As it is not perceived, on the other hand, that a single advantage will accrue to the public from the change, no reason presents itself, on the ground of expediency, why an untried system should be substituted to one under which the treasury business has so long been conducted with perfect security to the United States, and great convenience not only to the officers, but also to all those who have had payments of a public nature to make or to receive.

It does not seem necessary to advert to the particular objections made against the present charter, as these may easily be obviated by proper alterations. What has been called a National Bank, or, in other words, a new Bank of the United States, instead of the existing one, may be obtained by such alterations. The capital may be extended, and more equally distributed; new stockholders may be substituted to the foreigners, as had been suggested in the report of 2d March, 1809; and any other modifications which may be thought expedient may be introduced, without interrupting the operations of the institution now in force, and without disturbing all the commercial concerns of the country.

If, indeed, the Bank of the United States could be removed without affecting either its numerous debtors, the other moneyed institutions, or the circulation of the country, the ordinary fiscal operations of Government would not be materially deranged, and might be carried on by means of another general bank, or of State banks. But the transition will be attended with much individual, and probably with no inconsiderable public injury. It is impossible that an institution which circulates thirteen millions of dollars, and to whom the merchants owe fourteen, should terminate its operations, particularly in the present unfavorable state of the American commerce, and after the great losses lately experienced abroad, without giving a serious shock to commercial, banking, and national credit. It is not intended to overrate the extent of an evil which there are no certain data to appreciate. And, without expatiating on the fatal and unavoidable effects on individuals; without dwelling on the inconvenience of repaying, at this time, to Europe, a capital of seven millions; and without adverting to other possible dangers, of a more general nature, it appears sufficient to state that the same body of men who owe fourteen millions of dollars to the bank, owe, also, ten or twelve to the United States, on which the receipts into the treasury, for this year, altogether depend; and that, exclusively of absolute failures, it is improbable that both debts can be punctually paid at the same time. Nor must it be forgotten that the approaching non-importation will considerably lessen the efficiency of the provision, by which subsequent credits are refused to importers who have not discharged former revenue bonds. Upon the whole, a perfect conviction is felt that, in the critical situation of the country, new evils ought not to be superadded, and a perilous experiment be attempted, unless required by an imperious necessity.

In these hasty remarks, I have not adverted to the question of constitutionality, which is not a subject of discussion for the Secretary of the Treasury. Permit me, however, for my own sake, simply to state, that the bank charter having, for a number of years, been acted upon, or acquiesced in, as if constitutional, by all the constituted authorities of the nation, and thinking, myself, the use of banks to be at present necessary for the exercise of the legitimate powers of the General Government, the continuation of a bank of the United States has not, in the view which I have been able to take of the subject, appeared to me to be unconstitutional.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HON. WILLIAM H. CRAWFORD, *Chairman in Senate.*

11th CONGRESS.]

No. 345.

[3d SESSION.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 5, 1811.

Mr. NEWTON made the following report:

The Committee of Commerce and Manufactures, always disposed to encourage and extend the industry, agriculture, and manufactures, of the United States, beg leave to suggest the propriety and expediency of subjecting the articles specified in the subjoined resolution, to additional duties. They beg leave to refer to a report on this subject, made the 21st of June, 1809, and solicit that it may be taken as part of this.

Resolved, That additional duties ought to be laid on the following articles imported into the United States, to wit:

On ready made clothing and millinery, ——— ad valorem;
On cotton manufactures from beyond the Cape of Good Hope, ——— ad valorem;
On lead shot, ———.

Resolved, That zinc, alias spelter, be hereafter admitted free of duty.

Report of the Committee of Commerce and Manufactures, to whom was referred so much of the message of the President of the United States as relates to the revision of our commercial laws, for the purpose of protecting and fostering the manufactures of the United States, and also the petitions and memorials of sundry manufacturers of hats, of cotton goods, of hemp into linen, of shot, of woollen cloths, and of salt, made to the House of Representatives, June 21, 1809.

The committee are fully impressed with a conviction of the importance, difficulty, and delicacy, of the subject submitted. It is a mine which even the industry and laborious researches of philosophers cannot exhaust. The committee are apprised, that, on this subject, men of great science and experience have supported, and do still support, diversity of opinions. With such impressions, they cannot approach it without circumspection. On a review of the reports made on the policy of fostering and protecting our manufactures, the committee find that the plan therein recommended and pursued, has received the support of Congress, and likewise the countenance of the nation, if silence on, and long acquiescence in, that plan, can authorize them to infer it. In giving to our manufactures the support necessary to withstand foreign competition, skill, and capital, the committee have, on all occasions, endeavored to avoid the danger of fastening on the community oppressive monopolies. For a manifestation of the solicitude which they have at all times felt, and the caution which has always presided over their deliberations on this interesting subject, they beg leave to refer to the following reports, which they solicit may be taken as parts of the present:

Report on the memorials and petitions of sundry manufacturers of gun powder, &c. &c. 10th February, 1802.

[See No. 170.]

On the petition of sundry manufacturers of cordage, &c. &c. 18th February, 1802. [See No. 173.]

On the petition of sundry manufacturers of paper, &c. &c. 8th March, 1802. [See No. 176.]

On the petition and memorials of sundry calico printers and dyers, &c. &c. 25th January, 1804. [See No. 214.]

On the petition of the President and Directors of the New York Dutchess County Slate Companies, 15th November, 1804. [See No. 220.]

On the memorial and petition of the Philadelphia Typographical Society, 22d January, 1805. [See No. 227.]

And on the petitions and memorials of Paul and Joseph W. Revere, and sundry copper smiths, 21st January, 1808. [See No. 277.]

The like spirit which dictated those reports, maintains, without any diminution, its influence over the committee, and represses every disposition to depart from restraints, the observance of which becomes indispensable, if the public good be the sole object in view.

The shortness of the present session, and the want of materials, preclude the committee from giving this subject a full investigation. Though the committee have to regret that they are prevented from going into a minute discussion of the advantages that would result from a judicious encouragement of manufactures, yet they cannot refrain from expressing an opinion, that additional duties, at this time, may be laid with advantage on the importation of certain articles. It must be obvious to every person, on the slightest attention, that the citizens of the United States possess sufficient ingenuity and skill to make up all the articles of wearing apparel and millinery that may be wanting for use. It is no less clear, that shot, over and above our own consumption, can be supplied, and that other manufactures, in which lead is the article of chief value, have progressed so rapidly, as to deserve the fostering care of Government. The importation of cotton manufactures from beyond the Cape of Good Hope, interferes not only with our own cotton manufactures, but also comes into competition with fabrics imported from Europe, made of the cotton of the United States. Manufactories are in operation for supplying, and preparations are in great forwardness for increasing the supply of, coarse cotton manufactures. If some encouragement be given to establishments of this description, the probability is that the quantity of these manufactures, equal to the demand, may be supplied. Bed ticking of a quality superior to that which is imported, can be had in abundance.

The use of salt, as a necessary of life, cannot be dispensed with. To keep in the market a quantity commensurate to the consumption of the nation, is certainly an object of moment. In times of peace, importations of this article are abundant, and the price low; but, should the United States at any time be forced into war by a concurrence of inauspicious events—and they have no power to prevent it—the scarcity consequent on such a state of things, would greatly increase the price of this article, and the pressure would of course be sensibly and severely felt by that portion of the community least capable of bearing it. The scarcity and high price of salt, during the American war, produced no little distress. The apprehension lately entertained, that a deficiency in the necessary supply of this article, would be the consequence of an interdiction of commerce with the belligerent nations of Europe and their dependencies, gave rise to some objections, not easily removed, against the adoption of that measure. To prevent effectually a want of salt, on the occurrence of any event, is certainly an object deserving the serious attention of Congress. Assurances are made with confidence, that a supply of this article can be furnished by our own manufactories, equal to the demand, if encouragement be given by a moderate duty on imported salt. A nation erects a solid basis for the support and maintenance of its independence and prosperity, whose policy is, to draw from its native sources, all articles of the first necessity. As the encouragement sought can be given, it is very respectfully submitted to the consideration of the House, whether the manufacture of salt is not, in a national point of view, an object of primary importance, and highly deserving its patronage.

The committee, with great deference, submit the following resolutions:

Resolved, That additional duties ought to be laid on the following articles, imported into the United States, to wit:

On ready made clothing and millinery, two and one half per cent. ad valorem; on cotton manufactures from beyond the Cape of Good Hope, on bed ticking, and on corduroys and fustians, two and one half per centum ad valorem; and on shot, and other manufactures in which lead is the article of chief value, one-half cent per pound.

Resolved, That a duty of eight cents per bushel on imported salt, would give encouragement to the manufacture of that article in the United States.

11th CONGRESS.]

No. 346.

[3d SESSION.]

INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 6, 1811.

WASHINGTON, *January 18, 1811.*

SIR:

I am instructed by the Committee of Ways and Means, to ask for such information as may be in possession of the Treasury Department, on the following points, viz:

1. What diminution of revenue will be produced by the exclusion of articles, the growth, produce, or manufacture, of Great Britain, her colonies, dependencies, &c.

2. What particular articles or classes of articles, will bear an increase of the present duties, and to what extent, taking into view the security of the revenue and the sum to be produced.

And any other information which may tend to show whether it is more expedient to increase the per centum on articles paying ad valorem and specific duties, generally, or whether the public interest may be promoted, and the deficiency of revenue supplied, by an increase of duty on particular selected articles, or particular classes of articles.

With respect and esteem, I have the honor to be, your most obedient,

JNO. W. EPPES.

TREASURY DEPARTMENT, *January 28, 1811.*

SIR:

In answer to your inquiries respecting the diminution of revenue, which must result from the exclusion of articles of British produce or manufactures, I beg leave to refer you to a report, made to the House of Representatives, on the 28th February, 1806, and which, together with the statements annexed to it, gives a detailed view of the importations from the British dominions, and from all other countries, for the years 1802, 1803, and 1804. More reliance may be placed, as to any general result, on the statements for those years, than on those for any subsequent period. There was a very extraordinary increase of commerce during the years 1805 to 1807; but although the amount of importations was much larger, the proportion from the different countries had not been materially altered. From the last three years, no correct inferences can be drawn. The time requisite to prepare similar statements for the last six years, would also delay an answer; and the annual reports of importations in American and foreign vessels, will furnish such additional facts for any one year, as may be wanted.

It appears from that report, (page 9) that the nett duties (after deducting drawbacks) on merchandise imported from the British dominions, and from all other countries, might be estimated as followeth:

	British Dominions.	All other countries.
On merchandise paying duties ad valorem, including the additional duties called Mediterranean fund, -	\$4,257,000	1,238,000
On all other articles, deducting salt, the duty on which is now repealed, -	1,629,000	4,741,000
	<u>\$5,886,000</u>	<u>5,979,000</u>

At that time, however, (in the years 1802 to 1804) a non-importation from Great Britain would not have diminished the revenue to that extent, as, the continent of Europe being then open to the United States, a great number of articles usually imported from Great Britain, would have been supplied by other countries. A considerable diminution must take place, in relation to all the articles which cannot be thus supplied, or which may now be manufactured in the United States. And it was principally on account of the uncertain state of commerce with the rest of the world, that, in the annual report of the 10th December last, I stated that "the probable defalcation in the revenue, could not, for obvious reasons, be, at this time, estimated with any degree of precision."

In relation to the other inquiry of the committee, it appears to me, that the discrimination between the dutiable articles, would, at this time, be inexpedient. Those which will certainly continue to be imported, particularly spirits, wines, teas, sugar, and coffee, are for that reason, those on which an increase of duty would be most productive. But that consideration alone, does not seem sufficient to recommend a higher rate of increase on those, than on other articles; and I think that a general and equal increase on the rates of duties now paid, is, for the present, the most eligible mode.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Honorable JOHN W. EPPES,
Chairman of the Committee of Ways and Means.

11th CONGRESS.]

No. 347.

[3d SESSION.]

COMPENSATION MADE TO G. W. ERVING,

For attending the Board of Commissioners under the 7th article of the Treaty with Great Britain, of the 19th November, 1794.

COMMUNICATED TO THE SENATE, FEBRUARY 11, 1811.

To the Senate of the United States:

I transmit to the Senate a report of the Secretary of the Treasury, complying with their resolution of the 7th instant.

JAMES MADISON.

February 11th, 1811.

TREASURY DEPARTMENT, *February 8th, 1811.*

SIR:

I have the honor, in compliance with the resolution of the Senate of the 7th instant, to transmit a copy of the summary statement of George W. Erving's account, in relation to awards under the 7th article of the British treaty. The commission of $2\frac{1}{2}$ per cent. is charged on *£ sterling* 217,009 3s. 9d. being the amount actually received by Mr. Erving, on account of claimants who had not appointed any special agent to prosecute their claims, and receive the amount. The accounts themselves are voluminous, have passed the offices of the Auditor and Comptroller, and are, as I am informed, correct in every respect.

There is another account rendered by Mr. Erving, to the treasury, for a sum exceeding *£ sterling*, 55,000, and which is not sent, as it is not finally settled, and no commission is charged upon it. That sum consists of deductions made from the awards, generally, by direction of the Board of Commissioners, for the benefit of the United States, in order to reimburse them for expenses incurred in the prosecution of the claims. A portion was applied, by Mr. Erving, towards the discharge of the proctor's accounts, for which the United States had become responsible, and a balance, exceeding \$160,000, was paid by him into the treasury. It was from that fund, which was at the disposal of the President, for defraying the expenses incident to the prosecution of claims, that the compensation allowed to Mr. Erving should have been deducted. But the unexpended balance of that fund having been carried to the surplus fund, a new appropriation is necessary, for the purpose of settling the account, and of repaying to the award fund, which belongs to individuals, the sum retained by Mr. Erving, for the commission above mentioned.

There is no other information at the treasury, respecting Mr. Erving's services, but what results from the accounts, and from the letter annexed to the enclosed statement. The services were altogether performed in conformity with the instructions which he may have received from the Department of State.

I have the honor to be, with the highest respect, sir, your obedient servant,

ALBERT GALLATIN.

The PRESIDENT of the United States.

WASHINGTON, November 25, 1810.

SIR:

It appears that the sum of \$22,392 67, which stands charged upon the "award account" of my agency in London, under the 7th article of the late British treaty, as compensation for my services in that agency, ought to have been charged against, and deducted by me out of, that fund which was immediately applicable to the expenses incident to the execution of the said 7th article; hence, a difficulty, in point of form, exists in adjusting the said "award account" at the treasury, which renders necessary a reference of the subject to the President, through your Department.

As all the business under the said treaty was concluded previous to your coming into the Department of State, and this special matter cannot, therefore, be familiar to you, permit me briefly to explain how this necessity has arisen.

The per centage of $2\frac{1}{2}$, which makes up the sum of \$22,392 67, charged as is above mentioned, was so charged by authorization of the then Secretary of State, given in consequence of a representation made by me, in the year 1804. At that time, and during the whole period of my service in England, I held, by appointment of the President, three several offices, of very great trust and responsibility, independent of the Consulate of London, viz: 1st. The law agency of claims under the treaty; this had been previously held by Mr. Williams, at a salary of \$2,500 per annum. 2dly. The "commercial agency," under the same treaty, held by Mr. Cabot, at a salary of \$2,500 per annum. And, 3dly. The agency for obtaining the discharge of seamen from the British navy, called "Agency for the relief and protection of seamen," held by Mr. Lenox, at a salary of \$3,000, (or \$3,500) per annum. Of the whole of these salaries, making \$8,000 (or \$8,500) per annum, I received only \$2,000 per annum. To the claimants under the treaty, I did not charge any commission, nor did I derive one cent of profit in any shape or form, from the large sums of public and private moneys which were constantly in my hands. In adjusting the proctor's accounts, I saved large sums of money to the Government; these, together with the sums which I obtained from the Board of Commissioners, enabled me to reimburse, to a great extent, if not wholly, the expenses which the United States had incurred under the 7th article of the treaty.

The important and profitable office of "Assessor" to the Board of Commissioners, had been, also, conferred upon me by the President, and this had been intended as part of my compensation; but the Board having asserted a right of appointing its own "Assessor," a conflict hence arose, which embarrassed the progress of the public business, and menaced very mischievous consequences. On this account I withdrew my pretensions, and the President acquiesced in those of the Board. I cannot estimate that assessorship to have produced less than 6,000 *guineas*, over and above the salary of \$1,500 per annum, which was attached to it!

All these matters having been fully submitted to the Secretary of State, in my representation above mentioned, and by him laid before the President, the President determined to allow me a suitable compensation; by his order the Secretary of State wrote to me, in the month of November, 1805, the authorization before adverted to, which was in these words:

"Your observations on the reasonableness of some remuneration for your services, have, as you wished, been submitted to the President. The result of his reflections, for the present, is, that I should suggest that you retain, out of the next instalment, in its passage through your hands to the Barings, a per centage of $2\frac{1}{2}$ on the awards *actually received*, and to be received by you, and that you state it as an item in your account with the public. This will bring the equity of your claim regularly before the Government, and will leave the way open for the choice of modes and funds, as may finally appear most proper."

The commission of $2\frac{1}{2}$ per cent. herein allowed, as you will perceive, was not chargeable on all the awards made by the Board of Commissioners, but only on that portion of them wherein I had been made *payee*, which reduced it, in fact, to a commission upon about one-third of the business which I did at the Board. A commission to that extent, however, would have been a full compensation for the loss of the assessorship; but, desirous of adhering to the strict letter of the Secretary of State's instructions, I deducted only on that portion of the awards made payable to me, on which I finally received *payment* from the British Government, which, I suppose, was only about two-thirds of the awards in which I was made *payee*, one-third of them having been previously transferred by me to the private agents of the respective awarders; so that, in effect, I had not more than about one-half per cent. on the business which I did at the Board of Commissioners, (not to mention that which was done in the court of admiralty.) Thus, this commission now stands charged (pursuant to the strict letter of the instruction) against the awards on which I received *payment* of the English Government, in what is called the "award account," though, as it was, in fact, a compensation for the whole business transacted at the Board, it might, with propriety, have been, and probably it should have been, deducted out of a sum of \$160,000, paid by me into the treasury, upon what was called the "spoliation account." As the case stands, there has been carried to the public credit, from the last mentioned account, too much, by the amount of the commission; that fund, of \$160,000, owes, therefore, and should pay back, to the "award fund," the same amount.

This is the point now submitted, and on which an explanation to the Secretary of the Treasury, from the Department of State, is requested.

I have the honor to be, sir, with the most perfect consideration and respect, your most obedient servant,
GEORGE W. ERVING.

To ROBERT SMITH, *Secretary of State*.

11th CONGRESS.]

No. 348.

[3d SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, ON THE 2D OF MARCH, 1811.

Mr. CLAY, from the committee to whom was referred the memorial of the stockholders of the Bank of the United States, praying that an act of Congress might be passed, to continue the corporate powers of the Bank, for a further period, to enable it to settle such of its concerns as may be depending on the 3d of March, 1811, respectfully offered, for the consideration of the Senate, the following report:

That your committee have duly weighed the contents of the memorial, and deliberately attended to such explanations of the views of the memorialists, as they have thought proper to present through their agents. That, holding the opinion (as a majority of the committee do) that the constitution did not authorize Congress originally to grant the charter, it follows, as a necessary consequence of that opinion, that an extension of it, even under the restrictions contemplated by the stockholders, is equally repugnant to the constitution. But, if it were possible to surmount this fundamental objection, and if that rule which forbids, during the same session of the Senate, the re-agitation of a proposition once decided, were disregarded, your committee would still be at a loss to find any sufficient reasons for prolonging the political existence of the corporation, for the purpose of winding up its affairs. For,

As it respects the body itself, it is believed that the existing laws, through the instrumentality of a trust properly constituted, afford as ample means as a qualified continuance of the charter would, for the liquidation of its accounts, and the collection and final distribution of its funds. But, should any inconvenience be experienced on this subject, the committee are persuaded it will be very partial, and such as the State authorities, upon proper application, would not fail to provide a competent remedy for. And,

In relation to the community, if the corporation, stripped of its banking powers, were to fulfil *bona fide* the duty of closing its affairs, your committee cannot see that any material advantage would be derived. Whilst, on the contrary, if it should not so act, but should avail itself of this temporary prolongation, in order to effect a more durable extension of its charter, it might, in its operations, become a serious scourge.

Your committee are happy to say, that they learn, from a satisfactory source, that the apprehensions which were indulged, as to the distress resulting from a non-renewal of the charter, are far from being realised in Philadelphia, to which their information has been confined. It was long since obvious, that the vacuum, in the circulation of the country, which was to be produced by the withdrawal of the paper of the Bank of the United States, would be filled by paper issuing from other banks. This operation is now actually going on; the paper of the Bank of the United States is rapidly returning, and that of other banks is taking its place. Their ability to enlarge their accommodations is proportionately enhanced; and when it shall be further increased by a removal, into their vaults, of those deposits, which are in possession of the Bank of the United States, the injurious effects of a dissolution of the corporation will be found to consist in an accelerated disclosure of the actual condition of those, who have been supported by the credit of others, but whose insolvent, or tottering situation, known to the Bank, has been concealed from the public at large.

Your committee beg leave to present the following resolution:

Resolved, That the prayer of the memorialists ought not to be granted.

11th CONGRESS.]

No. 349.

[3d SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 2, 1811.

Mr. P. B. PORTER, from the committee to whom was referred the memorial of the stockholders of the Bank of the United States, made the following report:

That they have carefully examined the various matters set forth in the said memorial, and attentively listened to the representations of the gentlemen who have appeared in behalf of the said petitioners. The object of the memorialists is to obtain an extension of their corporate powers, beyond the period limited for the expiration of their charter, so as to enable them to prosecute for their debts, and to arrange, liquidate, and close, the various concerns of the company.

The committee are of opinion that a law of Congress, granting the powers prayed for, would facilitate the final adjustment of the affairs of the bank, although they do not think such a law indispensable to that object. But, believing, as your committee do, that, in granting the original charter to the stockholders, Congress transcended the legitimate powers of the constitution, the same objection now presents itself to the extension of any of their corporate capacities.

If the committee had time to go into the investigation, and to present to the House the various reasons which have conduced to this opinion, it would be more than useless, to divert its attention from the important concerns of the nation, at this late period of the session, to a subject which, but a few days since, was so fully and elaborately discussed. They, therefore, beg leave to recommend the following resolution:

Resolved, That the prayer of the memorialists ought not to be granted.

11th CONGRESS.]

No. 350.

[3d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 2, 1811.

TREASURY DEPARTMENT, *March 2, 1811.*

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed April 2d, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Comptroller's Office, March 2, 1811.*

SIR:

The statements herewith, marked A, B, and C, have been prepared pursuant to the seventh section of an act of Congress, passed the 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." They contain all the information relative to the transactions of the mint, which the settlements at the treasury enable me to give.

I have the honor to be, sir, with great respect, your obedient servant,

G. DUVAL.

Honorable ALBERT GALLATIN.

A.

Statement exhibiting the balance of Gold and Silver remaining in the hands of the officers of the Mint on the 31st of December, 1809; the amount of deposits from the 1st of January to the 31st of December, 1810; the different species of coins made and paid on account of deposits, allowance for wastage, and the balance remaining in the hands of the officers of the Mint on the said 31st of December, 1810, to be accounted for on a future settlement.

ANDREW ROSS, *Clerk.*

11th CONGRESS.]

No. 351.

[3d SESSION.

FINES, PENALTIES, AND FORFEITURES,

For violations of the Embargo and Non-intercourse Laws, and the Expenses of Prosecutions.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 2, 1811.

TREASURY DEPARTMENT, *March 2, 1811.*

SIR:

I have the honor, in pursuance of the resolution of the House of Representatives, to transmit a statement of fines, penalties, and forfeitures, and of expenses attending prosecutions under the embargo and non-intercourse laws, as exhibited in the accounts of the collectors of the customs rendered to the treasury.

Complete information on that and on the other subjects embraced by the resolution of the House, could only be obtained from the district attorneys. A letter was accordingly addressed to them, requesting statements on those several points. Answers not having yet been received from all of them, the report required by the House is necessarily delayed till the next session of Congress.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

Statement of fines, penalties, and forfeitures, arising under the embargo and non-intercourse laws, as exhibited in the accounts of the collectors of the customs adjusted at the treasury.

12th CONGRESS.]

No. 352.

[1st Session.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, NOVEMBER 25, 1811.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department, the Secretary of the Treasury respectfully submits the following report and estimates:

RECEIPTS AND EXPENDITURES.

I. *To the end of the year 1811.*—The actual receipts into the treasury, during the year ending on the 30th of September, 1811, have consisted of the following sums, viz:

Customs, sales of lands, arrears, repayments, and all other branches of revenue, amounting, together, as appears by the statement E, to	\$13,541,446 37
Temporary loan of 31st December, 1810,	2,750,000 00
Total amount of receipts,	\$16,291,446 37
Making, together with the balance in the treasury on the 1st of October, 1810, and amounting to	3,459,029 72
An aggregate of	\$19,750,476 09

The disbursements during the same year, have been as follows, viz:

Civil department, including miscellaneous expenses, and those incident to the intercourse with foreign nations,	\$1,360,858 98
Army, fortifications, arms, and arsenals,	\$2,129,000
Navy Department,	2,136,000
Indian Department,	142,725
Payments for interest on the public debt,	2,225,800 93
Total current expenses,	\$7,994,384 91
Reimbursement of the temporary loan (in March and September, 1811,)	2,750,000 00
Payments on account of the principal of the public debt,	5,058,272 82
Amounting, together, as will appear more in detail by the statement E, to	\$15,802,657 73
And leaving in the treasury, on the 30th of September, 1811, a balance of	3,947,818 36
	\$19,750,476 09

The actual receipts, arising from revenue alone, and exclusively of the temporary loan since reimbursed, appear, from this statement, to have exceeded the current expenses, including therein the interest *paid* on the debt, by a sum of more than five millions and a half of dollars. But the payments on account of interest, during the year ending on the 30th of September, 1811, have, from an unavoidable delay in making the usual remittances to Holland, fallen short of the amount due during the same period; and the real excess of receipts arising from revenue, beyond the current expenses, including therein the interest *accrued* on the debt, amounts only to near 5,100,000 dollars.

The receipts for the last quarter of the year 1811, are estimated at 3,300,000 dollars; and the expenditures (including the payments of arrears of interest and near 2,160,000 dollars, on account of the principal of the public debt) at 4,300,000 dollars, which will leave, at the end of the year, a balance in the treasury, of near three millions of dollars. It will not, therefore, be necessary to resort, for the service of the present year, to the loan authorized by the act of the last session of Congress.

II. *Year 1812.*—It is ascertained that the nett revenue arising from duties on merchandise and tonnage, which has *accrued* during the three first quarters of the year 1811, exceeds six millions of dollars; and it may, for the whole year, be estimated at about 7,500,000.

The custom house bonds outstanding on the 1st day of January, 1812, and falling due in that year, are also estimated, after deducting bad debts, at 7,500,000 dollars. This sum may therefore be assumed as the probable amount of receipts into the treasury during the year 1812, on account of duties on merchandise and tonnage; the portion of the revenue arising from importations subsequent to the present year, which will be received in 1812, being considered sufficient to pay the debentures and expenses of collection of that year.

The payments made by purchasers of public lands, north of the river Ohio, having, during the two last years, after deducting the expenses and charges on that fund, amounted to near 600,000 dollars a year, that branch of revenue may, for the present, be estimated at that sum. Allowing one hundred thousand dollars for the other small items of revenue, which will consist principally of arrears and re-payments, the whole amount of actual receipts into the treasury, during the year 1812, may therefore be estimated at 8,200,000 dollars.

The current expenses for the same year, are estimated as followeth, viz:

1. Expenses of a civil nature, both domestic and foreign,	\$1,260,000
2. Military and Naval establishments, according to the estimates of those two departments, and including the additional permanent appropriations for the purchase of arms and for Indian annuities, viz:	
Army (including 32,000 dollars for the militia)	\$2,581,000
Arsenals, arms, and ordnance,	614,000
Naval Department,	2,500,000
Indian Department,	220,000
	5,915,000
3. Interest on the public debt,	2,225,000
Amounting, together, to	\$9,400,000

And exceeding, by 1,200,000 dollars, the probable amount of receipts.

This deficit may be paid out of the sum of three millions of dollars in the treasury. But, under existing circumstances, it does not seem eligible to exhaust that fund; and the estimate of receipts being also liable to more than usual uncertainty, the propriety of authorizing a loan sufficient to supply that difference, and to defray such other extraordinary expenses as may be incurred during the year, is respectfully submitted.

It must, at the same time, be observed, that the sum of 9,400,000 dollars, thus stated as the amount of current expenses for the year 1812, includes, in fact, a portion of extraordinary expenses arising from the present state of affairs: for, if the military and naval expenditure had been estimated at a sum not exceeding the amount actually

expended for those objects during the year ending on the 30th of September, 1811, that is to say, at 4,400,000 instead of 5,900,000 dollars, the estimate of receipts would exceed that of current expenses.

The disbursements on account of the naval establishment have amounted, in the year ending on the 30th September, 1810, to - - - - - \$1,675,000
And in the year ending on the 30th September, 1811, to - - - - - 2,136,000
They are estimated, for the year 1812, at - - - - - 2,500,000

The disbursements on account of the military establishment have amounted, in the year ending on the 30th September, 1810, to - - - - - \$2,309,000
And in the year ending on the 30th September, 1811, to - - - - - 2,129,000
They are estimated, for the year 1812, at - - - - - 3,195,000

But the detailed annual estimates of the year 1812 will show that they are predicated on the employment of almost the whole naval force, and of the whole military establishment of the United States, as authorized by law; covering, besides several other items, all the expenses of more than seventeen thousand effective men in the land and sea service.

With respect to the payments on account of the principal of the debt, it is evident that an authority to borrow a sum equal to that which will be reimbursed during the year 1812, will be necessary. The payments, which, according to law, must be made during that year, on that account, consist of

1. Annual reimbursement of six per cent. and deferred stocks, - - - - - \$1,570,000 00
2. Reimbursement of the residue of the converted stock, - - - - - 565,318 41

Amounting, together, to - - - - - \$2,135,318 41

This sum, and that payable for interest, amounting together to 4,360,000 dollars, leave, in order to complete the annual appropriation of eight millions, a balance of 3,640,000 dollars, which can be applied in no other manner than in purchases of stock at the prices limited by law. The amount which may be thus applied, is therefore uncertain.

PUBLIC DEBT.

It appears, by the statement D, that the payments on account of the principal of the public debt will, from the 1st of October, 1810, to the 31st December, 1811, have exceeded six millions four hundred thousand dollars. With the exception of the annual reimbursement of the six per cent. and deferred stocks, there will remain, at the end of the year 1811, no other portion of the public debt reimburseable at the will of the United States, than the residue of converted stock, amounting, as above stated, to 565,000 dollars, and which will be paid in the year 1812. There being nothing afterwards left, on which the laws passed subsequent to the year 1801, for the redemption of the debt, can operate, a general view of the result and effect of those laws will now be presented.

Exclusively of near three millions of unfunded debt since reimbursed, as detailed in the report of the 18th of April, 1808, the public debt of the United States amounted, on the 1st of April, 1801, to - - - - - \$79,926,999

As will appear by the statement Dd. The whole amount of principal extinguished during the period of ten years and nine months, commencing on the 1st of April, 1801, and ending on the 31st of December, 1811, exceeds forty-six millions of dollars, viz:

Foreign debt, paid in full, - - - - - \$10,075,004
Eight per cent., five and a half per cent., four and a half per cent., and Navy six per cent. stocks, and temporary loans due on the 1st of April, 1801, to the Bank of the United States, all paid in full, - - - - - 12,657,700
Six per cent. and deferred stocks, including the exchanged stock reimbursed, - - - - - 20,820,744
Three per cent. stock, including converted stock reimbursed, - - - - - 2,379,269
Registered debt, and debt due to foreign officers, - - - - - 90,093
46,022,810

Leaving the amount of old debt unredeemed on the 1st of January, 1812, - - - - - \$33,904,189

And consisting of the following species, viz:

Six per cent. and deferred stocks, unredeemed amount, - - - - - 17,067,096
Three per cent. stock, - - - - - 16,157,890
Converted stock - - - - - 565,318
16,723,208
1796 six per cent, stock, - - - - - 80,000
Registered debt, and debt due to foreign officers, - - - - - 33,885

\$33,904,189

And to which, adding the Louisiana six per cent. stock, being a new debt, contracted subsequent to the 1st of April, 1801, - - - - - 11,250,000

Makes the whole amount of public debt, on the 1st of January, 1812, - - - - - 45,154,189

The annual interest on the public debt, due on the 1st April, 1801, amounts to - - - - - \$4,180,463

The annual interest on the public debt, extinguished between the 1st April, 1801, and the 1st January, 1812, amounted to - - - - - 2,632,982

Leaving, for the amount of annual interest, on the old debt unredeemed, on 1st January, 1812, - - - - - 1,547,481

The annual interest on the Louisiana stock is - - - - - 675,000

Making the annual interest on the whole debt, due on the 1st January, 1812, - - - - - \$2,222,481

Which, subtracted from the annual interest on the debt due on 1st April, 1801 - - - - - 4,180,463

Leaves, for the difference between the amounts of interest respectively payable at those two dates, - - - - - \$1,957,982

The disposable national revenue, or that portion which alone is applicable to defray the annual national expenses, consists only of the surplus of the gross amount of revenue collected, beyond the amount necessary for paying the interest on the public debt. A diminution of that interest is, with respect to the ability of defraying the other annual expenses, a positive increase of revenue, to the same amount. With an equal amount of gross revenue, the revenue applicable to defray the national expenses is now, by the effect of the reduction of the debt, two millions six hundred thousand dollars greater than on the 1st day of April, 1801. Or, if another view of the subject be thought more correct, the laws for the reduction of the debt have, in ten years and nine months, enabled the United States to pay in full, the purchase money of Louisiana, and increased their revenue near two millions of dollars.

If the amount of annual payments, on account of both the principal and interest of the public debt, during the last eight years, be contrasted with the payments hereafter necessary for the same purpose, the difference will be still more striking. Eight millions of dollars have been annually paid, on that account, during those eight years. The whole amount payable after the year 1812, including the annual reimbursement on the six per cent. and deferred stocks, is \$3,792,382; making an annual difference of more than four millions two hundred thousand dollars, which will be liberated from that appropriation. And this annual payment of about three millions eight hundred thousand dollars, would have been sufficient, with some small variations, to discharge, in ten years, the whole of the residue of the existing debt, with the exception of the three per cent. stock, the annual interest on which amounts only to

four hundred and eighty-five thousand dollars. The aspect of the foreign relations of the United States, forbids, however, the hope of seeing the work completed within that short period. The redemption of principal has been effected without the aid of any internal taxes, either direct or indirect; without any addition, during the last seven years, to the rate of duties on importations, which, on the contrary, have been impaired by the repeal of that on salt, and notwithstanding the great diminution of commerce during the last four years. It therefore proves, decisively, the ability of the United States, with their ordinary revenue, to discharge, in ten years of peace, a debt of forty-two millions of dollars; a fact which considerably lessens the weight of the most formidable objection, to which that revenue, depending almost solely on commerce, appears to be liable. In time of peace, it is almost sufficient to defray the expenses of a war; in time of war, it is hardly competent to support the expenses of a peace establishment. Sinking, at once, under adverse circumstances, from fifteen to six or eight millions of dollars, it is only by a persevering application of the surplus, which it affords in years of prosperity, to the discharge of the debt, that a total change in the system of taxation, or a perpetual accumulation of debt can be avoided. But, if a similar application of such surplus be hereafter strictly adhered to, forty millions of debt, contracted during five or six years of war, may always, without any extraordinary exertions, be reimbursed in ten years of peace.

This view of the subject has, at the present crisis, appeared necessary, for the purpose of distinctly pointing out one of the principal resources, within the reach of the United States. But, to be placed on a solid foundation, it requires the aid of a revenue, "sufficient, at least, to defray the ordinary expenses of Government, and to pay the interest on the public debt, including that on new loans which may be authorized."

PROVISION FOR THE ENSUING YEARS.

The revenue is derived from two sources—the duties on importations, and the sales of public lands.

The nett revenue, arising from duties on merchandise and tonnage, which accrued during the year 1809, amounted to \$6,527,168. The nett revenue, arising from the same sources, which accrued during the year 1810, amounted, as will appear by the statements A and B, to \$12,513,490; the same revenue, for the year 1811, is estimated, as has already been stated, at \$7,500,000. A portion of the revenue of this year having been collected on British merchandise, imported before the prohibition took effect, the permanent revenue, arising from duties on tonnage and merchandise, will not probably, at their present rate, and under existing circumstances, exceed \$6,000,000—an estimate which is corroborated by the view of the subject exhibited in the statement B 2.

The sales of the public lands, north of the river Ohio, have, during the year ending on the 30th September, 1811, amounted, as appears by the statement C, to 207,000 acres, and the payments by purchasers, to \$600,000. It has already been stated, that those payments, on the average of the two last years, amount, after deducting the expenses and charges on that fund, to the annual sum of \$600,000.

The sales in the Mississippi territory being, in the first instance, appropriated to the payment of \$1,250,000 to the State of Georgia, are distinctly stated.

The permanent revenue or annual receipts, after the year 1812, calculated on the existing state of affairs, may, therefore, be estimated at

	\$6,600,000
Which, deducted from the annual expenditures, calculated on the same principle, and amounting, by the preceding estimates for the year 1812, to	9,200,000

Leaves a deficiency to be provided for, of	\$2,600,000
--	-------------

An addition of fifty per cent. to the present amount of duties, (together with a continuance of the temporary duties heretofore designated by the name of "Mediterranean Fund,") will be sufficient to supply that deficiency, and is respectfully submitted. This mode appears preferable for the present to any internal tax. With respect to the sales of public lands, besides affording a supplementary fund for the ultimate redemption of the public debt, they may, without any diminution of revenue, be usefully applied as a bounty to soldiers enlisting in the regular service, and in facilitating the terms of loans. But it does not appear that the actual receipts into the treasury, arising from the sales, can be materially increased, without a reduction in the price, unless it be by an attempt to offer certain portions for sale in the large cities of the Union.

The same amount of revenue would be necessary, and, with the aid of loans, would, it is believed, be sufficient in case of war. The same increase of duties would therefore be equally necessary in that event. Whether it would be sufficient to produce the same amount of revenue, as under existing circumstances, cannot at present be determined. Should any deficiency arise, it may be supplied, without difficulty, by a further increase of duties, by a restoration of that on salt, and a proper selection of moderate internal taxes. To raise a fixed revenue of only nine millions of dollars, is so much within the compass of the national resources, so much less in proportion than is paid by any other nation, that, under any circumstances, it will only require the will of the Legislature to effect the object.

The possibility of raising money by loans to the amount which may be wanted, remains to be examined: for, the fact that the United States may easily, in ten years of peace, extinguish a debt of forty-two millions of dollars, does not necessarily imply that they could borrow that sum during a period of war.

In the present state of the world, foreign loans may be considered as nearly unattainable. In that respect, as in all others, the United States must solely rely on their own resources. These have their natural bounds, but are believed to be fully adequate to the support of all the national force that can be usefully and efficiently employed.

The ability and will of the United States faithfully to perform their engagements are universally known; and the terms of loans will, in no shape whatever, be affected by want of confidence in either. They must, however, depend not only on the state of public credit, and on the ability to lend, but also, on the existing demand for capital required for other objects. Whatever this may be, the money wanted by the public must be purchased at its market price. Whenever the amount wanted for the service of the year, or the whole amount of stock in the market, shall exceed certain limits, it may be expected that legal interest will not be sufficient to obtain the sums required. In that case, the most simple and direct is also the cheapest and safest mode. It appears much more eligible to pay at once the difference, either by a premium in lands, or by allowing a higher rate of interest, than to increase the amount of stock created, or to attempt any operation which might injuriously affect the circulating medium of the country. This difficulty, and it is the only serious one which has been anticipated, will not, indeed, if analysed, appear very formidable. For, to take an extreme case, and supposing even forty millions of dollars to be borrowed, at eight, instead of six per cent. a year, the only difference would consist in the additional payment of eight hundred thousand dollars a year, until the principal was reimbursed, a payment inconvenient, indeed, and to be avoided if practicable, but inconsiderable, if compared either with the effects of other means of raising money, or with some other branches of the public expenditure.

It appears from the preceding estimates, that nothing more may be strictly wanted for the defraying, during the year 1812, the expenses as yet authorized by law, than an authority to borrow a sum equal to that which may be reimbursed on account of the principal of the public debt.

With a view to the ensuing years, and considering the aspect of public affairs, presented by the Executive, and the measures of expense which he has recommended, it has been attempted to show—

1st. That a fixed revenue of about nine millions of dollars is necessary, and sufficient, both under the existing situation of the United States, and in the event of their assuming a different attitude.

2d. That an addition to the rate of duties on importations is at present sufficient for that purpose, although, in the course of events, it may require some aid from other sources of revenue.

3d. That a just reliance may be placed on obtaining loans, to a considerable amount, for defraying the extraordinary expenses which may be incurred beyond the amount of revenue above stated.

4th. That the peace revenue of the United States will be sufficient, without any extraordinary exertions, to discharge, in a few years, the debt which may be thus necessarily incurred.

All which is respectfully submitted.

ALBERT GALLATIN.

A.

A Statement exhibiting the amount of duties which accrued on Merchandise, Tonnage, Passports, and Clearances, of Debentures issued on the exportation of Foreign Merchandise, of payments for Bounties and Allowances, and for expenses of collection, during the years 1809 and 1810.

B 2.

A statement of the duties which accrued on the principal articles imported from Great Britain and her dependencies, during the year 1810, with an estimate of the debentures issued on the same articles, deduced from a comparison with the whole amount of duties accruing, and debentures issued, during the same year, on all articles of the same description, imported from all countries.

	Ad valorem	Spirits.	Cotton, spices, and indigo.	Sundries. (a.)
Gross amount of duties on articles imported from all countries, -	\$8,121,337	1,315,085	681,414	283,778
Deduct gross amount of debentures issued on the exportation of such articles, - - - - -	656,773	33,323	563,601	10,700
Nett revenue, - - - - -	<u>\$7,464,564</u>	<u>1,281,762</u>	<u>117,813</u>	<u>273,078</u>
Gross amount of duties on such of the same articles as were imported from Great Britain and dependencies, - - - - -	6,174,510	561,893	192,710	244,244
Deduct estimated amount of debentures on the exportation of such of the said articles as were of British importation, - - - - -	499,510	14,893	159,710	9,244
Estimated nett revenue on articles imported from Great Britain and dependencies, - - - - -	<u>5,675,000</u>	<u>547,000</u>	<u>33,000</u>	<u>236,000</u>
Nett revenue, as per statement A, for 1810. - - - - -	-	-	-	\$12,513,000
Deduct nett revenue on articles imported from Great Britain and dependencies, viz:				
on merchandise ad valorem, - - - - -	-	-	\$5,675,000	
spirits, - - - - -	-	-	547,000	
cotton, spices, and indigo, - - - - -	-	-	33,000	
sundries, - - - - -	-	-	236,000	
				<u>6,491,000</u>
Nett revenue, after deducting that arising from British importations, - - - - -	-	-	-	<u>\$6,022,000</u>

(a) Consisting of beer, pewter, anchors, sheet, slit, and hoop iron, nails and spikes, paints, lead, and manufactures of lead, steel, twine, and packthread, glass, coal, and fish. Some small items, not exceeding \$10,000, are omitted.

NOTE.—Sugar, coffee, and molasses, are not included, as the whole quantity wanted for domestic consumption will be supplied from other countries.

C.

Statement of the Lands sold in the Districts of Marietta, Zanesville, Steubenville, Canton, Chillicothe, Cincinnati, Jeffersonville, and Vincennes, from 1st October, 1810, to 30th September, 1811; showing, also, the amount of receipts from individuals, and payments made by Receivers, during the same time, with the balance due, both on the 1st of October, 1810, and 1st October, 1811.

TREASURY DEPARTMENT, November, 1811.

D.

An estimate of the principal redeemed of the Debt of the United States, from the 1st of October, 1810, to the 30th of September, 1811, and also from the 1st April, 1801, to 30th September, 1811.

	Redemption from 1st Oct. 1810, to 30th Sept. 1811.	Redemption from 1st April, 1801, to 30th Septem- ber, 1810, per the Secretary's report of 11th Dec. 1810.	Total redemption, from 1st April, 1801, to 30th Sept. 1811.
The amount of warrants issued on the Treasurer of the U. States, on account of the interest of the domestic debt, and of the reimbursement of the old six per cent. and deferred six per cent. stocks, from the 1st October, 1810, to the 30th September, 1811, exclusive of a repayment of \$140,000, and of the reimbursement of the exchanged six per cent. stock, as stated below, was, - - - - -			
			\$3,153,408 01
Deduct interest which accrued during the same period, calculated quarter yearly, - - - - -			1,846,260 45
Reimbursement of the old six per cent. and deferred stocks,	\$1,307,147 56	\$12,005,699 01	\$13,312,846 57
Do. of the navy six per cent. stock, - - - - -	- - - - -	711,700 00	711,700 00
Do. of the 5½ per cent. stock, - - - - -	- - - - -	1,847,500 00	1,847,500 00
Do. of the 4½ per cent. stock, - - - - -	- - - - -	176,000 00	176,000 00
Do. and purchase of eight per cent. stock, - - - - -	- - - - -	6,359,600 00	6,359,600 00
Do. do. of the exchanged 6 per cent. stock, - - - - -	3,751,125 26	2,542,225 86	6,293,351 12
Payments made for lands in certificates of the debt of the United States, - - - - -	- - - - -	268,240 70	268,240 70
Payments to foreign officers, and for certain parts of the domestic debt, - - - - -	- - - - -	90,092 58	90,092 58
Payments on account of domestic loans, - - - - -	- - - - -	3,440,000 00	3,440,000 00
Reimbursement of the foreign debt, - - - - -	- - - - -	(a.) 10,075,004 00	10,075,004 00
	\$5,058,272 82	\$37,516,062 15	(b.) 42,574,334 97

Notes to Statement D.

(a.) This sum of \$10,075,004, is the true amount of the foreign debt, (including principal and premiums) actually due on the 1st April, 1801; the whole of it having been reimbursed, this sum is substituted for that of \$10,239,442 33, inserted in the estimate D of last year, in which the advances for interest, payable in Europe, on the Louisiana stock, had been blended with the payment for principal of the old foreign debt.

(b.) To this sum of - - - - - \$42,574,334 97
Must be added—

Difference between the nominal amount of three per cent. stock, extinguished, and that of converted stock, issued under the act of 11th February, 1807, - - - - - \$1,001,458 45

Difference between the nominal amount of six per cent. and deferred stocks, as here stated, and the amount actually reimbursed, as per accounts settled at the treasury, arising from unclaimed dividends and arrears of interest, - - - - - 280,884 60

\$1,292,343 05

From which deduct reimbursement on stock paid in for lands, prior to the 30th September, 1805, - - - - - 4,229 90

1,288,113 15

True amount reimbursed from 1st April, 1801, to 30th September, 1811, - - - - -

43,862,448 12

The reimbursement of six per cent. and deferred stocks, on the 31st December, 1811, is estimated at - - - - -

\$865,909 97

The reimbursement of converted stock, - - - - -

1,294,452 29

2,160,362 26

Amount reimbursed from 1st April, 1801, to 1st January, 1811, as per Secretary's report, \$46,022,810 38

TREASURY DEPARTMENT, *Register's Office*, 20th November, 1811.

JOSEPH NOURSE, *Register*.

Dd.

Statement of the amount of the Public Debt on 1st April, 1801, and on the 1st January, 1812.

	Principal.	Interest.	
DEBT ON 1ST APRIL, 1801.

Eight per cent. (including \$800 over-issued)	6,482,500 00		
Navy six per cent.	711,700 00		
Temporary loans, viz: at six per cent.	2,040,000		
Do. do. five per cent.	1,400,000		
	<u>3,440,000 00</u>		
1796 six per cent.	12,657,700 00	863,218 50	
Foreign debt on 1st January, 1801,	80,000 00	4,800 00	
Deduct principal and premiums paid between 1st January and 1st April, 1801,	10,419,000 00		
	<u>343,996 00</u>		
Unfunded debt, consisting of such parts of the registered debt, and debt due to foreign officers, as have been subsequently paid,	10,075,004 00	466,100 00	
	90,092 58		
			\$4,180,463 26
Debt 1st April, 1801,	79,892,115 01		
Reimbursements from 1st April, 1801, to 1st January, 1812, viz:			
On six per cent. and deferred stocks,	-	1,249,244 67	
On three per cent. including reimbursement of converted stock, and deducting converted stock outstanding,	-	(a) 54,418 53	
Eight, five and a half, four and a half, and Navy six per cent. stocks, and temporary loans, paid all in full,	12,657,700 00	863,218 50	
Foreign debt, paid in full,	10,075,004 00	466,100 00	
On account of unfunded debt,	90,092 58		
Total reimbursement,	<u>46,022,810 48</u>		<u>2,632,981 70</u>
DEBT ON 1ST JANUARY, 1812.			
1. Old Debt, viz.			
(b) Six per cent. and deferred,	17,067,096 08	1,024,025 76	
(c) Three per cent.	16,157,890 04		
Converted six per cent.	565,318 41		
	<u>16,723,208 45</u>	518,655 80	
1796 six per cent.	80,000 00	4,800 00	
Old debt,	<u>33,870,304 53</u>		<u>1,547,481 56</u>
2. New Debt, viz.			
Louisiana six per cent. stock,	11,250,000 00		675,000 00
Total amount of debt, 1st January, 1812,	<u>45,120,304 53</u>		<u>2,222,481 56</u>
The reimbursement of principal for 1812, will be \$1,569,900 65, thus:			
Nominal amount of six per cent. and deferred stocks, \$32,424,080 14, at 8 per cent.		2,593,926 41	
Of which is interest, as above,		1,024,025 76	
		<u>1,569,900 65</u>	
Total amount annually payable on the public debt, after 1812,			<u>\$3,792,382 21</u>

Notes to Statement Dd.

(a) Interest extinguished on \$2,379,269 34, at 3 per cent.		\$71,378 08	
Deduct interest increased 3 per cent. on \$565,318 41 converted 6 per cent. stock outstanding,		16,959 55	
Diminution of interest on 3 per cent. stock		<u>54,418 53</u>	
(b) Six per cent. and deferred stocks, 1st January, 1801:			
Nominal amount, exclusive of the sinking fund,			\$41,895,310 01
The previous reimbursements by the accounts of receipts and expenditures, amount- ed to		3,976,239 84	
Deduct for an error inserted in the accounts for the year 1803,		24,210 31	
		<u>3,952,029 53</u>	
But of that reimbursement there had been paid on stock transferred to the sinking fund, a sum of		4,177 72	
Leaving for the reimbursement on the above stated nominal amount,			<u>3,947,851 81</u>
And making, for the unredeemed amount, as per report of April, 1808,			37,947,458 20
The reimbursement paid on 31st March, 1801, was			<u>59,617 66</u>
Unredeemed 6 per cent. and deferred, on 1st April, 1801,			<u>37,887,840 54</u>

Notes to Statement Dd—Continued.

The payments of principal, from 1st April, 1801, to January 1, 1812, are as follows:	
1. Annual reimbursements from 1st January, 1801, to 1st January, 1811, per printed accounts of receipts and expenditures, - - - - -	13,012,741 19
Deduct reimbursement for 1st quarter of 1801, as above, - - - - -	59,617 66
	<u>12,953,123 53</u>
Reimbursement of the year 1811, estimated at - - - - -	1,499,000 00
	<u>14,452,123 53</u>
2. Paid in for lands and purchased, viz:	
For lands, unredeemed amount, as stated in the several estimates marked D, - - - - -	61,282 10
Deduct on account of the nominal amount, instead of the unredeemed amount, having been inserted in these estimates prior to 30th September, 1805, - - - - -	4,229 90
	<u>57,052 20</u>
Purchased in 1806, - - - - -	17,517 61
	<u>74,569 81</u>
3. Exchanged stock reimbursed in full, - - - - -	6,294,051 12
	<u>20,820,744 46</u>
Unredeemed amount on 1st January, 1811, - - - - -	18,566,096 08
Deduct reimbursement of 1811, estimated, as per above, at - - - - -	1,499,000 00
	<u>17,067,096 08</u>
(c.) Three per cent. stock on 1st January, 1801, (including Higgins' stock, 17.18, stated subsequently in the accounts) per report of April, 1808, - - - - -	19,093,902 21
Do. issued subsequent thereto, - - - - -	8,575 68
	<u>19,102,477 89</u>
Total outstanding 1st April, 1801, - - - - -	-
Reimbursements:	
1. Surrendered in exchange for converted stock, - - - - -	2,861,309 15
2. Paid in for lands, - - - - -	83,278 70
	<u>2,944,587 85</u>
Outstanding on 1st January, 1812, - - - - -	-
	<u>16,157,890 04</u>
From the above amount of reimbursements, - - - - -	2,944,587 85
Deduct outstanding converted stock, on 1st January, 1812, - - - - -	565,318 41
	<u>2,379,269 44</u>
Makes the reimbursement on 3 per cent. stock (including converted) from 1st April, 1801, to 1st January, 1812, - - - - -	-
Viz. Difference between 3 per cent. surrendered and converted stock, issued under the act of February 11, 1807, - - - - -	1,001,458 45
Three per cent. stock paid in for lands, - - - - -	83,278 70
Converted do. do. - - - - -	80 00
Do. do. to be reimbursed on the 31st December, 1811, - - - - -	1,294,452 29
	<u>2,379,269 44</u>

12th CONGRESS.]

No 353.

[1st Session.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 27, 1811.

SIR:

TREASURY DEPARTMENT, *November 26, 1811.*

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1808, 1809, and 1810.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

A Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, in the years 1808, 1809, and 1810, compared with the amount of Duties collected on the same, respectively.

SPECIES OF MERCHANDISE.	IN THE YEAR 1808.		IN THE YEAR 1809.		IN THE YEAR 1810.

TREASURY DEPARTMENT, Register's Office, November 14, 1811.

JOSEPH NOURSE, Register.

12th CONGRESS.]

No. 354.

[1st SESSION.]

ASSAYS OF FOREIGN COINS.

COMMUNICATED TO THE SENATE, ON THE 29TH OF NOVEMBER, 1811.

The Secretary of the Treasury, in obedience to the act, entitled "An act regulating the currency of foreign coins in the United States," respectfully reports:

That assays of the foreign gold and silver coins, made current by that act, have been made at the Mint of the United States, conformably thereto, the result whereof is shown in a letter of the Director of the Mint, dated November 22, 1811, which is annexed to this report, and which is prayed to be received as part thereof.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, November 26, 1811.

MINT OF THE UNITED STATES, November 22, 1811.

SIR:

Agreeably to your desire, I have caused assays to be made of the several species of foreign gold and silver coins, made current in the United States, by an act of Congress of 10th April, 1806; the result of which, according to the assayer's report, is as follows:

Gold coins of Great Britain.

No.	Quantity	Dates	Assays	Weight	C.	grs.
No. 1,	on 5 pieces	of different dates,	prior to the year	1806,	--	22 0

7,	"	5	"	"	"	"	"	"	"	"	1811,	-	-	-	-	10	15	00

From the above report of the assayer, it appears:

- 1st. That the gold coins of Great Britain and of Portugal are all uniformly of the same quality, and exactly equal to that of the gold coins of the United States; and therefore their intrinsic value is at the rate of 100 cents for 27 grains, or $88\frac{3}{8}$ cents per dwt.
- 2d. That the gold coins of France are all very nearly of the same quality. The average from the above assays being $21\frac{2}{11}$ nearly, will give their value at the rate 100 cents for $27\frac{47}{100}$ grains, or $87\frac{37}{100}$ cents per dwt.
- 3d. That the gold coins of Spain are somewhat variable in their qualities. The average from the above assay being $20\frac{3}{4}$ will give their intrinsic value at the rate of 100 cents for $28\frac{53}{100}$ grains, or $84\frac{12}{100}$ cents per dwt.
- 4th. That the intrinsic value of the French crown, supposing its weight 18 *dwt.* 17 *grs.*, is, from the above assay, $110\frac{1}{100}$ cents; and that of the Ecu, or five francs piece of Napoleon, supposing its weight 16 *dwt.* 2 *grs.* (which is very nearly the average) = $93\frac{14}{100}$ cents.
- 5th. That the silver coins of Spain are very nearly of the same uniform quality. The average from the above assay being 10 *oz.* 15 *dwt.* 17 *grs.* nearly, will give the intrinsic value of the Spanish dollar, if of the full weight of 17 *dwt.* 7 = $100\frac{24}{100}$ cents.

I have the honor to be, sir, with great respect and esteem,

Your most obedient servant,

R. PATTERSON.

The Honorable ALBERT GALLATIN, *Secretary of the Treasury.*

ENCOURAGEMENT TO THE CULTURE OF HEMP.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 7, 1811.

To the Honorable the Senate and House of Representatives of the United States, the petition of the inhabitants of the county of Sussex, in the State of New Jersey, humbly sheweth:

That your petitioners are owners of considerable tracts of land, situated in the county of Sussex, that are suitable for the cultivation of hemp; which they have been at a heavy expense in draining, with the view of turning them to that use. They have been led to this object by the high prices which that article has hitherto borne in our markets; and, more particularly, by the encouragement held out by Congress to every improvement and extension of the agriculture and manufactures of this country—objects always dear to them, but much more so in the present convulsed state of the world; which has drawn from its accustomed employment the capital of the country, and with it the enterprise and industry of our citizens, which now turns its activity to the improvement of the interior of our country. Your petitioners have seen, with regret and disappointment, that the state of affairs abroad, which has curtailed or annihilated almost every other branch of commerce, has greatly increased the importation of hemp; much to their individual prejudice, and (as they beg permission to show) to the material prejudice of the country generally. In the counties of Sussex and Morris, there are not less than thirty thousand acres of land, adapted to the growing of hemp; and, in the county of Orange, which adjoins, a much greater quantity. These lands have heretofore been but little cultivated, and were of small value to the owners; in very many instances wholly unproductive. And as they were in most instances inundated during a part of the year, and filled with stagnant waters, the health of large districts of country has been greatly injured. To redeem these lands, therefore, and to render them susceptible of growing, in abundance, an article of such national importance as that of hemp, is a great and lasting gain to the country, in every point of view, and, perhaps, very essential to its independence. The importation of hemp, on the contrary, is a continual source of national loss. This article (as your honorable body well knows) is brought from countries that want few of the products of this country; and who are, besides, our rivals in many of the leading articles which

we have for exportation. The balance of trade with them is consequently largely against us; and, to extinguish this balance, the specie is drained from our country.

Your petitioners are fully of opinion that, with suitable legislative encouragement, there will be raised not only enough hemp for the consumption of the United States, but that it will become, in a short period of time, an important article of exportation. This encouragement is the more necessary at this time, to counteract the injury that is likely to be produced by a continuance of the state of things before alluded to; and to afford a more immediate and certain prospect of gain to the cultivator, inducing, by this means, others to embark their capitals in like enterprises; who would else be discouraged by the heavy expense that is unavoidably incurred in the outset, and which affords no return till after several years of persevering industry.

Such are the motives which have led your petitioners to apply to the General Government for assistance. They will not presume to point out the mode, whether by a bounty on domestic hemp, or an additional duty on foreign; this they leave to the wisdom of Congress. That every thing will be done that is consistent with the duties they owe to all classes, they have a sufficient pledge in the deep interest which the Government has always taken in raising the value of our native soil, and in lessening our dependence on foreign countries.

JAMES LUDLUM, and others.

November, 1811.

12th CONGRESS.]

No. 356.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 9, 1811.

Mr. NEWTON, from the Committee on Commerce and Manufactures, to whom was referred the petition of Najah Taylor and Nathaniel Richards, for themselves, and in behalf of Gustavus Upton, made the following report:

That the petitioners state, that Gustavus Upton, in October, 1807, purchased, in France, sundry articles of merchandise, which, in the month of February, 1808, were shipped in the *Ceres*, for New York, and the voyage commenced, but which was relanded in consequence of information received, that the British Government had issued orders for the capture of all American vessels bound to or from the ports of France. That no safe opportunity offering for the conveyance of the merchandise to the United States, in December, 1808, when one of the petitioners (Gustavus Upton) left France for Great Britain; having previously given instructions to Messrs. McCarthy and Brothers of Bordeaux to ship the merchandise to the United States directly, if a conveyance could be obtained: and, if not, to forward the same to England, whence, it was supposed, the merchandise might be shipped to the United States, with ease and safety. The petitioners further state, that, on the 12th of April, 1809, a conveyance was engaged for the said merchandise for London, in the ship *Yaug Fran Agena Sophia*, of *Knipphausen*. On the merchandise arriving in the port of London, liberty to land the same, for sale, was refused, but granted to reship it for the United States; which was done in June, 1809, on board the *Rhadius*, Captain Farly, for New York, and reached that port on the 18th of October, 1809, in contravention of the provisions of the act of Congress, entitled "An act to interdict the commercial intercourse between the United States and Great Britain and France, and their dependencies, and for other purposes," passed the 1st of March, 1809. The petitioners further state, that, on the arrival of the said merchandise at New York, they gave notice thereof to the collector, and that they had no intention of violating any law; that the merchandise, notwithstanding the fair and open procedure of the petitioners, was taken into the custody of the revenue officers, and that, on a petition to the Secretary of the Treasury, in conformity to the act, entitled "An act to provide for mitigating or remitting the forfeitures, penalties, and disabilities, accruing in certain cases therein mentioned," he decided that the said merchandise should be delivered to the petitioners, on their payment of costs, double duties on the articles imported contrary to law, and a sum equal to the extra duties imposed by his decision, for the use of the custom house officers at New York; with which decision the petitioners complied. They now pray the National Legislature that the sums of money which they have been made to pay, over and above the legal duties, may be refunded.

The Committee can see no great hardship in this case. The merchandise seized was prohibited, and the whole importation, had a prosecution been instituted, would have been condemned as an importation contravening the provisions of the act, entitled "An act to interdict the commercial intercourse between the United States and Great Britain and France and their dependencies, and for other purposes," passed the 1st day of March, 1809. The petitioners or shippers must have known that the merchandise was liable to seizure prior to the shipment of the same at London for the United States, the shipment having taken place more than three months subsequent to the passage of the abovementioned act.

So far from being liable to the charge of rigor in the application of law to the petitioners' case, the Committee are of opinion that the Secretary of the Treasury exercised the powers with which he is by law invested, with great moderation.

From this view of the subject, the Committee beg leave to recommend the adoption of the following resolution:

Resolved, That the prayer of the petition is unreasonable, and ought not to be granted.

12th CONGRESS.]

[1st SESSION.]

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 23, 1811.

To the Honorable the Senate and House of Representatives of the United States in Congress assembled, the petition of the subscribers, citizens of the State of New Jersey, respectfully represents:

That your petitioners are concerned in the manufactory of iron, for which the district of country wherein they reside is peculiarly adapted. Our hills and mountains abound with iron ore, of the best quality, adequate to supply the whole of the United States, and they also furnish streams of water, and fuel, sufficient to convert this ore into bar iron, castings, nails, &c. &c.

Whilst our commerce was undisturbed by the freebooters of Europe, our iron manufactories afforded us a living profit. Of late, the large importations from Russia and Sweden, and consequent reduction of price; the diminution

of commerce, and great difficulty of making sale of our iron for cash, have so effectually embarrassed our operations, that really we know not what course to pursue.

If we suffer our works to lay idle, after expending, perhaps, the *whole* of our capital in erecting them, we are most certainly *ruined*; and if we persist in conducting them, under such heavy embarrassments, we are almost *as certainly* ruined. In this dilemma, then, we appeal to the National Legislature, to relieve us from a situation which we could neither foresee nor prevent. We look to them with confidence, to cherish and foster, with parental care, establishments which, we are bold to say, may render us independent of Europe, in an article so highly important to the agricultural, commercial, and manufacturing interests of our country.

We solicit from your honorable body no other assistance than such as has been frequently extended to establishments of less importance than ours. If an entire prohibition to import iron from Europe should be judged inexpedient, we trust that the wisdom and patriotism of Congress will not hesitate in protecting us from ruin, by imposing such an additional duty on this article, when imported, as may enable us to proceed in exploring and bringing forth the hidden treasures of our mountains.

And your petitioners, as in duty bound, will ever pray.

JOSIAH MUNSON, *and others.*

NEW JERSEY, *November, 1811.*

[12th CONGRESS.]

No. 358.

[1st Session.]

COMPENSATION OF REVENUE OFFICERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 30, 1811.

Mr. BACON, from the Committee of Ways and Means, to whom was referred the several petitions of the collectors of the ports of Philadelphia, Norfolk, Plymouth, (Massachusetts) and Baltimore, and of the naval officer of the port of Philadelphia, made the following report:

That the aforesaid officers pray that provision may be made, by law, for remunerating to them the deficiencies which have happened in the amount of their usual annual compensations, for some years past; and, as it respects the collectors of the ports of Baltimore and Norfolk, that additional compensation may be made them for the future.

The committee have observed that the deficiencies referred to have occurred principally during the years 1808 and 1809, and have been occasioned by two causes:

1st. The generally depressed state of commerce, during those years, which so materially affected the general revenue of the country, and, consequently, the emoluments of the officers employed in its collection, in different degrees.

2d. The payment over, by some of the present incumbents of those particular offices, to the legal representatives of their deceased predecessors, of a moiety of the commissions arising from duties bonded by such predecessors, but actually received by such incumbents, pursuant to the 4th section of the act to establish the compensations of those officers, passed March 2d, 1799.

On this view of the subject, the committee would remark, that, so far as such diminution of compensation has been occasioned by the first mentioned cause, it must be expected by public officers, whose emoluments depend, in a great degree, upon the actual state of the general commerce of the country, that they should, in some measure, share their part in the occasional variations which, at particular periods, may happen to that commerce; and if, during some years, they are enabled to receive an amount which is obviously something more than an average compensation for services equally arduous, in the ordinary branches of private business, it ought not to be complained of, if, in other years, they should receive somewhat less. Applying this principle to the case of the particular officers under consideration, the committee are convinced that, upon an average of three years, from 1808 to 1810, both inclusive, those officers (with the exception of the collector of Baltimore) have been enabled to receive an annual compensation for their services, which, in reference to the general rewards of skill and industry, during that period, ought, under all the circumstances of their case, to be deemed a reasonable one. The nett emoluments of the collector of Philadelphia, (including the half commissions paid to his predecessor) during that period, amounting to the average sum of \$2,537 12, annually; those of the naval officer of that port, to \$2,625 89; those of the collector of Norfolk, to \$921 82; and those of the collector of Plymouth, to \$1,341 45.

That, so far as the nett emoluments of some of those officers have been affected by the second consideration above stated, it ought not to form a ground for remuneration by the Government, since it is a circumstance incident to all other officers of the same description, upon the commencement of their official duties, and is, in effect, but the advance of a sum out of their first year's emoluments, which they may calculate upon being refunded to them, or their legal representatives, after the expiration of their official duties by death or resignation.

That some inequalities exist in the compensations now allowed to the officers of the customs, is not improbable, and a general review of that subject may, at a suitable time, be proper and expedient. But it is doubted whether the present unsettled state of our commerce and revenue will afford sufficient *data* on which any permanent regulations in this behalf ought to be founded.

The case of the collector of Baltimore is the only one, amongst those referred to them, which, in the judgment of the committee, is attended with such obvious circumstances of hardship, and so striking inadequacy of compensation, as to justify extending to him specific and temporary relief. The present collector came into office near the commencement of the year 1808; and it appears, from the official returns of his emoluments and expenditures, that his nett emoluments for that and the two succeeding years have amounted to but \$1,180 57, being an average annual compensation for those years of but \$393 52; and, so far as can be ascertained from a comparative view of the official returns, it appears that the expenditures of that office have, during that period, been kept within as reasonable limits as circumstances would justify.

Under this view of the several cases referred to them, the committee recommend to the House the following resolutions:

1st. That the prayer of the several petitions of the collectors of the ports of Philadelphia, Norfolk, and Plymouth, (Massachusetts) and of the naval officer of the port of Philadelphia, ought not to be granted.

2d. That there be allowed and paid to James H. McCulloch, collector of the port of Baltimore, the sum of 1,500 dollars, as a remuneration for services in his said office, during the years 1808, 1809, and 1810, for which his official emoluments were an inadequate compensation.

[See supplemental report, No. 360.]

The Committee beg leave further to report:

That, in the course of the examinations which became necessary in relation to the merits of the particular cases under consideration, their attention has been drawn to the practical operation of those portions of the revenue laws which were designed to limit within reasonable bounds the nett annual emoluments of the officers of the customs, in some of the principal ports of the Union.

By the 3d section of the act of Congress, passed on the 30th day of April, 1802, it is provided "that, whenever the annual emoluments of any collector of the customs, after deducting therefrom the expenditures incident to his office, shall amount to more than five thousand dollars, or those of a naval officer, after a like deduction, to more than three thousand five hundred dollars, or those of a surveyor, after a like deduction, to more than three thousand dollars, the surplus shall be accounted for, and paid by them, respectively, to the treasury of the United States."

The principal items composing the aggregate of "expenditures incident to these offices," consist of clerk hire, stationary, office rent, and fuel; an account of which, those officers are now required by law to transmit, annually, to the Comptroller of the Treasury, to be by him laid before Congress. So long as the whole nett amount of emoluments received by them, respectively, does not exceed the *maximum* which they are authorized to retain for their own compensation, the personal interest of the officer is undoubtedly a sufficient check against an unreasonable application of their gross emoluments for clerk hire and other official expenses. But, whenever the nett amount comes to exceed that *maximum*, it is evident that the expenditures for those objects are liable to misapplication and abuse. In the branch of clerk hire, particularly, the establishment of an officer may be extended amongst his friends, connexions, and dependents, to a degree limited only by the amount of which the whole nett emoluments of the office exceed that to which the law has limited the personal compensation of the officer. The committee do not pretend to aver that any instances of such actual misapplication or abuse have been brought to their knowledge; but it is deemed their duty to state those of which the system, under present regulations, is susceptible. From the information received from the Treasury Department, it appears that no legal or practical check against such abuses now exists in that Department. It may, perhaps, be difficult to provide any which shall be entirely effectual. It has occurred to the committee, that some limitations upon the amount of clerk hire might properly be provided; that it should be made the duty of all custom house officers to return to the Comptroller of the Treasury a specification of the number, names, and respective compensation, of all clerks employed by them; and giving to the accounting officers of the Treasury Department a power of revising the accounts of office expenditures, and disallowing such parts thereof as should appear to them unreasonable or improper. That all the emoluments arising from any agency, employment, or office, attached to, or dependent on, any principal office in the customs, should be included in their general annual return of emoluments and expenditures—the returns heretofore made, as it is understood, not being uniform in this respect, some of the officers including those particular emoluments in their returns, and others omitting them. In illustration of the nature and extent of these emoluments, it is to be observed that all the collectors, in the ports where there are no surveyors, and the surveyors, in those ports where there are such officers, hold a separate commission of *inspector of the revenue for the port*, in virtue of which they are entitled to certain fees. One collector, in each State, under the act of April 6th, 1802, (for repealing the internal taxes) has been authorized to prepare certain certificates to accompany spirits, wines, and teas, imported, for which they receive certain fees. Sundry collectors are agents for the marine hospital, and superintendents of light houses, for which they receive certain commissions on moneys expended by them. And whether it is within the intention of the law of the 30th of April, 1802, limiting the compensations of these officers, that such incidental emoluments should be included in that limitation, or not, it is equally proper that their annual amount should be known, and brought within the review and controlling powers of Congress.

Although the amount received by the custom house officers, for their shares of fines, penalties, and forfeitures, does not form a part of their ordinary emoluments, so as to subject this portion of them to the limitation, yet they ought, as it is conceived, to include them in their returns, and for this obvious reason, viz: that the same causes which may have much diminished the regular emoluments of those officers, may, and probably have, greatly increased the casual ones arising from this source. Another reason for requiring such returns is that of uniformity—some of the officers now including, and others omitting them.

Some regulations of this sort, designed to bring the official expenditures of the officers of the customs more immediately under the review of the Legislature, and the reasonable control of the Treasury Department, have suggested themselves to the committee, and have been incorporated into the bill, which, by order of the House, is herewith reported.

COMMITTEE ROOM, *November 19, 1811.*

SIR:

The Committee of Ways and Means, to whom has been referred the several memorials of the collectors of Norfolk, Philadelphia, and Baltimore, paying for extra compensation for past services, and for an increase of the commissions attached to their offices, for the future, and which are herewith enclosed, have directed me to request of you the following information, viz:

1st. A statement of the gross emoluments and official expenditures of the collector of *Baltimore*, from the year 1805, inclusive, to the present period.

2d. A similar statement in relation to the collectors of *Philadelphia* and *Norfolk* for the preceding quarters of the year 1811.

3d. A statement of the official expenditures of the three officers aforesaid, from the year 1807, inclusive, to the present period, noting distinctly, the nature of those expenditures, the number of clerks employed by each, with their respective salaries and compensations.

4th. Whether the *official expenditures* of the collectors (particularly that portion of them occasioned by clerk hire) may not, without inconvenience, be diminished in proportion to the corresponding diminution of the current official business and emoluments of the several officers.

5th. Whether the necessary actual duties of said officers have not, in a good measure, diminished in a corresponding proportion to the diminution of their nett emoluments.

6th. What practical checks exist against the improper expenditure of money for clerk hire and other office expenditures, and what are the general rules adopted by the Treasury Department in relation thereto.

7th. Such other information, tending to elucidate the subjects referred to the committee, as you may think proper to communicate.

I am, sir, with great respect, your obedient servant,

E. BACON.

HON. ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *December 2d, 1811.*

SIR:

I have the honor to enclose the statements of emoluments and official expenditures of certain collectors, required by your letter of 19th ultimo, so far as the same are known at the treasury.

I do not know the number and salaries of clerks employed by the collectors. No other returns are required from them by law, in that respect, than those which have been annually transmitted to Congress. The treasury has no control over, or checks against, the employment of a superfluous number of clerks by those officers—the only check provided by law being the amount of their gross emoluments, out of which they must pay their clerks, office rent, fuel, stationary, &c. The expense of clerk hire may certainly be diminished when there is a great diminution of business; but this may decrease more suddenly than it is practicable to dismiss men in your employment. It is so much the interest of the collectors to reduce their expenses, when their profits are diminished, that it is probable

that they have all done it as far as they could; but I cannot assert the fact of my own knowledge. I am of opinion that, under the restrictive laws, the personal and actual duties of the collectors have been increased, notwithstanding the diminution of business in other respects. That the three collectors, whose petitions you enclosed, have not, during the period of their services, received a compensation adequate to those services, appears to me evident. How far justice and policy may require that an additional allowance should be made to them on that account, is not a question for me to decide.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

Hon. E. BACON, *Chairman of the Committee of Ways and Means.*

12th CONGRESS.]

No. 359.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 30, 1811.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of Ezekiel Hubble, of Bridgeport, in the State of Connecticut, made the following report:

That the petitioner, on the 17th of January, 1809, at London, in the kingdom of Great Britain, purchased of William Lyman, the consul of the United States, the ship *Eliza Ann*, of New York, he acting as the agent of the owners, Joshua Jones and Edward R. Jones, of New York, trading under the firm of Joshua Jones and son, and that the said ship was transferred to the petitioner, by the said William Lyman, according to the form prescribed by law. That, after the purchase of the said ship, she sailed from London, to Cadiz, in Spain; took in, there, a cargo, principally belonging to the petitioner, and proceeded to New York, at which place she arrived on or about the 7th of June, 1809; the petitioner being at that time absent in Europe, and for some months after the arrival of the said ship in the United States; in consequence of which a register, in the name of the owner or petitioner, could not be obtained, and the ship and cargo were subjected to the payment of foreign duties.

It is also stated that a register for the said ship, according to law, has been obtained.

The object of the petitioner is to obtain a remission of so much of the duties as are above those paid by vessels of the United States.

This case, while the said ship was without a register, came within the jurisdiction of the Treasury Department, and a remission of the foreign duties might have been procured, had an application been made to that Department during the continuance of the disability incurred by the owner's not taking out a register within three days after the arrival of the said ship in the port of New York.

A new certificate of registry being obtained previous to the application of the owner to the Secretary of the Treasury for a remission of the foreign duties, put it out of the power of the latter to do so, as the remission is incidental only to the Secretary's removing a disability.

The committee, on mature consideration, are of opinion that cases like the present ought to be decided without delay, and that it is safer to confine them to the jurisdiction of the Treasury Department. Being of this opinion, they beg leave to report a bill, authorizing the Secretary of the Treasury to render the same decision, on this case, that he would have done had application been made to him previous to the removal of the disability by the petitioner.

No. 360.

[1st SESSION.]

COMPENSATION OF REVENUE OFFICERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 6TH OF JANUARY, 1812.

Mr. BACON made the following report:

The Committee of Ways and Means beg leave to submit to the House the following report on the several petitions of the collectors of the ports of Philadelphia, Baltimore, Norfolk, and Plymouth, (Massachusetts) and the naval officer of the port of Philadelphia, in correction of, and as supplementary to, their report, made in relation thereto, on the 30th of December last. [See No. 358.]

That, on a further investigation of the amount of emoluments received by those officers during the years 1808, 1809, and 1810, it appears that the nett emoluments of the collector of Philadelphia, from the 27th of August, 1808, when he entered upon his office, to the close of the year 1810, (including the half commissions paid to the estate of his predecessor) amounted to the average sum of \$3,262 02, annually; those of the collector of Baltimore, from the 13th April, 1808, when he entered on his office, to the close of the year 1810, including the half commissions as aforesaid, to the average sum of \$1,687 68, annually; those of the collector of Norfolk, from the year 1808 to the year 1810, both inclusive, including the half commissions as aforesaid, to the sum of \$921 82, annually; those of the collector of Plymouth, for the same period, to \$1,953 92, annually; and those of the naval officer of the port of Philadelphia, for the same period, to \$2,802 29, annually.

Under this view of the facts, the committee recommend to the House the adoption of the following resolution, in lieu of those recommended in their former report on this subject:

That the prayer of the several petitions of the collectors of the ports of Philadelphia, Baltimore, Norfolk, Plymouth, (Massachusetts) and of the naval officer of the port of Philadelphia, ought not to be granted.

[1st Session.]

MINT.

COMMUNICATED TO THE SENATE, JANUARY 7, 1812.

To the Senate and House of Representatives of the United States:

I lay before Congress, for their information, a report of the Director of the Mint.

JAMES MADISON.

January 7th, 1812.

MINT OF THE UNITED STATES, January 1, 1812.

SIR:

I have now the honor of laying before you a report of the operations of the mint, during the last year. With the exception of a few weeks, after the expiration of the charter of the Bank of the United States, the supply of bullion, now furnished chiefly by the other banks in this city, has never been more abundant.

From the treasurer's statement of the last year's coinage, which is herewith transmitted, it will appear that, during that period, there have been struck and issued—

In gold coins, 99,581 pieces, amounting to 497,905 dollars.

In silver coins, 1,268,824 pieces, amounting to 608,340 dollars.

In copper coins, 281,165 pieces, amounting to 2,495 dollars and 95 cents.

Making, in the whole, one million six hundred and forty-nine thousand five hundred and seventy pieces of coin, amounting to one million one hundred and eight thousand seven hundred and forty dollars and ninety-five cents.

I have, sir, the honor to be, with sentiments of the greatest respect and esteem,

Your most obedient servant,

R. PATTERSON.

A Statement of the Coins struck at the Mint of the United States, from the 1st of January to the 31st December, 1811, viz:

	GOLD COINS.		Amount in dolls. and cents.	Total.
	Half Eagles.			
Quarter ending 31st of March, - - -	16,330		81,650	
30th June, - - -	21,520		107,600	
30th September, - - -	27,450		137,250	
31st December, - - -	34,281		171,405	
99,581 pieces of gold coins, - - -	99,581			
Total amount of gold coins, - - -				497,905 00
	SILVER COINS.			
	Dimes.	Half Dollars.		
Quarter ending 31st March, - - -	-	221,253	110,626 50	
30th June, - - -	12,000	337,026	169,713 00	
30th September, - - -	53,180	380,706	195,671 00	
31st December, - - -	-	264,659	132,329 50	
1,268,824 pieces of silver coins, - - -	65,180	1,203,644		
Total amount of silver coins, - - -				608,340 000
	COPPER COINS.			
	Cents.	Half Cents.		
Quarter ending 31st March, - - -	218,025	-	2,180 25	
30th September, - - -	-	63,140	315 70

No 362.

[1st SESSION.]

PUBLIC DEPOSITES IN BANKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 13, 1812.

TREASURY DEPARTMENT, *January 8th, 1812.*

SIR:

I have the honor, in obedience to the resolution of the House of Representatives, of the 23d ultimo, to transmit a statement of the several banks in which the public moneys are now deposited, showing the greatest amount that has been deposited in each bank at any one period since the 4th day of March, 1811, and also the amount deposited in each bank on the 30th of September, 1811.

The annexed correspondence, No. 1 to 17, relates to the other subjects of inquiry embraced by the resolution of the House.

As soon as it had been ascertained that the charter of the Bank of the United States would not be renewed, a letter was addressed (No. 1) to the collectors of Boston, New York, Philadelphia, Baltimore, Norfolk, Charleston and New Orleans, directing them to cease to deposite custom house bonds for collection in the Bank of the United States, (or its branches) to withdraw those falling due after the 3d day of March, 1811, and to deposite thereafter, the bonds, in one or more State banks, which were, according to the information already received, either pointed out or left at the option of the collector. The only condition required, in the first instance, from the bank or banks thus selected, was, that they should, in their discounts, give the preference to paper offered by persons having custom house bonds to pay. This, considering the pressure expected from the dissolution of the Bank of the United States, appeared of primary importance towards facilitating and securing the collection of the revenue. There being no State Bank at Savannah, the collector of that port was only directed to cease depositing the revenue bonds in the Branch Bank of the United States.

The banks selected in conformity with that instruction, were,

- At Boston, the Union and Massachusetts Banks;
- At New York, the Manhattan Company and Mechanics' Bank;
- At Philadelphia, the Bank of Pennsylvania and Farmers' and Mechanics' Bank;
- At Baltimore, the Bank of Baltimore and the Commercial and Farmers' Bank;
- At Norfolk, the branch of the Bank of Virginia;
- At Charleston, the State Bank;
- At New Orleans, the Bank of Louisiana.

Partial deposits had previously been made in the Bank of Pennsylvania, and with the Manhattan Company, as was in a former report stated to Congress. At Norfolk and New Orleans, there was no choice, as only one bank was established in each of those two cities. The revenue bonds are divided equally, at Philadelphia, between the two banks employed there. The collectors of New York and Baltimore have been directed to deposite about two-thirds of the bonds with the Manhattan Company and the Bank of Baltimore, respectively, and the other third in the other bank employed in each place. The collector of Boston deposites indiscriminately in the Union and Massachusetts Banks, but generally to a larger amount in the first.

All those banks, with the exception of that of Norfolk, explicitly assented to the condition required, and transmitted answers similar in substance to that given by the Bank of Pennsylvania, (No. 2.) The answer of the bank at Norfolk (No. 3) was also in the affirmative, but more cautiously expressed. There being but one bank in Virginia, which must necessarily be employed, and the public deposites, compared with its capital, being inconsiderable, it was thought ineligible to ask any other conditions, and the letter (No. 6) was accordingly written.

To all the other banks, above mentioned, the letter (No. 4) was written, informing them that a monthly statement of their situation, which would be considered as confidential, and the same accommodation, in the transmission of public moneys, as had heretofore been received from the Bank of the United States, would be expected from them. From all of them, the State Bank of South Carolina excepted, an answer in the affirmative was received, similar in substance to that given by the Bank of Pennsylvania, (No. 5.) The answer of the State Bank was modified, by reason of some particular provisions in its charter. That answer, and the reply to it, are marked No. 7 and 8. If the alterations in the charter, therein alluded to, are not obtained, it may hereafter become necessary to place the public moneys collected at Charleston, in another bank.

Previous to the establishment of the Branch Bank of the United States at Washington, the Bank of Columbia had been employed in paying the dividends on the public debt, and transacting all the treasury business at the seat of Government. It had afterwards continued to receive partial deposites, arising from the sources stated in a former report; and since the dissolution of the Bank of the United States, the treasury payments have been made through that bank and that of Washington, in the manner explained in the letters No. 9 to 13.

The dividends on the public debt, formerly paid at the Bank of the United States and its branches, are now paid, at Boston, by the Union Bank; at New York, by the Manhattan Company; at Philadelphia, by the Bank of Pennsylvania; at Washington, by the Bank of Columbia; and at Charleston, by the State Bank.

The other banks in which public moneys had previously been, and continue to be, deposited, are those of Maine and Saco, in the District of Maine; Roger Williams and Newport, in the State of Rhode Island; Alexandria, in the District of Columbia; Marietta, in the State of Ohio; Kentucky, in that State; and the office of the Bank of Pennsylvania, at Pittsburg. In the three last, deposits are made by the receivers of public moneys arising from the sales of lands; in the others, by the collectors of customs of the places where they are established. The letters, No. 14 to 17, will show the manner in which the surplus revenue collected in Maine, Rhode Island, Connecticut, North Carolina, Savannah, and some other ports, is drawn in the Union Bank, the Manhattan Company, the Virginia branch, of Norfolk, and the State Bank of South Carolina. The sums deposited at Pittsburg, are, when wanted, paid at Philadelphia, by the Bank of Pennsylvania. The banks of Marietta and Kentucky had, heretofore, agreed to pay, in one of the Atlantic banks, the moneys deposited with them, and for which the treasury could not draw upon them within four months after the date of such deposits. They have found it, lately, difficult to effect those payments within that time, and by a late agreement with the Bank of Kentucky, the time has been extended to six months.

No difficulty has been experienced in the transmission of public moneys, and, with the exception of Norfolk and Savannah, the revenue has generally been as well collected as heretofore.

With respect to the late Bank of the United States, the loan was repaid at the times and in the manner which appeared best calculated to produce the least inconvenience to the public, and to the banks now employed by Government. The deposits were gradually withdrawn, and the account with that institution and its branches finally closed, on the 2d of September last, with the exception of a balance of about 70,000 dollars in the New Orleans branch, for the whole of which a credit has, several months ago, been given to the agents of the War and Navy Departments, but which has not yet been made use of by them.

It had been suggested, in a report of January 23, 1811, that some doubt might exist respecting the obligation of the United States to receive the notes of the late Bank of the United States in payment of duties, after its dissolution. No legislative provision having been made on that subject, the collectors and receivers of public moneys were nevertheless directed not to receive any which the bank refused to receive from Government, or for which such collectors could not conveniently receive payment. The circuit court of Virginia has, however, lately decided, that, under the existing law, all the notes of that bank, and wherever payable, were still, every where, a legal tender in payment of duties. The necessity of an immediate repeal of that part of the law which is still considered as being in force, is respectfully submitted; as a very considerable amount of outstanding notes of New Orleans, Savannah, and Charleston, will otherwise be forced on the treasury, and cannot be realized without great risk, and the expense of transporting specie.

I have the honor to be, with great respect, Sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

Statement of the several banks in which the public money is deposited; showing the greatest amount in each bank at any one period, since the 4th March, 1811; and, also, the amount deposited in each bank on the 30th September, 1811.

Names of Banks.	Where situated.	Greatest amount at any one period since 4th March, 1811.		Amount on 30th September, 1811.
		Amount.	Period.

(a.) A credit in favor of the agents of the War and Navy Departments for the whole of this sum has been given for several months, but has not yet been made use of by them.

TREASURY DEPARTMENT, December 30, 1811.

No. 1.

TREASURY DEPARTMENT, February 25, 1811.

SIR:

It being now settled that the charter of the Bank of the United States will not be renewed, and it being necessary to discontinue the agency of that bank in transacting the treasury business, after its corporate character shall have ceased, I have to request your immediate attention to the following preliminary arrangements:

1. From the receipt of this letter, you will cease to deposite custom house bonds for collection in the Bank of the United States, and you will withdraw all such bonds, falling due after the third day of March next, as have been already deposited therein for collection.

2. You will deposite, for collection, all bonds becoming due after the third day of March next, in such of the State banks at Philadelphia as shall appear to you best adapted for effecting such collection punctually, effectually, and securely. The only condition to be previously required of such bank is the following: that, in making their discounts, other things being equal, they shall consider it as a rule, that paper offered by persons having custom

house bonds to pay, and intended to be applied to such payments, shall have the preference over all other paper offered for discount. This is not intended to take from the directors the privilege of judging as to the sufficiency of the drawers or endorsers of paper thus offered for discount, but only that, when such sufficiency is not doubted, the first facilities of the bank shall be given to those who have payments to make to the treasury. If the state of commercial credit, and the pressure on the banks, be such that, in your opinion, a division of those deposits between two banks will have a tendency more effectually to assist and support those interests, so important to the treasury, you are at liberty to make such division.

It is to be distinctly communicated to such bank or banks as you may select, that the arrangement now made is temporary, and that it is not, in any wise, to be taken as a pledge that the public deposits will be permanently continued with them.

3. The moneys collected are to be paid over weekly, as heretofore, to the credit of the Treasurer of the United States, with whom, of course, the bank or banks you may select, must open an account. Instructions, as to the mode of keeping this account, and transmitting statements of it to the treasury, will be given to them by this Department.

4. As soon as you shall have made your arrangements under this instruction, you will inform me, with precision, what they are, that the corresponding measures may be regularly and promptly taken here.

I am, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

JOHN STEELE, Esq. *Collector, Philadelphia.*

P. S. On equal terms, I would prefer employing the Pennsylvania Bank and the Farmers and Mechanics' Bank.

No. 2.

BANK OF PENNSYLVANIA, *March 2d, 1811.*

SIR:

I had the honor of laying before the directors of this institution your letter of yesterday, respecting the agency of this bank, in conjunction with the Farmers and Mechanics' Bank, in the collection of the revenue at this port.

I am directed to enclose you a copy of the resolution entered into by them, accepting of the agency on the terms proposed.

I am, sir, very respectfully, your obedient servant,

JOSEPH P. NORRIS, *P. B. P.*

JOHN STEELE, Esquire.

At a meeting of the President and Directors of the Bank of Pennsylvania, on Saturday, the 2d March, 1811, a communication, under date of the 1st instant, from John Steele, Esquire, collector of the port of Philadelphia, addressed to the President of this Board, being read, and the subject thereof duly considered, it is

Resolved, That the agency proposed to this bank, of transacting a part of the business of the Treasury Department of the United States, be accepted; and, in compliance with the stipulation made by the collector, it is understood that the persons having custom house bonds to pay at this bank will be accommodated with discounts, under the usual precautions and sufficiency of the paper, intending thereby to give the first facilities of the bank to the collection of the revenue, and to those who have payments to make to the treasury.

The President is requested to make a reply to the communication from the collector, furnishing a copy of the above resolution.

Extract from the minutes.

JONATHAN SMITH, *Cashier.*

No. 3.

The President laid before the Board of Directors a communication from the Secretary of the Treasury Department, to Larkin Smith, Esquire, collector of the port of Norfolk, on the subject of making arrangements with this office for opening an account, and depositing custom house bonds for collection: It is, therefore,

Resolved, unanimously, That they will, at all times, afford to the Government of the United States, and its debtors, every facility and aid in their power, consistent with the interest of the institution committed to their care; but will not pledge themselves for any specific arrangement on the subject of discounts.

A true extract from the proceedings of the Board of Directors of the Office of Discount and Deposite, Bank of Virginia, at Norfolk, 5th March, 1811.

THOMAS WILLIAMSON, *Cashier.*

No. 4.

TREASURY DEPARTMENT, *March 8, 1811.*

SIR:

The collector of Philadelphia having communicated to me the assent of the directors of your institution, to the propositions made by him to you for receiving the public deposits, I have now to observe, that, as the treasurer can keep no bank book, it is necessary that a weekly statement of his account be sent to him from the bank, crediting him with all moneys received on his account, (and specifying from whom, and generally on what account) and charging him with all bills paid. The bills are to be cancelled and returned at the same time; and a duplicate of the same account is to be also weekly sent to the Secretary of the Treasury.

From all the banks with which the public moneys will hereafter be deposited, the same statement, and, as far as practicable, the same accommodations will be expected, as have heretofore been received from the Bank of the United States.

A form of the statement of the situation of the bank, to be sent monthly to the Secretary of the Treasury, is annexed at the foot of this letter; but the general items therein inserted, are not intended to exclude any greater number of particulars which the bank may be in the habit of entering in statements of this nature. The statement may be put under double cover, the inner one marked "private," and will be considered confidential.

With respect to accommodations, I allude at this time only to the transmission of public moneys, which cannot be conveniently effected, unless some concert exists between the banks with which public deposits will be made in the several seaports. On that subject it must be agreed by the Bank of Pennsylvania, to give credit to the Treasurer of the United States, when the public service may require it, for the amount of such drafts as he may be directed to draw in their favor on the other banks doing the public business at the several places where branches of the Bank of the United States had been established. The names of these banks, and other details, will be hereafter given. But, in order to pave the way for a permanent arrangement, it is necessary to ascertain whether the Bank of Pennsylvania can conveniently transact the public business on that principle, and an early answer on that subject will be eligible. It is proper to add, that it will not be expected that the bank should thus take drafts on Norfolk, Charleston, Savannah, and New Orleans, beyond a limited and very moderate annual amount. But it would be an additional inducement to make your institution a permanent depository of the public moneys, if they would also agree to take annually, in the same manner, a certain sum in drafts on the banks of Chillicothe and Kentucky.

I have the honor to be, sir, your obedient servant,

ALBERT GALLATIN.

JOSEPH P. NORRIS, Esq. *President of the Bank of Pennsylvania.*

No. 5.

BANK OF PENNSYLVANIA, *March 13th*, 1811.

SIR:

I had the honor of receiving your letter of the 5th instant, and of laying the same before the directors of this institution. They have directed me to inform you, they accept the terms therein proposed, as per resolution, copy of which is enclosed.

As soon as we are notified of the banks transacting the public business, immediate measures will be taken to open a correspondence with them, in order to facilitate the fiscal arrangements of the Government.

Our present intercourse with banks in the States of Kentucky and Ohio enable us to comply with your wishes in taking drafts on Kentucky and Chillicothe.

I have the honor to be, very respectfully, sir, your obedient servant,

JOSEPH P. NORRIS, *P. B. P.*Honorable ALBERT GALLATIN, *Secretary of the Treasury.*

A communication from Albert Gallatin, Esquire, Secretary of the Treasury, addressed to the President of this Board, being read, by which it appears that, in order to a permanent arrangement for transacting the public business, and making this institution the depository of the public moneys, it is necessary to have an assurance that such accommodations and facilities, as the public service requires, will be afforded, it is, therefore,

Resolved, That the President be requested to make a respectful reply to the said communication, expressing the disposition and willingness of this Board to comply with the requisitions now made, and which hereafter may be made, by the Secretary of the Treasury, so far as the same is within the ability and resources of the bank.

Extract from the minutes.

JOSEPH P. NORRIS, *P. B. P.*BANK OF PENNSYLVANIA, *March 13th*, 1811.

No. 6.

TREASURY DEPARTMENT, *March 11*, 1811.

SIR:

The collector of Norfolk having communicated to me a resolution of the Board of Directors of the office of discount and deposite of the Bank of Virginia, at Norfolk, of the 5th instant, which I understand to imply a consent on their part to receive the public deposites, I beg leave to request, as the treasurer cannot keep a bank book with your institution, that you will direct your cashier to transmit to him, weekly, a statement of his account, crediting all sums received (specifying from whom, and generally on what account) and charging all bills paid. The bills are to be cancelled and transmitted with the statement to the treasurer; and I have also to request that a copy of the statement may be, at the same time, transmitted to the Secretary of the Treasury.

I have the honor to be, sir, your obedient servant,

ALBERT GALLATIN.

The President of the Office of Discount and Deposite of the Bank of Virginia, at Norfolk.

No. 7.

STATE BANK, CHARLESTON, S. C., *April 5*, 1811.

SIR:

On the first instant I had the honor of acknowledging the receipt of your two letters of the 13th and 19th ult., since which I have submitted them to the Board of Directors, who have passed the resolution I now enclose.

A desire and intention, expressed some years since, by the principal stockholders, to establish a credit with the Manhattan Bank of New York, and to enter into mutual arrangements so as to give credit to the post notes of the two banks, not meeting with the approbation of the Legislature, induced that body to impose the last enacting clause in the printed copy of the charter of our bank, which I also herewith transmit, restricting us from giving credit to any bank or banks established in any of our sister States. But the Board does not see that, in the arrangements which you have stated, there would be any violation of this charter, as it is not their intention to open any account with either of the Northern banks, but merely to take the drafts of the Government, payable at sight, which the bank must dispose of in the best manner possible; and it will be obvious to you, that the Government must always consider itself responsible for these drafts until they shall be paid, even if they are not presented for some time, and a failure of the Northern bank should, in the mean time, take place. This being understood, it cannot be said that we give any credit to a Northern bank, or that we violate either the letter or the spirit of our charter.

I also deem it proper to state that there is no doubt but that, if the clause alluded to shall hereafter be found to interfere with any arrangements which may be necessary to the accommodation of the Government, or to the benefit of the bank, it will, on a representation to the Legislature, at its next session, be repealed, as the State holds three-eighths of the capital of the bank.

I remain, very respectfully, sir, your obedient servant,

FELIX WARLEY, *President.*

The Honorable the Secretary of the Treasury of the United States.

STATE BANK, *Charleston, S. C., April 5, 1811.*

The committee to whom were referred the letters of the Honorable Albert Gallatin, of the 13th and 19th ultimo, respectfully report:

That they have taken the subject-matter of the said letters into their consideration, and recommend the adoption of the following resolutions, viz:

Resolved, That it is the earnest wish and desire of the directors of this bank to enter into all such arrangements and accommodations as will meet the views of the honorable the Secretary of the Treasury of the United States, and of the Government thereof, provided the same do not violate, and are not repugnant to, the charter of this bank.

Resolved, further, That the President of this bank do transmit a copy of the aforesaid resolution, together with a printed copy of the act of incorporation, to the honorable the Secretary of the Treasury of the United States.

By order of the Board.

FELIX WARLEY, *President.*

No. 8.

TREASURY DEPARTMENT, *April 15, 1811.*

SIR:

I had the honor to receive your letter of the 5th instant, and regret that the provisions of the charter of the State Bank should preclude that institution from giving to the treasury that accommodation in the transmission of public moneys which may, at times, be indispensably necessary. On comparing, however, the probable receipts at Charleston for this year, with the probable amount of demands against the treasury, payable at the same place, I think it improbable that the expenditure should exceed the receipts; and as it is only in that case that it would become necessary to provide for the deficiency by giving to the State Bank drafts on other banks, it is hoped that no inconvenience will, for the present, arise from the provision in its charter which forbids giving credit to banks in other States. With a view to permanent arrangements for the ensuing years, I would suggest the propriety of obtaining from the Legislature a modification in that provision, the object of which I do not understand, and which would certainly impede the operations of the bank in its relation with the General Government.

In the mean while, presuming that the resolution of the Board is, in every other respect, intended as an acceptance of the proposals of the treasury, and that the requested statements will be transmitted, the collector will be instructed to continue his public deposits in the State Bank.

I have the honor to be, sir, your obedient servant,

ALBERT GALLATIN.

FELIX WARLEY, Esq., *President of the State Bank, Charleston, South Carolina.*

No. 9.

TREASURY DEPARTMENT, *March 28, 1811.*

SIR:

It having been determined that a portion of the treasury payments should be made through the medium of the Bank of Washington, I have now to state the principles on which it is expected this business will be transacted by the bank.

1. The bank to receive such sums as may be offered by individuals who have payments to make into the treasury, and to pass the same to the credit of the Treasurer of the United States.

2. As the payments thus made into the bank will fall far short of the payments that will be required to be made by the bank, on account of the treasury, the sums that may be necessary to meet these last payments will be supplied to the bank by bills on Baltimore, Philadelphia, New York, and Boston, which bills will be regulated, as far as practicable, by the mutual convenience of the treasury in furnishing funds, and the bank in receiving them at each of those places.

3. The payments by the bank will be made on treasury, war, or navy warrants, directed to the bank by the treasurer, or on drafts drawn by him. The payment is, of course, always to be made in specie, if required by the holder of the warrant or draft.

4. On Monday of each week a copy of the treasurer's account with the bank, for the preceding week, is to be sent to the Secretary of the Treasury; and if the treasurer shall find it more convenient to receive a statement of his account, in that way, than to keep a bank book, the bank will also furnish him with a similar copy.

5. At the end of every month, a statement of the situation of the bank, made out agreeably to the annexed form, is to be sent to the Secretary of the Treasury. It may be enclosed in a double cover, the inner one marked "private," and will be considered as confidential.

The above are the most material principles which regulated the connexion between the treasury and the late office of discount and deposite at the seat of Government, and which it is desirable should continue to be maintained with the banks transacting the public business here. The assent of your direction to them will be necessary, and ought to be communicated to me as early as practicable. I shall, in the mean time, presuming, from the resolution of the Board, already passed upon the subject, that their assent will be given, direct the treasurer, on the first day of the ensuing month, to place in your bank bills on Baltimore and Philadelphia for twenty thousand dollars, to form the first deposite on which the treasury payments will commence.

I am, &c.

ALBERT GALLATIN.

DANIEL CARROLL, Esq., *President of the Bank of Washington.*

No. 10.

WASHINGTON, *April 3, 1811.*

SIR:

Your letter of the 28th of March has been before the directors of the Bank of Washington. They agree to the principles contained in that letter, relying always that we shall be treated with the same liberality extended to neighboring institutions.

I have the honor, &c.

DANIEL CARROLL, *of Duddington, President.*

The Honorable ALBERT GALLATIN.

No. 11.

TREASURY DEPARTMENT, *March 28, 1811.*

SIR:

I have thought it proper to state the following as the principles on which it is expected that the treasury business will be conducted by the Bank of Columbia, and to request that the same may be submitted to the directors, for their approbation, which, when given, you will please to communicate to me.

1st. The bank to continue to receive, as heretofore, such sums as may be offered by individuals, who have payments to make into the treasury, and to pass the same to the credit of the Treasurer of the United States.

2d. The bank to receive bills, drawn by the treasurer on Baltimore, Philadelphia, New York, or Boston, (regulated by the state of the funds, at the command of the treasury at each of those places, but accommodated, also, as far as practicable, to the convenience of the bank) for such sums as may be necessary to supply the bank with the means of meeting the payments of the treasury. Occasional drafts for the collecting in of the revenue in Virginia, will be furnished as heretofore.

3d. The payments of treasury, war, or navy warrants, directed by the treasurer to the Bank of Columbia, and of drafts drawn by him on the bank, are to be made in specie, whenever the holder shall require.

4th. On Monday of each week, a copy of the treasurer's account for the preceding week, is to be sent to the Secretary of the Treasury.

5th. At the end of every month, a statement of the situation of the bank, made out agreeably to the annexed form, is to be sent to the Secretary of the Treasury. It may be enclosed in a double cover, the inner one marked 'private,' and will be considered as confidential.

6th. The dividends on the public debt, payable at the treasury, will be paid through the medium of the Bank of Columbia. The Register of the Treasury has been directed to place the abstracts for the quarter ending on the 31st instant, in the Bank of Columbia; and the cashier of the late office of discount and deposite, at this place, will be directed to pay to the cashier of the Bank of Columbia, twenty thousand dollars, to enable him to make these payments. The abstracts of dividends, as well those returned unclaimed, from the loan offices, as those for stock standing on the treasury books, for past periods, which have, heretofore, lain in the office of discount and deposite, for payment, will be placed in the Bank of Columbia, as soon as the accounts of the cashier of the office of discount and deposite can be made out and settled at the treasury. For all sums furnished to the cashier of the Bank of Columbia, for the payment of dividends, he will be charged on the books of the treasury, and will render his accounts for the payment at such times, and in such manner, as the Comptroller of the Treasury shall prescribe. The dividends being payable, either to the stockholders, in person, or to their attorneys, and many standing powers for this purpose being now lodged in the late office of discount and deposite, they have been directed to be delivered up for the purpose of being deposited in the Bank of Columbia. But, as it may happen that they will not be ready for delivery by the first day of the ensuing month, you will direct your cashier, until the powers themselves are received, to receive a certificate of the existence and extent of such powers, from the late office of discount and deposite, as sufficient authority on which to make the payments. It is proper to mention, here, that powers given to the president and directors of the Bank of the United States, or their cashier, or any of their officers, *in their official characters*, are considered as being no longer of any validity. If any future question shall arise as to the validity of powers, the Comptroller of the Treasury is to be applied to for a decision.

To avoid any confusion in the accounts between the treasury and the Bank of Columbia, which might arise from the establishment by the bank of an office of pay and deposite in the city of Washington, it is to be understood that the whole of the treasury transactions with the bank will be conducted through the medium of this establishment, in Washington, and that no account with the treasurer is to be kept at the bank in Georgetown. Bills drawn by the treasurer, in favor of the bank, will be in the name of their cashier, for which credit is to be given to him in Washington; and the warrants and drafts of the treasurer will be all directed to, and payable only in, Washington. It will follow that the balance now to the credit of the treasurer, in the Bank of Columbia, is to stand, on the first of April, to his credit in Washington, his account in the bank at Georgetown being closed from that time.

I am, &c.

ALBERT GALLATIN.

JOHN MASON, Esqr. *President of the Bank of Columbia.*

No. 12.

BANK OF COLUMBIA, *April 5, 1811.*

SIR:

The letter you did me the honor to address me on the 28th ult., on the subject of the treasury deposites, has been submitted to the first board of directors convened, after it came to my hands.

I am instructed, sir, to transmit to you the enclosed resolution, and to assure you of the readiness with which this institution will, at all times, do whatever may on it depend, to facilitate the administration of the funds of the Government, and to prove to you that the confidence you have been pleased to place in it has not been abused.

With very great respect, I have the honor to be,

Sir, your most obedient and humble servant,

JOHN MASON, *President.*

The Hon. ALBERT GALLATIN, *Secretary of the Treasury.*

BANK OF COLUMBIA.

At a Board of Directors, held on Thursday, the 4th of April, a letter from the honorable the Secretary of the Treasury, dated the 28th of March, and addressed to the President of this institution, stating the principles on which it was expected that the treasury business will be conducted, by the Bank of Columbia, was laid before the Board, and the same having been read and considered,

Resolved, That all and every of the terms and conditions prescribed by the Secretary of the Treasury, in the aforesaid letter, be fully accepted; and that the president and cashier take the requisite measures to comply with the same, and to carry into execution the wishes of the Secretary in relation thereto.

Test, WILLIAM WHANN, *Cashier.*

No. 13.

TREASURY DEPARTMENT, *March 28, 1811.*

SIR:

It is proper to inform you, that, from the end of the present month, the late office of discount and deposite in this city will cease to be employed as the medium of the treasury payments and receipts at the seat of Government. Commencing on the first of April, the Bank of Washington and the Bank of Columbia will be employed for that purpose, and the arrangement in relation to them, so far as relates to your office, is as follows:

Persons who have moneys to pay into the treasury, in this place, may pay into either bank, at their option. You will continue, as heretofore, to give your check on the back of each warrant, and will direct it as the holder shall choose, to the Bank of Washington, or the Bank of Columbia. As the Bank of Columbia have established an office of pay and deposite in the city of Washington, through which all the treasury business with that bank will pass, and where your account will be kept, you will direct your checks to the "Bank of Columbia in Washington." They will not be payable in Georgetown.

As the new mode of keeping the accounts of your office, which will be put in operation on the 1st day of April next, will supersede the necessity of that distinction which has heretofore been made in the payment of treasury warrants, and those from the War and Navy Departments, and as the use of checks, as distinguished from bills, will no longer be necessary, you will be pleased, commencing on that day, to discontinue their use. All your payments will then be made, either by bills registered in the Register's office, where the payments are to be made at distant places, or by sending the warrants themselves, for such payments as are to be made here, with your direction on the back, to the Bank of Washington, or Bank of Columbia.

Treasury warrants, which are to be paid by bill, will contain the direction on the face of the warrant, and all such warrants will be directed to be sent in to you immediately, from the Register's office. War and Navy warrants, which are to be paid by bill, are to be sent up to my office, and the direction will be given on the warrant itself.

I am, &c.

ALBERT GALLATIN.

The TREASURER of the *United States*.

No. 14.

TREASURY DEPARTMENT, *March 5, 1811.*

SIR:

The Treasurer of the United States has been this day directed to draw bills in your favor, on the

Maine Bank, for	-	-	-	-	-	-	-	-	\$50,000
Saco Bank, for	-	-	-	-	-	-	-	-	25,000
									<u>\$75,000</u>

By an arrangement with those banks, they are bound to place the amount of bills, drawn as above, in Boston, within sixty days from the time when they are presented for payment. You are therefore requested to accept a compliance with those terms, as good payment of these bills, or of any similar bills which may hereafter be placed in your institution. But, in the mean time, it is necessary that the amount should appear in your account with the treasurer, to his credit, from the time when you receive the bills from him. Care will always be taken, that his drafts shall be so regulated, that no actual advance of funds by the Union Bank shall take place.

I am, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

GEORGE BURROUGHS, Esqr. *Cashier of the Union Bank, Boston.*

No. 15.

TREASURY DEPARTMENT, *March 5, 1811.*

SIR:

The Treasurer has been, this day, directed to draw bills in favor of your institution, as follows, viz:

On the collector of New Haven, for	-	-	-	-	-	-	-	-	\$50,000
Do. New London, -	-	-	-	-	-	-	-	-	6,000
Do. Fairfield, -	-	-	-	-	-	-	-	-	4,000
Do. Bristol, Rhode Island,	-	-	-	-	-	-	-	-	35,000
Roger Williams Bank, Providence, for	-	-	-	-	-	-	-	-	45,000
Newport bank, -	-	-	-	-	-	-	-	-	30,000
									<u>\$170,000</u>

By an agreement with the two abovementioned banks, they are to place the amount of the bills drawn on them in your hands, within sixty days after the bills are presented.

The banks in New Haven and New London make remittances for the collectors in the same way, viz: in sixty days.

Drafts on the collector of Bristol have been usually negotiated through the banks in Providence, and it is desirable that the present bill should take the same course, as a draft of specie might produce pressure and inconvenience.

As it is some time since similar drafts were furnished to your institution, I have thought it necessary to remind you of the mode in which their payment will be effected.

I am, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HENRY REMSEN, Esq. *President Manhattan Company, New York.*

No. 16.

TREASURY DEPARTMENT, *May 2, 1811.*

SIR:

For the purpose of bringing into the service of the treasury the public moneys collected at several of the small ports in Virginia and North Carolina, near Norfolk, bills have heretofore been drawn by the treasurer upon the collectors of those ports, and sent to the cashier of the Office of Discount and Deposit of the United States' Bank at Norfolk, for sale. A credit has been authorized, and they have usually been disposed of without delay. Notes, at the terms of credit allowed, are taken from the purchasers, with endorsers, to make them perfectly safe.

It is desirable that the same facilities should be afforded by the bank now transacting the public business at Norfolk; and I will thank you to inform me whether the treasury will receive them from your institution.

It is proper to mention, that, although the bank is not actually in cash for these bills, till the notes given for their purchase are paid, yet, to accommodate the treasury accounts, it is necessary that the treasurer should be credited for them as soon as they are received. But care will always be taken so to regulate the drafts of the treasurer on the bank, that no payment by the bank, on account of the bills on collectors, which they may have thus received, will ever be required till the money has been actually received by the bank for them. A note of a single line, at the foot of the treasurer's weekly account, stating the amount, either of bills on hand, unsold, or of notes for bills remaining unpaid, will always afford the necessary indication upon this point, and will be duly attended to.

In disposing of the bills, it is expected that the bank will exercise a sound discretion as to the makers and endorsers of the notes taken in payment for them, but the United States will remain responsible for any ultimate loss.

The notes are not to be renewed after the credit first given has expired. If they are not then paid, the amount will be refunded to the bank, and the United States will pursue the necessary measures for recovering the sum due from the makers and endorsers of the notes.

The ports on which the treasurer will occasionally draw, in pursuance of this arrangement, will be Folly Landing, Cherry Stone, and East River, in Virginia; Camden, Edenton, Plymouth, Washington, and Newbern, North Carolina. The terms of credit heretofore allowed, have been, for bills on East River, Camden, and Edenton, sixty days, and for the others, ninety days.

I have the honor to be, sir, your obedient servant,

ALBERT GALLATIN.

RICHARD E. LEE, Esq.

President of the Office of Discount and Deposit of the Bank of Virginia, Norfolk.

No. 17.

TREASURY DEPARTMENT, *August 2, 1811.*

SIR:

I have directed the Treasurer to draw a bill, in favor of your cashier, on the collector of Savannah, for twenty-five thousand dollars, for which you will obtain payment, either by sending to Savannah for the amount, or in any other mode that shall be most convenient to your institution. As this accommodation, in relation to the revenue collected at Savannah, is the only one, in relation to the transmission of public moneys, demanded by the treasury from the State Bank, I shall expect it to be continued; and that the bank will, from time to time, as the public moneys accumulate at Savannah, and as it may become necessary to draw for them in their favor, take the necessary measures, at their own expense, of obtaining the payment of such drafts from thence.

I am, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

FELIX WARLEY, Esq. *President of the State Bank, Charleston.*

12th CONGRESS.]

No. 363.

[1st SESSION.]

INCREASE OF REVENUE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 20, 1812.

COMMITTEE ROOM, *December 9th, 1811.*

SIR:

In your annual report, prepared in obedience to the act supplementary to the act, entitled "An act to establish the Treasury Department," and transmitted to the House of Representatives on the 22d ultimo, it is stated,

1st. That, to place the financial system of the United States on a solid foundation, it requires the aid of a revenue, sufficient, at least, to defray the ordinary expenses of Government, and to pay the interest on the public debt, including that on new loans which may be authorized.

That the expenses of the year 1812, calculated on the existing state of affairs, and including the interest on the public debt, will amount to - \$9,400,000 00
That the whole amount of actual receipts into the treasury, during the year 1812, may be estimated at - 8,200,000 00

Leaving a deficiency [which it is proposed to supply by authorizing a loan] of - 1,200,000 00
And that an authority to borrow a sum, equal to that which will be reimbursed of the principal of the public debt, during that year, will be necessary, amounting to not less than - 2,135,318 41

Making the whole sum, which it is proposed should be provided for by loan, for that year, - \$3,335,318 41

Under this view of the subject, the Committee of Ways and Means have instructed me to inquire of you, whether, according to the principle first above stated, it does not become necessary to provide "a fixed revenue," to be received during the year 1812, equal as well to the estimated expenses of that year, and amounting, as above stated, to 9,400,000 dollars, as also to the interest which will arise on the proposed loan of 1,200,000 dollars; or, otherwise, whether it is proposed to provide for the payment of such interest out of the money in the treasury at the commencement of that year, or from any other source?

2d. It is stated in your report, "that a fixed revenue of about nine millions of dollars is necessary, under the existing circumstances of the United States; and that the same amount would be necessary, and, with the aid of loans, will, in your opinion, be sufficient, in case of war."

In reference to this state of things, the Committee wish you to state, whether, as, in the event of war, increased loans will undoubtedly be required, it will not be necessary to provide an additional and gradually increasing revenue, to pay the interest on such loans?

3d. It is stated in your report, "that the permanent revenue, or annual receipts, after the year 1812, (calculated on the existing state of affairs) together with an addition of 50 per cent. on the present amount of duties, may be estimated at nine millions of dollars; and that, should any deficiency arise, in the event of war, it may be supplied, without difficulty, by a further increase of duties, by a restoration of that on salt, and by a proper selection of moderate internal taxes."

The Committee request that you would favor them with the best opinion which you are able to form (calculated on the event of war) of the probable amount of the receipts from duties; a specification of the increase of duties which you would think practicable and advisable; an estimate of the amount of that on salt; and such a selection of moderate internal taxes as you would recommend, with the probable expense of collection, and the amount of nett revenue estimated to arise therefrom.

4th. The Committee request that you would furnish them, in connexion with your replies to the preceding inquiries, with an estimate of ways and means, (calculated on the event of war) which will provide a revenue sufficient to meet the ordinary expenses of Government, and provide for the legal reimbursement and interest of the public debt, including the interest on new loans, to the amount at least of ten millions of dollars per annum, accompanied with such a scheme for the reimbursement of the principal of the new loans as you should deem expedient, together with such opinions as you may have formed respecting the terms on which such loans may probably be obtained; also, such further views or information, connected with or touching the foregoing objects of inquiry, as you may deem necessary and expedient.

With great respect, I have the honor to be, your obedient servant,

E. BACON.

Honorable ALBERT GALLATIN, *Secretary of the Treasury.*TREASURY DEPARTMENT, *January 10th, 1812.*

SIR:

In answer to the first inquiry of the Committee of Ways and Means, relative to the interest arising on the proposed loan of 1,200,000 dollars, necessary to supply the deficiency in the receipts of the year 1812, I beg leave to observe that that item was not included amongst the expenses of that year, because, the estimate being made with reference to the expenses alone which had previously been authorized by law, and a considerable proportion of those

on account of the public debt falling on the last day of the year, it would not have been necessary, in that view of the subject, to borrow that sum previous to that day, and the interest would not, therefore, have become a charge till the year 1813.

With respect to the second inquiry of the Committee, it was certainly contemplated, in conformity with the recommendation of the President, whose expressions were adopted in the report, "to raise a revenue sufficient, at least, to defray the ordinary expenses of Government, and to pay the interest on the public debt, including that on new loans which may be authorized." The sum of about nine millions of dollars was assumed as answering that description for the present, and the expression of "fixed revenue," which had been used in reference to existing circumstances, was inadvertently applied to the case of war. It will undoubtedly be proper, as remarked by the Committee, to provide, annually, an additional and gradually increasing revenue, sufficient to pay the interest on the loans required in the event of war. If, therefore, the loan for the present year will, according to the suggestion of the Committee, amount to ten millions of dollars, the receipts into the Treasury, to be provided for the year 1813, should, on those data, amount to about 9,600,000 dollars.

The Committee ask, in the next place, the best opinion which I am able to form of the probable amount of receipts from duties on merchandise, in the event of war.

As that amount will depend on the extent of the commerce between the United States and nations at peace with them, and on the numbers of the captures respectively made by our own privateers, and by the enemy, it is a matter of conjecture, and not a subject of calculation: for which reason it was stated in the report, that that amount could not at present be determined. Considering the rigorous restrictions laid by France on the commerce of the United States, with her own dominions and other countries under her influence, the dangers to which our commerce with the Baltic and with China will be exposed, the relations of England with Portugal and with Spain, and also that no inconsiderable part of the captures made by our privateers will be sent into foreign ports, a great defalcation in the receipts on duties on imported merchandise must be expected. The amount, under existing laws and circumstances, has, from correct data, been stated in the annual report at six millions of dollars. It would, in my opinion, be unsafe, in an estimate of ways and means, intended to be relied on with certainty, to calculate, in the event of a war, on more than 2,500,000 dollars, at the present rate of duties.

To the next inquiry of the Committee, respecting the increase of those duties which is thought practicable and advisable, it is answered, without hesitation, that the rate of duties may, in the event of war, be doubled, without danger or inconvenience. There will, in such an event, be less danger of smuggling, at that rate, than there is now, with the existing duties. With that increase, the duties will still be much less, on an average, than those paid on importations in England, France, and most other countries. And they will be collected with more ease to Government, and less inconvenience to the People, than could be devised, to the same amount, in any other manner.

A duty on imported salt might now be calculated on at least 3,500,000 bushels; but, in time of war, cannot be estimated on more than two millions of bushels, producing, at the rate of 20 cents per bushel, 400,000 dollars.

The duties on tonnage and imported merchandise, including the former duty on salt, and doubling the rate of all the others, would, according to that estimate, amount to

To which adding the proceeds of the sales of public lands, estimated, as by the annual report, at - 600,000

Makes an aggregate of	6,000,000
And leaves a deficiency of	3,600,000

In order to complete the *nett* revenue, wanted for the service of 1813, of

\$9,600,000

On the basis of annual loans of ten millions of dollars, during the continuance of the war, (which is the sum assumed by the committee, and which, considering the expenses already voted by Congress, is not more than will be wanted) and estimating at the lowest rate the interest on the loan of 1813, the deficiency for 1814, to be provided for by other resources, will amount to 4,200,000 dollars. The expenses of assessment and collection, and incidental losses, on the internal taxes, from the proceeds of which this deficiency must be supplied, may be estimated at 15 per cent. In order to produce a nett revenue of 4,200,000 dollars, the gross amount of taxes must therefore be near five millions of dollars. As the taxes, which may be organized during the present session of Congress, will not become due till the ensuing year, and as it is sufficiently ascertained, from universal experience, that taxes will not produce their full nominal amount the first year they are in operation, it may be relied on that a gross amount of five millions, intended to produce a nett revenue of 4,200,000 dollars, will not yield that sum till the year 1814, nor produce, in 1813, more than the required sum of 3,600,000 dollars. Five millions of dollars will, therefore, be assumed as the gross amount of taxes (including the expenses of assessment and collection, and the incidental losses) necessary to be raised at this time. That sum is calculated to cover the interest on the loans of ten millions a year, wanted for the service of the years 1812 and 1813, leaving the selection of the additional taxes, which may thereafter be necessary to provide for the interest of subsequent loans, to be made according to the experience which will be afforded by those two years.

Before I proceed to answer the inquiry of the committee, respecting a selection of the internal taxes now necessary, permit me to observe, that it was stated in the annual report of December 10, 1808, that "no internal taxes, either direct or indirect, were contemplated, even in the case of hostilities carried against the two great belligerent Powers"—an assertion which renders it necessary to show that the prospect then held out was not deceptive, and why it has not been realized.

The balance in the treasury amounted, at that time to near fourteen millions of dollars; but, aware that that surplus would, in a short time, be expended, and having stated that the revenue was daily decreasing, it was, in the same report, proposed "that all the existing duties should be doubled on importations subsequent to the first day of January, 1809." As the nett revenues accrued from customs during the three years, 1809, 1810, and 1811, has, without any increase of duties, exceeded twenty-six millions of dollars, it follows that, if the measure, then submitted, had been adopted, we should, after making a large deduction for any supposed diminution of consumption arising from the proposed increase, have had, at this time, about twenty millions of dollars on hand—a sum greater than the nett amount of the proposed internal taxes for four years.

In proportion as the ability to borrow is diminished, the necessity of resorting to taxation is increased. It is, therefore, also proper to observe, that, at that time, the subject of the renewal of the charter of the Bank of the United States had been referred by the Senate to the Secretary of the Treasury; nor had any symptom appeared, from which its absolute dissolution, without any substitute, could have then been anticipated. The renewal, in some shape, and on a more extensive scale, was confidently relied on; and, accordingly, in the report made during the same session, to the Senate, the propriety of increasing the capital of the bank to thirty millions of dollars, was submitted, with the condition that that institution should, if required, be obliged to lend one half of its capital to the United States. The amount thus loaned might, without any inconvenience, have been increased to twenty millions. And with twenty millions of dollars in hand, and loans being secured for twenty millions more, without any increase of the stock of the public debt at market, internal taxation would have been unnecessary for at least four years of war, nor any other resource been wanted, than an additional annual loan of five millions—a sum sufficiently moderate to be obtained from individuals, and on favorable terms.

These observations are made only in reference to the finances and resources of the General Government. Considerations of a different nature have, on both these subjects, produced a different result, which makes a resort to internal taxes, now, necessary, and will render loans more difficult to obtain, and their terms less favorable. But the resources of the country remain the same; and, if promptly and earnestly brought into action, will be found amply sufficient to meet the present emergency. With respect to internal taxes, the whole amount to be raised is so moderate, when compared either with the population and wealth of the United States, or with the burthens laid on European nations by their governments, that no doubt exists of the ability or will of the People to pay, without any real inconvenience, and with cheerfulness, the proposed *war taxes*. For, it is still hoped that the ordinary *peace* revenue of the United States will be sufficient to reimburse, within a reasonable period, the loans obtained during the war, and that neither a per-

petual and increasing public debt, nor a permanent system of ever progressing taxation shall be entailed on the nation. These evils cannot, however, be otherwise avoided, than by the speedy organization of a certain revenue. Delays in that respect, and a reliance on indefinite loans, to defray the war expenditure, the ordinary expenses of Government, and the interest on the loans themselves, would be equally unsafe and ruinous—would, in a short time, injure public credit, impair the national resources, and ultimately render much heavier and perpetual taxes absolutely necessary.

Of the gross amount of five millions of dollars to be now provided, according to the preceding estimates, by internal taxation, it is respectfully proposed that three millions should be raised by a direct tax, and two millions by indirect taxes.

The sum of three millions will not, considering the increase of population, be a much greater direct tax than that of two millions, voted in the year 1798. To this, permit me to add another view of the subject.

The direct taxes, laid by the several States during the last years of the Revolutionary war, were generally more heavy than could be paid with convenience. But, during the years 1785 to 1789, an annual direct tax of more than 200,000 dollars (\$205,189) was raised in Pennsylvania, which was [not oppressive, and was paid with great punctuality. The increase of population of that State, between the years 1787 and 1812, is, in the ratio of about four to nine. A tax of 450,000 dollars, payable in the year 1813, is not higher, in proportion to population, alone, and without regard even to the still greater increase of wealth, and of circulating medium, than a tax of 200,000 dollars was in the year 1787. But the quota of Pennsylvania, on a tax of three millions of dollars, will (counting Orleans as a State) hardly exceed 365,000 dollars. The proposed tax will, therefore, so far as relates to Pennsylvania, be near twenty per cent. lighter, in proportion to the respective population, than that paid during the years 1785 to 1789.

The rule of apportionment, prescribed by the constitution, operates with perhaps as much equality as is practicable, in relation to States not materially differing in wealth and situation. It may, therefore, be inferred, that a direct tax, which is not greater than Pennsylvania can pay with facility, will not press heavily upon any of the other Atlantic States. It is only in reference to the Western States that the constitutional rule of apportionment, according to the respective number of inhabitants in each State, may be supposed to be unequal. Being at a greater distance from a market, and having, on account of the recent date of their settlements, less accumulated capital, it is certainly true that they cannot, in proportion to their population, pay as much, or with the same facility, as the Atlantic States. Two considerations will, however, much diminish the weight, if they do not altogether obviate that objection.

1. Of the articles actually consumed in the Western States, there are two of general consumption, on which duties are laid, or proposed to be laid, and on which, being articles produced in those States, they will pay nothing, or less than the Atlantic States. On salt they will pay nothing, as the whole quantity consumed there is of domestic origin; and this observation affords an argument in favor of the restoration of the duty on that article, since it will tend to equalize the operation of the direct tax. A considerable part of the sugar those States consume (nearly seven millions of pounds) is also the produce of the maple, and pays no duty. And, in time of war, it is probable that the residue of their consumption will, in a great degree, consist of New Orleans sugar; also duty free.

2. A considerable portion of the direct taxes, in those States, is laid on lands owned by persons residing in other States, and will not fall on the inhabitants. It appears, by a late official statement, that more than two-thirds of the land tax of the State of Ohio are raised on lands owned by *non-residents*. The portion of the quota of that State on the United States' direct tax, which will be payable by its inhabitants, will, for that reason alone, be reduced to one-third part of the nominal amount of such quota. And, although the proportion may not be the same in the other Western States, it is well known that a similar result, though not perhaps to the same extent, will take place in all.

From every view which has been taken of the subject, it satisfactorily appears that the proposed amount of three millions is moderate, and cannot be productive of any real inconvenience, provided that the objects on which the tax shall be assessed be properly selected.

A direct tax may be assessed either on the whole amount of the property or income of the People, or on certain specific objects selected for that purpose. The first mode may, on abstract principles, be considered as most correct; and a tax laid in case of selection, on the same articles, in all the States, as was done in the direct tax of 1798, is recommended by its uniformity, and supported by respectable authority. It is, nevertheless, believed that the systems of taxation, respectively, adopted by the several States, matured, modified, and improved, as they have been by long experience, will generally be found to be best adapted to the local situation and circumstances of each State; and they are certainly most congenial with the feelings and habits of the People. It is therefore proposed that the direct tax should be laid and assessed in each State upon the same objects of taxation on which the direct taxes, levied under the authority of the State, are laid and assessed.

The attempt made, under the former direct tax of the United States, to equalise the tax by authorizing a Board of Commissioners, in each State, to correct the valuations made by the local assessors, was attended with considerable expense, and productive of great delay. In order to obviate this inconvenience, it is proposed that the quota assigned to each State, according to the rule prescribed by the constitution, should be apportioned by law amongst the several counties, towns, or other subdivisions of each State; adopting, in each State, where a State tax is now levied, the apportionment of the State tax, whether that be an absolute quota, fixed by a previous State law on the county or town, or whether it be only the amount which shall appear to have been last laid on such county by the operation of the general State laws, imposing a direct tax; making the apportionment in the States where no State tax is now levied, according to the best information and materials which can be obtained; and authorizing the States, respectively, to alter the apportionment thus made by law, at any time previous to the day fixed by law for assessing the United States' tax on individuals. The whole process of assessment will thereby be reduced to that of assessing the quota of each county, town, or other subdivision, on the lands and inhabitants of such subdivision. It will be as simple, and may be effected as promptly, and with as little expense, as the assessment of a county tax; and the objects of taxation being the same, it may be still more facilitated by authorizing an adoption of the State assessment on individuals, whenever it can be obtained from the proper authority.

With respect to indirect taxes, it does not appear necessary to resort to any other than those which had been formerly levied by the United States. As they were in operation during several years, their defects, and the modifications and improvements of which they are susceptible, are better understood than new taxes could be. With some alterations they may produce the amount now wanted; and it does not appear that any other, equally productive, could be substituted with any real advantage. The gross amount of those taxes, in the year 1801, was near one million of dollars. They would, according to the increase of population, and without any augmentation in their rate, yield, now, near 1,400,000 dollars. An average increase of about fifty per cent. in the rate would produce the intended gross amount of two millions. But it is believed that that increase ought not to be the same in all those taxes, and that some are susceptible of greater augmentation, or extension, than others.

1. *Duties on domestic spirits distilled.*—There is not any more eligible object of taxation than ardent spirits. But the mode of taxation is liable to strong objections, particularly with respect to persons who are not professional manufacturers, and who, only occasionally, distil the produce of their farms. It is therefore proposed, that the duties on the quantity of spirits distilled should be levied only on spirits distilled from foreign materials, at the rate of 10 cents per gallon, distilled, and on other distilleries employing stills, the aggregate of which shall contain more than four hundred gallons, at the rate of 3 cents per gallon, distilled; and that, instead of a duty on the spirits, or of licences in proportion to the time employed, all other distillers should only pay an annual tax of five dollars for each still solely employed in the distillation of fruit, and of fifteen dollars for each still otherwise employed. This tax may, also, still, without reference to time, be made to vary according to the size of the stills. At those rates, this class of duties is estimated to produce, at most, 400,000 dollars; and it is intended, in that case, that another duty should be levied on the same article, in the shape of licences to retailers. By the adoption of that mode,

the expenses of collection will be considerably diminished, penalties for not entering stills will be unnecessary, and they will be confined, with respect to country stills, to the case of clandestine distilling without paying the tax.

2d. *Duties on refined sugar.*—A duty double of that heretofore laid, viz. at the rate of 4 cents per pound, is estimated to produce 200,000 dollars. The drawback, both of that duty and of that on the importation of the raw material, to be allowed.

3d. *Licences to retailers.*—These are believed to be susceptible of considerable and very proper augmentation and extension. The following rates are estimated to produce 700,000 dollars.

For a licence to retail wines, - - - - -	\$20
do. do. spirits generally, - - - - -	20
do. do. domestic spirits only, - - - - -	15
do. do. any other species of foreign merchandise, - - - - -	10

Tavern keepers, licenced under the authority of any State, and not living in any city, town, village, or within five miles thereof, to be excepted. Every other person who sells wines, foreign spirits, or foreign merchandise, otherwise than in the vessel or package of importation, or in the case of dry goods, otherwise than by the piece, and every person who sells domestic spirits in less quantity than 30 gallons, to be considered as a retailer.

4th. *Duties on sales at auction.*—These, confined to the sales of articles of foreign produce or manufacture, and at the same rate as heretofore, may produce about 50,000 dollars.

5th. *Duties upon carriages for the conveyance of persons.*—Those duties, adding at the rate of 50 per cent. on the duties formerly raised, are estimated to produce 150,000 dollars.

6th. *Stamp duties.*—An association of ideas which connects those duties with the attempt of Great Britain to tax America, and which might, with equal propriety, attach odium to the duty on the importation of tea, has rendered their name in some degree unpopular. The great extension of post roads, and the facility of distribution, have, however, removed the most substantial objection to which they were liable. They do not appear to be more inconvenient than any other internal tax, and the expenses of collection are less than on any other, being only a commission on the sale, and the cost of paper and stamping. At the same rate as heretofore, with the exception of bank notes, on which an increase appears proper, (with an option to the banks to pay $\frac{1}{20}$ th part of their dividends in lieu thereof) they are estimated to produce 500,000 dollars.

RECAPITULATION.

Direct tax, gross amount, - - - - -	\$3,000,000
Duties on spirits and licences to distillers, gross amount, - - - - -	400,000
Refined sugar, - - - - - do. - - - - -	200,000
Retailer's licences, - - - - - do. - - - - -	700,000
Sales at auction, - - - - - do. - - - - -	50,000
Duties on carriages, - - - - - do. - - - - -	150,000
Stamp duties, - - - - - do. - - - - -	500,000
	2,000,000
Total gross amount, - - - - -	5,000,000
Deduct expenses of assessment and collection, and losses, estimated at 15 per cent. - - - - -	750,000
	4,250,000
But are not estimated to yield, in 1813, more than - - - - -	\$3,600,000

Most of the internal taxes have been estimated at their *maximum*; but it is hoped that any defalcation from the estimated amount will be compensated by a diminution in the expenses of collection, which have also been computed at the highest rate.

For the superintendence of those taxes, both direct and indirect, it appears indispensable that the office of commissioner of the revenue should be re-established. For their collection, the former offices of supervisor and inspector are believed to have been unnecessary and injurious links in the system, and that the expense will be diminished, and the collection and accountability better secured, by the division of the States into convenient collection districts, and by the appointment of a collector to each district, who will pay into the treasury, and be immediately accountable to that department, in the same manner as the collectors of customs. This arrangement, the greater amount to be collected, and the simplification in the objects and mode of taxation, will, it is hoped, reduce, in a short time, the expenses of collection of the indirect taxes to $7\frac{1}{2}$ instead of 13 per cent. which they formerly cost, when brought to their highest degree of improvement. In estimating the charges on the direct tax at 15 per cent. 5 per cent. have been allowed for the assessment, 5 per cent. for the collection, and 5 per cent. for losses. This last item is principally on account of losses on *unseated* lands, and on some remote districts of country, and is not susceptible of much reduction. That for assessment may be lessened in those States where the objects of taxation do not require an annual valuation, or where the State or county assessments may be used. The expense of collection proper may be, also, in some degree, lessened in cities and populous districts, and by uniting it with that of the internal taxes. It is, however, necessary that the compensation of the collectors be sufficient to command the services of men properly qualified, and in every respect worthy of the trust.

In performing the ungracious task of pointing out new objects of taxation, those have been submitted which appeared sufficiently productive and least oppressive. The objections to which each, including the increase of duties on importations, is liable, have not been stated, not because I was insensible of them, but because no substitute of any importance was perceived, which was not still more objectionable. Every tax being in some degree an evil, is, therefore, liable to some objection; and every one, taken singly, may, for that reason, be easily combated. But, if the necessity of an additional revenue be admitted, the objections afford no argument why the tax proposed should be rejected, unless another, less inconvenient, be substituted. The necessity of such an addition to the revenue has, in the course of this letter, been strongly urged, because it was strongly felt; but with respect to the taxes proposed, the selection is submitted with diffidence; and it will be highly gratifying that some more eligible may be devised.

The last inquiry of the committee relates principally to the terms on which loans, amounting to at least ten millions of dollars per annum, may be obtained, and to the plan proper to be adopted for the reimbursement of such loans.

The terms on which annual loans to that amount may be obtained, can be ascertained only by experiment. Government has never, since its organization, obtained considerable loans within the United States, at the rate of six per cent. a year, except from the Bank of the United States; and these, on a capital of ten millions, never amounted to seven millions in the whole. In proportion to the amount wanted for the service of the year, and to the increase of stock of the public debt at market, the terms must naturally become less favorable. It must, also, be recollected that, in addition to the sum wanted to defray the extraordinary expenses of the war, an annual loan, equal to the annual reimbursement of the six per cent. and deferred stocks, prescribed by law, will also be required. This, together with the reimbursement of the residue of the converted stock, amounting to 565,000 dollars, will, for this year, amount, as has been stated in the annual report, to 2,135,000 dollars. As the interest on the existing debt is included in the "current expenses," the loan necessary for the reimbursement of the six per cent. and deferred stocks, will, for each subsequent year, amount only to 1,570,000 dollars. The loans for those sums will, indeed, create no addition to the amount of the debt, but will, nevertheless, increase the total sum to be annually borrowed. It must also be observed,

that, if the price of stocks should sink below par, the commissioners of the sinking fund are bound, by the existing laws, to apply the residue of the annual appropriation of eight millions a year to the purchase of stock; and that residue will, this year, amount to \$3,640,000, which, in that case, must also be borrowed. It is a view of those several considerations which has created an apprehension that loans, to such large amount, might not, perhaps, be obtained on as favorable terms as under other circumstances, and, with the powerful assistance of a national bank, had been formerly anticipated. The same view of the subject has most forcibly impressed a conviction of the necessity of an additional revenue: for, if further loans be also resorted to for defraying the ordinary expenses and the interest, they must, if at all practicable, be obtained on the most ruinous terms. Excluding that idea, and embracing only the loans which are absolutely necessary, it appears to me more prudent not to limit the rate of interest by law. A discretionary power, in that respect, is, so far as relates to the Executive, altogether ineligible, but is preferable to the risk of leaving the public service unprovided for. It is, also, for the same reason, requisite that the loans may be made irredeemable for a term not less than ten years.

In a former communication to the Committee of Ways and Means, it was suggested that "treasury notes," bearing interest, might, to a certain extent, be issued, and to that extent diminish the amount to be directly borrowed. The advantage they would have, would result from their becoming a part of the circulating medium, and taking, to a certain degree, the place of bank notes. It is evident, however, that, for the same reason, the issue must be moderate, and never exceed the amount which may circulate without depreciation.

The loans necessary for the present year, are, 1st. A sum equal to that which may, during the year, be reimbursed on account of the principal of the debt. 2dly. The amount of expenses which have been, or may be, authorized by Congress, and are not included in the annual estimates.

The first sum will certainly amount to 2,135,000 dollars, and may be greater if the stocks should sink below par.

The second sum cannot yet be stated, since the extent of the expenses which may be authorized is not yet ascertained, and as the estimates for the additional army, already authorized, have not yet been received by the Treasury Department.

The deficit of 1,200,000 dollars (on the peace establishment) is not included as absolutely necessary, although its payment will, as stated in the annual report, leave in the treasury a smaller balance than, under existing circumstances, is eligible.

It may be proper to repeat that, so long as the public credit is preserved, and a sufficient revenue is provided, no doubts are entertained of the possibility of procuring, on loan, the sums wanted to defray the extraordinary expenses of a war; and that the apprehensions expressed relate solely to the terms of the loans—to the rate of interest at which they can be obtained.

The reimbursement of the new debt which may be created, must ultimately depend on the respective revenue and expenditure of the United States after the restoration of peace. No artificial provisions, no appropriations or investments of particular funds in certain persons, no nominal sinking fund, however constructed, will ever reduce a public debt, unless the nett annual revenue shall exceed the aggregate of the annual expenses, including the interest on the debt. Those who create the debt can only *estimate* what the peace revenue and expenditure will be, and presume that the supposed surplus *will be* faithfully and perseveringly applied to the payment of the principal.

The current or peace expenses have been estimated at nine millions of dollars. Supposing the debt contracted during the war not to exceed fifty millions, and its annual interest to amount to three millions, the aggregate of the peace expenditure would be no more than twelve millions. And as the peace revenue of the United States may, at the existing rate of duties, be fairly estimated at fifteen millions, there would remain, from the first outset, a surplus of three millions of dollars applicable to the redemption of the debt. So far, therefore, as can be now foreseen, there is the strongest reason to believe that the debt thus contracted will be discharged with facility, and as speedily as the terms of the loans will permit. Nor does any other plan, in that respect, appear necessary, than to extend the application of the annual appropriation of eight millions, and which is amply sufficient for that purpose, to the payment of interest and reimbursement of the principal of the new debt. No doubt can be entertained of that mode being sufficiently efficacious, since, by that plan alone forty-six millions of the public debt have been reimbursed during the last eleven years. If the national revenue exceeds the national expense, a simple appropriation for the payment of the principal of the debt, and co-extensive with the object, is sufficient, and will infallibly extinguish the debt. If the expense exceeds the revenue, the appropriation of any specific sum, and the investment of the interest extinguished, or of any other fund, will prove altogether nugatory; and the national debt will, notwithstanding that apparatus, be annually increased by an amount equal to the deficit in the revenue.

The annual interest on the existing debt amounts to	-	-	-	-	-	\$3,220,000
And estimating the interest on the new debt at	-	-	-	-	-	3,000,000
The sum which, on the annual appropriation of eight millions, would, at the restoration of peace, be applicable to the payment of principal, is	-	-	-	-	-	2,780,000
						<u>\$8,000,000</u>

A sum somewhat less than the presumed surplus of three millions, as above stated, and which will be nearly sufficient to reimburse, before the year 1823, the whole existing debt of the United States, with the exception of the three per cent. stock. The loans contracted during the war being made irredeemable for at least ten years, the first reimbursement would fall on that year; and the whole of the appropriation of eight millions, after deducting 485,000 dollars for the interest of the three per cent. stock, would thenceforth be applicable to the payment of the interest and principal of the new debt. The precise period of final extinguishment, and the precise amount of annual payments, will depend on the terms of the loans, and on the number of years for which it may be necessary to make each loan irredeemable. But this sketch is sufficient to show, 1st. That no inconvenience will arise in making the loans irredeemable for ten years, since there is not much probability that they could be sooner discharged. 2dly. That the appropriation of eight millions will be sufficient for their final reimbursement. 3dly. That that reimbursement, and that of the whole debt of the United States (the three per cent. stock excepted) will probably be effected within fifteen years after the restoration of peace. It must always be remembered that those estimates are predicated on the supposition than an additional revenue, to the amount already stated, will be provided, and that the increase of debt, during the war, will not exceed fifty millions.

In answering the inquiries of the committee on subjects so intimately connected with the most important questions of national concern, it became an imperious duty to represent every circumstance precisely as it was, or appeared to be, and without exaggerating or disguising any of the difficulties which must be encountered. To understand these to their full extent, will afford the best means of overcoming them; and there is none which appears insurmountable or even discouraging. What appears to be of vital importance is, that the crisis should at once be met by the adoption of efficient measures, which will with certainty provide means commensurate with the expense; and by preserving unimpaired, instead of abusing, that public credit on which the public resources so eminently depend, will enable the United States to persevere in the contest until an honorable peace shall have been obtained.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

HON. EZEKIEL BACON,
Chairman of the Committee of Ways and Means.

12th CONGRESS.]

No. 364.

[1st SESSION.]

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 29, 1812.

To the Honorable the Senate and the Honorable the House of Representatives of the United States in Congress assembled, the Directors of the New Hampshire Iron Factory Company beg leave respectfully to represent:

That said company own a very valuable bed of primitive iron ore, in the town of Concord, in the county of Grafton, and State of New Hampshire; and that said company have expended a large sum of money in erecting furnaces, forges, and machinery, in the town of Franconia, in the same county, for the purpose of manufacturing bar iron and various sorts of cast iron ware; that their works have been in operation for more than three years, but, owing to the high price of labor, and the low price they been obliged to receive for their manufactures, the said company have never realized one dollar, for the use of their capital stock, which amounts to more than one hundred thousand dollars; and that they have but little prospect of making their works profitable, or worth pursuing, while European manufactures, of the same kind, can be imported and sold in this country, for the prices at which they have been sold, for several years past.

They therefore pray, that, when commerce is laboring under great embarrassments, from the oppressive measures of belligerent Powers, that Congress, in their wisdom, would extend their fostering aid and encouragement to American manufactures, by imposing heavy duties on all imported hollow iron ware, and shapes of various kinds, an abundant supply of which, with proper encouragement, may be cast in our own country. This, we believe, will afford to merchants a prospect of employing part of their capital, withdrawn from the ocean, to some advantage, in establishing, and carrying on, useful manufactories. And, as in duty bound, will ever pray the New Hampshire Iron Factory Company, by their directors.

EBEN'R BECKFORD, *and others.*SALEM, *January 16, 1812.*

12th CONGRESS.]

No. 365.

[1st SESSION.]

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 3, 1812.

To the Senate and Representatives in Congress assembled:

The subscribers, brewers of malt liquor, in the city of New York, having long had to encounter with many impediments to the extension of their business, so as to render it profitable either to themselves, or as an useful branch of manufactory to the community at large, take the liberty to suggest to Congress, that, while the consumption of ardent spirits continues to form so common a drink, for the generality of people, particularly among the laboring part of society, it will operate against the use of malt liquors, which circumstance, together with the quantity of foreign beer heretofore imported, has lessened the consumption of the article manufactured at home, and which, in the event of the intercourse being opened, may again be the case.

With this view of the subject, we are induced to solicit the attention of Congress, in order that some legislative aid and encouragement may be afforded in the premises.

It is not for us to expatiate on the benefits which may result to the community, as to the preference, in point of health, which malt liquor may have to that of ardent spirits, or of the policy of encouraging the one, and of discouraging the other, even in a moral point of view; these are considerations, so connected with individual and general good, and so according with the system adopted by Congress, for promoting the manufactories of our country, and so congenial with the spirit of the nation, that we shall forbear expressing much on the subject.

We, therefore, submit to your consideration the propriety of adopting such measures as may be promotive of encouraging the manufactory, and use, of malt liquors, in the United States.

MURRAY & MILBANK, *and others.*New York, 1st month, 19, (*January*) 1812.

12th CONGRESS.]

No. 366.

[1st SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 5, 1812.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their last report, of the 2d of February, 1811, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the first day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

GEORGE CLINTON, *President of the Senate.*
 JAMES MONROE, *Secretary of State.*
 ALBERT GALLATIN, *Secretary of the Treasury.*
 WM. PINKNEY, *Attorney General U. S.*

WASHINGTON, *February 5, 1812.*

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That the balance of moneys advanced on account of the public debt, remaining unexpended at the close of the year 1809, and applicable to payments falling due after that year, which balance, as appears by the statement B, annexed to the last annual report, amounted to three hundred and sixty thousand nine hundred and ninety-nine dollars sixty-eight cents,	\$360,999 68
Together with the sums disbursed from the treasury, during the year 1810, on account of the principal and interest of the public debt, which sums, as appears by the statement C, annexed to the last annual report, amounted to eight millions and one thousand nine hundred and seventy-two dollars forty-three cents,	8,001,972 43
And amounting, together, to eight millions three hundred and sixty-two thousand nine hundred and seventy-two dollars eleven cents,	<u>8,362,972 11</u>

Have been accounted for in the following manner:

I. There was repaid into the treasury, during the year 1810, on account of the principal of moneys heretofore advanced for the payment of the domestic debt, as appears by the statement E, annexed to the last annual report, the sum of two thousand six hundred and thirty-nine dollars thirty-seven cents,	2,639 37
II. The sums actually applied, during the same year, to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the statement A, to seven millions eight hundred and sixty-seven thousand one hundred and fifty-eight dollars fifty-seven cents, viz:	
1. Paid in reimbursement of the principal of the debt, including the whole of the exchanged six per cent. stock outstanding,	\$5,163,328 16
2. Paid on account of the interest and charges on the public debt	2,703,830 41
	<u>7,867,158 57</u>
III. The balance remaining unexpended at the close of the year 1810, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the statement B, to four hundred and ninety-three thousand one hundred and seventy-four dollars seventeen cents.	493,174 17
	<u>\$8,362,972 11</u>

That, during the year 1811, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt, viz:

I. On account of the interest and reimbursement of the domestic funded debt,	\$4,736,092 06
II. For interest on temporary domestic loans,	69,842 45
III. For repayment of do. do.	2,750,000 00
IV. On account of the interest on Louisiana stock, and on exchanged and converted stocks payable in Europe,	592,160 49
Amounting, together, as will appear by the annexed list of warrants, marked C, to eight millions one hundred and forty-eight thousand and ninety-five dollars,	<u>\$8,148,095 00</u>

Which disbursements were made out of the following funds, viz:

I. From the funds constituting the annual appropriation of eight millions of dollars, for the year 1811, viz:	
From the fund arising from the interest on the debt transferred to the Commissioners of the Sinking Fund, as per statement I,	\$1,818,374 34
From the fund arising from the sales of public lands, being the amount received in the treasury from 1st October, 1810, to 30th September, 1811, per statement K,	767,061 23
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of vessels,	5,414,564 43
	<u>\$8,000,000 00</u>
II. From repayments into the treasury, on account of advances for the payment of dividends on the domestic funded debt, and for the purchase of foreign remittances, as will appear by the statement E, viz:	
Principal advanced from the treasury, repaid,	146,666 67
Interest and damages recovered,	1,428 33
	<u>148,095 00</u>
	<u>\$8,148,095 00</u>

That the abovementioned disbursements, together with the above stated balance, which remained unexpended at the close of the year 1810, of	493,174 17
Together with a further sum, arising from profit on remittances from America to Europe, purchased during the year 1811, and amounting, as will appear by the statement D, to	56,726 14
And together, also, with the further sum of £4,900 sterling, in bills taken in payment of the principal of an equal sum of protested bills, as will appear by the same statement D, and equal, at par, to	21,777 78
Making, together, eight millions seven hundred and nineteen thousand seven hundred and seventy-three dollars nine cents,	<u>8,719,773 09</u>

Will be accounted for in the next annual report, in conformity with the accounts which shall then have been rendered to the Treasury Department.

That, in the meanwhile, the manner in which the said sum has been applied, is estimated as followeth:

I. The repayments into the treasury, on account of the principal, including the amount of sundry bills received in exchange for others previously purchased, which had been protested, have, during the year 1811, amounted, as by the abovementioned statement E, to	\$168,444 45
II. The sums actually applied, during the year 1811, to the principal and interest of the public debt, are estimated as follows:	
1. Paid in reimbursement of the principal of the public debt, and including the temporary loan of \$2,750,000, obtained in 1810, from the Bank of the United States,	\$5,543,470 89
2. Paid on account of interest and charges on the public debt,	2,470,372 06
	<u>8,013,842 95</u>
As will appear by the estimate F,	8,013,842 95
III. The balance which remained unexpended at the close of the year 1811, and applicable to payments falling due after that year, as per estimate G, at	537,485 69
	<u>\$8,719,773 09</u>

That, in conformity with the resolution of the Commissioners of the Sinking Fund, of April 24th 1811, (L) there was reimbursed, at the close of the year 1811, in the manner prescribed by the 8th section of the act of February 11th, 1807, a portion of the converted stock created by the 3d section of that act, of \$1,294,452 29; which sum of \$1,294,452 29 forms a part of the sum of \$5,543,470 89, above stated, as the amount of the principal of the public debt reimbursed in the year 1811.

And that the statement H exhibits the amount of stock transferred to the Commissioners of the Sinking Fund, and to the Treasurer of the United States, in trust for said States, and standing to their credit on the books of the treasury, on the 31st December, 1811, no stock having been transferred in payment for lands during the year 1811.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, *February 1st, 1812.*

A.

Statement of the application, during the year 1810, of the funds provided for the payment of the principal and interest of the Public Debt.

I. *Payments on account of the principal of the Public Debt.*

Of the domestic debt, viz:

Annual reimbursement of old six per cent. stock,	-	-	-	\$1,011,638 97	
Do. of deferred do.	-	-	-	400,563 93	
					1,412,202 90
Reimbursement of exchanged six per cent. stock, being the whole of that stock which remained outstanding,	-	-	-	-	3,751,125 26
					<u>5,163,328 16</u>

II. *Payments on account of interest and charges.*

1. On the domestic debt.

Interest for the year 1810, on the several species of the domestic funded debt, as settled at the treasury,	-	-	-	-	\$1,985,579 93
Do. on Louisiana stock domesticated,	-	-	-	-	7,020 00

2. On the foreign debt.

Interest on exchanged and converted stocks, payable in Amsterdam,					
guilders 8,056 17 8, at 40 cents,	-	-	-	3,222 75	
London, £5,344 19, at 4s. 6d.	-	-	-	23,755 34	
					26,978 09
Interest on Louisiana stock, from 1st of July, 1809, to 30th June, 1810, viz:					
Payable in Amsterdam, guilders 750,000, at 40 cents,	-	-	-	300,000 00	
Do. in London, £83,099 5, at 4s. 6d.	-	-	-	369,330 00	
					669,330 00
Commissions and charges, viz: at Amsterdam, including guilders 9,768 3, interest on advances of the bankers, guilders 14,069 15 8,	-	-	-	5,627 91	
At London, £415 10,	-	-	-	1,846 66	
					7,474 57
Loss in exchange and remittances, per statement D, annexed to last annual report,	-	-	-	6,281 84	
Deduct gain on specie shipped by the John Adams, guilders 2,233,	-	-	-	893 20	
					5,388 64
Commissions to agents in America for purchasing bills,	-	-	-	-	2,059 18
					<u>711,230 48</u>
					<u>2,703,830 41</u>
					<u>\$7,867,158 57</u>

TREASURY DEPARTMENT, *Register's Office, January 30, 1812.*

JOSEPH NOURSE, *Register.*

B.

Statement of the provision made, before the 1st day of January, 1811, for the payment of the principal and interest of the Public Debt falling due after that day.

I. *On account of the Foreign Debt.*

1. Cash in the hands of commissioners and agents in Europe, viz:

In London, on 31st December, 1810, £44,640 14 6, at 4s. 6d.	.	.	.	\$198,403 22	
Deduct amount due the commissioners in Amsterdam on the same day, guilders 276,967 14 13, at 40 cents,	.	.	.	110,787 10	
					87,616 12
2. Remittances outstanding, viz:					
Amount paid for at the treasury, and remitted to Amsterdam, before 1st January, 1811, but not received by the commissioners till after that day, guilders 497,500, at 40 cents,	.	.	.	199,000 00	
Deduct amount of moneys received by the commissioners before 1st January, 1811, but not paid for at the treasury till after that day, guilders 16,695 15, at 40 cents,	.	.	.	6,678 30	
					<u>192,321 70</u>

Amount paid for at the treasury, and remitted to London, before 1st January, 1811, but not received by the bankers till after that day, £50,000, at 4s. 6d. 222,222 22

Of this sum there was protested for non-payment, as explained at foot of statement D, herewith, and remained unpaid on 31st December, 1810,

8,400	37,333 33	184,888 89
<u>41,600</u>		<u>377,210 59</u>

464,826 71

3. Amount of payments made at the treasury before the 1st of January, 1811, for bills which have been protested for non-payment, and which on that day had not been repaid into the treasury, viz:

Amount heretofore outstanding, as explained in the report of February 3, 1809, 13,357 00
 Amount of bills purchased in 1810, and protested for non-payment, which had not been repaid into the treasury December 31, 1810, £8,400 37,333 33

50,690 33

515,517 04

II. *Deduct amount, short provided, on account of the Domestic Debt, as follows:*

The demands unsatisfied on the 1st January, 1811, were the following, viz:

- | | |
|--|---------------------|
| 1. Dividends payable by the commissioners of loans, including the dividends due on that day, and exclusive of dividends no longer demandable at their offices, | 1,213,042 83 |
| 2. Unclaimed dividends payable at the treasury, | 70,050 44 |
| | <u>1,283,093 27</u> |

The provision made for the above objects was as follows, viz:

- | | |
|--|---------------------|
| 1. Cash due from commissioners of loans deceased, and out of office, | 6,660 20 |
| 2. Cash in the hands of do. in office, | 1,196,489 55 |
| 3. Cash in the hands of the treasurer, as agent for the commissioners of the sinking fund, | 57,588 65 |
| 4. Cash over advanced at the treasury for the payment of dividends, | 12 00 |
| | <u>1,260,750 40</u> |

Leaving this sum, short provided, on the 1st January, 1811, to meet all payments on account of the domestic debt, 22,342 87

Total amount of provision for the public debt remaining unapplied on the 31st December, 1810, \$493,174 17

Cost of advertising,		2 75
<u>82,520 0 0</u>		<u>298,044 59</u>
5,880 0 0, in exchange for protested bills.—See note (a) at foot.		
<u>£88,400 0 0</u> , applied to the purchase of remittances,		<u>\$583,339 13</u>
Paid for insurance and charges on the transportation and shipment of specie to Amsterdam,		8,076 26
Paid agents for commission on the purchase of bills,		745 10
		<u>\$592,160 49</u>
Amount of warrants issued in the year 1811, on account of the interest on Louisiana stock, per preceding statement C,		<u>\$592,160 49</u>
Gain in exchange, guilders 692,576 1 0, at par,		\$277,030 42
	<u>£88,400 0 0</u>	
Deduct bills taken in payment of the <i>principal</i> of protested bills, as per note (a) at foot,	<u>4,900 0 0</u>	
	<u>£83,500 0 0</u> , at par,	371,111 11
		<u>648,141 53</u>
Paid for remittances, as above,		\$583,339 13
Do. charges do. do.		8,076 26
		<u>591,415 39</u>
Gain in exchange in 1811,		<u>\$56,726 14</u>

Note to Statement D.

(a) Of the sum of £50,000 sterling, remitted to London, in bills, in October, 1810, there was returned in 1811, protested, for non-payment,		<u>£8,400</u>
Of this sum there was repaid into the treasury, in 1811, as per statement E, accompanying this report,		£1,500
For principal,		\$6,666 67
Damages,		533 33
		<u>\$7,200 00</u>
There has been put in suit, and still remains outstanding,		2,000
There was replaced, by new bills, furnished by the endorsers of those protested,		4,900
		<u>£8,400</u>

But on these bills there was claimed and paid the customary damages of 20 per cent., being on the £4,900, the sum of £980. This last sum was also furnished in bills, and is included in this statement, as so much gained in exchange.

TREASURY DEPARTMENT, *Register's Office*, January 30, 1812.

JOSEPH NOURSE, *Register*.

E.

Statement of repayments made into the Treasury, during the year 1811, on account of the Public Debt.

No. of war-rants.	Dates of war-rants.	On whom drawn.	Principal.	Damages and interest.	Amount of warrants.
1467	March 30,	John Stephen, late district attorney for Maryland, being so much received by him from the estate of Beale Owings, on account of the balance due for his bill of exchange on Amsterdam for 20,000 guilders, protested in the year 1802, for non-payment,	-	895 00	895 00
1487	May 28,	James Davidson, cashier of the late office of Discount and Deposite, Washington, being moneys remaining in his hands unexpended, which were heretofore advanced him for payment of dividends on the public debt, payable at the treasury,	50,000 00	-	50,000 00
1514	June 29,	Frederick Depeyster, being for the cost and damages on two bills of exchange, one drawn by F. Depeyster, for £1,000 sterling, and one by J. De Jongh, for £500 sterling, on Worrall & Williamson, of Liverpool, returned, protested, for non-payment,	6,666 67	533 33	7,200 00
1515	June 29,	James Davidson, cashier of the late office of Discount and Deposite, Washington, being moneys remaining in his hands unexpended, which were heretofore advanced him for paying unclaimed dividends on the funded domestic debt of the United States, payable at the treasury,	40,000 00	-	40,000 00
1520	Septem. 3,	Do. being on same account,	50,000 00	-	50,000 00
			\$146,666 67	\$1,428 33	\$148,095 00

To the above must be added the amount of three bills protested for non-payment in 1811, as follows, viz:

Butler, Burroughs, & Sturges, on John Stewart, of Liverpool, for £1,000	-	2,000
Hezekiah Lord, on Conway & Davidson, of do.	-	1,900
Do. Worrall & Williamson, of do.	-	1,000
		<u>£4,900</u>

For which other bills were taken in exchange, as explained in statement D, herewith. As this operation produces the same effect as a repayment into the treasury, it is necessary that it should appear in this statement, and is, therefore, here entered. £4,900, at par, is equal to

21,777 78
\$168,444 45

TREASURY DEPARTMENT, Register's Office, January 30, 1812.

JOSEPH NOURSE, Register.

F.

An estimate of the application made, in the year 1811, of the funds provided for the payment of the Principal and Interest of the Public Debt.

I. On account of the Principal.

1. Reimbursement of six per cent. and deferred stocks, estimated at	-	\$1,499,018 60
2. Do. of converted six per cent. stock,	-	1,294,452 29
3. Repayment of temporary loan obtained from Bank of the United States,	-	2,750,000 00
		<u>\$5,543,470 89</u>

II. On account of Interest and Charges.

1. Interest on the domestic funded debt, estimated at	-	\$1,682,515 66
2. Interest on Louisiana stock, domesticated,	-	24,051 00
3. Interest on temporary loan from Bank of the United States,	-	69,842 45
4. Interest and charges on foreign debt, viz:		
Interest on exchanged and converted stocks, payable in London and Amsterdam,	\$17,783 23	
Interest and charges on Louisiana stock, payable in London and Amsterdam,	667,358 36	
	<u>\$685,141 59</u>	
Charges on remittances, per statement D, herewith,	8,076 26	
Commissions to agents in America, for purchasing bills, per do.	745 10	
	<u>693,962 95</u>	
		<u>2,470,372 06</u>
		<u>\$8,013,842 95</u>

G.

An estimate of the funds provided, before the 1st January, 1812, for the payment of Principal and Interest of the Public Debt falling due after that day.

I. *On account of the Foreign Debt.*

Cash in the hands of commissioners and agents in Europe, and remittances outstanding on 31st Dec. 1810, per preceding statement B,	-	-	\$464,826 71
The remittances made during the year 1811, per preceding statement D, are as follow, viz:			
To Amsterdam,	-	-	
To London,	-	-	
		<i>Guilders, 692,576 1, at 40 cents,</i>	277,030 42
		<i>£88,400, at 4s. 6d.</i>	392,888 89
			<u>669,919 31</u>
Total to be accounted for,	-	-	1,134,746 02
The amount applied during the year 1811, per preceding estimate F, is calculated to have been for interest and charges in Europe,	-	-	<u>693,217 85</u>
The balance in the hands of agents in Europe, or in remittances outstanding, may, therefore, be estimated, on 31st December, 1811, at	-	-	441,528 17
The amount of protested bills outstanding on the same day, was as follows, viz:			
Unrecovered amount of A. Brown's and Brown & Hackman's protested bills for 120,000 guilders, per preceding reports,			\$13,357 00
J. W. and Gilbert Russell's bill on Conway & Davidson, of Liverpool, for £2,000 sterling, put in suit in 1811,			8,888 88
			<u>22,245 88</u>
			\$463,774 05

L.

At a meeting of the Commissioners of the Sinking Fund, held on the 24th of April, 1811—

Present: JOHN POPE, *President of the Senate pro tem.*
JAMES MONROE, *Secretary of State.*
ALBERT GALLATIN, *Secretary of the Treasury.*

The Secretary of the Treasury reported to the Board—

“ That the interest payable on the public debt during the year 1811, including therein the annual reimbursement on the six per cent. and deferred stocks, and the interest on the temporary loan obtained on the 31st of December last from the late Bank of the United States, is estimated at	\$3,950,000
That the principal of the above mentioned temporary loan, and reimbursable according to contract during the present year, amounts to	2,750,000
Making, together, a sum of	6,700,000
And leaving a balance of	1,300,000

To be applied, during this year, by the Commissioners of the Sinking Fund, in order to complete the annual appropriation for the public debt, of	8,000,000
--	-----------

And that the market price of stock of public debt being above that limited by law for purchases by the commissioners, the said balance can only be applied towards the reimbursement of the six per cent. converted stock, created by virtue of the act supplementary to the act, entitled ‘An act making provision for the redemption of the whole of the public debt of the United States.’ ”

Whereupon, resolved, That a sum not exceeding the balance aforesaid, be applied, during the present year, towards the reimbursement of the principal of the converted six per cent. stock, in conformity with the provisions of the act last above mentioned.

JOHN POPE, *President of the Senate pro tem.*
JAMES MONROE, *Secretary of State.*
ALBERT GALLATIN, *Secretary of the Treasury.*

I certify the foregoing to be a true copy of the original minutes of the proceedings of the Board.

EDWARD JONES, *Secretary to the Board of Commissioners.*

DRAWBACK OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 12, 1812.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of George B. Rapelye, and others, of the City and State of New York, merchants, made the following report:

The petitioners state, that their respective firms purchased of the firm of Ingraham, Phoenix, and Nixsen, goods, entitled, on exportation, to the drawback of duties, and which the petitioners purchased and exported under the persuasion that the debentures which issued from the custom house would be duly paid.

In this calculation they have been disappointed, as the firm of Ingraham, Phoenix, and Nixsen, which imported the goods, and entered the same for exportation, has since failed, without paying the duties, amounting to about ninety-six thousand dollars, to the United States. The petitioners solicit Congress to pass an act directing the collector of the customs for the port of New York to pay the debentures which they hold, notwithstanding the duties have not been paid by the firm of Ingraham, Phoenix, and Nixsen, the importers of the goods.

If Congress refuse to accede to this solicitation of the petitioners, they then pray that an act may pass to authorize them to institute a suit against the collector for the port of New York, for the amount of the debentures, inasmuch as the non-payment of the duties by the firm of Ingraham, Phoenix, and Nixsen, is fairly chargeable to the negligence of the collector, in not taking responsible sureties to the duty bonds.

The committee can see no ground on which the first proposition can be supported; the law, in letter and spirit, is opposed to it. The law says, “In no case of an exportation of goods shall a drawback be paid, until the duties, on the importation thereof, shall have been first received.” No duties, on the goods imported by the firm of Ingraham, Phoenix, and Nixsen, have as yet been paid, or are likely, as the committee understand, to be paid; the petitioners, therefore, are not entitled to receive the amount of their respective debentures. The law, as it stands, clearly evinces the soundness of the principles on which it is founded; no case could have occurred more apposite to prove the necessity of such a provision for the security of the treasury.

The drawback of duties is allowed on two grounds: first, the exportation of goods within twelve months, calculating from the time of entry; and, secondly, on the payment of duties to the United States, before, or after, such exportation.

The goods may be exported, but, if the duties, on their importation, are not paid, there can be no legal right to demand the payment of the debentures. The wise framers of the law never intended that a system, which they constructed for the encouragement of commerce and enterprise, should operate in such a way as to drain the treasury. To sustain the present application, would, undoubtedly, produce this effect.

The second proposition cannot, in any view in which it can be presented to the mind, be considered as tenable. The collector is responsible for the omission of such duties as the laws prescribe: in this case, if he has omitted to perform a duty assigned to him, the United States are alone the losers—the petitioners only fortuitously so—an accident against which speculations cannot be secured. The remedy of the petitioners is against the sellers of the merchandise. If the petitioners fail in obtaining redress against the firm of Ingraham, Phoenix, and Nixsen, in the responsibility of which they confided, their case is remediless. The committee cannot transcend the limits of the constitution, or the sound and correct principles of jurisprudence, in recommending the passage of a law which shall be endued with a retro-active operation. They, therefore, submit the following resolution to the House:

Resolved, That the petitioners have leave to withdraw their petition.

12th CONGRESS.]

No. 368.

[1st SESSION.]

PLAN FOR INCREASING THE REVENUE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 17TH OF FEBRUARY, 1812.

Mr. BACON made the following report:

The Committee of Ways and Means having taken into their consideration the subject of the revenue and expenditure of the United States, for the present and two succeeding years, in particular reference to a state of contemplated war, during a greater portion of that period, ask leave to report:

That the ordinary expenses during the present year, grounded on the estimates already laid before Congress, are estimated as follows, viz:

Expenses of a civil nature, both foreign and domestic,	\$1,260,000
Army—exclusive of the additional military force authorized by the act of the present session, and including \$32,800, for the service of militia in the years 1809, 1810, and 1811,	2,581,000
Naval Department, including the marine corps,	2,500,000
Arsenals, arms, ordnance, repairs of fortifications, including 200,000 dollars, permanent appropriations for the purchase and manufacture of arms,	614,000
Indian Department,	220,000
Interest on the public debt,	2,225,000
Total ordinary expenses,	9,400,000
That the actual receipts into the treasury, during the same year, are estimated at	8,200,000
Leaving a deficit in the receipts, of	<u>\$1,200,000</u>

Which deficit may, however, be paid out of the moneys remaining in the treasury at the close of the year, leaving a sum of 1,800,000 dollars on hand, which, in the opinion of the Committee, it would not be prudent, under existing circumstances, farther to exhaust.

That the extraordinary expenses of the present year, already authorized by law, or which, by bills pending before Congress, are in a course of authorization, are as follows:

Ordnance and ordnance stores, camp equipage, and other quartermaster's stores,	\$1,900,000 00
Six companies of mounted rangers,	108,772 00
Additional military force,	5,112,560 26
Repairing vessels out of commission, and purchase of timber for naval purposes,	680,000 00
Erection of additional fortifications,	1,000,000 00
Calling out certain corps of volunteers,	1,000,000 00
Calling out militia,	1,000,000 00
	<u>\$10,801,332 26</u>
Total extraordinary expenses, (say)-	<u>\$11,000,000 00</u>

The whole of which sum it is necessary, and is accordingly proposed, to raise by loan, conformable to the bill herewith reported by the Committee.

That the amount of the principal of the public debt, which is reimbursable during the same year, consisting of the six per cent., deferred, and exchanged stocks,

And, in the event of stocks falling below par, (thereby imposing upon the commissioners of the sinking fund an obligation to purchase, in order to satisfy the annual appropriation of eight millions of dollars for the reduction of the public debt) may amount to the further sum of

	3,640,000
Total amount of the principal of the public debt which may become reimbursable during the present year,	<u><u>\$5,775,000</u></u>

Which sum, it is also proposed to authorize the commissioners of the sinking fund to borrow, conformable to such bill as may hereafter be reported.

That the ordinary expenses of Government, for the year 1813, may be estimated, as for the present year, at about

To which must be added the interest then accruing on the loan proposed to be authorized for the service of the present year, estimating the same at six per cent., and amounting to

	\$9,000,000
	660,000
Making the revenue necessary to be provided, for paying the ordinary expenses and interest on loans for that year, (and leaving the extraordinary expenses of the year also to be provided for by loans)	9,660,000

That the receipts into the treasury, from the present sources of revenue, during that year, calculating on a state of war, during a greater portion of the present year, are estimated (conjecturally) at

	3,100,000
Leaving a deficiency, to be provided for by additional revenues to be received during that year, of	<u><u>\$6,560,000</u></u>

Estimating the ordinary expenses of 1814, as for the present year, at about	- - -	\$9,000,000
And adding the interest accruing on the loan proposed for the present year,	- - -	660,000
And also the interest then accruing on the loan which, in all probability, may be necessary to cover the extraordinary expenses of 1813, which it would not be prudent to calculate at less than eleven millions,	- - -	660,000
		10,320,000
Making the revenue necessary to be provided, for paying the ordinary expenses and interest on loans for that year, (and leaving the extraordinary expenses of the year also to be provided for by loans)		10,320,000
Estimating the receipts into the treasury, from the present sources of revenue, during that year, at		3,100,000
		\$7,220,000

Under this prospective view of the financial situation of the Government, it became, in the judgment of the Committee, their imperious duty, as well in reference to the obligations incumbent upon them from the general trust with which they were clothed, as also in deference to that portion of the message of the President of the United States, which had been specially referred to their consideration, to enter, as early as possible, upon a system of ways and means, calculated to provide a revenue, "sufficient, at least, to defray the ordinary expenses of Government, and to pay the interest on the public debt, including that on new loans which may be authorized." Any provision falling short of this requisition, would, in the opinion of the Committee, betray an improvidence in the Government, tending to impair its general character, to sap the foundations of its credit, and to enfeeble its energies, in the prosecution of the contest into which it may soon be driven, in defence of its unquestionable rights, and for the repulsion of long continued and most aggravated aggressions. Should the ruinous system of relying altogether upon the aid of loans, for defraying not only the extraordinary expenditures of the present and succeeding years; but also a large portion, both of the ordinary expenses of the Government, and the interest on the public debt, including that on new loans, be suffered to prevail, and no additional revenues be seasonably provided, it will result, that the loans which it may be necessary to authorize, during the year 1813, must amount to at least 17,560,000 dollars; and for 1814, to 18,220,000 dollars—an operation, which, by throwing into the market so large an amount of stock, accompanied with no adequate provision for paying even the interest accruing on such as may be created, but relying altogether upon the decreasing ability to borrow for the purpose of paying such interest, must have a most unfavorable effect upon the general price of public stocks, and the consequent terms of the loans themselves. It may be added that a system of that sort would, it is believed, be found to be altogether unprecedented in the financial history of any wise and regular Government, and must, if yielded to, produce, at no distant period, that general state of public discredit which attended the national finances during the war of the Revolution, and which nothing but the peculiar circumstances of the country, and the want of a well-organized and efficient Government, during the period of that Revolution, could at all justify.

To have withheld from the public view a fair exposition of the probable state of the fiscal concerns of the Government, under the very first pressure of active war, or to have deferred submitting to the House such a system, as, in the opinion of the Committee, was indispensable, to place the revenue of the country upon a basis commensurate with the public exigencies, would, in their judgment, at once have evinced, in the eyes of foreign nations, an imbecility of action and of design, the effects of which must be too obvious to be mistaken; and, as it regards our own country, would have indicated a policy, as feeble and short-sighted as it must have been considered deceptive and disingenuous; as unworthy the rulers of a free and enlightened nation, as, in its result, it would have been found fatal to its interests, and paralyzing to all its efforts. It is obvious that the whole amount which it is necessary to raise, in order to meet the anticipated deficit of revenue for the ensuing years, is indeed "moderate, when compared, either with the population and wealth of the United States, or with the burthens laid on European nations by their Governments."

To doubt either the "will or ability" of the People of the United States to bear such burthens as are indispensable to this end, would be to doubt their dispositions to meet seriously the contest which is presented to them, and would go far to prove, that it had better not have been attempted.

To doubt the readiness of the Government to bring "promptly and efficiently" into action the necessary resources of the nation, would be to cast a distrust over the sincerity of those pledges which they have so recently and distinctly given to the world in that respect, and would imply a suspicion of their firmness or forecast, not for a moment to be entertained.

For a more full and distinct elucidation of the general subject which it has become the duty of the Committee to present to the House, they beg leave to refer to the letter of the Secretary of the Treasury, in answer to the several inquiries made of him by their order, and which has heretofore been laid before the House, concurring, as they most fully do, in the general opinion expressed by him, "That what appears to be of vital importance, is, that the crisis should at once be met by the adoption of efficient measures, which will, with certainty, provide means commensurate with the expense; and, by preserving unimpaired, instead of abusing, that public credit in which the public resources so eminently depend, will enable the United States to persevere in the contest, until an honorable peace shall have been obtained."

It is then proposed by the Committee, that the additional revenue which will be necessary "to defray the ordinary expenses of Government, and to pay the interest on the public debt, including that on new loans, which may be authorized," should be immediately provided for, in the following modes, viz:

I. *Additional duties of impost and tonnage.*

1st. An increase of the duties now payable by law on imported merchandise, calculated to yield a nett revenue of	- - -	\$2,500,000
2d. A further retention on the amount of all drawbacks allowed by law on the exportation of goods, wares and merchandise, calculated to yield a nett revenue of	- - -	100,000
3d. An additional tonnage duty on American and foreign vessels, calculated to yield a nett revenue of	- - -	200,000
4th. A duty on all salt imported, calculated to yield a nett revenue of	- - -	400,000
		\$3,200,000

II. *Internal duties.*

1st. A duty on licences to distil spirits from foreign and domestic materials, calculated to yield a gross revenue of	- - -	\$275,000
2d. A duty on licences to retailers of wines, spirits, and foreign merchandise, including tavern keepers, calculated to yield a gross revenue of	- - -	500,000
3d. A duty on sales at auction of foreign merchandise, and of vessels, calculated to yield a gross revenue of	- - -	150,000
4th. A duty on all sugars refined in the United States, calculated to yield a gross revenue of	- - -	200,000
5th. A duty on carriages used for the conveyance of persons, calculated to yield a gross revenue of	- - -	150,000
6th. A duty on various instruments of writing, to be collected by means of stamps, calculated to yield a gross revenue of	- - -	450,000
		\$1,725,000
Total gross amount of revenue, estimated from internal duties,	- - -	\$1,725,000

III. *Direct tax.*

A direct tax to be laid and apportioned among the several States according to the rule prescribed by the constitution—gross amount, - - - - -	\$3,000,000	
Total gross amount estimated to be received from internal duties and direct tax, when they shall be effectually organized, (or in 1814) - - - - -	\$4,725,000	
Deduct expense of assessment, collection, and losses, at about 15 per cent. - - - - -	700,000	
Nett amount, estimated from internal duties and direct tax for 1814, - - - - -	\$4,025,000	4,025,000
Nett amount estimated from additional duties of impost and tonnage, internal duties, and direct tax, for 1814, - - - - -	\$7,225,000	
But which, on account of the ineffectual organization of the internal duties and direct tax, may not yield, in 1813, that amount, by a sum of - - - - -	650,000	
Leaving the nett amount, estimated for 1813, - - - - -	\$6,575,000	

And for this purpose the committee recommend to the House the adoption of the following resolutions, viz:

1st. *Resolved*, That an addition of 100 per cent. be made to the several rates of permanent duties now imposed by law on all goods, wares, and merchandise, imported into the United States.

2d. *Resolved*, That 25 per centum be retained on all the drawbacks allowed by law, on the exportation of goods, wares, and merchandise, exported from the United States.

3d. *Resolved*, That additional tonnage duties be laid at the following rates, viz:

1. On all vessels licenced for the coasting trade or fisheries, 20 cents per ton a year;
2. On all other vessels, owned by citizens of the United States, 25 cents per ton on the entry of the vessel;
3. On all foreign vessels, one dollar and twenty-five cents per ton on the entry of the vessel.

4th. *Resolved*, That a duty of 20 cents per bushel be laid upon all salt imported into the United States.

5th. *Resolved*, That duties be laid on licences to distil spirits, at the following rates, viz:

1. On stills employed in distilling spirits, from foreign materials, at the rate of 75 cents per gallon on the capacity of such stills;
2. On stills solely employed in distilling spirits from domestic materials, at any distillery, at which there are one or more stills of more capacity together than 150 gallons, at the rate of 50 cents per gallon on the capacity of such stills;
3. On other stills, solely employed in distilling spirits from fruit, at the rate of 5 dollars on each still, a year;
4. On other stills, solely employed in distilling spirits from any domestic materials, at the rate of 15 dollars on each still, a year.

6th. *Resolved*, That duties be laid on licences to retailers of wines, spirits, and foreign merchandise, including tavern keepers, at the following rates, viz:

If in cities, towns, or villages, containing more than one hundred families—

1. On retailers of foreign merchandise, including wines and spirits, 25 dollars;
2. On retailers of wines alone, 20 dollars;
3. On retailers of spirits alone, 20 dollars;
4. On retailers of domestic spirits alone, 15 dollars;
5. On retailers of foreign merchandise, other than wines and spirits, 15 dollars.

If in any other place than cities, towns, or villages, containing more than one hundred families—

1. On retailers of foreign merchandise, including wines and spirits, 15 dollars;
2. On retailers of wines and spirits, 15 dollars;
3. On retailers of domestic spirits alone, 10 dollars;
4. On retailers of foreign merchandise, other than wines and spirits, 10 dollars.

7th. *Resolved*, That duties be laid on sales at auction of foreign merchandise, for every hundred dollars of the purchase money, two dollars; and on sales at auction of ships or vessels, for every hundred dollars of the purchase money, twenty-five cents.

8th. *Resolved*, That a duty of four cents per pound be laid on all sugars refined in the United States, allowing a drawback on the exportation of the same.

9th. *Resolved*, That duties be laid on carriages, used for the conveyance of persons, at the following rates, viz:

1. On every coach, chariot, and postchaise, 25 dollars;
2. On every phaeton, and on every coachee having pannel work in the upper division thereof, 15 dollars;
3. On every other four wheel carriage, hanging on steel springs, 10 dollars;
4. On every four wheel carriage hanging upon iron or wooden springs, and on every two wheel carriage with a top, or hanging on steel or iron springs, 5 dollars;
5. On every other four or two wheel carriage, 3 dollars.

10th. *Resolved*, That stamp duties be laid on the following instruments of writing, viz:

1. On all notes payable to bearer, or order, issued by any bank or bankers, at rates on an average of one dollar for every hundred dollars, with an option to pay, in lieu thereof, $2\frac{1}{2}$ per centum on their dividends;
2. On all notes of hand above fifty dollars, payable to bearer, or order, having one or more endorsers, and on all bills of exchange above fifty dollars, having one or more endorsers, at rates, on an average, of five cents for every hundred dollars.

11th. *Resolved*, That three millions of dollars be raised by a direct tax, to be apportioned among the several States, agreeably to the rule prescribed by the constitution.

12th. *Resolved*, That each State be authorized to pay the amount of its quota to the United States, with a deduction of 15 per cent. if paid before the assessment is commenced, and of $7\frac{1}{2}$ per cent. if paid before the tax becomes due.

13th. *Resolved*, That all the duties above enumerated, and the tax aforesaid, shall be laid and become payable only, after the United States shall have become engaged in a war with a foreign European nation; or shall have authorized the issuing of letters of marque and reprisal against the subjects of such nation.

14th. *Resolved*, That the said duties and tax shall continue until one year after the conclusion of peace with such foreign nation, and no longer.

[12th CONGRESS.]

No. 369.

[1st SESSION.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 28, 1812.

TREASURY DEPARTMENT, *February 27, 1812.*

SIR:

I have the honor to transmit, herewith, a statement of the gross and nett amount of the customs, prepared in obedience to a resolution of the House of Representatives, of the 11th ultimo, and accompanied by an explanatory letter from the Register of the Treasury.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the *House of Representatives.*

TREASURY DEPARTMENT, *Register's Office, February 27, 1812.*

SIR:

Agreeably to a resolution of the House of Representatives, of the 11th January, 1812, I have the honor to transmit, herewith, a statement of the gross and nett amount of the customs, together with the amount of drawbacks, &c. and expenses of collection, in each State and territory, from the commencement of the present Government, annually, to the 31st day of December, 1810.

In making this exhibit, it was deemed most advisable to have it correspond with the printed public accounts, for which purpose an additional column for bounties and allowances is introduced, which, although not called for by the resolution, it is presumed will, however, be satisfactory.

I have the honor to be, very respectfully, sir, your obedient servant,

JOSEPH NOURSE, *Register.*

Honorable ALBERT GALLATIN.

Statement exhibiting the gross and nett amount of the customs, together with the amount of drawbacks, &c. and expenses of collection, in each State and Territory, from the commencement of the present Government, annually, to the 31st day of December, 1810.

From the commencement of the present Government to the 31st December, 1791.

12th CONGRESS.]

No. 370.

[1st SESSION.]

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 6, 1812.

To the Honorable the Senate and House of Representatives of the United States of America, the under written citizens of the State of Connecticut respectfully represent:

That we have lately observed, among the various applications to Congress, on the subject of commerce, petitions for the importation of wire from Great Britain, on a suggestion, as we believe, altogether unfounded, that a supply of wire cannot be made in the United States, and that such importation is necessary to our infant manufactories. We therefore beg leave to state, that, since the first of August last, we have erected, in the towns of Simsbury and Winchester, in this State, two manufactories for making iron wire, wherein, without any previous knowledge of the business, we have succeeded in making the various species of iron wire, of the best quality, from native ore, which, with suitable encouragement, may be increased to any quantity required, and afforded at a moderate price.

We therefore humbly request, that, instead of allowing the importation of wire, as heretofore, free of duty, whenever the importation thereof may be again allowed, it may be done on payment of such duties as to your honors may appear reasonable. And, as in duty bound, will ever pray,

SAMUEL HEADLEY & Co.
WADSWORTH, ALLYN & BOSTWICK.

As a proof of our success, we enclose, herewith, two samples of card wire, made in said Simsbury.

HARTFORD, February 25, 1812.

From an examination of several samples of iron wire, made in Simsbury and Winchester, and a knowledge of the reputation of the petitioners, we believe the facts stated in the foregoing petition are true.

JOHN J. PETERS, and others.

HARTFORD, February, 25th, 1812.

12th CONGRESS.]

No. 371.

[1st SESSION.]

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 20, 1812.

To the Honorable the Senate and House of Representatives of the United States: in Congress assembled, at their session, now in 1812, the petition of the subscribers, citizens, inhabitants, and iron manufacturers, in the Commonwealth of Pennsylvania, on behalf of themselves and others, humbly sheweth:

That, in order to improve their estates, respectively, as well as to aid the manufactories of the United States, in general, they have, at large expense, erected a number of furnaces, forges, rolling and slitting mills, steel furnaces, and tilt hammer forges, for manufacturing iron and steel, for the use of the citizens of the United States.

That, in common with other citizens of the United States, pursuing the same branches of business, they expected a reward, by a just and reasonable sale of their productions, for the expenses and industry necessary to erect, carry on, and support, works of such public utility to the American People.

That, to their surprise, they find that the subjects of those governments, or kingdoms, in Europe, who have endeavored to injure, if not to annihilate, the commerce of the United States, are bringing into the American market their wrought iron, and endeavoring to undersell the American manufacturers of those articles, whilst the commerce of the United States is subjected, in those countries, to such restrictions, duties, risk, and danger, so as nearly to destroy all the advantages the United States have any right to calculate on by commerce.

Your petitioners beg leave further to state, that they have succeeded in their several branches of iron manufacture equal to their expectations; and that the iron they make is equal, if not superior, to any imported from beyond sea, for the various purposes to which it is necessary to apply it in the United States.

They therefore pray that the honorable the Legislature of the United States will afford them protection to their manufactories, by a law, laying such countervailing duties on imported wrought iron, as will secure a just and reasonable reward to your petitioners, and others pursuing the same business, or in such other way as in your wisdom may seem meet.

And your petitioners, as in duty bound, will ever pray.

DAVID STEWART, and others.

12th CONGRESS.]

No. 372.

[1st SESSION.

DRAWBACK OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 30, 1812.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of Ebenezer Rollins, of Boston, made the following report:

That the petitioner, on or about the 20th of May, 1810, shipped on board the ship Rebecca Coffin, in the port of Boston, for Gottenburg, in the kingdom of Sweden, 29 hogsheads, 4 barrels, and 52 bags of coffee; which articles were imported in the district of Portland and Falmouth, on the 9th of June, 1809. That the said merchandise was loaded on board the said ship, on the 17th of May, 1810, for the benefit of a drawback; that she cleared out at the custom house in Boston, and was ready for sea, on the 7th June, 1810, and every requisite complied with to entitle the petitioner to the drawback, on the said 7th of June.

The petitioner further states, that, owing to a violent storm from the northeast, the said ship did not sail from the port of Boston until the 13th of June, 1810. That, on application to the collector for his debenture, he refused to grant it, on the ground that the said merchandise was not exported within the period of time for which drawbacks are allowed—twelve months having elapsed from the day of importation. On the 9th of June, 1810, the twelve calendar months expired.

This claim for the drawback on certain goods which have been exported, has been refused by the Treasury Department, on the application of the petitioner.

The committee cannot sustain the prayer of the petition, as the law is peremptory. The goods must be exported within twelve calendar months, to be entitled to the drawback. The goods for which the drawback is claimed, were exported after the time specified for the allowance of drawbacks had expired. Some rule must be observed, in cases of this kind, or the revenue will be liable to suffer great diminution.

If the committee were to authorize a departure of one day beyond the twelve calendar months, the committee might, on the same principle, extend the term to two or more years.

Averse to any innovation on the present system of drawbacks, as authorized by law, the committee beg leave to recommend the adoption of the following resolution:

Resolved, That the prayer of the petitioner ought not to be granted.

12th CONGRESS.]

No. 373.

[1st SESSION.

SUSPENSION OF THE PAYMENT OF CERTAIN BILLS,
Drawn under the Convention with France, of the 30th April, 1803.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 6TH APRIL, 1812.

COMMITTEE ROOM, *March 4, 1812.*

SIR:

Your several letters, of December 29th, and of the 25th ult. in relation to sundry bills drawn by Mr. Armstrong upon the Treasury of the United States, in favor of the cashier of the French Treasury, for the amount of certain claims, arising under the Louisiana convention, in favor of American citizens, have been received, and, with the documents accompanying them, submitted to the Committee of Ways and Means.

I am instructed by the Committee to inform you, as the result of their consideration, that, in the present state of that transaction, and from a view of the circumstances under which it is presented to them, they have deemed it their duty not to interfere in the regular course of accountability to which it is now subject.

I have the honor to be, with great respect, your obedient servant,

Hon. ALBERT GALLATIN,
Secretary of the Treasury.

EZ. BACON.

TREASURY DEPARTMENT, *25th February, 1812.*

SIR:

I had the honor, on the 2d December last, to address you on the subject of Mr. Armstrong's accounts, and now enclose a letter lately received from him.

Permit me to remind the committee, that the Secretary of the Treasury is bound to pay the bills drawn by the minister; and that the law having vested him with no discretion in that respect, the bills alluded to in my former letter will be paid whenever presented for that purpose. If, therefore, it is the opinion of the committee that they should not be paid, a law to that effect is necessary. On the other hand, if it be intended that they should be paid, a law is equally requisite to authorize the accounting officers to credit Mr. Armstrong for the amount. The detention of the bills in France (for causes not known at the treasury) having afforded an opportunity to obtain the sense of Congress on the subject, it would seem hard not to decide on it: for, if no decision be made, the bills will be paid, and Mr. Armstrong will remain accountable for the amount; whilst, on the contrary, he has no interest in the nature of the decision, provided it shall be made, since it is immaterial to him whether the bills be refused payment, in which case he will not be charged at all, or whether, being paid, he receives credit for their amount.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

P. S. I would wish to be enabled to inform Mr. Armstrong whether his presence be thought necessary.
Honorable EZEKIEL BACON, *Chairman of the Committee of Ways and Means.*

RED HOOK, 7th February, 1812.

DEAR SIR:

Not having yet seen a reference to any committee of Congress, of that part of my bill account which you have not hitherto thought yourself authorized to settle without the intervention of that body, and seeing much new business growing up for you, I begin to fear that the present session, like the last, will pass over without obtaining a decision on this subject. If Congress should not approve the arrangement made between the minister of the French treasury and myself, and which left in the hands of the cashier general, bills to a certain amount, for the purpose of discharging a given number of specified claims which had been liquidated in the ordinary form, but which, from various causes, had not, after a lapse of more than two years, been paid to the claimants, it is important that they should do so while they may have a power over the funds. In this case they could, by their minister in Paris, institute a new negotiation, and give such other form to the business as they might think safer and better than that which had been adopted. You will remember, that, when at Washington, I pressed the reference on this ground, and even invited you to suspend the payment of the bills, should they arrive, until the directions of Congress should be procured. This, you then thought, you had no power to do, which gave, and continues to give to the affair, an importance, as it relates to myself, which must be my apology for pressing it again on your notice. If you will have the kindness to advise me of the time you mean to offer it to the committee, I will not hesitate to go to Washington, and carry with me all that part of my correspondence with the French Government, which has any relation to the subject. There is, I find, much of it, and I would choose to be the bearer of it myself. When I recollect the labor and vexation I have already had in executing the convention; that it was a duty altogether wide of my ministerial functions, and entirely without remuneration of any kind; I do think (as you have very frankly acknowledged in one of your letters to me) that I ought to be as little embarrassed by it, hereafter, as possible. To me, no embarrassment could have arisen, had the reference been made as you promised and intended, at the last session of Congress; because, at that time, the remedy, whatever it might have been, would have been interposed before the bills were presented and paid, and of course before any charge of them against me could have been made. Had Congress approved the arrangement, there would have been an end of the business; had they disapproved it, they must, at the same time, have interdicted the payment of the bills. In either case, therefore, I should have been at my ease. Whether, however, the bills have, or have not, been paid since, I must entreat you to delay the reference no longer. This I have a right to claim, as well from your good will as your justice, and in both I have entire confidence.

I should be much obliged, if, in acknowledging the receipt of this letter, you would be good enough to state whether the bills in question have arrived and been paid.

With very great esteem and regard, I am, dear sir, your most obedient and humble servant,

JOHN ARMSTRONG.

HON. ALBERT GALLATIN.

TREASURY DEPARTMENT, December 2, 1811.

SIR:

Mr. Armstrong, in conformity with the second section of the act of November 10, 1803, "making provision for the payment of claims of citizens of the United States on the Government of France," &c. had been charged with the whole amount of bills drawn under the Louisiana convention. As that instrument contained a provision which made the French Government the final judge of all the claims, Mr. Armstrong has been credited, on producing, as his voucher, a certificate from that Government, a copy of which is enclosed in the papers now transmitted. In point of form, however, there has been, in one instance, a deviation from the convention, which renders the sanction of Congress necessary, before the accounts can be finally settled.

In order to close the transaction, Mr. Armstrong and the minister of the French treasury entered into an agreement for the disposition of a sum of 196,658.43 francs, which was the unapplied balance of the twenty millions payable by the convention on account of American claims. The accounting officers of the treasury do not consider themselves authorized to credit Mr. Armstrong for the amount of the bills drawn by virtue of that agreement, principally because a portion (amounting to 115,534.41 francs) is drawn in favor of the cashier of the French treasury, for certain claims which the French Government has, on that account, assumed to pay, instead of being drawn, according to the convention, in favor of the claimants themselves. And for the same reason, a doubt arises whether those bills, which have not yet been presented for payment, ought to be paid by the treasury.

The objections, together with Mr. Armstrong's explanations of the arrangement, are enclosed.

Although these embrace some other collateral points, the agreement above stated is the only one under the consideration of the treasury, and which prevents a final settlement.

It will be recollected, that it had, once before, been necessary to apply for a similar legislative sanction, which was given by the act of April 18th, 1806.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. EZEKIEL BACON,

Chairman of the Committee of Ways and Means.

TREASURY DEPARTMENT, April 2, 1812.

SIR:

I regret to be obliged, once more, to trouble you on the subject of Mr. Armstrong's account. But you will perceive, from the enclosed extract of his letter to me of the 19th ult. that he has received information that a part of the bills, drawn in the name of the cashier general of the French treasury, has been diverted from the objects of the agreement, and been vested in a person who was not a claimant under the convention.

The inference drawn from that fact by Mr. Armstrong is, that it authorizes the Secretary of the Treasury to refuse the payment of the bills until evidence shall be given, that the terms of the agreement, on the part of France, have been fulfilled. But, with that agreement, the treasury has nothing to do, and its decision cannot be affected by the fulfilment or non-fulfilment of those terms, on the part of France. Provided the bills are drawn by the minister of the United States at Paris, and provided they are, on the face thereof, expressed to be drawn under the convention, and are duly endorsed by the person in whose favor drawn, they *must* be paid at the treasury. Yet it would be very unpleasant for the Secretary to be placed in that situation, after the information received from Mr. Armstrong. And as this information affords solid ground why the payment of the bills should be suspended until evidence, as abovementioned, shall have been received, it seems proper to lay again the subject before the Committee of Ways and Means, who may, if they view the new fact, now communicated, in the same manner, propose a provision, authorizing the Secretary of the Treasury to refuse or suspend the payment of the bills.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Hon. Ez. BACON,

Chairman of the Committee of Ways and Means.

Extract of a letter from General Armstrong to the Secretary of the Treasury, dated Red Hook, 19th March, 1812.

"I have received information recently from France, which essentially alters its circumstances,* and will, I think, make a ministerial injunction on the payment of the bills drawn to the order of the cashier general, both proper and necessary, until evidence shall be given, that the terms of the agreement on the part of France, have been fulfilled. The substance of this information is, that part of these bills have been diverted from the objects of the agreement, and been actually vested in a person of the name of Dauchy, who was not a claimant under the convention, either in his own right or in that of another. In this information I have the most entire confidence. The man who gives it cannot mistake, and will not deceive. If any thing in the form of an affidavit, with regard to the facts of my being possessed of such information, or of my belief that it may be relied upon, is requisite, it shall be immediately furnished."

A.

Extract of a letter from the Secretary of the Treasury to General Armstrong, dated September 4th, 1809.

"There are several bills drawn in the name of the cashier general of the public treasury, without any indication of the claim, or on whose account they are drawn. As he could have no right to bills in his own name, the claim out of which they arose ought to be made known to the treasury of the United States.

"The last claim on the second French list, which is made to include the whole balance remaining undrawn of the twenty millions of francs, appears to have been left by the Emperor to be drawn for in any name you should designate, under certain conditions. The nature of this transaction, the claims which this sum is intended to satisfy, and the persons who are entitled to the money, must be explained before you can be discharged regularly at the treasury from the amount. It must also be shewn that Mr. Warden, in whose name the bills have been drawn, has paid over the money to the persons entitled to receive it."

B.

PARIS, February 6th, 1810.

SIR:

Your letter of the 4th September last, having made the detour of Amsterdam, did not reach me till within the last week. The variations which you state between the general list of vouchers and my bills drawn on the treasury, have arisen principally from a desire of the clerks in the French bureaux to abridge their own labor. It becomes a duty, on my part, therefore, to give you entire copies of the original vouchers on which the seven bills noted by you as requiring explanation have been drawn, as well as of those on which payments have been made to the order of the cashier general of the French treasury. To these you will find subjoined, an explanation of the final arrangement of the Louisiana business; the claims which have been satisfied by it; the names of the persons for whose use the bills have been paid; and lastly, the proof that Mr. Warden has paid them. Hoping that this explanation will discharge me from all responsibility in the case,

I am, sir, with great consideration, your most obedient and humble servant,

JOHN ARMSTRONG.

HON. ALBERT GALLATIN, &c.

No. 51. The Minister of the public treasury, charged with the execution of the Convention of the 10th Floréal, year 11, (30 April 1803) certifies to General Armstrong, Minister Plenipotentiary of the United States,

That, by decision of his Imperial Majesty, the liquidation of livres 164,301.15.5 (francs 162,248.4) made in the name of Eric Gladd, is reduced to one half; that the francs 81,124.2, forming the other half, and chargeable upon the twenty millions, remain at the free disposal of General Armstrong, under condition: 1. That Mr. Mitchell shall no longer have the right to claim, from the public treasury, the 14,000 francs which remained to be paid, of the 20,000 allowed to him by the former decision of his majesty. 2. That the claim made in the name of Maurice Giraud, arising out of contracts made between the agents for the subsistence of Paris and him, in the year 4, shall remain extinguished, without being capable, under any circumstances, of being renewed, against the French Government, either by the said Giraud, or by any other person in his right.

That the francs 81,124.2, to which Eric Gladd's liquidation is reduced, and the francs 14,000 remaining of the sum previously allowed to Mitchell, shall be paid to the public treasury, making - - Francs 95,124.2

That the same course shall be taken with the undermentioned liquidations, which have not yet been claimed:

No. 27. John Clark,	-	-	-	-	-	-	-	-	-	Francs, 95,124 02
58. Samuel Leighton,	-	-	-	-	-	-	-	-	-	2,768 32

392. Perron,	-	-	-	-	-	-	-	-	-	3,132 01
395. Nicholas Goix,	-	-	-	-	-	-	-	-	-	1,983 15
										900 52
										<u>Francs, 115,534 41</u>

By the delivery of bills drawn to the order of the cashier general, for the sum of francs 115,534.41, the public Treasury will stand bound to acquit the claims which may be made in the names of Eric Gladd, John Clark, Leighton, Tupper and Platt, Perron, and Goix.

That this sum of 115,534.41, and the 81,124.02 placed at the disposal of General Armstrong, complete the amount of American claims liquidated and chargeable on the twenty millions; that the convention of the 10th Floréal, year 11, will thus be definitively executed, and the payment of the twenty millions entirely completed.

The Count of the Empire, Minister of the Public Treasury,

MOLLIEN.

PUBLIC TREASURY, February, 21, 1809.

* The circumstances of the case.

MINISTRY OF THE PUBLIC TREASURY, *Paris, March 14, 1809.*

SIR:

I have received, from your excellency, your letter of the 10th of this month, the five bills to the order of the cashier general of the public treasury, making, together, frs. 115,534.41, which were to be delivered conformably to the decision of his majesty.

His Excellency Gen. ARMSTRONG.

MOLLIEN.

Explanation of the last article in the general voucher No. 2.

In the month of February, 1808, many difficulties arose with regard to the application of what remained of the Louisiana fund. A proposition, founded on the exclusive right of the French Government to this balance, was received by me, and peremptorily rejected. A second proposition, No. 1, followed, less objectionable, indeed, but sufficiently so to be rejected also. This letter, apparently, left to me the power of applying the sum gained to the fund, on the reduction of Gladd's claim, but really appropriated that sum to those of *Dauchy* and *Swan*, neither of which had received my approbation. A third proposition, No. 2, was then offered, which left nothing in controversy between Mr. Mollien, and myself, but the payment to *Dauchy* of 14,000 frs.* Believing that this was not a point to higggle upon, extremely anxious to close the business, and fearful least a too great tenaciousness might defeat its own object, I adopted the last proposition, (inserting the two articles underscored) and transmitted it to the minister, officially, with my letter, No. 3, of the 16th Feb. 1809. On the 21st of that month, I received his answer, No. 4. The voucher on the same day by Mr. Mollien, and the payment by me, on the 10th of March, p. 12, were the consequences of their arrangement. It remains, therefore, only to show what was the appropriation of the balance of 81,104f. 4c. which had been put, by their arrangement, at my disposition. This was as follows, viz: to John Holmes, claimant for supplies of provisions, 5,000f.; to John Mitchell, do. for supplies of do. furnished through Perotise, 14,000f.; to Joseph Russell, for ship Fame, 62,000f. In making this division, I was guided altogether by the nature of these several claims, their extent, and the degree to which they had been already satisfied. Besides, of the sum granted to Mr. Russell, there has been retained (as stated in a former letter) 25,000f. so that the sums actually paid have been—

5,124 francs, 4 centimes,	in behalf of Holmes,
14,000 do -	in behalf of Mitchell,
37,000 do -	in behalf of Russell.

The first and last of these sums were paid to the attorney of Russell and Holmes, (Mr. O'Mealy) a copy of whose receipt is annexed, No. 5, and Mr. Warden, being himself the attorney of Mitchell, † made such payments on his account as had been directed by him.

No. 1.

The following are the principles on which we may now hope to terminate the Louisiana affair:

1. There remains a disposable sum of 14,000 frs. which may serve to pay Mr. Mitchell. The credit of *Dauchy*, for which that sum was intended, may be provided for out of the funds mentioned below.
2. There are four credits not claimed; those of *Gladd*, *Leighton*, *Tupper* and *Platt*, and *Goix*. That of *Gladd*, including the interest, amounts to the sum of 162,634.68 frs. That may be divided in equal moieties; the credits of *Leighton* and the others, to remain entire to the treasury. And it may be stated, that, with one-half of *Gladd's* credit, and the whole of *Leighton's* and the others, the public treasury shall be charged to meet, in the most convenient manner, the final claims which may be made by the parties interested, without the Government of the United States being, in any event, liable to be called upon for them.
- To complete this operation, General Armstrong shall deliver bills to the treasury, drawn in the name of the cashier general, for the amount agreed upon.
3. Of the other half of *Gladd's* liquidation, amounting to 81,317f., it shall be expressed that Mr. Armstrong is to make the following application: 14,000 frs. to pay *Dauchy*, and the balance for the discharge of *Maurice Giraud*, who shall declare that he renounces all future demands, in any way, upon the French Government.
4. The proposition for the arrangement upon these terms, is to be made by Mr. Armstrong, who may take advantage of the intentions of his Government, which has manifested a wish that the liquidation of *Gladd* should be reduced.
5. The minister of the treasury will obtain, upon all this, the ideas of his majesty, whose approbation cannot be doubted, when the two ministers shall have agreed; and, the approbation once given, the Louisiana affair will be irrevocably completed.

No. 2.

The Louisiana liquidation may be finished as follows:

1. The 14,000 frs. still to be disposed of, shall remain to the treasury.
2. The little liquidations of *Leighton*, *Tupper* and *Platt*, and *Goix*, shall remain to the treasury, to be paid over to the claimants.
3. The liquidation under the name of *Gladd*, amounting to 163,891 frs. shall be divided into equal moieties. One of these moieties, amounting to 81,945.50 frs. shall be paid to General Armstrong, to be disposed of as he shall think proper.
4. General Armstrong shall deliver to the treasury, bills drawn in favor of the cashier general, for the 14,000 frs. the little liquidations of *Leighton*, *Tupper* and *Platt*, and *Goix*, and for the 81,945.50 frs.
5. He shall, in like manner, place in the hands, and draw in favor of *D. B. Warden*, bills amounting to the sum of 81,945.50 frs. for account of *Mitchell* and others.
6. It shall be stated, that neither *Mitchell*, nor *Maurice Giraud*, are, hereafter, under any pretence, to make a claim against the public treasury.
7. The minister of the public treasury shall furnish Mr. Armstrong with a general authority for the above payments, conformably to the decision which may be given by his majesty, and in the ordinary form. ‡

PARIS, *February 1, 1809.*

SIR:

I have the honor of submitting a proposition§ to your excellency, the object of which is to bring to a close the very protracted business of the convention of 1803. Should it meet your excellency's approbation, you will be pleased to take the step necessary to give it execution. Should you disapprove it, you will be pleased to signify your disapprobation.

Accept, &c.

JOHN ARMSTRONG.

* This very thing had already protracted the settlement one year.

† Mr. Mitchell being now in the U. States, will give to Mr. Gallatin such further information on this head as he may wish.

‡ This article, and article No. 5, were the articles added by me.

§ This was proposition No. 2, p. 17.

MINISTRY OF THE PUBLIC TREASURY, *Paris, February 14, 1809.*

SIR:

The mode proposed by your excellency, for completing the payment of the 20 millions, has been approved by his majesty. I rejoice at my concurrence in the adoption of measures which go to terminate, definitively, and to our mutual satisfaction, the execution of the convention of the 10th Floréal, year 11.

I have the honor to transmit to your excellency the certificate containing its detail.

I pray your excellency to accept, &c.

MOLLIEN.

The Minister Plenipotentiary of the United States.

C.

TREASURY DEPARTMENT, *November 1st, 1810.*

SIR:

I have the honor to transmit a copy of the statement of your account (for bills drawn under the Louisiana convention) as adjusted by the auditor of the treasury, together with copies of two statements therein referred to. You will perceive that the two sums suspended, and not yet carried to your credit, consist, 1st, of the bills which have not yet been paid; 2dly, of the amount drawn in favor of Mr. Warden, under your arrangement of February, 1809, with Mr. Mollien. But neither are you, or can you, be charged with the first item, until the bills shall have been paid at the treasury. The only point, therefore, on which the accounting officers wish some further explanation, is that of the arrangement with Mr. Mollien; it being doubted whether (however proper it may have been in itself under all the circumstances of the case) it is in conformity with the convention; and whether, therefore, they can legally give you credit for the amount paid at the treasury in consequence thereof.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

His Excellency JOHN ARMSTRONG, *Minister, &c. &c.*

Notes on Mr. Armstrong's letter of February 6, 1810, containing explanations upon the points stated in the letter of the Secretary of the Treasury to him, of September 4, 1809, as requiring to be cleared up, before his account, for bills drawn under the Louisiana convention, could be settled and closed at the treasury.

1. *Variations between the names contained in some of the bills, and the names entered against the corresponding claims in the French lists.*—Seven cases of this nature were particularly pointed out. Copies of the vouchers (consisting of the minute, or order, of the minister of the public treasury, for the drawing of the bills) are furnished, and appear satisfactory.

2. *Bills drawn in the name of the cashier general of the public treasury.*—The right of the public treasury of France to receive any bills under this convention, may well be contested; but it is, perhaps, not the time now to make any objection to it. It was a subject of discussion between Mr. Armstrong and the French minister, and the result was, that he drew the bills; his motives for acceding to this measure have been explained in his correspondence. The sum of 115,534.41 francs, being the last sum drawn in the name of the cashier general, however, stands upon a different footing from the other sums drawn in his name, and is to be separately considered under the next head.

3. *A sum of 81,124.02 francs, drawn by Mr. Armstrong in the name of David B. Warden.*—This sum, by Mr. Armstrong's explanation, is closely connected with the next preceding sum of 115,534.41, drawn in the name of the cashier general of the public treasury, and the following seems to be the history of the transaction: After paying all the claims admitted under the convention, which were applied for by the claimants, there appeared, in February, 1809, to be a sum of 196,658.43 francs remaining of the twenty millions; this sum appears to have been originally destined for the payment of the following claims viz:

Eric Gladd,	-	-	-	-	-	-	-	Francs	162,248.04
John Clark,	-	-	-	-	-	-	-	-	2,768.32
Samuel Leighton,	-	-	-	-	-	-	-	-	11,626.39
Tupper and Platt,	-	-	-	-	-	-	-	-	3,132.01
— Perron,	-	-	-	-	-	-	-	-	1,983.15
Nicholas Goix,	-	-	-	-	-	-	-	-	900.52
									<u>182,658.43</u>
John Mitchell,	-	-	-	-	-	-	-	20,000	
Of which had been paid,	-	-	-	-	-	-	-	6,000	
									<u>14,000.00</u>
								Francs,	<u>196,658.43</u>

The bills for the six claims first mentioned had not been applied for; Mitchell had applied for his bills, and demanded twenty thousand francs, but only six thousand had been given him. This being the state of things, the Emperor resolved (see Mr. Mollien's letter to Mr. Armstrong, in the form of a certificate, dated 14th March, 1809) that Eric Gladd's claim should be reduced to one-half of the sum at which it had been admitted, and that the half of that claim, thus rejected, amounting to 81,124.02 francs, should be put into the hands of Mr. Armstrong, to be given to what claimants he pleased: *Provided*, 1. That Mitchell should no longer claim from the French treasury, the fourteen thousand francs still due to him, (which was virtually to say, that Mr. Armstrong must pay him out of this sum thus put at his disposal.) 2. That a claim of Maurice Giraud, on the treasury of France, should also be abandoned, (implying, also, as is presumed, that this claim must be paid by Mr. Armstrong, out of this sum, and which he is supposed to have paid to John Holmes, in right of Giraud.) And, 3. That the other half of Gladd's claim, which was still to be considered as recognised for a valid claim, amounting to Francs, 81,124.02

And the other five claims, not yet applied for, amounting to - - - - - 20,410.39

And the amount of Mitchell's claim, unpaid, and which Mr. Armstrong was now to pay out of the sum put in his hands, viz: - - - - - 14,000.00

And amounting, altogether, to - - - - - Francs, 115,534.41

Should be paid to the French treasury, they assuming to pay Gladd's claim, and the other five outstanding claims, whenever they should be called for.

On this arrangement it is sufficient to remark, 1st. That the Emperor arbitrarily, as far as it appears, since no grounds for the act are assigned, took away from Eric Gladd 81,124.02 francs, of which sum he put into the French treasury 14,000 francs, and gave the other 67,124.02 to General Armstrong, to distribute among such claimants as he pleased. 2d. That Eric Gladd, for that portion of his claim which is left, and the other five claimants, for their claims, instead of receiving bills on the treasury of the United States, as they were entitled by the convention, are turned over to the French treasury for payment. 3d. The whole sum received by General Armstrong, which was left free in his hands, has been given, as he himself states, to Joseph Russell, for the ship *Fame*; unless the sum

which he has paid to John Holmes, should prove *not* to be the claim of Maurice Giraud, for provisions, which was expressly named in Mr. Mollien's certificate stating this arrangement. This is supposed to be the same claim, because Mitchell's claim, which, like Giraud's, was particularly named in Mollien's certificate, was provided for by Mr. Armstrong; and, also, because Giraud's claim was founded on a contract with the *agent des subsistances de Paris, en l'an IV*, and Holmes's claim, paid by Mr. Armstrong, was for provisions, as he himself states. The disposition, then, of the sum received by Mr. Armstrong, being - - - - - Francs, 81,124.02

Was as follows:

To Mitchell, as provided by the arrangement with the minister of the French treasury, and the result of which was, to enable them to put the same sum into the French treasury, without any legal right whatever,	Francs, 14,000.00
To Holmes, as was also provided by the arrangement, provided his claim is the same as Maurice Giraud's, which is supposed to be the case,	5,124.02
To Joseph Russell,	62,000.00
	81,124.02

The merits of the claim of Joseph Russell, above all others, are not shown any farther, than, as Mr. Armstrong states, that, in making the *division*, "he was guided, altogether, by the nature of the several claims, their extent, and the degree to which they had been already satisfied."

The above ideas appear to offer objections sufficient to prevent the settlement of Mr. Armstrong's accounts at the present time. The grounds upon which the whole arrangement was made with Mr. Mollien, in February and March, 1809, respecting the sum of 196,658.43 francs, are not perceived to arise out of the convention; and it deserves consideration, whether the bills for 115,534.41 francs, drawn in the name of the cashier general of the public treasury, should be paid when they are presented here.

May 22d, 1810.

[TRANSLATION.]

MINISTRY OF THE PUBLIC TREASURY, *Bureau of Oppositions.*

The Minister of the Public Treasury, charged with the execution of the convention of the 10 Floréal, year 11, certifies to General Armstrong, Minister Plenipotentiary of the United States, that the undermentioned items form a part of the claims liquidated and verified, in conformity with the dispositions of the said convention, and of the decisions of his Imperial Majesty; and that they have been paid in orders upon the United States, since the 10th July, 1807, on which day a statement was transmitted to General Armstrong, of the sums previously paid.

[Here follow the names of sundry persons, and the amount of the claims allowed in their favor. The two last on the list are the following:]

20. The cashier general of the public treasury, 115,534.41.

21. The 81,124.02 francs, left, by the decision of his majesty, to the disposition of General Armstrong, under condition that Messrs. Mitchell and Maurice Giraud shall no longer have a right to make any claims upon the French Government; this sum, chargeable upon the twenty millions, and for which Mr. Armstrong has announced, by his despatch of 10th March instant, that he has drawn in favor of Mr. Warden, 81,124.02.

[Here follows a recapitulation of the sums which had been certified to Mr. Armstrong, and for which he had drawn bills, amounting, together, including the two above items, to twenty millions of francs. The certificate concludes as follows:]

Thus, the payment of the twenty millions, the object of the convention of the 10 Floréal, year 11, is entirely consummated, and this convention completely and definitively executed.

MOLLIEN.

PUBLIC TREASURY, *March 14, 1809.*

D.

WASHINGTON, 26th December, 1810.

DEAR SIR:

I am much obliged by your communication of the 24th instant, and hasten to present a statement, which will, I hope, have the effect of clearing away the obstructions which have arisen to the final settlement of my accounts, under the convention of 1803. In this, the character of Gladd's claim, and that of Maurice Giraud, which had not before been noticed with sufficient distinctness, are shown to be, the one, a claim coming regularly under that provision of the convention which the French Government had a right to decide definitively; and the other, a claim on which nothing could be paid, since it had been rejected by both Boards, French and American. As to the more general objection, that the bills drawn to the order of the cashier of the treasury did not specify the owners, and left the money to a disposition different from that contemplated by the convention, it may continue to have some force; in which case, these bills may be stopped at the treasury, until the provisions of the convention be better satisfied.

I am, &c. &c.

J. ARMSTRONG.

Mr. GALLATIN.

On the — day of —, there remained of the Louisiana fund, the sum of 196,658.43 francs. Appropriations had been made of a part of this sum, by the functionaries of both Governments, conjointly, which were as follows, viz:

John Clark,	Francs, 2,768.32
Samuel Leighton,	11,626.39
Tupper and Platt,	3,132.01
— Perron,	1,983.15
Nicholas Goix,	909.52

A farther appropriation, by the French council, had been made to Eric Gladd, of the sum of 162,248.04

This last appropriation was rejected by the American commission, and the objections against it being sustained by me, the French Government was brought, after much discussion, to reduce it to one half of the sum originally allowed. This claim belonged (as I believe) to the French commercial house at Nantz, of Dobree and Sweighauser; Gladd was but the captain, bringing the supplies on which it was founded, and never did appear, personally, as the claimant. The necessary effect of this reduction, was to add to the residuary fund the sum of 81,124.02 francs. When this decision was taken, sundry other claims were pending under the convention: these were, that of John Mitchell; that of John Holmes; that of Joseph Russell; and that of Maurice Giraud. The *first* and *last* of these had been rejected by the French council, on the ground that they were claims not embraced by the convention; and the last, (that of Giraud) was rejected by the functionaries of both Governments. These facts explain the nature of the conditions stated in the Emperor's decision, and, particularly, why (whatever may have been the wish of the French Government) I refused to give to the claim of Giraud any portion of the sum of 81,124.02 francs; this claim belonged to James Swan, who had already received two millions, and upwards, of the fund. To Mitchell, the four-

teen thousand additional francs were given, because he proved, most satisfactorily, that the supplies, out of which his demand grew, were made by Anthony Butler, of Philadelphia, in his own right, and for his own benefit.

The bill to Holmes (which has been supposed to arise out of the claim of M. Giraud) had no connexion, whatever, with that claim, and was paid, in part, of a much larger one, made for provisions furnished at St. Domingo and which passed one, or both, of the authorities recognised by the convention.

The bills to Russell were drawn to the amount of sixty-two thousand francs, for freight and demurrage of the ship *Fame*, the joint property of the said Russell and T. W. Francis, of Philadelphia, and on which nothing had been previously paid; of these, thirty-two thousand only have been delivered, for reasons formerly assigned in two letters, of different dates, to you. These circumstances do not present to me any deviation from the convention, or from the law made in consequence of it. When the Emperor put at my disposition a moiety of the sum originally and wrongfully appropriated to Eric Gladd, it was distinctly understood, that this moiety should be applied to the extinction of claims then pending against the French Government, and, of course, could only apply to those above mentioned. The quantum of allowance to each, was the only thing submitted, as I conceived, to my discretion; a circumstance which, by no means, takes these cases out of the ordinary rules of proceeding, as, in many others, my opinions were equally decisive, and, indeed, were necessarily so, since the American commission determined nothing with regard to quantum.

With regard to the other branch of the arrangement, it must also be remarked, that, on receiving my bills for the sum of 115,534.41 francs, the French treasury took upon itself to pay the claims *specified* on the first page, and which had otherwise continued to embarrass and retard a final settlement of the business. Between, therefore, granting specific bills in discharge of these claims, and granting one or more to the French treasury, which covered all and ensured a final settlement, I cannot suppose that there is a sufficient legal distinction to prevent my particular account from being closed. Should this opinion, however, be erroneous, I must request that these bills, granted to the cashier general, may be stopped at the treasury, and held over until some other mode be adopted, which shall entirely satisfy the letter of the law.

P. S. The bill of twenty-five thousand francs, retained from the appropriation to Russell, shall be sent to the treasury. If I do not mistake, this bill has on it an endorsement by D. B. Warden, of cotemporary date with itself, showing why it was withheld.

Dr. *John Armstrong, Minister of the United States at Paris, in relation to claims on France under the Louisiana Convention, of the 30th April, 1803, in account current with the U. States.* Cr.

	Dollars	Cts.		Dollars	Cts.
To treasury warrants, for amount of sundry warrants issued from the 6th July, 1805, to the 5th of February, 1810, inclusive, in payment of bills drawn by him, for debts due to citizens of the United States, by the Government of France, as admitted by said Government, under the Louisiana convention of the 30th of April, 1803; including those issued in discharge of certain embargo claims, referred for payment to the treasury, per certificate of the Register herewith, - Profit and loss, for this sum arising from fractions of cents, gained in calculation,	3,692,053	45	By amount of claims on the Government of France, adm ^d by said Government as due to citizens of the United States, and which, pursuant to the provisions of the Louisiana convention of the 30th of April, 1803, were payable by bills drawn by the said minister on the treasury of the United States, including sundry <i>embargo</i> cases, as per lists certified by the minister of the French treasury, herewith, marked A No. 1, 2, & 3, - - - <i>Francs</i> , 20,000,000 00 <i>Deduct</i> — Amount of claims for which bills have not yet been presented, per statement marked B, - - - 309,036 35 Also this sum, in drafts, to the order of D. B. Warden, held at the disposition of General Armstrong, suspended for further explanation. (See statement marked C) - - - - - 81,124 02 <hr/> 390,160 37 <hr/> 19,609,839 63 Equal, at 5½ francs per dollar, to Balance due to the United States, - - - - -		
		2		24	3,676,844
	\$3,692,055	69		15,210	76
				\$3,692,055	69

The evidence on which the above credit is admitted, rests, principally, if not solely, on the lists of claims certified by the minister of the French treasury. This, on considering the terms of the convention, and the letter of the Secretary to Mr. Armstrong, dated September 4, 1809, is thought sufficient; and, indeed, is all that could probably be obtained, as the documents belonging to each case, appear to remain in possession of the French Government.
R. H.

N. B. The balance due the United States, as above, is the value of the *frs.* 81,124 02, drawn in favor of D. B. Warden, and which is suspended until the titles of the parties, to whom it is stated to have been paid over, are more satisfactorily explained and established.

12th CONGRESS.]

No. 374.

[1st SESSION.

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 13, 1812.

TREASURY DEPARTMENT, April 10, 1812.

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed April 2d, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, Comptroller's Office, April 9, 1812.

SIR:

The statements herewith, marked A, B, and C, have been prepared pursuant to the seventh section of an act of Congress, passed 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." They contain all the information relative to the transactions of the mint, which the settlements made at the treasury enable me to afford.

I have the honor to be, with great respect, your obedient servant,

RICHARD RUSH.

Honorable ALBERT GALLATIN, Secretary of the Treasury.

A.

No. 375.

[1st SESSION.

SUBSCRIPTION TO THE LOAN OF ELEVEN MILLIONS OF DOLLARS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 18, 1812.

TREASURY DEPARTMENT, *May 14th, 1812.*

SIR:

Subscriptions were opened on the first and 2d instant, to the loan of eleven millions of dollars, authorized by the act of 14th March last, in conformity with the enclosed notice, A. It was left optional with the banks which were disposed to subscribe, either to receive stock or to loan the money by special contract. The enclosed circular letters, B, C, D, show the instructions transmitted, and the manner in which the proposals were made to the several banks. It was thought most eligible not to limit, in any place, the amount of subscriptions to any specific sum; for which reason, the loan was kept open only for two days, in order that the general result might be ascertained, and a reduction, if necessary, be made.

All the returns have now been received, and an abstract, E, is herewith transmitted. From these it appears that \$6,118,900 were subscribed in those two days, viz: \$4,190,000 by banks, and \$1,928,900 by individuals. This last sum is greater than the aggregate of all the loans at six per cent. ever before obtained by this Government from individuals in the United States;* and, considering the price of stocks and various obstacles which at this time have im-

*The only two six per cent. loans obtained from individuals in the United States by this Government, are, 1st. On account of the loan of 5,000,000 of dollars, authorized by act of 31st May, 1796, one half of which stock was advertised for sale for several weeks, without any offer being received, and of which, at last, only 80,000 dollars were sold at private sale. 2d. The navy six per cent. loan, authorized by the act of June 30th, 1798, which made the money subscribed, applicable, on the spot, to a favorite object, and left the management and application of the funds in the hands of the subscribers. The amount of this stock issued, in the whole, was \$711,700.

peded the subscriptions, the amount is as great as might have been expected within so short a period. The unsubscribed residue will now be apportioned amongst the several places, according to the apparent demand in each, and subscriptions will be received, or stock sold, until the sums thus respectively apportioned shall have been disposed of.

It is confidently believed that the amount which remains unsubscribed for will thus be filled as early as the money will be wanted for the public service. In order, however, to prevent the possibility of disappointment, and to remove doubts and erroneous expectations, I beg leave to submit the propriety of authorizing the issue of treasury notes, on the following principles, viz:

1. Not to exceed, in the whole, the amount which may ultimately not be subscribed to the loan; that is to say, that the amount received on account of the loan, and that of the treasury notes, shall not, together, exceed eleven millions; which limits, therefore, the greatest possible amount of treasury notes to less than \$4,900,000.
2. To bear an interest of $5\frac{1}{2}$ per cent. a year, equal to $1\frac{1}{2}$ cent per day on a one hundred dollar note.
3. To become payable by the treasury one year after the date of their respective issues.
4. To be, in the mean while, receivable in payment of all duties, taxes, or debts, due to the United States.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

HONORABLE LANGDON CHEVES, *Chairman of the Committee of Ways and Means.*

A.

Whereas, by an act of Congress, passed on the fourteenth day of March, in the year of our Lord one thousand eight hundred and twelve, the President of the United States is authorized to borrow, on the credit of the United States, a sum not exceeding eleven millions of dollars, at an interest not exceeding six per centum per annum, payable quarter yearly, so, however, that no engagement or contract shall be entered into, which shall preclude the United States from reimbursing any sum or sums, thus borrowed, at any time after the expiration of twelve years, from the first day of January, one thousand eight hundred and thirteen: And whereas, by the said act, so much of the funds constituting the annual appropriation of eight millions of dollars, for the payment of the principal and interest of the public debt of the United States, as may be wanted for that purpose, after satisfying the sums necessary for the payment of the interest and such part of the principal of said debt as the United States are now pledged annually to pay and reimburse, is pledged and appropriated for the payment of the interest, and for the reimbursement of the principal of the stock now to be created, and the faith of the United States is pledged to establish sufficient revenues for making up any deficiency that may hereafter take place in the funds now appropriated for paying the interest and principal as aforesaid: And whereas the President of the United States did, by an act or commission, under his hand, dated the thirtieth day of March, in the year one thousand eight hundred and twelve, authorize and empower the Secretary of the Treasury to borrow, on behalf of the United States, a sum not exceeding, in the whole, eleven millions of dollars, and to make the necessary contract for the same, pursuant to the act of Congress above recited:

Now, therefore, The undersigned Secretary of the Treasury, in pursuance of the act of Congress, and the authority from the President of the United States, abovementioned, doth hereby, on behalf of the United States, contract and engage, in manner following, to wit:

1. Books for receiving subscriptions to a loan of eleven millions of dollars, for the use of the United States, shall be opened on the first day of May next,

At Portsmouth, New Hampshire, at the Union Bank.

At Salem, Massachusetts, at the Merchants' Bank.

At Boston, Massachusetts, at the State Bank, Union Bank, and Massachusetts Bank.

At Providence, Rhode Island, at the Roger Williams Bank.

At Hartford, Connecticut, at the Bank of Hartford.

At the City of New York, at the Manhattan Company and Mechanics' Bank.

At Philadelphia, at the Bank of Pennsylvania, and Farmers and Mechanics' Bank.

At Baltimore, at the Bank of Baltimore and Commercial and Farmers' Bank.

At the City of Washington, at the office of the Bank of Columbia.

At Richmond, Virginia, at the Bank of Virginia.

At Charleston, South Carolina, at the State Bank and Planters and Mechanics' Bank.

Which books shall continue open for receiving subscriptions during the ordinary hours of transacting business at the said banks, for two days. If more than eleven millions of dollars, in the whole, shall be subscribed, the surplus shall be deducted in proportion to the sums subscribed in each place, respectively, by a reduction of the subscriptions exceeding four thousand dollars.

2. For every hundred dollars which may be subscribed, there shall be paid, at the time of subscribing, the sum of twelve dollars and fifty cents, and a like sum of twelve dollars and fifty cents on the fifteenth day of each of the ensuing months of June, July, August, September, October, November, and December, one thousand eight hundred and twelve, respectively. Each subscriber, at the time of paying any of the above instalments, after the first, may pay all or any number of the subsequent instalments, and will be entitled to receive interest, at the rate of six per centum per annum, on the amount thus paid from the time of actual payment.

3. On the failure of payment of any instalment of the sums subscribed according to the tenor of the second article, the next preceding instalment of twelve dollars and fifty cents, which shall have been paid for every hundred dollars subscribed, shall be forfeited to the United States.

4. If any subscriptions shall be reduced in consequence of a greater sum than eleven millions of dollars being subscribed, conformably to the first article, the amount of such reduction shall be forthwith returned to the subscribers from whom such reduction shall have been made.

5. Each subsequent instalment must be paid at the same bank at which the original subscription was made, and where the first instalment was paid.

6. For such sums or number of shares of one hundred dollars, as may be subscribed, the cashiers of the respective banks, within twenty days after the time of subscribing, shall give certificates, stating the sums subscribed and payment made, and on which the payments of the subsequent instalments, when made, shall be respectively endorsed; which certificates shall be assignable, by endorsement and delivery of the parties, in whose favor they may be issued, until the completion of the payments required by the tenor of the second article.

7. After the completion of the payments aforesaid, the proprietors of the certificates of the cashiers, on which such payments have been completed, on surrendering the same at the loan office of the State in which the subscription and payments shall have been made, shall be entitled to receive from the commissioner of loans, certificates of funded capital stock, bearing an interest of six per centum per annum, from the time when the said instalments shall have been paid, respectively, and payable quarter yearly, at the several loan offices, or at the treasury of the United States, where the same may stand credited; which certificates of funded capital stock shall be issued in the sums of one hundred, four hundred, one thousand, four thousand or ten thousand dollars, at the option of the proprietor, and shall be transferable by the creditors, or their attorneys, duly constituted, at the treasury and loan offices, respectively, in the same manner as the present funded debt of the United States, and in pursuance of the rules which have been, or which may be, established, relative to the transfer of the said debt.

8. After the payment of the fifth instalment, such of the proprietors of the certificates of the cashiers, of four hundred dollars and upwards, as may then be desirous of funding the same, may, on presenting them at the loan office of the State in which the subscription and payments shall have been made, receive from the commissioner of loans, certificates of funded capital stock, of the description aforesaid, for the amount of the four first instalments, or one moiety of the sum expressed in the subscription certificates.

9. After the last day of December, in the year one thousand eight hundred and twenty-four, and after reasonable notice to the creditors, which shall be given by an advertisement in some public newspaper, printed at the seat of the Government of the United States, the said capital stock shall be redeemable at the pleasure of the United States, by the reimbursement of the whole sum which may at that time stand credited to any proprietor on the books of the treasury, or of the loan offices, respectively.

10. So much of the funds, constituting the annual appropriation of eight millions of dollars, for the payment of the principal and interest of the public debt of the United States, as may be necessary for the regular payment of the interest and for the reimbursement of the principal of the stock to be created under this contract, together with the faith of the United States for its due fulfilment, are hereby pledged, in pursuance of, and according to, the terms and conditions of the act of Congress herein before recited.

Given under my hand, and the seal of the treasury of the United States, at Washington, this thirty-first day of March, one thousand eight hundred and twelve.

ALBERT GALLATIN, *Secretary of the Treasury.*

B.

TREASURY DEPARTMENT, *April 7th, 1812.*

SIR:

I take the liberty of enclosing to you — copies of a contract for raising, by loan, eleven millions of dollars, pursuant to an act of Congress, passed on the 14th day of March last. Presuming that your institution would be disposed to facilitate this operation, it has been named as one at which subscriptions to the loan would be received. I will thank you to apprise me immediately, if, from any cause, it should be incompatible with your views to accede to this arrangement.

If the bank shall consent to receive the subscriptions in the manner proposed, it will be necessary, in the first place, that a book, in which the subscribers may enter their names, and the sums to be loaned by them, should be provided. This will consist of a book of sufficient magnitude to receive all the subscriptions likely to be made at your bank, to the first page of which one of the copies of the contract or terms of the loan, herewith transmitted, signed by the Secretary of the Treasury, and sealed with the treasury seal, is to be affixed. The subscribers will write, in words at length, against their names, the amount which they intend to subscribe: And on the same lines, respectively, the eighth part of that sum, being the first instalment, is, as soon as paid, to be entered by your cashier, in figures, in a column left for that purpose, at the right hand side of each page. This entry will, it is presumed, be a sufficient receipt to the subscriber, until the cashier's certificate, or scrip, shall be issued to him, which, according to the sixth article of the terms of the loan, will be within twenty days after the time of subscribing. Yet, if the parties, or any of them, should, at the time of subscribing, require receipts from the cashier, they may be given in his name, in any form you may prescribe, and to be returned when the above mentioned certificates or scrips shall be delivered. The whole amount paid at the time of subscription, is to be credited to a distinct account, bearing that designation, and not to be carried to the credit of the Treasurer of the United States before the expiration of twenty days, as above stated. This period has been taken, in order to give time for all the cashiers of the banks, where subscriptions are received, to return to the treasury an account of the sums subscribed, that it may be thus ascertained whether more than eleven millions, in the whole, shall have been subscribed, and a reduction of the larger subscriptions shall consequently become necessary, as provided for in the first article of the terms of the loan.

Immediately after the subscription is closed, on the second day of May, the cashier is to transmit to the Secretary of the Treasury an account, 1. Of the total amount subscribed; 2. Of the portion of that amount subscribed in sums exceeding 4,000 dollars, each; and, 3. A list of all the subscriptions exceeding 4,000 dollars, each.

As soon as these accounts from all the cashiers of banks where subscriptions are received shall reach the treasury, it will be ascertained whether any reductions of subscriptions will be necessary, and this will be immediately communicated to the cashiers, who will then, in case of reduction, repay the excess to the subscribers, credit the Treasurer of the United States for the residue, and issue the subscription certificates, which, together with forms for their entry and registry, will, in the mean time, be transmitted from the treasury.

As some of the banks may be disposed to become subscribers, provided the amount of their subscription be deposited with themselves until drawn for, for public purposes, you will be pleased, in case of any such subscription on the part of a bank in your State, and in good credit, to enter the same in a separate page of the subscription book, to consider the receipt of the cashier of such bank as sufficient evidence of payment on account of the loan, and to enter the same accordingly in the book. I insert, at foot of this letter, the names of the banks in your State, which are known and considered at the treasury as sufficient. To these, a circular letter, one of which you will also receive, will be written on that subject; and you may receive subscriptions, in like manner, from such others as, in your opinion, are perfectly responsible.

A reasonable allowance for the expenses of stationary and extra labor of the cashiers of the banks, where subscriptions to the loan are received, will be made from the treasury.

I have the honor to be, &c.

The President of the Union Bank of New Hampshire,
 Union Bank of Boston,
 Massachusetts Bank,
 State Bank, Boston,
 Roger Williams Bank,
 Bank of Hartford,
 Manhattan Company,
 Mechanics' Bank, New York,
 Bank of Pennsylvania,
 Farmers and Mechanics' Bank, Philadelphia,
 Bank of Baltimore,
 Commercial and Farmers' Bank, Baltimore,
 Bank of Columbia,
 Do. Washington,
 Do. Virginia,
 State Bank, Charleston,
 Planters and Mechanics' Bank, Charleston,
 Merchants' Bank, Salem.

C.

TREASURY DEPARTMENT, *April 7, 1812.*

SIR:

Having thought it probable that some of the banks might be disposed to subscribe to the loan of eleven millions of dollars, to be opened on the first day of May next, and that it would be an additional inducement to that measure if the sums to be paid on account of such subscription should be permitted to remain in deposite in the banks making the subscription, until wanted for the public service, I have taken this mode to notify the several banks that an arrangement of that kind will be allowed by the treasury.

If, therefore, it shall suit the views of your institution to subscribe for any part of the loan, the subscription may be made at the bank or banks in your State, where subscriptions, by the terms of the enclosed contract, are to be received, and the amount of each instalment, as it becomes payable, may remain in your bank to the credit of the Treasurer of the United States, till drawn for on account of the public service. A receipt or certificate of your

cashier, that the amount of each instalment, as it becomes payable, is placed in your bank to the credit of the Treasurer of the United States, has been directed to be accepted at the banks where subscriptions are received, as sufficient evidence of the payment.

If, from the terms of your charter, or from any other cause, it should be deemed improper to subscribe to the loan, and receive stock therefor, and the bank should, nevertheless, be disposed to loan money to the United States, at a rate of interest not exceeding six per centum per annum, a special contract for the purpose may be formed. In this event, you will be pleased to communicate to the Secretary of the Treasury the amount proposed to be loaned, the time or times when the whole, or its portions, will be advanced, and the period when reimbursement from the United States will be expected. The same privilege will be allowed in this case, as in case of subscription to the loan, of permitting the amount which may be engaged to be advanced by the bank, to remain in the bank in deposit, till drawn for by the Treasurer for the current service.

I have the honor to be, &c.

ALBERT GALLATIN.

D.

TREASURY DEPARTMENT, *May 11, 1812.*

SIR:

To my letter of the 7th instant, I beg leave to add, that, if it should suit the views of your institution to loan any sum of money to the United States, at a rate not exceeding six per centum per annum, without, however, subscribing to the proposed loan, and receiving stock therefor, a special contract for the purpose may be formed. In this event, you will be pleased to communicate to the Secretary of the Treasury the amount proposed to be loaned, the time or times when the whole, or its portions, will be advanced, and the period when reimbursement from the United States will be expected.

I also request, that, in the event of your institution subscribing to the proposed loan, you would inform me whether it would be your wish, in case of reduction, that that on your subscription should be made on the same principles as on all others, or whether you would leave it discretionary with me to reduce it to a less sum than your proportional share. My reason for this last inquiry is, that, in the event of a larger sum being subscribed, altogether, than eleven millions, it would be desirable to receive the whole amount from individuals, and to reserve, for some subsequent emergency, the resource of such loans as may be obtained from the several banks.

I am, very respectfully, &c.

The President of the Union Bank of New Hampshire,
 Union Bank of Boston,
 Massachusetts Bank,
 State Bank, Boston,
 Roger Williams Bank,
 Hartford Bank,
 Manhattan Company,

[1st SESSION.]

LOUISIANA STOCK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 21, 1812.

TREASURY DEPARTMENT, May 21, 1812.

SIR:

The Louisiana six per cent. stock is said to be generally from $\frac{1}{2}$ to 1 per cent. below par. It is important, at a time when new loans are opened and contemplated, that stocks of a similar nature with those offered to subscribers should be, if practicable, at par; and it is believed that this object would be promoted by making the Louisiana stock transferable, as the old debt, from the treasury books to those of the commissioners of loans, and from these, afterwards, to any other commissioner's book, or to the treasury. Being, by the act of November 10, 1803, fixed on the treasury books, the transfers, in case of sale, and the payments of dividends, are made exclusively at Washington. The delay, and the necessity of employing an agent here for those purposes, have the effect of depressing, in the commercial cities, the price of that stock below its real value.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HON. LANGDON CHEVES, Chairman of the Committee of Ways and Means.

12th CONGRESS.]

No. 377.

[1st Session.]

RECEIPTS AND EXPENDITURES ESTIMATED FOR 1812.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 29, 1812.

TREASURY DEPARTMENT, *June 24th*, 1812.

SIR:

The expenditures for the year 1812, calculated in conformity with the appropriations made by Congress, and adding such as are contemplated, may be stated in round numbers as followeth, viz:

1. Civil list, diplomatic intercourse, and miscellaneous expenses of a civil nature, appropriated,	\$1,522,030 02	
Printing treasury notes, and other miscellaneous expenses not yet provided for, estimated at	37,969 98	\$1,560,000
2. Military establishment, including militia, volunteers, and Indian department, appropriated	12,695,584 89	
Add for rangers, &c.	104,415 11	12,800,000
3. Naval establishment, appropriated	3,404,669 60	
Add for gunboats, &c.	535,330 40	3,940,000
4. Public debt, viz: Interest, including 200,000 dollars estimated interest on this year's loan,	2,425,000 00	
Reimbursement of six per cent, deferred and converted stocks, which must necessarily be made,	2,135,000 00	
Purchases of public debt, which <i>must</i> be made, if the debt can be purchased at the prices limited by law,	3,440,000 00	8,000,000
		\$26,300,000

The funds provided to meet that expenditure are, viz:

1. Of the balance of \$3,500,298 06, remaining in the treasury on the 1st of January, 1812, there may be applied to the expenses of the year,	\$2,000,000
2. The receipts into the treasury, arising from the duties on importation and sales of lands, were estimated, for the year 1812, in the annual report of 22d November last, at \$8,200,000. This estimate is predicated on the supposition that the receipts of 1812, arising from duties on importations made during the year, would be equal to the amount of debentures payable during the year, and there are not yet any data from which a more correct estimate can be made,	8,200,000
3. Loan authorized by law,	11,000,000
4. Treasury notes, according to the bill which has passed the House of Representatives,	5,000,000
Total,	\$26,200,000

Two branches of the expenditure may fall short of the amount appropriated:

1. It may be expected that the whole amount appropriated for the military establishment will not be expended, for the appropriations are sufficient to defray the expenses of the old establishments, (about 10,000 men) as if these had been complete on the 1st January last, and of the additional force of 25,000 men, as if the whole of it had been raised, and in actual service, on the 1st day of May last: neither of which is the fact. That expenditure not being, in any degree, under the control of the treasury, and the amount, which may not be wanted, being unascertained, a provision equal to the sum appropriated must still be contemplated. Whether the number of men in actual service in the navy corresponds with that for which provision was made by the appropriations, and whether, on that, or any other account, there may be less expended by that department than has been appropriated, is not known at the treasury.

2. If the six per cent. and deferred stocks should be at par, the whole amount of the sum which the commissioners of the sinking fund will otherwise be bound to apply to purchases, may not be wanted.

With respect to the funds provided to defray the expenses, no more than \$16,660,000 are already secured.

The subscriptions to the loan, including \$200,000 offered on special contract, but not yet accepted, amount to \$6,460,000; leaving an amount unsubscribed of \$4,540,000

Which, together with the intended treasury notes,	5,000,000
Makes an aggregate, not yet obtained, of	\$9,540,000
Funds already secured,	16,660,000
Total, as per above,	\$26,200,000

Although the experiment of issuing treasury notes be novel under this Government, the solid security on which they rest, the facilities they will offer in making remittances, the interest they bear, and, above all, the power to apply them to the payment of duties and of public lands, induce a belief that, notwithstanding some difficulties incident to a first emission, the amount contemplated may be put in circulation before the end of the year.

The result of the loan is more doubtful. The old six per cent. and deferred stocks are two or three per cent. under par; and any depression in the public funds would seriously affect the sales of the residue of the new loan. Nor does it appear eligible, without an absolute necessity, to give a premium or additional interest in order to obtain subscriptions for that residue. For, as it would be just, in that case, to place the first subscribers on the same footing, the charge to the public would be more than double the premium actually wanted to obtain the four millions and a half which are not yet subscribed.

The committee will, having all the facts before them, be able to decide whether any additional provision ought to be made, during this session, in order to guard against any possible contingency. In the mean while, I beg leave to suggest, that a conversion of the old six per cent. and deferred stocks, into a new six per cent. stock, not materially different from that created by virtue of the act authorizing the loan of eleven millions, would have a favorable effect on the price of those stocks, and thereby might facilitate the loan of this year, and prevent the necessity of applying, both this and the ensuing years, the large sums which must now be expended in the reimbursement and purchase of the public debt.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HON. EZEKIEL BACON, *Chairman of the Committee of Ways and Means.*

No. 378.

[1st SESSION.]

SURETIES IN A COLLECTOR'S BOND RELEASED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JULY 2, 1812.

Mr. WRIGHT, from the committee to whom was referred the petitions of Solomon Frazier and Mary Eccleston, made the following report:

That the said Solomon Frazier, together with a certain Charles Eccleston, (since deceased) and whom the said Mary doth represent, on or about the eighteenth day of May, seventeen hundred and ninety-five, became bound to the United States, with a certain James Frazier, and as his security, in the penalty of two thousand dollars, with condition that said James Frazier should well and faithfully discharge the duties of collector of the port of Vienna, in Maryland; that the said James Frazier continued in that office till April, eighteen hundred and five, when he resigned the same, having, in the year 1804, sustained a heavy loss by the burning of his dwelling house, with most of his furniture, in the night time. That, afterwards, to wit, in eighteen hundred and five, writs were issued on said bond against said Solomon Frazier, Charles Eccleston, and James Frazier; that Solomon Frazier was taken, returnable to March term, eighteen hundred and five; Charles Eccleston died before the return of the writ against him; that James Frazier was not taken till September, eighteen hundred and seven; that judgment was recovered against Solomon Frazier, in eighteen hundred and six, for the penalty of the bond, to wit, two thousand dollars; that, at September term, eighteen hundred and eight, judgment was recovered against James Frazier, on said bond, for two thousand dollars, the penalty, and nineteen hundred and twenty-four dollars and eighty-six cents damages or costs, (which said judgment, as to the damages, your committee think erroneous.) That a ca. sa. was issued on the twenty-ninth day of June, 1810, against James Frazier, returnable to September term, 1810; that the same James Frazier was taken, and in the custody of the keeper of the debtor's apartment. That, afterwards, on the third day of July, 1810, by the direction of the Secretary of the Treasury, by an instrument of writing under the hand and seal of said Secretary, the said James Frazier was discharged from gaol, as an insolvent debtor, on his, the said James Frazier's, making an assignment of all his estate, real, personal, and mixed, under the direction of the then district attorney; which said discharge was unauthorized by statute. Your committee, in order to ascertain the amount of the goods, chattels, and credits, assigned by said James Frazier, as aforesaid directed, applied to the Secretary of the Treasury for information on that subject, which he promised to furnish as soon as it could be obtained, but which we have not yet received. Your committee, by a number of depositions, have become satisfied, that, about the time of the judgment aforesaid, against said James Frazier, he had property sufficient to pay the same. Your committee are of opinion the Secretary of the Treasury had no power to discharge the said James Frazier, under the law by which he was discharged. They are of opinion, also, that, at common law, by which alone he could have been discharged, the discharge of the principal operates a discharge of the securities. Your committee are, therefore, of opinion, that, as James Frazier had, at the time of the judgment, sufficient assets to pay the penalty of the bond; as he was discharged under a statute that gave no authority to discharge him; that as, at common law, the discharge from custody of the principal is a virtual discharge of the securities; that, therefore, the said Solomon Frazier and Mary Eccleston ought to be discharged from said debt, for which purpose they have directed me to report a bill.

All which, &c.

ROBERT WRIGHT.

[12th CONGRESS.]

No. 379.

[2d SESSION.]

REMISSION OF FORFEITURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 25, 1812.

Mr. CHEVES, from the Committee of Ways and Means, to whom was referred so much of the President's message of the 4th instant, as relates to the late importations of British manufactures; also, the petitions of sundry merchants of New York; of John Tompkins and Adam Murray, merchants, of Richmond, Virginia; of William W. Woolsey and others, merchants of New Haven, Connecticut; of sundry merchants of the city of Philadelphia; of sundry merchants of Boston; of sundry merchants and others, of the city of Albany, in the State of New York; of sundry merchants of the city of Richmond, Virginia; of sundry other merchants of Philadelphia; of sundry merchants of Savannah, in the State of Georgia; of sundry merchants of Norfolk, Virginia; of David Lamb, of Charleston, South Carolina; of sundry merchants of the city of Baltimore; of Charles Sigourney and James Wells, merchants, of the city of Hartford, in the State of Connecticut; and of sundry merchants of the town of Alexandria, in the District of Columbia; all praying for the remission of penalties and forfeitures, incurred by them as importers of British manufactures, made the following report:

That they have bestowed on the subject a degree of attention proportioned to its importance: that they have, in the present investigation, confined themselves to the cases of importations directly from the united kingdom of Great Britain and Ireland, and that the result of their examination and inquiries will be found—

First, In a correspondence with the Secretary of the Treasury.

Secondly, In a detailed examination of committees of merchants, from Boston, New York, Philadelphia, and Baltimore, and some accompanying documents.

Thirdly, In a statement made by Mr. Russell, late Chargé des Affaires of the United States at the Court of London, who, at the request of the committee, was so obliging as to attend them and give this statement.

That, on a view of the whole subject, the committee are of opinion that the Secretary of the Treasury has full power to remit or mitigate the penalties and forfeitures incurred, should an interposition in either way be called for by the circumstances of the case, and therefore recommend, that it be

Resolved, That it is inexpedient to legislate upon the subject, and that the petitions, with the accompanying documents, be referred to the Secretary of the Treasury.

TREASURY DEPARTMENT, November 18, 1812.

SIR:

I have the honor, in compliance with the request of the Committee of Ways and Means, to submit the following statement of facts, so far as they have come to my knowledge, in relation to the late importations of British manufactures.

By the act of 2d March, 1811, it was enacted that certain provisions of the act "to interdict the commercial intercourse between the United States and Great Britain and France, and their dependencies, and for other purposes," should (until the President's proclamation, authorized by the act, should have been issued) have full force, and be immediately carried into effect, against Great Britain, her colonies, and dependencies. The provisions thus re-enacted forbade, under penalty of forfeiting the vessel and cargo, to import into the United States, or to put on board any vessel, in a foreign port, with intent thus to import, any merchandise of British growth or manufacture, from whatever port imported, and any merchandise, whatever, from a British port.

It was further enacted, by the same act, (of March 2, 1811,) that, in case Great Britain should so revoke or modify her edicts, as that they should cease to violate the neutral commerce of the United States, the President of the United States should declare the fact by proclamation; that such proclamation should be admitted as evidence, and that no other evidence should be admitted of such revocation or modification, in any suit or prosecution for the recovery of the forfeitures abovementioned; and that the restrictions, above stated, should, from the date of such proclamation, cease, and be discontinued.

By the act of Congress of 18th June, 1812, war was declared between the United States and Great Britain.

On the 23d of the same month, an order in council was issued by the British Government, purporting to be a revocation of the edicts of that Government which violated the neutral commerce of the United States, subject, however, to certain conditions, specified in the said order.

Immediately after the promulgation of that order, British merchandise was laden on board the American vessels, then in the harbors of Great Britain, with intent to import the same into the United States. It has been stated, and it is believed, that by far the greater part of those shipments were made in conformity with previous orders from merchants in America to their correspondents in England, by which these had been instructed to make such shipments whenever a revocation of the former British orders in council should take place; it having been presumed by the American merchants that such a revocation would, by virtue of the abovementioned act of Congress, of 2d March, 1811, produce a discontinuance of the prohibitions to import British merchandise into the United States.

On the 30th day of July following, the account of the declaration of war having reached England, a temporary embargo was laid on American vessels; but, on the ensuing day, they were, by order of council, permitted to continue to take cargoes of British merchandise, and to proceed to the United States, being for that purpose provided with licences protecting them, notwithstanding the existing hostilities, against capture by British cruisers. It has been stated that the time for obtaining such licences was, with respect to American vessels then in England, limited to the 15th of September last; and, if that be correct, all the vessels of that description (with the exception of some, which, having been captured by American cruisers, retaken by the British, and sent into Halifax, have not yet been released, and perhaps of some which may have had very long voyages) may be presumed to have arrived in the United States.

It appearing that, however reasonable the expectation of the discontinuance of the non-importation act might have been, yet, not only the act had made the President's proclamation the only evidence of the fact, but that the restrictions were to cease, not from the date of the revocation of the orders in council, but from the date of the proclamation; that the act to put merchandise on board a vessel, with intent to import, was forbidden by those restrictions; and that (all the merchandise having been thus laden, either prematurely, and before a proclamation could, in point of time, be issued by the President, or after the knowledge of war) all the shipments were therefore made in direct contravention of an existing provision; the collectors were instructed to seize and libel all such vessels and cargoes without discrimination. No exception was made with respect to vessels captured and sent in by American privateers, because, if American property, their right to make prizes was, by law, confined to enemies' property, and whether American or enemies', the forfeiture to the United States had been incurred from the date of the shipment, and could not be superseded by a subsequent capture. Instructions to prevent any interference, in that respect, by either public or private armed vessels, were also issued by the President, such interference being considered wholly unnecessary, since the vessels from England were of their own accord coming into the ports of the United States. It appears, however, that, in some cases, the owners of privateers, that have made captures of that description, intend to contest the prior claim to forfeiture of the United States; and that, in those cases, the question must be decided by the courts.

Previous to the time when those importations took place, it being understood that the judges of some of the district courts had restored to the claimants, prohibited merchandise, under seizure, on their giving bond for the appraised value thereof, the district attorneys were, on the 15th day of May, 1812, instructed, by the Comptroller, to oppose every motion to that effect, for the reasons stated in his letter. It appearing, afterwards, that the judges of some of the most commercial districts had, notwithstanding that opposition on the part of the United States, continued to order the restoration of British merchandise, no appeal being practicable, since the orders were immediately executed, and the commercial interest of those districts, where the restoration was refused, being deeply affected by the want of uniformity in the decisions, the Comptroller did, on the 5th day of October last, authorize the district attorneys to withdraw their opposition in all cases of bona fide American property. Copies of his two circulars, on that subject, are enclosed. All the prohibited merchandise restored to the claimants, has been so restored by order of court, without any interference, other than a forced acquiescence on the part of the Executive officers of Government. With respect to the mode of appraisement, it appears that the merchandise has generally been valued at its prime cost, adding thereto only the amount of duties, for which separate bonds have, in most cases, been taken. To this there are some exceptions, the valuation being, in Rhode Island, below, and in Connecticut, probably, above, the prime cost of the goods.

From returns transmitted by the collectors, some of which are in part on estimate, it appears that the prime cost of all the British merchandise imported as above stated, subsequent to the alleged revocation of the British orders in council, amounts to about four millions sterling; and that the bonds given for the value will fall short of eighteen millions of dollars, exclusively of the bonds given for duties, and which may be estimated at five millions of dollars. This embraces all the importations already made, and will not be materially increased by vessels still on their way; unless it be true, as has been asserted, that American vessels, which had sailed to the Baltic, under certain British licences, will, on their arrival in England, be provided with new licences for their return to the United States, with cargoes of British merchandise. Such importations would form a class distinct from those now under consideration.

Of the importations, heretofore made, about $\frac{3}{5}$ in value were in vessels which sailed from England between the 23d of June and 1st of August last, and the residue in vessels which sailed subsequent to the month of July. The whole may be arranged under the following heads, viz:

1. Merchandise purchased prior to the non-importation act, of 2d March, 1811, and which had remained warehoused in England at the risk of the American owners.
2. Merchandise purchased subsequent to the act of 2d March, 1811, and prior to the 23d of June, 1812, and which, since its purchase, had remained in the same manner in England.
3. Merchandise shipped on American account and risk, in pursuance of orders given prior to the 23d June, 1812, but not paid for till after the execution of such orders, and on different terms of credit.
4. Merchandise shipped in pursuance of similar orders, but consigned, in the first instance, to the order of the American correspondent of the British merchants, to be delivered, according to contingent instructions, to the real purchaser; which merchandise becomes American property when thus delivered, but remains till then on British account and risk.
5. Merchandise shipped entirely on British account.

There are no data from which, without further investigation, the amount of each class can be estimated.

The advance on the prime cost at which the merchandise thus imported has been, or can be sold, is not precisely known, and will undoubtedly vary according to the species of the goods. It has been asserted that, in some sales, the advance was sufficient to cover not only the prime cost, charges, and duties, but even the whole of the amount of the bonds. That this may have actually taken place in some particular instances, may be true; and it is probable that

the importers would, so far as they could, cover, in their sales, the estimated risk of being obliged to pay those bonds. But, so far as can be judged from the current price of goods, and from some sales said to have taken place, the supposition that they have been, or can be, generally, made, so as to cover the whole amount of the bonds, is believed to be greatly exaggerated.

It is, however, an indisputable fact that the importation falls generally far short of the ordinary former annual importations from Great Britain, and of the actual demand for most species of the merchandise imported; and that the goods are accordingly generally sold at an advance greater than the usual profits of importers. The difference constitutes an extraordinary profit, and is a tax levied on the community by the persons who have imported the merchandise contrary to law; which extra profit or tax is solely due to the non-importation act continuing in force with respect to all other persons and importations.

Of the forfeitures accrued, one half is by law vested in the custom house officers, or informers; and the other half in the United States. The power to remit the share of the United States, and of all other persons, in whole or in part, and on such terms and conditions as may be deemed reasonable and just, is by law vested in the Secretary of the Treasury. But, considering the magnitude and unforeseen nature of the case, it was thought proper not to exercise that authority until Congress had taken the subject into consideration, and prescribed, if they thought proper, the course to be pursued. All the petitions already received remain, therefore, suspended, and, in order to avoid useless expenses, the parties have been generally advised to delay making their applications in the manner directed by law, until the decision of Congress should be ascertained.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

HONORABLE LANGDON CHEVES,
Chairman of the Committee of Ways and Means.

[CIRCULAR.]

TREASURY DEPARTMENT, Comptroller's Office, May 15, 1812.

SIR:

As it may be supposed that, on a seizure under the law of March 1, 1809, commonly called the non-importation law, the claimant has a right to the repossession of the property seized, by giving bond as pointed out by the 89th section of the collection law, it is deemed proper to submit to you, respectfully, the views taken of this subject at this Department. If such be a correct construction of it, it is plain that it will go far towards defeating the ends contemplated by its passage.

The policy and intention of this act evidently was to shut the door, as effectually as possible, against the introduction of British manufactures. The motive of taking bond from a claimant, under the 89th section of the collection law, as in all similar or analogous cases, unquestionably is, not that it may be received *in lieu* of the thing surrendered, but to compel or ensure the forthcoming of the thing itself. But, the state of things existing, and always liable to exist, under the non-importation act, would hinder the operation of this obvious principle. The enhanced value of the British commodity, arising from a general scarcity, may make it, in most cases, the interest of the illicit importer to forfeit his bond, the penalty being regulated by the *nominal* or *invoice* price of the goods, or a sufficient intermediate rise taking place before the trial, although the penalty was fixed according to the *market* value at the time of seizure. The act, in its foundation, its objects, and entire scope, aims at the total exclusion from the country of all British goods. If thwarted in that object, its next is to transfer them, when unlawfully introduced, to the hands of the Government. To suffer them, when seized for an apparent breach of this law, to pass to the immediate and virtual ownership of the claimant, and be subject to his disposition, would, in a great degree, have the effect to turn it aside from all its original intendments.

As the design of the act would, thus, be liable to frustration, it may be asked where the authority is found for this alleged right in the importer? Its allowance, if it would endanger the primary objects of the Legislature, should rest on express words, or implication as imperious. The 18th section of the act of the 1st of March, 1809, in referring to the collection law as the rule of proceeding, does so, it is apprehended, only in relation to the distribution of the forfeitures. The first clause of that section stands as an integral provision, relying upon no other law for its support, and capable of being executed, as to all the purposes of a civil or criminal suit, merely on its own footing, with the aid, indeed, of the incidental powers of the court. It is not seen that this general or resulting power, often inherent in courts, to order the repossession of a thing claimed on stipulation, or caution being given, either where it was for the benefit of all concerned, or where the thing itself was perishable, or where hardships was feared to an innocent owner, would be applicable under this law. But, if this be the ground of the importer's claim, it, of course, leaves out of sight, in every relation to the point, the 89th section of the collection law. If he cannot, then, stand upon the faith of any imperative injunction put upon the court, it will follow that his application must be addressed to its discretion; and you are, in such case, requested to resist the application, as opposed to the demonstrable policy of every part of the act. That a re-delivery to the party should have been made to take place, by special provision, under the collection law, is reconcileable with the system of which it is a part, which looks only at a derivative offence against the revenue, without any where contemplating an original exclusion of the article seized. But, a similar course must be essentially repugnant to the spirit of a law which addresses itself to the interests of a foreign Power, declaring that that Power shall be debarred all benefit of transporting her wares to the United States, and seeks to close, with penal sanctions, the very threshold to their entrance. The concluding part of the eighth section of the law further distinguishes it from the collection act, and by prohibiting, under a penalty, the *purchase* of British goods, knowing them to be liable to seizure, holds out an intimation that every practicability to their *sale* should be foreclosed, while their liability to condemnation remains undecided.

I beg leave to call your attention to the third section of the act, *in pari materia*, of the 2d of March, 1811. The first proviso of this section, by pointing out a specific case in which British goods, unlawfully introduced, may be delivered to the owner upon bond, furnishes, it is conceived, an argument of weight, that in no other state of things ought it to be done.

These suggestions are respectfully submitted for your consideration and government. You will, doubtless, be able to extend them, and will superadd such other views, in elucidation of the meaning ascribed to the law at this Department, as your own reflections may supply. Under a conviction of its importance to the genuine intentions of the Government, it is particularly wished that you would resist, in every instance, a restoration to the claimant of the property seized, and never part, unless by the express order of the court, with the substantial security of a lien for the inferior and precarious safeguard of personal responsibility.

I have the honor to be, with great respect, your obedient servant,

RICHARD RUSH.

[CIRCULAR TO DISTRICT ATTORNEYS.]

TREASURY DEPARTMENT, Comptroller's Office, October 5, 1812.

SIR:

Since the circular of the 15th of May, addressed to you from this office, it appears, from information received, that, in some of the districts, the courts hold themselves bound to deliver up the vessel and goods, seized in violation of the non-importation law, on satisfactory bond given by the claimant, while in others, the opposition made to this course by the attorneys of the United States, has been found to avail with the court to refuse such delivery.

It is desirable that the law in question, whatever views may still be entertained of its original intention, should operate equally on the merchants or other owners of property seized, in every part of the Union.

Seeing, therefore, that a different line of practice is found to govern the courts in different districts, upon this point, and, in order to prevent, as far as possible, any inconvenience or supposed injustice to individuals, resulting from such difference, you are hereby requested to withhold the opposition you were requested to make to the delivery of the property to the claimant, on his giving bond; the object being, that, as the decisions of the courts are not to be controlled by this department, you may thus lend your aid, negatively, at least, towards the uniform execution of the law. You will be pleased, however, to consider this relaxation as extended to property owned by American citizens only, and to urge, in all cases, a true and adequate appraisement.

I have the honor to be, &c.

RICHARD RUSH.

— — —, *Attorney of the United States for* — — —.

TREASURY DEPARTMENT, *November 23d, 1812.*

SIR:

I had already transmitted an answer to your letter of the 18th instant, when I had the honor to receive that of the 20th, requesting, in addition to the statement of facts, such further and other views of the subject of the late importations of British manufactures, as I might think proper, and particularly, whether, in my opinion, their importation has not been actually and materially advantageous to the Government.

Having, in the answer already transmitted, stated all the important facts within my knowledge, I cannot present the subject in any new or other view than that exhibited by those facts.

The payment of five millions of dollars for duties on those importations, had been stated, and is advantageous to Government. Indirect aid may, also, perhaps, have been derived from the increase of supplies, and from the return of American capital, produced by that event. But these advantages, whatever they may be, have been forced upon Government, and cannot be urged as a service rendered by these importers. Had those advantages been supposed sufficient to outweigh other political considerations, the importations might have been, and still might be, permitted and regulated by law. In the case of the Calcutta vessels, whose cargoes (for the landing of which in the United States bond had been given in India) have, by the act of 5th July last, been admitted to entry, this was done on the express condition of the merchandise being warehoused, and remaining subject to the future disposition of Government—thus reserving the power to fix the terms on which those cargoes should be restored to the owners, and their sale be permitted. In the case now under consideration, the persons who have imported, contrary to law, do not seem entitled to more advantageous terms than would probably have been imposed, had a previous permission been granted.

Upon the whole, I continue in the opinion, submitted with great deference to the committee, that the one half of the forfeitures, which would otherwise fall to the share of collectors, ought to be remitted; but that, with respect to the one-half belonging to the United States, justice to the community requires that, when remitted, at least an equivalent may be secured to the public for the extra profit beyond that on common importations, which arises from the continuance of the non-importation act.

I have the honor to be, &c.

ALBERT GALLATIN.

HON. LANGDON CHEVES, *Chairman of the Committee of Ways and Means.*

EXAMINATION OF COMMITTEES OF MERCHANTS, &c.

Several committees of the petitioners and other merchants interested in these importations, attended your committee: these were, John G. Coster, John Mason, Washington Irving, and Abraham R. Laurence, from New York; Nathan Appleton, from Boston; Caleb Cresson, Jun'r, William Schlatter, and Samuel Harvey, from Philadelphia; and Luke Tiernan, Philip E. Thomas, and Evan Thomas, from Baltimore.

The statements made by these gentlemen, who are men of character and respectability, were delivered, apparently, with such fairness and candor, as induced your committee to give much credit to them. The statements made by the committee from New York have been corroborated and confirmed by declarations, made on oath, by persons disinterested, as well as those interested in these importations.

NEW YORK.

The committee from New York stated, that the current reports of enormous advances obtained by them, were not well founded; that some of them were entirely unfounded; that they had, for example, heard it stated that three hundred per cent. had been obtained in New York; that a local mode of selling English goods in New York, must have laid the foundation of this mis-statement; that it is usual in that city to demand and obtain three for one, in the sale of such goods: which means £3 New York currency for £1 sterling, which really yields but sixty-eight and two-thirds per cent. advance on the prime cost. They admitted that particular articles had been sold for very high prices; that these prices, however, were not exacted from a desire or determination to include in them the penalties which might be enforced by the Government, but from the great competition which existed in the market for the articles; that, for these articles, there was, to use the words of Mr. Irving, one of the committee, "a ravenous demand;" that it was understood that there were three army contractors, at one time, bidding upon each other; that these articles were few in number, and formed but a small part of the amount imported; that they did not exceed one-eighth part of that amount; that there were none of them in the invoices of some importers; that Mr. Coster, one of the petitioners, had imported to the amount of nearly £20,000 sterling, prime cost, and had not received an article of this description; that the goods which commanded such high prices consisted, principally, of blankets and coarse woollens; that these were bulky articles, and paid a high freight; that the same circumstance made them liable to an extraordinary portion of other charges; that the very high prices which were obtained, were often received by second and third purchasers, and not by the importers; that there are three descriptions of dealers in these goods in New York: 1st. The large importers. 2dly. Large purchasers, who have money at command, who are well acquainted with the state of the market for every article, and, when there is a scarcity of a particular article, monopolise it and raise the price—these are called jobbers. And, 3dly. The retailers; and they stated, that the very high prices alluded to had frequently been received by the second, and, sometimes, by the last description of persons, and not by the petitioners. Hardware, cotton goods, glass ware, and fine goods, generally, have not been sold at high prices. Some goods have become unsaleable, from change of fashions; some come into disadvantageous competition with American manufactures, which have grown up or increased in quantity, while these goods have been lying in England; some are not worth cost and charges. Goods for the Southern markets (South Carolina and Georgia, for example) are unsaleable, from the expense or impracticability of land carriage, the risk of water conveyance, from the cruisers of the enemy, and other circumstances of war. The occurrence of peace and free intercourse would make the importers great losers on many of those importations. The following were stated as the ordinary charges: four per cent. export duty; two per cent. inland charges on valuable fine dry goods; the same charges on coarse goods are much greater; one per cent. for packing, wrappers, &c.; one per cent. for insurance and storage against fire till shipped; two per cent. freight on the average of fine goods; ten per cent. on coarse goods; on crockery, from two hundred to three hundred per cent. insurance against sea risk, &c.; three per cent. on the aggregate amount of value as usually calculated in policies; commission for purchasing, from two and a half to five per cent.; one per cent. for receiving and paying over the remittance. The average of the lowest duties, as calculated at the custom house, amounts to thirty-three and one-third per cent. on the prime cost; on

crockery and glass ware, hardware, plated ware, silks, millinery, &c., fifty per cent. The duty is calculated by adding ten per cent. on the prime cost, and on all charges which precede the shipment, except commission and outside packages.

The following were stated as extraordinary charges and losses: One and a half per cent. for extra storage and insurance against fire. Many of the goods lay in store for more than eighteen months; average storage twelve months; seven per cent. (the legal interest of the State of New York) for the average detention of one year on the purchase money. The goods which have been disposed of, were sold on a credit, without interest, of from six to twelve months; average seven to eight months. A great portion of the goods will remain long on hand; all Spring goods, at least till the Spring. Great charges and embarrassments have been incurred from capture by American privateers. Cargoes have been carried into, and delivered in, ports distant from those in which they were owned, and to which they were destined. Importers have sustained grievous court charges under the prosecutions directed by the Government. In New York, the courts have authorized a separate libel against the property of every importer, on each of which the costs have been \$50 25, though the property may not have consisted of more than a single package. The gross charges will average sixty per cent. on fine goods, and on coarse, they will be greater. They admit that, if the penalties and forfeitures be remitted, the petitioners will have a handsome profit, not much, however, exceeding the usual profits of ordinary trade, and it will be the whole profit of two or three years of embarrassed, and otherwise losing commerce. If the bonds be exacted, it will greatly distress all the importers. Many, it will ruin. The petitioners had given no orders which authorized the shipment of their goods under the actual circumstances which attended their shipment. It was an error of judgment in their agents, though it was a very general error, and one which ought not to prejudice the importer. It was confidently believed in England, that the importation would be permitted, and deemed legal. A printed paper, of which a copy is annexed, was circulated among all those engaged in the American trade, as proof that there was no danger in these shipments. The petitioners knew so little of the actual state of the fact, that they were, at first, greatly afraid of British capture. Those who shipped after the existence of the war was known, did it to get the property out of the hands of the enemy, choosing to rely rather on the justice and the moderation of their own Government, than the forbearance of a foreign government and an enemy. If the property had lain in England to the end of the war, it would have been ruinous to the owners. A portion of their property was originally invested in British manufactures, because they had no means of getting it home without great sacrifices, and on account of the actual and growing depreciation of the paper credit of Great Britain at the time.

The petitioners have never violated any of the laws of the country, while their particular interests have often been injuriously and deeply affected by them.

Some of the petitioners might, by a compromise, which was offered to them by the American privateers, which had captured their property, have obtained it by the payment of only two and a half per cent.; and though this would not have given them any *legal* security, it might have enabled them *actually* to evade the operation of the law, as they believe some persons, dealing less fairly, have done by the same means. These petitioners, incapable of such an act, have relied on the justice of their own Government. They did not believe—the citizens of New York, generally, had no idea, that, under the hard circumstances of their case, their own Government would either forfeit their property, or mulct them where they intended no violation of the laws of the country.

[Copy of the printed paper referred to in the foregoing statement.]

Extract from the present non-importation act of the United States.

“SEC. 2. *And be it further enacted,* That, in case Great Britain shall so revoke or modify her edicts, as that they shall cease to violate the neutral commerce of the United States, the President of the United States shall declare the fact by proclamation, and such proclamation shall be admitted as evidence, and no other evidence shall be admitted of such revocation or modification, in any suit or prosecution, which may be instituted under the fourth section of the act to which this is a supplement. And the restrictions imposed, or which may be imposed, by virtue of the said act, shall, from the date of such proclamation, cease and be discontinued.”

Extract of a letter from Mr. Monroe, the American Secretary of State, to his Majesty's Minister, Mr. Foster, dated

WASHINGTON, 26th July, 1811.

“It is in the power of the British Government, at this time, to enable the President to set the non-importation law aside, by rendering to the United States an act of justice. If Great Britain will cease to violate their neutral rights, by revoking her orders in council, on which event alone, the President has the power, I am instructed to inform you, that he will, without delay, exercise it, by terminating the operation of this law.”

BOSTON.

The gentleman who attended on the part of the merchants of Boston, made a statement, in all important particulars the same as the foregoing statement of the committee from New York, except so far as the following particulars may distinguish them:

He stated that he was in England from June, 1810, to May, 1811. That large quantities of goods were purchased and prepared for shipment, before 2d February, 1811, on account of the merchants of Boston, which arrived at the shipping ports too late to be shipped before the day last mentioned. A portion of these were shipped in the ensuing spring and summer, to Halifax and Montreal, and the greater part of those thus shipped, have been introduced into the United States since the war.

The remainder of the goods purchased before the 2d February, 1811, forms part of those which have been lately imported into the United States, directly from Great Britain. Considerable portions of the goods thus imported, were purchased subsequently to the 2d February, 1811, and before the revocation of the British orders in council, by those who had funds in England, which they could not bring home; and there was a very considerable portion of these importations purchased immediately after the revocation of the orders in council. The last description of goods was shipped in pursuance of specific orders previously given, which were to be executed when the shipment of them should be deemed legal, or by confidential agents in England, acting under general powers. The general orders relative to the shipment of the goods on hand, or those ordered, were, to ship when it should be legal to do so.

The goods purchased before 2d February, 1811, were purchased on the usual credit of three and six months. Those purchased between that date and the revocation of the orders in council, were almost exclusively purchased with cash, as the only object of the purchase was to invest the money of the purchasers. The greater part of those purchased at the moment of the revocation was purchased with cash, which had been placed in England for the purpose.

At the period of the declaration of war, the exchange was at twenty per cent. discount. Afterwards, it was difficult to negotiate exchange at all, and it was thrown something under that depreciation. Since the late importations, it has risen, and is now at from fourteen to fifteen per cent. discount.

The goods which were purchased after the 2d February, 1811, and before the revocation of the orders in council, were purchased at a lower than the usual rate. In six months after 2d February, 1811, cotton goods suffered a depression equal to fifteen per cent. After the revocation, there was a small advance.

Generally, the importers of British goods were not the shippers of American produce to the Peninsula, or elsewhere. There are exceptions; many houses, much engaged in the shipments to the Peninsula, are among the late importers. A very large portion of the goods lately imported on account of the merchants of Boston, were imported by those engaged in the exportations to the Peninsula, who never imported British goods before. Probably three-fourths of the importations into Boston have been sold. The extraordinary profit beyond that of peace and free intercourse, is about from five to ten per cent. The late importations are less than the usual Fall importations.

PHILADELPHIA.

The committee from Philadelphia confirmed, in all important particulars, as applicable to that city, the statement of the committee from New York, and added the following particulars: The merchants of Philadelphia send off their orders for English manufactures from nine to twelve months before the period at which they expect the arrival of the goods. A considerable portion of the late importations, which have been made on account of the merchants of Philadelphia, were prepared for shipment by December, 1810. A considerable portion was purchased between February, 1811, and the revocation of the orders in council, and a few were purchased immediately after the revocation. Orders were given, in the summer of 1810, for the bulk of the goods which have been lately imported, and the principal part of these orders were executed by the month of December, 1810; but, on the appearance of the President's proclamation of the 2d November, 1810, the merchants countermanded the shipment of their goods, and the further execution of their orders, and gave instructions that they should be completed, and the shipments made when the orders in council should be revoked, and their importation into the United States become legal. A great portion of these goods was paid for at the time they were put up; some of them bought upon the usual credit, but paid for long before the revocation of the orders in council.

Dry goods, which were put up prior to 2d February, 1811, and those which were purchased after the revocation of the orders in council, were laid in at about the usual prices. Those purchased in the intervening time, were from ten to fifteen per cent. lower. Some articles of hardware cost rather an increased price, and none were purchased at reduced prices.

The importers of British manufactures are not, in Philadelphia, exporters of produce. The trade of that city is divided among two classes of merchants: one class imports, and the other exports. The importer almost universally makes his remittances in bills. The rate of exchange in Philadelphia varied, in 1811, from ten to twenty-two and a half per cent. discount. In 1812, it has varied from ten to twenty per cent. discount. Two weeks ago, it was at sixteen. In the Fall of 1810, it was at about five per cent. discount. The merchant does not consider as a part of his profit the advantage gained from a temporary depression of exchange, because, on other occasions, he has to pay a corresponding advance. It will be found, in twenty years, or other considerable given period, to be balanced. When it has been above par, they have not increased the usual advance on their goods. They have never, before late periods, known exchange on England to be so low; never knew it, before these periods, to be lower than ten per cent.

Generally speaking, about one-third of the late importations remains on hand. The profits have been rather greater than formerly; from five to ten per cent. greater. But the merchants have been idle for almost two years, paying house rent, and all the other expenses of their establishments, without any gain, and, considering these disadvantages, they will, notwithstanding this profit, be losers, not gainers, on their business.

The quantity imported is not a full importation.

BALTIMORE.

The committee from Baltimore confirmed, as applicable generally to that city, the statement of the committee from New York, except so far as the following particulars may be variant from it:

They stated that Mr. Russell, late chargé des affaires of the United States at London, had been applied to for his opinion and advice, and that he did advise these shipments, and gave it as his opinion, that the shippers would be safe; that the original importers of Baltimore had sold nearly all their goods; that they have not more than one fifteenth or one-twentieth of their importations on hand; they have passed into the hands of jobbers and speculators; the average profit which the importers have obtained, beyond that of ordinary years, is between 5 and 10 per cent.

The usual practice, under the late restrictions, has been to give orders for goods to be executed on the contingency of a remission of these restrictions. It is believed that many of the goods lately imported, were purchased before the revocation of the orders in council, and many before 2d February, 1811. The hardware importations were all of this description. One of the committee, in October and November, 1811, passed through the great manufacturing towns in England, and saw the warehouses full of goods, packed up, which were said to be there on American account.

A great many of these goods were paid for before their shipment, others were remitted for before their arrival, and others have been obtained on the usual credit. It has not been the general practice to pay for goods at the time of purchase; but merchants have had much more the means of paying for the late importations, than they had to pay some years ago; this increased ability has arisen from the circumstance that this description of merchants have done no business for nearly two years past. There will be always some not wholly paid for; but, whether paid for or not, whenever they are out of the warehouse, they are considered as on account of the importer.

The importers of these goods are not the same persons who have shipped American produce to the Peninsula. It is usual for these importers to place funds in England, in anticipation of their orders, for the purchase of goods; the usual operation is, by the purchase of bills of exchange.

Dry goods have been purchased lately, at a lower rate than formerly, in England; those purchased in March, April, and May, were obtained at a lower rate than the same goods have been purchased at, at any other time. It was only at these periods that goods were purchased at an unusually low rate.

They have not taken into the calculation of the profit of these importations, the advantage on the purchase of bills; this is not included, because, if, on an average, the merchant pays no more than par for the bills he remits, he is satisfied, and the experience of merchants proves, that no material advantage results to them in a course of years. There are cases in which persons went to England, provided with extensive funds, and have speculated on the low prices of the last Spring; but the great bulk of the goods imported were shipped in consequence of orders long before given. These importations have effected the return to this country of so much American capital. These importations have not exceeded the orders given—they have been less. Five ships were carried into Norfolk, three of which belonged to Baltimore, and one merchant gave bonds for nearly the whole of their cargoes, which averaged £100,000 sterling each. One vessel, belonging to Baltimore, the *Eliza Ann*, was carried into Boston; the value of the cargo exceeded £100,000 sterling, and one man gave bonds for the whole cargo; these bonds were sometimes given in the expectation of a commission, without any authority from the owners of the property.

NEW YORK.

The committee from New York, in a subsequent communication, stated further, that the late importations into that city included purchases which were made after the revocation of the orders in council, as well as those which were made before the 2d February, 1811, and at intervening periods, but that the great mass had been purchased, and was on hand, remaining on American account, from the latter end of the year 1810. They did not think, they said, on being interrogated to that point, that this was a large calculation, notwithstanding the relaxation introduced by the law of March, 1811; because the merchants had asked information of the Secretary of the Treasury, before the passage of that law, as to the construction of the act of the 1st May, 1810, and the President's proclamation of 2d November, 1810, and were informed by that officer, that all goods which should not arrive in the United States prior to the 2d February, 1811, would be liable to forfeiture; that they therefore countermanded their orders, and did not enjoy the advantage which was granted by the act of March, 1811.

Orders, which are to be executed in the Fall, are usually given by the first January preceding, but the merchant frequently revises his orders in the Spring.

Some of the goods lately imported have been purchased at a low rate, but a great part of them has not; as many of them have been long laid in, the late purchases have been made at lower than former prices.

The importers of British manufactures in New York, are a separate class of men from the shippers of American produce; they had no interest in the shipments to the Peninsula; there is scarce an exception within the knowledge of the committee, except Mr. Coster, one of themselves, whose trade was not to the Peninsula, but to the North of Europe; not one half of the American property in England, has been brought home; there were but twenty days in which to make shipments; 23d June, the orders in council were revoked. On the 13th July, news of the declaration of war reached Liverpool, and it is believed no licences were granted afterwards. The late importations are not equal to one half of the usual supply, perhaps not one-third.

There has been an advantage obtained by the shippers to the Peninsula, by the depreciation of exchange on England; when they took bills, they were obliged to take bills. The exportation of specie was not generally permitted, and where not specially permitted, the attempt to export, if discovered, was coupled with forfeiture.

The course of trade practised by importers of British manufactures, as to payments, has been changed; formerly, the shipments were made on credit; now, the purchases are made with cash; the merchant who wants goods, and has not money, obtains his credit here, instead of obtaining it in England, as formerly; this country is, and has been for some time, the creditor of England; those who have imported on credit, for some time past, have been ruined. It is believed that the greater part of the goods, the orders for which were executed in the Fall of 1810, was paid for at the time of purchase. There are, it is believed, cases in which the goods have been shipped to order, and were deliverable on contingencies to the American merchant, but they are probably few in number, because it cannot be presumed that, in the hostile attitude which the countries have presented, many men would be found who were disposed to place their property in a situation so precarious.

Mr. Russell stated, that, after the revocation of the orders in council, many of the American merchants did apply to him to obtain his opinion, whether they could ship British manufactures to the United States with safety or not? That, before the revocation of the orders, upon considering the whole circumstances of the case, examining the words of the law, and perceiving that its operation depended solely on the revocation of the orders in council—considering the evident bearing of the examinations in Parliament, and the ground on which the opposition contended for the revocation of the orders, which was not so much an act of justice to the United States as the advantage that was promised to their own manufacturers, he thought it his duty to countenance the idea that shipments made after the revocation of the orders, would be admitted into the United States; that this ground was taken by the advocates of a revocation of the orders, who declared that they would advise their friends to ship, as they believed shipments, in the event of a revocation, might be made with safety, and that he thought good policy required him to countenance the idea, in order to co-operate as far as possible, with the advocates of the revocation of the orders.

That, after the revocation of the orders, he continued to declare, and did declare, to the merchants who applied to him, as his opinion, that they might make shipments with safety. This opinion applied only to the cases where shipments were made before war. After a knowledge of the war had reached England, he declared distinctly to the merchants, that the ground of a probable annulment of the non-importation act, by the Government of the United States, had ceased.

Mr. Russell stated, however, that, after the knowledge of the declaration of war had reached England, he did still advise the American merchants to ship, because, if the property remained in England during the war, it would be ruinous to the holders. Many persons, after the revocation of the orders, and before the news of war arrived, had made purchases. He would not be understood to say, that he advised the merchants that, in case the law should not be repealed, they would be permitted to enjoy the advantages of a monopoly, and the consequent extraordinary profits, but merely that the property would not be confiscated. This, however, he said, was not at all a subject of conversation. His opinion that shipments might be made with safety, was founded as well on a presumption that the law would be annulled, as that the shippers would, in any event, be placed, as nearly as possible, on the footing on which they would have stood had the law been annulled. That, if the law should not be annulled, the special circumstances under which the shipments were made would entitle them to an exemption from its penalties. He believed that, before the revocation of the orders, and after the interdiction, purchases were made under an expectation of a revocation, and these were made at reduced prices. The depression was not very material. After the revocation, there was a rise, but they remained, throughout, lower than in common times, when the trade was assuredly free. He did not, however, pretend to be very conversant in these matters.

Some of the goods were purchased before the 2d February, 1811; but, he would suppose they formed a very small portion of the importations. In the period intervening between that date and the revocation of the orders, there had been more considerable investments, but he believed the greatest portion was purchased after the revocation. There was then great activity in investments, but he thinks it probable they were purchased with funds which had been remaining there for the purpose, and which were appropriated agreeably to orders which had been previously given, to be executed in the event of the revocation of the orders in council.

The knowledge of the declaration of war reached England about the 25th or 26th July. Official information was not so soon received, and therefore the embargo which was laid by the British Government was not imposed till the 30th July. The order, subsequently issued, permitting the departure of licensed vessels, but limiting their departure to the 15th of ———, was extended in some special cases, but not generally.

The following affidavits and letters are selected from a number reported by the Committee as part of their report; those which are not printed are of a like tenor.

UNITED STATES OF AMERICA, }
City of New York, } ss.

By this public instrument, be it known to all whom the same doth or may concern, that I, John T. Irving, a public notary in and for the State of New York, by letters patent under the great seal of the said State, duly commissioned and sworn, and in and by the said letters patent invested "with full power and authority to attest deeds, wills, testaments, codicils, agreements, and other instruments in writing, and to administer any oath or oaths, to any person or persons," do hereby certify, that, personally appeared before me, Charles Osborne, Cornelius Heyer, H. Van Wagenin, John Stoutenburgh, William Irving, Nathaniel Richards, John Dodgson, John Mowatt, Jr. Eliphalet Williams, Robert C. Cornell, John B. Dash, Benjamin W. Dwight, John R. Willis, Isaac Carow, Joseph Cornell, William W. Mott, James Jenkins, Francis B. Winthrop, Jr. Moses Judah, Garret B. Abeel, Edward Lyde, George Newbold, Seabury Tredwell, Leonard Kip, James J. Roosevelt, Charles Smith, Jr. Robert Lee, Ebenezer Irving, James S. Bailey, Joseph Curtis, and Henry King, all merchants, of the city of New York, and well known to me, who severally subscribed their names to the within deposition, and being by me severally sworn and affirmed, respectively deposed and affirmed to the truth of its contents.

In testimony whereof, I, the said notary, have subscribed these presents, and I have hereunto affixed my seal of office, the sixteenth day of November, in the year one thousand eight hundred and twelve, and of the independence of the United States of America the thirty-seventh.

JOHN T. IRVING, *Notary Public.*

STATE OF NEW YORK, }
 City of New York. } ss.

The subscribers, importers of hardware, in the city and county of New York, and merchants there resident, being severally duly sworn and affirmed, severally say:

That they have severally received importations of British manufactures, in their line, since the revocation of the orders in council by Great Britain; that, of these importations, they believe not more than one-third have been sold; that sales by the package, or wholesale, have been made at an average advance of about ninety per cent. on the invoice; that the average charges of inland carriage, export duty, shipping commissions, insurance, freight, duties of import, &c. amount to sixty-five per cent., of course not leaving a profit on their investments of more than sixteen per cent. or of twenty-five per cent. on the invoice cost, exclusive of any accidental benefit arising from exchange; that this benefit has been much less than would appear, by reason of many of the importers having remitted their funds, twelve, eighteen, and even twenty-four months ago, at which period exchange was not more than from six to ten per cent. under par; and against whatever gain may have been so made the loss of interest, with the expense of storage, insurance from fire, &c. in England, may be considered as nearly a counterbalance. And these deponents and affirmants severally further say, that the said sales that have been effected by the package have been of the articles most in demand, and therefore most profitable; that the residue consists of many articles less saleable, and some of which, owing to the increase of the manufactures of this country, have been supplanted, and must be sold at little or no profit, such as nails, spades and shovels, planes, hollowware, whip thongs, webbings, mill saws, brushes of most descriptions, &c. &c.

Charles Osborne,	Eliphalet Williams,	James Jenkins,	James J. Roosevelt,
Cornelius Heyer,	Robert C. Cornell,	Francis B. Winthrop, Jun.	Charles Smith, Jun.
H. Van Wagenin,	John B. Dash,	Moses Judah,	Robert Lee,
John Stoutenburgh,	Benjamin W. Dwight,	Garret B. Abeel,	Ebenezer Irving,
William Irving,	John R. Willis,	Edward Lyde,	James S. Bailey,
Nathaniel Richards,	Isaac Carow,	George Newbold,	Joseph Curtis,
John Dodgson,	Joseph Cornell,	Seabury Tredwell,	Henry King.
John Mowatt, Jun.	William W. Mott,	Leonard Kip,	

I, David Dunham, of the city of New York, auctioneer, do hereby certify and declare, that I am in daily practice of vending at public sale, goods of the late importations from Great Britain, &c.; that my sales embrace almost a general assortment of British manufactures, and that, for the present week alone, I have sold to the amount of near forty thousand dollars; that, with very few exceptions, the said goods have not brought above seventy to eighty per cent. upon the original costs; that the few instances where they have brought above that advance, it has more frequently occurred that they have not brought cost and charges, and in some instances, that there has been from ten to twenty per cent. loss on the goods. And I do further certify and declare, that, in the importations of goods, in which I have been interested, I have found a number of packages that it has been with difficulty that more than cost and charges have been obtained; and that I have *now* on hand an *entire* importation, that (owing to the long detention of said goods at New London; at which port they have been wrongfully detained) I am willing to sell for cost and charges; and further, that, when the whole of the goods *now* under detention, shall be brought into market, that the prospect is, that they will be considerably lower. And I do further declare, that I have been interested (under the firm of Dunham and Randolph) in the purchase of a very large amount of British manufactured goods, associated with three or four other houses, say upwards of half a million of dollars, and a great proportion of which have been purchased at a *bare* mercantile profit, after deducting all the contingent expenses attending the same; and lastly, that, in speaking of the cost and charges of all goods, the several penal bonds to the United States are never taken into calculation as composing any part thereof. To all these facts I subscribe, and stand ready to testify with my corporal oath, if necessary.

DAVID DUNHAM.

I, Matthias B. Edgar, a partner in trade with Mr. Dunham, the annexed named J. Valentine Van De Water, and I, Edward D. Burke, Clerks in the employ of the said David Dunham, are privy to the facts set forth in his certificate, so far as relates to his auction sales, and the goods imported by him, and of those now on hand; of the facts relating to the goods in which he has had an interest, with J. F. Randolph, under the firm of Dunham and Randolph, we believe to be true.

MATTHIAS B. EDGAR,
 VALENTINE VAN DE WATER.
 EDWD. D. BURKE.

NEW YORK, 16th November, 1812.

The subscribers, commission merchants and auctioneers, of the city of New York, do certify, that they have sold, both at private and at public sale, large quantities of British manufactured goods, which have been imported here in vessels which left Great Britain subsequently to the order in council of 23d June last; that, in almost all instances, they had the original invoices of the said goods and that they are of opinion, from various calculations they have made, the said goods have, upon an average, afforded a profit to the importers, beyond the cost and charges, of about, but not exceeding, twenty per cent. They further certify, that they have sold several separate invoices of goods, which did not produce as much as the cost and charges.

BOGGS, LIVINGSTON, & Co.

NEW YORK, ss.

On this 16th day of November, in the year one thousand eight hundred and twelve, before me, B. Livingston, an associate Justice of the Supreme Court of the United States, personally appeared James Boggs, one of the mercantile firm of Boggs, Livingston, & Co. of the said city, who, being duly sworn, deposeth and saith, that the facts stated in the foregoing certificate are, to the best of his knowledge and belief, substantially true.

JAMES BOGGS.

Sworn the 16th November, 1812, before me.

B. LIVINGSTON.

Jabez Harrison, of the city of New York, merchant, maketh oath, that he has imported, during the present Fall, since the repeal of the orders in council, about two hundred and thirty packages of dry goods, consisting of what is usually termed a general assortment; that, from those goods, he has sold several packages at less than cost and charges; that he has now on hand about twenty packages, for which, on an average, he is not offered more than the costs and charges; that upwards of one hundred packages of the foregoing have been sold at an advance varying from sixty to eighty two and a half per cent. and not exceeding the latter.

J. HARRISON.

Sworn before me, the 17th November, 1812.

WM. BLEECKER, *Notary Public.*

UNITED STATES OF AMERICA, }
 City of New York, } ss.

By this public instrument, be it known, to all to whom the same doth or may concern, that I, John T. Irving, a public notary in and for the State of New York, by letters patent under the great seal of the said state, duly commissioned and sworn, and, in and by the said letters patent invested "with full power and authority to attes

deeds, wills, testaments, codicils, agreements, and other instruments in writing, and to administer any oath or oaths, to any person or persons," do hereby certify, that, personally appeared before me, Daniel Hawxhurst, of the city of New York, merchant, known to me, who, in my presence, subscribed his name to the within deposition, and, being by me duly affirmed, deposed to the truth of its contents.

In testimony whereof, I, the said notary, have subscribed these presents, and I have hereunto affixed my seal of office, the sixteenth day of November, in the year one thousand eight hundred and twelve, and of the independence of the United States of America the thirty-seventh.

JNO. T. IRVING, *Notary Public.*

UNITED STATES OF AMERICA, }
District of New York, } ss.

Daniel Hawxhurst, of the city of New York, merchant, being duly affirmed, saith, that he is well acquainted with the value of hardware; that, within forty days past, he has purchased the best and scarcest articles, and those which yield as much profit as any others, at seventy-five per cent. advance on the nett amount of the invoice, at a credit of four months, and the discounts allowed in England were allowed to him; and that he knows the charges which have to be paid out of this advance of seventy-five per cent., in export duty, shipping expenses, insurance, commissions, freight, duties on imports, &c. &c. amount to from sixty to seventy per cent., and that the importer receives no more than a fair mercantile profit on the articles of this kind.

DANIEL HAWXHURST.

Affirmed to this 16th November, 1812, before me,
JNO. T. IRVING, *Notary Public.*

UNITED STATES OF AMERICA, }
District of New York, } ss.

Leonard Kip, of the city of New York, merchant, being duly sworn, deposes and saith, that he is well acquainted with the value of hardware; that, within ten days, last past, he has purchased the best and scarcest articles, and those which yield the largest profit, at ninety per cent. advance, on six months credit; and that he knows the charges which have to be paid out of this advance of ninety per cent., viz: export duty, shipping commissions, insurance, freights, duties of import, &c. amount to from sixty to seventy per cent, and that the importer receives no more than a fair mercantile profit for articles of this kind. And this deponent further saith, that he has now on hand a large quantity of nails, spades, and shovels, which, in consequence of the high duties and extra charges, he is willing to sell for the first cost, together with the double duties and invoice expenses, &c. to which the same are subject.

LEONARD KIP.

Sworn the 14th November, 1812, before
B. LIVINGSTON.

UNITED STATES OF AMERICA, }
District of New York, } ss.

Asa Hoyt, of the city of New York, merchant, being duly sworn, deposes and saith, that he is well acquainted with the value of hardware; that, within forty days last past, he has purchased the best and scarcest articles, and those which yield the largest profits, at ninety per cent. cash, and one hundred per cent. at four and six months credit, by the package, and that he knows the charges which have to be paid out of this advance of ninety to one hundred per cent., viz: export duty, shipping commissions, insurance, freight, duties of import, &c. amount to from sixty to seventy per cent., and, after taking from the list of importations, low priced cutlery, butt-hinges, and a few other light articles, the residue will not, under the double duties, bear a future importation, excepting in quite limited quantities, particularly brass, hollow ware, shovels, &c. which now form a considerable part of the importations, and do not, excepting at retail, pay any profit, and that the importer receives no more than a fair mercantile profit on the whole.

ASA HOYT.

Sworn this 16th day of November, 1812, before me,
C. BOSTWICK, *Notary Public, New York.*

NEW YORK, *November 14, 1812.*

DEAR SIR:

Some of my friends and neighbors feel a great interest on a subject now before Congress, in which, having personally but little interest, my views of the subject may perhaps be useful to you, when your attention shall be drawn to its consideration; at any rate, I presume on your friendship, to receive with candor the ideas I shall communicate.

Many of our importers of British goods are under immense responsibilities to the Government, for themselves and their friends; the course of my business would, at almost any other season, have placed me under similar circumstances; but not expecting, myself, the repeal of the orders in council, I had withdrawn my brother from England last year, and having no one there to act for us, we have not imported a cent on our account this season, although we have pretty large funds there, arising from shipments made a long time since. We have only bonded for \$3,750, amount of a small shipment made to us by an American citizen, in which we have no interest.

I am fully persuaded that Government wish to act with perfect fairness in relation to these bonds, and that the merchants have only to make out their case, as *entitled* to relief, to receive the full measure of it.

That those American merchants who happened to be in England, or had partners or agents there, on the repeal of the orders in council, should venture to make shipments, I presume can surprise no one, who has attended to the correspondence which has passed between the two Governments; at least, I am ready to say, that, not knowing or expecting war, I should certainly have done so, freely, had I been there. The only objection of any weight, to cancelling the bonds, that I have heard, is the large *profits* the merchants have realized; it is true, that some of those who were fortunate enough to have their vessels arrive early in the season, without the interruption of private or public cruisers, and who sold off their goods immediately, have secured unusually large profits on some descriptions of goods, say low priced woollens, &c. These prices have been obtained in consequence of the previous scarcity, and a belief that, in consequence of the war, further supplies were precarious, and not from any idea of indemnity against the risk of the penal bonds to Government. In all our large cities, there are a class of dealers who buy by the *package* from the importers, and sell by the *piece* to the country traders; this class of people have probably felt rather unfriendly to the importers, to whom they gave any *extra* profit, and many of them have represented the importers' profits as extravagant, in order to cover their own extortions on the country merchants. If, however, for this single season, the importers' profits should be unusually large, is it any thing more than the fair chance of trade, or an indemnity against the *losses* of former periods, arising out of the course of measures pursued by the Government for the general good, but which have borne with great severity on the importing dry good and hardware merchants? I do assure you, that, although I have conducted my business with my usual industry and judgment, that, for the last three years, I have not made my current expenses; and this I know to be the case with many others; there-

fore, although I do not share with them the handsome profits of this season, I feel that they are entitled to it, and do not envy them. Thus far, I have only viewed the bright side of the subject; there is, however, probably, a majority of those who have given bonds, who will only make a fair mercantile profit, in consequence of the expenses on, and delay in, the receipt of their goods, arising from detention by the cruisers, who have, in many instances, sent in the merchant ships to distant ports from where they were bound, and thus obliged the consigners of the goods to incur heavy expenses in procuring the release. Under these circumstances, the *delay* in getting possession of the property, has, in most instances, deprived the merchant of the greater part of his expected profit; and, it is within my own knowledge, that now (when goods have fallen in price, so as to afford, in most instances, little more than the usual small profits, and in some instances, *no profit*) many of the importers are but just getting possession of a great proportion of their goods, and many are not yet released. We have, ourselves, a ship in the freighting business, which was proceeding from Scotland to this port, with a valuable cargo of dry goods, on account of various merchants in this city; she was captured in August last by a privateer, and carried into Bristol (Rhode Island.) The ship is released on bond, but nearly the whole of the cargo is this day in store in Bristol, under charge of the marshal or collector—the privateer (the *Yankee*) refusing to consent to their release on bond. Are not these cases of hardship?

I am, with much respect, dear sir, yours, truly,

JAS. HEARD.

LEWIS CONDUCT, Esq.

BALTIMORE, November 17, 1812.

MY DEAR SIR:

In consequence of the death of our mutual and respectable friend, Mr. David Armour, of this city, as his particular friend, and administrator of his estate, the duty has devolved upon me of stating particularly the transaction as it occurred, and the circumstances under which the goods lately imported by Armour and Jenkins arrived. This subject, I observe, being referred to a committee of the House of Representatives, to make report on, imposes an obligation on me of stating such facts and circumstances, relating to this business, as I conceive may be useful. This I should have done at an earlier period, but was prevented by the want of the documents from Norfolk, which came to hand the night before last only. For many years past, as will no doubt appear, by referring to the Treasury Department, Armour & Jenkins, (saddlers of this city) were in the practice of importing, every Spring and Fall, a small quantity of saddlery. Pursuing their customary plan, on the 30th of June, 1810, they ordered the goods which have lately arrived, the subject which is now before the committee. Shortly after this period, Mr. D. Armour was taken sick, and died on the 11th of November following, leaving a widow and six children. During the time between the 30th of June, 1810, and his death, part of the money for those goods was paid; the balance, Mr. Jenkins, the surviving partner, paid, by great exertions, in the latter end of March, 1811, having obtained the money, in part, from the Union Bank of Maryland, on loan, to effect this object. The inducements to those exertions were, that Messrs. William Walker & Co. of Philadelphia, who were the agents of the Messrs. Walkers in England, of whom the goods were ordered, gave him a discount of 7½ per cent. for prompt payment. You will please to observe, that, when this money was paid, the goods were expected in a very short time; this opinion was induced by the letter of William Walker & Co. of Philadelphia, dated 13th March, 1811, an extract from which is herewith enclosed. The circular from the Treasury Department, it is presumed, which reached England in the interim, stopped their shipment, as, by that instrument, no goods were allowed to be landed in this country, which should arrive after the 2d of February; although it so turned out, that, had they been shipped, by a subsequent law of Congress they would have been legally imported, as the law admitted all goods that should leave England before the 2d of February. In the midst of those difficulties, and believing, from the declaration of our Government, that the non-importation act would be repealed, as soon as the British Government should revoke their orders in council, Mr. Jenkins, the surviving partner, with, I believe, almost every other importer, ordered the goods shipped, as soon as the orders in council should be removed. This event having taken place, and the shippers in England not knowing of war being declared by this Government, shipped them under the former orders they had received. I should have mentioned, that the goods sold, as heretofore mentioned, by order of the orphans' court, were sold on a credit of six months, which time, added to that already elapsed since the money was paid, makes twenty-five months' interest due, or 12½ per cent.; from which deduct the 7½ per cent. allowed for prompt payment, and 5 per cent. stands of course a proper item in the price of the goods, which would, on the money paid in England, amount to about \$720. From the foregoing, which is founded, not upon speculative suppositions, but upon facts, absolute in themselves, the documents of which can be exhibited, if necessary, it would follow, that, if the Government exacted the bonds taken, Armour & Jenkins would lose \$10,935 03½; this results from the following facts:

The amount of penal bond, per Tom Hazard, in Norfolk, is	-	-	-	-	\$12,807 88
Do. Do. Brig Ann, in Baltimore,	-	-	-	-	640 33
					13,448 21
From this sum, deduct nett profits made, as per statement No. 3,	-	-	-	-	2,513 17½
					\$10,935 03½

I am aware that something may be said about the rate of exchange; on this head, I shall adopt the language of Mr. Russell on a late occasion. I have *nothing to disguise*. The advantage of bills, upon the whole of this transaction, has been about 14 per cent.; but *have we not, without any fault of ours*, been subjected to great trouble, anxiety, and alarm? Yes, more than any man in his senses would be willing to undergo for such an advantage.

Having, as I conceive, made a fair and honest statement of this business, I would ask, what will Government be likely to do? In coming to this determination, there will be but one object in view—this object is justice. You know me too well to suppose I would not be among the very first to step forward to punish any violation of the laws of our own Government; but it is surely a sound maxim to say, that, where there was no intention to transgress, there can be no crime; and where there has been no crime, I am quite sure, an honest Government, like ours, will never punish. You may ask how a discrimination can be made. To this I would say, that, if the collected wisdom of the United States cannot devise means to punish the guilty, without involving the innocent, let the whole escape. Adopt the common declaration of law—it is better for ninety-nine guilty persons to escape, than to punish one innocently. Having been thus lengthy, I shall conclude by giving you permission to make what use you please of this letter, and the accompanying documents.

I remain, yours, very respectfully,

JOHN HILLEN,

Administrator of the estate of D. Armour, deceased.

ALEXANDER M'KIM, Esqr.

Extract of a letter from Wm. Walker & Co. dated Philadelphia, 13th March, 1811, to Messrs. Armour & Jenkins.

“GENTLEMEN: We have yours of the 11th; the last accounts we have from our friends in England, are of the 22d December, at which time they intended shipping all they could get on board by 2d February. They mention particularly, that the Baltimore orders having been received early, were in great state of forwardness, and would be ready for the first vessels. We have, therefore, no doubt, but the greatest part of your goods will be in the *Diana*.”

12th CONGRESS.]

No. 380.

[2d Session.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, ON THE 7TH OF DECEMBER, 1812.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

I. *To the end of the year 1812.*—The actual receipts into the treasury, during the year ending on the 30th of September, 1812, have consisted of the following sums, viz:

Customs, sales of lands, arrears, repayments, and all other branches of revenue, amounting together, as will appear more in detail by statement E, to	\$10,934,916 90
On account of the loan of eleven millions of dollars, authorized by the act of March 14th, 1812,	5,847,212 50
Total amount of receipts,	16,782,159 40
Making, together with the balance in the treasury, on the 1st of October, 1811, and amounting to	3,947,818 36
An aggregate of	<u>\$20,729,977 76</u>

The disbursements during the same year have been as followeth, viz:

Civil department, including miscellaneous expenses, and those incident to the intercourse with foreign nations,		\$1,823,069 35
Army, militia, volunteers, fortifications, arms, and arsenals,	\$7,770,300 00	} 11,108,776 54
Navy department,	3,107,501 54	
Indian department,	230,975 00	
Interest on the public debt,	2,498,013 19	
On account of the principal of do.	2,938,465 99	5,436,479 18
Amounting, together, as will appear more in detail by the statement E, to		18,368,325 07
And leaving in the treasury, on the 30th September, 1812, a balance of		2,361,652 69
		<u>\$20,729,977 76</u>

The statement Ee exhibits, in detail, the payments made by the Treasury Department, for the several branches of the military and naval expenditure, during the same year, (from the 1st of October, 1811, to 30th September, 1812) and also during the two last months, (October and November, 1812.)

The receipts for the last quarter of the year 1812, on account of both revenue and loans, are estimated at \$9,000,000; and the expenditures (including about 1,500,000 dollars, on account of the principal of the public debt, and 1,000,000 dollars for the militia) at nearly the same sum.

The sums obtained or secured, on loan, during this year, amount, so far as has been ascertained at the treasury, to (a.)		\$13,100,200 00
Of which there was received prior to the 1st October, 1812, as above stated,	\$5,847,212 50	
Received, or to be received, prior to 1st January, 1813,	6,202,987 50	
To be received in January and February, 1813,	1,050,000 00	
		<u>13,100,200 00</u>

It will also appear, by the statement F, that this sum was obtained on the following terms, viz:

For six per cent. stock, irredeemable till the 1st of January, 1825, and afterwards redeemable at the pleasure of the United States,		\$7,415,200 00
On temporary loans, at the rate of six per cent. a year, and reimbursable as followeth, viz:		
In 1813,	1,350,000 00	
In 1814,	750,000 00	
In 1817,	50,000 00	
		2,150,000 00
For treasury notes, bearing an annual interest of 5½ per cent. and reimbursable one year after date,		3,535,000 00
		<u>\$13,100,200 00</u>

From the present demand, it appears probable that the residue of the treasury notes, authorized by the act of 30th of June last, and amounting to \$1,465,000, will be disposed of prior to the 1st of March next.

It may be proper also to state, that, notwithstanding the addition thus made to the public debt, and although a considerable portion has been remitted from England and brought to market in America, the public stocks, which had at first experienced a slight depression, have been, for the last three months, and continue to be, at par.

II. *Year 1813.*—The nett revenue, arising from duties on merchandise and tonnage, which accrued during the year 1810, amounted to

	\$12,513,490
The nett revenue, arising from the same sources, which accrued during the year 1811, amounted, as will appear by the statements A and B, to	\$7,902,560

The same revenue, for the year 1812, is estimated at 12,500,000 dollars; of which sum, about 5,500,000 dollars arise from duties on the late importations from Great Britain.

The custom house bonds, outstanding on the 1st day of January, 1813, and falling due in that year, are estimated, after deducting bad debts, at 11,250,000 dollars; and it is believed that the probable amount of receipts from that source, into the treasury, during the year 1813, may be safely estimated at 11,500,000 dollars.

The sales of public lands, north of the river Ohio, during the year ending on the 30th September, 1811, and after deducting the lands which have reverted to the United States, have amounted, as appears by the statement C, to 390,000 acres; and the payments by the purchasers to 790,000 dollars. The Indian wars may affect the sales, and perhaps, to a certain extent, the amount of payments. It is, however, believed, that that branch of revenue may, together with some other small items, be estimated, for the ensuing year, at 500,000 dollars; making the whole amount of probable receipts into the treasury, for the year 1813, (exclusively of loans) 12,000,000 dollars.

The expenditures for that year are estimated as followeth, viz:

1st. Expenses of a civil nature, both foreign and domestic,		\$1,500,000
2d. Public debt, viz.		
Interest, including that on new loans of the years 1812 and 1813,	\$3,300,000	
Reimbursement of six per cent. and deferred stocks, and of temporary loans and treasury notes falling due in 1813, and estimated amount of purchases of stock,	5,200,000	
		<u>8,500,000</u>

(a.) The amount was stated in the President's message, at the commencement of the session, at eleven millions of dollars. The other two millions have been contracted for subsequent to its date.

3d. Military establishment:

The estimates of the Secretary of War are, with respect to the army, predicated on the employment of the whole force authorized by law, and amounting to 36,700 men, of every description. Adding to this the expense incident to the service of volunteers and militia, and also the increase of pay of the army, the appropriation for arming the militia, and 400,000 dollars of the unexpended balance for fortifications, the whole contemplated expense may be estimated as follows:

Army—pay, subsistence, bounties, clothing, and hospitals,	-	-	-	\$9,350,000
Ordnance and armories,	-	-	-	1,850,000
Quartermaster's department and contingencies,	-	-	-	2,500,000
Fortifications,	-	-	-	900,000
Arming the militia,	-	-	-	200,000
Volunteers and militia, in actual service,	-	-	-	2,000,000
Indian department,	-	-	-	200,000
				17,000,000

4th. Naval establishment:

The estimates of the Secretary of the Navy are predicated on the employment of the following force, viz:

Commissioned and warrant officers,	-	-	-	871
Petty officers, seamen, and boys, viz:				
For nine frigates and nine smaller vessels,	-	-	-	3,620
For two hundred gun-boats and other vessels,	-	-	-	7,000
Marines, including officers,	-	-	-	1,869
				13,360

And the expense is estimated as followeth, viz:

Pay, provisions, and medicine,	\$3,290,000
Ordnance,	100,000
Repairs, contingencies, and navy yards, adding the annual appropriation of \$200,000 for timber,	1,125,000
Marine corps,	410,000
						4,925,000

Amounting, altogether, to 31,925,000
 The receipts on account of the revenue, having been estimated at 12,000,000

Leaves a balance to be provided for, by loans, of \$19,925 000

Of this sum, more than one million is already contracted for, and there remains on hand a balance of about a million and a half, in treasury notes, not yet disposed of. An authority to issue new notes, for about two millions and a half more, being the amount reimbursable in 1813, will still keep the whole amount issued at five millions, and reduce the amount of the loan to about fifteen millions of dollars.

In order to facilitate the loan, and perhaps to improve its terms, it may, however, be eligible to leave some discretion in the Executive, as to the respective amounts of stock and notes to be issued; which may be advantageously varied, according to circumstances, without increasing the aggregate of both.

The preceding estimates do not embrace the expense incident to the proposed increase of the navy, nor any other expenditure, not yet authorized by law. In order to meet any new expense which may thus be authorized by Congress, it will, therefore, be necessary to increase the loan to a corresponding amount.

The sums received, or to be received, on loan, during the calendar year 1812, have been stated at \$12,950,200

The payments on account of the principal of the debt, during the same year, though not yet precisely ascertained, may be estimated (so far as ascertained on the 1st of December, at the treasury) at 2,350,200

Making the actual increase of debt, during that year, - - - - - \$10,600,000

It appears, according to the preceding estimate, that the whole sum to be borrowed, during the year 1813, will amount to about twenty millions of dollars; and that the payments on account of the principal of the public debt will exceed five millions; making the actual increase of debt, during that year, - - - - - \$15,000,000

Of the revenue which will accrue during the year 1813, and on which the receipts of the year 1814 will principally depend, it is not practicable at this moment to form a correct estimate. So far as may be inferred from the experience of the short period which has elapsed, since the declaration of war, it is not probable that the revenue derived from customs will exceed the amount of \$5,000,000, at which it had been estimated in a former communication. The duties accrued, or which will accrue, during the last six months of this year, after deducting drawbacks and expenses of collection, are estimated at less than 9,000,000 dollars; which, deducting about 5,500,000 dollars on account of duties on the late importations from Great Britain, and one million for the duties on importations from Calcutta and China, would not leave more than 2,500,000 dollars for the ordinary revenue on those branches of commerce which are permitted by law, and from which the United States will not be nearly excluded by the war.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, December 1st, 1812.

A.

A statement exhibiting the amount of Duties which accrued on merchandise, tonnage, passports, and clearances; of debentures issued on the exportation of foreign merchandise; of payments for bounties and allowances; and for expenses of collection, during the years 1810 and 1811.

Years.	Duties on			Debentures issued.	Bounties and allowances.	Gross revenue.	Expenses on collection.	Net revenue.
	Merchandise.	Tonnage.	Passports & clearances.					
1810	16,601,711 71	169,161 24	23,428 00	3,839,160 00	2,268 05	12,952,872 90	439,382 87	12,513,490 03
1811	10,427,412 21	124,363 30	19,737 70	2,227,245 00	784 13	(a) 8,343,484 08	440,924 46	7,902,559 62

(a) Gross revenue, for the year 1811,	-	-	-	\$8,343,484 08
Deduct interest and storage	-	-	-	19,026 60
Gross revenue, per statement B,	-	-	-	<u>\$8,324,457 48</u>

Statement of the amount of American and Foreign Tonnage employed in Foreign Trade, for the year 1811, as taken from the records of the Treasury.

American tonnage in foreign trade,	-	-	-	-	Tons, 948,247
Foreign tonnage,	-	-	-	-	33,203
Total amount of tonnage employed in the foreign trade of the United States,	-	-	-	-	<u>981,450</u>
Proportion of foreign tonnage to the whole amount of tonnage employed in the foreign trade of the United States,	-	-	-	-	<u>3.4 to 100</u>

TREASURY DEPARTMENT, *Register's Office*, November 18th, 1812.

JOSEPH NOURSE, *Register*.

B.

A statement exhibiting the value and quantities, respectively, of Merchandise on which duties actually accrued during the year 1811, (consisting of the difference between articles paying duty, imported, and those entitled to drawback, re-exported) and, also, the nett revenue which accrued, during that year, from duties on Merchandise, Tonnage, Passports, and Clearances.

GOODS PAYING DUTIES AD VALOREM.

12th CONGRESS.]

No. 381.

[2d SESSION.

REDUCTION OF DUTIES ON PRIZE GOODS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 21ST OF DECEMBER, 1812.

Mr. CHEVES, from the Committee of Ways and Means, to whom were referred so much of the petition of the owners and agents of sundry private armed vessels fitted out of the port of New York, as prays a reduction of the duties on prize goods; and the petitions of sundry owners of private armed vessels fitted out of the port of Boston; and of sundry owners of like vessels fitted out of the port of Norfolk and Portsmouth, Virginia, also praying a reduction of the duties on prize goods, made the following report:

That a letter from John Ferguson and John L. Lawrence, agents for the petitioners, from New York, and a letter from the Secretary of the Treasury, both addressed to the chairman of this committee, and which accompany this report, contain all the facts and views which will, probably, be found material in the examination and consideration of this subject. And that this committee, having maturely considered them, are of opinion, that a reduction of the duties on prize goods, without embracing, at the same time, all importations made in the prosecution of the ordinary commerce of the country, cannot, consistently with sound policy and rational legislation, be made; and that a general reduction would diminish the revenue, where it does not distress the consumer, and would not produce any material increase of gain to the captors. The committee, therefore, recommend the following resolve:

Resolved, That it is inexpedient to grant the prayer of the petitions.

WASHINGTON, 23d November, 1812.

SIR:

We take the liberty of enclosing to you, for the inspection of the Committee of Ways and Means, sundry papers connected with the application by the owners of privateers in New York, for a reduction of duties on prize goods. They are as follows:

- No. 1 exhibits the proceeds of the schooner *Venus* and cargo, captured by the privateer *Teazer*;
- No. 2 is a statement of the cost of the privateers *General Armstrong* and *Governor Tompkins*;
- No. 3 contains extracts of letters from several privateer agents.

The Committee of Ways and Means are (including the accompanying document) in possession of three statements of prize sales, where the property was, in each case, of a different character from the others. The cargo of the *New Liverpool* consisted (contrary to our impressions when before the committee) altogether of wine, amounting to 27,959 gallons, whereon the duty was 46 cents per gallon, which consumed more than one-half of the proceeds of vessel and cargo, and, connected with the other charges, left the owners of the privateer about one-sixth of the captured property. The *Industry* was laden with 152 barrels of salmon; and the benevolent intentions of the pri-

vateersmen, to restore to an indigent owner the amount of her loss, terminated, in consequence of the high duties and charges, in an inability to present her with more than a paltry sum, scarcely worth her acceptance. The *Venus* had a cargo of rum, sugar, fruit, and preserves, which produced \$17,637 68, and was charged with duties amounting to \$8,287 63. The vessel being well calculated for a privateer, was bought in by the captors for that business; but, experience teaching them that the profits of private naval warfare are by no means equivalent to the hazard, they have abandoned that intention, and are now offering the *Venus* for sale, in the public newspapers, but cannot meet a purchaser.

We would respectfully suggest to the Committee of Ways and Means, that great anxiety exists in New York that Congress may give the question of a reduction of prize duties a speedy decision; which, if favorable, will revive the spirit and zeal (now expiring) with which privateering was undertaken at the commencement of the war; and, if unfavorable, will prevent those who have purchased vessels for warlike enterprises, in which they cannot now dispose of any interest, from incurring losses accumulated under fruitless expectations.

We here take the liberty of reminding the committee, that no naval force of any efficiency can be supported by the Government, but at an expense far greater than the amount of the duties of which we pray the remission; and that there is, probably, no other species of naval armament half so destructive as privateers to the commerce of an enemy.

The employment of a great number of experienced masters of vessels and seamen, necessarily engaged in them, whose services could not, probably, be obtained in any other way, and whose skill and intrepidity produce so much honor to the country, forms another important consideration.

To these may be added, that, in no other way can the mercantile interest be so effectually united in the support and prosecution of the war, as by offering inducements to the investment of its otherwise unemployed capital in such enterprises.

We are, sir, with great respect, your obedient servants,

JOHN FERGUSON,
JN. L. LAWRENCE.

Hon. LANGDON CHEVES,
Chairman of the Committee of Ways and Means, House of Representatives.

NEW YORK, November 18, 1812.

SIR:

Under, you have the expenses of the schooner *Venus*, as she was sold by the marshal.

Owners, one half, - - - - -	- - - - -	7,682 15

From your's, respectfully,

SAMUEL ADAMS.

P. S. The small balance still remaining in court, and no prospects of getting out, it appears to be more difficult to get the money out of court than to get the prizes into port.

JOHN L. LAWRENCE, Esq.

Cost of private armed schooner *General Armstrong*, of 280 tons, mounting one 38 pounder, four long nines, and fourteen 9 pound cannonades, and 130 men, fitted out of the port of New York.

Cost of vessel and guns,	\$28,000 00
Armorer's bill, \$1,749 20; blacksmith's bill, \$245 46,	1,994 66
Shot, &c. per bill, \$1.094 09; bread and flour, \$670 50,	1,764 59
Medicine chest, \$104 96; duck and hammocks, \$277 12,	382 08
Beef and pork, \$764 50; surgeon's instruments, \$65 12,	829 62
120 casks powder, \$2,340 00; advance to crew, and shipping do. \$2,074 75,	4,414 75
Joiner's bill, \$47 00 cooper's bill, \$71 00; rigger's do. \$178 00; cartmen's do. \$75 50,	371 50
Grocer's bill, 78 89; boat hire, \$65 00; pilotage, \$35 37,	883 26
Fresh meat, \$92 00; ship chandler's bill, \$851 22; block maker's bill, \$125 25,	1,068 47
Tinman's bills, \$160 25; sundry small bills, \$146 22,	306 47
Carpenter's extra bill,	206 41
	\$40,221 81
Commission on purchase and outfits,	2,011 09
	\$42,232 90

Cost of private armed schooner *Governor Tompkins*, of 270 tons, mounting fourteen long 9 pounders, 120 men, fitted at the above, \$42,000 00

NEW YORK, 12th November, 1812.

We hereby certify that the above named armed vessels were purchased and fitted out by us, as agents; and that the actual cost of each, when ready for sailing, was as is stated above.

JENKINS & HAVENS.

Extract of a letter from Abraham Riker, agent for five of the privateers belonging to the port of New York, to John L. Lawrence, dated

NEW YORK, November 13th, 1812.

I sincerely hope you will accomplish what you have undertaken, otherwise the Teazer Company will have to give up privateering, and sell their vessels for the French trade, as the expenses are so heavy, taking into consideration the cost of the vessel, armament, &c. that they can make nothing by the business.

The cost of the private armed schooner Favorite,	-	-	-	-	-	\$9,160 00
Mounting 5 guns and carrying 80 men,	-	-	-	-	-	13,065 00
Total amount of cost of the Favorite, on her first cruise,	-	-	-	-	-	<u>\$22,225 00</u>

Extract of a letter from Samuel Adams, agent for five of the New York privateers, to John L. Lawrence, dated

NEW YORK, November 13th, 1812.

I purchased in the schooner Venus for the benefit of the owners; I was compelled by the marshal to pay the money into his hands, and he has paid it into court, and we cannot get one cent out of the court, notwithstanding we have \$27,000 there at this time; but I presume there will be very little left, after paying double duties, marshal's fees, prize commissioners, wardens, and a number of other expenses, too numerous to mention. If there is not some relief granted by Congress, there will be 20 privateers, to my certain knowledge, from this city, that will give up their commissions, as they cannot get men to enter into the spirit of it as long as there are such heavy expenses attending the condemnation of prizes. We have expended large sums of money in the privateering business, in the following vessels that I am agent for here, viz: the schooner Teazer, 16,000 dollars; B. Franklin, 25,000 dollars; schooner Orders in Council, 40,000 dollars; schooner Saratoga, 40,000 dollars; ship Yorktown, 54,000 dollars.

Extract of a letter from Peter H. Schenck, agent for several privateers, and Secretary of the Committee to forward the privateersmen's memorial to Congress, directed to John L. Lawrence, and dated

NEW YORK, 12th November, 1812.

You mention the expected success on our memorial as relates to court charges, &c. but that the duties are doubtful. We find it almost impossible to dispose of a share, unless the duties are reduced. Every one cries out against it, and will not adventure another cent unless Congress takes off the duties.

Extract of a letter from the same to the same, dated

NEW YORK, 14th November, 1812.

I am much gratified to hear of such a favorable reception by the Committee of Naval Affairs. The question of the duties is, however, the main difficulty, and unless they are remitted, privateering is at an end. I find it impossible to dispose of a single share in the Anaconda. The duties is the evil complained of. All those who have had concern in, and who advocate that species of warfare, declare that, unless Congress take off the double duties, they will not adventure another cent.

TREASURY DEPARTMENT, December 8th, 1812.

SIR:

The documents in the treasury do not yet afford any satisfactory information respecting the value of the prizes made by private armed vessels, or the amount of duties derived from that source. In answer to the inquiry of the committee respecting the propriety of diminishing the duties on prize goods, I can only take an abstract view of the subject.

No part of the duties on prize goods ultimately falls on the captors. The duties on importations are paid by the consumers, whether the merchandise be captured by privateers, or regularly imported by merchants. There may be accidental exceptions, arising from such a superabundance of a particular article as will sink its price below the prime cost and charges. It is not believed that this is now the case, and it is very improbable, that, during the war, this should be the case, with respect to any species of foreign merchandise whatever. Coffee, which is the most abundant article, pays a duty of ten cents a pound. The price for exportation, in which case no duty is paid, is about six cents; and the price for home consumption, is at least sixteen cents. Indeed, it is evident that a reduction of duties will be of no use to the privateers, unless the merchandise continues to be sold at the same price as if the duties had not been reduced. In order to render the reduction beneficial to the captors of prize goods, the consumers must still pay the same price as heretofore; the only difference being, that the duties still thus levied upon them, would be paid to the captors, instead of being paid into the treasury.

The question, therefore, is simply whether it be necessary and proper to pay, from the treasury, to the privateers, a bounty equal to the amount of the reduction of duties on prize goods, asked for by the petitioners.

The argument probably urged in favor of that measure, is, that the bounty would, by increasing the number of privateers, have a tendency to increase the amount of captures. Thus, supposing that a reduction of duties, to one-half of their present rate, should produce a double number of captures, the enemy would be annoyed to a double extent, without any loss to the treasury. But it is not believed that the intended effect will be produced, at least to a degree sufficient to compensate for the loss on the revenue, or to outweigh another forcible objection to this measure.

In order to justify the payment of a bounty, it must be assumed, either that the price at which some captured articles can be sold is so low as not to render it worth the risk to send into port vessels laden with such articles; or that the bounty is necessary for the purpose of encouraging the fitting out of a number of armed vessels, sufficient to capture all the enemy's vessels which can be taken by privateers.

The first position is not believed to be correct. There are not any articles constituting the mass of enemy's cargoes, and liable to pay duty, which are not sufficiently valuable to make it an object to capture the vessel, and send her into port. Coffee, the article which pays the highest proportionate duty, and the value of which is most reduced, is worth six cents a pound, or one hundred and twenty dollars per ton. But, if the fact was true, the true remedy would be to diminish the duty generally, and not to give an exclusive bounty to the owners and crews of privateers. For, if the article be not worth sending in, after capture, it must be altogether impossible for the importing merchant to pay its prime cost, freight, and insurance, and, with those charges, to import such an article without considerable loss. As the last position rests on conjecture, it is less susceptible of being conclusively refuted. It appears, however, highly probable, that a greater number of privateers has been, and will, without any bounty, continue to be, employed, than is necessary for the greatest possible annoyance of the enemy's trade.

All common regular occupations will generally find their own level; and if left to themselves, the capital and labor employed on each, will regulate themselves so as to leave a moderate but adequate profit to the persons re-

spectively engaged in each branch. Some occupations, important to the community at large, may be so unprofitable, as not to be pursued to the extent required by the public interest. These form an exception, and may require an extraordinary encouragement from Government. But experience shows, that the occupations, where profit depends wholly, or in a great degree, on hazard, are generally overstocked, and attract a considerable capital, although there be a certain loss in the aggregate. This is daily exemplified in the case of lotteries, which are filled, although there is a certain and acknowledged loss of 15 per cent. on the whole amount of capital thus laid out by the adventurers. The hope of a prize, the uncertain and improbable chance of an easy, prompt, and great profit, are sufficient inducements to produce that effect. The occupation of privateers is precisely of the same species, with respect to hazard, and to the chance of rich prizes, and is, at this moment, still more encouraged by the want of employment for the capital and seamen, heretofore engaged in ordinary commercial pursuits.

If this view of the subject be correct, it necessarily follows, that a bounty may indeed still more increase the number of privateers, but without increasing, in any proportionate degree, the number of captures; that of existing privateers being already more than sufficient for the quantity of food afforded by the enemy's trade. The only probable effect will therefore be, a diminution of revenue, which must be supplied by another tax, and an unprofitable application of the national capital and labor, without inflicting any additional sensible injury on the enemy.

Should, however, the opinion, thus formed, be considered as erroneous, there is another forcible objection to the mode now proposed of giving an encouragement or bounty. I allude to the temptation and facility which the vicinity of the British colonies affords, of making collusive or pretended captures of British prohibited merchandise. It has been suggested, from a source in which confidence may be placed, that arrangements were already made, or at least contemplated, for that object. A reduction of duties, by increasing the profit, would operate as an insurance on the risk, and assist in defraying the expenses attending the transaction. It seems that, even supposing some additional encouragement to be necessary, it would be preferable to give it in some other shape, which should not be calculated to promote those fraudulent operations.

It may not be irrelevant to state, that it is doubtful whether, by the existing laws, private armed vessels and their prizes are liable to the payment of tonnage duty, and that the seamen, thus employed, are certainly exempt from the payment of hospital money.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

Honorable LANGDON CHEVES,
Chairman of the Committee of Ways and Means.

12th CONGRESS.]

No 382.

[2d Session.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 21, 1812.

SIR:

TREASURY DEPARTMENT, December 18, 1812.

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1809, 1810, and 1811.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

A Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, in the years 1809, 1810, and 1811, compared with the amount of Duties collected on the same, respectively.

12th CONGRESS.]

No. 383.

[2d SESSION.]

IMPORTATIONS FROM BEYOND THE CAPE OF GOOD HOPE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 29, 1812.

Mr. CHEVES, from the Committee of Ways and Means, to whom were referred the petitions of Simon Forrester, David D. Pulsifer, and Boardman and Pope, and others, importers of goods, wares, and merchandise, from British settlements beyond the Cape of Good Hope, praying to be permitted, on securing the duties payable on such goods, when legally imported, to sell and dispose of them, and so forth; also, a bill from the Senate, embracing the cases of the petitioners, reported—

The said bill, with sundry amendments; also, sundry documents explanatory of the subject.

TREASURY DEPARTMENT, *December 10th*, 1812.

SIR:

I have the honor, in compliance with the request of the Committee of Ways and Means, to submit such information^r as appears to have been received at this office, concerning the importations from any of the ports of India, since the commencement of the operation of the non-importation act.

It will be recollected, that all the vessels which had cleared from the United States for any port beyond the Cape of Good Hope, prior to the 10th of November, 1810, were, by the non-importation act, of 2d March, 1811, exempted from its general provisions, and permitted to import their return cargoes. Of those cargoes, as they were entered without difficulty, no particular account has been received; and it is presumed that they were not intended to be embraced by the inquiry of the committee.

It is also possible that, on the subject of some of the importations, not permitted by the act abovementioned, letters may have been received from the parties, and that their names not being recollected, and no regular application for a remission of the forfeiture having been made, some of the cases, thus communicated, may now be accidentally omitted. Nor is it probable that application should have generally been made to the treasury, respecting vessels admitted to entry, by virtue of the act of 5th July, last, since it was evident, by the tenor of that act, that the ultimate disposition of the cargoes depended on a future act of Congress, and not in any degree on the Secretary of the Treasury. Indeed, it is known, from report, that two vessels of that description have arrived, of which no official information has been received.

The following cases have been officially communicated, viz:

The ship "Amiable" sailed from Philadelphia for the Isle of France, on the 22d of December, 1810; arrived to that place subsequent to its capture by the British, and returned to Philadelphia in August, 1811, with a cargo, the produce of that Island. On application to the treasury for a remission, it being certified by the district judge that the capture of the Isle of France by the British, which took place early in December, 1810, was not known at Philadelphia till the 2d of April, 1811, the forfeiture was unconditionally remitted.

The ship "Lark" also sailed for Isle of France on the 3d of January, 1811; arrived there, and returned to Philadelphia a few days after, and under the same circumstances as the ship "Amiable," with the exception of her having brought a small parcel of merchandise, presumed to be manufactures of British India, and which had been originally shipped, at Isle of France, on board of another vessel, bound to Philadelphia, as early as October, 1810, but was detained in port by reason of the attack and capture of the Island by the British. On application to the treasury for a remission, the forfeiture was unconditionally remitted, "except so far as relates to any articles of the produce or manufacture of any British possessions, other than the Isle of France, which may have been imported in the said vessel, the decision, in relation to such articles, being for the present suspended." It is not known whether that merchandise has been condemned, as there was some doubt as to the place where manufactured; but, if condemned, a remission will probably be granted, on terms at least as favorable as in the case of the "South Carolina," hereafter mentioned.

The brig "South Carolina" sailed from Philadelphia for Calcutta, on the 26th of December, 1810, with about 23,000 dollars on board, stated to have been shipped for the purpose of covering the expenses of the voyage, in case of a disappointment in the object of the said voyage, which was undertaken in order to bring from Calcutta the proceeds of funds, wholly belonging to citizens of the United States, and which were in British India prior to the President's proclamation of the 2d of November, 1810. The vessel, with a return cargo, (purchased with the said funds and outward cargo) sailed from Calcutta in October, 1811, bound to Philadelphia. The owners expecting the vessel, and finding the non-importation act still in force, employed pilots in the bay of Delaware, for the purpose of warning the vessel not to enter into the waters of the United States; but the vessel was compelled, by stress of water, to enter the port of Charleston, (where she arrived on the 27th of January, 1812) instead of proceeding to Philadelphia. On application to the treasury for a remission, and the abovementioned facts being proven, to the satisfaction of the district judge, and stated by him to be correct and true, the forfeitures were remitted, on condition "that, from the proceeds of sale of the cargo, the costs and double duties, as fixed by the act of 1st July, 1812, should be deducted; that the residue, if not exceeding the prime cost, freight, and charges, of said cargo, should be returned to the owners; but, in case of excess, so much only of the said residue as would be equal to the said prime cost, freight, and charges, should be returned to the owners; and that the balance, or surplus, should be divided in the same manner as the forfeiture would have been. The result of the sales is not known at the treasury; but there is reason to believe that they have not produced any surplus, and that the effects of the decision have only been the payment of double duties, and, in every other respect, an unqualified remission of the forfeitures.

The brig "Ellen Maria" sailed on the 10th of January, 1812, from Providence for the Isle of France, then a British colony, and thence bound, as is stated, for Smyrna. On her return voyage, and being informed at sea of the declaration of war, she proceeded to Boston, where she arrived prior to the 16th of September, 1812. No bond having been required at the Isle of France to land the cargo in the United States, the vessel is not embraced by the provisions of the act of 5th July last. The owners, from whom this statement of facts is obtained, have been informed that the Secretary of the Treasury had no authority to grant relief, except in the manner prescribed by law, viz: on application for remission, presented through the district judge, on whose statement of facts, alone, the Secretary of the Treasury could take the subject into consideration. No application has, as yet, been received.

The brig "Aurora" sailed in July, 1809, from New York, being cleared for Brazil alone, but with instructions to the captain to proceed thence to the South sea, and ultimately to Canton or Manilla. The vessel not being cleared for a port beyond the Cape of Good Hope, is not embraced within the exception made in favor of such vessels by the act of 2d March, 1811. The Aurora, after a long and circuitous voyage, arrived at Calcutta in September, 1811. She was chartered there on the 26th of December following, by citizens of the United States, who had knowledge of the non-importation act, but who seem to have presumed that the vessel, having sailed from the United States prior to the 10th of November, 1810, would, by virtue of the provisions of the act of 2d March, 1811, be permitted to bring a return cargo from British India. The same citizens purchased, at Calcutta, and shipped on board of the Aurora, a cargo of India goods; and, to accomplish the purchase, borrowed the necessary sum from a British house in that place. The policies of insurance were pledged to the lenders; and, by the terms of the agreement, the cargo was, in fact, on their risk, whilst at sea; but, from its arrival into the United States, the merchan-

dise was at the risk, and on account, of the American shippers, who are bound for the amount borrowed. The *Aurora* arrived at Philadelphia on the 16th of June, 1812, and an application has been made to the treasury for a remission. No decision has taken place; but the owners of the cargo have been verbally informed that the voyage from Calcutta, having been undertaken by them with a knowledge of the non-importation act, and without even the plea of having funds in India, which they wanted to bring to the United States, the transaction appeared, on their part, in the light of a direct and voluntary infraction of the law. As the cargo had not, however, been landed when the act of 5th July passed, and as that act, without reference to the time of arrival, or to any of the circumstances of the voyage, admits to entry all American vessels previously laden in India, for the landing of whose cargoes, in the United States, bond had been given, it appears that the *Aurora* is entitled to the benefits of that act; and it is believed that the owners of the cargo have availed themselves of its provisions, and that the cargo has been accordingly entered, and remains subject to the disposition of Congress. With respect to the vessel, a remission will, if necessary, be granted by the treasury, the owners having had no concern in, or control over, the illegal part of her employment.

The ship "*American Hero*" sailed on the 17th January, 1811, from Boston. The master sold her cargo at the Cape of Good Hope and the Isle of France; and having taken in payment, bills of exchange on Madras and Calcutta, proceeded there and purchased a cargo, for the landing of which, in the United States, bond was given. In conformity with orders from the owners, he thence went to Brazil, where he was not permitted to sell his cargo; and, after having waited several months, hearing of the last American embargo, and apprehending war, he left Brazil, and brought the vessel and cargo to Providence, where she arrived prior to September last.

The "*Atalanta*" arrived, prior to the 8th of November last, in Philadelphia, from Calcutta, via Rio Janeiro, with a valuable cargo. The circumstances of the voyage have not been communicated to the treasury.

The two last cases being clearly embraced by the act of 5th July, 1812, the parties have been informed that the cargoes must necessarily remain subject to the disposition of Congress, and that the Secretary of the Treasury had no power to interfere.

Another case has been mentioned, which, although no importation has taken place, ought, perhaps, to be stated.

The brig "*Daphne*" sailed from Philadelphia, for Calcutta, in the Spring of 1811. According to orders, and in order not to infringe the law, the vessel, with her return cargo, proceeded to St. Bartholmew's. Being there when the declaration of war between the United States and Great Britain took place, and the act of 5th July last not being known, the cargo was landed, and the vessel discharged. By the provisions of the said act, the cargo is not admissible to entry, unless brought in the vessel on board of which it was laden in India; and the owners, who cannot now import it legally, are placed in a worse situation than those who have infringed the law.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

Hon. LANGDON CHEVES, *Chairman of the Committee of Ways and Means.*

Extract from a regulation for the conduct of the trade of foreign nations, with the ports and settlements of the British nation, in the East Indies, and for defining the duties to which such trade shall be subject at such of the said ports and settlements as are immediately dependent on the Presidency of Fort William. Passed by the Vice President, in Council, on the 30th April, 1811.

ART. 3.—First. Foreign European ships, belonging to countries having no establishment in the East Indies, and ships belonging to the United States of America, may, (when those countries and States, respectively, are in amity with his majesty) in like manner, [as in article 2 is granted to the ships of nations having settlements in the East Indies] freely enter the British sea ports and harbors in the East Indies; they shall be hospitably received there; and have free liberty to trade in imports and exports, conformably to the regulations of the place; provided, always, that they proceed from their own ports direct to the said British territories, without touching at any port or place, whatever, on the voyage out, except from necessity, and merely to procure refreshments or repairs, in case of distress or accidents in the course of such voyage, the burthen of the proof of which necessity to rest upon the parties.

Second. The vessels of the said European Powers, last aforesaid, and of the United States, shall not carry any of the articles exported by them from said British territories, to any port or place, except to some port or place in their own countries, respectively, where the same shall be unladen. The said ships shall not be cleared to carry on the coasting trade in India; but vessels going with their original cargoes, or part thereof, from one British port of discharge to another British port, are not to be considered as carrying on the coasting trade.

Third. The said vessels shall not be allowed to proceed either with or without return cargo from the said British territories to the settlements or factories of any foreign European nation in India, or to the territory of any Indian or Chinese potentate or power, except from the like necessity as is before described, of which the proof shall rest with them. Nor shall the said vessels be allowed to enter the river in that part of the British territory situated in Bengal, for any other purpose than that of proceeding to the port of Calcutta for trade, refreshment, or repairs.

Fourth. In clearing out for their respective countries, the clearance shall be a direct one to the country, European or American, to which the vessel belongs, and to no other, whatever; they are to give bond, with the security of a resident in the country, that they will deliver the cargo at the port for which the clearance is made, and such bond is to be cancelled when a certificate from a British consul, or two known British merchants, resident at such port, is produced, of the bona fide delivery of the cargo there.

ASSAYS OF FOREIGN COINS.

COMMUNICATED TO THE SENATE, ON THE 31ST DECEMBER, 1812.

TREASURY DEPARTMENT, *December 28, 1812.*

SIR:

I have the honor to transmit, herewith, a letter from the Director of the Mint, containing the result of the assays of foreign gold and silver coins, made in pursuance of the act of the 10th of April, 1806, entitled "An act regulating the currency of foreign coins in the United States."

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The honorable the PRESIDENT of the Senate.

12th CONGRESS.]

No. 385.

[2d Session.

MINT.

COMMUNICATED TO THE SENATE, JANUARY 4, 1813.

To the Senate and House of Representatives of the United States:

I lay before Congress, for their information, a report of the Director of the Mint.

JAMES MADISON.

January 4th, 1813.

MINT OF THE UNITED STATES, *January 1st, 1813.*

SIR:

I have the honor of laying before you a report of the operations of the mint for the last twelve months. From the statement of the treasurer, herewith transmitted, it will appear, that, during the above period, there have been struck at the mint,

In gold coins, 58,087 pieces, amounting to \$290,435.

In silver coins 1,628,059 pieces, amounting to \$814,029 50

In copper coins, 1,075,500 pieces, amounting to \$10,755.

Making, in the whole, two millions seven hundred and sixty-one thousand six hundred and forty-six pieces of coin, amounting to one million one hundred and fifteen thousand two hundred and nineteen dollars and fifty cents.

The supply of gold and silver bullion still continues to be abundant—the deposits for coinage, at this time in our vaults, amounting to upwards of half a million of dollars.

I have the honor to be, sir, with the greatest respect, your faithful servant,

R. PATTERSON.

JAMES MADISON, *President of the United States.*

A statement of the Coins struck at the Mint of the United States, from the 1st of January to the 31st December, 1812, inclusive, viz:

TREASURY NOTES.

COMMUNICATED TO THE SENATE, JANUARY 23, 1813.

To the Senate of the United States:

I transmit to the Senate a report of the Secretary of the Treasury, complying with their resolution of the 20th instant.

JAMES MADISON.

January 23d, 1813.

TREASURY DEPARTMENT, *January 22d, 1813.*

The Secretary of the Treasury respectfully submits the enclosed statements, prepared in conformity with the resolution of the Senate of 20th instant.

For all the treasury notes which have been disposed of, credit has been given, by the respective banks, to the Treasurer of the United States, on the days from which such notes, respectively, were dated, and commenced to bear interest.

Respectfully submitted.

ALBERT GALLATIN.

The PRESIDENT of the United States.

Statement exhibiting the weekly state of the Treasurer's account with sundry banks, purchasers of Treasury Notes, from the dates, respectively, when such purchase was made, to the 4th January, 1813, taken from the weekly returns of the Treasurer of the United States to the Secretary of the Treasury.

1813.]

		500,000	700,000	330,000	600,000	650,000	400,000	3,180,000

(a.) No account is kept by the treasurer with the Trenton Bank. The sum of \$30,000, for the purchase of these notes, was paid into the Bank of Pennsylvania, and the notes furnished out of a sum of \$500,000, placed in that bank, to be sold by the cashier to any persons, or corporate bodies, who might apply for them.

(b.) This amount, of 300,000 dollars, was purchased by the Bank of Pennsylvania, out of the sum of 500,000 dollars placed in the hands of the cashier of that institution for sale, as stated in the preceding note. All the treasury notes contained in this statement, other than this portion of 300,000 dollars to the Bank of Pennsylvania, and the 30,000 dollars to the Trenton Bank, were purchased or contracted for directly at the treasury.

[2d SESSION.]

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 6, 1813.

WASHINGTON, February 6, 1813.

SIR:

The object of my petition is to obtain a duty on the importation of all copper which shall have been manufactured into sheets or bolts. It is not with me an object, at present, to have a duty laid on copper wire; but I conceive there is, at least, every reason in favor of a duty on wire, that exists for a duty on sheets or bolts. At the same time that a duty is asked on copper so manufactured, I would suggest the leaving of copper, in a crude state, to be free from duty.

The materials which I have manufactured, have been copper in an unrefined state, which has been imported from the western coast of South America, from Buenos Ayres, from Caraccas, from Mexico, by way of Vera Cruz and Havana, and from the Levant. The quantity to be obtained from these places is ample for every purpose. The mines in this country, so far as they have been explored, have not furnished sufficient assurance that a supply can be obtained from them. But, were the manufacture of copper, from the crude state, more general in practice, the increased facilities would, probably, occasion the known mines to be wrought.

I do not know, with any degree of certainty, what quantity of copper, in all its forms, is consumed in this country; perhaps I am not far from the amount when I say, five hundred tons, annually.

I understand, from Mr. Revere, that he can manufacture, taking the material in a crude state, from one to two hundred tons. I can manufacture, with my works, in their present state, one hundred tons, annually; and I can, if I consider the business as affording sufficient encouragement, construct them so as to double that quantity. Mr. Livingston, I suppose, can effect as much as either Mr. Revere or myself.

Considering the progress of these works, and that laying a duty will produce others, probably, I cannot doubt that works in this country will, at no distant period, be constructed to refine and manufacture as much copper as can be consumed in the United States.

With regard to a duty on crude copper, it may be a question whether the object of revenue, or encouragement to the infant manufacture, should preponderate. If, for the sake of revenue, a duty ought to be laid, I would conceive every doubt must be extinguished as to the policy of laying a duty on the material, in a higher state of manufacture. But, considering the uncertainty of an early resource in our own mines, and the assistance which manufactures require, in order to prosper in their first introduction into the country, I trust it will be judged good policy to extend to those now rising, the advantage of having the crude material exempt from duty.

When the mines of this country afford an expectation that they will be adequate to our wants, it may then become a question, whether the crude copper from Spanish America and the Levant may also be included amongst articles paying a duty.

I have not here the means of showing, and I cannot state, with absolute assurance of the fact, that a considerable quantity of the copper from South America has been usually manufactured in Great Britain. In former times, the most of that copper went to Cadiz; and, I believe, a considerable portion found its way to England. I have not thought it necessary to inquire particularly into this subject; but I believe, from such loose information as I have, that the quantity which has gone usually to England was considerable.

Of late years, considerable quantities have been brought to this country, which, there being but very limited means of working here, have been shipped to Europe and to Canton, and I believe to some other places beyond the Cape of Good Hope.

It may be a question, whether, contemplating a duty, there should be a distinction between brazier's copper and sheathing copper and bolts. Sheathing copper and bolts being used for ship-building, I conceive to stand on the same footing, and I would suppose the same policy which requires a duty on sail-cloth, hemp, cordage, and every other imported article necessary in constructing and fitting out a ship, will apply to copper. It need not be feared that this duty will depress, in any degree worthy of consideration, the shipping interest. The tonnage duty, and the duty on the articles mentioned, I consider equally objectionable. And here I would submit to the consideration of the committee, the object of having works which may, by their stock of copper in its various stages, necessarily on hand, together with apparatus and skilful workmen, not less important, afford a supply of this article indispensable in time of war, when we may not have the means of importing it.

The duty on sheathing copper may, in some degree, cause ships to be coppered in England, which, otherwise, would be coppered in this country. But this objection I set down as of little avail: for, if the copper is to be free of duty, whether in the hold or on the bottom of the vessel, the only advantage from bringing it in the vessel is, that our shipwrights will have the employment of fastening it on the vessel when it may arrive.

With regard to the duty on brazier's copper, it is to be considered that but an inconsiderable portion of brazier's copper is used for any other purpose than that of making stills. The duty on that copper amounts to little else than a tax on distillation.

I say, confidently, that the braziers cannot suffer any thing of importance by a duty on brazier's copper.

The duty on brazier's copper will not give British braziers such an advantage as to enable them to compete with our braziers in making stills and other vessels, to be used in this country. The increased freight of hollow ware is greatly against the British brazier. The variety in the capacity, form, and weight of stills, and other vessels used here, would oblige the importers of such wares, from England, to import a great portion of unsaleable vessels.

The fact is, that, in this country, the stills are generally made in the towns adjacent to the respective distilleries, that the vessels may be adapted to the wants, to the circumstances, and to the caprice of the respective distillers; and if a large quantity of stills, of any given form, capacity, or weight, or any assortment that could be preconceived, were imported, a great portion would, in general, be without purchasers. From the knowledge I have already acquired on the subject, I consider a tailor as having as much reason to fear that a duty on cloth will cause ready-made clothes to be imported from England, as that the braziers in this country have any thing to fear from this duty.

I have stated that, with my present works, I can manufacture one hundred tons annually. I am not here prepared with testimony of this fact, but I will, if required, produce evidence which shall be satisfactory. The quality I state to be excelled by none.

I have now on hand, about one hundred and seventy tons of crude copper. Should importations from England be free in a short space of time, and no duty be laid, an inundation of sheet copper may force me to seek a foreign market instead of having it manufactured, as, in that case, I might not choose to contest with the British manufactures, which have been centuries in progressive improvement, and which have attained to such great perfection.

I am, sir, your obedient servant,

LEVI HOLLINGSWORTH.

The Honorable THOMAS NEWTON,
Chairman of the Committee of Commerce and Manufactures.

WASHINGTON, February 6, 1813.

SIR:

The manufactory which I am interested in is capable, on its present establishment, to finish, with one set of workmen, three tons of copper in a week, without any extension of *works*; by employing two sets of workmen, we could nearly double that quantity.

In the year 1800 or 1801, we had a contract with the Navy Department, for a quantity of bolts, sheets, &c., to the best of my recollection about 350,000 lbs. which we delivered in two years, without interfering with our ordinary business. From the best information I have obtained, there was imported, the last year, from England, into the United States, short of five hundred tons of copper; this I consider to be an unusual quantity, as the market had been nearly drained, from the operation of the non-intercourse and non-importation laws, and many persons, who had funds in England, ordered copper to be shipped, who have not heretofore been importers of that article; allowing, then, for argument, for it is impossible to be accurate without recurring to documents, that four hundred tons are wanted annually, Mr. Hollingsworth can manufacture one hundred tons, Mr. Livingston one hundred, and our establishment one hundred and fifty tons. There cannot a doubt exist but each of us could double the quantity, provided the Government should protect us by laying a duty, and, no doubt, other manufactories would be established.

We depend, for the raw material, from abroad, viz: from Smyrna, Sweden, and South America.

Crude copper being an article of export from those places, particularly Smyrna and South America, whenever the merchant can be assured of not sustaining a loss, he makes his remittance in copper, as, there being no freight, the copper answering for ballast; therefore, in time of peace, we are sure of a sufficient supply, and should we be engaged in a long war, without doubt some of the mines in our country would be explored.

Notwithstanding the large quantity of copper raised in England, crude copper is always admitted when imported direct from the place of its origin.

When our revenue laws, regulating the duty on copper, were made, copper was not used in this country for building of vessels; in fact, at that time, it was only partially used in Europe. It has since become general, both in Europe and this country; the law, therefore, could not provide for this article, otherwise it would, without doubt, as almost every article used in building and equipping vessels are subject to duty, say, *cordage, duck, sheathing paper, and nails, &c.* The law says, "copper in plates, pigs, and bars, free;" but it provides for all copper manufactures paying a duty. Under that section the collectors demanded a duty on bolts and sheathing copper; some importers contended that bolts and sheathing was plates and bars, and, by a decision of the Supreme Court of the United States, established it so. When our works were erected, *bolts*, particularly, were subject to duty, and the report of the committee of Commerce and Manufactures, made on our petition, showed that, in the year 1808, that committee was of the same opinion. I have not, in our petition, requested a duty on brazier's copper, from the opposition which our former petition met with from those gentlemen; although I have every reason to believe that they (the braziers) would not be injured by a duty, as brazier's copper has always been at an advanced price of sheathing copper, more than the difference of cost; the importer is the only person who can be affected, and he will only be obliged to resign part of his profits to the Government; and, I have reason to believe, the importers were really the persons that remonstrated to our former petition, although signed by the coppersmiths and braziers. Our wish, therefore, is, to have a duty that will protect our manufactories whenever the intercourse shall be restored between this country and England. For, whenever that event takes place, our manufactories will be destroyed, unless the Government protect them by a duty.

Which is respectfully submitted by, sir, your most obedient very humble servant,

JOSEPH W. REVERE.

HONORABLE THOMAS NEWTON,

Chairman of the Committee of Commerce and Manufactures.

12th CONGRESS.]

No. 388.

[2d SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 8, 1813.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board subsequent to their last report, of the 5th of February, 1812, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the 5th day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

WM. H. CRAWFORD, *President of the Senate, pro tempore.*J. MARSHALL, *Chief Justice of the United States.*JAS. MONROE, *Secretary of State.*ALBERT GALLATIN, *Secretary of the Treasury.*

WASHINGTON, February 6, 1813.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That the balance of moneys advanced on account of the public debt, remaining unexpended at the close of the year 1810, and applicable to payments falling due after that year, which balance, as appears by the statement B, annexed to the last annual report, amounted to four hundred and ninety-three thousand one hundred and seventy-four dollars seventeen cents,	\$493,174 17
Together with the sums disbursed from the treasury during the year 1811, on account of the principal and interest of the public debt, which sums, as appears by the statement C, annexed to the last annual report, amounted to eight millions one hundred and forty-eight thousand and ninety-five dollars,	8,148,095 00
Together with a further sum arising from profit in exchange on remittances from America to Europe, purchased during the year 1811, amounting, as appears by the statement D, annexed to the last annual report, to fifty-six thousand seven hundred and twenty-six dollars fourteen cents,	56,726 14
And with the further sum of £4,900 sterling, in bills taken in payment of the principal of an equal sum of protested bills, as appears by the same statement D, and equal, at par, to	21,777 78
And amounting, together, to the sum of eight millions seven hundred and nineteen thousand seven hundred and seventy-three dollars nine cents,	<u>\$8,719,773 09</u>

Have been accounted for in the following manner:

I. There was repaid into the treasury, during the year 1811, on account of the principal of moneys heretofore advanced for the payment of the public debt, including the amount of sundry bills of exchange received in lieu of others previously purchased, which had been protested, as appears by the statement E, annexed to the last annual report, the sum of one hundred and sixty-eight thousand four hundred and forty-four dollars, forty-five cents,	\$168,444 45
II. The sums actually applied, during the same year, to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the statement A, to eight millions and forty-eight thousand eight hundred and fourteen dollars seventy-nine cents, viz:	
1. Paid in reimbursement of the principal of the public debt,	\$5,543,606 39
2. Paid on account of the interest and charges on the same,	2,505,208 40
	8,048,814 79
III. The balance remaining unexpended at the close of the year 1811, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the statement B, to five hundred and two thousand five hundred and thirteen dollars eighty-five cents,	502,513 85
	\$8,719,773 09

That, during the year 1812, the following disbursements were made out of the Treasury on account of the principal and interest of the public debt, viz:

I. On account of the interest and reimbursement of the domestic funded debt,	\$3,845,117 34
II. On account of the domestic unfunded debt,	\$945 04
And of the debt due to foreign officers,	1,444 17
	2,389 21
III. On account of the interest on Louisiana stock, and on converted stock, payable in Europe,	627,051 64
Amounting, together, as will appear by the annexed list of warrants, marked C, to four millions four hundred and seventy-four thousand five hundred and fifty-eight dollars nineteen cents,	\$4,474,558 19

Which disbursements were made out of the following funds, viz:

I. From the funds constituting the annual appropriation of eight millions of dollars, for the year 1812, viz:	
From the fund arising from the interest on the debt transferred to the Commissioners of the Sinking Fund, as per statement I,	\$1,899,125 23
From the fund arising from the sale of public lands, being the amount received into the treasury, from 1st October, 1811, to 30th September, 1812, per statement K,	822,599 64
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of vessels,	1,727,906 03
Amounting, together, to	\$4,449,630 89
Which sum of	\$4,449,630 89
Being deducted from the annual appropriation of	8,000,000 00
Leaves an unexpended balance, to be applied during the year 1813, in addition to the appropriation for that year, of	\$3,550,369 11

II. From repayments into the treasury on account of moneys heretofore advanced for the payment of dividends on the domestic funded and unfunded debt, as will appear by the statement E,	24,927 30
	\$4,474,558 19

That the above mentioned disbursements, together with the above stated balance, which remained unexpended at the close of the year 1811, of	502,513 85
And together with a further sum, arising from profit on remittances from America to Europe, purchased during the year 1812, and amounting, as will appear by the statement D, to	91,532 88
	91,532 88

Making, together, five millions and sixty-eight thousand six hundred and four dollars ninety-two cents,	\$5,068,604 92
---	----------------

Will be accounted for in the next annual report, in conformity with the accounts which shall then have been rendered to the Treasury Department.

That, in the meanwhile, the manner in which the said sum has been applied, is estimated as followeth:

I. The repayments into the treasury, on account of the principal of moneys advanced for the payment of dividends on the domestic funded and unfunded debt, have, during the year 1812, amounted, as by the above mentioned statement E, to	24,927 30
II. The sums actually applied during the year 1812, to the principal and interest of the public debt, are estimated as follows:	
1. Paid in reimbursement of the principal of the public debt,	\$2,262,690 01
2. Paid on account of interest and charges on the public debt,	2,422,060 14
	4,684,750 15

As will appear by the estimate F.

III. The balance which remained unexpended at the close of the year 1812, and applicable to payments falling due after that year, is estimated, per estimate G, at	358,927 47
	\$5,068,604 92

That, in conformity with the resolution of the Commissioners of the Sinking Fund, of the 19th of June, 1812, copy whereof is hereunto annexed, marked M, the residue of the converted stock was reimbursed at the close of the year 1812; and that, in conformity with the resolution of the said commissioners, of the 6th of July, 1812, copy of which is annexed, marked N, 179,300 dollars of Louisiana domestic six per cent. stock, 14,000 dollars (nominal) of deferred six per cent. stock, and 57,000 dollars of six per cent. stock, of 1812, have been purchased previous to the 31st December, 1812, having cost, together, 242,847 dollars 39 cents, as will more particularly appear in the statement marked L.

And that the statement H exhibits the amount of stock transferred to the Commissioners of the Sinking Fund, and to the Treasurer of the United States, in trust for said States, and standing on the books of the treasury on the 31st December, 1812; no stock having been transferred in payment for lands, during the year 1812.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, *February 5th*, 1813.

A.

Statement of the application, during the year 1811, of the funds provided for the payment of the principal and interest of the public debt.

I. Payments on account of the principal of the public debt.			
Of the domestic debt.			
Annual reimbursement of old six per cent. stock, - - -	\$1,074,203 05		
Do. Do. of deferred do. - - -	424,951 05		
		1,499,154 10	
Reimbursement of a part of the converted six per cent. stock, -	- -	1,294,452 29	
Repayment of temporary loan, obtained from the Bank of the United States, - - - - -	- -	2,750,000 00	
			5,543,606 39
II. On account of interest and charges.			
1. On the domestic debt.			
Interest for the year 1811, on the several species of the domestic funded debt, as settled at the treasury, - - -	- -	1,683,225 13	
Do. on Louisiana stock domesticated, - - -	- -	24,051 00	
Do. on temporary loan from Bank of the United States, -	- -	69,842 45	
2. On the foreign debt.			
Interest on exchanged and converted stocks, payable in Amsterdam, - - Guilders, 5,614 0 8, at 40 cents, \$2,245 61			
Do. do. in London, £3,977 18 11, at 4s. 6d. 17,679 76			
			19,925 37
Do. on Louisiana stock from 1st July, 1810, to 30th June, 1811, viz:			
Payable in Amsterdam, G. 750,000 00, at 40 cents, \$300,000			
Do. in London, £81,905 17, at 4s. 6d. 364,026			
			664,026 00
Commissions and charges, viz: at Amsterdam, including G. 5,247 9.			
Interest on advances of the commissioners, - G. 10,681 18 11, at 40 cts. \$4,272 77			
At London, - - £484 1 00, at 4s. 6d. 2,151 33			
			6,424 10
Loss in exchange in drawing G. 400,000 from London to Amsterdam, (cost £45,412 12 4,) - - - (a.) \$41,833 85			
Deduct gain on specie shipped to Amsterdam, by the Constitution frigate, G. 12,161 10, - - - 4,864 60			
			36,969 25
Commissions to agents in America, for purchasing bills, - - -			745 10
		728,089 82	
			2,505,208 40
			\$8,048,814 79

(a.) There was a gain in exchange on the remittance of this sum, of £45,412 12 4 from America to England, (which is accounted for as part of the sum of \$56,726 14, the amount of gain in exchange on remittances in the year 1811) of - - - - - \$38,368 87

So that the real loss in exchange, on the whole of the transaction, is only - - - - - 3,464 98

\$41,833 85

Or, a little more than 2 per cent. on the 400,000 guilders.

TREASURY DEPARTMENT, Register's Office, February 4, 1813.

JOSEPH NOURSE, Register.

B.

Statement of the provision made, before the 1st day of January, 1812, for the payment of the principal and interest of the public debt falling due after that day.

I. On account of the Foreign Debt.

1. Cash in the hands of commissioners and agents in Europe, viz:			
In London, on 31st December, 1811, - - - - -	£81,874 00 9		
Deduct amount of a draft on them, by the commissioners in Amsterdam, credited in Amsterdam prior to 31st December, 1811, though not charged in London till after that day, 45,412 12 4			
		£36,461 08 5, at 4s. 6d.	\$162,050 76
In Amsterdam, on the same day, - - - - -	G. 557,920 00		
Deduct amount of moneys received by the commissioners before 1st January, 1812, but not paid at the treasury till after that day, - - - - -	15,641 18		
		G. 542,278 02, at 40 cts.	216,911 24
2. Remittances outstanding, viz:			
Amount paid for at the treasury, and remitted to London before 1st January, 1812, but not received by the agents till after that day, £6,398 16 10, at 4s. 6d.			28,439 30
			407,401 30

3. Amount of payments made at the treasury before the 1st January, 1812, for bills which have been protested for non-payment, and which, on that day, had not been repaid into the treasury, viz:
 Amount outstanding previous to the year 1809, as explained in the report of February 3, 1809, \$13,357 00
 Do. do. of bills purchased in 1810, and protested for non-payment, (a.) 8,888 88

22,245 88
429,647 18

II. On account of the Domestic Debt, viz:

1. Cash in the hands of commissioners of loans, deceased, and out of office, \$9,061 85
 2. Do. do. of commissioners in office, applicable to payment of dividends, 1,226,069 92
 3. Do. do. of the treasurer, as agent for the commissioners of the sinking fund, 307,662 08
1,542,793 85
 4. Do. heretofore advanced to a commissioner of loans, no longer in office, for the reimbursement of exchanged stock, and remaining unapplied, 3,821 61
1,546,615 46

The demands to be satisfied out of these funds, on the 1st January, 1812, were as follows, viz:

1. Dividends payable by the commissioners of loans, including the dividends due on that day, and exclusive of dividends no longer demandable at their offices, 1,216,913 81
 2. Dividends on stock standing on the treasury books, beyond the amount advanced to the cashiers for their payment, 58,853 50
 3. Unclaimed dividends from the loan offices, payable at the treasury, beyond the amount advanced to the cashiers for their payment, 197,981 48
1,473,748 79
72,866 67
\$502,513 85

(a.) The amount of this item, as given in statement B, annexed to last annual report, was \$37,333 33
 During the year 1811, there was received in exchange for bills which had been previously protested, other bills, amounting to £4,900, as explained in the statements D and E, annexed to last annual report, equal, at par, to \$21,777 78
 And there was repaid into the treasury, the amount of two bills, (for £1,500) as stated in the same statement E, equal, at par, to 6,666 67
28,444 45
 Leaving still outstanding, John W. & Gilbert Russell's bill on Conway and Davidson, for £2,000 sterling, equal to \$8,888 88

TREASURY DEPARTMENT, Register's Office, 4th February, 1813.

JOSEPH NOURSE, Register.

E.

Statement of the Repayments made into the Treasury, during the year 1812, on account of the Public Debt.

Date of warrants.	No. of warrant.	On whom drawn.	Principal.	Damages and interest.	Amount of warrant.
1812. March 31,	1592.	James Davidson, for so much remaining in his hands, heretofore advanced for the payment of unclaimed dividends, per report No. 25,488,	\$20,000 00	-	\$20,000 00
	1593.	Do. do. for paying dividends on the funded domestic debt, per report No. 25,490,	4,903 99	-	4,903 99
	1594.	Do. do. on the registered debt, per report No. 25,489,	23 31	-	23 31
			<u>24,927 30</u>	-	<u>24,927 30</u>

TREASURY DEPARTMENT, *Register's Office*, 30th January, 1813.

JOSEPH NOURSE, *Register*.

F.

An estimate of the application made, in the year 1812, of the funds provided for the payment of the principal and interest of the public debt.

I. On account of the principal.

1. Reimbursement of old six per cent. and deferred stocks, estimated at	-	\$1,449,132 19	
2. Do. of converted six per cent. stock,	-	565,318 41	
3. Do. of registered debt, including arrearages of interest,	845 04		
4. Do. of debts due to foreign officers, including do. do.	1,444 17		
			2,289 21
5. Stocks purchased, viz: Louisiana domestic six per cent. stock,	179,300 00		
Six per cent. stock of 1812,	57,000 00		
Deferred six per cent. stock, nominal amount \$14,000, unredeemed amount,	9,650 20		
			245,950 20
			<u>2,262,690 01</u>

II. On account of interest and charges.

1. Interest on the domestic funded debt, estimated at	-	-	-	1,688,168 17
2. Interest on Louisiana stock domesticated,	-	-	-	107,322 00
3. Interest and charges on foreign debt, viz:				
Interest on converted stock, payable in London and Amsterdam,	7,651 78			
Do. and charges on Louisiana stock, payable in do. and do.	617,874 32			
				625,526 10
Commissions to agents in America, for purchasing bills,	-	1,043 87		
				<u>626,569 97</u>
				<u>2,422,060 14</u>
				<u>\$4,684,750 15</u>

G

An estimate of the funds provided, before the 1st January, 1813, for the repayment of the principal and interest of the Public Debt, falling due after that day.

I. On account of the foreign debt.

Cash in the hands of commissioners and agents in Europe, and remittances outstanding on the 31st December, 1811, per preceding statement B,	-	-	-	\$407,401 30
The remittances made during the year 1812, per preceding statement D, are as follows, viz:				
To Amsterdam, Gs. 521,629 8, at 40 cents,	-	-	-	\$208,651 76
To London, £ 114,500, at 4s. 6d.	-	-	-	508,888 89
				<u>717,540 65</u>
Total to be accounted for,	-	-	-	1,124,941 95
The amount applied, during the year 1812, per preceding estimate F, is calculated to have been, for interest, and charges in Europe,	-	-	-	<u>625,526 10</u>
The balance in the hands of agents in Europe, or in remittances outstanding, may therefore be estimated, on the 31st December, 1812, at				499,415 85
The amount of protested bills, outstanding and unrecovered on that day, was the same as that on the 31st December, 1811, per preceding statement B,				<u>22,245 88</u>
				521,661 73

From which deduct—

II. On account of the domestic debt.

For unclaimed dividends, demandable at the treasury, and not yet advanced to the bank, for payment to the creditors,	-	-	-	162,734 26
				<u>\$358,927 47</u>

H.

General Statement of the several Stocks transferred to the United States, to the 31st December, 1812, the interest on which, by the acts of 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

No. 389.

[2d SESSION.]

INCREASE OF REVENUE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 15, 1813.

Mr. CHEVES, from the Committee of Ways and Means, made the following report:

That they have deemed it to be their duty, that the public service may not suffer, and that the public credit may be duly supported, to look beyond the ways and means of the present year, and to take into consideration the revenue which may be wanted for the year 1814. That an estimate of the probable amount of the revenue which will accrue under existing laws, and be receivable within that year, has been submitted to Congress in the annual report of the Secretary of the Treasury, made during the present session. That, comparing the amount thereof with the sums which will probably be required, by a prudent regard to the public credit, it appears to the committee indispensably necessary to make a further provision. That this may be done by a partial suspension of the non-importation acts, which will not greatly lessen their injurious effects upon the enemy, by an additional duty on foreign tonnage, and by the imposition of internal taxes and duties. That, in their opinion, all these means will be necessary to supply the revenue which will be wanted. That it is impracticable, during the present session, consistently with a due attention to the other business of the nation, to enact the laws necessary to embrace the last mentioned object, but that this may be done without difficulty, and without a delay which will be injurious either to the public credit or the public service, by an earlier meeting of Congress than the constitutional period, which it will be the duty of Congress, or the Executive branch of the Government, to fix, at such time as shall be deemed most proper and expedient. That it is, however, necessary that the suspension of the non-importation acts, which is contemplated, should be enacted at the present session of Congress, and, for this purpose, and the imposition of additional duties on foreign tonnage, they beg leave to report a bill.

They also report, herewith, a correspondence between the Secretary of the Treasury and this committee, on the subject of this report.

COMMITTEE ROOM, 3d February, 1813.

SIR:

I am directed by the Committee of Ways and Means to request from you the favor of a reply to the following questions:

1. What, in your opinion, would be the probable amount of revenue applicable to the service of the year 1814, which would result from a modification or partial repeal of the non-importation acts, such as is suggested in your letter of the 10th day of June, 1812, addressed to the Chairman of the Committee of Ways and Means?
2. Is the modification, suggested by that letter, the best, in your opinion, that can be devised to obtain a given revenue with the least possible diminution of the effects of the non-importation acts? If not, be pleased to suggest such alterations and improvements as occur to your mind.
3. Are there, in your opinion, any further legal provisions necessary, or will any be expedient, more effectually to enforce the non-importation acts, or to ensure the more effectual collection of the revenue?
4. Would it, in your opinion, be advisable to increase the duty on foreign tonnage? If it would, to what amount, and what would be the probable addition to the revenue applicable to the year 1814, by such increase?

I am, sir, with great respect, &c.

LANGDON CHEVES.

The Hon. ALBERT GALLATIN, *Secretary of the Treasury.*

SIR:

TREASURY DEPARTMENT, 9th February, 1813.

I have the honor to submit the following answers to the questions proposed in your letter of the 3d instant:

1. It is believed, for the reasons stated in my letter of 10th June last, to the Committee of Ways and Means, that the amount of revenue applicable to the service of the year 1814, which would result from a modification of the non-importation acts, as suggested in the said letter, may be estimated at about five millions of dollars, provided that modification takes place during the present session of Congress.
2. No better modification, for the purposes therein intended, has suggested itself, than that proposed in the letter aforesaid. But, it would seem requisite, for the same object, that no drawback should be allowed on the re-exportation of the merchandise which may be thus imported.
3. The most important legal provision, which appears necessary to enforce the non-importation acts, is, a positive prohibition of a restoration, by order of court, of merchandise, the importation of which is prohibited by law. It is also believed that it will be necessary to order all the cargoes of salt, particularly from Lisbon, to be discharged under the inspection of proper officers; and it appears reasonable that the expense should be defrayed by the importers.
4. It appears, in every point of view, highly desirable that the duty on foreign tonnage should be increased. A duty of ten dollars per ton does not seem greater than what is required for the protection of American vessels. But I cannot form any correct estimate of the probable addition resulting to the revenue from such increase. Much would depend on the suppression of the trade carried by American vessels with enemy's licences.

With respect to the necessity of providing an additional revenue for the year 1814, I beg leave to refer to the statements made, and opinions expressed, when I had the honor, several weeks ago, to wait on the Committee of Ways and Means. And I beg leave to add, that this necessity has been considerably increased by the subsequent expenditures authorized by law: amongst which must be particularly mentioned the act for the increase of the navy and that for raising twenty thousand men for one year. Indeed, considering the general rate of expenditure resulting from the war measures which have been adopted, I am of opinion, that it will be necessary to recur both to a modification or repeal of the non-importation acts, and to the proposed internal taxes, in order to provide a revenue commensurate with those expenses. When an additional revenue of five millions was believed sufficient, that opinion was predicated on the supposition made by the committee, that annual loans of only ten or eleven millions of dollars would be wanted. With a revenue of twelve millions of dollars for this year, it is ascertained that a loan of at least sixteen millions is necessary.

I have the honor to be, &c.

ALBERT GALLATIN.

Hon. LANGDON CHEVES, *Chairman of the Committee of Ways and Means.*

COMMITTEE ROOM, *February 11, 1813.*

SIR:

The Committee of Ways and Means are of opinion that it is expedient to raise an internal revenue for the service of the year 1814; but that it is altogether impracticable, within the present session, to pass the necessary laws for that purpose; they have, therefore, directed me to inquire of you, at what time, in your opinion, it will be necessary that such laws should be enacted, in order to raise a revenue, which may be collected in time for the service of that year.

I am also directed to bring to your attention the last paragraph of your letter to the chairman of this Committee, of the 10th June, 1812, and to ask whether the opinion therein given is applicable to the present state of things, and to the probable exigencies of the Government, in the year 1814?

As early an answer as shall be consistent with your convenience is requested.

I am, with great respect, your obedient servant,

LANGDON CHEVES.

The Honorable ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *February 12, 1813.*

SIR:

In answer to your letter of yesterday, I have the honor to state that I still believe it practicable to organize the taxes within three or four months after the passing of the laws in the shape reported. This, however, is only matter of opinion, in which I may be mistaken; and it would certainly be desirable, if other considerations do not oppose it, to prevent the danger of disappointment, by allowing more time for the selection of officers, preparing and transmitting the forms and instructions, and taking all other steps necessary for the organization of a difficult and novel system, which must pervade every part of the extensive territory of the United States. The selection of officers, including the time necessary to ascertain whether they will accept, is perhaps the operation most likely to produce delay.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HON. LANGDON CHEVES, *Chairman of the Committee of Ways and Means.*

COMMITTEE ROOM, *June 9, 1812.*

SIR:

I am directed, by the Committee of Ways and Means, to request you to inform them, whether, in your opinion, the non-importation act may not be so modified, or partially suspended, as to afford a revenue equivalent to the estimated amount of the proposed internal taxes, additional tonnage duty, and diminution of drawbacks; and, in such event, whether the last mentioned objects of revenue may not, for the present, be dispensed with.

I am, sir, with great respect, your obedient servant,

LANGDON CHEVES.

The Honorable ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *June 10, 1812.*

SIR:

I had the honor to receive your letter of yesterday, asking whether, in my opinion, the non-importation act may not be so modified, or partially suspended, as to afford a revenue equivalent to the estimated amount of the internal taxes, additional tonnage duty, and diminution of drawbacks; and, in such event, whether the last mentioned objects of revenue may not, for the present, be dispensed with?

All the estimates of revenue, which have been transmitted during this session, having necessarily been made in conformity with the existing laws, were predicated on the supposed absolute prohibition of British produce and manufactures. These, in ordinary times, amounted to more than one half of the foreign merchandise consumed in the United States. The actual exclusion of the greater part of the articles of our own growth from France, Holland, and Germany, the consequent nullity of our commerce with those countries, and the conquest by Great Britain of their colonies, still more lessens the proportion of foreign articles which may be imported from other countries than the British dominions.

It is, therefore, evident, that the amount of duties on importations will be more than doubled in the event of a suspension of the non-importation, and that they will, whilst that suspension continues, afford a revenue, at least, equivalent to the estimated amount of the proposed direct tax, internal duties, additional tonnage, and diminution of drawbacks. All these may be dispensed with, so long as the suspension continues, provided that the contemplated increase of one hundred per cent. on the duties on importations shall take place.

It is not believed that the result would be materially affected by a modification, or partial, instead of an absolute, suspension of the non-importation: for the amount of importations would be principally regulated by the amount of American funds already in England, and by the subsequent consumption of American produce in Great Britain, Spain, and Portugal, and the British West Indies, respectively. If a discrimination be thought eligible, it would seem that the articles entitled to preference are colonial produce, particularly rum, coarse woollens, middle price cotton goods, Irish linens, earthen and glass ware, hardware and manufactures of steel, tin, brass, and copper, fine cloths, muslins, plain cotton goods, manufactures of silk, hemp, flax, (with the above exception) and leather, paper, hats, shoes, and millinery, may either be altogether supplied by domestic manufactures or dispensed with.

The annual importations of British colonial and domestic produce and manufactures could not be estimated at less than thirty-five millions of dollars. Supposing (on the same grounds on which the other estimates of duties on importation in time of war were made) that the war and other restrictions should reduce the amount to one half, the proposed double duties collected on the revenue would produce a nett revenue of at least five millions of dollars, and greater, therefore, than all the proposed internal taxes and duties and additional tonnage duty.

Permit me, however, to observe, with respect to this last duty, that, so far as relates to foreign vessels, the proposed addition appears necessary, and is hardly sufficient to compensate the great advantages which war will give them over American vessels, in the American commerce.

It is proper to add, that all the bills for laying and collecting the direct tax and internal duties have been prepared in conformity with the former request of the Committee, so that the whole subject may be taken up at this, or any other time, without any delay on the part of the treasury. The only detail on which the information is not as complete as might be desired, is that of the quotas of the direct tax intended to be laid on the several counties in each State. It is also believed that the system has been prepared in such manner that it may be organized, and all the taxes be in full operation, in the month of April next, provided the laws are enacted before the commencement of the year 1813.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

HONORABLE LANGDON CHEVES, *Chairman of the Committee of Ways and Means.*

[12th CONGRESS.]

No. 390.

[2d SESSION.]

FINES, PENALTIES, AND FORFEITURES, UNDER THE REVENUE LAWS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 27, 1813.

Mr. QUINCY made the following report:

The Committee appointed to inquire into the principles and practice adopted by the Treasury Department in relation to the revenue laws, and to the mitigating or remitting the fines, penalties, and forfeitures, accruing under the same, having, in pursuance of that appointment, had an interview with the Secretary of the Treasury, and examined such papers as they deemed necessary for the due execution of their trust, addressed to him a letter, marked A, and received from him, in reply, the letter marked B, with the accompanying document. All which are annexed to this report.

It appears to your committee, as far as they are enabled to judge, that the remitting and mitigating powers, exercised by the Treasury Department, have been used in a manner liberal and just. Your Committee have not deemed it their duty, from the terms of their authority, to enter into the consideration of the expediency of relieving the Treasury Department from the burden of exercising this discretion. In some commercial communities, a similar discretion is invested in a board of commissioners, whose numerous members form a check upon each other, and the publicity of whose proceedings preserve their decisions, under the scrutiny of the public eye, and the wholesome control of public opinion.

Your Committee report to the House the annexed papers, as the result of their inquiry.

A.

HOUSE OF REPRESENTATIVES, *January 22d*, 1813.

SIR:

The Committee appointed to inquire into the principles and practice adopted by the Treasury Department in relation to the revenue laws, and to the mitigating or remitting the fines, penalties, and forfeitures, accruing under the same, have directed me to request such an elucidation of the general construction given by that Department, of its powers in relation to that subject, as may indicate the principles by which it has been regulated. They particularly have authorized me to desire an answer to the following inquiries:

Whether, in cases of "intention of fraud" existing, the Department deems itself authorized either to remit, or mitigate?

Whether, in cases of "wilful negligence" existing, the Department deems itself authorized either to remit, or mitigate?

Whether, in cases where neither one nor the other exists, the Department deems itself at liberty to inflict the whole penalty, or any part of it?

If the Department has deemed itself at liberty, in cases where no "wilful negligence" and no "fraud" has existed, to inflict the whole penalty, or forfeiture, or any part of either, then the Committee have directed me to inquire by what general principles its decision, in such cases, has been regulated?

Particularly, whether the Department has deemed itself confined, in relation to such cases, to such a mitigation of the penalty, or forfeiture, as might include the mere incidents of the prosecution, and the "terms and conditions" on which, having reference to such incidents, it should be made to cease; or, whether, in relation to such cases, it has deemed itself at liberty to take into consideration other circumstances, such as the profits of the treasury, the gains of the individual, the like, or other considerations, in estimating the amount of the penalty or forfeiture to be exacted.

The Committee having perceived that, in certain cases, where "wilful negligence and fraud" were stated not to exist, the condition of release has been on the payment of "*costs and charges, and a certain per centage, for the use of the United States, in addition to the duty established by law*," they have directed me to inquire by what principles this levy has been regulated? To what cases it has been applied? And what has been the gain to the United States by such payments of per centage?

The Committee also request a general statement of the fines, penalties, and forfeitures, received by the Treasury Department since the date of the establishment, and the expenses which have occurred on prosecutions for them.

The Committee will be happy to receive any elucidation which the above inquiries, or any other considerations, connected with the subject, may suggest.

I am, sir, respectfully, your obedient servant,

JOSIAH QUINCY.

HON. ALBERT GALLATIN, *Secretary of the Treasury of the United States.*

B.

TREASURY DEPARTMENT, *February 12*, 1813.

SIR:

The pressure of current business has prevented an earlier answer to your letter of 22d ultimo. The tenor of some of the queries therein contained, renders it necessary to premise some observations on the object and obvious construction of the law, which authorizes remissions or mitigations of fines, penalties, and forfeitures.

In almost every penal code, the law fixes the maximum of the fine which may be inflicted for offences made punishable by the payment of money, and leaves it discretionary with the court to prescribe, in every case, according to its circumstances, the sum, not exceeding that maximum, which shall be paid by the offender. In the revenue and restrictive laws of the United States, the fines, or forfeitures, which may be incurred by reason of any infraction of those laws, are made absolute; and the power to mitigate, and even to remit the whole amount, has, it is presumed, for the sake of uniformity, been vested, under certain limitations, in the Secretary of the Treasury. It is enacted that he shall have power "to mitigate or remit such fine, forfeiture, or penalty, (or remove such disability) or any part thereof, if, in his opinion, the same shall have been incurred without wilful negligence, or any intention of fraud in the person or persons incurring the same; and to direct the prosecution, if any shall have been instituted for the recovery thereof, to cease and be discontinued, upon such terms or conditions as he may deem reasonable and just."

Since the Secretary of the Treasury is not authorized to remit, or even to mitigate, unless there has been neither intention of fraud, nor wilful negligence, it necessarily follows, that, by the words *wilful negligence*, is meant only such flagrant and voluntary infraction of the laws as, though not implying fraud, properly so called, is, by the statute, considered as tantamount to fraud, and therefore precluding any remission, or even mitigation of the penalty incurred.

Since the power to remit in part, or to mitigate, which is precisely the same as a power to enforce a part of the penalty, not only may be exercised in cases which fall short, in the words of the statute, of intention of fraud, or

of wilful negligence, but is limited to such cases alone; it necessarily follows that the statute contemplates offences implying a certain degree of guilt, and requiring a punishment less than the whole amount of the penalty incurred, although there has been, in persons incurring such penalty, neither intention of fraud, nor what is there called wilful negligence.

It is evident, from the tenor of the statute, that it describes two classes of offences: 1st, such as imply fraud, or (to use the expression) *statute* wilful negligence, and which shall be punished by the infliction of the whole amount of the fine, penalty, or forfeiture incurred. 2dly, such as imply neither fraud or *statute* wilful negligence, to which alone the power to remit, or to mitigate, can be applied.

That the last class embraces two species of infractions: 1st, such as, falling short of the highest degree of offence, which precludes even a mitigation, must, however, render the party liable to a partial payment of the penalty incurred. 2dly, such as, from involuntary and unimportant omissions, have made the party legally liable to the penalty, but where such penalty should, in equity, and may, without weakening the execution of the laws, be altogether remitted; and that the authority vested in the Secretary of the Treasury is applicable only to that class of offences, which imply neither fraud nor *statute* wilful negligence, and consists in graduating the amount of penalty which it may still be proper and necessary to enforce, or in granting an unqualified remission, according to the nature of the case.

This exposition of the law affords a ready answer to the general queries proposed by the committee, and was thought necessary, because it was apprehended that some erroneous view of the subject and meaning of the law might result, from not particularly attending to the restricted sense affixed to the words "*wilful negligence*," by the statute.

It was apprehended that, on a first impression, the position may have been assumed, either, that the power to enforce a part only of the penalty did not exist, although that power be expressly implied in that of *mitigating*, and *remitting in part*, or that it could not be exercised in cases where there was neither fraud, or *statute* wilful negligence, although this authority be, by the statute, expressly confined to such cases alone.

To the three first queries of the committee, it is, therefore, answered:

1. That the Secretary of the Treasury does not consider himself authorized, either to remit or to mitigate, in cases where, in his opinion, there has been either intention of fraud, or (*statute*) wilful negligence.
2. That he does not consider himself authorized to inflict the whole penalty, in cases where, in his opinion, there has been neither intention of fraud, or (*statute*) wilful negligence.
3. That he does consider himself authorized, when, in his opinion, necessary and proper, to enforce a part of the penalty in some, and to require the payment of costs in all the cases where, in his opinion, there has been neither intention of fraud, or (*statute*) wilful negligence.

The fourth query of the committee is to the following effect:

By what general principles has the decision of the Treasury been regulated in cases where, there being no fraud or (*statute*) wilful negligence, a part of the penalty or forfeiture has nevertheless been enforced? "Particularly, Whether the Department has deemed itself confined, in such cases, to such a mitigation of the penalty, or forfeiture, as might include the mere incidents of the prosecution, and the 'terms and conditions' on which, having reference to such incidents, it should be made to cease; or, whether, in relation to such cases, it has deemed itself at liberty to take into consideration other circumstances, such as the profits of the treasury, the gains of the individual, the like, or other considerations, in estimating the amount of the penalty, or forfeiture, to be exacted."

From what has already been stated, it follows, that, if by "incidents of prosecution," and terms and conditions connected therewith, the payment of costs only be meant, the Treasury (with the exception of a few cases of great hardship) has required such payment in all cases of remission or mitigation, and has not deemed itself confined to such payment in those cases where it appeared necessary and proper to enforce a part of the penalty or forfeiture. The statute grants, in that respect, two distinct powers—that of prescribing the terms and conditions on which prosecutions shall be discontinued; which, of course, embraces the payment of costs and other incidents of prosecution, and that of mitigating or remitting, only in part, the penalty. Which last authority would be nugatory, and would not, therefore, have been given, had the law intended to confine the effect of that authority to the costs, or other similar incidents of prosecution; these being embraced by another part of the enacting clause.

In deciding on those cases to which the power of remitting, in whole or in part, does apply, and in graduating the amount of penalty enforced, in those where it appeared improper to grant an unqualified remission, the Treasury has been invariably governed by three principles:

1st. Enforcing the laws. 2dly. Reducing the penalty to that amount, and requiring only that portion which appeared sufficient for the purpose of preventing infractions. 3dly. Uniform rules of decision, so far as the diversity of cases rendered them practicable. In the application of those principles to individual cases, several circumstances have naturally been taken into consideration, such as the degree of negligence manifested by the party; the importance, for the safety of the revenue, of the particular provision which had been infringed; the encouragement due to the vigilance of the officers; and, when necessary, for the purpose of checking illegal importations, the profit derived from the transaction.

The gain of the treasury never had any influence on any decision, or has even been thought of. The portion of a mitigated penalty sometimes happens to be paid into the treasury, because the law had made one-half payable there, if not mitigated. The decisions of the Treasury never can add any thing to the amount actually forfeited, and otherwise legally payable; and whenever a mitigation takes place, it operates as a deduction from such payment. If it ever should be attempted to draw a revenue from forfeitures and penalties, it will be done by giving to the statute a construction precisely the reverse of that now adopted. Instead of restricting the words "*wilful negligence*" to flagrant infractions, tantamount to fraud, as is now done in conformity with the obvious meaning of the statute, let those expressions receive that construction of which, in common parlance, they are susceptible; let every negligence, however unimportant, provided it be accompanied with an act of the will, be called "*wilful negligence*," and every penalty which has been mitigated, together with many of those which have been remitted in full, will fall in the class of those on which no remission can be granted. With that construction, instead of the trifling amount which has been paid into the treasury for the share of the United States, in mitigated penalties, which have been enforced in part, not less, probably, than two millions of dollars, remitted by those decisions, would have been legally exacted. The exposition of the law, and the preceding arguments, have been adduced only in proof of the correctness of the principles which have been adopted in mitigating penalties: for, in point of fact, the portion which has been paid on that account, in the treasury, is so inconsiderable, that, if known, it never could have been supposed that what is called the gain of the treasury had the smallest effect on the decisions.

The whole number of decisions, since the present Secretary of the Treasury has filled that office, viz: from the 14th of May, 1801, to the 14th of December, 1812, amounts to 1,297. In ninety-two of these cases, there being, in the opinion of the Treasury, intent of fraud, or (*statute*) wilful negligence, no remission could be granted. Of the 1,205 other cases, to which the power of remitting in whole, or in part, applied, there have been 888 in which an absolute remission has been granted, generally on payment of costs; and 317 have been mitigated. In about two-thirds of these, nothing more has been inflicted than the payment of sums, generally inconsiderable, to the use of the custom house officers. Of the residue, there are 27, consisting of three embargo cases, and of 24 cases of illegal importations, principally from Amelia island, or in vessels at sea when war was declared, in which the decision has been, that, from the nett proceeds of sales, the costs, and (in the cases of importation) the duties in force, when the decisions took place, should be deducted; that the residue, if not exceeding the prime cost, freight, insurance, and other charges, should be paid to the claimants, and that the surplus, if any, should be distributed in the same manner as the whole forfeiture, if enforced, would have been. In one of those cases, 150 dollars have been paid into the treasury. It is ascertained that, in many of them, there is no surplus; and the same result is anticipated in most others. In 67 other cases, hereafter stated, in answer to the last query of the committee, the whole amount paid

into the treasury falls short of four thousand dollars. There may be eight or ten more cases of mitigations, in which some payments have been, or may be, made into the treasury, and which, not being sufficiently designated in the register of decisions, could not be ascertained without a critical examination of all the original papers. The amount of penalties and forfeitures actually paid into the treasury, and which is hereafter stated, arises, almost exclusively, from cases of fraudulent infractions of the laws, on which no remission whatever could take place, and, in most of which, no application has, of course, been made to the treasury.

The last query of the Committee relates to the principles and amount of mitigations where a certain per centage has, in addition to the duties established by law, been required for the use of the United States.

In cases where a fine is mitigated, it is always done by fixing a sum of money less than the fine. When a forfeiture is mitigated, it is more consistent with the spirit of the law that the reduced payment which is required should still be in proportion to the value of the whole forfeiture incurred. This principle has been adopted in those cases designated as having been mitigated, by requiring the payment of a per centage. All those which have been ascertained, amount to sixty-seven, as already stated, and consist of two classes.

1. The first partial non-importation act took effect on the first day of July, 1808. The following rules were adopted with respect to subsequent importations, not fraudulent, and susceptible of remission or mitigation. An absolute remission was granted on all importations in vessels which had sailed from a British port, prior to the 1st of June, 1808, on the ground that there was a possibility of their arrival prior to the time when the law took effect. The forfeiture was mitigated in the subsequent cases, and no greater portion required than what appeared absolutely necessary to prevent continual infractions. For that purpose, the forfeiture was reduced to the payment of a sum equal to double the amount of the legal duties, to be divided as the forfeiture itself, if enforced, would have been. But that sum was levied only on the articles actually prohibited, and not on those otherwise admissible, and belonging to the same owners, though they were also forfeited by the law. There were 37 cases of this description. It has been ascertained that the sum paid in the treasury, on 30 of them, amounts to \$1,646 and 44 cents. The sum paid on the seven other cases, is blended, in the collector's accounts, with the ordinary duties, but, from the value of the merchandise, is estimated to have been less than nine hundred and sixty dollars. The forfeitures remitted by those same decisions, are believed to have exceeded half a million of dollars in value.

2. The importation of spirits, porter, and refined sugar, is prohibited in vessels or casks, of a size less than is prescribed by law. In the first decisions made on those cases, the condition of the remission was, that the articles imported, contrary to law, should be re-exported, without giving any other option to the owners. The only exception, whilst that rule prevailed, is Gillespie's case, where the spirits had been sold by order of court, prior to the application for a remission being made. The condition of paying one-fourth part of the proceeds was substituted to that of re-exportation, which had become impracticable. The share of the United States, contrary to what was intended, did not, in that case, cover the legal duties. It being, from experience, ascertained that the condition of an absolute re-exportation was sometimes impracticable, and, in most cases, more severe than was required for the purpose of preventing infractions of the law, an alternative was added to that condition, by leaving it optional with the claimants, if they did not re-export, to pay a certain sum, which, after some variations, was fixed at the rate of five cents per gallon of spirits, for the use of the United States, in addition to the legal duties. But, in all the cases, two only excepted, where the omission arose from inadvertence in filing the decisions, the condition of the re-exportation has always been preserved, and the payment aforesaid imposed only in case of not complying with that condition. The cases of this description, in which any money may have been paid in the treasury, amount to thirty. The actual payments being blended with the accounts of duties, cannot be ascertained. But the amount of spirits, porter, and sugar, embraced by those cases, have been ascertained, from the applications for remission; and it appears that, if no part has been re-exported, and if, in every instance, the parties have preferred to pay the sum to which the forfeiture was reduced, the whole amount paid in the treasury cannot have exceeded 1,400 dollars, and may, therefore, have been less.

A general statement of all the fines, penalties, and forfeitures, paid by the collectors in the treasury, from the 1st January, 1794, to the 31st December, 1811, and amounting to \$253,508 05, is enclosed. The expenses of prosecution in those cases, as paid by the marshals, cannot be discriminated from the general expenses paid generally for jurors, witnesses, and all other expenses incident to the prosecutions of every species of offences against the United States, including the safe-keeping of prisoners. The aggregate of all these amounts, for the same period, as appears by the annexed statement, to \$857,206 69. There can be no doubt that the portion expended in prosecuting for the offences against the revenue and restrictive laws under which the abovementioned fines, penalties, and forfeitures, have been incurred and paid, considerably exceeds the amount actually recovered and paid in the treasury; and that those penalties have never been a source of revenue, nor been sufficient to defray the expenses of prosecution: for which object they are exclusively appropriated by law.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Honorable JOSIAH QUINCY, *Chairman.*

No. 391.

[2d SESSION.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 1, 1813.

Mr. CHEVES, from the Committee of Ways and Means, to whom was referred the petition of Thomas Vincent, of Charleston, South Carolina, made the following report:

That the facts concerning this petition are contained in certain documents which accompany the petition, in a letter from the Secretary of the Treasury to the chairman of the committee, on the subject of the said petition, and in a letter from the Secretary of the Treasury to the collector of the port of St. Mary's, in Georgia; all of which are herewith reported.

That it appears the petitioner applied to the Secretary of the Treasury, under his ordinary powers, for relief from penalties and forfeitures incurred by the importation of British manufactures from the Spanish dependencies, and that, under the said application, the Secretary has finally and definitively decided, from which decision the petitioner prays to be relieved.

The committee, therefore, without inquiring into the merits of that decision, are of opinion that it would be improper and impolitic to revise, by an act of legislation, a decision thus finally and definitively made. The Committee, therefore, recommend the following resolve:

Resolved, That the prayer of the petition be not granted.

TREASURY DEPARTMENT, February 1st, 1813.

SIR:

I have the honor to return Thomas Vincent's petition, and the accompanying documents.

The circumstances under which possession was taken of Amelia island are known to the committee. As soon as the fact was known at the treasury, a letter, a copy of which is enclosed, was written to the collector of St. Mary's, enjoining on him to continue to consider Amelia island as a foreign port. All the acts of the late Governor Mathews, respecting the taking possession, what is called the capitulation, the asking bonds for Spanish duties, and the advice to masters of vessels and others, to proceed with prohibited merchandise to the United States, were altogether unauthorized and illegal.

The most valuable cargo then in Amelia island's harbor, was that of Mr. Stephen Girard's vessel, which, together with two or three more, proceeded to the Delaware, where they have been seized and libelled. The parties have not applied for a remission, but contend that they have incurred no forfeiture; and the suits are still pending. The cargoes have, notwithstanding the opposition of Government, been restored to the parties, on giving bond for the appraised value, which is understood to have been the prime cost. It has been stated, but whether correctly I cannot vouch, that Mr. Girard's bond for the ship and cargo is \$296,000; and that the cargo was sold for more than \$600,000.

The following eight cases are the only ones, (those just now mentioned excepted) in which prohibited goods, to my knowledge, have been imported from Amelia island since possession was taken by Governor Mathews. In all of them application was made for a remission of the forfeiture; and this was, in all the cases, granted, on the same conditions as in the case of Thomas Vincent, which is in the possession of the committee.

Names of the petitioners.	Names of the vessels.	Where imported.	Date of decision.
Thomas Vincent,	Ship Nautilus,	South Carolina,	July 8, 1812.
Micah Stone, for P. Chase,	Ship Eclipse,	Georgia,	July 8, 1812.
John Haslet, and J. M. Clark,	Ship Charlotte,	South Carolina,	July 9, 1812.
Sylvanus Howett,	Ship Julia,	Norfolk,	July 13, 1812.
Thomas Cross,	Brig Union,	Portland,	August 6, 1812.
R. Richardson and J. Bolton,	- - - - -	St. Mary's,	Oct. 23, 1812.
Strobel & Aspinal,	- - - - -	Do.	Dec. 14, 1812.
James Blair and J. Napier,	- - - - -	Do.	Dec. 14, 1812.

In the three last cases the merchandise was brought in boats across the St. Mary's river.

As, in the case of the petitioner, the merchandise sold for less than the prime cost and double duties, it is only that part of the decision which imposed those duties of which he complains. On that subject I will only observe, that the merchandise in that and all the other cases could not be legally admitted to entry till after the remission of the forfeitures, all of which were remitted subsequent to the first day of July, and after the passing of the act of Congress imposing the double duties. That condition appeared equally consistent with equity, and with the law then in force. With respect to the bonds given at Amelia island to an unauthorized person, it is evident that they are a perfect nullity, and cannot be recovered from the petitioners.

It may not be improper to add, that the same rule of decision has been adopted, and the forfeitures remitted precisely on the same terms as in the case of the "Nautilus," in the following cases, viz:

1. Brig South Carolina, arrived at Charleston, from Calcutta, remitted on 13th July, 1812; the circumstances of which case were stated in my letter of 10th December last, to the Committee of Ways and Means.
2. Two cases of merchandise, imported from Canada, subsequent to the declaration of war, under the apprehension of danger from the enemy, viz: furs, by J. Jacob Astor, remitted October 13th, 1812, and merchandise by David Vantine, remitted November 17th, 1812. Should the bill, intended for the relief of importers from the British provinces, since the declaration of war, be rejected by Congress, the same rule of decision which has been adopted in those two cases would be applied to all the others.

3. Nine vessels, which, being either on the coast, waiting for orders, or at sea, bound to foreign ports, and being informed of the war, came into the ports of the United States to avoid capture by the enemy, viz:

Names of petitioners.	Names of vessels.	Where from.	Where arrived.	Date of decision.
Stephen Higginson, jr.	Schooner Mary, -	Liverpool, - -	Boston, - - -	13th July, 1812.
Samuel Singleton, -	Ship South Carolina,	Algeziras, - -	Philadelphia, - -	13th July, 1812.
Edward Howe, jr. -	Ship Charleston and Liverpool packet,	Liverpool, - -	Norfolk, - - -	14th July, 1812.
John S. Trott, } M. Blake and others, }	Brig Thomas, - -	Ditto. - - -	Boston, - - -	14th August, 1812.
John Patrick, } John Baker, }	Brig Taber, - -	Montego Bay, -	New York, - - -	26th August, 1812.
J. & Wm. Flagg, -	Ship Jason, - -	Liverpool, - -	Portsmouth, N. H. -	26th August, 1812.
John Patrick, } Jacob Fash, }	Brig Emeline, -	Jamaica, - - -	New York, - - -	27th August, 1812.
D. Patch, } Ph. Currier, }	Brig Nymph, - -	Martinique, - -	Boston, - - -	31st August, 1812.
John M'Lean, } D. Ellis, }	Brig Wm. & Martha,	Liverpool, - -	Boston, - - -	12th October, 1812.

I have the honor to be, with respect, &c. sir, your obedient servant,

ALBERT GALLATIN.

Honorable LANGDON CHEVES,
Chairman of the Committee of Ways and Means.

TREASURY DEPARTMENT, *April 7th, 1812.*

SIR:

I learn by a letter from Mr. George Mathews, that a portion of East Florida has been ceded to the United States. Unacquainted as I am with the circumstances of that event, and not being yet informed of the manner in which it will be viewed by the Government of the United States, I can only direct you to continue to consider, for the present, and until otherwise instructed, every part of East Florida, by whomsoever possessed, as a foreign port or place.

I am, &c.

ALBERT GALLATIN.

ABRAHAM BESSANT, Esq. *Collector of St. Mary's, Georgia.*

[2d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 2, 1813.

TREASURY DEPARTMENT, *February 27, 1813.*

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed April 2d, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the *House of Representatives.*

TREASURY DEPARTMENT, *Comptroller's Office, February 27, 1813.*

SIR:

The statements herewith, marked A, B, and C, have been prepared pursuant to the seventh section of an act of Congress, passed the 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." They contain all the information, relative to the transactions of the mint, which settlements made at the treasury enable me to afford.

I have the honor to be, with great respect, your obedient servant,

RICHARD RUSH.

ALBERT GALLATIN, Esq.

A.

Statement exhibiting the balance of Gold and Silver remaining in the hands of the officers of the Mint on the 31st of December, 1811; the amount of deposits from the 1st of January to the 31st of December, 1812; the different species of coins made and paid on account of deposits, allowance for wastage, and the balance remaining in the hands of the officers of the Mint on the 31st of December, 1812, to be accounted for on a future settlement.

ANDREW ROSS, Clerk.

13th CONGRESS.]

No. 393.

[1st Session.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, ON THE 3D OF JUNE, 1813.

In obedience to the act supplementary to the act, entitled "An act to establish the Treasury Department," the Acting Secretary of the Treasury respectfully submits the following report:

The receipts into the treasury, from the 1st of October, 1812, to the 31st March, 1813, have amounted to	\$15,412,416	25
The balance in the treasury, on the 30th September, 1812, was	2,362,652	69
Making, together,	\$17,775,068	94
The expenditures, from the 1st October, 1812, to the 31st March, 1813, have amounted to	\$15,919,334	41
Leaving a balance in the treasury, on the 1st of April, 1813, of	1,855,734	53
	\$17,775,068	94

The enclosed statement (A) shows, in detail, the several sources from which the receipts were derived, and the branches of expenditure to which the disbursements from the treasury were applied.

Pursuant to the act of 8th February last, subscriptions for a loan of sixteen millions of dollars were opened on the 12th, and again on the 25th of March last. But, although a thirteen years' annuity of one per cent. was offered, in addition to a six per cent. stock at par, for the money which might be subscribed, it being aparent, from the result of the first subscription, that the whole amount could not be obtained on those terms, proposals in writing

were invited. Offers, exceeding, by about a million of dollars, the amount wanted, were received, some demanding a thirteen years' annuity of one and a half per cent, in addition to six per cent. stock at par, but most of them requiring a six per cent. stock, at the rate of 88 per cent. On these terms, leaving to the subscribers the option, the loan was effected.

In conformity with the public notification, the same terms were extended to those persons who had subscribed on the first opening of the subscription, and they have the same option; which, if the stock, at the rate of 88 per cent., be taken, is equivalent, precisely, to a premium of thirteen dollars sixty-three cents and seven-elevenths of a cent, for each hundred dollars loaned to the Government.

The enclosed papers, under the letter B, are copies of the several public notices given on the subject, and a statement of the moneys, respectively, obtained by open subscriptions, and by written proposals, and showing, also, the sums obtained and payable in each place where subscriptions were opened.

Of that sum of sixteen millions of dollars, thus obtained on loan, there was paid into the treasury, prior to the 1st of April, 1813, the sum of 1,086,737 50, which makes a part of the moneys received previously to that day, as stated in the statement A.

The resources for the residue of the year 1813, consist of the following items, viz:

1. The remainder of the loan abovementioned,	\$14,913,262 50
2. The sums payable on account of customs, and of the sales of public lands, estimated at	9,320,000 00
3. The five millions of dollars in treasury notes, authorized by the act of February 25th, 1813,	5,000,000 00
	Say <u>\$29,230,000 00</u>

The expenses for the last nine months of the present year, are calculated as followeth, viz:

1. Civil list, and all expenses of a civil nature, both foreign and domestic,	\$900,000 00
2. Payments on account of the principal and interest of the public debt, as per estimate C, herewith,	10,510,000 00
3. Expenses on account of the War and Navy Departments,	17,820,000 00
	<u>\$29,230,000 00</u>

Of the sum of \$1,855,734 53, remaining in the treasury on the 1st of April last, a small part may be considered as applicable to such extraordinary expenses, already authorized, as may arise during the remainder of the year; and for the same object, the sum of 1,000,000 of dollars, authorized, by an act of the State of Pennsylvania, to be loaned to the United States, but which was not offered in time to be accepted as a part of the loan of sixteen millions, may be considered as a resource.

In this estimate, the whole sum of five millions of dollars, authorized to be issued in treasury notes, is taken as a part of the resources of the present year. But, as it is not deemed eligible to increase the amount of treasury notes in circulation, and as three millions only, of those authorized by the act of 1812, were issued in that year, and are reimbursable in the course of the present year, it is respectfully suggested that, in lieu of issuing two millions of the five millions authorized by the act of February, 1813, Congress should authorize an additional loan for the same amount; it being made a condition of such loan, that its terms should not be higher than those of the loan of sixteen millions, already effected.

The provision already considered, is for the service of the present year only; that which will be necessary for the year 1814, requires an early attention. It is difficult to estimate, with accuracy, the sum which will be received into the treasury from the revenue, as now established.

During a state of war, the customs, at the present rate of duties, have been heretofore estimated to produce five millions of dollars. The additional tonnage duty, imposed upon foreign vessels, by the act of 1st July 1812, producing about 200,000 dollars a year, is not included in that sum.

It is believed that, during the year 1814, a greater sum than five millions two hundred thousand dollars ought not to be relied upon, as receivable into the treasury, from custom house duties. The sum arising from sales of public lands may be estimated at six hundred thousand dollars, making, together, 5,800,000 dollars. The interest alone, on the public funded debt, on temporary loans, and on the treasury notes, which will become payable in that year, will amount to four millions four hundred thousand dollars. The other engagements, on account of the principal of the funded debt, of temporary loans, and of treasury notes, which will become reimbursable in that year, amount to 7,150,000 dollars; exceeding, together, by more than five millions seven hundred thousand dollars, the estimated amount of the receipts into the treasury, derived from the revenue, as now established.

This view of the subject is sufficient to evince the necessity of a speedy and effectual provision for the service of that and the ensuing years. The mode and the extent to which this provision should be carried, have been heretofore suggested, from this Department, to Congress, and have received the consideration of that body.

The expenses of the peace establishment of the United States, and the interest on the public debt, including that on the loans made for the prosecution of the war, are believed to be the least sums that ought, under any circumstances, to be raised within each year. These, if the expenses of the peace establishment are taken at the sum necessary for the ordinary expenditure of the United States, previously to the additional armaments made in the year 1812, with a view to an approaching state of war, and including the interest on the loans of the year 1812 and 1813, and also of that which will probably be necessary in the year 1814, will amount, during that year, to eleven millions four hundred thousand dollars, viz:

The expense of the peace establishment, exclusive of the additional force authorized by the acts passed during the year 1812, may be estimated at

The interest on the public debt, during the year 1814, will be as follows:	\$7,000,000
On old funded debt,	\$2,100,000
On six per cent. stock of 1812, including temporary loans, received in part of the loan of eleven millions, which will remain unpaid in 1814,	500,000
On six per cent. stock of 1813,	1,090,000
On treasury notes, which will be reimbursable in 1814, say on 5,000,000 dollars, at 5½ per cent.	270,000

On the loan for the year 1814, interest payable within that year, - - - - - 3,960,000
440,000

\$11,400,000

The revenue, as now established, being estimated to produce - - - - - \$5,800,000
Would leave to be raised - - - - - 5,600,000

To cover the above sum of - - - - - \$11,400,000

The internal taxes, heretofore proposed, were estimated to produce - - - - - \$5,000,000
And the duty of 20 cents a bushel on salt, imported, which, though estimated, heretofore, at only 400,000 dollars a year, during a state of war, yet, as the consumption considerably exceeds 2,000,000 of bushels, may be estimated to produce - - - - - 600,000

Making the sum wanted, - - - - - \$5,600,000

Although the taxes, if early laid, may be brought into operation in the commencement of the year 1814, yet, as they cannot be expected to have their full effect during that year, some auxiliary resource will be required. This may be found in the sum of 1,500,000 dollars, which is the excess of the sinking fund for the present year, over the demands on that fund, according to the existing engagements of the United States. This sum of 1,500,000 dollars, may be carried to the sinking fund, for the year 1814, and will be wanted, in addition to the annual appropriation of 8,000,000 of dollars, to meet the engagements on account of the public debt, which must be fulfilled during that year.

As reliance must be had upon a loan, for the war expenses of the year 1814, the laying of internal taxes may be considered, with a view to that object, as essentially necessary—in the first place, to facilitate the obtaining of the loan, and secondly, for procuring it on favorable terms.

It is ascertained that the terms of the loan, for the present year, would have been more favorable, if the taxes had been previously laid; and it is obvious enough, that, by affording a security for the regular payment of the interest, and the eventual reimbursement of the principal, more stable, and less liable to be weakened or cut off by the natural effects of war, upon external commerce, than a revenue, depending as that of the United States now does, almost wholly upon such external commerce, capitalists will advance with the greater readiness, and at a lower rate of interest, the funds necessary for the prosecution of the war; public confidence will be ensured, and the means afforded of preserving the public credit unimpaired—a measure of the utmost importance, in a country like ours, where, from the lightness of the demands made upon the People, during the continuance of peace, the extraordinary expenses of a state of war can be supplied only by a resort to that credit.

The resources of the country are ample, and, if the means now proposed, and those heretofore recommended from this Department, are adopted, it is believed they may be fairly and fully brought into action.

All which is respectfully submitted.

W. JONES, *Acting Secretary of the Treasury.*

TREASURY DEPARTMENT, *June 2d, 1813.*

A.

Receipts and expenditures at the Treasury of the United States, from the 1st October, 1812, to the 31st of March, 1813.

B.

The United States' loan of 16,000,000 dollars has been taken up in the following manner and proportions, viz:

First subscription, on the 12th and 13th March, 1813,	-	-	-	-	\$3,956,400 00
Second subscription, 25th to 31st March, 1813,	-	-	-	-	1,881,800 00
Proposals made on the 5th of April, of which only \$10,161,800 could be received,	-	-	-	-	11,106,000 00
To which may be added the amount intended to be loaned by the State of Pennsylvania, the proposals for which not being received in time, could not be admitted,	-	-	-	-	1,000,000 00
					<u>\$17,944,200 00</u>

Being 1,944,200 dollars more than the sum of 16,000,000, authorized by law, and actually borrowed.

That sum of \$16,000,000 has been subscribed, and is payable at the following places:

New Hampshire,	-	-	-	-	\$40,000
Massachusetts,	-	-	-	-	120,000
					183,600
					75,300
Rhode Island,	-	-	-	-	67,800
New York,	-	-	-	-	5,437,100
					283,500
Pennsylvania,	-	-	-	-	6,858,400
Maryland,	-	-	-	-	1,950,800
Columbia,	-	-	-	-	442,500
Virginia,	-	-	-	-	49,000
					35,000
					103,000
South Carolina,	-	-	-	-	354,000
					<u>\$16,000,000</u>

B 1.

Whereas, by an act of Congress, passed on the eighth day of February, one thousand eight hundred and thirteen, the President of the United States is authorized to borrow, on the credit of the United States, a sum not exceeding sixteen millions of dollars, so, however, that no engagement or contract shall be entered into, which shall preclude the United States from reimbursing any sum or sums thus borrowed, at any time after the expiration of twelve years from the first day of January, one thousand eight hundred and fourteen: And whereas, by the said act, so much of the funds constituting the annual appropriation of eight millions of dollars, for the payment of the principal and interest of the public debt of the United States, as may be wanted for that purpose, after satisfying the sums necessary for the payment of the interest, and such part of the principal of said debt as the United States are now pledged annually to pay and reimburse, is pledged and appropriated for the payment of the interest, and for the reimbursement of the principal of the stock now to be created, and the faith of the United States is pledged to establish sufficient revenues for making up any deficiency that may hereafter take place in the funds now appropriated for paying the interest and principal as aforesaid: And whereas the President of the United States did, by an act or commission, under his hand, dated the seventeenth day of February, one thousand eight hundred and thirteen, authorize and empower the Secretary of the Treasury to borrow, on behalf of the United States, a sum not exceeding, in the whole, sixteen millions of dollars, and to make the necessary contracts for the same, pursuant to the act of Congress above recited:

Now, therefore, the undersigned, Secretary of the Treasury, in pursuance of the act of Congress, and the authority from the President of the United States, above mentioned, doth hereby, on behalf of the United States, contract and engage in manner following, to wit:

1. Books, for receiving subscriptions to a loan of sixteen millions of dollars, for the use of the United States, shall be opened on the twelfth day of March next,

At Portsmouth, N. H.	at the New Hampshire Union Bank.
At Salem, Mass.	at the Merchants' Bank.
At Boston, Mass.	at the State Bank.
At Providence, R. I.	at the Roger Williams Bank.
At the city of New York,	at the Manhattan Company and the Mechanics' Bank.
At Albany,	at the New York State Bank, and the Mechanics and Farmers' Bank.
At Philadelphia,	at the Bank of Pennsylvania, the Farmers and Mechanics' Bank, and the Philadelphia Bank.
At Baltimore,	at the Bank of Baltimore, the Commercial and Farmers' Bank, and the Union Bank of Maryland.
At the City of Washington,	at the Bank of Washington, and the office of the Bank of Columbia.
At Richmond, Va.	at the Bank of Virginia.
At Charleston, S. C.	at the State Bank, and the Planters and Mechanics' Bank.

And at any other incorporated Bank, in any of the above named cities or towns, which shall open books for receiving subscriptions, as aforesaid, and give public notice thereof.

Which books shall continue open for receiving subscriptions during the ordinary hours of transacting business at the said banks, on Friday, the twelfth, and Saturday, the thirteenth day of March next. If more than sixteen millions of dollars, in the whole, shall be subscribed, the surplus shall be deducted in proportion to the sums subscribed in each place, respectively, by a reduction of the subscriptions exceeding four thousand dollars. But no reduction shall be made of the subscriptions made by any persons or bodies corporate, holders (at the time of subscribing) of stock issued under the act of March 14, 1812, called "six per cent. stock of 1812," unless the aggregate of their subscriptions should exceed sixteen millions of dollars; in which case, the surplus shall be deducted by a reduction of the proportionally highest subscriptions. If any subscription shall be thus reduced, the amount of such reduction shall be forthwith returned to the subscriber from whom such reduction shall have been made.

2. No subscriptions will be received for a sum less than one hundred dollars, nor for a fractional part of a hundred dollars.

3. For every hundred dollars which may be subscribed, there shall be paid, at the time of subscribing, twelve dollars and fifty cents, and a like sum of twelve dollars and fifty cents on the first day of each of the ensuing months of April, May, June, July, August, September, and October, one thousand eight hundred and thirteen, respectively. Each subscriber, at the time of paying any of the above instalments, after the first, may pay all, or any number, of the subsequent instalments, and will be entitled to receive interest, at the rate of six per centum per annum, on the amount thus paid, from the time of actual payment.

4. On the failure of payment of any instalment of the sums subscribed, according to the tenor of the third article, the next preceding instalment of twelve dollars and fifty cents, which shall have been paid for every hundred dollars subscribed, shall be forfeited to the United States.

5. Each subsequent instalment must be paid at the same bank at which the original subscription was made, and where the first instalment was paid.

6. The cashiers of the respective banks where subscriptions are received, shall, within twenty days after the time of subscribing, give certificates, stating the sums subscribed and payment made, and on which the payments of the subsequent instalments, when made, shall be, respectively, endorsed; which certificates shall be assignable by endorsement and delivery of the parties in whose favor they may be issued, until the completion of the payments required by the tenor of the third article.

7. After the completion of the payments aforesaid, the proprietors of the certificates of the cashiers, on which such payments have been completed, on surrendering the same at the loan office of the State in which the subscription and payments shall have been made, shall be entitled to receive, from the commissioner of loans, certificates of funded capital stock for the amount thus subscribed and paid, bearing an interest of six per centum per annum, from the time when the said instalments shall have been paid, respectively, and payable, quarter yearly, at the several loan offices, or at the treasury of the United States, where the same may stand credited; and shall, moreover, receive, from the commissioner of loans, a certificate, entitling such proprietor to an annuity or annual sum, payable quarter yearly, for thirteen years, commencing on the first day of January, one thousand eight hundred and thirteen, of one dollar on every hundred dollars thus subscribed and paid; which certificates of annuity shall constitute a separate and distinct stock, and may be sold, assigned, and transferred, to and from the books of the treasury, or of the several loan offices, separately and distinctly from the aforesaid funded capital six per cent. stock. And the said funded capital stock, and the said annuities, shall be transferable by their respective proprietors, in person, or by their attorneys, duly constituted, in the same manner as the present funded debt of the United States, and in pursuance of the rules which have been, or which may be, established, relative to the transfer of the said debt.

8. After the payment of the fifth instalment, such of the proprietors of the certificates of the cashiers, of two hundred dollars and upwards, as may then be desirous of funding the same, may, on presenting them at the loan office of the State in which the subscription and payments shall have been made, receive, from the commissioner of loans, certificates of funded capital six per cent. stock, for the amount of the four first instalments, or one moiety of the sum expressed in the certificates of the cashiers; and also, certificates for one moiety of the thirteen years' annuity of one dollar on the hundred dollars subscribed. But no certificate of funded capital six per cent. stock, including a fractional part of a hundred dollars, or certificate of annuity, including a fractional part of a dollar, will be issued.

9. After the last day of December, in the year one thousand eight hundred and twenty-five, and after reasonable notice to the creditors, which shall be given by an advertisement in some public newspaper, printed at the seat of the Government of the United States, the said capital six per cent. stock shall be redeemable at the pleasure of the United States, by the reimbursement of the whole sum which may at that time stand credited to any proprietor on the books of the treasury, or of the loan offices, respectively. And the payments of the said annuities, for thirteen

years, shall cease and determine on the first day of January, one thousand eight hundred and twenty-six, when the certificates of the same shall be surrendered up and cancelled.

10. So much of the funds constituting the annual appropriation of eight millions of dollars for the payment of the principal and interest of the public debt of the United States, as may be necessary for the regular payment of the interest, and for the reimbursement of the principal of the stock, and for the regular payment of the annuities to be created under this contract, together with the faith of the United States for its due fulfilment, are hereby pledged, in pursuance of, and according to, the terms and conditions of the act of Congress herein before recited.

Given under my hand, and the seal of the treasury of the United States, at Washington, this twentieth day of February, one thousand eight hundred and thirteen.

ALBERT GALLATIN,
Secretary of the Treasury.

B 2.

UNITED STATES' LOAN.

TREASURY DEPARTMENT, *March 18th, 1813.*

Notice is hereby given, that the books for receiving subscriptions to the loan, authorized by the act of Congress, of February 8th, 1813, will again be opened on the 25th day of this month, on the same terms and conditions as heretofore, and continue so open till the 31st day of this month, unless sooner closed by public notice, at the following places, and for the following sums, respectively, that is to say:

At New York, for five millions of dollars, at the Manhattan Company, Mechanics' Bank, City Bank, Merchants' Bank, Bank of America.

At Philadelphia, for five millions of dollars, at the Bank of Pennsylvania, Farmers and Mechanics' Bank, Philadelphia Bank, Stephen Girard's Bank.

At Baltimore, for one million seven hundred thousand dollars, at the Bank of Baltimore, Commercial and Farmers' Bank, Union Bank of Maryland, Mechanics' Bank, Marine Bank.

At Washington, for three hundred thousand dollars, at the Bank of Washington, office of the Bank of Columbia.

Proposals will also be received by the Secretary of the Treasury, until the fifth day of April next, from any person or persons, body or bodies corporate, who may offer, for themselves or others, to subscribe for the whole or part of the residue of the loan aforesaid, which may not have been subscribed for prior to the 1st day of April next. The proposals must distinctly state the amount offered to be loaned, the species of stock or stocks, which the parties wish to obtain, and the price they will allow for the same. Unless a different modification should be asked in the proposal, it will be understood that the amount loaned will be paid into the treasury, in four equal instalments, viz: on the 15th days of April, June, August, and October next, and that the stock issued will be irredeemable till the 31st day of December, 1825.

If proposals shall be made, amounting, together, to a greater sum than that required, the preference will, on equal terms, be given to stockholders of the six per cent. stock of 1812.

If any proposals, differing in terms from one another, or from those on which subscriptions have already or may be made prior to the 1st day of April next, should be excepted, all the parties, including those who have already subscribed, or may subscribe prior to the 1st day of April next, shall be placed on the same footing, by giving to all, the option, either of the terms offered by them, or on which they have subscribed, or of those offered by any other persons, and which shall have been accepted.

No proposal will be received for a sum less than one hundred thousand dollars. But a commission of one quarter per cent. will be allowed to any person collecting subscriptions for the purpose of incorporating them in one proposal, to the amount of one hundred thousand dollars or upwards; provided that such proposal shall be accepted.

All the proposals must be transmitted by duplicates, one directed to the City of Washington, and the other (under cover of the Cashier of the Bank of Pennsylvania) to Philadelphia.

ALBERT GALLATIN,
Secretary of the Treasury.

. 3.

UNITED STATES' LOAN.

TREASURY DEPARTMENT, *April 15th, 1813.*

Those persons who have subscribed to the United States' loan of sixteen millions of dollars, prior to the 1st day of the present month of April, are hereby notified that terms, different from those under which they made their subscriptions, have been allowed to the persons who have taken the remainder of the said loan of sixteen millions; and that, conformably to the public notification from this Department, of the 18th of March last, those who subscribed prior to the 1st of April have the privilege of taking the terms thus subsequently allowed; and which terms are as follows, viz:

1st. That the subscriber shall receive a six per cent. stock, the interest payable quarter yearly, redeemable at the pleasure of the United States, at any time after the end of the year 1825, at the rate of eighty-eight per cent. or one hundred dollars in stock for eighty-eight dollars in money.

Or, 2d. That the subscriber, for every hundred dollars in money, shall receive one hundred dollars in the same species of six per cent. stock, and an annuity, for thirteen years, from the 1st day of January last, of one dollar and fifty cents, payable quarter yearly.

The subscribers, who may wish to avail themselves of these terms, will present their scrip certificates to the cashier of the bank by whom they were issued, and will express, in writing, on the face of the same, which of the above terms they will elect to accept, and will receive, from the cashier, new scrip certificates, conformably thereto; the payments upon which, and funding whereof, are to be effected in the same manner as before.

Such subscribers as have already completed their payments, and obtained certificates of funded stock and annuities on the terms originally proposed, are to surrender the same to the commissioner of loans, or to the Register of the Treasury, by whom they were issued, expressing their election in the same manner; and will receive from him certificates of funded stock, and of annuities, as the case may be, in conformity with the election they may thus make.

ALBERT GALLATIN,
Secretary of the Treasury.

C.

View of the Sinking Fund for the year 1813.

The balance belonging to this fund, remaining unapplied on the 31st December, 1812, (per report of commissioners to Congress, of February 6, 1813,) was	-	-	-	-	\$3,550,369 11
The annual appropriation for the year 1813,	-	-	-	-	8,000,000 00
					11,550,369 11
There was applied, during the first quarter of the year 1813,	-	-	-	-	1,036,868 28
Leaving to be applied, in the three last quarters of that year,	-	-	-	-	\$10,513,500 83

The manner in which the amount will be applied in the year 1813, is as follows:

Interest and reimbursement of old six and deferred stocks, estimated at	-	-	-	\$2,160,000 00
Interest on exchanged six per cent. stock of 1812,	-	-	-	180,000 00
Ditto on three per cent. stock,	-	-	-	485,000 00
Ditto on 1796 six per cent. stock,	-	-	-	5,000 00
Ditto on Louisiana stock, and charges,	-	-	-	680,000 00
Ditto on six per cent. stock of 1812, including temporary bank loans and some arrearages,	-	-	-	700,000 00
Interest on new stock of 1813,	-	-	-	470,000 00
Principal of temporary loans reimbursable in 1813,	-	-	-	1,350,000 00
Treasury notes, including those payable on the 1st and 11th January, 1814, which must be provided for by the 31st December, 1813,	-	-	-	\$3,804,500
Interest on the same,	-	-	-	205,443
				say 4,010,000 00

INCREASE OF REVENUE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 10, 1813.

Mr. EPPES made the following report:

The Committee of Ways and Means, to whom was referred so much of the message of the President of the United States as relates to the establishment of a well digested system of internal revenue, have had the same under consideration.

They deem it unnecessary to say any thing as to the necessity of providing additional revenue, at a time when the general rate of expenditure has been so much increased by measures necessarily connected with a state of war. A reference to the reports from the Treasury Department, and from the Committee of Ways and Means, during the last and preceding years, will show that a provision for additional revenue can no longer be delayed, without a violation of all those principles held sacred in every country, where the value and importance of national credit have been justly estimated. They have reviewed the system heretofore presented, and taking into consideration its having been sanctioned, in its principles, by a vote of the House of Representatives, have determined to recommend its adoption, with some modifications, in preference to commencing a new system, at a period when neither the principles or details could receive that mature consideration on which, alone, they could venture to recommend its adoption. The bills, heretofore reported, were founded on estimates which assumed for a basis providing a revenue sufficient to meet the expenses of the peace establishment, the interest on the old debt, and on such new loans as have been, or may be, hereafter, authorized. These several items, for the year 1814, are estimated as follows:

The expense of the peace establishment, at	-	-	-	-	-	\$7,000,000
<i>The interest on the Public Debt.</i>						
On the old funded debt,	-	-	-	-	-	2,100,000
On six per cent. stock, of 1812, including temporary loans received in part of the loan of 11,000,000 dollars, which will remain unpaid in 1814,	-	-	-	-	-	500,000
On six per cent. stock, of 1813,	-	-	-	-	-	1,090,000
On treasury notes which will be reimbursable in 1814, say on \$5,000,000, at 5 $\frac{2}{3}$ per cent.	-	-	-	-	-	270,000
						3,960,000
On the loan for 1814, interest payable within that year,	-	-	-	-	-	440,000
						11,400,000
The revenue now established being estimated to produce	-	-	-	-	-	5,800,000
						5,600,000
Leaves to be provided for,	-	-	-	-	-	5,600,000
To meet which sum, the committee propose—						
1. A direct tax of	-	-	-	-	-	3,000,000
Internal duties, viz:						
1. Duties on stills, estimated to produce	-	-	-	-	-	765,000
on refined sugar,	-	-	-	-	-	200,000
on retailers' licences,	-	-	-	-	-	500,000
on sales at auction,	-	-	-	-	-	50,000
on carriages,	-	-	-	-	-	150,000
on bank notes and negotiable paper,	-	-	-	-	-	400,000
on salt, at twenty cents,	-	-	-	-	-	400,000
Additional duty on foreign tonnage,	-	-	-	-	-	900,000
						6,365,000
Total gross,	-	-	-	-	-	6,365,000
Deduct for expenses of collection, assesment, and losses,	-	-	-	-	-	750,000
						\$5,615,000

The Committee therefore ask leave to report the following bills:

1. A bill for the assessment and collection of direct taxes;
2. A bill to lay and collect a direct tax within the United States;
3. A bill laying a duty on imported salt;

4. A bill establishing the office of commissioner of the revenue;
5. A bill laying duties on licences to retailers of wines, spirituous liquors, and foreign merchandise;
6. A bill laying duties on carriages for the conveyance of persons;
7. A bill laying duties on licences to distillers of spirituous liquors,
8. A bill laying duties on sales at auction, of foreign merchandise, and of ships and vessels;
9. A bill laying duties on sugars refined within the United States;
10. A bill laying duties on bank notes, and on notes of hand, and foreign bills of exchange of certain descriptions;
11. A bill making further provision for the collection of internal duties; and,
12. A bill laying an additional duty on foreign tonnage.

DIRECT TAX.

Mode adopted for ascertaining the quotas of the counties in the several States.

In those States where there is a State tax, the apportionment of that tax, among the counties of the State, has been made the rule for apportioning the direct tax; and the quota of each county, of the direct tax, has been made to bear the same proportion to the whole quota of the State, as the amount of the State tax, paid by such county, bears to the whole sum paid in the State for the State tax.

In those States where there is no State tax, or, if there be one, the proportions in which it is apportioned among the counties is not known, the principle assumed for a basis is, that the comparative advancement of wealth (or rather the increase in the value of property, subject to the direct tax now to be imposed) and of population in the different districts of the same State, have been equal, since the year 1799; so that, if a given portion of a State, containing, for example, one-fourth of the population of the State, and which paid, in 1799, one-fourth of the direct tax of that State, now contains one-third of the whole population of the State, it ought now to pay one-third of the whole tax to be imposed upon the State. And, in respect to *population* for both epochs, although the *federal numbers*, or numbers represented in Congress, have been taken as the constitution directs, for ascertaining the quota of each State, of the whole sum to be raised in the United States; yet, for apportioning the sum thus found as the quota of any State, among the several counties of that State, the whole numbers of the several counties, including slaves, have been taken; because it is considered that the slaves increase the wealth, or the ability to pay, in a ratio at least equal to the augmented quota which this mode will give to those parts of a State in which slaves are possessed, over those in which there are none, or a smaller number. Maryland is the only State where there is a considerable proportion of slaves, to which this mode of apportioning the tax among the counties has been applied.

The process, then, is, to make the quota of each county in a given State, compared with its population in 1810, bear the same proportion to the present quota of the State, compared with its whole population in 1810, as the quota of the same county, of the direct tax of 1799, compared with its population by the census of 1800, bore to the quota of the whole State, of the direct tax of 1799, compared with its whole population in 1800.

To effect this, there must be found—

1. The proportion which the population of each county, in 1800, bore to the population of the whole State at that time.
2. The proportion which the population of the same county bore in 1810 to the population of the whole State in 1810.
3. Then, as the ratio found by No. 1 is to the ratio found by No. 2, so is the quota which the county paid, of the direct tax in 1799, to the sum which would be payable by the same county, of a direct tax at this time, of which the quota of the State in question would be the same as was the quota of that State, of the direct tax in 1799.
4. Lastly, as the quota of the State, in 1799, is to the quota of the State under the direct tax now to be imposed, so is the sum found by No. 3, to the quota of the county under the direct tax, now to be imposed.

Exemplified by Rockingham county, New Hampshire:

1. The total population of New Hampshire, in 1800, was 183,858, and of Rockingham county, at the same time, 45,427. The proportion, 24.7.
2. The total population of New Hampshire, in 1810, was 214,360; of Rockingham county, at the same time, 50,175. The proportion, 23.4.
3. The quota of Rockingham county, of the direct tax of 1799, was 27,743 dollars. Then, as 24.7 : 23.4 :: 27,473 : 26,027 dollars; the sum which would be payable by Rockingham county, if the quota of the State of New Hampshire were now the same as it was in 1799.
4. The quota of New Hampshire, (as finally assessed) in 1799, was 77,968 dollars. The quota now proposed for it is \$96,793.37. Then, as 77,968 : 96,793.37 :: 26,027 : 32,311.21, the sum now payable by Rockingham county. This sum, in the table, has been made \$32,263.37, to accommodate the fractions, which, in these long calculations, were not carried through more than three or four places of figures. Although mathematical accuracy has not thus been attained, no considerable inequality is believed to have been occasioned; and the proposed provision, by which the right is given to the States of altering the quotas of their counties, whenever their Legislatures should deem an unjust or unequal apportionment to have been made by the act of Congress, has been considered as securing the people of every part of the country from an unfair or oppressive bearing of the tax upon them.

States in which the quotas of counties have been found, by comparing their population, in 1810, with that of 1800, and the direct tax of 1799.

New Hampshire,	Pennsylvania,
Rhode Island,	Delaware,
Vermont,	Maryland.
New York,	

States in which the quotas of counties have been made to bear the same proportion to the whole quota of the State, as the amount of the State taxes, in each county, bears to the whole amount of the State tax in each State.

Massachusetts,	Georgia,
Connecticut,	Ohio,
New Jersey,	Kentucky,
Virginia,	Tennessee, (a.)
North Carolina,	Louisiana, (a.)
South Carolina,	

(a.) The necessary information respecting State taxes not yet received.

13th CONGRESS.]

No. 395.

[1st SESSION.]

REMISSION OF PENALTIES AND FORFEITURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 16, 1813.

The Acting Secretary of the Treasury, to whom was referred the memorial of Stephen Girard and others, owners of the ships Good Friends, United States, and Amazon, and their cargoes, respectfully reports:

That the above named vessels, with their cargoes, consisting of merchandise of the growth, produce, or manufacture, of Great Britain, having left ports in Great Britain in the months of October and December, 1811, arrived at Amelia Island, in East Florida, between the 22d of December, 1811, and the 10th of February, 1812, and were lying in the port of Fernandina, in that island, on the 18th of March, 1812; on which day possession was taken of the island by George Mathews, under a pretended authority from the Government of the United States. Under the same authority, a local government was established by him, and such officers appointed as he deemed necessary to administer it. The supercargoes and agents for the property on board the vessels in question, deeming their situation insecure, and that the value of the cargoes would probably invite hostile or predatory attacks upon them if they remained in a port where, within three days, the public authority had been exercised under no less than three different jurisdictions, and considering themselves as already, without their own agency or consent, placed, with the property in their charge, under the authority of the United States, applied to General Mathews for permission to proceed to Philadelphia, under such conditions and restrictions as might secure the property from the penalties and forfeitures to which, by the then existing laws of the United States, it would be exposed if imported into the United States. General Mathews granted this request, considering, as he himself expressed it, "that the vessels and their cargoes were already under the protection of the flag of the United States, and within the waters of an integral part of our common country;" and that they would not therefore be subjected, by going to Philadelphia, to the prohibitions of the non-importation law. He directed that the vessels and cargoes should be delivered in charge to the collector of Philadelphia, should so remain until the determination of the Government in relation to them should be known, and took bonds for the performance of this condition. The vessels left Amelia Island on the 10th of April, 1811, and arrived in the river Delaware, on their way to Philadelphia, on the 19th day of the same month, when they were seized by the collector of the district of Delaware, and were subsequently libelled in the district court of that district, as liable to forfeiture for an infringement of the non-importation act. The taking possession of Amelia Island by General Mathews, in the manner in which it was done, and his subsequent acts at that place, being altogether unauthorized and illegal, the licence, or permission, which he gave for the vessels to proceed to Philadelphia was entirely null, and they, with their cargoes, were, of course, on coming within the jurisdiction of the United States, subject to forfeiture.

These are the material facts in the cases represented in the memorial. The grounds on which the memorialists ask for relief, are,

1st. That the lading of the merchandise on board their ships, in the first instance, was without any intention to violate the provisions of the act of March 1st, 1809, commonly called the non-importation act. By the 5th section of that act, the lading of prohibited merchandise on board of any vessel in a foreign country, with an intent to import the same into the United States, is made penal, and subjects the merchandise, and the vessel on board of which it is laden, to forfeiture. But the memorialists represent, that, although the ultimate destination of the merchandise was for the United States, yet, that it was not their intention that it should at any time enter the United States in contravention of the laws; that their property was withdrawn from England in the apprehension of its insecurity there from an approaching state of war; and that it was placed in a situation recommended by its supposed safety, and by its proximity to the United States, to await the time when it might, by an expected act of the Government, be made lawful to introduce it into the United States. The intention of violating the law, which is what the act of March, 1809, must have contemplated when the lading of prohibited merchandise on board a vessel in a foreign country was made criminal, is disowned by the memorialists; and from all the circumstances, particularly in Mr. Girard's case, from the application made by him to Congress, in the month of March, 1812, for permission by law to import the cargo of the ship Good Friends, thereby manifesting his disposition to respect the laws, and to avoid, in every particular, their infringement, appears not to have been entertained by them.

2d. That the importation, when actually made, was supposed by the memorialists and by their agents not to be illegal. The powers which General Mathews assumed to possess at Amelia Island, could not, from the nature of the case, be investigated by the agents of the memorialists there present. He pretended to have authority for what he did; and exterior circumstances may, in some measure, have justified a belief, on their part, that his acts were directed, and would be sanctioned, by the Government. The vessels and their cargoes, on their arrival in Philadelphia, were to be put in possession of the collector of the customs, and no intention of a clandestine or fraudulent introduction of any part of the merchandise can be supposed to have been entertained in the remotest manner by the memorialists.

Under these views of the cases of the memorialists, they would appear to be entitled to relief. The consideration that Congress has, by three acts, passed at their last session, directed the penalties and forfeitures incurred under the same prohibitory act, by three classes of importers of British merchandise, to be remitted, strengthens and confirms this idea. But it must be recollected that several cases of importations from Amelia Island, under circumstances similar to those stated in the present memorial, have already occurred and been acted on. Petitions for remission having been presented to the Secretary of the Treasury, they were granted under the authority of the general mitigating act of March, 1797, upon certain conditions, the effect of which was, to subject the merchandise to the payment of the double duties imposed by the act of July 1, 1812; and this upon the ground that, as the merchandise could not be legally admitted to entry till the remission took place, and as this was not granted till after the act of July 1, 1812, was in operation, it was equally consistent with equity, and with the law then in force, that the double duties should be made to attach to the merchandise. The principles which governed in those decisions were stated in the letter of the Secretary of the Treasury to the chairman of the Committee of Ways and Means, of the 1st of February last, of which a copy is annexed to this report.* Those principles were sanctioned by the Committee of Ways and Means, and are understood to have been concurred in by the House. The same measure of justice or of indulgence is due to all those standing in the same situation; and it is respectfully suggested, that the relief prayed for by the memorialists in the present case should be granted only on the payment of the double duties imposed by the act of July 1st, 1812; or, in other words, on the payment of such duties as would be payable on the merchandise if imported at the time when the act by which the importation already made is legalized, shall be passed.

All which is respectfully submitted.

W. JONES, *Acting Secretary of the Treasury.*

TREASURY DEPARTMENT, *June 15th, 1813.*

To the Senate and House of Representatives of the United States of America in Congress assembled,

The memorial of Stephen Girard, of the city of Philadelphia, in the State of Pennsylvania, merchant, owner of the ship *Good Friends*, and her cargo; Thomson and Morris, of the same place, merchants, owners of the ship *Amazon*, and of part of her cargo; Bryan & Schlatter, Edward Wilson, Longstreth & Wilson, William S. Crothers, and John Vaughan, the legal representatives of Samuel Merrik, lately deceased, all of the same place, merchants, also respectively part owners of the cargo of the said ship *Amazon*; Luke Tiernan & Co., Henry Shroeder and Co., and Levin Wetherill, of Baltimore, in the State of Maryland, merchants, also respectively part owners of the cargo of the said ship *Amazon*; and Jonathan Ogden, of the city of New York, merchant, also part owner of the cargo of the said ship *Amazon*; and Rugan & Rhodes, of the city of Philadelphia, merchants, owners of the ship *United States*, and her cargo, respectfully sheweth:

That your memorialist, Stephen Girard, represented to Congress, at their session in March, 1812, the circumstances under which his ship the *Good Friends*, Robert Thompson, master, with a valuable cargo of the manufactures of England, (belonging also to him) had proceeded from London to Amelia Island; and prayed, in contemplation of the impending war between the United States and Great Britain, that he might be permitted to rescue his property from the danger to which it was exposed, by placing it, upon any terms that the wisdom of the Legislature should prescribe, within the protection of the United States; as will more particularly appear by a copy of the representation annexed to the present memorial, A.

That your memorialists, the owners of the ships *Amazon* and the *United States*, and of their respective cargoes, influenced by motives similar to those which had actuated Mr. Girard, also removed their property from the immediate jurisdiction and power of the British Government, and sent it to Amelia Island, as a situation of comparative safety, in the event of war. But, reposing perfect confidence in the impartiality, as well as in the liberality of Congress, they abstained from addressing your honorable body on the occasion; since the principle of your decision on Mr. Girard's memorial, would naturally be applied to all cases, within the same reason for indulgence and relief. The ship *Amazon* sailed from Liverpool about the fourth of October, 1811, and arrived at Amelia Island about the 22d of December following. The ship *United States* sailed from Liverpool about the 25th of October, 1811, and arrived at Amelia Island about the 25th of December following.

That your memorialists, while the attention of Congress is again claimed upon this interesting subject, deem it proper, solemnly and explicitly to declare, that, although they were desirous to withdraw their respective funds from England, and to reap the emolument of a fair trade, in the goods which they had respectively ordered, yet, that they never did intend to make the shipments in England, or to import the goods into any district of the United States, in violation of the laws of their country. True it is, that, at the time of the shipments, your memorialists anticipated, either as a consequence of an adjustment of the differences subsisting between the United States and Great Britain, or as a consequence of a formal declaration of war, that an importation would, eventually, be rendered lawful; but they utterly deny that the shipments were made with a view to an importation, in peace or in war, at any period of time, or under any change of circumstances, without the direct and positive sanction of the American Government.

That, in connexion, however, with this declaration, your memorialists respectfully remark, that, notwithstanding the existence of the non-importation act, the citizens of the United States might lawfully transport their property, consisting of British products or fabrics, from one British port to another; or from a British port to the ports of any other foreign nation; and an ulterior design to bring the property to their own home, whenever that course might also be lawfully pursued, has never been denounced, and can never be justly denounced, as a subject for prosecution and punishment: for, if, upon a rigid interpretation of a doubtful expression, it has been alleged that a penalty is incurred, by the act of putting goods of British growth or manufacture, on board of any ship or vessel, with intention of importing them into the United States, "*against the prohibition or the true intent and meaning of the law,*" even before the goods have been brought within the jurisdiction of the United States, yet, neither the spirit nor the language of the law can ever be so strained, as to affix the same penalty to the act of putting such goods on board of any ship or vessel, with the qualified, contingent, and avowed intention of importing them, *only when, and after, the legislative prohibition had ceased, and the intent and meaning of the law could not possibly be contravened.*

That your memorialists having, with these unoffending dispositions, transported their property from England to the port of Fernandina, in Amelia Island, were anxiously, but submissively waiting the decision of Congress upon their case, when a political revolution suddenly occurred, which transferred the possession and jurisdiction of the Island from Spain to the United States. It appears, from the public documents of the time, that, in consequence of an insurrection of the neighboring inhabitants, the town of Fernandina surrendered to an armed party, calling themselves "*the Patriots,*" on the 17th of March, 1812; that the Patriots, on the ensuing day, entered into capitulation with General George Mathews, at the head of the land and naval forces of the United States, ceding to him the town, the harbor, and the adjacent country, as the deputed commissioner of the United States, to receive the cession; and that General Mathews took immediate possession of Fernandina, appointed a judge, a collector, a harbor master, and a notary public; and exercised all the other functions of government, civil and military, in the name, and on behalf, of the United States.

*For this letter see No. 391, page 618.

That your memorialists are aware of the disclosure, at a period long subsequent, of the secret act of Congress, passed on the 15th of January, 1811, authorizing the President, upon the occurrence of certain events, to take possession of the territory lying east of the river Perdido, and south of the State of Georgia, and the Mississippi territory, of the commission and instructions issued to General Mathews and Col. McKee, jointly and severally, for carrying the provisions of the act into effect; and of the judgment of the President, that General Mathews, in accepting the cession of Fernandina, under the circumstances which have been stated, transgressed the limits of his commission. But your memorialists, with great deference, observe, that, in a transaction to which the Legislative and Executive Departments of the Government had thus affixed the seal of secrecy and confidence, a knowledge of the law could not be acquired, by the ordinary means of information; and every citizen was obliged, every citizen was bound, to presume the competency and the validity of General Matthews' authority, simply, because the authority was exercised. The commissioner might, therefore, be personally responsible for his conduct; reparation might become due, as for a violation of the territory and sovereignty of a foreign Power; and individuals, upon the spot, might be involved in losses, for which no indemnity could be obtained; but it will be without precedent, as it is, most manifestly, without principle, that the American Government should take advantage of the honest delusion produced by the public conduct of an accredited agent, acting under color of a secret commission, to entangle its own citizens in the net of legal confiscation.

That, as soon as the revolution of Fernandina appeared to be consummated, by the organization and establishment of a government under the authority of the United States, the masters of the ships, belonging, as before mentioned, to your memorialists, and the supercargoes charged with the care of the goods on board, saw that the danger and the difficulty of their situation were greatly increased, without their participation in the cause. By an act performed in the name, and under the authority of the United States, Amelia Island had become an American possession; the vessels and cargoes of your memorialists, without their intention or knowledge, were subjected to the American jurisdiction; the Island no longer remaining a neutral asylum, seemed to present an attitude of defiance towards England, as well as Spain; and the rich accumulation of American property in the harbor of Fernandina, afforded so strong a temptation, that any other inducement was scarcely wanting, to ensure a predatory visit, under whatever pretext, from some of the belligerent cruisers or privateers. To remain, therefore, at Amelia Island, in this unexpected change of circumstances, was thought a wilful sacrifice of the ships and cargoes. The alternative of seeking another safe and peaceful port, in a foreign country, was thought impracticable: for, no voyage could be undertaken, with a hope of avoiding capture; no insurance could be effected, at any rate of premium; and, after all, what port was open for selection, to which the belligerents, with hostile views, could not also resort? In this dilemma, it was natural, it was proper, that the agents of your memorialists should apply for advice and assistance, to the commissioner of the United States, whose public conduct (then deemed to be duly authorized) had contributed to embarrass them; and let it be remarked, that, even if they had been disposed rather to place the property of your memorialists within the reach of their own Government, as an object of confiscation, than to expose it to the belligerents, as an object of pillage, the patriotism of the choice might serve, in the most unfavorable result, as some excuse for its imprudence.

But your memorialists further respectfully represent, that their agents, well knowing the nature and obligation of the instructions which they had received, felt no disposition, under any aspect of affairs, to enter the ports of the United States, in violation of the law. Of the authority of General Mathews to accept the cession of Fernandina, upon the terms of the capitulation, they never conceived a doubt; of the constitutional or legal effect of the cession to identify Amelia Island with the territory of the United States, they never presumed to form an opinion; of the public policy and lawfulness of removing the American property from Amelia Island, they believed General Mathews to be a competent judge; but, still, with respect to all these considerations, they referred their conduct implicitly to the order and guidance of the commissioner, acting in the name and under the authority of the United States, as will more particularly appear by their address, and his answer, of which copies are annexed to this memorial, B, C.

That from these, and other documents now exhibited, your memorialists are confident that it will be satisfactorily proved to your honorable body, that the ships and cargoes belonging to them, as before stated, were not voluntarily brought by their agents from Amelia Island into the United States, with a design to contravene the prohibition of the act of Congress respecting goods of British growth or manufacture; but that they were sent hither, under an apparently lawful licence, upon motives of public policy, in a case of necessity, to be disposed of as the Government should be pleased, eventually, to direct: Thus,

1. The agents of your memorialists, declaring that they did not wish to violate any law, and expressing a belief that General Mathews possessed sufficient powers for the occasion, suggested that permission might be granted to proceed from Amelia Island to Philadelphia, as a place of refuge and safety, under bonds to deliver the ships and cargoes into the hands of the collector, subject to the orders of the President.

2. General Mathews, acting upon a knowledge of his powers, and exercising his own judgment, adopted the suggestion; considering the ships and cargoes to be under the protection of the capitulation, by which Amelia Island was ceded to the United States; considering, on motives of public policy, as well as of private justice, that the large amount of property, at Amelia Island, would be an additional attraction to the belligerents, and, probably, lead to hostilities at that place; considering, that, in consequence of the cession, the vessels and cargoes were under the protection of the flag of the United States, in the waters of an integral part of the common country; and considering that, for these reasons, the ships and cargoes could no longer be subject to the penalty of the non-importation law, upon entering a port of the United States, with the sanction of his licence.

3. But, at the moment of issuing the licence, bonds were exacted from your memorialists, with a condition, "to produce, to the collector of the district of Amelia Island, within six months, a certificate that the cargoes had been delivered to the collector of Philadelphia, and to remain in his charge, until the determination of the Government of the United States should be known;" and, with these bonds, the ships and cargoes sailed, and were actually consigned to the collector of the port of Philadelphia, under the licence of a letter, which Governor Mathews addressed to that officer, bearing date the 31st of March, 1812. (D.)

That it is thus manifestly proved, that the ships and cargoes, belonging to your memorialists, as before stated, were sent, for safety, about the 10th of April, 1812, from Amelia Island, into the waters of the United States, under a public licence, to be delivered (*not to their respective owners*, but) to the officers of the Government in the port of Philadelphia; subject (*not to the orders of their respective owners*, but) to the orders of the President. The ships and cargoes, accordingly, arrived in the Delaware, about the 19th of April, in their passage to the port of Philadelphia; but, notwithstanding the peculiar circumstances under which they arrived, with a fair destination to the port of the owners, for delivery to the collector there, by the order of General Mathews, and notwithstanding the certain and continued power of the Government over the property, in the port of Philadelphia, as well as elsewhere, within the territory of the United States, the ships and cargoes were seized, upon an alleged breach of the non-importation law, in the district of Delaware, and carried to the port of Wilmington, for trial and adjudication. And, by these proceedings, your memorialists (without indulging the useless language of complaint) have to lament that they are involved in a forfeiture of the bonds which have been given at Amelia Island; that they are deprived of the benefit of the decision of the Government, upon the question of admitting or excluding the ships and cargoes, for refuge and safety, if not for importation and trade; that they have been compelled to obtain a restitution of their property, upon bonds, with sureties, for their respective interests, amounting to the aggregate sum of \$645,731 22; of which the interest of one of your memorialists, alone, (Stephen Girard) amounts to the sum of three hundred and three thousand four hundred eighty-eight dollars and eighty three cents; that they have been obliged to secure and to pay the duties of tonnage and impost upon their ships and cargoes, (amounting at least to a sum of \$94,338 11) even before the fate of the property is ascertained; and, finally, that they are constrained, at a crisis of such public importance, to obtrude upon the time and attention of Congress a respectful, but earnest, solicitation for relief from the prosecution which threatens them.

And here your memorialists rest, with a confidence, which every consideration of the wisdom, the justice, and the impartiality of Congress is calculated to fortify and confirm. They have seen, with sentiments of unqualified

approbation, a legislative interposition, to save from the ruin of heavy penalties and forfeitures, a class of citizens, who, proceeding upon a sincere, though mistaken anticipation of the effect of the alleged revocation of the British orders in council, in relation to the American non-importation system, voluntarily and unlawfully sent their vessels, and their cargoes, in a direct voyage from England to the United States. They now present a case, in which an importation into the United States was never contemplated, pending the existence of the non-importation law; in which property has been placed within the jurisdiction of the United States by the force of events beyond the influence and control of its owners; in which the authority of the Government was employed (colorably at least) to produce those events; and in which the ships and cargoes of your memorialists, brought into the waters of the United States, under the licence of a public agent, for the purposes of refuge and safety, have been unjustly branded with the offence of an illicit importation for the purposes of trade. Does not the honor of the Government, then, equally with the innocence or the misfortune of your memorialists, seem, in such a case, to demand that the claim of confiscation should be effectually silenced? A court of law may construe the words of the prohibitory act so as to embrace, in its penal dispensations, a contingent and eventual intention, as well as a wilful and direct intention, to import. A judge may regard the defective authority of a public agent as no authority to justify, or excuse, an acquiescence in its exercise. The equitable jurisdiction of the Treasury Department, also, may be deemed inadequate to remit an imputed forfeiture of a nature so complex, and of a magnitude so great. But, in Congress, every power resides to display the honor, the justice, and the liberality of the nation, and to Congress your memorialists definitively appeal.

STEPHEN GIRARD,

Thomson & Morris, Bryan & Schlatter, Edward Wilson,
 Longstreth & Wilson, Rugan & Rhodes, Jonathan Ogden, by his attorney, Edward Thompson.
 William S. Crothers, Jn. Vaughan, administrator of Samuel Merrill.

PHILADELPHIA, 28th May, 1813.

A.

To the Senate and House of Representatives of the United States of America, in Congress assembled, the memorial of Stephen Girard, of the city of Philadelphia, in the State of Pennsylvania, merchant, respectfully sheweth:

That your memorialist, who has been engaged, for many years, in the prosecution of an extensive commerce, feels pride and pleasure in being able to affirm, that the operations of his personal industry, and pecuniary capital, have not, in any instance, been injurious to his country, nor dishonorable to himself. And at the moment of soliciting your attention for the object of the present memorial, he prays you to believe that he aims not, in any degree, to obstruct the policy of the Government, nor to obtain from legislative favor an indulgence which is incompatible with legislative impartiality.

That your memorialist perceives, in the existing system, prohibiting the importation of British merchandise into the United States, a design to coerce the justice of a foreign Power, through the medium of its interest; but it cannot be presumed that a system, calculated to vindicate the national rights, will be allowed to impair the national resources; or that the means employed to redress the wrongs of an American citizen, shall be rendered the means more completely to impoverish and oppress him.

That, before the prohibitory system was adopted and enforced, there had been entrusted, either directly or circuitously, to the care of British merchants, in Europe, a considerable portion of the commercial capital of the United States, which, upon the adoption of that system, it became obviously the interest of the nation at large, as well as of the individual proprietors, to withdraw. And although the immediate policy of our Government prevented an investment in British products or manufactures, the American capitalists were enabled, for a time, by fortuitous circumstances, to make important returns in the public stock of the United States, and in the stock of the late Bank of the United States, as well as by bills of exchange.

That the efficacy of the prohibitory system has been thought, so far, to require a general restraint; but, upon principle, a clear and satisfactory distinction has always existed, and must forever exist, between the case of the merchant, who seeks to purchase with money, or on credit, British produce and manufactures, for the current purposes of trade, and that of the merchant who is forced into a similar investment, for the sole purpose of bringing home his pecuniary funds, which had previously accumulated in the hands of a foreign agent. In the former case, a new source of encouragement may be opened to the British manufacturer; but, in the latter, the incidental consideration of British profit is lost, while we estimate the more important effect which adds the fruits of American enterprise to the active wealth of the country.

That, connected with these views which the prohibitory system alone presents, your memorialist respectfully submits to the wisdom of Congress the considerations that arise from an approaching war. In contemplation of war, every government endeavors to preserve the property of its citizens from the grasp of an enemy; and even few treaties are formed, without guarding against the violent effects of a sudden rupture, by an express stipulation, that, in such event, the citizens of the contracting parties inhabiting the territory of each other, shall enjoy a reasonable opportunity to remove themselves and their goods. The prohibitory system prevented the importation of British merchandise into the United States; but the strong and continued indications of an approaching war admonished every American citizen to remove his property, in any practicable mode, to any lawful place of deposite, out of the sphere of British seizure and confiscation. Hence, when it was no longer practicable, in the ordinary modes of remittance, by bills of exchange, or by purchases of American stock, to transfer pecuniary funds from England to America; when gold and silver were scarcely current, and could not be exported; and when the depreciated state even of bank notes, forbade the voluntary acceptance of any payment for a debt, in the paper medium of the kingdom; the American saw no other prospect, to rescue his fortune from the impending war, than in investment in British merchandise, which, without offending English or American laws, he might transport to an asylum of temporary security, if not of ultimate emolument, in some neutral country.

That, resting his hope of relief upon these general foundations, your memorialist proceeds, with deference and respect, to represent the peculiar circumstances of his own case, in a brief but distinct narrative, which he is ready to verify, with all the formalities of legal evidence. Thus, it has been his course of trade for several years past, to send valuable cargoes, consisting of the produce of the United States, and of the produce and fabric of the East and West Indies, in his own vessels, to the continent of Europe, where, the cargoes being sold, the greater portion of the proceeds of the sales has been invested, from time to time, in Spanish milled dollars, and sent, in the same vessels, to the Isles of France and Bourbon, Java, Madras, Calcutta, and Canton, to procure return cargoes for the port of Philadelphia. The proceeds of sales, which were not thus employed, were remitted to London; but, in the year 1807, when the embarrassments and dangers of neutral commerce had greatly increased, your memorialist deemed it expedient to abandon the scheme of circuitous voyages; his vessels were ordered to return immediately from Europe to America, and his consignees upon the continent were instructed to remit the whole proceeds of his consignments to Messrs. Baring, Brothers, & Co. of London, for his use. In consequence of these arrangements, it will appear, from a schedule annexed to this memorial, A, that, on the 31st of December, 1808, the balance in favor of your memorialist, in the hands of Messrs. Baring, Brothers, & Co. amounted to £33,681 17s. sterling; that, during the year 1809, the sum of £131,003 5s. 9d. sterling, was remitted from the continent to the London house; and the sum of £62,042 16s. 8d., was drawn for by your memorialist, leaving, on the 31st of December, 1809, a balance in his favor, amounting to £102,642 6s. 1d. sterling; that, during the year 1810, the sum of £69,500 1s. 11d. sterling, was remitted from the continent to the London house, and the sum of £45,440 15s. 7d. sterling, was drawn for by your memorialist, leaving, on the 31st of December, 1810, a balance in his favor, amounting to £116,701 12s. 5d. sterling; and that, during the year 1811, the sum of £77,794 1s. 4d. sterling, was remitted from the continent to the London house, finally placing in their hands an aggregate amount of £194,495 13s. 9d. sterling, subject to the orders of your memorialist.

That your memorialist here prays leave to remark, that this accumulation of funds in the hands of the London house did not arise from a course of English trade, nor was it designed for an investment in British merchandise. The fact is, that Messrs. Baring, Brothers, & Co. were constituted the European bankers of your memorialist, and were instructed to make remittances to him in American stock and bank shares. The commencement of the year 1811, however, exhibited a crisis the most alarming. On the one hand, the hope of obtaining satisfactory remittances from England vanished; while, on the other, the prospect of inevitable war seemed to put at hazard the property itself. In this situation, your memorialist determined to close his European transactions, and to collect, at a point nearer to his home, his various pecuniary resources. In the fulfilment of this determination, he employed the proper agents, and the result has been the investment of a part of his funds in American stock, and bank shares; of another part in British merchandise; and still leaving a balance of £40,639 4s. 2d. sterling, in his favor, in the hands of Messrs. Baring, Brothers, & Co.

That your memorialist, with a more particular view to the relief that he seeks, further represents, that the British merchandise thus procured and specified in the statement marked B, having not yet received the original invoices, was shipped on board his vessel called the Good Friends, Robert Thompson, master, which sailed about the 4th of January, 1812, from the port of London, for Amelia Island, Rio Janeiro, and Philadelphia; the last place being mentioned in the clearance, because Captain Thompson had given bond to land certain articles there, viz: three anchors, twenty-five boxes of sheathing copper, and two barrels patent copper sheathing nails, intended for the use of my ships; that the vessel arrived at Amelia Island, about the 9th of February, and that she there lies with her cargo, constituting, together, a property amounting, as per statement, to £66,943 19s. 1d. sterling, exposed to tempests and fire, to felonious depredations, and hostile capture.

And now your memorialist, having shown the origin and progress of the present transaction, by which he has rescued his property from the possession of a contemplated enemy, at the eve of a public war, presumes, most earnestly, though most respectfully, to hope, that he may be permitted, also, to rescue it from the existing danger, by placing it, upon any terms, within the jurisdiction, and under the protection, of the United States. If, notwithstanding the peculiar circumstances of the case, it shall be deemed inexpedient to admit his vessel and cargo to a general entry, he concludes with praying that they may be admitted to take refuge in the possession of the revenue officers of any port of the United States, until a season of greater safety.

PHILADELPHIA, March 9, 1812.

Explanatory Statement A.

These several years past, I have been in the habit to ship, on my account, cargoes consisting of produce of the United States, and other articles of India, West India, &c., to the continent of Europe. Those shipments have been disposed of, at their respective destinations, by the consignees; and, in many instances, the greatest part of their proceeds were invested in Spanish milled dollars, &c., and shipped on board of my ships or vessels for the isles of France and Bourbon, Java, Madras, Calcutta, and Canton, and back to this port. The residue of the nett proceeds of the original cargoes was remitted, from time to time, to my London friends, until July, 1807, when the increasing difficulties compelled me to order my ships back direct from said continent of Europe to this port, and to request my consignees to remit my funds to Messrs. Baring, Brothers, & Co., merchants, of London, subject to my order, as it appears by the following statement, viz:

On the 31st of December, 1808, balance in my favor in the hands of the London house, £33,681 17s. sterling.

During the year 1809, £131,003 5s. 9d. sterling, were remitted from Amsterdam, &c., to the London house, and my bills, &c., on said house, during that year, amounted to £62,042 16s. 8d.

On the 31st December, 1809, balance in my favor, £102,642 6s. 1d.

In the year 1810, remittances from the continent, amounting to £59,500 1s. 11d. sterling, were made on my account, and the amount of my bills, &c., during that year, £45,440 15s. 7d.

Balance in my favor, on 31st December, 1810, £116,701 12s. 5d. sterling.

The remittances made on my account, in the year 1811, by my consignees, on the continent of Europe, to Messrs. Baring, Brothers, & Co., amounted to £77,794 1s. 4d.

The lowness of exchange on England, with the increasing danger and difficulties which our commerce experienced in Europe, together with the apparent gradual depreciation of British sterling bank notes, and the rumors of war between this country and some of the belligerent Powers, rendered me very uneasy, particularly as I had not received those remittances which I had requested my London friends to make me in American stocks and in United States' Bank shares. After meditating on these unfavorable prospects, in July last I decided to liquidate the unsettled business which I had on the continent of Europe, and to draw from there and from England all the funds which I had in those countries. For that purpose, I appointed two confidential agents; one is Mr. Charles N. Bancker, a competent judge of dry goods, whom I furnished with a letter of credit on Messrs. Baring, Brothers, & Co., of London, for £50,000 sterling, to be invested in British manufactures, to be shipped, on my account, on board of my ship Good Friends. The other agent was Mr. Joseph Curwen, a merchant of this city, whom I invested with my general power of attorney to settle all my European business, and to remit me my funds as fast as practicable. That gentleman was also authorized to furnish Mr. Charles N. Bancker with an additional sum of £10,000 sterling, to be also invested in British manufactures, if he should judge advisable.

Mr. Charles N. Bancker went from New York, early in August, 1811, to England, where he attended the business allotted to him. Mr. Joseph Curwen sailed from the river Delaware, on or about the 1st August last, in my ship Good Friends, Robert Thompson, master, for Lisbon; there attended to the sales of that ship's cargo, consisting of flour; went to Cadiz on business of his own; and from there proceeded to London, where he arrived in October last, superintending my interest, and investing funds, on my account, in American 6 per cent. stock, at 12 per cent. above par, and United States' Bank shares at about £94 10s. per share, to the amount of £153,856 9s. 7d. sterling, including £66,943 19s. 1d. sterling amount of British manufactures selected, purchased, and shipped, on my account, by Mr. Charles N. Bancker, &c., on board of the ship Good Friends, Robert Thompson, master.

On or about the 20th November last, Mr. Joseph Curwen went from England over to the continent of Europe, for the purpose of settling my concerns at Hamburg, Riga, and Sweden.

Mr. Charles N. Bancker sailed from Portsmouth, England, passenger on board of the ship Good Friends, on the 4th January last. At his departure from that country, there was still a balance in my favor of £40,639 4s. 2d. sterling in the hands of Messrs. Baring, Brothers, & Co.

The funds which I had, and still have, in England, result altogether out of the proceeds of the shipments on my account, which I have consigned to my agents on the continent of Europe, who, after having sold my goods, have remitted their proceeds to Messrs. Baring, Brothers & Co.

The foregoing statement of the yearly balance due me by Messrs. Baring, Brothers, & Co., of London, ever since the 31st December, 1808, may, at all times, be proved by my books; also, by the accounts current which I have received from that house; their correspondence with me; and by the several accounts of sales, accounts current, and letters received from my agents and consignees, of my shipments to said continent of Europe.

The ship Good Friends, Robert Thompson master, with a cargo of British manufactures, amounting to £66,943 19s. 1d., including three anchors, sheathing copper, copper nails, bunting, and other articles, for the use of my ships, was cleared out in London, for Amelia Island, Rio Janeiro, and Philadelphia. Sailed from England on the 4th January last, and arrived at Amelia Island on the 9th ult. Captain Robert Thompson having been compelled to give a bond for the landing of the copper and anchors in a port of the United States, is, as I am informed, the cause which has induced the collector of the British customs to insert Philadelphia in the clearance of said ship.

My ship Good Friends and cargo, at Amelia Island, being subject to loss by tempest, fire, capture, &c. I am anxious to secure that valuable property in a place of safety, by being permitted to order said ship, with her cargo, round to this port; here to enter said cargo for exportation, and to have the same landed and stored under the care of the custom-house, except the three anchors, the sheathing copper, and copper nails, a small ball of bunting, four night glasses, with several charts, amounting to £1,563 18s. sterling, which, being intended for the use of my ships, part of them are now wanted for a new ship which I am fitting out.

B.

To General George Mathews, Commissioner of the United States.

We, the undersigned, masters and supercargoes of the following American vessels and their cargoes, viz: the ship *United States*, of Philadelphia, James Girdon, master, George Rugan, agent for the owners; the ship *Amazon*, of New York, George R. Turner, master, and agent for consignees and owner; the ship *Good Friends*, of Philadelphia, Robert Thompson, master, and William Adgate, supercargo; being under great apprehension for the safety of the vessels and property under their charge, are induced thus to offer you a statement of their cases.

The ship *United States* arrived at Amelia 25th December, 1811, from Liverpool, with a cargo consisting of crates of earthenware and blankets, the property of Rugan and Rhodes, merchants and citizens of the United States, resident in Philadelphia; the ship *Amazon* arrived at Amelia 22d December, from Liverpool, with a cargo of dry goods belonging to citizens of the United States, residing in Philadelphia, New York, and Baltimore; the ship *Good Friends* arrived at Amelia on the 10th February, from London, with a cargo of dry goods belonging to Mr. Stephen Girard, a citizen of the United States, and resident merchant in Philadelphia.

The undersigned beg leave to state, that, by reason of the non-importation law, they could not enter the waters of the United States. In consequence of which, they came here to wait until they could be legally admitted; having remained here from the dates above-mentioned, with all their cargoes on board, which will appear by the bills of lading, and other documents, until the late occurrences, which have placed our vessels and property under the protection of the United States. That they are fearful that, in the event of hostilities being commenced, and this being the seat of war, the property may not be safe in its present situation. Not wishing to violate any law, and deeming you authorized, we are induced, for the safety of the property in question, to request permission from you to proceed to the port of Philadelphia, under such conditions and restrictions as shall secure the property from the penalties which might arise out of the existing laws of the United States. Agreeably to your request, we lay before you the amount of the cargoes, as far as they can at present be ascertained, which we suppose will amount in all to about five hundred thousand dollars.

JAMES GIRDON,
GEO. RUGAN,
GEO. R. TURNER,
ROBERT THOMPSON,
WM. ADGATE.

C.

FERNANDINA, *March 27th*, 1812.

GENTLEMEN:

I have received your statement, and do not hesitate as to the justice and reason of your request; but wish, for your own interest, as well as for public satisfaction, that the mode may be varied; which may be done without militating against the essential part of your petition.

In your address to me I should prefer, to the present form, your briefly stating the names of the ships, owners, amount of cargo, the port last from, and date they were riding at anchor in these waters, under the protection of the Spanish flag, when, on the 17th instant, the flag was changed by articles of capitulation with the late Patriots of this district, and their flag hoisted; that, in the aforesaid articles, protection is afforded to shipping and merchandise of every description, and that, by the cession of the Patriots of this district, on the 18th, to the United States, through me, as United States' commissioner, I have, in my official capacity, guarantied the observance of the capitulation; that, unless my interference is afforded in the way and manner you point out, you expect the consequences you appear to, and I have no doubt really dread for. I fully concur in opinion with you, that the large amount of property here, would be an additional excitement to the belligerents to visit this place, and am desirous to remove every source which, in its consequences, might lead to hostilities. I shall, however, require that a schedule of the property removed be given, and that you enter into bonds and security to the President of the United States, that your ships and cargoes shall be under the direction and control of the collectors of the ports to which your ships may be destined, until further orders from the Secretary of the Treasury, or the Government of the United States.

I am, gentlemen, your obedient servant,

GEO. MATHEWS.

Messrs. James Giridon, Geo. Rugan, Geo. R. Turner, Robt. Thompson, and Wm. Adgate.

D.

EAST FLORIDA, *March 31st*, 1812.

DEAR SIR:

A revolution has lately been effected in East Florida, and the late province, with the exception of the town and citadel of St. Augustine, ceded to the United States by the constituted local authorities, through me, as United States' commissioner.

Previous to the cession, the ship *Good Friends*, owned by Stephen Girard, merchant, of Philadelphia, of which Robert Thompson is master, from London, was riding at anchor in the Spanish waters of Amelia river, laden as per manifest enclosed will appear, when, on the 16th instant, the Patriots summoned the town of Fernandina to surrender. It capitulated on the 17th instant, and, on the 18th, the Patriots ceded an extensive district, including the town, waters, and islands, to the United States, through me, as United States' commissioner. In that capacity, by virtue of powers vested in me, I took possession, with a detachment of United States' troops, to hold and defend the same for the United States, stipulating, in my acceptance of the cession, to observe inviolate the articles of capitulation of Fernandina, which affords protection to property of every description—a copy of which has been duly transmitted to the Secretary of the Treasury of the United States; and, at the same time, I forwarded, with others, a statement of the leading circumstances that relate to this ship and cargo. Having a full conviction that neither the ship nor cargo will be subject to the penalties of the non-importation and non-intercourse laws, in consequence of her entering a port or ports of the United States, I have, for the following reasons and circumstances, thought proper to grant permission for her to proceed to the port of Philadelphia. I consider her now to be under the protection and flag of the United States, and in the waters of an integral part of our common country.

I have taken bond and security for the amount of forty-six thousand six hundred and twenty dollars, that the vessel and the whole of the cargo shall be delivered in charge to the collector of the port of Philadelphia, until the determination of the Government of the United States be known, as relates to her case, and that the ship and cargo shall be subject to the direction of the collector.

Besides the justice of the measure I have adopted, in ordering her a clearance, I think good policy dictates the propriety of the measure at this crisis: for she, with others under exactly, and some under nearly, similar circumstances, would probably, if they remained here, invite the attack of piratical marauders, and perhaps the belligerents the sooner to make this place the theatre of hostilities.

I am, respectfully, dear sir, your obedient servant,

GEO. MATHEWS.

To JOHN STEELE, *Collector of the port of Philadelphia.*

REMISSION OF PENALTIES AND FORFEITURES.

COMMUNICATED TO THE SENATE, JUNE 23, 1813.

Mr. SMITH, from the Committee to whom was referred the memorial of Stephen Girard and others, made the following report:

That the memorialists, respectively, were owners of the ships *Good Friends*, the *United States*, and the *Amazon*, with their respective cargoes.

That in the Fall of the year 1811, the memorialists being apprehensive that a war would break out between the United States and Great Britain, sent the ships and cargoes to Amelia island as a place of safety, with an intention, eventually, to bring them to the United States, if the non-importation law should be repealed, or the sanction of Government should be obtained, so as to render the importation lawful.

That, while the ships and cargoes lay in the port of Fernandina, General Mathews, acting in the name, and on behalf of the United States, took possession of Amelia island, and established a local government there.

That the agents of the memorialists represented to General Mathews the increased danger to which the ships and cargoes were exposed, in consequence of the revolution at Amelia island, and General Mathews, impressed with the justice of the representation, as well as with an apprehension that the continuance of so much valuable property there would invite hostilities, granted a licence to proceed, with the ships and cargoes, to the port of Philadelphia, under bonds to place them in the custody of the collector of the port, subject to the orders of the Government.

That the ships and cargoes, on the way to Philadelphia, under the authority of the licence, were intercepted and seized, in the district of Delaware, in April, 1812, and libelled on the ground of a violation of the non-importation law.

That, soon after the seizure, the ships and cargoes were restored to their respective owners, upon bonds for the appraised value, to abide the final adjudication of the prosecution which had been instituted. And the cargoes were sold in the months of April and May, 1812.

That the memorialists, upon receiving the cargoes, made the regular entries at the custom house, and secured, by bonds, the payment of the duties which were payable according to law, at the time of the entry.

That, upon examination, it appears that, in some cases, the Secretary of the Treasury, under the act of March, 1797, and Congress, by special acts, have remitted forfeitures, upon condition that the respective owners should pay the rate of duties imposed by the act of the 1st of July, 1812, although the importations were made prior to that day. But it is understood that, in all such cases, the cargoes remained unsold until the act of the 1st of July commenced its operation; and of course the double duties were charged in the price to the purchasers.

Upon this view of the circumstances of the case, the Committee submit the following resolution to the consideration of the Senate:

Resolved, That a committee be appointed to bring in a bill for the relief of Stephen Girard and others, the owners, respectively, of the ships called the Good Friends, the United States, and the Amazon, and their cargoes, upon condition that they respectively pay, to the collector of the port of Philadelphia, for the use of the United States, in addition to the duties by them heretofore respectively secured and paid upon the said cargoes, a sum which shall be sufficient to make the whole amount paid equal to the amount of the duties that would have been chargeable if the cargoes had been imported and entered subsequent to the 1st of July, 1812.

13th CONGRESS.

No. 397.

[1st SESSION.]

LOAN.

COMMUNICATED TO THE SENATE, JULY 21, 1813.

TREASURY DEPARTMENT, July 19th, 1813.

SIR:

I have had the honor to receive your letter of the 17th instant, inquiring what further provision is deemed necessary to be made, during the present session of Congress, for meeting the public engagements and defraying the public expenditures.

In the report made from this Department to Congress, on the 2d of June last, the means already provided for the service of this year was stated to be sufficient, exclusive of any additional expenditures which might be found necessary on account of the War and Navy Departments. New and additional expenditures are contemplated in those Departments, amounting to near a million of dollars, and calls of militia in various parts of the United States, which have already taken place, and which will probably be repeated before the close of the present year, may require a million of dollars more. An additional sum of about two millions may therefore be considered as necessary to secure the public service, during the remainder of the year, from delay and embarrassment.

As the loan for the service of the year 1814 cannot, with convenience, be made sufficiently early in that year to meet the demands which must be sustained by the treasury at its commencement, it is proposed that, in addition to the sum of two millions, abovementioned, for the present year, a loan should now be authorized, sufficient, with the sums receivable from the revenue, to defray the expenditures of the three first months of the year 1814.

The demands upon the treasury for those three months are estimated as follows, viz:

For civil, diplomatic, and miscellaneous expenses,	\$400,000
For public debt, exclusive of treasury notes and interest thereon, falling due in the months of January and February, 1814, which will be provided for out of the surplus of the sinking fund for the year 1813,	1,100,000
For the War and Navy Departments,	6,000,000
	\$7,500,000
The amount receivable from the custom house duties, during that period, may be estimated at	\$1,500,000
From sales of public lands, and from the internal duties which will go into operation on the 1st of January, 1814,	250,000
The balance which will remain in the treasury on 31st of December next, is estimated to amount to about 2,000,000 of dollars. As this amount is somewhat larger than may be necessary to be permanently retained in the treasury, there may be applied from it towards the demands during the first quarter of the year 1814, the sum of	250,000
Making, together,	2,000,000
And will leave to be furnished by the loan,	5,500,000
	\$7,500,000

The whole sum, therefore, for which it is conceived eligible that an authority should now be given to the President to obtain, on loan, before the close of the present year, is seven millions five hundred thousand dollars; of which it is estimated that two millions may be wanted for the service of the present year, and the residue towards the supply for the service of the year 1814.

If this loan shall be authorized, a sufficient sum from its proceeds may probably be brought into the treasury, in the course of the present year, to take the place of two millions of dollars of the treasury notes already authorized to be issued, and taken into the former estimates as a part of the resources of the present year. A special authority to make a loan for this purpose was suggested as proper to be granted by Congress, in the report to that body of the second of June last; and the necessity for it arose from the consideration, that, if five millions of dollars, being the whole amount of those notes authorized to be issued for the service of this year, should be actually issued before its close, there would be, at that time, in circulation, the sum of seven millions of dollars—a sum greater, considering the limited state of our commerce, and the small amount of custom house bonds which will then remain outstanding, and to the payment of which they are applicable, than might perhaps be maintained in circulation, without some difficulty or depreciation. In the months of January and February, 1814, near two millions of dollars of treasury notes, issued under the act of June 30, 1812, will be paid off; and if the issuing of that amount of those notes, authorized by the act of February 25, 1813, for the service of the year 1813, can be postponed till that time, as it may be, if the loan now proposed should be authorized, they will merely take the place of the others, and the amount in circulation not exceed what a steady and effective demand requires.

It is not perceived that any provisions are necessary in the law for authorizing the loan, at the present time, different from those contained in the act of February 8th, 1813, authorizing a loan for a sum not exceeding sixteen millions of dollars.

I have the honor to be, very respectfully, sir, your obedient servant,

W. JONES, *Acting Secretary of the Treasury.*

HON. WILLIAM W. BIBB, *acting Chairman of the Committee of Ways and Means.*

13th CONGRESS.]

No. 398.

[1st Session.

DUTIES ON PRIZE GOODS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JULY 23, 1813.

TREASURY DEPARTMENT, July 21st, 1813.

SIR:

The inquiry which forms the basis of your letter of the 20th, can only be answered by the conflict of opinion between the Secretary of the Treasury, in his letter of the 8th of December last, to the honorable chairman of the Committee of Ways and Means, and the person now acting in that capacity—a task of no ordinary kind, and which I undertake with great deference.

The data for ascertaining the amount of duties on prize goods, captured by private armed vessels since the declaration of war, is as imperfect as was then stated; the amount of duties on prize goods captured by public, as well as private armed vessels, having been blended together.

There is, however, satisfactory ground to infer, that the amount of duties on prize goods, captured by private armed vessels, has rapidly declined, and is certainly, at this time, very inconsiderable.

The causes which have produced this decline may also be a subject of controversy, in which, though I feel that I have the better cause, I apprehend, the weaker argument.

The position assumed by the Secretary is, that “no part of the duties on prize goods ultimately falls on the captors. The duties on importations are paid by the consumers, whether the merchandise be captured by privateers, or regularly imported by merchants.” To this I may answer, that the maxim derives more weight from the felicity of argument and commanding character of the great author of “Wealth of Nations,” than from the universality of the principle.

It is undoubtedly true, in the abstract; but my experience as a merchant has taught me to know the practical value of a maxim, derived from an author of a lighter cast:

“What is the worth of any thing,
“But so much money as ’twill bring?”

If an article, from whatever cause, will not sell for the amount of duties, added to the cost and other charges, whether the importation be made regularly by a merchant, in the usual way, or in the cost of equipping and maintaining a privateer, the difference, or loss, will not fall upon the *consumer*, but upon the *importer*. This is no uncommon case; indeed, instances are frequent, in which imported articles sell for less than the prime cost and charges, exclusive of the duties. Who pays the duty in this case? The consumer? No. It is paid by the unfortunate importer. Were it otherwise, there would be no bankruptcies; your merchants would have but one side to their profit and loss account. “These are the accidental exceptions arising from such a superabundance of a particular article, as will sink it below the prime cost and charges.” And this has actually been the case with many prize importations. Indeed, it is said, and I believe with truth, that, in some of the southern ports, the duties and the charges of sale have absorbed nearly the whole, if not the whole proceeds.

“The price for exportation, in which case no duty is paid,” forms but a very partial exception in this case: for, when you have little or no export of foreign products, the benefit of drawback is lost.

The Secretary has said, that “a reduction of duties will be of no use to the privateers, unless the merchandise continues to be sold at the same price as if the duties had not been reduced.” This is not strictly the fact. It is well known, in the *actual market*, that coffee, for instance, subject to 10 cents per pound duty, and entitled to drawback, seldom sells for more than four cents over the price for consumption, and this must continue until the excess is very great, or the exportation free, which is not likely to be the case during the war. The equality of price approximates as the obstacles to exportation increase; and if exportation was prohibited, or completely obstructed, the equality of price between the same kind of merchandise, entitled to drawback, or sold for consumption, would be absolute.

The lower the price of the article, the greater the consumption. The American People, enjoying the means, indulge their taste for variety, and habituate themselves to every kind of luxury. This produces an accommodation of taste, which changes, with great facility, from the use of coffee to tea, from brandy to rum, &c. &c. as abundance or scarcity and price shall indicate.

The question is not *now*, “simply, whether it be necessary and proper to pay from the treasury, to the privateers, a bounty equal to the amount of the reduction of duties on prize goods,” for there is, literally, now, a very trifling amount of duties collected on prize goods; and, therefore, any encouragement of this nature given by Government to private armed vessels, will, if any prizes arrive, bring money into, instead of extracting it from, the treasury, and, therefore, so far from the payment of a bounty for the purpose of encouraging privateers, the Government will receive an amount of duties on prize goods, which otherwise would not be brought into our ports.

The Secretary observes, that, “if the article be not worth sending into port after capture, it must be altogether impossible for the importing merchant to pay its prime cost, freight, and insurance; and, with those charges, to import such an article without considerable loss.” An article may not be worth sending in; after capture, in consequence of the heavy charges and great risk, perhaps equal to a premium of 50 to 75 per cent. whilst the importing merchant may import the same article in neutral bottoms, at a premium of 10 per cent. and receive his goods at little more than the ordinary charges previous to the declaration of war. He, moreover, has the advantage of selling at such time, and on such terms, as his interest may dictate, and to his regular customers; whereas prize goods are necessarily brought to the hammer, and sold in large parcels, to speculators, uncontrolled by the prudent management of mercantile superintendence, frequently from 20 to 30 per cent. less than those of the regular importer. These causes operate as a bounty in favor of the regular importer, and against the captors. The owner of a privateer receives but a moiety of the captured property; the cost of that moiety to him, is the cost of the equipment, maintenance, insurance, wear and tear, and depreciation of his privateer, (all which is very extravagant) and the insurance, duties, and other heavy charges, on his prize.

The cause of the present inquiry proves the error of the Secretary’s prediction, “that a greater number of privateers will, without bounty, continue to be employed, than is necessary for the greatest possible annoyance of the enemy’s trade.”

The fact is, that, from causes that occupy the present discussion, privateering is nearly at an end, and, from the best observation I have been enabled to make, it is more from the deficiency of remuneration in the nett proceeds of their prizes, than from the vigilance and success of the enemy in recapturing. One-fourth part of the year, at least, the elements will raise the blockade of our ports, and it is at that season that the harvest and the reapers are most abundant and successful in privateering.

There is, sometimes, wisdom in taking counsel from our enemy, and his dread of our privateers may be collected from the marked hostility and severity of treatment which the crews of privateers are subjected to, when captured, and the insidious efforts to excite prejudices against them. The analogy between privateering and lotteries, does not appear to me to be so strict as the Secretary seems to consider it. The adventure of a privateer is of the nature of a commercial project or speculation, conducted by commercial men, upon principles of mercantile calculation and profit. The vessel and her equipment is an object of great expense, which is expected to be remunerated by the probable chances of profit, after calculating the outfit, insurance, &c. as in a regular mercantile voyage, as much so as the voyage of a letter of marque, with a cargo, running all the chances of hostility, and incurring the consequent heavy charges of war.

I do not think that a "reduction of duties, by increasing the profit, would operate as an insurance on the risk of collusive or pretended captures of British prohibited merchandise," to such an extent as to warrant the withholding any proper encouragement to this most potent weapon of annoyance to the enemy, which we possess. Frauds no doubt may be committed; but, in the existing absolute prohibition of all British merchandise, from whatever quarter, there is a much stronger inducement to collusion than can be found in the reduction of one half the duties in favor of prizes; and no doubt frauds are committed; yet these considerations are not deemed of sufficient importance to induce a repeal or relaxation of the system.

The number of accessaries to the fraud; the risk of capture, by the vessels of the enemy, who do not participate in the profits of the collusion; the vigilance of our own cruisers, officers, and prize courts, appear to afford a very reasonable security against the practice, to any very injurious extent. And the humane, generous, and gallant conduct of our citizens, employed in private armed vessels, proves a moral sense which merits more confidence and liberality than has been awarded to them.

I will not undertake to say that the reduction of the duties in favor of prizes captured by private armed vessels is the proper or only encouragement to be provided; *I repeat the fact*, that, as a question of revenue, the nation has every thing to gain, and nothing to lose. One of the most efficient means of distressing the commercial and military marine of the enemy, is the capture and detention of his seamen, as well to enhance the difficulty of manning his ships, as to provide for the exchange, and to retain hostages, to ensure the proper treatment of our own. Whatever encouragement may be devised for the destruction of the ships of the enemy on the ocean, and bringing into port his captured seamen, will inflict the deepest possible wound upon his commerce and marine—the vitals of his resources and power.

I have the honor to be, with the highest respect, sir, your obedient servant,

W. JONES,
Acting Secretary of the Treasury.

The Hon. HUGH NELSON,
Chairman of the Naval Committee of the House of Representatives U. S.

13th CONGRESS.]

No. 399.

[1st SESSION.]

TERMS OF THE LOAN OF SIXTEEN MILLIONS OF DOLLARS.

COMMUNICATED TO THE SENATE, JULY 29, 1813.

To the Senate of the United States:

I transmit to the Senate a report of the Acting Secretary of the Treasury, containing the information requested by their resolution of the 27th instant.

JAMES MADISON.

WASHINGTON, July 28, 1813.

In compliance with the resolution of the Senate, of the 27th instant, the Acting Secretary of the Treasury has the honor to report to the President of the United States—

That, by virtue of the act of February 8th, 1813, entitled "An act authorizing a loan for a sum not exceeding sixteen millions of dollars," and the authority of the President of the United States to the Secretary of the Treasury, of the 17th of the same month, a public subscription to a loan of sixteen millions of dollars was invited, by a notification issued on the 20th of February, 1813, in which the terms of the loan were specified; the most material of which terms were, that the subscribers should receive for each hundred dollars loaned to the United States, a certificate of six per cent. stock for one hundred dollars, and an annuity of one dollar, for thirteen years, from the 1st day of January, 1813. Of this notification, a copy is hereunto annexed, marked A. [See No. 393, page 625, B 1.]

The amount subscribed under this notification was 3,956,400 dollars. A second notification was issued on the 18th of March, by which the books of subscription were notified to be re-opened on the 25th of March, and kept open until the 31st day of that month, on the same terms as the former subscription. Proposals were, at the same time, invited, for loaning to the United States the whole, or any part, of the sum of sixteen millions of dollars, which might remain unsubscribed on the 1st day of April, leaving the persons thus making their proposals, to state, themselves, the terms upon which they were willing to make the loan to the United States. And it was engaged, that, if any proposals, thus made, should be accepted, with terms differing from those of any other proposals that might also be accepted, or differing from the terms on which subscriptions had already been, or might be made, prior to the 1st day of April, all the persons whose proposals might be accepted, and also all those who had subscribed, or might subscribe, prior to the first day of April, should have the option of accepting the terms allowed to any other persons whose proposals might be accepted. A copy of this notification is annexed, marked B. [See No. 393, page 626, B 2.]

The amount subscribed under this notification, from the 25th to the 31st of March, inclusive, was 1,881,800 dollars. Proposals were sent in between the 1st and the 5th of April for loaning to the Government 11,106,000 dollars, being 944,200 dollars more than could be received; and the further sum of 1,000,000 dollars was intended to be loaned by the State of Pennsylvania, but the offer was not made in time to be accepted. The sums offered were subsequently reduced to 10,161,800 dollars, being the sum which, with the amount of the first and second subscriptions, made up the sixteen millions of dollars authorized to be borrowed.

The terms proposed by the persons who offered to loan the above sum, were of two descriptions:

1st. That the lenders were to receive a six per cent. stock, the interest payable quarter yearly, redeemable at the pleasure of the United States, at any time after the end of the year 1825, at the rate of *eighty-eight* per cent. or 100 dollars in stock for eighty-eight in money.

2d. That the lenders, for every hundred dollars in money, were to receive one hundred dollars in the same species of six per cent. stock, and an annuity for thirteen years, from the first day of January, 1813, of one dollar and fifty cents, payable quarter yearly.

Two of the proposals also contained a condition, that, if any other loan for the service of the year 1813, should be made under any law passed for that purpose, before the end of the year 1813, upon terms different from those allowed to the persons then making proposals, the option of taking those new terms should be extended to them. Copies of the letters containing these proposals are hereto annexed, marked C and D; and also, a copy of the answer of the Secretary of the Treasury, by which those proposals were accepted, marked E. The other proposals contained no condition of this nature. They were accepted by letters of the Secretary of the Treasury of the same purport as that above referred to, marked E.

As the notification of the 18th of March contained an engagement that every contributor to the loan, whether under the first or second subscription, or under the proposals, should have the option of any of the terms allowed to

any other contributor, a public notification was issued on the 15th of April, in which the terms allowed to the persons who had made proposals were stated, and the option as to the two kinds of stock, was offered to all. A copy of this notification is subjoined, marked F. [See No. 393, page 626, B 3.]

No other contract in relation to any part of the loan of sixteen millions was entered into, than what resulted from the engagements contained in the public notifications above referred to, and the acceptance by the Secretary of the Treasury of the proposals made under those notifications.

All which is respectfully submitted.

TREASURY DEPARTMENT, July 28, 1813.

W. JONES, *Acting Secretary of the Treasury.*

C.

PHILADELPHIA, 5th April, 1813.

SIR:

In consequence of the notice given by the Treasury Department, under date of the 18th of March, 1813, that proposals will be received by you for the whole, or part of the residue of the loan of sixteen millions of dollars, we herewith beg leave to offer to take as much stock of the United States, bearing interest at six per cent. per annum, payable quarter yearly, the stock not to be redeemable before the 31st December, 1825, at the rate of eighty-eight dollars for a certificate of one hundred dollars, as aforesaid, as will amount to the sum of eight millions of dollars, or to the residue of the said loan, provided you will agree to allow us the option of accepting the same terms that may be granted to persons lending money to the United States by virtue of any law authorizing another loan for the service of the year 1813, that Congress may pass before the last day of the present year.

It must be further understood and agreed to, that one quarter per cent. will be allowed us on the amount to which the present proposal will be accepted.

With regard to the payment of the instalments on the amount to be loaned by us, we shall expect to enter with you into such arrangements as will be mutually accommodating.

We are, with high regard, sir, your most obedient servants.

DAVID PARISH,
STEPHEN GIRARD.

The Hon. ALBERT GALLATIN, Esq. *Secretary of the Treasury.*

To be paid at Stephen Girard's bank.

STEPHEN GIRARD,
For self and David Parish.

D.

PHILADELPHIA, 5th April, 1813.

SIR:

I will take for myself, and my friends in New York, two millions and fifty-six thousand dollars' worth of the loan authorized by Congress in February last, receiving six per cent. stock at the rate of eighty-eight dollars, money, for one hundred dollars of six per cent. stock, payable in New York, by instalments, as proposed by you, or as may be otherwise agreed on. I understand that, in case Government should make another loan during the year, I am to be placed on as good footing as the lenders of money, or contractors, for that loan, will be. I also understand that I am to receive the quarter per cent. which is to be paid to persons procuring subscriptions to the present loan.

I am, very respectfully, sir, your obedient humble servant,

JOHN JACOB ASTOR.

The Hon. ALBERT GALLATIN, *Secretary of the Treasury.*

E.

TREASURY DEPARTMENT, April 7th, 1813.

GENTLEMEN:

Your proposal for lending seven millions and fifty-five thousand eight hundred dollars to the United States, in part of the sixteen millions loan, is accepted. You will be pleased to deliver, before the 15th day of this month, to the cashier of Stephen Girard's bank, or such other, where, according to your proposals, the payments are intended to be made, the names of the persons embraced by your proposal, together with the sum respectively payable by each. Each will be entitled to receive in payment, at his option, either six per cent. stock, at the rate of eighty-eight per cent., or six per cent. stock at par, and a thirteen years' annuity of one and a half per cent. of the money loaned; which option must be made at the time of paying the first instalment. The payments shall be made in eight equal instalments, on the fifteenth day of April, May, June, July, August, September, October, and November. But every person, at the time of paying any of the instalments, may pay all, or any number of the subsequent instalments. Certificates of funded stock will, on the application of any subscriber for more than one hundred thousand dollars, be issued, on payment of any one instalment, for the amount of the next preceding instalment. In every other respect, the terms of the public notice of the 20th of February last will be considered as part of this agreement.

I have, &c.

ALBERT GALLATIN.

DAVID PARISH and STEPHEN GIRARD.

The same answer, changing only the sum, and the bank where payable, was made to John J. Astor.

13th CONGRESS.]

No. 400.

[2d SESSION.]

DUTIES ON IMPORTS AND TONNAGE.

COMMUNICATED TO THE SENATE, DECEMBER 20, 1813.

To the Senate of the United States:

I transmit to the Senate a report of the Acting Secretary of the Treasury, complying with their resolution of the 13th instant.

JAMES MADISON.

December 20th, 1813.

TREASURY DEPARTMENT, December 16, 1813.

SIR:

In compliance with the resolution of the Senate, of the 13th instant, I have the honor to state, that the amount of duties accruing on goods, wares, and merchandise, imported into the United States, from the 1st day of July, 1812, to the 31st day of December, of the same year, for which period the accounts of the collectors of the customs are settled, was

And the amount of tonnage, including light money, accruing during the same period, was	-	\$9,869,199 31
	-	92,297 70
		<u>\$9,961,497 01</u>

The accounts of the collectors, from the 1st day of January, 1813, to the 30th day of September, of the same year, have been but partially settled; and some for the quarter ending 30th of September, have not yet been received at the treasury. For this period, therefore, an estimate only can be given, taken from the accounts of the collectors as rendered to the treasury, and in some cases, from their less formal returns. This estimate is as follows:

Duties on goods, wares, and merchandise, imported—		
For the 1st quarter of the year 1813,	-	\$2,280,000 00
2d do. do.	-	2,356,000 00
3d do. do.	-	1,380,000 00
		<u>\$6,016,000 00</u>
Tonnage duties, including light-money—		
For the 1st quarter of the year 1813,	-	\$89,000 00
2d do. do.	-	84,000 00
3d do. do.	-	67,000 00
		<u>\$240,000 00</u>

The sums above stated for duties on merchandise imported, are without deduction for drawbacks paid on merchandise re-exported. These drawbacks, paid from the 1st of July, to the 31st December, 1812, amounted, by the accounts as settled, to \$639,555 44.

And they are estimated to have amounted, during the three first quarters of the year 1813, to the following sums, viz:

During the 1st quarter of the year 1813, to	-	\$536,000 00
2d do. do.	-	229,000 00
3d do. do.	-	148,000 00
		<u>\$913,000 00</u>

I have the honor to be, with the highest respect, sir, your most obedient servant,

W. JONES, *Acting Secretary of the Treasury.*

The PRESIDENT of the United States.

13th CONGRESS.]

No. 401.

[2d SESSION.]

ASSAYS OF FOREIGN COINS.

COMMUNICATED TO THE SENATE, ON THE 4TH OF JANUARY, 1814.

TREASURY DEPARTMENT, December 31, 1813.

SIR:

I have the honor to transmit, herewith, a letter from the Director of the Mint, containing the result of the assays of foreign gold and silver coins, made in pursuance of the act of the 10th of April, 1806, entitled "An act regulating the currency of foreign coins in the United States."

I have the honor to be, with great respect, sir, your obedient servant,

W. JONES,
Acting Secretary of the Treasury.

The Honorable the PRESIDENT of the Senate.

MINT OF THE UNITED STATES, December 22, 1813.

SIR:

I have the honor to acknowledge the receipt of your letter of the 11th instant, and, agreeably to your desire, have caused assays to be made of the several species of foreign gold and silver coins, made current by an act of Congress of the 10th of April, 1806; the result of which, according to the assayer's report, is as follows:

Gold coins of Great Britain.

						C. grs.	
No. 1,	made of 3	pieces of various dates, prior to the year 1806,	-	-	-	-	22 0
2,	" 4	do. of dates from 1806 to 1810, inclusive, except the year 1807,	-	-	-	-	22 0

Gold coins of France.

No. 1,	made of 4	pieces of various dates prior to the year 1806,	-	-	-	-	21 2 ⁵ / ₈
2,	" 5	" of dates from 1806 to 1810, inclusive,	-	-	-	-	21 2 ⁵ / ₈
3,	" 5	" dated 1811,	-	-	-	-	21 2 ³ / ₈
4,	" 5	" " 1812,	-	-	-	-	21 2 ³ / ₈

Gold coins of Spain.

No. 1,	made of 4	pieces of various dates prior to the year 1806,	-	-	-	-	20 3
2,	" 5	" of dates from 1806 to 1810, inclusive,	-	-	-	-	20 3
3,	" 3	" dated 1811,	-	-	-	-	20 3 ¹ / ₈
4,	" 1	" " 1813,	-	-	-	-	20 3 ¹ / ₄

Gold coins of Portugal.

No. 1,	made of 2	pieces of various dates prior to the year 1806,	-	-	-	-	22 0
2,	" 5	" of dates from 1806 to 1810, inclusive,	-	-	-	-	22 0
3,	" 5	" dated 1811,	-	-	-	-	22 0
4,	" 5	" " 1812,	-	-	-	-	22 0
5,	" 2	" " 1813,	-	-	-	-	22 0

Silver coins of France.

No. 1,	made of 5	crowns of various dates,	-	-	-	-	oz. dwt. grs. 10 18 12
--------	-----------	--------------------------	---	---	---	---	---------------------------

Silver coins of Spain.

No. 1,	made of 5	pieces of various dates, prior to the year 1806,	-	-	-	-	10 16 00
2,	" 5	" of dates from the year 1806 to 1810, inclusive,	-	-	-	-	10 15 12
3,	" 5	" dated 1811,	-	-	-	-	10 15 12

ASSAYER'S OFFICE, 20th of 12th Month, 1813.

From the above report, it will appear:

- 1st. That the gold coins of Great Britain and of Portugal are all uniformly of the same quality, and exactly equal to that of the gold coins of the United States; and therefore their intrinsic value is at the rate of 100 cents for 27 grains, or $88\frac{2}{3}$ cents per pennyweight.
- 2d. That the gold coins of France, especially those issued since the year 1806, inclusive, are also of a uniform quality; their intrinsic value being at the rate of 100 cents for $27\frac{351}{800}$ grains, or $87\frac{25}{100}$ cents per dwt.
- 3d. That the gold coins of Spain are somewhat variable in their quality, their average intrinsic value being at the rate of 100 cents for $28\frac{738}{1331}$ grains, or $84\frac{3}{100}$ cents per dwt.
- 4th. That the intrinsic value of the French crown, supposing its weight 18 dwt. 17 grs., is 110 cents and $\frac{7527}{884980}$ parts of a cent.
- 5th. That the intrinsic value of the Spanish dollar, exclusive of those issued prior to the year 1806, supposing it of the full weight of 17 dwt. 7 grs. is 100 cents and $\frac{25935}{30438}$ parts of a cent.

I have the honor to be, sir, with great respect and esteem,

Your most obedient servant,

R. PATTERSON.

The Honorable WILLIAM JONES, *Acting Secretary of the Treasury.*

13th CONGRESS.]

No. 402.

[2d SESSION.]

MINT.

COMMUNICATED TO THE SENATE, JANUARY 7, 1814.

To the Senate and House of Representatives of the United States:

I communicate, for the information of Congress, the report of the Director of the Mint, of the operation of that establishment during the last year.

JAMES MADISON.

January 6th, 1814.

MINT OF THE UNITED STATES, January 1, 1814.

SIR:

I have now the honor of laying before you a report of the operations of the mint, for the last twelve months.

From the treasurer's statement of the coinage, herewith transmitted, it will appear that, during that period, there have been struck and issued—

In gold coins,	95,428 pieces, amounting to	-	-	-	-	\$477,140 00
In silver coins,	1,241,903 pieces, amounting to	-	-	-	-	620,951 50
In copper coins,	418,000 pieces, amounting to	-	-	-	-	4,180 00

Making, in the whole, one million seven hundred and fifty-five thousand three hundred and thirty-one pieces of coin, amounting to one million one hundred and two thousand two hundred and seventy-one dollars and fifty cents.

I have the honor to be, sir, with sentiments of the most perfect respect and esteem,

Your obedient, faithful servant,

R. PATTERSON.

JAMES MADISON, *President of the United States.*

A Statement of the Coins struck at the Mint of the United States, from the 1st of January to the 31st December, 1813, inclusive, viz:

[2d SESSION.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, ON THE 10TH OF JANUARY, 1814.

In obedience to the directions of the Act supplementary to the act, entitled "An act to establish the Treasury Department," the Acting Secretary of the Treasury respectfully submits the following report and estimates:

The moneys actually received into the treasury, during the year ending on the 30th September, 1813, have amounted to \$37,544,954 93

Viz: Proceeds of the customs, sales of lands, small branches of revenue, and repayments,	\$13,568,042 43	
Proceeds of loans, viz:		
Loan of eleven millions, under the act of March 14th, 1812,	\$4,337,487 50	
Loan of sixteen millions, under the act of February 8, 1813,	14,488,125 00	
Treasury notes, under the acts of June 30, 1812, and February 25, 1813,	5,151,300 00	
	<u>23,976,912 50</u>	
As will appear by the annexed statement E,	\$37,544,954 93	
Making, together with the balance in the treasury on the 1st of October, 1812, which was		2,362,652 69
An aggregate of		<u>\$39,907,607 62</u>

The payments from the treasury, during the same period, have amounted to		\$32,928,855 19
Viz: For civil, diplomatic, and miscellaneous expenses, both foreign and domestic,	\$1,705,916 35	
Military department, including militia and volunteers, and the Indian department,	18,484,750 49	
Navy, including the building of new ships, and the marine corps,	6,420,707 29	
Public debt:		
On account of interest,	\$3,120,379 08	
Principal reimbursed,	3,197,102 07	
	<u>6,317,481 15</u>	
As will also appear by the annexed statement E,		<u>32,928,855 19</u>
And left in the treasury, on the 30th of September last,		6,978,752 43
		<u>\$39,907,607 62</u>

The accounts for the fourth quarter of the year 1813, have not yet been made up at the treasury, but the receipts and expenditures, during that quarter, have been nearly as follows:

Receipts from the customs, sales of lands, and small branches of the revenue, about	\$3,300,000 00
Loan of sixteen millions,	1,500,000 00
Loan of seven and a half millions,	3,850,000 00
Treasury notes,	3,680,000 00
	<u>\$12,330,000 00</u>

Making, with the balance in the treasury on the 1st of October, 1813, of	6,978,752 43
An aggregate of about	<u>\$19,309,000 00</u>

The disbursements have been, for civil, diplomatic, and miscellaneous expenses, about	\$400,000 00
Military department,	5,887,747 00
Naval do.	1,248,145 10
Public debt, (of which near \$6,000,000 was on account of the reimbursement of principal)	7,087,994 95
And leaving in the treasury, on the 31st December, 1813, about	4,685,112 95
	<u>\$19,309,000 00</u>

Of the sums obtained on loan, during the year 1813, and included in the receipts above stated, an account of the terms on which they were made, has been laid before Congress, excepting as to the treasury notes issued under the act of February 25, 1813, and the loan of seven and a half millions, obtained under the authority contained in the act of the 2d of August, 1813. The annexed statement, marked F, will show the whole amount received for treasury notes, during the year 1813, and at what places they were sold or disposed of. Three millions eight hundred and sixty-five thousand one hundred dollars, of the notes issued under the act of June 30th, 1812, became due in the course of the year 1813, or in the present month of January, and have been paid off, or the funds placed in the hands of the commissioners of loans, for that purpose.

The papers under the letter G will show the measures taken, under the act of August 2d, 1813, authorizing a loan of seven millions five hundred thousand dollars, and the manner in which that loan was obtained. The terms were eighty-eight dollars and twenty-five cents in money for one hundred dollars in stock, bearing an interest of six per cent., which is equivalent to a premium of thirteen dollars thirty-one cents and four-ninths of a cent on each hundred dollars, in money, loaned to the United States. Of this sum of 7,500,000 dollars, about 3,850,000 dollars were paid into the treasury during the year 1813, and the remainder is payable in the months of January and February, 1814.

For the year 1814, the expenditures, as now authorized by law, are estimated as follows:

1. Civil, diplomatic, and miscellaneous expenses,	\$1,700,000
2. Public debt, viz:	
Interest on the debt existing previous to the war,	\$2,100,000
Interest on debt contracted since the war, including treasury notes, and loan for the year 1814,	2,950,000
	<u>5,050,000</u>
Reimbursement of principal, including the old six and deferred stocks, temporary loans, and treasury notes,	7,150,000
	<u>12,200,000</u>

3. Military establishment, estimated by the Secretary of War, for a full complement (including rangers, sea fencibles, and troops of all descriptions) of 63,422 officers and men, and including ordnance, fortifications, and the Indian department, and the permanent appropriations for Indian treaties, and for arming and equipping the militia,	24,550,000
4. Navy, estimated for 15,787 officers, seamen, and boys, and for 1,869 marines, and including the service of two 74 ships for four months, and three additional frigates for six months of the year 1814, and the expenses of flotillas on the coast and on the lakes,	6,900,000
Amounting, altogether, to	<u>\$45,350,000</u>

The ways and means already provided by law, are as follows:

1. Customs, and sales of public lands. The nett revenue accruing from the customs, during the year 1812, amounted, as will appear by the annexed statements A and B, to 13,142,000 dollars. Of this sum, about 4,300,000 dollars was produced by the additional duties imposed by the act of July 1, 1812. The duties which have accrued during the year 1813, are estimated at 7,000,000 dollars. The custom house bonds outstanding on the 1st January, 1814, after making a due allowance for insolvencies and bad debts, are estimated at 5,500,000 dollars; and it is believed that 6,000,000 dollars may be estimated for the receipt of the customs during the year 1814. The sales of public lands, during the year ending September 30, 1813, have amounted to 256,345 acres, and the payments by purchasers to 706,000 dollars, as will appear by the annexed statement C. It is estimated that 600,000 dollars will be received into the treasury from this source, during the year 1814. The sum, therefore, estimated as receivable from customs and lands, is	\$6,600,000
2. Internal revenues and direct tax. From the credits allowed by law on some of the internal duties, and from the delays incident to the assessment and collection of the direct tax, it is not believed that more ought to be expected to come into the treasury, during the year 1814, than the sum of	3,500,000
3. Balance of the loan of seven and a half millions, already contracted for,	3,650,000
4. Balance of treasury notes, already authorized,	1,070,000
5. Of the balance of cash in the treasury, on the 31st December, 1813, amounting, as above stated, to about	\$4,680,000
There will be required, to satisfy appropriations made prior to that day, and then undrawn, at least	3,500,000
And leaving, applicable to the service of the year 1814,	<u>1,180,000</u>
	16,000,000
So that there remains to be provided, by loans, the sum of	<u>29,350,000</u>
	<u>\$45,350,000</u>

Although the interest paid upon treasury notes is considerably less than that paid for the moneys obtained by the United States on funded stock, yet the certainty of their reimbursement at the end of one year, and the facilities they afford for remittances, and other commercial operations, have obtained for them a currency which leaves little reason to doubt that they may be extended considerably beyond the sum of five millions of dollars, hitherto authorized to be annually issued. It will perhaps be eligible to leave to the Executive, as was done last year, a discretion as to the amount to be borrowed upon stock; or upon treasury notes, that one or the other may be resorted to, within prescribed limits, as shall be found most advantageous to the United States.

The amount estimated to have been reimbursed, of the principal of the public debt, during the year ending on the 30th September last, including treasury notes and temporary loans, will appear, by the estimate marked D, to have been 3,201,368 dollars. As the payments on account of the loan of sixteen millions, had not then been completed, and the stock had, consequently, not been issued therefor, it is not practicable to state, with precision, the amount added to the public debt, during that year; but, after deducting the above mentioned reimbursement of 3,200,000 dollars, this addition will not fall short of 22,500,000 dollars.

The plan of finance proposed at the commencement of the war, was to make the revenue, during each year of its continuance, equal to the expenses of the peace establishment, and of the interest on the old debt then existing, and on the loans which the war might render necessary, and to defray the extraordinary expenses of the war out of the proceeds of loans to be obtained for that purpose.

The expenses of the peace establishment, as it existed previous to the armaments of 1812, made in contemplation of war, but including the eight regiments added to the military establishment in the year 1808, and the augmentation of the navy in actual service, authorized in 1809, amounted, after deducting some casual expenses of militia, and other incidental items, to about

The interest on the public debt, payable during the year 1814, will be:	
On the old debt, or that existing prior to the present war,	\$2,100,000
On the debt contracted since the commencement of the war, including treasury notes, and allowing 560,000 dollars for interest on the loan which must be made during the year 1814, a sum as small as can be estimated for this object,	2,950,000
	<u>5,050,000</u>
Making	<u>\$12,050,000</u>

The actual receipts into the treasury from the revenue, as now established, including the internal revenues and direct tax, are not estimated, for the year 1814, at more than	\$10,100,000
Viz: from customs and public lands,	\$6,600,000
Internal revenues and direct tax,	3,500,000
	<u>\$10,100,000</u>

If to this sum be added that part of the balance in the treasury on the 31st December, 1813, which has been estimated above, to be applicable to the expenses of the year 1814, and which, upon the principle above stated, may be considered as a surplus of revenue beyond the expenses of the peace establishment, and of the interest on the public debt for the year 1813, and therefore applicable to the same expenses for the year 1814, which sum is estimated at

And making, together,	11,280,000
There will still remain to be provided, new revenues, capable of producing	770,000
	<u>\$12,050,000</u>

But, as the internal revenues and direct tax, when in full operation, will produce, in the year 1815, probably 1,200,000 dollars more than is estimated to be received from them in the year 1814, it will rest with Congress to decide, whether it is necessary that new and additional revenues should now be established.

To what extent the existing embargo may reduce the receipts into the treasury from the customs, during the year 1815, it is difficult to estimate, as the operation of the war had reduced the receipts from the customs nearly one half from that which was received during the year preceding the war.

The former embargo reduced the revenue from the customs nearly one-half the amount of that which was received during the year preceding its full operation. In this case, however, the transition was from the full receipt of a peace revenue to the entire suspension of exportation and of foreign commerce in American bottoms. It is not, therefore, to be presumed, that the existing embargo will cause a reduction of the war revenue in the proportion of the peace revenue: moreover, the effect of the act prohibiting the importation of certain articles, necessarily increases the demand, and enhances the value of those which may be lawfully imported; and the high price they bear will produce extraordinary importations, and, in part, compensate for the prohibition to export any thing in return; to this may be added the duty on salt, the operation of which is yet but partial.

To the amount of the defalcation of the revenue, caused by the embargo, whatever it may be, must be added the difference between the amount of the interest payable in the year 1814, on the loan of that year, and the whole amount of the interest on the said loan, payable in the year 1815, as well as that part of the interest which may be payable in the year 1815, on the loan of that year. The sum of these items will be required for the year 1815, in addition to the revenues now established, except 430,000 dollars, being the difference between the estimated increase in the receipt of the internal revenues and direct taxes, and the 770,000 dollars remaining to be provided for in the foregoing estimate.

With these considerations, it is submitted whether it may not be expedient and prudent to provide new revenues, capable of producing either the whole, or such part of the 770,000 dollars, unprovided for, as may appear necessary to fulfil the public engagements, and secure to the financial operations of the Government the confidence, stability, and success, which is due to its fidelity, and to the ample resources of the country.

All which is respectfully submitted.

W. JONES,
Acting Secretary of the Treasury.

TREASURY DEPARTMENT, *January 8th, 1814.*

A.

A Statement exhibiting the amount of duties which accrued on Merchandise, Tonnage, Passports, and Clearances, of Debentures issued on the exportation of Foreign Merchandise, of payments for Bounties and Allowances, and for expenses of Collection, during the years 1811, and 1812.

Years.	Duties on			Debentures issued.	Bounties & Allowances.	Gross Revenue	Expenses on Collection.	Nett Revenue.

	<u>\$3,930,000 00</u>

G.

LOAN OF SEVEN MILLIONS FIVE HUNDRED THOUSAND DOLLARS.

The annexed notification, marked *Ga*, was issued on the 30th of August, 1813; and, in pursuance thereof, proposals were received on the 25th of September, for loaning money to the United States, on a six per cent., to be received by the lenders at various rates, amounting in the whole to 12,791,500 dollars. A copy of one of these proposals is annexed, marked *Gb*, the others were substantially of the same form. After rejecting those least favorable to the United States, and apportioning, by an equal rule, among those that were accepted, the sum that was to be received on loan, the following proposals, for the sums annexed to each, were accepted, by a letter addressed to each of the persons making the proposals, in substance the same as that annexed, marked *Gc*, viz:

Jonathan Smith, of Philadelphia,	\$2,152,000
Jacob Barker, of New York,	1,435,000
Ralph Higinbotham, of Baltimore,	1,435,000
Quintin Campbell, of Philadelphia,	468,000
Fitz G. Halleck, of New York,	288,000
Thos. W. Bacot, of Charleston, S. C.	221,000
William Cochran, of Boston,	151,000
George T. Dunbar, of Baltimore,	147,000
G. B. Vroom, of New York,	144,000
Henry Kuhl, of Philadelphia,	144,000
Isaac McKim, of Baltimore,	144,000
Whitehead Fish, of New York,	118,000
John Duer, of Baltimore,	118,000
William G. Cochran, of Baltimore,	110,000
Jacob G. Koch, of Philadelphia,	108,000
William Whann, of Washington,	73,000
James Cox, of Baltimore,	72,000
Thomas Cumming, of Augusta, Geo.	72,000
The Navy Pension Fund,	100,000
	<u>\$7,500,000</u>

And the aforesaid sum of \$7,500,000, was made payable at the following places, viz:

At Wiscasset, Maine,	\$75,000
New York,	2,025,000
New Brunswick, N. J.	36,000
Philadelphia,	2,384,000
Baltimore,	2,514,000
Washington,	73,000
Washington, Navy Pension Fund,	100,000
Charleston, S. C.	221,000
Augusta, Georgia,	72,000
	<u>\$7,500,000</u>

Ga.

NOTICE.

TREASURY DEPARTMENT, *August 30th*, 1813.

Whereas, by an act of Congress, passed on the 2d day of August, 1813, the President of the United States is authorized to borrow, on the credit of the United States, a sum not exceeding seven millions five hundred thousand dollars: And whereas the President of the United States did, by an act or commission under his hand, dated the 7th day of August, 1813, authorize and empower the acting Secretary of the Treasury to borrow, on behalf of the United States, the aforesaid sum of seven millions five hundred thousand dollars, pursuant to the act of Congress above recited:

PUBLIC NOTICE IS THEREFORE HEREBY GIVEN,

That proposals will be received by the Acting Secretary of the Treasury, until the twenty-fifth day of September next, from any person or persons, body or bodies corporate, who may offer, for themselves or others, to loan to the United States the whole or any part, not less than one hundred thousand dollars, of the aforesaid sum of seven millions five hundred thousand dollars.

The stock to be issued, for the money loaned, will bear an interest of six per cent. per annum, payable quarter yearly; and the proposals must distinctly state the amount of money offered to be loaned, and the rate at which the aforesaid stock will be received for the same.

The amount loaned is to be paid into a bank or banks authorized by the Treasury, in instalments, in the following manner, viz:

One-eighth part, or twelve dollars and fifty cents on each hundred dollars, on the 15th day of October next.

One-eighth part on the 15th day of November next.

One-fourth part, or twenty-five dollars on each hundred dollars, on the 15th day of each of the ensuing months of December, January, and February next.

The proposals must specify the place where the money is to be paid.

If proposals differing in terms from one another should be accepted, the option will be allowed to any persons whose proposals may be accepted, of taking the terms allowed to any other person whose proposals may be accepted.

No proposals will be received for a sum less than one hundred thousand dollars; but a commission of one-eighth of one per cent. will be allowed to any person collecting subscriptions for the purpose of incorporating them in one proposal, to the amount of one hundred thousand dollars or upwards, provided that such proposal shall be accepted.

A commission of one-eighth of one per cent. will also be allowed to the cashiers of the banks where the payments shall be made; who will issue scrip certificates to the persons making the payments, and will endorse thereon the payments of the several instalments when made.

On failure of payment of any instalment, the next preceding instalment to be forfeited.

The scrip certificates will be assignable by endorsement and delivery, and will be funded after the completion of the payments, upon presentation by the proprietor to the commissioner of loans for the State where the payments have been made.

The funded stock, to be thus issued, will be irredeemable till the 31st day of December, 1825; will be transferable in the same manner as the other funded stock of the United States; and will be charged for the regular and quarterly payment of its interest, and for the eventual reimbursement of its principal, upon the annual fund of eight millions of dollars, appropriated for the payment of the principal and interest of the debt of the United States, in the manner pointed out in the aforesaid act of the 2d of August, 1813.

W. JONES, *Acting Secretary of the Treasury.*

Gb.

CITY OF WASHINGTON, *September 25*, 1813.

SIR:

Having, agreeably to the terms of your public notice of the 30th of August last, collected subscriptions for the purpose of incorporating them in one proposal, I hereby propose to take, of the loan of seven millions five hundred thousand dollars, the sum of three millions of dollars, payable at the Bank of Pennsylvania, on the following terms, viz: for every hundred dollars, in six per cent. stock, I will give eighty-eight dollars and twenty-five cents in money, or, for the privilege of paying the balance at any subsequent instalment after the first, I will give, for every hundred dollars of the aforesaid stock, eighty-eight dollars and fifty cents in money.

I have the honor to be, with great respect, sir, your obedient servant,

JONA. SMITH.

The Hon. the *Secretary of the Treasury.*

Gc.

TREASURY DEPARTMENT, *September 25*, 1813.

SIR:

More than twelve millions and a half of dollars were this day offered for the loan of seven and a half millions. The rate at which the loan is taken, is eighty-eight dollars and twenty-five cents in money, for each hundred dollars in stock. Your proposal for three millions of dollars of the loan, having been at this rate, has been accepted; but, in consequence of the large surplus offered, it has been necessary to reduce the amount allowed to you to two millions one hundred and fifty-two thousand dollars. Upon completing the payment of this sum, in the proportions and at the periods stated in the public notification relating to this loan, of the 30th of August last, you will be entitled to receive stock at the rate above mentioned.

If you shall desire, or any of the persons in whose behalf your proposal was made, to obtain the certificates of funded stock before the 15th of February next, the day on which the last instalment of the loan will be payable, it may be effected by paying, on any day fixed for the payment of an instalment, after the first, all the subsequent instalments; but interest will, in such case, be allowed only as if each instalment had been paid on the day fixed in the public notification of the 30th of August. You will be pleased, on receipt of this letter, to state to me the bank or banks in which the money will be paid; and, if more than one, the precise sum payable at each; and on or before the 15th of October, will furnish the cashier or cashiers of such bank or banks, with the names of the persons in whose behalf your proposal has been made, and the sums payable by each.

The commission of one-eighth per cent. will be paid from the treasury, after the payment of the first instalment on the 15th of October next.

I am, respectfully, sir, your obedient servant,

W. JONES, *Acting Secretary of the Treasury.*JONATHAN SMITH, Esq. *Philadelphia.*

No. 404.

[2d SESSION.]

NATIONAL BANK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 10, 1814.

Mr. EPPES, from the Committee of Ways and Means, to whom was referred the memorial of sundry inhabitants of the State of New York, praying for the establishment of a national bank, made the following report:

That the power to create corporations within the territorial limits of the States, without the consent of the States, is neither one of the powers delegated by the constitution of the United States, or essentially necessary for carrying into effect any delegated power.

To the Senate and House of Representatives of the United States of America in Congress assembled, the petition of the subscribers, in behalf of themselves and their associates, respectfully sheweth:

That they are desirous of establishing a national bank, and of being incorporated, for the purpose of carrying on the business of banking, with a capital of thirty millions of dollars, at such places as the president and directors of the corporation shall appoint, or as shall be designated in the act of incorporation.

Your petitioners are induced to make this application to the General Government, from a sincere belief that the establishment of a national bank, will be no less beneficial to the public, than to the individuals who may be concerned in it. Among the most obvious and important advantages which the Government would acquire, by such an establishment, would be the means of borrowing from it money for the public service, not only on better terms, but with much greater facility, than can be done from individuals. In order to secure to the Government this benefit, your petitioners propose, that the bank shall loan to the Government, whenever required, such sums as they may want, so as they shall not, at any time, exceed one half of their capital, and that a proper clause be inserted in the act of incorporation, to carry this proposal into effect.

The other fiscal concerns of the Government would also derive great aid from a national bank, through which their operations might be conducted with much more economy and advantage than they can be through distinct State banks.

Your petitioners think they may, on this subject, safely appeal to the past experience of the Government, for the inconvenience they have suffered for the want of such an institution. Your petitioners, at the same time, beg leave to suggest the impolicy of having the moneyed transactions of the General Government dependent on State institutions to carry them into effect.

Your petitioners beg leave farther to state, that the whole circulating medium of the United States is now appropriated, by the different State banks, who, in lieu thereof, circulate their own paper, to the amount of at least fifty millions of dollars, to the exclusive benefit of their stockholders: whereas, by the establishment of a national bank, on the plan proposed, the People, in every part of the United States, would participate in its benefits, and the Government would receive from it accommodations in various ways, which the State banks have not the means of affording; and, in converting the circulating medium to the use of Government, Congress will find less difficulty, and less inconvenience will be occasioned, than in raising the same amount of money in any other manner.

The establishment of a national bank will also be attended with political effects, which the wisdom of Government will not fail duly to appreciate. Men of wealth and influence, without regard to party distinctions, will, in the different parts of the United States, embark a part of their fortunes in such an institution; and, as its prosperity and security must depend upon the stability of the union, and its present form of government, the motives of interest, to such as become stockholders, will be superadded to those of patriotism to contribute to their perpetuity.

Your petitioners forbear to press upon your notice a variety of other considerations, calculated to show the public usefulness of the proposed institution, because they are sensible that they will suggest themselves to the intelligence and discernment of those whom they address.

Your petitioners, therefore, pray for an act of incorporation, authorizing them to establish a national bank, on such terms as may be best suited to the public interest of our country.

NEW YORK, December 18, 1813.

Signed by one hundred and twenty-one persons.

No. 405.

[2d SESSION.]

DUTIES ON LICENCES TO RETAILERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 10TH OF JANUARY, 1814.

Mr. EPPES made the following report:

The Committee of Ways and Means, instructed by a resolution of the House to inquire into the expediency of amending the first section of the act, entitled "An act laying duties on licences to retailers of wines, spirituous liquors, and foreign merchandise," with a view to authorize the sale, without licence, of spirits in less quantities than five gallons, at the place where the same shall have been distilled, report:

That, in many parts of the United States, where the population is dispersed over an extensive country, and but few retail stores established, the provision of the law, as it now stands, will subject to inconvenience those who purchase spirit in less quantities than five gallons. For the accommodation of the great mass of the community, however, the privilege to sell in quantities not less than five gallons, will be sufficient; and will also enable the small distiller to dispose of the spirit he has been accustomed to sell in his immediate neighborhood, without paying a retail licence. The tax on stills must ultimately fall, not on the distiller, but on the consumer. It does not appear, therefore, that the payment of this tax in the first instance, ought to exempt the distiller from the retail tax, where, from any peculiarity of situation, with a view to profit, he may add the occupation of a retailer to that of distiller. Fearful that the proposed amendment might tend to introduce frauds, and diminish the revenue, and considering it more safe to leave the law as it now stands, and to apply in future a remedy, if experience shall pronounce against its provisions. They therefore submit the following resolution:

Resolved, That it is inexpedient, at the present time, to authorize the sale, without licence, of spirits, in less quantities than five gallons, at the place where the same shall have been distilled.

TREASURY DEPARTMENT, December 28, 1813.

SIR:

I have had the honor to receive your letter of the 20th instant, on the subject of a proposed amendment to the law laying duties on licences to retailers, the object of which is to prevent domestic spirits to be sold in less quantities than five gallons, by persons holding licences for distilling spirits of that description; and inquiring whether any information, derived from the operation of the former revenue laws, can be afforded from the treasury, which will enable the Committee of Ways and Means to decide upon the probable effect of such an amendment.

Under the former revenue laws, no licence was necessary for the selling of domestic spirits; and no information, therefore, can be derived from that source. But, without resorting to experience upon the subject, it is obvious that the proposed amendment would be attended with most injurious effects upon the revenue. The sum now payable for a licence for retailing domestic spirits alone, is fifteen dollars in towns, and ten dollars in the country. A licence for the employment of a still of fifty gallons for two weeks, may be obtained for four dollars and fifty cents; and if the licence be taken for distilling roots only, for one half that sum, or two dollars and twenty-five cents. Every person, therefore, desirous of retailing domestic spirits, instead of taking a licence for that purpose, would be induced to take a licence for distilling, if that licence will cost but one-half, or one-fourth of the sum payable for the other, and will carry with it the privilege of selling the spirits by retail. It is doubted whether the provision, at present contained in the law, by which persons having a licence for distilling, are authorized to sell domestic spirits in quantities not less than five gallons, will not be found liable to abuse. To extend it further, would be to render this abuse certain; and would, moreover, be likely to convert every distillery into a retail store or tavern.

I have the honor to be, very respectfully, sir, your obedient servant,

W. JONES, *Acting Secretary of the Treasury.*

Hon. JOHN W. EPPES, *Chairman of the Committee of Ways and Means.*

[2d SESSION.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 17, 1814.

SIR:

TREASURY DEPARTMENT, January 15, 1814.

In obedience to the permanent order of the House of Representatives, of the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1810, 1811, and 1812.

I have the honor to be, very respectfully, sir, your obedient servant,

W. JONES, *Acting Secretary of the Treasury.*

The Hon. the SPEAKER of the House of Representatives.

Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, during the years 1810, 1811, and 1812, compared with the amount of Duties collected on the same, respectively.

TREASURY DEPARTMENT, Register's Office, January 15, 1814.

JOSEPH NOURSE, Register.

13th CONGRESS.]

No. 407.

[2d SESSION.]

DIGEST OF MANUFACTURES.

COMMUNICATED TO THE SENATE, ON THE 5TH OF JANUARY, 1814.

To the Senate of the United States:

I transmit to the Senate a report of the Acting Secretary of the Treasury, complying with their resolution of the 11th instant.

JAMES MADISON.

January 15th, 1814.

TREASURY DEPARTMENT, January 13th, 1814.

SIR:

In pursuance of the resolution of Congress, of the 19th of March, 1812, directing the Secretary of the Treasury to employ a person to digest, and reduce to such form as shall be most conducive to the interests of the United States, a statement of the number, nature, extent, situation, and value of the arts and manufactures of the United States, &c., Tench Coxe, Esq. of Philadelphia, was employed for that purpose. I have now the honor to transmit, for the use of the Senate, two series of tables, as prepared by him, exhibiting the several manufactures of the United States, as returned by the marshals, and secretaries of territories, and their assistants, in the year 1810, first by States and Territories, and secondly, in every county in the Union.

These tables are accompanied by two essays, or collections of facts and observations, prepared also by Mr. Coxe, relating to the state of the manufactures of this country, and the motives which exist for affording encouragement and extension to them.

I have the honor to be, very respectfully, sir, your most obedient servant,

W. JONES, *Acting Secretary of the Treasury.*

The Honorable the PRESIDENT of the United States.

PHILADELPHIA, June 21, 1813.

SIR:

I have the honor to transmit to you the required copies of a statement of the arts and manufactures of the United States, which it has been my endeavor to render as correct, and as plain and conformable with the views of the Legislature, as the diversities and deficiencies, in the marshals and territorial secretaries' returns, rendered practicable.

I trust that the submission of the facts in Part I, which relates to manufactures, as connected with *the general principles of political economy*, and the further submission of the facts in Part II, relating to *the proper economy of the arts and trades*, both which precede the digest of the returns, will not be deemed useless or improper. Considered as symptoms and as evidences, all pertinent facts appeared to be valuable, as indicating the true state of the body politic, in its various members and operations.

The small variation in the form of the statements, which were prepared in the beginning of last December, and the addition of the county returns, involved a transcription of the whole, and much additional clerkship, and have delayed the document until this time. The present form and substance are the best in which it has been in my power to present the authentic or official materials. The entire portion of the work, which is of the nature of *estimate*, is exhibited separately from the digest of the returns of the marshals and territorial secretaries, in order that neither might obscure or injure, and that each might contribute to illuminate and support the other.

With great respect, I have the honor to be, sir, your most obedient servant,

TENCH COXE.

WILLIAM JONES, Esq. *Acting Secretary of the Treasury.**A Statement of the Arts and Manufactures of the United States of America, exhibiting*

I. A collection of facts, evincing their benefactions to agriculture, commerce, navigation, and the fisheries, and their subserviency to the public defence, with an indication of certain existing modes of conducting them, peculiarly important to the United States.

II. A collection of additional facts, tending to show the practical foundations, actual progress, condition, and establishment, of the American arts and manufactures, and their connexion with the wealth and strength of the United States.

III. A series of tables of the several branches of American manufactures, exhibiting them by States, Territories, and Districts, so far as they are returned in the reports of the marshals, and of the secretaries of the territories, and their respective assistants, in the autumn of the year 1810, together with similar returns of certain doubtful goods for productions of the soil, and agricultural stock, as far as they have been received.

IV. A series of tables of the several branches of American manufactures, exhibiting them in every county of the Union, so far as they were returned in the reports of the marshals, and of the secretaries of the territories, and their respective assistants, in the autumn of the year 1810, in execution of an instruction of Albert Gallatin, Esq. Secretary of the Treasury, given by him in obedience to a resolution of the Congress of the United States, of the 19th day of March, 1812.

PART I.

A collection of facts, evincing the benefactions of the Arts and Manufactures to Agriculture, Commerce, Navigation, and the Fisheries, and their subserviency to the Public Defence, with an indication of certain existing modes of conducting them, peculiarly important to the United States.

PHILADELPHIA, December 8, 1812.

SIR:

I have already had the honor to acknowledge the receipt of your letter of the 26th day of June last, committing to me the preparation of a statement of the arts and manufactures of the United States, in pursuance of the joint resolution of the Senate and House of Representatives, approved by the President on the 19th day of March, 1812.

The resolution of Congress is framed with a view so comprehensive, as to include all pertinent information of an authentic character, while it allows the most convenient latitude as to the form and manner; requiring, only, that the statements shall so exhibit the matter, as to be most conducive to the interests of the United States. As the tables, which will comprise the whole mass of the returns of the marshals, will exhibit many genuine parts of the entire body of our manufactures, as they existed in the year 1810, it appeared expedient that they should be preceded by certain fundamental and relative facts, which may contribute more fully to display the objects of investigation, in their bases, commencement, progress, and actual situation, and to facilitate public and private measures in this branch of the national industry, and in the other branches, to which manufactures have a great and permanent relation.

As some of the facts are of a nature favorable to *the landed interest*, as some of them are beneficial to *foreign commerce*, and some of them are advantageous to *the business of the fisheries*, it is deemed most convenient, in this part of the exposition, to class them under those three several heads and relations. It has also appeared proper, separately and distinctly to present, in this first part, another class of facts, which shows the connexion of manufactures with *the public defence*.

It is considered as a very interesting and fundamental truth, that *manufactures facilitate the first struggles of the American settlers for decent comforts, thrifty profits, and farming establishment*.

For the purpose of effectually testing the correctness of this allegation, two measures have been adopted. The first of these measures is an examination into the state of manufactures, in four several sparsely settled districts of our country, which, in 1810, had been recently laid out, according to the nature of the places, for future establishments as counties. The inconsiderable population, within these four intended counties, exhibits the infantine condition of their respective settlements, in that year.

A note of the persons of both sexes, within four of the districts of Pennsylvania, intended to be organized as counties, when sufficiently populated, and of the stock of animals, producing *materials for manufactures*, with *the implements, &c. for the operations* of manufactures, and the goods made in the year 1810, so far as they are returned by the marshals' assistants.

In these new and widely scattered settlements, where foreign consumers have yet no agents, the mere presence of a few sheep and cattle, supplying wool, hides, skins and horns, and tallow and other fat, as materials for manufacture, (that is to say, the presence of the raw materials) occasions the corresponding manufactures. In such places, profit, comfort, and necessity, appear to invite, or rather to compel, the farmers and their families to that mode of industry. The returns of the assistant officers, necessarily every where defective in this first experiment, must be extremely imperfect in settlements so widely separated. Carriage makers, blacksmiths, hatters, shoemakers, tailors, domestic makers of garments, and other manufacturers, known to exist among recent improvers and in old establishments, are omitted, or did not appear to the officers. Boards, pot ashes, and maple sugar, are also omitted by the marshal or his assistants. It is observed, that the surplus industry of these new settlements is applied to the manufacture of cotton from the Atlantic or the Mississippi. The second measure of examination, to ascertain *that manufactures commence with our first settlements, and aid their progress in its earliest stages*, relates to the interior State of *Ohio*, the youngest member of the Union in 1810. It will be remembered, that a number of the Revolutionary officers and soldiers commenced the settlement of that State, originally a part of the *Northwestern Territory*, soon after the peace of 1783; that the French settlement at Sciota was made a few years later; and that these were followed by the settlements of emigrants from various States, and particularly, of a great number, who improved the tract on Lake Erie, granted to Connecticut. The settlements in the State of *Ohio* were very much retarded and confined by the detention of the western posts and by the Indians, till after the victory of the Miami, under General Wayne, in the year 1794. Within the fourteen years, which preceded the taking of these accounts of manufactures, in the autumn of 1810, the settlements in the State of *Ohio* were principally commenced. Its whole population, according to the census of that year, was 230,760 persons, whose comfortable condition and prosperous agriculture were occasioned, maintained, and manifested, by a number of manufactures, of which, and of the connected instruments and machinery for which, the following is the imperfect official summary:

The whole number of looms in the State, actually returned, is 10,856—1,943,433 yards of linen, woollen, and cotton goods, &c.	-	-	-	-	-	-	-	-	\$999,538
217 tanneries, making leather worth	-	-	-	-	-	-	-	-	153,581
1,212,266 gallons distilled spirits, and 35,140 gallons beer,	-	-	-	-	-	-	-	-	584,892
Cut nails,	-	-	-	-	-	-	-	-	64,723
Iron made; machines for carding wool and spinning cotton; fulling, paper, gun powder, and oil, mills,	-	-	-	-	-	-	-	-	159,636
3,023,806 pounds of maple sugar, (which may be deemed questionable, as to its classification as a manufacture)	-	-	-	-	-	-	-	-	302,380
									\$2,264,760

Considerable as this amount is, the important fact will not escape notice, that shoes, boots, saddles, bridles, harness, fur and wool hats, common smiths' work, knit stockings, the making of garments in shops and families, manufactures of wood, soap, candles, pot ash, wares of metal, (exception) watches and clocks, and various other things, actually made, are omitted. To subject the raw materials of the *State of Ohio*, wrought into these manufactures, to the expenses of transportation to the Atlantic ports of Canada, or the United States, and to import such substantial, large, and heavy, supplies from the usual ports of Europe and Asia, and to transport them into those interior settlements, would discourage or deter all new migrators towards that young State; and would involve its present population in much distress, if not in ruin. The domestic manufacture of cotton appears in counties of *Ohio* which do not produce that raw material.

In further evidence of the favorable effects of manufactures upon our *interior* settlements, those of the county of *Washington*, on the western boundary of Pennsylvania, may be correctly adduced. Its whole population, in 1810, was 36,289 persons. Its sheep, *more numerous than those returned by any other county in the State*, were 47,206. Its spinning wheels, 8,763. Its looms, much the greater part of which are supposed to be worked by *male weavers, regularly in the trade*, 1,774. Its hand cards, 4,115 pairs. Its carding machines, 6. Fulling mills, 12.

Distilleries, 301. Blacksmiths' shops, 146. Hatters', 20. Saddlers', 19. Shoes and boots, 37,000 pairs. Coopers, 62. The yards of goods made, 570,773; and bricks, 913,000. These, with the goods made in its oil mills, saw mills, powder mills, tanneries, and other manufactures and works, exhibit a value of goods, exclusively of flour, of 1,630,000 dollars. As the boroughs, towns, and villages, of Washington, in Pennsylvania, do not contain more than a twentieth of its population, the benefits of manufactures, when *conveniently or closely adjacent to agriculture and the landed interest*, are clearly displayed. Tracing this case to a national result, it will be found, that the whole population of the United States, in 1810, combining agriculture, the productions of nature, and manufactures, with the same success, would have exhibited an aggregate value of manufactured goods, nearly amounting to three hundred and twenty-five millions of dollars.* The quantity of the manufactured meal of Washington is greater than that of any other county of Pennsylvania. Its number of horses is greater than that of any other, one excepted. Its number of neat cattle is greater than that of any other, except four. It has not one open or worked mine of any metal, nor a furnace, nor a forge, on the return of the marshal.

Pursuing the current of facts from this Western scene to the banks of the Susquehannah and Schuylkill, it is found, that the counties of Lancaster and Berks, with a joint population of 97,073 persons, manufactured an aggregate value, including flour, of 5,055,000 dollars. Twelve other counties of the same State, from the head of the Ohio river, to the banks and county of Delaware, respectively, exhibit similar manufactures, exceeding, on a medium, one million of dollars. The manufactures of the limited but swarming county of Philadelphia, exclusively of the incorporated or city part of the entire town, and deducting all the flour and meal, amount to 6,070,652 dollars. The manufactures of the city of Philadelphia, (within the strict chartered limits, not including any of the suburbs or liberties) containing on twelve hundred acres of land, 53,722 persons, amount to 9,347,767 dollars. The manufactures of Pennsylvania, on twenty millions of acres of her settled lands, including her flour and meal, † and other doubtful articles, appear, by the return of the marshal, to amount to 44,292,093 dollars. This return is considered by that officer, and his most intelligent assistants, to be very considerably defective. It has been selected, however, for the preceding exhibition, because, in combination with the *return of Ohio*, it displays the state of manufactures through an extent of country, exceeding fifty millions of acres, commencing at the distance of 530 miles west of Philadelphia, where its very recent settlements are interspersed with Indian cabins, and terminating in the south-east with a great emporium of manufactures, navigation, domestic trade, and foreign commerce. A vast redundancy of land exists in this middle district: for, the total population of Ohio and Pennsylvania in 1810, was 1,048,808 persons, upon one fifth of their joint soil. But this redundancy of land is accompanied by abundance of mill seats, of fossil and wood fuel, of mineral and calcareous substances, of bark, dye woods, sugar trees, clay, marble, building timber, and other natural raw materials, ingredients and necessaries for the manufactures. This redundancy of land also furnishes, upon the cheapest terms, all that belongs to sites for the establishments of the operators, and for the farms of the growers of the raw materials. Hence we find the sheep of Pennsylvania, nearly 619,000; her neat cattle more than 612,000; her horses 255,645; her flour and meal, and grain liquors, worth more than fifteen millions of dollars. Her manufactures of iron and leather, nearly eleven millions in their joint amount. These facts, from the most considerable return, are respectfully adduced and rendered prominent, in order to evidence, by the relative truths, the actual and substantial benefits of manufactures, *adjacent to agriculture*, in our half settled districts.

The State of Vermont, though its straggling settlements were commenced under numerous disadvantages, but a few years before the Revolution, presents a body of manufactures, almost exclusively from its own productions, of 4,325,824 dollars, effected by a population, on farms, in hamlets, and in villages, of no more than 217,805 persons. Its spinning wheels, more than one half of which are for wool, the most numerous in proportion on the returns, are 67,756; its looms, 14,801; its carding machines, 139; its woollen goods, 1,207,976 yards; its flaxen goods, 1,859,931 yards; its hats, 96,760; its shoes and boots, 304,280 pairs; its maple sugar, 1,200,000 pounds. Its saddlery is valued at 127,840 dollars; its tanneries, at 386,500 dollars; its iron foundries, tilt hammers, and forges, are 104; its oil mills, 26; its paper mills, 11; its fulling mills, 166; and its naileries, 67. The goods made in its smiths' shops, printing offices, and pot ash works, and by its book binders, brush makers, carriage makers, tallow chandlers, and soap boilers; coopers, clock and watch makers, copper smiths, tin plate workers, silver smiths, and other existing manufacturers, are omitted in the return. They are certainly very considerable in value.

The State of Kentucky, a recent establishment, and much later than Vermont, exhibits, on her return, 4,120,683 dollars, and Maine, with nearly as much land as the rest of the Eastern States, drawn, of course, from manufactures by agriculture, and by commerce, navigation, and the fisheries, returns home-made goods to the value of 2,137,781 dollars. In the reports from each of these States, numerous existing branches are entirely unnoticed. Similar omissions, great and evident, appear in many instances. But a very impressive fact, evincing the real and natural connexion between the planting and farming citizens, and the manufacturing branch of the national industry, is the possession and employment of about 122,719 looms by Virginia, North Carolina, Kentucky, and Tennessee, which differ little from six-sixteenths of the whole number of looms in the United States. It appears that, in the South, *the presence of the various raw materials, and still more the great redundancy of cotton, have excited innumerable and valuable manufactures*. It is believed that it is to the excitement produced by *the presence of the finest marbles*, more than to a peculiar eminence of genius, that the Greeks and Romans owe their possession of the beautiful and the grand fabrications from those materials. The invention of statuary occurred in Egypt, but it did not rise to any perfection, in a country destitute of fine marble.

It is a fact of great importance in this statement, and on the subject of the relation of manufactures to the landed interest, that none of its productions, whether of *natural growth or the fruits of cultivation*, in the Middle, Northern, and Eastern States, which can be considered as raw materials, are now exported, in an unmanufactured state, to foreign markets. The manufacturers may be said to purchase and employ a quantity equal to the whole: for, if small parcels have been lately exported, much greater quantities of similar foreign articles have been introduced from abroad. The landed interests have no actual foreign purchasers for their wool, flax, hemp, hides, and skins of domestic animals, and various metals. The tables compiled from the marshals' returns, will display a very great value and variety of goods, made of those materials, and the returns of imports, and other documents, justify the allegation, that importations of similar foreign materials, to the amount of forty or fifty millions of pounds weight, for the purpose of manufacture, were made in each of several years preceding the season of the returns. The momentous fact is, therefore, satisfactorily established, that *the American manufacturer's demand has greatly surpassed all the abilities of the planters, farmers, land-holders, and miners, to supply those five descriptions of raw materials*. In the same situation, all our crude sugars and molasses, produced in Louisiana, if considered as materials for manufacture, are placed, by our refineries and distilleries.

COTTON.

Until the late revolution in the cultivation of cotton, by which it was converted, through the strenuous exertions of the friends of manufactures, from a petty object, in little fields and gardens, into an article of extensive cultivation among the planters and farmers, there was no redundant raw material for the manufacture of cloths and stuffs for apparel and furniture in the United States. There is, at this time, no other redundant raw material.

The green seed cotton was the best adapted to the general quality and situation, and to the climate of the Southern States. But, its easy cultivation was very much restrained by the extraordinary difficulty of separating it from the seeds. This operation required so much manual industry as greatly to impede the manufacture, and of course, for the time, to prevent an extensive cultivation. In the year 1793, *the invaluable saw gin* was invented by a citi-

* Pinkerton, in one edition, states the total value of the manufactures of England at 63,200,000 pounds sterling, about 280,000,000 of dollars. In another edition he states them at 67,200,000 pounds sterling. They exclude some things, which we include.

† The flour and meal are worth, by the marshal's report, 10,800,290 dollars. The unsettled lands of Pennsylvania are supposed to amount to nearly 8,000,000 of acres.

zen of the United States, and was so improved and perfected as to render it easy, it is said, to separate the seeds from one hundred millions of pounds weight of cotton wool, by the employment of three or four hundred persons, although it is alleged that it would require three hundred thousand persons to effect the same by hand. The inventor of this gin states the difference between its operation in common hands, and the ordinary manual operation, at one thousand to one. By the employment of this machinery, every vicinity can, easily, and expeditiously, prepare its cotton for the manufacturing cards, and that, in the aggregate, to any extent that the world could require, were it to clothe itself entirely in cotton manufactures. Thus has there been added, by our own invention, to the machinery to facilitate the manufactory of a staple production of our soil, a single improvement, moveable by water, steam, cattle, or hand, which has set loose those immense powers of agriculture, to produce cotton wool, which were before enchained.

In pursuing the statement of facts which manifest the aids of manufactures to the landed interest, the next step, from the *American saw gin*, is, to the system of machinery to make cotton yarn.

The water-spinners of cotton, in one of the States, have represented to the marshal that they can make eighty-two pounds and one half of yarn, by each spindle, within every year. But the owners of other spinning mills deem it unsafe to calculate on more than fifty-two pounds of yarn, per annum, for each spindle. The quality of the yarn under consideration is said to be suitable for cotton cloth of twenty-seven inches in width, worth forty cents per yard. At the lowest of the rates, the United States, had they 1,160,000 spindles, could work up into yarn, the sixty-four millions of pounds weight of cotton, which are the maximum of our exportation in any one year. In a proportion, corresponding with the table in page 10 of your report in part, on the subject of manufactures, this number of spindles would require a capital of nearly seventy millions of dollars. But this would be as well in real estate as in the cash, and other personal property, and loans, and purchases on credit. Sixty-four millions of pounds of cotton, in the proportion of the same table, page 10, would produce about fifty millions of pounds of cotton yarn, and with the labor, in the proportion of the same table, of about 58,000 persons. Of these, no more than one eighth part ought to be adult males; the remaining seven-eighths might be women and children. This employment of less than a hundredth part of our white population would be no inconvenience to agriculture or commerce. As the cotton spinning mills are increased in magnitude, a smaller proportion of capital will be required.

The yarn thus manufactured, at a price twelve and a half per cent. less than that in the table of the report, page 10, (which appears to be one dollar and one eighth per pound) would amount to fifty millions of dollars—a sum exceeding the average value of all the exports of American articles, in the three most favorable years. This great production is from the water and steam manufactory of the exportable surplus of a cotton crop, worth, at twelve and one half cents per pound, eight millions of dollars.*

But, if the weaving of this yarn be executed, as it may be, with perfect ease, by the employment of 100,000 women, (less than one-sixth of our adult females) with the *fly shuttle*, during one half of each working day in the year, the quantity of cloth, by the Rhode Island rule, of four yards for every pound, would amount to about two hundred millions of yards. This quantity of cotton cloth, at one-third of a dollar per yard, would be worth about sixty-seven millions of dollars.

There is yet another operation, which can be effected by labor-saving means, and by a process superseding the labor of many hands. Machinery is now in actual operation, in the United States, for printing cotton and linen cloths, by engraved rollers of copper, moved by water. Ten thousand yards have been printed with ease in a single day, by one man and two boys, with these rollers. Fifty thousand children's handkerchiefs have been printed in the same time by the same number of persons. Similar means are in constant use for staining or dyeing cotton and linen cloths of one color, in the same expeditious manner, so as to make them fit for a greater variety of apparel and furniture. Were these operations to be performed upon the whole quantity of cotton goods estimated in this statement, they would add seven or eight millions of dollars to their value, and would require but fifty or sixty thousand men and children. The aggregate value of our surplus cotton, (64,000,000 lbs.) even when thus simply manufactured by 210,000 persons, would be raised from eight or nine millions of dollars to seventy-five millions of dollars. The total addition to the original value of our cotton crop alone would be at a rate far exceeding the value of our exports of American growth.

To manifest the importance of such operations to the landed interest, it may be safely affirmed that sixty-four millions of pounds weight of clean cotton wool, freed from the seeds, can be produced, on a low average, by half a million of acres of unmanured land. A quantity of cotton wool, equal to all that is now produced by the civilized and uncivilized nations of the world, could be raised on a very small portion of our Southern soil.

Such are the benefits which agriculture and the country at large may derive from the manufacture of our only *redundant raw material*. The States of Rhode Island and Massachusetts have expelled all doubts about the practicability of the cotton operations. With the smallest territory in the United States, Rhode Island has already attained and introduced into her vicinity† a cotton branch of our manufactures, as valuable as the cotton branch of any country in Europe was, at the time of the formation of our present constitution.‡ The neighboring States of Massachusetts and Connecticut quickly followed Rhode Island; and the tables, which are annexed, imperfect as they unavoidably are, manifest the universality and magnitude of the cotton manufacture in 1810. If a very sober prudence shall estimate the value of the water spun and steam spun cotton yarns, at the prices for which they can be imported, without profit, from Europe, there will remain an opportunity for much lucrative business in works, and very great accommodations and savings in private families, especially in the Southern and Western States and districts. This allegation will not be doubted, since the State of Georgia, with a white population of one hundred and forty-five thousand four hundred and fourteen persons, manufactured, at the date of the last census, more yards of various cloths and stuffs than Rhode Island. The difference in favor of Georgia was one million five hundred and forty thousand yards. By the proportion of this frontier southern agricultural State,|| the white population of our country might be proved to have been capable of manufacturing, in 1810, assorted cloths and stuffs, of the various raw materials, to the amount of one hundred and seventy-two millions of yards. These facts illustrate the state of manufactures in one of the *most agricultural* and in one of the *least agricultural States*, before the recent increase of the port duties upon foreign manufactures, and the voluntary or unforced course, which those two dissimilar States have respectively taken, in manufacturing their cloths and stuffs, for furniture and apparel, out of the various productions of our own lands.

WOOL.

The facts which will be presented in evidence of the present influence of the *woollen manufacture* upon the landed interest, are numerous and important.

There does not occur to present recollection any raw material, in which the hand of Providence has made so great a diversity of quality and value, as exists with respect to sheep's wool. Each description has its proper uses and capacities. The climate in which the sheep is brought forth, raised, and maintained, is considered by many as a circumstance of the utmost importance. A standard by which to determine the correspondence of places in all those particulars which constitute climate, appears therefore to be a great *desideratum*, and is most likely to be

* Cotton yarn, of No. 73, was worth, in England, A. D. 1787, 36s. 6d. sterling, or \$8 11 per pound. Such yarn, in 1792, was reduced to 9s. 8½d. sterling, or \$2 16 per pound. In 1807, the same No. 73 was worth 4s. 4½d. sterling, or 97 cents per pound. Cotton machinery was not generally extended, in Great Britain, till the year 1780, when it continued under a monopoly. We had not began to raise cotton crops for exportation, nor invented the saw gin.

†Massachusetts is also great in the cotton branch.

‡ The quantity of cloths and stuffs, for clothing and furniture, which could be made by the United States, in proportion to the population and manufactures of Rhode Island, in 1810, would be 243,000,000 of yards, according to the marshal's return, which he considers as materially defective.

|| In the year 1807, Georgia had only one-eighty-fourth part of the tonnage of the ships and vessels of the United States.

found in natural objects. Some vegetable production, of peculiar characteristics, indicating *the same degree of temperature*, wherever it is found, was presumed to be probably existent. It is believed that, until a more sure and more accurate standard object can be thought of or discovered, the *Aurantia Sinensis*, or the *China* or *Sweet Orange*, may prove an useful natural instrument to ascertain a climaterial correspondence of a line of places, on the European and North American continents, from which we may safely begin to count *the minutes and degrees of temperature*, at least for agricultural and manufacturing purposes. The vicinities of Lisbon, in the old world, and St. Augustine and New Orleans, in the new, produce this delicate fruit in the highest perfection, and will be considered as justifying the temporary assumption, subject to correction, that *the climates of places, in the Atlantic States, correspond in temperature with those of Europe, not being insular, which are nine degrees of latitude more Northern*.*

An application of this guide to the production of wool, in the United States, gives the following results:

	N. Latitude in Europe.	Equal, in America to,
The best wool in Great Britain, is in the Western Islands of Scotland, and is very fine,	Deg. 58 00"	Deg. 49 00"
The next quality is the wool of Herefordshire, England, and is very good,	52 20"	43 20"
Saxon wool, the best German, very fine,	51 40"	42 40"
Rousillon, French wool, very fine,	42 50"	33 50"
Spanish merino wool, from	44 to 39°	35 to 30°

From the very fine quality of the Scottish Western Island wool, (which is said to be from the merino breed of sheep, obtained accidentally so long ago as A. D. 1588) from the excellency of the Scottish Shetland wool, and from similar qualities of the wool of Saxony and of the ancient wool of Berri, and the modern wool of Rousillon, in France, there is reason to believe that *the climates of Europe, capable of producing undegenerate merino sheep, extend considerably beyond and to the North of Spain*. But the classification is given here with exactness; and certain fine wools of Denmark and Sweden might be added. If the political disconnexion of France occasioned her not to possess the breed and the pastoral regimen, necessary to the production of the finest description of wool, the perfect freedom of agriculture, and the actual diffusion of all legitimate advantages in every mode of business, in the United States, will soon enable us to ascertain the extent in which we possess the proper Cis-Atlantic latitudes. *There appears no reason to doubt that the precise temperatures of the most favorable and most esteemed sheep walks of Spain are to be found within our territory.*

It is considered that a dry air is very favorable to the health of sheep, and to the fineness and delicacy of their wool, and it is believed that the United States may entertain a just confidence in the success of their woollen manufacture, from their enjoying an atmosphere of this character. The most successful woollen manufacture in the world, is found in an insular and humid situation. Our success may therefore become superior.

It is considered that no part of our territory is too far south for healthful sheep and fine wool. This fact is worthy of particular estimation, because it has been erroneously suggested, that the tropical climates convert the fleeces of sheep into hair. Since St. Augustine is of the temperature of Lisbon, our territory on the Gulf of Mexico must be more cool than the South of Spain, Barbary, the South of Italy, Greece, Egypt, the land of Canaan, and the greater part of Persia and Thibet, in which countries the most ancient histories and the most recent information concur to prove the abundance of sheep, and the excellence of the wool. Even in the ardent climate of Peru, there abound certain indigenous wool bearing animals, † one race of which produces fleeces of the finest quality.

The breeds of sheep which have prevailed in the United States, till within a few years, have not been of the heavy fleeced character, except in a very few valuable instances. But, since the introduction of the Spanish merinoes, and the attraction of the public attention to some of the breeds, whose fleeces were observed to be heavy, or which are adapted to the comb, numerous experiments afford the strongest reason to believe that sheep, in this country, will be great wool bearers, according to their respective breeds. The annual shearings and exhibitions display much detailed and satisfactory evidence on this point.

Of the productions of agriculture and husbandry among the civilized nations, sheep employ the smallest number of persons, according to their value. The raising and maintenance of sheep, are, so far, *peculiarly* adapted to our circumstances, as to extent of territory, and moderate population. Sheep are then a convenient object for the United States, as they employ more land than any other production, and we have more than we can cultivate or employ. Holland is forbidden, by her very limited soil, to be extensive, though skilful in the woollen manufactory; and imports, by her canals, most of the flax and yarn of which she makes her linens. *The United States, on the contrary, are capacitated and invited, by their extensive territory, to rise, with ease and singular rapidity, into eminence in the woollen branch.* The sagacity and energy of Rhode Island have given her the first comparative importance in cotton mills and establishments; but the young settlements of Maine and Vermont, by means of their more extensive territories, have enabled each of them far to exceed her in sheep, wool, and woollen manufactures. England and Wales, with only thirty-four millions of acres of land, and twenty-six to twenty-nine millions of sheep, have been said to produce one hundred and forty-five millions of pounds of wool, in every year, ‡ and to sell to other nations, more woollens, than the rest of mankind exports. The English and Welsh population is about ten millions; *but their progress in the production of wool seems to be arrested by the want of soil for grain, cattle, horses, and plantations of trees.* Britain imports all the wool she can purchase, and pays immense sums to Ireland and to foreign countries for bread and meat, wood and timber, iron, flax, hemp, and skins, for her European and foreign dominions, armies, navies, and manufactures. Scotland, with a very sagacious, economical, and energetic population, is the least favored of the civilized nations, as to the quality of her soil. She consequently exports very few woollens from her own agriculture. It may be affirmed, then, in safe contradiction to ancient opinions, of our own and of Europe, that *the abundance of the soil of the United States qualifies and irresistibly invites or impels them to continue, improve, and extend, the woollen manufacture.*

The case of the Western Scottish islands, in which some stranded, captured, and fugitive vessels of the Spanish armada are believed to have left, in the year 1588, some Castilian sheep, establishes the truth, that poor *dry* lands will preserve, in a considerable degree, fine wool in a breed of sheep, even in a moist and rigorous climate, where the lightness of the soil has stunted the stock of the animals, and reduced the weight of the fleece: for these Scottish sheep are very small, and bear little wool. The proper temperature, dry situations, the proper lightness of food, greater care of the fleeces, in the time of growth, and increasing skill in the important operations of the wool sorter, ensure us a very rapid attainment of fine wool. It must soon be more than we can want at home. But exportation takes off the woollens of a single European nation, from their own raw materials, to the amount of twenty millions of dollars, with a considerable addition from foreign wool.

The examples of all the fenny or marshy districts of Great Britain, establish the truth, that the unoccupied swamps of the United States, when they shall be properly drained, will support the heavy fleeced breeds of long woolled sheep, much of the fleeces of which is adapted to the comb, and is necessary for the "worsted" or "stuff" manufacture, for the ordinary hosiery, and for well coated blankets.

* The production of the sugar cane, and of the cotton shrub or tree, in Spain and America, may also be considered.

† Hama, properly Runa, like a small Camel; Guanaca, and Vicuna; of which the Pacos is a species. See the skin of this animal, with its wool, hair, teeth, and hoofs, in Peale's Philadelphia Museum.

‡ Luccock, of Leeds, states the wool of England and Wales to have been, in 1805, about 94,500,000 pounds.

At this moment we possess, *unused*, a superabundant quantity of fenny, marshy, boggy, or swampy land, capable of sustaining more of the long woolled or heavy fleeced sheep, than we can want for our own use, and promising to our merchants an export trade. The most notable quantities of these lands are in the maritime counties of North Carolina and Virginia.* These large, heavy fleeced, and long woolled sheep, require to be well fed. Mixing the long woolled and other breeds, and a right management, produce great benefits to the farmer, and to the hosier class of manufacturers.

It is considered that there were at least thirteen or fourteen millions of pounds of wool sheared in the United States, in the year 1810; and that the growth of wool in the year 1812 has been twenty to twenty-two millions of pounds. There are some who believe the quantities to be rather greater, because the increase is in a large compound ratio. One half of the young are females, and the males are wool bearers, till they are exported or consumed. Much more care of sheep is generally observable. The fleece, while growing, is better kept. There is much more care and opportunity for choice as to breeders. The merino fleece is heavier, as well as finer, than the country breeds. The embargoes, foreign restrictions, spoliations, war, and high freights, have diminished exportation; and rendering other meat and fish more difficult to sell, and combining with other causes, have doubtless affected the consumption of mutton. There has been at the same time a considerable importation of wool, and a great importation of fine woolled and heavy fleeced sheep. It is probable that no country has ever effected so great changes in the value and extent of its stock of sheep, as the United States, within a few years. There is the strongest encouragement to persevere in the preservation, multiplication, and improvement, of these animals.

The improvements in the manufacture of wool, and in the means of conducting it, have been very considerable. Carding machines have been introduced, to the number of 413, in the single State of New York. The wool picking machine also saves labor. The manufactory of hats, *consuming more wool, with few hands, than any other of the ancient modes*, is carried to the extent of our consumption. We begin to export hats. The European improvements to save labor, in spinning wool, have been brought into extensive use. Fulling, a labor saving process, is greatly increased. It was formerly, as in hatting, *a manual operation*. More, than formerly, of our wool is used in those manufactures, which do not require regular fulling, such as flannels, and goods made of combed wool. Dying is much improved by the modern aids of chemistry. The *fly shuttle, which saves labor*, is constantly multiplied. The loom and the weaver are much improved. *Female aid* in manufactures, which prevents the diversion of men and boys from agriculture, has greatly increased. Children are employed as well as the infirm and the crippled. The asylums of the poor and unfortunate, and the penitentiaries of indiscretion and immorality, are improved and aided by the employment and profits of manufactures. *In the section of the Union occupied in part by colored laborers, decent and comfortable hospitals have been established upon some of the planters' estates, in which children, convalescents, aged persons, and married females, for a proper time before and after puerperal occasions, have been employed with humanity and advantage, in manufacturing cloths and stuffs, for apparel and furniture.*

Modern improvements in the stocking loom, and in the shearing of woollen cloths, have been introduced into the United States, and there can be no doubt that the current of acquisition of the means of the woollen manufacture has fully equalled the great and manifest increase of the raw material. Indeed, it may be safely affirmed, that the *manufacturer's demand has continued to exceed the farmer's ability to supply the various descriptions of wool*. The sheep were formerly a mere object of domestic economy and convenience, and have at length become a great and universal object of agricultural profit and wealth. Besides the increase in the number of sheep, and the goodness of wool, the price of the three established qualities has sustained an addition of fifty per centum.

IRON.

In the iron branch, the consumption of that most useful natural production takes place in a manner yielding an accumulation of benefits to the landed interest. This is displayed in various labor-saving nail mills, the improvements in the easy operation of casting iron and steel, the very rapid progress in the wire manufactory, the sudden creation of private armories and military foundries, the multiplication of the rolling and slitting mill, the boring mill, the grinding mill, the polishing and metal turning machinery, the tilt or trip hammer, the wool card making machinery, the nailed shoe, the manufactories of surgical instruments, of cannon ball and shells, the machinery for making screws, the saw, file, and edge tool manufactories, the multiplication of steel and common furnaces, bloomeries, and forges, the innumerable black and white smiths' shops, for every iron implement and necessary of farming, planting, manufacture, and navigation. The benefits to the landed interest, from the consumption of so great a quantity of iron, fuel, food, forage, and building materials, and the employment of so many cattle and mill seats as the iron manufacturers require, are great and evident; but the aid to agriculture, from the abundant, cheap, sure, and adjacent supply of iron work, for every purpose of the garden, the field, and the family, is incalculable and indispensable. Not a building for man, for cattle, nor for the safe keeping of produce or merchandise—not a plough, a mill, a loom, a wheel, a spindle, a carding machine, a fire arm, a sword, a wagon, or a ship, can be provided, without the manufactures of the iron branch.

LEATHER.

The manufactures of hides and skins are of great importance to agriculture. The coats of animals, nearly excluded, by the introduction and improvements of the cloth manufacture, from their original uses in making garments, would become a mere offal, but for their present employment in leathern goods. Bark, abounding every where in America, is redundant in new settlements, where the tanning business facilitates the destruction of the forests, which obstruct agriculture. This manufacture has an additional value in producing a market for lime. A method of splitting skins has been invented, and an improvement in making shoes, which saves four-fifths of the workmanship, has been discovered. The uses of leather are of the utmost importance to health, the facilitation of industry, the diffusion of knowledge, and the military operations of the United States, by land and sea. The shoes, boots, and slippers, manufactured in 1812, undoubtedly exceeded the value of all the manufactures imported in the first year of the present Government, which, by the actual return of November 30th, 1791, were worth here only 15,295,638 dollars. The shoemakers' wares of the entire State of Massachusetts, through the production of handicraft, are equal, in their total value, to its proportion, according to its population, of one moiety of the exports of goods of our growth, produce, and manufacture, in the most favorable year. Were shoes, boots, and slippers, manufactured in the same proportion to numbers in all the States, they would be equal in value to twenty-four millions and sixty-seven thousand dollars. The cordwainers' purchases are the greatest support of the leather branch. Upon an examination of the number of shoes, boots, and slippers, saddles and bridles, harness, carriages, (many of which have leathern boots, tops, curtains, and aprons,) drums, gloves, leathern breeches, rigging, and other hides for ships and vessels, bound books, manufacturing cards and carding machines, military equipments, and other leathern goods, there will appear no reason to doubt, that a value of leathern manufactures is annually made in the United States, fully equal to that of half our exports of our own productions and manufactures. These are real necessities or plain conveniences. The Americans consuming more animal food than any other People, in proportion to our numbers, being near to the greatest foreign sources of unmanufactured hides, and being invited to sheep, swine, and cattle farming, by our own redundant soil, with cheaper water and land, proper oils, lime, and bark, for the leather making business, than any other country, our leathern branch must continue to be very considerable, and rapidly to extend and improve. It is not doubted that it is at present equal in value to the same branch in any other country, in proportion to the population, if the same qualities of goods be estimated at the same prices. These facts, in relation to the leather branch, are of peculiar importance, as it is a manufacture by hand and not by machinery. They prove our capacity even in the handicraft branches.

* Romney marsh, in England, maintains above four sheep, for each acre, on a medium.—*Luscock*.

FLAX.

The manufactures of flax, existing in every part of the United States, afford conclusive evidence of the universal ability to produce this raw material. Agriculture might, therefore, be more considerably supported by it, if there were occasion. But the easier production and manufacture of cotton occasions a small and proper degree of attention to flax in the greater part of the southern section of this country. As flax requires but a small quantity of land, especially where a great stock of farmer's animals produces abundance of manure, its cultivation and manufacture are *particularly* convenient and important to the fully settled districts which do not yield cotton. Our climate is favorable to bleaching. In Connecticut, though much advanced in cotton spinning, there is returned a diffused manufacture of various linen cloths, (besides sewing thread, linen chain for mixed goods, tapes, bobbins, fringes, lace, webbing, &c.) equal to the yearly rate of three dollars and five cents and one-half per head, which is at the rate of 22,091,704 dollars for the whole population of the United States. Yet Connecticut has many convenient seaports. Her return, too, is considered to be materially short. Vermont makes linen at a nearly equal rate. Two hundred thousand spinning wheels (of which about two-fifth parts are probably employed on flax) in the two States, whose returns of that very useful and general little machine, are the most complete, give an additional evidence of the present condition of this manufacture. But for the growth of cotton, the flax manufacture would have become very great. Many families in the United States derive their origin from nations the most successful in the linen manufacture during our two centuries. Such of the States as may not very greatly increase their sheep, for want of land, or for other reasons, will be particularly accommodated by the cultivation and manufacture of flax. Oil mills, for crushing and pressing flax seed, have been so multiplied within a few years, as to prove the extension of the linen branch, and materially to benefit the growers of flax, especially those whose distance from the seaports prevents recourse to foreign markets in disposing of their seed. The actual extension and improvements in all the arts and trades which employ paints, are favorable to the sale of flax seed oil. The economy and beauty of painting all wooden and many other constructions, especially the preservation of those which are exposed to the weather, occasions the manufactory of this oil greatly to increase in quantity and value. The use of the oil cake yields a benefit to the country. Modern, and particularly *recent* improvements in dressing, spinning, weaving, and bleaching flax, have greatly facilitated the manufacture of this raw material. The United States are perfectly prepared for such an extension of it as to maintain a steady demand equal to our power conveniently to raise flax; wherefore, agriculture will certainly continue to be extensively and very considerably aided by it, in all places which are without the region of the cotton cultivation. We have regularly imported flax from the distant markets of Russia, because the demand of the manufacturers could not be satisfied by all the exertions of our farmers. This was the case before labor-saving machinery was introduced, which adds to the proof of our capacity for even handicraft goods or proper manufactures.

HEMP.

The ability to produce hemp is enjoyed by every State in the American Union. Soil, climate, industry, machinery, situation, and the possession of capital in the shape of the raw material, appear to have carried this branch to the greatest height in the State of Kentucky, even since the extension of the cotton culture in that quarter. The marshal reports a production, in 1810, of 5,755 tons, in the prepared state. But, as there are made, in Kentucky, 453,750 yards of hempen bagging cloth, for packing cotton, and one thousand nine hundred and ninety-one and one-half tons of cordage, and much yarn; and, moreover, as the various hempen, flaxen, cotton, and woollen cloths and stuffs, of that State, in 1810, are reported to have amounted to 2,216,526 dollars, it is manifest that the landed interest is much assisted by the hempen manufacture.* Improvements in the process for separating the fibres of hemp from the woody part, labor-saving machinery to manufacture it, and skill in the cultivation, resulting from the introduction of experienced manufacturers, have enhanced the aggregate value of hempen goods, and increased their importance to agriculture. *So much greater has been the demand for hemp, at home, than the practical ability hitherto to supply it, that importation, to a very considerable amount, has regularly taken place, although there is an extraordinary duty on foreign hemp, and although the cultivation and manufacture of cotton have suddenly and greatly interfered with the manufacture of this raw material.* The manufacture of hemp being of the utmost importance to the supplies of the army and navy, and to public defence on the water and on land, the United States can only be rendered perfectly safe and independent by early and effectual encouragements to the growth, preparation, and manufacture, of hemp. It is of no less importance than those of arms and gunpowder. To separate all the fibrous from the ligneous parts of this raw material, without converting too much of the strong and good staple into worthless tow, by ill management, would occasion the quantity for manufacture to be much larger, and the profits to the cultivator to be more considerable, and would render the operations of the manufacturers more easy and successful. Improvements in all the machinery for hemp are worthy of peculiar attention and exertion.

WOOD.

The numerous and diversified manufactures of wood, and the consumption of wood in the business and families of the manufacturers, occasion vast benefits to the landed interest, in all situations, maritime and interior.

The coopers and carpenters' packages for exported goods, alone, probably exceed two millions two hundred thousand in number. To these may be added as many, or more, for home use. The ships and boats of the United States, at their greatest amount, on a medium of a period of three years, have been computed at forty-five millions of dollars. Staves, heading, and boards, may be deemed simple or imperfect manufactures of wood. Carriages for pleasure, business, and war, cabinet wares, saddle-trees, turnery, with ploughs, harrows, corn fans, hand and wheelbarrows, wooden measures, mill work and machinery, wooden instruments, implements, and utensils, with the wooden handles of metallic instruments, potashes, maple sugar, tar, pitch, and turpentine, from the various forest trees, ashes for the soap manufactory, bark, and wood fuel, including charcoal, are examples of wooden goods drawn from our forests. It may be safely alleged, that the natural and cultivated trees of the United States are rendered, by manufactures, a very great benefit to the landed interest. It is considered that pot ashes and pearl ashes nearly compensate the settler for the expense of clearing the portion of a new farm assigned for cultivation, in all situations convenient to boat navigation. The bark of the cork tree is used in other countries as a material to manufacture, and might be added, by means of plantations, to the North American productions. It is an evergreen forest tree in Spain and Portugal, and is found in the southwestern angle of France, in temperatures corresponding with those of Georgia and the two Carolinas, and the Southwestern States and territories. We have obtained the cork-cutting business, before the landed interest have procured the exotic tree, or supplied the material. It is an impressive fact, that manufactures, in America, outrun agriculture in most instances.

The oils of vegetables and animals, which are generally from the cultivated lands of the United States, form a very valuable class of simple manufactures, greatly beneficial to the agricultural interest. These are flax seed oil, castor oil, soap, candles, lard, rendered tallow, wax, butter, and cheese. We might add the olive oil, as we have the proper temperatures in the country south of the Chesapeake bay. A labor-saving machine has been introduced, by American ingenuity, into the manufactories of common dipt candles. Rape seed oil might be made in all the States. Fish oil being necessary to make good leather, the fisheries of the lakes and Western rivers merit con-

* It appears that, if the United States were to manufacture cloths and stuffs, in as great a degree as is reported by Kentucky, (which has no sea port) in proportion to the whole population of that State and of the Union, our manufactures of such goods might amount to more than eighty-four millions of yards. The return is doubtless very short. Though hemp, freed from the woody part, and only prepared for spinning, is not set down among the manufactures, yet is materially advanced from the raw state by that preparation. That the general return of Kentucky is very short, will appear certain, when it is observed that shoes, and other manufactures of tanned leather, hats, all manufactures of iron, (except bars, castings, and cut nails) of copper, brass, silver, and gold, of clocks and watches, of lead, of pewter, of tin, of casks, of meal, of carriages, of cabinet ware, of books, and various other goods, are omitted.

sideration, as to a possibility of improvement. The aggregate of the areas of the lakes is as great as a considerable sea. The caviar and isinglass are objects of attention and profit in Russia. The sturgeon from which they are made, is *Acipenser, Ruth. et Stur. Linnæ*. It abounds in the fresh waters of the Don and the Wolga, and is suitable for our lakes.

DYES AND PAINTS.

Indigo, dying woods, and plants and pigments, of various kinds, used in manufactures, are additional instances of the benefits of that branch of the national industry to the owners and cultivators of the soil. Manufacturing all we produce of lead, we have been obliged to import a large balance of that useful metal, for our workmen, after using all our own lead, which is convertible into various pigments, is a raw material of several useful manufactures, in its separate state, or mixed with other metals. *The rapid advance of lead manufactures, on the purchase of Louisiana, proves that they not only steadily progress, but rapidly extend, on every new supply of the raw material.* Manufactures goad the whole landed interest to profitable production.

TOBACCO.

The manufacture of tobacco, snuff, and cigars, has become a very considerable benefit to the planter. Labor-saving machinery does much in this branch. Our manufactory has mitigated the shock given by the recent wars and foreign commercial impediments to the tobacco cultivation. We are equal to the supply of any demand for the export trade, in snuff and tobacco, after an abundant reserve for home consumption.

FRUIT.

Manufactures from fruit are every where economical, and, in many places, highly profitable to the farmer, and admit of a vast and profitable extension. These are cider, apple and peach brandy, *the wine of the Corinth fruit,* or currant wine*, and vinegar in its ordinary state, and prepared with the juices of various fruits. It is believed that the extent in which the American currant wine has been already made, has not been observed or considered, nor are its pleasantness, utility, facility of manufacture, nor our vast capacity for the manufacture, sufficiently known, or duly appreciated. The red, black, and white currants grow and produce well in our most Northern and Eastern States, and in colder parts of Europe. The *proper Corinthian grape* was found in the climate of Southern Greece, and its island of Zante. The red, black, and white currants are indigenous or domesticated here. They all yield wine. The quantity of two barrels, or sixty-three gallons, may be easily made in every farmer's family, without the use of more ground than he ought to appropriate for his common kitchen garden, and with as little trouble as that necessary to make butter, cheese, cider, or beer. Even the inhabitants of the cities, and other towns, who have gardens, or who purchase currants, may make the currant or Corinthian wine. Our million of white families (by the census of 1810) at a medium of sixty-three gallons each, or two barrels, are capable of preparing sixty-three millions of gallons—a quantity nearly twelve times as great as that of all the wine received from abroad, or twenty-three times the quantity consumed in the United States.† It is, doubtless, capable of distillation into brandy. *It would be a profitable business to make Corinthian wine upon the great scale, and it is far more worthy of attention, in the country north of the Bay of Chesapeake, than the cultivation of the wine grapes of Germany, France, Spain, Portugal, Italy, and their islands.* No beverage is more pleasant; none, it is believed, more wholesome; and it would afford *an universal opportunity to mitigate the ardor or diminish the use of distilled spirits.* The *currant, or Corinthian wine*, if made extensively in the United States, would greatly increase the benefits of the manufactures of *fruit liquors* to the cultivators and land-holders, which are already very considerable, convenient, and profitable.

As in relation to the quality of wool, so in relation to the manufactures of the grape, the opinion is submitted, that the *Surantia Sinensis*, or the *China orange*, is an useful indicator of climaterial temperature. Presuming upon the difference of nine degrees, which the steady productions of that delicate fruit appear to justify, the following table of corresponding temperatures, in relation to the finest wines of considerable productions on the continent of Europe, is respectfully offered, since wine, or fermented spirits, brandies, and cremor tartar, or the salt of wine, are manufactures from the grape.

	Degree of North latitude in Europe.	Equal, in North America, to
Moselle, Rhenish, and Hock wines, are produced in	49° to 50°	40° to 41°
Champaign wine, in	49° to	40°
Burgundy wine, in	47° to 48°	38° to 39°
Claret, Sauterne, and Grave wines, in	44½° to 45½°	35½° to 36½°
Oporto, or Port wine, in	41° 20"	32° 20"
Lisbon and Carcavela wines, in	38½° to 39½°	29½° to 30½°
Xeres or Sherry, St. Lucar, and Malaga, or mountain wines, in	37° 28"	28° 28"

CIDER AND PERRY.

The manufactures of cider and perry are so highly perfected in Europe, that the former liquor, of the most excellent quality, has been sold for prices greater than the first costs of some of the wines of the European and African Islands, and of those continents. Much more might be safely asserted of the British cider. The American cider advances rapidly in quantity and quality. So far as either the fining, fermentation, or ripening of the liquor, or the quality of the fruit, may be affected by the temperature of the climate, the same difference of nine degrees may be considered in relation to the cider countries of Europe and America. It is conceived that, in safe comparisons of places, the situations of both should be on continents. The climates of islands of the same magnitude may also be compared in the same manner.

GRAIN.

The evidences of the immense advantages which *the landed interest* derives from *manufactures*, will be concluded by the adduction of some facts in relation to those from grain. A single State returns the various descriptions of meal and flour to the amount of almost eleven millions of dollars, made at two hundred and eight mills, besides more than 4,365,000 dollars in value in fermented malt liquors and distilled spirits, chiefly from grain. Cider is not included. The whole value of the distilled spirits from molasses, grain, and fruit, made in the United States, appears to have been above fifteen millions and one half of dollars, in 1810. Much the greater part is made of grain; to these are to be added wafers, starch, hair-powder, and all the varieties of the baker's goods. Considering flour and meal, *bolled*, some times *kiln dried*, and *packed in casks for exportation*, and *biscuit so packed and prepared*, as manufactures from grain, it appears that our exports of these goods, in one year, have amounted to 1,557,000 casks, of various sizes. In fine, such is the vast importance of this branch, that, were the grain mills, bake houses, starch, hair powder, and wafer manufactories, breweries, and distilleries, of the United States, suspended in their

*Ribes on Horticulture. See Miller's Gardener's Dictionary, (folio enlarged.)

†The wines left for consumption in the United States, in 1807, were only 2,692,737 gallons, by the returns of imports and exports. The Madeiras, Burgundy, Champaign, and fine clarets, were only one-tenth.

operations, the body of the farmers and the planters would be wounded and crippled in most plaes, and paralysed in many of the States. It is an important fact, that manufactories of grain (such as the brewery and distillery) ensure this country against a distressful famine, because we could consume, in a scarce year, in bread, that which was raised to make liquors.

Such are the principal facts which occur to recollection at this time, evincing the benefit, to the cultivator and owners of the soil, from the manufactures which have arisen, unforced, in the United States. Their principal protection by duties was incidental. Those duties were imposed to raise the necessary revenue, and greatly favored the manufacturers. I proceed to submit some of those facts which evidence the aid afforded by our manufacturing industry to *navigation and commerce*.

NAVIGATION AND COMMERCE.

The construction of ships and vessels, with their boats, may be considered as having produced an accumulation of that description of manufactured property, in the year 1810, amounting to a million of tons, and worth the sum of forty-five millions of dollars, properly estimating the old, the new, and the half worn. The cloth of which the sails were made, and an inconsiderable sum in bunting or worsted stuff, for colors, with a smaller sum in optical and other instruments, are all the foreign articles, in this great value, of those indispensable requisites to commerce, navigation, and commercial defence. Although the cannon, muskets, pistols, swords, pikes, shot, ball, shells, and gunpowder, of the public and private armed ships, are now made in the United States, to an amount very far beyond the quantity demanded for our mercantile and military vessels, the cost of these articles is not included in the sum of forty-five millions, above mentioned.

The navy, private armed ships, and letter-of-marque ships, are also constructed or manufactured in the United States; and being of the utmost importance to the defence of commerce, their manufacture appears to be a proper object of statement under this head.

The working carriages employed in the various operations of commerce, with many of the scales and weights, measures, and other utensils, and instruments of trade, are made in our work shops.

The number of American articles, in the regular lists of the exports of the United States, is about one hundred and ten, of which about seventy are manufactures of the United States, subserving commerce, by affording new, various, and more convenient articles of exportation. Among these are included flour, bread, boards, and scantling, with other articles, not always considered as manufactures. But, if we did not make boards, scantling, shingles, staves, heading, flour, meal, and biscuit, the foreign sugar colonies would not take off much of our wheat and timber. The manufactures of wood and grain render the original productions or materials convenient to our general trade, and absolutely necessary to some of its branches. The value of some of our exported manufactures, as they are sometimes strictly considered, may not exceed three millions of dollars, but these constitute an interesting assistance to foreign trade, and are steadily increasing. If, however, we add 1,557,000 casks of flour, meal, and biscuit, at an average price of eight dollars, with two hundred and twenty millions of feet and pieces of sawed, split, and dressed boards, plank, scantling, staves, &c., and some other articles of a like nature, the manufacturing operation, *though imperfect*, becomes very influential on the convenience of stowage, the benefits of freight, the accommodation of purchasers, and, consequently, upon the *activity and prosperity of commerce*.

The manufacturers assist the merchants by their purchases of very large quantities of foreign raw materials, imported in their vessels. These are, wool, hemp, flax, and cotton, iron and steel, saltpetre, sulphur, hides, skins, and leather, indigo, fustic, and other dye woods and dye stuffs, lead, copper, and brass, in pigs and sheets, tin in blocks and sheets, spelter, molasses, raw sugars, cocoa, mahogany and other cabinet woods, wines and spirits, for medical manufactures, rags, and many other articles, with coal for the supply of their laboratories, furnaces, forges, and work shops. The manufacturers also purchase, for their domestic consumption, great quantities of imported goods, benefitting the merchant.

The transportation of American raw materials, fuel, and building materials, for the workmen, occasions a very great trade and business in boats, shallops, and coasting vessels, highly favorable to the merchants who own them; and the transportation of American manufactures, in like manner, to the markets on our rivers, bays, and coasts, is profitable to the owners of vessels. In Great Britain, the largest portion of the tonnage in any branch, is that in the coasting trade. This branch of manufacturing commerce rapidly increases.

The most distinguished modern commercial countries in the world import great quantities of raw materials, and export large quantities of manufactures. *These operations constitute, in fact, the greater part of their commerce*. In those countries, many of their most respectable merchants have become partners in their manufactories. The export trade in British manufactures, before the wars which have grown out of the French revolution, constituted much the largest part of their outward trade, and it seems likely to become equally considerable, in proportion to their exports, on the return of a general peace. This export trade in the valuable manufactures of the British kingdom, is now extensively conducted by persons who combine the business of the manufacturer with that of the foreign merchant, or, in other words, *who unite those two great branches of commerce in their respective houses*. A similar and great field for capital and mercantile enterprise manifestly lies open before the American merchants; and some of them have entered upon it with capital, spirit, and success. So far as labor-saving machinery has been employed in the operations, the persons who have undertaken them have proved the benefits of manufactures to the mercantile capitalist; and, in other considerable instances, the same advantageous employment of trading capital has occurred.

The banks established in the United States, which are the most wealthy and important of our institutions of property, are mercantile corporations. The deposits and discounts of the sugar refiners, millers, bakers, distillers, brewers, cotton spinners, woollen manufacturers, hatters, nail makers, iron masters, various smiths, coopers, tanners, shoe makers, rope makers, &c. &c. are highly profitable to them, and are uncommonly safe. Since our exports of our own productions are known to be worth forty-eight millions of dollars, and the aggregate value of our manufactures may be safely estimated at three and one half or four times that sum, it is plain that the custom of the manufacturers is highly important to our banking companies. Many of the manufacturers are proprietors of the stocks of the banks of the United States, and thus lend to the merchants.

Insurances on manufactures, raw materials, vessels employed in transporting them, coastwise, and from and to foreign countries, and upon the manufacturing establishments themselves, afford considerable benefit to the private underwriters and insurance companies. Many persons concerned in these mercantile institutions are engaged in manufacturing houses and associations.

The greater prosperity of British commerce, with great and various manufactures, and the lesser prosperity of Irish commerce, with fewer and less various manufactures, afford the most conclusive evidence of the benefit of manufactures to foreign trade. This is the more clear and strong, because the soil of Ireland, in proportion to its extent, is better than that of Great Britain. *The greater prosperity of British commerce, in time of peace, with superior manufactures, and the lesser prosperity of French commerce, in the same season, with inferior manufactures, is a further evidence of the benefits of the useful arts to foreign trade*. The prosperity of American trade with manufactures, in the seven years which preceded the year 1810, (the date of the following tables) was superior to that of the seven years preceding the adoption of the Federal constitution, with less manufactures, *and to the seven years which preceded the Revolutionary war, almost without manufactures*.

The richest object of commercial enterprise for the merchants of the United States is the trade of those countries which do not manufacture. Of this, the trade of our American brethren from Texas and Mexico to the Straits of Magellan, is an inestimable instance. We can import their raw materials and export our manufactures to an immense amount, with substantial benefit. Their rich products will not often be received in the ports of Europe, in our vessels, foreign to them. Their copper, crude sugar, peculiar cottons and woods, their various dyeing materials, drugs, and medicines, their wool, hides, and tallow, and their gold and silver, will be exchanged for cabinet wares, carriages, paper, refined sugar, beer, distilled spirits, candles, hats, boots, shoes, gold and silver plate and jewelry, pottery, iron manufactures, mill work, copper manufactures, machinery, types, gunpowder, arms, ships, and other vessels, boats, and various other manufactures of the United States. They do not want our pro-

visions, tobacco, cotton, lumber, indigo, and other articles of unmanufactured produce. If we had only such raw productions, commerce between the United States and foreign America would be very limited and unprofitable. As our manufactures progress, the trade with that near and connected country, and with St. Domingo, and all the countries similarly circumstanced, cannot fail to increase. Even the manufacturing nations will be induced to purchase our goods, *which can be made with the vast advantage of labor-saving machinery operating upon raw materials, exempted from the duties and other charges of importation.* If we have re-shipped to other countries tens of millions of the foreign manufactures of Great Britain, Ireland, Russia, Germany, France, and the East Indies, we may ship to the same places, the productions of our own national industry. If Great Britain, the East Indies, Germany, France, and Russia, find in foreign countries purchasers for their manufactures, we may be able to do the same. Since the Government is impartial and friendly to our merchants and manufacturers, those two descriptions of our citizens may liberally and profitably aid each other, as those do who live as fellow-citizens in foreign countries.

The establishment of many new manufactures in the United States, from foreign materials, occasions new demands for those foreign materials, to be so employed. The merchants, alone, can import those materials, and they must be imported in their ships. This facilitates remittances, which, in many trades, are difficult and unprofitable.

The greatest drain of their coin and bullion which the United States sustain, is in the remittances for manufactures to foreign countries. By our own manufactures we diminished this drain in part, and they already furnish us with substitutes for remittances in the precious metals, in a further part, by enabling us to send abroad wrought goods, to the value of three millions of dollars. Every thing that facilitates the retention of our coin and bullion, is considered as favorable to the merchants and to our commercial or banking institutions and operations. A balance of trade in favor of the country is an advantage to the mercantile body, and, by our manufactures, we shall bring more nations in debt to us, than we formerly did. So far as we export manufactures we now contribute to that end.

Manufactures, to a considerable amount, such as malt and distilled liquors, loaf sugar, cheese, candles, and soap, are consumed among the stores of seamen and passengers. Manufacturers who come to the United States, pay to our merchants passage money for themselves and their families, and freight money for their furniture and other personal property, imported in our vessels.

The commerce among the several States in the American Union, in the raw materials, manufactures, and provisions of our country, is a branch of trade more certain than any other. It does not depend upon foreign laws. Remote foreign markets are less accessible in war. The commerce among the States, always interesting, derives the utmost additional importance from the recent deperiment of too many of the naval Powers. It is an evident and important fact, that this mutual and increasing exchange of raw productions, fuel, and provisions, for finished manufactures, between the producing and manufacturing States, has become *a decisive consideration for the continuance of the Federal Union*—a connexion vital to the general commerce of the American People. *The manifest difficulty of securing justice in commercial affairs, even by the whole of the United States, affords conclusive evidence that any two possible sections, into which they might be cut, would fail to maintain the standing of a trading nation.*

THE FISHERIES.

The benefits to the fisheries of the United States, resulting from manufactures, are considerable, stable, and increasing.

Our manufacturers near the sea coast consume very large quantities of dried and pickled fish. They employ, in their manufactures, the head matter of the whale to make the superior oil. This will not coagulate, and it is fit for use in light houses and lamps, in cold and wet situations. From its purity, it is adapted to the consumption of good and well furnished houses. The residuum of the same material is used for making spermaceti candles.

The umbrella makers, manufacturers of whips, fishing tackle, stay makers, &c. employ the whale fins or whale bone, the little cuttings and chips of which have been applied to making patent brushes, composed of split bone, in lieu of strong hair.

The coarser oils are used in lamps, in many of the work shops, and in the dressing of leather; and, in short, as the manufacturers of the world, at home and abroad, use nearly all the piscatory articles, in some one form or another, so those of the United States have long used some, and have increased in the use of others; and since foreign laws burthen those articles with ruinous duties, it is certain that our manufacturers' purchases may be hereafter relied on as a great and sure support to the fisheries of the United States.

In all those particulars in which manufactures support and assist navigation, they benefit the fisheries: for, ships and other vessels, and boats of every size and description, are employed in the fisheries, armed and unarmed; and as manufactures have strong and beneficial effects upon *the coasting trade*, and all our fishing vessels, except the large whalers, are adapted to, and actually partake in, that great and sure branch of the domestic trade, it is a very important fact, that the manufactures of the United States, in that respect, greatly benefit the numerous owners of fishing vessels. Too small for most voyages to other countries, and excluded by foreign navigation laws from many adjacent ports, the transportation, for our manufacturers, of raw materials, provisions, fuel, building materials, and manufactured goods, become to them a very necessary support, whenever they are disappointed in taking fish. The fishing season is but a portion of the year. Out of that season, the coasting trade affords convenient employment to the fishing vessels.

The manufacture of salt is a very considerable aid to the fisheries. If the temperature of the climates, in which lie the best salt ponds of Europe, be proved (by the growth of the sweet orange tree) to be the same as those of the Floridas and Louisiana, and if it be recollected that the best French European salt is made without fuel, and by the natural evaporation by the sun, in a temperature corresponding with that of the Accomack coast of Virginia, the beneficial effects of this manufacture may be deemed permanent and increasing. The fairest and purest marine salt of France is made on the Isle of Rhè, in north latitude 46 degrees and 15 minutes. It is made by the sun as far north as Bourneuf, Croisac and Guesrande, in ancient Brittany, and the latitude of 47 degrees.

All the peculiar tackle and instruments of the fisheries are well manufactured in the United States, and the fishermen themselves, at leisure times, make a number of them, by which many of the benefits of domestic or household manufactures are realized. This remark also applies to the manufacture of a great part of the oil. The packing of a cask of fish, and the making of the cask and of the pickle, add as much per centum to the value of the fish, as the corresponding operations add to the value of several raw materials; some of the European economical writers, therefore, class salted and pickled meats and fish among their manufactures.

From a review of these facts, not only the peculiar benefits rendered by the manufacturers to the fisheries are evinced, but, it is apparent that the operations of the fishermen partake strongly of the manufacturing character.

DEFENCE.

It has been considered as proper to submit, under a separate and distinct head, another class of facts, relating to such manufactures as are useful or necessary to *the defence of the United States.*

It has occasionally been deemed expedient to restrain the exportation of those manufactures which are requisite for war. From this consideration, and from obvious policy, the Federal and State Governments are conceived to have wisely partaken even in the manufactories of such warlike goods, and to have encouraged them, by high duties and by advances in specie, or in raw materials. Difficulties, arising from a want of capital, are thus surmounted, in cases wherein the public purchases are often the principal, and always very considerable.

The important modern operation of casting of cannon, without a calibre, and boring them out of the solid iron, for the reception of the ball, by water machinery, was first performed at the public expense in the United States. Several armories, for small fire arms and swords, have been established by the States and by the Union. Contracts, with advances of money, not only for making arms and other military manufactures, but for importations of the proper raw materials, have been repeatedly made, and to a large amount, upon security.—Adversary belligerents have forbidden or prevented the exportation of warlike manufactures to the United States, during our late neutrality.

Indian wars, occasions of apparent danger from abroad, and the commercial demands on this country for military supplies for various foreign places, within the last twenty years, have caused very considerable attention to the repair and manufacture of arms, and to making establishments for these and other instruments and munitions of war in the United States. It may be safely affirmed, that there is no irremovable obstacle to the manufacture of every species of arms, and almost every supply of war, of good qualities, and in sufficient quantities. *A well devised system of inspection exists in some branches of manufacture, under several of the State Governments, and such a system, as to military supplies, has been proved to be indispensably necessary, by the experience of the Union and of the States, on many occasions, during the greater part of the last twenty years.* But, whatever has been the amelioration of this important operation, within two or three years, the ordinary commerce and exportation of arms, *without inspection*, is yet practicable, while the trade in flour, wet provisions, lumber, pot ashes, and other goods, in several of the States, has been wisely placed under *a very strict and salutary regimen of inspection.*

Since various foreign nations have obstructed military supplies, which we have endeavored to procure from their ports, and since the present war has imparted the contraband character to all such things, the importance of the manufactures of that description to the defence of the country, particularly at this time, is very great and manifest.

The possession of iron, lead, saltpetre, charcoal, wood for ships and vessels, for military carpentry, and for every description of the wooden implements and instruments of war, and the constant supplies of foreign raw materials, for warlike manufactures, enable the United States to make the necessary establishments. Accordingly, it appears that cannon foundries, and all other military works and shops, are as practicable as they are indispensable to the peace, union, and safety, of the country. *The difference in the situations of the United States, at the respective commencements of hostilities, in the year 1775, and in the year 1812, is greater, in respect to the various manufactures necessary to defence, than it is in respect to any other matter in the whole circle of its national industry.* In the times of the provinces, the public defence was under the care and control of an external and distant national Government, which preferred to draw the public supplies from the manufactures of the metropolitan State, adjacent to its court and offices. But now, the all important principle of internal resource, well understood, and the present state of American industry, occasion a course diametrically opposite to be maintained by the Union, the States, many associations, and numerous individuals.

LABOR-SAVING MACHINERY AND COTTON.

It is a fact, in the history of the manufactures of the United States, that, in some very important instances, the knowledge or acquisition of the means of manufacturing has occasioned excitements and exertions of the cultivators to produce the raw materials. In this complex business, success in one portion of the means has quickened the exertions to procure the remainder. In the year 1786, I became well acquainted with the fact, that *labor-saving spinning machinery was in considerable use in Great Britain.* It was understood that it was applicable, at that time, only to the *carding and spinning of cotton*, which we constantly imported from foreign countries. In the course of the following autumn and winter, repeated examinations and considerations of this subject occasioned very high expectations, from a few well authenticated facts in relation to the production of the cotton raw material in gardens and other small pieces of land, *as far north as the latitude of thirty-eight degrees and forty-five minutes,** and in some other places on the rivers of the Chesapeake bay. It was inferred, that, as the shrub or tree grew in that central degree, in our country, all the extensive region south of thirty-nine was capable of producing cotton, which is found not only in climates hotter than the warmest of those of North America, but in the torrid zone. It was therefore confidently presumed, that *the cotton spinning mill* might be brought into very beneficial use in the United States. The production of cotton in the old settlements of Virginia, was carefully examined, as a test of this opinion, and opportunities offered to make it in a manner commanding entire confidence. After the more exact information of the existence and operations of the labor-saving cotton machinery, in Europe, had led to due reflection on the importance of the vast capacity of this country to produce the proper raw material, the most effectual measures were actively pursued to excite the attention of the whole community, and particularly of *the planters of the five original Southern States.* But, though our capacity to produce cotton was so great, as we at this time know it to have always been, though labor-saving machinery was effecting wonders in Great Britain, and though common cotton was then worth, in the United States, forty-four cents per pound, owing to foreign trade laws, and though it was at a high price in many parts of Europe, several years elapsed before sufficient attention to the culture could be excited, even by the numerous publications which were incessantly made.

At length, however, *the proper consideration of this great natural capacity of the Southern States, and of the peculiar value of labor-saving machinery to a nation of moderate numbers, dwelling in a country of redundant soil,* with the all important discovery of *the saw gin*, has occasioned our cultivators to produce the requisite cotton. These two machines for cleaning cotton, in America, and for spinning it, abroad and at home, with the ordinary modes of household manufacture, have drawn the planters into an enriching revolution in the southern agriculture.

The principle of labor-saving means of manufacture being thus brought into consideration and practice, in the case of machinery; and labor-saving processes, such as the brewery, distillery, and tannery, being drawn into similar notice, *a new and very beneficial career in the national industry has been commenced by the United States.* Carded and combed wool, flax, and hemp, have been subsequently subjected to manufacturing machinery, adapted to their respective forms and natures. We have been taught that thirty thousand pieces of metal have been coined and counted in England, in a single hour, by a steam engine, adapted to mechanism, capable of application to the button manufactory, and to other branches susceptible of such operations. Several nail making machines, of curious facility and great utility, have been invented in the United States. Certain skins, formerly half expended in offal pairings, or remaining of an useless thickness, have been split, by an *American* invention, into two equal and useful parts. The simple but tedious operations of the dip manufacture of tallow candles, have been abridged or accelerated by a labor-saving wheel. The mechanism for steam has undergone a variety of new and curious modifications in this country, greatly extending the uses of that vast and omnipresent power, in modes directly or indirectly subservient to manufactures. An improvement in the construction of draught casks has been invented, to obviate the great expense of bottling malt and other fermented liquors. A simple, cheap, and rapid chemical process has been discovered, to extract the ill flavored empyreumatic oil from distilled spirits. Since the confirmation of the settlements in this country, hydraulics, geometry, chemistry, and all the arts and sciences, have been rendered very extensively subservient to manufactures and the useful arts. *Deeply impressed with the peculiar value to them of these modern aids and means,* the People of the United States seek the establishment of manufactures by every variety of ingenious mechanism, process, and device, which, while they save time and labor, manifestly exempt them from the deleterious modes of the old manufacturing system. If, in other countries, and in former times, various classes of morbid and decrepit persons were produced by the ancient method of making goods *only by human hands*, and the citizens of America shall continue to pursue, to the utmost of their power, *the use of water, steam, horses, cattle, machinery, dexterity, and various modern processes and devices, to effect the same beneficial ends,* they will prevent the creation and existence of those sickly and deformed classes of people in this country. Women, relieved in a considerable degree from their former employments as carders, spinners, and fullers, by hand, occasionally turn to the occupations of the weaver, with improved machinery and instruments, which abridge and soften the labor, while the male weavers employ themselves in superintendence, instruction, superior or other operations, and promote their health by occasional attentions to gardening, agriculture, and the clearing and improvement of their farms. The lapse of a few years will release from the restraint of the patent, *the iron bound shoe*, (the rights to make which are much diffused) when the sedentary labors of the journeymen will be greatly relieved. The dangerous services of the sedentary writer's desk have been lessened, by the printing, copper plate, and copying presses, and several pentagraphic and other graphic inventions. Many of the uses of the labors of the statuary and the painter have been attained by the multiplied portraits and scenic representations of the various classes of engravers. The

* A vicinity in the county of Talbot, in Maryland.

auxiliary part of the making of men's apparel, is extensively performed by the aid of females, formed by nature and habit for sedentary occupations. Some branches of manufacture unfavorable to health, are unsuitable to us, and will be long unknown in our country, and other branches, formerly of the same ill tendency, have been exempted from their pernicious effects by the employment of mills and the improvements in the operations, and in the construction of laboratories. It is a manifest truth, that, besides the proper personal powers, industry, and skill, of the People of the United States, we have attained by water, steam, cattle, labor-saving machinery, and chemistry, the means to effect, with an exactness and promptitude beyond the reach of manual power and skill, *a great variety and number of manufacturing operations.* These *wonderful machines*, working as if they were *animated beings*, endowed with all the *talents* of their *inventors*, laboring *with organs that never tire*, and subject to no expense of food, or bed, or raiment, or dwelling, *may be justly considered as equivalent to an immense body of manufacturing recruits, enlisted in the service of the country.**

In order to display the present form and nature, and, in some degree, the extent of the arts and manufactures of the United States, the substance of the returns of the marshals and their assistants will be presented in the form of tables, in the third and fourth parts of this statement. In submitting this body of new evidence, it is necessary to state, that the information it contains is of various dates, in the last five months of the year 1810, and that it relates to the whole national population of that time, being 7,239,903 persons, of both sexes, and of all colors, ages, and conditions. Though many of the officers and assistants have performed this new and difficult service with great zeal and intelligence, yet various causes have concurred to occasion *numerous and very considerable imperfections* and omissions in returns from cities, towns, and villages, townships, hundreds, and counties, and as to valuable branches and articles, from States, to be observable. In these first sets of tables, it has not been thought best to supply these by estimates, which might be erroneous and sanguine. It was observed that there were some instances of goods of a doubtful nature, or which could not be considered as manufactured, in so material a degree as to entitle them to be placed in the class of "*manufactures.*" These have been separately exhibited, but are considered as sufficiently relative to the subject of the statement to render these imperfect returns of them useful both to the various departments of Government, and to those who are engaged or propose to enter into the manufacturing business.

PART II.

A collection of additional facts, tending to shew the practical foundations, actual progress, condition, and establishment of the American Arts and Manufactures, and their connexion with the wealth and strength of the United States.

In the tables which form the third and fourth parts of this statement is contained the result of this first attempt of an extensive and populous country, or perhaps of any country, to ascertain, in detail, the facts which constitute and display *the actual condition of its manufactures.* The duty was additional and secondary to the periodical enumeration of the People, and required a longer period of time than was allowable for such an enumeration, enjoined as a basis for the distribution of constitutional power. The period of the two measures was not sufficient for correspondence between the superior and subordinate officers, which would have produced more perfect details and greater uniformity and perspicuity. It may, however, be affirmed, that the tables contain a great number and variety of clear indications of the state of the manufacturing branch of the national industry, and a mass of positive evidence upon the subject, in relation to the Eastern, Northern, Middle, Southern, Atlantic, and Western sections or grand divisions of the country, with respect to the forms or modes of the manufactures which have grown up, the raw materials upon which they operate, a very considerable portion of the value to which they have arisen, very useful data for the comparative value of *internal commerce or manufactures, and external commerce or navigation and foreign trade*, and much elucidation of the operations of manufacturing industry upon the commercial and the landed interest, and upon the public safety.

From the official papers on which the tables are founded, and from many other sources, some additional information, not reducible into regular columns, has been collected, which it is now proposed to submit in the form of statements, concerning several branches and denominations of manufactures and the connected machinery. To show the importation of manufactures *in the first year of the present constitution*, the substance of the return of that year of ordinary trade, will be added. The national population was then nearly four millions of persons, and the value of foreign manufactures was about fifteen millions of dollars. Some of the non-enumerated or unspecified goods were certainly not manufactures, but their value is not considerable, and may be fully allowed for by the deduction of \$295,688 98, which has been made from the amount of the return. Distilled spirits were not included among these imported manufactures. If our population be taken at seven millions and a quarter, in 1810, our demand for foreign manufactures might be contemporarily estimated at \$27,187,500. But, on the one hand, importation has been increased in consequence of a freer consumption, and the business produced by increased wealth and other circumstances. On the other hand, the consumption of foreign manufactures has been diminished by the great increase of those of the United States. The exportations of manufactures, in the year 1807, are afterwards given, so far as they appear on the face of the general custom house returns; but it is considered as a certain fact, that a greater value is exported than appears from that document.

A very great number and variety of literary productions, foreign and American, diffuse the knowledge of labor-saving machinery, processes, and devices, and quicken the progress of manufacturing industry and skill. *Those which favor family or household manufactures are peculiarly interesting.* It is respectfully suggested, that it would repay the expense and pains, if measures were taken, under known public authority, to ascertain and exhibit, by plain descriptions or specifications and engravings, the best set of implements, instruments, utensils, and machinery, existing in the United States, to render household manufactures more and more easy, expeditious, convenient, economical, and profitable. *The fly shuttle* is considered as a very valuable invention, but, though it has been known in this country many years, more than ninety-nine hundredths of our shuttles are not of that description. The same observation occurs as to spinning mills, mules, jennies, &c. The stocking loom, though so much more rapid in its work than the knitting needle, has not been yet, by any means, sufficiently extended. It is more convenient, in a private family, than the smallest cloth loom, or the great spinning wheel.

It is necessary to observe that several facts, in the first part of this statement, will be found in this second part. They were given in the former, on the ground of *the general economy and policy of manufactures*, merely to show their influence in favor of agriculture, commerce, the fisheries, and defence. In the following statements they are adduced *in a strict practical view*, to manifest the state of *the respective branches of manufactures* and of the specific means of their execution.

COTTON.

This raw material being the *only redundant* one produced in the United States, adapted to the manufacture of cloths for apparel and furniture, and being the most susceptible of labor-saving operations, the cotton branch will, probably, become, very soon, the most considerable of our manufactures. It is adapted to all seasons, in its various forms, and to a greater variety of uses than any other cloth or stuff. While sheep's wool continues to be much more wanted, cotton wool will be proportionably used as a substitute for it in blankets, corduroys, velvets, and the chain or warp of goods, with woollen wool or filling. Cotton goods can be printed—an operation seldom

* The diminution of *manual labor* in Great Britain, by means of *machinery*, in the *cotton business*, was estimated, in the year 1808, at 200 to 1. An able writer and artist, (Mr. John Duncan, of Glasgow) considers it to be much more.

performed on woollens or silks—never on hempen goods. They are substitutes for worsteds or stuffs of combed wool, and for silks, which are made of raw materials, not yet considerable in the United States. The cotton raising States are the most numerous employers of family looms. Improvements in the household carding machinery, spinning machinery, loom and shuttle, and in family bleaching and dyeing, are producing new and great facilities, savings, and profits, in the manufacture of cotton goods by the farmers and planters. The cotton cloths, for various uses, manufactured in the United States, exceeded in *measurement*, in the year 1810, all the other cloths, that is, all the cloths of flax, hemp, wool, and silk; and the progress of the cotton branch is greater than any other, and, indeed, greater than that of all the others. *Capitalists can most easily extend themselves in the cotton manufacture, because the raw material is abundant, and capable of being conveniently and promptly increased.* The United States have some palpable and great advantages, over their foreign rivals, in the cotton branch. Those of Europe depend upon foreign agriculture for the raw material, for the indigo dye, and, in a considerable degree, for their bread stuff. Those in the East Indies will not be allowed, or be able, to use labor saving machinery. Improvements in the looms, and other things, are opposed by force in Europe. The expenses, costs, and charges of transporting cotton from the farms and plantations, even near the coasts of the United States, to the manufactories of Manchester, Glasgow, and Rouen, and the same charges upon the manufactured goods from Manchester, Glasgow, and Rouen, to the houses of the planters and farmers in America, are equal to fifty per cent. upon the European costs of the finer, and seventy per cent. upon the coarse, heavy, and bulky goods of those great manufacturing towns. Every person capable of working in the manufactories of woollen, linen, hempen, and silken cloths, can become, in less than a week, a good cotton manufacturer. The cotton branch, in the United States, is the great resort of all unemployed cloth manufacturers, and there is here no impediment to a person's changing his trade or employment, or place of business. Every man and woman in America, uncharged with crime, is free of every city, town, borough, village, hamlet, township, hundred, and county, and enjoys the freedom of every occupation, trade, and calling. The chief American bark and other dyes, and particularly the costless dye, called the *iron liquor*, made by covering useless fragments of that metal with vinegar or the pyroligneous acid, are convenient coloring for cotton yarn and cloths. A great *desideratum* in the manufacture of cotton is a method of giving it a true *scarlet* dye, which no art has, hitherto, been able to fix in goods made of this raw material. It has been, for many years, the subject of an offer of a very considerable premium in Europe. The Americans make good red cotton for the weaver, superior to Turkey yarn.

In consequence of numerous and particular inquiries and communications, in and from all parts of the United States, it satisfactorily appears that the skill, the means, and the scale of the year 1810, in the cotton manufacture, have been very greatly improved and extended, and that the capital, machinery, and establishments, have been very much enlarged and multiplied. The cotton blanket, which is a luxury on the continent of Europe, is a matter of great economy in the United States. It is an excellent covering. The double twilled cotton cloth, for apparel and furniture, begins to rival the immense invoices of foreign ticklenbergs and other stout linens. Similar facts occur in a variety of other instances. *Heavy cotton goods cannot be imported without a loss.* Fancy goods offer the greatest profits, and, in many instances, are easy of imitation. In household manufactures, as soon as it happens that the stock of flax and wool is exhausted, the industry of very great numbers of families of the Middle, Northern, and Eastern States, is applied to our redundant cotton, which is every where for sale, and pays no import duty or excise. Every additional working hour, in a day thus employed, is an addition of one twelfth part to the domestic manufactures of the country. *It is highly beneficial to possess an unlimited raw material, which, at once, invites and impels to sober, steady industry, and facilitates its operations.* One natural effect is, to render every industrious female an artizan, whenever her household duties do not require her time. The general practice of manufacturing cotton in families, not resident in the cotton raising district, prepares those families, by their habits of industry and their skill, for that extension in the woollen manufacture which the rapid multiplication of sheep must very soon occasion.

A large quantity of cotton is used as chain or warp, with woollen wool or filling, and it is used as wool or filling for goods with flaxen or hempen chains or warps. It has nearly superseded the use of flax in the manufacture of hosiery, and is, sometimes, mixed with wool in making stockings. Cotton is well adapted to use, in stockings, in our Southern winters. It is believed that it would be favorable to health if the colored laborers were supplied with a cap of thick undyed cotton swanskin, similar, in form, to the highland woollen cap of North Britain. Fevers, and morbid strokes of the sun, would be prevented by the protection of the head.

WOOL.

The manufacture which is next in rapid improvement and extent to cotton, is that of wool. It is very considerably aided by the new carding and spinning machinery, by the introduction of the merino, Barbary, and long woolled sheep, by improvements in the breeding and tending of the general flocks of the country, by superior care of the growing fleece, by the increase of the value of the carcass or mutton, by the sorting of wool, by improvements in the stocking and cloth looms, by the acquisition of the *fly shuttle*, and of machinery to dress and finish cloths, by increased skill in the workmen, and by improvements in the arts and business of fulling and dyeing, to acquire which, great exertion and expense are applied.

The present growth and production of English wool is supposed to be most accurately estimated by Mr. Luccock, of Leeds, in his late publication. It is believed to decline. The soil is insufficient for the population. He estimates it at ninety-seven millions of pounds per annum. If the whole quantity of the united kingdom be taken at one hundred and twenty millions, and if two third parts be used by the British and Irish people, it will give eighty millions of pounds for sixteen millions of people, or five pounds per head, whether infant or adult. This is exclusive of foreign wool and the increased cotton substitutes. In the same proportion, the United States, if they contain, at this time, eight millions of persons, would require, were our climates as cold, forty millions of pounds. If it be considered that half our population lies to the southward of Pennsylvania, and that their cotton is a very convenient substitute for wool, it would appear that forty millions of pounds weight of sheep's wool is a good supply. It is believed, from the facts stated and considerations suggested on the subject of wool, that the supply of 1812 does not fall short of twenty to twenty-two millions of pounds. Not only have sheep been multiplied, but their fleeces have been increased in weight, and much better preserved. A very few years must increase our wool to forty, fifty, or sixty millions of pounds, when the exportation of woollens must take place: for, it is not doubted, that our housewives, manufacturers, and machinery, will continue to make up all the wool our sheep will yield. The stocks of fine woolled sheep in Spain and Portugal are, unhappily, diminished, neglected, and injured, as well in the fleeces as in the bodies of those animals. Our principal source of European supply of fine wool is then reduced in quantity and quality, while prices are advanced. Our own stock of fine wool is, therefore, the more convenient and beneficial, and the manufactory of it is the more highly encouraged and greatly assisted. The most strenuous and judicious efforts to increase the *quantity* and *quality* of our wool have occurred within the two or three last years, while our adventitious gains of sheep and wool have been far greater than in any past time. Yet the manufacturers (with their machinery) have so increased and extended as to advance the prices of wool, and even to produce continued importations. Considerations of *revenue*, at least, have occasioned the *actual encouragement* of increased duties, in the last year. The simplicity of the prevailing colors in the woollen branch, for some time, has been favorable to the United States, and continues to be so in the present state of their woollen manufacture. Scarlet, purple, garnet, crimson, claret, maroué, and pea green, are more difficult to dye, fix, and finish, than drabs, bottle greens, grave mixtures, and browns. Several extensions of the woollen manufacture, produced by interruptions of the importations from Europe, and by the increase of wool, are particularly convenient to this country, because they do not require the aid of fulling mills, and may, therefore, be executed in families, and by manufacturers within their own working places. Flannels, common woollen stockings, and hats, are among the goods contemplated. These are commodities of very great consumption, and as necessary as any other woollen goods for the general population, and for the supply of the army and navy.

The spinning wheel, the loom, and the fulling mill, are real aids to manual labor. The two first have been long invented. The last is a far more recent discovery. It has been little improved since its invention. *If nice skill in using the fulling machinery is of the greatest importance to the success of the woollen branch, it is very desirable to awaken the most particular attention of the manufacturers to this operation and mill.* The fulling of hosiery is practised in Pennsylvania, in that description which is called the *Germantown stockings*. It particularly adapts them to the *comfort and trying service* of the army. The fulling of hats is yet a manual labor. Wool, and other animal substances, are capable of being fullled. Vegetable substances are not deemed capable of that operation. The improved carding, spinning, and shearing machines, the house cloth loom, and stocking cloth loom, are all capable of saving labor. Dying saves the domestic labor and expense of washing, while it prevents all that injury to the pleasantness and beauty of woollen cloths, which frequent washing occasions.

No branch of manufactures receives so great an accession of foreign workmen as the woollen branch, because the raw material and manufacture are universal in Europe.

No branch, of the manufactures of the United States, receives so great a propulsion, from *our immense landed capital*, as the woollen branch; because sheep are produced in every section of our country. *Cotton has a natural or climaterial district*, and requires a very limited portion of it. *Wheat has a practical district*. Hemp and flax are limited in their cultivation by the state of population and employment. All these require the steady labor of many hands. *But the field of sheep walks is as extensive as our territory, and sheep farming is universal. It must become very extensive.* They do, themselves, much towards the care they require. The quantity of land which would maintain the greatest stock, belonging to any country in Europe, is but a minor fraction of our soil. Wool, then, must become abundant, and household manufactures, machines, and artizans, ensure the conversion of it, as fast as it will increase into materials for apparel and furniture, and into other merchandise, for domestic and foreign trade and consumption.

Of all raw materials, none is capable of conversion into manufactures, so favorable to health, as wool. It is extensively and indispensably necessary to the enjoyment of that blessing. A great number of persons, of both sexes, and of all ages and conditions, require woollens for their comfort and their safety. There is no other good material for carpets; no other *capable material for common hats and winter stockings*; no other which preserves, in the human body, that constant, and equable, and insensible perspiration, the want of which brings early pain, disease, and death. No material for cloths, for furniture, and apparel, is so safe as wool, in respect to fire. No abundant one, for these purposes, is so capable of economical and elegant colorings or dyes. Wool receives, and better than any other material retains, every tint, every shade of color. The goods of this manufacture are of very great variety and compass; beginning with three shillings, sterling, per groce of yards, in the shape of woollen bindings, and rising to fifteen dollars per yard, in the form of superfine broad cloths, of the best Peruvian or Vicunia wool.

IRON.

The red appearance, produced by iron, in our burnt clay, in every State and county, proves that character or quality of our soil. The ore is very abundant and widely diffused. The extraction of the metal, in the best condition, the conversion of it into steel, and the manufacture of it into all the necessaries and conveniences, belonging to this extensive and useful branch, are facilitated by the omnipresence of wood, and, consequently, of charcoal, and by rich and numerous veins of fossil coal, appearing, in many places, on the surface of the earth. These are present magazines, and uncommonly strong symptoms of immense latent treasures of that fuel. *The manufacturers of iron wares loudly call on the owners of mines of that metal to open more of them, and to work the whole upon a far greater scale.* Machinery, to work up pig iron, has been wonderfully invented, extended, diversified, and multiplied, in this country, since the impediments, from the year 1750, from external legislation, ceased to exist. Every year enlarges and diversifies the iron and steel manufactures. They are much too numerous for a detailed statement. Castings have been made in very increased quantities. Those for the use of manufacturing machinery, alone, have been computed at one thousand tons per annum. The common blacksmiths' work, though, of necessity, very imperfectly given in the tables, is a branch of manufacture of great amount, and is performed in every section of the United States, however agricultural, and however peopled. *The improvement of the system and tools of these workmen, and, particularly, the introduction of labor-saving machinery into their shops, would be a very substantial benefit to them and to the country.* The blacksmiths' shops are, in effect, *primary schools of the arts*. The cut nail machinery has been very beneficially introduced into some of these shops, near to the iron furnaces, ensuring the profitable employment of all the time not otherwise occupied. It is like the two spinning wheels and the loom among the women, in private families. The greatest nail making State produces at the rate of nine pounds of nails for each person in the State; which is at the rate of *sixty-five millions of pounds* for the whole white population of the United States, were equal attention paid to this gainful economy of time and labor. There are many blacksmiths and nail makers among the people of African birth and descent.

There being, in effect, no limit to our fund of charcoal, the extraction of pig metal from iron ore, the refining of iron by the second process, as also by the forge hammer, and other modes of compression, and the formation of it into manufactures, by all the operations which require it to be heated to the malleable degree, are, therefore, performed without any of the injuries to the metal, arising from fossil coal, and with all the benefits resulting from carbonic fuel. As the extent of our territory ensures a very great duration to our stock of charcoal, by mere natural reproduction, and generally without the labor and expense of plantations, our iron manufactures must be very good, permanent, and highly beneficial. There are great quantities of iron adjacent to forests, which continue to impede the cultivation of the richest soils. Practice, the sciences, and imported aid and skill, add yearly to the degree of ability we possess in the iron branch. The rolling and slitting mills, the nail mill, the tilt hammer, the grinding and polishing mill, the wire mill, and all the great variety of iron works, except the common furnace and forge, were assumed to be prohibited by the act of the British Parliament, of the year 1750, restraining the manufacture of iron beyond the pig and the bar. The iron and steel manufactures of Great Britain were raised, in 1785, to the value of fifty millions of dollars. The United States formerly exported much iron, but they now import a far greater quantity in bars, and some rolled and slit. The returns of the quantity of iron manufactured are very imperfect, yet much is exhibited on the face of those documents. This branch has been very fruitful in inventions and labor-saving devices, both at home and abroad. In the moments when we feared difficulty and injury for the want of certain necessary things, the manufacture has been suddenly attained and established. This is remarkably the case as to *common steel, iron wire, and edge tools*, the manufactures of all which have been greatly advanced since 1810. The variety of iron goods returned by some of the States and counties, proves, to all who are acquainted with this country, that great quantities and values of the same kinds of goods are omitted in the returns from other States and counties. The improvement and extension of the cast iron manufactures, including cannon, cast solidly, with a spruce head, and bored out, have been very great. The saving of the labor of the manual hammer, which is a chief benefit of small castings, and of the tilt and trip hammers, have given extraordinary activity to this branch of the iron manufactory.

The course of things is very strikingly altered with respect to both the commerce and manufacture of iron. The iron branch is more extensive and perfect in Great Britain than in any other country. It is worthy of note, therefore, that considerable quantities of iron and steel are imported, even from that country, into the United States, proving our capacity to manufacture iron goods. The duty alone prevents much more considerable importations of British iron. The English iron manufactures were very extensive in 1783. But in each of the five years preceding 1800, they imported, on an average, 41,000 tons of bar iron. Many British workmen of their furnaces and forges have migrated to the States on the Baltic, and to other parts of the world, induced by the temptations of countries *full of iron and wood*. The scale upon which iron works have been lately conducted in Britain, the use of the steam power and the charring of pit coal, have produced great benefits to the owners of iron works. Every thing that saves, or which is equivalent to the saving of labor, in the business of the furnaces, is of peculiar importance to the countries possessing abundance of iron ore. The extension of our manufactures is not impeded by any want of the means to

work it, *when procured in the first simple state of pig metal.* The extraction of metal from the ore involves much expensive labor. Much business is done in labor-saving manufactories, much in the common manual shops, since we can make the wire and working cards, and cannon, small nails, and anchors, spinning-wheel irons and mill work, screws and plough-shares; and as we have raised the price of bar iron from sixty to one hundred and ten dollars, since our Revolution, our capacity in the iron branch cannot be doubted. But the most weighty fact, respecting the state of our iron manufactures, is, *that we cannot procure enough of pig metal and bars to satisfy the great and increasing demands of labor-saving mills and machines, and our numerous handicraft workmen.* A principal improvement in the iron manufacture would be, to make more valuable descriptions of goods, such as cutlery, fine tools, needles, watch springs, and other nice wares.

HEMP.

The growers of this raw material are said to suffer very considerably from the sacrifice of the quantity and value of their crops, by imperfections in rotting and preparing it for the manufacturers. An injurious conversion of a great number of strong and good fibres into tow, by the want of skill and care in the preparation of it for the spinner, too often occurs. This strong and harsh raw material is also rather unsuitable to the numerous class of female spinners and weavers. The labor of the culture, preparation, and manufacture, of hemp, occasions it to be nearly excluded from the operations of household manufacturers, in which respect it is on a less convenient footing than flax. *Its great importance to defence obviously recommends hemp to the most particular attention and consideration.* Its region, its soil, its seed, its mode of gathering, rotting, freeing from the stalk, dressing, keeping, spinning, weaving, finishing, and uses, merit thorough investigation, very intelligible specification, and extensive diffusion, so as to ascertain, preserve, and make known, all those things, with the best instruments of its culture, preparation, and manufacture, and the selection of its seed for propagation, oil making, and all other uses.

In the spinning of hempen yarn, water and steam mills have been introduced. In making twine, and even in making cables, horse machinery is used. The improvements in weaving are more likely to be successful in the manufacture of hemp than in any other raw material, *from the great strength of the yarn.*

No manufacture appears to demand, in a greater degree, the aid of *joint stock, or associations of capitalists and manufacturers.* It is possible that such companies might very favorably effect the cultivation of hemp, by purchasing it of the planter, *in the state in which it is first separated from the root or ground,* in the manner in which some of the Louisiana cane growers sell to a sugar manufacturer, *the stalks of the cane,* as soon as they have been cut. Such *divisions of labor* have many favorable effects, and some particularly desirable in this country. When the manufacturer buys *sugar canes* to make sugar, or *hemp in the stalk* to rot, and otherwise prepare, he, in effect, carries his manufacturing laborers into the present system of cultivation, by making them perform certain labors, which the farmer's people have hitherto performed. The manufacturer also brings his money earlier into the hands of the farmer or planter, and he saves him all the capital requisite for works, tools, instruments, and wages. The operations of the manufacturer also save labor, either by machinery, or by the superior skill and dexterity of those *who follow one art or branch of industry.* There is an useful reaction of all the adjacent arts and trades upon the neighboring cultivators, leading to care in all the parts of agriculture necessary to the production of excellent goods in the best condition. Our numerous flour millers are ever checking the farmers who offer them bad kinds of wheat, or unclean, or mixed with rye or garlic.

Positions in the best hemp districts of the United States, where the strong nature of the soil tempts, or impels to the cultivation of hemp, and where fossil coal abounds, appear to be fit places to bring forward the manufacture of hempen cloths, yarns, twines, and all other goods which are convenient to handle, to store, and to transport; and which are not, like cables and ships' cordage, liable to be injured by the tar used in their manufacture. By manufacturing hemp at the place of its growth, in such situations in Kentucky, the great and useless charges of transporting the offal, the tow, and the good hemp, in an unmanufactured state, would be avoided. The best part of the materials, increased in value by the costs and profits of the manufacturing, would better sustain the charges of sending them to the other States, or to the sea ports, for the foreign trade. This raw material affords the strongest evidence of the absolute necessity of manufactures, and of adjacent manufacturers, especially by labor-saving machinery, to the prosperity of agriculture, and to the certainty of public supplies. Had we not cultivated and manufactured hemp, in the time of peace, we must have suffered for want of the manufactures in time of war. Measures, even to force such manufactures as are really necessary to the public safety, are not uncommon in the United States. A printed investigation into the cultivation, manufacture, and uses of hemp, with engravings, from the seed to the completion in cordage, cloths, and other supplies of war, by sea and land, would be of great public advantage. One foreign nation went into such a measure, and displayed before the people, in the most perspicuous manner, all the operations of forty arts and trades, most important to agriculture, war, domestic service, and foreign trade.* No country would be more promptly moved by such measures than the United States. The minds of the people are open to useful information, and those who receive conviction from such information, are under no restraints of local or professional privileges. The freedom of trades, and the freedom of towns, as they exist in some countries, are deductions from the general freedom of the national industry.

FLAX.

Habit, convenience, and necessity, especially without the bounds of the cotton district of the United States, occasion an extensive cultivation, preparation, and manufacture, of this raw material. The foreign countries which are most distinguished in this branch, have not yet made any considerable use of labor-saving machinery, and have few regular factories in which flax is prepared, spun, twisted, or wove. They have, until lately, depended entirely upon household industry for the preparation and spinning. In the United States, the branch has risen to its present considerable height chiefly by the same means. Within a few years, machinery saving labor, in a greater degree than the common spinning wheel, has been introduced into regular establishments, and even into private families; also machinery to double, treble, and twist. There appears no reason to doubt that the flax manufacture will maintain a respectable ground in the United States, by the industry of common spinners and weavers, by little and great labor-saving machines, by the fly shuttle, and by some of the improvements of the loom. Such an investigation and display of all the operations and instruments of the culture and manufacture of flax, as have been suggested in regard to hemp, would be equally useful with a view to profit, though not so important to the defence of the country. The spinners and weavers demand of our merchants their constant aid in the importation of flax, for our cultivators do not keep pace with the wants and progress of the manufacturers; and in proportion as labor-saving machinery and capital shall be introduced into this branch, still greater exertions of the landed interest will become necessary. The household manufacture of flax is the most general, and the most familiar of all the family operations, relating to cloths for apparel and furniture, in the United States. In consequence of habits so prevailing, all we can raise is manufactured, and all we can import. This branch also affords conclusive evidence that even handicraft operations will succeed in the household way.

GOLD, SILVER, AND THE FINER MIXED METALS.

The increase of capital, with the consequent freedom of consumption and extension of manufactures and commerce, has occasioned goods made of these materials to be greatly multiplied, diversified, and improved. Gold and silver wares are made in all the considerable towns, and have reached a very high degree of convenience, excellence, and beauty, in some places. They are not only equal to every possible demand of the country, but our present workmen could make a stock of gold and silver wares, for foreign sale, equal to the quantity exported by any nation of Europe. With common care, the standard quality is good and uniform, the branch being in the hands of an intelligent and respectable class of citizens, and if it were chosen to raise the standard of quality in such inconsider-

* The French exposition of the arts and trades, called "Dictionnaire des Arts et Métiers."

able degree, as to make the silver plate a little superior to the purest foreign standard, and to establish an assay, the operation would probably be quite as pleasing to the conductors of this branch of our manufactures as it would be practicable and easy.

The use of rollers, and other contrivances, to save labor in some degree, have been gradually introduced into the gold and silver manufactory; but, being numerous, they have, though small, at length reached to a considerable aggregate importance. They would, indeed, be, at this time, highly convenient and valuable, did not taste and fashion, to the dominion of which this branch is peculiarly subject, render it unsafe to make a too large stock of goods, though exhibiting, in their forms, every line of beauty and of grace.

The goldbeater's trade, or that of the manufacture of gold leaf, has been recently introduced into the United States. The metal is prepared by labor-saving rollers, which reduce it to the thickness of a hard, tough, and very thin letter paper. Silver is similarly manufactured into leaf. The city of New York has attracted the most conspicuous and greatest number of these artists. It is understood that they are well established and prosperous. The workmen of Europe, in all branches such as this, are much incommoded by the fluctuations and distresses of that quarter of the world, and they now find encouragement here. This is the case with all that description of artists who are employed in making the more valuable metal ornaments, trinkets, set work, of glass, valuable stones, and paste, in gold, and silver, and jewelry.

Plated work, and the fine and common mixed metal buttons and buckles, are made in very considerable quantities, by foreign and native workmen. Casting and machinery afford them great assistance.

Button making has become a lucrative and regular employment in the United States, and is far more considerable than appears by the returns. The rollers for small and fine work are not sufficiently numerous and dispersed, or all the necessary supplies might be made with ease. The rolling and stamping apparatus greatly saves labor in button making. The American cast button is so cheap, that it can rarely be imported. Water mills and steam engines, to roll and stamp, in the manner of Europe, will quickly possess the United States of the entire manufactory of buttons, and other small metal goods, for seven millions and a half of people, with opportunities of free and unburdened exportation.

HIDES AND SKINS OF DOMESTIC AND WILD ANIMALS.

Every description and variety of leather is made here. So entirely and easily are the raw materials worked up by the tanners, leather dressers, and other manufacturers, that even the deer skin, which was formerly prepared in the buff mode only, is now much more frequently and extensively tanned and dressed as russet or colored leather. That species of skin alone has been heretofore exported in the unmanufactured state. Fine and delicate skins, which were not formerly known as raw materials, are now imported, and handsomely dressed, finished, and made up into ladies' shoes, pocket books, and other goods. The demand for skins, in this extensive and successful branch, has occasioned a curious and effective invention, to split skins, producing a double quantity of covers for books, and other purposes. The hog skin is tanned in some places, but it is too often neglected and lost, in the shape of mere offal of fresh, pickled, and smoked meat. Being particularly fit to make strong and handsome saddlery, the farmers will profit by attention to the best management of their hog skins, in all the States, as they now do in some. The proper oil of fish is not so abundant as it formerly was, nor obtainable in interior situations, without a great expense; and it is possible, that the congenial fat of the skin of this animal may occasion it to be better and more easily preserved than the skins of horses and oxen. A judicious course in manufactures is to consider the true fitness of the various materials, and to put each kind to its proper use.

The facility and utility of the manufactory of leather, is every where such that the utmost ingenuity has been exercised upon the subject of the sources of the raw materials, and the economy of them when manufactured. A considerable premium has been offered, by the French Government, for the invention of the best and cheapest substitute for leather, for the covers of books.

It would favor the Indian trade, which has a great tendency to conciliate the aborigines, if the manufacture, and a greater consumption of deer skins, could be effected in our frontier towns. It would give activity to the Indian commerce. The transportation of dressed skins from thence, would not be subject to so heavy a rate of expense, in proportion to the increased value, nor would they suffer, in their substance, as they now do, from the worm, and from fermentation and decay.

The present and constant manufacture of all our hides and skins, affords the manufacturers an opportunity to devise and perform such things as, by increasing the beauty and goodness of their commodities, will enhance the aggregate value of the leather branch. Much utility and profit may be derived from *superior* tanning, coloring, dressing, workmanship, fancy, taste, and economy, *in the whole range of the operations of the leather manufacturers.* The elegance of our improved book binding is an example. The abundance of farm lands, and the distance of many of them from the seaports, render it certain that the United States will always be one of the greatest cattle raising and meat eating countries. *Of course, there will be in our markets a great quantity of North American hides and skins.* Bark, lime, and water sites, are, in many places, rarer incidents in country tanners' possessions and general situation, than things required to be specially sought, purchased, or hired. Whatever is properly made of leather, is a commodity of the most useful and durable nature. There are no commodities, the surplus of which will more certainly command a good and sure foreign market, than the manufactures of this raw material. As the nature of the country, and of many things in it, give a great fund of fixed and necessary capital in this branch, so it is true that there is a very large *moneyed* capital constantly employed in it. The Southern planters have, in many instances, made tanning a household or plantation business, which they may generally do with a little attention to the practice, and the addition of the pleasure of a little relative chemical reading. *Were chemistry, in particular, and the general science relative to the fine and useful arts and manufactures, made a branch of domestic and academical instruction, it would greatly and permanently redound to the dignity of the American mind, and the solid internal profits of the business of the country.* Such a course of instruction may be commenced at an early age: for exhibitions of this nature, internal compositions, mixtures, attractions, fermentations, and decompositions of material objects, are as amusing as instructive, and all these are pleasingly and intelligibly displayed *in experimental philosophy.*

It is believed that the present annual value of the leather manufactures of the United States exceeds that of any other nation, in proportion to the population, though the prices in America are lower, and the goods are nearly all of the useful and necessary, and not of the fine and showy character; and, as they are chiefly by the mere manual industry, and are not much aided in the domestic or household way, they establish our capacity for general manufactures in the ordinary modes.

MAPLE SUGAR.

This useful and valuable commodity has been heretofore generally estimated as one which this country was rather able than likely ever to manufacture in a considerable quantity; yet, incomplete as manifestly are the general tables, in which eight only of the twenty-six districts return the maple sugar manufactured, and defective as are the subordinate returns from nearly all the States which have noticed the commodity, it is found that 9,665,108 pounds of maple sugar are proved to have been made in the year 1810. It is considered that seventeen millions and one-half of foreign sugar, with perhaps three millions and one-half more, of maple sugar, supplied our consumption in 1790, when the population was four millions of persons. Four millions of pounds might be added for the weight of molasses *used in substance.* Our present population would, therefore, probably enjoy a comfortable but moderate supply of foreign and domestic sugar, in fifty millions of pounds of the crude or Muscovado, allowing, for obvious reasons, a freer consumption now than heretofore. It is not rare for careful, attentive families to make three or four hundred pounds weight in a season. If two hundred and fifty thousand families (of the one million two hundred and fifty thousand families which compose this nation) were to make only two hundred pounds each, or five hundred thousand of those families were to make no more than one hundred pounds each, we should have the requisite supply of fifty millions of pounds. The State of Ohio, with a population equal to about one-thirty-third

part of that of the United States, returns three millions and twenty-three thousand eight hundred and six pounds of maple sugar. If the whole Union were to manufacture at that rate, it would produce above one hundred millions of pounds. Thus are the calculations of the year 1790 fully realized, though deemed then sanguine and fanciful. *The preservation and general propagation of the sugar maple tree, therefore, very strongly press upon the public consideration.* This substantial and energetic nation can effect, with ease, what the youngest member of the Union, in 1810, struggling with the forest and the savage, performed *in mere ordinary course.* The thorough investigation and display of this subject, from the natural history of the tree, through the course of exposure, seasons, treatment, management, and manufacture, till its formation into refined loaf sugar, and to the death and new plantation of the tree, with its qualities and various uses as wood, and with due attention to the implements, utensils, process in a manufacturing and in a chemical view, in all the possible details, appears to be earnestly demanded of the Government. This effort would induce its reward in almost every township, by the benefits which would result from the mere excitement of a general attention to the manufacture of so pleasant, so profitable, and so nutritious a production. To be fully and universally aware of an attainable advantage, is, in such a case, to ensure the attention necessary to obtain and preserve it. The season of making maple sugar is from the middle of February to the end of March, when the farmer and his family have little business to employ them. Five pounds have been stated as the produce of a tree; but if four, and even three pounds be taken from each tree, on an average, seventeen millions of trees will produce fifty-one millions of pounds of sugar. There are frequently forty trees upon an acre of land; but, if there be only thirty-four, then five hundred thousand acres (a quantity of land inferior to very many single counties in the United States) will yield the whole necessary supply. The reserved wood lands of our farms is, on a medium, more than a fourth part, even in our old counties; wherefore, a tract of two millions of acres (of which three-fourths might be cleared for the plough) would fully suffice. This quantity may be considered as about one-thirteenth or fourteenth part of a State as large as the lands of New York or Pennsylvania, uncovered by streams and lakes. Our rough mountain land will produce this tree. It has been credibly certified that a single township, in the State of New York, produced one hundred and fifty thousand pounds weight of maple sugar in the infancy, or seventh year of its settlement. It will be observed, that the manufacture is proved by the annexed tables, in Parts III. and IV., already to take place in the Northern State of Vermont and in the Southern State of Tennessee, and in many parts of the intermediate country, *establishing the region of the sugar maple tree and manufacture to be several hundreds of millions of acres.* The tree is abundant in more southern districts. As it is at present considered necessary to impart to the wine of the *Corinth* or *currant fruit* a greater degree of the saccharine character than it has from nature, the general presence of the maple tree, and the universal capacity of our country to produce the red, white, and black currants, are facts apparently worthy of the public attention. Maple sugar, within my personal knowledge, has been so well refined as to have been served to the largest circles of foreign and American evening visitors at the house of the late President Washington. The quality was of that real excellence, which the double refined white loaf sugar (from the cane) of the late Mr. *Edward Pennington*, of Philadelphia, is generally known to have possessed. Information as to the proper quantity and use of quick lime, and some directions to avoid waste and injury in the operation of boiling, are the principal instructions wanted by our farmers and planters, to make good Muscovado sugar from the proper kind of the American maple tree. While the Governments of Europe labor so incessantly to discover a vegetable production which will yield them sugar, we enjoy, from the gift of Providence, a great favor in the sugar maple trees which overspread our country. If we have but a limited quantity of cane land, it is happy that we possess very many more than the requisite number of sugar maple trees.

The substitution of this sugar for molasses, or the use of it when it reaches the condition and substance of molasses, is a further object to our country, which imports many millions of gallons of that commodity from foreign countries. With a view to the economy of drink, this is a most interesting consideration.

But sugar and molasses are so auxiliary to household preparations of various kinds, and to several great and small manufactures, and they are so acceptable to the great mass of our increasing population, that there is no reason to doubt that there might be a good market for all the sugar we can procure, not only from our canes and maple trees, but by the most active commerce. Consumption at home, and free exportation, will ever support the price. Sugars of every quality have increased in value throughout the world within a few years.

THE SUGAR OF THE CANE.

This interesting commodity is, in the United States, in the crude form, little more than an agricultural production, and, in its best refined condition, an elegant and grateful manufacture. After the acquisition of a cane district, by the purchase of Louisiana, it was apprehended that the constitutional impediment to the importation of slaves would have at once deprived us of much cane sugar, which our newly acquired country could produce, and, in some degree, affect the prosperity of the Delta of the Mississippi. But the reported production of nine millions six hundred and seventy-one thousand pounds of the sugar of the cane in Lower Louisiana, in the year 1810, with one hundred and seventy-nine thousand five hundred gallons of molasses,* is considered as far short of what that country will be quickly made to produce, by the general adoption of *the new and curious operations in the culture of cane and the manufacture of sugar*, which are found to be practicable. The new course appears worthy of particular attention.

Instead of the employment of slaves, requiring a very burdensome advance of capital, and an expensive subsistence, the occasional labor of neighboring or transient hired white persons is often used to prepare the grounds with the plough and harrow, to plant the new canes, to dress the old ones, and to clear the growing plants from weeds. The same or other white laborers are afterwards employed by the planters to cut, and stack under cover, the ripened canes, so as to prepare them for the grinding mill and boiler. The operation of planting occurs after the sickly autumnal season, and before the vernal; and the operation of cutting also occurs in the healthy season, at the end of the following autumn. The service is not, therefore, unhealthy.

It is considered to be expedient that the planters who own, and they who cultivate the soil, should not expend great sums in the establishment of mills and sets of works on all the sugar estates, after the manner of the West India colonies of the European States. But it is found more convenient and profitable to leave the business of grinding and boiling *to one manufacturer of Muscovado sugar*, for a number of planters. These persons, like the owners of grain mills and saw gin mills, can be employed for a toll in kind or part of the produce, or for a compensation in money. By this method a tract of two miles square, or three hundred and twenty perches square, which will contain twenty-five plantations of above one hundred and two acres each, may be accommodated by *one central manufactory of Muscovado sugar* from the cane stalks: for none of the plantations will be more distant from the boiler than a single mile—a mere city portage or cartage. Refineries, making white sugar, and distilleries, may be added, and the economy and accommodation to the planters will be more complete.

The effect of this division of labor and ownership will be rapidly to bring into the most complete and productive cultivation all the cane lands in the United States, and to advance the various manufactures of this valuable and wholesome agricultural production. The easy and cheap maintenance of cattle, the abundant supplies of provisions and building materials for man and beast, and the redundance of fuel and cask lumber, with the benefits to our planters from being more frequently and comfortably their own stewards and overseers, will greatly redound to their convenience and profits. The exemption from duty on their Muscovado sugar, their refined white sugar, their molasses, and their rum, is a very great advantage to the manufacturers of and from the brown sugar and molasses of the United States.†

* There were made, also, two hundred and thirty-nine thousand one hundred and thirty gallons of distilled spirits out of two hundred and thirty-nine thousand one hundred and thirty gallons of molasses, in Lower Louisiana, in the year 1810.

† It is understood that the sugar cane has been successfully cultivated on the coast of Georgia, within thirty or forty miles of the ocean.

WINES OF THE GRAPE.

The proper wines of the grape, of the best qualities, are those produced in various climates which are found in the United States, if reliance can be placed upon the indications of temperature which I have ventured to suggest. To the kinds of that liquor which have been mentioned, the celebrated wine, called *Tokay*, may be added. It is produced near a place of the same name, situated in Hungary, in 49° north, in a temperature approaching to that of *Champagne*, one of the best wine districts of France. This situation may be considered as nearly corresponding with that of the country around the common point of contact of Virginia, Maryland, and Pennsylvania. The exquisite wines of the Cape of Good Hope, particularly the red and white *Constantia*, which are produced in 34° south, a position deemed colder than the same latitude north, may be also added. The Madeira produces there an excellent wine.

It has been understood, within a short time, that some enterprising and well informed emigrants from Germany, after careful experiments, have considered the temperature of the southwestern corner of Pennsylvania as suitable for the production of the *Rhenish* and *Moselle* qualities of wines. This fact contributes to support the opinion, that it will be safe to count the degrees and minutes of common temperature in Europe and North America, respectively, from Lisbon and St. Augustine or New Orleans.

It appears by the returns, that about ninety-six quarter casks (a quantity of good red wine worthy of notice) have been made by a few Swiss settlers, from the Madeira and Cape of Good Hope grapes, on the river Ohio, in about 39° north latitude, in the territory of *Indiana*. It is also understood, that a good wine, really fit for table use, has been made in the vicinity of Columbia, in South Carolina. Other experiments have been made, with various success.

The grape vine of several distinctly different species is indigenous in the United States, and is found in every degree of latitude, from the river St. Croix to the Gulf of Mexico. It is, doubtless, from such original stocks, in corresponding temperatures of Europe, that its several present excellent wine grapes have been obtained by selection, choice of position, and soil and cultivation. The skill of the wine maker, resulting from practice, and improved by the relative arts, has curiously perfected the manufacture of wine. This commodity rewards, by profit and pleasure, the skill and exertion of its improvers. A striking difference, very interesting to the United States, occurs in the characters of certain great classes of foreign wines, extensively used in this country, a statement and attempt to explain which may contribute to improve the future operations of the wine makers of the United States.

It has been constantly observed that, although the superior red and white wines of France (the Burgundy, the finer clarets, the Champagne, and the Sauterne) are proved by the hydrometer to be as strong as some, and stronger than others, of the wines of Spain, Portugal, and their wine islands, (the Sherry, the Pacharetta, the Lisbon, the Carcavella, the Madeira, the Teneriffe, the Fayal, and the St. Michael's) yet the *French* wines can only be kept in bottles well corked and sealed, while the latter are constantly kept upon tap, in half emptied casks. It is also observed, that, within a few hours after the uncorking of a bottle of French wine, especially of any of the superior qualities, it becomes sensibly bad, while these white wines of Spain, Portugal, and their islands, remain good, and some of them even improve in decanters, which by accident have remained long unstopped. This difference is considered to be occasioned by the fact, that the spirit of the French wine is its own natural and proper fermented spirit, while the Portuguese and Spanish wines have, in addition to their fermented, infusions of distilled spirits or brandy. The French wines, soon after their exposure to the air, by the drawing of the cork, are believed to recommence fermentation, and are quickly injured, having been before sufficiently and most perfectly fermented; while the distilled spirits in those wines of Spain and Portugal, prevents a similar recommencement of fermentation and its consequent injuries. Distilled spirits have no sensible fermentation.

Believing in this cause of the difference between those two great classes of wines, and deeply impressed with the importance of that difference, in several views, I submitted the facts, in a guarded and informal conference with the President, Vice Presidents, and several other learned and judicious members of the *American Philosophical Society*, at one of our meetings, in a manner which led to suggestions of the moment, from the gentlemen, respectively, in order to attain a knowledge of the cause; and, after hearing the whole, that which I have stated was also submitted to their consideration, and was received with as much assent as the nature of a learned body and of the subject rendered proper and necessary, on a new and informal communication. This matter is introduced here as the foundation of a suggestion, that, in the wine making business of the United States, in internal situations, where bottles may be costly or unattainable, a cautious infusion of the barely necessary portion of homogeneous distilled spirits (the purest and best brandy of the grape) will, probably, enable our citizens to keep their wine as they keep those of Lisbon, Xeres, Madeira, Fayal, and Teneriffe, in half empty casks and common decanters. Thus, not only a great and universal economy in respect to bottles may be made, but the practicability of keeping wines, in a condition fit for use, may be extended to all situations, and to every store keeper and family. Hitherto the manufacture of fermented liquors has been impeded, by the expense of bottles, and often by the total want of them.

As the grape and its wines and essential salt (known under the name of cream of tartar) are of very considerable importance to our interior country, which must receive foreign wines at costs and charges, which a great majority of the people cannot sustain, and as wine has a high value as an inducement from distilled spirits and as a medicine, besides the value of the fresh and dry grape, it is a matter of real consequence in this statement, that the success of the wine manufacture appears to be rendered certain, by the variety and universality of native grapes, by a number of successful experiments, and by the correspondence of temperature between parts of our country and the districts of the Tokay, the Champagne, the Moselle, the Rhenish, and the Hock, the Burgundy, the various clarets of Bordeaux, the Sauterne and Grave, the Oporto, the Lisbon, and other superior or estimable wines of the European continent, and those also of the Cape of Good Hope. Extreme heat does not appear necessary or even favorable to the happiest concoction of the juices of the grape, the orange, and fruit in general. France, not less distinguished for its various and exquisite fruits than any other country, has no point more southern than 42° 26' north latitude. In considering the character of Madeira and its wines, it will be remembered that it is a small and elevated island, and similar considerations, as to temperature, arise, in regard to the *Constantia* vineyards, at the southern point of Africa, the Cape of Good Hope, which must greatly partake of insular characteristics.

OTHER FERMENTED LIQUORS.

The moralizing tendency and salubrious nature of these manufactures, recommend them to a serious consideration, and particularly in our country. Distinct views of those of the wines of the grape, customarily, and of the currant or Corinth fruit, have been submitted. Beer, ale, porter, cider, and perry, manufactures of great aggregate importance to the farmers, remain for notice. The difficulty and expense of procuring a supply of strong bottles, and a peculiar taste for lively or foaming beer, which our summers do not favor, have been principal causes of the inconsiderable progress of the manufacture of malt liquors, compared with distilled spirits. The absence, or the infrequency of malting, as a separate trade, has also operated against brewing in the small way, and in families. The great facility of making and preserving distilled spirits, has occasioned them exceedingly to interfere with the brewery. The liquor of peaches, hitherto deemed incapable of use without distillation, greatly prevents the use of beer in a very extensive region of our country, where the peach tree grows with the freedom of a weed, and where its fruit is of the best quality. Cider, which is abundantly produced in another very extensive region, rivals fermented malt liquors, as a common drink, and a material for a customary concoction (the cider royal) and for distillation.

A method to preserve beer, and other fermented malt liquors, on tap, in half full vessels, by peculiar constructions of the casks and the cocks, has been invented.* The manufactory of glass bottles is likely to continue to

* By the present Mr. Robert Hare, a native of Philadelphia.

increase. *The cork tree might be established in all our climates south of the Chesapeake.* The manufacture of wire, for securing the corks, is commenced with abundant capital in several places. The sealing materials for bottled liquors, are cheap in America. The manufactures of the brewery are diversified in the shapes of porter, pale ale, brown ale, strong beer, and small beer, to suit all tastes, and to accommodate all climates and consumers. The want of a head, or top of foam (or cream, as it is popularly called here) is now known to be observable in the tap beers of Europe, and it is presumable that this object of fancy, or taste, will not, therefore, be, in future, deemed indispensable in the American tap houses and families. We have been used to consider the want of this foam as an evidence of badness. The brewery must be expected to improve in the United States, as it manifestly has, since the introduction of the *pale ale* and porter manufactures, in 1774. The exportation of malt liquors, and their coasting transportation and sale, have been very much increased.

So great inducements from the cultivation and production of *grain* arise from the cultivation and growth of raw materials, including cane sugar, and from the very increased attention to sheep, and horse, and cattle farming, that the great farmer's manufactory of *cider* must extend, increase, and improve. The high price of flour, also, diminishes attention to grain liquors. The first qualities of *cider* are more valuable than the inferior wines are to the cultivators of France, the Azores, the Balearic isles, the Greek isles, the Canaries, and other wine countries. *Cider* is particularly convenient to those States whose settlements are completed, as it requires the use of but little land, and not the exclusive use: for orchards admit the cultivation of the ground. The distillery in those fully populated States, is chiefly from apples, to the north of the Delaware. The preservation of *cider*, without the expense of bottling, is more practicable and more general than that of fermented malt liquors.

The exquisite and various flavor of the North American peach, in the most favorable situations, and the ease with which it is propagated in such places, give rise to great solicitude, that *nice and careful experiments should be made of the quality of the clear fermented liquor it would yield.* Whether the attempt would succeed best, if the peach were treated like the grape, the apple, and the pear, in making wine, *cider*, and perry, or whether it would best succeed, if the fruit were treated in the manner of the currant, experience would determine. In the former cases, proper grape wines, *cider*, and perry, are made of the juices of the grape, the apple, and the pear, without water, and often without brandy in the wine; always without brandy in the farmer's *cider*, and in perry. In the case of the currant wine, brandy is sometimes added, and sometimes omitted; sugar is always added, on account of the acidity of that fruit. The peach would not require that addition. There seems to be reason to fear it may prove too saccharine. It ought, however, to be remembered, that the wine of France, called *Frontignac*, is of an extreme sweetness, with less pungency than the juice of the peach. It is possible, too, that the peach juice, fined, and with or without an infusion of brandy, might be preserved as a sweet, to mix with other things; it would probably require the bottle. The ease with which the peach is raised throughout the United States, and its application, hitherto, to the table, only in its fresh and dried states, and to the distillery, invite to endeavors to extend its utility. So copious an addition to our substitutes for cane sugar, in the form of a sweetening treacle, and of so exquisite a flavor, would be very valuable, if it could be rendered conveniently attainable.

The ancient fermented liquors, made of honey, called *metheglin*, and *mead*, are not mentioned in any of the returns, though they have been long made in the United States—the former, in considerable quantities. They would fairly contribute to swell the aggregate value of our household manufactures.

DISTILLED SPIRITS.

Numerous and valuable improvements in this manufacture have been effected. By making spirits of *sixth* proof, (Jamaica rum and French brandy being only fourth proof) the transportation of American distilled spirits, from distant interior places, is effected upon more favorable terms, according to the value, or a lower rate per centum. The empyreumatic oil is frequently and easily extracted by a patented operation, and the bad flavor of ill tasted spirits is taken off. The quantity of distilled spirits reported, is 25,804,792 gallons, equal to 234,589 puncheons, of about 110 gallons each, very far exceeding all the West Indian and South American rum, or spirits, and molasses, of every foreign Power. Our manufacture of spirits is partly from foreign and American molasses, oats, Indian corn, buckwheat, wheat, and potatoes, but principally from rye, apples, and peaches. The comparative importance of this distillery will be more clearly understood, when it is known that the amount of all the rum and spirits imported from the British colonies, into *England*, in 1785, was only 18,184 casks, of 110 gallons each. It is true, that there was a considerable exportation from the British West Indies to the United States, some to the Northern British colonies, and a little in other directions. But the American distillery, at present, very far exceeds the whole. It will certainly continue to receive considerable support from foreign consumption.

The unobserved rapidity of the growth of the grain distillery, combining with the extension of the brewery, and with the increased consumption of the various meals, by the manufacturers, and the modern cultivations of cotton and sugar, have greatly contributed to maintain the high prices of wheat and Indian corn: for, the rye and barley, which have been raised for the distillery and brewery, have employed a proportional part of the cleared land and labor of the country. But, as our objects of cultivation have increased in number, and continue to increase, and as grain will be raised in a less proportion, according to our population, and our manufacturers, cotton growers, sugar planters, and cattle farmers, will require large supplies, the original necessity for the grain distillery will decrease. *Cider*, and wines of the grape and currant, will, at the same time, increase, and will materially interfere with the grain distillery by their rivalry, and by their employment of a portion of our industry. The distillery of the potato is said to be very profitable and increasing, and the flavor may be improved by the extraction of the empyreumatic oil, in the patented manner, as very profitable, and as moralizing rivals of distilled spirits. All the other drinks, such as fermented malt liquors, *cider*, currant wine, perry, and grape wine, are respectfully conceived to merit a sanctioned investigation, and perspicuous display, for the use of the People.

CHEMICAL PREPARATIONS.

This branch of manufactures has been a great source of profit in Holland, Germany, Great Britain, and France. Our rapid and very great attainments in it are evidences of the enterprise of our citizens in trade and business, and of their progress in science and useful knowledge. The sugar refinery, distillery, and brewery, may be considered as ancient and important parts of this branch; but the operations, to which reference is most particularly intended, are those of the proper chemist's laboratories, for drugs, medicines, tinctures, extracts, dyes, and pigments. These have been extended with great skill and profit. The works, the capital, and the talents, which are constantly added to this business, ensure its permanency and success.

Soon after the acquisition of the Southern lead mines, establishments, to make pigments of that material, were erected, in one season, sufficient, with the new shot factories, to employ that portion of the addition which was likely to reach the Atlantic ports. Red and white lead and patent yellow are now made in very considerable quantities, and, operating with the other manufactories of the same raw material or metal, occasion a demand upon the miners and the merchants for much more than they supply. Besides these, a great number and variety of other preparations of paints, drugs, tinctures, extracts, &c. are constantly made, so as to interfere with the importations, in some instances, and to prevent them in others. The practitioners of physic, various artists, and builders, derive great assistance, in their respective operations, from these manufactures, and, by a selection of faithful makers, have it in their power to avoid those fraudulent and pernicious deceptions, which few importers can detect, and none can entirely prevent. It would be favorable to morals, to the public health and interest, and to the internal and external trades, if these and other manufactures, liable to adulteration, were required to be sold with evidence of the maker's names.

BRICKS AND BRICK CLAY.

There are very great quantities of brick clay, or common potters' clay, in the United States; and in numberless situations adjacent to abundant reserved woods and forests, and frequently to fossil coal. These clays are very gene-

rally impregnated with iron, and therefore the bricks, tiles, and potters' wares, usually become red when burned. The implements, utensils, and instruments, employed in the manufacture of bricks, have been considerably improved, so as to make very good and handsome work, with great despatch, saving labor. The pottery being effected by preparatory horse mills and turning machines, we save the time and work of the operators, and give regularity to the form of their wares. Twenty-two *labor-saving* projects have been offered in brick making alone. This beneficial principle thus frequently occurs in a branch which does not at first view appear susceptible of the advantage of labor-saving machinery. A horse mill might be made to turn a number of potters' forming wheels. Red hearth tiles, of a very nice quality, are made; the clay might be freed from extraneous matter, and prepared in moulds, plain, fluted, or figured, so as to be formed into tablets, facies, columns, pilastres, and other ornamental matters, of the same color as the general brick work. The marble now used for such things, would be left for other and more convenient or necessary purposes. The official returns of manufactures of bricks are every where very defective, and in most places these simple manufactures are entirely omitted. There is some exportation, and much coasting trade, in bricks and various tiles for masonry. The use of unburned bricks, and walls composed of large regular pieces of earth, and earth and sand worked into an adhesive state, with and without lime, has been adopted in some places. Bricks cannot be imported without a loss. The few that arrive are brought as ballast, and do not injure the American manufactory.

THE POTTERY.

The manufacture of ordinary ware, of common potters' clay, is very much extended in the United States. It is of great use in dairies, kitchens, larders, store rooms, sale stores, and manufactories. Crucibles are made in several places. *Black* lead is redundant. Some manufactures of potters' ware, of qualities fit to substitute for queens ware, or British Staffordshire ware, have been established. The manufacture of the common potters' ware, of clay, which becomes red in the kiln, is capable of improvement, by judgment in the choice of clay, and skill in preparing it; also in the formation, glazing, and ornaments. Within a few years, more numerous, and better veins of potters' clay have been discovered, *in consequence of the attention to manufactures*, than had been observed during the seventeenth and eighteenth centuries, which have elapsed since the settlement of North America. The spirit of improvement in every branch of internal industry, affects the establishment of manufactures as rapidly as the ascertaining and making known the suitable qualities of materials, in convenient situations, take place. Every kind of fuel is abundant, the clays are not deficient, and some workmen arise, and others arrive among us, from various countries. The freight, cost of packages, and breakage, and other charges and losses, on potters' ware, are very great.

The lead colored potters' ware, often called stone ware, is also made of clay, and salt, and pot ash. It is of the same kind which was formerly imported from Holland, at a very great expense. This manufacture is from a clay which does not become red in the kiln.

As the establishment of potteries has succeeded in the Atlantic counties, it cannot be doubted that they will be more beneficial in the interior and western districts, where fuel, grounds, and building materials, are cheap, and where the breakage and expenses of transportation of foreign ware, over land, occasion the prices of the unbroken to be excessive. It is affirmed, *in the strongest manner*, by persons of *judgment* and *skill*, that the requisite clays and flints for the branches of the pottery, called English china and queens' ware, are very far beyond any possible wants of this country, for internal consumption or exportation. The Vermont clay is held in much estimation.

There is no manufactory for which this country is now more perfectly prepared than for those of potters' and glass wares, nor is it probable that the progress of any other manufactures will be henceforth so rapid; the consumption is very great and increasing.

GLASS.

The manufacture of glass has made, till of late, a slow but considerable progress. It has been, however, astonishing, that an article so costly in the importation, so much subjected to loss by breaking, in the importation and in the transportation over land, and so universal in its consumption, has not made a rapid progress in the Western and mid-land, and even in the Atlantic sections of so well-wooded a country, so full of the materials. Wood fuel, and consequently alkaline salts, are to be procured with a profit, because the lands from which a glass manufacturer or potter should take them, would be greatly increased in value by the removal of the wood. The diffusion of the knowledge of this art by examination, statement, engravings, and instruction, would produce much gain in the United States. Our inexhaustible stock of wood actually cumber much excellent soil, and suspends its cultivation and production. Fossil coal is abundant in several extensive districts. Large tracts of land, convenient to the materials, covered with wood, and accommodated with water, are purchasable upon very low terms, and on even long credits.

Seven of the States and districts made returns of twenty-three or more glass manufactories, in 1810, making glass of materials lying every where on the surface of the earth—a vast proportion of which is unused. The amount of goods made was 1,046,004 dollars. When this fact is considered, and the encouragement given to manufactures by the state of things since 1810, by the new duties, and by the war, it cannot be doubted that the necessary and convenient part of the glass manufactory is rapidly becoming sufficient for our consumption. The whole value of the British glass manufactory, in the year 1783, was considered to be 2,800,000 dollars for eleven millions of people; yet they exported considerably to Ireland, their colonies, and to the United States. It appears that our glass works in 1810, were far more numerous and productive than was then supposed. New works have been since erected. There are great savings and large profits to a number of the American glass manufacturers, arising from their obtaining buildings, materials, fuel, and produce, from the lands they purchased, at very low prices, for those works, and from the sure and steady increase in the value of lands so purchased in the United States. The constant improvement in the style of the buildings in this country, the erection of houses in new towns, and on new farms, the extension of these into interior situations, the improvement of the glass manufactory itself, and the export trade, assure to the glass manufacturers in the United States, a good, steady, and increasing demand.

It is manifest that the United States have made great progress in the manufactory of fermented liquors, and it is believed that their lessened proportioned attention to the bread grains, in consequence of the cotton, tobacco, sugar, and indigo cultivations, horse, sheep, and cattle farming and mining, will occasion more future activity in the brewer's, farmer's, and housewife's manufacture of fermented liquors, which will greatly increase the demand for glass bottles. Many old and new branches of manufacture also demand large numbers of those vessels. Our increasing population requires a constant addition. We have not yet discovered any considerable quantity of tin, which is one of the materials to make pewter, and our summers incline the people to use glass drinking cups, (which are indeed preferable, from their facility to be quickly and nicely cleaned) to any other drinking vessel. The people of this country will, therefore, always be great consumers both of the useful and elegant glass wares. The importation of hollow glass ware, and looking glass plates, is extremely expensive, especially to the inhabitants of the interior.

SILK.

The steady and increased application to the prevalent household manufactures has prevented any considerable attention to breeding silk worms. Our manufacture of silk, from the immediate production of the worm in America, is very small. It is chiefly from foreign silk, and foreign silk thread; which last is wrought into fringe, tassels, buttons, and other fancy goods of taste and fashion, and is used in making up clothing and furniture.

The most interesting manufacture of silk for the United States, is that of bolting cloths for our flour mills. There are no difficulties in the way of procuring enough of the raw material to manufacture this *necessary* class of silk goods. It is true that importation may be expected certainly to furnish the quantity of those cloths which we shall want. But the peculiar value, or rather the indispensable necessity for this commodity, renders it desirable to hold it up in the most striking point of view. Holland, without any particular advantage over us in the manufac-

ture, and in some respects less prepared for it than we are, has been induced, probably by her numerous flour mills, and the profits she derived from the manufacture of *bolting cloths*, to enter into it in a greater degree, in proportion to her population, than any other nation. The general silk gauze manufacture, of which this may be considered as a branch, has very much declined; so that experienced weavers might be drawn to America in any requisite number. The necessary importation of raw silk can always be made, if other objects should continue to employ private families. The infirmaries on the Southern estates, which have been already mentioned, would be convenient places for breeding silk worms. The climates of our region of colored population are those of the great silk countries, and persons well enough to move with comfort may tend the silk worm. Connecticut has done much in the production of the proper mulberry tree and of the silk, as well as in the manufacture of cloths of silk, though in a colder climate than those of the worm in Europe and Asia. This worm does well in dry countries. From such facts our capacity in the silk business may be considered as common to a great number of the States.

It appears that countries so successful in commerce and manufactures, and parts of those countries so populous and extensive, prosecute with such steadiness the production and manufacture of silk, that the subject must be worthy of a more profound and minute examination, than has yet been applied to it in the United States. Between the Southern extremities of Italy, Greece, and Spain, which, being peninsular, are probably of the warmth of our State of Louisiana, to the latitude of Presburg, in Hungary, which nearly corresponds in temperature with that of Baltimore, in Maryland, are found the innumerable silk worms of France, Spain, Hungary, Germany, Switzerland, Lombardy, Italy, and Turkey. In most of those countries, the Governments, the merchants, the manufacturers, and the householders, pay a great and increasing attention to the production and commerce of unmanufactured and manufactured silks, of every description and quality. Similar facts occur in the corresponding climates of Asia. In many of those regions of the ancient and modern manufacturing and trading nations, the production, manufacture, and commerce, of silk, have been pursued through a long series of ages. They are maintained at the greatest known height, at the present time, when rival productions, manufactures, and trades, constantly employ an immense mass of capital and population. It is true, also, that there are, or have been, in Great Britain, the whole of the Netherlands, and many parts of Germany, which do not produce silk, very considerable manufactures of that raw material, which they import from Italy, Turkey, and India. These facts satisfactorily prove, that the production of a surplus of silk is profitable in some countries, and that the manufacture of that surplus is found to be advantageous to other countries, which do not produce that material. The Governments and People of the United States cannot observe without impression our constant importations of foreign silk goods, in parcels, amounting, sometimes, on board of a single vessel, to six hundred packages. There does not occur to recollection any employment so suitable for the decrepit, the valetudinarian, and the aged part of the national population. It appears, also, to be compatible with the pursuits of all persons who rarely go abroad, and with those of such as can make it convenient to remain generally at home. Silk is so easily and abundantly producible, that it is found to be the most economical clothing of the poor of China. It requires no ownership nor tenancy of soil. There are some prepossessions against the production of silk in the United States, but the pursuit of it has been so long continued in many countries, and the results are so considerable, that it is much doubted whether the subject is correctly estimated. A complete examination of it, throughout its districts of foreign production, manufacture, and commerce, with the relative examinations in our own country, with the proper application of the whole, would be a useful service.

SALT.

The manufacture of salt, from springs in the interior country, is very imperfectly returned. New York is understood to return about 300,000 bushels per annum, and it is represented that the quantity can be increased. The *Ouabache Saline* made, in 1809, about 130,000 bushels, of which there is no return. Other salt springs have been discovered on the banks of the Kenhawa. The manufacture of salt, (and that of glauber salts, which are procured in the progress of the work) on the sea coast, is considerable and increasing, and has been very favorably affected by a recent discovery. The flowing of the sea near to Cape Henlopen, in the *Delaware State*, occasions a collection of salt water in a great sandy pan, or extensive shallow cavity. In this cavity the evaporation of much of the water appears to take place, while the remainder is absorbed by the sand. This occasions the saltiness of the absorbed part to be much increased. That briney water is subject to further evaporation, till it reaches a clayey bottom, which lies under the sand. By uncovering this clay bottom in places, and making short trenches in it, opportunity is given for the evaporated water to pass into them. When taken in vessels from these trenches, the water is found to be strong enough to float an egg, and of course produces a much greater proportion of salt than the common sea water. Sometimes this water from the trenches is converted into salt by mere evaporation. On the French Atlantic coast, such clayey bottoms occur in the salt district, and are highly valued.

It is said that such great pans, or shallow cavities, or receptacles of sea water, are numerous along the coasts of the United States. They ought to be brought into immediate use, as in Europe.

The salt works at Cape Henlopen are stated to produce nearly 2,000 bushels per week, or 100,000 bushels per annum. Only a small part was reported in 1810 in the Delaware return. It is believed that the increase has been so considerable as to amount to the quantity now mentioned. This new advantage in salt works may not only occasion a great extension of the manufacture, but may produce savings of labor and fuel. It is possible that situations remote from the mouths of great rivers may be most favorable for salt works, as the sea water is perhaps less briney where a great body of fresh water is disembogued. Islands are found best on the coast of Europe. It may not be amiss to consider the temperature of places, on that coast, where salt is manufactured. Cadiz, Lisbon, and the south of France, (no part of which is in less than 42° and 26' North,) may be considered as the great sources of salt on the continent of Europe. The coasts and islands of Georgia, and the shores of the Gulf of Mexico, appear to be much more favorable for the manufacture of salt than the southern districts of France, and situations upon the Gulf seem more likely to be suitable than the vicinities of Lisbon and St. Ubes, so far as depends on temperature. Long droughts and a climate of a general dry character must favor the manufacture. Fuel in abundance can be procured in America, where the manufacture by solar heat is not yet found to be practicable.

It is probable that the manufacture of the best pearl ashes, out of the common ashes produced by the fires of the salt makers, might conduce to the profits of salt works. It ought to be remembered, that the ashes of the pine and all other terebinthine woods are considered as unfit for the ordinary manufacture of pot ash.

Other wholesome and agreeable anti-septics are substitutes for salt, and are sufficiently relative to a competent manufactured supply of salt to merit suggestion. A considerable portion of brown or unrefined sugar, or of molasses, rubbed on meat intended to be pickled, or coarse sugar or molasses, mixed with the salt and water in certain proportions, with or without saltpetre, is known to contribute to preserve meat, and to prevent its growing hard. This is a well tried fact, highly interesting to every body, when salt is scarce and dear, and it is peculiarly so to the owners of sugar maple lands. To this method of saving salt, or lessening the demand for it, may be added the adoption of the practice in Canada, and in some parts and families of the United States, of placing meat in a situation to be frozen, and to be retained in that state while it is kept, in winter, for family consumption. Ice houses have the same effect upon the economy of salt, in the warmest seasons, and merit the consideration of the farmers. They are built of logs from our woods, below the surface of the earth, and of logs and a very thick and close thatch, above the surface, for a very small value of labor, and less of materials.

It is a good operation, in manufactures, to make substitutes for such things as cannot be obtained in sufficient quantities. If, therefore, maple sugar and maple molasses shall be made use of to perform a part of the *anti-septic and preservative operations of marine salt*, and are, as we know, of a less scorbutic tendency, it is a great point gained. To make salt less necessary, by the use of the maple or cane sugar, or molasses, by freezing meat, and by ice houses, is equal to the effect of manufacturing salt in greater quantities.

It may be useful to remark, that the parts of the coast of France where the greatest quantities of salt are made, *by the operation of the sun*, are the coast of Brittany, Sainteuzé, and the country of Aunis, the most northern of which is of the temperature of our Virginia coast. They manufacture salt by fire, as far north as the mouth of the Seine.

CANNON AND MUSKETS.

The quantity of iron cannon wanted has not, for a long time, been a matter of any difficulty to procure; the price being stipulated, so as to induce to the undertaking, the commodity is obtainable with certainty. It has been already mentioned, that the most approved practice is to cast them in the solid manner, with a spruce head, which, it is supposed, occasions a more perfect formation of a compact piece of ordnance, and is considered as conducing highly to its goodness, at and near the muzzle. The gun is then set in machinery, which turns it with a pressure towards a fixed instrument; this bores a calibre in the solid gun-form mass of iron, with great exactness and beauty.

Cannon are constantly manufactured, when demanded, to a very considerable extent, in the public armories of the Union, and of the States, and on contracts, and for sale to associations of citizens, and to individual purchasers, for use at home, or for exportation. Of these very considerable operations, there are some specific returns for 1810, under the heads of "gun makers," and "boring mills," and, it is presumed, there are some included under that of iron foundries. The public armories, and their manufactures, are not particularly noticed in the returns; they are mentioned, as of 1810 also, in your report, in part.

The improvements in the manufactory of steel, and the experience in the general manufacture of arms, with the exigencies of the times, and, above all, the evidences from the operations of individuals, of the States, and of the Union, under various administrations, that the expense and trouble of a *judicious* and *rigorous* inspection are required to be surely and effectually provided for, have made favorable changes in the condition of this important branch of our manufactures. But it appears highly worthy of consideration, whether, after a proper notice, military guns or pistols should be allowed to be sold, without the evidences of the inspection of a sworn and responsible officer. These are manufactures which obvious considerations require to be placed under a regimen, so well devised, and so strictly executed, as to prevent deception, and its most evil consequences. The numerous facts which have occurred fully prove that unfaithful, or unskilful, or at least insufficient work in this branch, is confined to no time, no place, no persons, no nation, no cost.

THE FINE ARTS AND THE SCIENCES.

The works of human genius and cultivation, which belong to the elegant and magnificent class of the arts, have a very considerable effect upon the convenience, utility, and profits of those things, which are usually called *manufactures*.

A knowledge of architecture is necessary even to the cheapness of construction—geometry, which is the scientific basis of architecture, teaching the operator that, as a square contains the largest area within a certain extent of uncurved outlines, so the walls of a square building are less costly than those of any other right-lined edifice. The strength of the arch is taught in like manner. An analysis of beauty instructs us in the grounds of ornaments of curved lines.

The fine arts, particular painting and sculpture, have beautified the manufactures of alabaster, marble, clay, plaster, and metals, and of wool, linen, cotton, and leather. The fine porcelain of France and Saxony, the statues and paintings of Greece and Rome, the modern imitations of them in paintings, statues, and casts, the elegant miniatures of alabaster, its various flowers and ornaments, the improvements in the composition and in the pottery of wedgewood, the imitations of the antique vases and figures in various gold and silver ornaments and utensils, and indeed of brass, the tapestry of the Ghobelries, embroidery, brocading, dying, engraving, and the printing of linen, cotton, and silken cloths, are among the numerous examples that crowd upon the mind. The fluctuations and disorders of the old world have occasioned innumerable transfers of the instruments, the libraries, the models, the works, the agents, and the lovers, of the fine arts, from thence to the United States. This truth is as simple, absolute, and well-known, as the transfer hither of merino flocks, and of manufactures of fine wool, from their proper original countries. The effects of such transfers of much that was foreign and all that was necessary for the interesting cultivation of the fine arts, either in their distinct and separate character and form, or as pleasing and beneficial auxiliaries to the useful arts and manufactures, are manifest to the attentive observer. A numerous body of professors and instructors, in music, painting, sculpture, architecture, and all the finer branches of human skill and industry, of a character, in their respective arts and sciences, very far indeed above the colonial schools, and such, in numbers, in standing, and in talents, as nothing but the agitated state of Europe could so early have induced or driven hither, are seen in all our principal cities. Even by the musical branch, light as it may appear to many, the useful arts have been improved. The manufacture of every instrument, from the organ to the fife, involving considerable science, exempts us from the costs and expenses of importation, and the exhibition of the *Panharmonicon* has diffused instruction, in an electric style, through every attentive mind, gifted with mechanical talent, or opened by education, in that branch of knowledge.*

The advantages of military architecture, by land and by sea, are perfectly obvious. It involves much and various art and science. Our display of skill in construction for the naval department is not surpassed, whether it be tested by promptitude of exertion, shortness of voyages, exemption from foundering, preservation from the dangers of a lee shore, safety in retreat from a superior foe, forcing an adversary into action, or the all-important workings of our ships of war, throughout the time of actual engagement. The construction and equipment of a ship require much art and science. They involve the use and benefits of the curious mystery of the magnet, those of the discovery of the compass, the science of chemistry, in regard to the generation, refinement, and composition of nitre, the purification of sulphur, the preparation of carbon, and the adjustment of the whole; the doctrines of matter and motion, and of pneumatics and projectiles; the principles and practice of geometry and mechanics; sculpture in the formation of the head and ornaments—a beautiful, extended, and peculiar symmetry; and various other matters in the fine and superior arts and sciences.

The improved state of our manufactures, with their buildings, materials, ingredients, compositions, instruments, and mechanism, involves a knowledge and a practice in wide circles of the fine arts, and of nearly all the sciences.

In the branches of sculpture, the United States exhibit some works of merit, and of greater promise. In the useful part of the engraving department, our progress has been rapid and considerable, because there is a demand for the works of the artists. It has been accompanied by invention, evincing genius. In the ornamental and elegant part of sculpture, enough has appeared to prove that we have the art, if occasions shall draw it into frequent action. In wood, there are very honorable evidences of native talent, in various works of taste and fancy, and there are numerous works of that material in the statuary branch. In our marble, we exhibit some specimens, by foreign artists, far beyond the quality of the materials. The United States may claim eminence from the works of its native and adopted sons, in the various branches of the art of painting, and the superior works of civil architecture.†

INSTRUMENTS AND AGENTS OF MANUFACTURES.

Machinery and processes to effect manufactures, so as to leave the manual industry of a nation for other employments, are of a degree of importance to the United States proportioned to the smallness of the average population on a square mile of our extensive territory. As we possess innumerable horse-powers, applied to digging and raking machines, to turn up and break the soil, and cover the seed grain, under the names of *the plough* and *the harrow*, to our incalculable profit, so we have water mills and steam engines, in numerous instances, and of diversified forms, to manufacture boards, bark, powder, flour, bar and sheet iron, nails, wire, carded wool and cotton, yarn and thread, metal plates of every kind, hair powder, snuff, gunpowder, paper, muskets, scythes, bolts, stocking

*The conception and the execution of this curious and complicated machine are very strong evidences of genius, and of practical mechanical talents.

† The finest paintings may be considered as manufactures; and though temples and other magnificent buildings are not manufactures, they involve, like the works of naval architecture, a great number and variety of the operations and manufactures of the fine and useful arts and trades.

web, various cloths, and printed and other goods. These and many other machines have been obtained from abroad, or derived from the actual and very considerable talents of our own citizens. The complicated silk mill, the first invention for yarn or thread, the fulling mill, and various other mechanical constructions, were acquired by the most extensive manufacturing nation of this time, in Europe, from her neighbors. The wisdom of the world has been, and is, attainable by us, as by other industrious and qualified nations, and the inventive genius of the People of the United States has produced a very great number of curious and valuable instruments and machines.

Various important processes enable us to tan and color skins, brew, distil, rectify, refine, extract, combine, and separate the raw materials or manufactures of the United States. The sciences, and the fine arts, and the useful arts and manufactures, beneficially co-operate to obtain, what would be otherwise unattainable, or attainable with much labor and expense, and less perfection. In this department, foreign sources, the knowledge, and, indeed, the learning and talents of our citizens have yielded to the country vast benefits. Chemistry has rapidly become a very general study. Leather, glass, distilled and fermented liquors, drugs and medicines, dye stuffs, pigments, and all the metals, and the numerous preparations of them, all the salts, all the oils, and all the extracts, tinctures, spirits, and decoctions, with many other things, belong to this class.

It is in this country, as much as in any other, that the civil and religious freedom of the citizens enables them to display the value of, and effectually to use, those strong and various abilities and qualifications for different employments in life, which Divine Providence has imparted to the human mind and body. Such faculties for certain pursuits, when not used, are talents held in an unproductive state. To have kept *Rittenhouse* and *Franklin* in the usual employments of agriculture, would have deprived the country of *the unparalleled planetarium, and of the safe conductor of the electric fire*. But the history of such a man as Galileo presents the obstacles these eminent Americans would have encountered in some countries. It would have been a mine of wealth lost to the country if the talent to invent the saw gin, to prepare cotton for the manufacturer's card, had not been exerted, and if the inventive and fabricating powers of our citizens' minds and bodies had not been applied to steam enginery, to the machinery for nails, to rolling and slitting mills, to card wire making, to carding, spinning, and weaving machinery, to fulling mills, to manufactures of grain, and other ingenious occupations, the curious merits of which are lost in familiarity.

It is a truth of the utmost importance, that there are now in the United States working examples, intelligible models, books of instruction, and qualified workmen, foreign and native, by means of which persons in almost every fine and useful art and manufactory can obtain good instruments, machinery, information, and assistants, to make and conduct valuable establishments for every raw material. The tables prove how extensively these things were diffused, so long ago as the autumn of 1810. Since that period, a very rapid progress and a much wider diffusion in the useful arts and trades have certainly occurred. Many curious and valuable inventions and improvements have taken place in the mechanical and chemical branches, and in the system of labor and political economy. Every month, every week, produces additions to them. Among these are distillation by steam, the pendulum and lever mill, the machine for splitting skins, the pressed nail mill, the great increase of chemical preparations for dyers, colormen, and manufacturers, the conversion of fossil coal into a pigment, the cask for preserving fermented liquors on tap in sound condition, weaving machinery in several new forms, the manufacture of edge tools from rolled steel, various improvements to save fuel, the variations and extensions of the application of steam, the manufacture of opium from the common red poppy and from the lettuce, the increase of the pharmaceutic preparations to the number of seventy, the division of labor in the cultivation of the cane, activity in the manufacture of the currant wine, the tanning of deer skins, activity and ingenuity in the substitutions for wool, by the manufacturing of thick and warm cotton goods, and by cotton warps under woollen woofs, the machine for manufacturing dipt candles, the activity, extension, and improvement of the sheep breeding and farming, the new employment of the children in the cities, boroughs, and villages, and the active employment of the females in general in manufactures, the extension and facilitation of communication between the producers and importers and the manufacturing citizens, by the various and unprecedented improvements in the post office department, the extension of the funds of the manufacturers by many of the banks, which are solidly and rigidly founded, constituted, and administered, the introduction of new exotic raw materials, by means of commerce, and of laborers, artisans, and manufacturers, and processes of every branch from various foreign nations. Foreign masters, as well as journeymen and foreign capitalists, have discovered that the United States afford extensive opportunities to employ themselves and their money in manufactures and the useful arts, as well as in commerce, navigation, stocks, banks, and insurance companies. These branches are as open to them here as are agriculture and the purchase of lands and houses in the most favorable States, or as they are to a native or naturalized citizen. Patented monopolies, processes, machinery, and tools, engrossed, for a time, by the foreign inventor in Europe, may, of course, be used here by all persons, without restraint or injury. In this high inventive and learned age these opportunities, in such a country as the United States, often redound to the great benefit of respectable foreigners, as well as to ourselves.

It has been attempted, by means of the marshals' returns, by a resort to other documents, by careful recollections, by observation, and by inquiry, to present in this digest such a statement of pertinent facts as appeared suitable to compose a body of convincing evidence, respecting the reality, the situation, the nature, the magnitude, the variety, the benefits, the materials, the means, and the tendencies, of the national manufactures. I respectfully submit a well considered and confident opinion, that this internal branch of trade has become, and will continue to be, productive of the most solid benefits to the landed and other interests of the country, and to give very considerable extension to the navigation, fisheries, coasting trade, and foreign commerce, of the United States.

It was believed that the design of the present resolution of the Legislature was to procure facts on which they could rely, and in the best form admitted by the materials; and not estimates, which might be partial, erroneous, and, from their nature, doubtful. Estimates in innumerable details would diminish the force the returned facts would possess, separately presented. When it was observed that a single county in Massachusetts reported 89,600 common sheep, that one other returned only 10,000, another 1,939, another 1,600, and that eight others, abounding in sheep, returned none; that the statement from New Jersey was still more imperfect, and that twenty-one States, districts, and territories, did not return their flocks; that there were but eight returns of blacksmiths' work, from \$3,998 to \$1,572,627; that, though one State reported nearly two spinning wheels to a family, there were fourteen omissions to return such wheels, with a multitude of similar facts, a present attempt to estimate in complete detail appeared likely to wrap up the principles, and the quantities, values, and other facts, which the returns exhibit, in a volume of matter that would obscure or diminish their proper and natural impression, and give rise to inconvenient objections to the whole document. I am, indeed, of opinion, that the extensive local knowledge, and very diversified information necessary to a *detailed* estimate, which should extend to the various cities, towns, villages, counties, and townships, defective in their returns, or entirely unreturned, cannot be claimed by any individual. But, since it has been the desire of the Treasury Department that the best estimate that can be made should be attempted, I have very carefully examined and compared all those things which are of a nature to afford a sound foundation for such an operation. The defects of the local returns, the importation and production of raw materials, food, forage, fossil coal, and wood fuel, and the possession of mill seats, manufacturing capitalists, white population, machinery, and native and foreign manufactures, have been duly observed and considered, and an estimate of the whole value of the manufactures of each State, territory, and district, for the year of the returns, has been so accomplished as to satisfy my own mind, in a considerable degree, as to its total amount, and to occasion me strongly to hope, that the amounts for the States, and other sections, respectively, are not materially erroneous.

Considering that the manufactures actually reported by the marshals and secretaries of territories, extremely imperfect as many of the subordinate returns really are, in quantities, valuations, and even in notices of numerous small and great known manufactures, amount to the sum of \$127,694,602, after many goods have been deducted, which are not always classed, at least by commercial men, under the head of manufactures, I have ventured respectfully to offer an estimate of the whole manufactures of the United States, as worth, in the year 1810, \$172,762,676. The facility of retaining and steadily extending this valuable branch of the national industry is manifested by its early and spontaneous commencement in every county and township, and by its nearly spontaneous and costless growth, with such aids only as have not occasioned any material expense or sacrifice to agriculture or commerce,

since they were chiefly incidental to necessary revenue, or resulted from our distance from the foreign consumers of our productions, and manufactures of our supplies. The comparative importance of the manufacturing branch, in the business of the country, will be illustrated by the reflections, that the greatest value, in one year, of the exports of American productions and manufactures, has been \$48,000,000, and the like value of the exports of foreign productions and manufactures, \$60,000,000, under very extraordinary and transitory circumstances, which may never again occur. Foreign and domestic exports, in the greatest year, having thus amounted to \$108,000,000, a nett profit of ten per cent. on the exports, and the same on the imports, being 21,600,000 dollars; a nett freight of vessels, worth 45,000,000 dollars, estimated at 10 per cent. outwards and the same inwards, being 9,000,000 dollars; and the aggregate of these great national items of mercantile trade being 137,000,000 of dollars, a comparison of the *manufacturing* and commercial branches of *the national trade* may be made and considered, and, as it is believed, without any probability of material or dangerous errors. Some confirmation of this view of our national operations, *mercantile* and *manufacturing*, may be drawn from the facts, that, in years of general peace and of regular and prosperous commerce, from 1785 to 1787, the average exports of England *alone*, with about 8,500,000 inhabitants, amounted to 70,000,000 of dollars; while their manufactures were computed at 266,000,000 of like money. By means of this great foreign case, as stated for their legislative use, and by means of the case of the United States, as it may be found to stand, after the proper investigations, it is probable that expedient and equitable measures may be occasionally or systematically devised.

The public expenses, incurred to promote, accommodate, and protect commerce, however moderate, just, and necessary, have been very considerable, compared with those incurred to promote manufactures. A *portion* of the navy, the beacons, buoys, light houses, and public piers, with a part of the diplomatic and consular establishments, have occasioned expenditures, which, however reasonable, expedient, and equitable, are for the proper benefit of commerce. Nothing, equal to this, has been done for manufactures. The mere interest of the aggregate of those commercial expenses, for a single year, would produce, it is believed, new and important lights, guides, and aids, to all who are politically, professionally, or incidentally interested in the subject of manufactures. Such being the truth as to any past expenditures, occasioned by this branch of the internal industry, it is conceived to be a duty to state it, as a relative fact, subject to examination and consideration.

This suggestion appears the more interesting, when it is remembered that the persons who, at this time, compose the entire body of the American manufacturers, their assistants and families, with a just addition for those engaged in household manufactures and upon the estates of the planters and farmers, constitute the second class of the national population, in respect to numbers. They are native, adopted, and foreign; adults and minors; rich, substantial, and poor; male and female. Our Federal and State constitutions and laws secure to them the right to pursue their occupations, and to obtain comfort and prosperity, in common with the rest of the citizens and inhabitants. They are diffused through all the States, districts, and territories; all the cities, towns, and villages, and all the counties, townships, and hundreds. They are found in every vicinity, and even in most of the private families. They are a part of the constituents of every member of the Territorial, State, and National Legislatures and administrations, and are of every church known among us. They constitute a great portion of the militia, contribute to fill the posts and ranks of the army, are parts of its necessary organization in several of their proper arts and trades, appear in numbers on the rolls of the mercantile vessels, of the public and private armed ships, and of the workmen they carry to preserve them from injury or destruction, by accident, tempest, or battle. They possess and employ property, real and personal, to a very large amount, and greatly contribute to the public revenues of the States, and of the Union, in the form of direct taxes, and duties on imports or consumption.

Opinions have been advanced in some countries, unfavorable to *the morals* of the manufacturers. But it does not appear that there is more vice among the description of *persons* indicated in the preceding paragraph, than in some other extensive classes of our population. Perhaps the smugglers, by violence and deception, are the most immoral description of *persons of business* in every civilized community. Their misconduct is, at the same time, most injurious to the country. The system, adopted at the manufactory of Humphreysville, in Connecticut, with respect to education, manners, discipline, morals, and religion, is an interesting evidence that the People of the United States may quicken and increase the virtues of the rising generation, and reform the degenerate of later years, by a humane and politic system in the large manufactories. It may be correctly observed, that, while no commotions have dishonored the reputation of the manufacturers in this country, from this class of our citizens there have arisen Nathaniel Greene, Benjamin Franklin, and David Rittenhouse, respectfully conceived to be comparable, without disadvantage to their respective memories and to their manufacturing brethren, with any equal number of ornaments and benefactors to their country, of any other single profession or occupation. The field of manufacturers, represented, in other parts of the world, to be fruitful in mischief and turbulence, has produced here a body of firm supporters of our constitutions and laws, and the most respectable examples of the civic virtues.

When it is considered that natural history unfolds the works of Divine Providence in the formation of our earth, of its productions, and of all its animated tenants; that chemistry displays their values, their relations, and their uses; general philosophy and particular geometry annually teaches man more and more to know the principles, the powers, and the laws, involved in the stupendous system of the universal frame; and when it is remembered that the arts and manufactures are the practical application of this extensive and precious body of human science, the branch of the national industry which has engaged the attention of Congress appears to be worthy of the most profound investigation and the most perfect display.

I have taken the liberty of detaining this statement to the last day permitted by your instruction, in the hope that, by the means which I had adopted, I should obtain additional information from several of the States, in the North and in the South, whose returns are manifestly and greatly defective. But none have been received. I therefore beg leave to conclude, with the remark that the form and details of the succeeding tables may facilitate the measures of the Government of the Union and of the States, in causing their officers occasionally to report further information, concerning particular branches, and respecting manufactures in general, with their raw materials, their means, and their instruments.

Submitting with perfect deference the preceding statement in all its details,

I have the honor to be, sir, your respectful servant,

TENCH COXE.

To the Secretary of the Treasury.

In the course of the numerous and diversified operations, occasioned by the deliberate execution of this digest and statement, constant and very close attention has been applied to those facts which have occurred throughout the Union, since the autumn of the year 1810, from which a judgment of the condition of the manufactures of the United States could be safely formed. It has resulted in a thorough conviction that, after allowing for the interruptions to the importations of certain raw materials, the several branches, and the States, territories, and districts, have advanced, upon a medium, at the full rate of twenty per centum, which would give an aggregate, for this year, of 207,315,211 dollars. In this increase, the State of New York is considered to have most largely partaken, especially by means of her joint stock companies. But, as it is best to make ample allowances for some repetitions of articles, which are inextricably involved in the subordinate returns, a sincere and well reflected opinion is respectfully submitted, that the whole People of the United States, taken, in 1813, at eight millions of persons, will actually make, within this year, manufactured goods (exclusively of the doubtful) to the full value of two hundred millions of dollars, or forty five millions of pounds sterling.

June 21st, 1813.

PART III.

A series of Tables of the several branches of American Manufactures, exhibiting them by States, Territories, and Districts, so far as they are returned in the reports of the Marshals, and of the Secretaries of the Territories, and their respective assistants, in the autumn of the year 1810; together with similar returns of certain doubtful goods, productions of the soil, and agricultural stock, as far as they have been received.

Indiana Territory,	196,532
Illinois Territory,	71,703
Michigan Territory,	37,018
Columbia, (District)	719,400
Amount, in dollars,	127,694,602

A Summary of the Manufactures of the United States, in the year 1810, so far as they appear in the preceding tabular statement, taken from the returns of the Marshals, and the Secretaries of the Territories, exhibiting the respective values of the several descriptions or branches of manufacture, and excluding doubtful articles.

1	Goods manufactured by the loom, of cotton, wool, flax, hemp, and silk, with stockings, -	\$39,497,057
2	Other goods, of those five materials, spun, -	2,052,120
3	Instruments and machinery manufactured, value -	\$186,650
	Carding, fulling, and floor cloth stamping, by machinery, value, -	5,957,816
4	Hats, of wool and fur, &c. and of mixtures of them, -	4,323,744
5	Manufactures of iron, -	14,364,526
6	Manufactures of gold, silver, set work, mixed metals, &c. -	2,483,912
7	Manufactures of lead, -	325,560
8	Soap, candles of tallow, wax, spermaceti, spring oil, and whale oil, -	1,766,292
9	Manufactures of hides and skins, -	17,935,477
10	Manufactures from seeds, -	858,509
11	Grain, fruit, and cane liquors, distilled and fermented, -	16,528,207
12	Dry manufactures, from grain, exclusively of flour, meal, &c. -	75,766
13	Manufactures of wood, -	5,554,708
14	Manufactures or essences, and oils, of and from wood, -	179,150
15	Refined or manufactured sugar, -	1,415,724
16	Manufactures of paper, paste boards, cards, &c. -	1,939,285
17	Manufactures of marble, stone, and slate, -	462,115
18	Glass manufactures, -	1,047,004
19	Earthen manufactures, -	259,720
20	Manufactures of tobacco, -	1,260,378
21	Drugs, dye stuffs, paints, &c. and dyeing, -	500,182
22	Cables and cordage, -	4,243,368
23	Manufactures of hair, -	129,731
24	Various and miscellaneous manufactures, -	4,347,601
	Amount,	\$127,694,602

* The Marshal of Rhode Island represents his return as short of the real amount of manufactures, by 25 to 35 per cent.

† The Marshal of Connecticut represents the manufactures of that State as considerably greater than the sum reported.

‡ It is presumed to be not improper to note here, that the *unofficial* estimate of the manufactures of the State of New York, received from thence in November last, and transmitted to the treasury in the month following, including some of those which have been classed as doubtful, amounts to \$33,387,566. It is not made by the Marshal, and is in round numbers.

§ The Marshal of Kentucky considers the quantity of iron as much greater than is reported. Such appearances and convictions occur throughout the United States.

|| The Marshal of South Carolina represents the returns of various cloths and distilled spirits, in that State, as not more than one-half of the real value, and that, in general, the manufactures are much more considerable than his assistants have reported.

¶ The Marshal of Georgia is decidedly of opinion, that the manufactures of that State amount to a much larger sum than his assistants have reported.

An Estimate of the value of the Manufactures of the United States, excluding the doubtful articles, digested by States, Districts, and Territories, formed by a consideration of all the reported details, and by a valuation of the Manufactures which are entirely omitted or imperfectly returned, for the year 1810.

Michigan do.	50,000	
Columbia, (District)	1,100,000	
Amount,	\$172,762,676	

An Estimate for one year, ending on the 30th day of September, 1790, of the value of the specified Manufactures, actually imported from foreign countries, into the United States, together with the goods rated ad valorem, from those countries and ports which supply manufactures, intended to exhibit the probable amount of foreign manufactures imported, during that year.

Denominations and descriptions of Goods.	Price at that time.	Value of each denomination.
	<i>Cents.</i>	
Beer, ale, and porter, - - - - 83,734 gallons,	20	\$16,746 80
Loaf sugar, - - - - 140,528 pounds,	10	14,052 80
Candles, of tallow, - - - - 6,206 do.	10	620 60
Do. wax, - - - - 1,749 do.	50	874 50
Cheese, - - - - 92,282 do.	8	7,382 56
Soap, - - - - 13,537 do.	10	1,353 70
Tobacco, manufactured, - - - - 928 do.	20	185 60
Snuff, - - - - 377 do.	20	75 40
Nails and spikes, - - - - 1,808,439 do.	7	126,590 73
	<i>Cwt. qrs. lbs.</i>	
Steel, unwrought, - - - - 5,428 3 5	6	36,478 00
Cables, - - - - 626 1 23	800	5,059 64
Tarred cordage, - - - - 5,151 3 27	800	41,294 34
Untarred cordage and yarn, - - - - 894 1 1	900	8,046 15
Twine and pack thread, - - - - 676 0 22	20	15,093 60
Salt, - - - - 1,194,188 bushels, at various prices,	-	109,132 04
Malt, - - - - 5,232 do.	60	3,139 20
Shoes, slippers, and goloshoes, of leather, - - - - 57,927 pairs,	100	57,927 00
Shoes or slippers, silk or stuff, - - - - 25,729 do.	80	20,583 20
Boots, - - - - 844 do.	500	4,220 00
Wool and cotton cards, - - - - 757 dozens,	400	3,028 00
Cider, beer, ale, and porter, - - - - 18,166 doz. bottles,	133	24,160 78
Packs of playing cards, - - - - 18,552 packs,	6	1,113 12
Value of goods dutied <i>ad valorem</i> , not specified, but generally manufactures,	-	14,798,481 21
Amount,	-	\$15,295,638 97

* It is represented, as the concurrent opinion of several of the officers of the Government of the United States in Rhode Island, that the increase of the cotton manufacture of that State, since 1810, is equal to thirty-three and one-third per centum.

† The Marshal of Connecticut represents that there are constant additions to the number and capital of the manufactures in that State.

‡ The Marshal of Kentucky represents the production of hemp, their greatest raw material, as doubled in many places, in 1811, and that the capacity of that State to supply saltpetre is very great.

A statement of Exports of the Manufactures of the United States, during one year, commencing the 1st October, 1806, and ending the 30th September, 1807.

Species of Merchandise.	Quantity or value.
Oil, Spermaceti, - / - - - - -	gallons, 44,339

								Amount,
								\$25,850,795

*The whole of the grain, peas, beans, pickled and smoked meat, lard, butter, cheese, and lumber, (or boards and scantling, staves, heading, hoops, shingles, &c.) of the State of New York, were unofficially computed in round numbers, in November, 1812, to amount to 22,600,000 dollars, agreeably to the document transmitted to the treasury.

PART IV.

A series of tables of the several branches of American Manufactures, exhibiting them in every county of the Union, so far as they were returned in the reports of the Marshals, and of the Secretaries of the Territories, and of their respective assistants, in the autumn of the year 1810; together with returns, in similar local detail, of certain doubtful goods, productions of the soil, and agricultural stock.

* Or 1,116 barrels.

† The account of Maple Sugar manufactured, was only taken in eight counties, as appears. From those the total amount made in the State has been estimated, according to the population of the different counties, by the Marshal, who considers that it is made as generally in one part of the State as another. Pounds, 3,023,806; value, \$302,280.

STATE OF KENTUCKY—Manufactures.

PHILADELPHIA, IN THE UNITED STATES OF AMERICA, May 30th, 1813.

TENCH COXE.

13th CONGRESS.]

No. 408.

[2d SESSION.

UNSETTLED ACCOUNTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 31, 1814.

WAR DEPARTMENT, *January 28th*, 1814.

SIR:

Conformably to a resolution of the honorable the House of Representatives, of the 30th of July last, requiring the Secretary of War to lay before the House a view of the unsettled accounts in the offices of the accountant of this Department, and of the paymaster of the army, and to suggest measures to secure the accountability of public agents and to prevent the accumulation of unsettled accounts connected with the War Department, I have to report, that a satisfactory view of the unsettled accounts in either of these offices has not been, and (agreeably to the enclosed statements of the paymaster of the army and of the accountant) cannot be, rendered by them, within any definite period of time.

The better to secure the accountability of public agents, and to prevent the accumulation of unsettled accounts, I have the honor to "suggest"—

1st. That an office be established, in which all accounts, whether in specie or in kind, connected with the military and Indian departments, shall be adjusted, audited, and settled, conformably to rules and regulations to be prescribed by the Treasury Department; and

2d. That, to render efficient the pay department of the army, which is now but adapted to a small and peace establishment, and to secure the regular and punctual payment of the troops, a new organization be adopted, to consist of a Paymaster General of the armies of the United States, with such deputy, district, and assistant paymasters, as the exigencies of the service may require, neither of whom shall belong to the line of the army.

With great respect, I have the honor to be, sir, your most obedient servant,

JOHN ARMSTRONG.

The SPEAKER of the House of Representatives of the United States.

ARMY PAY OFFICE, *City of Washington, January 18th*, 1814.

SIR:

In the estimate which I had the honor of submitting to you for the compensation of clerks in this office, for the year 1814, I confined myself to the amount appropriated for the year 1813, under the impression that any increase which the public service might call for would be more properly brought to your view in the report which I was then about preparing. I have since thought, however, that it might as well be made the subject of a separate communication.

For the due examination and adjustment of the heavy and voluminous accounts of the several sub-paymasters of the army and militia, and of numerous recruiting officers, which are already rendered, and daily coming in, together with the current business of the office, I consider it my duty to suggest that an additional appropriation of at least 4,000 dollars, for compensation of clerks in the year 1814, appears to be highly necessary.

I would also beg leave to suggest the propriety of an appropriation of \$1,547 22 for contingencies of the office, (1,000 of which on account of the year 1814) for the purpose of paying for books, stationary, printing, fuel, and other necessary expenses, including a debt already contracted for those articles, for the use of the office, for the last six months of the year 1813, of \$547 22.

The books, stationary, and printing, have heretofore (until the 1st of July, 1813,) been paid for out of the general contingent fund of the War Department; but, if an appropriation be specifically made for those objects, as herein suggested, it will relieve the contingent fund of the War Department from them, relieve the officers of that Department from the settlement of the accounts, and remove the difficulties which at present exist respecting the construction of the laws on the subject.

I have the honor to be, most respectfully, sir, your obedient servant,

ROBERT BRENT, *Paymaster of the Army.*

The Honorable JOHN ARMSTRONG, *Secretary of War.*

ARMY PAY OFFICE, *City of Washington, January 24th*, 1814.

SIR:

I have been for some time endeavoring to make up a report conformably to the views of the honorable the House of Representatives, as expressed in their resolution of the 30th of July, 1813, and of your letter to me of the 4th of August last, but find it totally impracticable to make one by any means satisfactory to myself, or which would convey correctly the information which it would seem the resolution contemplated; and for the following reasons:

The debits and credits of the several sub-paymasters, recruiting officers, and others, who receive public moneys from this office, are constantly fluctuating; so also are the immense masses of accounts which are daily transmitted to it. Scarcely a mail leaves the city, east, west, north, or south, but carries with it remittances to the above mentioned officers. Scarcely a mail arrives from any of the four points of the compass but comes loaded with their accounts and vouchers. Not a day passes over but some of them are examined and settled at this office: hence it will appear perfectly impossible to give any thing like the true state of open unsettled accounts, and I must beg the favor of you to state these circumstances to the honorable Chairman of the Committee of Ways and Means who introduced the resolution.

The letter which I had the honor of addressing to you on the 18th instant, is calculated for that part of the resolution which relates to measures tending to prevent the future accumulation of unsettled accounts in this office.

I am, very respectfully, sir, your most obedient,

ROBERT BRENT, *Paymaster of the Army.*

The Honorable JOHN ARMSTRONG, *Secretary of War.*

DEPARTMENT OF WAR, *Accountant's Office, January 21st*, 1814.

SIR:

I duly received your letter of the 4th of August last, wherein you require to be furnished, by the 1st of November following, with a "statement of the unsettled accounts in this office, showing as well the amount of moneys which have been advanced by the Government, and the time when advanced or paid, as the amount of vouchers

rendered by the individuals charged, the causes which have occasioned the delay of settling the accounts of the several agents and individuals who have received money from the appropriations made for the War Department, noting the time when their agencies or contracts expired, as well as the balances and amount of each now remaining unsettled." Since which my attention has been devoted to the accomplishment of the objects required; but such has been the great increase of the business of the office, that I have hitherto found it impracticable to furnish the statements: they are in a state of progression, and may possibly be completed during the present session of Congress.

In order to place you in possession of some of the leading causes of this delay, I will take the liberty to bring to your view the course that the business takes in its progress through this office.

It will be recollected that all the moneys appropriated for, and expended in, the War Department, are drawn from the treasury, by warrants drawn by the Secretary of War, and countersigned by the Accountant, the amount of which, during the year ending on the 30th of September last, has exceeded nineteen millions of dollars. These warrants are all recorded in this office, and separate accounts kept of each specific appropriation out of which they are drawn, of which annual statements are furnished to Congress. The warrants thus drawn, are either for advances directed by the Secretary of War, or for balances ascertained on settlements made by the Accountant. For the advances, the persons receiving them are charged and held accountable on the books of this office, and the settlements are made in conformity to law and established regulations, or by authority from the Secretary of War. All these transactions are entered on the books of the office, and quarter yearly statements of them are made out, and the accounts accompanying them transmitted to the treasury for examination and revision.

In the prosecution of these duties it will readily occur to you, sir, that, where the expenditures of the Department exceed so far in amount those of ordinary years, the business of accounts must necessarily increase in a correspondent degree, even if the system according to which the business is transacted, were as well calculated for the one as the other. This I cannot avoid stating is not the case; and with the view of showing wherein the difference is most prominent, I will take the liberty of stating that part of the business in relation to advances and the manner they are now accounted for.

1st. As it regards the Quartermaster General's department.

It will be recollected that, by the acts of Congress establishing a Quartermaster General's department, the Quartermaster General is expressly exonerated from any responsibility for his deputies; the consequence is, that advances are made to the quartermaster generals, which they distribute to the several officers of their departments; these again advance moneys to others, and consequently, when one personal account is adjusted, it gives rise to a number of others, and in this manner the duties of this office, in relation to that department are increased to a degree more readily imagined than described.

2d. As it regards the recruiting service.

Officers commanding recruiting districts are furnished with money in advance, with which they are charged. These are branched out to officers of every grade in the army, with each of whom separate accounts are opened and settlements are required to be made at this office, and the same remark applies to this branch of the business, as it regards the number of personal settlements, as that made in relation to accounts of the Quartermaster's department.

3d. As it regards the Pay department.

The course pursued is, for the Paymaster of the army to receive advances for the pay, subsistence, and forage, of the army, and for bounties and premiums, with which he is charged on the books of this office. His payments consist principally in advances to paymasters of districts, and to officers for recruiting. The district paymasters advance money to the regimental paymasters, and others, for the pay, &c. of the army, and by this process, when the Paymaster of the army exhibits his accounts for adjustment, their settlement occasions the opening of a multitude of accounts, all of which are to be ultimately settled in this office.

4th. Commissary General's department.

Advances are made from this office to the Commissary General of Purchases, and to every deputy commissary in service; separate accounts from each are received and adjusted at this office, to a very great extent: for, independent of the number of accounts which the advances are calculated to produce, the system directed by the act of the 3d March, 1809, by which every person has a distinct account opened under each specific appropriation out of which the moneys are advanced to him, the number of accounts which an agent of purchases, for instance, has open, amounts to ten or twelve, for each of which he renders quarter yearly accounts and vouchers, which are to be settled and entered on the books of this office.

When it is recollected that all these transactions are to be placed on record on the books of this office, that the accounts are all to be settled, the balances ascertained and paid, without any other examination than that which they receive at this office, I flatter myself that it will be found that all has been done which it was practicable to do with the force employed in the office, and under the circumstances above mentioned, and that causes, not within my control, have prevented my complying with the contents of your letter within the time required.

I have thus, sir, mentioned some of the prominent features of the system, according to which a part of the duties of this office are performed, and some of the difficulties incident to that system. I could proceed to state the increased labor and time necessary to the adjustment of the great accumulation of personal accounts, the very great and increasing correspondence of the office consequent to that accumulation; but it will doubtless occur to you, sir, that, from what has been stated, some alteration has become indispensably necessary to the regular and punctual performance of the public business of this office; and the subject is accordingly respectfully submitted to you as the head of the War Department.

I am, sir, very respectfully, your most obedient servant,

The Honorable JOHN ARMSTRONG, *Secretary of War.*

WILLIAM SIMMONS.

13th CONGRESS.]

No. 409.

[2d SESSION.]

DRAWBACK OF DUTIES ON EXPORTS TO NEW ORLEANS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 2, 1814.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the memorial of Joshua Sands, late Collector of the Customs for the port of New York, submitted the following statement of facts:

That, from the — day of April, in the year 1797, to the — day of June, in the year 1801, Joshua Sands was Collector of the Customs for the port of New York. That, prior to the 1st day of July, in the year 1799, a drawback of duties was allowed on the exportation of merchandise to New Orleans, which, at that time, and for several years subsequent to that date, was one of the dependencies of Spain. That by the seventy-fifth section of the act, entitled "An act to regulate the collection of duties on imports and tonnage," which act passed the second day of March, 1799, and went into operation on the first day of July following, the former act, allowing the drawback of duties on merchandise exported to the dependencies of any foreign State or kingdom adjoining to the United States, was repealed. That Joshua Sands, misapprehending the true import of the said seventy-fifth section, issued debentures for merchandise exported to New Orleans, some of which, to the amount of twenty-nine thousand four hundred and seventy-seven dollars and fifty-nine cents, he paid before he was conscious of his misapprehension of the law. When the other debentures issued by him became due, and were presented for payment, he refused to pay the same. Samuel Corps, who held some of those debentures, petitioned Congress for the amount thereof, which was paid over to him, as will appear by reference to the act for the relief of the said Samuel Corps, passed the twenty-fifth day of February, 1804.

The committee further state, that so much of the said twenty-fifth section of the above recited act, as prohibited the allowance of drawback of duties on the exportation of merchandise to New Orleans, was repealed by an act which passed the 5th day of April, 1800, entitled "An act to allow a drawback of duties on goods exported to New Orleans," and therein to amend the act, entitled "An act to regulate the collection of duties on imports and tonnage."

From this statement of facts, the committee have formed this opinion: that it was not the intention of the National Legislature, in revising and modifying the former act for the collection of duties, by that which passed in 1799, to prohibit the exportation of merchandise to New Orleans, with an allowance of the drawback of duties. The real object of the law was to prevent exportation with this privilege to merchandise shipped to any of the colonies of Great Britain, adjoining the United States. The act of Congress which passed the 5th day of April, 1800, repealing so much of the seventy-fifth section of the act of 1799, which prohibited the exportation of merchandise with allowance of the drawbacks, to New Orleans, is a clear and satisfactory proof that the Spanish dominions adjoining the United States were included through inadvertence.

The promptitude with which a repeal was effected, the first opportunity which presented itself to Congress, removes every doubt from the subject.

If, however, additional evidence of the intention of Congress be wanting to establish the fact, that evidence is found in, and confirmed by, the act granting relief to Samuel Corps, by which he was paid the amount of the debentures which had been issued by Joshua Sands, and which the said Sands refused to pay on discovering his misinterpretation of the law. The error of Mr. Sands was an error of judgment, to which the best and wisest men are liable. In no instance could he be personally interested or benefitted by such a construction of the law. A suit has lately been instituted against him for the amount of the drawbacks paid by him. He solicits the National Legislature to pass an act which shall authorize the accounting officer of the Treasury Department to allow him credit on his accounts for the amount of the drawbacks paid by him. So much are the committee persuaded, from a full view of this case, that relief is reasonably asked, and ought to be granted, that they have instructed their chairman to ask for leave to report a bill for the relief of Joshua Sands, late Collector of the Customs for the port of New York.

No. 410.

[2d SESSION.]

ARTICLES, FOREIGN AND DOMESTIC,

Consumed in clothing the Army and Navy of the United States, in the year 1813, and an estimate for 1814.

COMMUNICATED TO THE SENATE, FEBRUARY 3, 1814.

To the Senate of the United States:

I transmit to the Senate of the United States reports of the Secretary of War and Secretary of the Navy, complying with their resolution of the 3d ultimo.

JAMES MADISON.

February 3, 1814.

WAR DEPARTMENT, *February 1, 1814.*

SIR:

I beg leave to submit to you the following documents on the subject of the resolution of the Senate of the 3d ultimo, in relation to the quality of woollen goods provided for the army, during the last year, &c. and have the honor to be, sir, with the highest respect, your most obedient servant,

JOHN ARMSTRONG.

The President.

COMMISSARY GENERAL'S OFFICE, *Philadelphia, January 29, 1814.*

SIR:

In obedience to the resolution of the Senate, of the 3d of January, 1814, transmitted in your letter of the 4th instant, requiring an account of the quantity of blankets, and other woollen goods, provided for the army, during the year 1813; distinguishing, as far as practicable, such as were of foreign, from those of domestic manufacture; also, an estimate of the quantity of the same goods that may be judged necessary, for the like purposes, for the present year; I have the honor of transmitting the enclosed statements, viz:

No. 1. Of woollen goods, of domestic origin, manufactured within the United States, purchased during the year 1813.

No. 2. Of cotton goods, also of domestic origin, also manufactured and purchased as above.

No. 3. Of sundries, made of leather, metal &c. of like origin, manufacture, &c. &c.

No. 4. Of woollen goods, of foreign origin and manufacture, imported into the United States, purchased during the year 1813.

No. 5. Of cotton goods, &c. &c. of like origin and manufacture, imported and purchased as above.

No. 6. Estimate of the quantity of the same goods, that may be necessary for the like purpose, for the year 1814.

Permit me to observe that, although large quantities of foreign cloths, for coats and overalls, were purchased during the year 1813, as well as linens of various kinds, and articles for facing military clothing; also, flannels, for shirts, baizes, for stocks, &c., &c., yet such has been the rapid progress of manufactures in this country, that, for the service of the present, and, if they continue to progress as they have, for future years, I may confidently rely on the resources of our own country, and on our own manufacturers, for every article of clothing required for the army, with the exception of blankets, and they are excepted for the present year *only*.

It is true that the prices of articles, manufactured from *wool* and *cotton*, have increased; and that the average prices of the year 1814 will exceed those of 1813. Yet, inasmuch as the money paid for the goods remains in this country, and is circulated among our own citizens, this advantage is considered by me as a full equivalent for a moderate advance on domestic goods—even if the prices should exceed that paid for those that have been imported; and the article is uniformly more durable than the like article imported, and, taking the circumstance into view, the American article is, in reality, less expensive than the foreign.

British woollens have advanced in price fully in proportion to the enhanced price of wool, in this country. Foreign cloths, of proper quality for coats, cannot now be purchased at a price less than \$3 50 per yard; and three point blankets, at \$4 50 to \$5 each.

If it could be made to comport with the views of Congress, to appropriate moneys for providing for the wants of the army, one year before hand; for instance, to make the appropriation for 1815 during the present session, or even to appropriate (say 500,000 dollars) for the supplies of next year, the money could be profitably applied in the purchase of blankets, woollen and cotton goods. It would give the purchasing officer an advantage in the market, which late and limited appropriations never afford.

All which is respectfully submitted to the consideration of the Secretary of War.

CALLENDER IRVINE, *Commissary General of Purchases.*

General JOHN ARMSTRONG, *Secretary of War.*

No. 1.

Statement of materials for Clothing, purchased by the Commissary General's Department, during the year 1813, being of domestic origin, and manufactured from wool, within the United States.

ARTICLES PURCHASED.		Uses to which the articles purchased are to be applied.	Average prices.	REMARKS.

The above estimate comprehends materials to clothe 54,162 men; of which 49,500 are Infantry,
 1,602 " Light Dragoons,
 5,120 " heavy Artillery,
 760 " Riflemen, and
 780 " Light Artillery.

Total, 54,162

COMMISSARY GENERAL'S OFFICE,

Philadelphia, January 29, 1814.

CALENDER IRVINE, *Commissary General of Purchases.*

General JOHN ARMSTRONG, *Secretary of War.*

NOTE. In addition to the above, I am directed to provide 1,500 blankets, 3,000 bed sacks, 3,000 sheets, and 2,450 pillow cases, for the Hospital Department; and, on the *whole estimate*, 10 per cent. should be added, to cover *losses, extra issues, &c. &c.*

NAVY DEPARTMENT, *January 12, 1814.*

SIR:

In conformity with the resolution of the Senate on the 3d instant, I have now the honor to enclose an account of the blankets and other woollen goods provided for the navy during the last year, as far as it can be ascertained from the accounts rendered; but as those accounts do not exhibit the quantity remaining on hand, and as the consumption fluctuates with the voluntary demand of the seamen, the account now rendered may be considered as forming a better estimate of the probable demand for the present year, than any data now in the Department; to this, however, may be added perhaps twenty per cent. with a view to the contemplated increase of the naval force.

I am very respectfully, your obedient servant,

W. JONES.

The PRESIDENT of the *United States.*NAVY DEPARTMENT, ACCOUNTANT'S OFFICE, *January 10, 1814.*

SIR:

I now hand you a statement of the blankets and other woollen goods, procured for the navy during the last year, as far as it can be ascertained from the accounts rendered.

I have the honor to be, very respectfully, your obedient servant,

THO. TURNER.

The Hon. W. JONES.

NAVY DEPARTMENT, *Accountants' Office, January 8, 1814.*THO. TURNER, *Accountant.*

13th CONGRESS.]

No. 411.

[2d Session.

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 7, 1814.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their last report, of the 6th of February, 1813, so far as the same have been completed, are fully detailed in the report of the acting Secretary of the Treasury to this Board, dated the fourth day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

E. GERRY,
JAS. MONROE,
W. JONES, *Acting Secretary of the Treasury.*

WASHINGTON, February 5th, 1814.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That the balance of moneys advanced on account of the public debt, remaining unexpended at the close of the year 1811, and applicable to payments falling due after that year, which balance, as appears by the statement B, annexed to the last annual report, amounted to five hundred and two thousand five hundred and thirteen dollars eighty-five cents,	\$502,513 85
Together with sums disbursed from the treasury during the year 1812, on account of the principal and interest of the public debt, which sums, as appears by the statement C, annexed to the last annual report, amounted to four millions four hundred and seventy-four thousand five hundred and fifty-eight dollars nineteen cents,	4,474,558 19
Together with a further sum arising from profit in exchange on remittances from America to Europe, during the year 1812, amounting, as appears by the statement D, annexed to the last annual report, to ninety-one thousand five hundred and thirty-two dollars eighty-eight cents,	91,532 88
And with a further sum, being the difference between the principal of stock purchased during the year 1812, and the money paid for the same, of three thousand one hundred and two dollars eighty-one cents,	3,102 81
And amounting, together, to five millions and seventy-one thousand seven hundred and seven dollars seventy-three cents,	<u>\$5,071,707 73</u>

Have been accounted for in the following manner, viz:

I. There was repaid into the treasury, during the year 1812, on account of the principal of moneys heretofore advanced for the payment of the public debt, as appears by the statement E, annexed to the last annual report, the sum of twenty-four thousand nine hundred and twenty-seven dollars thirty cents,	\$24,927 30
II. The sums actually applied during the same year to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the annexed statement A, to four millions seven hundred and ten thousand nine hundred and fifty-four dollars thirty-nine cents, viz:	
1. Paid in reimbursement of the principal of the public debt,	\$2,259,681 82
2. Paid on account of the interest and charges on the same,	2,451,272 57
	<u>4,710,954 39</u>
III. The balance remaining unexpended, at the close of the year 1812, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the annexed statement B, to three hundred and thirty-five thousand eight hundred and twenty-six dollars four cents,	335,826 04
	<u>\$5,071,707 73</u>

That, during the year 1813, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt, viz:

I. On account of the interest and reimbursement of the domestic funded debt,	\$4,713,421 61
II. On account of the unfunded registered debt,	29 28
III. On account of the principal and interest of temporary loans, viz:	
Payment of interest,	127,067 10
Reimbursement of principal,	1,350,000 00
	<u>1,477,067 10</u>
	\$6,190,517 99
IV. On account of principal and interest of treasury notes,	4,239,925 80
V. On account of the interest on Louisiana stock and converted stock payable in Europe,	679,673 64
Amounting, together, as will appear by the annexed list of warrants, marked C, to eleven millions one hundred and ten thousand one hundred and seventeen dollars forty-three cents,	<u>\$11,110,117 43</u>

Which disbursements were made out of the following funds, viz:

I. From the balance of the appropriation of eight millions of dollars for the year 1812, remaining unexpended at the end of that year, which balance amounted, as stated in the last annual report, to	3,550,369 11
II. From the funds constituting the annual appropriation of eight millions of dollars for the year 1813, viz:	
From the fund arising from the interest on the debt transferred to the Commissioners of the Sinking Fund, as per statement I,	\$1,932,107 92
From the fund arising from the sales of public lands, being the amount received into the treasury from the 1st October, 1812, to the 30th September, 1813, per statement K,	830,671 53
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of vessels,	4,794,966 44
Amounting, together, to	<u>7,557,745 89</u>

Which sum of - - - - -	\$7,557,745 89
Being deducted from the annual appropriation of - - - - -	8,000,000 00
<hr/>	
Leaves an unexpended balance to be applied, in addition to the appropriation for that year, of - - - - -	\$442,254 11
<hr/>	
III. From repayments into the treasury, on account of moneys heretofore advanced for the payment of dividends on the domestic funded debt, as will appear by the annexed statement E, - - - - -	2,002 43
That the above mentioned disbursements, together with the balance above stated, which remained unexpended at the close of the year 1812, of - - - - -	335,826 04
Together with a further sum arising from profit on remittances from America to Europe, purchased during the year 1813, and amounting, as appears by the annexed statement D, to - - - - -	98,452 05
And with a further sum, being the difference between the principal of stock purchased during the year 1813, and the money paid for the same, amounting, as appears by the annexed statement L, to - - - - -	1,902 34
<hr/>	
Making, together, eleven millions five hundred and forty-six thousand two hundred and ninety-seven dollars eighty-seven cents, - - - - -	\$11,546,297 87
<hr/>	

Will be accounted for in the next annual report, in conformity with the accounts which shall then have been rendered to the Treasury Department.

That, in the mean time, the manner in which the said sum has been applied is estimated as follows, viz:

I. The repayments into the treasury on account of the principal of moneys advanced for the payment of dividends on the domestic funded debt, have amounted, during the year 1813, as by the above mentioned statement E, to - - - - -	2,002 43
II. The sums actually applied, during the year 1813, to the principal and interest of the public debt, are estimated as follows:	
1. Paid in reimbursement of the principal of the public debt, - - - - -	\$7,177,550 24
2. Paid on account of interest and charges on the public debt, - - - - -	3,510,054 67
<hr/>	
As will appear by the annexed estimate F, - - - - -	10,687,604 91
III. The balance which remained unexpended at the close of the year 1813, and applicable to payments falling due after that year, is estimated, per annexed estimate G, at - - - - -	856,690 53
<hr/>	
	\$11,546,297 87
<hr/>	

That, in conformity with the resolution of the Commissioners of the Sinking Fund, of the 6th of July, 1812, a copy of which was annexed to the last annual report, purchases of Louisiana stock and six per cent. stock of 1812 were continued in the year 1813, and \$147,200 of the former and \$267,200 of the latter were purchased for \$412,497 66, the particulars of which purchases are exhibited in the annexed statement, marked L.

That, agreeably to the terms of the contracts by which certain temporary loans had been obtained in the year 1812, under the law authorizing the loan for a sum not exceeding eleven millions of dollars, such instalments of those loans as fell due in the year 1813, were duly discharged at the times when they respectively became payable. These instalments amounted to \$1,350,000, and are shown in detail in the annexed statement, marked M.

That, during the year 1813, and in the months of January and February, 1814, treasury notes amounting to \$4,022,700, became payable, and, together with the interest thereon, were paid on moneys advanced for their payment at the several days on which they fell due. The annexed statement, N, shows the times when, and the places at which, these notes were payable.

And that the annexed statement, marked H, exhibits the amount of stock transferred to the Commissioners of the Sinking Fund and to the Treasurer of the United States, in trust for said States, and standing on the books of the treasury to their credit, on the 31st December, 1813.

All which is respectfully submitted.

W. JONES, *Acting Secretary of the Treasury.*

TREASURY DEPARTMENT, *February 4th, 1814.*

A.

Statement of the application, during the year 1812, of the funds provided for the payment of the principal and interest of the Public Debt.

I. *Payments on account of the principal of the Public Debt:*

Of the domestic debt.		
Annual reimbursement of the old six per cent. stock, - - - - -	\$1,047,195 68

		5,966	06
Loss on exchange in drawing 275,000 guilders from London to Amsterdam, cost £30,445 13 6,	-	25,814	11
		656,701	32
Commissions to agents in America for purchasing bills,	-	1,043	87
		657,745	19
			2,451,272 57
			<u>\$4,710,954 39</u>

TREASURY DEPARTMENT, *Register's Office*, February 3, 1814.

JOSEPH NOURSE, *Register*.

B.

Statement of the provision, made before the 1st of January, 1813, for the payment of the principal and interest of the Public Debt, falling due after that day.

I. *On account of the Foreign Debt.*

1. Cash in the hands of commissioners and agents in Europe, viz:			
In London, on 31st December, 1812,	-	£52,899 8 10, at 4s. 6d.	\$235,108 63
In Amsterdam on the same day, guilders,	-	385,646 10	
Deduct amount of moneys received by the commissioners before 1st January, 1813, but not paid for at treasury till after that day,	-	18,322	
		G.367,324 10, at 40 cents,	146,929 80
2. Remittances outstanding, viz:			
Amount paid for at the treasury, and remitted to Amsterdam before 1st January, 1813, but not received by the agents till after that day, guilders	-	215,505 10, at 40 cents,	86,202 20
			468,240 63
3. Amount of payments made at the treasury, before the 1st of January, 1813, for bills which have been protested for non-payment, and which, on that day, had not been repaid into the treasury, viz:			
Amount outstanding previous to the year 1809, as explained in report of February 3, 1809,	-	\$13,357 00	
Amount outstanding of bills purchased in 1810, as explained in report of February 5, 1813,	-	8,888 88	
			22,245 88
			490 486 51

II. *Deduct amount, short provided, on account of the Domestic Debt, as follows:*

The demands unsatisfied on the 1st January, 1813, were as follows, viz:

1. Dividends payable by commissioners of loans, including the dividends due on that day, and exclusive of dividends no longer demandable at their offices,	-	\$1,182,597 37	
2. Dividends on stock standing on treasury books, beyond the amount advanced to the cashiers for their payment,	-	63,616 79	
3. Unclaimed dividends from the loan offices, payable at the treasury, beyond the amount advanced to the cashiers for their payment,	-	234,774 18	
			1,480,988 34
The provision made for the above objects, was as follows, viz:			
1. Cash due from commissioners of loans, deceased and out of office,		9,061 85	
2. Cash in the hands of commissioners of loans, in office,		1,232,695 18	
3. Cash in the hands of the treasurer, as agent of the commissioners of the sinking fund,		80,539 23	
4. Undrawn dividend on stock belonging to the commissioners of the sinking fund, not received by the treasurer till 1813,		210 00	
5. Cash heretofore advanced to a commissioner of loans, no longer in office, for the reimbursement of exchanged stock, and remaining unapplied,		3,821 61	
			1,326,327 87

Leaving this sum short provided on the 1st January, 1813, to meet all payments on account of the domestic debt,

Total amount of provision for the public debt, remaining unapplied on the 31st December, 1812, \$335,826 04

TREASURY DEPARTMENT, *Register's Office*, February 3, 1814.

JOSEPH NOURSE, *Register*.

G.

An estimate of the funds provided before the 1st January, 1814, for the payment of principal and interest of the Public Debt, falling due after that day.

I. *On account of the Foreign Debt.*

Cash in the hands of commissioners and agents in Europe, and remittances outstanding on the 31st December, 1812, per preceding statement B,	\$468,240 63
The remittances made during the year 1813, per preceding statement D, are as follows, viz:	
To Amsterdam,	Guilders 91,319,08, at 40 cents, \$36,527 76
To London,	£166,500 at 4s. 6d. 740,000 00
	<u>776,527 76</u>
Total to be accounted for,	1,244,768 39
The amount applied during the year 1813, per preceding estimate F, is calculated to have been, for interest and charges in Europe,	<u>540,727 23</u>
The balances in the hands of agents in Europe, or in remittances outstanding, may therefore be estimated, on the 31st December, 1813, at	704,041 16
The amount of protested bills outstanding, and unrecovered on that day, was the same as that on the 31st December, 1812, per preceding statement B,	<u>22,245 88</u>
	726,287 04

II. *On account of the Domestic Debt.*

Cash advanced from the treasury, beyond the amount necessary for the payment of dividends, and remaining in the hands of the treasurer, as agent for the commissioners of the sinking fund,	130,403 49
	<u>\$856,690 53</u>

No. 412.

[2d SESSION.

INCORPORATED BANKS AND INSURANCE COMPANIES IN THE DISTRICT OF COLUMBIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 22, 1814.

TREASURY DEPARTMENT, February 21, 1814.

SIR:

I have the honor to transmit herewith, in compliance with the resolution of the House of Representatives of the 10th instant, a statement containing the information therein required, in relation to the incorporated banks within the District of Columbia.

There is, it is believed, but one incorporated insurance company within the district, and the inclosed letter from the secretary of that company states the particulars in relation to it, required by the said resolution.

I have the honor to be, very respectfully, sir, your obedient servant,

G. W. CAMPBELL.

The Honorable the SPEAKER of the House of Representatives.

Statement of the incorporated Banks within the District of Columbia, and of the situation of their affairs, agreeably to the latest statements rendered by them, respectively, to the Secretary of the Treasury.

ALEXANDRIA, February 12, 1814.

SIR:

Seeing a call from Congress upon your Department for information of all insurance companies in the district, I have thought the following communication might not be unacceptable.

The General Assembly of Virginia passed an act on the 16th of January, 1798, incorporating the "Marine Insurance Company of Alexandria, allowing a capital of 12,500 shares at \$20 per share, or \$250,000, to be paid by instalments, as called for at discretion of the President and Directors.

Of this, 7,434 shares only were subscribed in the first instance, (nor has the subscription been since opened) on which were called instalments amounting, together, to \$13 a share, making the present actual capital \$96,642, which, on an experience of sixteen years, has been found fully adequate to the business of the company.

The war has now completely wound up that business, not having a cent. at risk, and the entire capital is invested in the stock of the banks of Alexandria and Potomac.

I am, respectfully, sir, your most obedient servant,

J. B. NICKOLLS,

Secretary Marine Insurance Company of Alexandria.

The Hon. WILLIAM JONES, Secretary of the Treasury.

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 3, 1814.

Mr. IRVING, from the committee appointed to take into consideration the petition of George Walkington, made the following report:

That they have had the same under consideration, and find, by the statement of the petitioner, supported by other respectable vouchers, that, in the year 1808, being a mariner, out of employ, on account of the embargo, he was engaged by a Mr. George M. Woolsey, at that time a respectable merchant in the city of New York, to take charge of the ship Halcyon, to clear her out from the port of said city, and to carry her to the port of Jersey, on the opposite side of the Hudson river.

That, shortly after he carried the said ship to Jersey, a captain was placed on board of her, and the petitioner discharged, receiving as a compensation for his services for the time he had charge of her, *ten dollars*. That, when he cleared the said ship out from the port of New York, he signed certain papers at the custom house, which, as he

had never cleared a ship out before, he supposed to be mere papers relating to her clearance. That, in the year 1810, he was arrested, at the suit of the United States, on a bond for \$57,000, which, to his surprise, he then learned was an instrument he unwittingly signed at the time of the said clearance. That, being friendless, and not able to procure surety for such an amount, he was placed in prison, and remained there for ten months, when, by the commiseration of the collector of the port of New York and the attorney for the district, who joined in a petition with him to the Secretary of the Treasury, the penal bond was reduced to \$800, for which he gave bail, and then applied himself to his avocation, in the hope of making sufficient to meet the bond. That, while thus in the prosecution of his calling as a mariner, he was taken at the commencement of the present war with Great Britain, was carried into Gibraltar, where his cargo and all his little property was condemned, and himself detained a prisoner of war eleven months. That, being at length exchanged, he returned in a cartel from London to the United States, and on arriving in the city of New York, he found judgment entered against him on the penal bond, and was surrendered to prison by his bail. That he is now pennyless, in abject want, and has a wife and two small children, who are, likewise, through his imprisonment, involved in the same state of penury and suffering.

From the testimony of others in behalf of the character and circumstances of the petitioner, the committee are of opinion that his situation is as deplorable as he represents, and that he has been an unsuspecting dupe; especially so, when they take into consideration the smallness of the sum, *ten dollars*, which was all that he received for his services on board of the said vessel; which he states to have been at the rate of two dollars per day, the wages usually allowed in the port of New York to those who are employed as ship keepers.

The committee are convinced that a man of the character the petitioner is represented to have possessed, would hardly have rendered himself liable to the consequences which have overtaken him for so paltry a sum. If, however, he should have been guilty, they are of opinion that the law has been fully satisfied for his offence, in his imprisonment for sixteen months, and his having been reduced to his present state of absolute wretchedness and want.

They therefore beg leave to report a law for his relief.

13th CONGRESS.]

No. 414.

[2d SESSION.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 23, 1814.

To the Honorable the Senate and the Honorable the House of Representatives of the United States in Congress assembled, the petition of the subscribers, inhabitants of the towns of Sutton, Millbury, Oxford, and Dudley, in the county of Worcester, and Commonwealth of Massachusetts, humbly sheweth:

That the manufacturing of scythes in this section of the country, at the present, is in a flourishing and increasing state. That, in the year 1810, there were in these towns, eleven blacksmith shops, to wit: nine in the town of Sutton, two in Oxford, but none in Dudley, which were appropriated to the use of making scythes. Since which time a part of the town of Sutton have been incorporated by the name of Millbury. That there have been erected in these towns, since 1810, seven new shops; in some of which can be made one thousand dozen of scythes annually. The scythe making business is not confined to these towns, but has increased, as your petitioners believe, in nearly an equal degree, throughout this State, and, we think, we might add, throughout the Northern States. Your petitioners confidently believe that a sufficient quantity of scythes are and could be manufactured for the use of the United States, by its own citizens.

Also, the manufacturing of mill saws is carried on in this vicinity to a considerable extent, as also in many other places in the Union, and is capable of such improvements as to supply the country with that article.

Your petitioners are, however, aware that whenever the restrictions on commerce shall cease, that from the great importation of scythes and mill saws from Europe, which would, of course, succeed such an event, they must unavoidably suffer, unless encouraged by the interposition of Congress. They therefore pray your honors, that such duty may be imposed on all scythes and mill saws imported, as shall render suitable encouragement to the manufacturing of those articles in this country, or in such way as the wisdom of your honors shall deem proper; and, as in duty bound, will ever pray.

ELIJAH WATERS, & Co., and others.

13th CONGRESS.]

No. 415.

[2d SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE SENATE, MARCH 24, 1814.

Mr. ROBERTS, from the committee to whom was referred the petition of Stephen Girard, of Philadelphia, on the subject of the ransom of the ship *Montesquieu*, made the following report:

That, after a careful examination of the petitioner's allegations, they see no reasons for considering the importations in the *Montesquieu* as being placed in a different situation, as to the payment of duties, on account of the ransom of that vessel. The ransoming differs not from any other commercial adventure in its principle. The petitioner was permitted to ransom his vessel, by the Government, on his own application, for the promotion of his own interest, and it was in character an indulgence. It is not suggested the interest of the petitioner has suffered by the adventure. If the act of ransoming be considered as a partnership act between the petitioner and the Government, that would justify, even in the event of loss, a diminution of duties, the rule of justice, in the event of profit, would give him a participation in the nett gain. The committee, not seeing there is any validity in the suggestion of common interest, and finding no loss is alleged, submit a resolution, as follows:

Resolved, That the petitioner have leave to withdraw his petition.

Attest:

SAMUEL, A. OTIS, Secretary.

13th CONGRESS.]

No. 416.

[2d SESSION.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 25, 1814.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of James Washburn and John Alexander, of New Bedford, Massachusetts, made the following report:

The object of the petitioners is to be relieved from the payment of two executions which have been issued against them. The facts as set forth are these:

The petitioners, in the summer of 1811, despatched the schooner Mars, a coasting vessel, to Eastport, in Massachusetts, for a load of plaister of paris, which was obtained; on her return she was seized, and the vessel and cargo were libelled. Judgment by the court was given against the vessel and cargo, on this ground: that the vessel, as a coasting vessel, was engaged, contrary to law, in a foreign trade; all which will evidently appear by a reference to the record. The petitioners seek relief from Congress, and rely to obtain it on the ground that the plaister of paris, which was purchased of a certain Solomon Rice, of Eastport, was legally imported into the United States. This case has been solemnly decided by the judiciary, on great deliberation, after giving the parties ample time to make their defence. The fact on which they depend for obtaining relief from Congress, if it existed at all, had an existence prior to the institution of a libel against the said vessel and cargo, and might have been made manifest to the court. But this was not done; no new case is made out; a review of the cause, in the nature of an appeal, is solicited. This solicitation is contrary to every principle of jurisprudence, were it to be granted. Infinite mischief would be the result, and the province of the judicatories of the United States would be invaded. If the parties have sustained any damage, it is fairly chargeable to their own rashness or negligence. If they are without a remedy, they are the cause of it. From this view of the case, the committee are compelled to recommend to the House the adoption of the following resolution:

Resolved, That the petitioners have leave to withdraw their petition.

13th CONGRESS.]

No. 417.

[2d SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 25, 1814.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of Lenon Orso, a native of New Orleans, made the following report:

The petitioner states, that, since the year 1809, he has purchased of John D. Beckett, and others, merchants of New Orleans, sundry articles of foreign merchandise, the duties on which he was informed, and verily believes, have been paid. That the merchandise, thus purchased, at sundry times, was shipped on board the coasting schooner Victoire, to the town of Mobile, in that part of Louisiana, of which possession had not been delivered to the Government of the United States, and there landed the said merchandise, and disposed of a part of the same. The petitioner also, further states, that, towards the end of November, 1810, it was generally believed, that a certain Reuben Kemper, with others associated with him, had formed a plan for taking, plundering, and burning the said town of Mobile. The petitioner, apprehending an attack on the said town, embarked for the county of Baldwin, near Fort Stoddert, carrying with him, in the said schooner Victoire, his family, and the merchandise which remained unsold; the articles of which are enumerated in the invoice annexed to this petition. On the arrival of which merchandise, at the port of Fort Stoddert, the petitioner reported to the collector of the district of Mobile, who compelled him to enter the same, and give bond for the payment of duties on the same. The petitioner prays to be relieved from the payment of the said bond, amounting to upwards of six hundred dollars.

The committee, on mature consideration of this case, are impressed with the opinion, that they have not jurisdiction over the same. They think that it belongs, properly, to the cognizance of the judiciary. The petitioner, complains that he has been compelled, by the collector at Fort Stoddert, to execute a bond contrary to law, for the payment of duties on certain merchandise, not liable to pay duties. The case is briefly this, the merchandise subjected to duty, he says, he purchased of John D. Beckett, and others, at New Orleans, in the years 1809 and 1810, the duties, previously to his purchasing the same, having been paid. That, in the year 1809 he moved, and carried with him to the town of Mobile, the merchandise then purchased; and that at sundry times afterwards, in the year 1810, he received at the last mentioned place, other articles of merchandise, purchased of the said John D. Beckett, and others; and that he resided at the town of Mobile, till the latter end of November, 1810; at which time, apprehending an attack on the town, by a certain Reuben Kemper and others, he removed, with the merchandise then unsold, to the county of Baldwin, near Fort Stoddert. If the petitioner has been constrained, illegally, to secure the duties on the above mentioned merchandise, the courts of law are open to the petitioner for relief; to them he ought to resort. The petitioner can fairly bring his case to a judicial examination and decision, by refusing to pay the bond, executed by him to secure the duties to the United States. It is the province of the legislature to enact laws, but not to expound and enforce them. Happily for this nation, these solemn duties are confided to separate and distinct departments. The committee can never be brought to countenance an usurpation of power, by any of their acts. The demarcations which the constitution has fixed and assigned to the several co-ordinate branches of the government, will be sedulously kept in view. They will never pass, knowingly, the barrier prescribed by the constitution to their functions. These considerations, they conceive, sufficiently justify them in recommending to the House of Representatives to refuse the interposition of its extraordinary powers, and the propriety of leaving the petitioner to his remedy at law. But, should the House deem this position not solid, and require a report on the merits of the case; in order to meet with promptitude such a requisition, and to prevent delay, the committee beg leave to offer the following views on the merits of the claim of the petitioner, to a remission of the duties:

On a full and deliberate examination of this case, this committee are of opinion, that relief ought not to be granted. The reasons which have led them to form this opinion, are the following: The petitioner, who states that he is a citizen of the United States, knew, at the time that he removed from New Orleans, with the avowed intention of taking his stand, of residing at the town of Mobile, and carrying on there the business of a merchant, that the town of Mobile was in possession of the Spaniards, and subject, while they possessed it, to the laws of Spain.

He had voluntarily removed himself from the jurisdiction of the laws of the United States, and had relinquished during such residence there, all claim to the privileges which they impart. Had he committed, while he resided there, an offence, which was punishable by the Spanish laws, he would have been amenable to them? Had he imported merchandise there, it would likewise have been subject to the tariff of the Spanish customs, and the duties arising from the same, would have gone to the Spanish treasury. These are positions the committee take to be undeniable;

no exception can be made to them; nor can the petitioner avail to himself any advantage, by alledging, that the town of Mobile, was a part of Louisiana; because, although the town, in fact was part of the territory belonging to the United States, yet the possession of it had not been obtained by the Government of the United States, from that of Spain.

During the forcible detainer of the town of Mobile, by the Spanish Government, that of the United States could view it in no other light, than as being, during the possession thereof by the Spaniards, for all purposes of commerce and intercourse, a place under the jurisdiction of a foreign nation. Had the Government of the United States considered it in any other point of view, the town of Mobile would have been the emporium of foreign merchandise for the surrounding country, and the treasury of the United States would have been defrauded of the duties, arising on their importation. If these reasons be sound, and the committee are persuaded that they are so, the petitioner can have no just cause for complaining that the merchandise, which he removed from the town of Mobile, to the county of Baldwin, has been subjected to the payment of duties to the United States. Should this ground, however, prove to be untenable, which the committee apprehend is not likely to be done; another consideration of which the petitioner's case is susceptible, will place it beyond every hope of redress, and show, in the strongest manner, that by granting relief, all the just rules which reason and law sanction, would be violated.

The petitioner, in substantiating his claim to have the duties remitted, which he has been compelled to secure to the United States, by the collector of Fort Stoddert, insists much on this fact, that the merchandise, on which the duties have been paid, was purchased of certain merchants in New Orleans, on which the duties, previous to his purchasing the same, had been paid to the United States. This statement, and the confident reliance of the petitioner on it, to make good his claim, requires some examination. To perform which task, the committee are necessarily compelled to analyze the evidence offered by the petitioner. The deposition of John D. Becktell, taken *ex parte*, amounts to this, that certain merchandise, specified in the invoice annexed to the petition, was purchased of him at New Orleans, in the years 1809 and 1810, but it does not prove that the merchandise which was removed in 1810, by the petitioner, in the schooner *Victoire*, a coasting vessel of the United States, to the aforementioned county of Baldwin, was the same merchandise which had been purchased of him in the years 1809 and 1810. Nor was it possible for the deponent to do so. How could he depose to the identity of the articles of merchandise, after such a lapse of time? Could not the town of Mobile be furnished in the course of trade, with the like articles, from no other person than the deponent; from no other place than New Orleans? The attempt to prove the fact as stated, would be proving too much; it would be proving a thing, if not impossible, that was at least highly improbable. The fact, then, that the merchandise which was removed to the aforementioned county of Baldwin, was a part of the same specified in the invoice, and which was purchased as aforementioned, is proved only by the statement and averment of the petitioner alone. This testimony is inadmissible; it is contrary to all the rules of enlightened jurisprudence, that the party interested should be a witness; nay, the sole witness in his own cause. The committee do not intend, by their mode of examining this case, to implicate the characters of the petitioner, or the deponent. These are persons unknown to them; and they deprecate nothing more than the infliction of injury on the feelings and characters of those who shall pass in their view and review, while performing the sacred office of judges. To keep the scales of justice in equipoise, between the government and the citizen, is the sole object of the committee. To effectuate this object, always desirable, but of difficult attainment, the freedom of discussion is essential. Truth cannot be arrived at without the vigorous and free exercise and exertion of the faculties of the mind. Her lights must be elicited, like sparks from the flint; to those belong the property to animate and to cherish, and, when just cause and imperious necessity shall require, to blast, or to consume.

For these reasons, the committee respectfully submit the following resolution:

Resolved, That the petitioner have leave to withdraw his petition.

[18th CONGRESS.]

No. 418.

[2d SESSION.]

REVISION OF THE REVENUE LAWS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 9, 1814.

To the Honorable, the Senate and House of Representatives of the United States of America in Congress assembled, your petitioners, Manufacturers of the city and neighborhood of Baltimore, and others, who feel interested in the promotion of domestic manufactures, respectfully represent:

That they have long understood, it is the opinion of many merchants engaged in the importation of foreign manufactured merchandise, that the mode at present used to ascertain the duties thereon is, in many respects, very defective, not calculated either to protect the interests of the United States in a full receipt of revenue, or the honest importer from the practices of the fraudulent one, and that some amendment to the present collection law is absolutely necessary. They are now under the impression, that a law will soon be passed, which will have the effect to produce an entire change in the usual manner of introducing such manufactures, at least those which are of British origin, through the medium of neutrals, and, therefore, it is more desirable than ever, that such an amendment should be made without delay, because, if this law should pass, an immense importation of goods will no doubt take place in the course of a few weeks, and if the proposed amendment to the collection law should not be made previous thereto, the United States will no doubt suffer a great loss of revenue, and an injury proportional thereto will be done to domestic manufactures. It is of little moment to the importer what is the rate of duty which he has to pay, because he always calculates on its reimbursement; but it is of vital importance to him, and to the security of the revenue, that the same duty is paid on the same kind and quality of goods by every importer in the United States. To endeavor to obtain such an amendment to the present collection law as will have this effect, is the principal object of this petition, and your petitioners are the more solicitous for it from a full belief, that while it will protect the interests of the fair trader, and increase the revenue, it will also support the manufactories already established in the United States and forward and encourage the erection of many others now in contemplation.

Your petitioners further represent, that they believe a prohibition of the importation of cotton goods the manufacture of countries beyond the cape of Good Hope, would very materially tend to benefit the agricultural interest of the country, by creating a constant and steady demand for raw cotton, and, that while it would encourage the manufacture of coarse cotton fabrics, it would serve as an important check to the exportation of specie.

Your petitioners therefore pray that an act or acts may be passed for the purposes stated, or that such other relief may be granted in the premises as to both Houses of Congress may appear to be right, and your petitioners, as in duty bound, shall ever pray, &c.

Signed by the subscribers, a committee appointed for this purpose, at a meeting held at the Merchant's Coffee House, in Baltimore, the 6th day of April, 1814.

JOHN HILLEN,
WM. PATTERSON,
SAML. HARDEN,
ROBERT MCKIM,
JNO. GILL,
NATHAN LEVERING,

[2d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 9, 1814.

TREASURY DEPARTMENT, April 7, 1814.

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed April 2d, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

G. W. CAMPBELL.

The Hon. the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, Comptroller's Office, April 4, 1814.

SIR:

The statements herewith, marked A, B, and C, have been prepared pursuant to the seventh section of an act of Congress, passed the 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." They contain all the information, relative to the mint, which the settlements made at the treasury enable me to afford.

I am, sir, with great respect, your obedient servant,

EZ. BACON.

GEORGE WASHINGTON CAMPBELL, Esq. Secretary of the Treasury.

A.

Statement exhibiting the balance of Gold and Silver remaining in the hands of the officers of the Mint on the 31st December, 1812; the amount deposited from 1st January to 31st December, 1813; the different species of coins made and paid on account of deposits, allowance for wastage, and the balance remaining in the hands of the officers of the Mint on the 31st December, 1813, to be accounted for on a future settlement.

ANDREW ROSS, Clerk.

13th CONGRESS.]

No. 420.

[2d SESSION.]

ON THE EXPEDIENCY OF MAKING FOREIGN GOLD COINS A LEGAL TENDER, AND PROHIBITING THE EXPORTATION OF SPECIE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 12, 1814.

BALTIMORE, March 4, 1814.

Sir:

From the numerous calls for specie lately made on the banks of this State, and to the Southward; and which there is reason to apprehend will be repeated, great inconvenience must soon result, unless some measures are adopted to avert the difficulty of meeting those demands. The banks of this city have been, and still are, laboring under considerable inconvenience, from the circumstance of foreign gold coins not being a legal tender. They received those coins to a large amount, under an act of Congress which was suffered to expire, and are now unable to use them, notwithstanding the pressing demands upon them. A law giving some rate of currency to specie of this description, seems indispensably necessary, and would contribute materially to their relief.

Since the State of Maryland has been wholly deprived of commerce, the banks in the city of Baltimore have been gradually getting in debt to the Eastern cities, and payments are now required in specie, to an amount that will greatly exhaust their treasure--in the event of peace, the further demand for exportation will, it is apprehended, materially increase their embarrassments. In the latter point of view, the subject is peculiarly interesting to the banks of New York, Philadelphia, and Baltimore, inasmuch as they have subscribed largely to the late loans to the United States. Nearly one-third of the banking capital of Baltimore has been thus invested, and if, on the return of peace, specie should be permitted to be exported, the necessary consequence will be, that the increased demand upon the banks will compel them to throw this stock into the market at a very reduced value, much to their own injury, as well as to the injury of the nation. And it may not be entirely unworthy of consideration, how far the prospect of exporting specie, at the close of the war, may retard, or the prohibition to export may facilitate, such loans as the Government may hereafter wish to make.

Under these impressions, therefore, we take the liberty respectfully to suggest to you, the propriety of recommending to Congress, during the present session, to provide by law for giving a rate of currency to foreign gold coins; and to prohibit the exportation of specie for twelve months after peace shall be proclaimed. In the hope that, if these measures shall meet your approbation, you will submit them to the President, or give them such other course as may in your opinion best promote the objects we have in view.

We have the honor to be, sir, with very high respect and consideration, your very obedient servants,

W. COOKE,
President of the Bank of Maryland.

WM. WILSON,
President of the Bank of Baltimore.

HENRY PAYSON,
President of the Union Bank of Maryland.

JAMES MOSHER,
President of the Mechanics' Bank of Baltimore.

HEZ. WATERS,
President of the Marine Bank of Baltimore.

JOSEPH H. NICHOLSON,
President of the Commercial and Farmers' Bank of Baltimore.

PHIL. MOORE,
President of the Franklin Bank of Baltimore.

WM. GRAHAME,
President of the Farmers' and Merchants' Bank.

JOHN DONNELL,
President of the City Bank of Baltimore.

The Hon. GEO. W. CAMPBELL, *Secretary of the Treasury.*

13th CONGRESS.]

No. 421.

[2d Session.]

REVISED STATEMENT OF THE PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 14th OF APRIL, 1814.

TREASURY DEPARTMENT, *April 12th, 1814.*

SIR.

I have the honor to transmit, herewith, a revised statement of the debt of the United States, accompanied by an explanatory letter on the subject, from the Register of the Treasury, by which it appears that in the statement of the public debt on the 1st January, 1813, annexed to the printed account of the receipts and expenditures for the year 1812, the amount of stock constituted under the act authorising a loan for the service of that year, was, by mistake, stated at eleven millions of dollars, instead of eight millions thirty-four thousand seven hundred dollars, the real amount of six per cent. stock issued by virtue of the act before recited.

I have the honor to be, very respectfully, sir, your obedient servant,

G. W. CAMPBELL.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Register's Office, 7th April, 1814.*

SIR.

I have the honor to transmit a revised statement of the "debt of the United States on the 1st January, 1813," as a substitute for the statement thereof, forming a part of the appendix to the printed accounts of the receipts and expenditures for the year 1812, presented a few days since, and transmitted to the House of Representatives of the United States.

The item in which the variation appears, is the extension of the sum of eleven millions of dollars, as constituted stock under the act for borrowing to that amount in the year 1812, and which had been calculated to the full amount; whereas the whole amount of the moneys borrowed under the authority of that act was only

- - - - -	\$10,184,700
But as \$2,150,000 therefore had been borrowed of certain banks, on contract, reimbursable in the years 1813 and 1814, this amount forms a deduction of	\$2,150,000

Leaving the true amount of six per cent. stock of the year 1812, of	\$8,034,700
---	-------------

A sufficient number of copies of this revised statement has been struck off, not only for the present occasion, but also to be bound up with the appendix to be rendered with a similar statement for the ensuing year, for the purpose of maintaining the correctness of those annual exhibitions of the public debt.

I have the honor to be, sir, your most obedient servant,

JOSEPH NOURSE, *Register.*

Honorable GEORGE W. CAMPBELL, *Secretary of the Treasury.*

Revised Statement of the Debt of the United States, on the 1st of January, 1813.

Domestic Debt, exclusive of the sums passed to the credit of the Sinking Fund:

Six per cent. stock, - - - - -	\$17,506,485 90
Three per cent. stock, - - - - -	16,157,972 59
Deferred stock, - - - - -	9,576,634 68
Louisiana six per cent. stock, - - - - -	11,070,700 00
Six per cent. stock, loan of 1796, - - - - -	80,000 00
Exchanged six per cent. stock of 1812, - - - - -	2,745,120 58
	<hr/>
	\$57,136,913 75

Six per cent. stock, constituted by an act passed the 14th of March, 1812, entitled "An act authorizing a loan of money not exceeding eleven millions of dollars," and for which scrip certificates were issued, - - - - -	*\$8,034,700
Deduct, purchased by the commissioners of the Sinking Fund, - - - - -	57,000
	<hr/>
	7,977,700 00

Nominal amount of debt on the 1st of January, 1813, - - - - -	\$65,114,613 75
Deduct reimbursement of the six per cent. and deferred stocks, to the 31st December, 1812, - - - - -	\$19,909,972 19
From this, deduct reimbursement paid on stock subsequently transferred to the Sinking Fund, to 1st January, 1810, - - - - -	28,748 02
And the difference between the nominal amount of six per cent. and deferred stocks exchanged, and the amount of exchanged stock issued in lieu thereof, being reimbursement previously paid on said stocks, - - - - -	5,664,227 48
	<hr/>
	5,692,975 50
	<hr/>
	14,216,996 69

Unredeemed amount on the 1st January, 1813, - - - - - (a) \$50,897,617 06

Nominal amount of the debt, as above stated, - - - - -	\$65,114,613 75
--	-----------------

Sinking Fund. The following sums are in the treasury books, passed to the credit of the commissioners of the Sinking Fund, to the 31st December, 1812.

Foreign Debt, viz: Five per cent. stock, - - - - -	\$8,200,000	
Four and one half per cent. stock, - - - - -	820,000	
Four per cent. stock, - - - - -	3,180,000	
	<hr/>	12,200,000 00
Domestic Debt, viz: Six per cent. stock, - - - - -	1,946,026 92	
Three per cent. stock, - - - - -	698,555 41	
Deferred six per cent. stock, - - - - -	1,005,179 83	
Eight per cent. stock, - - - - -	6,482,500 00	
Exchanged six per cent. stock, - - - - -	6,294,051 12	
Converted six per cent. stock, - - - - -	1,859,850 70	
Four and a half per cent. stock, - - - - -	176,000	
Five and a half per cent. stock, - - - - -	1,848,900	
Navy six per cent. stock, - - - - -	711,700	
Louisiana six per cent. stock, - - - - -	179,300	
Six per cent. stock of 1812, - - - - -	57,000	
	<hr/>	21,259,063 98
		<hr/>
		33,459,063 98'
		<hr/>

(a) Unredeemed amount, 1st January, 1812, - - - - -	- - - - -	\$45,120,150 43
Add six per cent. stock of 1812, - - - - -	\$8,034,700 00	
From which, deduct amount purchased by Sinking Fund, - - - - -	57,000 00	
	<hr/>	7,977,700 00
Add three per cent. stock issued since, - - - - -	82 55	
	<hr/>	7,977,782 55
		<hr/>
		53,097,932 98

Deduct reimbursement of six per cent. and deferred stocks, - - - - -	1,446,047 31
Ditto, of converted stock, - - - - -	565,318 41
Louisiana stock purchased, - - - - -	179,300 00
Deferred ditto, - - - - -	9,650 20
	<hr/>
	2,200,315 92

Unredeemed amount January 1, 1813, - - - - - \$50,897,617 06

(b) Total nominal amount of debt, including Sinking Fund, 1st of January, 1812, - - - - -	\$93,120,734 16
Add six per cent. of 1812, - - - - -	8,034,700 00
Three per cent. stock, issued since, - - - - -	82 55
	<hr/>
	8,034,782 55

Deduct difference between six per cent. and deferred stocks exchanged, and stock issued in lieu, 2,581,838 98

As above, - \$98,573,677 73

*The total amount of moneys received into the treasury, viz: In the year 1812, - - - - -	\$10,002,400
In the year 1813, - - - - -	182,300
	<hr/>
	\$10,184,700
From which, deduct the amount of temporary loans reimbursed in 1813 and 1814, - - - - -	2,150,000
	<hr/>
	\$8,034,700

13th CONGRESS.]

No. 422.

[3d SESSION.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, SEPTEMBER 26, 1814.

The Secretary of the Treasury, in obedience to the act "supplementary to the act, entitled an act to establish the Treasury Department," has the honor respectfully to submit to Congress the following report and estimates:

The sums authorized by Congress to be expended during the year 1814, and for which appropriations have been made, are as follows:

1. For civil, diplomatic, and miscellaneous expenses,	\$2,245,355 59	
To this sum is to be added, the amount which may be payable on the following accounts, viz: 1. The amount of fines, penalties, and forfeitures actually received into the treasury, which is appropriated for defraying the expenses of courts of the United States. 2. The sums received by the collectors of the customs for the Marine Hospital Fund and Privateer Pension Fund, which are paid into the treasury with the other moneys derived from the customs, but are exclusively applicable to the two objects here mentioned, respectively. 3. The moneys received into the treasury for the United States' moiety of prizes captured by public vessels, which belong exclusively to the Navy Pension Fund. These items are contingent and uncertain, until the accounts for the year are made up, and their amount ascertained. As they appear among the receipts into the Treasury, they must also be placed among its expenditures. They may be estimated for the year 1814, at	200,000 00	2,445,355 59
2. Military expenses, including the Indian Department, and the permanent appropriation of 200,000 dollars annually, for arming and equipping the whole body of the militia of the United States,		24,502,906 00
3. Naval expenses, including 200,000 dollars for the purchase of timber, appropriated by the act of March 30, 1812.		8,169,910 87
4. For the public debt, such sum as the public engagements may require; and which, during the year 1814, may be estimated as follows:		
Interest on the public debt existing previously to the present war,	1,980,000 00	
Interest on the debt contracted during the present war, including the loans of the present year and treasury notes,	2,950,000 00	
Reimbursement of principal, consisting of, the annual reimbursement of the old six per cent. and deferred stocks, temporary loans payable during this year, and treasury notes reimbursable during the same period,	7,572,000 00	
	12,502,000 00	
But for these purposes there had been advanced from the treasury during the year 1813, to sundry commissioners of loans, beyond the demands upon them for the year 1813, and to the Treasurer of the United States, as agent for the Commissioners of the Sinking Fund, about	350,000 00	
Leaving payable during the year 1814,		12,152,000 00
		<u>\$47,270,172 46</u>

The means by which this sum was to be provided, were the following:

1. Moneys receivable on account of the public revenue, and which were estimated as follows:		
From the customs,	6,500,000 00	
Sales of public lands,	600,000 00	
Direct tax and internal duties,	3,800,000 00	
Postage, and incidental receipts,	50,000 00	
	10,950,000 00	
2. Moneys receivable for the proceeds of loans, and for treasury notes to be issued, as follows:		
Amount payable into the treasury during the year 1814, of the loan of seven and a half millions, made under the act of August 2, 1813,	3,592,665 00	
Amount authorized to be borrowed by the act of March 24, 1814,	25,000,000 00	
Amount authorized by the act of March 4, 1814, to be issued in treasury notes,	5,000,000 00	
	33,592,665 00	
And it was estimated, that out of the balance of cash remaining in the treasury on the 1st day of January, 1814, which amounted to \$5,196,482 00, there might be applied a sum sufficient to cover the whole amount of the authorized expenditures, and which would be		2,727,507 46
		<u>\$47,270,172 46</u>

The accounts of the treasury have as yet been made up only for the two first quarters of the year 1814, or to the 30th of June, of that year. The annexed statement, marked A, shows the receipts and expenditures at the treasury for the fourth quarter of the year 1813, which have not before been communicated to Congress, and separately, those of the two first quarters of the year 1814.

By this statement, it appears that the payments from the treasury during the first half of the present year, have been,

For civil, diplomatic, and miscellaneous expenses,	1,444,062 60
Military,	11,210,238 00
Naval,	4,012,899 90
Public Debt,	3,026,580 77
	19,693,781 27

And would leave payable during the remainder of the year, on those several accounts, the following sums:

For civil, diplomatic, and miscellaneous expenses,	1,001,292 99
Military expenses,	13,292,668 00
Naval, do.	4,157,010 97
Public debt, do.	9,125,419 23
	27,576,391 19
	<u>\$47,270,172 46</u>

The receipts into the treasury during the first half of the present year, have been as follows:		
For the proceeds of the customs,	-	4,182,088 25
Public lands, (including those in the Mississippi Territory, the proceeds of which are now payable to the State of Georgia)	-	540,065 68
Internal duties and direct tax,	-	2,189,272 40
Postage and incidental receipts,	-	166,744 00
		<u>7,078,170 33</u>
Loan of seven and a half millions, under the act of August 2, 1813,	-	3,592,665 00
Loan of ten millions, (part of 25 millions,) under the act of March 24, 1814,	-	6,087,011 00
		<u>9,679,676 00</u>
Treasury notes, issued under the act of February 25, 1813,	1,070,000 00	
Treasury notes, issued under the act of March 4, 1814,	1,392,100 00	
	<u>2,462,100 00</u>	
		<u>12,141,776 00</u>
		19,219,946 33
And there remained cash in the treasury, on the 1st of July, 1814,	-	4,722,639 32
		<u>\$23,942,585 65</u>
To make up the sum, therefore, which will be wanted to meet the expenditures as above estimated, there must be obtained during the third and fourth quarters of the present year,		23,327,586 81
		<u>\$47,270,172 46</u>
And the further sum of 1,500,000 dollars, which is the least that ought at any time during a state of war, to be left in the treasury, making,	-	\$24,827,586 81

Of this amount it is estimated that there will be derived from the various sources of existing revenue, the following sums, viz:

From the customs,	-	2,820,000 00
It has not been practicable to prepare the statements of this and of the other branches of the revenue in the usual official form, to be communicated to Congress at this time. Some of these statements have been heretofore regularly given for periods terminating on the 30th of September; and to preserve the series unimpaired, their preparation is postponed until they can be made out terminating with that day. They will hereafter be laid before Congress in the proper form. The amount of the custom house duties which accrued during the year 1813, was 7,070,000 dollars. During the two first quarters of the present year they amounted to about 3,000,000 dollars; but, during the two last quarters, will not, probably, exceed 1,000,000. The amount receivable into the treasury, during the year 1814, from bonds outstanding at the commencement of the year, and from the duties accruing, and which will become payable during that year, is estimated at 7,000,000 dollars; which is 500,000 dollars more than was heretofore estimated. Of this sum, \$4,182,088 25, was paid during the first half of the year, and will leave payable, during the remainder of the year, the sum here stated.		
<i>Sales of Public Lands.</i> The proceeds of the public lands sold in the Mississippi Territory, which are now payable to the State of Georgia, are brought into the treasury in the same manner as the moneys derived from the sales of other public lands. As the amount, when paid out of the treasury to the State of Georgia, appears among the public expenditures, it is proper that these moneys should be placed among the receipts of the treasury. Including the proceeds of the lands in the Mississippi Territory, the receipts during the year 1814 are estimated at \$900,000; of which, \$540,065 68, having been received during the two first quarters of the year, there will be receivable during the two last quarters,	-	360,000 00
<i>Internal Duties and Direct Tax.</i> The receipts into the treasury, from these sources, during the present year, will fully equal the estimate heretofore made. These taxes are paid readily and cheerfully. The direct tax is in collection in more than three-fourths of the districts, and will shortly be in the same state in all the districts, except two or three, where the difficulty of obtaining competent persons to act as assessors has produced some delay. In several of the districts, the collection is already nearly completed. The amount estimated as receivable from these two sources, was 3,800,000 dollars. Of this sum, there was received prior to the 1st of July last, \$2,189,272 40, and leaves to be received during the remainder of the year,	-	1,610,000 00
<i>Postage, and Incidental Receipts.</i> These were estimated, for the whole year, at \$50,000. Including repayments, prize money, and the arrears of the former direct tax and internal duties, there was received, on these accounts, during the first half of the year, \$166,744. These receipts are so casual and uncertain, that it is difficult to make any estimate of their amount. During the remainder of the year, they may, perhaps, be expected to produce	-	50,000 00
Total amount receivable for revenue,	-	<u>\$4,840,000 00</u>

Under the act of the 24th of March, 1814, by which the President was authorized to borrow twenty-five millions of dollars, a loan was opened on the 2d of May, for ten millions of dollars, in part of that sum. A loan for ten millions of dollars was considered as more likely to prove successful, than if an attempt were made to obtain the whole amount of twenty-five millions at once. The sums offered for this loan amounted to 11,900,806 dollars; of which 2,671,750 dollars were at rates less than 88 per cent., and 1,183,400 dollars at rates less than 85 per cent. Of the sum of 9,229,056 dollars, which were offered at 88 per cent., or at rates more favorable to the United States, five millions were offered, with the condition annexed, that if terms more favorable to the lenders should be allowed for any part of the twenty-five millions authorised to be borrowed the present year, the same terms should be extended to those holding the stock of the ten million loan. Taking into consideration the expectation, then entertained, of an early return of peace, and the importance of maintaining unimpaired the public credit, by sustaining the price of stock in the meantime; and, also, considering the measure was sanctioned by precedent, it was agreed to accept the loan with that condition. Had the sum to which the condition was annexed been rejected, the consequence would have been to reduce the amount obtained to less than five millions, a sum altogether inadequate to the public demands; or, by depressing the stock to 85 per cent., to have obtained only a little more than six millions, which would still have been insufficient to answer the purposes of Government. Offers were subsequently made to this loan, of sums amounting to 566,000 dollars, which were accepted on the same terms as the original offers, and augmented the amount of the loan which was taken to 9,795,056 dollars.

The papers annexed, under the letter B, exhibit the particulars relating to this loan.

There was paid into the treasury, on account of the loan of ten millions, prior to the 1st of July, \$6,087,011; leaving to be paid, after that day, \$3,708,045. Of this sum, a failure of payment on the days fixed by the terms of the loan, of about 1,900,000 dollars, has taken place; and it is doubtful whether the payment will be effected. No

more, therefore, can be relied on towards the supply necessary for the third and fourth quarters of the year 1814, than what has already been paid, and amounting to about \$1,800,000.

Proposals were again invited on the 22d of August, for a loan of six millions of dollars, in further execution of the power contained in the act of the 24th of March, for borrowing twenty-five millions. The whole amount offered was only 2,823,300 dollars, of which 100,000 dollars were at rates less than 80 per cent., and 2,213,000 dollars were at the rate of eighty dollars in money for one hundred dollars of six per cent. stock. The remaining sum of 510,300 dollars was offered at various rates, from 80 to 88. Notwithstanding the reduced rate at which the greater part of the above sum was proposed, yet as the market price of stock hardly exceeded 80 per cent.; as there was no prospect of obtaining the money on better terms; and as it was indispensable for the public service, it was deemed advisable to accept the sums offered at that rate. Including the sums offered at rates more favorable to the United States than that here stated, the whole amount of the proposals accepted was 2,723,300 dollars; and a further sum of 207,000 dollars has been since accepted at the same rate; making the whole amount taken of this loan, 2,930,300 dollars.

The annexed papers, under the letter C, relate to this loan.

Some of the persons who originally made proposals for this loan, which were accepted, have since given notice that they could not carry their proposals into execution. The sums, in relation to which this failure has taken place, amount to 410,000 dollars; and there can, therefore, be relied on for the proceeds of this loan, only \$2,520,300.

Moneys having been heretofore obtained by the United States on loan in Europe upon favorable terms, and the punctuality and fidelity with which they were repaid, having established their credit there on a firm and respectable footing; it was determined, in consequence of the difficulties experienced in obtaining at home the sums requisite for the public service, to try the market in that quarter. To effect this purpose, the requisite powers and instructions have been given for negotiating a loan for six millions of dollars as a further part of the loan of twenty-five millions authorized by the act of the 24th of March last; and, in order to facilitate this object, six per cent. stock to that amount has been constituted and transmitted, with directions for its sale, if that shall be found the most advantageous mode for obtaining the money. The result, however, of this experiment, is not certain; and the proceeds, in case it should be successful, will not, probably, come into the treasury in the course of the present year; they cannot, therefore, be placed among the resources of this year. But, as this sum forms a part of that which was authorized to be borrowed, and which will be necessary for the service of the present year, further authority will be required from Congress for obtaining this sum, by loan or otherwise; in which case, the proceeds of the negotiation undertaken in Europe, will be applicable to the service of the ensuing year. With a view to avoid the inconvenient increase of stock in the market, and its consequent depreciation, an effort was made to obtain temporary loans from the banks by special contracts; but the attempt was not attended with success.

The amount of treasury notes issued prior to the 1st of July last, under the act of the 4th of March, 1814, was 1,392,100 dollars. Those since issued amount to \$1,512,300. The annexed statement, marked E, shows the particulars relating to these notes; and, in the paper marked D, an account is given of those treasury notes issued under the act of the 25th of February, 1813, which have not been heretofore reported to Congress.

There are now in circulation near 8,000,000 of dollars in treasury notes; of which, during the fourth quarter of the present year, notes for more than four millions of dollars will become reimbursable. A part of them may, perhaps, be replaced by new notes; but it is not believed that, upon their present footing, more than two millions and a half of dollars can thus be replaced. This would still leave more than six millions of dollars of notes in circulation; which the experience of two years has shown to be nearly as large a sum, while the other circulating paper medium of the country remained unembarrassed, and maintained itself in the public confidence, as can, in their present shape, be freely and easily circulated. Notes of a smaller denomination than those heretofore issued, have been prepared, and will, probably, by passing into a more numerous and extensive class of the money transactions of individuals, carry a greater quantity into circulation; there having been already issued, since the 1st of July, treasury notes amounting to 1,500,000 dollars, and it being estimated that a further sum of 2,500,000 dollars may be put in circulation previously to the end of the present year, the amount estimated to be derived from this source during the third and fourth quarters of the year, will be 4,000,000 dollars.

The means, then, for meeting the demands upon the treasury during the last half of the present year, as now ascertained, are estimated as follows:

From the revenue,	-	-	-	-	-	-	-	-	\$4,840,000
Loans under the twenty-five million act, viz:									
Loan of ten millions,	-	-	-	-	-	-	-	\$1,800,000	
Loan of six millions,	-	-	-	-	-	-	-	2,520,000	
								<u>4,320,000</u>	
									9,160,000
Treasury notes,	-	-	-	-	-	-	-	-	4,000,000
									<u>13,160,000</u>
And leave still to be obtained,	-	-	-	-	-	-	-	-	11,660,000
									<u>\$24,820,000</u>

The difficulties already experienced in obtaining loans, and the terms on which it has been found necessary to accept them, sufficiently show the propriety of Congress adopting effective measures for procuring the sums still required for the service of the residue of the present, as well as for that of the ensuing year.

The suspension of payments in specie, by many of the most considerable banks in the United States, and of those most important in the money operations of the treasury, has produced, and will continue to cause difficulties and embarrassments in those operations. The circulating medium of the country, which has consisted principally of bank notes, is placed upon a new and uncertain footing; and those difficulties and embarrassments will extend in a greater or less degree into the pecuniary operations of the citizens in general. The powers of Congress, so far as they extend, will be required to be exerted in providing a remedy for these evils; and in placing, if practicable, the currency of the country on a more uniform, certain, and stable footing.

If further reliance must be had on loans, it is respectfully suggested, that additional inducements should be offered to capitalists to advance their money, by affording an ample and unequivocal security for the regular payment of the interest, and reimbursement of the principal of such loans as may be obtained. This may be effected by establishing an adequate revenue, and pledging the same specifically for that purpose.

It is also submitted, for the consideration of Congress, whether treasury notes might not, by augmenting the rate of interest they now bear, and securing its payment, as well as their eventual reimbursement, by an adequate revenue pledged for that purpose, be placed on a footing better calculated, than at present, to sustain their credit, encourage their circulation, and answer with more certainty the purposes of Government.

The estimates for the service of the year 1815 have not yet been prepared. It is certain, however, if the war continues, that a sum will be required at least equal to that demanded for the present year; and, under the head of Public Debt, an additional sum, sufficient for the payment of the interest on the loans made in the meantime.

By the plan of finance which was adopted at the commencement of the present war, this additional sum would be all that would be required to be raised, by new taxes, during the year 1815, except what might be necessary to make good a deficiency in any of the existing revenues. According to that plan of finance, the expenditures to be covered by the revenue during the year 1815, would be as follows:

Expense of the peace establishment, - - - - -		\$7,000,000
Interest on the debt, existing prior to the war, - - - - -	1,900,000	
Interest on the debt contracted since the war, including treasury notes, and including the interest which will become payable during the year 1815, on debt contracted within that year, - - - - -	4,600,000	
	6,500,000	
		\$13,500,000

The revenues, as now established, are estimated to produce, during the year 1815, the following sums, viz:

<i>Customs.</i> —While the whole navy of the enemy is disposable for the interruption of our trade, this source of revenue cannot be very productive. From bonds which will be outstanding at the commencement of the year 1815, and from the duties which will accrue during that year, it is estimated that there will be received into the treasury, - - - - -		\$4,000,000
Sales of public lands, - - - - -		800,000
<i>Internal Duties.</i> —These will all bring their full amounts into the treasury during the year 1815, and will, it is believed, produce a nett sum of - - - - -		2,700,000
Arrears of direct tax of 1814, which will be received in 1815, - - - - -		600,000
Postage, and other incidental receipts, - - - - -		100,000
	8,200,000	
Total amount, - - - - -		8,200,000
And leaving to be provided, - - - - -		5,300,000
		\$13,500,000

Towards making up this sum of 5,300,000 dollars, a continuance of the direct tax will, it is believed, be necessary; but at its present rate, it will not produce, nett to the Treasury, more than 2,600,000 dollars.

In order to provide the remaining sum of 2,700,000 dollars, as well as such other sums as may be deemed requisite for the objects herein before suggested, it will be for Congress to consider how far it would be expedient to increase this tax, as well as the present internal duties; and, also, what new objects of taxation may, for that purpose, be most advantageously resorted to.

But the plan of finance above referred to, assumed, as one of the grounds upon which it depended, that loans might be annually obtained during the continuance of the war, for the amount of the extraordinary expenditures occasioned by it. The experience of the present year furnishes ground to doubt whether this be practicable, at least in the shape in which loans have been hitherto attempted. Nor is it even certain that the establishing and pledging of revenues adequate to the punctual payment of the interest and eventual reimbursement of the principal of the sums which will be required for the service of the year 1815, would enable the treasury to obtain them through the medium of loans effected in the ordinary way.

With this view of the subject, it is respectfully submitted, whether it would not be expedient to extend the provisions to be made for the service of the ensuing year, beyond those contemplated in this plan of finance, hitherto pursued for carrying on the war, so as to provide, by means other than loans, for at least a portion of the extraordinary expenditures occasioned thereby. This would have a tendency to ensure public confidence, and preserve and confirm the public credit.

The present state of our country, growing out of the unjust policy of the enemy, as well as the unusual manner in which he prosecutes the war, calls for new and extraordinary exertions on the part of the nation; and the means requisite to meet the expenditures which these may occasion, ought to be provided.

The resources of the nation are not exhausted; they are ample, and the occasion requires they should be brought into full activity.

The very expenditures which render necessary the imposition of additional taxes, will themselves have increased in the community the ability to discharge them.

The promptitude and cheerfulness with which the present taxes are paid, afford the best pledges of the spirit with which the people will meet such demands as the interest and safety of the country may require. A people who have not only tasted, but enjoyed in their full extent, the blessings of liberty and independence, for more than thirty years, cannot consider any sacrifices too great, which are found indispensable to preserve them inviolate.

Those sacrifices, however, which may be demanded by the present crisis in our affairs, will be of a temporary nature only; for, while we may fairly calculate, that, with the termination of the present contest, the duration of which will be shortened in proportion to the vigor and unanimity with which it is sustained on our part, will cease the expenditures consequent on a state of war, and render no longer necessary a continuance of those extraordinary revenues established to provide the supplies requisite for that object; we may with equal confidence rely, that the growing revenue arising from the commerce of a few prosperous years of peace, will be found sufficient to redeem the pledges which may have been made to the public creditors, and thus relieve the people from these burthens which times of danger and of difficulties rendered indispensable.

All which is respectfully submitted.

G. W. CAMPBELL.

NOTICE.

TREASURY DEPARTMENT, *April 4th*, 1814.

Whereas, by an act of Congress, passed on the 24th day of March, 1814, the President of the United States is authorized to borrow, on the credit of the United States, a sum not exceeding twenty-five millions of dollars; and whereas the President of the United States did, by an act or commission, under his hand, dated the 20th day of March, 1814, authorize and empower the Secretary of the Treasury to borrow, on behalf of the United States, the aforesaid sum of twenty-five millions of dollars, or any part thereof, pursuant to the act of Congress above recited:

Notice is therefore hereby given, that proposals will be received, by the Secretary of the Treasury, until the 2d day of May next, from any person or persons, body or bodies corporate, who may offer, for themselves or others, to loan to the United States, on account and in part of the aforesaid sum of twenty-five millions of dollars, the sum of ten millions of dollars, or any part thereof, not less than twenty-five thousand dollars.

The stock to be issued for the money loaned, will bear an interest of six per cent. per annum, payable quarter yearly; and the proposals must distinctly state the amount of money offered to be loaned, and the rate at which the aforesaid stock will be received for the same.

The amount loaned is to be paid into a bank or banks authorized by the treasury, in instalments, in the following manner, viz:

One-fourth part, or twenty-five dollars on each hundred dollars, on the twenty-fifth day of May next.

And one-fourth part on the 25th day of each of the ensuing months of June, July, and August next.

On the day fixed for the payment of any instalment after the first, all the remaining instalments may be paid.

The sum loaned is to be paid into such bank or banks as may be mutually convenient to the lender and to the Government, in the State where the lender resides, if desired by him. The proposals must state the bank or banks into which the lender may desire to make the payments.

If proposals, differing in terms from one another, should be accepted, the option will be allowed to any persons whose proposals may be accepted, of taking the terms allowed to any other person whose proposals may be accepted.

No proposals will be received for a sum less than twenty-five thousand dollars; but a commission of one-fourth of one per cent. will be allowed to any person collecting subscriptions for the purpose of incorporating them in one proposal, to the amount of twenty-five thousand dollars, or upwards, provided such proposal shall be accepted.

If proposals shall be made, amounting together to a greater sum than that required, the preference will, on equal terms, be given to those made by persons who were subscribers to the loan of eleven millions, in the year 1812.

On failure of payment of any instalment, the next preceding instalment to be forfeited.

Scrip certificates will be issued by the cashiers of the banks where the payments shall be made, to the persons making the payments; and the said cashiers will endorse on these certificates the payments of the several instalments, when made.

The scrip certificates will be assignable by endorsement and delivery; and will be funded after the completion of the payments, upon presentation by the proprietor, to the Commissioner of Loans for the State where the payments have been made.

The funded stock to be thus issued, will be irredeemable till the 31st day of December, 1826; will be transferable in the same manner as the other funded stock of the United States; and will be charged for the regular and quarterly payment of its interest, and for the ultimate reimbursement of its principal, upon the annual fund of eight millions of dollars, appropriated for the payment of the principal and interest of the debt of the United States, in the manner pointed out in the aforesaid act of the 24th of March, 1814.

GEO. W. CAMPBELL, *Secretary of the Treasury.*

Ba.

WASHINGTON, *4th Mo. 30th*, 1814.

RESPECTED FRIEND:

I will loan to the Government of the United States five millions of dollars, receiving one hundred dollars six per cent. stock for each eighty-eight dollars paid; and will pay the money in the proportions, and at the periods, mentioned in thy advertisement of the 4th April, to their credit, in such banks in the United States as may be agreeable to thee.

On the payment of each instalment, and satisfactory assurances for the payment of the others, funded stock to be issued. It being understood and agreed, that, if terms more favorable to the loaners be allowed for any part of the twenty-five millions authorized to be borrowed the present year, the same terms are to be extended to this contract.

The commission of one quarter of one per cent. mentioned in thy advertisement, to be allowed me on the amount loaned.

With great respect and esteem, I am thy assured friend,

JACOB BARKER.

The Hon. GEORGE W. CAMPBELL, *Secretary of the Treasury.*

Bb.

TREASURY DEPARTMENT, *May 2d*, 1814.

SIR:

The terms upon which the loan has been concluded, are as follows, viz:

Eighty-eight dollars in money for each hundred dollars in stock; and the United States engage, if any part of the sum of twenty-five millions of dollars, authorized to be borrowed by the act of the 24th of March, 1814, is borrowed upon terms more favorable to the lenders, the benefit of the same terms shall be extended to the persons who may then hold the stock, or any part of it, issued for the present loan of ten millions.

Your proposal of the 30th of April, 1814, for \$5,000,000 of the loan, having been at the above rate, or at a rate more favorable than the above to the United States, has been accepted; and you will please to pay, or cause to be paid, on the 25th day of the present month, into the bank or banks you have named, or into such as you shall name to the Secretary of the Treasury, on the receipt of this letter, twenty-five per cent., or one-fourth part of the sum above stated, pursuant to the notification from this department, of the 4th of April last, and the remaining instalments on the days fixed in the said notification. You will be pleased, also, on or before the 25th of May, to furnish the cashier or cashiers of the bank or banks where the payments under your proposal are to be made, with the names of the persons in whose behalf the proposal has been made, and the sums payable by each.

The commission of one-fourth of one per cent. will be paid from the treasury after the payment of the first instalment, on the 25th day of the present month.

I am, respectfully, &c.

G. W. CAMPBELL, *Secretary of the Treasury.*

JACOB BARKER, Esq. *New York.*

						<u>\$566,000</u>

C.

NOTICE.

TREASURY DEPARTMENT, *July 25, 1814.*

Notice is hereby given, that proposals will be received by the Secretary of the Treasury, until the 22d day of August next, for loaning to the United States the sum of six MILLIONS of dollars, or any part thereof, not less than twenty-five thousand dollars, the same being in part of the sum of twenty-five millions of dollars authorized to be borrowed by the act of Congress of the 24th day of March last.

The stock to be issued for the money loaned, will bear an interest of six per cent. per annum, payable quarter yearly; and the proposals must distinctly state the amount of money offered to be loaned, and the rate at which the aforesaid stock will be received for the same.

The amount loaned is to be paid into a bank or banks authorized by the treasury, in instalments in the following manner, viz:

One-fourth part, or twenty-five dollars on each hundred dollars, on the tenth day of September next.

And one-fourth part on the tenth day of each of the ensuing months of October, November, and December next.

On the day fixed for the payment of the first, or any other instalment, all the remaining instalments may be paid at the option of the lender.

The proposals must state the bank or banks into which the lender may desire to make his payments; and he will be allowed to make them according to his wishes, thus expressed, in all cases where the convenience of the treasury will permit.

The same terms will be allowed to all whose proposals are accepted.

No proposals will be received for a sum less than twenty-five thousand dollars; but a commission of one-fourth of one per cent. will be allowed to any person collecting subscriptions for the purpose of incorporating them in one proposal to the amount of twenty-five thousand dollars, or upwards, provided such proposal shall be accepted.

On failure of payment of any instalment, the next preceding instalment to be forfeited.

All the instalments must be paid at the same bank as that at which the first instalment shall be paid.

Scrip certificates will be issued by the cashiers of the banks where the payments shall be made, to the persons making the payments; and the said cashiers will endorse on these certificates the payments of the several instalments when made.

The scrip certificates will be assignable by endorsement and delivery, and will be funded after the completion of the payments, upon presentation to the Commissioner of Loans for the State where the payments have been made.

Certificates of funded stock will also be issued, if the holders of scrip certificates shall desire it, for the amount of any instalment paid, after the payment of the next succeeding instalment.

The funded stock to be thus issued will be irredeemable till after the 31st day of December, 1826; will be transferable in the same manner as the other funded stock of the United States; and will be charged for the regular and quarterly payment of its interest, and for the ultimate reimbursement of its principal, upon the annual fund of eight millions of dollars appropriated for the payment of the principal and interest of the debt of the United States in the manner pointed out in the aforesaid act of the 24th of March, 1814.

G. W. CAMPBELL, *Secretary of the Treasury.*

Ca.

BALTIMORE, August 22d, 1814.

SIR:

I will take eighteen hundred thousand dollars of the six millions loan, at the rate of eighty per cent. The periods of payment to be in conformity with your advertisement for proposals; and the banks into which the payments shall be made, are the Bank of Pennsylvania and the Mechanics' Bank of Baltimore.

I am, sir, with great respect, your obedient servant,

D. A. SMITH.

G. W. CAMPBELL, Esq. *Secretary of the Treasury.*

Cb.

TREASURY DEPARTMENT, August 31st, 1814.

SIR:

That part of the loan of six millions of dollars for which the proposals were accepted, has been taken at the rate of eighty dollars, in money, for one hundred dollars in stock. Your proposal for _____ dollars being at that rate, or at one more favorable for the United States, has been accepted, and you will be pleased to make your payments into the bank or banks specified in your proposal, in the manner, and at the times stated in the public notification. But as some delay, the cause of which is doubtless known to you, has unavoidably taken place in advising you of the acceptance of your proposal, the first payment may, if your convenience shall require it, be made on the 20th instead of the 10th of September, as required by the public notification. This, however, will not affect the subsequent instalments, which are, nevertheless, to be paid on the days already fixed, viz: the 10th day of the months of October, November, and December.

The same causes which have occasioned a delay in advising you of the acceptance of your proposal, will perhaps render it impossible to place the scrip certificates in the hands of the cashiers of the banks where the payments are to be made, by the time at which the first instalment will be payable. If this should be the case, you will please to receive from the cashier his receipt for the amount which you may pay, to be subsequently exchanged for a scrip certificate, when those papers shall be ready for delivery.

I am, respectfully, sir, your obedient servant,

G. W. CAMPBELL, *Secretary of the Treasury.*

The above letter was addressed to the following persons, who made proposals for the sums affixed to their names respectively, viz:

William Rice,	Portsmouth, New Hampshire,	\$43,000
Henry S. Langdon,	do.	35,000
Amasa Stetson,	Boston,	37,000
Jesse Putnam,	do.	15,000
Nathan Waterman, Jr.	Providence, Rhode Island,	10,000
John S. Shearman,	Newport, do.	25,000
John Savage,	Philadelphia,	240,000
William W. Smith,	do.	100,000
William Patterson and Sons,	Baltimore,	70,000
Dennis A. Smith,	do.	1,800,000
James L. Hawkins,	do.	15,000
John P. Van Ness, and others,	Washington,	201,000
David English,	Georgetown,	35,000
John Lukens,	Charleston,	47,300
George M. Deaderick,	Nashville,	50,000
								\$2,723,300

There has been subsequently offered, and accepted, proposals from the undermentioned persons, for the following sums, viz:

George T. Dunbar,	Baltimore,	120,000
Clement Smith,	Georgetown,	87,000
								\$207,000

Of the persons who originally made proposals, the following have given notice that they could not carry them into effect:

John Savage,	Philadelphia,	\$240,000
William W. Smith,	do.	100,000
William Patterson and Sons,	Baltimore,	70,000
								\$410,000

TREASURY DEPARTMENT, February 3d, 1815.

Sir:

In the report made to Congress from this Department, on the 23d day of September last, it was stated, that the papers exhibiting a view of the revenues of the United States, not having been, at that time, prepared, owing to the early meeting of Congress, would be laid before that body at a subsequent day.

I have now, therefore, the honor to transmit two statements, marked A and B, showing the amount of duties which accrued on merchandise imported, on the tonnage of vessels, passports, and clearances, during the years 1812 and 1813, and the particular articles of merchandise subject to duty, imported in the year 1813; and two statements, marked C, and Ca, showing the quantity of public lands sold, and the receipts therefor, in the State of Ohio, Indiana and Illinois Territories, and in the Mississippi Territory, during the year ending on the 30th September, 1814; the whole prepared in the form in which these statements have usually been presented, in the annual report on the state of the finances made to Congress, from this Department.

I have the honor to be, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

The Honorable the PRESIDENT of the Senate.

A.

A Statement exhibiting the amount of Duties which accrued on Merchandise, Tonnage, Passports, and Clearances; of Debentures issued on the exportation of Foreign Merchandise; and of expenses on collection of the Revenue, during the years 1812 and 1813.

Years.	Duties on			Debentures issued.	Gross Revenue.	Expenses on collection.	Nett Revenue.
	Merchandise.	Tonnage.	Passports and clearances.				
1812	\$14,990,188 51	\$155,353 00	\$14,928 00	\$1,542,622 19	\$13,617,847 32	\$475,838 95	\$13,142,008 37
1813	7,379,899 31	315,638 00	3,640 00	580,327 16	(a.)7,118,850 15	410,483 94	6,708,366 21

(a.) Gross revenue for the year 1813, - - - - \$7,118,850 15
Deduct interest and storage, - - - - 32,544 98
Gross revenue, per statement B., - - - - \$7,086,305 17

A Statement showing the amount of American and Foreign Tonnage employed in Foreign Trade, for the year 1813, as taken from the records of the Treasury.

American tonnage, in foreign trade,	- - - - -	Tons, 237,348
Foreign tonnage,	- - - - -	113,897
Total tonnage employed in the foreign trade of the United States,	- - - - -	<u>351,175</u>
Proportion of foreign tonnage to the whole amount of tonnage employed in the foreign trade of the United States,	- - - - -	<u>48 to 100</u>

B.

A Statement exhibiting the value and quantities, respectively, of merchandise, on which duties actually accrued, during the year 1813, (consisting of the difference between articles paying duties, imported, and those entitled to drawback, re-exported) and, also, of the nett revenue which accrued, during that year, from duties on merchandise, tonnage, passports, and clearances.

Makes for 1815, a revenue of	-	-	-	-	-	-	\$22,435,000

DIRECT TAX AND INTERNAL DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, OCTOBER 15, 1814.

TREASURY DEPARTMENT, October 13, 1814.

SIR:

In obedience to the resolutions of the House of Representatives, of the 10th instant, I have the honor to transmit the accompanying statements.

In compliance with the first resolution, the statement A is rendered, showing the amount of the valuations of lands, dwelling houses, and slaves, and the assessments founded upon them, as made under the acts of July 22d, and August 2d, 1813, so far as returns have been received at the treasury.

The statement B furnishes, as far as the materials existing at the treasury admit, the information required by the second resolution. In the collection districts in regard to which no information is given, either the assessment is not ascertained to have been completed, or has been so recently completed, as to have allowed little time for collecting the tax. The sums annexed to those districts in which the collection is completed, or in progress, are the amounts ascertained to have been received by the collectors. As the returns of the collectors, made in the month of September, have been but partially received, and, as in that month, the collections appear to have been made with great activity, a much larger aggregate amount than that stated, is believed to have been received.

The statement C furnishes, as far as the accounts rendered admit, the information required by the third resolution. These accounts do not supply the materials for a statement in which the amount actually received on account of each duty can, at present, be exhibited.

To comply the more fully with the scope of the resolution, two views are presented; the first, of the amounts of the several internal duties, distinctly exhibited, that have accrued for the two first quarters of the present year, in each collection district, so far as returns have been made by the collectors; the second, of the aggregate amounts of duties ascertained on the 10th of October, 1814, to have been received in each State or territory, the former being derived from quarterly, and the latter from monthly returns made by the collectors. In those districts from which the returns for the two quarters have not been received, the period of time for which returns have been rendered is stated. Monthly returns have been received from all the collection districts, except the first of Louisiana, in which there is yet no collector.

I have the honor to be, sir, your obedient servant,

SAMUEL H. SMITH, *Acting Secretary of the Treasury.*

Honorable the SPEAKER of the House of Representatives.

A.

Statement exhibiting the amount of the valuations of Lands, Dwelling Houses, and Slaves, in the several collection districts within the United States, and the assessments founded thereon, as made under the acts of July 22d, and August 2d, 1813; so far as the same have been received at the Treasury, on the 12th day of October, 1814.

NOTE.—The States of New Jersey, Pennsylvania, Virginia, South Carolina, Georgia, Ohio, and Kentucky, having assumed the payment of the direct tax, under the act of August 2, 1813, the valuations have not been made in those States.

13th CONGRESS.]

No. 425.

[3d Session.]

PUBLIC CREDIT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, OCTOBER 18, 1814.

WASHINGTON, October 14th, 1814.

SIR:

The Committee of Ways and Means have had under their consideration, the support of public credit by a system of taxation more extended than the one heretofore adopted. They have determined to suspend proceeding on their report at present before the House of Representatives, with a view to afford you an opportunity of suggesting any other, or such additional provisions, as may be necessary to revive and maintain unimpaired the public credit.

I have the honor to be, your most obedient,

JOHN W. EPPES.

Honorable Mr. DALLAS, *Secretary of the Treasury.*

TREASURY DEPARTMENT, October 17th, 1814.

SIR:

I have the honor to acknowledge the receipt of your letter, dated the 14th inst.; and, aware of the necessity for an early interposition of Congress on the subject to which it relates, I proceed, at the moment of entering upon the duties of office, to offer to the consideration of the Committee of Ways and Means, an answer on the several points of their inquiry.

Contemplating the present state of the finances, it is obvious, that a deficiency in the revenue, and a depreciation in the public credit, exist, from causes which cannot in any degree be ascribed, either to the want of resources, or to the want of integrity in the nation. Different minds will conceive different opinions in relation to some of those causes; but it will be agreed on all sides, that the most operative have been the inadequacy of our system of taxation to form a foundation for public credit; and the absence even from that system of the means which are best adapted to anticipate, collect, and distribute the public revenue.

The wealth of the nation, in the value and products of its soil, in all the acquisitions of personal property, and in all the varieties of industry, remains almost untouched by the hand of Government; for, the national faith, and not the national wealth, has hitherto been the principal instrument of finance. It was reasonable, however, to expect, that a period must occur in the course of a protracted war, when confidence in the accumulating public engagements could only be secured by an active demonstration, both of the capacity and the disposition to perform them. In the present state of the treasury, therefore, it is a just consolation to reflect, that a prompt and resolute application of the resources of the country will effectually relieve from every pecuniary embarrassment, and vindicate the fiscal honor of the Government.

But it would be vain to attempt to disguise, and it would be pernicious to palliate the difficulties which are now to be overcome. The exigencies of the Government require a supply of treasure for the prosecution of the war, beyond any amount which it would be politic, even if it were practicable, to raise by an immediate and constant imposition of taxes. There must, therefore, be a resort to credit, for a considerable portion of the supply. But the public credit is at this juncture so depressed, that no hope of adequate succor, on moderate terms, can safely rest upon it. Hence, it becomes the object first and last in every practical scheme of finance, to re-animate the confidence of the citizens, and to impress on the mind of every man, who, for the public account, renders services, furnishes supplies, or advances money, a conviction of the punctuality as well as of the security of the Government. It is not to be regarded, indeed, as the case of preserving a credit which has never been impaired, but rather as the case of rescuing from reproach a credit over which doubt and apprehension (not the less injurious, perhaps, because they are visionary) have cast an inauspicious shade. In the former case, the ordinary means of raising and appropriating the revenue, will always be sufficient; but in the latter case, no exertion can be competent to attain the object, which does not quiet, in every mind, every fear of future loss or disappointment, in consequence of trusting to the pledges of the public faith.

The condition of the circulating medium of the country, presents another copious source of mischief and embarrassment. The recent exportations of specie have considerably diminished the fund of gold and silver coin; and another considerable portion of that fund has been drawn, by the timid and the wary, from the use of the community, into the private coffers of individuals. On the other hand, the multiplication of banks in the several States has so increased the quantity of paper currency, that it would be difficult to calculate its amount; and still more difficult to ascertain its value, with reference to the capital on which it has been issued. But the benefit of even this paper currency is in a great measure lost, as the suspension of payments in specie, at most of the banks, has suddenly broken the chain of accommodation that previously extended the credit and the circulation of the notes which were emitted in one State into every State of the Union. It may, in general, be affirmed, therefore, that there exists, at this time, no adequate circulating medium, common to the citizens of the United States. The moneyed transactions of private life are at a stand; and the fiscal operations of the Government, labor with extreme inconvenience. It is impossible that such a state of things should be long endured; but, let it be fairly added, that, with *legislative aid*, it is not necessary that the endurance should be long. Under favorable circumstances, and to a limited extent, an emission of treasury notes would, probably, afford relief; but treasury notes are an expensive and precarious substitute, either for coin or for bank notes, charged as they are with a growing interest, productive of no countervailing profit or emolument, and exposed to every breath of popular prejudice or alarm. The establishment of a national institution, operating upon credit combined with capital, and regulated by prudence and good faith, is, after all, the only efficient remedy for the disordered condition of our circulating medium. While accomplishing that object, too, there will be found, under the auspices of such an institution, a safe depository for the public treasure, and a constant auxiliary to the public credit. But whether the issues of a paper currency proceed from the national treasury, or from a national bank, the acceptance of the paper in a course of payments and receipts must be forever optional with the citizens. The extremity of that day cannot be anticipated, when any honest and enlightened statesman will again venture upon the desperate expedient of a tender law.

From this painful, but necessary development of existing evils, we pass, with hope and confidence, to a more specific consideration of the measures from which relief may be certainly and speedily derived. Remembering always, that the objects of the Government are to place the public credit upon a solid and durable foundation; to provide a revenue commensurate with the demands of a war expenditure; and to remove from the treasury an immediate pressure, the following propositions are submitted to the committee, with every sentiment of deference and respect:

PROPOSITIONS.

1. It is proposed, that, during the war, and until the claims contemplated by the proposition are completely satisfied, or extinct, there shall be annually raised by taxes, duties, imposts, and excises, a fund for these purposes:—

1. For the support of Government,	\$1,500,000
2. For the principal and interest of the public debt, existing before the declaration of war, and payable according to the contract,	3,500,000

3. For the interest of the public debt contracted, and to be contracted, by loans, or otherwise, from commencement to the termination of the war; calculated upon an annual principal of seventy-two millions of dollars;	4,320,000
4. For the payment of treasury notes, with the accruing interest,	7,400,000
5. For the payment of debentures to be issued (as is hereinafter proposed) for liquidated balances due to individuals, on account of services or supplies, authorized by law, but either not embraced by a specific appropriation, or exceeding the sum appropriated,	280,000
6. For a current addition to the sums raised by loan, or issues of treasury notes, towards defraying the general expenses of the war,	2,000,000
7. For the gradual establishment of a sinking fund, to extinguish the debt incurred during the war,	500,000
8. For a contingent fund, to meet sudden and occasional demands upon the treasury,	1,500,000
	\$21,000,000

II. It is proposed, that, during the war, and until the claims contemplated by the preceding proposition are completely satisfied, or other adequate funds shall be provided and substituted by law, there shall be annually raised, by the means here specified, the following sums:

1. By the customs, (which cannot be safely estimated, during the war, at a higher product)	\$4,000,000
2. By the existing internal duties,	2,700,000
3. By the existing direct tax,	2,500,000
4. By the sales of public lands, (which cannot be safely estimated, during the war, at a higher product)	800,000
5. By an addition to the existing direct tax of 100 per cent.	2,850,000
6. By an addition of 100 per cent. on the present auction duties,	150,000
7. By an addition of 100 per cent. on the existing duties upon carriages,	200,000
8. By an addition of 50 per cent. on the existing duties on licenses to retail wines, spirituous liquors, and foreign merchandise,	300,000
9. By an addition of 100 per cent. on the existing rate of postage,	500,000
10. By the proceeds of the new duties specified in the next schedule, marked A, making in the aggregate,	7,000,000
	\$21,000,000

III. It is proposed that a national bank shall be incorporated for a term of twenty years, to be established at Philadelphia, with a power to erect offices of discount and deposite elsewhere, upon the following principles:

1. That the capital of the bank shall be fifty millions of dollars, to be divided into 100,000 shares of 500 dollars each. Three-fifths of the capital, being 60,000 shares, amounting to 30,000,000 of dollars, to be subscribed by corporations, companies or individuals: and two-fifths of the capital, being 40,000 shares, amounting to 20,000,000 of dollars, to be subscribed by the United States.
2. That the subscriptions of corporations, companies, and individuals, shall be paid for in the following manner:
 - One-fifth part, or \$6,000,000, in gold or silver coin.
 - Four-fifth parts, or 24,000,000, in gold or silver coin, or in six per cent. stock issued since the declaration of war, and treasury notes, in the proportion of one-fifth in treasury notes, and three-fifths in six per cent stock.
3. That the subscriptions of corporations, companies, and individuals, shall be paid at the following periods:

20 dollars on each share, to be paid at the time of subscribing, in gold or silver coin,	1,200,000
40 dollars on each share, to be paid in gold or silver coin, one month after the subscription,	2,400,000
40 dollars on each share, in two months after the subscription, in gold or silver coin,	2,400,000
100 dollars,	specie, 6,000,000
100 dollars on each share, in gold or silver coin, or in six per cent stock, or in treasury notes, according to the preceding apportionment, to be paid at the time of subscribing,	6,000,000
150 dollars on each share, to be paid in like manner, in two months after subscribing,	9,000,000
150 dollars on each share, to be paid in like manner, in three months after subscribing,	9,000,000
500 dollars.	\$30,000,000
4. That the subscription of the United States shall be paid in six per cent. stock, at the same periods, and in the same proportions, as the payments of private subscriptions, in stock and treasury notes.
5. That the United States may substitute six per cent. stock, for the amount of the treasury notes subscribed by corporations, companies, and individuals, as the notes respectively become due and payable.
6. That the bank shall loan to the United States \$30,000,000, at an interest of six per cent. at such periods, and in such sums, as shall be found mutually convenient.
7. That no part of the public stock, constituting a portion of the capital of the bank, shall be sold during the war, nor at any subsequent time, for less than par; nor at any time to an amount exceeding one moiety, without the consent of Congress.
8. That provision shall be made for protecting the bank notes from forgery; for limiting the issue of bank notes; and for receiving them in all payments to the United States.
9. That the capital of the bank, its notes, deposites, dividends, or profits (its real estate only excepted) shall not be subject to taxation by the United States, or by any individual State.
10. That no other bank shall be established by Congress, during the term for which the national bank is incorporated.
11. That the national bank shall be governed by fifteen directors, being resident citizens of the United States and stockholders. The President of the United States shall annually name five directors, and designate one of the five to be the president of the bank. The other directors shall be annually chosen by the qualified stockholders, in person or by proxy, if resident within the United states, voting upon a scale graduated according to the number of shares which they respectively hold. The cashier and other officers of the bank to be appointed as is usual in similar institutions.
12. That the directors of the national bank shall appoint seven persons, one of whom to preside, as the managers of each office of discount and deposite, and one person to be the cashier.
13. That the general powers, privileges, and regulations of the bank, shall be the same as are usual in similar institutions; but with this special provision, that the general accounts shall be subject to the inspection of the Secretary of the Treasury.

IV. It is proposed, that, after having thus provided for the punctual payment of the interest upon every denomination of public debt; for raising annually a portion of the annual expense, by taxes; for establishing a sinking fund, in relation to the new debt, as well as in relation to the old debt; and for securing to the public the efficient agency of a national bank; the only remaining object of supply shall be accomplished by annual loans, and issues of treasury notes; if, unexpectedly, such issues should continue to be necessary or expedient.

1. The amount of annual expenditure during the war, exceeding the sums provided for, does not admit of a prospective estimate beyond the year 1815; but, for that year, it may be estimated with sufficient accuracy for the general purposes of the present communication, at - \$28,000,000
2. Then for the year 1815, an additional provision must be made, authorizing a loan and the issue of treasury notes, to an equal amount, - \$28,000,000

V. It is proposed that the accounts for authorized expenses, being duly stated and settled, a certificate or debenture, shall issue to the accountant specifying the balance; and that, in all cases, where there has been no specific appropriation, or the claim exceeds the amount of the sum appropriated, the balance shall bear an interest of three per cent. until provision is made by law for paying the amount.

VI. And finally, it is proposed to relieve the treasury from an immediate pressure, upon the principles of the following statement:

1. The amount of demands upon the treasury (exclusively of balances of appropriations for former years unsatisfied) was stated in the report of the late Secretary of the Treasury, of the 23d September, 1814, to be, on the 30th of June,	\$27,576,391 19
2. The accounts of the third quarter of 1814, are not yet made up, and the precise sums paid during that quarter cannot now be ascertained; but they amount to nearly,	8,400,000 00
Leaving to be paid in the fourth quarter of 1814,	<u>\$19,176,391 19</u>
3. This balance payable during the fourth quarter of 1814, consists of the following items:	
Civil, diplomatic, and miscellaneous expenses, about	\$353,292 99
Military, about	8,792,688 00
Naval, about	2,382,010 97
Public debt, about	7,648,419 23
	<u>\$19,176,391 19</u>
4. The existing provisions by law for the payment of this balance of \$19,176,391 19, may be stated as follows:	
The act of the 24th of March, 1814, authorized a loan for	25,000,000 00
The act of the 4th of March, 1814, authorized an issue of treasury notes for	5,000,000 00
	<u>\$30,000,000 00</u>
Under these authorities, there have been borrowed on loan about	10,895,000
There has been sent to Europe, in six per cent. stock,	6,000,000
There has been issued in treasury notes,	3,504,000
	<u>20,399,000 00</u>
	<u>\$9,601,000 00</u>
There remains, therefore, an unexecuted authority to borrow,	8,105,000
To issue treasury notes,	1,496,000
	<u>\$9,601,000 00</u>
The demands of the fourth quarter being then	19,176,391 19
There may be applied to meet them, the revenue accruing during the quarter, from all sources, about	2,900,000
Also, payments to be made on account of loans already contracted for, according to the authority above stated, about	2,500,000
	<u>5,400,000 00</u>
Leaving a balance to be provided for,	<u>\$13,776,391 19</u>
By the authority remaining to borrow,	8,105,000 00
By the authority remaining to issue treasury notes,	1,496,000 00
By an additional authority to be granted by law to borrow, and to issue treasury notes,	4,175,391 19
	<u>\$13,776,391 19</u>

These estimates, however, it will be observed, are made with a view, simply, to the appropriations by law for the expenses of the year 1814; and do not embrace a provision to satisfy balances of appropriations made for the expenses of preceding years, which have not been called for at the treasury. But it will, probably, be deemed expedient to make such provision, by extending the new authority to borrow from the above balance, to 6,000,000. If the six per cent. stock which has been sent to Europe, should be there disposed of, it will form an item in the estimates of the ensuing year.

As a portion of the amount, to be provided during the present quarter, consists of treasury notes, which will soon be due, it will be advisable to make them receivable in subscriptions to the loan.

It is proper to accompany these propositions with a few explanatory remarks.

1. The first proposition contemplates a permanent system; but the estimate of the particular items of claims and demands upon the public, must be regarded as immediately applying to the year 1815. In every subsequent year, there will necessarily be some variation; as, for instance, the item of interest on the old debt will annually sink, while the item of interest on the new debt will annually rise during the continuance of the war.

The items for annually raising a portion of the public expenses by taxes, and for applying to the new debt a sinking fund (gradually increasing until it becomes commensurate to its object) are essential features in the plan suggested, with a view to the revival and maintenance of public credit. The extinguishment of the old debt is already in rapid operation, by the wise precaution of a similar institution.

2. The second proposition will, doubtless, generate many and very various objections. The endeavor has been, however, to spread the general amount of the taxes over a wide surface, with a hand as light and equal as is consistent with convenience in the process, and certainty in the result.

All the opportunities of observation, and all the means of information that have been possessed, leave no doubt upon the disposition of the people to contribute generously for relieving the necessities of their country; and it has been thought unworthy of that patriotic disposition to dwell upon scanty means of supply, or short-lived expedients. Whenever the war shall be happily terminated in an honorable peace, and the treasury shall be again replenished by the tributary streams of commerce, it will be at once a duty and a pleasure to recommend an alleviation, if not an entire exoneration of the burthens which necessarily fall, at present, upon the agriculture and manufactures of the nation.

3. In making a proposition for the establishment of a national bank, I cannot be insensible to the high authority of the names which have appeared in opposition to that measure upon constitutional grounds. It would be presumptuous to conjecture that the sentiments which actuated the opposition have passed away; and yet it would be denying to experience a great practical advantage, were we to suppose that a difference of times and circumstances would not produce a corresponding difference in the opinions of the wisest, as well as of the purest men. But, in the present case, a change of private opinion is not material to the success of the proposition for establishing a national bank. In the administration of human affairs, there must be a period when discussion shall cease and decision shall become absolute. A diversity of opinion may honorably survive the contest; but, upon the genuine principles of a representative government, the opinion of the majority can alone be carried into action. The judge, who dissents from the majority of the bench, changes not his opinion, but performs his duty, when he enforces the judgment of the court, although it is contrary to his own convictions. An oath to support the constitution and the laws, is not,

therefore, an oath to support them under all circumstances, according to the opinion of the individual who takes it, but it is, emphatically, an oath to support them according to the interpretation of the legitimate authorities. For the erroneous decisions of a court of law, there is the redress of a censorial, as well as of an appellate jurisdiction. Over an act, founded upon an exposition of the constitution, made by the legislative department of the Government, but alleged to be incorrect, we have seen the judicial department exercise a remedial power. And even if all the departments, legislative, executive, and judicial, should concur in the exercise of a power, which is either thought to transcend the constitutional trust, or to operate injuriously upon the community, the case is still within the reach of a competent control, through the medium of an amendment to the constitution, upon the proposition, not only of Congress, but of the several States. When, therefore, we have marked the existence of a national bank for a period of twenty years, with all the sanctions of the legislative, executive, and judicial authorities; when we have seen the dissolution of one institution, and heard a loud and continued call for the establishment of another; when, under these circumstances, neither Congress nor the several States have resorted to the power of amendment; can it be deemed a violation of the right of private opinion, to consider the constitutionality of a national bank, as a question forever settled and at rest?

But, after all, I should not merit the confidence, which it will be my ambition to acquire, if I were to suppress the declaration of an opinion, that, in these times, the establishment of a national bank will not only be useful in promoting the general welfare, but that it is necessary and proper for carrying into execution some of the most important powers constitutionally vested in the Government.

Upon the principles and regulations of the national bank, it may be sufficient to remark, that they will be best unfolded in the form of a bill, which shall be immediately prepared. A compound capital is suggested, with a design equally to accommodate the subscribers, and to aid the general measures for the revival of public credit; but the proportions of specie and stock may be varied, if the scarcity of coin should render it expedient; yet not in so great a degree as to prevent an early commencement of the money operations of the institution.

4. The estimates of receipts, from established sources of revenue, and from the proposed new duties, and the estimates of expenditures on all the objects contemplated in the present communication, have been made upon a call so sudden, and upon materials so scattered, that it is not intended to claim a perfect reliance on their accuracy. They are, however, believed to be sufficiently accurate to illustrate and support the general plan, for the revival of the public credit, the establishment of a permanent system of revenue, and the removal of the immediate pressure on the treasury.

Upon the whole, sir, I have freely and openly assumed the responsibility of the station, in which I have the honor to be placed. But, conscious of the imperfections of the judgment that dictates the answer to the important inquiries of the Committee of Ways and Means, I derive the highest satisfaction from reflecting, that the honor and safety of the nation, for war, or for peace, depend on the wisdom, patriotism, and fortitude of Congress, during times which imperiously demand a display of those qualities, in the exercise of the legislative authority.

I have the honor to be, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

J. W. EPPES, Esq. *Chairman of the Committee of Ways and Means.*

A.

Schedule of new taxes, referred to in the letter of the Secretary of the Treasury to the chairman of the Committee of Ways and Means, in which the taxes proposed in the report of the committee to the House of Representatives, on the 10th instant, are principally adopted.

1. On spirits distilled from domestic or foreign materials, 25 cents per gallon, computed on 24,000,000 gallons; provided the present tax on the capacity of the still should be continued. If it is thought best to lay the tax entirely on the liquor, then the tax on the capacity of the stills to be taken off, and 30 cents per gallon to be laid on the liquor. For the present estimate, it is taken at 25 cents per gallon,	\$6,000,000
2. On porter, ale, and strong beer, 2 cents per gallon, computed on 6,000,000 gallons,	120,000
3. On manufactured tobacco and snuff, averaged at 5 cents per pound, and computed on 10,000,000 pounds,	500,000
4. On leather of various kinds, averaged at 3 cents per pound, and computed on 20,000,000 pounds,	600,000
5. On pig iron, at \$1 50 per ton, computed on 300,000 tons,	450,000
6. On paper, at various rates, averaging 7 per cent. on the value of the article, computed on the annual manufacture of the value of 2,500,000 dollars,	175,000
7. On playing cards, at 25 cents per pack, computed on 400,000 packs,	100,000
8. On counsellors and attorneys at law, process in suits at law and equity, proceedings in admiralty, arbitrations, and references, and other legal proceedings in the courts of the United States,	300,000
9. On conveyances, mortgages, and other contracts, relating to real estate,	250,000
	\$8,495,000
The sum to be raised by new taxes, according to the estimates of the Secretary's letter, is	7,000,000
Leaving a surplus for the expenses of collection, and errors in the estimates, of	\$1,495,000

COMPOSITION FOR THE STAMP DUTY ON NOTES OF PRIVATE BANKERS.

COMMUNICATED TO THE SENATE, OCTOBER 26, 1814.

To the Senate and House of Representatives in Congress assembled, the memorial of Stephen Girard, of the City of Philadelphia, in the State of Pennsylvania, Merchant and Banker, respectfully sheweth:

That your memorialist has established a bank in the city of Philadelphia, upon the foundation of his own individual fortune and credit, and for his own exclusive emolument, and that he is willing most cheerfully to contribute, in common with his fellow citizens throughout the United States, a full proportion of the taxes which have been imposed for the support of the National Government according to the profits of his occupation and the value of his estate; but a construction has been given to the acts of Congress laying duties on notes of banks, &c. from which great difficulties have occurred and great inequalities daily produced to the disadvantage of his bank, that were not, it is confidently believed, within the contemplation of the Legislature.

That the first section of the act of Congress of the 2d August, 1813, having imposed a stamp duty on notes issued by any banker or bankers, as well as by any banks or companies, either incorporated or not incorporated, it is pro-

vided by the second section of the act, "that in respect to any stamp on any of the notes of the *banks* or *companies* aforesaid, now established, or which may hereafter be established within the United States, it shall be lawful for the Secretary of the Treasury to agree to an annual composition, in lieu of such stamp duty, with any of the said *banks* or *companies*, of 1½ per centum on the amount of the annual dividend made by such banks to their stockholders respectively; that your memorialist, in due season, offered to enter into the said composition at the rate of 1½ per centum on the amount of the annual profit of his bank, deeming the annual profit of an individual banker equivalent in language and in law, to the annual dividend of a bank established by a corporation or company. That it has been officially declared, however, that the second section of the act of Congress does not authorize a composition with an individual banker, because it speaks only of *banks* and *companies*, (not of banker and bankers,) and because it speaks only of dividends (not of profits) made to the stockholders, and that hence an individual banker, acting upon a capital of one million of dollars, and issuing bank notes to the amount of one million of dollars, is subjected to the prompt payment of a duty amounting to 10,000 dollars, while an incorporated bank, or even a private company of two or three bankers, acting upon the same amount of capital and issuing the same amount of bank notes, will only be liable, periodically, to the payment of a duty amounting to 1,500 dollars, upon the customary annual dividend of ten per cent.

That the first section of the act of Congress of the 2d August, 1813, imposes a stamp duty upon any promissory note, or notes payable either to bearer or order, issued by any banks or companies, or by any banker or bankers; that the eighth section of the act provided that no banks or companies, which shall not have compounded for the stamp duty, shall issue any bank bill or promissory note, unless upon paper duly stamped, and whereon the respective duties shall have been paid; and the twelfth section of the act declares, that all the paper wanted for the purpose of the stamp duty, *excepting paper for bank notes*, shall be furnished, at the expense of the United States, by the Secretary of the Treasury. That, after the rejection of his offer to enter into a composition for the stamp duty, your memorialist has complied with the directions of the law, and has transmitted to the Commissioner of the Revenue sheets of bank notes in order to be stamped.

That, independent of the great hazard and delay to which your memorialist is exposed by these operations, it is obvious, from the texture and quality of bank paper, that the stamp, as at present impressed on bank notes must disappear in the course of an extensive circulation, producing some uncertainty in the revenue and probably, great injustice to individuals.

And your memorialist having submitted these considerations to the wisdom of Congress, respectfully prays, that the act of Congress, may be so amended, as to permit the Secretary of the Treasury to enter into a composition for the stamp duty, in the case of private bankers as well as in the case of corporations and companies, or so as to render the duty equal in its operations upon every denomination of bankers.

STEPHEN GIRARD.

PHILADELPHIA, 24th October, 1814.

[3d Session.]

DUTIES ON CARRIAGES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 21, 1814.

NOVEMBER 15, 1814.

SIR:

No subject of internal taxation has, in its collection, been attended with so much difficulty, as the duty on carriages, either under the old or existing system, between which there is a close, though not an entire resemblance. This difficulty may be intrinsic, or may proceed from the incorrectness of the principle on which the duty is laid. After making a fair allowance for the first circumstance, I am, on a full consideration of the subject, satisfied that the principle of the existing act is incorrect. This conviction is corroborated by the abundant evidence on the files of the revenue office that the duty is extremely unequal. This is in so great a degree the case, that the small sum of two dollars is frequently paid on carriages of greater value than those which pay seven, and even ten dollars.

This inequality proceeds from the erroneous principle on which carriages are classed, the leading feature of which is the kind of springs on which they hang, which is rarely a true criterion of their value.

It seems to be universally admitted that the duty should be graduated according to the value of the carriage.

I feel a confidence in the opinion that no classification, founded on name or form, can equitably equalize the duty. This will be manifest from considering the ceaseless activity of human ingenuity in devising new forms, especially where the caprice of fashion rules, perhaps more imperiously than reason, and novelty and ornament are more esteemed than utility.

The only remaining resort is, a classification according to the value, which, I think, presents the fewest difficulties, and which, besides the attainment of a just equality, will be attended with many other benefits. I have, accordingly, taken the liberty to form a bill on this principle.

If the proposed bill should not be accepted by the Committee of Ways and Means, a regard to the public interests calls for the expression of the opinion, that it will be indispensable to make three radical amendments in the existing act:

First. To lay the duty on all carriages not *exclusively* employed in husbandry or the transportation of goods. Under the present equivocal provision some abuses are practised, and much greater are expected, which may, perhaps, prove the act incapable of execution.

Second. To increase the penalty for not entering a carriage.

Third. To define what is meant by *iron springs*, a substance which, according to the opinions of seventeen out of twenty-one respectable coachmakers, in different parts of the United States, now before me, cannot exist. Agreeably to this opinion, as it corresponds with my own, it will become my duty, unless the existing act be altered, to instruct the collectors to receive the lowest duty for the various classes of carriages, however expensive and elegant in their structure, which hang on iron jacks or bows, or any other iron substance.

I am, with great respect,

S. H. SMITH.

Hon. Secretary of the Treasury.

[3d SESSION.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 25, 1814.

Mr. EPPES, from the Committee of Ways and Means, to whom was referred the petition of Justin and Elias Lyman, made the following report:

That the facts which are material to a decision on the prayer of the petition, are contained in a letter from the Secretary of the Treasury to the chairman of this committee, which accompanies this report. From this statement of facts, it appears, 1st, that the unlawful importation was made by the express order of the agents of the petitioners; 2d, that the papers of the schooner and her cargo exhibited on the entry at the custom house at Newport, were false, colorable, and fraudulent; 3d, that the real facts of the case coming accidentally to the knowledge of the collector, without any disclosure on the part of the petitioners, the schooner and cargo were seized and libelled as forfeited; and the late Secretary of the Treasury refused to remit the forfeitures incurred, "because it did not appear, to his satisfaction, that the said forfeitures and penalties were incurred without wilful negligence or any intention of fraud. On a review of the circumstances of the case, the committee concur in the opinion already pronounced by the Treasury Department, that the petitioners are not entitled to relief. The following resolution is therefore submitted:

Resolved, That the prayer of the petition ought not to be granted.

TREASURY DEPARTMENT, 21st November, 1814.

SIR:

In answer to your inquiries, on behalf of the Committee of Ways and Means, I have the honor to state, that on the 28th of June, 1814, the late Secretary of the Treasury decided not to remit the forfeitures and penalties incurred by the petitioners, because, "it did not appear, to his satisfaction, that the said forfeitures and penalties were incurred, without wilful negligence, or any intention of fraud." I cannot discover any reason to presume, that the Secretary declined acting, at any time, on the ground, that the general power to remit, did not embrace the present case, and having, in fact, acted, his decision is final, unless the petitioners can entitle themselves, by the equitable circumstances of their case, to the favor of Congress.

The information to be collected in this department, upon the merits of the case, appears to authorize the following general statement of facts:

That the petitioners, merchants of New-York, in April or May, 1810, were holders of bills of exchange for £1,100 sterling, drawn in Berbice, on merchants in Glasgow, which they negotiated, but which they were afterwards obliged to pay on being returned protested for non-payment. That, in the spring of 1811, the petitioners sent the bills to Berbice, in order to recover the amount from the drawer, and their agents accepted a quantity of coffee in payment. That the coffee was shipped from Berbice to St. Andrews, in Nova Scotia, where it arrived in the month of February, or March, 1812, and was there landed and stored; that, upon the declaration of war, in June, 1812, the petitioners assigned the coffee, in trust, to Messrs. Murray and Sons, of New-York, who were well known at St. Andrews, and, particularly, to the consignees of the coffee. That, on the 26th of December, 1812, the petitioners applied to the Secretary of the Treasury, (Mr. Gallatin) for permission to import the coffee into the United States, but were refused. That, early in the year 1813, the consignees requested Messrs. Murray and Sons to remove the coffee, expressing some doubts of its safety at St. Andrews; and, thereupon, Messrs. Murray and Sons, at the instance of the petitioners, assigned the coffee in trust, to a Portuguese, in order that it might be protected, as neutral property, from British capture, on its passage to the United States. That the coffee was afterwards (about the 2d of August, 1813) shipped on board of a Portuguese schooner, and brought to Newport, in Rhode Island, about the 24th of August, 1813, when the captain of the schooner reported, that he had arrived from St. Bartholomew. That the captain delivered to the collector of Newport, sundry documents, and particularly, 1st, certificates, dated Gustavia, St. Bartolomew, June 26th, and 28th, 1813; stating the cargo of coffee, to be the growth and produce of Spanish settlements, and that it had been imported into that island; 2d, a clearance for the Portuguese schooner, dated at Gustavia, island of St. Bartholomew, June 26th, 1813, particularly specifying the cargo of coffee. That, upon these documents, the schooner was admitted to an entry, bonds were given for the duties, and the cargo was landed. That, the real facts of the case coming, accidentally to the knowledge of the collector, without any disclosure on the part of the petitioners, the schooner and the coffee were seized and libelled as forfeited under the non-importation law; the petitioners applied, in due form, to the Secretary of the Treasury for a remission, and the Secretary decided not to remit.

Upon these general facts, the district attorney, and the collector of Newport, have objected to a remission of the forfeiture; 1st, because the unlawful importation was made, by the express order of the agents of the petitioners; 2d, because it did not appear that the petitioners informed their agent, that the Secretary of the Treasury had refused to permit the importation of the coffee; 3d, that the papers of the schooner and her cargo, exhibited on the entry at the custom house of Newport, were false, colorable, and fraudulent.

In answer to these objections, the petitioners allege: 1st, that by clothing the American property with a neutral cover, they meant to elude the British cruisers, and privateers; not to violate the laws of this country; 2d, that the colorable documents, respecting the origin of the cargo, and the clearance of the vessel, were put on board by the agent of the petitioners, without their authority; and might have been designed to enable the schooner to escape capture by American privateers, until the vessel should arrive in a port of the United States, when an appeal could be made to the equity of the Government for relief against the forfeiture incurred by the importation; 3d, that the captain of the Portuguese schooner was ignorant of our language and laws; that he made an entry, without instructions from the petitioners, and contrary to their intention; and that the colorable papers ought not to have been produced at the custom house without an explanation of the facts; 4th, that the silence of the petitioners, on the impropriety of the entry upon false papers, was owing to their desire to avoid involving the Portuguese captain in the penalties of the law.

Under these circumstances, the case rests with the committee; and (returning the papers accompanying their reference) I have only to repeat the assurances of the sincere respect, with which I am, sir,

Your most obedient servant.

A. J. DALLAS.

13th CONGRESS.]

No. 429.

[3d Session.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 28, 1814.

WASHINGTON, November 27th, 1814.

SIR:

The committee of the House of Representatives, to which the bank bill was re-committed on Friday last, have directed me to request you to communicate your opinion, in relation to the effect which a considerable issue of treasury notes, (to which should be attached the quality of being receivable in subscriptions to the bank) might have upon the credit, and particularly upon the prospects of a loan for 1815. As the bill, as it was referred to the committee, provides for the subscription of forty-four millions of treasury notes, to form, with six millions of specie, the capital of the bank; any information which you may think proper to give, either in relation to the practicability of getting them into circulation without depreciation, or in regard to their operation on any part of our fiscal system afterwards, will be very acceptable.

I am, sir, very respectfully, your obedient servant,

WILLIAM LOWNDES.

To the Honorable the Secretary of the Treasury.

TREASURY DEPARTMENT, November 27, 1814.

SIR:

I have the honor to acknowledge the receipt of your letter, requesting, for a committee of the House of Representatives, an opinion upon the following inquiries:

1. The effect which a considerable issue of treasury notes, with the quality of being receivable in subscriptions to a national bank, will have upon the credit of the Government; and particularly, upon the prospects of a loan for 1815.

2. The practicability of getting forty-four millions of treasury notes, forming, with six millions of specie, the capital for a national bank, into circulation, without depreciation.

The inquiries of the committee, cannot be satisfactorily answered, in the abstract, but must be considered, in connexion with the state of our finances, and the state of the public credit.

When I arrived at Washington, the treasury was suffering under every kind of embarrassment. The demands upon it were great in amount; while the means to satisfy them, were, comparatively small, precarious in the collection, and difficult in the application. The demands consisted of dividends upon old and new funded debt, of treasury notes, and of legislative appropriations for the army, the navy, and the current service; all urgent, and important. The means consisted, first, of the fragment of an authority to borrow money, when nobody was disposed to lend, and to issue treasury notes, which none but necessitous creditors, or contractors, in distress, or commissaries, quartermasters, and navy agents, acting, as it were, officially, seemed willing to accept: 2d. Of the amount of bank credits, scattered throughout the United States, and principally in the southern and western banks, which had been rendered, in a great degree, useless, by the stoppage of payments in specie, and the consequent impracticability of transferring the public funds from one place, to meet the public engagements in another place: 3d. Of the current supply of money from the import, from internal duties, and from the sales of public land; which ceased to be a foundation of any rational estimate, or reserve, to provide even for the dividends on the funded debt, when it was found that the treasury notes, (only requiring, indeed, a cash payment at the distance of a year) to whomsoever they were issued at the treasury, and almost as soon as they were issued, reached the hands of the collectors, in payment of debts, duties, and taxes; thus disappointing and defeating the only remaining expectations of productive revenue.

Under those circumstances, (which I had the honor to communicate to the Committee of Ways and Means,) it became the duty of this department, to endeavor to remove the immediate pressure from the treasury; to endeavor to restore the public credit; and to endeavor to provide for the expenses of the ensuing year. The only measures that occurred to my mind, for the accomplishment of such an important object, have been presented to the view of Congress. The act, authorising the receipt of treasury notes in payment of subscriptions to a public loan, was passed, I fear, too late to answer the purpose for which it was designed. It promises, at this time, little relief, either as an instrument to raise money, or to absorb the claims for treasury notes, which are daily becoming due. From this cause, and other obvious causes, the dividend on the funded debt, has not been punctually paid; a large amount of treasury notes, has already been dishonored; and the hope of preventing further injury, and reproach, in transacting business with the treasury, is too visionary to afford a moment's consolation.

The actual condition of the treasury, thus described, will serve to indicate the state of the public credit. Public credit depends, essentially, upon public opinion. The usual test of public credit is, indeed, the value of public debt. The faculty of borrowing money, is not a test of public credit; for a faithless Government, like a desperate individual, has only to increase the premium, according to the exigency, in order to secure a loan. Thus, public opinion, manifested in every form, and in every direction, hardly permits us, at the present juncture, to speak of the existence of public credit; and yet, it is not impossible, that the Government, in the resources of its patronage, and its pledges, might find the means of tempting the rich, and the avaricious, to supply its immediate wants. But, when the wants of to-day are supplied, what is the new expedient, that supply the wants of to-morrow? If it is now a charter of incorporation, it may then be a grant of land; but, after all, the immeasurable tracts of the western wild, would be exhausted in successive efforts to obtain pecuniary aids, and still leave the Government necessitous, unless the foundations of public credit were re-established, and maintained. In the measures, therefore, which it has been my duty to suggest, I have endeavored to introduce a permanent plan for reviving the public credit; of which the facility of borrowing money, in anticipation of settled and productive revenues, is only an incident, although it is an incident as durable as the plan itself. The outline seemed to embrace whatever was requisite, to leave no doubt upon the power and the disposition of Government, in relation to its pecuniary engagements, to diminish, and not to augment the amount of public debts, in the hands of individuals, and to create general confidence, rather by the manner of treating the claims of the present class of creditors, than by the manner of conciliating the favor of a new class,

With these explanatory remarks, sir, I proceed to answer, specifically, the questions which you have proposed:

1. I am of opinion, that considerable issues of treasury notes, with the quality of being receivable in subscriptions to a national bank, will have an injurious effect upon the credit of the Government; and, also, upon the prospects of a loan for 1815.

Because, it will confer, gratuitously, an advantage upon a class of new creditors, over the present creditors of the Government, standing on a footing of at least equal merit.

Because, it will excite general dissatisfaction among the present holders of the public debt; and, generally, distrust among the capitalists, who are accustomed to advance their money to the Government.

Because, a quality of subscribing to the national bank, attached to treasury notes, exclusively, will tend to depreciate the value of all public debt, not possessing that quality; and whatever depreciates the value of the public debt in this way, must necessarily impair the public credit.

Because, the specie capital of the citizens of the United States, so far as it may be deemed applicable to investments in the public stocks, has already, in a great measure, been so vested; the holders of the present debt, will be unable to become subscribers to the bank, (if that object should, eventually, prove desirable) without selling their stock at a depreciated rate, in order to procure the whole amount of their subscriptions in treasury notes; and a general depression in the value of the public debt, will inevitably ensue.

Because, the very proposition of making a considerable issue of treasury notes, even with the quality of being subscribed to a national bank, can only be regarded as an experiment, on which it seems dangerous to rely; the treasury notes, must be purchased at par, with money; a new set of creditors are to be created; it may, or it may not, be deemed an object of speculation, by the money holders, to subscribe to the bank; the result of the experiment cannot be ascertained, until it will be too late to provide a remedy, in the case of failure; while the credit of the Government will be affected, by every circumstance which keeps the efficacy of its fiscal operations in suspense or doubt.

Because, the prospect of a loan, for the year 1815, without the aid of a bank, is faint and unpromising; except, perhaps, so far as the pledge of a specific tax may succeed; and then, it must be recollected, that a considerable supply of money will be required for the prosecution of the war, beyond the whole amount of the taxes to be levied.

Because, if the loan for the year 1815 be made to depend upon the issue of treasury notes, subscribable to the national bank, it will, probably fail, for the reasons which have already been suggested; and, if the loan be independent of that operation, a considerable issue of treasury notes, for the purpose of creating a bank capital, must, it is believed, deprive the Government of every chance of raising money, in any other manner.

2. I am of opinion, that it will be extremely difficult, if not impracticable, to get forty-four millions of treasury notes, (forming, with six millions of specie, the capital of a national bank,) into circulation, with or without depreciation.

Because, if the subscription to the bank becomes an object of speculation, the treasury notes will probably be purchased at the treasury, and at the loan offices, and never pass into circulation at all.

Because, whatever portion of the treasury notes might pass into circulation, would be speedily withdrawn, by the speculators in the subscription to the bank, after arts had been employed to depreciate their value.

Because, it is not believed, that, in the present state of the public credit, forty-four millions of treasury notes, can be sent into circulation. The only difference between the treasury notes now issued, and dishonored, and those proposed to be issued, consists in the subscribable quality; but reasons have already been assigned for an opinion, that this difference does not afford such confidence in the experiment, as seems requisite to justify a reliance upon it, for accomplishing some of the most interesting objects of the Government.

I must beg you, sir, to pardon the haste, with which I have written these general answers to your inquiries. But, knowing the importance of time, and feeling a desire to avoid every appearance of contributing to the loss of a moment, I have chosen rather to rest upon the intelligence and candor of the committee, than to enter upon a more labored investigation of the subject referred to me.

I have the honor to be, very respectfully, your obedient servant,

A. J. DALLAS.

[3d SESSION.]

INCOME TAX.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 3, 1814.

Mr. EPPES, from the Committee of Ways and Means, to whom was referred a resolution of the House of Representatives, instructing them to inquire into the "expediency of laying a duty on all salaried officers, and on the professional income of lawyers, solicitors, and counsellors, and on the legal proceedings of courts of justice," made the following report:

That a tax upon salaries can only be expedient and proper under arbitrary Governments, where pensions and places are bestowed without a just regard to the public interest. In the United States, according to the principles of our Government, no salary can be allowed except as a compensation for public service; a tax operates as a deduction from the salary, and such a tax so far as respects the officers of the United States, would be an admission on the part of the Legislative body, that, in fixing the salaries of their public officers, the public interest had been disregarded, and more than a just compensation allowed. Without deciding whether in some instances this may not be the case, the committee are of opinion, that if the evil exists, the proper constitutional remedy is not a tax, but a reduction of the salaries. The second member of the resolution embraces the income of lawyers, solicitors, and counsellors. The selection of a particular class of the community, which already pays in common with others, a tax on property and on consumption, and imposing on it an income tax from which every other class is exempted, would be a departure from that system of equal and exact justice, which ought to form the basis of legislation in a free country. The third member of the resolution proposes a tax on the legal proceedings of courts. This tax, if confined to the courts of the United States, would be unproductive. If extended to the State courts, difficult in the collection. It would fall principally on the necessitous and unfortunate, and produce collision with the State authorities. Upon the whole it is considered inexpedient to resort to either of the proposed taxes. The following resolution is, therefore, submitted:

Resolved, That it is inexpedient to impose a duty on salaried officers, on the income of lawyers, or on the proceedings of courts at law.

[3d Session.]

MONEYS PAID FOR MILITARY SERVICES RECEIVABLE IN PAYMENT OF TAXES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 3, 1814.

Mr. EPPES, from the committee of Ways and Means, to whom was referred a resolution of the House of Representatives, instructing them to inquire into the expediency of providing by law, that any kind of money paid by the Government, to the troops in the service of the United States, for military services, shall be receivable from the people in payment of taxes, made the following report:

That, under the general power to regulate the collection of taxes, the Secretary of the Treasury is preparing instructions to the collectors, in which a uniform rule as to the receipt of bank notes will be prescribed. The committee consider that it would be unsafe to designate, by law, the notes in which taxes shall be received, and that a due regard for the public interest requires that this subject should be regulated, at present, by instructions issued, from time to time, from the Treasury Department, which may be so framed, as to unite the safety of the revenue with the accommodation of the individual citizens. A statement of the circumstances which produced the resolution drawn up by the representatives of Tennessee, together with a letter from the Secretary of the Treasury, accompanies this report, and the committee submit the following resolution:

Resolved, That it is inexpedient to designate by law the bank notes which shall be receivable in payment of taxes.

TREASURY DEPARTMENT, November 23, 1814.

SIR:

I have the honor to acknowledge the receipt of your letter, dated the 21st instant, enclosing a resolution of the House of Representatives, passed the 11th instant, directing an inquiry "into the expediency of providing by law that any kind of money which may be paid by the Government to the troops in the service of the United States for military services, shall be receivable in payment from the people in taxes."

In the course of an endeavor to ascertain the grounds of the resolution, I have been favored with a communication from the representatives of Tennessee in Congress, (of which a copy is annexed) in addition to the general information possessed in this department; and I believe that the facts of the case are briefly these:—The Secretary at War, having occasion for money to pay the militia who marched from Tennessee against the Creek Indians, obtained a loan in bank notes, for that purpose, from the Bank of Chilicothe. Some of these notes have since been offered in payment of taxes to the collectors of the internal duties in the State of Tennessee; but, as the banks of Tennessee (where the money collected for taxes is required to be deposited) refuse to receive them as cash deposits, the collectors, in their turn, refuse to receive them as cash for taxes. Owing to the causes suggested, in the communication to which I have already referred, and, perhaps, to other causes, perfectly consistent with the general solvency of the bank of Chilicothe, the notes circulating in Tennessee have suffered a considerable depreciation. They have already been, it is alleged, an object of speculation; those paid by the United States to the militia cannot now be distinguished from other notes issued by the bank of Chilicothe; and any attempt to give the former a preference, in the payment of taxes, would probably increase the arts of speculation, as well as the other inconveniences of which the citizens of Tennessee complain.

Under these circumstances, the case is, obviously, one of great delicacy. The Government has passed the notes at their nominal value; but it is equally true, that the Government is bound to pay for them to the bank, according to their nominal value. The Government did not contract any engagement to support the credit of the notes, nor to accept them in payment of duties at any subsequent period; and all the persons who have accepted the notes, either in payment from the Government, or by transfer from the militia, have done so voluntarily, without any pretence of reliance upon any such engagement. If, therefore, it should be deemed proper to direct, by the legislative authority, that the notes of the bank of Chilicothe shall be received in payment for duties, the principle of the direction will be equally applicable to every other case where the Government has paid its troops or creditors in bank notes, which have afterwards suffered (from whatever cause) a depreciation in credit or circulating value. The effect of such a law, upon the public revenues, need not be particularly stated.

Considering the subject, however, as a general subject, meriting the serious attention of the Treasury Department, I am preparing instructions to the collectors, to regulate their conduct in receiving bank notes for taxes. The design of the instructions will be, to unite the security of the revenue with the accommodation of the banks, as well as of individual citizens, during the disordered condition of the circulating medium of the country; and, in making this arrangement, I shall be highly gratified to find, that the views of the mover of the resolution under consideration, can be accomplished.

I have the honor to be, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

J. W. EPPES, Esq., *Chairman of the Committee of Ways and Means.*

CONGRESS HALL, November, 1814.

SIR:

It may be satisfactory to you to be informed of the situation of the banks in the State of Tennessee. There are two banks in that State; one at Knoxville, and the other at Nashville; both of them of unquestionable credit and solvency. No suspension has taken place of specie payments, nor do we believe any suspension will take place.

With respect to the bank of Chilicothe, in the notes of which most of the troops in the service of the United States, from the State of Tennessee, have been paid, we can only observe, that no doubt was entertained of its solvency and ability to discharge its respective engagements, so far as we have been informed; but the notes would not circulate without considerable discount. This, we think, was produced in consequence of the course of trade being from the Southwest, Eastwardly, and Northeast, and money was not wanted at Chilicothe by the citizens of the mercantile towns in Tennessee, and not by any doubt existing of the solvency of the bank.

As these notes do not suit the commercial relations existing between the citizens of Tennessee and the Eastern States, we do not wish them to be further used in the payment of troops there.

The refusal, by the Government, to receive them again in payment of taxes, has necessarily produced considerable irritation, and it is believed, by some of the people there, to be an intentional attempt to impose on them.

The spirit of patriotism and military ardor, now existing in as high a degree as in any part of the United States, is sinking under the injustice of this measure.

We have the honor to be, very respectfully, yours, &c.

P. W. HUMPHREYS,
JOHN H. BOWER,
THOS. K. HARRIS,
N. CANNON.

[3d SESSION.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 3, 1814.

Mr. EPPES, from the Committee of Ways and Means, to whom was referred the petition of Noah Shaw, made the following report:

That the facts necessary for forming an opinion on the case, are stated in a letter from the Secretary of the Treasury, which accompanies this report. From this statement it appears that the petitioner is not entitled to relief under the special act of Congress, passed on the second day of January, 1813; and that the former Secretary refused, under the general law of the third of March, 1797, to remit the forfeiture incurred by the petitioner, on the ground, that it did not appear to his satisfaction that the forfeiture was incurred without wilful negligence, or any intention of fraud. On a review of the circumstances, the committee concur in opinion with the late Secretary of the Treasury, that the petitioner is not entitled to relief. The following resolution is, therefore, submitted:

Resolved, That the prayer of the petitioner ought not to be granted.

TREASURY DEPARTMENT, November 4, 1814.

SIR:

In answer to your letter of the 28th ultimo, I have the honor to state, from the documents which accompany the reference of the Committee of Ways and Means, and from the facts ascertained at the Treasury Department, that, in the year 1813, Noah Shaw, on behalf of Samuel Salsbury, and A. P. Cleaveland, of Boston, presented a petition to the judge of the district court for the district of Vermont, setting forth, that Salsbury and Cleaveland, on the 9th of June, 1811, had imported into the province of Upper Canada, from Liverpool, in England, certain goods, (specified in the invoice annexed) which they afterwards, on the 5th of March, 1813, imported into Burlington, in the district of Vermont; that the goods being owned by citizens, were imported into Canada on board of a ship which departed from Liverpool between the 23d of June and the 15th of September, to wit: on the first of August, 1811; and that the goods were purchased in Great Britain before the war was there known to exist.

That, on the 20th of November, 1813, the district judge certified to the Secretary of the Treasury the petition and the proofs, but he made no statement of facts; and, on the 12th of July, 1814, the Secretary of the Treasury decided, in form, *not to remit* the forfeiture incurred by the importation of the goods into the United States.

That it appears by the petition which Noah Shaw has recently presented to Congress, that Salsbury and Cleaveland had sold the goods to B. and C. Adams, on the 22d of September, 1812, from whom they were purchased by Noah Shaw, on the 11th of January, 1813, with a view to the importation, which he effected in the ensuing month of March.

Upon these facts I take the liberty to offer the following observations, for the consideration of the committee:

1. That, from the terms of the petition to the district judge, it appears that Mr. Shaw intended to seek relief, as for Salsbury and Cleaveland, under the special act of the 2d of January, 1813, directing the remission of certain forfeitures; and the prayer of the petitioner is, therefore, for relief according to the law *in such case* made and provided. The case, however, was certainly not embraced by the special act; for the goods were not imported into the United States, from the United Kingdom of Great Britain and Ireland; they were not shipped on board of a vessel which departed therefrom between the 23d of June, and the 15th of September, 1812; and, so far as respects Mr. Shaw, the owner at the time of the importation, the purchase of the goods was made long after the war was known to exist at the place of purchase.

2. That, although the case was not embraced by the special act, it became, properly, a question, whether the Secretary of the Treasury was authorized to remit, or mitigate, the forfeiture, under the general law of the 3d of March, 1797, if, in his opinion, it was incurred without wilful negligence, or any intention of fraud. It does not appear that the late Secretary objected merely to an irregularity in the mode of exhibiting the facts, or of transmitting the documents; for, then he would not have decided the case, but he would have returned it to the district judge, to undergo the necessary revision and amendment in point of form. Nor does it appear, from any information within my reach, that the Secretary decided the case upon any doubt of his jurisdiction to remit the forfeiture. The case must, therefore, be deemed to have been decided on its merits; and the power of the Secretary of the Treasury being once executed, the department cannot afterwards modify, or rescind, or change the decision.

It will remain, upon this general view of the subject, for the committee to decide, whether the petitioner ought to be recommended for relief to Congress. The danger of giving a sanction to speculations which involve an unauthorized intercourse with the enemy, and the tendency of such speculations to cover and countenance the worst kind of smuggling, will, no doubt, be duly considered. If, indeed, the case had been originally presented for my official interposition, I should have reflected well before I decided, that, in principle, and in circumstances, it was entitled to the equitable relief of the act of the 3d of March, 1797. That act was meant to provide for cases of mere accident or misfortune, and for cases uncontaminated by any fraudulent intention, when the necessary rigor of the general law would become, in the particular instance, an instrument of hardship and cruelty. But no man is ever permitted to obtain relief in the courts of justice, upon a claim founded in his own wilful violation of the law; and it would be an extraordinary, and, I presume, a novel application of the equitable powers of the Secretary of the Treasury, to legitimate a trade with the enemy, through the medium of remitting penalties and forfeitures incurred by a breach of the non-importation acts.

I have the honor to be, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

Honorable J. W. EPPES, *Chairman of the Committee of Ways and Means.*

13th CONGRESS.]

No. 433.

[3d SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE ON THE 5TH OF DECEMBER, 1814.

To the Senate and House of Representatives of the United States:

The memorial of the subscribers, committees appointed by five of the banks in the city of New York, to take into consideration all matters relating to the state of credit in the city, respectfully represents:

That your memorialists, with great deference to the wisdom of Congress, presume that it will not be considered as unbecoming in them, to express their opinions on a subject, which they have, practically, under their constant view.

That they see, with great alarm, the proposed incorporation of a Bank of the United States, with a capital of fifty millions of dollars; not that they are insensible of the advantages of such an institution, but because they are persuaded, in their most deliberate view of the subject, that the present time is most inauspicious for the creation of such a bank, and that, so far from aiding the fiscal operations of the Government, it will, in their opinion, tend to embarrass still more than the adverse circumstances of the times have already done, all public, as well as private credit.

Your memorialists firmly believe, that the proposed capital will be found too large;

That six millions of dollars in specie, cannot be obtained by any inducements which can be held out, and that a less sum will not afford a proper security to the public;

That, even if six millions could be procured, the payment of the notes in specie could only be continued for a short period, under the present circumstances of the country;

That, if by the exercise of the power proposed to be lodged in the President of the United States, the notes are not paid in specie, they will infallibly depreciate;

That, if they depreciate, no existing bank can possibly take them, without the greatest injury to their stockholders;

That, if the notes are not taken by the present banks, throughout the United States, they cannot serve as a general medium of circulation.

A full discussion of this subject, your memorialists are well aware, would transgress the proper limits of this memorial; they will, therefore, confine themselves to a few of the reasons which have induced them to form these opinions.

They think that the capital will be found too large, because the late Bank of the United States had only a capital of ten millions of dollars, at the period of our greatest commercial prosperity, and since the expiration of the charter of that bank, the amount of its capital has been much more than supplied, by the incorporation of other banks. It is believed to have been the opinion of the part of the community best informed on that subject, that this amount was abundantly sufficient. Your memorialists, therefore, cannot but dread the effects which a new banking capital of fifty millions, must have upon the paper circulation of the country, particularly when it is considered, that the proposed bank is to be pledged to lend to the Government thirty millions, which the public exigencies will probably very soon call for, without any power of refusal being left to those who are to manage the bank, even if convinced that the emission of so large a sum in notes must be ruinous to the bank itself.

It is well known, that a great and constant drain of the precious metals from the United States, has existed for a long time past, while supplies of them have been cut off by the war; and that the alarms necessarily existing during a war, have induced many timid and cautious persons to hoard specie, the consequence of which has been, to render a suspension of specie payments necessary to the banks in Baltimore, Philadelphia, New York, and in various other parts of the United States, notwithstanding the utmost care has been taken to restrain the circulation of notes within moderate bounds, yet, it has been found impossible to prevent a difference in value between specie and the notes of the banks in the best credit. This difference is now, in the city of New York, from twelve to fifteen per cent., and in other places, still greater. Your memorialists, therefore, have no hesitation in giving it as their opinion, that six millions of specie cannot be procured; but, they are persuaded also,

That, if procured, that sum could not long supply specie payments, because, as the same causes are likely still to operate, and with increased effect, when the paper circulation is so much increased, as it must be, by the proposed loans to the Government, it is believed, that as fast as the notes are issued, they will be returned for specie. As they bear no interest, there will be no inducement for any person to hold them, to counteract the great advantage offered by the high price of specie, in sending them for payment.

If it should be found necessary to restrain the bank from paying specie, your memorialists are convinced the notes will depreciate. The treasury notes which have been issued, have done so, although in much less quantity, and under more favorable circumstances, because bearing interest, and being payable at definite periods. While treasury notes have these obvious advantages, it is not perceived that the notes of the proposed bank will have any to balance them, the security being presumed the same in both cases. The expenses of the war must, in the first instance, be paid in these notes, and of course they will be, to a considerable extent, in the hands of persons who must, of necessity, dispose of them for what they will bring. The late Bank of the United States, while redeeming its notes in specie, and possessing the entire support of the Government, and the confidence of the public, never had, it is believed, more than six millions of notes in circulation. The banks in the city of New York, whose aggregate capital is about fifteen millions of dollars, have not, upon an average, had a circulation of more than five millions, although possessing all the advantages to be derived from the business and support of the Government in this city. Presuming that the proportion of circulation to capital, is nearly the same in other parts of the United States, and taking into view, that the circulation is probably as great at the present period, as under the circumstances of the country, and the removal of the check of specie payments, it can safely be, can it be doubted what the effect of an additional emission, even of twenty millions of paper, will necessarily be?

As it appears evident to your memorialists, that the notes of the proposed bank must depreciate, it appears equally so, that no existing bank can take them without the greatest injury to their stockholders. However disposed they may be to aid the fiscal operations of the Government, yet, from the moment the notes are depreciated, if they are taken either in payment or in deposits, all their debts will be paid in that description of paper, the circulation of their own notes will nearly cease, and they will be left in possession of notes, redeemable at some future uncertain period, and bearing no present interest. Can such a sacrifice of the interest of their constituents be called for, or expected, from the present institutions?

It has been supposed, that the want of a medium of general circulation, rendered a national bank necessary; but your memorialists beg leave to observe, that, while they admit the want of such a medium, they are quite persuaded that bank notes will not answer the purpose, unless they can be exchanged, at pleasure, for specie, or are taken generally by the banks throughout the United States. If your memorialists are right in the opinions already stated, it appears to follow as a necessary consequence, that the notes of the proposed bank will not supply the place of a general medium.

As your memorialists are persuaded that the best interests of the United States require, that the suspension of specie payments, which has unfortunately been found necessary, should be continued for as short a period as possible, they dread the increased difficulty which an additional paper circulation, probably of thirty or forty millions, will occasion; they fear it will approach to an insuperable bar to the resumption of specie payments, while, on the

other hand, a national bank, founded upon proper principles, and at a more favorable period, when there was a reasonable prospect of continuing to pay specie, would offer the best remedy for the deranged state of the circulation, and a most powerful instrument to renovate the commercial credit of the United States.

Your memorialists beg the indulgence of Congress, when they add, that they have no doubt, that treasury bills, issued nearly in the way proposed by the Committee of Ways and Means of the House of Representatives, would be found of more service to the Government, be much less dangerous to the public, and tend much more to supply the want of a general medium of circulation. They believe, that treasury notes, issued for various denominations, redeemable at the pleasure of the Government, but not at any definite periods, bearing interest, while in circulation, at the present rate, but fundable at the option of the holder, at a higher rate of interest, would be less liable to depreciation, than the notes of a bank bearing no interest, and the security being the same.

The present interest on the treasury notes, would offer an inducement to keep them, and whenever the market was overcharged, the power to fund them at a higher rate of interest, would take off the redundancy. In this way, the issue of treasury notes would probably operate to a considerable amount, as a constant loan, at a reduced rate of interest; nor should it be overlooked, that the consequences of a depreciation, if it unfortunately should take place, would neither be so extensive, nor so lasting, as in the case of a Bank of the United States.

[3d SESSION.]

LOANS:

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 5, 1814.

WASHINGTON, December 2, 1814.

SIR:

Your letter of the 27th of November has been referred to the Committee of Ways and Means, and I am instructed to ask for the amount of the payments to be made during the present quarter, on account of the public debt; the funds prepared to meet those payments, and any other information which may enable the committee to decide as to the necessity of adopting additional measures for meeting the public engagements during the present quarter of the year.

I have the honor to be, your most obedient,

JOHN W. EPPES.

Honorable Mr. DALLAS, *Secretary of the Treasury.*

TREASURY DEPARTMENT, December 2, 1814.

SIR:

I have the honor to acknowledge the receipt of your letter, dated this morning, stating that mine of the 27th of November, addressed to the committee on a national bank, has been referred to the Committee of Ways and Means.

In my communications to the committees of Congress, I have never been disposed to disguise the embarrassments of the treasury. A frank and full development of existing evils will always, I hope, be best calculated to secure the attention and exertion of the public authorities; and, with legislative aid, I am still confident, that all the difficulties of a deficient revenue, a suspended circulating medium, and a depressed credit, may be speedily and completely overcome. My only apprehension arises from the lapse of time; as a remedy which would be effectual to-day, will, perhaps, only serve to increase the disorder to-morrow.

In answering the inquiries of your letter, permit me to state: 1st. The amount of the payments which were to be made during the whole of the present quarter on account of the public debt, and the funds prepared, or applicable to meet those payments: 2d. The payments that remain to be made, and the funds that remain to meet them, for the residue of the quarter: And, 3d. General information, in relation to additional measures for meeting the public engagements.

First Point.

It is respectfully stated, agreeably to an estimate which was formed on the 4th of October, 1814:

DR.

1. That, during the quarter commencing the 1st of October, 1814, and ending the 1st of January, 1815, including both days, there was payable, for the principal and interest of treasury notes, during the whole quarter, chiefly at Boston, New York, and Philadelphia, a sum of	\$4,457,069 80
2. That, during the same period, there was payable, for the principal and interest of temporary loans, at Boston, Baltimore, and Charleston, the sum of	771,125 00
3. That, during the same period, there was payable, in dividends upon the public funded debt, at the several loan offices, the sum of	1,900,000 00
	\$7,128,194 80

CR.

1. That there were bank credits scattered throughout the United States, on the 1st of October, 1814, amounting, by estimate, to	\$2,500,000 00
2. That there was receivable from the customs, during the whole quarter, the sum of	1,800,000 00
3. That there was receivable, on account of the sales of public lands, during the same period, a sum of	160,000 00

4. That there was receivable, on account of internal duties and direct taxes, during the same period, a sum of	900,000 00
5. That there was receivable, on account of loans, during the same period, a sum of	1,700,000 00
6. That there might be obtained, upon an issue of treasury notes, during the same period, a sum of about	2,500,000 00
	<u>\$9,560,000 00</u>

From which it results:

1. That the amount of the whole payments, for dividends of public debt, for temporary loans, and for treasury notes, during the whole of the current quarter, was	\$7,128,194 80
2. That the amount of the whole of the estimated receipts of the treasury, was	9,560,000 00
	<u>\$2,431,805 20</u>

Leaving a surplus of receipts of

It is believed that this estimate, formed upon official facts and experience, would have been substantially realized in the event, if the banks had not suddenly determined to suspend their payments in specie. But for that occurrence, the dividend on the public debt would have been punctually paid to the individual creditors of Boston on the 1st of October last; the transfer of the public funds, from one place to another place, in order to meet the public engagements, would have continued easy and certain; the credit and use of treasury notes, (limited to the specified amount) would, probably, have been preserved, and the revenue arising from duties and taxes, would not have been materially intercepted, if at all, in its passage to the treasury, by payments in treasury notes.

Second Point.

DR.

1. That, of the principal and interest of the treasury notes, payable during the present quarter, and which have already fallen due, there remains, on this day, unpaid, at the places mentioned in the schedule A, the sum of	\$1,902,680 80
2. That the principal and interest of the treasury notes, which will become due on or before the 1st of January, 1815, at the places mentioned in the schedule B, amount to	1,243,720 00
3. That the dividends on the public debt, payable on the 1st of January, 1815, at the places mentioned in schedule C, amount to the sum of	1,873,000 00
4. That the principal and interest of temporary loans, payable during the present quarter, and contracted at the treasury, in part execution of the authority granted by the act of Congress, passed the 14th of March, 1812, and payable at Boston on the 15th and 31st of December, amount to	506,875 00
	<u>\$5,526,275 80</u>

CR.

1. That, on the 28th ultimo, there were bank credits, in the banks specified in the schedule D, applicable to the payment of the public debt, during the present quarter, (deducting the amount of bank credits (\$813,000) which, as it could not be transferred for the payment of public debt, has been recently applied to the appropriations for the War and Navy Departments) amounting to	\$2,372,287 13
2. That the amount receivable during the remainder of the present year, on account of the loan of six millions, applicable, also, to the payment of the public debt, if no failure in payment occurs, will be about	450,000 00
3. That the estimated amount, receivable during the remainder of the present year, on account of customs, applicable, also, to the payment of the public debt, (subject, however, to various contingencies, such as the non-payment of bonds, the payment of bonds in treasury notes, &c.) may be stated at	350,000 00
4. The estimated amount, receivable during the remainder of the present year, on account of the sales of public lands, subject, however, to contingent payments in treasury notes, may be stated at	150,000 00
5. The estimated amount, receivable during the remainder of the present year, for internal duties and direct tax, subject, however, to contingent payments in treasury notes, may be stated at	450,000 00
	<u>\$3,772,287 13</u>

From this second view of the debit and credit of the account, limited merely to the payment of the public debt becoming due for the residue of the present quarter, it appears,

1. That the debt amounts to the sum of	\$5,526,275 80
2. That the resources to pay the debt, (excluding the sum applied to the Army and Navy Departments, as before stated, and excluding the possible proceeds of new loans, and new issues of treasury notes, for the single purpose of paying public debt) amount to	3,772,287 13
	<u>\$1,753,988 67</u>

The difference between the results of the statements, under the first and the second points, will be accounted for, by the unexpected effect of payments in treasury notes, on account of duties, taxes, and land; by the total cessation of the use of treasury notes, either to pay the public creditors, or to raise money; and by an unavoidable variance in estimates, depending upon a variance in the state of information at the treasury. A priority of payment may be justly claimed by the holders of the funded debt; and, therefore, it is proper to add,

1. That the amount of public credits, as estimated in the preceding statement, is the sum of	\$3,772,287 13
2. That the amount of the dividend, on the old and new funded debt, payable on the 1st of January, 1815, is the sum of	1,873,000 00
3. And that, consequently, the surplus of the resources, after satisfying that single object, is the sum of	<u>\$1,899,287 13</u>

It will be observed, that these estimates do not include, as an item of the debt the dividend on the funded debt, amounting to two hundred thousand dollars, which was not actually paid to the individual creditors at Boston on the 1st of October last. But it is omitted, because an adequate fund in the State bank was seasonably provided for the occasion, and the usual treasury draft was issued in favor of the commissioner of loans, so as to deduct a corresponding amount from the bank credits of the Government. The State bank declined, for several reasons, (which it is unnecessary to repeat) paying in coin, or in bank notes, and most of the public creditors refused to accept the treasury notes, which the bank offered to them as an alternative payment. It is not considered, that, under these circumstances, connected with the general state of the circulating medium, (which places the power of the Government to meet its engagements, on the same footing with the power of the most opulent of its citizens) there can

exist any just reproach upon the public credit, or resources. But, nevertheless, efforts have been anxiously made by this department, and are still in operation, to satisfy the public creditors, independent of the fund which was originally set apart, and which still remains on deposit at the State bank, by all the remaining means at the disposal of the treasury.

Nor, on the other hand, have I included, in the statement of our resources to pay the public debt, the unexecuted authority to borrow upon public loans, and to issue treasury notes. I have only included the items of revenue, which, in ordinary times, would be deemed certain and effective; reserving any surplus of those items, with the loan and the treasury notes, to meet the general appropriations for the public service.

Third Point.

It is respectfully stated, that the non-payment of the treasury notes, and the hazard of not being able to pay the dividend on the public debt, according to the respective contracts, was chiefly (I believe entirely) owing to the suspension of specie payments at the banks, and the consequent impracticability of transferring the public funds, from the place in which they were deposited, to the place in which they were wanted. I have endeavored, therefore, to induce the banks, as the performance of an act of justice, not inconsistent with their interest, or their policy, to assist in alleviating the fiscal embarrassments of the Government, which they have thus contributed to produce. The answers to my last proposition (of which a copy is annexed, in schedule E) have not been received.

But the danger of depending upon gratuitous aids, (of depending, indeed, upon any thing but the wisdom and the vigilance of Congress) makes, with every day's experience, a deeper impression upon the mind. In speaking, therefore, of additional measures for meeting the public engagements, during the present quarter of the year, I derive great satisfaction, in reflecting upon the inevitable and immediate effect of the legislative sanction (even so far as it has already been given) to a settled and productive system of taxes, for defraying the expenses of Government, and maintaining the public credit. This policy, embracing, in its course, the introduction of a national circulating medium, and the proper facilities for anticipating, collecting, and distributing the public revenue, will, at once, enliven the public credit; and even the existing resources of the present quarter must ripen and expand, under an influence so auspicious. But something may be conveniently and usefully added; for instance:

1. A discretionary authority may be given, by law, to issue treasury notes, for the amount of the sums now authorized to be raised by law.

2. An authority may be given, by law, to transfer bank credits, from one place to another place, in order to meet the public engagements, allowing a reasonable rate of exchange.

3. Appropriations may be made, by law, to defray the extra expenses of the War and Navy Departments, during the present year; and a general authority may be given to borrow, or to issue treasury notes, to supply any deficiencies in former appropriations for those departments, and for the payment of the public debt, the treasury notes, and the civil list.

The present opportunity enables me to assure you, sir, that I am preparing, with all possible diligence, to report to the Committee of Ways and Means, upon the subjects which they have been pleased to confide to me—

1. The tax bills are numerous, new in some of their principles, and complicated in most of their details; nor are the best sources of information at hand. They will, however, be drafted, and sent to the committee in succession.

2. The plan for establishing a competent sinking fund is under consideration, and will, probably, be ready to be reported before the tax bills are passed.

3. The estimates for the expenses of 1815, the annual appropriation bill, and the bills to authorize a loan, and an issue of treasury notes for that year, are, also, objects of attention.

I have the honor to be, very respectfully, sir, your obedient servant,

A. J. DALLAS.

JOHN W. EPPES, Esq., *Chairman of the Committee of Ways and Means.*

A.

Schedule of Treasury Notes which have already fallen due, and remain unpaid, this 2d day of December, 1814.

Where payable.	When payable.	Principal.	Interest.	Total.

SCHEDULE E.—[CIRCULAR.]

TREASURY DEPARTMENT, *November 25, 1814.*

SIR:

The sudden determination of most of the banks, in which the deposits of public money were made, to refuse payment of their notes, and of drafts upon them, in specie, deprived the Government of the use of its gold and silver, without any act, or assent, on the part of the treasury. The equally sudden determination of the banks of

each State, to refuse credit and circulation to the notes issued in other States, deprived the Government, without its participation, of the only means that were possessed for transferring its funds, from the places in which they lay inactive to the places in which they were wanted, for the payment of the dividends on the funded debt, and the discharge of treasury notes. It was the inevitable result of these transactions, that the bank credits of the Government should be soon exhausted in Boston, New York, Philadelphia, &c. where the principal loan offices, for the payment of the public debt, were established; and that the Government should be unable to satisfy its engagements in those cities, unless the public creditors would receive drafts on banks in other States, or would subscribe the amount of their claims to a public loan, or would accept a payment in treasury notes. It was not unreasonable, indeed, to hope, that the banks, whose conduct had produced the existing embarrassment, would cheerfully afford some alleviating accommodation to the Government; but every attempt to realize that hope has hitherto failed. Even, however, if the present application should, also, be unsuccessful, I think I may rely on the intelligence and candor of our fellow-citizens, to vindicate the Government from any reproach, for a want of good faith, or of essential resources to maintain the public credit. The events which have occurred, the Government could neither avert nor control.

Under these circumstances, I have deemed it a duty to the public, and to myself, to request the attention of the banks, which have acted as agents of the treasury, in the receipt and distribution of public money, to the following propositions:

1. That the banks shall assist the Government with the means of discharging the treasury notes, and paying the dividends of public debt, during the present quarter, at the loan office of their respective States. A great portion, both of the treasury notes and public debt, belongs to the banks, respectively; and, so far, nothing more than a protracted credit will be required. The balance of the demand will be payable, of course, in the notes of the respective banks.

2. That, to secure and satisfy the advances, thus to be made by the banks, respectively, the banks shall be admitted, on reasonable terms, to subscribe to the loan of three millions of dollars; or they shall receive treasury notes, or they shall receive bank notes, or drafts upon banks in other States. If any bank should prefer accommodating the treasury with a temporary loan, on a legal interest, this course may be pursued.

I will thank you, sir, for an early answer to this proposition, and, if it should be accepted, I will immediately make the necessary arrangements to carry it into effect.

I have the honor to be, sir, very respectfully, your most obedient servant,

A. J. DALLAS.

13th CONGRESS.]

No. 435.

[3d Session.

REVENUE LAWS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 7, 1814.

TREASURY DEPARTMENT, *November 19, 1814.*

SIR:

I have the honor to acknowledge the receipt of your letter, requesting, on behalf of the Committee of Ways and Means, "any information which the Treasury Department can furnish, as to the defects of the present revenue laws, and the best mode of correcting the evils arising from an intercourse with the enemy."

Although the expediency of a general revision of the revenue laws, with the view contemplated by the committee, is acknowledged, I fear it will be impracticable, at this time, to undertake, and to execute, satisfactorily, so extensive a task. The pressure of the current business upon the department, is severe, and precludes an application of the Secretary's time to any object which is not of immediate importance. The inconveniences that are suggested in the documents from Vermont, accompanying the reference of the committee, require, however, an early attention, and the following views of the subject are respectfully submitted to your consideration:

I. The representations from Vermont present various causes of complaint:

1. That smuggling is extensively prosecuted, on the Northern frontier, by citizens of the United States, sometimes with, and sometimes without, the cover of a neutral character; in the course of which the enemy obtains important intelligence; he is furnished with cattle, and other essential supplies; and he is enabled to introduce his merchandise surreptitiously into our markets.

2. That the powers of the revenue officers are inadequate to the detection and prosecution of these offences, because the right of search is not extended to every vehicle that may be employed; because the prohibitory laws do not sufficiently define and enumerate the subjects of an illicit trade; because no efficient act of prevention is authorized to be performed, even upon the strongest ground of suspicion; and because there is no force, civil or military, provided to aid the revenue officers in the execution of their duty, when cases of violent opposition occur.

3. That, limited as the general powers of the revenue officers appear to be, they are rendered still more inadequate by the terror which the officers now feel, of being exposed to suits for damages, under the authority of recent decisions in the courts of law; for it has been adjudged in Vermont, that the inspectors of the customs are not authorized, in any case, to make seizures, and that actions may be maintained against them, to recover the whole value of the property seized, even when the property itself has been duly condemned, as forfeited by law.

II. The actual state of the laws, in relation to these subjects of complaint, may be sufficiently seen in the following analysis:

Of the power and privileges of Inspectors, and other officers of the customs.

1. The inspectors of the customs, are persons employed by the collector, with the approbation of the principal officer of the Treasury Department, and their duties are entirely directed to guard against frauds upon the revenue, by smuggling, or any other kind of illicit trade. They are described and considered, throughout the acts of Congress, as officers of the customs, though not as chief officers.

2. On the arrival, or the approach, of ships or vessels, the inspectors, as well as the chief and other officers of the customs, are empowered to go on board, (whether in or out of their respective districts) for the purpose of demanding manifests of their cargoes, and of examining and searching the ships and vessels. This act is to be performed, *ex officio*, by way of precaution, without any special deputation from a collector, naval officer, or a surveyor.—4 vol. 367, s. 64.

3. If, however, there be reason to suspect that any goods, subject to duty, are concealed in any ship or vessel, an inspector cannot enter such ship or vessel, to search for, seize, and secure such goods, without being specially appointed for that purpose by the collector, naval officer, or surveyor. And if there be cause to suspect a concealment of such goods, in any particular dwelling house, store, building, or other place, a search warrant must be obtained from a justice of the peace, to authorize a search and seizure. The cases here provided for, are cases of

suspicion only, when probable information has been received of a concealment of goods, either on water, or on land, with a design to evade the payment of duties. The act to be performed is not in the ordinary course of an inspector's official duty; it is not an act of precaution, but of detection; it is not an act authorized for seizing goods which are notoriously liable to seizure, but for entering a ship, or a house, in a doubtful case, to ascertain whether any goods liable to seizure are there concealed.—4 vol. 389, s. 68.

4. But any ship, or vessel, goods, wares, or merchandise, which are liable to seizure by virtue of any act respecting the revenue, it is the duty of the several officers of the customs (including, by general description, and practical construction, the inspectors of the customs) to seize and secure, as well without, as within their respective districts. The act to be performed, in this case, is founded on the fact, that the property is liable to seizure, but that it is not necessary to enter either a ship or a house, to ascertain whether such goods are so liable, and are there concealed.—4 vol. 390, s. 70.

5. In the performance of their duties, the inspectors, in common with the other officers of the customs, are protected by the law, when unjustly sued or molested, in actions for damages; and when any prosecution is commenced, on account of the seizure of any ship, or goods, in which judgment is given for the claimant, the inspectors are released from all responsibility, on showing that there was a reasonable cause of seizure. [4 vol. 391, s. 71, *Ibid* 429, s. 89.] This last provision, indeed, has been extended generally for the protection of any collector, or other officer, under any act of Congress authorizing a seizure of any ship or vessel, goods, wares, or merchandise, where the seizure has been made on probable cause, although restitution should be decreed.—8 vol. 255, s. 1.

6. The "Act to prohibit any American from proceeding to, or trading with, the enemies of the United States, and for other purposes," declares, that, "if any person shall transport, or attempt to transport, over land, or otherwise, in any wagon, cart, sleigh, boat, or otherwise, naval or military stores, arms, or the munitions of war, or any article of provision, from any place of the United States, to Upper or Lower Canada, Nova Scotia, or New Brunswick," certain forfeitures and penalties shall be incurred. And authority is given "to the collectors of the several ports of the United States, to seize and stop naval or military stores, arms, or the munitions of war, or any articles of provision, and ship or vessel, wagon, cart, sleigh, boat, or thing, by which any article, prohibited as aforesaid, is shipped or transported, or attempted to be shipped or transported." It seems to be a strained and impracticable construction of the provision, to confine the exercise of the authority for stopping and seizing the contraband articles, to the personal agency of the collectors. A collector, in this case, as in every other case where a positive restriction is not imposed, must act through the vigilance and co-operation of the inspectors, and other officers of the customs.

Of the existing auxiliary means to execute the revenue laws, and the laws prohibiting trade and intercourse with the enemy.

1. In addition to the means which the preceding statements will suggest, the judges of the supreme court, and of the several district courts of the United States, and all judges and justices of the courts of the several States, (having authority, by the laws of the United States, to take cognizance of offences against the constitution and laws thereof) have the like power to hold to security of the peace, and for good behavior, in cases arising under the constitution and laws of the United States, as may, or can be lawfully exercised, by any judge or justice of the peace of the respective States, in cases cognizable before them.—4 vol. 231.

2. Whenever the laws of the United States are opposed, or the execution thereof obstructed, in any State, by combinations too powerful to be suppressed by the ordinary course of judicial proceedings, or the powers of the marshal, the President is authorized to call forth a competent force of the militia, to cause the laws to be executed. [4 vol. 188, s. 2, 9.] And by a subsequent act, the President is authorized to employ the land or naval force of the United States, for the same purpose.—8 vol. 311.

3. A final judgment, or decree, in any suit, in the highest court of law or equity of a State, in which a decision of the suit could be had, where is drawn in question the validity of an authority, exercised under the United States, (as in the case of an officer of the customs) and the decision is against the validity, may be re-examined, and reversed, or affirmed, in the supreme court of the United States, upon a writ of error; but the matter in dispute must exceed the value of two thousand dollars, exclusive of costs.—Vol. 1. s. 61, 63.

III. From these views of the subject of complaint, and of the state of the law in relation to them, we are led to consider the best modes of amending the defects, and correcting the evils which exist.

1. An habitual respect for the judicial authority, does not permit me to controvert, any further, the decisions of the courts of law in the State of Vermont, respecting the official character and powers of the inspectors, and other officers of the customs. It is recommended, therefore, that the law should be so amended, as to place the inspector upon the footing of officers within the meaning of the revenue laws, and laws prohibiting trade and intercourse with the enemy; and that the collectors should be authorized to employ a competent number of inspectors, with authority to stop, search, detain, and seize, all cattle, live stock, and other supplies; all goods and money, and, generally, all other articles whatsoever, howsoever carried and transported, by land or by water, on the way to, or from, the British provinces, subject to such regulations as will secure, with as little embarrassment as possible, the rights of a lawful or neutral trade.

2. The officers of the customs should be entitled, in proper cases, and on proper proofs, to obtain, from any magistrate, a warrant to search dwelling houses, and other buildings; to demand the assistance of the marshal of the district, and his deputies, with the posse of the district, if necessary, for the execution of their duties; and to hold any person to security for his good behavior, stating, on oath, that they have probable and just cause for believing that such person is carrying on an unlawful trade, or intercourse, with the enemy.

3. No citizen, or person usually residing within the United States, should be allowed to cross the frontier into the British provinces, without a passport from the Secretary of State, or from the Secretary of War, or from the officer commanding the military district in which such person usually resides. All persons coming from the British provinces into the United States, should be required to report themselves, within a reasonable time, to the military commander, or the collector of the district within which they shall, respectively, first arrive. And any person hovering upon the frontier, at a distance from his usual place of residence, without any business requiring his attendance there, and without a passport, should be held to security for his good behavior, as a person suspected, upon probable cause, to be engaged in an unlawful trade, or intercourse, with the enemy.

4. The militia and army of the United States, on the frontier, should be authorized, under proper regulations, to co-operate with the civil magistrates, and officers of the customs, in seizing and securing persons engaged in an unlawful trade, or intercourse with the enemy, together with the articles and vehicles employed in such trade, or intercourse.

5. A more effectual provision should be made for transferring, from the State courts to the Federal courts, suits brought against persons exercising an authority under the United States, so that such suits may be transferred, as soon as conveniently may be, after they are commenced.

6. Treason being defined by the constitution, and misprision of treason being an offence which is necessarily founded upon that definition, many practices, of a treasonable nature and effect, which cannot be constitutionally classed with treason, are unnoticed in our penal code. An act of Congress declaring such practices to be misdemeanors, and punishing them with fine and imprisonment, would, perhaps, be the most effectual mode of correcting the evils arising from an intercourse with the enemy.

The papers that were received from the committee, are now returned; and I embrace the opportunity to repeat the assurances of the sincere respect, with which I have the honor to be, sir, your most obedient servant,

A. J. DALLAS.

J. W. EPPES, Esq., Chairman of the Committee of Ways and Means.

No. 436.

[3d SESSION.]

PROPRIETY OF LEGALIZING THE PAYMENT OF CLAIMS IN GOVERNMENT STOCK OR
TREASURY NOTES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 19, 1814.

TREASURY DEPARTMENT, *December 19, 1814.*

SIR:

I have the honor to acknowledge the receipt of your letter of this morning's date, requesting, for the Committee of Claims, an opinion upon the propriety of providing, by law, for the payment in Government stock, or treasury notes, of claims allowed by Congress, instead of making general appropriations for payment, out of any money in the treasury, not otherwise appropriated?

It gives me great pleasure to acknowledge the disposition manifested by the committee, to accommodate the treasury upon the present occasion. I do not think, however, that the change in the mode of appropriation, which your letter suggests, would be attended with any public advantage, and it might, at this time, be injurious to the public credit. Every creditor is entitled to be paid, according to the terms of his contract; and, as to the medium of payment, the truth is, that every creditor must accept whatever the treasury is able to offer. It is known, that there is no gold and silver, and that bank notes are of a limited circulation, while the Government bank credits are of a limited amount. Stock and treasury notes are, consequently, the present means of payment proposed by the treasury, generally speaking. But the state of the business is better to be explained at the treasury, than to be announced in an act of Congress; particularly, as I cherish the hope of an early amelioration of our fiscal resources.

I have the honor to be, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

B. YANCY, Esq. *Chairman of the Committee of Claims.*

[3d SESSION.]

MINT.

COMMUNICATED TO THE SENATE, JANUARY 10, 1815.

To the Senate and House of Representatives of the United States:

I communicate for the information of Congress, the report of the Director of the Mint, of the operation of that establishment during the last year.

JAMES MADISON.

January 10th, 1815.

MINT OF THE UNITED STATES, *January 2, 1815.*

SIR:

I have now the honor of laying before you a report of the operation of the Mint for the last year.

From the Treasurer's statement of the coinage, herewith transmitted, it will appear, that during the above period, there have been struck and issued—

In Gold coins, 15,454 pieces, amounting to \$77,270;

In Silver coins, 1,460,575 pieces, amounting to \$561,687 50;

In Copper coins, 357,830 pieces, amounting to \$3,578 30;

Making, in the whole, one million eight hundred and thirty-three thousand eight hundred and fifty-nine pieces, amounting to six hundred and forty-two thousand five hundred and thirty-five dollars and eighty cents.

I have, sir, the honor to be, with sentiments of the greatest respect and esteem, your most obedient servant,

R. PATTERSON.

JAMES MADISON, *President of the United States.*

A Statement of the Coins struck at the Mint of the United States, from the 1st of January to the 31st December, 1814, inclusive.

[3d SESSION.]

STATE OF THE TREASURY

At the close of the year 1814, and a plan for providing the ways and means for the year 1815.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 21, 1815.

TREASURY DEPARTMENT, *January 17, 1815.*

SIR:

I have deemed it hitherto my duty to wait, with deference and respect, for a decision upon the measures which I had the honor to suggest to the Committee of Ways and Means, on the 17th of October last. But the rapid approach to the termination of the session of Congress, induces me again to trespass upon your attention, earlier, perhaps, than is consistent with a satisfactory view of the situation of the treasury, as some important plans are still under legislative discussion. I have, now, however, the honor to submit to the consideration of the Committee of Ways and Means, the following additional statements and propositions.

STATEMENTS.

I. STATEMENT OF THE SITUATION OF THE TREASURY AT THE CLOSE OF THE YEAR 1814.

1. *The charges on the treasury, for 1814.*

It appears that, at the close of the year 1813, there was a general balance of the appropriations for that year, remaining unsatisfied, and subject to be called for at the treasury, in the year 1814, amounting to about \$8,131,313 03 and composed of the following items:

Of the appropriation for the civil department, about	390,499 07
Of the appropriation for the military department,	2,666,230 33
Of the appropriation for the naval department,	3,611,240 75
Of the appropriation for the diplomatic department,	253,846 62
Of the appropriations for miscellaneous services,	1,209,496 26
	8,131,313 03

The annual appropriations for the year 1814, amounted to the sum of	38,003,691 28
The sum necessary to meet the engagements, in relation to the public debt, was about	11,560,586 39
	49,563,277 67

The gross charge on the treasury, for the year 1814, was, \$57,694,590 70

2. *The ways and means of the treasury, for 1814.*

The gross charge upon the treasury, for the year 1814, amounting to \$57,694,590 70, included, as above stated, the balance of the appropriations of 1813, remaining unsatisfied at the close of that year. It is, therefore, proper to place to the credit of the treasury, the outstanding revenue and resources, at the commencement of the year 1814; and these consisted of the following items:

Of cash in the treasury on the 1st of January, 1814,	5,196,482
Of revenue received at the treasury in the 1st quarter of 1814,	4,286,062 28
Of revenue received in the 2d quarter,	2,822,108 05
Of revenue received in the 3d quarter,	2,313,183 20
Of revenue received in the 4th quarter, by estimate,	1,920,000 00
	11,311,353 53
Of the proceeds of loans contracted for in 1813, and paid in 1814,	3,592,665 00
Of the proceeds of treasury notes issued under the act of 1813, and received in 1814,	1,070,000 00
	4,662,666 00
Of the amount of the loan authorized by the act of the 24th of March, 1814,	25,000,000 00
Of the amount of the loan authorized by the act of the 15th of November, 1814,	3,000,000 00
	28,000,000 00
Of the amount of treasury notes authorized to be issued by the act of the 4th of March, 1814,	5,000,000 00
Of the amount of treasury notes, authorized to be issued by the act of December 26, 1814,	3,000,000 00
	8,000,000 00
	\$57,170,500 53

From this statement, therefore, it appears,

That the charges on the treasury for 1814, amounted to	57,694,590 70
That the ways and means of the treasury, for 1814, amounted to	57,170,500 53
	\$524,090 17

And this excess of charges on the treasury, amounting to \$524,090 17, beyond the ways and means actually appropriated, will be payable out of the revenue uncollected on the 31st of December, 1814.

But, independent of the general view thus taken of the existing charges on the treasury, and of the ways and means designated, by law, for the service of 1814, it is necessary to present a statement of the actual receipts and disbursements for that year.

The *actual receipts* at the treasury, during the year 1814, amounted to the sum of \$40,007,661 53, and consisted of the following items:

The cash in the treasury on the 1st of January, 1814, amounted, as above stated, to	\$5,196,482 00
The revenue received at the treasury, during the year 1814, amounted, as above stated, to	11,311,353 53
The cash received at the treasury, in the year 1814, on account of the loans and issues of treasury notes, authorized in 1813, amounted, as above stated, to	4,662,665 00
The cash received at the treasury, on account of the loans authorized in 1814, amounted, in the second quarter, to	6,087,011 00
In the third quarter, to	2,815,060 00
In the fourth quarter, by estimate,	2,707,810 00
	11,609,881 00

The cash received at the treasury, on account of the issues of treasury notes, authorized in 1814, amounted in the second quarter, to	1,392,100 00
In the third quarter, to	1,603,900 00
In the fourth quarter, to	4,231,280 00
	7,227,280 00
	40,007,661 53

The actual disbursements at the treasury, during 1814, (taking a part of the fourth quarter by estimate) amounted to the sum of \$38,273,619 28, and consisted of the following payments:

For the civil department,	933,327 97
For miscellaneous services,	1,207,492 30
For the diplomatic department,	206,306 52
For the military department,	20,510,238 00
For the naval department,	7,312,899 90
For the public debt,	9,103,354 59
	38,273,619 28

The estimated balance of cash in the treasury, on the 31st of December, 1814, being . . . \$1,734,042 25

To these views, however, 1st, of the general charges on the treasury, and of the ways and means designated by law, for the service of 1814; and 2d, of the actual receipts and disbursements at the treasury, during that year, it is proper to add a statement of the result, showing the condition of the treasury at the end of 1814, in relation to the unsatisfied demands, and to the unexpended ways and means.

The *unsatisfied demands* on the treasury, at the close of 1814, amounted to \$19,420,971 42, and consisted of the balances of appropriations for the following objects:

For the civil department,	519,967 11
For miscellaneous services,	1,285,682 36
For the diplomatic department,	230,940 10
For the military department,	9,458,898 33
For the naval department,	4,468,251 72
For the public debt,	3,457,231 80
	19,420,971 42

The *unexpended amount of the ways and means* provided for 1814, was \$23,396,881 25, and consisted of the following items:

Cash in the treasury on the 1st of January, 1814, estimated at	1,734,042 25
Revenue uncollected and outstanding, estimated at	4,500,000 00
Authority to borrow money and to issue treasury notes, not executed, or not yet productive, under acts of the 4th and 24th of March, 1814,	8,162,839 00
Stock sent to Europe,	3,000,000 00
Under act of November 15, 1814,	3,000,000 00
Under act of December 26, 1814,	3,000,000 00
	9,000,000 00
	23,396,881 25

The surplus of ways and means, in reference to the service of 1814, including revenue, and the unexecuted authority to borrow, and to issue treasury notes, is, therefore, . . . \$3,975,909 83

The conclusion from this statement of the situation of the treasury, at the close of 1814, under the different views which have been presented, would seem to establish, that the ways and means provided for the service of that year were considerably more than the demands on the treasury would require. But it must always be recollected that the demands are positive and urgent, while a great portion of the ways and means rests upon a precarious foundation. Thus: the unsatisfied demands on the treasury, for the service of 1814, positive and urgent in their nature, amount to

The cash in the treasury, and the outstanding revenue, only amount to	19,420,971 42
	6,234,042 25
	\$13,186,929 17

And, consequently, the payment of the difference, amounting to \$13,186,929 17, for the service of 1814, must depend on the success of raising money by loan, or by issues of treasury notes, under the unexecuted authority constituting the remaining ways and means designated for the same year.

II. STATEMENT OF THE SITUATION OF THE TREASURY FOR THE YEAR 1815.

1. *The charges upon the treasury, for the year 1815, as already ascertained.*

The estimates for the annual appropriations amount to \$40,538,889 39, consisting of the following items:

For civil, diplomatic and miscellaneous expenses,	1,979,289 39
For the military department,	30,342,238 00
For the naval department,	8,217,362 00
	40,538,889 39

The public debt will call for a sum of \$15,493,145 30, to answer the following claims:

For interest and reimbursement of stocks existing before the war,	3,452,775 46
For interest on the funded debt, created since the war,	2,922,816 72
For the interest on loans to be effected in 1815, by estimate,	1,500,000 00
For the principal and interest of treasury notes falling due in 1815, and on the 1st of January, 1816,	7,617,553 12
	15,493,145 30
	\$56,032,034 69

From this view, it appears that ways and means must now be provided for an expenditure of \$56,032,034 69, in the year 1815, independent of such additions as may arise from the contemplated establishment of a sinking fund, in relation to the public debt created since the war, and from any other new object of expense, which shall be authorized during the present year.

2. *The Ways and Means of the Treasury, for 1815.*

The outstanding and uncollected revenue, at the commencement of 1815, has been considered as applicable to the payment of the unsatisfied balances of the appropriations for the preceding year; and, consequently, only such parts of the revenue, as shall accrue, and be actually received at the treasury, during 1815, can be embraced in the resources for the current service. But it also follows, from that view of the subject, that the treasury is entitled to be credited in 1815, for the excess, in the provision of ways and means, to meet the expenditure of 1814.

Tobacco and snuff,	-	-	-	-	-	-	-	-	-	200,000

[Vide No. 447.]

DIRECT TAX ON THE DISTRICT OF COLUMBIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 23, 1815.

Mr. EPES, from the Committee of Ways and Means, to whom was referred a resolution of the House of Representatives, instructing them to inquire into the constitutionality and expediency of imposing a direct tax on the District of Columbia and the several Territories of the United States, made the following report:

That the 16th clause of the 8th section of the constitution, declares that Congress shall have power "to exercise exclusive legislation, in all cases whatsoever, over such district of country, not exceeding ten miles square, as may, by cession of particular States, and the acceptance of Congress, become the Seat of the Government of the United States." No doubt can be entertained, but that this general grant of legislative powers, must include the right of imposing taxes, which is among the most common and ordinary objects of legislation. Nor is it believed that the exercise of this power, so far as it respects the District of Columbia, is either prohibited or limited by any clause of the constitution. The 3d clause of the 2d section of the constitution, which declares "that representatives and direct taxes shall be apportioned among the several States, which may be included within this Union, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons, is considered as applying exclusively to the States, and was evidently designed, so far as respects the imposition of taxes as a substitute for the rule of apportionment fixed by the 8th article of the old confederation, under which each State contributed for the common defence and general welfare, according to the value of its lands, buildings, and improvements, instead of the amount of its population. The right to tax the other territories of the United States, appears equally clear. The 4th article of compact between the United States and the territories, declares "the said territory and the States which may be formed therein, shall forever remain a part of this confederacy of the United States of America, subject to the articles of confederation, and to such alterations therein as may be constitutionally made, and to all the acts and ordinances of the United States in Congress assembled, conformable thereto. The inhabitants and settlers in the said territory, shall be subject to pay a part of the federal debt, contracted or to be contracted, a proportional part of the expenses of Government, to be apportioned on them by Congress according to the same common rule and measure by which apportionments thereof shall be made on the other States."

On the other point referred to the committee, viz: the policy of imposing a direct tax, they have bestowed all the attention which its importance merits, from involving the principles of representation and taxation. It cannot be denied, that the imposition of taxes, by persons who owe complete responsibility to the People, is one of the best securities against the abuse of power. By the constitution of the United States, this principle of representative responsibility was violated, so far as respects the District of Columbia, and the rights and interests of the people transferred to persons over whose election the inhabitants have no control. The only question is, whether their being placed in a peculiar situation by the constitution, ought to operate as a permanent exemption from taxes.

It is not believed that the right to tax, exercised by persons who owe no responsibility to those on whom their laws must operate, is in principle more exceptionable, than the exercise of powers which affect the personal rights, and even the life of the citizen. On these important questions; however, the Congress of the United States must legislate. No other power can, within the District of Columbia, prescribe the regulations necessary to protect the innocent and punish the guilty. In a free country, every portion of the community ought to contribute to the common defence and general welfare; nor is it believed that the framers of the constitution intended to violate this principle, by exempting from taxes a district of country whose natural advantages are surpassed by no portion of the United States, and which derives peculiar benefits from the disbursement annually of large sums drawn from other portions of the Union.

The situation of the other territories is materially different: at a distance from market, with a large portion of unimproved and unproductive land, they are still struggling with all the inconveniences attendant on infant settlements, surrounded by powerful tribes of hostile savages. While, therefore, no doubt can be entertained as to the constitutional right to impose a direct tax on territories, the committee deem it at present inexpedient, and submit a bill for imposing a direct tax on the District of Columbia.

No. 440.

[3d SESSION.]

UNEQUAL OPERATION OF THE ACT IMPOSING A DIRECT TAX.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 23, 1815.

Mr. EPPES, from the Committee of Ways and Means, to whom was referred the petition of sundry inhabitants of the counties of Hickman and Dickson, in the State of Tennessee, made the following report:

That the petitioners pray to be relieved from the unequal operation of the act imposing a direct tax. The section of that act, authorized the several State legislatures to vary the sums imposed on the respective counties. The legislature of the State of Tennessee passed an act, requiring the assessors of the United States, after the valuations were completed, to equalize and apportion the tax on the several counties. The Congress of the United States passed a law declaring its assent to the act of the State of Tennessee, with a proviso, declaring, "that in case the assessors should, from any circumstance, fail to make the equalization and apportionment required by the act of the State of Tennessee, that then, and in that case, the tax should be levied and collected in the form prescribed by the law of the United States, imposing a direct tax." It appears that some of the assessors performed the duties required by the act of the State of Tennessee; the assessor from the county of Murry, refused to discharge the duties required by the act; in consequence of which the counties of Hickman and Dickson were deprived of the advantages derived from the equalization and apportionment, and the tax was levied and collected in conformity with the provisions of the law of the United States, declaring the assent of Congress to the act of the State of Tennessee. The petitioners state, that the refusal of the assessor to act, has subjected the county of Hickman to a tax of fifty-four cents in the hundred dollars, and the county of Dickson to a tax of forty cents, while the county of Murry, the place of residence of the assessor, is subjected to a tax of only nineteen cents in the hundred dollars. The petitioners pray, either that the equalization may be now made, or that the counties of Hickman and Dickson may be allowed a credit for the sum with which, from the conduct of the assessor, they were made chargeable. It cannot be doubted but that the conduct of the assessor produced, as stated by the petitioners, inequality in the operation of the tax on the counties of Hickman and Dickson. As, however, the State of Tennessee alone had the benefit of a partial equalization by the assessors, all the counties in all the States might, with equal justice, claim an examination of the principles on which their respective portions of the State quota have been fixed. By the direct tax bill recently passed, provision is made for an equalization of the tax; this will afford ample relief for the counties of Hickman and Dickson, against the future operation of the inequality complained of. The tax having been paid in many of the States, and the collection having progressed in all, the committee consider, that it would be inexpedient to recommend any measure which might bring into question the principles on which the tax was originally imposed. The following resolution is, therefore, submitted:

Resolved, That the prayer of the petitioners ought not to be granted.

[3d SESSION.]

DUTY ON STILLLS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 23, 1815.

— Mr. EPPES, made the following report:

The Committee of Ways and Means, to whom was referred the petition of sundry proprietors of copper stills in the State of Connecticut, submit, as a part of their report, a letter from the Commissioner of the Revenue. On a view of the facts contained in the letter, the committee unite in opinion with the Commissioner of the Revenue, that the duty recently imposed on the gallon of spirits distilled will tend, in some degree, to remedy the inequality complained of, and that it is inexpedient, at present, to vary the proportion between the duty on stills and boilers.

TREASURY DEPARTMENT, REVENUE OFFICE, *November 25, 1814.*

SIR:

I have the honor to acknowledge the receipt of your favor of the 23d instant, enclosing a petition from sundry inhabitants of the State of Connecticut, representing the unequal operation of the existing duty on stills and boilers.

The information in my possession does not enable me to form a decided opinion whether the present duty on stills is greater than it should be, compared with that on boilers. Several letters have been received, all of which state the advantages which the distiller will derive from recent improvements in the construction of boilers, and generally

recommending an increased duty on them; but it does not satisfactorily appear that these advantages are peculiar to boilers, and that equal advantages do not attach to some stills over others, owing to late improvements in their construction. Such is undoubtedly the variety in the forms and modes of operation of the several descriptions of vessels used in the United States for the purposes of distillation, in their productive powers, and in the expense with which they are worked, that the existing duty is relatively light on some, compared with other stills, and on some, compared with other boilers, as well as on some boilers compared with some stills. This effect, it will be perceived, is altogether independent of the duty, and is incident to the superior improvements of the one kind of vessel over the other. The boilers, it is to be added, being of recent introduction, possess, so far as applicable to them, all the improvements made in stills.

From an inspection of the whole number of licenses ascertained to have been granted in all the collection districts during the two first quarters of the present year, and in seventy districts for the third quarter, it appears that there have been granted 18,846 licenses for stills, and 542 for boilers; of which number there have been granted in the State of Connecticut, 425 for stills, and 26 for boilers.

It is certainly desirable that a just equality should characterise the duty on stills and boilers. A just equality cannot, however, require the imposition of such a duty as would tend in any way to disturb the relative benefits attendant on different descriptions of vessels which would be used independent of the existence of the duty, much less to deprive ingenuity of the stimulus to improvement which it reasonably finds in the profit that flows from such improvement.

Upon the whole, as the contemplated duty on the gallon of spirits distilled within the United States will, in some degree, overcome any inequality in the present duty, and as more experience of the operation of the present duty is required to ascertain the nature and extent of any existing inequalities, I am of the opinion that it would be inexpedient at this time to vary the proportion between the duty on stills and boilers.

I am, with great respect, your obedient servant,

S. H. SMITH, *Commissioner of the Revenue.*

Hon. JOHN W. EPPES, *Chairman of the Committee of Ways and Means.*

[3d SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, JANUARY 30, 1815.

To the Senate of the United States:

Having bestowed on the bill, entitled "An act to incorporate the subscribers to the Bank of the United States of America," that full consideration which is due to the great importance of the subject, and dictated by the respect which I feel for the two Houses of Congress, I am constrained by a deep and solemn conviction that the bill ought not to become a law, to return it to the Senate, in which it originated, with my objections to the same.

Waiving the question of the constitutional authority of the legislature to establish an incorporated bank, as being precluded, in my judgment, by repeated recognitions, under varied circumstances, of the validity of such an institution, in acts of the legislative, executive, and judicial branches of the Government, accompanied by indications, in different modes, of a concurrence of the general will of the nation, the proposed bank does not appear to be calculated to answer the purposes of reviving the public credit, of providing a national medium of circulation, and of aiding the treasury, by facilitating the indispensable anticipations of the revenue, and by affording to the public more durable loans.

1. The capital of the bank is to be compounded of specie, of public stock, and of treasury notes convertible into stock, with a certain proportion of each, of which every subscriber is to furnish himself.

The amount of the stock to be subscribed, will not, it is believed, be sufficient to produce, in favor of the public credit, any considerable or lasting elevation of the market price, whilst this may be occasionally depressed by the bank itself, if it should carry into the market the allowed proportion of its capital, consisting of public stock, in order to procure specie, which it may find its account in procuring, with some sacrifice on that part of its capital.

Nor will any adequate advantage arise to the public credit from the subscription of treasury notes. The actual issue of these notes nearly equals, at present, and will soon exceed, the amount to be subscribed to the bank. The direct effect of this operation is simply to convert fifteen millions of treasury notes into fifteen millions of six per cent. stock, with the collateral effect of promoting an additional demand for treasury notes beyond what might otherwise be negotiable.

Public credit might, indeed, be expected to derive advantage from the establishment of a national bank, without regard to the formation of its capital, if the full aid and co-operation of the institution were secured to the Government during the war, and during the period of its fiscal embarrassments. But, the bank proposed will be free from all legal obligation to co-operate with the public measures; and, whatever might be the patriotic disposition of its directors, to contribute to the removal of those embarrassments, and to invigorate the prosecution of the war, fidelity to the pecuniary general interest of the institution, according to their estimate of it, might oblige them to decline a connexion of their operations with those of the national treasury, during the continuance of the war, and the difficulties incident to it. Temporary sacrifices of interest, though overbalanced by the future and permanent profits of the charter, not being requirable of right in behalf of the public, might not be gratuitously made; and the bank would reap the full benefit of the grant whilst the public would lose the equivalent expected from it. For it must be kept in view, that the sole inducement to such a grant, on the part of the public, would be the prospect of substantial aids to its pecuniary means, at the present crisis, and during the sequel of the war. It is evident that the stock of the bank will, on the return of peace, if not sooner, rise in the market to a value, which, if the bank were established in a period of peace, would authorize, and obtain for the public, a bonus to a very large amount. In lieu of such a bonus, the Government is fairly entitled to, and ought not to relinquish or risk, the needful services of the bank, under the pressing circumstances of war.

2. The bank, as proposed to be constituted, cannot be relied on, during the war, to provide a circulating medium, nor to furnish loans, or anticipations of the public revenue.

Without a medium, the taxes cannot be collected, and, in the absence of specie, the medium understood to be the best substitute, is that of notes issued by a national bank. The proposed bank will commence and conduct its operations, under an obligation to pay its notes in specie, or be subject to the loss of its charter. Without such an obligation, the notes of the bank, though not exchangeable for specie, yet resting on good pledges, and performing the uses of specie, in the payment of taxes, and in other public transactions, would, as experience has ascertained, qualify the bank to supply at once a circulating medium, and pecuniary aids to the Government. Under the fetters imposed by the bill, it is manifest, that, during the actual state of things, and probably during the war, the period particularly requiring such a medium, and such a resource for loans and advances to the Government, notes, for which the bank

would be compellable to give specie in exchange, could not be kept in circulation. The most the bank could effect, and the most it could be expected to aim at, would be to keep the institution alive, by limited and local transactions, which, with the interest on the public stock in the bank, might yield a dividend sufficient for the purpose, until a change from war to peace should enable it, by a flow of specie into its vaults, and a removal of the external demand for it, to derive its contemplated emoluments from a safe and full extension of its operations.

On the whole, when it is considered that the proposed establishment, will enjoy a monopoly of the profits of a national bank, for a period of twenty years; that the monopolized profits will be continually growing, with the progress of the national population and wealth; that the nation will, during the same period, be dependent on the notes of the bank for that species of circulating medium, whenever the precious metals may be wanted, and at all times for so much thereof as may be an eligible substitute for a specie medium; and that the extensive employment of the notes in collection of the augmented taxes will, moreover, enable the bank greatly to extend its profitable issues of them, without the expense of specie capital to support their circulation; it is as reasonable, as it is requisite, that the Government, in return for these extraordinary concessions to the bank, should have a greater security for attaining the public objects of the institution, than is presented in the bill, and particularly for every practicable accommodation, both in the temporary advances necessary to anticipate taxes, and in those more durable loans which are equally necessary to diminish the resort to taxes.

In discharging this painful duty of stating objections to a measure, which has undergone the deliberations, and received the sanction of the two Houses of the national Legislature, I console myself with the reflection, that, if they have not the weight which I attach to them, they can be constitutionally overruled; and, with a confidence that, in a contrary event, the wisdom of Congress will hasten to substitute a more commensurate and certain provision for the public exigencies.

JAMES MADISON.

WASHINGTON, January 30, 1815.

AN ACT TO INCORPORATE THE SUBSCRIBERS TO THE BANK OF THE UNITED STATES OF AMERICA.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a Bank of the United States of America shall be established, the capital stock of which shall be thirty millions of dollars, divided into three hundred thousand shares, of one hundred dollars each share; and that subscriptions for thirty millions of dollars, towards constituting the said capital stock, shall be opened, on the last Monday of February next, at the following places, viz: at Portland, in Maine, Portsmouth, in New Hampshire, Windsor, in Vermont, Boston, Providence, New Haven, New York, New Brunswick, in New Jersey, Philadelphia, Baltimore, the city of Washington, Richmond, Raleigh, Charleston, Savannah, Lexington, in Kentucky, Nashville, in Tennessee, Chillicothe, in Ohio, and New Orleans, under the superintendence of the following persons, as commissioners to receive the same: at Portland, Matthew Cob, Isaac Isley, Joshua Wingate, junior; at Portsmouth, John Goddard, Nathaniel A. Haven, Henry S. Langdon; at Windsor, Elias Lyman, William Levetret, Eleazer May; at Boston, Israel Thorndike, Thomas H. Perkins, William Gray, Aaron Hill, Samuel Brown; at Providence, Seth Wheaton, Ebenezer K. Dexter, Henry Smith; at New Haven, Abraham Bishop, William W. Woolsey, Henry Jones; at New York, Robert Troup, William Paulding, junior, Robert Lenox, John Jacob Astor, Samuel Tinker, Isaac Bronson, Henry A. Coster; at New Brunswick, James Vanderpool, John Bray, Peter Gordon; at Philadelphia, Jared Ingersoll, Thomas M. Willing, Stephen Girard, Chandler Price, Anthony Taylor, John Sergeant, Cadwallader Evans; at Baltimore, James A. Buchanan, Henry Payson, William Wilson; at the city of Washington, John Mason, Robert Brent, John P. Van Ness; at Richmond, Benjamin Hatcher, John Brockborough, John Preston; at Raleigh, Sherwood Haywood, Beverly Daniel, William Peace; at Charleston, John C. Faber, Thomas Jones, Stephen Elliot, Charles B. Cochran, Thomas Blackwood; at Savannah, John Bolton, Charles Harris, James Johnson; at Lexington, in Kentucky, Charles Wilkins, Lewis Sanders, John H. Morton; at Nashville, Robert Weakly, Felix Grundy, John R. Bedford; at Chillicothe, Samuel Finley, Thomas James, William M'Farland; at New Orleans, Dominick A. Hall, Benjamin Morgan, Paul Lanuse, Thomas L. Harman, and William Flood: which subscriptions shall continue open every day, from the time of opening the same, from ten o'clock in the forenoon, until four o'clock in the afternoon, until the Saturday following, at four o'clock in the afternoon, when the same shall be closed; and immediately thereafter, the commissioners, or any two of them, at the respective places aforesaid, shall cause two transcripts or fair copies of such subscriptions to be made, one of which they shall send to the Secretary of the Treasury, one they shall retain, and the original shall, within three days from the closing of the same, be by the said commissioners transmitted to the said commissioners at Philadelphia, or to one of them; and on the receipt thereof, the said commissioners at Philadelphia, or any three of them, shall immediately thereafter convene and proceed to take an account of the said subscriptions; and if more than the amount of thirty millions of dollars shall have been subscribed, then the said last mentioned commissioners shall apportion the same among the several subscribers, according to their several and respective subscriptions: *Provided, however,* That such commissioners shall, by such apportionment, allow and apportion to each subscriber at least one share; and, in case the aggregate amount of the said subscriptions shall exceed thirty millions of dollars, the said commissioners, after having apportioned the same as aforesaid, shall cause lists of the said apportioned subscriptions to be made out, including in each list the apportioned subscription for the place where the original subscription was made, one of which lists shall be transmitted to the commissioners, or to one of the commissioners, under whose superintendence such subscriptions were originally made, that the subscribers may ascertain from them the number of shares apportioned to such subscribers, respectively; and, if the amount of thirty millions of dollars shall not be subscribed during the period aforesaid, at all the places aforesaid, the subscription to complete the said sum shall afterwards be and remain open at Philadelphia, under the superintendence of the said commissioners appointed at that place and the subscription may be then made by any corporation, copartnership, or person, for any number of shares not exceeding the amount required to complete the said sum of thirty millions of dollars. And, in case of the death, or refusal to serve, of any of the commissioners aforesaid, it shall be lawful for the President of the United States to supply the vacancy or vacancies thus created, by appointing some suitable person or persons.

SEC. 2. And be it further enacted, That it shall be lawful for any person, copartnership, or body politic, to subscribe for so many shares of the said capital stock of the said bank, as he, she, or they, shall think fit, not exceeding three thousand shares, except as is hereinafter provided for the subscription on behalf of the United States, and the sums respectively subscribed, except on behalf of the United States, as is hereinafter provided, shall be payable in the manner following; that is to say: five millions of dollars thereof in gold or silver coin of the United States, or of foreign coin at the value heretofore established by the act of Congress, entitled "An act regulating the currency of foreign coins," passed the tenth day of April, one thousand eight hundred and six; ten millions of dollars thereof in gold or silver coin, as aforesaid, or in the public debt of the United States, contracted by virtue of the act of Congress, entitled "An act authorizing the loan for a sum not exceeding eleven millions of dollars," passed the fourteenth day of March, one thousand eight hundred and twelve, or contracted, or to be contracted, by virtue of any subsequent act and acts of Congress heretofore passed, authorizing a loan or loans; and fifteen millions of dollars thereof in gold or silver coin, or in treasury notes, issued under the act of Congress, entitled "An act to authorize the issuing of treasury notes," passed the thirtieth day of June, one thousand eight hundred and twelve, or issued, or to be issued, under the authority of any subsequent act or acts of congress, authorizing, or which shall authorize, treasury notes to be issued, previously to the final closing of the subscriptions to the said bank. And the said payment shall be made and completed in the sums and at the times hereinafter declared, that is to say: at the time of subscribing there shall be paid six dollars and sixty-six cents and two-thirds of a cent on each share, in gold or silver coin; twenty dollars in the treasury notes aforesaid; and thirteen dollars thirty-three cents and one-third of a cent in the public debt of the United States, contracted, or to be contracted, as aforesaid; and the expiration of four calendar months after the time of subscribing there shall be paid the further sum of three dollars thirty-three

cents and one-third of a cent on each share, in gold or silver coin; ten dollars in the treasury notes aforesaid; and six dollars sixty-six cents and two-thirds of a cent in the public debt of the United States, contracted or to be contracted as aforesaid: at the expiration of six calendar months from the time of subscribing, there shall be paid the further sum of three dollars thirty-three cents and one-third of a cent on each share, in gold or silver coin; ten dollars in the treasury notes aforesaid; and six dollars sixty-six cents and two-thirds of a cent in the public debt of the United States, contracted, or to be contracted, as aforesaid: at the expiration of eight calendar months from the time of subscribing, there shall be paid the further sum of three dollars thirty-three cents and one-third of a cent, in gold or silver coin; ten dollars in the treasury notes aforesaid; and six dollars sixty-six cents and two-thirds of a cent in the public debt of the United States, contracted, or to be contracted, as aforesaid. And the subscriptions in public stock and treasury notes, as aforesaid, shall be taken and credited for the principal and so much of the interest thereof, respectively, as shall have accrued on the day of subscribing the same. And, at the time of subscribing to the capital stock of the said bank, as aforesaid, each and every subscriber shall deliver to the commissioners at the place of subscribing, as well the specie amount of their subscriptions, respectively, as the certificates of stock for the stock proportion of their subscriptions, respectively, together with a power of attorney authorizing the said commissioners, or a majority of them, to transfer the said stock, in due form of law, to "The President, Directors, and Company, of the said Bank of the United States of America," as soon as the said bank shall be organized; and, also, treasury notes for the proportion of the subscriptions, respectively, payable in treasury notes as aforesaid: *Provided, always*, That if, in consequence of the apportionment of shares in the said bank among the subscribers, in the case and in the manner hereinbefore prescribed, any subscriber shall have delivered to the commissioners, at the time of subscribing, a greater amount of specie, stock, and treasury notes, than shall be necessary to complete the payments for the share or shares to such subscriber, apportioned as aforesaid, the commissioners shall only retain so much of the said money, stock, and treasury notes, as shall be necessary to complete such payments, and shall forthwith return, on application for the same, the surplus thereof to the subscriber lawfully entitled thereto. And the commissioners respectively shall deposit the gold and silver, certificates of stock, and treasury notes, by them respectively received, as aforesaid, from the subscribers to the said bank, in some place of secure and safe keeping, so that the same may and shall be specifically delivered and transferred, as the same were by them respectively received, to the said president, directors, and company, of the said Bank of the United States of America, or to their order, as soon as shall be required after the organization of the said bank.

SEC. 3. *And be it further enacted*, That the United States may, at any time before the expiration of this act, in pursuance of any law which may be passed by Congress for that purpose, cause to be subscribed, for the use of the United States, to said bank, fifty thousand additional shares, to be paid in public stock, bearing an interest of four per cent. per annum, redeemable in any sums, and at any periods, which the Government may deem fit.

SEC. 4. *And be it further enacted*, That whenever and as often as any of the treasury notes, subscribed as aforesaid, to the said capital stock of the said bank, shall be due and payable, it shall be lawful for the Secretary of the Treasury (and he is hereby authorized and required) to pay and redeem the same, principal and interest, by causing certificates of public stock for an equal amount, bearing an interest of six per cent. per annum, and redeemable in any sums, and at any periods, which the Government may deem fit, to be prepared and made in the usual form, and the same to be delivered to the president and directors of the said bank, in satisfaction and discharge of such treasury notes.

SEC. 5. *And be it further enacted*, That the subscribers to the said Bank of the United States of America, their successors and assigns, shall be, and are hereby created, a corporation and body politic, by the name and style of "The President, Directors, and Company, of the Bank of the United States of America," and shall so continue until the third day of March, in the year one thousand eight hundred and thirty-five; and by that name shall be, and are hereby made, able and capable in law, to have, purchase, receive, possess, enjoy, and retain, to them and their successors, lands, rents, tenements, hereditaments, goods, chattels, and effects, of whatsoever kind, nature, and quality, to an amount not exceeding in the whole thirty-five millions of dollars, including the amount of the capital stock aforesaid; and the same to sell, grant, demise, alien, or dispose of, to sue and be sued, plead, and be impleaded, answer and be answered, defend and be defended, in all courts and places whatsoever; and also to make, have, and use, a common seal, and the same to break, alter, and renew, at their pleasure; and, also, to ordain, establish, and put in execution, such by-laws and ordinances, and regulations, as they shall deem necessary and convenient, for the Government of the said corporation, not being contrary to the constitution and laws of the United States; and generally to do and execute all and singular the acts, matters, and things, which to them shall or may appertain to do; subject, nevertheless, to the rules, regulations, restrictions, limitations, and provisions, hereinafter prescribed and declared.

SEC. 6. *And be it further enacted*, That, for the management of the affairs of the said corporation, there shall be twenty-five directors, who shall be elected at the banking house in Philadelphia, on the first Monday of January, in each year, by the stockholders or proprietors of the capital stock of the said corporation, and by a plurality of votes then and there actually given, according to the scale of voting hereinafter prescribed. And the directors, so duly chosen, shall be capable of serving by virtue of such choice, until the end or expiration of the first Monday in January next ensuing the time of such election, and no longer: *Provided, always*, That the first election and appointment of directors shall be at the time, and for the period, hereinafter declared.

SEC. 7. *And be it further enacted*, That, as soon as the sum of twelve millions of dollars in gold and silver coin, and in the public debt and treasury notes, shall have been actually received on account of the subscriptions to the said capital stock, (exclusively of the subscription aforesaid on the part of the United States) notice thereof shall be given by the persons under whose superintendence the subscriptions shall have been made at Philadelphia, in at least two public newspapers, printed in each of the places where subscriptions shall have been made; and the said persons shall, at the same time, and in like manner, notify a time and place, within the said city of Philadelphia, at the distance of at least twenty days from the time of such notification, for proceeding to the election of directors as aforesaid; and it shall be lawful for such election to be then and there made. And the persons who shall be then and there chosen, as aforesaid, shall be the first directors, and shall proceed to elect one of their number president of the said corporation, and they shall be capable of serving, by virtue of such choice, until the end and expiration of the first Monday of January next ensuing the time of making the same, and shall forthwith, thereafter, commence the operations of the said bank, at the said city of Philadelphia: *Provided, always*, That in case it should at any time happen, that at an election of directors and president of the said corporation should not be made upon any day when, in pursuance of this act, they ought to be made, the said corporation shall not for that cause be deemed to be dissolved; but it shall be lawful on any other day to hold and make an election of directors and president of the said corporation, (as the case may be) in such manner as shall have been regulated by the by-laws and ordinances of the said corporation; and, until such election be so made, the directors and president, for the time being, shall continue in office: *And provided, also*, That, in case of the death, resignation, or removal, of the president of the said corporation, the directors shall proceed to elect another president: *And provided, also*, That in case of the death, resignation, or absence from the United States, or removal of a director from office, the vacancy shall be supplied by the stockholders.

SEC. 8. *And be it further enacted*, That the directors, for the time being, shall have power to appoint such officers, clerks, and servants, under them, as shall be necessary for executing the business of the said corporation, and to allow them such compensation for their services, respectively, as shall be reasonable; and shall be capable of exercising such other powers and authorities for the well governing and ordering of the affairs of the said corporation, as shall be prescribed, fixed, and determined, by the laws, regulations, and ordinances, of the same.

SEC. 9. *And be it further enacted*, That the following rules, restrictions, limitations, and provisions, shall form and be fundamental articles of the constitution of the said corporation, to wit:

1. The number of votes to which the stockholders shall be entitled, in voting for directors, shall be according to the number of shares he, she, or they, respectively, shall hold, in the proportions following, that is to say: for one share, and not more than two shares, one vote; for every two shares above two, and not exceeding ten, one vote;

for every four shares above ten, and not exceeding thirty, one vote; for every six shares above thirty, and not exceeding sixty, one vote; for every eight shares above sixty, and not exceeding one hundred, one vote; and for every ten shares above one hundred, one vote. But no person, copartnership, or body politic, shall be entitled to a greater number than thirty votes; and after the first election, no share or shares shall confer a right of voting, which shall not have been holden three calendar months previous to the day of election. And stockholders actually resident within the United States, and none other, may vote in election by proxy.

2. Not more than three-fourths of the directors in office, at the time of an annual election, shall be elected for the next succeeding year, and no person shall be a director more than three out of four years; but the director who shall be the president at the time of an election, may always be re-elected.

3. None but a resident citizen of the United States, and holding at the time of his election not less than ten shares, bona fide in his own right, shall be a director; and if any director shall cease to be a stockholder to that amount, he shall cease to be a director.

4. No director shall be entitled to any emolument. The stockholders may make such compensation to the president, for his extraordinary attendance at the bank, as shall appear to them reasonable.

5. Not less than seven directors shall constitute a board for the transaction of business, of whom the president shall always be one, except in case of sickness or necessary absence, in which case his place may be supplied by any other director whom he, by writing, under his hand, shall depute for the purpose. And the director so deputed, may do and transact all the necessary business belonging to the office of a president of the said corporation, during the continuance of the sickness or necessary absence of the president.

6. A number of stockholders, not less than sixty, who, together, shall be proprietors of one thousand shares or upwards, shall have power at any time to call a general meeting of the stockholders, for purposes relative to the institution, giving at least ten weeks' notice in two public newspapers of the place where the bank is seated, and specifying in such notice the object or objects of such a meeting.

7. Every cashier or treasurer, before he enters upon the duties of his office, shall be required to give bond, with two or more sureties, to the satisfaction of the directors, in a sum not less than fifty thousand dollars, with a condition for his good behavior, and the faithful performance of his duties to the corporation.

8. The lands, tenements, and hereditaments, which it shall be lawful for the said corporation to hold, shall be only such as shall be requisite for its immediate accommodation in relation to the convenient transacting of its business, and such as shall have been bona fide mortgaged to it by way of security, or conveyed to it in satisfaction of debts previously contracted in the course of its dealings, or purchased at sales upon judgments which shall have been obtained for such debts.

9. The total amount of debts which the said corporation shall at any time owe, whether by bond, bill, note, or other contract, over and above the debt or debts due for money deposited in the bank, shall not exceed the sum of thirty millions of dollars, unless the contracting of any greater debt shall have been previously authorized by a law of the United States. In case of excess, the directors under whose administration it shall happen, shall be liable for the same, in their natural and private capacities, and an action of debt may, in such case, be brought against them, or any of them, their or any of their heirs, executors, or administrators, in any court of record of the United States, or either of them, by any creditor or creditors of the said corporation, and may be prosecuted to judgment and execution, any condition, covenant, or agreement, to the contrary notwithstanding. But this provision shall not be construed to exempt the said corporation, or the lands, tenements, goods, or chattels, of the same, from being also liable for, and chargeable with, the said excess. Such of the said directors who may have been absent when the said excess was contracted or created, or who may have dissented from the resolution or act whereby the same was so contracted or created, may respectively exonerate themselves from being so liable, by forthwith giving notice of the fact, and of their absence or dissent, to the President of the United States, and to the stockholders, at a general meeting, which they shall have power to call for that purpose.

10. The said corporation shall not, directly or indirectly, deal or trade in any thing except bills of exchange, gold or silver bullion, or in the sale of goods really and truly pledged for money lent, and not redeemed in due time, or goods which shall be the proceeds of its lands. It shall not be at liberty to purchase any public debt whatsoever; nor shall it take more than at the rate of six per cent. per annum for or upon its loans or discounts.

11. The said corporation shall not, in any one year, sell any portion of the public debt constituting a part of its capital stock aforesaid, to an amount exceeding five millions of dollars, without the consent of Congress.

12. No loan shall be made by the said corporation, for the use, or on account, of the Government of the United States, to an amount exceeding five hundred thousand dollars; or of any particular State, to an amount exceeding fifty thousand dollars; or to any foreign Prince or State, unless previously authorized by a law of the United States.

13. The stock of the said corporation shall be assignable and transferable according to such rules as shall be instituted in that behalf, by the laws and ordinances of the same.

14. The bills obligatory and of credit, under the seal of the said corporation, which shall be made to any person or persons, shall be assignable by endorsement thereupon, under the hand or hands of such person or persons, and his, her, or their executors or administrators, and of his, her, or their assignee or assignees, and the executors or administrators of such assignee or assignees, and so as absolutely to transfer and vest the property thereof in each and every assignee or assignees successively, and to enable such assignee or assignees, and his, her, or their executors or administrators, to maintain an action thereupon in his, her, or their own name or names. And the bills or notes which may be issued by order of the said corporation, signed by the president, and countersigned by the principal cashier or treasurer thereof, promising the payment of money to any person or persons, his, her, or their order, or to bearer, although not under the seal of the said corporation, shall be binding and obligatory upon the same, in the like manner, and with the like force and effect, as upon any private person or persons, if issued by him, her, or them, in his, her, or their private or natural capacity or capacities, and shall be assignable and negotiable in like manner as if they were so issued by such private person or persons; that is to say: those which shall be payable to any person or persons, his, her, or their order, shall be assignable by endorsement, in like manner, and with the like effect, as foreign bills of exchange now are; and those which are payable to bearer, shall be assignable and negotiable by delivery only.

15. Half yearly dividends shall be made of so much of the profits of the bank as shall appear to the directors advisable; and once in every three years, the directors shall lay before the stockholders, at a general meeting, for their information, an exact and particular statement of the debts which shall have remained unpaid after the expiration of the original credit, for a period of treble the term of that credit, and of the surplus of profits, if any, after deducting losses and dividends. If there shall be a failure in the payment of any part of any sum subscribed by any person, copartnership, or body politic, the party failing shall lose the benefit of any dividend which may have accrued prior to the time for making such payment, and during the delay of the same.

16. The directors of said corporation shall be bound to establish a competent office of discount and deposite in the District of Columbia, whenever any law of the United States shall require such establishment; and it shall be lawful for the said directors to establish offices wheresoever they shall think fit, within the United States or the territories thereof, for the purposes of discount, deposite, and distribution; or for the purposes of deposite and distribution only; and upon the same terms, and in the same manner, as shall be practised at the bank; and to commit the management of the said offices, and the business thereof respectively, to such persons, and under such regulations, as they shall deem proper, not being contrary to law or to the constitution of the bank. Or, instead of establishing such offices, it shall be lawful for the directors of the said corporation, from time to time, to employ any other bank or banks, at any place or places that they may deem safe and proper, to manage and transact the business proposed as aforesaid to be managed and transacted by such offices, under such agreements, and subject to such regulations, as they shall deem just and proper. But the managers or directors of every office of discount, deposite, and distribution, established as aforesaid, shall be annually appointed by the directors of the bank, to serve one year; each of them shall be a citizen of the United States, and shall hold, at the time of his appointment, not less than five shares in the said bank, bona fide in his own right; and if he shall cease to be a stockholder to that amount, he shall cease to be a manager or director of such office of discount, deposite, and distribution; and not more than three-fourths

of the said managers or directors in office at the time of an annual appointment, shall be re-appointed for the next succeeding year; nor shall any person be a manager or director for more than three out of four years; but the president may be always re-appointed.

17. The said corporation, all offices of discount, deposite, and distribution, and of deposite and distribution only, which shall be established by the said directors as aforesaid, and all banks by the said directors employed in lieu of such officers as aforesaid, shall be bound to receive, upon deposite, the treasury notes of the United States which have been, or may be hereafter, issued by virtue of any law or laws of the United States; but it shall be optional with the said corporation to pay and discharge the checks or drafts of the persons making such deposite, in treasury notes, for the amount thereof, either in gold or silver coin, or in the notes of the bank, or in treasury notes. And all banks by the said directors employed as aforesaid, in lieu of the offices aforesaid, shall be further bound to receive on deposite, and to circulate, the notes of the said corporation, on the same terms, and in the same manner, as the notes of the said banks respectively are received and circulated; and, from time to time, issue and exchange for the said notes of the said corporation, other notes of the said corporation, or the notes of the said banks respectively, or treasury notes, at the option of the persons applying for such issue or exchange. The said corporation shall, at all times, distribute among the offices of discount, deposite, and distribution, and of deposite and distribution only, and at all the banks employed in lieu of such offices as aforesaid, a sufficient sum, in the various denominations of the notes of the said corporation, and in the treasury notes which it may receive upon deposite from the Government, to answer the demand therefor, and to establish a sufficient circulating medium throughout the United States and the territories thereof.

18. The officer at the head of the Treasury Department of the United States shall be furnished, from time to time, as often as he may require, not exceeding once a week, with statements of the amount of capital stock of the said corporation, and of the debts due to the same; of the moneys deposited therein; of the notes in circulation; and of the cash in hand; and shall have a right to inspect such general accounts in the books of the bank as shall relate to the said statement: *Provided*, That this shall not be construed to imply a right of inspecting the account of any private individual or individuals with the bank.

SEC. 10. *And be it further enacted*, That if the said corporation, or any person or persons for or to the use of the same, shall deal or trade in buying or selling any goods, wares, merchandise, or commodities whatsoever, contrary to the provisions of this act, all and every person and persons by whom any order or direction for so dealing or trading shall have been given, and all and every person and persons who shall have been concerned as parties or agents therein, shall forfeit and lose treble the value of the goods, wares, merchandises, and commodities, in which such dealing and trade shall have been; one half thereof to the use of the informer, and the other half thereof to the use of the United States, to be recovered in any action of law, with costs of suit.

SEC. 11. *And be it further enacted*, That if the said corporation shall advance or lend any sum of money, for the use or on account of the Government of the United States, to an amount exceeding three hundred thousand dollars; or of any particular State, to an amount exceeding fifty thousand dollars; or of any foreign Prince or State, (unless previously authorized thereto by a law of the United States) all and every person and persons, by and with whose order, agreement, consent, approbation, and connivance, such unlawful advance or loan shall have been made, upon conviction thereof, shall forfeit and pay, for every such offence, treble the value or amount of the sum or sums which shall have been so unlawfully advanced or lent; one-fifth thereof to the use of the informer, and the residue thereof to the use of the United States.

SEC. 12. *And be it further enacted*, That the bills or notes of the said corporation, originally made payable, or which shall have become payable, on demand, shall be receivable in all payments to the United States, until otherwise directed by act of Congress.

SEC. 13. *And be it further enacted*, That if the subscriptions and payments to the said bank shall not be made and completed, so as to enable the same to commence its operations, or if the said bank shall not commence its operations on or before the first day of March, one thousand eight hundred and sixteen, then, and in that case, this act shall be null and void.

SEC. 14. *And be it further enacted*, That it shall at all times be lawful for a committee of either House of Congress, appointed for that purpose, to inspect the books, and to examine into the proceedings, of the corporation hereby created, and to report whether the provisions of this charter have been by the same violated or not; and whenever any committee as aforesaid, shall find and report, or the President of the United States shall have reason to believe, that the charter has been violated, it may be lawful for Congress to direct, or the President to order, a scire facias to be sued out of the circuit court of the district of Pennsylvania, in the name of the United States, (which shall be executed upon the president of the corporation, for the time being, at least fifteen days before the commencement of the term of said court,) calling on the said corporation to show cause wherefore the charter hereby granted shall not be declared forfeited; and it shall be lawful for the said court, upon the return of the said scire facias, to examine into the truth of the alleged violation; and if such violation be made appear, then to pronounce and adjudge, that the said charter is forfeited and annulled: *Provided, however*, Every issue of fact which may be joined between the United States and the corporation aforesaid, shall be tried by jury. And it shall be lawful for the court aforesaid, to require the production of such of the books of the corporation as it may deem necessary for the ascertainment of the controverted facts; and the final judgment of the court aforesaid, shall be examinable in the supreme court of the United States, by writ of error, and may be there reversed or affirmed, according to the usages of law.

SEC. 15. *And be it further enacted*, That, during the continuance of this act, and whenever required by the Secretary of the Treasury, the said corporation shall do and perform the several and respective duties of the Commissioners of Loans, for the several States, or of any one or more of them, at the times, in the manner, and upon the terms, to be prescribed by the Secretary of the Treasury.

SEC. 16. *And be it further enacted*, That no other bank shall be established by any future law of the United States, during the continuance of the corporation hereby created; for which the faith of the United States is hereby pledged: *Provided*, Congress may renew existing charters for banks in the District of Columbia, not increasing the capital thereof; and may grant charters, if they deem it expedient, to any banking associations now in operation, in the said District, and renew the same, not increasing the capital thereof. And notwithstanding the expiration of the term for which the corporation is created, it shall be lawful to use the corporate name, style, and capacity, for the purpose of suits, for the final settlement and liquidation of the affairs and accounts of the corporation, and for the sale and disposition of their estate, real, personal, and mixed, but not for any other purpose, or in any other manner whatsoever: nor for a period exceeding two years, after the expiration of the said term of incorporation.

LANGDON CHEVES, *Speaker of the House of Representatives.*
JOHN GAILLARD, *President of the Senate, pro tempore.*

13th CONGRESS.]

No. 443.

[3d Session.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 3, 1815.

SIR:

TREASURY DEPARTMENT, February 2, 1815.

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1811, 1812, and 1813.

I have the honor to be, very respectfully, sir, your obedient servant,

A. J. DALLAS.

The Hon. the SPEAKER of the House of Representatives.

Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, during the years 1811, 1812, and 1813, compared with the amount of Duties collected on the same, respectively.

TREASURY DEPARTMENT, Register's Office, February 1, 1815.

JOSEPH NOURSE, Register.

13th CONGRESS.]

No. 444.

[3d SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 6, 1815.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their last report, of the 5th of February, 1814, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the sixth day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

JOHN GAILLARD, *President of the Senate, pro tempore.*JAS. MONROE, *Acting Secretary of State.*A. J. DALLAS, *Secretary of the Treasury.*

WASHINGTON, February 6th, 1815.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That the balance of moneys advanced on account of the public debt, remaining unexpended at the end of the year 1812, and applicable to payments falling due after that year, which balance, as appears by the statement B, annexed to the last annual report, amounted to — — — \$335,826 04

Together with sums disbursed from the treasury during the year 1813, on account of the principal and interest of the public debt, which sums, as appears by the statement C, annexed to the last annual report, amounted to — — — 11,110,117 43

Together with a further sum arising from profit in exchange on remittances from America to Europe, during the year 1813, amounting, as appears by the statement D, annexed to the last annual report, to — — — \$98,452 06

From which is to be deducted, as explained in the note to the statement B, annexed to this report, the sum of — — — 6,202 20

And with a further sum, being the difference between the principal of stock purchased during the year 1813, and the money paid for the same, of — — — 92,249 86

— — — 1,902 34

And amounting, together, to — — — \$11,540,095 67

Have been accounted for in the following manner, viz:

I. There was repaid into the treasury, during the year 1813, on account of the principal of moneys heretofore advanced for the payment of the public debt, as appears by the statement E, annexed to the last annual report, the sum of	\$2,002 43
II. The sums actually applied during the year 1813, to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the annexed statement A, to ten millions seven hundred and seventy-six thousand eight hundred and eighty-seven dollars forty-nine cents, viz:	
1. In reimbursement of the principal of the public debt,	\$7,177,432 27
2. On account of the interest and charges on the same,	3,599,455 22
	<u>10,776,887 49</u>
III. The balance remaining unexpended, at the close of the year 1813, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the annexed statement B, to	761,205 75
	<u>\$11,540,095 67</u>

That, during the year 1814, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt, viz:

1. On account of the interest and reimbursement of the funded domestic debt,	\$4,937,451 33
2. On account of the principal and interest of temporary loans, viz:	
Reimbursement of principal,	250,000 00
Payment of interest,	57,798 90
	<u>307,798 90</u>
3. On account of the principal and interest of treasury notes,	2,979,783 40
4. On account of the interest on Louisiana stock, payable in Europe,	161,847 06
	<u>\$8,386,880 59</u>

Amounting, together, as will appear by the annexed list of warrants, marked C, to

Which disbursements were made out of the following funds, viz:

I. From the balance of the annual appropriation of eight millions of dollars for the year 1813, remaining unexpended at the end of that year, which balance amounted, as stated in the last annual report, to	\$442,254 11
II. From the funds constituting the annual appropriation of eight millions of dollars for the year 1814, viz:	
From the fund arising from the interest on the debt transferred to the Commissioners of the Sinking Fund, as per statement I,	\$2,003,495 54
From the fund arising from the nett proceeds of the sales of public lands, being the amount received into the treasury from the 1st October, 1813, to the 30th September, 1814, as per statement K,	1,021,058 19
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of vessels,	4,633,736 10
	<u>7,658,289 83</u>
Which sum of	\$7,658,289 83
Being deducted from the annual appropriation of	8,000,000 00
	<u>\$341,710 17</u>
Leaves an undrawn balance, to be applied in addition to the appropriation for the year 1815, of	<u>\$341,710 17</u>

III. From repayments into the treasury, on account of moneys heretofore advanced for the payment of interest on the Louisiana stock in Europe, and for the payment of the principal and interest of treasury notes, as will appear by the annexed statement E, -	286,336 65
	<u>\$8,336,880 59</u>

That the disbursements above mentioned, together with the balance above stated, which remained unexpended at the end of the year 1813, of

Together with a further sum arising from profit in exchange, on remittances from America to Europe, made in the year 1814, and amounting, as appears by the annexed statement D, to

19,827 61

\$9,167,913 95

Will be accounted for in the next annual report, in conformity with the accounts which shall then have been rendered to the Treasury Department.

That, in the mean time, the manner in which the said sum has been applied is estimated as follows, viz:

I. The repayments into the treasury on account of the principal of moneys advanced for the payment of interest on the Louisiana stock in Europe, and for the payment of principal and interest of treasury notes, have amounted, during the year 1814, as by the above mentioned statement E, to	\$286,336 65
II. The sums actually applied, during the year 1814, to the principal and interest of the public debt, are estimated as follows:	
1. Paid in reimbursement of the principal of the public debt,	\$4,283,735 90
2. Paid on account of interest and charges on the same,	4,586,348 54
	<u>8,870,084 44</u>

III. The balance which remained unexpended at the end of the year 1814, and applicable to payments falling due after that year, is estimated, per annexed statement G, at	11,492 86
	<u>\$9,167,913 95</u>

That, agreeably to the terms of the contracts by which certain temporary loans had heretofore been obtained, under the authority of the act of the 14th of March, 1812, the instalments of the following loans, which became payable in the year 1814, were duly paid at the times when they respectively became payable, viz:

To the Bank of Baltimore, on the 16th November, 1814,	\$100,000 00
To the State Bank, Charleston, on the 1st December, 1814,	150,000 00
	<u>\$250,000 00</u>

Two instalments of 250,000 dollars each, which became payable on the 16th and 31st December, 1814, to the State Bank, Boston, were not paid, it having been impracticable, in consequence of the general suspension of payments in specie, by the banks, to transfer the amount from those banks in which the moneys of the treasury were deposited, to Boston, where the payment was to be made, and equally impracticable to obtain the money on the spot for that purpose.

That, during the year 1814, and on the 1st of January, 1815, treasury notes became payable (in addition to those payable in the months of January and February, 1814, for the payment of which money was advanced in the year 1813, as stated in the annual report of February, 1814) amounting to 5,357,300 dollars. Of these, there was paid, or money advanced from the treasury for their payment, notes amounting to 2,558,100 dollars, at the times and places stated in the annexed statement, marked L. From the same causes as those above stated, which prevented the reimbursement of the temporary loans payable to the State Bank, Boston, it was impracticable to provide at the treasury for the payment of the remainder of the above mentioned notes; and they remain unpaid, amounting to 2,799,200 dollars. The times when, and the places at which, they became payable, are exhibited in the annexed statement, marked M.

For the payment of the dividend on the domestic funded debt, payable at the loan office in Massachusetts, on the 1st day of October, 1814, the commissioner of loans was furnished with a draft of the Treasurer of the United States, on the State Bank, Boston, he having at that time a much larger sum than was necessary for this object, deposited to his credit in that bank. The draft was, nevertheless, refused payment by the bank, except upon the condition of paying the public creditors, whose dividends amounted to 100 dollars, or upwards, in treasury notes; and the payment to such of the creditors, as have been paid, is understood to have been made in that way.

For the payment of the dividend, payable at the same loan office, on the 1st day of January, 1815, the treasury was unable, from the causes before stated, to make any other provision than that of treasury notes; and such of the public creditors, as have received their dividends payable on that day, at that loan office, have been paid in those notes.

A statement marked H, is annexed, exhibiting the amount of stock transferred to the Commissioners of the Sinking Fund, and standing to their credit on the books of the treasury, on the 31st December, 1814.

All which is respectfully submitted,

A. J. DALLAS, *Secretary of the Treasury.*

February 6th, 1815.

A.

Statement of the application, during the year 1813, of the funds provided for the Payment of the Principal and Interest of the Public Debt.

I. *Payments on account of the principal of the Public Debt:*

Of the domestic debt.

Annual reimbursement of the old six per cent. stock,	- - -	\$1,007,859 25	
Do. of deferred do.	- - -	382,443 74	
			1,390,302 99
Reimbursement of temporary loans,	- - -	- - -	1,350,000 00
of registered debt, including arrearages of interest,	- - -	- - -	29 28
Payment of the principal of treasury notes,	- - -	- - -	4,022,700 00
Stock purchased by the Commissioners of the Sinking Fund, per statement L, annexed to the last annual report, viz:			
Louisiana domestic six per cent. stock,	- - -	147,200 00	
Six per cent. stock of 1812,	- - -	267,200 00	
			414,400 00
			<u>7,177,432 27</u>

II. *On account of interest and charges.*

1. Of the domestic debt.

Interest for the year 1813 on the several species of funded debt, as settled at the treasury,	- - -	2,519,519 06

Commissions to agents in America, for purchasing bills,	- - -	- 1,597 94	
			3,599,455 22
			<u>\$10,776,887 49</u>

TREASURY DEPARTMENT, *Register's Office, February 3d, 1815.*

JOSEPH NOURSE, *Register.*

B.

Statement of the provision made before the 1st day of January, 1814, for the payment of the Principal and Interest of the Public Debt, falling due after that day.

I. *On account of the Foreign Debt.*

1. Cash in the hands of commissioners and agents in Europe, viz:			
In London, on the 31st December, 1813,	-	£99,658, 7s. 4d. at 4s. 6d.	\$442,926 07
In Amsterdam, on the same day,	-	Guilders, (a) 502,317 at 40 cents,	200,926 80
			<u>643,852 87</u>
2. Amount of payments made at the treasury before the 1st day of January, 1814, for bills which have been protested for non-payment, and which, on that day, had not been repaid into the treasury.			
Amount outstanding previous to the year 1809, as explained in report of February 3, 1809,	-		\$13,357 00
Ditto of bills purchased in 1810, as explained in report of Feb. 5, 1813,	-		8,888 88
			<u>22,245 88</u>
			<u>\$666,098 75</u>

II. *On account of the Domestic Debt.*

1. Cash in the hands of commissioners deceased, and out of office,	-	7,059 42
2. Cash in the hands of commissioners in office, and applicable to dividends,	1,549,761 10	
3. Cash in the hands of the Treasurer, as agent for the Commissioners of the Sinking Fund,	-	261,852 15
		<u>1,818,672 67</u>
4. Cash heretofore advanced to a commissioner of loans, no longer in office, for the reimbursement of exchange stock, and remaining unapplied,	-	3,821 61
		<u>1,822,494 28</u>

The demands to be satisfied out of these funds, on 1st January, 1814, were as follows:

1. Dividends payable by the commissioners of loans, including the dividends due on that day, and exclusive of dividends no longer demandable at their offices,	-	\$1,462,415 38
2. Dividends on stock standing on the treasury books, beyond the amount advanced to the cashiers for their payment,	-	63,616 79
3. Unclaimed dividends from the loan offices, payable at the treasury, beyond the amount advanced to the cashiers for their payment,	-	201,355 11
		<u>1,727,387 28</u>
		<u>95,107 00</u>

Total amount of provision for the public debt, remaining unapplied on the 31st December, 1813, \$761,205 75

(a.) This sum, according to the statements annexed to this and the preceding report, would appear to be 517,822 guilders, 10 stivers, or 15,505 guilders, 10 stivers, more than here stated. This difference arises from an error in the statement D, of remittances for the year 1813, annexed to the last annual report; the sum of 15,505 guilders, 10 stivers, there set down as so much remitted to Amsterdam in 1813, being, in fact, a part of the sum of 300,000 guilders, included in statement D, of remittances for the year 1812, annexed to the preceding annual report; and the two several sums of \$6,405 80, and \$481 78, contained in statement D, of remittances annexed to the annual report for the year 1814, were additional payments made in 1813, on account of the sum of 300,000 guilders, included in statement D, of remittances for the preceding year. The result of this transaction is, that the sum of 15,505 guilders, 10 stivers, appears to have been remitted more than was actually remitted; which is corrected by stating the balance in the hands of the commissioners at Amsterdam at its true amount as above, 502,317 guilders, instead of 517,822 guilders, 10 stivers, which the statement of remittances would produce, and the amount of this sum of 15,505 guilders, 10 stivers, which is, at par, in dollars, 6,202 20, has been over stated as a gain in exchange on the remittances of the year 1813, and is corrected, by deducting that sum, in the body of the present report, from the amount of gain on exchange, as exhibited in the statement D, annexed to the report of last year.

TREASURY DEPARTMENT, *Register's Office, February 3, 1815.*

JOSEPH NOURSE, *Register.*

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 23, 1815.

TREASURY DEPARTMENT, February 22, 1815.

SIR:

I have the honor to transmit, herewith, a letter from the acting Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed April 2d, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

A. J. DALLAS.

The Hon. the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, Comptroller's Office, February 22, 1815.

SIR:

The statements marked A, B, and C, have been prepared pursuant to the seventh section of an act of Congress, passed the 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." They contain all the information, relative to the transactions of the mint, which the settlements made at the treasury enable me to afford.

I have the honor to be, sir, with great respect, your obedient servant,

NATHAN LUFBOROUGH, Acting Comptroller.

ALEXANDER JAMES DALLAS, Esq. Secretary of the Treasury.

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 25, 1815.

To the Honorable the Senate and House of Representatives of the United States in Congress met, the memorial of the manufacturers of the city and county of Philadelphia respectfully sheweth:

That your memorialists, while filled with joy and exultation for the restoration of the inestimable blessing of honorable peace to their country, cannot divest themselves of anxiety and dread for the fate of the infant manufactures, whose existence and prosperity are unquestionably of vital importance to the whole community. That, trusting to Providence, to the wisdom and protection of your honorable body, and to their own industry, they look forward, with hope, to the permanent establishment of such manufactures as shall render the United States independent on foreign nations for the necessaries and comforts of life.

That, confiding implicitly in the wisdom and patriotism of your honorable body, your memorialists will not presume to suggest any particular measure, but will content themselves with observing, that every civilized nation has thought proper, by legislative acts, to afford to the industry of their respective countries that protection and support necessary to bring forth to maturity the establishment of manufactures necessary to their existence and prosperity. The intimate connexion of the agricultural with the manufacturing interest, and the extreme importance of a competent supply, in times of war, for the army and navy of the United States, without dependence on foreign aid, will be so obvious to your honorable body as to require no comment on the part of your memorialists.

But your memorialists respectfully beg leave to call the attention of your honorable body to the existence and correction of an abuse, which is, at the same time, destructive of the revenue of the United States, highly injurious to the honest merchant, and, if persisted in, will render entirely useless any law enacting protecting duties. This abuse is the introduction, through the custom houses of our country, of merchandise subject to ad valorem duties, at from one-fourth to one-half of their value. This enormity, practised in various shapes, cannot be checked

by any provision of the present revenue laws, and it is to the wisdom of your honorable body, alone, that your memorialists and the country can look for a competent remedy. This remedy may probably be found in the substitution of specific for ad valorem duties, or in the establishment of a board, at each custom house, possessing the requisite power; which board might be composed of the collector and naval officer, and one respectable competent individual capable of deciding on the value of merchandise imported. The extraordinary expense to be borne by the merchandise imported.

Your memorialists respectfully add, that, in making the above suggestion, they resign themselves, with perfect confidence, to the better judgment of your honorable body. And for the welfare of your honorable body your memorialists will ever sincerely pray.

THOMAS GILPIN, *and others.*

13th CONGRESS.]

No. 447.

[3d SESSION.

ESTIMATED REVENUES FOR 1815:

Loan, New Issue of Treasury Notes, and the Prohibition of the Exportation of Specie, recommended.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 25, 1815.

TREASURY DEPARTMENT, February 20, 1815.

SIR:

I have the honor to acknowledge the receipt of your letter, dated the 15th instant, which, in consequence of the termination of the war, requests, in behalf of the Committee of Ways and Means, "a view of the probable receipts from imports and tonnage, during the year 1815, and any other information that may enable the committee to decide on the measures necessary to meet the unexpected and fortunate change which peace must produce in the resources of the United States." It has hitherto been my arduous and painful employment to suggest to your consideration, measures for relieving the embarrassments of the treasury, with a view to the expenditures of a protracted war. And you will readily believe, that, on every account, personal as well as public, I join you, most sincerely, in rejoicing at an event which brings with it an immediate alleviation of the pressure upon this Department, as well as a general assurance of national honor and prosperity.

The objects which claimed the attention of the committee, in my former communications, were, 1st, The state of the public credit; 2d, the state of the circulating medium; and, 3d, the ways and means to defray the various expenses of the Government.

1. The public credit was depressed during the war, owing to several causes that must now cease to operate. All the circumstances, internal and external, which were calculated to excite doubt as to the duration, or as to the issue of the contest, in the minds of the cautious and the timid, have passed away; and, in their place, the proofs of confidence begin already to appear, with practical advantage. While it was doubtful to what extent the public exigencies would require the aid of loans, those persons who retained the means of lending, either feared, or affected to fear, the eventual security of the Government; and even the exemplary display of the national resources, which has been made during the present session of Congress, for the benefit of the public creditors, was curtailed of its natural effect, in the resuscitation of public credit, by the countervailing influence of causes which it is unnecessary to specify. But when the whole amount of the public debt, incurred during the war, is fixed and ascertained; when it is known that ample provision is made for the punctual payment of the interest, and for the gradual extinguishment of the principal of the debt; and when, above all, it is seen that Congress is inflexible in its adherence to the faith and policy of the legislative pledges, the public credit of the United States will stand upon a basis the most durable and the most honorable.

2. The difficulties of the national circulating medium, remain, however, to be encountered, under circumstances which the Government cannot control. The effects of the peace will certainly restore a metallic medium; but, until that result be produced, the only resource, for all the pecuniary transactions of the treasury, as well as of individuals, will be the issues of treasury notes, and the notes of the State banks. If, indeed, the State banks were soon to resume their payments in specie; or if they were again to give credit and circulation to the notes of each other, throughout the United States; and if they were, moreover, able and willing to accommodate the fiscal views of the Government, (which I do not permit myself for a moment to doubt) a total dependence upon those institutions, however impolitic in the abstract, would be practically safe and beneficial. But if, on the other hand, the notes of the State banks shall continue limited, in circulation and use, to the city, the town, or the State, in which they are issued, it must be obvious, that they cannot answer the purposes of a national medium; and that the receipt of such notes, in payments for duties of import, or internal duties, will convert the public revenue, which is destined for general uses abroad, as well as at home, into a local fund, that may not be wanted where it exists, and cannot be applied where it is wanted. It is, nevertheless, in the power of Congress to obviate, in a considerable degree, this difficulty, by authorizing the payment of a reasonable rate of exchange, upon the transfer of its revenue from the places of collection and deposit, to the places of demand and employment; and I respectfully recommend the expedient to the consideration of the Committee of Ways and Means.

The alternative, or concurrent resource of treasury notes, for a national circulating medium, has, on other occasions, been considered. The security of the Government must always, upon every reasonable and candid estimate, be deemed superior to the security of any private corporation; and, so far as treasury notes bear an interest, and are receivable in the payment of duties and taxes, they are evidently more valuable than bank notes, which do not possess those characteristics. But the machinery of a bank is calculated to give an impulse and direction to its issues of paper, which cannot be imparted by the forms of the treasury, or any merely official institution, to the paper of the Government. In the operations of a bank, too, the facilities of bank credits supply the place, in a very important degree, of the issues of notes; so that a bank loan of thirty millions of dollars, for instance, would, probably, require no greater issue than six millions of dollars in notes. On the contrary, the whole amount of whatever sum is to be raised by an issue of treasury notes, must be actually sent, in the form of treasury notes, into the market, through the various channels of credit or demand. It is, however, to be admitted, that an issue of treasury notes, not greatly exceeding, in amount, the demand created for them by the duties and taxes, for which they are receivable, can be annually sustained; but, if the amount exceeds, or even equals, the amount of that demand, the revenue will generally be absorbed by the notes, before it reaches the treasury; the holder of the treasury notes being thus paid, in preference, and often to the exclusion, of every other public creditor; and the other branches of the public service being thus deprived of the contemplated means for their support.

It is proper here to observe, that the actual issue of treasury notes on this day, (including those due and unpaid, those which are daily becoming due, and those which have been ordered, but are not yet signed) amounts to the sum of \$18,637,436 80 cents, and the amount will be constantly augmenting. If, therefore, the revenue for the year 1815, enriched by the duty on imports, and by the other beneficial effects of the peace, should amount to twenty

millions of dollars, it is still evident that the whole of the revenue might be expended in the single purpose of paying the treasury note debt; leaving every other object of the Government to be provided for by loans, or by new issues of treasury notes.

Having suggested the difficulty and the danger, I cannot presume to dwell upon any expedient for relief, which Congress has already refused to adopt; but I take the liberty, with deference and respect, to renew the recommendation of the plan that was submitted to your consideration, in my letter of the 17th of January last,* under a belief, that, considering the outstanding amount of treasury notes, any new issue should be made to rest upon a basis that will enable the Government to employ it, both as a circulating medium, and as the means of raising money in aid of the revenue. How far a power given to fund the treasury notes, upon an advanced interest, or to pass them in payment of taxes and duties, will be sufficient for the purposes contemplated, without providing other means of payment by regular instalments, I must submit to the judgment of the committee.

3. The ways and means to defray the various expenses of the Government, for 1815, will consist of the revenue which will be actually received at the treasury during that year. It is not intended, on the one hand, to take into view the balances due upon the appropriations of preceding years, nor, on the other hand, to take into view the revenue which will accrue in the present year, but which will not be payable until the year 1816.

The direct amelioration of the resources of the country, in consequence of the peace, applies principally to the item of the duties on import and tonnage. The effect, however, must be confined, with immaterial exceptions, for 1815, to two-thirds, or the eight concluding months of the year. The West India trade will produce little, and the European trade nothing, by way of revenue, before the first of May next. Some outstanding adventures beyond the Cape of Good Hope, will hardly be brought home, upon the intelligence of peace, before the present year has expired. Considering, therefore, that a credit of eight, ten, and twelve months, is allowed for the duties on merchandise imported from Europe, and that a credit of three and six months is allowed for the duties on merchandise imported from the West Indies, it is evident that, whatever may be the amount accruing on merchandise imported from Europe, for the year 1815, the actual receipts at the treasury cannot be great; that the whole of the duties accruing on merchandise imported from the West Indies, before the first of July, will be actually received at the treasury in the year 1815; and that one moiety of the amount of the duties on merchandise imported from the West Indies, between the first of July and the first of October, will, also, be received at the treasury in the year 1815.

The average of the nett revenue of the customs which accrued for the three years, 1806, 1807, and 1808, was more than fourteen millions of dollars for each year; and a similar average for the three succeeding years, 1809, 1810, and 1811, was about nine millions of dollars for each year. But the first period was one of uncommon commercial prosperity, when the United States were the only neutral nation, and cannot be taken as the basis of an estimate for the present time, when the other nations of the world are, also, at peace. The second period was embarrassed by commercial restrictions; but, probably, the effect of those embarrassments upon the revenue, were counterbalanced by the advantages of our neutrality. It is thought, therefore, upon the whole, that, in a state of general peace, the customs operating upon the single duties would not have produced, before the American war, more than a sum between nine and ten millions of dollars annually. But the comparatively small quantity of foreign merchandise at present in the American market, would, probably, give rise to an extraordinary amount of importations during the first year of peace, equal, at least, to the supply of two years; if the fact, that the double duties are limited in their continuance to a year after the termination of the war, did not operate as a check upon importations, beyond what may be requisite for the consumption of the current year. These counteracting causes may, therefore, be reasonably supposed to neutralize the force of each other, and, consequently, to refer and confine any estimate of the double duties upon merchandise, imported in the year 1815, to the amount of the importations for the consumption of a single year.

Under these views it is estimated that the produce of the customs, during the first twelve months of peace, will amount, with double duties, to a sum between eighteen and twenty millions of dollars. Of that period, ten months occur in the year 1815; but, as the importations can only partially commence, for the space of two months, and cannot reach their average extent for three or four months, the fair proportion of time, to form the ground of an estimate, will be (as already suggested) eight months of the year 1815. Upon this scale of computation, the product of the customs, which will accrue from the first of May to the thirty-first of December, 1815, will, probably, be 13,500,000 dollars; but there must be added to that sum, the estimated amount of customs accruing, independent of the effects produced by the peace, from the first of January to the first of May, to wit, 1,500,000 dollars; making the aggregate of the revenue of the customs, accruing in the year 1815, about fifteen millions of dollars.

It remains, however, to present an estimate of the amount of the customs, which will not only accrue, but which will be actually received at the treasury in the year 1815. The extent of the commerce, which is expected to be opened, and the effect of the credits which are allowed for the payment of duties, for the year 1815, have been already explained; the estimate, therefore, assumes the following form:

1. The total revenue of the customs, accruing in the year 1815, being, as above stated, - - - \$15,000,000

It is estimated, that, of that sum, there will become payable, and will actually be received into the treasury, in the year 1815, in the manner exhibited in the annexed schedule, marked A, about \$3,500,000

2. That, on account of custom-house bonds outstanding at the end of the year 1814, which, in the letter from this Department, dated the 17th of January, 1815, was reserved to meet the unsatisfied appropriations of that year, there will be received, during the year 1815, near - - - 3,000,000

Making the total amount of the actual receipts into the treasury, from the customs, for the year 1815, \$6,500,000

The ways and means of the treasury for 1815, provided and payable during the year, may now be presented in a view essentially different from that which was necessarily taken in the letter from this Department, dated the 17th of January last, while contemplating a continuance of the war.

1. The duties on imports and tonnage will, probably, produce a sum, inclusive of that receivable for duties which accrued prior to the present year, of about - - - \$6,500,000

2. The direct tax, instead of a sum of two millions of dollars, will probably give to the treasury, in the year 1815, in consequence of the facilities of the peace, a sum of about - - - 2,500,000

3. The internal duties, old and new, and postage, instead of a sum of 7,050,000 dollars, will probably give to the treasury, in the year 1815, in consequence of the facilities of the peace, a sum of about - - - 8,000,000

4. The sales of the public lands will, probably, produce, in the year 1815, - - - 1,000,000

5. The amount of incidental receipts, from miscellaneous sources, will, probably, be about - - - 200,000

\$18,200,000

While the revenue is thus materially augmented, the charges upon the treasury will be considerably reduced. It is not in the power of this Department, at the present time, to advert to the estimates of the expenses of the peace establishment for the War and Navy Departments; but, with the aid of the public credit, and the legislative sanction for the measures which will be proposed, it is believed that the treasury will be competent, in that respect, to meet the most liberal views of the Government. Independent, therefore, of the estimates of the War and Navy Departments, the charges on the treasury, for the year 1815, will consist of the following items:

* Vide No. 447.

1. Civil, diplomatic, and miscellaneous expenses, as stated in the general estimates for 1815,	\$1,979,289 39
2. The public debt will call for a sum of \$14,723,808 58, to answer the following claims:	
For interest and reimbursement of the funded debt created before the war, (the amount of principal unredeemed on the 31st of December, 1814, being about \$39,905,183 60)	\$3,452,775 46
For interest of the funded debt created since the war, (the amount of principal on December 31st, 1814, being 48,580,812 26, to which little has been since added) about	3,000,000 00
For the principal and interest of treasury notes falling due in 1815, and the 1st of January, 1816, including \$620,000 of notes issued under the act of February 25th, 1813, falling due within this period,	8,271,033 12
	14,723,808 58
	\$16,703,097 97

It is to be observed, however, that the preceding estimate does not include a sum of 2,799,200 dollars, being the principal of the treasury notes which became due in 1814, and remain unpaid; because the unexecuted authority to raise money, by loan, for that year, is sufficient to cover the amount, if a loan can now be obtained, independent of the custom house debt (\$3,000,000) which accrued in 1814, but is payable in 1815, and which is now considered as part of the excess of \$3,975,909 83, stated in the letter of the 17th of January, 1815, for the purpose of being specifically transferred, in the present estimates, from the ways and means of last year, to the credit of the ways and means for the present year.

Upon the whole, then, it appears that the revenue for the year 1815 will, probably, amount to \$18,200,000; and that ways and means are now to be devised, to provide for the difference between that sum and the aggregate amount of the demands for the service of the year 1815; which will be ascertained by adding the amount of the estimates for the peace establishment of the War and Navy Departments to the amount of the demands for the expenses of Government, and the public debt being, as above stated, the sum of \$16,703,097 97.

It only remains to suggest some additional measures, which appear to be required, at this time, for the support of the public credit, and the supply of the treasury.

1. It is respectfully suggested, that all the holders of treasury notes, issued, or to be issued, under the authority of any existing law, should be allowed to fund them at an interest of seven per cent., and that interest be allowed on all treasury notes which have not been punctually paid, until the day of funding, or of payment.

2. It is respectfully suggested, that a new issue of treasury notes should be authorized, upon the principles suggested in the letter from this Department, dated the 17th of January, 1815.

3. It is respectfully suggested that a loan should be authorized to the amount necessary, upon a view of all the estimates, to complete the ways and means for the year 1815.

4. It is respectfully suggested, that the exportation of specie should be prohibited, for a limited period.

I am, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

J. W. EPPES, Esq., *Chairman of the Committee of Ways and Means.*

A.

Estimate of the amount receivable into the Treasury in the year 1815, from Duties of Customs, accruing within the same year.

PRINCIPLES ON WHICH THE ESTIMATE IS FOUNDED.

1. That, from prize goods, and all other importations, from 1st January to 30th April, 1815, the duties accruing will be \$1,500,000
2. That there will be in the usual proportion of about one-third from the West Indies, on which the terms of credit are three and six months. The other two-thirds are taken as if arising wholly on merchandise imported from Europe, the credit on which is eight, ten, and twelve months; the duty on salt is payable in nine months, and on wine, in twelve months. The duties on merchandise, from beyond the Cape of Good Hope, and from South America, are payable, one half in six months, one fourth in nine, and one fourth in twelve months. The salt and wine duties will, probably, counterbalance the shortened term of credit on these duties, so far as the importations of 1815 are concerned.
3. That the duties, accruing from 1st May to 31st December, 1815, will amount to 13,500,000
4. That of these, one-third will be on merchandise from the West Indies. That the duties in the months of May, June, July, and August, will average \$2,000,000 a month; and for the remaining four months of the year, 1,375,000 dollars a month. That of the duties accruing during the months of May, June, July, and August, two-fifths will be on merchandise from the West Indies; and during the rest of the year, one-fourth only. Then the result will be as in the following table:

Months in which Duties accrue.	Amount of Duties accruing.	Payable in 1815, in										Total payable in 1815.	Payable in 1816, in					
		April.	May.	June.	July.	August.	Sept.	October.	Nov.	Dec.	January.		Feb'ry.	March.	April.	May.	June.	
1815.																		
January,	\$375,000	\$62,500	-	-	\$62,500	-	\$83,000	-	\$83,000	-	\$291,000	\$84,000	-	-	-	-	-	
February,	375,000	-	\$62,500	-	-	\$62,500	-	\$83,000	-	\$83,000	291,000	-	\$84,000	-	-	-	-	
March,	375,000	-	-	\$62,500	-	-	62,500	-	83,000	-	208,000	83,000	-	\$84,000	-	-	-	
April,	375,000	-	-	-	62,500	-	-	62,500	-	83,000	208,000	-	83,000	-	\$84,000	-	-	
May,	2,000,000	-	-	-	-	400,000	-	-	400,000	-	800,000	400,000	-	400,000	-	\$400,000	-	
June,	2,000,000	-	-	-	-	-	400,000	-	-	400,000	800,000	-	400,000	-	400,000	-	400,000	
July,	2,000,000	-	-	-	-	-	-	400,000	-	-	400,000	400,000	-	400,000	-	400,000	400,000	
August,	2,000,000	-	-	-	-	-	-	-	400,000	-	400,000	-	400,000	-	400,000	-	400,000	
September,	1,375,000	-	-	-	-	-	-	-	-	172,000	172,000	-	-	172,000	-	343,000	400,000	
Oct. Nov. Dec.	4,125,000	No part of the duties accruing in these months will become payable in the year 1815.																
											Total amount payable in the year 1815,	\$3,570,000						

Tonnage, light money, and duties on passports and clearances, are payable without credit. The aggregate amount of these duties is small, and insufficient to pay the expenses of collection of the whole duties of customs, which must also be paid without credit. Nothing, therefore, is inserted in this estimate for these small items.

13th CONGRESS.]

No. 448.

[3d SESSION.]

REVISION OF THE REVENUE LAWS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 27, 1815.

TREASURY DEPARTMENT, February 25, 1815.

SIR:

I have the honor to acknowledge the receipt of your letter, dated yesterday, inquiring, on behalf of the Committee of Foreign Relations, whether any further legislative provisions are necessary for enforcing the due execution of the existing revenue laws?

Permit me to suggest, that the act to prohibit intercourse with the enemy, and for other purposes, contains many useful and necessary provisions, for securing the revenue arising from duties on imports. The act expired with the war; but the 1st, 2d, 5th, 6th, 7th, 8th, and 9th sections should be re-enacted.

It is, also, very desirable that the district courts should be vested with a jurisdiction of all suits instituted in the name, or for the use of, the United States, whatever may be the amount of the demand, or the cause of action.

There are many defects in the existing revenue laws, which are of long standing, and would require more time and attention than can be now bestowed, with a view to a radical reform. These may be presented to the consideration of Congress at a subsequent session.

I have the honor to be, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

The Honorable Mr. BIBB.

No. 1.

WILLINGTON, S. C. November 17, 1814.

SIR:

Your favor of the 31st ultimo and 2d instant are received. Enclosed I return the blank receipt for retailing licence, filled up agreeably to the instructions.

Some cases have occurred where persons who have incurred forfeitures, &c. have petitioned for a remission; there being no judge of the district court of the United States, within the prescribed limits, nor district court of the United States, within the prescribed distance, the petition for a remission was presented to a judge of the State court, who declined to act upon it, and stated that he was willing to accommodate parties in particular cases, but as he could not proceed, nor was bound to act under all the cases of the United States, concerning fines, penalties, and forfeitures, it might be construed into a consent of his willingness to act in all such cases; therefore, he declined to act in this particular instance of the petition.

I am, respectfully,

J. CALHOUN, Junr.

S. H. SMITH, Esqr. *Commissioner of the Revenue.*

No. 2.

24th Collection District of the State of New-York,
CANANDAIGUA, November 21st, 1814.

SIR:

The subscribers deem it their duty to represent to you the situation of this collection district. The act of Congress for the assessment and collection of direct taxes, and for the collection of internal revenue, give to the State courts jurisdiction in cases arising under those acts, only when a district court does not sit within fifty miles. The State of New York has been divided into two districts, and the courts are directed to be held at Canandaigua, but in fact there has been no court held in the county of Ontario under the last act. Cases have occurred where it has been necessary to prosecute for penalties, and bonds taken for the United States daily becoming due. Application has been made for process to the person who was appointed clerk of the district court, to be held at Utica and Canandaigua, under the first law; he declined issuing any, on the ground that the late act dividing the State into two districts takes away his former office, and that he has received no new appointment. Application was then made to Mathias B. Tallmadge, Esqr. the senior district judge, and who, by the act, was assigned to this district; and he was informed that the clerk had refused to issue process. In his answer, he seems to be of opinion that the clerk was right, if the act creating the district be constitutional, of which he appears to entertain some doubts. He says that he notified Judge Van Ness, the junior district judge, through the clerk of the court, of his inability to hold the court at this place in September last; and that it became the duty of Judge Van Ness to hold it. As the matter stands, there is no court to grant process, no clerk to issue it, no marshal to execute it, and no district attorney for the United States, in this district. To proceed, therefore, in the United States' court, is impossible, until those officers are appointed. The question then occurs whether the State courts have jurisdiction in such a case? By a reference to the several acts of Congress, it will be seen that a regular United States' district court is appointed to be held within fifty miles of this collection district. Although none has been actually held the past year, yet one may be held the ensuing year; in that event, would the State courts have jurisdiction? Can it be conceived that the question of jurisdiction is to depend upon the uncertainty or certainty of a district court being held? And is it not more reasonable to conclude, that, where a district court is by law appointed to be held in a collection district, it takes away the jurisdiction of a State court? This, at least, is the legal opinion we have obtained on this subject.

If, then, the State courts have no jurisdiction over cases arising under the beforementioned act of Congress in this collection district, it is indispensable, to the enforcing of the laws, that something should be done with the United States' district court, to render it possible to proceed at all.

Your directions on this subject are requested, and the sooner the necessary steps are taken the better, as many important prosecutions, against flagrant and wilful offenders who defy the law, are waiting.

Very respectfully, your obedient servant,

STEPHEN BATES, *Collector.*
JOHN C. SPENCER, *Assessor.*

SAMUEL H. SMITH, Esqr.

TREASURY DEPARTMENT, December 8, 1814.

SIR:

The information which has been communicated to me by the commissioner of the revenue, by collectors of duties on importation, and by other persons, acting in official stations, appears to require immediate attention, with a view to protect the revenue, and to facilitate the means of detecting and prosecuting delinquents. The subject is connected with my report of the 19th of November last, on the complaints from Vermont, and, therefore, I take the liberty of placing it in the view of the Committee of Ways and Means.

1. A provision seems necessary to provide more effectually for organizing and holding the district court at Canandaigua, in the State of New York. No. 1.

2. A provision seems necessary to provide more effectually for the exercise of jurisdiction by State courts, and State magistrates, in cases arising under the revenue laws, at a distance from the seat of the district court. No. 2.

3. It appears necessary to provide more effectually for examining and stating the facts, by State courts or State magistrates, in cases of petition to the Secretary of the Treasury for the remission of fines, penalties, and forfeitures, incurred at a distance from the seat of the district courts. No. 1, 2.

4. A provision seems necessary, making it the duty of the district attorneys, to appoint deputies for the collection districts in which they do not themselves practise.

I accompany this letter with only two of the communications that have been received at the treasury; as these will be sufficient to shew the nature and the extent of the inconveniences which it is desirable to remove.

I am, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

J. W. BRPES, Esqr. Chairman of the Committee of Ways and Means.

13th CONGRESS.]

No. 449.

[3d SESSION.]

RELEASE OF PENALTIES AND FORFEITURES.

COMMUNICATED TO THE SENATE, FEBRUARY 27, 1815.

Mr. BIBB, from the Committee on Foreign Relations, who were instructed to inquire into the expediency of making provision, by law, to release all or any claims of the United States to penalties or forfeitures, under acts which have imposed prohibitions or temporary restrictions on commercial intercourse, and to discontinue prosecutions therefor, upon payment of costs legally incurred, reported the following resolution:

Resolved, That it is inexpedient to make such provision.

13th CONGRESS.]

No. 450.

[3d SESSION.]

PUBLIC EXPENDITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 5, 1815.

Mr. MACON, from the Committee on Public Expenditures, made the following report:

That they have endeavored to perform the duties for which they were appointed, but have found it impossible to do it, during a session in which the House has been more constantly engaged in business than usual. The committee deem it a duty to state to the House, that they are of opinion that, at any session, it will be impracticable to make a satisfactory examination into the expenditure of public money. The several attempts which have heretofore been made to do this, confirm the correctness of the opinion. While the committee believe that the officers whose duty it is to settle the public accounts, will discharge the trust reposed in them with fidelity, they also believe that it is the duty of the House to ascertain, by a committee, that it is done. The committee beg leave to suggest to the House the propriety of appointing a committee, to sit during a recess, to make the examination.

The committee consider it their duty to state to the House, that they attempted to examine the account of Col. James Thomas, deputy quartermaster general, but have not finished it; and that they collected many papers relating to it, all of which they have transmitted to the Comptroller of the Treasury, before whom the account now is for settlement.

13th CONGRESS.]

No. 451.

[3d SESSION.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE SENATE, ON THE 1ST OF MARCH, 1815.

Mr. ROBERTS, from the committee to whom was referred the petition of Robert Kid, made the following report:

That it appears the said petitioner became the purchaser of goods, wares, and merchandise, to the amount of six thousand dollars' value, from the mercantile house of Vanuxum & Clarke, of the city of Philadelphia, about the first of October, 1812, which were imported in a vessel cleared from the port of London, after a knowledge of the declaration of war, and partly in a vessel which cleared from the port of Bristol, also after a knowledge of the declaration of war; said ports being in the kingdom of Great Britain. On their arrival at Philadelphia, they were seized by the collectors, as forfeited, for a breach of the non-importation laws, and also as prize of war, being the property of an enemy. The invoices or bills of parcels of said goods, were made out as if they were the property of the said Vanuxum & Clarke, and were bought by said petitioner as such, he knowing, however, that they were under seizure as aforesaid. The petitioner obtained a restitution of them, on bonds, for the value, and entered them at the custom-house, and secured the duties. A petition appears to have been presented, by the said Robert Kid, to the district judge, setting forth the facts material to his case, in order to have them found and transmitted, by said

judge, to the Secretary of the Treasury, to obtain a remission of the forfeiture. To the truths of these facts the petitioner made oath on the 12th of September, 1813. The petition presented to the district judge, states that the said goods were a consignment of Samuel Guppy, a British merchant, resident in England, to the house of Vanuxum & Clarke, but that, when he purchased them, he was not informed of that fact. A copy of said petition is herewith reported, as also a letter addressed to the committee by the Secretary of the Treasury, at their request, showing why the equitable powers vested in him do not apply to the petitioner's case.

The committee are of opinion, that, if the petitioner bought said goods, unapprized that the invoices were fraudulent, that he has legal remedy for any damage he may thereby incur against the said Vanuxum & Clarke; and they are bound to believe the fact of his ignorance, as he has made oath to it; nor does he appear unapprized of his remedy against Vanuxum & Clarke, as he notices it in his petition. The committee believe that Congress have, in no instance, by special act, authorized a remitting of forfeitures of goods, shipped after the twenty-third day of June, from British ports, and by British subjects, and certainly not shipments made after war was known to exist at the ports of shipment. The want of authority in the Secretary of the Treasury to take cognizance of this case, arises solely from the forfeiture having been incurred while the goods were in the hands of the consignees. The committee are, therefore, of opinion, that the said petitioner having legal remedy, is not entitled to relief from Congress, and that regularity of proceedings, as well as justice, requires there should not, in this case, be legislative interference. They, therefore, submit the following resolution:

Resolved, That the petitioner have leave to withdraw his petition.

13th CONGRESS.]

No. 452.

[3d SESSION.

PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 2, 1815.

TREASURY DEPARTMENT, February 24, 1815.

SIR:

I have the honor to submit to the consideration of the Committee of Ways and Means, a proposition to provide for paying the interest, and gradually reducing the stock debt, which has been created during the late war. It was my intention to have accompanied this communication with tables, illustrating, in detail, the operation of the sinking fund, as well as the effect of the present proposition, but various causes render the performance of this task impracticable, before the adjournment of Congress, and I cannot do better than to refer to the report which was made by the Treasury Department to the House of Representatives, on the 9th of April, 1808, exhibiting explanatory statements and notes of the public debt, its increase or decrease, from the 1st of January, 1791, to the 1st of January, 1808. I shall, therefore, confine my views to, 1st, the general state of the public debt before the war: 2d, the general state of the public debt contracted since the war; and, 3d, the particular provision to be now made for the last description of the public debt.

I. On the 31st December, 1814, the amount of the public debt, created before the war, may be estimated at \$39,905,183 66; and it consisted of the following particulars:

1. Old six per cent. stock, the nominal amount being	-	-	-	17,250,871 39	
Of which there had been reimbursed,	-	-	-	12,879,283 78	
Leaving due on the 31st December, 1814,					4,371,587 61
2. Deferred six per cent. stock, the nominal amount being	-	-	-	9,358,320 35	
Of which there had been reimbursed,	-	-	-	3,971,148 36	
Leaving due on the 31st December, 1814,					5,387,171 99
3. Three per cent. stock,	-	-	-	-	16,158,177 34
4. Exchanged six per cent. stock under the act of 1812,	-	-	-	-	2,984,746 72
5. Six per cent. stock of 1796,	-	-	-	-	80,000 00
6. Louisiana six per cent. stock,	-	-	-	-	10,922,500 00

Estimated amount of the whole of the public debt, contracted before the war, due on the 31st of December, 1814, \$39,905,183 66

Upon the principles and estimates of the treasury report, of the 9th of April, 1808, it was computed—

1. That, on the 1st of January, 1808, the public debt amounted to	-	-	-	64,700,000 00
2. If, therefore, the amount of the public debt, computed to be due on the 31st December, 1814, be deducted, to wit,	-	-	-	39,905,183 66

The amount redeemed between the 1st of January, 1808, and the 31st of December, 1814, may be estimated at \$24,794,816 34

The establishment of a sinking fund, to redeem the principal of the public debt, was coeval with the funding system of 1790; but the payment of the interest of the debt was not charged upon that fund until 1802. The amount of the public debt was increased, during the several years that intervened between January, 1791, and January, 1803, and the sinking fund was enriched, at various periods, by the assignment of additional revenues. The acts of the 8th of May, 1792, the 3d of March, 1795, the 29th of April, 1802, and the 10th of November, 1803, form, however, the principal basis of the present sinking fund, providing for the annual payment of the interest, as well as for the gradual redemption of the debt.

Under the authority of these acts of Congress, the sinking fund amounts to the sum of \$8,000,000 annually, which, at this time, is supplied from the following sources:

1. From the interest on such parts of the public debt as have been reimbursed, or paid off, and which, at present, amounts to the sum of	-	-	-	1,969,577 64
2. From the nett proceeds of the sales of public lands, (exclusive of lands sold in the Mississippi territory, which, as yet, belong to the State of Georgia) estimated, annually, at the sum of	-	-	-	800,000 00
3. From the proceeds of duties on imports and tonnage, to make the annual sum of \$8,000,000, estimated at about	-	-	-	5,230,422 36
				<u>\$8,000,000 00</u>

II. On the 31st of December, 1814, the amount of the public debt, created since the war, (independent of temporary loans and issues of treasury notes) may be estimated at

And it consisted of the following particulars:

1. Six per cent. stock of 1812, (the eleven millions loan)	-	-	-	-	\$7,710,000 00
2. Do. do. 1813, (the sixteen millions loan)	-	-	-	-	18,109,377 51
3. Do. do. 1813, (the seven millions five hundred thousand loan)	-	-	-	-	8,498,583 50
4. Do. do. 1814, (the loan of ten millions, part of the loan authorized for twenty-five millions)	-	-	-	-	9,919,476 25
5. Do. do. 1814, (the loan of six millions, part of the loan authorized for twenty-five millions)	-	-	-	-	4,342,875 00
					<u>48,580,312 26</u>

But it is proper to bring into view here, the additional six per cent. stock, which will be created in consequence of contracts depending on the 31st of December, 1814, to be completed in 1815, to wit:

1. The committee of defence of Philadelphia contracted to loan \$100,000 to fortify the island in the river Delaware, called the Pea Patch, for six per cent. stock at par, which will be issued under the act of March, 1812,	-	-	-	-	100,000 00
2. The corporation of New York contracted to advance money for fortifications, supplies, &c. at New York, on the terms of the six millions loan, and the amount being liquidated, six per cent. stock has been ordered for	-	-	-	1,100,009 87	
					<u>1,200,009 87</u>
					<u>\$49,780,322 13</u>

There are, however, other contracts for loans, made through the medium of the War Department, which have been recognised at the treasury, to be paid in six per cent. stock, but which have not been so liquidated, as to furnish a ground to estimate their amount.

The six per cent. stock, which was issued under the act of the 24th of March, 1814, amounting to \$3,000,000, and sent to Europe, has not been, and probably will not be, sold. It is, therefore, omitted in the present estimates.

Besides the funded debt, above stated, there have been contracted debts to the amount of \$19,002,800, upon temporary loans, and upon the issues of treasury notes, consisting of the following particulars:

1. Temporary loans have been obtained under the act of March, 1812, (of which the sum of \$500,000 became due in December, 1814, and remains unpaid; and of which \$50,000 will be payable in the year 1817, for	-	-	-	-	550,000 00
2. Treasury notes had been issued or ordered on the 20th of February, 1815.					
(1.) Payable on or before the 1st January, 1815, due and unpaid, principal,	-	2,799,200 00			
(2.) Payable since the 1st of January, 1815, due and unpaid,	-	620,000 00			
(3.) Payable almost daily, from the 11th of March, to and including the 1st of January, 1816,	-	7,227,280 00			
(4.) Payable from the 11th of January, to and including the 1st March, 1816,	-	7,806,320 00			
					<u>18,452,800 00</u>

Making floating public debt, in temporary loans and issues of treasury notes,	-	-	-	-	19,002,800 00
To which add the amount of funded debt,	-	-	-	-	49,780,322 13

And the whole of the ascertained amount of debt created during the war, is the sum of

\$68,783,122 13

The general claims for militia services and supplies, arising under the authority of the individual States, as well as of the United States, have been partially exhibited; but neither the principle of settlement, nor the amount of the claims, can, at this time, be stated.

III. In suggesting provisions to pay the interest, and gradually to reduce the principal of the public debt, contracted since the declaration of war, the inconvenience which has been introduced, by making the payment of the principal and interest of the treasury notes a charge upon the sinking fund, is greatly to be lamented. The treasury notes were, in their design, and ought to be in their use, a species of circulating medium; but it is evident that a sinking fund of eight millions of dollars could never supply the means of paying the prior claims, and, also, of discharging, punctually, the whole of the principal, as well as the interest, of annual issues of treasury notes, amounting to eight or ten millions of dollars. It is indispensable, therefore, to the free and beneficial operation of the sinking fund, that it should be disengaged, as soon as possible, from this burden. The means of disengaging it are, 1st, by the payment of the treasury notes out of the current revenue; or, 2d, by funding them upon reasonable terms, under the act by which it is proposed to authorize a loan for the service of the year 1815; and these means, it is believed, will be effectual.

The sinking fund being thus emancipated from the treasury note debt, would be sufficient, in 1815, for the interest and reimbursement of the stock created before the war; for the interest of the stock created since the war; and for the interest of the loan to be raised for the present year, either in money, or by converting the treasury note debt into stock debt. Thus,

1. The sinking fund amounts to	-	-	-	-	\$8,000,000 00
2. The interest and reimbursement of stocks created before the war, will require a sum of	\$3,452,775 46				
3. The interest on the stocks created since the war, (computed on the above sum of \$49,780,322 13) and including \$7,968, payable for annuities, will require a sum of	2,994,787 32				
4. The interest on the loan for 1815, (computed to average a half year's interest on the sum of \$11,500,000, being the estimated amount of the treasury notes which may be converted into stocks) will require a sum of		345,000 00			
5. But there must be added, the interest and principal of the temporary loans, due and unpaid, which were obtained under the authority to borrow, granted by the act of the — March, 1812, amounting, for 1815, to the sum of			533,000 00		
					<u>7,325,562 78</u>

And would leave a surplus of

\$674,437 22

It appears, on this view of the sinking fund, (independent of the operation of the past year) that there will be a surplus of \$674,437 22, to be further applied to the reduction of the principal, both of the old and the new public debt. But this can only be now done by purchases in the market.

The proposition to be, at this time, submitted to the consideration of the Committee of Ways and Means, in relation to the stock debt created since the war, involves the following points:

1. That provision be made for the payment, or for the funding of the treasury note debt, so as to relieve the sinking fund from that charge.

2. That the sinking fund be applied, in the *first* place, to the interest and reimbursement of the old six per cent. stock, according to the existing laws.

3. That the sinking fund be applied, in the *second* place, to the payment of the principal and interest of the temporary loans, obtained under the act of March, 1812.

4. That the sinking fund be applied, in the *third* place, to the payment of the interest accruing upon the stock debt created since the war.

5. That the annual surplus of the sinking fund, after satisfying the above objects, be applied to the purchase of the stock created since the war; and that the interest upon the stock annually purchased, be added, from time to time, to that appropriation, for the purpose of making new purchases.

After the present year, there is reason to presume that the public revenue will considerably exceed the public expenditure, and, consequently, that the necessity of borrowing will cease. At that period, a more satisfactory view may be taken of the subject than can be taken while the amount of the public debt remains, in some measure, unascertained; the operation and product of the new taxes, as well as of the impost upon the revival of commerce, are conjectural, and the legislative intentions, respecting a peace establishment, have not been declared.

Since, therefore, the existing sinking fund (being relieved, in the manner before intimated, from the incumbrance of the treasury note debt) is already charged with the payment of the interest on the stock created since the war, and will be sufficient for that purpose, besides paying the interest, and the annual reimbursement of the stock created before the war, I respectfully propose that no further step be taken, during the present session of Congress, than to authorize the subscription of treasury notes to the loan which is now under legislative consideration, and to direct the surplus of the sinking fund to be applied to purchases of the stock created since the war, for the emolument of the fund. But it will be proper to confine the benefit of subscribing to the loan, to such treasury notes only as have been, or may be, issued under the acts which render them a charge upon the sinking fund, namely, the acts of the 30th of June, 1812, of the 25th of February, 1813, and of the 4th of March, 1814; and the Secretary of the Treasury should be authorized to designate the notes to be received in subscription, from time to time, according to the date of the issues.

I have the honor to be, very respectfully, sir, your most obedient servant,

A. J. DALLAS.

The Hon. J. W. EPPES,
Chairman of the Committee of Ways and Means.

No. 453.

Receipts and Expenditures, from the 4th of March, 1789, to the 31st December, 1815; also, the balances in the Treasury at the close of each year.
