 10 to 30 cents per gallon, are estimated as having paid, on an average, 20 cents per gallon. This column shows, from the year 1793, those three kinds distinctly, from wines paying specific duties, viz: Madena, Sherry, and St. Lucar; Burgundy and Champaign; Lisbon and Oporto; Teneriffe, Fayal, and Malaga. See Statement C.

(c.) From the annual importations are deducted not only the exportations of salt, but, also, the quantities which did not pay duties on account of the bounties upon the exportation of salted fish and provisions, and of the allowances to fisheries; the quantities thus deducted being calculated as if the bounties and allowances had been during the whole period at the same rate as established by the now existing laws. See Statement D.

TREASURY DEPARTMENT, Register's Office, December 12, 1801.

JOSEPH NOURSE, Register.

1800	3,287,868	25,950	105,536	527,675	2,734,243

(a.) Each of these two years estimated at the same rate as the year 1792.

TREASURY DEPARTMENT, Register's Office, December 12, 1801.

JOSEPH NOURSE, Register.

## E.

Statement of the value of the several classes of Merchandise paying duties ad valorem, deducting exportations from importations, for each of the years 1795 to 1800.

YEARS.	VALUE OF GOODS AD VALOREM.			TOTAL.
	At 10 and 12½ per cent.	At 15 per cent.	At 20 per cent.	
1795	23,431,013	6,225,887	230,073	29,886,973
1796	28,267,085	7,858,262	371,242	36,496,589
1797	21,137,877	6,609,665	296,734	28,044,276
1798	19,179,952	4,570,096	222,212	23,972,260
1799	26,394,967	6,428,842	270,022	33,093,831
1800	26,514,393	7,448,410	430,814	34,393,617
Total,	144,925,287	39,141,162	1,821,097	185,887,546
Duties at the } present rate, }	18,115,661	5,871,174	364,219	24,351,054

NOTE.—On the total value, as above, \$185,887,546, gives for the average duty, near 13.1 per cent.

TREASURY DEPARTMENT, Register's Office, December 12, 1801.

JOSEPH NOURSE, Register.

Average of the six years, 1793 to 1798,	559,841	87,827	647,668	13.6 to 100

TREASURY DEPARTMENT, Register's Office, December 12th, 1801.

JOSEPH NOURSE, Register.

## L.

A Statement exhibiting the value and quantities, respectively, of dutied articles, (consisting of the difference between articles paying duty imported, and those entitled to drawback re-exported) supposed to have been annually consumed during the three years, 1790—1792, and the six years, 1793—1798; and, also, the annual revenue, which, after deducting drawbacks, bounties, and allowances, would have accrued during each period, at the present rate of duties, drawbacks, bounties, and allowances.

	Quantities.		Average present rate of duty.	Amount of duties, at present rate.	
	1790 a 1792.	1793 a 1798.		1790 a 1792.	1793 a 1798.
Merchandise paying duties ad valorem, dollars,	19,310,801	27,051,440	13.1 pr. ct.*	\$2,530,000	\$3,543,000
Spirits, - - - - - gallons,	4,108,802	5,176,811	28½ cts.*	1,171,000	1,475,000
Molasses, - - - - - do.	5,423,122	3,822,351	5 cts.	271,000	191,000
Wines, - - - - - do.	1,091,478	2,164,346	35—33 cts. †	382,000	714,000
Teas, - - - - - pounds,	2,215,749	2,175,694	15*	332,000	326,000
Coffee, - - - - - do.	3,836,391	7,351,665	5	192,000	367,000
Sugar, - - - - - do.	22,379,370	36,149,665	2½ ‡	560,000	903,000
Salt, - - - - - bushels,	1,475,033	2,210,942	20	295,000	442,000
All other articles paying specific duties, per statement H, - - - - -			Various,	256,000	352,000
Extra duty of ten per cent. on the duties on goods imported in foreign vessels, (d) - - - - -				236,000	113,000
Extra duty arising from its not being returned as drawback, on re-exportation of such goods, (f) - - - - -				4,000	43,000
Two and a half per cent. detained on all drawbacks since 1st July, 1800, (e) - - - - -				3,000	86,000
Tonnage duties, per statement I, - - - - -				155,000	99,000
Passports and clearances, (g) - - - - -				6,000	9,000
Gross revenue, - - - - -				\$6,393,000	\$8,663,000
Deduct expenses of collection, at 3.62 per cent. - - - - -				231,000	313,000
Nett average annual revenue for each period, - - - - -				\$6,163,000	\$8,350,000

\* Average duty deducted from statements E, F, G.

† Average duty, thirty-five cents per gallon, for the first, and thirty-three cents for the second period, deducted from statement C.; the average duty on wines being lower, during the last period, on account of the greater proportion of low priced wines imported.

‡ The white powdered sugars, which pay three and a half cents per pound, not being distinguished from brown, the average duty is stated only at two and a half cents per pound, the price paid by the last, which is something below the actual duty.

(d) Deducted from the proportion of foreign tonnage to the whole amount of tonnage employed in foreign trade, as per statement K, on a supposition that the value and quantities of goods imported in foreign vessels, were in proportion to the amount of tonnage of those vessels.

(e) Deducted from statement I; the drawbacks, which would have been paid at the present rate of duties, being supposed to bear the same proportion to the drawbacks actually paid; as the duties which would have been collected, according to this statement, at their present rate, bear to the duties actually accrued.

(f) Deducted from statements I and K, by combining the principles on which the two last items have been estimated.

(g) Deducted from statement I, for last period, and for the first from the amount of American tonnage, respectively employed in foreign trade, during each period.
