AMERICAN STATE PAPERS.

FINANCE.

7th CONGRESS.]

No. 187.

[2d SESSION.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, DECEMBER 20, 1802.

In obedience to the directions of the act, supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report:

The permanent revenues of the United States, exclusively of fees, fines, and penalties, which, in a general view of the subject, may be omitted, consist of duties on merchandise and tonnage, proceeds of the sales of public lands, and duties on postage.

The duties on postage, which were, in the annual report of last year, estimated at \$50,000, have, during the year ending on the 30th day of September last, yielded 50,500 dollars. The decrease of ship letters, the extension of the establishment through unproductive roads, and the acceleration of the progress of the mail, may, however, cause some defalcation in the receipts of the ensuing year.

Three hundred and twenty-six thousand and fifty-two dollars and eight cents have been received, during the same year, on account of public lands; of which sum, 17,162 dollars and 50 cents were paid in the treasury, in evidences of the public debt, and 179,575 dollars and 52 cents in specie; the local situation of the land offices not having yet rendered it practicable to draw the balance from the receivers of public moneys.

Three hundred and forty thousand acres of land have been sold, for six hundred and eighty thousand dollars, during the year ending on the 31st day of October last; of which quantity near ninety-seven thousand acres were sold on account of pre-emptions claimed by purchasers under John Cleves Symmes, and two hundred and forty-three thousand acres are the result of current sales. The annexed statement A designates the quantities respectively sold in the several districts, and the annual payments receivable on account of the balance of nine hundred and sixty thousand dollars, due on these and the preceding sales.

From those several results it appears probable that the annual receipts under this head will not, on an average, fall short of the sum of four hundred thousand dollars, at which they have been estimated.

Although it had been anticipated that the receipts in the treasury, on account of duties on merchandise and tonnage, could not, for the present year, be affected by the restoration of peace in Europe, yet the sum actually paid has exceeded the most sanguine expectations. Twelve millions two hundred and eighty thousand dollars have been received, during the course of the year ending on the 30th day of September last—a sum larger, by two millions of dollars, than the amount received for the same duties, during the preceding or any other year; and which exceeds, by twelve hundred thousand dollars, the aggregate heretofore collected in any one year, on account of both the impost and the internal duties, repealed by an act of last session.

This excess, which had not been calculated upon, is considered, alone, as amply sufficient to cover any possible defalcation which might, during the next and ensuing year, reduce that branch of the revenue below last year's estimate of nine millions five hundred thousand dollars. Such defalcation is not, however, apprehended: for, although there are not yet sufficient data precisely to ascertain the effect of peace on the amount of duties, those which are in the possession of this Department tend to corroborate the presumption that that sum, at least, (nine millions and a half) will hereafter be annually received. The statement B, which exhibits a comparative view of that revenue for each quarter, during the last two years, shows that the amount of duties accrued during the nine first months of the present year exceeds eleven millions three hundred thousand dollars; and, after deducting three millions five hundred thousand dollars, amount of debentures issued during the same period, on account of re-exportations of foreign goods, leaves for those three quarters, a balance of more than seven millions eight hundred thousand dollars, subject to no other deduction but the expenses of collection; and from the knowledge already obtained of the importations, during the present quarter, as well as from the gradual diminution of re-exportations, no doubt remains that the nett revenue, accruing during the whole year, will exceed the estimate.

From present appearances, the whole of the permanent revenues of the United States may, therefore, be reasonably computed at ten millions of dollars; of which sum, seven millions three hundred thousand dollars are appropriated for the payment of the principal and interest of the public debt, and two millions seven hundred thousand dollars are applicable to the current expenses of Government.

According to the estimates for the year 1803, those expenses will, exclusively of a sum of one hundred and eighty thousand dollars, wanted to cover the navy deficiencies of the years 1801 and 1802, but including sundry permanent appropriations, which make no part of the annual estimates, amount to two millions six hundred and sixty thousand dollars, to wit:

For the Civil Department, and all domestic expenses of a civil nature, - - - -	\$680,000
For expenses attending the intercourse with foreign nations, including prize causes and Barbary Powers, - - - - -	250,000
For the Military and Indian departments - - - - -	830,000
For the Naval establishment, calculated on a supposition that six frigates shall be kept in constant employment, - - - - -	900,000
	<u>\$2,660,000</u>

Neither the payments due on account of the convention with Great Britain, and which will, for three years, amount annually to eight hundred and eighty-eight thousand dollars, nor the instalments and interest on account of the 200,000 dollars loan obtained from the State of Maryland, for the city of Washington, are included in that calculation, as they may be defrayed out of the following resources, which make no part of the permanent revenues, viz:

1st. The surplus of specie in the treasury, which, as the whole amount there will not, at the close of the present year, fall much short of five millions of dollars, far exceeds the sum which it is prudent to keep.

2dly. The uncollected arrears of the direct tax, estimated at four hundred thousand dollars. And,

3dly. The outstanding uncollected internal duties, amounting to near seven hundred thousand dollars.

The only embarrassment experienced during the course of last year, arose from the difficulty of procuring the remittances necessary to meet the large instalments of debt due in Holland. The impossibility of obtaining bills on that country, to the amount wanted by Government, and the loss which, on account of the rate of exchange, must be incurred by remitting circuitously through England, induced the Secretary of the Treasury to recommend, in a report to the commissioners of the sinking fund, marked C, a recourse to bank stock, as the most favorable mode of remitting.

Of the five thousand shares in the stock of the Bank of the United States, originally subscribed by the United States, 2,780 shares had been sold in 1796, by virtue of the act, entitled "An act making provision for the payment of certain debts of the United States," and for the purpose of discharging a part of the debt due to the bank. The remaining 2,220 shares were now, under the same authority, sold, at 45 per cent. advance. The 1,287,600 dollars which they produced, were, in conformity to the provisions of the said act, applied towards discharging an equal amount of that part of the debt which had become due to the bank before or during the year 1796; and the purchaser of the stock sold, at the same time, to the treasury, an equal sum in bills on Holland, at 41 cents per guilder, the securing of which large amount, at that rate, was the inducement, on the part of Government, to dispose of the bank stock on those terms. As the dividend usually received on the bank stock sold, and the annual interest payable on the debt due to the bank, thus extinguished, were nearly equal, the July half yearly dividend on the stock was, in fact, the premium paid for the purpose of effecting the remittance; and Government has thereby been enabled to obtain, without raising the price of exchange, the whole amount wanted to meet the payments due in Holland, till the month of September, 1803.

Exclusively of, and in addition to, the debt of 1,287,600 dollars, thus paid to the bank, out of the proceeds of the sales of bank shares, a sum of eight millions three hundred and thirty-four thousand seven hundred and fifty-seven dollars and eighty-nine cents, has been paid out of the treasury, during the year ending on the 30th day of September last, on account of the principal and interest of the public debt; and the payments, in part, of the principal of the debt made during the same period, have been as followeth:

1st. The payments on account of the principal and interest of the domestic debt, have been -	\$4,628,105 39
From which, deducting one year's interest on the same, - - - - -	3,470,259 75
Leaves a sum, applied to the reimbursement of the principal of the six per cent. and deferred stocks, of - - - - -	1,157,845 64
2d. Paid to foreign officers, and for the registered debt, - - - - -	9,603 18
3d. Principal of domestic loans (exclusively of the 1,287,600 dollars paid out of the proceeds of bank shares) - - - - -	202,400 00
4th. Evidences of public debt paid for lands, - - - - -	17,162 50
5th. The payments on account of the principal and interest of the foreign debt, have been - - - - -	3,310,874 32
From which sum, deducting one year's interest and charges, equal to 462,731 00	
And, on account of the different rates at which bills have been purchased, and of sundry bills returned for non-payment, and now in suit, a further sum of - - - - -	82,284 98
	<u>545,015 98</u>
Leaves, applicable to payment of the principal, - - - - -	2,765,858 34
	<u>4,152,869 66</u>
Amounting, altogether, to four millions one hundred and fifty-two thousand eight hundred and sixty-nine dollars and sixty-six cents. And if to that sum shall be added the - - - - -	1,287,000 00
Paid on account of the principal of the debt due to the bank, out of the proceeds of the sale of the bank shares, the total amount of debt extinguished during that year, will be found to exceed five millions four hundred and forty thousand dollars, - - - - -	<u>5,440,469 66</u>

The balance of specie in the treasury, which, on the first day of October, 1801, amounted to 2,948,718 dollars and 73 cents, had increased, on the first October, 1802, to the sum of 4,539,675 dollars and 57 cents; making a difference in favor of the treasury, of 1,590,956 dollars and 84 cents; which last sum, added to the above-mentioned payment of 4,152,869 dollars and 66 cents, made out of the treasury, on account of the principal of the public debt, makes an actual difference, in favor of the United States, of more than five millions seven hundred and forty thousand dollars, during that year.

The payments on account of the principal of the public debt, from the 1st day of April, 1801, to the 30th day of September, 1802, (exclusively of, and in addition to the bank debt, discharged out of the proceeds of bank shares) amounts to - - - - -

Viz:	
On account of the domestic debt, - - - - -	\$1,334,942 81
On account of the foreign debt, - - - - -	3,302 543 63
And in re-payment of temporary loans, - - - - -	702,400 00
	<u>\$5,339,886 44</u>

And if to that sum shall be added the increase of specie in the treasury, during the same period, which, (as the amount on the 1st April, 1801, did not exceed 1,794,044 dollars and 85 cents) amounts to - - - - -

The difference in favor of the United States, for those eighteen months, will be found equal to eight millions eighty-five thousand and five hundred and seventeen dollars and sixteen cents, -

\$8,085,517 16

Of the annual appropriation of 7,300,000 dollars, for the principal and interest of the public debt, near three millions nine hundred thousand dollars will be wanted to pay the interest which falls due in the year 1803, and the residue, amounting to three millions four hundred thousand dollars, may be considered as the sum applicable, during that year, to the extinguishment of the principal of the debt.

From all which it results, that, so long as the United States shall not be afflicted by any unforeseen calamity, and whilst the public expenditures shall be kept within their present limits, there does not appear any necessity for increasing the public revenues.

All which is most respectfully submitted, by

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *December 16th, 1802.*

(a) This column shows the true amount of gross revenue accruing during each quarter, (after deducting from the total amount of duties, the amount of debentures, bounties, and allowances, granted for, or in lieu of, drawback on the re-exportation of foreign articles) and subject to no other deductions but the expenses of collection.

(b) The accounts for several small ports, for these three quarters, are on estimate.

C.

At a meeting of the Commissioners of the Sinking Fund, on the 7th of June, 1802,

Present: The Secretary of State, the Secretary of the Treasury, the Attorney General of the United States.

The Secretary of the Treasury reported to the Board, that provision has already been made to meet nearly all the demands which will become due in Holland during the course of the present year; but that it is necessary to make immediate provision for the payments on account of principal and interest, which fall due there, during the first five months of the year 1803, and amounting to four millions four hundred and thirty-nine thousand eight hundred and thirty guilders, and payable at the following periods, viz:

1st of January,	-	-	-	-	872,700 guilders.
1st of February,	-	-	-	-	986,350
1st of March,	-	-	-	-	601,090
1st of June,	-	-	-	-	1,979,780

That, from the great diminution of trade between this country and Holland, he has ascertained, during his late excursion to New York and Philadelphia, that it is impracticable to obtain bills on Holland to that amount; that the rate of exchange is already forty-one cents per guilder, and that any attempt, on the part of the Government, to procure the large amount now wanted, would indubitably raise, considerably, the rate of exchange.

That, if it shall be attempted to remit, by the way of England, the loss will be also considerable; the present rate of exchange with that country being now above par, and raising, and would indubitably be enhanced, should Government come into the market for large purchases; and the rate of exchange between England and Holland being, by the last advices, ten guilders eight sivers per pound sterling, nor likely to become more favorable, which, supposing the whole amount in bills on England to be procurable (which is not believed to be the fact) at 168, would, including the commission of one per cent. in England, amount to forty-three and a half cents per guilder.

That the Bank of the United States having been applied to, has refused to undertake to contract for making the necessary remittance; and that the two only considerable offers made to the Secretary, are now submitted to the Board, viz:

The Manhattan Company offer to remit the whole, at the rate of forty-three cents per guilder.

Alexander Baring offers to remit guilders 3,140,487 16½, payable in Amsterdam, at the following dates, viz:

1st of January, 1803,	-	-	-	-	605,000 guilders.
1st of February,	-	-	-	-	685,000
1st of March,	-	-	-	-	425,000
1st of June,	-	-	-	-	1,425,487 16½

And at the rate of forty-one cents per guilder: Provided, however, that the United States shall sell to him the two thousand two hundred and twenty shares of the Bank of the United States, owned by the United States, at forty-five per cent. advance, or at the rate of five hundred and eighty dollars per share; which last proposition is recommended by the Secretary of the Treasury as the most eligible; as, exclusively of the advantageous rate of exchange thereby secured, the transaction will not have any unfavorable effect on the rate of exchange generally, and, by so considerably diminishing the demand, will enable the United States to obtain what is still wanted, at a reasonable rate; and because, in his opinion, the price obtained for the Bank shares, is more than could be obtained were they thrown in the market for sale, and more than their intrinsic value. Whereupon, it was

Resolved, by the Board, "That the Secretary of the Treasury be authorized to sell the shares of the stock of the Bank of the United States, belonging to the United States, and that the proceeds thereof be applied to the payment of the capital or principal of any part of the debt of the United States, which had become due to the Bank of the United States before or during the course of the year 1796, and which remains still unpaid, in conformity to the provisions of the act, entitled 'An act making provision for the payment of certain debts of the United States,' passed on the 31st day of May, 1796."

JAMES MADISON, *Secretary of State.*
ALBERT GALLATIN, *Secretary of the Treasury.*
LEVI LINCOLN, *Attorney General.*

Attest,

EDWARD JONES, *Secretary to the Board of Commissioners of Sinking Fund.*

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 22, 1802.

Mr. SAMUEL SMITH, from the Committee of Commerce and Manufactures, to whom was referred the petition of John Holland, Jr. of Boston, made the following report:

That it appears from the proofs submitted, that the petitioner arrived in the port of Boston, in the schooner Hannah, on Sunday, the twentieth of September, one thousand eight hundred and one; that, on Monday, the twenty-first, he entered the said schooner at the custom house, being himself the owner and commander; that, on the night of the same day, his schooner caught fire below the cabin floor, and the fire increasing, the said schooner was scuttled, by order of the fire wards, and sunk; by which the cargo suffered great damage.

The petitioner, therefore, prays a remission of duty on the said cargo, in proportion to the damage sustained.

The committee are of opinion, that, as no part of the cargo had been landed, the prayer of the petition ought to be granted, and recommend the following resolution:

Resolved, That the collector for the port of Boston and Charlestown be, and he is, hereby, authorized to have ascertained the rate of damage sustained by John Holland, Jr. on the goods which were on board the schooner Hannah, when she caught fire, and remit to the said John Holland the duties, in proportion to the damage sustained by the goods damaged as aforesaid.

7th CONGRESS.]No. 189.[2d SESSION.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 4, 1803.

TREASURY DEPARTMENT, *January 3, 1803.*

SIR:

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement, exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1799, 1800, and 1801.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the *House of Representatives.*

A Statement exhibiting the amount of Drawbacks payable on sundry articles exported from the United States, in the years 1799, 1800, and 1801, compared with the amount of Duties collected on the same, respectively.

7th CONGRESS.]

No. 190.

[2d SESSION.]

INTERNAL REVENUES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 6, 1803.

TREASURY DEPARTMENT, *January 3, 1803.*

SIR:

I have the honor to transmit two statements relating to the internal revenues of the United States, accompanied with a letter from the commissioner of the revenue, explanatory thereof.

The statement marked A exhibits the official emoluments and expenditures of the officers employed in collecting the internal revenues of the United States, from the first of January, 1801, to the 31st of December following, and is rendered in pursuance of an act of Congress, passed on the 11th day of July, 1798.

The statement marked B exhibits the amount of duties upon domestic distilled spirits and on stills; the amount of duties upon sales at auction, refined sugar, carriages, and upon licences to retailers; and the amount of duties upon stamped vellum, parchment, and paper, and which have accrued from the first of January, 1801, to the 31st of December following, and is rendered in pursuance of the resolution of the House of Representatives, passed on the 6th day of January, 1797.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the *House of Representatives.*

TREASURY DEPARTMENT, *Revenue Office, December 29, 1802.*

SIR:

I have the honor to enclose two statements relating to the internal revenues of the United States, which have been prepared pursuant to a resolution of the House of Representatives, passed on the 6th day of January, 1797, and an act of Congress passed on the 11th day of July, 1798.

These statements exhibit the amount of duties upon *domestic distilled spirits and stills; sales at auction; refined sugar; carriages; retailers' licences; and stamps upon vellum, parchment, and paper*; also, the *official emoluments and expenditures* of the officers employed in collecting the same, for the year prior to the first day of January, 1802, as ascertained from abstracts rendered by the supervisors of the respective districts.

In order to show the progress of remittances, during the period for which these accounts are made up, I have annexed a note of the sums which were paid into the treasury, and covered by warrant, on account of the internal revenues, and on account of the direct tax, by the several supervisors.

I have the honor to be, with perfect respect, your obedient servant,

WILLIAM MILLER, Jr. *Commissioner of the Revenue.*

The Honorable the *Secretary of the Treasury.*

A.

Statement showing the number of each description of officers actually employed in each district, during the year 1800, the amount allowed by law for salaries, &c. and the emoluments and expenditures, during the year ending on the 31st December, 1800.

TREASURY DEPARTMENT, Revenue Office, December 29, 1802.

WILLIAM MILLER, Jr., Commissioner of the Revenue.

7th CONGRESS.]

No. 191.

[2d SESSION.]

MINT.

COMMUNICATED TO CONGRESS, JANUARY 11, 1803.

Gentlemen of the Senate
and of the House of Representatives:

I transmit you a report, received from the Director of the Mint, on the subject of that institution.

January 11, 1803.

TH: JEFFERSON.

MINT OF THE UNITED STATES, 1st January, 1803.

The Director of the Mint of the United States begs leave respectfully to make his annual report on the issues and state of the mint.

He is happy to inform the President that the bullion, deposited in the mint during the past year, has far exceeded what was expected at the beginning of it, notwithstanding the considerable check given to deposits, for some time, by frequent reports from the seat of Government, during the last session of Congress, that the mint would be abolished.

Since the 1st day of January, 1802, there has been issued from the mint a sum, amounting, in the whole, to five hundred and sixteen thousand one hundred and fifteen dollars and eighty-three cents, as will appear in detail by schedule No. 1, hereunto annexed, which have been added to the current coin of the Union. Of this sum, one hundred and twenty nine thousand seven hundred and thirty dollars and ninety one cents, in value, in gold, have been coined from bullion and gold dust imported into the United States, and collected to the mint, as a centre, from the different parts of the Union. The balance of the gold coinage has been coined from clipped, plugged, and

otherwise spoiled foreign coins, which have been sent to the mint as bullion. Had not this whole sum been coined in the United States, it must have been remitted to the European markets, in which case the freight, insurance, and commissions, with the profits on the cents, would have amounted to a sum nearly equal to the current expenditures of the mint.

All these deposits were private property, the certificates for which were sold, generally, as soon as given, to the banks in this city, at a fourth and a half per cent. discount for the delay of coinage. The banks are fond of keeping the coin in their vaults, as part of their capitals, on account of the ease with which they are counted, without the trouble of weighing. The Bank of the United States, indeed, having a considerable part of their specie in this coin, have been enabled, for some time past, to cancel their five dollar notes, and to substitute the payment of half eagles, by which our coins begin to be more generally dispersed among the people.

There have never been any of the precious metals coined on account of the Government of the United States.

Comparative issues from the mint, for several years past, will appear by schedule No. 2, also hereunto annexed. The current expenses of the mint, for the past year, have amounted to seventeen thousand four hundred and sixty-two dollars and sixty-five cents, as will appear from schedule No. 3, from which the profits on the copper coinage, amounting to \$5,644 33 should be deducted. Besides the cents on hand, we have near twenty-four tons of copper-planchettes ready for striking; the coinage of which are in daily operation, at the rate of fifteen thousand cents a day.

It is a duty incumbent upon the Director of the Mint respectfully to call the President's attention to the expiration of the law of the United States, for continuing the mint at Philadelphia, on the 4th of March next, by its own limitation. It, therefore, becomes absolutely necessary that the subject should be brought before Congress, so early, that provision may be made for the contingency. If Congress should rise without doing any thing therein, the mint could not be continued in Philadelphia, with propriety; neither could it be removed to the seat of Government, for want of a law to authorize it.

It is but doing justice to merit to say, that the officers of the mint, concerned in the coinage, and the workmen, have greatly increased in their professional knowledge, and have acquitted themselves with strict integrity, and particular attention to their several departments, for many years past; so that not a dollar has been lost, except in one solitary instance, when the culprit was detected by their assiduity and care, prosecuted and punished, and it was by their exertions that the mint was kept open during the late distress of the city, by the fever of last summer.

If the mint should remain in its present situation, there will be a necessity of, at least, two additional horses, and some repairs to the machinery—part of it having been repaired, the past year, from necessity. At least five hundred dollars will be necessary, in that case, to be added to the usual estimate, to be appropriated for the purchase of horses, and further repairs to the present machinery.

All which is respectfully submitted to the President, by his very obedient and humble servant,

ELIAS BOUDINOT, *Director.*

To the PRESIDENT of the United States.

An abstract of the Coins struck at the Mint of the United States, from 1st January to 31st December, 1802.

No. 192.

[2d SESSION.

EXTENSION OF DUTY BONDS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 14, 1803.

Mr. RANDOLPH, from the Committee of Ways and Means, who were instructed "to inquire into the expediency of prolonging the terms of payment on bonds due by merchants who may have been sufferers by the late fire at Portsmouth, in New Hampshire," reported the following resolution:

Resolved, That the Committee of Ways and Means be directed to prepare and report a bill to authorize the Secretary of the Treasury to suspend, for a limited time, the collection of bonds due to the United States by merchants of Portsmouth, New Hampshire, who have suffered by the late conflagration of that town.

TREASURY DEPARTMENT, *January 11th*, 1803.

SIR:

I have the honor to enclose the copy of a letter of the Collector of Portsmouth, in New Hampshire. The calamity which has lately afflicted that town, is so extensive, that, if a decision depended upon me, I would feel inclined to grant the prolongation of credit requested in favor of the sufferers.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Hon. S. SMITH, *Chairman of the Committee of Commerce and Manufactures.*

COLLECTOR'S OFFICE, DISTRICT OF PORTSMOUTH, *December 29*, 1802.

SIR:

The greatest calamity that ever befel the town of Portsmouth took place on Sunday last, of which the New Hampshire Gazette, now enclosed, gives some of the particulars. The store employed for containing public property, as well as the custom house, was consumed. But I have the satisfaction to inform you, that the books and papers of the custom house were all secured, and the loss sustained was only the stamping press, the scales and weights, and some stores belonging to the revenue cutter. The weights can be restored to use. The office furniture was consumed.

Among the sufferers are several persons indebted to the United States on bonds for duties, which the present calamity will render distressing to them to discharge at the terms they are payable; and it would greatly relieve, and be singularly gratifying, to such, if a prolongation of the term of credit could be authorized by an act of Congress, as it is now in session, and which would tend to evince the continued attention of the Government to relieve the distresses of the People.

I have the honor to be, with perfect respect, sir, your most obedient servant,

JOSEPH WHIPPLE.

The Hon. ALBERT GALLATIN, Esq.

7th CONGRESS.]

[2d SESSION.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 4, 1803.

The memorial of the subscribers, gun manufacturers, in the borough of Lancaster, in the Commonwealth of Pennsylvania, respectfully sheweth:

That your memorialists have seen, with deep and affecting concern, a resolution, to exempt from impost duties, arms manufactured in foreign countries, pass in the House of Representatives of the United States. To extend the hand of power, and crush the manufactures of our common country, in their most infant state, your memorialists would, in times more pressing than the present, consider impolitic; but, when, in the full enjoyment of order and peace, the various resources of our country excite improvement and accumulate wealth, the manufacture of arms by ourselves, and for our own use, instead of receiving the fostering protection of our Government, is defeated, after a successful experiment of its utility—your memorialists can behold no point of improvement upon which they can rest with stability; no manufacture, that promises to be permanent; no experiment, that will flatter them with patronage and encouragement.

Encouraged by the Government of the State, in which your memorialists live, they have, at very great expense, established manufactures of arms, and, in conjunction with others in the State, have nearly completed twenty thousand stand, for the use of the commonwealth of Pennsylvania. Allured by this encouragement, they have increased their establishments, taken in and instructed apprentices, and excited, by their undertakings, a competition—a spirit of enterprise, among their fellow citizens, in this manufacture, so essential to national safety, national independence, and national reputation. If the independence and liberty of a nation depend upon the correspondence of its resources to its wants, then is there no want so imminent now, which should be more necessitously supplied from the resources of our own country, than the manufacturing of arms. But, by giving a loose to the facility of importing arms, the Government of the United States will crush this manufacture in its infant establishment, which your memorialists hoped to see cherished—if not for the maintenance of the artist, at least for the safety of the country. Arms may be imported, but who will keep them in repair, after the dispersion of our journeymen and apprentices, who must engage in other pursuits, when the one they have been trained up in will cease to afford them subsistence? Will the day of importation last forever? or will there never be a day when the manufacture of arms will be thought useful, and merit the protection of Government? A given stock of arms will be exhaustible in war, should it happen; and from whence will it be supplied, if arms are to be procured in another country, when the very cause of the consumption will preclude the possibility of their importation? But the encouragement of such a domestic manufacture will establish an inexhaustible stock of arms, in time of need; artists will be numerous, and manufactures convenient; the means will be easy, and their attainment certain. At considerable expense have your memorialists undertaken, and with some difficulty progressed in, the establishment of this manufacture. Mills for the making of gun barrels have been erected; gun locks, and every other article in a gun, have been made in the best manner, and of the most substantial kind. The workmen, the execution, the machinery, and the demand, have all progressed apace with each other. A few years' more protection from Government, and this manufacture, in this country, we believe, will be too firmly established to be destroyed by the importation of foreign arms. Break it up, by the resolution you have adopted, and it will not revive for ages: for no security can afterwards be given to its re-establishment, in which a prudent man will confide. But, your memorialists do not consider the manufacture of arms exclusively affected by this resolution, which passed your honorable House; they humbly conceive the principle of that resolution strikes deep at all our domestic manufactures: for, with this example before them, few manufacturers will be disposed to place reliance on the improvement and permanency of any manufacture. Your memorialists beg leave further to represent, that the manufacture of arms, in this State, is not merely circumscribed within the limits of the county of Lancaster; it is diffused over the State, equally progressing, in extent and improvement, throughout; and they confidently assert that twenty thousand stand of arms can be annually manufactured in this State.

Your memorialists beg leave to call the attention of your honorable body to this extensive manufacture, in this State, and they would, with deference, ask, if it be prudent or politic to reduce it, by a single decision—to destroy it with one blow! If our sister States to the southward have not established, nor can now practically establish, such extensive manufactures of arms, they can here be supplied, on the same terms we have supplied our own Government; and though they may purchase arms cheaper in Europe than they can from the American manufacturer, yet, as they will suffer no grievance, when supplied on the same terms with other States, they should obtain no preference by being supplied by importation, and that, too, at the expense of destroying a useful domestic manufacture.

If these considerations can command the attention of the honorable the Congress of the United States, we trust and pray that the impost duty on arms will not be taken off; and that the encouragement of manufacturing them among ourselves, will be considered not only expedient, but necessary.

And your memorialists, as in duty bound, will ever pray.

January 28th, 1803.

No. 194.

[2d SESSION.

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 7, 1803.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their report of the 16th of December, 1801, as far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the third day of the present month, and in the proceedings of the officers of the treasury, therein referred to, which are herewith referred to, and prayed to be received as part of this report.

All which is respectfully submitted, by

AARON BURR,
*Vice President of the United States and President of the Senate.*JAMES MADISON, *Secretary of State.*ALBERT GALLATIN, *Secretary of the Treasury.*LEVI LINCOLN, *Attorney General of the U. S.*

WASHINGTON, February 5, 1803.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund:

That, since the date of the last report to Congress, of the 16th December, 1801, and to the 1st January, 1802, the following parts of the principal of the public debt have been discharged:

1st. In payment of instalments of six per cent. stock, viz. seventh instalment of the six per cent. stock, which, pursuant to the "Act making further provision for the support of public credit, and for the redemption of the public debt," passed 3d March, 1795, and the act in addition thereto, passed the 28th April, 1796, became payable for the year 1801,	\$805,846 30
First instalment of the deferred six per cent. stock, which, pursuant to the acts above recited, also became payable in the year 1801,	272,416 24
	<u>\$1,078,262 54</u>
2d. In payment of the tenth and last instalment of the subscription loan for bank stock, due on the last day of December, 1801,	200,000 00
Amounting to	<u>1,278,262 54</u>

Which payments were made out of the following funds:

1st. The interest fund on sums which accrued on the stock purchased, and transferred to the commissioners of the sinking fund, in trust for the United States, as particularly stated in the document hereto annexed, marked B, 1801,	\$312,282 68
2d. The fund arising from the payment of debts which originated prior to the present constitution, as particularly stated in the document marked C, 1801,	420 00
3d. The fund arising from dividends on the capital stock which belonged to the United States, in the bank of said States, from 1st January, 1800, to 30th June, 1801, after deducting the interest on the subscription loan for the same period, as stated in the document marked D, 1801,	94,320 00
4th. The fund arising from the sale of public lands, being the amount drawn by the agent to the commissioners, pursuant to the act of third March, 1795, as stated in the document marked E, 1801,	162,021 29
5th. The proceeds of the duties on goods, wares, and merchandise, imported, on the tonnage of ships or vessels, and on stills, and spirits distilled in the United States, appropriated by the 8th section of the act of 3d March, 1795, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt,"	709,218 57

Making, in the whole, the amount of the reimbursements of the six per cent. stock, and the tenth and last instalment of the subscription loan for bank stock, as above stated,

\$1,278,262 54

That, besides the above mentioned reimbursements, there remained, at the close of the year 1801, an unapplied balance of 2,513,846.9 guilders, applicable to the payment of the principal and interest of the Dutch debt for the year 1802, and consisting of remittances purchased and paid for, before the first day of January, 1802, beyond the sums wanted to meet the demands in Holland during the year 1801.

That, during the year 1802, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt:

1st. There was paid, on account of the reimbursement and interest of the domestic debt, the sum of	\$4,654,699 61
2d. On account of principal of moneys borrowed of the Bank of the United States,	1,290,000 00
3d. On account of interest on domestic loans,	162,025 00
4th. On account of reimbursement of capital and interest of Dutch debt, exclusive of repayments into the treasury,	3,243,065 91
5th. On account of debts due to foreign officers,	7,994 92
6th. On account of certain parts of the domestic debt,	14,966 84
	<u>\$9,372,752 28</u>

Which disbursements were made out of the following funds:

1st. From the funds appropriated by the first section of the "Act for the redemption of the whole of the public debt," viz:	
From the fund arising from interest on the domestic debt, transferred to the commissioners of the sinking fund, as per statement herewith for 1802, marked B,	\$326,449 92
From the fund arising from payments into the treasury, of debts which originated under the late Government, as per statement herewith for 1802, marked C,	888 79
From the fund arising from dividends on the capital stock which belonged to the United States, in the bank of said States, from 1st July, 1801, to 31st December following, as per statement herewith, marked D,	33,960 00
From the fund arising from the sales of public lands, being the amount of moneys paid into the treasury in the year 1802, as per statement herewith, marked E,	179,575 52

From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels,	6,759,125 77
Making, in the whole, the annual appropriation, by law, for the year 1802, under the act aforementioned,	<u>\$7,300 000 00</u>
2d. From the proceeds of goods, wares, and merchandise, imported, and on tonnage, advanced by the treasury in order to enable the commissioners in Holland to make the payments in time, conformably to the fifth section of the "Act making provision for the whole of the public debt," and being in part, and on account of, the annual appropriation of \$7,300,000, for the year 1803,	785,152 28
3d. From the proceeds of 2,220 shares of the capital stock of the Bank of the United States, which have been sold, in pursuance of the "Act making provision for the payment of certain debts of the United States," the proceeds of which have been placed in the treasury, as appears from the proceedings of the accounting officers, herewith transmitted, marked F,	1,287,600 00
	<u>\$9,372,752 28</u>

That the above mentioned disbursements, made during the year 1802, and amounting to \$9,371,752 28, together with the above mentioned balance of 2,313,846.9 guilders, which remained unexpended on the first January, 1802, have been applied as follows, that is to say:

1st. To the payment of the interest which, during the year 1802, accrued on the whole of the public debt, including domestic loans,	<u>\$4,065,738 47</u>
2d. To the reimbursement of the following parts of the debt of the United States, which have been discharged during the year 1802, viz:	
Temporary loans obtained of the Bank of the United States, from the proceeds of two thousand two hundred and twenty shares of bank stock,	\$1,287,600
From the proceeds of duties on merchandise and tonnage,	2,400
Instalments of the Dutch debt which became due by contract in 1802, viz:	
	Guilders at 40 cts.
Second instalment of two millions loan, of 4th March, 1774,	250,000
Fifth and last instalment of one million loan of 1st January, 1787,	200,000
Fourth instalment of one million loan, of 13th March, 1788,	200,000
Third instalment of three millions loan, of 1st February, 1790,	600,000
First instalment of two millions five hundred thousand loan, of 2d March, 1791,	500,000
First instalment of two millions and fifty thousand loan, of 30th November, 1791,	410,000
First instalment of six millions loan, of 14th December, 1791,	1,200,000
	<u>3,360,000</u>
	At 40 cents, - - - 1,344,000
	<u>\$2,634,000</u>
3d. To the provision necessary for the reimbursement of the eighth instalment of the six per cent. stock, and the second instalment of the deferred six per cent. stock, becoming payable the 1st January, 1803, estimated at the sum of	<u>\$1,117,869 37</u>

And that, besides the above mentioned reimbursement and payments, there remained, at the close of the year 1802, exclusively of the amount of sundry protested bills still outstanding, and of unexpended balances in the hands of agents, an unapplied balance, estimated at 5,914,606.10 guilders, applicable to the payment of the principal and interest of the Dutch debt for the year 1803, and consisting of remittances purchased and paid for before the first day of January, 1803, beyond the sums wanted to meet the demands in Holland during the year 1802.

No purchases of the debt of the United States have been made since the date of the last report to Congress; and the accompanying statement, marked A, exhibits, for the years 1801 and 1802, respectively, the operations at the treasury in the transfer of stock to the commissioners of the sinking fund, in trust for the United States, upon the reimbursement of the foreign debt, in the years 1800 and 1801, and include, also, the sums in the several species of stock transferred in each of those years, in payment for lands sold belonging to the United States, that is to say:

In 1801,	\$23,816 58.
In 1802,	<u>15,518 49</u>

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *February 3, 1803.*

A.

A General Statement of the several stocks transferred to the United States, to the 31st December, 1801, the interest upon which, by the acts of the 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

	Old 6 per cent. stock.	3 per cent. stock.	Deferred 6 per cent. stock.	5 per cent. stock.	5½ per cent. stock.	8 per cent. stock.	Amount of the several species of stock.

DUTY ON REFINED SUGAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 11, 1803.

Mr. RANDOLPH, from the Committee of Ways and Means, to whom was referred the memorial of Charles Gartes, and others, sugar refiners of the City of Baltimore, made the following report:

That, by an act, passed during the last session of Congress, it is enacted that, from and after the 30th of June, 1802, all internal duties on refined sugar shall cease and be discontinued, excepting such duties thereon as should have *accrued*, and *remained* outstanding, on, or before, that day.

That the petitioners complain of a construction given to this act, by the Treasury Department, whereby sugars refined before the above mentioned period, although not removed from the refinery until *after* its expiration, have been subjected to duty.

This construction your committee believe to have been correct, for the following reasons:

1st. The duty is laid, by the second section of the act imposing certain duties on suuff and refined sugar, upon all sugars *refined* after the 30th day of September, 1794, and was not levied on any sugars refined *previous* to that period, although *subsequently* removed.

The act of *refining*, therefore, and not of *removing* the sugars, rendered them liable to the duty; and the provisions in relation to their removal from the refinery, were intended to render convenient and secure the collection of the duty, which, *by the act of refining*, had been incurred. On those sugars, therefore, which have been refined before the 30th day of June, 1802, (and on which the duties have not been satisfied) duties "had *accrued*, and did *remain outstanding*," although they might not have been removed, or sent out of the manufactory.

2d. A contrary construction might have enabled the sugar refiners, by forbearing to remove their sugars from the time of passing the act repealing the duty, until the 1st of July, 1802, to evade, altogether, the payment of those duties, during that period, to the manifest detriment of the revenue, and the evasion of the plain intention of the act in question. But, in consideration of the reduction of price, which, it is believed, did actually take place [in consequence of an expectation that the duties would cease to be collected after the 30th of June, 1803] and of the diversity of opinions which exist in relation to the construction of the law in question, the committee respectfully recommend the following resolution:

Resolved, That no duty shall be collected on sugars, removed from the refinery since the 30th day of June, 1802, any law to the contrary notwithstanding.

7th CONGRESS.]No. 196.[2d SESSION.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 21, 1803.

Mr. SAMUEL SMITH, from the Committee of Commerce and manufactures, to whom were referred the petitions and memorials of the following manufacturers of the United States, to wit: Of the Franklin Association, and other journeymen printers, of comb makers, gun smiths, cork cutters, calico printers, cordwainers, paper makers, letter founders, makers of umbrellas, brushes, glass, stoneware, gunpowder, hats, and starch, praying for protecting duties to be laid on the importation of articles of their respective manufactures, made the following report:

That justice to the petitioners and sound policy point to the necessity of granting governmental aid for the protection of such manufactures as are obviously capable of affording to the United States an adequate supply of their several and respective objects, either by admitting, free of duty, the raw article essential to their manufacture, and which cannot be procured in the United States, or by imposing a higher duty than is paid on those articles, to the manufacture whereof our citizens are incompetent.

The committee take leave to observe, that the duties now payable on importation do not, in their opinion, operate as protecting duties to our infant manufactures; because that the duties on almost all the articles of consumption being nearly equal, the manufacturers of the United States are charged therewith in every thing they consume, and the journeyman being compelled to pay for every thing he consumes at least 28 per cent. more than he would be obliged to pay, if such duties did not exist, he must, of course, be paid in proportion for his labor. Your committee are, therefore, induced to believe that the present duties on imports operate an injury rather than a benefit to the manufacturer of the United States.

Your committee refrain from pressing this important subject during the present session, as well because that the press of public business is such, that time sufficient could not be afforded for a proper discussion, as that they hope and expect that Congress will, at their next session, revise their laws laying duties on imports; as a preparation for which the committee submit the following resolution:

Resolved, That the Secretary of the Treasury be, and he is, hereby, directed to prepare, and lay before Congress early in their next session, a plan for the laying new and more specific duties on goods, wares, and merchandise, imported into the United States, so as that the same shall (as near as may be) neither increase nor diminish the present revenue arising to the United States from imports.

7th CONGRESS.]

No. 197.

[2d SESSION.]

ARREARS OF DIRECT TAXES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 1, 1803.

The Secretary of the Treasury, in obedience to the resolution of the House of Representatives, of the twenty-fourth ultimo, respectfully reports:

That, by the last returns, it appears that the uncollected arrears of the direct tax may be estimated at 367,600 dollars and 73 cents, as will more fully appear by the letter of the commissioner of the revenue, hereunto annexed, and to which the Secretary begs leave also to refer, for the reasons which, in the opinion of the commissioner, have delayed the completion of the collection of that tax.

That, amongst several other causes, the two most prominent impediments seem to have been, first, the difficulty of completing the assessments; and secondly, the length of the process necessary to effect a sale of unoccupied lands; which last cause has operated most forcibly in the States of Massachusetts, New York, Pennsylvania, Virginia, and Kentucky.

That the completion of the assessments was retarded in almost all the States, by the novelty of the experiment, in some, by the sparse situation of the inhabitants, in several, by the large quantity of unseated lands; and particularly, in the three Southern States, by an alleged want of a sufficient compensation for the commissioners and assessors, evidenced by successive resignations.

That, in the State of North Carolina, the difficulty of obtaining assessors was increased by a disqualifying law of the State, and that, for almost a year, and until an extra compensation had been provided for by law, the abstracts were detained in that State, for want of persons to transcribe the assessment lists; for which reasons the tax did not become due there, till the month of November, 1801.

That, in Georgia, the business was delayed one year, for want of a meeting of the Board of commissioners; and that the final proceedings of the Board, which were received at the treasury, in April, 1801, were, on account of numerous inaccuracies, returned, for the purpose of being corrected; which prevented the operation of the tax till January, 1802.

And that, in South Carolina, the assessment, which is not yet completed, has been principally retarded by the difficulty of obtaining a commissioner in the first district, in which five gentlemen, successively appointed commissioners, refused to act, two resigned, and one died.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *February 28th*, 1802.

TREASURY DEPARTMENT, *Revenue Office, February 2d*, 1803.

SIR:

On the subject of the enclosed resolution of the House of Representatives, I have the honor to submit the following information:

The tax assessed on the States of Connecticut, New Jersey, and Delaware, has been collected and accounted for.

The balances outstanding on the New Hampshire and Tennessee lists, were so much diminished, when the supervisors made up their last returns, that I consider the collection thereof completed ere now.

The situation of the other States, appears to be nearly as follows:

The sums to be collected and accounted for, by the collectors, amount to,

In Massachusetts,	-	-	-	-	-	-	\$9,904 89
Rhode Island,	-	-	-	-	-	-	4,833 05
Vermont,	-	-	-	-	-	-	4,896 38
New York,	-	-	-	-	-	-	21,582 92
Pennsylvania;	-	-	-	-	-	-	30,783 70
Maryland,	-	-	-	-	-	-	15,485 45
Virginia,	-	-	-	-	-	-	16,588 71
Kentucky,	-	-	-	-	-	-	24,236 25
North Carolina,	-	-	-	-	-	-	85,474 78
							<u>\$215,788 13</u>

In the State of Georgia, the assessment was complete, and collectors were appointed for all the counties except Bullock and Bryan; the collection was then in progression throughout eighteen districts, but as no moneys had reached the supervisor's hands, the whole quota, amounting to \$38,814 87, may be accounted outstanding.

As the report of the commissioners, who were appointed in South Carolina, has not made its appearance, the collection of the quota of that State, which amounts to \$112,997 73, will be delayed for some time longer.

The circumstances which have impeded the collection are numerous; but, as they have been very frequently the subject of discussion, it may not be deemed necessary to revert to all of them, in the present stage of the business. If inaccuracies are observable in any of the tax lists, they may be attributed, in a great degree, to a want of attention among the land holders, to the provisions and injunctions of the acts of Congress, which authorized the valuations, &c.; and no adequate remedy can now be had for this evil.

Although the compensations allowed to the collectors were not complained of in the populous districts, the rates which were originally established were too low for the newly settled parts of the country, and especially where there are large bodies of unproductive land owned by non-residents. As the prospect of an indemnity for their trouble and expenses was not flattering, the difficulty of obtaining good men to undertake the responsibility of collecting, &c. in such cases, was very much increased; and, in some instances, occasioned considerable delay. In some of the populous districts to the eastward, where there are a great number of small taxes for dwelling houses, of the first and second classes, and small lots owned and occupied by indigent persons, with large families, and scarcely any visible property, the trouble has been so much enhanced as to occasion a temporary suspension of the collection, in some instances.

In order to secure to individuals an opportunity of investigating the demands of collectors, a variety of measures were sanctioned by the act of Congress, which are calculated to procrastinate the sales of property, and collection by other compulsory process; but a circumstance which has exceeded all others in delaying the completion of this business, is the tedious period which has been consumed by some of the Boards of commissioners, in making up thereports upon which the assessments in the several States were founded. I have, however, the satisfaction to state, that, notwithstanding the extraordinary difficulties which have attended the sales of land, for unpaid taxes, they appear to have gone pretty generally into effect in Virginia; and as the same objects are maturing in New York, and other States, I trust that the result of the whole business will be ascertained in a very short period.

I have the honor to be, very respectfully, your obedient servant,

WM. MILLER, *Commissioner of the Revenue.*

The Honorable the Secretary of the Treasury.

7th CONGRESS.]

No. 198.

[2d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 3, 1803.

TREASURY DEPARTMENT, *March 2d, 1803.*

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, of this date, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed on the second of April, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Comptroller's Office, March 2d, 1803.*

SIR:

The statements marked A, B, C, and D, which are herewith laid before you, have been prepared pursuant to the seventh section of an act of Congress, of the second of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." These statements contain all the information concerning the transactions of the mint, which the settlements made at the treasury enable me to give.

I have the honor to be, with great respect, your obedient servant,

G. DUVALL.

The Hon. ALBERT GALLATIN, Esq.

A.

Statement of appropriations made by law for the Mint establishment, for the year 1802, with the amount of warrants drawn by the Secretary of the Treasury on said appropriations.

Amount of warrants drawn on the Treasurer in favor of the mint, for the services for the year 1802, *\$37,027 72	Balance of the several appropriations for the mint establishment, unexpended on the 1st January, 1802,	\$41,187 21
Balance unexpended on 1st January, 1803, 29,535 49	Acts respecting the mint, dated 27th May, 1796, and 24th April, 1800:	
	For amount of cents and half cents paid into the treasury in the year 1802,	14,476 00
	An act making appropriations for the support of Government, for the year 1802, passed 1st May, 1802,	10,900 00
		<u>\$66,563 21</u>
		\$66,563 21

*This sum includes a warrant for \$4,000, drawn in January, 1803, which is accounted for by the treasurer of the mint in 1802; the unexpended balance, therefore, exhibited on the treasury books, is \$ 33,535 49.

A—Continued.

Statement of appropriations made by law for the payment of the salaries of the officers and clerks of the Mint, for the year 1802.

Amount of warrants drawn on the Treasurer of the United States, for the salaries of the officers and clerks of the mint, for the year 1802, \$10,600 00	Balance unexpended on the 1st January, 1802,	\$6 94
Balance unexpended on the 1st January, 1803,	An act making appropriations for the support of Government, for the year 1802,	10,600 00
		<u>\$10,606 94</u>
		\$10,606 94

B.

Summary Statement exhibiting the value of Coins made at the Mint, the amount of disbursements on account of the establishment; the amount allowed for wastage; the amount retained of deposits, and the amount gained on the coinage of copper.

Value of gold, silver, and copper coins made at the mint, to the 31st December, 1801, per summary statement, marked A, accompanying the Comptroller's report of the 22d March, 1802.	.	.	\$3,045,091 94
Ditto, of gold coins made from the 1st January to the 31st December, 1802, per statement herewith, marked B,	.	\$423,310 00	
Ditto, of silver coins, do. do.	.	58,343 00	
Ditto, of copper coins, do. marked C,	.	34,422 83	
			516,075 83
Total value of gold, silver, and copper coins made to the 31st Dec. 1802,	.	.	3,561,167 77
Nett charge on the coinage of gold, silver, and copper, to the 31st December, 1801, per statement, marked E, accompanying the Comptroller's report of the 22d March, 1802,	.	296,957 10	
<i>Deduct the following sums, viz.</i>			
This sum, being the cost and charges of copper, included in statement marked B, accompanying the Comptroller's report of the 30th January, 1799,	\$34,427 48		
This sum, do. do. included in statement marked A, accompanying the Comptroller's report of the 25th April, 1800,	7,110 22		
This sum, do. do. included in statement marked B, accompanying the said report of the 25th April, 1800,	12,438 71		
This sum, do. do. included in statement marked E, accompanying the Comptroller's report of the 22d March, 1802,	45,318 47		
	99,294 88		
This sum, being the amount of wastage on the coinage of gold and silver from the commencement of the institution to the 31st December, 1801, per former statements transmitted,	12,503 03		
		111,797 91	
		185,159 19	
<i>Add the following sums, viz.</i>			
This sum, being the amount gained on the coinage of copper, per statement marked C, accompanying the Comptroller's report of the 22d March, 1802,	19,234 43		
This sum, being the amount retained of deposits, from the commencement of the institution to the 31st December, 1801, per former statements transmitted,	2,149 98		
		21,384 41	
Amount charged for the support of the establishment to 31st December, 1801,	.	.	206,543 60
Amount charged from the 1st January to the 31st December, 1802, (exclusive of the cost of copper, which amounts, for the year, 1802, to the sum of \$20,344 79) per statement herewith, marked A,	.	.	17,462 65
Amount of wastage to the 31st December, 1801, as above,	.	12,503 03	
Ditto, from the 1st January to 31st December, 1802, per statement marked B, herewith,	.	1,836 97	
		14,340 00	
Deduct this sum, being the amount retained of deposits to 31st December, 1801, as above,	2,149 98		
Ditto, this sum, retained of ditto, from January 1st to December 31st, 1802, &c.	185 92		
		2,335 90	
Total amount retained,	.	.	12,004 70
Total amount of disbursements (not including the cost of copper to the 31st December, 1801, which amounts, as appears above, to \$99,294 88) on account of the establishment from the commencement of the institution to the 31st December, 1802,	.	.	236,010 95
From the above deduct the gain on copper coinage, from the commencement of the institution to the 31st December, 1802, per statement, marked C, herewith,	.	.	25,369 30
Nett charge on the coinage of gold, silver, and copper, to the 31st December, 1802, including the cost of lots, buildings, machinery, &c.	.	.	210,641 65

7th CONGRESS.]

No. 199.

[2d SESSION.]

SINKING FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 3, 1803.

Mr. RANDOLPH made the following report:

The Committee of Ways and Means, to whom it was yesterday referred, by a resolution of this House, to inquire and report "whether the commissioners of the sinking fund have, agreeably to the act 'making provision for the redemption of the whole of the public debt of the United States,' applied the sum of \$7,300,000 to the payment of the principal and interest of the public debt? And, also, generally to inquire into the accounts and proceedings of the commissioners of the sinking fund;" have, according to order, proceeded therein, and beg leave to report:

That, pursuant to the directions of the committee, a letter was written and addressed, by the chairman of the committee, to the Secretary of the Treasury, covering a copy of the resolution of the House; and, also, a statement of queries thereon, to which the answer of the Secretary was required; and that, to his answer, which, together with sundry explanatory documents, is annexed to this report, the committee beg leave to refer, and request that it may be considered as part of their report.

MARCH 2d, 1803, at half past 6 o'clock, P. M.

SIR:

The enclosed resolution this day passed the House of Representatives. The annexed paper, marked A 1, contains the objections stated by the mover of the resolution, to which you are requested, if practicable, to return an answer, previous to the dissolution of Congress. It may be necessary to remark, that the objections to the report of the commissioners of the sinking fund consisted principally of a supposed variance between the statements contained in that report, and those submitted by the Secretary of the Treasury, at the last session of Congress, and a denial that the sum appropriated, by the law of the last session, [\$7,300,000] had been applied agreeably to the provisions of the act; and that the sum disbursed by the treasury, on account of the public debt, has not been fully accounted for; an unaccounted balance remaining of \$114,839 44: moreover, that the sum of 5,914,000 guilders is upon estimate.

With perfect esteem, I have the honor to be, yours,

JOHN RANDOLPH.

ALBERT GALLATIN, *Secretary of the Treasury.*

IN THE HOUSE OF REPRESENTATIVES OF THE UNITED STATES,
Wednesday, the 2d of March, 1803.

On motion,

Resolved, that the Committee of Ways and Means be directed to inquire whether the commissioners of the sinking fund have, agreeably to the directions of the act, entitled, "An act making provision for the redemption of the whole of the public debt of the United States," applied the sum of seven millions three hundred thousand dollars, provided by the same, to the payment of the principal and interest of the public debt; and to inquire, generally, into the accounts and proceedings of the commissioners of the sinking fund, and to report to the House.

Extract from the Journal.

WILLIAM LAMBERT, for JOHN BECKLEY, *Clerk.*

A 1.

1. Have the commissioners of the sinking fund applied the sum of \$7,300,000 to the payment of the public debt, in the year 1802? If they have not applied it, why has it not been done?

2. What was the true amount of interest on the public debt for 1802? And is the sum of \$4,065,738 47 that true amount? A detailed account is requested.

3. What have been the actual remittances to Holland, during the year 1802? A detailed account of all the bills, contracts, &c. is requested, with the names of the persons with whom contracts have been made, and from whom bills have been purchased, with the price paid?

4. If the contracts and bills do not cover all the balance in the hands of the commissioners, an account of the remainder is requested, with the names of the persons in whose hands the same remains, with the particular sums held by each person.

5. What were the sums disbursed from the treasury, on account of the domestic debt, between 1st of October, 1801, and 1st of January, 1802; and what were the sums disbursed for the same account, between October 1, 1802, and January 1, 1803?

6. In the treasury report of December, 1801, in table P, the interest of foreign debts, for 1802, is said to be \$476,931: in table R, the interest is said to be, guilders, 1,145,250: from whence arises the difference? How is the interest, stated in table P, made up?

7. An account of the remittance forwarded to Holland, or purchased in 1803, is requested, if convenient; the account to be in detail; and likewise such other information as the Secretary of the Treasury may think will elucidate the transactions of the commissioners.

TREASURY DEPARTMENT, March 3d, 1803.

SIR:

I had the honor to receive, last night, at seven o'clock, your letter of the same day, enclosing a resolution of the House, in relation to the accounts of the sinking fund, and certain inquiries proposed on that subject by the mover of the resolution.

Although I may give information sufficient to come within the meaning of the resolution, and to elucidate the transactions of the commissioners, time will not, perhaps, permit, to procure all the detailed accounts specified in the inquiries: all that can be examined and transcribed in the course of the day shall be transmitted.

I must premise, that I had received yesterday, from the Register of the treasury, a letter, hereunto annexed, A 2, accompanying an official statement B, of all the warrants drawn on the Treasurer, during the year 1802, on account of the public debt, and amounting (after deducting 119,592 dollars and 78 cents, repayments on account of the Dutch debt) to \$9,333,407 40. This sum is \$39,344 88 less than the sum of \$9,372,752 28, which is stated, in the report of the Secretary of the Treasury to the commissioners of the sinking fund, to have been disbursed on that account, during that year.

This error arose, as stated by the Register, from the necessity of making the report of all the transactions of the year 1802, in the first week of February, 1803, and before the books of the treasury, for the last quarter of that year, could be posted up.

The difference resulting from the correction consists in that the disbursements out of the treasury, during the year 1802, were, on account of the reimbursement and interest of the domestic debt, \$4,618,021 39; and on account of the Dutch debt, 3,240,399 25; instead of being \$4,654,699 61 and \$3,243,065 91, as stated in the report; and in that the payment in advance, and on account of the annual appropriation of 1803, was only \$745,807 40, instead of \$785,152 28, as stated in the report.

The objects of the present inquiry seem to be,

I. An elucidation of certain variations between the report to the commissioners of the sinking fund, and that made on the 18th December, 1801, to Congress; to which it is presumed that the 2d and 6th inquiries of the mover of the resolution refer.

In the statement P, annexed to the report of the 18th December, 1801, the interest on the public debt, including the annual reimbursement of the six per cent. and deferred stocks, is stated at	-	-	-	\$5,228,034 67
In the report to the commissioners of the sinking fund, the interest is stated at	-	4,065,738 57		
And the reimbursement of six per cent. and deferred stocks,	-	-	1,117,869 37	
Making, altogether,	-	-	-	5,183,607 94
The difference between the two statements is	-	-	-	\$44,426 73

Which arises from the three following items, viz:

1st. The annual interest on the temporary loans obtained from the Bank of the United States is stated, in the former report, at \$152,900; but one million two hundred and ninety thousand dollars of the principal of that debt having been paid to the bank, on the 30th June last, the interest on that sum ceased after that day; which makes the annual interest on those loans \$35,450 less for that year, and reduces that item, in the last report, to \$117,450, as will appear by the annexed statement C; which, in conformity to the wishes of the mover of the resolution, as expressed in his second inquiry, gives the several items of the gross amount of \$4,065,738 57, stated, in the report to the commissioners of the sinking fund, as the amount of interest for 1802.

2d. The interest due for 1802, on the foreign debt, is stated, in the report of the 18th December, 1801, at	-	-	-	\$476,931
And in the report to the commissioners of the sinking fund, as per statement C, hereunto annexed, at	-	-	-	467,731
Making a difference of	-	-	-	\$9,200

In both statements, the interest, properly so called, is the same, viz: 1,145,250 guilders, equal, at 40 cents per guilder, to 458,100 dollars; but the difference arises from the items of commissions and gratifications.

In the statement of December, 1801, to the sum of - - - - - \$458,100 are added the following commissions, viz:

One per cent. on the interest, equal to	-	-	-	\$4,581
One per cent. on 12,500 guilders, gratifications on the Dutch loans, payable that year, 125 guilders, equal to	-	-	-	50
One per cent. on 3,550,000 guilders, the then supposed amount of the instalments, falling due during 1802, in Holland and Antwerp, 35,500 guilders, equal to	-	-	-	35,500
				18,831
Making, as above stated,	-	-	-	\$476,931

In the report to the commissioners of the sinking fund, to the said sum of - - - - - \$458,100 are added only the two first mentioned commissions, of - - - - - 4,631

But, on the other hand, the gratification of 12,500 guilders, which, in the report of December, 1801, is considered as part of the principal of the debt, and not included in the interest, is, in this last report, considered as part of the interest; it never having been the practice, in former reports of the Board, to include the payments of those gratifications in the account of principal.

This item is equal to - - - - - 5,000

Making, altogether, as above stated, - - - - - \$467,731

The reason why the last mentioned commission of one per cent. on the payment of instalments of the principal, and stated in the report of the 18th December, 1801, as above mentioned, at 35,000 guilders, has been omitted in the report to the commissioners of the sinking fund, remains to be explained.

It had been heretofore supposed at the treasury, that a commission of one per cent. was charged in Holland, by the bankers of the United States, on the payment of the instalments of the Dutch debt; and it is so stated in every official report of the Department on that subject, from that of the late Secretary of the Treasury, presented to the House on the 4th January, 1796, to that of the Secretary, of the 18th December, 1801. An inspection of the accounts of the bankers, and the knowledge that such charges were not usual in relation to loans obtained in Holland, have since shown that that opinion was erroneous, and the item is therefore omitted in the last report.

It is also proper here to observe, though noticed neither in your letter, nor in the enclosed queries, that the instalments, payable in 1802, had heretofore been erroneously supposed to amount to 3,550,000 guilders, as stated in the report of 4th January, 1796, and in that of 18th December, 1801, (statement R) instead of 3,360,000 guilders, as stated in the last report to the commissioners of the sinking fund; an error which arose from a supposition that the Antwerp loan, instead of being payable, as is the case, in five instalments, of 410,000 guilders each, was payable in four instalments, the three first of 600,000 guilders each, and the last of 250,000 guilders.

These two items, viz:

Difference on interest on domestic loans,	-	-	-	\$35,450 00
And do. on do. on foreign debt,	-	-	-	9,200 00
Make an aggregate of	-	-	-	44,650 00
3d. From which must be deducted, a difference between the two statements, in relation to the interest due on account of the domestic debt, and explained by the Register, in the note annexed to statement C, amounting to	-	-	-	223 27
Leaving, for the whole difference, as above stated,	-	-	-	\$44,426 73

II. It is asked, why the sum disbursed by the treasury has not been fully accounted for? Why the sum of 5,914,000 guilders, remitted to Holland, beyond the amount due in 1802, is upon estimate? And it is asked, why there remains a supposed unaccounted balance of \$114,839 44? As tending to elucidate that part of the inquiry, the 3d and 4th queries of the mover of the resolution apply for statements of the remittances to Holland, and of the balances which may remain unexpended in the hands of agents, &c.

From these objections to the report, it is presumable that some misconception has taken place in relation to the mode of conducting the business of the sinking fund.

The commissioners never receive any public moneys, nor are they accountable for the sums paid out of the treasury, on account of the public debt: the persons who, upon the warrants of the Secretary of the Treasury, receive such sums, are immediately charged for the amount, and become then accountable to the treasury, in the same manner as all other receivers of public moneys.

It results from thence that the disbursements out of the treasury shew, themselves, in what manner the money has been applied by the commissioners of the sinking fund; and, accordingly, the annexed statement B exhibits the advances or payments made by them, or rather by the Secretary of the Treasury, as their agent, during the year 1802, and shows the sums paid or advanced, the dates when, the persons to whom, and the objects for which, the payments or advances have been made. There is not, and cannot be, in that respect, any unaccounted balance.

As to the ultimate application of the money, by the persons to whom it has been advanced, it cannot be ascertained with precision, until their accounts shall have been rendered and settled at the treasury: and, it is evident, that neither on the first week of February, 1803, nor on this day, can the accounts of persons who received public moneys in the course of the year 1802, be settled, or even rendered.

It was not, therefore, attempted, in the report to the commissioners of the sinking fund, to state, with precision, an account of the ultimate application of the moneys paid out of the treasury during the year 1802, which should *balance* the aggregate of the disbursements. An attempt of that kind was impracticable, for want of materials. That it was not intended, is evident on the face of the report itself: for the items which relate to that ultimate application are not added together: two of them are explicitly stated to be on estimate; it is as explicitly stated that some protested bills and balances, in hands of agents, are not included; and there are two prominent items amongst the disbursements, viz: "to foreign officers, and in payment of certain parts of the public debt," which are not repeated amongst the items relating to the ultimate application of the money, although credit would have been taken for them, had it been intended to balance the account of disbursements by an account of their ultimate application.

The report exhibits all that could be expected, by designating, in the first place, the several general objects to which the disbursements were applicable during the year 1802, and by giving, in the next place, the estimated amount of remittances to Holland, which had been purchased on account of that part of the Dutch debt which falls due during the present year. If this last amount is stated only as an *estimate*, it is because, as has already been mentioned, the accounts in relation thereto being only rendered in part, and not being yet settled by the accounting officers of the treasury, any calculations taken from the auxiliary books or registers of the bills purchased, are liable to errors, and ought not to be reported to Congress as an ascertained amount.

It so happens, however, that, if an attempt shall be made to strike an approximated balance between the account of disbursements and that of the application of the money, what is called an unaccounted balance will disappear, and instead of it, the amount paid out of the treasury will be found to be *less* than the amount applied, including balances in hands of agents, and the estimated unexpended balance of bills on Holland; which shows only that that balance has been estimated in the report something above, and not below, its real amount.

1st. The disbursements out of the treasury, on account of the interest and reimbursement of the domestic debt, were stated in the report, at	-	-	-	-	-	-	-	-	\$4,654,699 61
But on account of the warrant twice included, as per Register's letter, A 2,	-	-	-	-	-	-	-	-	36,678 22
Leaves, for the true amount,	-	-	-	-	-	-	-	-	<u>\$4,618,021 39</u>

The objects for which that sum was advanced, were,

1. On account of interest on the domestic debt, growing due in 1802, as per statement C,	3,480,557 57
2. On account of the reimbursement of the six per cent. and deferred stock, estimated per do.	1,117,869 35
	<u>4,598,426 92</u>
Leaving a balance advanced, during the year 1802, beyond the amount payable during the same, and for which some of the banks or commissioners of loans are accountable,	19,594 47
	<u>\$4,618,021 39</u>

2d. The disbursements on account of the interest on the domestic loans, were	-	-	-	\$162,025 00
--	---	---	---	--------------

The interest actually accrued during 1802, and which makes part of the amount of interest stated in the report to the commissioners of the sinking fund, as per statement C, was only,	117,450 00
The difference, which amounts to	44,575 00
	<u>\$162,025 00</u>

Results from the circumstance of the interest due to the bank, on domestic loans, being always paid after it has become due. Thus, the sum of \$162,025, disbursed in 1802, was applied to the payment of the interest which accrued on domestic loans, from the 1st of July, 1801, to the 30th June, 1802; and not to the payment of the interest which accrued from 1st January to 31st December, 1802.

3d. The payments to foreign officers, and for certain parts of the domestic debt, being charged in the amount of disbursements, ought to be credited in the account of the application of those disbursements.

Those two items amount to,	-	-	-	-	-	-	-	-	<u>\$22,961 76</u>
----------------------------	---	---	---	---	---	---	---	---	--------------------

If, therefore, there is an apparent unaccounted balance in the report to the commissioners of the sinking fund, of	-	-	-	-	-	-	-	-	\$114,839 44
As stated in your letter, the error stated by the Register,	-	-	-	-	-	-	-	-	39,344 88

Must, in the first place, be deducted, which will leave,	-	-	-	-	-	-	-	-	75,494 56
--	---	---	---	---	---	---	---	---	-----------

For the amount of that supposed balance; and the above stated items are fair offsets against it, viz:

1st. Advanced on account of domestic debt, beyond the interest and reimbursement of the year 1802,	19,594 47
2d. Paid on account of the interest on domestic loans beyond the amount which accrued during 1802,	44,575 00
3d. Paid to foreign officers, and for certain parts of the domestic debt,	22,961 76
Making, altogether,	<u>87,131 23</u>
An aggregate which exceeds, by	11,636 67

\$87,131 23

The above stated supposed unaccounted balance, and shews that such balance does not exist; but that, on the contrary, the estimate of unapplied bills on Holland errs in having made that amount too large. Whether that error consists in having blended, amongst the bills purchased in 1802, some which were actually purchased in 1801, or from some mistake of the clerk in entering the amount of bills purchased, or from having entered as purchased, bills

which are, by contract, to be paid for only when they shall have been honored, or from any other cause, cannot, I apprehend, be ascertained, until the accounts of the purchases shall have been regularly settled, by which means alone can every error be checked and discovered. It was because it was known that an account, given at present, was liable to be affected by all those several sources of error, that it was presented as an estimate. If it shall be found practicable to form and transcribe, in the course of the day, a more correct detailed account from the documents in this office, it shall be forwarded; but it is doubted whether it can be done; and, if done, I must beg leave to repeat, that it must still be considered as an estimate and a sketch, and not as an ascertained account. In the mean while, it is proper to state, that no alteration in that estimate can change any general result; that every person who has received money on that account from the treasury, has been charged, and is held accountable for it, and that the error in the estimate consists in nothing more than in exhibiting a larger amount of bills than has been paid for by the United States.

Leaving those uninteresting and immaterial details, I proceed to what seems to be the principal object of the resolution of the House.

III. It is asked whether the commissioners of the sinking fund have applied the sum of 7,300,000 dollars, to the payment of the public debt, in 1802, in conformity to the act making provision for the redemption of the whole of the public debt of the United States?

Although it be difficult to understand precisely the supposed objection to the proceedings of the commissioners of the sinking fund, which has given rise to this inquiry, yet, as the report to the commissioners exhibits, after deducting the amount lately corrected by the Register, an application of 9,333,407 dollars and 40 cents—of which sum, 1,287,600 dollars were paid out of the proceeds of the sales of bank stock, and the remaining 8,045,807 dollars and 40 cents, out of the other funds vested in the sinking fund—it is presumed that the objection goes to the mode of application, and not to the sum applied; and I cannot find what that can be, unless, by the words “payment of the public debt in the year 1802,” it be meant that the commissioners of the sinking fund were bound by the law to extinguish, during the year 1802, so much of the principal of the public debt, *due that year*, as, together with the interest accruing during that year, would amount to 7,300,000 dollars; and that an application of part of the 7,300,000 dollars to the making provision for the payment of a debt, falling due after the 31st December, 1802, was not to be considered as a part of the said legal payment of 7,300,000 dollars.

The objection does not apply to the actual payments made by the commissioners; nor is it supported by any part of the law.

It does not apply to the payments made by the commissioners in 1802: for, supposing the assumed construction of the law to be correct, it is, nevertheless, true, that the commissioners of the sinking fund have, during the year 1802, paid more than 7,300,000 dollars, falling due during that year.

Those payments consist of the following items, viz:

1. Interest accrued during the year 1802,	-	-	-	-	-	-	-	\$4,065,738	47
2. Instalments of the Dutch debt, which fall due during that year,	-	-	-	-	-	-	-	1,344,000	00
3. Reimbursement of six per cent. and deferred stocks,	-	-	-	-	-	-	-	1,117,869	37
4. Payment to foreign officers, and for certain parts of the domestic debt,	-	-	-	-	-	-	-	22,961	76
5. Payment on account of the principal of the temporary loans due to the bank,	-	-	-	-	-	-	-	1,290,000	00
Amounting, altogether,	-	-	-	-	-	-	-	\$7,840,569	60

Perhaps it may, in the spirit of the objection, be insisted that the payment of 1,117,689 dollars and 37 cents, being the reimbursement of the six per cent. and deferred stocks, which fall due on the 1st day of January, 1803, cannot be considered as the extinguishment of a debt actually due in 1802. But, on that supposition, credit must be given for the payment of a similar reimbursement, which took place on the 1st day of January, 1802, and which, in the report of the Secretary, to the commissioners of the sinking fund, is credited to the account of the year 1801, because it was paid out of funds accrued during 1801; in the same manner as he has credited the payment of 1st January, 1803, to the year 1802, because it was paid out of funds accrued during the year 1802. But, whether he was correct or not, in that arrangement, is immaterial in the present question; and as one payment was made on the 1st January, 1802, and another on the 1st January, 1803, either the one or the other must be credited to the account of the year 1802.

Perhaps it may also be said, that 1,287,600 dollars of the temporary loans, discharged in 1802, having been paid for out of the proceeds of the sales of the bank shares, (which, in the report of the Secretary to the commissioners, are stated as a distinct fund from the annual appropriation of 7,300,000 dollars,) cannot properly be stated as a payment in part of that appropriation. But it is not less true, that, if there is any thing in the law which binds the commissioners to pay annually 7,300,000 dollars, in the manner contended for, there is certainly nothing which compels them to make that payment out of the annual appropriation of 7,300,000 dollars, or out of any other. They may be bound to make payments to a certain amount, but they may make them out of any funds in their hands. To this may be added, that the first section of the law which makes the appropriation, includes in the annual appropriated sum of 7,300,000 dollars, the moneys, other than surplusses of revenue, which constitute the sinking fund, or shall accrue to it by virtue of any provisions theretofore made. The proceeds of the bank shares accrued to the sinking fund, by virtue of the provisions of the act of the 31st day of May, 1796, and might, therefore, by the Secretary of the Treasury, have been contemplated and stated as part of the annual appropriation of 7,300,000 dollars. But, considering it optional with him, either to state those proceeds in that way, or, under the proviso of the 3d section of the act, to state them as a distinct fund, he chose to do it in the last mentioned manner, in order to give the greatest possible efficacy to the sinking fund. From which it results, that, if he had stated those proceeds as part of the annual appropriation of 7,300,000 dollars, although he would have, by that mode, actually diminished the payments on account of the public debt, by a sum of 1,287,600 dollars; yet, he would, upon the construction assumed by the objection, have paid 1,287,600 dollars *more*, on account of the public debt of 1802, than has been done according to the mode of stating the accounts which he has adopted.

But, supposing that the facts supported the objection; supposing that the sales of bank stock had not taken place, and that the payment of the debt due to the bank had not been made; yet, nothing appears in the law which can support the principle assumed by that objection.

The construction which is insisted upon against the proceedings of the commissioners, is, that they are bound by the law to apply annually 7,300,000 dollars, and that that application must, in the very year in which it is made, extinguish a debt or pay an interest due that year, excluding from what is thus considered as a legal payment, any payment on account of a debt falling due after that year. Neither of those positions appears to me to be in any degree supported by any part of the law.

The first section of the law makes an annual appropriation of 7,300,000 dollars.

The second section enjoins it as a positive duty on the Secretary of the Treasury, to cause to be paid, annually, to the commissioners of the sinking fund, the said sum of 7,300,000 dollars, thus appropriated.

The third section directs the commissioners to pay, every year, the interest accruing, and the instalments or parts of principal falling due during that year, and then proceeds in the following words: “And also, it shall be the duty of the said commissioners, to cause to be applied, the surplus of such fund as may at any time exist, after satisfying the purposes aforesaid, towards the further and final redemption, by payment or purchase, of the present debt of the United States,” &c.

There is nothing there which binds the commissioners, after they have satisfied the purposes aforesaid, that is to say, after they have paid the interest and principal falling due in any one year, to apply the remainder or surplus of the 7,300,000 dollars, if any, during the course of the same year.

Provided that the Secretary had placed at their disposition, in due time, the funds necessary to meet the instalments and interest due in the year, it would be a good execution of the law if he paid to them the remainder of the

appropriation on the last day of the year; in which case it would be impossible for them to apply that remainder till the ensuing year.

That act, in fact, as well as all the preceding laws on that subject, places a discretionary power in the commissioners, both as to time and manner, for any payment other than those which fall due in the year, and which must at all events be made; and the proviso of the first section actually contemplates the case of the money remaining unexpended for six months after the end of the calendar year, to which the annual appropriation refers, and provides that, under certain circumstances, such surplus shall cease to be at the disposition of the commissioners.

In the present instance, however, it is, on the part of the Secretary of the Treasury, contended, that more than 7,300,000 dollars, have, exclusively of the payment to the bank, been applied, during the year 1802, *towards the further redemption by payment of the debt of the United States*; and that, after having paid the interest and instalments which fell due during that year, the purchase of about three millions and a half of guilders, remitted to Holland, *towards the payment of the Dutch debt, falling due next year*, was a faithful, legal, and proper execution of the law.

It is difficult to prove a negative; in this case the law is silent as to the species of debt, and the time and manner of applying the surplus moneys; there is nothing which excludes from the meaning of the law an application in the year, which will produce a payment in the ensuing year. The words, "by payment or purchase," are, according to the strict sense of the sentence, connected with the word "redemption;" the further and final redemption is to be effected by payment or purchase; the application of moneys which the commissioners may legally effect, is *towards that further redemption*; the subtlety of the objection seems to consist in making the words "by payment," depend immediately on the words "to cause to be applied;" from which it would result, that the application, instead of being, as expressed by the law, *towards a redemption*, which redemption must, when effected, be effected by payment or purchase, would be confined to an immediate payment; and as the purchase of bills is not an immediate payment, but a provision towards a future payment, such purchases would be excluded from that authorization in the law. Not only that construction is not justified by the strict sense of the words, as connected in the sentence, but, if it was adopted, it must follow that there did not exist, nor ever had existed, (for the phraseology of this sentence is transcribed from preceding laws) any authority whatever, in the commissioners of the sinking fund, to provide, in time, for the payment of the Dutch debt. They must, according to that new construction, be bound in the application of the surplus of the fund to an immediate payment, and not be permitted to purchase remittances for the purpose of making a payment the ensuing year. For this is the only clause which authorizes the commissioners to make any payment, other than for the payment of interest and principal falling due that year; and if it forbids them to make the purchase of bills under the appropriation of 7,300,000 dollars, it forbids them altogether, there being no words in the clause limiting its effect to that appropriation.

It is hardly necessary to dwell any longer on the manifold absurdities which must flow from this assumed construction, and indeed I have no time left for any further observations. Yet I would remark, that, when the act passed, such an application was contemplated, and that it was stated, explicitly, that it was necessary to provide for the payments due in Holland, at least six months before they became due. The statement S, annexed to the report of the 18th December, 1801, and which exhibited the effect of an annual appropriation of 7,300,000 dollars on the debt, was actually predicated on that supposition.

Permit me to add, that the demands in Holland were so considerable, and the difficulties apprehended in procuring the sufficient remittances so alarming, that it is confidently believed that no application of the surplus moneys of the sinking fund could have been more beneficial to the true interests of the United States, than the purchases of remittances which have been made. The whole of what was payable in 1803, which was the heaviest year, has been remitted, without re-loan, and without the employment of an agent abroad; and being now so much before hand, I apprehend no longer any difficulties in procuring, at a reasonable rate, the remittances which shall be wanted for meeting the payments of the following years.

It has been impossible to transcribe the detailed accounts which were required; but I enclose an account D, of the purchases made in 1801 and 1802, on account of the Dutch debt, showing the prices paid in 1802, and the amount of remittances purchased before the 1st January, 1803, applicable to the payment of this year. This must still be considered as an estimate, though more correct than that of the report to the commissioners of the sinking fund.

I regret the late hour at which the resolution was introduced, for no other reason than because it prevents my furnishing the more detailed account which the mover was desirous of obtaining. But I trust that all the information which was substantially necessary to meet the object of the resolution, has been given; and I must rely on the indulgence of the committee for the many imperfections which must be attached to this hasty communication.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Honorable JOHN RANDOLPH, Esq.
Chairman of the Committee of Ways and Means.

A 2.

TREASURY DEPARTMENT, *Register's Office*, March 2d, 1803.

SIR:

I do myself the honor of transmitting an official statement of the several warrants drawn, according to law, upon the Treasurer of the United States, during the year 1802; that is to say:

1st. Warrants for the payment of moneys on account of the reimbursement and interest of the domestic debt, amounting to	\$4,618,021 39
2d. Warrants on account of the repayment of principal of moneys, borrowed of the Bank of the United States,	1,290,000 00
3d. Warrants on account of the payment of interest on the domestic loans,	162,025 00
4th. Warrants on account of the reimbursement of capital, and interest of the Dutch debt, after deducting repayments into the treasury,	3,240,399 25
5th. Warrants on account of debts due to foreign officers,	7,994 92
6th. Warrants on account of certain parts of the domestic debt,	14,966 84
Amounting, in the whole, to the sum of	<u>\$9,333,407 40</u>

The amount stated to have been paid on account of the principal and interest of the public debt, during the year 1802, as per printed report to the commissioners of the sinking fund, page 6, founded on aggregate sums which I had the honor of transmitting you, was

The actual amount paid, was, as per my official statement herewith, only

Variation,	<u>\$39,344 88</u>
------------	--------------------

This variation is confined to two items, viz:

Warrant No. 3381, for the sum of	\$2,666 66
This was taken off, in the transcript from the first entry, as having been paid on account of the Dutch debt; but, since posting the books, it has been ascertained it was for a remittance on account of prize causes.	
Warrant No. 3497, dated 31st December, 1802, for	36,678 22
This sum was added twice, by mistake, in the transcript of items paid on account of the reimbursement of principal and interest of the domestic debt, and arose altogether from the books of the treasury not being posted up, when the transcript (to ascertain the aggregate amount) was made from the book of first entries in the Register's office.	
As above,	\$39,344 88

As it may be expedient, in future, to accompany the annual statements of the sinking fund with official documents, in relation to the disbursements out of the treasury, on account of the principal and interest of the public debt, and as the period now fixed by law may be considered too early in the year to form those official documents to the close of the preceding year, with all possible correctness, I would beg leave to submit whether two weeks later in the session, than the law now directs, might not be a regulation which would be found convenient to the Treasury Department.

I have the honor to be, sir, with the greatest respect, your obedient servant,

JOSEPH NOURSE, *Register.*

The Honorable ALBERT GALLATIN.

B.

List of Warrants drawn, according to law, during the year 1802, on the Treasurer of the United States, on account of the Reimbursement and Interest of the Domestic Debt.

NOTE

Explanatory of the variation in certain capital sums of the public debt, upon which the interest was calculated as becoming due in the year 1802, as severally stated by the Secretary of the Treasury, in his report to the House of Representatives, dated the 18th December, 1801, and his report to the Commissioners of the Sinking Fund, dated the 3d February 1803, and upon which the sum of 223 dollars 27 cents arose.

\$19,091,063 92	Interest thereon, at 3 per cent. being the amount included in the sum of 4,065,738 dollars 57 cents, the whole amount of interest which accrued during the year 1802, on the whole of the public debt, including domestic loans, and as stated by the Secretary of the Treasury, in his report to the Commissioners of the Sinking Fund, dated the 3d February, 1803,	\$572,731 91
\$19,079,705 63	at 3 per cent. being the amount as stated in the report of the Secretary of the Treasury, to the House of Representatives, dated the 18th December, 1801, and referred to therein, document accompanying that report, marked P,	572,391 16
\$11,358 29	This difference arises from an increase of 3 per cent. stock, under the act of 12th June, 1798, more than paid into the treasury on account of lands, between the periods upon which the two statements were formed, viz: the 18th December, 1801, and 31st December, 1802.	
\$41,879,525 23	Amount of 6 per cent. stock upon which a calculation was made at 8 per cent. as stated by the Secretary of the Treasury in said report to the House of Representatives, referred to in said statement, marked P,	\$340 75
\$41,878,086 66	Amount of said stock upon which a calculation was made, as stated by the Secretary of the Treasury in his aforesaid statement to the Commissioners of the Sinking Fund,	3,350,244 53
	Deduct	
\$1,468 57	This variation is from the two dates at which the calculations of interest were made, and arises from payments for lands in public stock, and thereby affects the principal. The first statement referred to in the report of the Secretary of the Treasury, of 18th December, 1801, was made by the Register on the 12th December, 1801, before the public accounts of stock were made up at the treasury to the close of that year; whereas the statement of stock referred to by the Secretary of the Treasury, in his report to the Commissioners of the Sinking Fund, was made by the Register from official documents agreeably to the printed statement of the public debt, on the 1st January, 1802.	117 48

(a.) Viz: In hands of Messrs. Simpson, and Dalton.

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, OCTOBER 25, 1803.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

The annual nett proceeds of the duties on merchandise and tonnage, had, in former reports, been estimated at nine millions five hundred thousand dollars. That estimated revenue, predicated on the importations of the years immediately preceding the late European war, and on the ascertained ratio of increase of the population of the United States, appears, from the experience of the two last years, to have been underrated. The nett revenue arising from that source, which accrued during the year 1802, exceeds ten millions one hundred thousand dollars. The revenue which has accrued during the two first quarters of the present year, appears, from the best estimate that can now be formed, to have been only fifty thousand dollars less than that of the two corresponding quarters of the year 1802; and the receipts in the treasury, on account of the same duties, during the year ending the 30th September last, have exceeded ten millions six hundred thousand dollars. Those facts afford satisfactory evidence that the wealth of the United States increases in a still greater ratio than their population, and induce a belief that this branch of the public revenue may now be safely calculated at ten millions of dollars.

From the statement A, it will appear that the same revenue, for the two last years of the late European war, (1800 and 1801) calculated at the present rate of duties, averaged 11,600,000 dollars a year; but, although it might, with some degree of probability, be supposed that the renewal of hostilities will again produce a similar increase, no inference from that period is drawn in this report, in relation to the revenue of the ensuing years.

The statement B shows the several species of merchandise on which the duties on importations were collected, during the year 1802, the portion of that revenue which was derived from drawbacks, and that which arose from the extra duty on merchandise imported in foreign vessels.

Although the sales of the public lands, during the year ending on the 30th day of September last, were affected by the situation of the Western country, two hundred thousand acres have been sold during that period; and, as it appears by the statement C, that, independent of future sales, the sums already paid to the Receivers, together with those which, exclusively of interest, fall due during the three ensuing years, amount to 1,250,000 dollars; the annual revenue arising from the proceeds of those sales, cannot be estimated at less than four hundred thousand dollars.

The extension of post roads, and the acceleration of the mail, whilst diffusing and increasing the benefits of the institution, have, as an object of revenue, rendered it less productive. The receipts from that source have amounted, during the last year, to 27,000 dollars; but, as neither these, nor those arising from some other smaller incidental branches, are of sufficient importance to effect any general result, the whole existing revenue of the United States will be computed at only ten millions four hundred thousand dollars.

The permanent annual expenses of government, which, under existing laws, must be defrayed out of that revenue, amount to nine millions eight hundred thousand dollars, to wit:

1st. The annual appropriation of 7,300,000 dollars, for the payment of the principal and interest of the debt; of which about three millions and a half are at present applicable to the discharge of the principal, and the residue to the payment of interest, - - - - -	\$7,300,000
2d. The current expenses of Government, which, according to the estimates for the year 1804, consist of the following items, viz:	
For the civil department, and all domestic expenses of a civil nature, - - - - -	791,000
For expenses attending the intercourse with foreign nations, including the permanent appropriation for Algiers, and all other expenses relative to the Barbary Powers, - - - - -	184,000
For the Military and Indian departments, - - - - -	875,000
For the Naval establishment, calculated on the supposition that two frigates and four smaller vessels shall be kept in commission, - - - - -	650,000
	<u>2,500,000</u>
	9,800,000
And deducted from the permanent revenue of - - - - -	10,400,000
Leave a surplus revenue of six hundred thousand dollars, applicable to other objects. - - - - -	<u>\$600,000</u>

The following extraordinary resources and demands, not being of a permanent nature, are not included in that calculation, to wit:

The specie in the treasury, which, on the 30th day of September last, amounted to - - - - -	5,860,000
The arrears of the direct tax, estimated at - - - - -	250,000
The outstanding internal duties, amounting to near - - - - -	400,000
And the sum which will be repaid to the United States on account of advances heretofore made in England, for the prosecution of claims, estimated at, - - - - -	150,000
	<u>\$6,660,000</u>

Constituting an aggregate of more than six millions six hundred thousand dollars, which, after reserving the sum which it is necessary to keep in the treasury, will be sufficient to discharge the demands due on account of the convention with Great Britain, and amounting to - - - - -	\$2,664,000
Sundry extraordinary expenses in relation to the conventions with France and Great Britain, estimated at - - - - -	100,000
The loan obtained from the State of Maryland for the city of Washington, amounting to - - - - -	200,000
And also to pay two millions of dollars on account of the purchase of Louisiana; being the same sum which was reserved for the purposes contemplated by the law of the last session, appropriating that amount for the extraordinary expenses attending the intercourse with foreign nations. - - - - -	2,000,000
	<u>4,964,000</u>

It appears by the estimate D, that, during the year ending on the 30th September last, the payments from the treasury, on account of the public debt, have amounted to - - - - -	3,096,700
Which, together with the increase of specie in the treasury, during the same period, amounting to - - - - -	1,320,000
Makes an actual difference in favor of the United States, of more than four millions four hundred thousand dollars during that year, - - - - -	4,416,700
The payments on account of the principal of the public debt, from the 1st day of April, 1801, to the 30th day of September, 1803, have amounted, as appears by the estimate E, to - - - - -	9,924,004
The specie in the treasury on the 1st day of April, 1801, amounted to - - - - -	1,794,000
And on the 30th day of September, 1803, to - - - - -	5,860,000
Making an increase of - - - - -	4,066,000
Those two items constitute an aggregate of - - - - -	13,990,004
From which deducting the extraordinary resource arising from the sales of the bank shares, which produced, - - - - -	1,287,600
Leaves, for the amount of the true difference, - - - - -	<u>12,702,404</u>

In favor of the United States, for that period of two years and a half, a sum of twelve millions seven hundred thousand dollars.

From that view of the present situation of the financial concerns of the United States, it seems that the only question which requires consideration, is, whether any additional revenues are wanted in order to provide for the new debt, which, if Congress shall pass the laws necessary to carry the treaty with France into effect, will result from the purchase of Louisiana.

The sum which the United States may have to pay by virtue of that treaty, amounts to fifteen millions of dollars, and consists of two items: 1st, 11,250,000 dollars payable to the Government of France, or to its assignees, in a stock bearing an interest of six per cent., payable in Europe, and the principal of which will be discharged at the treasury of the United States, in four instalments, the first of which shall commence in the year 1818. 2dly, a sum which cannot exceed, but may fall short of, 3,750,000 dollars, payable in specie at the treasury of the United States, during the course of the ensuing year, to American citizens having claims of a certain description on the Government of France.

It has already been stated that two millions of dollars may be paid from the specie now in the treasury, on account of the last item; and the whole amount of the new debt which may eventually be created, cannot, therefore, exceed thirteen millions of dollars, the annual interest of which is equal to 780,000 dollars; but, on account of commissions and variations of exchange, will be estimated at eight hundred thousand dollars.

The existing surplus revenue of the United States will, as has been stated, be sufficient to discharge six hundred thousand dollars of that sum; and it is expected that the nett revenue collected at New Orleans will be equal to the remaining two hundred thousand dollars. That opinion rests on the supposition that Congress shall place that port on the same footing as those of the United States, so that the same duties shall be collected there, on the importation of foreign merchandise, as are now, by law, levied in the United States, and that no duties shall be collected,

either on the exportation of produce or merchandise, from New Orleans to any other place, nor on any articles imported in the United States from the ceded territories, or into those territories, from the United States.

The statements F, G, H, exhibit the annual exports and imports of the United States, to and from Florida and Louisiana, for the years 1799 to 1802; and the statement G particularly shows, that the exportations from the Atlantic States to those colonies, of articles, not of the growth, produce, or manufacture, of the United States, amounted, for the three years, 1799, 1800, and 1801, to 6,622,189 dollars, making an average of more than two millions two hundred thousand dollars of foreign articles liable to pay duty, annually imported into Florida and Louisiana from the United States alone.

It is ascertained that the exportations from the United States to Florida are so trifling that that statement may be considered as applying solely to New Orleans; and it is also known, that almost the whole of those importations were consumed within that colony; and that, during the war, the supplies from the United States constituted by far the greater part of its imports.

From thence it results, that the annual importations into the ceded territory, of articles destined for the consumption of its own inhabitants, and which will, under the revenue laws of the United States, be liable to pay duty, may safely be estimated at two millions five hundred thousand dollars; an amount which, at the present rate of duties, will yield a revenue of about 350,000 dollars.

From that revenue must be deducted 150,000 dollars, for the following items, viz:

1st. The amount of duties on a quantity of sugar and indigo, equal to that which shall be imported from New Orleans to the United States, as those articles, being imported free from duty, will diminish, by so much, the revenue now collected in the seaports of the United States. The whole amount of sugar exported from New Orleans is less than 4,000,000 of pounds, and that of indigo is stated at about 30,000 pounds. Supposing (which, on account of that exemption, is not improbable) that the whole of those articles should, hereafter, be exported to the United States, the loss to the revenue will be about 100,000 dollars.

2d. No increase of expense in the military establishment of the United States is contemplated on account of the acquisition of territory; but the expenses of the civil administration of the province, and those incident to the intercourse with the Indians, are estimated at 50,000 dollars: leaving for the nett revenue derived from the province, and applicable to the payment of the interest of the new debt, 200,000 dollars, as above stated. The only provisions, which, if that view of the subject be correct, appear necessary, and are respectfully submitted, are, 1st, in relation to the stock of 11,250,000 dollars, to be created in favor of the Government of France, or of its assignees.

That that debt be made a charge on the sinking fund, directing the Commissioners of the fund to apply so much of its proceeds as may be necessary for the payment of interest, and reimbursement or redemption of the principal, in the same manner as, by the existing laws, they are directed to do in relation to the payment of interest and discharge of the principal of the debt now charged on that fund.

That so much of the duties on merchandise and tonnage as will be equal to seven hundred thousand dollars, being the sum wanted to pay the interest of that new stock, be added to the annual permanent appropriation for the sinking fund, making, together with the existing appropriation, eight millions of dollars, annually applicable to the payment of the interest and principal of the public debt.

And that the said annual sum of eight millions of dollars remain thus pledged, and be vested in the Commissioners of the Sinking Fund, in trust for the said payments, until the whole of the existing debt of the United States and of the new stock shall have been reimbursed or redeemed.

As a sum, equal to the interest accruing on the new stock, will thus be added to the sinking fund, the operation of that fund, as it relates to the extinguishment of the existing debt, will remain precisely on the same footing as has been heretofore provided by Congress. The new debt will neither impede or retard the payment of the principal of the old debt; and the fund will be sufficient, besides paying the interest on both, to discharge the principal of the old debt before the year 1818, and that of the new within one year and a half after that year.

2d. In relation to the American claims, the payment of which is assumed by the convention with France.

That a sum not exceeding 3,750,000 dollars, inclusive of the two millions appropriated by a law of the last session of Congress, for defraying the extraordinary expenses incident to the intercourse with foreign nations, be appropriated for the payment of those claims, to be paid out of any moneys in the treasury not otherwise appropriated.

That, for the purpose of effecting the whole of that payment, the President of the United States be authorized to borrow a sum not exceeding 1,750,000 dollars, at an interest not exceeding six per cent. a year.

And that so much of the proceeds of the duties on merchandise and tonnage, as may be necessary, be appropriated for the payment of the interest, and for the reimbursement of the principal of the loan, which may, eventually, be effected by virtue of the preceding provision.

It is not proposed to charge that loan on the sinking fund, because its amount, in case it shall be effected, cannot, at present, be ascertained; and because it may, perhaps, under the then existing circumstances of the treasury, be found more expedient not to borrow the money, and, in lieu of it, to pay, out of the sinking fund, the whole, or a part of the two last instalments, payable by virtue of the convention with Great Britain, as authorized by the act making provision for the payment of the whole of the public debt.

It is evident that the possibility of thus providing for the payment of the interest of a new debt of thirteen millions of dollars, without either recurring to new taxes, or interfering with the provisions heretofore made for the payment of the existing debt, depends on the correctness of the estimate of the public revenue which has been submitted. Although it is not without diffidence that the hope of such favorable result is entertained, some reliance is placed on the solidity of the basis on which the estimate is grounded. It rests, principally, on the expectation that the revenue of the ensuing year shall not be less than that which accrued during the year 1802. No part of it depends on the probable increase which may result from the neutrality of the United States during the continuance of the war in Europe, nor even on the progressive augmentation, which, from past experience, may naturally be expected to arise from the gradual increase of population and wealth. Nor has that effect been taken in consideration, which the uninterrupted free navigation of the Mississippi, and the acquisition of New Orleans, may have, either on the sales of the public lands, or on the general resources of the inhabitants of the Western States.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

A.

A Statement exhibiting the amount of duties which accrued on Merchandise and Tonnage; of debentures issued on the exportation of Foreign Merchandise; of payments for bounties and allowances and for expenses of collection, during each of the years 1800, 1801, and 1802.

JOSEPH NOURSE, Register.

D.

An estimate of the Principal redeemed of the Debt of the United States, from the 1st October, 1802, to the 30th September, 1803.

<i>On account of the Domestic Debt.</i>			
The amount of warrants issued on the Treasurer of the United States, during that period, according to the quarter yearly statement of receipts and expenditures, exclusive of \$2,047 48 repaid into the treasury, was		\$4,606,352 35	
Deduct interest, which accrued during the same period, calculated quarter yearly,		3,399,555 33	
Leaves the amount of principal discharged,		-	\$1,206,797 02
Payments were made into the treasury, in certificates of the debt of the U. States, for lands purchased,		-	5,343 17
Payments were made to foreign officers, and of certain parts of the domestic debt,		-	32,868 22
<i>On account of the Foreign Debt.</i>			
The amount of warrants issued on the Treasurer, exclusive of \$108,319 39, repaid into the treasury, including \$5,502, received for damages on bills protested, was,		2,278,977 16	
Deduct interest on one year,	\$400,100 00		
Commissions at 1 per cent.	4,001 00		
Add the difference between 41 cts. per guilder, and 40, the par on \$2,868,588 7.6,	28,685 88		
	\$432,786 88		
Deduct damages received,	5,502 00	427,284 88	
			1,851,692 28
Amounting to,			\$3,096,700 69

TREASURY DEPARTMENT, Register's Office, October 22d, 1803.

JOSEPH NOURSE, Register.

E.

An estimate of the Principal redeemed of the Debt of the United States, from the 1st April, 1801, to 30th September, 1803.

<i>On account of the Domestic Debt.</i>			
The payments from the Treasury of the United States were as follows:			
From 1st April, 1801, to 31st December following,	-	-	\$3,613,378 65
From 1st January, 1802, to 31st December following,	-	-	4,618,021 39
From 1st January, 1803, to 30th September following,	-	-	3,033,828 76
			11,265,228 80
Deduct interest which accrued during the above periods, viz:			
From 1st April, 1801, to 31st December following,	-	\$2,633,636 70	
From 1st January, 1802, to 31st December following,	-	3,451,696 197	
From 1st January, 1803, to 30th September following,	-	2,588,378 91	
			8,623,712 58
Total interest which accrued, calculated on the real amount of principal, at the several rates of interest,			
Paid on account of principal,	-	-	2,641,516 22
Whereof,			
From 1st April, 1801, to 31st December following,	-	-	979,741 95
From 1st January, 1802, to 31st December following,	-	-	1,166,324 42
From 1st January, 1803, to 30th September following,	-	-	495,449 85
As above,	-	-	\$2,641,516 22
Payments made in certificates of the debt of the United States, on account of lands purchased,			
From 1st April, 1801, to 31st December following,	-	-	23,816 58
From 1st January, 1802, to 31st December following,	-	-	15,518 49
From 1st January, 1803, to 30th September following,	-	-	4,604 59
			43,939 66
Payments to foreign officers, and for certain parts of the domestic debt.			
From 1st April, 1801, to 31st December following,	-	-	18,235 66
From 1st January, 1802, to 31st December following,	-	-	22,961 76
From 1st January, 1803, to 30th September following,	-	-	19,026 21
			60,223 63
Payments on account of domestic loans.			
From 1st April, 1801, to 31st December following,	-	-	700,000 00
From 1st January, 1802, to 31st December following,	-	-	1,290,000 00
			1,990,000 00
Payments on account of the Dutch debt.			
From 1st April, 1801, to 31st December following,	-	-	1,306,726 59
From 1st January, 1802, to 31st December following,	-	-	3,240,399 25
From 1st January, 1803, to 30th September following,	-	-	1,819,386 73
			6,366,512 57
Interest and commissions, viz:			
	Guilders.	Dolls.	
From 1st April, 1801, to 31st December following,	616,352 10	= 246,541	
From 1st January, 1802, to 31st December following,	1,156,827 10	= 462,731	
From 1st January, 1803, to 30th September following,	917,080	= 366,832	
			1,076,104
To which add—			
The difference between 41 cts. per guilder, and 40, the par on 6,689,779 3 14	-	-	66,897 79
Deduct therefrom, the difference between 39 and 40 cents per guilder, on 890,364,	-	-	8,903 64
			57,994 15
			1,134,098 15
Damages received, deduct	-	-	11,910 78
Leaves the total to be deducted for interest and commissions,	-	-	1,122,187 37
Deduct also, certain bills of exchange, returned under protest for non payment, and in a way of recovery, but which, not being applied, is deducted—			\$5,244,325 20
Guilders, 140,000, cost,	-	-	\$56,000 00
			5,188,325 20
Amounting to	-	-	\$9,924,004 71

TREASURY DEPARTMENT, Register's Office, October 22d, 1803.

JOSEPH NOURSE, Register.

Note to Statement E.

From the amount of debt redeemed from the 1st April, 1801, to the 30th September, 1803, amounting, as per this statement, to	-	\$9,924 004 71
Deducting the amount redeemed, from 1st October, 1802, to 30th September, 1803, amounting, as per statement D, to	-	3,096,700 69
Leaves the amount redeemed, from 1st April, 1801, to 30th September, 1802,	-	6,827,304 02
The Secretary of the Treasury, in his report of the 16th December, 1802, states the amount redeemed, during the same period, exclusively of 1,287,600 dollars, bank debt, discharged out of the proceeds of bank shares, at	\$5,339,886 44	
To which, adding the amount of bank debt thus discharged,	1,287,600 00	
Makes an aggregate of	-	6,627,486 44
Making a difference between this statement and that of the Secretary,	-	\$199,817 58
Arising as follows, viz:		
I. The Secretary, in his report of December 18, 1801, did not include the following items of debt, discharged between the 1st April, and 30th September, 1801, to wit:		
1st. Payments to foreign officers, and on account of certain parts of the domestic debt,	17,752 23	
2d. Payment on account of the principal of the domestic debt, by the reimbursement of three per cent. on the nominal amount of the six per cent. and deferred stocks,	142,271 28	
Which payment was exclusively of that to the trustees of the sinking fund, of \$129,048 83, stated by the Secretary in his report.		
3d. Payment on account of the foreign debt, arising from his having estimated the interest accruing during these six months, at one half of that for the calendar year, viz:	245,980 50.	
Whilst the real interest accruing during said six months, was	209,272 00.	
	36,708 50	196,732 01
II. The Secretary, in his report of 16th December, 1802,		
1st. Estimates, the interest accrued on the domestic debt, from 1st October, 1801, to 30th September, 1802, at	3,470,259 75	
By the Register's calculation, it amounted to	3,464,706 29	
	5,553 46	
2d. He estimated the deduction on account of rate of exchange and bills in suit, at less than it really was,	2,619 22	2,934 24
III. The Register has inserted in the amount of this estimate, for a debt due to the United States, paid in stock,		
	-	151 33
		\$199,817 58

F.

TREASURY DEPARTMENT, Register's Office, October 24, 1803.

JOSEPH NOURSE, Register.

8th CONGRESS.]

No. 201.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 14, 1803.

Mr. SAMUEL L. MITCHILL, from the Committee of Commerce and Manufactures, to whom was referred the petition of William McAuley and John McJimsey, in behalf of the ministers and elders of the Associated Reformed Church, in North America, made the following report:

The petitioners state, that, contemplating the establishment of a seminary for instructing young men in Christian theology, they have imported a collection of books for the sole use of the library of their seminary; their value is two thousand three hundred and sixty-three dollars, and they have been entered at the custom house in New York. The petitioners hope, that, from the encouragement of Christian literature, Congress may remit the duties payable thereon, in consideration of the infancy of the institution, and the smallness of the funds.

To allow the prayer of this petition, would, in the opinion of the committee, involve the Legislature in an act of partiality, or render it necessary to exempt from impost, by a general provision, all books of instruction for young men who destine themselves for the Christian ministry. But, while a sincere regard is shown for this species of literature, it ought to be remembered that the Government must be supported, under which those excellent studies may prosper; and that, to this great end, the friends and promoters of that noble cause have never incurred the suspicion of unwillingness to contribute their moderate proportion.

The committee feel a persuasion that the petitioners ought to have no objection to render unto the Government the same duties which their fellow citizens of all other denominations pay, and that they would rather make an exertion to raise a little more money for this purpose, than implicate the Government in the charge of favoritism, by allowing to them, what is refused to the people, generally, or of inducing it to surrender the impost upon all similar importations of books, by an universal regulation.

It is, therefore, submitted, that the petitioners have leave to withdraw their petition.

8th CONGRESS.]

No. 202.

[1st SESSION.]

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 14, 1803.

Mr. SAMUEL L. MITCHILL, from the Committee on Commerce and Manufactures, to whom was referred the memorial of Thomas Ketland, of the City of Philadelphia, made the following report:

The committee, on inquiry, learn that the petitioner, a merchant and citizen, purchased a foreign built ship, in partnership with two other persons, stated to be also citizens. The vessel was bought in June, 1799, in London, and sailed, in the ensuing September, for Philadelphia; during her passage she was damaged in an action with a French ship of war, and obliged to repair to Lisbon, in distress. By this misfortune she was detained so long, that she did not reach the river Delaware until May 4th, 1800. Afterward, to wit, in July, 1800, she was despatched on a voyage to Batavia, whence she returned in June, 1801, with a cargo of sugar and coffee. It is stated that the property of the said ship, called the Washington, has never been changed, except by the death of one of the original partners, and that the title now remains entirely in the two survivors.

Such being the history and title of the ship, the following difficulty arose on the subject of a drawback, which the owners expected on the Batavian sugar and coffee, the whole of which they, afterwards, shipped in other vessels to Europe. They calculated on receiving the whole of the drawback, with the customary abatement of two and a half per cent. They were disappointed, and the reason of their disappointment was this. On the 13th of May, 1800, an act had been passed, nearly two months previous to the sailing of the ship, by which it was directed that no part of the *additional duties*, payable on goods, wares, and merchandise, imported in *foreign ships*, should be entitled to drawback on exportation. The collectors construed this section to include all *unregistered* vessels

belonging to citizens of the United States, which, on the 13th of May, 1800, were not furnished with sea-letters. The ship *Washington*, having not any such document, the drawback of the *additional* ten per cent., on the duties imposed upon the sugar and coffee, was refused, upon the construction that they had been imported in a foreign built ship, not having the customary sea-letter, &c.

Congress, afterward, by an act passed 14th April, 1802, enacted that the statute of May 13th, 1800, should not be considered to operate upon unregistered vessels, owned by citizens of the United States at the time of the passing thereof; provided such ships or vessels possessed a sea-letter, or other regular documents issued from a custom house, in the United States, proving such vessel to be American property.

The unfortunate case of the petitioner was not embraced in this liberal and retrospective regulation, and he now applies to the National Legislature to allow him the drawback on the *additional* duty, as would have been allowed, if the ship *Washington* had been duly provided with a sea-letter.

On this view of the facts, the committee beg leave to remark, that, as the act of 1800 was passed on the 13th of May, and the ship did not sail for Batavia until July following, there was time enough, after the passing of the act, for the owners to have procured a sea-letter, and every other document, before the day of her departure; that they did not take care to provide their ship with all the needful papers in due season, is their own lache, and not the fault of the Government. It is believed, the act of April, 1802, did not mean to extend its remedial operation, and to retrospect any further than the 13th of May, 1800; and the petitioner's case not coming within the limitation and description thus specified, there does not seem to be even an equitable claim on the Government for the drawback of the additional duties; wherefore, the committee submit their opinion, that the prayer of the petition ought not to be granted.

8th CONGRESS.]

No. 203.

[1st SESSION.]

REMISSION OF FORFEITURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 25, 1803.

Mr. SAMUEL L. MITCHELL, from the Committee of Commerce and Manufactures, on the petition of Charles D'Wolfe, of Bristol, in the State of Rhode Island, made the following report:

The petitioner, on the 5th of June, 1799, became bound as principal to the United States in an obligation, in a penalty of 4,128 dollars, to be void on the condition of exporting duly abroad fifty eight hogsheads one tierce and eighteen barrels of domestic distilled spirits; this was executed in the common form directed by the act of March, 1791. He gave another bond, on the 23d of August, 1799, for securing the fair exportation of one hundred and seventy-three hogsheads two tierces and six barrels of domestic distilled spirits, in the penalty of \$13,731 67 to be forfeited in case of non-performance. He alleges that the conditions nullifying the said two bonds have been complied with, by exporting the spirits in the schooner *Lucy*, and the snow *Fair Eliza*, to the coast of Africa, and unloading and landing them there, and not unshipping or putting them ashore in any part of the United States.

The certificates of landing of this New England rum in Africa were not subscribed by foreign consignees or vendees, as they ought to have been, according to the strict provisions of law, but by the captains in their capacity of consignees. These were accompanied by attestations of foreign merchants in their favor, and by confirmatory affidavits of some of the persons on board the vessels; neither consul, nor other public agent of the United States, nor American merchants, were to be found in the settlements to which these voyages were made.

Without stating what species of traffic they engaged in, the petitioner alleges that, from the nature and great variety of it, joined to the illiterate and barbarous character of the inhabitants who bought the rum that certificates minutely correct, according to the requisition of the statute, were not, and could not be procured.

Such certificates, as could be obtained were, in due time, exhibited to the collector of the customs in Newport. The collector, aware of their informality, forwarded, as was his duty, a statement of the facts to the then Comptroller of the Treasury.

The Comptroller decided, after examination of the case, that the matters set forth in the certificate of landing abroad were unsatisfactory; but, in the exercise of that latitude of discretion officially allowed him, he would permit the petitioner to adduce supplementary proof. If the petitioner had parted with the rum for a valuable consideration, it would be easy for him to tell what the consideration was; by exhibiting an invoice or manifest of the return cargo, it was presumed that all doubts might have been dispelled from the Comptroller's mind, and an order obtained for cancelling the export bonds. The petitioner, however, to this day, has imposed upon himself the strictest silence upon this head.

The bonds thus remaining in force, the attorney for the district of Rhode Island was, sometime thereafter, directed to put several similarly circumstanced, with these of the petitioner, in suit. Actions were, accordingly, commenced in the district courts of that State. In the course of the trial, the defendants attempted to support their plea of performance of the condition of their bonds, by parole testimony and common law evidence; they were informed by the court that this was an issue under the revenue law, and that the proof must conform to the statute strictly. The judge declared that, of the points decided in suits upon exportation-bonds, among others, were these: that pleas might be but in by the defendants as in other suits; that, in issues joined, a plea of performance could only be substantiated by evidence conforming to the statutes, and by no other kind; that, if the evidence conforms to the statutes, the jury ought to find for the defendants, even in opposition to the decision of the Comptroller; but, if the evidence does not conform to the statutes, the Comptroller has the exclusive power of discharging the bond; and his judgment, in cases of the kind then depending, was final and conclusive. Unfurnished with statute evidence, and unable to resort to collateral and circumforaneous testimony, the defendant was unable to make proof to the jury of the performance of the condition of his bond, and, of course, a verdict was found for the plaintiff.

Previous to the proceeding to execution, a petition was presented to the Comptroller, praying that he would direct the bonds to be cancelled, or suits to be withdrawn, or grant other relief. It will be proper to observe, that all the proceedings, hitherto, had been had under the direction of the late Comptroller; but this petition was addressed to the present one. Mr. Duvall returned for answer, "that the case of the petitioners having been decided by his predecessor, the subject was not then considered as open to investigation; and it appeared to him a proper subject for legislative deliberation." This reply is accompanied with a note in writing, that there is a *similarity of circumstances* in the cases of William Gardner, Constant Tabor, and Samuel Martin, who are sureties in other bonds mentioned in their petitions, which were referred to this committee, by order of the House, on the first instant.

Such having been the series of proceedings in the collector's office, in the Comptroller's department, and in the district court, the petitioner now craves mercy, and exoneration from the penalty of his bonds, from the Legislature of his country.

The committee have abstracted this narrative as concisely as possible from a volume of papers and documents. A considerable part of these has been already distributed in print, and to these, once for all, they make a general reference. A variety of details, not comprehended in this report, may be seen there.

There does not appear to have been partiality, passion, or interestedness, in any part of the proceedings before the Comptroller or district judge. On the contrary, in endeavoring to come at the truth, amidst obscure papers, cover-

ing mercantile transactions on the coast of Africa, these officers appear to have acted with so much independence and intelligence, that there does not appear to be a call for any revision, or, far less, a censure of their acts by Congress.

To reverse the upright proceedings of those officers who interpret and execute the revenue laws, ought not to be attempted but with caution. If the citizens of the United States voluntarily engage in a commerce beset with the difficulties stated by the petitioners, they ought not to blame the Government or its officers for the embarrassments and losses they suffer.

The regular course of proceeding for the petitioner, if dissatisfied with the decision of the district judge, would seem to have been by applying to a higher court for a correction of the error, if any had been committed, unless the doctrine should be deemed sound, that, in the petitioner's case, and in the others of a similar nature, the Comptroller's decision on the weight of the evidence, and the mode of conducting the trial, is final.

On the whole, the committee do not find sufficient cause for legislative interference in the petitioner's behalf.

The following resolution is, therefore, respectfully submitted to the House:

Resolved, That the petitioner have leave to withdraw his petition, with the papers accompanying the same.

To the Honorable the Senate and House of Representatives of the United States in Congress assembled, the petition of Charles D'Wolfe, of Bristol, in the State of Rhode Island, merchant, respectfully represents:

That your petitioner was bound, as principal to the United States, in a bond dated the 5th of June, 1799, in a penalty of four thousand one hundred and twenty-eight dollars, the condition of said bond being for the due exportation abroad, of fifty-eight hogsheads one tierce and eighteen barrels of domestic distilled spirits, according to the law of March 3d, 1791, viz. That if the said spirits, the danger of the seas and enemies excepted, should be really exported to, and landed in, some port or place without the limits of the United States, and should not be unshipped from on board the ship or vessel whereupon the same were laden for exportation, within the said limits, or any ports or harbors of the United States, nor landed in any other part of the same, shipwreck or other unavoidable accident excepted, then the above mentioned obligation to be void, otherwise, to remain in full force and virtue. That he likewise became responsible to the United States, as principal, in another bond, for the penalty of thirteen thousand seven hundred and thirty-one dollars and sixty-seven cents, which bond was dated the 30th August, 1799, and was with condition for the exportation and delivery abroad of one hundred and seventy-three hogsheads two tierces and six barrels of domestic distilled spirits. Now, your petitioner would represent, that he has fully and faithfully complied with the condition of said bonds, and has exported said spirits to, and landed them on, the coast of Africa, and that the said spirits were not unshipped from on board the schooner called the Lucy, and the snow called the Fair Eliza, whereupon the same were laden for exportation, within the limits, or any port or harbors, of the United States, nor re-landed in any part of the same. Your petitioner would further represent that, of such his performance of the conditions of said bonds, manifold proofs and documents have been produced, within the time limited by law, to the collector of the port of Newport, the port of exportation, which proofs, though satisfactory and convincing, and substantially in conformity to the proof required by law, were, nevertheless, in some merely formal points, defective; and the bonds having been sued, and the evidence, on account of its informality, not being permitted to pass to the jury, judgments have been rendered against your petitioner.

Now, your petitioner would represent, that the rejection of the proofs and documents above mentioned, and the consequent rendering of the said judgments, were not by reason of any defect imputed to them as rational evidence, nor by reason of any impeachment of their truth and validity, but solely by reason of certain minute variations in them, originating in unavoidable accident, from the forms required. That such is the nature of the trade, the great variety, together with the illiterate and suspicious barbarity of the inhabitants of the country to whom the spirits were sold, that certificates minutely correct, according to the requisition of the statute, were not, and could not be procured. That there is no suggestion against the good faith of your petitioner, no fraud is charged or suspected, and the fact of a fair and true exportation of the said spirits is admitted by the officers of Government; and as the present Comptroller of the Treasury has intimated an opinion favorable to your petitioner, and recommended his case as a proper subject for legislative deliberation and relief, and has suspended the executions in these suits for the purpose of affording an opportunity to obtain the same, your petitioner therefore prays that the said bonds may be directed to be cancelled, or discharged, the amount of said judgments to be remitted to him, or such other relief extended to him as to Congress may seem meet and proper, and he, as in duty bound, will ever pray.

CHARLES D'WOLFE.

8th CONGRESS.]

No. 204.

[1st SESSION.]

FISHING BOUNTY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 25, 1803.

Mr. SAMUEL L. MITCHILL, from the Committee on Commerce and Manufactures, to whom was referred the petition of sundry inhabitants of the town of New Shoreham, in the State of Rhode Island, made the following report:

The petitioners (one hundred and five in number) state, that they are inhabitants of Block Island, belonging to the commonwealth of Rhode Island, and principally engaged in the cod fishery, for nine months in the year. Owing to the bleak situation of the land they inhabit, and the high surf by which it is almost incessantly assailed, they pursue their occupation in small craft, during the day, and returning on shore at night, haul their boats above the reach and fury of the waves.

The number of these boats is stated to be from thirty to forty, and under the burthen of ten tons; the number of fishermen, nearly two hundred; and the quantity of fish taken, annually, is from ten to fifteen thousand quintails; of these, about half the quantity is barrelled and pickled, and the other half dried.

By the first section of the act, concerning certain fisheries of the United States, and for the regulation and government of the fishermen employed therein, there is paid a bounty on the tonnage of vessels employed in the fisheries; which bounty is intended as a commutation and equivalent for the drawback of the duties paid on the salt used in preserving such dried fish. There are different rates of bounty on boats and vessels, from five to thirty tons and upwards. By the 83d section of the collection law, it is provided that, for pickled fish, exported, there shall be paid thirty cents a barrel, in lieu of a drawback upon the salt employed.

As the existing law does embrace all boats of more than five tons, and the petition does state their boats to be under ten tons, it is to be presumed that a considerable number of their boats are already on a footing with the boats of the other parts of the Union; but the petitioners are desirous of procuring the same advantage to boats under five tons. This is what your committee do not think eligible, as it would be attended with more trouble than emolument; neither can your committee agree to allow them a bounty on dried fish, because, if the measure is not general, it would open a door to frauds on the revenue; therefore, concluding that it would be more proper for the petitioners to employ boats of the burthen contemplated by law, than for Government to legislate for boats of smaller size, the following resolve is submitted, to wit:

That it is not expedient to make provision, by law, for allowing the petitioners a bounty for dried fish, caught in boats of smaller capacity than five tons.

OFFICE OF COMMISSIONER OF LOANS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 8, 1803.

Mr. JOHN RANDOLPH, Jr. from the Committee of Ways and Means, who were instructed to inquire into the expediency of discontinuing the office of Commissioner of Loans, in the different States, made the following report:

That, conceiving this establishment may be considered as a part of the contract between the public and its creditors, which is contained in the act "making provision for the debt of the United States," passed the 4th day of August, 1790; believing that the abolition of the loan offices, by impeding the facility of transferring the debt, may tend, in some degree, to impair its value; unwilling to advise a measure which may, in any manner, however remote, affect the public credit, or which may be construed into a breach of the public faith, the committee respectfully recommend the following resolution:

Resolved, That it is inexpedient to discontinue the office of Commissioner of Loans in the several States.

8th CONGRESS.]

No. 206.

[1st Session.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 9, 1803.

To the Honorable the Senate and House of Representatives of the United States, the memorial of the subscribers, artisans and manufacturers of Philadelphia, respectfully sheweth:

That in every country there is an inseparable connexion betwixt the manufacturing and the duties on foreign merchandise, insomuch, that some of the greatest statesmen have made the imposts a political engine, to be used for the introduction or protection of the arts: for, as Rousseau observes, in his "Political Economy," "It belongs only to the real statesman to elevate his views, in the imposition of taxes, above the mere object of the finances, and to transform those burthens into useful regulations."

After the peace, and during the Confederation, the confusion that reigns in that branch of finance, by each State having different objects in view, rendered the manufacturing interest, at that time, precarious and uncertain. Since the adoption of the constitution, and that the imposts have been transferred to the Federal Government, it is to the wisdom of Congress alone that your memorialists have to look up for protection.

It is with deep concern, however, that your memorialists have to represent, that, during the long period, from the peace which terminated our Revolutionary war, to the present time, they have seen the wealth of the nation sent to foreign countries, to purchase a thousand articles which can be as well manufactured at home; and of which, nature has abundantly supplied us with the raw materials.

Among that immense number of articles, even of the first necessity, manufactured for the United States by foreign nations, there are very few that could not be produced by our own citizens, upon equal terms, if they were not prevented by some of the following reasons: 1st. Foreign fashion. 2d. Our markets being constantly overstocked with foreign goods. 3d. The unjust competition which we are obliged to sustain with foreign manufacturers. 4th. The expense necessarily attending the commencement of complicated manufactories. And, 5thly, Duties injudiciously laid on raw materials, or goods partially manufactured. On each of these your memorialists beg leave to state, what has come within their own knowledge and observation. And,

1st. The articles that are affected by foreign fashion, are principally clothing, and more especially fabrics of cotton. Our manufacturers of that article, in the trials that have already been made, find it impossible to keep pace with the changes introduced by the new patterns from foreign nations; they are, therefore, confined to those articles which bear very little profit, for which low wages are given; and have continually the mortification of seeing themselves excluded from the most profitable branches of the trade, and their goods rejected by the citizens of America, as unfashionable.

2d. Our stores being constantly glutted with foreign goods, is another very great obstruction to an incipient or even an established manufacture. The greater part of the manufactures, of which iron, silk, wool, cotton, or flax, are the raw materials, ought to be established in the interior of the country, where provisions, house rent, and fuel, are cheap; it is, therefore, necessary that there should be a middle man betwixt the consumer and the manufacturer, that the latter may not waste his time in seeking for customers: these are the store keepers, wholesale or retail, who inhabit the towns and sea ports. Now, it is evident, that, if a foreign manufacturer shall be permitted to keep these people with a constant supply of goods, and give them long credit, it will be impossible for the citizen, with a small capital, to persuade the store keeper to purchase *his* goods for ready money; and if he applies immediately to the consumer, the time that he wastes, in a country where the population is diffused, forces him to demand an extraordinary price, or fix himself in a large town, where house rent, fuel, &c. eat up the profits of his labor.

3d. The competition that the manufacturing citizens of the United States are, by the laws of the country, obliged to sustain with the manufacturers of a foreign nation, is, in the opinion of your memorialists, unjust, inasmuch as the finished articles of our infant manufactures, produced from raw materials found in the United States, such as works of copper, iron, lead, earth, glass, cotton, wool, wood, fur, bone, horn, and leather, are generally, either prohibited in foreign countries, or duties imposed far greater than is paid on the like goods coming into the United States; so that there is no encouragement to attempt to excel foreign manufacturers: for, in spite of the greatest exertions, still the consumption must be confined to the United States. If any difference were to be made betwixt two competitors, it ought to be in favor of the weakest; and an infant manufacture must have *some* protection, to enable it to contend with an old establishment. Your memorialists are, however, under the painful necessity of stating, that, in the United States, the reverse of this takes place. In several instances, especially in hats, shoes, paper, and saddlery, manufactures which have arrived to as high perfection as in any country, in spite of foreign competition; they are, however, not permitted into the country of our competitors, while theirs are still admitted here, and gain sometimes a temporary advantage over our manufacturers, which they are not able to recover for many years, owing to a fluctuation in the price of manual labor, or of the raw material, or the necessaries of life. But to whatever state of perfection our manufactures may arrive, and however low we may be enabled to sell them, we never can contend with our competitors in their own markets, or put them to temporary inconveniency, because they totally prohibit us from their markets. And in those manufactories which require great capitals, and a

combination of talents, our competitors in foreign countries have us altogether at their mercy: or rather, the word *competitor* is perversion of the term: for, wherever one party is laid prostrate at the feet of the other, there is an end to competition.

4th. The next obstacle is the expense necessarily attending the commencement of complicated manufactories. Where an article must pass through the hands of several ingenious artists, before it is fit for the market, the expense of collecting those artists must be considerable. The time, too, that is taken up to bring the materials from a raw state to be fit for sale, must require an additional capital, which no man would risk, unless the consumption of his fellow-citizens were secured to him, and, at the same time, defended from every species of competition, but what he can see, and whose strength he can measure, (*viz.:*) with his fellow citizens *only*. If an insidious foe is liable to come upon him in the dark, and in the guise of fashion, it would be the extreme of folly to venture his capital.

5th. Your memorialists conceive, that the injudicious imposition of duties on raw materials, or goods partially manufactured, and in some cases a freedom from duty, equally injurious to the arts, merit the attention of Congress. Among the first, may be reckoned, rags for making paper, the bark of the cork tree, &c. and among the latter, wire of all kinds, as being an article for which the United States ought not to depend on a foreign country, especially as iron of the best kind is found here in abundance.

It is a position, that will not be denied by the greatest enemies to domestic manufacturing, that, as soon as any particular branch shall be established, foreign goods of the same kind ought to be prohibited or discouraged; and this is certainly the case with every manufactory of leather and fur; and yet your memorialists would be glad to know by what mode of reasoning it can be made to appear, that the hatter and shoemaker, who have spent their youth in acquiring those arts, should, every five or six years, be ruined by an excessive importation of foreign hats or shoes, which perhaps may be the remaining estate of some European bankrupt?

The enemies to the manufacturing system have, at different times, brought forward objections, which, to men fully acquainted with that branch of industry, hardly deserve notice; but, as there are others, with the best intentions, who are true friends to the prosperity of these States, who may be led away by these specious objections, or rather imaginary obstacles, we shall mention them, not with any intention of entering into a serious refutation, but only to shew their insignificance. 1st. They say "this country is too *young* to begin the manufactory of clothing for the citizens." In the progress of every original country, (colonies excepted) the manufactory of clothing has always preceded every thing else, even agriculture itself. But your memorialists cannot help expressing their opinion, that agriculture and the manufacturing arts ought neither to precede or be behind each other; that they were destined for mutual protection and support; of which the history and present state of all nations bear ample testimony. The flourishing state of agriculture must always be in proportion to the population; and population, on any given territory, is in proportion to the manufacturing arts, or the *kind* of labor in which the people are employed. Already, in some parts of the New England States, emigration is necessary to carry off the superabundant population; and it would be an injustice done to the land holders of that part of the Union, if they were prevented from pursuing that line of industry, which, by preserving the population to the State, would enhance the value of their property. And we have no hesitation in saying, that it will be bad policy indeed, when the United States shall retard the prosperity of the most ancient and most populous States, for no other reason than that the new States are not equally forward in point of population, agriculture, &c. There is no fact better authenticated than this, that several of the States have, from a multiplicity of causes, far outstripped others in the progress towards that state of society in which all the three great branches of national industry are combined, *viz.* agriculture, manufactures, and commerce; and it is equally true, that not one of them have been permitted to exert the force of their faculties, or call forth the industry of their citizens, but have been uniformly retarded and checked in their career, by United States' policy, and its fiscal regulations. In the great towns, we see all the evils attendant on luxury—such as pride, idleness, and dissipation, without any of the benefits and advantages, which, by political writers, have been ascribed to it: as, that it makes the rich contribute to the ingenious poor; calls forth talents, and circulates the wealth of a nation. But no such good can attend luxury in America: instead of circulating the wealth of the nation, it transfers it to foreign Powers, and gives them the sinews of war, only to menace our peace and disturb our tranquillity.

It has been, also, objected to manufactures, "that they would retard or prevent the population of the Western wilderness." As if the prosperity of the citizens, in old established situations, were to be sacrificed to new projects and land speculators. Every migration must be a loss, and not a gain, to the American nation at large. What the Western States gain, the Eastern lose, and so far there is a balance; and the real loss is in the act of migration: the trouble, the change of climate, and a thousand other inconveniences, which, in a national scale, must be a loss.

The health of the citizens has been considered as in danger by the sedentary life of manufacturers; but your memorialists know of no manufactory which can be called a sedentary employment, except the clerks necessary to keep the accounts; and, as far as it regards them, the objection will apply to merchants as well as manufacturers. It is true, in foreign countries, where the Government, the law, and the employer, are all in combination, or rather conspiracy, against the employed, poverty, and its concomitant, disease, must be very frequent among the people *employed*, not only in manufactories, but among the peasantry or cultivators of the ground; and to whatever deplorable condition artisans may be reduced, in these Governments, the cultivators of the soil are still worse: for, to every other species of misery, *ignorance* must also be added.

Objections have been also made to arts and manufactories, on account of the supposed *vice*, which is said to be found in manufacturing towns. A considerable number of your memorialists have seen the manufacturing towns of Europe, and are convinced that the greatest portion of virtue is to be found there; and that ten times the number of crimes are committed near courts and in seaports, that are committed in manufacturing towns. In a word, if we may judge from the state of society in Europe, artisans and manufacturers, oppressed as they are, are, nevertheless, the most virtuous and the most intelligent class in civil society. In a letter from Mr. Colquhoun, of London, to Mr. Eddy, of New York, author of the treatise on the prisons of that city, we find the following observations: "From the facts you have disclosed, relative to the criminal offences committed in the city of New York, I am induced to enlarge upon this subject. They appear to me to be of a magnitude to excite a considerable degree of alarm, with respect to the degree of criminality in the American towns, inasmuch as it would appear, that they greatly exceed the larcenies and misdemeanors committed in towns in Great Britain, of an equal or even a greater population; and, although I have not had an opportunity of ascertaining the fact, I have an impression on my mind that the annual convictions in the whole of Scotland, where population approaches two millions of people, are short of those which take place yearly in the State of New York."

The last objection that we shall notice, is, "That Government ought not to grant any special privilege or protection to any part or portion of the national industry, more than to another; and if any manufactory will not take root of itself, it shows it is not fit for our climate or state of society, and ought not to be cultivated here." To which your memorialists beg leave to answer, that this objection can only hold good in the case of a simple manufactory, which is begun and finished by the ingenuity of one man, and where the market for the ready sale of the article is at hand, and does not require the interposition of the merchant to dispose of it, at a distance from the manufactory; but, in all complicated arts, where a combination of skill, and a combination of capital, too, is absolutely necessary, it will be found, that this never has, and we presume never will be, obtained, but by the fostering care of Government. And, if we inquire what other nations have done in similar circumstances, we shall find, that those who have given the greatest encouragement to the complex manufactories, have been the most successful, the most wealthy, and powerful; and, although the English Government has always been unwilling to let her artisans know that it was to them she owed her greatness, and has insidiously ascribed it to her navy, to her commerce, to her insular situation, to her soil, to her climate, to the constitution of her Government, and a number of other secondary or auxiliary causes, your memorialists are convinced that she is indebted for her greatness and power to the well directed industry of her artisans and manufacturers; and your memorialists, it is hoped, will not be blamed for trespassing on the time of your honorable body, by shewing what that nation has done for her manufactories.

By the statute 3 Ed. IV. c. 4, no merchant or other person shall bring into the kingdom, to be sold within the realm, any of the following goods, *viz.* woollen cloths, laces, ribbons, silk in any wise embroidered, saddles, stir-

rupts, harness, things wrought of tawed leather, shoes, hats, locks of any kind, &c. &c., upon pain to forfeit the same as often as they may be found in the hands of any person, to be sold, half to the king and half to the seizer. This statute was confirmed by 19 Hen. VII. c. 21. And, upon consideration that white ashes, made within the realm, are very necessary for the making of soap and saltpetre, and for whitening of linen cloth, and scouring of woollen, &c. therefore, it is enacted that no person shall ship, or carry beyond sea, any white ashes, on pain of forfeiting six shillings and eight pence for every bushel: 3 Ed. VI. c. 26. And to preserve the wool—rams, lambs, or sheep, alive, are prohibited to be carried out of the realm, upon pain that every offender shall, for the first offence, lose all his goods, and also suffer one year's imprisonment, and have his left hand cut off: 8 Eliz. c. 3. And the statute 12 Char. II. c. 32, ordains that no person shall export any sheep, or wool, yarn made of wool, wool flocks, or fuller's earth, on pain of forfeiture, &c. And, for the protection of manufactures of leather, it is enacted by the 13 and 14 Char. II. c. 7, that no person shall carry out of England, the skins or hides, tanned or untanned, of any ox, steer, bull, cow, or calf, under a penalty of 500 pounds. And the statutes 13 and 14 Char. II. c. 19, prohibits the importation of card wire, or iron wire employed in making wool cards; that no part of their woollen manufactory might depend upon foreign nations. And for encouraging the manufactories of the kingdom, it is enacted, by the statute 11 and 12 Wm. III. c. 10, that all wrought silks, Bengals, and stuffs, of the manufacture of Persia, China, or the East Indies, and all printed, stained, and dyed calicoes, which shall be imported, shall not be worn in the kingdom; but shall be entered and carried to ware houses appointed by the commissioners of the customs, in order for exportation, and not taken thence, but on security given that they shall be exported. It was by such protecting statutes, and a multitude of others, that England created her extensive manufactories, which multiplied the objects of commerce, and laid the foundation of that navy, which, at this day, gives laws to the maritime world. And an English author, who wrote upon the trade of that nation forty years ago, says, "What is of the utmost consequence to England, is, that, by laying high duties, we are always able to check the vanity of our people, in their extreme fondness for wearing exotic manufactories: for, if it were not for this restraint, as our neighbors give much less wages to their workmen than we do, and, consequently, can sell cheaper, the Italians, the French, and the Dutch, would have continued to pour upon us their silks, paper, hats, donggets stuffs, and even Spanish woollen cloths; for they have the wool of that country as cheap as we, and are become masters of that business, by the great encouragement they have given to able workmen from other countries to settle with them; and, thereby, have prevented the growth of those manufactories amongst us, and so might have reduced us to *the low estate we were in before their establishment*; and, therefore, it will be a maxim, to be observed by all prudent Governments, who are capable of manufacturing within themselves, to lay such duties on the foreign as may favor their own, and discourage the importation of any of the like sorts from abroad."

If other nations, as Spain, Portugal, Naples, &c. have neglected their manufactories, and, consequently, hold only a second or third rank among the nations of Europe, it would ill become the United States, to follow their example. In this particular we should rather imitate England or France, without, however, making the source of riches a rod of oppression, as they have done; and, notwithstanding artisans are greatly oppressed there, whatever of republicanism is to be found in their constitutions, is to be ascribed to them: for in all ages the peasantry have been too ignorant to understand their rights, and too remote from each other to be able to withstand oppression.

It is, however, conceded by some, "that coarse goods, and articles of the first necessity, ought to be manufactured here, while fine goods, and articles of luxury, ought to be imported from abroad;" which is much the same as to say, that foreign manufacturers ought to be employed in the most beneficial branches of our consumption, and the citizens should be contented with the inferior kinds of labor.

If this be not the meaning of our opponents, then it must be inferred, either that our citizens want genius to perform the finer arts, or that they are despised in the United States. It is a fact, however, of perfect notoriety, that there are more fine goods of every manufactory used in the towns of America, than in those of the same size in Europe; and also, that our citizens do not want talents to execute, or genius to contrive, any thing that may be required of them, and for which they shall have due encouragement. Among the members even of this society, if we except china ware, it would be almost impossible to mention an article in use here, that could not be made by one or other of them. It is true, that many of them are employed out of their proper line of business, and in occupations far beneath their genius or talents. Your memorialists cannot, therefore, be blamed for their opinion, that it would be more profitable to the nation to employ those people in teaching the rising generation those arts, than to continue purchasing foreign goods; and also, that the best and most profitable parts of the labor, ought to be given to the citizens; and the coarse or inferior branches, reserved for foreign nations.

But it has been said, that high duties ought not to be laid, because we have not at present a sufficient number of hands to supply the United States. This only shews the necessity of protecting duties, which, *alone*, can give encouragement to men of genius to pursue complex and difficult manufactories; and that no length of time would ever produce a sufficient number of hands without it.

Having answered, as briefly as possible, some of the objections of our opponents, and shown what another great nation did for the arts, during their infancy, in that country, your memorialists beg leave to state some of the effects likely to be produced from an union of the three great branches of national industry, agriculture, manufactures, and commerce; in which it will be seen, that each of them would receive an additional impulse by such an union. And first, of agriculture.

It has been already observed, that the state of agriculture is always in proportion to population. This is evident from a view of the price of land, which decreases in the compound ratio of its intrinsic worth, and its distance from the centre of a town, or the populous part of a country. But agriculture *alone*, will never concentrate the population, so as to form a town of any considerable magnitude. There can only be a country village, where a few neighboring proprietors are collected, with the blacksmith, tavern keeper, and store keeper, &c. which, instead of being the centre of trade and industry, is oftener the focus of dissipation. This scattered population requires a greater extent of roads than can be kept in any decent repair; hence, during several months in the year, they are impassable; and at all seasons, the distance is too great to make it profitable to transport heavy commodities, the rude produce of agriculture, except along the banks of navigable waters.

But when the useful arts are established, in the midst of a fertile country, the system of farming becomes improved; land advances in value, because all the produce of a farm finds a ready market in the neighborhood; and good roads may be made, without oppressive taxation. It is thus that agriculture has always flourished best, in the neighborhood of the arts; and commerce consisting in the exchange of the commodities of one district for those of another, the histories of all nations demonstrate, that, where objects of industry are greatly diversified, the greater is the trade of the merchant. Manufactories might change the nature and objects of commerce; but, to annihilate it, would be contrary to the experience of all mankind.

As the revenue of the United States is derived principally from the objects of foreign industry, it will be proper to inquire what would be the effects of the manufacturing system on that revenue. We will suppose that, with all the protection that would be given to manufactories, it would be, nevertheless, twenty years before the United States could supply themselves with every thing they chose to make, or could arrive at that perfection, so as to equal foreign nations: and if the revenue on goods imported were divided into two parts, viz. 1st. That which arises from the useful arts, (which it would be proper for the United States to encourage here) and, 2d. That which is levied on luxuries, such as tea, china ware, &c. or other manufactories, which it, perhaps, would be imprudent, for a series of years, to attempt, it is highly probable, if not evident, that the increasing population of the United States would, in twenty years, double the produce of the revenue arising from the importation of those luxuries, and make the revenue from that part alone, equal to the whole of the present revenue. On the other hand, a heavy protecting duty on the useful arts would make a very considerable addition to the revenue, for a few years, which would, however, be gradually diminishing, as manufactories were established throughout the country. This argument is predicated upon the stationary quality which the expenses of the Federal Government possesses, and on the nature of its revenue, increasing in proportion to the population.

Nothing can be a more appropriate object of taxation than foreign fashions and foreign luxuries. When foreign luxuries shall become more expensive, the citizens will be contented with more decent attire, and learn to place a higher value on the plain fabrics of home manufacture. In a few years, the genius of Americans will be called forth to invent luxuries of our own, which are as beneficial to a country as *foreign* luxuries are injurious.

Thus, by *one* operation, many advantages will accrue to the nation. New sources will be laid open for the employment of capital in the interior; the coasting trade and internal commerce will receive a new impulse; domestic industry will put to shame idleness and dissipation; foreign nations will lose their influence over our councils. The fertile lands of America will rise to their just value, by bringing a market to the door of the farmer. The riches with which nature has so bountifully blessed this country, will be explored and brought into use, and the minerals and waters of the country will be employed to the purposes for which they were designed by the God of nature.

Your memorialists now beg leave to state, *in a general way*, what alterations it would be necessary, in our opinion, to make on the duties on importation, so as to protect some of the most useful arts already established, and to encourage the introduction of others; and this we do, neither in the servile language of petition, nor with the presumption of dictating to the wisdom of Congress.

And 1st. It is our opinion that all manufactories of which wood, fur, leather, horn, bone, or rags, are the raw materials, as they are the produce of the country, ought either to be prohibited, or high duties laid on their importation. Goods manufactured from these materials are either already made here, or may be made as soon as the artisans are secured in their respective pursuits.

The manufactories also, of which hemp, flax, cotton, and iron, are the raw materials, as they require great capital, a great diversity of skill and talents, and have, for the most part, had a beginning here, ought to receive all the fostering care of Government; that we should not, in these expensive undertakings, have to contend with foreign goods in our own market.

Whenever Congress shall seriously take up the subject of manufactures, a great number of articles will come under consideration, which are neither properly raw materials, in the strict sense of the word, nor finished goods; such, for example, are iron and brass wire, sheet brass, sheet copper, printing ink, types, &c. all of which are, however, necessary to the completion of other manufactories. These, it is believed, might, some of them, be encouraged by premiums from the States: for it is known that, if once they are fairly set up, and the first expense got over, a very moderate duty would prevent foreign nations from rivaling us.

Manufactories of the precious metals have already been established; but it is questionable whether they will preserve their reputation without being assayed and stamped, as is practised in other nations, and whether this be within the jurisdiction of Congress.

No nation can be called independent which relies for military or naval stores on a foreign country; and there can be no certainty of a supply, in time of war, but by encouraging their manufactory in times of peace, by prohibiting all foreign arms and ammunition.

Every fabric of silk may, at present, be considered as a luxury, and, therefore, the proper subject of taxation; which, at the same time, would operate greatly in favor of the Southern States, where silk, in a few years, might be as plenty as in China.

Your memorialists have forbore to say much on the manufacture of wool, as that article cannot be multiplied at pleasure, as cotton, hemp, and flax, may. This would depend upon a combination of circumstances. The people must be induced to prefer mutton and lamb to the flesh of hogs; and this can only be done by an attention to the breed, and improvements in the mode of pasturing those useful animals—a subject which would come with more propriety from a society of agriculturists.

Having thus submitted our case to the wisdom of Congress, your memorialists must now wait, with anxiety, your decision; and, in whatever manner this great question shall be determined, we shall console ourselves with having brought it to an issue: for, after your determination, the citizens will be no longer in suspense, as to the nature and object of their pursuits. The capitalist will be able to calculate in what line he ought to employ his capital. Parents will judge what occupation will be most profitable for their children. And foreign artists will see the propriety or impropriety of migrating hither—points which are not easily determined in the present state of things. All which is respectfully submitted, &c.

[1st SESSION.]

ABATEMENT OF DUTIES.

COMMUNICATED TO THE SENATE, DECEMBER 15, 1803.

The Secretary of the Treasury, in obedience to the resolution of the Senate, of the first day of March last, directing him to consider and report on the petition of Aaron Man, respectfully reports:

That the petitioner prays for an abatement of duties on certain goods imported into the district of New York, in January, 1803, on account of damage received, as he states, during the voyage of importation.

That, amongst other rules which have been prescribed, by the fifty-second section of the act to regulate the collection of duties on impost and tonnage, for ascertaining the damages which may have been thus received, and for making the proportionate deduction from the duties accrued, it is provided that no allowance shall be made for damage on merchandise, which, after the payment or securing of duties, has come in the possession of the owner or consignee, "unless proof, to ascertain such damage, shall be lodged in the custom house of the port or place where such merchandise has been landed, within ten days after the landing of such merchandise."

That, in the present instance, not only the ten days had elapsed, before application was made to any custom house, but the damage does not appear to have been discovered until after the goods had been transported from the district of New York to that of Providence; from whence it has resulted that no proof whatever has ever been exhibited to the custom house of the port of importation.

And, that it does not seem that, under those circumstances, relief can be granted, without a substantial deviation from established principles and regulations, which are considered essential to the security of the revenue.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, December 13, 1803.

8th CONGRESS.]

No. 208.

[1st Session.

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 15, 1803.

Mr. SAMUEL L. MITCHILL, from the Committee on Commerce and Manufactures, to whom was referred the petition of Nathaniel and William Smith, made the following report:

The petitioners ask to be exonerated from the payment of a custom house bond, for the duty on twenty-two hogsheads of sugar, imported into the United States, and which were lost or totally damaged, going *coastwise* from Newburyport to Boston, where, it is stated, the sugar was to have been exported to a foreign country.

The sugar was accompanied with the usual document, certifying that the duties inwards had been secured; and stating the amount, and time of importation. This certificate was only intended to identify the article upon its arrival at Boston, and was not the *debenture* promising the payment of a sum of money, which debenture would have been issued at the custom house where the sugar was originally bonded, had it been exported directly out of the limits of the United States. It has never been considered proper to *refund* the duty accruing on any goods or merchandise, when the same have been regularly landed, and the returns thereof have been duly certified at the custom house, although losses or damages may afterwards have accrued, from any cause whatever, *other* than from the fault, neglect, or error, of the custom house officers; and *excepting* in cases of debentures for drawback of duties for goods shipwrecked, or otherwise lost on our own coasts, after the goods have been bonded for exportation, and cleared out for a foreign port or place.

The sugar in question was not cleared out for exportation to a *foreign* country. The committee had hoped merchants had understood, by this time, that the duties secured to be paid will always be demanded, and that the United States are not to be considered as insurers or underwriters on goods bonded at the custom house.

The committee are fully of opinion, that it would be improper to allow the drawback on any merchandise which may be damaged or lost, in the transportation thereof, *coastwise*, from one district to another, in the United States; and they, therefore, beg leave to submit the following opinion:

Resolved, That the prayer of the petitioners ought not to be granted.

8th CONGRESS.]

[1st Session.

DIRECT TAX.

COMMUNICATED TO THE SENATE, DECEMBER 20, 1803.

The Secretary of the Treasury, in obedience to the resolution of the Senate, of the 18th ultimo, respectfully reports:

That the statements hereunto annexed, and which have been abstracted from the latest returns in the treasury, by the commissioner of the revenue, under whose superintendence the internal revenues have been placed by law, exhibit the sums either paid in the treasury, collected, or remaining outstanding in the several States, on account of the direct tax.

And that it appears, by a letter dated the 22d ultimo, that the assessment of South Carolina, which, by the death or resignation of eight gentlemen, who had been successively appointed commissioners of the first division of that State, had been so long delayed, has, at last, been completed.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, December 17, 1803.

Statement of the Direct Tax, in conformity to a resolution passed in the Senate of the United States, on the 18th of November, 1803.

Remittances to the treasury,	- - - -	\$1,545,192 00.0
Charges of collection,	- - - -	128,234 37.5
Balances to be accounted for,	- - - -	182,004 35.3
		<u>1,855,430 72.8</u>
Quota of South Carolina and Georgia,	- - - -	\$151,812 61.4
Balances to be accounted for in the fourteen States, which have been heretofore assessed,	- - - -	182,004 35.3
		<u>\$333,816 96.7</u>
Total amount to be accounted for at present,	- - - -	<u>\$333,816 96.7</u>

Notes to the preceding Statement.

- * The columns entitled "charges of collection," embrace the compensations paid to surveyors of the revenue for preparing tax lists, the amount of commissions accruing on moneys received and paid over, contingent expenses, and all allowances which have been admitted by the supervisor, to the present date.
- † In the supplementary statements, marked A, which accompany this sketch, will be found the names of collectors, &c. who are held responsible for these balances.
- (a) "The tax due from districts 5 and 58 is not yet ascertained, although the lists are completed for both. This circumstance prevents me from stating the exact sum to be collected from the State; but I am disposed to believe, from the assessments of these two districts, that there will be a deficiency of something more than \$1,000 of the quota required to be raised from North Carolina. This deficiency originates entirely from one county, and is owing to an error in the footing of the assessment by the commissioner of this State, when he rendered his return to the Secretary of the Treasury, the county alluded to being charged with \$1,010,000 more than it was actually assessed." (See Mr. Polk's letter to the commissioner of the revenue, November 28, 1803.) In consequence of this information, I have estimated the assessment at 192,697 96.5, which is \$1,000 short of the quota. Collectors have been appointed to all the districts, excepting the aforementioned Nos. 5 & 58, which are, of course, taken on estimate at \$3,757 44.5.
- (b) "Lists for which no collectors had been appointed," to wit: In the State of Massachusetts, division No. 1, (Maine) \$8,431 25, being the amount assessed on districts Nos. 4, 6, 7, 9, 18, 19, 21, 22, 24, & 25. The supervisor states that he has no expectation of procuring collectors for either of them. In the State of Rhode Island, \$275 57 being the amount assessed on district No. 29.
- (c) By referring to the supervisor's return, of the 31st March, 1802, it appears that the collectors of the tax had received and accounted for \$40,588 23; the charges on collection, amounting to \$2,029 23, being deducted, there remained in the hands of the supervisor, a balance of \$38,559; since 31st March, 1802, he has received further payments, amounting to \$1,564 91, as appears by his weekly returns. From the date of the assessment on the State of Vermont, until the present time, the supervisor's payments to the treasury amount to no more than \$34,362 73; he is, therefore, held accountable for the difference, which is \$5,761 18, as above stated. Mr. Brush's last weekly return was dated April 16, 1803; the balance which he then acknowledged to be in his hands, was \$115 55. No explanation has been given, which will enable me to reconcile this extraordinary variance in his statements; and, although both Mr. Brush, and (since his decease) his son, have been repeatedly urged to render a final account, it has not been transmitted, nor has any satisfactory reason been assigned for the delay.
- (d) The balance which appears on the last weekly return of Edward Carrington, Esq. is \$663 79. When the supervisor deducts the commissions, and to which he was entitled by accounts rendered at the close of the last quarter, there will be no difference in our statements.
- (e) Balance in the hands of Mr. Dexter, late supervisor, \$376,47.5. In the hands of Mr. Peck, marshal, (who now discharges the supervisor's duties) \$131 64.9.
- (f) The commissioners appointed under the act of Congress of July 11, 1798, having made no returns of their valuations, &c. the assessment on this State is still suspended.
- (g) The supervisor received the necessary forms and instructions from the Revenue office, and was long since apprised, by the Secretary of the Treasury, of the rate of assessment, but he has not rendered regular returns of his proceedings. Copies of my letters of the 31st January, 22d March, and 10th October, 1803, accompany this statement; and I am sorry to add, that the urgent solicitations which are therein contained, have produced no satisfactory result.
- (h) In the hands of J. Chester, Esq. late supervisor, } as will appear by the annexed statements.
- (i) In the hands of H. Miller, Esq. late supervisor, }

TREASURY DEPARTMENT, *Revenue Office, December 12, 1803.*

WM. MILLER, Jr., *Commissioner of the Revenue.*

A.

Statement exhibiting the balances due by Collectors of the Direct Tax, in the District of New Hampshire, on the 31st December, 1802.

By a summary statement rendered, it appears that the aggregate amount for which collectors were accountable on 31st December, 1802, was - - - - - \$2,880 84
 And by the supervisor's weekly returns, since, there has been paid over to him on account, - 1,529 43
 Leaving a balance for which the collectors are still accountable, amounting to - - - - - \$1,363 41

But the supervisor has rendered statements of payments to surveyors for preparing tax lists, amounting to \$674 90, and of other contingencies, to a considerable amount, which have been discharged by drafts upon collectors. I have, therefore, considered the abovementioned balance as extinguished, or nearly so.

Statement exhibiting the balances due by Collectors and Inspectors on account of the Direct tax assessed on the District of Massachusetts, on the — of August, 1803.

From the date of the preceding statement, there has been collected and paid into the hands of William Peck, marshal, executing the duties of supervisor, \$131 64.9, viz: By Collector George James, \$24 02.2; by Collector Joseph Thurston, \$107 62.7, as appears by his weekly returns.

Copy of a letter from William Peck Esq., Marshal for the District of Rhode Island, to the Commissioner of the Revenue, dated

PROVIDENCE, 26th November, 1803.

In compliance with your directions, I now transmit a weekly return of the state of the direct tax. Since the papers, relating to this tax, were handed to me by the late supervisor, (by which I was enabled to know who were the collectors in the several districts, and from whom balances were due) I have either seen, in person, or written in the most pressing manner to the delinquents, that the arrearages must be collected and paid in without any further delay. From the most of them I have been assured, that the collection shall be completed as speedily as the law will enable them to effect the business. The time which has elapsed since any considerable collections have been made, together with a prevailing idea that the Southern States have paid but a small part of this tax, causes many very unpleasant reflections upon the persons who are, at present, engaged in completing the collection of this part of the revenue.

I, however, hope to be able to bring the business to a close, without any coercive measures, and by such a period as a business, so unpopular, can reasonably be expected.

I have the honor to be, sir, with great respect, your most obedient humble servant,
WILLIAM PECK, *Marshal.*

Statement of the balances due by Collectors of Direct Tax, in the District of Vermont, on the 31st of March, 1802.

NAMES OF COLLECTORS.	No. of the Collection District.	Uncollected.	Cash in the hands of Collectors.
Jehiel Webb, Jr. - - - - -	2	\$147 43	\$92 00
Thomas Leverett, - - - - -	3	240 14

		<u>\$10,377 11</u>	

By the supervisor's letter of the 2d instant, it appears that
 \$2,803 32 of the preceding balances is due from collectors appointed for the city of New York.
 5,299 41 from collectors against whom warrants of distress have been issued.
 1,605 63 from collectors, who owe small balances, arising from taxes on slaves, and inaccuracies in their lists.
 130 00 from collector Beckman, } Lost through post offices.
 215 00 from collector Chappel, }
 323 75 from N. Fish, late supervisor, for moneys received of collectors, which were omitted in his accounts.

\$10,377 11

The supervisor remarks "that the amount due from the city of New York would have been collected by the sale of the property on which the tax remained unpaid, before this time, had not the late unhappy situation of the city, from sickness, prevented that measure; the sales are, however, to take place in all this month, and that very little of the item of \$1,605 63, will ever be collected.

Statement exhibiting the balances due by Collectors of Direct Tax, in the district of Pennsylvania, on the 31st of March, 1803.

		\$21,430 30.5	\$9,601 58

From the date of the preceding statement, there has been collected and paid into the hands of the supervisor, \$4,480 10, as appears by the weekly returns; but, as these returns do not distinguish the name of the person by whom payment was made, the amount to the credit of each collector cannot be ascertained at present.

* When General Muhlenberg was appointed to the supervisor's office, the proceedings of Mr. Ash were suspended under an expectation that Mr. Coxe, who succeeded him in the office of collector of the internal duties, would have undertaken to collect the balance of the direct tax. Mr. Ash, accordingly, exhibited his list of what was outstanding, and was ready for settlement; but the difficulty of collecting a number of fragments, by compulsory process, upon the small commission which the law allowed, prevented the accession of Mr. Coxe to the arrangement which the supervisor had contemplated. Mr. Ash has since been urged to resume his functions, but I do not know with what success; however, from a notification which has appeared from the supervisor's office, in the Philadelphia papers, I conclude that Mr. Ash has consented to the winding up of the business.

Extract of a letter from the Supervisor of the district of Kentucky, to the Commissioner of the Revenue, dated March 11th, 1803.

"In a few days I will give you a statement of the sales of lands where the direct tax has not been paid. At present, appearances are rather unpromising; a great proportion of the lands will not sell. I have instructed the collectors to adjourn the sales for a few days, whenever they find the sales dull, by which means, I am in hopes, in the course of the Spring, to be able to dispose of a great proportion of the lands in this State, on which the tax has not been paid."

The statement referred to by the supervisor has not made its appearance.

Statement exhibiting the balances due by the Collectors &c. of the Direct Tax, in the district of Tennessee, on the 16th of November, 1802.

By the supervisor's account current, there was uncollected, and in the hands of the Marshal of East Tennessee, on the 16th November, 1802, a balance, amounting to - - - - \$774 04
 And by the supervisor's weekly returns since, there has been paid over to him on account, - 433 82
 Leaving a balance, for which the collectors are still accountable. of - - - - \$340 22

The collectors are, however, entitled to a credit for several abatements, for inaccuracies, &c. in their lists, so that it is probable no part of this balance will be recovered.

*The late supervisors of Connecticut and Pennsylvania have not been notified, by the Comptroller, of the adjustment of their direct tax accounts.

†The difference between these sums, and the balance in the supervisor's last weekly returns, is accounted for, in the notes which are annexed to the general statement.

Copies of letters to the Supervisor of Georgia, referred to in the general statement G.

TREASURY DEPARTMENT, *Revenue Office, January 31, 1803.*

SIR:

By your letter of the 29th ult. it appears that collectors of the direct tax were still wanting in two counties, viz. Bullock and Bryan. As the collection was progressing in 18 districts, and likely to proceed in four more by the 1st of February, I hope that I shall very soon be favored with a return of your receipts, conformably to my instructions. As more than 15 months have expired since you were notified by the Secretary of the Treasury of the rate of assessment, &c. and authorized to proceed in the business, he is surprised that so little appears to have been done.

By referring to the 19th section of the act which imposes a direct tax, you will find that collectors are liable to a forfeiture of all their commissions on sums which are not accounted for and paid over with promptitude. If other means of ensuring punctuality do not succeed, you must inevitably resort to this provision, and put the bonds of collectors in suit, without loss of time. I, however, flatter myself that I shall not have occasion to complain of unreasonable delays, on any future occasion.

I am, respectfully, your obedient servant,

WILLIAM MILLER, *Commissioner of the Revenue.*

JOHN MATHEWS, Esq.

TREASURY DEPARTMENT, *Revenue Office, March 22, 1803.*

SIR:

I am looking with great impatience for the arrival of regular weekly returns of your receipts and payments on account of the direct tax, for the information of the Secretary of the Treasury. It is indispensably necessary that this document should not be neglected; the irregularity of the subordinate officers cannot affect your conduct in this respect; I, therefore, hope that some other apology will be given, if the present requisition is not immediately complied with.

I am, respectfully, sir, your obedient servant,

WILLIAM MILLER, *Commissioner of the Revenue.*

JOHN MATHEWS, Esq.

TREASURY DEPARTMENT, *Revenue Office, October 10, 1803.*

SIR:

The Secretary of the Treasury is desirous of laying before Congress, at an early period of the approaching session, an exact account of the internal duties and taxes which remain outstanding; I have, therefore, to request that you will immediately make up and forward the remainder of your accounts, in order that the situation of your district may be ascertained. If you are not fully prepared to render a statement to the 30th September, 1803, or your final statement, I wish the balances on the 30th June, 1803, or at the expiration of any of the preceding quarters, to be correctly stated, noting thereupon all subsequent receipts and payments.

I am, respectfully, your most obedient servant,

WILLIAM MILLER, *Commissioner of the Revenue.*

JOHN MATHEWS, Esq.

8th CONGRESS.]

No. 210.

[1st SESSION.]

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 20, 1803.

Mr. SAMUEL L. MITCHILL made the following report:

The Committee of Commerce and Manufactures report such facts as have occurred to them, on a resolve of the House, of the 9th of November, directing them to report, by bill or otherwise, whether a drawback of duties ought not to be allowed on sugar refined in the United States, and exported to foreign ports or places, together with their opinion on the same.

By "An act laying certain duties on snuff and refined sugar," a duty was laid and collected of two cents the pound, on sugar refined within the United States. By the fourteenth section of the same act this duty was allowed to be drawback on exportation, together with three cents the pound on account of the duties paid upon the importation of crude sugar. At the time of making this regulation, the duty on crude sugar was one cent and one half the pound. Upon the calculation that two pounds of crude sugar were required to make one pound of refined sugar, three cents of drawback were allowed on exporting the refined article, and to this were added the two cents paid for the excise: the sum of the duty and the excise, when added together, making the five cents of drawback at that time.

By the statute of March the third, one thousand seven hundred and ninety-seven, an additional duty of half a cent the pound was levied on brown sugar imported from foreign places; and by the fifth section of that act, there was allowed an additional drawback of one cent the pound on exported refined sugar, of domestic manufacture; observing the same rate of calculating two pounds of crude sugar for one of refined.

On the thirteenth day of May, one thousand eight hundred, Congress imposed a further duty of half a cent the pound on imported brown sugar, and increased the drawback, in consequence thereof, to one cent the pound on the exportation of domestic refined sugar.

The whole amount of drawback, amounting thus to seven cents the pound, on the exportation of sugar refined in the United States, was done away by the statute repealing the internal taxes.

The committee find further, notwithstanding the repeal of these statutes, and of their parts, which relate to the duties, excises, and drawbacks, provided for crude and refined sugars, that the refining of sugar at home is not wholly unprotected. It is known that sugar candy or crystallized sugar could be imported from Asia, not only so cheap as to vie with West India brown, but even to be substituted, in many cases, for refined sugars in the markets of the United States. The merchants who could have brought great quantities of this elegant form of sugar, were interrupted in their trade in this article, by the imposition in the statute of March 3, 1797, of the excessive duty of nine cents the pound, and by the statute of May 13th, 1800, an additional duty of two cents and one half per pound, making together eleven cents and one half the pound, and of course the almost entire prohibition of the importation. Thus, to protect the domestic refiners of sugar, the merchants who trade to the East Indies are prohibited from bringing sugar candy to the United States, and the citizens at home from consuming it, but at the enormous price paid for it, as a dainty, a medicine, or a rarity.

Sugar candy being thus excluded our market, and, of course, from competition, Congress made another provision for encouraging the domestic sugar refinery. They imposed, by the several acts of August 10, 1790, of June 7, 1794, and of January 29, 1795, various duties, amounting to nine cents, on the importation of foreign refined loaf sugar, and six and one half cents on all other refined sugar. They refused, by the statute of June 5th, 1794, a drawback on the exportation of imported loaf and lump sugars of foreign refinery; they forbade the importation of it altogether in vessels of less burthen than one hundred and twenty tons; and they, even then, prohibited the admission of it in parcels of smaller quantities than six hundred pounds. This amounts almost to the prohibition of foreign refined sugar; as a proof of which, it may be observed that, from one thousand seven hundred and ninety, to one thousand seven hundred and ninety-two, the quantity of imported loaf sugar, consumed in the United States, was two hundred and eight thousand five hundred and forty pounds; from one thousand seven hundred and ninety-three, to one thousand seven hundred and ninety-eight, it was forty-one thousand three hundred and thirty-seven pounds. In one thousand seven hundred and ninety-nine, and one thousand eight hundred, it was eleven thousand seven hundred and eleven pounds, which, at the rate of nine cents per pound, produced, in the first period, eighteen thousand seven hundred and sixty-nine dollars of revenue; in the second period only three thousand seven hundred and twenty dollars; and in the last, but one thousand and fifty-four dollars. From October the first, one thousand eight hundred, to the thirtieth of September, one thousand eight hundred and one, there were only sixteen thousand six hundred and twenty-eight pounds of loaf sugar imported; of which, twelve thousand seven hundred and fifteen pounds were in American, and three thousand nine hundred and thirteen pounds in foreign vessels.

Under this loss of revenue from the existing regulations concerning sugar, it is believed, by the persons engaged in the refining business, that, in the infantine state of this manufacture, it stands in need of greater encouragement.

It will be remembered that, already, sugar candy and loaf sugar, from abroad, are loaded with such heavy duties that their prohibition operates as a bounty on the domestic manufacture. It will be recollected, too, that the duties on the refined sugar consumed at home, are paid by the consumer; and that, to protect the refiners of sugar in the United States, Government have adopted measures that have considerably lessened the revenue on that article; and by removing foreign competition, enhanced the price to the domestic consumer.

Still it is inquired whether the drawback ought not to be allowed on the exportation of refined sugars of our own manufacture?

There are two difficulties attending this, arising from the acquisition of Louisiana.

The first is, that already four thousand and five hundred casks of sugar, weighing half a ton each, estimated to be worth three hundred and two thousand and four hundred dollars, are prepared and exported annually from New Orleans, and its vicinity. By annexing this territory to the United States, this quantity of sugar, or a ratable proportion of it, will come into the States, and probably be refined. It would be unreasonable to pay a drawback upon sugar which had never paid a duty. Under an improved cultivation, the country lying between the river Iberville and the city of New Orleans may be made additionally productive of sugar cane; it is supposed that a tract of ninety miles in length, and three quarters of a mile in breadth, on both sides of the Mississippi, will be turned into sugar plantations, and yield, annually, twenty-five thousand hogsheads of sugar, and twelve thousand puncheons of rum. This quantity, thrown into our market, may be contemplated as good stock for the refiners to work upon.

The second difficulty is, that a refinery of sugar has been, for some time, established at New Orleans, which is said to produce two hundred thousand pounds of loaf sugar annually. This branch of manufacture may be expected to increase there, as the quantity of sugar increases, and as capitalists and men of enterprise go into the business. By performing the operation of refining near the place where the sugar is raised, much of the expense of transportation will be saved, by carrying the wrought rather than the raw article to a distant or a foreign market. And to accomplish the object, which the refiners in the United States have in view, it would be necessary to prohibit the importation of refined sugar from Louisiana; and to avoid paying the amount of a drawback upon sugars that have never paid duties, it will be necessary for the economy of Government, and the security of the treasury, to distinguish those of Louisiana from others of foreign production.

It would appear, from this examination of facts, that sugar refining has been more favored by Government than, perhaps, any branch of domestic manufacture. The diminution of 17,735 dollars in the revenue, heretofore derived from imported loaf sugar, indicates the amount of a virtual bounty annually paid to encourage the business.

It may be questioned whether a drawback ought to be allowed on the exportation of domestic refined sugar, unless the duties were lessened on the importation of sugar candy and foreign refined sugar. While the prohibitory duties exist on the latter articles, the demand for French [United States] refined sugar, in foreign markets, may raise the price of the article, so as sensibly to affect the consumer of refined sugar at home.

This rise of the price of refined sugar at home and abroad, will, of course, raise the price of brown or crude sugar in our home market; and by the competition between the refiners and the housekeepers, muscovado sugar itself must be paid for at a dearer rate by the citizens, at large, who consume it. Thus the trade will be in danger of being engrossed by the refiners, who, without paying any revenue to Government, raise the price of loaf, lump, and brown sugar, to the consumer.

A good reason does not occur to the committee, wherefore both the treasury of the nation, and the pockets of the individual citizens, should be subjected to greater payments than at present, for promoting the refinery of sugar; and particularly, as the extension of the laws of the United States to Louisiana, presents this subject in an aspect different from any in which it has been viewed before.

The plain principle on which drawbacks are allowed, is that the *identical* article imported, shall be exported according to law. If they are granted upon articles that have undergone a remarkable chemical or mechanical alteration, then they ought to be allowed on all exported cordage formed from imported hemp, on exported rum distilled from imported molasses, and on garments made at the slop shops, and otherwise from imported cloth, and afterwards carried abroad.

In the case of sugar, the committee is inclined to think, that the operation of refining has already been patronised to as great an extent by Government as is consistent with political economy and public good; and under that conviction, they submit to the House their opinion—

That it would be improper, at this time, and under existing laws and regulations, to allow a drawback upon the exportation of domestic refined sugar.

8th CONGRESS.]

No. 211.

[1st Session.]

MINT.

COMMUNICATED TO CONGRESS, JANUARY 13, 1804.

To the Senate and House of Representatives of the United States:

The Director of the Mint having made to me his report of the transactions of the mint, for the year 1803, I now lay the same before you, for your information.

TH: JEFFERSON.

January 13, 1804.

MINT OF THE UNITED STATES, Philadelphia, January 6th, 1804.

The Director of the Mint of the United States, on the commencement of the new year, respectfully makes the following report of the issues of the mint, from the 1st January, 1803, to the 31st December of the same year.

Notwithstanding the dull prospect at the beginning of the year, coinage, of every kind, amounts, in the whole, to the sum of three hundred and seventy thousand six hundred and ninety-eight dollars and fifty-three cents, as will appear, in detail, by the schedule No. 1, hereunto annexed.

The current expenses of the mint have been reduced to the sum of seventeen thousand seven hundred and five dollars and ninety-five cents, as will appear from schedule No. 2; and the profit on the copper coinage has amounted to five thousand and ninety-five dollars and forty-eight cents, as appears by schedule No. 3.

It appears to be the duty of the Director, respectfully to remind the President, that, in case the loan office in this city should be abolished by law, provision must be made for a commissioner to attend the inspection and assaying the reserved pieces during the past year, on the second Monday in February next, in the room of the Commissioner of Loans, if he should be removed.

All which is respectfully submitted to the President, by his very obedient and very humble servant,

ELIAS BOUDINOT, *Director of the Mint.*

To the PRESIDENT of the United States.

BENJAMIN RUSH.

8th CONGRESS.]

No. 212.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 23, 1804.

Report of the Committee of Commerce and Manufactures, on the the petition of Samuel Corp, referred on the 13th January.

The petitioner, in August, 1799, was consignee of the ship Chesapeake, bound from London to New York, with a cargo of European goods, destined for the New Orleans market. It was his intention to have made an entry thereof, for exportation accordingly, at the custom house in New York, to avoid the payment of the impost there, and avail himself of the exemption therefrom, which the law of his country permitted.

When the petitioner went to the custom house, after the arrival of the ship, it was still his intention not to land any part of the cargo in the United States; and the captain had also made a declaration upon his manifest, of an intention to export. These precautions having been duly and openly made, the petitioner hoped his merchandise would have been exempted from duties.

The ship, however, on her passage to New York, had been visited by a revenue officer of New London, who had demanded of the captain a copy of his manifest. This had been given to the officer; but the captain did not express thereon, that the cargo was intended for exportation.

By reason of this variance in the copy of the manifest, the collector of the port of New York obliged the petitioner to give bonds for the duties on the cargo. These bonds, it was then conceived, would be of little inconvenience to him, as he could be relieved from the duties by afterwards exporting the merchandise: the collector only retaining for the United States, the customary drawback on the debentures.

Believing now that the business was in a safe and proper train, the petitioner did not think it necessary to make an application to the Secretary of the Treasury for relief. But, with the exception of a few casks of shot, which he took out of the ship, he exported the whole cargo, without unlading it, directly to New Orleans. There, duties were paid on it to the Spanish Government, and no part appears to have been relanded in the United States.

Afterwards, on applying for payment of the three debentures, which had been issued to him by the collector, he could obtain payment for no more than one. The payment of the other two has been refused, under the act of March, 1799, prohibiting the allowance of debentures for drawback on merchandise exported to foreign dominions contiguous to the United States, as Louisiana then was.

The relief solicited by the petitioner is for the amount of the two remaining debentures, which he now holds.

It appears to the committee that the ship sailed from Europe in January, 1799. At that time the collection law of 1790 was in force. That statute did *not* require that the declaration to export should be stated by the captain, on the manifest first exhibited. The captain therefore acted according to the law of his country, at the time he sailed; and he could not be presumed to know what alterations had been made during his absence.

The whole series of the transactions appears to have been fair and candid, on the part of the petitioner. He has shewn the utmost respect and obedience to the laws. The collector and naval officer entertain no doubts of his original intention to export the merchandise in question; and if, as the committee suppose, the petitioner ought to have been originally excused from entering his merchandise, and giving bonds for duties on the same, then he clearly is entitled to a reimbursement of the money, which he has been obliged to pay in satisfaction of those bonds. It is, therefore, the opinion of the committee,

That the request of the petitioner is reasonable, and that he ought to be relieved.

8th CONGRESS.]No. 213.[1st SESSION.]

ADDITIONAL DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 24, 1804.

The Secretary of the Treasury, in obedience to the resolution of the House of Representatives, of the 21st of February, 1803, respectfully reports:

That the articles in the annexed statement are susceptible of being taxed in proportion to quantity instead of value.

That the great variations in prices, arising from the various places where the articles are purchased, from fluctuations at the same places, and from the different modes of purchasing, render it difficult to state with precision, in conformity with the resolution, what specific duty, instead of that now laid, would neither increase nor diminish the revenue; but that, from the best materials which have been obtained, the duties, which, in the annexed table, are stated as equal to those now laid, appear equivalent to the present duties, ad valorem, computed on the highest market value.

And that the alterations in the rate of duty, which will be found in the last column of the statement, have been suggested by some of the collectors.

Although not embraced by the resolution of the House, it is respectfully suggested that a small difference in the rate of duties respectively laid on the importation of the several manufactures of hemp and flax, cotton, silk, wool, paper, leather, and hardware, for the purpose of ascertaining, with precision, the amount consumed in the United States, of each class, would, hereafter, enable the Legislature, without risk to the revenue, to introduce, from time to time, such modifications as might appear most favorable to the agricultural and manufacturing interests of the country.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, 23d January, 1804.

Statement of articles, on the importation of which new specific duties may be laid.

(a.) Spikes and nails now pay a duty of 2d. per pound, which is, therefore, much lower, in proportion to the value on nails of a small, than on those of a large, size: the alteration proposed in the last column would equalize the duty.
 (b.) Segars now pay, under the name of tobacco, a duty of 6d. per pound, which is less than 5 per cent. on the value.
 (c.) Seines now pay an ad valorem duty of 12½ per cent.; twine pays 4 dollars per cwt.; it is proposed to lay a similar duty on seines.
 (d.) Kid and morocco shoes now pay the same duty as leather shoes, viz: 15 cents per pair; it is proposed to lay on them a duty equal to that laid on silk shoes, viz: 25 cents a pair.
 (e.) Sicily wine being non-enumerated, now pays 23 cents per gallon; it is proposed to lay on it a duty of 30 cents, as on Lisbon wine, to which it is said to be, at least, equal in quality.
 (f.) All manufactures of leather now pay 15 per cent. ad valorem, saddles and parts of saddles excepted, which pay only 12½ per cent.

8th CONGRESS.]

No. 214.

[1st SESSION.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 25, 1804.

Mr. SAMUEL L. MITCHILL made the following report:

Report of the Committee of Commerce and Manufactures on various memorials and petitions from citizens of New York, New Jersey, Pennsylvania, and Maryland, praying for legislative patronage to several domestic arts, trades, and manufactures.

During the first session of the seventh Congress, petitions and memorials were presented to Congress from the manufacturers of gunpowder, of hats, of printing types, of brushes, and of stone ware. These were severally referred to the Committee of Commerce and Manufactures, and upon them a distinct report was made on the 10th of February, 1802. In the course of the same session, a report was made by the same committee on the subject of hemp, in consequence of a memorial from certain citizens praying an increase of duty on imported hemp and sail duck. This was presented to the House on the 18th February, 1802.

Afterwards, during the same session, the memorials and petitions of various manufacturers of starch, paper, and umbrellas, referred by order of the House, were severally reported on. And this report was offered on the 8th March, 1802.

The session then drawing towards a close, the reports on these petitions, together with the memorials of sundry calico printers, cordwainers, and shoemakers, were, few of them, acted on, but were left, with other unfinished business, to be taken up at the succeeding session. The resolution of the House, to this effect, passed on the 16th of April, 1802.

In the course of that succeeding session, a considerable number of the former petitions were renewed, or others presented for similar purposes; and to the former collection were added memorials from printers, comb makers, gun smiths, and cork cutters. The report on this volume of memorials was made on the 21st of February, 1803.

A number of these memorials, or others of the like import, have been presented again during the present session. The cutters of corks, the makers of plated trappings for carriages and horses, the stainers of plain cotton goods, and, in short, the domestic tradesmen and artists of almost every other denomination, have applied to Congress to patronize their respective employments, and to increase their profits. The modes of favoring domestic manufactures by governmental aid, may be reduced to the following heads:

1st. *Encouragement by exempting imported raw materials from imposts.*—Already has it been recommended to the House to encourage some of our domestic manufactures by increasing the facility of introducing the raw materials which enter into them. And it was thought a sufficient encouragement for the manufacture of wheat into flour, and of mill stones, that rough or unwrought burrs should be admitted free from duty. The like opinion was entertained concerning the encouragement of the brush manufacture, by advising that bristles of swine should be admitted free. As our country is not known, as yet, to furnish pure antimony, the exemption of the regulus of that metal from impost, was thought a sufficient encouragement for the incipient type manufacture. The paper manufacture seemed to be sufficiently provided for, if rags were permitted to be brought into the country without being dutied. Though saltpetre and sulphur both abound in the United States, yet, as their preparation is still in a backward state, it was thought that the manufacture of gunpowder would receive due patronage by exempting them both from the payment of impost on their importation from Italy and India. Some think indigo ought to come free; as also the bark of the cork tree.

2d. *Encouragement by laying higher or prohibit duties on manufactured articles imported.*—It has been urged that a duty of twenty-five per centum ad valorem, on fur hats, brushes, stone ware, saddles, cannon ball, glass bottles, and glass ware of all kinds; and fifty cents on umbrellas; three cents per pound on starch; and four cents on hair powder, would have an operation favorable to the domestic enterprise of hatters, brush makers, potters, saddlers, iron masters, glass, umbrella, and starch manufacturers.

In like manner it has been considered by a former committee that, if five cents the pound was laid upon imported gunpowder; three cents per pound upon glue; two cents per pound upon tarred cordage; two and a half cents upon untarred cordage or yarns; on printed calicoes an additional duty of two and a half per cent.; on all plated ware, an additional duty of five per cent.; on soap, three cents the pound; on candles of tallow, three cents the pound; on anchors, two cents per pound; on spikes or bolts of iron, two cents per pound; on cut, slitted, or rolled iron, one cent per pound; on foreign pickled fish, one dollar the barrel; and on all dried fish, one dollar the quintal; there would be an adequate governmental aid extended to the manufacturers of gunpowder, glue, cordage, soap, and candles, anchors, spikes, slit iron, and to the cod fishery.

3d. *Encouragement by withholding drawback from articles of foreign manufacture exported again.*—This is done already in the case of loaf and refined sugar, and might easily be extended to other articles.

4th. *Encouragement by allowing drawback of duties paid on domestic manufactures equal to what was paid for the raw materials on their importation.*—This has generally been allowed on the exportation of sugar refined from the foreign material, and on rum distilled from foreign molasses, though, under our present law, neither is entitled to the drawback. It has been supposed that plain cottons, which undergo the operation of staining and printing within the country, might be permitted to receive drawback on exportation in the form of calicoes.

5th. *By direct bounties.*—This mode of encouragement has been thought to have been employed partially in the curing and exporting of cod fish, and could be extended to other branches of business, if sound policy required it.

From this view of the proceedings of Congress, it will appear that much has been done already to encourage the domestic industry of our citizens.

That industry, under such aids as the Government by these means has given, at a time when population is so rapidly increasing, has caused useful arts and manufactures to rise up and thrive in almost every part of the country. Our works in wood, copper, hemp, leather, and iron, are already excellent and extensive. And, if we do not excel in the manufacture of the finer articles of cotton, silk, wool, and the metals, we may felicitate ourselves that, by reason of the ease of gaining a subsistence, and the high price of wages, our fellow citizens, born to happier destinies, are not doomed to the wretchedness of a strict discipline in such manufactories.

Our citizens are distinguished for their ingenuity and skill. They have invented many expedients by machinery to shorten and cheapen labor. The machine for making wool and cotton cards, the machines for ginning cotton, the machines for cutting and heading nails, the machinery for elevating wheat, and for raising and stirring meal, in mills, and the improvements in the manufacture of muskets, class with the most useful inventions with which the age has been adorned.

It is, perhaps, to be regretted by the petitioners, that Congress is deprived of the power to encourage manufactures by imposing duties on certain domestic raw materials, if exported. If this, however, had not been withheld by the constitution, an export duty upon horns and bones of oxen and deer, might operate in favor of the comb, knife, lantern, &c. manufacture; and an export duty upon green myrtle wax might favor the bleaching of that choice vegetable production, and the formation of white candles from it; so, perhaps, the laying an export duty upon furs would be a ready method of aiding the hat manufacture. Or, to take a stronger case, an export duty on provisions, by making bread, meal, and other articles of food cheap at home, might be viewed by some of the petitioners as a capital method of lowering labor and encouraging domestic manufactures. But none of this latter class of expedients is under the control of the Government.

The committee observe in the journal of the House, that, on the 21st of February, 1803, a resolve was passed directing the Secretary of the Treasury to prepare, and lay before Congress, a plan for the levying new and more specific duties on goods, wares, and merchandise, imported into the United States, so that the same shall, as near as may be, neither increase nor diminish the present revenue collected from imports. From this plan, lately presented to Congress, additional light has been thrown on this subject.

In the mean time, it ought to be considered that there is great scope for agriculture, tillage, and rural employment, in the United States. Agriculture is the great occupation which sets in motion all kinds of manufactures. It furnishes both the raw materials, and the articles of subsistence to those who are engaged in manufacturing employments. The cultivation of the earth is, therefore, absolutely necessary to provide the ingredients for artizans to work upon, and the food for enabling them to live, while they are engaged in labor. This being the fact, the great question arises, whether we shall furnish raw materials and food to manufacturers in our own country, or in foreign lands?

Political economists will instantly see that the good of the revenue, and the happiness of the people, are best promoted by offering a part of our unwrought materials, and of our surplus provisions, to domestic manufacturers, and, at the same time, to export the other part of what we can spare, in exchange for the wrought productions of foreign manufactories.

In a country devoted to agriculture, the cluster of arts and trades which minister to its wants spring up of course, and almost from necessity. The plainer, coarser, and more useful fabrics in wood, wool, leather, iron, flax, cotton, and stone, are manufactured with tolerable skill; while the more fine, costly, and high wrought articles of those several kinds, can be procured more conveniently from foreign parts. And while the country consumer pays for the former with one part of his spare produce, he barter away the other part to procure a proportion of the latter.

There may be some danger in refusing to admit the manufactures of foreign countries; for, by the adoption of such a measure, we should have no market abroad for our produce, and industry would lose one of its chief incentives at home.

In addition to the wise calculations and estimates of our predecessors in Congress, who devised the existing system of imposts, there may probably be something done. And the following plan appears to the committee as well adapted as any thing that has occurred, to suit the wishes of the petitioners as far as seems reasonable, and as actual circumstances warrant:

Resolved, That rags of linen, cotton, woollen, and hempen cloths; bristles of swine; regulus of antimony; unwrought burr stones; salt petre; and the bark of the cork tree, (which pay at present $12\frac{1}{2}$ per cent. ad valorem) be admitted free of duties.

Resolved, That brushes and black bottles, (now paying a duty of $12\frac{1}{2}$ per cent.) be henceforward charged with a duty of 25 per cent.

Resolved, That fur hats, and plated ware, (which now pay 15 per cent.) shall be raised to a duty of 20 per cent.

Resolved, That stone ware, window glass, and cannon ball, (which now pay 15 per cent.) be hereafter charged with a duty of 25 per cent.

Resolved, That foreign pickled and dried fish, (which now pay $12\frac{1}{2}$ per cent. ad valorem) be subjected to a duty of 150 cents the barrel for the former, and of 100 cents the quintal for the latter.

Resolved, That a duty of 3 cents the pound be laid upon starch, of 4 cents the pound upon hair powder, and 4 cents upon glue, on their importation, in lieu of the present duties of 15 per cent. ad valorem.

Resolved, That printed calicoes, and gun-powder, (now paying $12\frac{1}{2}$ per cent.) be henceforward charged with a duty of 15 per cent.

Resolved, That tarred cordage and cables (now paying 180 cents the cwt.) be subjected to a duty of 2 cents the pound; and that untarred cordage (now paying 225 cents the cwt.) be made to pay $2\frac{1}{2}$ cents the pound.

Resolved, That a duty of 50 cents a piece be laid upon umbrellas; of 3 cents per pound upon soap; of 3 cents the pound upon tallow candles; of 2 cents the pound upon anchors; of $2\frac{1}{2}$ cents upon spikes and bolts of iron.

No. 215.

[1st SESSION.]

REMISSION TO THE COLLECTOR AND NAVAL OFFICER AT SAVANNAH.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 27, 1804.

Mr. SAMUEL L. MITCHILL made the following report:

Report of the Committee of Commerce and Manufactures, on the memorial of Laughlan M'Intosh and Joseph Habersham, referred on the 16th instant:

The former of the memorialists is the late naval officer of the port of Savannah, in Georgia. The latter is the agent of the estate of John Habersham deceased, late collector of the customs at that port.

In the years 1791 and 1792, the collector and naval officer, from a misunderstanding and improper construction of the revenue laws, at that time, omitted to charge the ten per cent. on enumerated articles imported in foreign vessels.

After the mistake was detected, the memorialists made all the exertions in their power to collect these arrears of duties. And in this they were so successful that the whole of the sum due from the collector and naval officer to the treasury was recovered, except one thousand one hundred and eleven dollars and eighteen cents; and the reason why the whole was not recovered was, that many of the importers of goods were transient persons, who never came into that collection district again. A list of the names of these persons, and the sums of money owing by them, respectively, accompanies the memorial.

The accounts of Mr. M'Intosh, and Mr. John Habersham, have never, as yet, been settled at the treasury. And the object of the present application is to solicit an exoneration of the arrears of debt, to the amount aforesaid; and to this appeal to Congress they have been prompted, in consequence of the inability of the Secretary and Comptroller of the Treasury to grant relief.

It appears that the *then* Secretary of the Treasury was inclined to construe favorably the error in judgment of the collector and naval officer in the interpretation of the law. And the *present* Secretary of the Treasury, in pursuance of the probability he feels that the inconvenience complained of arose from a mistake in construing the law, or from an ignorance of it, was disposed to direct credit to be given for the amount, had not the Comptroller conceived that the law forbade the exercise of that discretion in the present case.

The committee are of opinion, that the petitioners are entitled to relief; and that the Secretary of the Treasury be authorized to direct credit to be given to the late collector of Savannah, to the amount of eleven hundred and eleven dollars and eighteen cents.

8th CONGRESS.]No. 216.[1st SESSION.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 30, 1804.

TREASURY DEPARTMENT, *January 27, 1804.*

SIR:

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement, exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1800, 1801, and 1802.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of *the House of Representatives.*

A Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, in the years 1800, 1801, and 1802, compared with the amount of Duties collected on the same, respectively.

8th CONGRESS.]

No. 217.

[1st SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 6, 1804.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their report of the 5th February, 1803, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury, to this Board, dated the third day of the present month, and in the statements therein referred to; which are herewith transmitted, and prayed to be received as part of this report.

JOHN BROWN, *President of the Senate.*JAMES MADISON, *Secretary of State.*ALBERT GALLATIN, *Secretary of the Treasury.*LEVI LINCOLN, *Attorney General United States.*

WASHINGTON, February 4, 1804.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That, at the close of the year 1801, the unexpended balance of the disbursements, made out of the treasury, for the payment of the principal and interest of the public debt, which was applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted to - - - - - \$1,085,907 60

As will appear by the statement A.

That, during the year 1802, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt, viz:

I. There was paid on account of the reimbursement and interest of the domestic funded debt, the sum of	-	-	-	-	-	4,618,021 39
II. On account of domestic loans obtained from the Bank of the United States, viz:						
On account of the principal,	-	-	-	-	-	1,290,000 00
On account of the interest,	-	-	-	-	-	162,025 00
						<u>1,452,025 00</u>
III. On account of the domestic unfunded debt, viz:						
On account of debts due to foreign officers,	-	-	-	-	-	7,994 92
On account of certain parts of the domestic debt,	-	-	-	-	-	14,966 84
						<u>22,961 76</u>
IV. On account of the principal and interest of the Dutch debt, including repayments in the treasury,	-	-	-	-	-	3,359,992 03
Amounting, altogether, to	-	-	-	-	-	
As will appear by the annexed list of warrants B.						<u>9,453,000 18</u>

Which disbursements were made out of the following funds, viz:

I. From the funds constituting the annual appropriation of \$7,300,000, for the year 1802, viz:						
From the fund arising from interest on the debt transferred to the commissioners of the sinking fund, as per statement annexed to last year's report, marked B,	-	-	-	-	-	326,449 92
From the fund arising from payments into the treasury, of debts which originated under the late Government, as per statement annexed to last year's report, marked C,	-	-	-	-	-	888 79
From the fund arising from dividends on the capital stock, which belonged to the United States, in the bank of the said States, as per statement annexed to last year's report, marked D,	-	-	-	-	-	33,960 00
From the fund arising from the sales of public lands, being the amount of moneys paid into the treasury, in the year 1802, as per statement annexed to last year's report, marked E,	-	-	-	-	-	179,575 52
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships and vessels,	-	-	-	-	-	6,759,125 77
						<u>7,300,000 00</u>
II. From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels, advanced in part and on account of the annual appropriation of \$7,300,000, for the year 1803,	-	-	-	-	-	745,807 40
III. From repayments in the treasury, on account of remittances purchased for providing for the foreign debt, as will appear by the statement E, viz:						
Repayment of the purchase money,	-	-	-	-	-	109,120
Damages and interest recovered,	-	-	-	-	-	10,472 78
						<u>119,592 78</u>
IV. From the proceeds of two thousand two hundred and twenty shares of the capital stock of the Bank of the United States, as per statement annexed to last year's report, marked F,	-	-	-	-	-	1,287,600 00
						<u>\$9,453,000 18</u>

That the abovementioned disbursements, together with the abovementioned balance, which remained unexpended on the 1st January, 1802, and amounting altogether, to - - - - - 10,538,907 78

Ten millions five hundred and thirty-eight thousand nine hundred and seven dollars and seventy-eight cents, have been accounted for, in the following manner, viz:

I. There was repaid in the treasury, during the year 1802, on account of protested bills or advances made for contracts, which were not fulfilled, as appears by the abovementioned statement E, a sum of	-	-	-	-	-	109,120 00
II. The sums actually applied during the same year, to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amount to seven millions seven hundred and seventy-two thousand eight hundred and fifty-four dollars and seventy cents, viz:						

I. Paid in reimbursement of the principal of the public debt,	-	-	-	3,638,744 63	
II. On account of the interest and charges on the same,	-	-	-	4,134,110 07	
					<u>7,772,854 70</u>
As will appear by the statement D.					
III. The balance remaining unexpended at the close of the year 1802, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted to (as will appear by the statement F)	-	-	-	-	2,656,933 08
					<u>\$10,538,907 78</u>

That, during the year 1803, the following disbursements were made out of the Treasury, on account of the principal and interest of the public debt, viz:

I. There was paid on account of the reimbursement and interest of the domestic funded debt, a sum of	-	-	-	-	4,568,176 68
II. On account of domestic loans obtained from the Bank of the United States, viz:					
On account of the principal,	-	-	-	-	500,000 00
On account of the interest,	-	-	-	-	82,000 00
					<u>582,000 00</u>
III. On account of the domestic unfunded debt, viz:					
On account of debts due to foreign officers,	-	-	-	-	12,123 31
On account of certain parts of the domestic debt,	-	-	-	-	12,073 43
					<u>24,196 74</u>
IV. On account of the principal and interest of the foreign debt, including repayments in the treasury,	-	-	-	-	2,153,348 17
					<u>7,327,721 59</u>

As will appear by the annexed list of warrants, G.

Which disbursements were made out of the following funds, viz:

I. From the funds constituting the annual appropriation of \$7,300,000, for the year 1803, viz:					
From the fund arising from interest on the debt transferred to the commissioners of the sinking fund, as per statement N,	-	-	-	-	401,355 05
From the fund arising from payments into the treasury, of debts which originated under the late Government, as per statement O,	-	-	-	-	135 46
From the fund arising from the sales of public lands, being the amount of moneys paid into the treasury, in the year 1803, as per statement P,	-	-	-	-	158,949 65
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels,	-	-	-	-	5,993,752 44
					<u>6,554,192 60</u>

Which sum of
Together with the sum advanced during the year 1802, on account of the appropriation for the year 1803, and amounting, as above stated, to

Make, in the whole, for the year 1803, the annual appropriation of 7,300,000 00

II. From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels, advanced in part, and on account of the annual appropriation for the year 1804,	-	-	-	-	753,236 40
III. From repayments in the treasury on account of remittances purchased for providing for the foreign debt, and of advances made to commissioners of loans, as will appear by the statement I, viz:					
Repayment of the purchase money, and advances,	-	-	-	-	13,117 48
Damages and interest recovered,	-	-	-	-	2,218 00
					<u>15,335 48</u>
IV. From the moneys appropriated by law, for paying commissions to agents employed in the purchase of remittances for the foreign debt, being the amount paid at the treasury, during the year 1803, for that object, as will appear by statement G,	-	-	-	-	4,957 11
					<u>\$7,327,721 59</u>

That the abovementioned disbursements, together with the above stated balance of
Which remained unexpended at the close of the year 1802, and with a further sum arising from profits made on remittances made to Holland, by the way of London, which is estimated at

	-	-	-	-	2,656,933 08
					<u>11,200 00</u>
					<u>9,995,854 67</u>

And amounting altogether, to nine millions nine hundred and ninety-five thousand eight hundred and fifty-four dollars and sixty-seven cents, will be accounted for in the next annual report, in conformity with the accounts which shall then have been rendered to the Treasury Department.

That, in the mean while, the manner in which the said sum has been applied, is, from the partial accounts which have been rendered, and from the knowledge of the payments, intended to be made both in Holland and in America, estimated as followeth, viz:

I. The repayments in the treasury have amounted, as by the abovementioned statement I, to	-	-	-	-	13,117 48
II. The sums actually applied, during the year 1803, to the payment of the principal and interest of the public debt, are estimated as followeth, viz:					
Paid in reimbursement of the principal of the public debt,	-	-	-	-	4,528,196 74
Paid on account of interest and charges on the same,	-	-	-	-	3,903,144 11
					<u>8,431,340 85</u>

As will appear by the estimate K.

III. The balance remaining unexpended at the close of the year 1803, and applicable to payments falling due after that year, is estimated, as per estimate L, at	-	-	-	-	1,551,396 34
					<u>\$9,995,854 67</u>

That no purchases of the debt of the United States have been made since the date of the last report to Congress. And that the statement M exhibits the operations at the treasury, in the transfer of stock to the commissioners of the sinking fund, in trust for the United States, upon the reimbursement of the foreign debt, in the year 1802; and includes also, the sum of six thousand three hundred and fifty-nine dollars and twenty cents, being the aggregate of the several species of stock transferred in the year 1803, in payment for public lands.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *February 3, 1804.*

A.

Statement of the provision made before the 1st January, 1802, for the payment of the principal and interest of the public debt falling due after the year 1801.

<i>I. On account of the foreign debt.</i>	<i>Guilders.</i>	<i>Dolls. Cts.</i>
1. Cash in the hands of the commissioners at Amsterdam and Antwerp, on 31st December, 1801:		
In Amsterdam, per treasury statements No. 13,824 and 14,359, - - -	1,508 14 02(a)	
In ditto, transferred by the commissioners during the year 1802, from the account of Gov. Morris to the credit of Dutch debt, being the balance of a sum formerly remitted for paying the interest on the debt due to foreign officers, - - -	41,787 10 08	
	<u>43,296 04 10</u>	
Deduct balance due to C. J. M. DeWolf, in Antwerp, - - -	1,432 00 00	
	<u>41,864 04 10</u>	
At 40 cents, is - - -		16,745 69
2. Amount of remittances paid for at the treasury and remitted to the commissioners on or before the 31st December, 1801, which are credited by the commissioners in their account for 1802, - - -	2,240,523 04(b)	
Which remittances cost only \$888,065 64, but, at 40 cents, is - - -		896,209 28
3. Amount of payment, made at the treasury before the 31st December, 1801, for remittances which have been protested for non-payment, on account of contracts not fulfilled, and on that day not repaid into the treasury, - - -		(c)153,120 00
4. Advances made to G. Simpson and P. R. Dalton, agents for purchasing bills of exchange, unexpended on 31st December, 1801, - - -		20,961 40
<i>II. From which deduct, on account of the domestic debt, viz:</i>		
The balance on 31st December, 1801, in the hands of deceased commissioners of loans, amounted to - - -	\$3,393 99	
Ditto in the hands of acting ditto, - - -	1,196,390 16	
Overpaid to Bank of United States beyond the dividends payable at the treasury, - - -	95 88	
	<u>\$1,199,880 03</u>	
The demands unsatisfied on the same day, on that account, were, viz:		
Dividends payable by the commissioners of loans, including that due on 1st January, 1802, and exclusively of unclaimed dividends no longer demandable at their offices, - - -	\$1,178,863 59	
Unclaimed dividends payable at the treasury, - - -	22,126 59	
Balance due to the late commissioner of loans for Georgia, - - -	18 62	
	<u>1,201,008 80</u>	
Balance due on account of domestic debt, - - -		\$1,128 77
Amount advanced in anticipation of payments for the public debt, - - -		<u>\$1,085,907 60</u>

NOTES TO STATEMENT A.

(a) In the account of the commissioners for the year 1801, as settled at the treasury, per report 13,824, a balance is stated in favor of the United States, of - - -	Guilders, 57,631 16 15
In their account for the year 1802, as settled at the treasury, per report No. 14,359, they are charged for transactions antecedent to 1802, with a further sum of - - -	6,146 14 03
	<u>63,778 11 02</u>
From which deducting an item for dividends on stock sold, only suspended for want of vouchers, and amounting to - - -	62,269 17 00
	<u>1,508 14 02</u>
Leaves the balance, as per statement B, - - -	19,676 15 00
The commissioners, in their account for 1801, had stated a balance due to them by the U. States, of - - -	<u>21,185 09 02</u>
Making a difference of - - -	
Which difference consists of the following items, viz:	
Overcharge of $\frac{1}{2}$ per cent. on their charges for negotiating the loan of 3,000,000 guilders, of 1st January, 1794, - - -	Guilders, 15,000 00 00
Interest charged by them on said sum, - - -	2,679 09 00
Amount of a bill paid to them on account of the Dutch debt, and by them erroneously credited to the Department of State, - - -	3,000 00 00
Interest on the said sum, - - -	467 05 03
Commission overcharged on payment of interest on Dutch debt, - - -	38 14 15
	<u>Guilders, 21,185 09 02</u>

(b) This sum, which makes part of the sum of 5,009,985 02 08 accounted for by the commissioners during the year 1802, as per their account for that year, settled at the treasury, (report No. 14,359) consists of the following items, viz:

Guilders, 814,364 at 39 cents, -	\$317,601 96
1,426,159 04 at 40 " -	571,463 68
	<u>2,240,523 04 cost</u>
	<u>\$888,065 64</u>

(c) This sum consists of the following particulars:

Bill purchased from Pragers & Co. in 1798,	-	-	-	Guilders 120,000	Dollars 48,000	} yet in suit.
Ditto A. Brown in 1801,	-	-	-	60,000	24,000	
Ditto D. Harris	-	-	-	35,000	14,000	} repaid in 1802.
Ditto J. Burrall,	-	-	-	10,000	4,000	
Ditto ditto	-	-	-	8,000 at 39 cts.	3,120	
Advance to J. and R. Waln, on account of a contract for paying moneys in Amsterdam, not fulfilled in 1801,	-	-	-	-	60,000	
					<u>\$153,120</u>	

TREASURY DEPARTMENT, Register's Office, February 1, 1804.

			\$109,120	\$10,472 78	\$119,592 78

TREASURY DEPARTMENT, Register's Office, 1st February, 1804.

JOSEPH NOURSE, Register.

F.

Statement of the provision, made before the 1st day of January, 1803, for the payment of the principal and interest of the Public Debt, falling due after the year 1802.

I. On account of the Foreign Debt.

	Guilders.	Dolls. Cts.
1. Cash in the hands of the commissioners, viz:		
In Amsterdam, as per acc't settled at the treasury, report No. 14,359, (e.)	1,039,823 03	
From which deduct a bill for	46,750	
Credited by the commissioners in 1802, but not paid for at the treasury till 1803, leaves a balance of	993,073 03	
In Antwerp,	195	
	993,268 03 at 40 cts.	397,307 26
2. Amount of remittances paid for at the treasury, and remitted to the commissioners, on or before the 31st December, 1802, which will be credited in their accounts for the year 1803, (f.)	52,884,976	2,115,398 92
3. Amount of payments made at the treasury before 31st December, 1802, for remittances, which have been protested for non payment, and which, on that day, had not been repaid in the treasury, (g.)	-	115,070 00
4. Advances made to George Simpson, and P. R. Dalton, agents for purchasing bills of exchange unexpended on 31st December, 1802,	-	14,120 01
		2,641,896 19

II. On account of Domestic Debt.

Cash due from deceased commissioners of loans,	3,393 99	
Ditto, in the hands of acting commissioners of loans,	1,220,264 83	
	1,223,658 82	
The demands unsatisfied on the same day, on that account, were as follows, viz:		
1. Dividends payable by the commissioners of loans, including that due on 1st January, 1803, and exclusively of unclaimed dividends, no longer demandable at their offices,	1,193,572 27	
2. Unclaimed dividends, payable at the treasury,	15,049 66	
	1,208,621 93	15,036 89
Total amount of provision for public debt, remaining unapplied on 31st December, 1802,		\$2,656,933 08

NOTES.

(e.) The account, as settled at the treasury, states the balance at	-	1,102,093 00
From which deducting the suspended item, as explained in note (a.) to statement A,	-	62,269 17
Leaves the amount as here stated,	-	1,039,823 03
(f.) The following statement proves the sum of guilders 5,288,497 06, as here stated, to be correct, viz:		
Balance in the hands of the commissioners, on 31st Dec. 1801,	-	41,864 04 10
Remittances paid for, previous to the year 1802, and credited by the commissioners in their accounts for that year,	-	2,240,523 04 00
Ditto, purchased in 1802, per statement C, in guilders,	7,521,218 14 00	
70,000 pounds sterling, at par, produces,	777,777 15 06	
	8,298,996 09 06	
		10,581,383 18 00

Amount applied to principal and interest of the foreign debt in 1802, per statement D, viz:

For principal,	-	-	-	-	2,950,000	
For interest and charges,	-	-	-	-	1,172,559 10	
						4,122,559 10

Bills purchased during the year 1802, protested for non payment, viz:

Brown and Hackman,	-	-	-	-	60,000	
Felix Imbert,	-	-	-	-	40,000	
Joseph Williams,	-	-	-	-	10,000	
John Halsey,	-	-	-	-	20,000	
Beal Owings,	-	-	-	-	20,000	
E. and L. Bollman,	-	-	-	-	27,000	
						177,000 00

Cash in the hands of commissioners, 31st Dec. 1802, per this statement,	-	-	-	-	-	993,268 03
Loss in exchange, on remittance of 94,250 guilders, from Amsterdam to Antwerp, per statement D,	-	-	-	-	-	58 19
Balance of remittances outstanding,	-	-	-	-	-	5,288,497 06
As above,	-	-	-	-	-	10,581,383 18

(g.) Statement of protested bills, outstanding 31st December, 1802:

Outstanding, 31st Dec. 1801.	{ Prager's bill for guilders,	120,000	\$48,000	} 72,000	} These bills are in suit.
	{ A. Brown's ditto,	60,000	24,000		
Purchased in 1802.	{ Brown and Hackman's do,	60,000	24,000	} 32,000	} This bill recovered in 1803.
	{ Beale Owings, do,	20,000	8,000		
	{ E. and L. Bollman's do,	27,000	11,070	cost 41 cts. 11,070	
		287,000	115,070	43,070	

The following proves the above statement to be correct:

The amount of protested bills, &c. outstanding 31st Dec. 1801, per statement A, was,	-	\$153,120
The repayments in 1802, for bills, &c. purchased, previous to 31st Dec. 1801, per statement E, amounted to	-	81,120
Left outstanding of these bills, &c.	-	72,000
The amount of bills protested, &c. outstanding on the 31st December, 1802, of those purchased during that year, as above, is,	-	43 070
Making, together,	-	\$115 070

TREASURY DEPARTMENT, Register's Office, 1st February, 1804.

JOSEPH NOURSE, Register.

G.

Commissions to agents for purchasing bills,	- - - 4,957 11		
		440,178 61	
			3,903,144 11
			\$8,431,340 85

L.

An estimate of the funds provided before the 1st January, 1804, for the payment of the principal and interest of the public debt, which, being unexpended on that day, are considered as applicable to payments falling due after the year 1803.

I. On account of the foreign debt.

The cash in the hands of the commissioners, and bills outstanding, amounted, on 31st December, 1802, as per statement F, to	-	-	Guilders, 6,281,765 09 00	
The bills and remittances made during 1803, are as follow:				
Guilder bills, purchased as per statement H,	-	-	4,125,840 10 06	
From which deduct a protested bill,	-	-	50,000 00 00	
			<u>4,075,840 10 06</u>	
Sterling bills, as per same statement,	-	£109,585 17 08		
Deduct two protested bills,	-	22,500 00 00		
		<u>87,085 17 08</u>	at par	967,620 18 08
Profit in exchange, on the above sterling bills, and on £70,000, purchased in 1802, remitted from London to Amsterdam, estimated at	-	-	-	28,000 00 00
				<u>5,071,461 08 14</u>
Total to be accounted for,	-	-	-	11,353,226 17 14
The application, during 1803, as per estimate K, has been—				
For principal,	-	-	-	6,970,000 00 00
For interest and charges,	-	-	-	1,026,487 10 00
				<u>7,996,487 10 00</u>
1st. The balance in the hands of commissioners, or in bills outstanding, on 31st December, 1803, may therefore be estimated at	-	-	-	3,356,739 07 14
Equal, at forty cents, to	-	-	-	\$1,342,695 75
2d. The amount of protested bills outstanding on the same day, was as follows, viz:				
Purchased before 1803,	{	Prager's bill, -	Guilders, 120,000 - \$48,000 00	} In suit.
	{	Brown's do. -	60,000 - 24,000 00	
	{	Brown & Hackman's, bill	- 60,000 - 24,000 00	
	{	Owing's, do.	- 20,000 - 8,000 00	
Purchased in 1803,	{	Tarascon's, do.	- 50,000 cost 20,500 00	} Recovered in 1803, but not bro't into the treasury, by warrant, till 1804. Secured, but not yet paid.
	{	Girard's two bills, -	- £22,500 - 100,000 00	
				<u>224,500 00</u>
				1,567,195 75
II. From which deduct, on account of domestic funded debt—				
For unclaimed dividends, demandable at the treasury, and not yet advanced to the bank for payment to the creditors, estimated at	-	-	-	15,799 41
				<u>\$1,551,396 34</u>

RECAPITULATION.

The provision applicable to the year 1804, per the foregoing,	-	-	\$1,551,396 34
Application during the year 1803, per estimate K,	-	-	8,431,340 85
Repayments in the treasury in 1803, per statement I,	-	-	13,117 48
			<u>9,995,854 67</u>
The balance, remaining unexpended 31st December, 1802, amounted, per statement F, to	-	-	2,656,933 08
The disbursements during the year 1803, as per statement G, to	-	-	7,327,721 59
The profit on sterling bills remitted to London, and the proceeds of which were remitted from thence to Holland, estimated at 28,000 guilders,	-	-	11,200 00
			<u>\$9,995,854 67</u>

M.

A General Statement of the several stocks transferred to the United States, to the 31st December, 1803; the interest upon which, by the acts of 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

	Old six per cent. stock.	3 per cent. stock.	Deferred 6 per cent. stock.	4 per cent. stock.	5 per cent. stock.	5½ pr. ct. stock.	8 per ct. stock.	Amt. of the several species of stock.
Purchased with moneys received on account of the surplus of duties, to the end of the year 1790, as per statement thereof,	\$439,016 12	401,072 90	631,786 86	-	-	-	-	1,471,875 88

8th CONGRESS.]

No. 218.

[1st SESSION.]

FISHING BOUNTY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 17, 1804.

Mr. SAMUEL L. MITCHILL, from the Committee on Commerce and Manufactures, to whom was referred the petition of Daniel Chapman and others, of the State of Connecticut, made the following report:

The petitioners, twelve in number, are owners and charterers of sundry vessels, which were cleared out of different ports in Connecticut for foreign places. They, however, proceeded to the straits of Bellisle, with the intention of catching cod fish to carry with them to their respective places of destination, for sale; but, the season being unfavorable, and their luck being bad, they could not make up a cargo suitable for a foreign market, and were obliged to return, in dissatisfaction, to their respective ports, at home.

On applying for the bounty for the fish which they took, they find they are precluded from receiving it, because they cleared out for a *foreign market*, instead of the fishing ground. It appears they were destitute of a fishing licence, and of the papers necessary for a fishing voyage. They however solicit the same bounty that is allowed to regular fishing vessels.

The Committee is of opinion that this request is improper, and ought not to be granted.

8th CONGRESS.]

No. 219.

[1st SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 21, 1804.

TREASURY DEPARTMENT, *March 20, 1804.*

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed on the second of April, one thousand seven hundred and ninety-two.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Comptroller's Office, March 17th, 1804.*

SIR:

The statements marked A, B, C, D, and E, which are herewith laid before you, have been prepared pursuant to the seventh section of an act of Congress, of the 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." These statements contain all the information relative to the transactions of the mint, which the settlements made at the treasury enable me to give.

I have the honor to be, with great respect, your obedient servant,

G. DUVALL.

The Honorable ALBERT GALLATIN, *Secretary of the Treasury.*

A.

Statement of appropriations made by law for the Mint establishment, for the year 1803, with the amount of warrants drawn by the Secretary of the Treasury on said appropriations.

Amount of warrants drawn on the Treasurer in favor of the mint, for the services of the year 1803, -	\$15,572 20
Balance unexpended on the 1st January, 1804, -	65,713 15
	<u>\$81,285 35</u>

Balance of the several appropriations for the mint establishment, unexpended on the 1st January, 1803, per statement for the preceding year, -	\$29,535 49
Appropriated by "acts respecting the mint," dated the 27th May, 1796, and 24th April, 1800, being the amount of cents and half cents paid into the treasury in 1803, -	42,349 86
Appropriated by "act making appropriations for the support of Government for the year 1803," dated the 2d March, 1803, -	9,400 00
	<u>\$81,285 35</u>

Statement of appropriations made by law for the payment of the salaries of the officers and clerks of the Mint, for the year 1803.

Amount of warrants drawn on the Treasurer of the United States, for the salaries of the officers and clerks of the mint in 1803, -	\$10,600 00
Balance unexpended on the 31st December, 1803, which is to be carried to the surplus fund, -	6 94
	<u>\$10,606 94</u>

Balance unexpended on the 1st January, 1803, -	\$6 94
By the "act making appropriations for the support of Government for the year 1803," passed the 2d March, 1803, -	10,600 00
	<u>\$10,606 94</u>

Statement of the application of moneys advanced from the Treasury of the United States, for the support of the Mint establishment, during the year 1803.

The moneys paid by the treasurer of the mint, on warrants drawn by him on the Director, and admitted by the accounting officers of the treasury of the United States, on the adjustment of his accounts, were as follow:

Incidental and contingent expenses and repairs of the Mint.

For 7105 dollars 95 cents, being the amount expended for the requisite repairs, apparatus, machines, wages of workmen, and other expenses,	
Paid in the 1st quarter, -	\$1,805 74
Paid in the 2d quarter, -	1,913 85
Paid in the 3d quarter, -	1,750 24
Paid in the 4th quarter, -	1,636 12
	<u>\$7,105 95</u>

Copper purchased for coinage.

For 23,369 dollars 77 cents, being the amount of the cost and charges of copper purchased for coinage, viz:	
67,470 pounds purchased from 1st October to 31st December, 1803, -	23,369 77

Salaries of the officers and clerks of the Mint.

Paid in the 1st quarter, -	\$2,650 00
Paid in the 2d quarter, -	2,650 00
Paid in the 3d quarter, -	2,650 00
Paid in the 4th quarter, -	2,650 00
	<u>10,600 00</u>

Wastage in the coinage of Gold and Silver.

Applied to make good deficiencies in wastage in the coinage of gold and silver, -	1,572 20
	<u>\$42,647 92</u>

Balance to be accounted for by Benjamin Rush, treasurer of the mint, on the 1st January, 1803, -	\$10,085 17
--	-------------

Advanced from the treasury for said establishment, viz:

For the salaries of the officers and clerks, -	10,600 00
--	-----------

Advanced from the treasury for the Mint establishment, viz:

For the purchase of copper, and the incidental and contingent expenses, -	15,572 20
Balance due to the treasurer of the mint, on the 31st December, 1803, per Auditor's report No. 15,150, -	6,390 55
	<u>\$42,647 92</u>

Account of Cents and Half Cents paid into the Treasury of the United States, by the Treasurer of the Mint, in the year 1803.

Paid in the 1st quarter, -	\$11,686 83
Paid in the 2d quarter, -	21,395 00
Paid in the 3d quarter, -	6,154 50
Paid in the 4th quarter, -	3,113 53
	<u>\$42,349 86</u>

TREASURY DEPARTMENT, Register's Office, March 3, 1804.

JOSEPH NOURSE, Register.

B.

An Abstract Statement of the settlements at the Treasury, of the accounts of the Treasurer of the Mint, from January 1st, to December 31st, 1803, exhibiting the balance, in bullion, for which he remained accountable on the last settlement, and also the deposits of Bullion, value of Coins paid, allowance for wastage, and balance remaining in the hands of the Officers of the Mint, and in the Bank of the United States.

8th CONGRESS.]

No. 220.

[2d SESSION.]

PROTECTING DUTY ON SLATE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 15, 1804.

Mr. SAMUEL L. MITCHILL made the following report:

The Committee of Commerce and Manufactures respectfully submit their report on the memorial of the President and Directors of the New York Slate Companies:

Two associations of individuals, in the State of New York, were formed, one in the year 1800, and the other in 1803, for the purpose of exploring and opening quarries of slate, within Dutchess county, in the said State. After expending considerable capital, they state that they have been successful in finding slate of an excellent quality. This they have brought to market in great quantity, and offer for sale at a reduced price of fifty per cent. They allege that they are capable of supplying the whole domestic demand for this useful article of building, and could easily furnish slate of various sizes and thickness, for exportation. But they complain of the rivalry and competition of the importers of slate from foreign countries; who, by means of superior numbers and capitals, can, without sensible inconvenience, submit to temporary losses, undersell the petitioners, and interrupt the regular course of their domestic industry. For the sake of preventing these discouraging embarrassments, they solicit an increase of impost on the importation of slate from foreign parts.

In the preamble to the act "making further provision for the payment of the debts of the United States," passed August 10th, 1790, it is declared that duties were laid on goods, wares, and merchandise, imported, for the discharge of the debts of the United States, AND THE ENCOURAGEMENT AND PROTECTION OF MANUFACTURES. By the first section of that act, slate was charged with a duty of 10 per cent. ad valorem. Afterwards, by the act "for raising a further sum of money for the protection of the frontiers, and for other purposes therein mentioned," passed May 2d, 1792, an additional 2½ per cent. was added; but this ceased at the end of two years, by its own limitation. Then again an additional five per cent. ad valorem was laid upon imported slate, by the first section of the "act for laying additional duties on goods, wares, and merchandise, imported into the United States," passed June 7th, 1794.

A further impost of 2½ per cent. was laid by the first section of the "act further to protect the commerce and seamen of the United States against the Barbary Powers," passed March 25th, 1804, upon all goods, wares, and merchandise, chargeable with an ad valorem duty. Slate comes within this class of articles. The money collected goes to "the Mediterranean fund;" and this additional 2½ per cent. will not be discontinued until three months after a ratification of a treaty of peace with Tripoli.

Hence, it appears that the existing duties on slate, imported from foreign ports, amount to 17½ per cent. if imported in ships or vessels of the United States; and computing the 10 per cent. additional, amount to 19½ per cent. upon all slate imported in vessels not of the United States. When to these are added freight, commission, insurance, and the other heavy charges on such a bulky article, it would seem that a sufficient *protecting* duty was already imposed to encourage this species of domestic manufacture. The committee are inclined to think it would be impolitic to increase the import to a *prohibitory* amount.

The committee cannot forbear to express a sentiment of pleasure on this discovery of an inexhaustible quantity of an incombustible material for covering buildings. The increasing scarcity of timber, and the prevailing custom of constructing fire proof houses, added to the more excellent, it may be said unequalled quality and abundance of the slate of New York, may be expected in a short time to accomplish the wishes of the petitioners, and give the home made slate a complete ascendancy in the market. While, therefore, they rejoice at the detection of this new resource of their country, and of its proportionally increased independence, they forbear to recommend any augmentation of impost upon its introduction from abroad.

On the whole, it is the opinion of the committee that any additional duty upon imported slate would, at this time, be inexpedient.

8th CONGRESS.]

No. 221.

[2d SESSION.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, NOVEMBER 21, 1804.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

REVENUE.

The nett revenue, arising from duties on merchandise and tonnage, which accrued during the year 1802, and on which the estimates of last year were predicated, amounted, as will appear by the statement A, to \$10,154,000. The nett revenue, arising from the same source, which accrued during the year 1803, has amounted, as appears by the same statement, to \$11,306,000; and it is ascertained that the nett revenue which accrued during the three first quarters of the year 1804, considerably exceeds that of the corresponding quarters of the year 1803. Without drawing any inference from the increase of the present year, an increase which must be ascribed to the situation of Europe, and will, eventually, be diminished by subsequent re-exportations, that branch of the revenue may, exclusively of the Mediterranean fund, be safely estimated at \$10,730,000, which is the average of the two years 1802 and 1803. The actual payments in the treasury, on account of those duties, during the year ending on the 30th of September last, amount nearly to the same sum; (a.) and there is no reason to suppose that the receipts of the ensuing, will fall short of those of last year.

The statement B exhibits, in detail, the several species of merchandise, and other sources, from which that revenue was collected, during the year 1803.

(a.) 10,729,708 dollars and 54 cents.

It also appears, that the revenue arising from the sales of public lands is gradually increasing. The statement C shows that, exclusively of the September sales, at Cincinnati, three hundred and fourteen thousand acres have been sold during the year ending on the 30th of September last. The proceeds of those sales, calculated on the supposition that every purchaser will be entitled to the discount allowed in case of prompt payment, would yield five hundred and fifteen thousand dollars. And, notwithstanding the difficulties which exist in drawing into the treasury the moneys collected by the receivers of the remote land offices, it is believed that the actual receipts from that source will, for the ensuing year, exceed four hundred and fifty thousand dollars.

The permanent revenue of the United States may, therefore, including the duties on postage, and other small incidental branches, be computed at eleven millions two hundred thousand dollars.

And the payments in the treasury, during the year 1805, on account of the temporary duties which constitute the "Mediterranean Fund," are estimated at five hundred and fifty thousand dollars; making, in the whole, for the probable receipts of that year, a sum of - - - - - \$11,750,000

EXPENDITURES.

The expenses of the year 1805, which must be defrayed out of that year, consist of the following items:

1. The annual appropriation of eight millions of dollars, for the payment of the principal and interest of the public debt; of which near \$3,700,000 will be applicable to the discharge of the principal, and the residue to the payment of the interest,	\$8,000,000
2. For the Civil Department, and all domestic expenses of a civil nature, including military pensions, the light-house and mint establishments, and the expenses of surveying public lands,	952,000
3. For expenses incident to the intercourse with foreign nations, including the payment of awards under the 7th article of the British treaty, and the permanent appropriation for Algiers,	294,000
4. For the Military and Indian departments, including the permanent appropriation for certain Indian tribes,	954,000
5. For the Naval establishment, viz. annual appropriation charged to the ordinary revenue,	\$650,000
Extraordinary expenses of the last expedition against Tripoli, which will be payable in the year 1805, and are chargeable to the Mediterranean fund,	590,000
	1,240,000
6. Reserved out of the Mediterranean fund, for meeting other extraordinary expenses, which may be incurred under the act constituting the fund,	100,000
Making, altogether,	11,540,000
Eleven millions five hundred and forty thousand dollars; and, deducted from the revenue of	11,750,000
	\$210,000

Leaves a surplus of more than two hundred thousand dollars.

MEDITERRANEAN FUND.

The sum which may probably be received during the year 1805, on account of that fund, and the payments during that year, which will ultimately be charged to the fund, are included in the preceding estimate of receipts and expenditures; but it is necessary to give a distinct view of the whole amount of revenue and expenses under that head.

The value of merchandise, paying duties ad valorem, which was imported in the year 1802, amounts, after deducting the exportations of the same year, to \$31,706,000. The value of the same description of merchandise, imported in the year 1803, amounts to \$34,370,000. The additional duty of 2½ per cent. on that description of imported articles, constitutes the Mediterranean Fund, and calculated on the average importations of the two years, would have yielded, annually, \$826,000. But several articles, which, in the years 1802 and 1803, paid duties ad valorem, having, in lieu thereof, been charged with specific duties, by an act of last session, are not liable to the additional duty of 2½ per cent. Although the value of those articles cannot be precisely ascertained, it is believed that the deduction, on that account, will not amount to \$50,000, and that the proceeds of the additional duty may be computed at the annual sum of \$780,000; and for the eighteen months commencing on the 1st July, 1804, and ending on the 31st December, 1805, at \$1,170,000. The expenses authorized under the act constituting the fund, have been predicated on that estimate, and apportioned in the following manner:

1. For the Navy Department, (in addition to the annual appropriation of \$650,000) viz.	
There had been advanced, from the ordinary revenue, prior to the 30th September, 1804,	\$350,000
A further payment will be made before the 1st January, 1805, of	130,000
To be paid during the year 1805, on account of this fund, as stated under the 5th item of expenditures for that year,	590,000
	\$1,070,000
2. Reserved for other extraordinary expenses, which may be incurred for the same object, being the 6th item of expenditures for the year 1805,	100,000
	\$1,170,000

Those duties began to operate on the 1st day of July last; but, as they are payable six, eight, nine, ten, and twelve months after the importation, no part will be paid in the treasury during the present year; and a sum of only \$550,000 is expected to be received in the course of the year 1805. For that sum only, credit has been taken in the general estimate of receipts for that year; whilst a part of the \$1,170,000, chargeable to the fund, has already been expended, and the rest is included in the preceding estimate of expenses for 1805. The difference, amounting to \$620,000, will, at the end of the next year, consist of outstanding bonds, payable in 1806. And, if the additional duty should, as well as the extraordinary expense for which it is appropriated, cease at that time, that outstanding balance will, as it is collected, replace in the treasury the sum advanced for the ordinary revenues, in anticipation of the proceeds of the fund. For it is hoped that the situation of the treasury will render it unnecessary to recur to the authority given by the act, to borrow on the credit of the fund.

BALANCE IN THE TREASURY.

The greater part of the balance of \$5,860,981 54, which, on the 30th day of September, 1803, remained in the treasury, was, in the last year's report, considered as applicable to the payments of certain extraordinary demands, therein stated.

As no payment has been made on that account, during the last year, besides the first instalment of \$888,000 due to Great Britain, nor any other extraordinary expense been discharged, than the advance of \$350,000, in anticipation of the Mediterranean fund; the balance remaining in the treasury on the 30th September, 1804, still amounted to \$4,882,225 11. That sum, together with the estimated surplus of revenue for the year 1805, the sum advanced from the ordinary revenue to the Mediterranean fund, and the arrears of the direct tax and internal revenues, may still be considered as sufficient to discharge the balance of \$1,776,000, due to Great Britain; the loan of \$200,000 due to Maryland; and two millions of dollars on account of the American claims assumed by the French convention. As the greater part of those demands will be paid in the course of the year 1805, the balance will not, probably, at the end of that year, exceed the sum which it is always expedient to retain in the treasury.

PUBLIC DEBT.

It appears by the estimate D, that the payments on account of the principal of the public debt, have, during the year ending on the 30th September last, amounted to - - - - - \$3,652,887 15

And during the three years and a half, commencing on the 1st day of April, 1801, and ending on the 30th September, 1804, to - - - - - \$13,576,891 86

During the same period, a new debt of thirteen millions of dollars has been created by the purchase of Louisiana, viz:

Six per cent. stock, issued in conformity with the convention, - - - - - \$11,250,000

Amount of American claims assumed by the convention, and for the payment of which authority has been given to obtain a loan; two millions thereof being already provided for, out of the surplus specie in the treasury, - - - - - 1,750,000

\$13,000,000

Another view of the subject may be given, in the following manner:

The balance in the treasury amounted, on the 1st day of April, 1801, to - \$1,794,044 85

And on the 30th September, 1804, to - - - - - 4,882,225 11

Making an increase of - - - - - \$3,088,180 26

From which deducting the proceeds of the sales of the bank shares, - - - - - 1,287,600 00

Leaves, for the increase arising from the ordinary revenue, - - - - - \$1,800,580 26

From the 1st day of April, 1801, to the 30th September, 1804, the following debts, which originated prior to that period, have been discharged:

1st. Payments on account of the domestic and foreign debt, as above stated, - \$13,576,891 86

2d. First instalment of the sum payable to Great Britain, "in satisfaction and discharge of the money which the United States might have been liable to pay, in pursuance of the provisions of the sixth article of the treaty of 1794," - 888,000 00

\$14,464,891 86

Making, altogether, - - - - - \$16,265,472 12

And from which, deducting fifteen millions, being the purchase money of Louisiana, - - - - - 15,000,000 00

Leaves, - - - - - \$1,265,472 12

A difference of more than twelve hundred thousand dollars in favor of the United States.

It may be added, that, if the revenue shall, during the ensuing year, prove, as is not improbable, more productive than has been estimated, the surplus will be applied towards the payment of the above mentioned sum of \$1,750,000, yet unprovided for, on account of the American claims, and will, so far, diminish the amount of the loan authorized for that object.

From the preceding statements and estimates it results, that the United States have, during the period of three years and a half, ending on the 30th September last, discharged a larger amount of principal of their old debt, than the whole amount of the new debt, which has been or may be created in consequence of the purchase of Louisiana; and that their existing and growing resources will, during the ensuing year, be sufficient, after defraying the current expenses of the year, and paying more than \$3,750,000, on account of the engagements resulting from the French and British conventions, to discharge a further sum of near three millions and seven hundred thousand dollars, of the principal of the public debt.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *November 19th, 1804.*

A.

A Statement exhibiting the amount of duties which accrued on Merchandise, Tonnage, Passports, and Clearances; of Debentures issued on the exportation of Foreign Merchandise; of payments for Bounties and Allowances and for expenses of collection, during each of the years 1802 and 1803.

	DUTIES ON			Debentures issued.	Bounties and allowances.	Gross revenue.	Expenses on collection.	Nett revenue.
	Merchandise.	Tonnage.	Passports & clearances.					
1802	\$14,795,975 87	\$161,709 79	\$13,820 00	\$4,197,256	\$134,233 80	\$10,640,015 86	\$485,451 93	\$10,154,563 93

TREASURY DEPARTMENT, Register's Office, 14th November, 1804.

JOSEPH NOURSE, Register.

8th CONGRESS.]

No. 222.

[2d SESSION.

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 4, 1804.

Mr. CROWNINSHIELD, from the Committee on Commerce and Manufactures, to whom were referred the petition of Thomas Parker and others, Directors of the Library Company of Philadelphia, and the memorial and petition of the Board of Trustees of the College of New Jersey, made the following report:

The Directors of the Library Company of Philadelphia state to the House, that they have lately received a valuable collection of books and prints, bequeathed to their institution, by the Rev. Samuel Preston, of the county of Kent, in Great Britain, on the importation of which, at Philadelphia, the sum of four hundred and ninety eight dollars and twenty cents is demanded for duties, agreeably to the laws of the United States.

The President of the Board of Trustees of New Jersey College informs Congress, that, after replenishing their library, (which had been destroyed by fire) in part, by donations and purchases of books, they have been obliged to import a large number of books from Europe, on the importation of which duties have been bonded at New York, under the laws of Congress, to the amount of four hundred and fifteen dollars and sixty-two cents.

The object of the petitioners, in both instances, is to be exonerated from the payment of the duties, on their respective importations, and they pray that the bonds given at the custom house may be cancelled.

It is not within the knowledge of the committee that any duties which have accrued upon any importation whatever have been restored to the importers. To grant exemptions from duty to any institution, or to free any class or body of our citizens from the obligations of their bonds, for money due to the United States, would be going beyond what the committee could venture to recommend to the House. "All duties shall be *uniform* throughout the United States," is the peremptory language of the constitution, and the committee are well persuaded that the petitioners themselves would not, after mature reflection, hesitate to acknowledge, that the constitution is the paramount law, and that, in granting a privilege to them, to import books free of duty, while the right is denied to others, would be a violation of that justice which is so eminently due to the whole people of the United States; and as, from a late decision of the House, involving the same principle, there can be no reasonable expectation that the petitioners could obtain the exemptions prayed for,

The committee recommend that they have permission to withdraw their respective petitions.

8th CONGRESS.]

No. 223.

[2d SESSION.

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 7, 1805.

Mr. CROWNINSHIELD, from the Committee on Commerce and Manufactures, to whom were referred the petitions of Benjamin Bailey, James Bogart, Jr. and others, citizens of the United States, and resident merchants of the city of New York, made the following report:

The petitioners have been sufferers to a large amount, by a late distressing fire in the city of New York. They represent that they imported into the district of New York, various goods and merchandise, of a great value; and while they were still owners of such property, a conflagration took place, and destroyed their stores, with all, or nearly all, their contents, including the merchandise on which the duties were secured to be paid. They pray that Congress will authorize the collector of New York to deliver up, or cancel, all bonds or other securities given by them for duties upon such part of the said goods and merchandise as were destroyed by the fire.

Repeated decisions on similar applications leave no doubt on the mind of the committee that it would be improper to grant the prayer of the petition. When any article is imported into the United States, and the duties thereon are ascertained at the custom house, the amount forms a part of the actual value, and is an insurable interest: if it is afterwards destroyed by fire, or lost in the transportation, coastwise, from port to port, or in any manner injured or damaged, it has never yet been considered that the United States were bound to cancel the bonds entered into by the importers for the duties. The United States can, in no respect, be considered in the light of underwriters. When the duties have, at any time, accrued, they ought to be paid, and the importing merchant can have no greater right to call upon the Government for a return of the duties, than he would to demand of the seller a diminution in the price, or to ask the possessor of his note or bond, that he may be exonerated from the payment for any article purchased in the market, merely because the bargain was not advantageous, or because the merchandise was burnt or destroyed, which formed and constituted the evidence of *value received*. It is with regret the committee make these observations, but they wish it to be generally understood by the merchants, that, in no case could they deem it proper to advise the House to refund the duties upon merchandise destroyed by any accident whatever.

It is true the treasury of the United States ought not to be enriched from the losses of private individuals, and that our revenue is chiefly derived from the duties on articles consumed in the country; but, when it is fairly considered that, to abandon claims upon the importers, would lead to numerous impositions; that if some were relieved from debts contracted in good faith, (although the articles on which those debts originated were actually destroyed) it might induce others to expect similar indulgencies, without having equal claims upon the national bounty, and as there exists a strong necessity for perserving uniformity in these decisions; and as it cannot be reasonably expected that Congress should now deviate from a long course of practice, founded as it is on equitable and strict commercial principles, the committee recommend that the petitioners have permission to withdraw their petition.

8th CONGRESS.]

No. 224.

[2d SESSION.]

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 11, 1805.

Mr. CROWNINSHIELD, from the Committee on Commerce and Manufactures, to whom was referred the memorial of Thomas Ketland, of the city of Philadelphia, merchant, made the following report:

The petitioner, with John Ketland and James Williamson, all of Philadelphia, in June, 1799, purchased the ship *Washington*, in London. It is stated that the ship arrived in the Delaware, on the 4th of May, 1800, entered at the custom house in Philadelphia, on the 17th of said month, and cleared out for Batavia, on the 9th July following, at which time she received a sea letter, and other regular documents.

The *Washington* is a *foreign built ship*, and by existing laws is not entitled to the benefit of an American register.

It appears that merchandise, on which the drawback was payable, was exported in the ship to Batavia, (the quantity not stated) which, having been previously imported in the same ship, had been charged with the *additional ten per cent. on the duties*.

The collector retained this part of the drawback, under the direction of the act of the 13th of May, 1800, and which the petitioner is now solicitous should be refunded to him.

The Committee of Commerce and Manufactures reported on this case at the last session of Congress, but the petitioner being of opinion that the committee have misconstrued the material facts upon which their decision was founded, solicits a revision, for reasons mentioned in his petition.

On the 13th of May, 1800, Congress passed an act, in which it is declared that no part of the additional duties, payable on goods imported in *foreign ships*, should be drawn back on exportation. And on the 14th of April, 1802, another law was passed, declaring that the act above referred to, should not be deemed to operate upon unregistered ships or vessels, owned by citizens of the United States, at the time of passing the said act, in those cases where such ship or vessel, *at that time*, possessed a sea letter, or other regular document, issued from a custom house of the United States, proving such ship or vessel to be American property.

At the last session, from the documents then exhibited, the committee concluded the ship sailed for Batavia without a sea letter, but they did not rest their decision on that point. It was material only to prove that the *Washington*, on the 13th of May, 1800, did not possess a sea letter, or any regular documents, issued from a custom house of the United States, proving her to be American property. It is stated, in that report, that the act of 1802 did not mean "to extend its remedial operation, or to retrospect beyond the 13th of May, 1800; and the petitioner's case not coming within the limitation and description therein specified, there did not seem to be even an equitable claim on the Government, for the drawback of the additional duties," &c.

A certificate from the collector of Philadelphia states that the ship cleared out for Batavia on the 9th of July, 1800, and took out a sea letter and the usual documents; so that it is fully proved she does not come within the provisions of the act of April, 1802: for that act was only meant to operate in favor of vessels possessing a sea letter, &c. on the 13th of May, 1800.

By looking at a document furnished the committee, it appears the petitioner places some dependence on the circumstance; that the ship's "*manifest*" was delivered to a revenue officer, on the 9th of May, but he acknowledges that the entry at the custom house was not made until the 17th of May. A manifest is not a regular document issued from the custom house; it is a memorandum or inventory of the inward cargo, to whom consigned, &c., and is generally made out at sea, and is presented to any revenue officer who demands it, and a copy is always necessary to be delivered previous to the entry.

This paper furnishes no evidence whatever, that the owners of the ship *Washington* ought to receive the allowance prayed for. Upon an impartial review of the whole case, therefore, the committee are satisfied—

1st. That the ship *Washington*, on the 13th of May, 1800, did not possess a sea letter, or any regular document issued from a custom house of the United States, proving her to be American property.

2d. That, under existing laws, although the ship received a sea letter, &c. on the 9th of July, 1800, and may now possess it, no goods or merchandise imported in that ship, after the date of the act of May, 1800, can be entitled to the allowance of the additional duties, as drawback upon their exportation, either in the same bottom, or on any other whatever. And further, the committee are fully convinced that unregistered vessels of the United States ought not to receive the same privileges, in our own ports, as those built within the United States, and entitled by the laws to the benefit of American registers; and the ship *Washington's* case clearly not being within the limits or provisions of the act of April, 1802,

The committee submit their opinion, that the prayer of the petition of Thomas Ketland ought not to be granted.

8th CONGRESS.]

No. 225.

[2d SESSION.]

EXTENSION OF DUTY BONDS.

COMMUNICATED TO THE SENATE, ON THE 17TH OF JANUARY, 1805.

To the Honorable the Senate and House of Representatives of the United States in Congress assembled, the petition of the subscribers, merchants, residing in the city of New York, respectfully sheweth:

That your petitioners are concerned in trade and navigation, to a considerable extent, between the port of New York and different ports on the continent of South America; that, by the act, entitled "An act to regulate the collection of duties on imports and tonnage," the terms of credit allowed for the payment of duties imposed on all "goods, wares, and merchandise, (other than wines, salt, and teas) imported from any other place than Europe or the West Indies," are as follow: one half of such duties payable in six months, one quarter in nine months, and the other quarter in twelve months from the date of each respective importation, as by the said act, to which your petitioners refer, may more fully appear; that, by a construction of the said act, adopted by the collector of the port of New York, which appears to your petitioners to be evidently founded in mistake, and which they are advised by counsel is certainly incorrect, your petitioners conceive that they have been much aggrieved by being obliged to give bonds to the said collector for the payment of such duties, on goods imported from the continent of South America; the one half in three months, and the other half in six months, and to pay such duties, accordingly, as in the

case of goods imported from the West Indies; that your petitioners are credibly informed, and believe, that a different construction of the said act, in this respect, has prevailed in several other ports of the United States, and the terms of credit, first above mentioned, allowed, which your petitioners believe is obviously the intent and meaning of the said act; that some of your petitioners have, at length, resisted the payment of the said duties at the periods claimed by the said collector of the port of New York, and have commenced a suit in the circuit court of the United States, in equity for the district of New York, in order to obtain a judicial determination of the credits allowed for the payment of such duties by the said act, but, at the same time, offering, in the said suit, to pay the duties in question therein, at such times as should be directed by the said court, which suit is still depending and undetermined; and your petitioners hoped that the mode so adopted, of settling the construction of the said act, if there existed any doubt concerning it, would have been deemed proper, and that a judicial decision thereon would be regarded as regulating the subsequent practice under the same. But your petitioners have since been informed that some application or representation on this subject has been made to your honorable body, and that, in consequence thereof, a bill hath been introduced in the honorable the House of Representatives, proposing to alter or limit the terms of credit on goods imported into the United States from all places on the continent of South America, situated north of the equator, to the periods of credit allowed for duties on goods imported from the West Indies. Your petitioners cannot but view the limitation proposed by the said bill as particularly injurious to their interest, and to the prosperity of a trade, already extensive, and in which a large portion of citizens of the United States are engaged; and your petitioners beg leave to represent, as an important consideration in favor of the periods of credit which they consider to be well established by the act above mentioned, that the voyages to the usual places of trade on the continent of South America; although north of the equator, are generally as long, and as difficult and expensive, as the ordinary course of voyages to Europe; that, in the apprehension of your petitioners, the principal object or reason of allowing a credit in the payment of duties on foreign imports is to enable the merchant, out of the proceeds of the sales of the goods imported, to reimburse himself the amount of such duties before they become payable; that, without a credit of sufficient length to answer this end, it can be of little importance whether any credit be, at all, given: for, if the amount of the duties are required to be paid before they can be realised from the proceeds of the imports on which they are charged, it imposes on the merchant the necessity of employing his capital, or a part of it, for the discharge of such duties, instead of applying to that object the proceeds of such imports. This would operate as a tax upon his capital, and would necessarily tend to cramp and embarrass the negotiations of trade, and, consequently, instead of increasing or aiding the revenue, would diminish its receipts. Your petitioners, therefore, apprehend that the true interests of the merchant and of the Government are, in this respect, the same, and that, considering the heavy duties already imposed on imports in general, it would be just as well as politic to allow a sufficient time of credit to enable the merchant to pay such duties out of the proceeds of the goods on which they are charged. Your petitioners also conceive that such credit, while it is at all times important to the merchant, cannot, when once in operation, prove, in any respect, material or detrimental to the revenue; and, in conformity to these ideas, your petitioners are also of opinion, and such they believe to be the opinion of a large majority of the merchants of this and other ports of the United States, that the periods of credit allowed on goods imported from the West Indies are too short and injurious to that trade. And your petitioners are convinced, from experience, that the trade with the continent of South America cannot be carried on, without great disadvantage, except upon terms of credit for the payment of duties equally beneficial with those which they conceive themselves at present entitled to by law, and they therefore humbly pray that your honorable body will not pass any act to limit or curtail such credit. And your petitioners, &c.

NEW YORK, *January 9th*, 1805.

8th CONGRESS.]

No. 226.

[2d SESSION.]

DRAWBACK ON REFINED SUGAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 21, 1805.

Mr. CROWNINSHIELD, from the Committee of Commerce and Manufactures, to whom was referred the memorial of Moses Rogers, Edmund Seaman, and others, sugar refiners in the City of New York, having had the same under consideration, submitted the following report:

The memorialists are extensively concerned in the manufacture of refined sugar, in the city of New York, and are possessed of establishments adequate (as they state) not only to the supply of the home market, but also to the production of considerable quantities for exportation to foreign countries.

They acknowledge they are protected by the present high duties on imported loaf sugar, to the extent of the domestic demand, but, as their refineries are capable of producing still greater supplies, they pray that a drawback or bounty may be allowed on the exportation, to foreign countries, of all refined sugar in the United States, equivalent to the duty paid on the raw sugar employed in the manufacture.

The committee beg leave to inform the House that similar applications have been frequently made to Congress, and it is almost unnecessary to add that the allowance prayed for has been invariably refused. At the last session of Congress, a lengthy, and, the committee thought, a conclusive report, was made on a resolution of the House "to inquire and report, by bill or otherwise, whether a drawback of duties ought not to be allowed on sugar refined in the United States, and exported to foreign ports and places;" and the committee then offered their opinion, "that it would be improper, under existing laws and regulations, to allow a drawback upon the exportation of domestic refined sugar;" and this report was concurred in by the House. Notwithstanding the repeated decisions of Congress, the present memorialists have hazarded their application; but the committee cannot see that they have offered any new or weighty reasons to induce them to alter their former opinions on this subject.

If the committee are not mistaken, it will be found, upon examination, that the sugar refiners are the most favored body of manufacturers in the United States. Our commercial regulations seem opposed to all prohibitory duties, and to monopolies. These are in direct hostility to systems heretofore deemed valuable, are contrary to what is right and just between one citizen and another, and ought never to be indulged in a free country, except (which could seldom happen) where they are necessary for the safety and protection of the whole people. And where monopolies are granted, or where such high duties exist as enable a particular class of men to engross any article of general use in a community, they only tend to heap up wealth in the hands of a few individuals, at the certain expense of the many. The duties on foreign refined sugar have been several times augmented to benefit the American refiners, and since January, 1795, this sugar has been charged with the high duty of nine cents per pound. It is denied the drawback on exportation, and cannot be imported in less quantities than six hundred pounds, nor in vessels of a less burthen than one hundred and twenty tons. The committee are at a loss to conceive the necessity of these severe restrictions. Sugar candy pays a duty, on importation, of eleven cents and one half the pound, and there can be no doubt that this extravagant duty was imposed with a view of favoring the sugar refiners. These high duties amount to almost a prohibition of the two articles: for, it is proved that they have been imported only in the most inconsiderable quantities, in late years, so that the sugar refiners possess the whole American market to

themselves. They enjoy a certain monopoly in their business. No foreign loaf sugar can enter into competition with what they manufacture. Bengal and China sugar candy could be imported in considerable quantities, at very reasonable prices; and there is no better substitute for refined sugar, either in the lumps, or when reduced to powder; but the present duty on that article excludes it altogether from the American market, to the injury of the East India trade—a loss of revenue to the United States, and to the benefit of no other persons but the sugar refiners. It might be supposed that these high protecting and prohibitory duties on the foreign article secured to the sugar refiners every important advantage which they could reasonably hope to receive. With the exclusive home trade, supplying the United States, upon their own confession, with every pound of refined sugar consumed in the country, charging their own prices to the consumer, the foreign article excluded from our market, the wide range of speculation all their own, their profits great, and probably beyond any other manufacturer's in the United States, it was rather a matter of surprise to the committee, that the sugar refiners should expect further indulgencies.

Without mentioning all the reasons that have occurred to the committee, against granting the allowance in question, they will suggest some of the objections to which it is liable.

1st. The Louisiana sugar might be used in the manufacture, almost in spite of any regulation that could be safely introduced, (and at New Orleans it would be exclusively employed) and as it is not charged with any duty, the United States would, in many instances, be compelled to pay the allowance where they had received no equivalent.

2d. It is well known that drawbacks are not payable on any goods and merchandise, after the expiration of twelve months, dating from the time of importation, and then only in cases where the original duties have been first received. If the crude sugar should lose the drawback, as it would in one year from the period of its importation, the price would be lowered in the market (presuming it was intended for exportation) in a sum equal to the duties, and it must then be sold for home consumption, probably at a reduced rate.

Now, sugar thus circumstanced, if purchased and manufactured by the refiners, could not be entitled to the allowance of drawback, on any principle whatever; and when it is supposed that the surplus of raw sugar in our market will find its way to Europe in American bottoms, and when it is considered that, in a refined state, it is not a bulky article, it may be doubted whether its reduction of weight would, in cases of exportation, be so advantageous to the carrying trade of the United States as might at first be imagined. If the sugar is exported in its crude state, the freight would be double, and those merchant ships that depended solely on freight would thereby derive at least a trifling advantage.

Although the committee do not wish it to be inferred that they would recommend the exportation of the raw materials found in our markets, in preference to those manufactured by American workmen, and reduced to half their ordinary bulk, merely for the benefit of the extra freight, yet, in respect to the article referred to, it becomes questionable whether the exporting merchant and ship owner do not now enjoy as great, or even greater advantages, than they would if bounties were allowed on refined sugar, to the extent of the quantity which could be manufactured for exportation from the United States.

3d. As the raw sugar, in refining, undergoes a complete transformation, it would be difficult, if not impossible, to guard against some impositions in paying the bounty, and frauds might be attempted on the revenue. The custom house officers could not always attend at the sugar houses; and, however upright the intentions of the refiners and exporters might be, the certificates must be multiplied, and such precautionary measures be introduced, as would embarrass the fair collection of the public revenue; and the allowance might perhaps tend, in some respects, to lessen its amount, and certainly it could not augment it.

4th. Should the prayer of the petition be granted, no good reason could be offered why New England rum, distilled from imported molasses, or cordage and cables manufactured from foreign hemp, and canvass made into sails, for the use of vessels, should not receive similar allowances. All the manufactured iron, too, which had paid a duty on importation in its unwrought state, would certainly be equally entitled to the benefit of such allowance; and domestic rum, sail cloth made up for ship's use, cordage, and various articles of iron work, such as anchors, bolts, spikes, nails, and hoops, are exported from the United States in considerable quantities, and it is believed in value far beyond the whole amount of refined sugar which could possibly be disposed of to advantage in foreign markets, and yet the committee do not recollect that the distillers, rope makers, sail makers, or blacksmiths, have ever petitioned Congress for a repayment of the duties on the exportation of the articles employed by them, or connected with their respective occupations.

The memorialists allege that, in Great Britain, a bounty on the exportation of refined sugar is allowed, of forty shillings sterling per hundred weight. In Great Britain the duties on imports will average about thirty per cent. higher than those paid in the United States, and on sugar, in particular, the duty is twenty-six shillings and six pence sterling per hundred weight, exceeding five and one quarter cents a pound, or double the American duty; still, the drawback on refined sugar exported from England is by no means payable at a certain or fixed standard, and a table of English drawbacks, now before the committee, fully prove that different rates of drawback are allowed, varying from forty shillings, when the price does not exceed forty shillings, to thirteen shillings, when the price is from sixty-eight to seventy shillings, per hundred weight; and whenever the average price of sugar exceeds seventy shillings per hundred weight, nothing is allowed, and it is presumed that sugar is often at that price in England, exclusive of the duties. But, in the examination of this question, it is of little consequence what commercial regulations exist in other countries, so long as they do not affect our rights, and it is sufficient for us that we adopt such as are known to be beneficial, and most conducive to the interests of this nation; and individuals ought not to complain that other countries follow this or that system, under different circumstances, and that our laws are not shaped to operate for their exclusive advantage.

Protecting duties on such articles as we can conveniently manufacture have been a long time established in the United States; and surely the sugar refiners can have no complaints to offer on that point: for there, the committee trust, it has been proved they possess peculiar, if not exclusive advantages. Various other objections could be adduced, to prove that Congress ought not to grant the allowance on the exportation of sugar refined in the United States, particularly while the present high duties are continued on loaf sugar, imported from Europe, and sugar candy, from the East Indies and China; but it is supposed to be quite unnecessary to enlarge a report already too much extended. The committee therefore respectfully submit the following resolution:

Resolved, As the opinion of the Committee of Commerce and Manufactures, that it is inexpedient to grant any allowance or bounty on refined sugar exported from the United States.

8th CONGRESS.]

No. 227.

[2d SESSION.]

PROTECTING DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 22, 1805.

Mr. CROWNINSHIELD, from the Committee on Commerce and Manufactures, to whom was referred the memorial of the Philadelphia Typographical Society, made the following report:

The petitioners are desirous that Congress should impose greater duties on books imported into the United States. They are under apprehension that, after the conclusion of the present war in Europe, the English bookseller will be able to undersell the American in his own market; and, possessing a sincere conviction that their situation may be greatly ameliorated by restricting the constant and great importation of foreign books, they solicit an augmentation of the present rate of duties on all books imported into the United States, probably with a view of increasing their profits, or, at least, of giving to the American booksellers the preference in their own market, and to which, the petitioners are of opinion, they are justly entitled.

The Committee can entertain no doubt that the petitioners are extremely desirous of encouraging the manufacture of books in the United States; and, if the exclusive interest of printers and booksellers were alone to be consulted, it is probable the Committee might be induced to recommend the proposed augmentation in the duties; but, it will be recollected that Congress are legislating for the benefit of the whole American People, and not for the sole advantage of any particular individuals.

At the last session of Congress, a law passed, declaring that rags of all sorts, for making paper, should be imported free of duty. The American paper is presumed to be cheaper here, than it can be imported from Great Britain, and, it may be supposed, we shall soon be able to supply the greater part of the demand for the domestic consumption of that article; so that foreign supplies will not be wanted, after a few years; and, although higher wages may be given for journeymen printers and bookbinders, it must be confessed that the Art of Printing has progressed more rapidly in the United States, than almost any other branch of machinery. This is a truth acknowledged by the petitioners, and assented to, with much pleasure, by the Committee; where, then, can be the danger that the English bookseller will be able to undersell the American in his own market? When it is considered that foreign books pay a duty of fifteen per cent. upon their importation, and that, to this charge, the commissions and various shipping expenses at the place of exportation must be added, together with the freight and insurance, the whole amounting, at the lowest calculation, to forty per cent. in favor of, and as a direct encouragement to, the American printers and booksellers, it might be supposed that the petitioners were sufficiently protected, and that they need not be under any apprehension of foreign competition in their business.

The great expenses which must necessarily attend the importation of European books into this country, if there was no other difference in their favor, will, it is hoped, give a decided advantage to the American bookseller.

In the imposition of duties on imported books, or on any article whatever, it was never imagined that the mere importer became ultimately charged with the amount, or that the Government had not in view the collection of a revenue to defray the expenses, and complete the payments of engagements, for which the public faith stands pledged; but surely it could not be supposed that these duties were to be augmented, at any time, to so high a rate as to amount to a complete prohibition on the importation. If a revenue is to be collected, extravagantly high duties ought not to be laid; and, in their augmentation beyond a fair proportion, a diminution of the revenue may be expected. If the duties are raised to answer the design of the petitioners in its full extent, the consequence will be, that little, or no revenue will be derived from imported books; the petitioners will be exclusively benefited; they will charge their own prices for American books; there can be no competition, and the nation will be the only sufferers.

The American People have still a great predilection for English printed books, notwithstanding it has been frequently proved that they can be as accurately and as elegantly printed here, as in any part of the world. The Committee see no reason why the price should be increased by additional duties, and they are unwilling to augment the charge to those readers, who prefer foreign publications to our own, especially when it is conceived that books of every description, whether of foreign or domestic manufacture, are, at present, sold at the most extravagant prices in the bookstores throughout the United States.

If the committee entertained an opinion that the art of printing was not sufficiently protected in this country, they would consider themselves bound, immediately, to recommend the adoption of some measure, calculated to meet the wishes of the petitioners, but, for the reasons stated, and from the strongest conviction, that the proposed augmentation of the duties on books imported into the United States is unnecessary and inexpedient, at this time, they submit their opinion to the House—

That the Board of Directors of the Philadelphia Typographical Society have leave to withdraw their petition.

8th CONGRESS.]

No. 228.

[2d SESSION.]

MINT.

COMMUNICATED TO CONGRESS, JANUARY 26, 1805.

To the Senate and House of Representatives of the United States:

I communicate, for the information of Congress, the report of the Director of the Mint, of the operations of that institution during the last year.

January 25, 1805.

TH: JEFFERSON.

MINT OF THE UNITED STATES, PHILADELPHIA, 1st January, 1805.

At the commencement of the year, it is the duty of the Director of the Mint to communicate to Government the state of the mint, with its issues for the past year.

The issues of silver coins, notwithstanding the mercantile embarrassments attending the importation of bullion, have greatly exceeded that of the year 1803, and the advantage of a public mint has been sensibly experienced, by the greatest part of the deposits being issued in small coin, which has been found very beneficial to the citizens, at large, under the late scarcity of Spanish dollars, occasioned by the great exportation of them for mercantile purposes.

The quantity of gold bullion has been equal to that of the last report; so that, in the past year, the coinage of the precious metals has amounted to three hundred and fifty-eight thousand nine hundred and eighty-three dollars. The particulars will appear by the schedule No. 1, herewith, to which the Director begs leave to refer.

It is worthy of the President's attention, that about eleven thousand dollars of the gold coin is the produce of virgin gold, found in the county of Cabarrus, in the State of North Carolina, where, it is said, a considerable quantity has been found since, which will, in all probability, be forwarded to the mint. It is to be regretted that this gold is melted into small ingots before it is sent to the mint, for the convenience of carriage; but, by which, there is reason to believe, a considerable portion of it is wasted. It is also said, that the finest particles are neglected, and only the large grains and lumps sought after.

The increased price of copper in Europe, and the quantity on hand have been thought sufficient reason to confine the coinage of cents to one press; and from the last accounts from Europe, copper is likely to be considerably increased in price, which will render the coinage of cents less profitable. The past year there have been issued seven hundred and fifty-six thousand eight hundred and thirty-eight cents, and one million and fifty-five thousand three hundred and twelve half cents—equal to twelve thousand eight hundred and forty-four dollars and ninety-four cents, as appears by the same schedule, No. 1. The amount of the cost of copper, and profit on the whole coinage of cents this year, will be seen by schedule No. 2.

The coinage of the year amounts, in the whole, to the sum of three hundred and seventy-one thousand eight hundred and twenty-seven dollars and ninety-four cents; and the number of pieces to two millions forty-six thousand eight hundred and thirty-nine.

The expenses of the mint, for the past year, will appear, by schedule No. 3, to be reduced to a trifle more than sixteen thousand dollars.

The Director thinks it his duty to mention to the President, that very considerable difficulty, as well as danger, may arise to the public, from the officers and workmen of the mint being exposed to be called out to attend militia meetings, or on detachments. When large deposits of the precious metals are passing through the mint, and, particularly when in fusion, it may be of the most dangerous consequences to have the officers and men called away, or be liable to fines for non-attendance. It is too important a trust to be thus exposed. The President, in his wisdom, will provide against this evil.

ELIAS BOUDINOT, *Director.*

To the PRESIDENT of the United States.

No. 229.

[2d SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 5, 1805.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board subsequent to their report of the 4th of February, 1804, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the fourth day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

A. BURR, *President of the Senate.*
J. MARSHALL, *Chief Justice of the United States.*
ALBERT GALLATIN, *Secretary of the Treasury.*

WASHINGTON, February 5, 1805.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That the balance remaining unexpended at the close of the year 1802, and applied to payments falling due after that year, which balance, as appears by the statement F, annexed to the last annual report, amounted to two millions six hundred and fifty-six thousand nine hundred and thirty-three dollars and eight cents, \$2,656,933 08
Together with the disbursements made during the year 1803, out of the treasury, on account of the principal and interest of the public debt, which disbursements, as appears by the statement G, annexed to the last annual report, amounted to seven millions three hundred and twenty-seven thousand seven hundred and twenty-one dollars and fifty-nine cents, - - - - - 7,327,721 59

And amounting altogether to nine millions nine hundred and eighty-four thousand six hundred and fifty-four dollars and sixty-seven cents, - - - - - \$9,984,654 67

Have been accounted for in the following manner, viz:

1. There was repaid into the treasury, during the year 1803, on account of the principal of protested bills, and of advances made to commissioners of loans, as appears by the statement I, annexed to the last annual report, a sum of thirteen thousand one hundred and seventeen dollars and forty-eight cents,	\$13,117 48
2. The sums actually applied during the same year, to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amount, as will appear by the statement A, to eight millions six hundred and twenty-two thousand four hundred dollars and sixty-eight cents, viz:	
1. Paid in reimbursements of the principal of the debt,	\$4,727,788 44
2. Paid on account of the interest and charges on the same,	3,894,612 24
	8,622,400 68
3. The balance remaining unexpended at the close of the year 1803, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amount, as will appear by the statement B, to one million three hundred and forty-nine thousand one hundred and thirty-six dollars and fifty one cents,	1,349,136 51
	\$9,984,654 67

That, during the year 1804, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt, viz:

1. On account of the reimbursement and interest of the domestic funded debt,	\$4,612,171 06
2. On account of domestic loans obtained from the Bank of the United States, viz:	
On account of the principal,	\$250,000 00
do. do. interest,	60,593 68
	310,593 68
3. On account of the domestic unfunded debt,	653 37
4. On account of the principal and interest of the foreign debt, and of the interest on the Louisiana stock,	3,336,427 44

Amounting altogether, as will appear by the annexed list of warrant C, to eight millions two hundred and fifty-nine thousand eight hundred and forty-five dollars and fifty-five cents,

\$8,259,845 55

Which disbursements were made out of the following funds, viz:

1. From the moneys appropriated by the 3d section of the act of 10th November, 1803, for paying the interest accruing on the Louisiana stock, to the end of the year 1803,	\$22,499 93
2. From the funds constituting the annual appropriation of \$8,000,000 for the year 1804, viz:	
From the fund arising from interest on the debt transferred to the commissioners of the sinking fund, as per statement I,	\$366,223 50
From the funds arising from the sales of public lands, being the amount of moneys paid into the treasury, from the 1st October, 1803, to the 30th June, 1804, as per statement K,	324,021 66
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels,	6,556,518 44
Amounting, altogether, to	7,246,763 60
Which sum of	7,246,763 60
Together with the sum advanced during the year 1803, on account of the appropriation for the year 1804, and amounting, as appears by the last annual report, to	753,236 40
Makes, in the whole, the annual appropriation for the year 1804, of	\$8,000,000 00

3. From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels, advanced in part, and on account of the annual appropriation for the year 1805,	829,901 59
4. From re-payments in the treasury, on account of remittances purchased for providing for the foreign debt, and of advances made to commissioners of loans, as will appear from the statement F, viz:	
Re-payment of the purchase money, and advances,	\$121,446 51
Damages and interest recovered,	32,370 91
	153,817 42
5. From the moneys appropriated by law, for paying commissions to agents employed in the purchase of remittances for the foreign debt, being the amount paid at the treasury, during the year 1804, for that object, and will appear by the statement C,	6,863 01

8,259,845 55

1,349,136 51

That the abovementioned disbursements, together with the above stated balance of which remained unexpended at the close of the year 1803, and with a further sum, arising from profit on remittances, purchased in the year 1804, and amounting, as will appear by the statement D, to

45,049 25

And amounting, altogether, to nine millions six hundred and fifty-four thousand and thirty-one dollars and thirty-one cents,

\$9,654,031 31

will be accounted for in the next annual report, in conformity with the accounts which shall then have been rendered to the Treasury Department.

That, in the meanwhile, the manner in which the said sum has been applied, is estimated as follows, viz:

1. The re-payments in the treasury, on account of principal, have, during the year 1804, amounted, as by the abovementioned statement E, to	\$121,446 51
2. The sums actually applied during the year 1804, to the payment of the principal and interest of the public debt, are estimated as follows, viz:	
1. Paid in reimbursement of the principal of the public debt,	\$3,205,248 52
2. Do. on account of the interest and charges on the same, as will appear by the estimate F,	4,006,799 69
	7,212,048 21
3. The balance remaining unexpended at the close of the year 1804, and applicable to payments falling due after that year, is estimated, as per estimate G, at	2,320,536 59
	\$9,654,031 31

That no purchases of the debt of the United States have been made since the date of the last report to Congress, and that the statement H exhibits the amount of stock transferred to the commissioners of the sinking fund, in trust for the United States, to the 31st December, 1804, including the sum of \$12,730 27, being the aggregate of the several species of stock transferred in the year 1804, in payment for public lands.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *February 4, 1805.*

A.

Statement of the Application, during the year 1803, of the Funds provided for the payment of Principal and Interest of the Public Debt.

I. Payments on account of the Principal of the Public Debt.

			<i>Guilders.</i>	
1st instalment of loan of 3,000,000 of 1st January, 1792,			600,000	
3d do. 2,000,000 do. February, 1784,			250,000	
4th do. 3,000,000 do. do. 1790,			600,000	
2d & 3d do. 2,500,000 do. March, 1791,			1,000,000	
5th do. 1,000,000 do. June, 1788,			200,000	
1st do. 2,950,000 do. do. 1792,			600,000	
Loan of 1,000,000 do. do. 1793,			1,000,000	
2d & 3d do. 6,000,000 do. Sept., 1791,			2,400,000	
1st & 2d do. 2,050,000 do. Dec'r. do. Antwerp,			820,000	
				7,470,000
	At 40 cents,			2,988,000 00
				<u>4,727,788 44</u>

II. Payments on account of the Interest and Charges on the Public Debt.

1. On the domestic debt, viz:				
Interest for the year 1803, on the several species of stock, constituting the domestic funded debt, as settled at the treasury,			3,381,796 85	
From which deduct this sum, being so much gained by rejecting mills in paying dividends,			10	
				3,381,796 75
2. Interest on domestic loans,				82,000 00
3d. On the foreign debt, viz:			<i>Guilders.</i>	
Interest paid at Amsterdam,			929,655	
Do. Antwerp,			81,487.10	
				(a.) 1,011,142.10
	At 40 cents,			\$404,457 00
Premiums on loan of 1st February, 1804,			15,000	
	At 40 cents			6,000 00
Commissions and charges, viz:				
At Amsterdam,			15,647,18.8	
At Antwerp,			7,724,08.0	
				23,372.06.8
	At 40 cents,			\$9,348 93
Commissions on purchase of bills in America,			4,957 11	
Loss in exchange, (b.)			6,052 45	
				20,358 49
				<u>430,815 49</u>
				<u>3,894,612 24</u>
Total amount applied to the public debt, during the year 1803,				<u><u>\$8,622,400 68</u></u>

NOTES TO STATEMENT A.

(a) The interest regularly due for 1803, on the Amsterdam and Antwerp debt, was	Guilders, 981,800.00
To which add for the following items:	
1. The 1st instalment of the Antwerp loan, due on the 1st December, 1802, was, through some misapprehension on the part of the banker, paid only on the 1st May, 1803, the interest for that period, amounting to	7,687.10
2. the 3d instalment of the loan of 1st March, 1791, and payable 1st March, 1804, was paid by anticipation, on the 1st November, 1803, the interest from that day to the 1st March, 1804, was saved, and the interest from 1st March 1803 to 1st November, 1803, was paid, together with the principal,	16,675.00
3. The third instalment of the loan 1st September, 1791, and payable 1st September, 1804, was paid by anticipation on the 1st October, 1803, the interest for eleven months was saved, and one month's interest paid, together with the principal,	4,980.00
	<u>29,342.10</u>
	<u>Guilders, 1,011,142.10</u>

(b.) Loss on exchange, viz:

On bills purchased in 1803, as per statement H, annexed to the last annual report,	Guilders 4,125,840 10 01	Cost, \$1,674,057 21	
Deduct a bill on which, it having been protested, no loss of exchange was incurred,	50,000 00 00	do. 20,500 00	
	<u>4,075,840 10 01</u>	<u>1,653,557 21</u>	
At par,		1,630,336 21	
Loss,			\$23,221 00
At par,	Sterling, £109,585 17 08	do. \$488,453 86	
		<u>487,048 36</u>	
Remitted to Amsterdam,	do. 129 10 07	Guilders, 1,431 09 00	1,405 50
At par,		<u>1,439 04 00</u>	
From which deduct, gained, viz: loss,		<u>7 15 00</u>	3 10
Remitted from London to Amsterdam,	Sterling, £70,000	do. 27,092 17 00	24,629 60
Do. do. do. do. 80,587 14 07		<u>25,267 09 08</u>	
		do. 52,860 06 08	
		<u>20,944 13</u>	
Deduct charges and commissions in London,		Sterling, £704 00 06	
At 4s. 6d.		<u>3,129 00</u>	
		<u>17,815 13</u>	
On remittances from Amsterdam to Antwerp,		Guilders, 1,905 01	
At 40 cents,		<u>762 02</u>	18,577 15
			<u>\$6,052 45</u>

TREASURY DEPARTMENT, REGISTER'S OFFICE, February 1st, 1805.

JOSEPH NOURSE, Register.

B.

Statement of the provision made before the 1st day of January, 1804, for the payment of the Principal and Interest of the Public Debt falling due after the year 1803.

I. On account of the Foreign Debt.

1. Cash in the hands of commissioners and agents, in Europe, viz:			
In Amsterdam, as per treasury settlement			
No. 15,416,	Guilders, 2,152,072 14 8	(a)	
From which, deducting a bill credited by the commissioners, in 1803, but not paid for at the treasury till 1804,	59,500 00 0		
	<u>2,092,572 14 8</u>		
Leaves a balance of	Guilders, 2,092,572 14 8		
Deduct a balance due in Antwerp, (b)	416 11 0		
	<u>2,092,156 03 8</u>		
	At 40 cents,	\$836,862 47	
In London, as per account rendered by Sir Francis Baring & Co.	sterling £2,664 12 00		
	At 4s. 6d.	11,842 67	
		<u>\$848,705 14</u>	
2. Amount of remittances paid for at the treasury, and remitted on or before the 31st December, 1803, which are credited by the commissioners or agents in their accounts for 1804, viz:			
Remitted to Amsterdam, (c)	Guilders, 697,051 00 0		
	At 40 cents,	278,820 40	
Do. to London, (d)	sterling £3,000 0 0		
	At 4s. 6d.	13,333 33	
		<u>292,153 73</u>	
3. Amount of payments made at the treasury before the 31st December, 1803, for remittances which have been protested for non-payment, and which, on that day, had not been repaid into the treasury, (e)		224,500 00	
		<u>\$1,365,358 87</u>	

II. *Deduct, on account of the Domestic Debt:*

The demands unsatisfied on the 1st January, 1804, were as follow, viz:

1. Dividends payable by Commissioners of Loans, including that due on that day, and exclusively of unclaimed dividends, no longer demandable at their offices,	\$1,232,043 74
2. Unclaimed dividends, payable at the treasury,	8,782 55
	<u>\$1,240,826 29</u>

The provision made for that object, was as followeth, viz:

1. Cash due from deceased Commissioners of Loans,	\$1,346 51
2. In the hands of acting Do. Do.	1,223,257 42
	<u>1,224,603 93</u>

Leaving the amount wanted to meet all the demands to 1st January, 1804,	16,222 36
Total amount of provision for public debt, remaining unapplied on 31st December, 1803,	<u>\$1,349,136 51</u>

NOTES TO STATEMENT B.

(a) The account, as settled at the treasury, states the balance at	Guilders, 2,214,342 11 8
From which, deducting the suspended items, as explained in last annual report,	62,269 17 0
Leaves the amount here stated,	<u>2,152,072 14 8</u>

(b) Mr. De Wolf has rendered his account only to 18th July, 1803, on which day the balance due to him, was	Guilders, 1,616 11 0
The payments at Antwerp on 1st December, 1803, for principal and interest, were	483,800 00 0
	<u>485,416 11 0</u>
The remittances made to him to meet those payments, and which he had not yet received at the date of his last rendered account, amount to	485,000 00 0
Leaves the balance due him, exclusively of charges which may appear in his next account,	<u>416 11 0</u>

(c) The following statement proves the sum of <i>Guilders</i> 697,051, as here stated, to be correct:	
Balance in the hands of commissioners at Amsterdam and Antwerp, on 31st December, 1802, as per statement F, annexed to the last annual report,	Guilders, 993,268 03 2
Remittances paid for, previous to 1803, and credited by the commissioners in their accounts for that year, as per ditto,	5,288,497 06 0
Do. purchased in 1803, as per statement H, annexed to the last annual report,	Guilders, 4,125,840 10 6
Do. do. do. do. sterling £109,585 17 08	At par, 1,217,620 18 0
Profit on exchange of remittances from London to Amsterdam, and from Amsterdam to Antwerp, as per note (b.) to the preceding statement A,	\$18,577 15
Deduct loss on bill of sterling £129 10 07, remitted to Amsterdam, per do.	3 10
	<u>18,574 05</u>
	At 40 cents, 46,435 02 8
	<u>5,389,896 10 14</u>
	Guilders, <u>11,671,662 00 00</u>

Amount applied to principal and interest of Foreign Debt, in 1803, as per statement A, viz:

For principal,	7,470,000 00 00
Interest,	1,011,142 10 00
Premiums,	15,000 00 00
Commissions and charges,	23,372 06 08
	<u>1,049,514 16 08</u>
Bills purchased in 1803, protested for non-payment, as per statement E, annexed to this report, viz:	8,519,514 16 08
L. A. Tarascon,	50,000 00 00
Stephen Girard,	sterling £22,500, at par, 250,000 00 00
	<u>300,000 00 00</u>
Cash in hands of commissioners at Amsterdam and Antwerp, on 31st December, 1803, as per this statement,	2,092,156 03 08
Remittances to London, paid for in 1803, and remaining unapplied on do., as per do., viz:	
In hands of F. Baring, & Co.	sterling £2,664 12 00
Credited by Do. in his account for 1804,	3,000 00 00
	<u>sterling £5,664 12 00</u>
Balance of outstanding remittances to Amsterdam, as per this statement,	At par, 62,940 00 00
	<u>697,051 00 00</u>
As per above,	Guilders, <u>11,671,662 00 00</u>

(d) The sterling bills purchased in 1803, on account of the Foreign Debt, amounted, as per statement H, annexed to last year's report, to sterling £109,585 17 08

Which are accounted for as followeth, viz:

Stephen Girard's bill, protested for non-payment,	22,500 00 00
Bill remitted from America to Amsterdam,	129 10 07
Do. remitted from London to Amsterdam,	80,587 14 07
Charges on said remittance,	704 06 00
Balance unapplied on 31st December, 1803, viz:	
In hands of F. Baring & Co.	2,664 12 00
Credited by Do. in 1804, as here stated,	3,000 00 00
	5,664 12 00
	sterling £109,585 17 08

(e) Statement of protested bills outstanding 31st December, 1803:

Purchased,	
Before 1802, { Prager's bill, Guilders, 120,000, . . . \$48,000	} \$104,000, yet in suit.
{ A. Brown's do. 60,000, . . . 24,000	
In 1802, . { Brown & Hackman's do. 60,000, . . . 24,000	}
{ Beal Owings', do. 20,000, . . . 8,000	
In 1803, . { L. A. Tarascon's do. 50,000, cost 20,500	} \$120,500, recovered in 1804.
{ Stephen Girard's do. sterling £22,500, . . . 100,000	
	\$224,500

The protested bills outstanding on the 31st December, 1802, amounted, as per statement F, annexed to last annual report, to	\$115,070
The repayments, in 1803, of the principal of protested bills, amounted, as per statement J, annexed to last annual report, to	11,070
	104,000
Leaving, outstanding, of those bills,	104,000
Bills purchased in 1803, and which, having been protested, remained outstanding at the close of that year, as per above,	120,500
	\$224,500

TREASURY DEPARTMENT, Register's Office, February 1st, 1805.

ber, 1803,	22,191 75			
Do. from 1st January to 1st July, 1804,	337,500 00			
		359,691 75		
Commissions to agents for purchasing bills,		6,863 01		
			640,294 76	
				4,006,799 69
				\$7,212,048 21

G.

An estimate of the funds provided before the 1st January, 1805, for the payment of the principal and interest of the public debt, which, being unexpended on that day, are considered as applicable to payments falling due after the year 1804.

1st. On account of the foreign debt:

Cash in the hands of commissioners and agents in Europe, Dec. 31, 1803, per statement B, - \$848,705 14
Remittances to Europe outstanding on 31st December, 1803, as per ditto, - 292,153 73

The bills and remittances made during the year 1804 are, as per statement D, as follow, viz:

Remittances in guilders to Amsterdam and Antwerp, guilders, 7,534,849.18, at 40 cents, - 3,013,939 96
Remittances in sterling, £81,151 11 09, at 4s. 6d. per dollar, - 360,673 72

Total to be accounted for, - \$4,515,472 55

The amount applied during the year 1804, per estimate F, has been, for principal, \$1,664,000 00
Interest and charges, 633,431 75

2,297,431 75

The balance in hands of commissioners and agents in Europe, or in remittances outstanding, may, therefore, be estimated, on 31st December, 1804, at \$2,218,040 80

The amount of protested bills outstanding on the same day, was as follows:

Purchased before and in 1802.	{	Prager's bill, - - - - -	Guilders, 120,000	\$48,000	} In suit.
		Brown's bill, - - - - -	60,000	24,000	
		Brown and Hackman's bill, - - - - -	60,000	24,000	
		Owing's bill, - - - - -	20,000	8,000	
					104,000 00

\$2,322,040 80

2d. From which deduct, on account of domestic funded debt, for unclaimed dividends demandable at the treasury, and not yet advanced to the bank for payment to the creditors, estimated at - 1,504 21

\$2,320,536 59

RECAPITULATION.

The provision applicable to 1805, per the foregoing, - \$2,320,536 59
Applied during the year 1804, per estimate F, - 7,212,048 21
Repayments in the treasury in 1804, per statement E, (for principal) - 121,446 51

\$9,654,031 31

The balance remaining unexpended 31st December, 1803, per statement B, was \$1,349,136 51
Disbursements during the year 1804, per statement C, - 8,259,845 55
Profit in exchange in the year 1804, per statement D, - 45,049 25

\$9,654,031 31

H.

A General Statement of the several Stocks transferred to the United States, to 31st December, 1804, the interest on which, by the acts of the 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

No. 230.

[2d SESSION.]

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 15, 1805.

Mr. CROWNINSHIELD, from the Committee on Commerce and Manufactures, to whom was referred the memorial of Stephen Kingston, of the city of Philadelphia, merchant, made the following report:

Stephen Kingston, the memorialist, on the 22d and 23d of July, 1801, entered outwards, at the custom house of Philadelphia, took out a regular permit, and actually shipped on board the United States' frigate George Washington, Captain John Shaw, then destined for Algiers, three bales of cinnamon, fifteen bales of India goods, and eleven hogsheads of loaf sugar, for benefit of drawback and bounty.

All the proceedings at the custom house, previous to the shipment, appear to have been perfectly regular. The articles were entered outwards, in the usual manner, and an inspector attended to their delivery on board the lighter, and, so far as the committee can discover, the memorialist was willing to comply with every requisite formality at the custom house, which was enjoined by the laws: yet, it is proved to your committee, that an error was committed by the inspector, in exporting the merchandise. The George Washington was preparing to get under way, and proceed down the Delaware, when the lighter came alongside, and the captain being of opinion that the ship would draw too much water to pass the bar in the river, if the articles were then received on board, ordered the lighter to follow the ship, and they were taken in below the bar, and at some distance out of the Philadelphia district.

In the case under consideration, the articles would have been liable to seizure and confiscation, if they had been relanded in Philadelphia, without permission from the collector. The exporter, therefore, was, in some measure, compelled to ship them on the George Washington; and in doing this, he appears to have pursued a safe and prudent line of conduct: for, if he had peremptorily ordered the lighter to return to Philadelphia, with her loading, he might have exposed himself to a prosecution for an attempt to commit a fraud on the revenue; and his property to almost certain confiscation. Although it is understood that permission was granted in this case, the committee are of opinion that our public vessels ought not to be permitted to carry merchandise for account of private individuals; but as no prohibition then existed to prevent similar shipments, the George Washington having been permitted to clear out in the usual manner, it is conceived that the exporter ought not to lose the drawback, merely because the articles were exported in a national vessel. On the whole, the exporter having complied with the existing regulations of the custom house, previous to the delivery of the merchandise on board the lighter, and it not appearing that the deviation from the ordinary course which was subsequently committed, proceeded from his fault or neglect, the committee are impressed with an opinion, (the irregularity, too, being committed by a captain in the service of the United States) that the memorialist has an equitable claim upon the Government for the drawback and bounty arising on the exportation of the articles mentioned in his memorial, upon the proof being exhibited to the Secretary of the Treasury that the same were actually landed out of the limits of the United States; and the committee submit the following resolution:

Resolved, That the prayer of the memorial of Stephen Kingston is reasonable and ought to be granted.

[2d SESSION.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 20, 1805.

TREASURY DEPARTMENT, *February 20, 1805.*

SIR:

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1801, 1802, and 1803.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

A Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, in the years 1801, 1802, and 1803, compared with the amount of Duties collected on the same, respectively.

8th CONGRESS.]

No. 232.

[2d SESSION.]

COLLECTOR'S BOND—SURETY RELEASED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 22, 1805.

MR. JOSEPH CLAY, from the Committee of Ways and Means, to whom was referred the petition of Anthony Benezet and others, children and surviving heirs of Daniel Benezet, late of the city of Philadelphia, deceased, made the following report :

That Daniel Benezet, the younger, brother to the petitioners, was appointed, in March, 1790, collector of the port of Great Egg Harbor, in the State of New Jersey; Daniel Benezet the elder, his father, became his surety in a bond for two thousand dollars, given for the faithful discharge of his duties in that office.

Daniel Benezet, the younger, rendered no account for settlement at the treasury subsequent to the 30th June, 1791, although repeatedly urged to do it; he continued in the office until the 7th of March, 1795, when he was superseded by the appointment of Constant Somers, who had been his deputy.

Daniel Benezet, the elder, died in April, 1797, and his estate was settled and divided among the heirs, of whom Daniel Benezet, the younger, was one, in the beginning of the year 1798.

Daniel Benezet, the younger, received for his share of his father's estate a sum of money amounting to more than five thousand dollars; he died in December, 1798, and his estate was sold to pay his debts, and finally settled in the year 1801, as far as it was in the power of his administrators and heirs to settle it.

In the year 1802, seven years after his dismissal, his administrator was, for the first time, applied to by the Comptroller of the Treasury for some books and papers, which, it had been intimated, related to the transactions of the custom house of Great Egg Harbor, with a request that they might be delivered to the then collector. This request could not be complied with, as no such books, and very few and trifling papers, were in the possession of the administrator; the attorney for the district of New Jersey was then directed to commence a suit on the official bond; but finding that the parties interested all lived in Pennsylvania, he gave notice of that circumstance to the Comptroller, upon which the district attorney for Pennsylvania was, by a letter bearing date the 12th of August, 1803, directed to institute a suit for the recovery of the penalty. On the 7th of October, 1803, suit was accordingly brought against the administrators of Daniel Benezet, the *elder*, and judgment was entered by agreement in favor of the United States, for two thousand dollars, with a stay of execution for six months. It was also agreed, that, if, before the expiration of that time, the defendants could satisfy the Comptroller that they were entitled to be released, in whole or in part, from the amount of the judgment, it should accordingly be endorsed on the Comptroller's certificate. The Comptroller having no authority to release any part of the judgment, the petitioners have applied to Congress for relief. By an act of Congress, passed September 2d, 1789, it is made the duty of the Comptroller to "provide for the regular and punctual payment of all moneys which may be collected," and to "direct prosecutions for all delinquencies of officers of the revenue."

By an act of Congress, passed August 4th, 1790, it was made the duty of the collectors, once in every three months, or oftener if required, to transmit their accounts for settlement.

Although Daniel Benezet, the younger, was frequently pressed to forward his accounts for settlement, and refused or neglected to do so, and although he was dismissed from office, probably for delinquency, yet no steps were taken to recover from him the penalty of his bond, during his life, nor from his or his father's estate, until the year 1802, eleven years after his appointment, seven years after his dismissal, five years after the death of his father, and four years after the final settlement and division of his father's estate, and after his own death.

Had any application been made previously to the settlement of either of the estates, the penalty of the bond might have been recovered and paid out of his own effects. But, from the delay, and not to say neglect, of the then Comptroller, no steps were taken until the whole of his property was disposed of, in payment of his private debts.

When it is considered that policy has dictated, in all countries, a limitation of the time in which ordinary debts between individuals may be recovered, and that the humanity of the Government has determined that even penalties and forfeitures, for crimes against the revenue laws, shall not be imposed upon the offenders unless the prosecution be had within a limited time; and particularly, when it is considered that statutes of limitation have been passed, to prevent the allowance of claims against the United States, unless brought before a certain period—claims, too, of the most meritorious nature—it is submitted to Congress whether a consistent regard to justice does not forbid the rigorous exaction of the sum adjudged against the petitioners, especially as the delay has arisen from the negligence of the officers of the Government. Your committee conceiving this case to be extremely severe, think the petitioners entitled to the relief for which they pray, and recommend the following resolution :

Resolved, That the prayer of the petitioners is reasonable, and ought to be granted.

TREASURY DEPARTMENT, *Comptroller's Office*, February 19, 1805.

SIR:

I have before me your letter of the 15th instant. You would have received an immediate answer but for the reason which I stated to you yesterday.

The late Daniel Benezet was appointed collector for the port of Great Egg Harbor, in New Jersey, in the year 1790, and continued in the office until he was superseded by the appointment of Constant Somers, in consequence of which the official functions of Mr. Benezet ceased on the 7th day of March, 1795.

It appears, from the correspondence of the office, that Mr. Benezet rendered no account for settlement at the treasury, subsequent to the 30th of June, 1791, although repeatedly urged to do it. That, after his death, Anthony Benezet, one of the administrators, was requested to furnish books and papers, which, it had been intimated to the Comptroller, were in his possession, in order that the accounts of the intestate might be settled. The administrator not complying, the attorney of the United States for the district of New Jersey was directed by letter, bearing date 24th July, 1802, to commence a suit on Mr. Benezet's official bond. Mr. Maxwell, the then attorney, finding, upon inquiry, that the parties interested all lived in Pennsylvania, gave the information to this Department, upon which the district attorney of Pennsylvania was directed, by letter bearing date 12th August, 1803, to institute a suit for the recovery of the penalty of the official bond before mentioned. This has been done, and a judgment recovered, as stated by the petitioners.

These are all the facts which appear to be material to be stated for the information of the committee.

The petition and papers which accompanied it are returned.

I have the honor to be, Sir, with great respect, your obedient servant,

G. DUVAL.

JOSEPH CLAY, *Esq.*

8th CONGRESS.]

[2d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 1, 1805.

TREASURY DEPARTMENT, *February 27th*, 1805.

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed on the 2d of April, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Comptroller's Office, February 26th*, 1805.

SIR:

The statements marked A, B, C, D, and E, herewith laid before you, have been prepared pursuant to the seventh section of an act of Congress, of the second of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." They contain all the information, relative to the transactions of the mint, which the settlements made at the treasury enable me to give.

I have the honor to be, with great respect, your obedient servant,

G. DUVALL.

ALBERT GALLATIN, Esq.

A.

Statement exhibiting the balance of gold and silver remaining in the hands of the officers of the Mint, on the 31st December, 1803; the amount of deposits from the 1st January, to the 31st December, 1804; the different species of coins made and paid on account of deposits; allowance for wastage; and the balance remaining in the hands of the officers of the Mint on the said 31st of December, 1804, to be accounted for on a future settlement.

STATEMENT OF COPPER COINAGE, 1804.

DR. *Mint of the United States, in account current of Copper purchased and coined, from the Commencement of the Institution to the 31st December, 1804, with the United States.* CR.

	Avoirdupois weight.	Troy weight.	Cost of copper.		Troy weight.	Value of copper at the rate of 7 dwt. to one cent.
	Pounds.	lbs. oz. dwt.	Dolls. cts. mills.		lbs. oz. dwt.	Dolls. cts. mills.
To amount of rough copper and planchettes, purchased from the commencement of the institution to the 31st December, 1803, per statement marked D, accompanying the Comptroller's report of the 17th March, 1804,	-	659,292 11 19	181,422 94	By amount of rough copper and planchettes accounted for, per statement marked D, accompanying the Comptroller's report of the 17th March, 1804,	583,896 0 12	186,194 25
To this sum, being the cost and charges of planchettes purchased in the year 1804,	45,410	55,185 9 3	17,151 28	By amount of cents and half cents, charged as delivered to the Treasurer of the United States, in the quarter ending 31st March, 1804,	} 32,214 4 18	3,495 00
				By amount of cents and half cents, charged as delivered to the Treasurer of the United States, in the quarter ending 30th June,		2,840 00
				By amount of cents and half cents, charged as delivered to the Treasurer of the United States, in the quarter ending 30th September,		2,885 00
				By amount of cents and half cents, charged as delivered to the Treasurer of the United States, in the quarter ending 31st December,		2,424 94
Balance, being the amount gained,	-	714,478 9 2	198,574 22	Balance remaining on the 31st December, 1804, viz:	616,110 5 10	\$197,239 19
			31,327 46.5	Cents and half cents in the hands of the treasurer of the mint,	5,250 0 0	1,800 00
				Planchettes in the hands of ditto,	55,185 9 3	18,920 83
				Ditto, in the hands of the chief coiner,	84,829 10 6	11,941 66.5
				Profit and loss for this amount, per statement last rendered,	2,393 9 18	
				Add this amount, short, extended on that statement,	50 0 0	
				This amount of planchettes, spoiled in striking, charged to this also,	151 5 6	
				This amount, credited the chief coiner on account of the cents said to weigh more than seven dwt. each,	507 4 19	
			\$229,901 68.5		3,102 8 3	
					714,478 9 2	\$229,901 68.5

NOTE.—Agreeably to the allowance made to the chief coiner, on the coinage of copper, each cent, made during the years 1803 and 1804, ought to weigh seven pennyweights three and a third grains. The spoiled planchettes, with which the account of profit and loss is charged, I expect were placed in the hands of the melter and refiner, and used by him for alloy to gold and silver.

COMPTROLLER'S OFFICE, February 23d, 1805.

ANDREW ROSS.

C.

Summary Statement exhibiting the value of coins made at the Mint; the amount of disbursements on account of the establishment; the amount allowed for wastage; the amount retained of deposites; and the amount gained on the coinage of copper.

Value of gold, silver, and copper coins, made at the mint to the 31st December, 1803, -	-	\$3,931,866 30	
Ditto, of gold coins made from the 1st January to the 31st December, 1804, per statement herewith, -	-	258,642 50

TREASURY DEPARTMENT, Register's Office, February 21st, 1805.

JOSEPH NOURSE, Register.

9th CONGRESS.]

No. 234.

[1st Session.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, DECEMBER 9, 1805.

In obedience to the directions of the acts supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

REVENUE AND RECEIPTS.

The nett revenue, arising from duties on merchandise and tonnage, which accrued during the year 1801, amounted to	\$12,020,279
The nett revenue, arising from the same source, which accrued during the year 1802, amounted to	10,154,564
That which accrued during the year 1803, amounted to	11,306,430
And that which accrued during the year 1804, amounted, after deducting that portion which arose from the additional duties, constituting the Mediterranean fund, as will appear by the statement A, to	12,672,323
It is ascertained that the nett revenue which has accrued during the three first quarters of the year 1805, does not fall short of that of the corresponding quarters of the year 1804. And that branch of revenue may, exclusively of the Mediterranean fund, be safely estimated, for the present, at twelve millions of dollars, which is nearly the average of the two years 1803 and 1804.	
The defalcation which took place in the year 1802, and the increase in the next following years, sufficiently show that no inconsiderable portion of that branch of the revenue is due to the neutrality of the United States, during the continuance of war in Europe. Yet, if the revenue of 1802, the only year of European peace since 1792, be considered as the best basis on which to form an estimate, this, with an addition of ten per cent. on account of the increase of population for three years, and of near 300,000 dollars, the computed revenue of New Orleans, will give a result of near eleven millions and a half. The statement B exhibits in detail the several species of merchandise and other sources from which that revenue was collected during the year 1804.	
The revenue arising from the sales of public lands has been greater during the year ending on the 30th September, 1805, than that of any preceding year. It appears by the statement C that, during that period, besides 145,000 acres sold to persons claiming a right of pre-emption, 474,000 acres have been disposed of, at the ordinary sales; making, altogether, with the preceding sales, from the time when the land offices were opened in 1800 and 1801, an aggregate of near two millions of acres. The actual payments by purchasers, which, during the year ending on the 30th September, 1804, had amounted to 432,000 dollars, and had not, in any one previous year, exceeded 250,000 dollars, have, during the year ending on the 30th September, 1805, amounted to 575,000 dollars; of which sum 535,000 dollars were paid in specie, and the residue in stock of the public debt. The specie receipts from that source may, for the ensuing year, be safely estimated at five hundred thousand dollars.	
The receipts arising from the permanent revenue of the United States may, therefore, without even including the duties on postage and other small incidental branches, be computed, for the year 1806, at twelve millions and five hundred thousand dollars,	\$12,500,000
The payments in the treasury, during the same year, on account of the temporary loans constituting the "Mediterranean fund" which will have accrued to the 31st day of March next, are estimated at nine hundred thousand dollars, and about one hundred thousand may be expected from the arrears of internal duties and of the direct tax, and from other incidental branches; making, for temporary and incidental receipts, one million of dollars,	1,000,000
The balance of specie in the treasury, which, on the 30th day of September last, amounted to 4,575,654 dollars, will, as the receipts and current expenditures of the present quarter may be considered as nearly equal, be diminished at the end of this year, only by the payments on account of the American claims assumed by the convention with France; and as the whole amount of those claims which remained unpaid on the 30th day of September last, will, in this estimate, be stated amongst the expenditures of 1806, the whole of the abovementioned balance may be added to the receipts of that year, viz:	4,575,000
Making, in the whole, an aggregate of more than eighteen millions of dollars,	<u>\$18,075,000</u>

EXPENDITURES.

The expenses of the year 1806, which must be defrayed out of those resources, are, like the revenue, either of a permanent nature or temporary.

The permanent expenses are estimated at 11,450,000 dollars, and consist of the following items, viz:

1. The annual appropriation of eight millions of dollars for the payment of the principal and interest of the public debt, of which more than 4,000,000 dollars will be applicable to the discharge of the principal, and the residue to the payment of interest,	\$8,000,000
2. For the civil department and all domestic expenses of a civil nature, including invalid pensions, the light house and mint establishments, the expenses of surveying public lands, the third instalment of the loan due to Maryland, and a sum of 150,000 dollars, to meet such miscellaneous claims or grants as may be allowed by Congress,	1,150,000
3. For expenses incident to the intercourse with foreign nations, including the permanent appropriation for Algiers,	200,000
4. For the Military and Indian departments, including the permanent appropriations for certain Indian tribes,	1,030,000
5. For the Naval establishment, (exclusively of deficiencies for the service of the years 1804 and 1805, which are estimated at 600,000 dollars) -	1,070,000
	<u>\$11,450,000</u>

The extraordinary demands for the year 1806 amount to four millions of dollars, viz:

The navy deficiencies for 1804 and 1805, as abovementioned,	600,000
And the balance of the American claims assumed by the French convention, which remained unpaid on the 30th September last, amounting to	3,400,000
	<u>4,000,000</u>
Making, altogether,	<u>\$15,450,000</u>

It appears, from the preceding statement, that the permanent revenues of the United States will, during the ensuing year, exceed the permanent expenditures by a sum of more than one million of dollars; and that the moneys already on hand, together with the temporary resources of the year, will, after leaving the sum which it is always

necessary to keep in the treasury, be sufficient to discharge the navy deficiencies, and the whole amount of the claims assumed by the convention with France, the large receipts of last year rendering it unnecessary to recur for that object to the loan authorized by the act of the 10th of November, 1803.

MEDITERRANEAN FUND.

It appears by the statement B that the additional duty of two and a-half per cent. on goods paying duties ad valorem, which constitutes the "Mediterranean fund," amounted, during the six last months of 1804, to 563,038 dollars. And it is ascertained that the amount of the duty accrued during the year ending on the 30th day of June, 1805, was 990,000 dollars. This apparent product will, it is true, be diminished by subsequent exportations; but it is believed, from a view of the value of the goods imported in 1803 and 1804, which are charged with that duty, that the fund may be estimated as producing nearly \$900,000 a year. If that estimate be correct, the fund will ultimately produce, during the one year and nine months commencing on the 1st day of July, 1804, and ending on the 31st day of March, 1806, - - - - - 1,575,000

The expenses heretofore charged on that fund, have been, viz:

Paid in 1804, to the Navy Department, under the act constituting the fund,	-	525,000
Paid in 1805, to the said Department, by virtue of the 2d section of the act of 25th Jan. 1805,	-	590,000

Making, altogether,	-	-	-	-	-	-	1,115,000
---------------------	---	---	---	---	---	---	-----------

And leaving an unappropriated surplus, estimated at	-	-	-	-	-	-	<u>\$460,000</u>
---	---	---	---	---	---	---	------------------

But which will be more than absorbed by the navy deficiencies above-mentioned.

The moneys actually received or to be received into the treasury, on account of that fund, prior to the 1st day of January, 1806, are estimated at about \$600,000. The residue will be received between that day and the 31st day of March, 1807, and credit has been taken for a sum of \$900,000 on that account, in the preceding estimate of the receipts of the year 1806.

PUBLIC DEBT.

The payments on account of the principal of the public debt have, during the year ending on the 30th September, 1805, exceeded four millions three hundred and seventy-seven thousand dollars, as appears by estimate D,	-	-	-	-	-	-	\$4,377,898 63
--	---	---	---	---	---	---	----------------

The two last instalments due to Great Britain, and amounting to one million seven hundred and seventy-six thousand dollars, have also been discharged during the same period,	-	-	-	-	-	-	1,776,000 00
---	---	---	---	---	---	---	--------------

Making, in the whole, a reimbursement of more than six millions one hundred and fifty thousand dollars.	-	-	-	-	-	-	6,153,898 63
---	---	---	---	---	---	---	--------------

As the exportation of the specie necessary to discharge the last mentioned instalment, would have been sensibly felt, it was found eligible to pay it in London, in conformity with the authority given by the act of the 3d of March, 1805; and the operation was effected at par, by the Bank of the United States.

It appears, by the same statement D, that the payments on account of the public debt, from the 1st April, 1801, to the 30th September, 1805, have amounted to almost \$18,000,000	-	-	-	-	-	-	17,954,790 49
---	---	---	---	---	---	---	---------------

During the same period there have been paid to Great Britain, in satisfaction and discharge of the money which the United States might have been liable to pay, in pursuance of the provisions of the 6th article of the treaty of 1794,	-	-	-	-	-	-	2,664,000 00
--	---	---	---	---	---	---	--------------

The balance in the Treasury amounted, on the 1st day of April, 1801, to	-	1,794,052 59
And on the 30th day of September, 1805, to	-	4,575,654 37

Making an increase of	-	2,781,601 78
From which, deducting the proceeds of the sales of the Bank shares,	-	1,287,600 00

Leaves for the increase arising from the ordinary revenue,	-	-	-	-	-	-	1,494,001 78
--	---	---	---	---	---	---	--------------

Making, in the whole, a difference of more than twenty-two millions of dollars in favor of the United States, during that period of four years and a half,	-	-	-	-	-	-	<u>\$22,112,792 27</u>
--	---	---	---	---	---	---	------------------------

In order to give a more general and concise view of the receipts and expenditures of the United States, during the four years, commencing on the 1st day of April, 1801, and ending on the 31st day of March, 1805, than can be derived from the annual printed accounts, a statement, marked H, and several explanatory statements, marked H 1, to H 8, have been added to those which usually accompany this report.

From those it appears, that a sum of fifty millions six hundred and sixty-seven thousand four hundred and sixty-seven dollars and four cents, has been paid into the treasury during that period, viz:

From duties on tonnage, and on the importation of foreign merchandise,	-	-	45,174,837 22
From all other sources, (including \$1,596,171 43 cents, arising from the sales of Bank shares and of public vessels)	-	-	5,492,629 82

	-	-	<u>50,667,467 04</u>
--	---	---	----------------------

And that the expenditures, during the same period, have amounted to forty-nine millions six hundred and sixty-five thousand five hundred and twenty-seven dollars and fifty-six cents, which have been disbursed for the following purposes:

1. Less than one-third of the whole has been sufficient to defray all the current expenses of the United States, viz:

For the civil list, and all domestic expenses of a civil nature,	-	-	3,786,114 79
For the military establishment and Indian department,	-	-	4,405,192 26
For the naval establishment,	-	-	4,842,635 15
For the expenses attending the intercourse with foreign nations,	-	-	1,071,437 84

Amounting, altogether, to	-	-	-	14,105,380 04
---------------------------	---	---	---	---------------

2. Near one-third was necessary to pay the interest on the public debt, viz:	-	-	-	16,278,700 95
--	---	---	---	---------------

On which subject it may not be improper to observe, that a part of that sum, amounting to \$3,160,000, was paid on account of the interest on the deferred stock, a charge which commenced only in the year 1801, and was, therefore, in addition to the annual sum wanted before that year, for the payment of interest on the public debt.

3. More than one-third, and which may be considered as the surplus revenue of the United States, during that period, has been applied towards the reimbursement and extinguishment of the debt, viz:

On account of the principal of the public debt proper,	-	-	16,317,663 92
In payment of debts contracted before the 1st day of April, 1801, and arising under the British treaty and under the French convention of 30th September, 1800,	-	2,963,782 65	-

	-	-	19,281,446 57
--	---	---	---------------

	-	-	<u>\$49,665,527 56</u>
--	---	---	------------------------

It is sufficiently evident, that, whilst one-third of the national revenue is necessarily absorbed by the payment of interest, a persevering application of the resources afforded by seasons of peace and prosperity, to the discharge of the principal, in the manner directed by the Legislature, is the only effectual mode by which the United States can ultimately obtain the full command of their revenue, and the free disposal of all their resources. Every year produces a diminution of interest, and a positive increase of revenue. Four years more will be sufficient to discharge, (in addition to the annual reimbursements on the six per cent. and deferred stocks) the remainder of the Dutch debt, and the whole of the eight per cent., navy six per cent., five and a half per cent. and four and a half per cent. stocks. As the portion of the public debt which shall then remain unpaid, will consist of the six per cent. deferred, and Louisiana stocks, neither of which can be reimbursed, except at the periods, and in the proportions fixed by contract, and of the three per cent. stock, which its low rate of interest will render it ineligible to discharge at its nominal value, the rapidity of the reduction of the debt, beyond the annual reimbursements permitted by the contracts, will, after the year 1809, depend on the price at which purchases may be effected. And, should circumstances render it eligible, a considerable portion of the revenue now appropriated for that purpose, may then, in conformity with existing provisions, be applied to other objects.

All which is respectfully submitted

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *December 9th, 1805.*

A.

A statement exhibiting the amount of duties which accrued on merchandise, tonnage, passports, and clearances; of debentures issued on the exportation of foreign merchandise; of payments for bounties and allowances, and for the expenses of collection, during the years 1803 and 1804.

The instalments represented as becoming due at Cincinnati, are calculated upon the same principle as those accruing from ordinary sales of land; but a portion of them, estimated at \$360,000, arising from the sales of pre-emption lands, has, by the provisions of the 8th section of the act of March 26th, 1804, been made payable in six annual instalments, commencing on the 1st day of January, 1807.

TREASURY DEPARTMENT, Register's Office, December 9, 1805.

JOSEPH NOURSE, Register.

D.

An estimate of the principal redeemed of the debt of the United States, from the 1st October, 1804, to the 30th September, 1805, inclusive; showing, also, the redemption of the principal of the said debt, from 1st April, 1801, to the 30th September, 1805.

	Redemption from 1st Oct. 1804, to 30th of September, 1805.	Redemption from 1st April, 1801, to 30th September, 1804, as per statement referred to in the Secretary's report of 19th Nov. 1804.	Total principal redeemed, from 1st April, 1801, to 30th Sept. 1805.
<i>On account of the domestic debt.</i>			
The amount of warrants issued on the treasury of the United States, according to the quarter yearly statement of receipts and expenditures, from 1st October, 1804, to 30th September, 1805, exclusive of \$560 02, repaid into the treasury, was	\$4,720,156 68		
Deduct interest which accrued during the same period, calculated quarter yearly,	3,245,743 96		
	1,474,412 72	3,683,190 44	5,157,603 16

Explanatory Notes to the foregoing Statement.

(a) Including the printing of the laws, passports, and sea letters.
 (b) Including the office of Purveyor of Public Supplies, and the printing of the public accounts.
 (d) The expenses of that establishment were not discharged by the treasury till 1st July, 1802, and, as the moneys were advanced by the collectors, the sums here stated are not those actually expended, but the aggregate of the accounts settled at the treasury each year.
 (e) Surveys and Boards of Commissioners, - - - - - \$69,001 54
 Opening roads, - - - - - 6,000 00
 Wabash saline, - - - - - 2,562 60
 Surveys and Boards of Commissioners south of Tennessee, - - - - - 15,345 27
\$92,909 41

(f) In this the — are included, and the proceeds of the copper coinage deducted; but as, in the year 1803, this last item exceeded the whole expenses of the establishment by a sum of - \$12,177 66
 This, deducted from the gross sum of - - - - - 97,421 58
\$85,243 92

Leaves, for the true expense of the mint for those four years, - - - - - \$85,243 92

(g) This sum is a repayment to the Navy pension fund.

(h) Jail, - - - - - \$11,702 66
 Public buildings, - - - - - 123,000 00
 Reimbursement and interest on Maryland loans, - - - - - 156,474 84
\$291,177 50

(i) Paid from the President's contingent fund, - - - - - \$1,440 00
 Do. 2,000 dollar annual appropriation, - - - - - 3,271 12
 Do. 4,000 do. - - - - - 9,516 50
 By virtue of special acts of Congress, - - - - - 54,700 79
\$68,928 41

† The items marked thus, properly speaking, are charges to, and deductions from, the proceeds of sales of public lands, direct tax, internal duties, and customs, respectively.

H 4.

A Statement of the Expenditures of the United States, on account of the intercourse with Foreign Nations, during the four years, &c.

	From 1st Apr. to 31st Dec'r. 1801.	1802.	1803.	1804.	From 1st Jan. to 31st March 1805.	Total.

[1st SESSION

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 24, 1805.

MR. CROWNINSHIELD made the following report:

The Committee of Commerce and Manufactures, to whom was referred the petition of Isaac Clason, of the city of New York, respectfully submit the following report:

The petitioner, in the month of August last, imported from Havana into the port of New York, one thousand four hundred and twenty boxes of sugar; the duties upon the importation amounted to fifteen thousand six hundred and nineteen dollars and twenty-four cents. On the 31st of the same month, the petitioner having determined to export the said sugar to Amsterdam, in the ship *Ambition*, gave due notice of such intention, and made a regular entry of the said sugar for exportation; a permit to load the said sugar was issued at the custom house on the 2d of September, and the sugar was actually laded on board the said ship, under the inspection of the proper officer, and the return thereof made to the collector, the ship receiving her clearance to proceed to sea on the ninth day of September, and actually sailed on the twenty-second day of the same month. At the moment of the clearance being granted to the ship, the yellow fever made its appearance in New York, and a great number of the citizens left the city in the course of a week from that time; and the petitioner, justly alarmed at the danger to which he was exposed, and partaking of the general consternation, fled among the rest. A general interruption and suspension of business in the city took place for several weeks, and the custom house itself was removed to a place of safety. On the 30th of September, the petitioner applied to the custom house to receive the debentures for the drawback of the duties on the exportation of the said sugar, and offered to give bond and take the oath required by law in the cases of goods exported for the benefit of drawback; but the collector refused to receive the oath or bond, or to grant the debentures, alleging that the ten days limited by law had expired, after the clearance of the ship, and that, in consequence thereof, the drawback reverted to the United States.

Repeated and pressing applications, of a similar nature, have been made to Congress, and the number may be expected to increase. In all of them which have, at various times, been before the committee, no intention of fraud has appeared. Some persons have unintentionally overstayed the time, one, two, or three days. Others have been prevented, by dangerous sickness, from attending at the custom house. In the case now under consideration, the yellow fever afflicted the city of New York. The inhabitants fled before its dreadful ravages. The petitioner partook of the general consternation, and left the city the next day after the clearance of the ship. It did not occur to him that he would, thereby, lose the benefit of drawback on the sugar in question; and, if it had occurred to him, it is not probable that he could then have obtained the debentures by application at the custom house. It was a time of general alarm and agitation, and every citizen was only eager to save himself and family. The security of property was but a secondary consideration.

The committee are of opinion the provisions of the law, as it stands at present, are too severe. If the article on which the benefit of drawback is claimed, is really exported out of the limits of the United States, it is all that ought to be required. The merchants are solicitous to obtain the debenture certificates; they become transferable property, being negotiable paper, like promissory notes, and are receivable at the custom house in lieu of the inward duties. No man would willingly overstay the time limited by law, in which he could apply for his debentures; it is for his interest to apply early, yet it may sometimes happen that he will omit, and overstay the time; but, surely, the United States do not wish to enrich their treasury in this manner. Our revenue is derived from the foreign articles consumed in the country, and not from exports. Under all the circumstances in which this subject can be placed, the committee are of opinion that a general, and not a particular bill should be passed, calculated to relieve all the applicants where no intention of fraud shall appear, and to provide for the extension of the time in taking the oath and giving bond, in cases of goods intended to be exported for benefit of drawback. The committee, therefore, submit the following resolution:

Resolved, That the petition of Isaac Clason is reasonable, and ought to be granted.

TREASURY DEPARTMENT, *Comptroller's Office*, 31st December, 1805.

SIR:

Your letter of the 29th is received. Enclosed is a certified copy of the letter of the collector at New York, detailing the facts in the case of Isaac Clason, who claimed a drawback on 1420 boxes of sugar, intended to be shipped by him, on board the ship *Ambition*, for exportation. I possess no other information on the subject.

Mr. Clason having neglected to take the oath, and give bond within the time required by law, and it appearing, also, that, although the city of New York was afflicted by a malignant disease, which occasioned a removal of the collector's office, the removal to Greenwich, a distance of about two miles, was effected on the 9th of September, where it was not considered hazardous to transact business, no relief could be granted at the treasury, according to established decisions.

I have the honor to be, &c.

G. DUVALL.

JACOB CROWNINSHIELD, Esq.

CUSTOM HOUSE, NEW YORK, *Collector's Office*, November 2d, 1805.

SIR:

I have received your letter of the 18th ultimo, relating to a shipment of sugar by Mr. Isaac Clason. In the month of August last, he imported, in the ship *Ambition*, Walter Nexsen, master, (wholly owned by himself from the Havana, 1420 boxes sugar, all of which were landed and weighed, and the duties secured according to law, on the 17th August.

On the 31st August, Mr. Clason made an entry for 1420 boxes (the same) sugar intended to be shipped by him in the said ship *Ambition*, ———, master, for Amsterdam. On the 2d September, permit was issued for shipping the same; the inspector returned, that the 1420 boxes of sugar were laden on board the said ship, under his inspection, the 9th; the entries, inward and outward, the weigher's and inspectors returns, and every requisite required by law, all appear, and I have no doubt, are correct; the omission to take the oath and give bond, within ten days after clearance, only excepted.

Mr. Clason did not apply at the custom house to take the oath and give bond, as required by law, until the 30th September; he was with his family in West Chester county, about twenty or twenty-five miles from the city; the ship sailed the 22d of September. Mr. Clason probably mistook the ten days after sailing for the ten days after clearing.

No doubt can be entertained of the fairness of the transaction, nor of the upright intention of Mr. Clason; and I believe I am fully warranted in saying that the omission, on his part, was owing to the confusion of the city, occasioned by the very sudden visitation of the late fever; there was a very general moving of the citizens on the 9th September, on which day the custom house was removed to Greenwich, two miles from the city (*and there remained until the 29th ultimo*) where it was not considered hazardous to visit my office.

The amount of drawback being upwards of \$15,000, I advised Mr. Clason to make application to the treasury, as I could, by no means, take upon myself the responsibility of issuing the debenture, whether the neglect was occasioned by absence, sickness, or any other cause.

I am, very respectfully, sir, your obedient servant,

DAVID GELSTON.

GABRIEL DUVALL, Esquire.

9th CONGRESS.]

No. 236.

[1st SESSION.]

REPEAL OF THE ACT AUTHORIZING EVIDENCES OF PUBLIC DEBT TO BE RECEIVED IN PAYMENT FOR LANDS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 28, 1805.

TREASURY DEPARTMENT, *December 28th, 1805.*

SIR:

I have the honor to enclose the copy of the extract of a letter pointing out certain abuses, which are said to arise from the operation of the law authorizing the receipt of evidences of the public debt, in payment for the lands of the United States, passed on the 3d day of March, 1797.

Although, the letter having been received only a few days ago, it has not yet been ascertained whether the facts alluded to are, in this instance, truly stated, there is no doubt that such abuses may take place, and that, whilst the law continues in force, it will be difficult to prevent them.

Indeed, it cannot be doubted that, with very few exceptions, the law is of no utility to actual purchasers. So far as relates to the reduction of the public debt, the act is useless, since the annual appropriation of eight millions of dollars has been made; and it may, on the contrary, by creating a competition in the market, impede the object whenever it should be thought proper to apply a part of the appropriation to purchases of the debt. To this may be added, that the uncertainty resulting from the provision of the payments in specie, which might otherwise be relied upon, deranges the general operations of the treasury.

I also beg leave to observe, that, by the act of the 8th of May, 1792, and all the subsequent acts contain a similar provision, the commissioners of the sinking fund are authorized to purchase the debt of the United States at its market price, if not exceeding the par or true value thereof.

This last limitation does not seem sufficiently explicit; but the construction heretofore adopted, and which will be, of course, adhered to, unless altered by an explanatory act, is, that, by par or true value, is meant the nominal value or amount of the stock. It follows, that, on the one hand, the commissioners may give one hundred dollars for every nominal hundred dollars of the three per cent. stock, provided they shall not give more than the market price; whilst, on the other hand, they are, in fact, precluded from making any purchases of the eight per cent. stock, as its market must necessarily exceed its nominal value.

Permit me, therefore, respectfully to submit the propriety of fixing, absolutely, by law, the price which the commissioners may give for stock. That for the six and deferred stock may remain as it now stands, that is to say, not to exceed the nominal value of its unredeemed amount; the limitation in relation to the three per cent. stock may be easily fixed, at any rate which Congress may think proper.

That for the eight per cent. stock is more difficult to fix, because it sinks, every quarter, in value, and will continue so till the first day of January, 1809, when it becomes redeemable, and therefore, equal to its nominal value. It may, in the mean while, be considered as consisting, first, of a six per cent. stock, payable at the time above mentioned, and worth par; secondly, of an annuity of two per cent. a year, (or rather at the rate of half per cent. quarterly) which will cease, also, on the 1st of January, 1809, when the stock will be paid off.

The annexed table shews the true value of the stock, calculated on that principle, and on a supposition that a six per cent. stock is at par, for the first day of every quarter, from the 1st of January, 1806, to the 1st of January, 1809. It must, however, be observed, that, from the first day, till within fourteen days of the end of each quarter, the stock will progress a little in value, as the time of receiving the dividend approaches. Both on that account, and because the variations in the prices of stock do not descend to such minute fractions as are exhibited in the table, it may be more simple to fix the limitation by the gross amount of the two per cent. annuity which may, at the time, be still demandable, without making any deduction for the discount. The commissioners would, on that principle, be authorized to give no more than 106 per cent. during the first quarter of the year 1806, no more than 105½ per cent. during the ensuing quarter, and so on, diminishing half per cent each quarter, so as to give no more than 100½ per cent. during the last quarter of the year 1808, and paying at par, according to contract, the residue of the unpurchased principal, on the 1st of January, 1809. There are two other limitations, in the powers of the commissioners to purchase stock, which may require some modifications. By the first, no purchase can be made, except during the first thirty days of each quarter—a provision, the object of which I cannot perceive; as the situation of the treasury and the price of stock may often render another more eligible. The other directs the purchases to be made by a known agent, and by open purchase, or by receiving sealed proposals; and, although it may be more eligible for the commissioners themselves to make the purchase in that way, because it will prevent any improper imputation attaching to their conduct, it is not less true that that mode must necessarily raise the price of stocks, and prevent any purchases on favorable terms.

Although there are yet considerable parts of the public debt which may be reimbursed, as purchases may, however be found, under certain circumstances, more advantageous to the United States, I have thought it my duty to lay these observations before the Committee of Ways and Means. But I beg, at the same time, to be indulged in expressing my opinion, that a sinking fund which acts by purchases is better calculated to raise the prices of stock, and as an engine to favor loans and an increase of debt, than for the purpose of redeeming it on reasonable terms. And as the nature of the existing species of stocks will offer a powerful, perhaps insuperable obstacle, to the whole redemption, within the time contemplated by the Legislature, I intend, in a subsequent communication, to submit to the consideration of the committee, a plan for the conversion of the old six deferred and three per cent. stocks into a six per cent. stock, which may be redeemed within the expected period.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

HON. JOHN RANDOLPH, *Chairman of the Committee of Ways and Means.*

A Table exhibiting the true value of one hundred dollars eight per cent. stock, redeemable after the year 1808, on the supposition of six per cent. stock being at par, for the first day of each quarter, from the 1st January, 1806, to the 1st January, 1809.

Extract of a letter, &c.

"The clerks in that office are engaged in what they call the stock business. They get stock transferred, in payment for the lands, of such people as will pay them their money without taking an office receipt. Now, the grievance that I would complain of is, that it is almost impossible to get business done in that office, unless the person applying will consent to let them have their money that they may pay, in stock. As for my part, I had rather do my own business. When a man goes into the office, one of the clerks addresses him, that he can't have his business done unless he waits two or three days; and recommends to him to leave his money with another one, which I suppose to be a clerk also, who offers to do the business for him, provided he will let him transfer stock for his payment; and thus they worry many people out of their money. As to this stock business, I know nothing about it; and as it is no advantage to me, I had rather pay my money, and get my receipt without further trouble."

No. 237.

[1st Session.]

BALANCES DUE FROM STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 31, 1805.

To the House of Representatives of the United States:

I now communicate to the House of Representatives all the information which the Executive offices furnish on the subject of their resolution of the twenty-third instant, respecting the States indebted to the United States.

TH: JEFFERSON.

December 31, 1805.

TREASURY DEPARTMENT, *December 30th*, 1805.

The Secretary of the Treasury respectfully reports to the President of the United States—

That it does not appear that any debtor State has availed itself of the provisions of the act of Congress of the 23d of June, 1797.

That, under the provisions of the act of Congress passed on the 15th of February, 1799, the sum of 222,810 dollars and six cents, has been placed to the credit of the State of New York, in part payment of the debt due from the said State, to the United States, on account of money expended by the said State in fortifying the fort and harbor of New York, as will more fully appear by the annexed copy of the treasury settlement, No. 12,250.

And that, although expenses may have been incurred by other States, which, under the provisions of either the act of Congress of June 23d, 1793, or of that of May 3d, 1798, or of that of February 15th, 1799, may ultimately entitle such State or States to a credit for expenses incurred in fortifying forts and harbors, no other account has been presented for that object to the Treasury Department.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

The PRESIDENT of the United States.

No. 12,250.

TREASURY DEPARTMENT, *Auditor's Office*, April 16th, 1801.

Whereas the *State of New York*, by an act of its Legislature, passed on the 28th day of March, 1800, has complied with the act of Congress, passed on the 15th day of February, 1799, entitled "An act respecting balances reported against certain States by the commissioners appointed to settle the accounts between the United States and the several States:" And whereas it appears, by an account stated by the comptroller of the treasury of the said State of New York, and approved by the Secretary of the Treasury of the United States, that the said State has appropriated and expended, for the purpose of fortifying the fort and harbor of New York, the sum of one hundred and thirty six thousand five hundred and thirty-three dollars and eighty-two cents, in *specie*, which sum, calculated on the principles established by the act of Congress above recited, and according to the terms agreed upon between the said Comptroller and Secretary, is equal to the following amounts, in stock of the United States, viz.

\$45,511 27, being one third of the said sum, calculated in 3 per cent. stock, at 9s. in the pound, is \$101,136 16
 30,340 84, being one third of the remaining two thirds, calculated in deferred stock, at 14s. 5d. in the
 pound, is - - - - - 42,091 35
 60,681 71, being the remainder, calculated in six per cent. stock, at 15s. 3d. in the pound, is - 79,582 55

\$136,533 82, *specie*; equal, in stock, to - - - - - \$222,810 6

I do, therefore, report, in pursuance of the acts and stipulations aforesaid, that the following credit ought to be passed on the books of the treasury, in favor of the State of New York, viz:

By this sum, being the value, in stock of the United States, of \$136,533 82, specie, appropriated and expended for the purpose of fortifying the port and harbor of New York, agreeably to an account, stated on the 28th of August, 1799, by the comptroller of the treasury of said State, and approved by the Secretary of the Treasury of the United States, and which is admitted on account, and in part payment, of the debt due from the said State to the United States, \$222,810 6

The documents on which this report is founded are herewith transmitted, for the decision of the Comptroller of the Treasury thereon.

R. HARRISON, *Auditor.*

To JOHN STEELE, Esq. *Comptroller of the Treasury.*

TREASURY DEPARTMENT, *Comptroller's Office, April 28, 1801.*

Admitted and certified.

JOHN STEELE, *Comptroller.*

To the Register.

TREASURY DEPARTMENT, *Register's Office, 27th December, 1805.*

I do certify that the foregoing is a true copy of the original report on file in this office; and I further certify, that the aforementioned sum of two hundred twenty-two thousand eight hundred ten dollars and six cents has been placed to the credit of the State of New York, in the books pertaining to the former Government, in ledger, page 1524.

JOSEPH NOURSE, *Register.*

9th CONGRESS.]

No. 238.

[1st SESSION.]

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 31, 1805.

Mr. CROWNINSHIELD made the following report:

The Committee of Commerce and Manufactures having considered the petition of John Dorr, of Boston, in the State of Massachusetts, referred on the 5th instant, submit the following report:

The petitioner states that, on the 6th of August last, he imported into the district of Boston and Charlestown, in the ship *Jenny*, from Antwerp, four boxes of *Dutch* playing cards, the duties on which amounted to nine hundred and thirty-six dollars. Being ignorant of the existence of any law refusing the drawback on the exportation of playing cards, the petitioner actually shipped the cards for the East Indies, and applied to the custom house to receive the debenture certificates, when he was, for the first time, informed, that playing cards were not entitled to the benefit of drawback. He pleads ignorance of the law, and has made application to Congress for relief.

The committee find that playing cards are refused the drawback on exportation, under the provision of "the act for imposing more specific duties on the importation of certain articles," &c. passed 27th March, 1804, which act was officially received by the collector at Boston, on the 1st of May, and went into operation on the 1st day of July following. From certificates exhibited in this case, it appears it did not occur to the collector, at the time of shipment, that playing cards were not entitled to the drawback, and the petitioner, also, was unacquainted with the law. The committee are of opinion, however, that the petitioner ought to have known that such a law was in force. It would then have been at his own option to have reported the cards for exportation, and in this case they might have been reshipped in the same bottom, without being landed, and no duties whatever could have been demanded upon them. The same law which prohibits the drawback on playing cards, refuses the drawback on foreign fish and fish oil. The importers or exporters of these articles might, with the same propriety, urge complaints against the law, and request a return of the duties in cases of exportation. If the drawback on playing cards is granted, it would be fair to return it on all the foreign fish and fish oil exported since the act went into operation. There appears to have been ample time for the law to have been generally known; it was nearly *eighteen months* from its passing to the time of the exportation of the playing cards. Although the committee are convinced the petitioner was not informed of the existence of the law, and although they are of the opinion that his situation is an unfortunate one, yet, considering the necessity there is of preserving uniformity in decisions of this sort, and taking into view, also, the danger that would arise to the revenue, in repealing the law in this particular instance, without extending it to the other articles named in the same act, they are satisfied that the relief prayed for ought not to be granted, and recommend that the petitioner have leave to withdraw his petition.

9th CONGRESS.]

No. 239.

[1st SESSION.]

MINT.

COMMUNICATED TO THE SENATE, JANUARY 15, 1806.

To the Senate and House of Representatives of the United States:

I communicate, for the information of Congress, the report of the Director of the Mint, of the operations of that institution during the last year.

TH: JEFFERSON.

January 15, 1806.

MINT OF THE UNITED STATES, Philadelphia, January 3d, 1806.

Agreeably to former practice, I have the honor, at the commencement of the present year, to lay before you a statement of the issues from the mint of the United States, and the expenses of the institution, during the past year: and conceiving that it might not prove unacceptable, the treasurer has, at my request, drawn up, and exhibited, in one comprehensive view, schedule No. 4, a statement of all the gold, silver, and copper coins, struck at the mint, from the commencement of its operation till the present time.

From this statement, it appears that, of gold coins issued from the mint, the whole amount is 2,613,972½ dollars; of silver coins, 1,953,917¾ dollars; and of copper coins, 179,453 dollars 47½ cents; making the total amount 4,747,343 dollars 72½ cents; and the total number of pieces 22,594,832.

During the last year, as will appear in particular detail from schedule No. 1, there have been struck at the mint, of gold coins, 34,964 pieces, amounting in value to 170,367½ dollars; of silver coins, 469,496 pieces, value 149,067½ dollars; and of copper coins, 1,755,580 pieces, value 13,483 dollars 48 cents; making the total number of pieces of the precious metals 504,460, and of copper coins 1,755,580; and the total value 332,918 dollars 48 cents. This amount is indeed somewhat less than that of the preceding year, (\$371,827 94) yet the number of pieces is much greater, being all of the smaller coins; and this latter circumstance will readily account for the small difference in value; since the labor and time necessary to prepare and strike an equal number of large and small pieces of coin, will be nearly equal.

Of the precious metals, the number of pieces coined in the last year far exceeds that in any former year since the establishment of the mint; indeed, it is considerably more than *double* of what it has been in any one of the four last years.

The striking of small coins is a measure which has been adopted to accommodate the banks and other depositors, and at their particular request, both with a view of furnishing a supply of small change, and to prevent the exportation of the specie of the United States to foreign countries.

I am authorized, sir, to assure you, that the Bank of the United States (with perhaps the other banks in this city) will furnish the mint an ample supply of bullion during the current year; and to avoid, as far as practicable, all inconvenient delay in the issue of coins, I am, with your approbation, about to employ a few additional workmen. The utmost economy, however, in the expenses of the institution, will be carefully observed.

The schedule No. 3 exhibits an abstract of the expenditures of the mint during the last year. From this it will be observed that the contingent expenses, in the last six months, have been pretty considerable. This has arisen from sundry repairs, particularly of the stable, coal house, a pair of rollers, and one of the coining presses, which could no longer be dispensed with, but which will not again occur in many years.

Schedule No. 2 exhibits a general statement of the gain on the copper coinage for the last year, amounting to \$2,187 68, exclusive of 51 dollars 96 cents of spoiled planchettes, used in the alloy of the precious metals. This gain would have been still greater, had not the planchettes proved to be somewhat over weight, though the late Director had given the most particular charges and instructions on this head to the person of whom they were purchased.

I have, sir, the honor to be, with the greatest esteem, your most obedient servant,

ROBERT PATTERSON, *Director.*

To the PRESIDENT of the United States.

[1st Session.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 16, 1806.

SIR:

TREASURY DEPARTMENT, *January 15, 1806.*

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1802, 1803, and 1804.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

A Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, in the years 1802, 1803, and 1804, compared with the amount of Duties collected on the same, respectively.

TREASURY DEPARTMENT, Register's Office, January 14, 1806.

JOSEPH NOURSE, Register.

9th CONGRESS.]

No. 241.

[1st Session]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 20, 1806.

Mr. CROWNINSHIELD made the following report:

The Committee of Commerce and Manufactures having considered the petition of Elizabeth Peckham, of North Kingston, in the State of Rhode Island, widow of Benedict Peckham, referred to them by the House of Representatives, on the 11th of December, submit their report:

The petitioner states that her husband, Benedict Peckham, in the month of August, 1801, sailed from Rhode Island, on a voyage to the West Indies, and imported from thence, into Washington district, North Carolina, about twenty-two hogsheads of rum, and there entered and landed the same, and gave bond with William Ross, as surety for the duties, amounting to six hundred and eighteen dollars and forty-four cents. That the markets not answering the expectations of the said Peckham, he re-shipped the said rum, and took passage therewith himself for New York, about the 18th of February, 1802. That, soon after, a violent storm came on, and without doubt the vessel and every person on board were lost, as they have never been heard of since that time. That the said Ross was obliged to pay the duties on the rum, and commenced his action therefor, and attached a dwelling house and four acres of land, situated in North Kingston, in Rhode Island, on which the petitioner resided with her children, and obtained judgment on his suit, and caused the house and land to be sold at auction. The petitioner further states, that the said Peckham, died in debt to the amount of the remainder of his estate, and that she with her six children are turned out of their home, in consequence of this decision.

The petitioner prays that the amount of the duties on the twenty-two hogsheads of rum may be refunded.

The committee consider this as a hard case, and if their humanity alone was to be consulted on the occasion, they could not hesitate to recommend that the wished for relief should be granted; but they cannot venture to recommend a deviation from the invariable practice of the House, on all similar applications. The decisions have been founded on strict commercial justice. When articles are imported and bonded at the custom house, the duties form a part of their value, and immediately become an insurable interest. In the case under consideration, the rum might have been insured, (although it is not stated that it was insured) and the loss would have fallen on the underwriters. It is true it was not consumed in the country; this, however, ought not to make any difference, if it is considered that the article was going from port to port in the United States, with coasting documents, no bonds having been given to export it to a foreign country. If this claim is allowed, it would be equally fair to refund the duties on all goods which may receive damage after importation, and previous to their consumption, and even in cases of loss by fire, storms, and from every accident or injury whatever.

Considering, therefore, the danger that would arise from innovating upon the revenue system of the United States, in a principle of this magnitude, the committee are induced to offer the following resolution:

Resolved, That the petitioner have leave to withdraw her petition.

9th CONGRESS.]

No. 242.

[1st SESSION.]

PROTECTING DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 21, 1806.

Mr. CROWNINSHIELD, from the Committee of Commerce and Manufactures, to whom was referred the petition of Nathaniel Goodwin and others, manufacturers of iron hollow ware, in the State of Massachusetts, made the following report:

The petitioners state that they are engaged in the manufacture of iron hollow ware, and as the United States are amply furnished with the materials, and blast furnaces, to supply their inhabitants with that article, they pray that an additional duty may be imposed upon all iron hollow ware, imported from foreign countries.

The committee find that, under existing laws, this article is subject to a duty of seventeen and a half per cent. ad valorem, on importation into the United States in American vessels; and if imported in vessels *not* of the United States, it is charged with the additional duty of ten per cent. on the duty; making the duty, in this case, amount to nineteen and one quarter per cent. on the invoice value.

There are no documents within the reach of the committee that show the quantity of iron ware imported into the United States, in any one year—goods, wares, and merchandise, paying the ad valorem duty, not being particularly designated in the returns from the collectors of the customs; but it is believed the quantity and value have not been very considerable for some years past. It cannot be doubted that the United States are in possession of the material for making iron hollow ware. The native ore is in abundance in many parts of the country, and already furnaces have been established, which bid fair to furnish the fullest supply of that article. The *protecting duty* imposed on the foreign iron ware, holds out to the skilful manufacturer every encouragement he can reasonably ask for. If this duty was deemed too moderate, and not sufficiently high to give a preference to the domestic manufacture, the committee would deem themselves authorized to propose a further augmentation. The article being not only bulky but of considerable weight, must be subject to a high freight in proportion to its prime cost; if to this is added the commissions for purchase in Europe, the insurance, and other shipping charges, with the duties payable on its importation here, it will be found that the foreign article comes burthened sufficiently to give a decided advantage to the American manufacturer. Surely the petitioners do not wish to claim a monopoly. A preference they ought to have, and, so far as encouragement has been given to American manufactures generally, the article in question is charged with the highest rate of duties, with a very few exceptions.

If Congress had determined to impose higher duties on imports, with a view of raising additional revenue, or to countervail the extraordinary impositions of other countries, it would be sound policy to single out such articles as could be readily manufactured in the United States; and by making a just discrimination, all might derive a benefit and none be injured; but as the House have only authorized the committee to report on the subject matter of the petition, and as they are satisfied that the petitioners may receive a preference in the market for their manufacture, so far as cheapness and the quality of the article will give it to them, when put in competition with the foreign article, they are of opinion that it is at this time *inexpedient* to augment the duty on iron hollow ware imported into the United States. And the committee recommend that the petitioners have leave to withdraw their petition.

9th CONGRESS.]

No. 243.

[1st SESSION.]

REMISSION OF FOREIGN TONNAGE DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 3D OF FEBRUARY, 1806.

Mr. CROWNINSHIELD, from the Committee of Commerce and Manufactures, to whom was referred, on the 8th instant, the petition of Francis Amory, merchant, of Boston, Massachusetts, made the following report:

The following facts are stated in the documents accompanying the petition. That the petitioner was the owner of the ship *Astrea*, an American vessel, commanded by Solomon Stanwood, which sailed from Batavia, in the month of December, 1804, bound to Boston, and loaded with a cargo of sugar and coffee. That, on the 17th of January following, being then in the Indian ocean, the ship experienced a violent hurricane, and was dismasted, and otherwise so wrecked and disabled, as to be obliged to put into the Isle of France, for the preservation of the lives of the crew, and the property on board. That, upon examination in that island, finding the ship not sea-worthy, and that it was impossible to repair her, except at an expense of sixteen or seventeen thousand dollars, which greatly exceeded her then value, the master was obliged to abandon her, and she was condemned and sold for the benefit of the underwriters, and all concerned. The master and supercargo now state, that, as no American bottom could be obtained, to transport the cargo to America, they chartered the Swedish ship *Pelee*, and shipped the same in that vessel, to Boston, where she lately arrived. The collector of Boston charged the alien or foreign duty on the *Pelee's* cargo, as she was a foreign ship, and it is this additional duty which the petitioner is desirous should be remitted to him, upon the ground that the cargo was originally shipped in an American vessel, and that the change of bottom, which subsequently took place, was an act of necessity beyond his control, and for which he ought not to suffer.

It will be observed by the House, that the cargo in question was actually imported into the United States in a *foreign ship*, and it is known that the character of the ship determines the amount of duties payable upon the cargo imported in her. The cargo may be American property, but, if the ship is sailing under a foreign flag, or even under the flag of the United States, and is not furnished with an American register, the cargo is liable to the extra duty alluded to, and the ship herself is charged with the foreign tonnage duty. By the laws now in force, it will be found that all goods, wares, and merchandise, imported into the United States, in vessels not of the United States, are subject to pay the addition of ten per cent. on the amount of duty, chargeable upon similar articles imported in American vessels. The following statement will point out the difference of duty between a foreign and an American ship, and their respective cargoes, upon entering a port of the United States.

American Ship.

For instance: A cargo is imported from a foreign port or place, in an American vessel, and the duty amounts	
to	\$1,000 00
Tonnage duty for the ship, supposed to be of the burthen of 200 tons, at six cents per ton,	12 00
Duty on the cargo, imported in the American ship, including her duty of tonnage,	\$1,012 00

Foreign Ship.

If we presume the cargo to be imported in a vessel <i>not</i> of the United States, the first duty is	-	\$1,000 00
To which add the ten per cent. additional duty for foreign vessels,	-	100 00
Add, also, the foreign tonnage for 200 tons, at 50 cents per ton,	-	100 00
And the foreign light money, for the same tonnage, at 50 cents per ton,	-	100 00

The amount of tonnage and the light money, for the foreign ship and the duty on her cargo, will be, \$1,300 00

Here, it is manifest, the advantage is on the side of the American vessel, in our own ports; but the disadvantages our vessels suffer in foreign ports, from the extraordinary impositions on our commerce and shipping, more than counterbalance the trifling additional expenses to which foreign vessels are subject upon entering the ports of the United States; and if the United States should, at once, repeal all the alien or additional duties payable by foreign ships, both on imports and tonnage, upon the condition that other nations would adopt the same liberal and just policy towards American ships and cargoes, when entering their ports, placing them on an equal footing with their own, commerce would be free from some of the shackles with which it is at present burthened, and a fair competition, in every market, would soon determine who could afford to sell cheapest. This is all that is wanted, to give to American shipping and commerce the free scope to enterprise, and a ready and advantageous sale of our productions, with cheap returns for the consumer. The committee have been led to make these observations, previous to giving their opinion on the present application for a remission of the additional duties imposed on the cargo of a foreign ship. They seemed to have a bearing on the subject, and are supposed to be of some importance, from a consideration that it would be inexpedient to allow such a claim, without, first, repealing the discriminating law.

If the duty on the cargo is returned, it would certainly be as fair to return the foreign tonnage duties on the ship. The committee are not informed of any one instance, where either has been done. It is true, this was a constrained importation, but it is already seen, if the cargo had been brought in any unregistered vessel of the United States, it must have been charged with the additional duty. The cargo came from a foreign port, and was of foreign production, and imported in a foreign built vessel. It having been once on board an American ship, seems to make very little difference in its favor. It ought to give it no new or extraordinary privileges. Let the committee be allowed to reverse the case, and to suppose the *Astrea* had been the foreign ship, and the *Pelee* the American ship, and all the other circumstances had been similar in every respect. The cargo then is imported in the *Pelee*, entitled to American privileges, when it might have been imported in the *Astrea*, if no accident had happened to her on the voyage. Should the American or foreign duties be charged on such an importation? Surely the American duties. And would it not have been manifestly unjust, to have charged the owner with the foreign duties on the cargo of the American ship, merely because it was taken from a foreign ship? And yet, if the principle is correct in one case, it must be so in the other. If, however, the transshipment had been made at sea, from an American to a foreign ship, under circumstances of eminent distress, it would have placed the claim on somewhat higher ground; but, even in this case, the committee would hardly have felt themselves authorized to propose a return of the additional duties. The amount of the duty on this importation is not stated in any documents accompanying the petition. If the cargo was re-exported, the ten per cent. additional duty was retained, besides the usual three and a half per cent. deducted from the drawback.

The committee are satisfied, if this claim was allowed, it would lead to many others of a similar nature; and, the law being clear and explicit on this head, they are of opinion that the House ought not to grant the prayer of the petitioner, and they recommend that he should have leave to withdraw his petition, with the documents accompanying it.

9th CONGRESS.]

No. 244.

[1st SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 5, 1806.

WASHINGTON, February 5, 1806.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their report of 5th of February, 1805, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the fourth day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

GEORGE CLINTON, *President of the Senate.*

JOHN MARSHALL, *Chief Justice.*

JAMES MADISON, *Secretary of State.*

ALBERT GALLATIN, *Secretary of the Treasury.*

JOHN BRECKINRIDGE, *Attorney General.*

The PRESIDENT of the Senate.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That the balance remaining unexpended at the close of the year 1803, and applicable to payments falling due after that year, which balance, as appears by the statement B, annexed to the last annual report, amounted to one million three hundred and forty-nine thousand one hundred and thirty-six dollars and fifty-one cents,	-	\$1,349,136 51
Together with the disbursements made during the year 1804, out of the treasury, on account of the principal and interest of the public debt, which disbursements, as appears by the statement C, annexed to the last annual report, amounted to eight millions two hundred and fifty-nine thousand eight hundred and forty-five dollars and fifty-five cents,	-	8,259,845 55
And with a further sum arising, from profit on the remittances from America to Europe, purchased in the year 1804, which profits, as appears by the statement D, annexed to the last annual report, amounted to forty-five thousand forty-nine dollars and twenty five cents,	-	45,049 25
And amounting, altogether, to nine millions six hundred and fifty-four thousand and thirty-one dollars and thirty one cents,	-	<u>9,654,031 31</u>

Have been accounted for in the following manner, viz:

I. There was repaid into the treasury, during the year 1804, on account of the principal of protested bills, and of advances made to commissioners of loans, as appears by the statement E, annexed to the last annual report, a sum of one hundred and twenty-one thousand, four hundred and forty-six dollars and fifty-one cents,	\$121,446 51
II. The sums actually applied, during the same year, to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amount, as will appear by the statement A, to seven millions two hundred and fifteen thousand six hundred and nine dollars and sixty-six cents.	
1st. Paid in reimbursement of the principal of the debt, - - - - -	3,207,587 65
2d. Ditto on account of the interest and charges on the same, - - - - -	4,008,022 01
	7,215,609 66
III. The balance remaining unexpended at the close of the year 1804, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the statement B, to two millions three hundred and sixteen thousand nine hundred and seventy-five dollars and fourteen cents,	2,316,975 14
	9,654,031 31

That, during the year 1805, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt:

I. On account of the reimbursement and interest of the domestic debt, - - - - -	4,583,960 54
II. On account of domestic loans, obtained from the Bank of the United States, viz:	
On account of the principal, - - - - -	700,000 00
On account of the interest, - - - - -	56,170 12
	756,170 12
III. On account of the domestic unfunded debt, - - - - -	8,061 71
IV. On account of the principal and interest of the foreign debt, and of the interest on the Louisiana stock, - - - - -	1,980,316 70
	7,328,509 07

Amounting, altogether, as will appear by the annexed list of warrants, C, to seven millions three hundred and twenty-eight thousand five hundred and nine dollars and seven cents,

Which disbursements were made out of the following funds, viz:

I. From the fund constituting the annual appropriation of eight millions of dollars, for the year 1805, viz:	
From the fund arising from interest on the debt transferred to the commissioners of the sinking fund, as per account I, - - - - -	711,737 41
From the funds arising from the sales of public lands, being the amount of moneys paid into the treasury, from 1st July 1804, to 30th June, 1805, as per account K, - - - - -	553,521 63
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels, - - - - -	5,904,839 37
Amounting, altogether, to - - - - -	7,170,098 41
Which sum of - - - - -	7,170,098 41
Together with the sum advanced during the year 1804, on account of the appropriation for the year 1805, amounting, as appears by the last annual report, to - - - - -	829,901 59
	\$8,000,000 00

II. From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels, advanced in part, and on account of the annual appropriation for the year 1806,	67,716 02
III. From repayments in the treasury, on account of remittances purchased for providing for the foreign debt, and of advances made to commissioners of loans, as will appear by the statement E, viz:	
Repayment of the purchase money and advances, - - - - -	66,703 02
Damages and interest recovered, - - - - -	20,731 20
	87,434 22
IV. From the moneys appropriated by law, for paying commissions to agents employed in the purchase of remittances, for the foreign debt, being the amount paid at the treasury, during the year 1805, for that object, as will appear by the statement C, - - - - -	3,260 42
That the abovementioned disbursements, together with the above stated balance of dollars, - - - - -	2,316,975 14
Which remained unexpended at the close of the year 1804, and with a further sum arising from profit on remittances from America to Europe, purchased in the year 1805, and amounting, as will appear by the statement D, to - - - - -	117,137 52
	9,762,621 73

Will be accounted for in the next annual report, in conformity with the accounts which shall then have been rendered to the Treasury Department.

That, in the mean while, the manner in which the said sum has been applied is estimated as followeth:

I. The repayments into the treasury, on account of principal, have, during the year 1805, amounted, as by the above mentioned statement E, to - - - - -	66,703 02
II. The sums actually applied, during the year 1805, to the payment of the principal and interest of the public debt, are estimated as followeth, viz:	
1st. Paid in reimbursement of the principal of the public debt, - - - - -	3,905,291 61
2d. Paid on account of interest and charges on the same, - - - - -	4,142,853 18
	8,048,144 79

As will appear by the estimate F.

III. The balance remaining unexpended at the close of the year 1805, and applicable to payments falling due after that year, is estimated, as per estimate G, at - - - - -	9,762,621 73
--	--------------

That no purchases of the public debt have been made since the date of the last report to Congress. And that the statement H exhibits the amount of stock transferred to the commissioners of the sinking fund, in trust for the United States, to the 31st December, 1805, including the sum of \$98,909 41 cents, being the aggregate of the several species of stock transferred in the year 1805, in payment for public lands.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *February 4, 1806.*

A.

Statement of the application, during the year 1804, of the funds provided for the payment of principal and interest of the Public Debt.

I. Payments on account of the Principal of the Public Debt.

1st. On the domestic debt, viz:

Reimbursement of old six per cent. stock,	\$965,168 84	
Do. deferred stock,	327,765 44	
	<u>1,292,934 28</u>	

As per treasury report, No. 17,368.

2d. Domestic loans reimbursed,	250,000 00
3d. Unfunded debt, viz: registered debt,	653 37

4th. On the foreign debt, viz:

		<i>Guilders.</i>	
2d instalment of loan of 3,000,000 of 1st January, 1792,	600,000		
4th do. do. 2,000,000 of 1st February, 1784,	250,000		
5th do. do. 3,000,000 of 1st February, 1790,	600,000		
4th do. do. 2,500,000 of 1st March, 1791,	500,000		
2d do. do. 2,950,000 of 1st June, 1792,	600,000		
4th do. do. 6,000,000 of 1st Sept. 1791,	1,200,000		
3d do. do. 2,050,000 of 1st Dec. 1791, Antwerp,	410,000		
	<u>Guilders, 4,160,000</u>		
	At 40 cents,	1,664,000 00	
		<u>\$3,207,587 65</u>	

II. Payments on account of the interest and charges on the Public Debt.

1st. On the domestic debt, viz:

Interest for the year 1804, on the several species of stock constituting the domestic funded debt, as settled at the treasury,	\$3,307,824 41
To which add this sum, arising from a difference or error in calculation of dividends on stock standing on the books of the commissioner of loans, New York,	05
	<u>3,307,824 46</u>

2d. Interest on domestic loans,	60,593 68
---	-----------

3d. On the foreign debt, viz:

Interest paid at Amsterdam,	<i>Guilders,</i> 602,500	
Do. at Antwerp,	55,350	
	<u>657,850</u>	
	At 40 cents,	\$263,140 00
Premiums on loan of 1st February, 1784,	17,500	
	At 40 cents,	7,000 00
Interest on Louisiana stock, from 20th to 31st December, 1803,	\$22,191 75	
Do. do. from 1st Jan. to 1st July, 1804,	337,500 00	
	<u>359,691 75 (a)</u>	

Commissions and charges, viz: -

At Amsterdam, (b) <i>Guilders,</i> 7,403 18 05	
At Antwerp, 5,054 02 12	
	<u>12,458 01 01</u>
	At 40 cents,
	\$4,983 22

From this sum deduct a profit in exchange on remittances from London to Amsterdam, and in Antwerp, (c) 2,074 11

Commissions on the purchase of bills in America,	2,909 11	
	6,863 01	
	<u>639,603 87</u>	

Total amount applied to the public debt, during the year 1804,	<u>\$7,215,609 66</u>
--	-----------------------

NOTES TO STATEMENT A.

(a) Of the sum of \$359,691 75, here stated as paid for interest on Louisiana stock, there was paid—
 For interest on stock in London, £44,961 9 2 = \$199,828 75
 Do. do. in Amsterdam, *Guilders,* 399,657 10 00 = 159,863 00
\$359,691 75

(b) The amount of commissions and charges stated in the accounts of the commissioners at Amsterdam, for the year 1804, and admitted at the treasury, is *Guilders,* 7,412 06 00
 From which there is here deducted, a sum short stated in the report of last year as the balance in the hands of the commissioners at the end of the year 1803, arising from an overpayment of interest by them in that year, on sundry bonds, *Guilders,* 8 06 11
 And a further sum, for an error in the statement of the amount of remittances of last year, this amount being, *Guilders,* 7,534,849 18, instead of 7,534,849 17, as stated, 1 00

Leaving the sum here stated, *Guilders,* 7,403 18 05

(c) Profit on exchange in Europe.

On £4,000 9 10, remitted from London to Amsterdam,			
Produced,	Guilders,	47,524 06 08	
At par, would make,		44,449 18 00	
Gain,		3,074 08 08	
	At 40 cents,		\$1,229 77
Deduct charges in London on the remittance,	£30 16 02		
	At 4s. 6d.		136 91
			1,092 86
Profit on remittances to Antwerp, being a difference in favor of Holland currency over exchange money of Antwerp,	Guilders, 2,453 02 06, at 40 cents,		981 25
			<u>\$2,074 11</u>

TREASURY DEPARTMENT, Register's Office, 31st January, 1806.

JOSEPH NOURSE, Register.

B.

Statement of the provision, made before the 1st day of January, 1805, for the payment of the principal and interest of the Public Debt, falling due after the year 1804.

I. On account of the Foreign Debt.			
1st. Cash in the hands of commissioners and agents in Europe, viz:			
In Amsterdam, as per treasury report, No. 16,534,	Guilders, 2,024,692 5 11		
From which deduct a balance due the commissioner in Antwerp, per treasury report, No. 16,568 - - - - -	751 11 6		
	<u>2,023,940 14 5</u>		
	at 40 cents, \$809,576 28		
In London, per account rendered, of December 31st, 1804, (a)	£37,823 8 7, at 4s. 6d. 168,104 13		
		977,680 41	
2d. Amount of remittances to Amsterdam, paid for at the treasury previous to 31st December, 1804, which are credited by the commissioners in their accounts for 1805, (b.) guilders 3,102,628 4, at 40 cents,		1,241,051 28	
3d. Amount of payments made at the treasury, before the 31st December, 1804, for bills which have been protested for non-payment, and which, on that day, had not been repaid into the treasury, (c.) - - - - -		104,000 00	
			2,322,731 69
II. Deduct on account of the Domestic Debt, as follows:			
The demands unsatisfied on the 1st January, 1805, were as follow, viz:			
1st. The dividends payable by commissioners of loans, including the dividend due on that day, and exclusively of unclaimed dividends no longer demandable at their offices, - - - - -		1,413,709 14	
2d. Unclaimed dividends payable at the treasury, (d.) - - - - -		15,906 30	
		<u>1,429,615 44</u>	
The provision made for that object was as follows:			
1st. Cash due from commissioners of loans deceased and out of office, - - - - -	2,855 68		
2d. Cash in the hands of acting commissioners, - - - - -	1,421,003 21		
		<u>1,423,858 89</u>	
Leaving the amount wanted to meet all the demands to 1st January, 1805, -			5,756 55
Total amount of provision for public debt remaining unapplied on 31st Dec. 1804,			<u>\$2,316,975 14</u>

NOTES TO STATEMENT B.

(a) The following statement shows the disposition of the sterling bills during the year 1804, and proves the correctness of the balance as here stated:

The balance remaining in the hands of Sir Francis Baring, & Co. on the 1st January, 1804, as per note (d.) to statement B, annexed to the last annual report, was,	£2,664 12 0
And the outstanding remittances, purchased previously to that time, but not credited by them till afterwards, per same, was,	3,000 0 0
	<u>5,664 12 0</u>
The sterling bills purchased in 1804, per statement D, annexed to the last annual report, after deducting the amount transferred to funds other than the public debt, amounted to	81,151 11 9
Amounting together, to	<u>£86,816 3 9</u>

Which are accounted for as follows, viz:

Remitted to Amsterdam, - - - - -	£4,000 9 10
Charges in London, on that remittance, - - - - -	30 16 2
Paid interest on Louisiana stock in London, \$199,828 75, - - - - -	44,961 9 2
Balance in the hands of the agents, 31st Dec. 1804, as hereafter, - - - - -	37,823 8 7
As above, - - - - -	<u>£86,816 3 9</u>

NOTES TO STATEMENT B—Continued.

(c.) Statement of protested bills, outstanding December 31, 1804.

		<i>Guilders.</i>		<i>Dollars.</i>	
Purchased before 1802.	{ Prager's bill,	120,000	-	48,000	recovered in 1805. In suit, but a partial payment made in 1805.
	{ A. Brown's bill,	60,000	-	24,000	
Purchased in 1802.	{ Brown and Hackman's bill,	60,000	-	24,000	
	{ Beal Owings' bill,	20,000	-	8,000	
		<u>260,000</u>		<u>104,000</u>	

The protested bills outstanding on 31st December, 1803, amounted, as per note (c.) to statement B, annexed to last annual report, to	\$224,500
The repayments in 1804 of the principal of protested bills, amounted, as per statement E, annexed to last annual report, to	120,500
And leaves outstanding, as here stated,	<u>104,000</u>

(d.) The amount of unclaimed dividends, consisting of dividends declared at the several loan offices, and which having remained open for payment at the loan offices for nine months, were unclaimed during that period, and were then transferred to the treasury for payment pursuant to law, actually outstanding on the 1st January, 1805, amounted to \$15,903 31
To this sum has been added, in the statement, a sum short advanced for the payment of the dividend on stock standing on the books of the treasury, for the third quarter of the year 1804, amounting to 2 99
And making, together, the sum stated, \$15,906 30

(b.) The following statement proves the sum of guilders, 3,102,628 4, as here stated, to be correct:

Balance in the hands of the commissioners at Amsterdam and Antwerp, on 31st December, 1803, as per statement B, annexed to the last annual report,	<i>Guilders.</i> 2,092,156 03 08
Remittance paid for, previously to 1804, and credited by the commissioners in their accounts for that year, as per same statement,	- 697,051 0 0
Ditto purchased in 1804, as per statement D, annexed to last annual report,	7,534,849 17
Ditto, made from London to Amsterdam. £4,000 9 10, at par,	44,449 18
Gain in exchange on this remittance, per note (b.) to statement A, of this year,	<i>Guilders.</i> 3,074 08 08
Ditto, ditto, at Antwerp, ditto, ditto,	2,453 02 06
	<u>5,527 10 14</u>
	<u>7,584,827 05 14</u>
	<i>Guilders,</i> <u>10,374,034 09 06</u>

Amount applied to principal and interest of foreign debt in 1804, as per statement A, viz:

For principal,	<i>Guilders,</i> 4,160,000
Interest and premiums on Dutch debt,	675,350
Interest on Louisiana stock in Amsterdam,	\$159,863 = 399,657 10
Commissions and charges,	12,458 01 01
	<u>1,087,465 11 01</u>
Cash in hands of commissioners at Amsterdam and Antwerp, per this statement,	2,023,940 14 05
Balance of outstanding remittances to Amsterdam, per ditto,	3,102,628 04 00
As above,	<i>Guilders,</i> <u>10,374,034 09 06</u>

TREASURY DEPARTMENT, Register's Office, January 31st, 1806.

JOSEPH NOURSE, Register.

C.

List of Warrants drawn according to law, during the year 1805, on the Treasurer of the United States, on account of the reimbursement and interest of the domestic debt.

Last instalment of loan of 6,000,000 of 1st September, 1791, -	-	1,200,000	
Fourth and Fifth instalment of loan of 2,050,000 of 1st December, 1791, (Antwerp) -	-	820,000	
		4,570,000 =	1,828,000 00
			3,905,291 61
II. On account of interest and charges.			
1. Interest on domestic funded debt, estimated, for 1805, at -	- -	3,224,083 95	
2. Interest on domestic loans, -	- -	56,170 12	
3. Interest on foreign debt, viz:			
	Guilders, at forty cents each.		
At Amsterdam, -	-	387,000	
Premiums at do, -	-	20,000	
At Antwerp, -	-	36,900	
		443,900 0 0	
Charges at Amsterdam, -	-	4,209 4 8	
Charges at Antwerp, -	-	4,300 0 0	
		8,509 4 8	
		452,409 4 8 =	\$180,963 69
Interest and charges on Louisiana stock, in London and Amsterdam, -	-	678,375 00	
Commissions to agents in America for purchasing bills, -	-	3,260 42	
			862,599 11
			4,142,853 18
			<u>\$8,048,144 79</u>

G.

An estimate of the funds provided, before the 1st January, 1806, for the payment of the principal and interest of the public debt; which, being unexpended on that day, were considered as applicable to payments falling due after the year 1805.

1. On account of the foreign debt.

Cash in the hands of commissioners and agents in Europe, December 31, 1804, per preceding statement B, -	-	\$977,680 41
Remittances to Amsterdam, outstanding on 31st December, 1804, as per do. -	-	1,241,051 28
The remittances made during the year 1805, as per preceding statement D, as follows, viz:		
Remittances to Amsterdam and Antwerp, guilders, 3,761,734 10, at 40 cents, -	-	1,504,693 80
Ditto to London, -	-	589,500 00
		<u>\$4,312,925 49</u>
Total to be accounted for, -	-	
The amount applied during the year 1805, per preceding estimate F, has been, for		
principal, -	-	\$1,828,000 00
Interest and charges, -	-	859,338 69
		<u>2,687,338 69</u>

The balance in the hands of commissioners and agents in Europe, or in remittances outstanding, may, therefore, be estimated, on 31st December, 1805, at - \$1,625,586 80

The amount of protested bills outstanding on the same day was as follows, viz:			
Purchased before and in 1805, {	A. Brown's bill, -	G. 60,000	\$24,000
{	Brown & Hackman's do. -	60,000	24,000
{	Beal Owings' do. -	20,000	8,000
			<u>56,000</u>
Of which there was received, in 1805, in part, -	-	18,143	
Remains outstanding, -	-		37,857 00
			<u>1,663,443 80</u>

2. From which deduct, on account of domestic funded debt, For unclaimed dividends demandable at the treasury, and not yet advanced to the bank for payment to the creditors, estimated at -	-	15,669 88
		<u>\$1,647,773 92</u>

RECAPITULATION.

The provision applicable to 1806, per the foregoing,	-	-	-	-	-	\$1,647,773 92
Amount applied during the year 1805, per estimate F,	-	-	-	-	-	8,048,144 79
Repayments in the treasury in 1805, per statement E, for principal,	-	-	-	-	\$61,903 02	
To which add for the difference between the actual amount of principal recovered on Prager's protested bill, and the amount of that principal as stated in former reports, per note to the said statement E,	-	-	-	-	4,800 00	
					<u>66,703 02</u>	
						<u>\$9,762,621 73</u>
The balance remaining unexpended 31st December, 1804, per preceding statement B, was						\$2,316,975 14
Disbursements from the treasury during the year 1805, per preceding statement C,	-	-	-	-	-	7,328,509 07
Profit in exchange in the year 1805, per preceding statement D,	-	-	-	-	-	117,137 52
						<u>\$9,762,621 73</u>

H.

A General Statement of the several stocks transferred to the United States, to the 31st December, 1805, the interest upon which, by the acts of 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

	Old six per cent. stock.	3 per cent. stock.	Deferred 6 per cent. stock.	4½ per cent. stock.	4 per cent. stock.	5 per cent. stock.	5½ pr. ct. stock.	8 per ct. stock.	Amt. of the several species of stock.

No. 245.

[1st SESSION.]

FISHING BOUNTY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 17, 1806.

Mr. CROWNINSHIELD, from the Committee of Commerce and Manufactures, to whom was referred the petition of John Earle, jun. and Thomas M. Hazard, of Newport, in the State of Rhode Island, made the following report:

The petitioners, in the month of May, 1805, fitted out the sloop Abigail, of the burthen of thirty tons, for a fishing voyage to the straits of Belle Isle, and, as they state, through ignorance of the law in this particular, the vessel sailed under a coasting licence, and not under a fishing licence, as is provided for by the several acts of Congress, relative to the coasting trade and fisheries.

The vessel was seized by the collector of Newport, on her return to Rhode Island, but was released by the order of the Secretary of the Treasury. The collector refuses to pay the bounty allowed to fishing vessels, alleging that the owners neglected to provide their vessel with the usual document to entitle them to the benefit of the law.

The Committee are satisfied that the collector has performed his duty in the particular alluded to. The bounty cannot be paid to vessels sailing with coasting papers, any more than it could be to vessels clearing out for foreign voyages. When the regulations of law are calculated for the security of the revenue, and are not found to operate injuriously to individuals in general, there would seem to be no necessity for an alteration to meet every deviation from the ordinary practice. If the petitioners had stated to the collector, at the time of clearing out their vessel, that they intended to employ her upon a fishing voyage, he could not have refused to grant the fishing licence; and, as they omitted to do this, it would appear that the relief prayed for from Congress ought not to be granted.

The Committee, therefore, recommend that the petitioners have leave to withdraw their petition.

9th CONGRESS.]

No. 246.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 26, 1806.

Mr. CROWNINSHIELD, from the Committee of Commerce and Manufactures, having considered the petition of Tristram Hussey, of the Island of Nantucket, in the State of Massachusetts, made the following report:

The petitioner, with Edward Cary, jun. and others, merchants, of Nantucket, were, and still are, the owners of the ship Union. This vessel has been, for some time past, employed in the whaling business, with an American master and crew, regularly documented as a vessel of the United States. In the year 1801, on the passage to the Brazils, and before they arrived at the Cape de Verd Islands, they obtained eight casks of spermaceti oil, and sent the same to New York, in an American vessel. The collector charged seventy-two dollars and fifteen cents duty on the oil, notwithstanding it was the produce of American fisheries. Upon a second voyage in the same ship, in the following year, they procured twenty-seven casks of oil, from whales taken on the passage, prior to passing the

Cape de Verd Islands, and shipped the same also, in an American bottom, to New York, where the collector again demanded a duty on its importation, and they were obliged to pay a further sum of three hundred and twenty-three dollars and twenty-five cents for the duties. In both instances, the oil was not landed at any foreign port. It was actually taken from the ship *Union*, and put on board American vessels; and the proof exhibited to the Committee is incontestible that it was the produce of the American whale fishery. The collector of New York might, with equal propriety, have charged a duty on the whole cargo of oil, imported in the *Union*, had she entered at that port, as in the two cases under consideration. It appears that American oil cannot be subject to any duty whatever. There is no law known to the Committee that seems to authorize a similar charge. No duty can be collected on articles of the growth, produce, or manufacture, of the United States; and, wherever any American articles have been returned from foreign countries, the duty is believed to have been invariably remitted, or, rather, none has ever been demanded. Cod fish, taken by American fishermen, in American vessels, are not chargeable with duty, whether imported in the vessel in which they were caught, or on any other American bottom; surely, then, oil, of the American fisheries, must be entitled to a similar exemption from duty. The Committee are of opinion that Congress ought to relieve the petitioners from the payment of the duty charged to them, without the authority of law to warrant it; and they beg leave to submit the following resolution:

Resolved, That the prayer of the petitioner is reasonable, and ought to be granted.

9th CONGRESS.]

No. 247.

[1st SESSION.]

PROTECTING DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 4, 1806.

MR. CROWNINSHIELD, from the Committee of Commerce and Manufactures, to whom was referred the petition of the Dutchess County Slate Company, in the State of New York, made the following report:

The petitioners represent that, for four years past, they have been engaged in working and manufacturing slate in the county of Dutchess, in the State of New York, and are proprietors of quarries containing an inexhaustible quantity, and of a quality superior to any heretofore discovered in this country. They have already advanced upwards of one hundred and twenty thousand dollars, as a capital stock, for carrying on the business, and employ a great number of workmen and laborers. The petitioners state that slate is now getting into general use, in most parts of the United States, and they seem to be of opinion that the interests of our citizens, and the credit of our country, require that we should no longer be under the necessity of importing it from Europe. With a view, therefore, of checking the importation of foreign slate, and as an encouragement to our own, they solicit that additional duties may be imposed on all slate imported from Europe. They recommend that a specific duty should be imposed, in preference to an ad valorem duty, on account of the exceedingly low price at which the slate is procured from the quarries in Wales.

The committee find that the House decided on a similar application from the New York and Dutchess County Slate Company, at the last session of Congress. The report was unfavorable to the petitioners, and the House confirmed the decision of the committee, and refused to impose any additional duty upon imported slate. It does not appear that any new arguments have been urged, in the present petition, to induce the committee to change their former opinion on this subject. The petitioners confess that the price of foreign slate is now reduced as low as that of American, but they complain that the importation of the former is continued. And can the petitioners reasonably expect that such extravagant high duties should be imposed on the importation of foreign slate as will amount to a prohibition of the article? The committee hope the petitioners have formed no such expectations. In the United States, no monopolies exist, and none ought ever to be permitted to exist. If a duty, amounting to a prohibition, is laid on the foreign slate, the American slate will be enhanced in price, just so much as the difference may be between the old and the new duty; indeed, it is fair to presume, the price would go beyond that difference; having the whole market to themselves, it might be in the power of the manufacturers of slate, in this country, to augment the cost of that article to the purchaser beyond all reasonable bounds.

Imported slate is now charged with a duty of seventeen and a half per cent. ad valorem. In the opinion of the committee, no sufficient reason exists to recommend any addition to this duty. The interests of other persons than those who would be immediately benefitted by the augmentation of the price, are to be consulted in deciding on the merits of this question. The purchaser or consumer must ultimately pay the whole duty; he ought not to be prevented from buying foreign slate, if he prefers it to that of his own country. If the duty is raised considerably, the American manufacturer would have the entire command of the market, and would charge his own prices; competition would cease; the seller would be enriched, at the expense of the buyer, and, having secured a monopoly to one class of manufacturers, others might expect similar favors. Such a policy cannot be approved in this country. However, notwithstanding the expression of these opinions, if the existing duty was not deemed to be sufficiently high to afford an advantage to the American slate, (the charges on the importation of foreign slate being at the same time considered as adding greatly to the price) the committee would probably have been induced to propose some addition, though not to the extent prayed for by the petitioners.

If Congress intended to raise the duties generally, on articles imported from foreign countries, either with a view to new revenue, or as a further encouragement to domestic manufactures, the committee have no reason to suppose that slate would be omitted. As the committee are convinced that the manufacturers of slate are sufficiently protected already, and being perfectly satisfied that the increased or prohibitory duty on foreign slate would only enhance the price of the article, to their exclusive benefit, but to the manifest injury of the consumer, the following resolution is respectfully submitted:

Resolved, That the Dutchess County Slate Company of New York be permitted to withdraw their petition.

9th CONGRESS.]

No. 248.

[1st Session.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 11, 1806.

Mr. JOHN COTTON SMITH, from the Committee of Claims, to whom was referred the petition of Peter A. Guestier, agent of the former owners of the French ship *Blaireau* and her cargo, made the following report:

It is stated by the petitioner, that the French ship called the *Blaireau*, owned by a mercantile house in Bordeaux, set sail from St. Pierres, in the island of Martinique, some time in March, 1803, bound on a voyage to Bordeaux, having on board a valuable cargo, consisting principally of coffee and sugar, and consigned to different persons at the port last mentioned. That about the 30th March, in the same year, while the ship was in the prosecution of her voyage, she was met in the night, and run foul of, by a large Spanish ship of war, called the *St. Julien*; in consequence of which accident, so much injury was sustained by the *Blaireau*, that the captain and crew, after due consultation, abandoned her, and took refuge on board the Spanish ship, which continued her voyage to Spain, where they were all landed. That, on the day following the disaster, an English ship, called the *Firm*, commanded by William Mason, bound on a voyage from London to Baltimore, met with the *Blaireau*, thus abandoned by her captain and crew, and, after examining her situation, and perceiving there was a possibility that the injury might be so far repaired as to enable her to be brought into port, the captain put on board a part of his crew; who, on making the requisite repairs, with great labor, and at the imminent risk of their lives, succeeded in conducting her in safety to Baltimore, where she arrived the beginning of May following. That, shortly after the arrival of the *Blaireau*, a libel was filed in the district court of Maryland, by Captain Mason and crew, for salvage; that, by a decree of the court, salvage was allowed, and for that purpose a sale of the ship and cargo was ordered; and finally, that the marshal, under whose direction the sale took place, was compelled, by the collector of the port of Baltimore, to pay, out of the proceeds thereof, the sum of \$12,112 58, being the amount of duties alleged to be due to the United States. To obtain the restitution of this sum, under the idea that the duties could not lawfully be collected, is the object of the present application.

The petitioner founds his title to relief upon an opinion pronounced by the district judge of Maryland, when deciding the following case. That part of the *Blaireau's* cargo, which Captain Mason placed on board the *Firm*, he omitted to report to the collector of Baltimore. The district attorney, apprehending this omission to be a violation of the collection law, instituted a suit against the captain, for the penalty of \$1,000, imposed by the statute. On trial of the cause, it appears a verdict was taken for the plaintiffs, subject to the opinion of the court upon a point saved by the counsel. Judgment was rendered in the following terms: "Mature consideration having been given to this case, it is the opinion of the court that the goods, wares, and merchandises, aforesaid, are not chargeable with the payment of any duties to the United States, and therefore, that the above action cannot be sustained. Judgment for the defendant on the point saved."

It may be safely affirmed, that the opinion of the learned judge was somewhat broader than the case submitted to his consideration. There might be, and there doubtless were, sufficient reasons to excuse the defendant from the penalty of the statute, independently of the question, whether the cargo was chargeable with the payment of duties. The decision, so far as it regards this point, must be deemed extra judicial, and it remains only to inquire whether, from a sound construction of the statute, duties were chargeable in the present case. The words of the act relative to this subject are, "that, upon all goods, wares, and merchandise, which shall be brought into the United States, from any foreign port or place, there shall be levied," &c. It is difficult to conceive of language more explicit, more unequivocal. The word "imported" is not here used, and apparently for the purpose of avoiding any expression to which technical narrowness might be applied. The word "place" is introduced, manifestly with the same view; and the plain sense of the passage is, duties shall be paid on goods, &c. brought into the United States, from any point without their limits or jurisdiction. A phraseology so simple, so perfectly free from ambiguity, might fairly be presumed to set criticism itself at defiance. The United States have unquestionably a legal right to the duties in this case; and who will say their claim is not equitable, also, when it is considered that, by the sale of the cargo, the amount of the duties has been identified with the price?

It is perhaps worthy of consideration, whether the collection law may not require some farther provisions applicable to this subject. But such an inquiry is not within the province of your committee, nor is it at all necessary, in determining the question submitted to their examination. The cargo, in this case, could not have been disposed of without the intervention of the district court, nor could the sale have been effected but through the instrumentality of the officers of the Government; under these circumstances, their negligence would have been highly culpable if the duties had not been retained.

Your committee are of opinion the prayer of the petition ought not to be granted.

9th CONGRESS.]

No. 249.

[1st Session.]

PAYMENTS MADE TO AMERICAN CITIZENS UNDER THE CONVENTION WITH FRANCE, OF THE 30TH APRIL, 1803.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 22, AND APRIL 3, 1806.

TREASURY DEPARTMENT, March 20th, 1806.

SIR:

In obedience to the resolution of the House of Representatives of the 13th instant, I have the honor to transmit a list of all the bills drawn by the minister of the United States at Paris, on the treasury of the United States, for claims embraced by the convention with the French republic, of April 30th, 1803, which have been presented at the treasury, previous to the 14th day of March, 1806, and amounting to 13,450,608 francs and 7 centimes.

In addition to that list, it appears by a list forwarded by Mr. Armstrong, on the 3d of July, 1805, that bills to the amount of 633,186 francs and 19 centimes, had been drawn by him, on, or before that day, which have not yet been presented at the treasury.

Letters of advice have also been received at the treasury, for bills, amounting to 117,432 francs and 25 centimes, drawn subsequent to the 3d of July, 1805, which bills have not yet been presented at the treasury.

So far as can be judged by the numbers annexed to the bills, it would seem that one hundred and twenty-nine bills, drawn between the 5th day of August and 25th day of November, 1805, have not yet been presented for payment; but, for what sums, or in whose names drawn, is not known.

In every other case, the names of the persons in whose favor bills have been drawn, prior to the 25th day of November, 1805, appear in the enclosed lists; but there are not many in which the nature of the claims can be distinguished on the face of the bills, and the collateral information received by this Department, on that subject, could only assist in making a partial and conjectural estimate, and not an official statement.

A list of forty-four Bordeaux embargo cases, for which Mr. Armstrong has advised that no bills will be drawn, and amounting to 702,998 francs and 97 centimes, having already been transmitted, on the 28th ultimo, to the Committee of Ways and Means, has not been included in the annexed lists.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

List of Bills drawn by the Minister Plenipotentiary of the United States at Paris, on the Treasury of the United States, for claims embraced by the Convention with the French republic, of April 30, 1803, which have been presented at the Treasury previous to the 14th day of March, 1806.

TREASURY DEPARTMENT, April 3d, 1806.

SIR:

A complete list of the bills drawn to the 14th day of January last, by the minister of the United States at Paris, for claims under the convention of the 30th April, 1803, having been lately received, I have the honor to enclose a list of all such bills as were not included in that transmitted to the House of Representatives, on the 20th day of March last.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the Speaker of the House of Representatives.

Supplementary list of bills drawn by the minister plenipotentiary of the United States at Paris, for claims embraced by the Convention with the French republic, of April 30th, 1803, not included in the list transmitted to Congress, on the 20th of March, 1806.

The list containing the above bills was received at the treasury, March 28th, 1806. The whole amount of bills drawn prior to the 15th January, 1806, is stated by Mr. Armstrong to have been *Francs*, 16,668,191 90.

[NOTE.—See No. 253.]

9th CONGRESS.]

No. 250.

[1st SESSION.]

FOREIGN COINS.

COMMUNICATED TO THE SENATE, MARCH 26, 1806.

Mr. ANDERSON, from the committee to whom was referred the bill, passed by the House of Representatives, to repeal so much of the act, entitled "An act regulating foreign coins, and for other purposes," as is contained in the second section thereof, reported:

That they find, by the law aforesaid, which passed on the 9th day of February, 1793, in the first section thereof, certain foreign coins are made a legal tender, at the rates therein specified. The said first section closes with these words, viz: "But no foreign coin that may have been, or shall be, issued subsequent to the 1st of January, 1792, shall be a tender as aforesaid, until samples thereof shall have been found, by assay at the mint of the United States, to be conformable to the respective standards required, and proclamation thereof shall have been made by the President of the United States."

The second section of the same law (a repeal of which section is contemplated by the bill referred to the committee) is in the following words, viz: "That, at the expiration of three years next ensuing, the time when the coinage of gold and silver, agreeably to the act, entitled 'An act establishing a mint, and regulating the coins of the United States,' shall commence at the mint of the United States, (which time shall be announced by the proclamation of the President of the United States) all foreign gold coins, and all foreign silver coins, except Spanish milled dollars, and parts of such dollars, shall cease to be a legal tender as aforesaid."

The committee find that, in consequence of the operations of the mint having commenced, the President of the United States did, by his proclamation, dated the 22d day of July, 1797, announce the same, pursuant to the directions contained in said second section, and did thereby give notice that, in conformity with said law, all foreign silver coins, except Spanish milled dollars and parts of such dollars, would cease to pass current as money, within the United States, and to be a legal tender for the payment of any debts or demands, after the 15th day of October then next, and that all foreign gold coins would cease to be a tender as aforesaid, after the 31st day of July, in the year 1798.

The committee find that no proclamation has ever been made by the President of the United States, upon the subject of foreign coins which may have issued since January 1st, 1792, as contemplated by the first section of the act aforesaid; nor does it appear that any assay of such coins has been made at the mint of the United States.

The committee find that, on the 1st day of February, 1798, Congress passed an act, supplementary to the act, entitled "An act regulating foreign coins, and for other purposes" in the words following, viz: "That the second section of an act, entitled 'An act regulating foreign coins, and for other purposes,' be, and the same is hereby, suspended, for and during the space of three years, from and after the 1st day of January, 1798, and until the end of the next session of Congress thereafter; during which time the said gold and silver coins shall be and continue a legal tender, as is provided in and by the first section of the act aforesaid; and that the same coins shall thereafter cease to be such tender."

On the 30th of April, 1802, Congress passed an act to suspend, in part, the act, entitled "An act regulating foreign coins, and for other purposes," in the words following, viz: "That so much of the act, entitled 'An act for regulating foreign coins, and for other purposes,' as is contained within the second section thereof, be, and the same hereby is, suspended, for and during the space of three years, from and after the end of the present session of Congress." That session of Congress, the committee find, was closed, and at an end, on the 3d day of May, 1802.

By placing in one view all the laws upon the subject of foreign coins, it appears that, if the first section of the law upon that subject were now in force, no foreign coin whatever, which has issued subsequent to the 1st of January, 1792, is current money or a legal tender—not even Spanish milled dollars and parts of such dollars, unless by force of the second section of the same law; which, if suspended or repealed, will throw out of circulation almost the whole of Spanish dollars and parts of dollars, as but few pieces of those, or of any other foreign coins of a prior date to January, 1792, are in circulation. But, when we consider the act passed on the 1st day of February, 1798, as not only *suspending* the operation of the second section of the act regulating foreign coins, but *positively enact-*

ing that all the foreign coins, mentioned in the first section thereof, shall, at the end of the next session of Congress, after three years from the 1st day of January, 1798, *cease to be a tender*, it will be discerned that the first section stands completely repealed, as it respects the legal tender of foreign coins: for the act of the 30th of April, 1802, suspends the operation of the second section only of said act, without reviving the first section.

The legal state of things in the United States, in respect to the currency of foreign coins, then, is as follows, viz: From and after the 3d day of May, 1802, (the end of the session of Congress mentioned in the act of February, 1798) no foreign coin whatever has been a legal tender, until 3d May, 1805. From the 3d May, 1805, (at which time the last suspension of the second section of the law regulating foreign coins, expired) Spanish milled dollars, and parts of such dollars, have been a legal tender.

With this view of the subject, which your committee believe is correct, they cannot discern the policy of *repealing* the second section of said act, as contemplated by the bill referred to them by the Senate. Were this bill to pass, no money would be a *legal tender* to satisfy debts and demands in the United States, except the gold and silver coins which have issued from their mint. These coins, the committee believe, are not sufficient in quantity and value for a circulating medium, without the aid of Spanish milled dollars and parts of such dollars.

But, since such great quantities of Spanish milled dollars have been exported, and are still exporting, from the United States, and so great a portion of the remaining foreign gold and silver coins, as well as those issued by the United States, are locked up in the cells of the Banks, already numerous, and still increasing; your committee believe that measures ought to be adopted by Congress, to increase the quantity of circulating medium beyond our own coins and Spanish milled dollars and parts of such dollars.

In effecting this object, the committee are sensible that caution is requisite to prevent coins, which may not be of a standard weight and value, from becoming a currency, especially as there seems to have been no assay of foreign coins, which have issued subsequent to the 1st day of January, 1792.

No. 251.

[1st SESSION.]

FISHING BOUNTY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 28, 1806.

Mr. CROWNINSHIELD, from the Committee of Commerce and Manufactures, to whom was referred, by the House of Representatives, the petition of Jonathan Very, of Salem, in the State of Massachusetts, made the following report:

The petitioner, in the year 1800, was the owner of the schooner Edmund, of the burthen of fifty-one tons. This vessel was licensed for employment in the cod fishery, and sailed on her voyage the twenty-first day of June, and returned to Salem on the ninth day of August, with a fare of fish, of three hundred and seventy-two quintals. She departed on the second voyage, the twenty-first day of August; and after being employed in the cod fishery, and having caught upwards of forty quintals of fish, on the ninth day of September, ensuing, the said vessel met with a severe storm, shipped a sea, and was so wrecked that the crew deserted her, and she, with her whole cargo of fish and salt, was thereby totally lost. In consequence of this loss, the petitioner and the crew of said schooner were deprived of the bounty money allowed under the existing laws for the encouragement of the fishery, in lieu of the drawback on the salt consumed in making the fish. The petitioner prays that he and the crew of said schooner may receive the same bounty, which, in the event of a successful voyage, they would have been entitled to, or such proportion thereof as may be deemed proper.

The committee are satisfied that the duty paid to the United States, on the quantity of salt exported in the schooner Edmund, amounted to an equal sum with the bounty prayed to be allowed by the petitioner; it might, therefore, at the first view, seem reasonable to grant the prayer of the petitioner; but, on the other hand, the existing law only warrants the payment of the bounty to fishing vessels actually employed during four months of the fishing season; that is accounted to be from the first day of March to the first day of December, in every year. This schooner was at sea, and actually engaged in the fishing business, for seventy days only, during the two voyages. She was not employed longer than that time before she was lost, and abandoned by the crew. No provision exists, in the law for the encouragement of the fisheries, which is calculated to meet a case similarly circumstanced. It contemplates the employment of a fishing vessel, for the period of four months, and leaves no discretion to be exercised by the officers of the customs. If a regularly licensed fishing vessel is lost, or shipwrecked, at any time within the four months, as the law now stands, the bounty cannot be paid. The committee consider this as a hardship upon the fishermen, and the owners of fishing vessels. It would certainly be an equitable arrangement to allow them to receive such proportion of the bounty, as the time employed, previous to the loss of the vessel, might bear to the four months; and where the vessel should be entirely lost, with the crew, it would be only a fair and just encouragement to the cod fishery, if the full bounty was paid; and such a provision could not be considered as operating injuriously to the revenue, as the bounty is allowed in lieu of the drawback to which the salt used in curing the fish would be entitled, upon its exportation out of the United States.

The committee, however, are not permitted to vary the law to suit each individual case. A mere informality, unintentionally committed, might sometimes be dispensed with; but, where the principal provision of the law is not complied with, there can be no reason to induce Congress to fluctuate in its decisions, according to the various applications or views of individuals, who may feel themselves injured.

Under all the circumstances stated in this case, (although the committee are fully sensible that the loss falls peculiarly hard on the petitioner) they are of the opinion that, as the law now stands, it would be improper to allow the bounty asked for by the petitioner; and therefore recommend, that he have leave to withdraw his petition, and the documents accompanying the same.

[1st SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 1, 1806.

TREASURY DEPARTMENT, March 29th, 1806.

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed on the 2d of April, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Comptroller's Office, March 28th, 1806.*

SIR:

The statements marked A, B, C, and D, which you will receive herewith, have been prepared pursuant to the seventh section of an act of Congress, of the 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." They contain all the information relative to the transactions of the mint which the settlements made at the treasury enable me to give.

I have the honor to be, with great respect, your obedient servant,

ALBERT GALLATIN, Esq.

G. DUVALL.

A.

Statement exhibiting the balance of Gold and Silver remaining in the hands of the officers of the mint on the 31st December, 1804; the amount of deposits from the 1st January to the 31st December, 1805; the different species of coins made and paid on account of deposits; allowance for wastage; and the balance remaining in the hands of the officers of the mint on the said 31st December, 1805, to be accounted for on a future settlement.

TREASURY DEPARTMENT, *Register's Office*, March 24, 1806.

JOSEPH NOURSE, *Register*.

9th CONGRESS.]

No. 253.

[1st SESSION.]

CLAIMS TO BE PAID UNDER THE CONVENTION WITH FRANCE, OF THE 30th APRIL, 1803.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 2, 1806.

TREASURY DEPARTMENT, *February 28, 1806.*

SIR:

It is provided by the act making provision for the payment of claims of citizens of the United States on the Government of France, &c. passed on the 10th November, 1803, that the payments shall be made at the treasury, on the orders of the minister plenipotentiary of the United States to the French republic. A difficulty having arisen in France respecting the persons who were entitled to compensation for the Bordeaux embargo, it was agreed by the minister of the United States, and by the minister of the public treasury of France, that a list of the liquidations should be transmitted to the treasury of the United States for payment, leaving it to be decided by the officers of the said treasury, to whom payment ought to be made. A transcript of the said liquidations,* which amount to 702,995 francs and 97 centimes, and of a letter from Mr. Armstrong accompanying the same, are herewith transmitted. It is believed that the proof of ownership will be easily obtained; and the difference on the right to commission having been adjusted, no difficulty is apprehended in the settlement of the accounts. But a law is necessary to authorize the settlement of accounts at the treasury, and the payment to the proper claimants; as no bills or orders drawn by the minister of the United States, in the usual form, accompany the transcript of liquidation, and the officers of the treasury have no authority, under the existing law, to decide who are the real owners.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GAILLATIN.

HON. JOHN RANDOLPH, *Chairman of the Committee of Ways and Means.*

*This transcript is not on the files of either House of Congress or the Treasury Department.

PARIS, November 21, 1805.

SIR:

Herewith enclosed is a list of liquidations made under the treaty of 1803, between the United States and the Government of France, certified by the minister of the public treasury, and now transmitted to you for payment, under an arrangement made between that minister and myself, on the fifteenth of June last. A note of a conversation between him and me, which produced this transmission, is subjoined.

I am, sir, with great respect, your most obedient and very humble servant,

JOHN ARMSTRONG.

THOMAS T. TUCKER, Esq. *Treasurer of the United States of America, Washington.*

NOTE

Of a conversation which took place, on the 15th of June, 1805, between Mr. Barbé Marbois and myself, on the subject of certain liquidations, under the treaty of 1803, and the claims, respectively, of Fulwar Skipwith, Esq. and Joseph Fenwick, to receive the bills issuable thereon.

It was contended by Mr. Marbois, that, inasmuch as the liquidations had been made in the names of J. Fenwick's constituents, the bills ought to be drawn to them; and the rather, because, though Mr. Skipwith presented himself as attorney for certain persons, claiming to be owners of the vessels to which indemnities had been accorded, still, that no sufficient evidence of their being such, had been offered by him (Mr. Skipwith.)

To the arguments drawn from the facts of the liquidation having been made in the names of Mr. Fenwick's constituents, it was answered, that neither the treaty, nor the usage under it, made the liquidations alone, conclusive evidence of the property; that, in many cases, liquidations had been sent back to the council general, and by it conforming to the views of the two ministers.

As to the 2d argument, viz. That Mr. Skipwith had not offered sufficient evidence of the ownership of his constituents, it was answered, that it matters little from whom the evidence of ownership came, whether from Mr. Skipwith, or other person, provided the evidence was in itself sufficient; that the distinction taken by the minister, so far from supporting the objection, made against it; because, though Mr. Skipwith might not have preferred any evidence competent to his purpose, yet that Mr. Fenwick had supplied that defect; that, in a paper presented by him, (Mr. Fenwick) as a transcript from the consular books of Bordeaux, and of cotemporary date with the embargo, the constituents of Mr. Skipwith are recognised as the owners; that it will not be contended that the evidence of this paper is either diminished or destroyed by the circumstance of its having been produced by Mr. Fenwick, for another purpose; and lastly, that its authority has been deemed sufficient in other cases to regulate our payments.

Admitting, however, the fact, that no sufficient evidence had, from any quarter, been produced, of the ownership contended for by Mr. Skipwith, still, it by no means followed that the bills could be drawn to the constituents of Mr. Fenwick—

1st. Because, according to his own showing, these constituents were not owners, but agents, whose authority was merely incidental to the relation they bore at the time to the ships embargoed, and which necessarily terminated with that relation, unless revived by new powers from the owners, which in none of these cases appears to have been given.

2d. Because, had their powers been revived in this form, and were they now operative, unless they gave an entire control over the property, the agents would be precluded from recovering the bills in their own names, under the general rule, that "bills were not payable to the order of agents, whose powers do not extend to the alienation of the claims represented by them."

And 3dly. Because, were the bills drawn agreeably to the list of liquidations, I see nothing that could afterwards impair the titles of the captains, nor any means by which the owners could compel them to pay over the moneys received by them. The liquidations and the bill must be regarded, by the treasury of the United States, as the highest possible evidence of the property. No attachment, of course, could lay there, nor could the jurisdiction of our courts (any more than the powers of our treasury) reach the evil; it being altogether incompetent to inquire whether the payment was made rightfully or wrongfully.

Mr. Marbois being tenacious of his opinion, and I not disposed to yield mine, it was suggested that a list of the liquidations made in these cases, stating in one column the names of the captains, and in another, those of the persons claiming as owners, and certified by the minister of the public treasury of France, should be transmitted to the United States, to be paid there, to those persons in whom the property might be found.

9th CONGRESS.]

No. 254.

[1st SESSION

RELIEF TO A SURETY IN A CUSTOM HOUSE BOND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 2, 1806.

Mr. CROWNINSHIELD, from the Committee of Commerce and Manufactures, to whom was referred, on the 4th instant, by the House, the petition of Francis Barretto, of the city of New York, made the following report:

The petitioner prays that Congress would relieve him from the payment of a custom house bond, where he is the surety, or, if this is deemed improper, as he is in indigent circumstances, he hopes that some favorable arrangement may be made for him, whereby his person may be exempt from arrest, under the judgment obtained against him, at the suit of the United States.

The following facts appear in this case: The petitioner, on the 17th day of July, in the year 1795, together with George Arnold and James Harrison, became bound to the United States, as sureties for Jose Joaquim La Costa, for duties on the cargo of the brigantine Los Amigos, from Madeira, amounting to the sum of nine thousand dollars. The person who signed the bonds as principal having failed in his business, and neglecting to pay the debt, suits were commenced for the recovery of the duties, upon which judgment was obtained, and the principal debtor was a long time confined in the gaol of New York, and was finally liberated pursuant to an act of Congress, passed sixth of June, 1798, upon assigning all his property to the use of the United States. It is further stated, that the other two sureties, James Harrison and George Arnold, being totally insolvent, have departed from the United States; and the petitioner, unable to struggle with the difficulties and loss of mercantile credit which he had incurred, was under the necessity of taking the benefit of the bankrupt act. Since the discharge from his private creditors, the attorney of the United States for the New York district has recovered judgment against him for the amount of the bond, and he is liable to be imprisoned from day to day.

He is totally destitute of property, and has a numerous family of young children, who depend upon his exertions for their education and support. In this distressing situation he is unable to pursue any business to advantage, and can only expect or hope for relief from the benevolent interposition of Congress.

The committee remark, that the petitioner's misfortunes do not appear to be owing to his fault or neglect; he placed implicit confidence in the person who was principal on the bond, and expected he would pay it; he was deceived in this expectation. His own funds were, and still are, inadequate to meet the payment. He is totally destitute of property. The United States cannot expect to receive any thing from the petitioner. Thus circumstanced, and well knowing that Congress have, in several instances, where any meritorious cases presented themselves, made provision for the relief of persons who were unable to pay their debts, the committee conceive that the House will readily agree to exempt the person of the petitioner from arrest for the debt owing to the United States. Similar bills have been reported during this session, for the relief of Francis Johonnot and John McFadon, and the present petitioner has equal, if not superior claims upon the humanity of Congress. The committee beg leave to submit the following resolution:

Resolved, That the prayer of the petitioner, so far as to free his person from arrest or confinement, on account of any judgment obtained against him, in behalf of the United States, is reasonable, and ought to be granted.

9th CONGRESS.]

No. 255.

[2d SESSION.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, DECEMBER 8, 1806.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

REVENUE AND RECEIPTS.

The nett revenue arising from duties on merchandise and tonnage, which accrued during the year 1804, amounted, after deducting that portion which arose from the additional duties constituting the Mediterranean fund, to

	\$12,673,458
--	--------------

And that which accrued during the year 1805, amounted, after making a similar deduction (as will appear by the statement A) to	13,083,823
--	------------

It is ascertained that the nett revenue which has accrued during the three first quarters of the year 1806, exceeds that of the corresponding quarters of the year 1805; and that branch of the revenue may, exclusively of the Mediterranean fund, be safely estimated, for the present, at thirteen millions of dollars.

The statement B exhibits in detail the several species of merchandise, and other sources, from which that revenue was collected during the year 1805.

It appears by the statement C that the sales of public lands have, during the year ending on the 30th September, 1806, exceeded 473,000 acres. The actual payments by purchasers, have, during that period, amounted to 850,000 dollars, of which sum near 700,000 dollars have been paid in specie, and the residue in stock of the public debt. The specie receipts from that source may, after deducting charges, and the five per cent. reserved for roads, be estimated, for the ensuing year, at five hundred thousand dollars.

The receipts arising from the permanent revenue of the United States may, therefore, without including the arrears of direct tax and internal revenues, the duties on postage, and other incidental branches, be computed, for the year 1807, at	13,500,000
--	------------

And the payments into the treasury during the same year, on account of the temporary duties constituting the Mediterranean fund, estimated at	1,000,000
---	-----------

Making, in the whole, an aggregate of	<u>\$14,500,000</u>
---------------------------------------	---------------------

EXPENDITURES.

The permanent expenses are estimated at 11,400,000 dollars, and consist of the following items, viz:

I. The annual appropriation of eight millions of dollars, for the payment of the principal and interest of the public debt, of which sum, not more than 3,600,000 dollars will, for the year 1807, be applicable to the payment of interest,	\$8,000,000
II. For the Civil department, and all domestic expenses of a civil nature, including invalid pensions, the light house and mint establishments, the expenses of surveying public lands, the fourth instalment of the loan due to Maryland, and a sum of 130,000 dollars to meet such miscellaneous appropriations, not included in the estimates, as may be made by Congress,	1,150,000
III. For expenses incident to the intercourse with foreign nations, including the permanent appropriation for Algiers,	200,000
IV. For the Military and Indian departments, including trading houses, and the permanent appropriations for certain Indian tribes,	1,150,000
V. For the Naval establishment,	900,000
	<u>\$11,400,000</u>

The extraordinary demands for the year 1807, already authorized by law, amount to two millions seven hundred thousand dollars, viz:

The balance of the American claims assumed by the French convention, which remained unpaid on the 30th September last, amounting to,	700,000
And the two millions of dollars appropriated by the act of 13th February, 1806, making provision for defraying any extraordinary expenses attending the intercourse between the United States and foreign nations,	2,000,000
	<u>2,700,000</u>
Making, altogether,	<u>\$14,100,000</u>

From which it appears that, besides a surplus of four hundred thousand dollars, the resources of the ensuing year will be sufficient to meet the current demands, and to discharge, without recurring to the loan authorized by the last mentioned act, the extraordinary appropriation of two millions for foreign intercourse.

It is here proper to state, that, under the authority given by that act, a credit of one million of dollars has been opened in Holland, to the ministers of the United States appointed to treat with Spain. Should the credit be used, the million will be charged to the proper appropriation; but, although the balance chargeable to the expenditure of the year 1807, will, in that case, be only one, instead of two millions, as stated in the above estimate, the general result will be the same, as it will then be necessary to replace, in Holland, the million thus employed for a different object than the payment of the foreign debt, to which it now stands charged.

The balance in the treasury amounted, on the 30th day of September, 1805, to \$4,558,664 02; and, on the 30th day of September, 1806, to \$5,496,969 77. But it will, on account of the heavy payments to be made in the course of this month for the public debt, be probably reduced, on the 1st January, 1807, to a sum not much exceeding four millions of dollars.

PUBLIC DEBT.

The annexed note of the proceedings of the Commissioners of the Sinking Fund, marked E, shows that a considerable portion of the annual appropriation of eight millions of dollars was applicable this year to the reimbursement or purchases of the domestic debt. No more than 17,517 dollars and 61 cents were offered at market price, and accordingly purchased. The reimbursement of the Navy six per cent., amounting to 711,700 dollars, was, therefore, effected on the 30th day of September last, and that of the five and a half per cent. stock, amounting to 1,847,500 dollars, is advertised for the 1st day of January next. The payment of the last mentioned sum will be made by the treasury in the course of this month. Although a more than usual portion of the appropriation for the calendar year 1806, falls, for that reason, on the last quarter, it appears, by the statement D, that the payments on account of the principal of the public debt have, during the year ending on the 30th day of September, 1806, amounted to near three millions two hundred and fifty thousand dollars.

It appears by the same statement, that the payments on account of the principal of the public debt have, from the 1st of April, 1801, to the 30th September, 1806, amounted to, - - - - - \$21,203,903 55

The payments on the same account, to be made by the treasury in the course of this month, are—
 For the reimbursement of the five and a half per cent. stock, - - - - - 1,847,500 00
 For the annual reimbursement of the six per cent. and deferred stocks, - - - - - 993,389 19
2,840,889 19

Amounting, altogether, to \$24,044,792 74

And making the total of principal of the public debt, reimbursed from the 1st of April, 1801, to the 1st January, 1807, more than twenty-four millions of dollars.

During the same period, there have also been paid to Great Britain, in satisfaction and discharge of the money which the United States might have been liable to pay, in pursuance of the provisions of the sixth article of the treaty of 1794, two millions six hundred and sixty-four thousand dollars; and to the holders of bills, drawn by the minister of the United States, at Paris, on account of American claims assumed by the convention with France, a sum exceeding three millions and fifty thousand dollars; neither of which sums is included in the preceding statement of debt redeemed.

As the only parts of the public debt which the United States have a right to reimburse, during the year 1807, consist of the annual reimbursement of the six per cent. and deferred stocks, estimated at 1,540,707 dollars, and of the four and a half per cent. stock, amounting to 176,000 dollars, it will not be practicable, unless purchases can be effected within the limitations prescribed by law, to apply, during that year, the whole of the annual appropriation of eight millions of dollars. The unexpended balance, together with the appropriation for the year 1808, will enable the United States to reimburse, on the 1st of January, 1809, the whole of the eight per cent. stock, which is irredeemable before that day.

But in order that Congress may have a clear view of the situation of the public debt after the year 1808, and be enabled to decide on the propriety of making further legislative provision for that object, it appears necessary to state, distinctly: 1st, The operations which will take place in relation to the debt, during the years 1807 and 1808. 2dly, The several species and aggregate of debt, which will have been extinguished between the 1st April, 1801, and the 1st January, 1809. 3dly, The several species and aggregate of debt remaining unpaid on the last mentioned day. 4thly, A comparative view of the revenue, and annual payments on account of the debt, after that day.

I. The payments to be made during the years 1807 and 1808, on account of the principal and interest of the public debt, consist of the following items, viz:

Interest and reimbursement of the six per cent. and deferred stocks, - - - - -	\$6,688,296 08
Of which sum, the sum required for interest is, - - - - -	3,512,337 83
And the reimbursement of principal will amount to - - - - -	3,175,958 25
	\$6,688,296 08
Interest and charges on all the other species of debt, - - - - -	3,529,457 50
Principal of the eight per cent. and four and a half per cent stocks, - - - - -	6,538,400 00
	\$16,756,153 58
That is to say, for interest, - - - - -	7,041,795 33
And in reimbursement of principal, - - - - -	9,714,358 25
	\$16,756,153 58

This sum exceeds, by only 756,000 dollars, the sixteen millions appropriated by law for those two years; and that difference may be supplied, according to law, from the surplusses of revenue already accrued, which are sufficient for that purpose, and which it will be eligible to apply in that manner, in order that the United States may not continue to pay an interest of eight per cent., any longer than they are compelled to do it by the terms of the loan.

II. The amount of debt redeemed from the 1st of April, 1801, to the 1st January next, has been already stated to be, - - - - - \$24,044,792 74

And the principal which will be reimbursed during the year 1807 and 1808, amounts, by the preceding statement, to - - - - - 9,714,358 25

Making, together, more than thirty-three millions seven hundred and fifty thousand dollars, reimbursed between the 1st of April, 1801, and the 1st January, 1809. } \$33,759,150 99

Which sum consists of the following items, viz:

The whole of the foreign debt, - - - - -	\$10,236,108 05
The whole of the loans formerly obtained from the Bank of the United States, and of the Navy six, five and a half, four and a half, and eight per cent. stocks, - - - - -	12,537,600 00
Annual reimbursements of the six per cent. and deferred stocks, - - - - -	10,631,575 67
Payments on various species of stock, for public lands, stock purchased, and unfunded debt reimbursed, - - - - -	353,867 27
	\$33,759,150 99

III. The debt remaining unpaid on the 1st day of January, 1809, will consist of the following species:

Unredeemed amount of old six per cent. and deferred stocks, reimbursable only at the rate of eight per cent. a year (for principal and interest) on the nominal amount,	\$27,142,357 21
Three per cent. stock,	19,019,481 56
1796 six per cent. stock, redeemable in 1819,	80,000 00
Louisiana stock, reimbursable in four annual instalments, in the years 1818, 1819, 1820, and 1821,	11,250,000 00
Amounting, altogether, to near fifty-seven millions and five hundred thousand dollars, -	\$57,491,838 77

The Louisiana stock cannot be reimbursed before the period fixed by the contract. The gradual operation of the annual reimbursement will extinguish the old six per cent. in the year 1818, and the deferred stock in 1824; after which year the only remaining incumbrance will be the interest on the three per cent. stock, which, in its present shape, may be considered as irredeemable. Purchases cannot be relied upon, as the application of even an inconsiderable sum would raise the stocks above the prices limited by law. It follows, that all the species of debt on which the entire annual appropriation of 8,000,000 dollars could operate, will have been reimbursed prior to the year 1809; that the remaining debt cannot, without some modifications, assented to by the public creditors, be more rapidly or completely discharged than is here stated; and that the annual payments on that account, will, after the year 1808, and prior to the year 1818, be reduced to the interest and annual reimbursement, amounting to near 4,600,000 dollars, as will more fully appear by the annexed table, marked G.

IV. The revenue derived from customs during the year 1802, which was a year of European peace, was much less in proportion than that of any of the immediately preceding or following years, and yet exceeded ten millions of dollars. As it has been ascertained that the population of the United States increases at the rate of thirty-five per cent. in ten years, the revenue derived from customs for the year 1812, may be estimated at thirteen millions five hundred thousand dollars: to which, adding only five hundred thousand dollars, for the annual proceeds of the sales of public lands, will give fourteen millions of dollars for the total revenue of that year, or for the average revenue of the years 1809—1815. And this must be considered as a very moderate computation, since it does not include the revenue derived from New Orleans; is predicated on the supposition that the wealth of the United States increases in no greater ratio than their population; and does not exceed the sum, which, exclusively of the Mediterranean fund, was received last year into the treasury.

The annual payments on account of the public debt will, during the same period, amount, as has already been stated, to 4,600,000 dollars. All the other expenses of the United States, whether domestic or foreign, of a civil nature, or for the support of the existing military and naval establishments, do not, at present, exceed 3,500,000 dollars. The total annual expenditure, allowing four hundred thousand dollars a year for contingencies, may, therefore, be estimated, after the year 1808, at eight millions and a half; which, deducted from a revenue of fourteen millions, will leave a nett annual surplus of five millions and a half of dollars.

The question now recurs, whether a portion of that surplus would not be most advantageously employed in hastening the reduction of the debt? Whether some mode may not be devised, to provide, within a short period, for its final and complete reimbursement, and, thereby, release the public revenue from every incumbrance? This can only be effected by a modification of the debt, assented to by the public creditors; and a conversion of the old six per cent. deferred, and three per cent. stocks, on terms mutually beneficial, into a common six per cent. stock, redeemable within a limited time, has appeared the most simple and eligible, if not the only practicable plan, that can be adopted. For its details, a reference is respectfully made to a letter written in January last, to the Chairman of the Committee of Ways and Means, a copy of which, marked F, is annexed. It will only be necessary to state, that, if such a plan should be sanctioned by Congress, and accepted by the creditors, those several species of debt, amounting, on the 1st of January, 1809, to something more than forty-six millions of dollars, would be converted into a six per cent. stock, amounting to less than forty millions of dollars, which the continued annual appropriation of eight millions of dollars would (besides paying the interest on the Louisiana debt) reimburse, within a period of than seven years, or before the end of the year 1815, as will appear by the table marked H.

The total annual expenditure for those seven years, would then, allowing still 3,500,000 dollars for current expenses, and 400,000 dollars for contingencies, amount to something less than twelve millions of dollars; which, deducted from a revenue of fourteen millions of dollars, would still leave, after the year 1808, a clear surplus of more than two millions of dollars, applicable to such new objects of general improvement or national defence, as the Legislature might direct, and existing circumstances require. And, after the year 1815, no other incumbrance would remain on the revenue than the interest and reimbursement of the Louisiana stock, the last payment of which, in the year 1821, would complete the final extinguishment of the public debt.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *December 5, 1806.*

A.

A Statement exhibiting the amount of Duties which accrued on Merchandise, Tonnage, Passports, and Clearances; of Debentures issued on the exportation of Foreign Merchandise; of Payments for Bounties and Allowances, and for expenses of collection, during the years 1804 and 1805.

TREASURY DEPARTMENT, Register's Office, 27th November, 1806.

JOSEPH NOURSE, Register.

E.

At a meeting of the Commissioners of the Sinking Fund, on the 28th day of April, 1806—

Present: JAMES MADISON, *Secretary of State.*
ALBERT GALLATIN, *Secretary of the Treasury.*
JOHN BRECKENRIDGE, *Attorney General.*

The Secretary of the Treasury laid before the Board a report, dated the 26th April, 1806, which was read, and is as follows:

“That the current payments to be made by the commissioners of the sinking fund, during the year 1806, are estimated as followeth, viz:

Reimbursement and interest on the domestic debt,	- - - - -	\$4,585,000
Instalments and interest on the Dutch debt, payable from 1st January, to the 1st June, 1807, and which must, therefore, be remitted in 1806,	- - - - -	1,004,032
One year's interest on the Louisiana stock,	- - - - -	678,375

	Amounting, altogether, to	\$6,267,407
And leaving, in order to complete the annual appropriation of eight millions of dollars, a sum exceeding one million seven hundred and thirty thousand dollars, (exclusively of the interest which may be redeemed by the payment of said sum) to be applied in such manner as the Board shall direct,	- - - - -	1,732,593

\$8,000,000

That the said sum may be applied either to reimbursements or purchases of the public debt.

That the only portions of the debt which may be reimbursed, are:

The Navy six per cent. stock, amounting to	- - - - -	\$711,700
The five and a half per cent. stock, amounting to	- - - - -	1,847,500
And the four and a half per cent. stock, amounting to	- - - - -	176,000

And that it is now submitted, whether, previous to advertising the reimbursement of the five and a half per cent. stock, it might not be advisable to ascertain whether a more advantageous application may be effected by purchases in the manner authorized by law.”

Whereupon, it was *Resolved*,

1. That the sum, which, after making the current payments mentioned in the preceding report, shall remain to complete the annual appropriation of eight millions of dollars, be applied in the following manner, viz: first, to the purchase of the eight per cent., old six per cent., and deferred stocks, at a price not exceeding the rates fixed by law; giving the preference, in the first place, to the eight per cent., and, in the next place, to the deferred stock, provided that the President of the United States shall assent to such application; and, secondly, in case that a sufficient quantity of stock cannot be purchased, to the reimbursement of the navy six per cent. stock, and, at the option of the Secretary of the Treasury, either to the reimbursement of the five and a half per cent. stock, or of so much of the bills drawn on the treasury, by the minister of the United States at Paris, in conformity with the convention between France and the United States, of the 30th of April, 1803, as will be necessary to complete the payment of the said eight millions of dollars.

2. That the Treasurer of the United States be the agent, under the superintendence of the Secretary of the Treasury, for making the said purchases; that the said purchases be made by receiving sealed proposals for any sums which may be offered; and that the said agent forthwith advertise to receive such proposals, until the 13th day of June next, inclusively.

3. That notice of the reimbursement of such stocks as may be reimbursed, be given by the Secretary of the Treasury, prior to the 1st day of July next, and that the date of reimbursement be, at his option, either the 1st day of October, or the 1st day of January next.

JAMES MADISON, *Secretary of State.*
ALBERT GALLATIN, *Secretary of the Treasury.*
JOHN BRECKENRIDGE, *Attorney General U. S.*

Attest,

EDWARD JONES, *Secretary to the Commissioners of the Sinking Fund.*

F.

TREASURY DEPARTMENT, *January 20th, 1806.*

SIR:

I had the honor, in my letter of the 28th ultimo, to suggest that a conversion of the old six per cent. deferred, and three per cent. stocks, into a new six per cent. stock, would promote the intention of the Legislature to extinguish, within a fixed period, the whole debt of the United States. For a better understanding of the subject, a recapitulation of the several species of stock, which, on the first day of this year, constituted the public debt, is necessary. The first class embraces the several species of debt, reimbursable on or before the 1st day of January, 1809, viz:

I. *Dutch Debt.*

The amount of principal remaining unpaid on the 31st of December, 1805,	Guilders, 5,500,000
Of which there had been remitted, previous to that day, in addition to the interest of the year 1806, a sum more than sufficient to discharge all the instalments payable in the same year, and amounting to,	2,000,000

Leaving for the balance of principal unprovided for,	3,500,000 = \$1,400,000
Nine hundred and twenty thousand dollars of that sum fall due in the year 1807, and the residue is payable in two equal instalments, of 240,000 dollars each, on the 1st days of February, 1808 and 1809. The whole amount, therefore, will have been paid by the treasury, before the end of the year 1808.	

II. *Eight per cent. stock, irredeemable till after the year 1808.*

The original amount of that stock was	\$6,480,400
Of which had been paid, in payment for public lands, prior to the 1st of January, 1806,	50,900
Leaving the amount unredeemed,	6,429,500
Partial purchases may, perhaps, be effected within the limitations prescribed by Congress, during this and the two ensuing years; and, at all events, the whole will be reimbursed on the 1st day of January, 1809.	

III. *Debts reimbursable at the pleasure of the United States, viz:*

Navy six per cent. stock,	711,700
Five and a half do.	1,847,500
Four and a half do.	176,000
	<u>2,735,200</u>
	0,564,700

Which will also be reimbursed before the year 1809, unless the price of stocks should render it more advantageous to purchase some other species of debt.

The second class consists of debts payable at more distant periods, which it does not appear practicable to anticipate, viz:

I. 1796 six per cent. stock, redeemable in 1819,	-	-	-	-	-	-	80,000	
II. Louisiana stock, redeemable in four annual instalments, the first of which is payable in 1818,	-	-	-	-	-	-	11,250,000	11,330,000

The old six per cent. deferred, and three per cent. stocks constitute the last class, and amount to the following sums:

The nominal amount of six per cent. is	-	-	-	-	-	-	28,180,000	
Of deferred do.	-	-	-	-	-	-	13,660,000	
							<u>41,840,000</u>	

Of which has been redeemed, by the annual reimbursement of eight per cent. on account of principal and interest, (omitting fractions) viz:

On the six per cent. stock, at the rate of 30.16 per 100 dollars,	-	-	8,500,000	
On the deferred stock, at the rate of 11.30 per 100 dollars,	-	-	1,540,000	
			<u>10,040,000</u>	

Leaving the unredeemed amount on 1st January, 1806, (in round numbers)	-	-	31,800,000	
The nominal amount of three per cent. (in round numbers also)	-	-	19,050,000	
			<u>50,850,000</u>	

Total amount of the public debt, - - - - - \$72,744,700

Although the old six per cent. and deferred stocks are still considered as a six per cent. stock, they are both, in fact, an annuity of eight per cent. on the original nominal amount, which, extinguishing the principal by degrees, will cease for the old six per cent. in the year 1818, and for the deferred in 1824. A certificate of six per cent. stock, of one hundred dollars nominal, was considered, on the 1st January, 1806, as equal to sixty-nine dollars and ninety-four cents, real six per cent. stock, because thirty dollars and sixteen cents of the principal had been discharged by the annual reimbursement of eight per cent., instead of which, it was, properly speaking, an annuity of eight dollars for twelve years and something less than nine months. And in the same manner, a certificate of deferred stock, of one hundred dollars nominal, was considered as equal to eighty-eight dollars and seventy cents, real six per cent. stock, instead of which, it was, strictly speaking, an annuity of eight dollars for eighteen years and something less than nine months.

The proposition now submitted to the Committee of Ways and Means is, that, in exchange for the present six per cent. and deferred, a common six per cent. stock shall be offered to the public creditors, equal in amount to the unredeemed amount of the present stocks, and redeemable at the pleasure of the United States: Provided, however, that no partial payment shall be made on any new certificate or credit, but that Government shall be obliged to reimburse, at a single payment, the whole amount of each such new certificate or credit, and to give previous reasonable notice of such intended reimbursement. Although peculiar circumstances may prevent a general acceptance of that proposal, the exchange would certainly be advantageous to the creditors. Because, 1st, it is difficult to calculate, and inconvenient to reinvest, four times in each year, the portion of principal reimbursed, which makes part of the quarterly dividend; and every stockholder who does not fully thus reinvest, insensibly consumes his capital. 2dly, an annuity for a limited term of years is uniformly sold at market for a price less than its intrinsic or arithmetical worth, as may be exemplified by the market value of every lease, and of every estate, less than the absolute fee. For that reason, the Navy six per cent., which is redeemable at the pleasure of the United States, has always been worth, at market, something more than the old six per cent. and deferred stocks; and these, in England, do not even command a higher price than the American five and a half per cent. stock, which is, also, redeemable at will. 3dly, the time and manner in which the new stock would be reimbursed, would, as far as it is practicable, prevent any great fluctuation in its price, and fix its market value at par.

The exchange would also be advantageous to the public. 1st, Because Government will, thereby, be enabled to reimburse the whole in less than nine years instead of eighteen. And, 2dly, because, supposing that circumstances should render a resort to loans necessary, the terms on which these may be obtained, will, in a considerable degree, depend on the price of the existing stocks. It is, therefore, desirable that that species, the price of which has a tendency to regulate that of all others, should be as valuable as its rate of interest will admit; and it has already been stated, that the present six per cent. and deferred stocks, being an annuity for a number of years, are generally worth less than their intrinsic value. It is believed that that effect was sensibly felt in the operations connected with the purchase of Louisiana.

The advantages of the proposed conversion being reciprocal, no sacrifice should be made by the United States, in order to ensure the assent of the public creditors; those who may refuse it, will continue to receive the eight per cent. annuities, and these will, as has been stated, cease in the years 1812 and 1818. It appears, however, proper that such remaining annuities should be designated by their proper name, instead of carrying on the face of the certificates of stock, the deceptive appearance of a six per cent. stock. The annexed printed table, exhibiting the amount of principal redeemed on the first day of each quarter, shows the difficulty to persons not well versed in those transactions, of calculating the *true nominal* value or unredeemed amount of a stock which is perpetually diminishing, whilst its *apparent nominal* amount still remains the same. It may easily be understood, how it may, in some instances, happen, that the stockholder consumes his principal, whilst he supposes that he is only living on the interest; and how it does sometimes happen, that ignorant purchasers, thinking that the whole apparent nominal amount, as expressed on the face of the certificate, is still due by the United States, are induced to pay for stock more than its real value.

It is, therefore, proposed, that it should be enacted by law, that, in every case, where it shall be necessary to issue new certificates, either in lieu of such as may be lost or destroyed, or by reason of a transfer of the property itself, or from the books of one office to those of another, the new certificate should, on the face thereof, express the true amount of the annuity due, and of the time when it shall cease, instead of stating, as at present, the nominal amount of the stock which was originally due.

A conversion of the three per cent. into the six per cent. stock cannot be so easily effected; nor, indeed, without some apparent sacrifice on the part of the United States.

A three per cent. will always be worth more at market than a six per cent. stock, which produces an equal interest—

1st. Because there is a possibility that its nominal amount may ultimately be reimbursed.

2dly. Because, supposing it to be a perpetual annuity, the principal of which shall never be reimbursed, its market price is regulated, not only by the legal or market rate of interest in America, but by the price of similar foreign stocks, and by the demand for American stocks in foreign countries. More than eleven millions of dollars of the American three per cent. stock are held by persons residing in England, Holland, and other foreign countries. That stock is never worth less than sixty per cent. of its nominal amount, when the old six per cent. stock is at par. It cannot, therefore, be expected, that the holders will assent to any modification which will not secure to them advantages at least equal to those they now possess; and the question to be decided by the committee and by Congress, is, whether that debt shall, henceforth, be considered as a perpetual incumbrance on the nation, or whether such a compensation shall be offered to the creditors, as may induce them to accept a conversion which will secure the ob-

ject heretofore contemplated—the total extinguishment of the American debt. It may not be improper to add, that, even to those who may think the accomplishment of that object either unimportant or impracticable, the taking into consideration such a state of things as may render new loans necessary, the existence of a three per cent. stock is ineligible. To a nation already incumbered with an immense debt, and subject, on account of her relative situation, to peace and war establishments of great magnitude and corresponding expense, the annual sum which it may be necessary to pay, in order to obtain extraordinary resources, becomes the primary consideration; and that species of stock which, in proportion to its rate of interest, is the most valuable at market, will naturally be created. The political and geographical situation of the United States permits at least a hope, that, under every contingency, the reimbursement of the debts which may necessarily be incurred, will, at a subsequent period, be attainable, and that the principal will not be increased for the sake of diminishing the intermediate payments of interest. As the ultimate value which a three per cent. stock may reach at market, has natural limits, and the probability of its reaching that value rests on uncertain contingencies, it is presumable that the assent of the creditors may be obtained on reasonable terms, and no greater sacrifice should certainly be made than the advantages expected from the operation will justify. In appreciating the value of the new six per cent. stock, which the creditors would receive, not only its nominal amount, but also the additional annuity which will be payable till the stock shall be reimbursed, must be taken into consideration. It will, on that account, be eligible to provide that it shall not be redeemable till after all the eight, five and a half, four and a half, and Navy six per cent. stocks, as well as all the stock which may be created in exchange of the old six per cent. and deferred stocks, shall have been reimbursed—a period which, supposing no adverse circumstances to intervene, may be estimated at about eight years. Thus, supposing the three per cent. to be converted into a six per cent. stock, at the rate of sixty per cent. of its nominal amount, the creditor would, at the end of eight years, receive sixty dollars, and, in the meanwhile, an annuity of three dollars and sixty cents, instead of three dollars, which he now receives; both which provisions may be considered as nearly equal to a redemption at the rate of sixty-five dollars. It may be added, that this new stock would be worth more at market than the six per cent. created in exchange of the old six per cent. and deferred, and probably more than par. The Louisiana stock, which is irredeemable for twelve years, is now worth, in England, one hundred and five, whilst the old six per cent. is only at ninety-five per cent. Whatever reasonable rate may be paid for the proposed conversion, the United States will provide, at a fixed price, for the redemption of the debt; and the creditor, besides receiving an intermediate additional interest, will exchange the uncertain contingency of a supposed increase of value for the certainty of a reimbursement, greater than the highest price which the three per cent. stock has ever yet reached. It has already been stated, that more than eleven millions of dollars of the three per cent. stock, are held by persons residing in foreign countries. About fourteen millions of the unredeemed amount of the six per cent. and deferred stocks, are in the same situation. As it will be more difficult to obtain the assent of that class of stock holders, particularly as relates to the three per cent. stock, it might also be agreed that the interest due to them on the new stock, should, like that on the Louisiana stock, be paid in Europe—a provision which, without costing much to the United States, will be a strong inducement in favor of the proposed modifications. Nor would it be impracticable to provide for an exchange of certificates in Europe, which would remove the objection arising from the delays and dangers incident to a double transmission of papers across the Atlantic. Some subordinate details may be introduced in the law; but these outlines will be sufficient to convey an idea of the plan which appears to be the most simple and cheapest mode of effecting the object contemplated. Still it is less the plan thus respectfully submitted, than the subject itself, which I have been desirous of bringing under the consideration of the committee. Although an ample appropriation has been made for the extinguishment of the whole of the public debt, the nature of the greater part of the stock will, unless some modification shall be obtained, prevent or considerably retard the accomplishment of that object. If no alteration shall take place in the nature of that stock, the Commissioners of the Sinking Fund will, after the year 1809, have no other means of applying near one-half of the annual appropriation, than by making purchases. Annual purchases to the amount of near four millions of dollars, would necessarily raise the old six per cent. and deferred stocks above par, and the three per cent. stock to the highest price of which it is susceptible. As a necessary consequence, the commissioners would cease to purchase; and without any real advantage being obtained by the creditors, the United States would continue to be encumbered, for a number of years, with the eight per cent., and in perpetuity with the three per cent. annuities. Years, perhaps the most favorable for the extinguishment of the debt, would elapse, and periods might follow when the pressure of the annual payments would be sensibly felt. To improve the present time, appears the most provident course; will, it is believed, conform with the public opinion; and is most consistent with the former acts of the Legislature.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HON. JOHN RANDOLPH, *Chairman of the Committee of Ways and Means.*

STATEMENT F—Continued.

Table showing the amount of principal (on the calculation of one hundred dollars) redeemed at certain quarterly periods, until its final extinction, by the United States, of their stock bearing an interest of six per cent. per annum, arising from the payment of dividends of eight per centum per annum, under the provisions of sundry acts of Congress.

PUBLIC DEPOSITES IN BANKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 23, 1806.

The Secretary of the Treasury, in obedience to the resolution of the House of Representatives of the 8th instant, respectfully reports:

That the receipts into the treasury have amounted, during the year ending on 30th day of September, 1804, to	\$11,574,211 04
During the year ending on the 30th day of September, 1805, to	13,611,753 96
And during the year ending on the 30th day of September, 1806, to	14,975,800 53
	<u>\$40,161,765 53</u>

That, of the above mentioned sums, the following sums, consisting of drafts in favor of individuals, on collectors, and others, and of advances made by them, have not passed through the medium of banks, viz:

During the year ending on 30th of Sept. 1804,					\$655,244 58	
Do do do 1805,					508,877 76	
Do do do 1806,					468,034 47	
						1,632,156 81
That all other moneys paid into the treasury during the above mentioned three years, were paid and deposited, by the collectors and other persons, into the following banks, viz:						
In the Bank of the United States, at Philadelphia, and its several offices of discount and deposite, at Boston, New York, Baltimore, Washington, Norfolk, Charleston, Savannah, and New Orleans:						
During the year ending 30th September, 1804,					10,391,315 50	
Do do do 1805,					12,203,875 99	
Do do do 1806,					13,600,688 12	
						36,195,879 61
In the Bank of New Hampshire, during the year ending 30th September, 1804,						
Do Hartford,	do	do	do	do		1,465 81
Do Albany,	do	do	do	do		107 10

Do do do 1806,	-	-	-	-	53,374 75	
					114,050 00	170,338 41
Amounting, altogether, to						\$40,161,765 53

That the moneys thus deposited have been drawn from time to time, in order to discharge the public expenditures, and have, also, sometimes been transferred, as the public service required, from one part of the Union to another, and from one bank to another; so that the balances, actually deposited in the several banks, have fluctuated from week to week, and from day to day; a circumstance which renders it impracticable, without great delay, to give a precise statement, from which to deduce the average balances; or permanent deposits in each bank.

That the annexed table exhibits the balances which were actually deposited in each bank on the last days of every quarter of the three years aforesaid, being the days on which the treasurer's accounts are periodically settled by the accounting officers of the treasury; but that the largest regular payments being made by the treasury towards the end of each quarter, it follows, that the balances, particularly in the Bank of the United States and its branches, have generally been greater than is there exhibited.

And that, taking that table as the basis, on which to form an estimate, it appears that the average balances in the several banks in which public moneys are now deposited, which balances may be considered as the permanent public deposits in such banks, have, for each of the three years aforesaid, amounted to the following sums, that is to say:

In the Bank of the United States and its several branches, as above mentioned:						
During the year ending 30th September, 1804,						\$4,217,899 82
Do do do 1805,						3,509,526 46
Do do do 1806,						3,821,428 28
In the Pennsylvania Bank, and its branch at Pittsburg, during the year ending 30th Sept. 1804,						
Do do do 1805,	do	do	do	do	\$157,847 82	
Do do do 1806,	do	do	do	do	348,295 53	
					315,858 39	
In the Roger Williams Bank, during the year ending 30th Sept. 1804,						
Do do do 1805,	do	do	do	do	\$62,000 00	
Do do do 1806,	do	do	do	do	84,884 56	
					47,460 43	
In the Newport Bank, during the year ending 30th Sept. 1804,						
Do do do 1805,	do	do	do	do	\$23,572 08

9th CONGRESS.]No. 257.[2d SESSION.]

DIRECT TAX.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 31, 1806.

The Secretary of the Treasury, in obedience to the resolution of the House of Representatives of the 18th instant, respectfully reports:

That the annexed statement of the situation of the direct tax shews the quotas assigned to each State, the sums actually received into the treasury, and the respective amounts paid for expenses and losses, or of outstanding tax, so far as the same has been ascertained.

That 1,664,066 dollars and 33 cents had been paid into the treasury, prior to the 30th day of September last.

That the expenses of collection, so far as accounts have been rendered, amount to about 120,000 dollars, and that, estimating the expenses incurred in the States of Pennsylvania, South Carolina, Georgia, and Kentucky, which are not yet ascertained, at 40,000 dollars, there is still a nominal outstanding balance of near 176,000 dollars; which balance is liable to considerable deductions, partly on account of the delinquencies of some of the officers employed in the collection, but principally because they have been unable to sell a number of lots or tracts of land which had been returned in the assessment and cannot be found.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, *29th December*, 1806.

Statement of the situation of the Direct Tax, and the arrears due upon it, December 20th, 1806.

STATES.	Quota per act of July 14, 1798.	Cash paid into the treasury to 30th Sept. 1806.	BALANCE, ESTIMATED TO CONSIST OF			
			(a) Amount paid for expenses of collection, losses, &c.	Tax outstanding.	Total.	
New Hampshire, -	\$77,705 36	\$71,967 71	\$5,737 65	- -	\$5,737 65	Massachusetts. Of the balance due from Massachusetts, \$8,431 25 is the amount assessed on ten districts in Maine, for which no collectors could be obtained. The business in relation to those districts has been transferred to Joshua Wingate, jun. collector of Bath, who is now engaged in effecting the collection. The whole of the remaining sum is absorbed by expenses, and by a balance due the supervisor, on his internal revenue account.
Massachusetts, -	260,435 31	233,000 00	19,004 06	8,431 25	27,435 31	
Rhode Island, -	37,502 08	31,423 21	2,376 04	3,702 83	6,078 87	Pennsylvania. About one-half of the balance which appears due, has been paid in expenses. The remainder is uncollected, or remains in the collector's hands. The accounts do not afford an exact statement of the business. Suits have been instituted for the recovery of a part, and measures taken for the recovery of the remainder of what is outstanding.
Connecticut, -	129,767 00	120,762 14	9,004 86	- -	9,004 86	
Vermont, -	46,864 19	35,262 27	5,053 31	6,548 61	11,601 92	
New York, -	181,680 71	(b) 163,703 60	11,145 81	6,831 30	17,977 11	
New Jersey, -	98,387 25	91,272 02	7,115 23	- -	7,115 23	
Pennsylvania, -	237,177 73	204,740 36	- -	- -	32,437 37	
Delaware, -	30,430 79	28,442 37	1,988 42	- -	1,988 42	Maryland. Of the tax outstanding, \$3,000 have been paid into the treasury since the 30th Sept. last.
Maryland, -	152,599 95	131,000 00	9,302 37	12,297 62	21,599 95	
Virginia, -	345,488 67	313,433 79	30,961 82	1,093 06	32,054 88	South Carolina. Four thousand dollars have been paid into the treasury since the 30th September last, and there are \$7,523 57 in the hands of the supervisor. The residue is outstanding, but subject to the payment of the expenses of collection.
North Carolina, -	193,697 96	165,933 87	16,986 13	10,777 96	27,764 09	
South Carolina, -	112,997 74	35,782 54	- -	- -	77,215 20	
Georgia, -	38,814 88	9,020 00	- -	- -	29,794 88	Georgia. No accounts have been rendered by the late supervisor, Mr. Matthews. The business has been lately transferred to James Alger, commissioner of loans, who has not as yet rendered any accounts relating to this object. The whole of this apparent balance is either uncollected, or in the hands of collectors, but is subject to the expenses of collection.
Kentucky, -	37,644 00	(b) 12,471 70	- -	- -	25,172 30	Kentucky. The greatest part of this large balance is uncollected, owing, in some cases, as is stated, to errors in the assessments, by which the lands returned cannot be found; and in other cases, to a want of purchasers at the sales. Sundry collectors have proved delinquent, and have been committed to prison under the proper process, but without obtaining the money. The expenses of collection are chargeable on this outstanding balance. They will probably amount to 4 or 5,000 dollars.
Tennessee, -	18,806 38	(b) 15,850 75	2,521 63	434 00	2,955 63	
	\$2,000,000 00	\$1,664,066 33			\$335,933 67	

(a.) The sums inserted in this column, as the amount of expenses, losses, &c. is on estimate. None of the accounts of the direct tax, except those of the supervisor of Delaware, have been finally settled and closed. Some of the other supervisors have rendered their accounts, which are suspended for various causes. And in the rest of the districts, the collection has not been so far completed as to enable the supervisors to render their final accounts. From these causes, the sums here inserted for expenses will vary from the amount as finally settled; but the difference in most cases will not be considerable.

(b.) The sums here stated as the amount of payments in the States of New York, Kentucky, and Tennessee, are the sums actually paid by the supervisors. The treasury books, in each case, exhibit a different sum, owing to the payments of the supervisors, from the want of a proper specification, at the time, having been applied at the treasury to a different account than that intended by the supervisors.

9th CONGRESS.]

No. 258.

[2d SESSION.

SALT TAX AND THE MEDITERRANEAN FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 7, 1807.

COMMITTEE ROOM, December 12, 1806.

SIR:

The Committee of Ways and Means, to whom has been referred that part of the message of the President of the United States, of the 2d instant, which suggests the expediency of abolishing the duties on salt, and of continuing, for a limited time, those duties, the proceeds of which constitute the Mediterranean fund, have instructed me to request that you will furnish them with such information, in possession of the Treasury Department, as you may deem connected with the subject.

I am, sir, with very high respect, yours,

JOHN RANDOLPH.

The Secretary of the Treasury.

TREASURY DEPARTMENT, December 18, 1806.

SIR:

I had the honor to receive your letter of the 12th instant, requesting such information as I might deem connected with the proposition for abolishing the duty on salt, and for continuing, for a limited time, the duties which constitute the Mediterranean fund.

An examination of the report made on the 5th instant, in obedience to the provisions of the act, supplementary to the act to establish the Treasury Department, will show, that, if no other expenses whatever shall be incurred, but such as are already actually authorized by law, neither the salt tax, nor the Mediterranean fund, are, any longer, wanted. The propriety of continuing the last mentioned fund for a limited time, must be decided by considerations connected with the political situation of the United States: for it is only to provide for the speedy payment of any contemplated acquisition of territory, without creating a new debt, or in case of war, that the fund can be wanted. Under existing circumstances, I should think it consistent with prudence to continue it for one year longer.

As to the duty on salt, the only additional information which appears connected with the subject, is what relates to the allowance heretofore made to vessels employed in the cod fishery: for this, perhaps, exceeds the duties paid on the importation of the salt employed in curing the fish.

The allowance has amounted—

For the year 1803, to	-	-	-	-	-	-	-	-	-	-	-	\$117,174
For the year 1804, to	-	-	-	-	-	-	-	-	-	-	-	145,987
For the year 1805, to	-	-	-	-	-	-	-	-	-	-	-	152,928

Quintals.

The quantity of dried American fish exported during the year ending on the 30th September, 1803, to	-	-	-	-	-	-	-	-	-	-	-	461,870
For the year ending on 30th September, 1804, to	-	-	-	-	-	-	-	-	-	-	-	567,825
And for the year ending 30th September, 1805, to	-	-	-	-	-	-	-	-	-	-	-	514,549

But the quantity of fish of that description, consumed within the United States, is not known.

The bounty paid on the exportation of pickled fish, pork, and beef, is said to be no more than the duty on the salt used in curing the same.

Should there be any points on which further elucidations are wanted, and the committee will be pleased to designate what they are, their directions will be immediately attended to.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HON. JOHN RANDOLPH, *Chairman of the Committee of Ways and Means.*

TREASURY DEPARTMENT, January 3, 1807.

SIR:

I have the honor to enclose a statement of the quantity of salt imported into the several ports of the United States, and exported therefrom to foreign countries, during the year ending on the 30th day of September, 1805.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HON. JOHN RANDOLPH, *Chairman of the Committee of Ways and Means.*

[2d SESSION.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 8, 1807.

SIR:

TREASURY DEPARTMENT, *January 6, 1807.*

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1803, 1804, and 1805.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

A Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, in the years 1803, 1804, and 1805, compared with the amount of Duties collected on the same, respectively.

9th CONGRESS.]

No. 260.

[2d SESSION.]

DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 21, 1807.

Mr. EARLY, from the Committee of Commerce and Manufactures, to whom was referred the petition of Gideon Lamson, made the following report:

The ship Doris, of which the petitioner was owner, received on board, at Philadelphia, in the month of June last, a quantity of sugar and coffee, intended to be shipped to Antwerp, for the benefit of drawback. Before the whole of the intended cargo had been put on board, it was discovered that the vessel had made considerable water, and the sugar and coffee she had received were relanded. The sugar was damaged seventy-five per cent., and by the exporter, was thrown upon the hands of the owner of the ship. It does not appear that the misfortune arose from any want of care or attention. On the contrary, the vessel had, immediately before she began to receive her load, been examined by a person of competent skill, and pronounced free from defect.

The memorialist prays, upon these facts, that the debenture on the sugar may be allowed him, or that such other relief may be afforded, as Congress may consider just and proper.

The committee know of no principle heretofore recognized by Congress, which would authorize a compliance with this application. To allow the debenture when the sugar has not been exported from the United States, would be, in the highest degree, preposterous. To afford relief, *in any way*, would be to make the Government of the United States insurers against individual losses. The committee, therefore, submit the following resolution:

Resolved, That the prayer of the petition of Gideon Lamson ought not to be granted.

[2d SESSION.]

MINT.

COMMUNICATED TO THE SENATE, JANUARY 29, 1807.

To the Senate and House of Representatives of the United States:

I communicate, for the information of Congress, the report of the Director of the Mint, of the operations of that establishment during the last year.

TH: JEFFERSON.

January 27, 1807.

MINT OF THE UNITED STATES, *January 1st*, 1807.

SIR:

At the commencement of the present year, I have the honor of laying before you, a report of the operations of the mint during the last year.

From the treasurer's annual statement it will appear that, during this period, there have been struck at the mint, gold coins to the amount of three hundred and twenty-four thousand five hundred and five dollars, and silver coins to the amount of four hundred and seventy-one thousand three hundred and nineteen dollars; making the total amount seven hundred and ninety-five thousand eight hundred and twenty-four dollars, and the number of pieces one million one hundred and eleven thousand four hundred and nine.

By comparing this year's coinage of the precious metals with that of the ten preceding years, the time that the mint had been in full operation, it will appear that, though the expense has been comparatively moderate, yet the amount struck is nearly *double* the average annual amount during that period, and the number of pieces, (the most accurate measure of the quantity of labor) considerably more than *quadruple*.

This favorable circumstance may, in a great measure, be ascribed to the regular supply of bullion, furnished chiefly by the Bank of the United States and the Bank of Pennsylvania. Nor is there any doubt of a like supply during the current year.

It will be observed that but little has been done in the coinage of copper during the last year. This was owing to the cent press requiring a new screw and other repairs, which it was not easy to procure, and besides, it was but seldom that a hand could be spared, for this purpose, from the more urgent business of the mint.

Arrangements are, however, now made for carrying on this coinage during the present year, which, it is hoped, will fully supply all current demands for this species of coin.

I have the honor to be, with sentiments of the most perfect esteem, your obedient servant,

R. PATTERSON.

THOMAS JEFFERSON, *President of the United States.*

A Statement of the Coins struck at the Mint of the United States, from the 1st January to the 31st December, 1806, inclusive, viz:

[2d SESSION.]

INDEMNITY TO COLLECTORS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 4, 1807.

TREASURY DEPARTMENT, *January 22, 1807.*

SIR:

I have the honor to transmit copies of the vouchers sent by Mr. Gelston to the Comptroller's office, and establishing the facts stated in his petition that he had paid \$9,974 62, recovered from him in two suits instituted against him for damages arising from a seizure made by him, as collector, of two vessels which were presumed to be owned by foreigners, though sailing under American registers. Although the proofs were not sufficient to obtain a condemnation of the vessels, the circumstances were such as did justify the attempt. But the accounting officers had no authority to allow to the collector the amount of damages recovered; and the hardship of the case consists particularly in that, in case of condemnation, the United States would have received one half of the nett proceeds of the forfeiture, and the collector one sixth part of the same; whilst, in case of acquittal and subsequent damages, the whole falls on the collector who has made the seizure.

Whatever may be the determination of Congress in this case, it appears proper that some general provision may be adopted, which, without injuring the citizens, may protect the collectors, and ultimately the United States, against actions of this kind, when the seizure shall appear to have been made on reasonable grounds.

It is provided by the 89th section of the act to regulate the collection of duties on imports and tonnage, that, "when any prosecution shall be commenced on account of the seizure of any ship or vessel, goods, wares, or merchandise, and judgment shall be given for the claimant or claimants, if it shall appear to the court before whom such prosecution shall be tried, that there was a reasonable cause of seizure, the said court shall cause a proper certificate or entry to be made thereof, and, in such case, the claimant or claimants shall not be entitled to costs, nor shall the person who made the seizure, or the prosecutor, be liable to action, suit, or judgment, on account of such seizure and prosecution." But this provision extends only to revenue cases arising under the act, and applies neither to the registering act, nor to the acts prohibiting the slave trade, nor to the acts prohibiting the intercourse with St. Domingo, or the importation of certain goods from the dominions of Great Britain. It necessarily results that the execution of those laws is not enforced as it ought to be; and that, principally since the damages recovered in the case now under consideration have been known, collectors cannot be expected to make seizures at the risk, perhaps, of the whole amount of their property, even in cases where circumstances are extremely suspicious, and it is expected that a legal investigation will lead to a full discovery. The same will happen in cases where the law is not perfectly clear, and where a judicial decision is in fact necessary to fix its meaning.

If the provision abovementioned be proper in revenue cases, it cannot be improper in the cases arising under the registering act, or under any other law which authorizes a seizure. If the collector dares to seize without reasonable cause, the court will refuse a certificate, and the party will recover damages, which, in such case, Congress never can be called upon to refund. But, unless the provision be thus extended, either the collectors must be assured that Congress will always indemnify them, or the laws will remain in a great degree unexecuted, and those provisions, particularly, which were intended to protect the American flag, be materially impaired.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Honorable PETER EARLY, *Chairman of the Committee of Commerce and Manufactures.*

9th CONGRESS.]

No. 263.

[2d SESSION.]

COLLECTION DISTRICTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 4, 1807.

Mr. EARLY, from the Committee on Commerce and Manufactures, to whom were referred the petition of sundry inhabitants of the towns of Stonington and Groton, in the State of Connecticut, and the petition of sundry inhabitants of Pawcatuck, in the State of Rhode Island, made the following report:

The petitioners pray that a new collection district may be formed, to include Stonington and Groton, in the State of Connecticut, and Pawcatuck, in the State of Rhode Island, together with certain shores and waters adjacent; and that Stonington may be made the port of entry thereof.

This is an application which, if granted, will lead to an invasion of a principle in the arrangement of the collection districts of the United States, heretofore so tenaciously adhered to that but a single exception has ever been made to it. The principle is to avoid forming a district out of different States. The exception is in the annexation of the towns of Kittery and Berwick, in the State of Massachusetts, to the district of Portsmouth, in the State of New Hampshire, leaving, however, vessels bound to the former places the option of making their entry at York, the nearest port of entry in the former State. Such an option will be indispensable in every case of the kind, to avoid an infraction of that provision in the constitution, which declares that vessels bound to or from one State, shall not be obliged to enter, clear, or pay duties in another; and the necessity for such an option it is, that raises, in the opinion of the committee, an insuperable objection to the present application, as being embarrassing to the officers and hazardous to the security of the revenue.

The committee have not been able to discover the reasons which dictated the arrangement in the solitary case above mentioned, but they cannot consider it otherwise than a dangerous precedent. They submit the following resolution:

Resolved, That the prayer of the memorialists ought not to be granted.

9th CONGRESS.]

No. 264.

[2d SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 5, 1807.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their report of the 5th of February, 1806, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the fourth day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

GEO. CLINTON, *President of the Senate.*
 J. MARSHALL, *Chief Justice of the United States.*
 JAMES MADISON, *Secretary of State.*
 ALBERT GALLATIN, *Secretary of the Treasury.*
 C. A. RODNEY, *Attorney General.*

WASHINGTON, February 5, 1807.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That the balance remaining unexpended at the close of the year 1804, and applicable to payments falling due after that year, which balance, as appears by the statement B, annexed to the last annual report, amounted to two millions three hundred and sixteen thousand nine hundred and seventy-five dollars and fourteen cents,	\$2,316,975 14
Together with the disbursements made during the year 1805, out of the treasury, on account of the principal and interest of the public debt, which disbursements, as appears by the statement C, annexed to the last annual report, amounted to seven millions three hundred and twenty-eight thousand five hundred and nine dollars and seven cents,	7,328,509 07
And with a further sum, arising from profit on the remittances from America to Europe, purchased in the year 1805, which profit, as appears by the statement D, annexed to the last annual report, amounted to one hundred and seventeen thousand one hundred and thirty-seven dollars and fifty-two cents,	117,137 52
And amounting, altogether, to nine millions seven hundred and sixty-two thousand six hundred and twenty-one dollars and seventy-three cents,	<u>\$9,762,621 73</u>

Have been accounted for in the following manner, viz:

I. There was repaid into the treasury during the year 1805, on account of the principal of protested bills, and of advances made to commissioners of loans, as appears by the statement E, annexed to the last annual report, a sum of sixty-six thousand seven hundred and three dollars and two cents,	66,703 02
II. The sums actually applied during the same year, to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the treasury department, amount, as will appear by statement A, to eight millions forty eight thousand four hundred and forty-two dollars and eighty-two cents:	
1. Paid in reimbursement of the principal of the debt,	\$3,905,169 25
2. Paid on account of the interest and charges on the same,	4,143,273 57
	<u>8,048,442,82</u>
III. The balance remaining unexpended at the close of the year 1805, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the statement B, to one million six hundred and forty-seven thousand four hundred and seventy-five dollars and eighty-nine cents,	1,647,475 89
	<u>\$9,762,621 73</u>

That, during the year 1806, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt, viz:

I. On account of the reimbursement and interest of the domestic debt,	\$7,136,368 03
II. On account of the domestic unfunded debt,	249 09
III. On account of the principal and interest of the foreign debt, and of the interest on the Louisiana stock,	1,811,389 78
Amounting, altogether, as will appear by the annexed list of warrants C, to eight millions nine hundred and forty-eight thousand and six dollars and ninety cents,	<u>\$8,948,006 90</u>

Which disbursements were made out of the following funds, viz:

I. From the funds constituting the annual appropriation of eight millions of dollars, for the year 1806, viz:	
From the fund arising from interest on the debt transferred to the commissioners of the sinking fund, as per account I,	\$864,964 02
From the funds arising from the sale of public lands, being the amount of moneys paid into the treasury from the 1st July, 1805, to 30th September, 1806, as per account K,	699,385 37
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels,	6,367,934 59
Amounting, altogether, to	<u>7,932,283 98</u>
Which sum of	7,932,283 98
Together with the sum advanced during the year 1805, on account of the appropriation for the year 1806, and amounting, as appears by the last annual report, to	67,716 02
Makes, in the whole, the annual appropriation for the year 1806, of	<u>\$8,000,000 00</u>
II. From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels, advanced in part, and on account of the annual appropriation for the year 1807,	1,003,790 70
III. From repayments in the treasury, on account of remittances purchased for providing for the foreign debt, and of advances made to commissioners of loans, as will appear by the statement E, viz:	
Repayment of the purchase money and advances	\$6,000 00
Damages and interest recovered,	1,020 00
	<u>7,020 00</u>

IV. From the moneys appropriated by law for paying commissions to agents employed in the purchase of remittances for the foreign debt, being the amount paid at the treasury, during the year 1806, for that object, as will appear by the statement C,	4,912 22
	<u>\$8,948,006 90</u>
That the abovementioned disbursements, together with the above stated balance of - - - - -	1,647,475 89
Which remained unexpended at the close of the year 1805, and with a sum arising from profit on remittances from America to Europe, purchased in the year 1806, and amounting, as will appear by the statement D, to - - - - -	35,697 77
And with a further sum, arising from profit on the purchases of the public debt, made by the commissioners of the sinking fund in the same year, and amounting, as will appear by the statement L, to - - - - -	437 96
	<u>\$10,631,618 52</u>

And amounting, altogether, to ten millions six hundred and thirty-one thousand six hundred and eighteen dollars and fifty-two cents, - - - - -

Will be accounted for in the next annual report, in conformity with the accounts which shall then have been rendered to the Treasury Department.

That, in the mean while, the manner in which the said sum has been applied, is estimated as followeth:

I. The repayments into the treasury, on account of principal, have, during the year 1806, amounted, as by the abovementioned statement E, to - - - - -	6,000 00
II. The sums actually applied, during the year 1806, to the payment of the principal and interest of the public debt, are estimated as followeth:	
1. Paid in reimbursement of the principal of the public debt, - - - - -	4,828,899 17
2. Ditto, on account of interest and charges on the same, - - - - -	3,910,791 43
	<u>8,739,690 60</u>

As will appear by the estimate F.

III. The balance remaining unexpended at the close of the year 1806, and applicable to payments falling due after that year, is estimated, as per estimate G, at - - - - -	1,885,927 92
	<u>\$10,631,618 52</u>

That, in conformity with the proceedings and resolutions of the commissioners of the sinking fund, of the 28th of April, 1806, a copy whereof, M, is annexed, and public notice having been given that proposals would be received by the Treasurer of the United States for the purchase of the public debt, \$17,517 61 unredeemed amount of old six per cent. and deferred stocks, were purchased at 97½ per cent. as will appear by the statement L; the other offers, which amounted only to \$91,956 nominal value, having been made at prices above the then market price of stocks, and accordingly rejected. And that the statement H exhibits the amount of stock transferred to the commissioners of the sinking fund, in trust for the United States, to the 31st of December, 1806, including the sum of \$112,950 56, being the aggregate of the several species of stock transferred in the year 1806, in payment for public lands.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *February 4, 1807.*

A.

Statement of the application, during the year 1805, of the funds provided for the payment of principal and interest of the public debt.

I. *Payments on account of the principal of the public debt.*

1. Of the domestic debt, viz:	
Reimbursement of old six per cent. stock, - - - - -	\$1,022,329 40
Do. deferred stock, - - - - -	346,778 14
	<u>1,369,107 54</u>
2. Domestic loans reimbursed, - - - - -	700,000 00
3. Debts due to foreign officers, including arrearages of interest, - - - - -	7,947 94
Unfunded registered debt, reimbursed, - - - - -	113 77
	<u>8,061 71</u>
4. Of the foreign debt, viz:	
	<i>Guilders.</i>
3d instalment of loan of \$3,000,000 of 1st January, 1792,	600,000
1st do. do. 3,000,000 of 1st January, 1794,	600,000
5th do. do. 2,000,000 of 1st February, 1784,	250,000
Last do. do. 2,500,000 of 1st March, 1791,	500,000
3d. do. do. 2,950,000 of 1st June, 1792,	600,000
Last do. do. 6,000,000 1st September, 1791,	1,200,000
4th and 5th do. 2,050,000 1st Dec. 1791, (Antwerp)	820,000
	<u>4,570,000, at 40 cents, \$1,828,000 00</u>
	3,905,169 25

II. *Payments on account of the interest and charges on the public debt.*

1. On the domestic debt.	
Interest for the year 1805, on the several species of the domestic funded debt, as settled at the treasury, - - - - -	(a) \$3,224,059 80
2. Interest on Louisiana stock domesticated, - - - - -	150 00
3. Interest on domestic loans, - - - - -	56,170 12
4. On the foreign debt, viz:	
	<i>Guilders.</i>
Interest paid at Amsterdam, - - - - -	387,000 00
Do. at Antwerp, - - - - -	36,900 00
	<u>423,900 00</u>
	at 40 cents, \$169,560 00
Premiums on loan of 1st February, 1784, 20,000 guilders, do.	8,000 00
Interest on Louisiana stock, from 1st July, 1804 to 1st July, 1805,	675,000 00

Commissions and charges, viz:

	<i>Guilders.</i>			
At Amsterdam, including Louisiana stock,	8,695 11 8			
At Antwerp, (b)	4,300 00 0			
	12,995 11 8			
At London, on Louisiana stock, £421 17 6	at 40 cents,	\$5,198 23		
		1,875 00		
			7,073 23	
Commission on purchase of bills in America,			3,260,42	
				\$862,893 65
				4,143,273 57
				\$8,048,442 82

NOTES TO STATEMENT A.

(a) The interest on the several species of domestic debt, for the year 1805, as settled at the treasury, amounted to	\$3,324,061 73
From which has been deducted the result of sundry small errors, occasioned by miscalculations of dividends at the treasury and loan offices,	2 93
Making the sum given in the statement,	\$3,224,059 80

(b) The death of Mr. De Wolf, the commissioner at Antwerp, charged with the payment of the interest and principal of the loan obtained at that place, has prevented the rendering of his final accounts. The precise amount of the charges, on the payments made in 1805, cannot, therefore, be stated. The sum here given is an estimate, but cannot be far out of the way.

TREASURY DEPARTMENT, *Register's Office, February 4th, 1807.*

JOSEPH NOURSE, *Register.*

B.

Statement of the provision made, before the 1st day of January, 1806, for the payment of the principal and interest of the Public Debt falling due after the year 1805.

I. *On account of the Foreign Debt.*

1. Cash in the hands of commissioners and agents in Europe, viz:				
In Amsterdam, on 31st December, 1805, per treasury report, No. 18,410,	<i>Guilders,</i>	2,397,174 18 3		
From which deduct a balance due the commissioner in Antwerp,		767 1 6		
		2,396,407 16 13		
		At 40 cents,	\$958,563 14	
In London, per account rendered, of December 31st, 1805,	£42,664 1 1			
	At 4s. 6d.		189,618 01	
			\$1,148,181 15	
2. Remittances outstanding, viz:				
Amount paid for at the treasury, and remitted to Amsterdam before the 1st January, 1806, but not received by the commissioners till after that day,	<i>Guilders</i>	700,000		
		At 40 cents,	280,000 00	
Do. do. do. remitted to London, outstanding on 1st January, 1806,	£43,000			
	At 4s. 6d.		191,111 11	
			471,111 11	
3. Amount of payments made at the treasury before the 1st January, 1806, for bills which have been protested for non-payment, and which, on that day, had not been repaid into the treasury, (a)			43,857 00	
			1,663,149 26	

II. *Deduct on account of the Domestic Debt, as follows:*

The demands unsatisfied on the 1st January, 1806, were the following, viz:

1. Dividends payable by commissioners of loans, including the dividend due on that day, and exclusive of unclaimed dividends no longer demandable at their offices,	1,430,976 71
2. Unclaimed dividends payable at the treasury,	7,791 66
	1,438,768 37

The provision made for the above objects was as follows:

1. Cash due from commissioners of loans deceased, and out of office,	\$2,295 66
2. Cash in the hands of acting commissioners of loans,	1,419,701 24
3. Amount over advanced at the treasury for payment of unclaimed dividends,	1,098 10
	1,423,095

Leaving the sum wanted on 1st January, 1806, to meet all the payments on account of the domestic debt,
 15,673 37 |

Total amount of provision for the public debt, remaining unapplied on the 31st December, 1805,
 \$1,647,475 89 |

NOTE TO STATEMENT B.

(a) Statement of protested bills, outstanding December 31st, 1805.

Purchased before 1802,	A Brown's bill,	<i>Guilders</i> , 60,000	\$24,000
Purchased in do.	Brown and Hackman's do.	60,000	24,000
Do. do.	Beale Owings' do.	20,000	8,000

140,000	56,000
---------	--------

A partial payment made on the above bills in 1805, of	-	18,143
---	---	--------

Purchased in 1805, John J. Astor's bill,	<i>Guilders</i> , 15,000	37,857	6,000	Amount repaid in 1806.
--	--------------------------	--------	-------	------------------------

\$43,857

The protested bills, outstanding on 31st December, 1804, per note (c), to statement B, annexed to the annual report dated February 4th, 1806, amounted to	-	-	-	-	\$104,000
The amount protested since that time, is	-	-	-	-	6,000

The repayments in 1805, per statement E, annexed to the report of February 4th, 1806, amounted to	-	-	-	-	110,000
					66,143

And leaves outstanding, as here stated,	-	-	-	-	\$43,857

E.

Statement of repayments made into the Treasury, during the year 1806, on account of the public debt.

Date of warrant.	No. of Warrant.	On whom drawn.	Principal repaid.	Damages &c. recovered.	Amount of Warrant.
1806. June 30.	967.	John Jacob Astor, for amount received for his protested bill, -	\$5,550	\$1,470	\$7,020

NOTE.—The amount of Mr. Astor's bill was fifteen thousand guilders, and was purchased at thirty-seven cents per guilder, making the sum of five thousand five hundred and fifty dollars, as above stated. But, as the difference between this sum and the par value of the bill at forty cents per guilder, has been accounted for in the amount of profit on exchange, in the year 1805, it becomes necessary to consider the principal of the bill repaid, as if it were purchased at par, and it is consequently taken, in the accounts of this year, at six thousand dollars.

TREASURY DEPARTMENT, *Register's Office, 23d January, 1807.*
JOSEPH NOURSE, *Register.*

F.

An estimate of the application made, in the year 1806, of the funds provided for the payment of the principal and interest of the public debt.

I. On account of the principal.

G.

An Estimate of the Funds provided, before the 1st January, 1807, for the payment of the principal and interest of the Public Debt falling due after that day.

I. *On account of the Foreign Debt.*

Cash in the hands of commissioners and agents in Europe, on the 31st December, 1805, per preceding statement B,	-	-	-	-	-	\$1,148,181 15
Remittances to London and Amsterdam outstanding on the 31st December, 1805, per same statement,	-	-	-	-	-	471,111 11
The remittances made during the year 1806, per preceding statement D, are as follow, viz:						
To Amsterdam,	-	-	G. 4,127,660.11, at 40 cents,	-	-	\$1,651,064 22
To London,	-	-	£ 43,000, at 4s. 6d.	-	-	191,111 11
						<u>1,842,175 33</u>
					Total to be accounted for,	3,461,467 59
The amount applied, during the year 1806, per preceding estimate F, is calculated to have been,						
for principal,	-	-	-	-	-	\$800,000 00
Interest and charges,	-	-	-	-	-	785,793 16
						<u>1,585,793 16</u>
The balance in the hands of commissioners and agents in Europe, or in remittances outstanding, may, therefore, be estimated, on 31st December, 1806, to be	-	-	-	-	-	1,875,674 43
The amount of protested bills outstanding on the same day, was as follows, viz:						
Purchased before, and in, 1802,	{	A. Brown's bill,	-	G. 60,000 = \$24,000	} In suit.	
	{	Brown and Hackman's do.	-	60,000 = 24,000		
	{	Beale Owing's do.	-	20,000 = 8,000		
						<u>56,000</u>
Of which there has been received in part,	-	-	-	-	-	18,143
Remains outstanding,	-	-	-	-	-	<u>37,857 00</u>
						<u>1,913,531 43</u>

II. *From which deduct, on account of the Domestic Funded Debt:*

For unclaimed dividends, demandable at the treasury, and not yet advanced to the bank for payment to the creditors, estimated at	-	-	-	-	-	27,603 51
						<u>\$1,885,927 92</u>

RECAPITULATION.

The balance remaining unexpended 31st December, 1805, per preceding statement B, was	-	\$1,647,475 89
Amount advanced from the treasury in the year 1806, per preceding statement C, was	-	8,948,006 90
Profit in exchange, in the year 1806, per preceding statement D,	-	35,697 77
Do. on the purchase of stock by the commissioners of the sinking fund, per annexed statement L,	-	437 96
		<u>\$10,631,618 52</u>
The amount estimated to have been applied to the public debt in 1806, per preceding estimate F, is	\$8,739,690 60	
Repayments into the treasury in 1806, for principal of bills protested, per preceding statement E,	6,000 00	
Provision in advance, applicable to the payments of the year 1807, per above statement G,	1,885,927 92	
	<u>\$10,631,618 52</u>	

H.

A General Statement of the several Stocks transferred to the United States, to December 31st, 1806; the interest on which, by the acts of the 8th of May, 1792, and 3d of March, 1795, is appropriated for the redemption of the public debt.

TREASURY OF THE UNITED STATES, July 9, 1806.

TH. T. TUCKER, Treasurer United States

M.

At a meeting of the Commissioners of the Sinking Fund, on the 28th day of April, 1806:

Present: JAMES MADISON, Secretary of State.
ALBERT GALLATIN, Secretary of the Treasury.
JOHN BRECKENRIDGE, Attorney General.

The Secretary of the Treasury laid before the Board a report, dated the 26th of April, 1806, which was read, and is as follows:

"That the current payments to be made by the Commissioners of the Sinking Fund, during the year 1806, are estimated as followeth, viz:

Reimbursement and interest on the domestic debt,	\$4,585 000
Instalments and interest on the Dutch debt, payable from the 1st Jan. to 1st June, 1807, and which must, therefore, be remitted in 1806,	1,004,032
One year's interest on the Louisiana stock,	678,375

Amounting altogether, to	6,267,407
And leaving, in order to complete the annual appropriation of eight millions of dollars, a sum exceeding one million seven hundred and thirty thousand dollars (exclusively of the interest which may be redeemed by the payment of said sum) to be applied in such manner as the Board shall direct,	1,732,593

\$8,000,000

That the said sum may be applied either to reimbursements or purchases of the public debt.

That the only portions of the debt which may be reimbursed, are—

The Navy six per cent. stock, amounting to	:	:	:	:	\$711,700
The five and a half per cent. stock, amounting to	:	:	:	:	1,847,500
And the four and a half per cent. stock, amounting to	:	:	:	:	176,000

And that it is now submitted whether, previous to advertising the reimbursement of the five and a half per cent. stock, it might not be advisable to ascertain whether a more advantageous application may be effected by purchases, in the manner authorized by law."

Whereupon, it was *Resolved*,

1. That the sum, which, after making the current payments, mentioned in the preceding report, shall remain to complete the annual appropriation of eight millions of dollars, be applied in the following manner, viz:

First, to the purchase of the eight per cent., old six per cent. and deferred stocks, at a price not exceeding the rates fixed by law, giving the preference, in the first place, to the eight per cent. and in the next place, to the deferred stock; provided that the President of the United States shall assent to such application. And, secondly, in case that a sufficient quantity of stock cannot be purchased, to the reimbursement of the Navy six per cent. stock, and, at the option of the Secretary of the Treasury, either to the reimbursement of the five and a half per cent. stock, or of so much of the bills drawn on the treasury, by the minister of the United States at Paris, in conformity with the convention between France and the United States, of the 30th of April, 1803, as will be necessary to complete the payment of the said eight millions of dollars.

2. That the Treasurer of the United States be the agent, under the superintendence of the Secretary of the Treasury, for making the said purchases; that the said purchases be made, by receiving sealed proposals for any sums which may be offered; and that the said agent forthwith advertise to receive such proposals, until the thirteenth day of June next, inclusively.

3d. That the notice of the reimbursement of such stocks as may be reimbursed, be given by the Secretary of the Treasury, prior to the first day of July next; and that the date of reimbursement be at his option, either the first day of October, or the first day of January, next.

JAMES MADISON, *Secretary of State.*
 ALBERT GALLATIN, *Secretary of the Treasury.*
 JOHN BRECKENRIDGE, *Attorney General U. S.*

Attest, EDWARD JONES, *Sec'y to the Commissioners of the Sinking Fund.*

9th CONGRESS.]

No. 265.

[2d SESSION.]

PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 28, 1807.

TREASURY DEPARTMENT, February 27th, 1807.

SIR:

I have the honor to transmit a statement of the public debt, on the 1st days of January, 1801, 1802, 1803, 1804, 1805, 1806, and 1807, respectively, together with sundry explanatory statements and notes, prepared in pursuance of the resolution of the House of Representatives, of the 8th of January last.

It has not been practicable to complete, before the adjournment of Congress, similar statements for the preceding years, but they will be prepared during the recess. Quarterly statements would have been attended with still more considerable labor in investigation, as the accounts for several parts of the public debt are rendered only semi-annually, and they are all settled annually.

It appears, from the statement herewith transmitted, that the whole public debt of the United States, unprovided for on the days abovementioned, amounted to the following sums, respectively, that is to say:

On the 1st day of January, 1801,	-	-	-	-	-	\$81,996,268 49
Do. 1802,	-	-	-	-	-	78,750,669 83
Do. 1803,	-	-	-	-	-	74,728,023 98
Do. 1804,	-	-	-	-	-	85,349,744 35
Do. 1805,	-	-	-	-	-	80,530,159 78
Do. 1806,	-	-	-	-	-	74,539,058 75
Do. 1807,	-	-	-	-	-	67,727,756 76
The total amount of payments of the debt (including lands paid for in stock) have been,						
In 1801,	-	-	-	-	-	2,325,418 55
In 1802,	-	-	-	-	-	3,657,945 95
In 1803,	-	-	-	-	-	5,627,565 42
In 1804,	-	-	-	-	-	4,114,970 38
In 1805,	-	-	-	-	-	6,588,879 84
In 1806,	-	-	-	-	-	6,505,292 19
And the difference between the anticipated provision made on the 1st January, 1807, and that which had been made on the 1st January, 1801, is, as will appear by the statement C,						448,439 40
						29,268,511 73
Which, deducted from the amount of debt on the 1st day of January, 1801,						81,996,268 49
						52,727,756 76
To which adding the debt contracted by the purchase of Louisiana,						15,000,000 00
Leaves the amount of debt, on the 1st of January, 1807, as above stated,						67,727,756 76

The debt has, therefore, during those six years, and notwithstanding the addition made by the purchase of Louisiana, been diminished more than 14,260,000 dollars.

Although the amount stated for the 1st January, 1807, is necessarily on estimate, and not from accounts actually settled at the treasury, it is believed not to differ materially from the precise amount.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

A.

Statement of the Debt of the United States on the 1st of January, in the years 1801, 1802, 1803, 1804, 1805, 1806, and 1807.

9th CONGRESS.]

No. 266.

[2d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 3, 1807.

TREASURY DEPARTMENT, March 3d, 1807.

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint and regulating the coins of the United States," passed on the 2d of April, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, Comptroller's Office, March 3d, 1807.

SIR:

The statements marked A, B, C, and D, which you will receive, herewith, have been prepared pursuant to the seventh section of an act of Congress of the 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." They contain all the information concerning the transactions of the mint, which the settlements made at the treasury enable me to give.

I have the honor to be, with great respect, sir, your obedient servant,

G. DUVALL.

ALBERT GALLATIN, Esq. Secretary of the Treasury.

A.

Statement exhibiting the balance of gold and silver remaining in the hands of the officers of the mint on the 31st December, 1805; the amount of deposits from 1st January to the 31st December, 1806; the different species of coins made and paid on account of deposits; allowance for wastage, and the balance remaining in the hands of the officers of the mint on the said 31st December, 1806, to be accounted for on a future settlement.

COMPTROLLER'S OFFICE, February 27th, 1807.

ANDREW ROSS.

D.

Statement of the application of moneys advanced from the Treasury of the United States for the support of the Mint Establishment, during the year 1806.

Moneys paid by the treasurer of the mint on warrants drawn on him by the Director, and admitted by the accounting officers of the treasury, on the adjustment of his accounts, were as follow, viz:

Incidental and contingent expenses, and repairs of the mint.

For \$9,029 70, being the amount expended for the requisite repairs, apparatus, machines, wages of workmen, and other expenses,

In the 1st quarter, -	\$1,822 89
2d do. -	2,391 42
3d do. -	2,019 01
4th do. -	2,796 38
	9,029 70

Salaries of the officers and clerks of the mint.

In the 1st quarter, -	2,650 00
2d do. -	2,650 00
3d do. -	2,650 00
4th do. -	2,650 00
	10,600 00

Wastage in the coinage of gold and silver.

Applied to make good the deficiency in said coinage for the year 1805, -	1,104 48
Balance to be accounted for by the treasurer of the mint, -	5,878 85
	\$26,613 03

Balance which was to be accounted for by the mint, on the 1st January, 1806, as per statement for the preceding year, - - - - - 6,908 55

Advanced from the treasury for the Mint Establishment, viz:

For the salaries of the officers and clerks, - - - - -	10,600 00
For the purchase of copper and incidental expenses, - - - - -	8,000 00
Warrant No. 7172, for deficiencies in coinage in 1805, - - - - -	1,104 48

[10th CONGRESS.]

No. 267.

[1st SESSION.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, NOVEMBER 7, 1807.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

REVENUE AND RECEIPTS.

The nett revenue arising from duties on merchandise and tonnage, which accrued during the year 1805, amounted to - - - - -	\$14,135,138
--	--------------

And that which accrued during the year 1806, amounted, as will appear by the statement A, to - - - - -	\$16,576,454
--	--------------

The same revenue, after deducting that portion which arose from the duty on salt, and from the additional duties constituting the Mediterranean fund, amounted, during the year 1805, to - - - - -	12,520,532
And during the year 1806, to - - - - -	14,809,758

It is ascertained that the nett revenue, which has accrued during the three first quarters of the year 1807, exceeds that of the corresponding quarters of the year 1806; and that branch of the revenue may, exclusively of the duty on salt, and of the Mediterranean fund, both of which expire on the first day of January next, be safely estimated, for the present, and if no change takes place in the relations of the United States with foreign nations, of fourteen millions of dollars.

The statement B exhibits in detail the several species of merchandise, and other sources, from which that revenue was collected during the year 1806.

It appears, by the statement C, that the sales of the public lands have, during the year ending on the 30th of September, 1807, exceeded 284,000 acres. Some returns are not yet received; and the proceeds of sales in the Mississippi territory, being, after deducting the surveying and other incidental expenses, appropriated, in the first place, to the payment of a sum of 1,250,000 dollars to the State of Georgia, have not been included, but are distinctly stated. The actual payments by purchasers, have, during the same period, exceeded 680,000 dollars; and the receipts into the treasury from that source, may, after deducting charges, and the five per cent. reserved for roads, be estimated, for the ensuing year, at five hundred thousand dollars.

The receipts arising from the permanent revenue of the United States, may, therefore, without including the duties on postage, and other incidental branches, be computed, for the year 1808, at - - - \$14,500,000

And the payments into the treasury during the same year, on account of the salt and Mediterranean duties, previously accrued, are estimated at - - - - - 1,300,000

Making, in the whole, an aggregate of - - - \$15,800,000

LAST QUARTER OF THE YEAR 1807.

The balance in the treasury, which, on the 30th day of September, 1806, amounted to \$5,496,969 77, did, on the 30th day of September, 1807, amount to - - - \$8,530,000

The receipts into the treasury from the 1st of October to the 31st of December, 1807, are estimated at - - - - - 4,000,000

\$12,530,000

The expenses, during the same period, for all objects whatever, the public debt excepted, and including 686,076 dollars for the extraordinary expenditures of the Navy Department, of which the estimate has been transmitted, are estimated at - - - - - \$1,700,000

The ordinary payments on account of the public debt, including the provision for the interest on the Louisiana and Dutch debt, to the 1st July, 1808, are estimated at - - - - - 1,700,000

A further sum of about 1,500,000 dollars, should also be paid during this quarter, in order to complete the annual appropriation of 8,000,000 of dollars. If the whole of this sum, which is applicable to the purchase of the eight per cent. stock, cannot be expended this year, the unexpended balance will form an additional expenditure for the year 1808, charging however, the whole to this quarter, - - - - - 1,500,000

Makes an aggregate of - - - - - \$4,900,000

And will leave in the treasury, at the close of the year, a balance of about seven millions six hundred thousand dollars. - - - - - 7,630,000

\$12,530,000

EXPENDITURES OF THE YEAR 1808.

The permanent expenses, calculated on a peace establishment, are estimated at \$11,600,000, and consist of the following items, viz:

1st. For the Civil department, and all domestic expenses of a civil nature, including invalid pensions, the light house and mint establishments, the expenses of surveying public lands and the sea coast, the fifth instalment of the loan due to Maryland, and a sum of 100,000 dollars, to meet such miscellaneous appropriations, not included in the estimates, as may be made by Congress, - - - \$1,100,000

2d. For expenses incident to the intercourse with foreign nations, including the permanent appropriation for Algiers, - - - - - 200,000

3d. For the Military and Indian departments, including trading houses, and the permanent appropriations for certain Indian tribes, - - - - - 1,280,000

4th. For the Naval establishment, - - - - - 1,020,000

5th. The annual appropriation of eight millions of dollars, for the payment of the principal and interest of the public debt, of which sum not more than 3,400,000 dollars will, for the year 1808, be applicable to the payment of interest, - - - - - 8,000,000

\$11,600,000

To the permanent expenses must be added, for the year 1808, a sum of about 800,000 dollars, necessary, in addition to the annual appropriation of eight millions of dollars, to complete, on the 1st January, 1809, the reimbursement of the eight per cent. stock, - - - - - 800,000

And for paying the balance of American claims assumed by the French convention, - - - - - 200,000

Making, altogether, for the expenses of that year, - - - - - \$12,600,000

The receipts of that year having been estimated at - - - - - \$15,800,000

And the probable balance in the treasury, on the 1st January next, at - - - - - 7,630,000

Making, altogether, - - - - - \$23,430,000

Would, therefore, probably, leave in the treasury, on the 1st January, 1809, a balance of near eleven millions of dollars, - - - - - 10,830,000

\$23,430,000

PUBLIC DEBT.

It appears by the statement D, that the payments on account of the principal of the public debt, have, during the year ending on the 30th day of September, 1807, exceeded four millions six hundred thousand dollars; making the total public debt reimbursed from the 1st of April, 1801, to the 1st of October, 1807, about twenty-five millions eight hundred and eighty thousand dollars, exclusively of more than six millions which have been paid during the same period, in conformity with the provisions of the treaty and convention with Great Britain, and of the Louisiana convention.

Of the twelve millions of dollars, which, according to the preceding estimates, may be paid on account of the public debt, between the 30th September, 1807, and the 1st January, 1809, about eight millions will be on account of the principal. It must, however, be observed, that the unascertained result of the proposition made to the public creditors, for a modification of the debt, may affect the amount payable during the year 1808, on account of both principal and interest.

On the first day of January, 1809, the principal of the debt will, if the proposed modification be not assented to by the public creditors, amount to near fifty-seven millions and five hundred thousand dollars; the subsequent annual payments thereon, on account of principal and interest, will not, exclusively of occasional purchases, exceed 4,600,000 dollars; and the whole of the debt, the nineteen millions three per cent. stock only excepted will be reimbursed in sixteen years.

A general subscription would reduce the capital to about fifty-one millions of dollars; the payments would amount to eight millions of dollars, annually, during six years, and average less than three millions during the seven following; at the end of which period the whole debt would be extinguished.

An annual unappropriated surplus of at least three millions of dollars may, henceforth, be relied upon with great confidence. The receipts of the year 1808 have been estimated at 15,800,000 dollars, and the expenses at 12,600,000 dollars. The permanent revenue has been computed at 14,500,000 dollars; and the permanent expenses, predicated on an annual payment of eight millions of dollars on account of the debt, have been stated at 11,600,000 dollars; and, as these would, if no modification of the debt shall take place, be reduced to less than 8,500,000 dollars, the annual surplus would then amount to six millions of dollars. Nor are the seven millions and a half of dollars, which will remain in the treasury at the end of the present year, included in the calculation.

What portion of that surplus may be wanted for necessary measures of security and defence; what portion should be applied to internal improvements, which, while increasing and diffusing the national wealth, will strengthen the bonds of union, are the subjects which do not fall within the province of the Treasury Department. But it is not improbable that, after making ample provision for both those objects, considerable surplusses, and which can no longer be applied to the redemption of the debt, may still accumulate in the treasury.

A previous accumulation of treasure, in time of peace, might in a great degree defray the extraordinary expenses of war, and diminish the necessity of either loans or additional taxes. It would provide, during periods of prosperity, for those adverse events to which every nation is exposed, instead of increasing the burthens of the People at a time when they are least able to bear them, or of impairing, by anticipations, the resources of ensuing generations. And the public moneys of the United States not being locked up and withdrawn from the general circulation, but, on the contrary, deposited in banks, and continuing to form a part of the circulating medium, the most formidable objection to that system, which has, nevertheless, been, at times, adopted with considerable success, in other countries, is, thereby, altogether removed. It is also believed that the renewal of the charter of the Bank of the United States may, amongst other advantages, afford to Government an opportunity of obtaining interest on the public deposits, whenever they shall exceed a certain amount. Should the United States, contrary to their expectation and desire, be involved in a war, it is believed that the receipts of the year 1808 will not be materially affected by the event, inasmuch as they will, principally, arise from the revenue accrued during the present year. The amount of outstanding bonds due by importers, after deducting the debentures issued on account of re-exportations, exceeds, at this time, sixteen millions of dollars. The deductions to be made from these, on account of subsequent re-exportations, would, in case of war, be less than usual: for, exportations will then be checked as well as importations; and, in proportion as these will decrease, a greater home demand will be created for the stock on hand, and the necessity of re-exporting be diminished.

It has already been stated that the specie in the treasury, at the end of this year, together with the surplus of the year 1808, will amount to near eleven millions of dollars—a sum probably adequate to meet the extraordinary expenses of a war for that year. It will also be recollected, that, in the estimated expenses of the year 1808, a reimbursement of near five millions and a half of the principal of the debt is included. The only provision, therefore, which may, under any contingency, be necessary for the extraordinary service of that year, in order to cover any deficiency of revenue or increase of expenditure beyond what has been estimated, will be an authority to borrow a sum equal to that reimbursement.

That the revenue of the United States will, in subsequent years, be considerably impaired by a war, neither can, or ought to be concealed. It is, on the contrary, necessary, in order to be prepared for the crisis, to take an early view of the subject, and to examine the resources which should be selected for supplying the deficiency and defraying the extraordinary expenses.

There are no data from which the extent of the defalcation can, at this moment, be calculated, or even estimated. It will be sufficient to state, 1st. That it appears necessary to provide a revenue at least equal to the annual expenses on a peace establishment, the interest of the existing debt, and the interest on the loans which may be raised. 2dly. That those expenses, together with the interest of the debt, will, after the year 1808, amount to a sum less than seven millions of dollars, and, therefore, that, if the present revenue of 14,500,000 dollars shall not be diminished more than one half by a war, it will still be adequate to that object, leaving only the interest of war-loans to be provided for.

Whether taxes should be raised to a greater amount, or loans be altogether relied on for defraying the expenses of the war, is the next subject of consideration.

Taxes are paid by the great mass of the citizens, and immediately affect almost every individual of the community. Loans are supplied by capitals previously accumulated by a few individuals. In a country where the resources of individuals are not generally and materially affected by the war, it is practicable and wise to raise by taxes the greater part at least of the annual supplies. The credit of the nation may, also, from various circumstances, be at times so far impaired as to leave no resource but taxation. In both respects the situation of the United States is totally dissimilar.

A maritime war will, in the United States, generally and deeply affect, whilst it continues, the resources of individuals; as not only commercial profits will be curtailed, but, principally, because a great portion of the surplus of agricultural produce necessarily requires a foreign market. The reduced price of the principal articles exported from the United States will operate more heavily than any contemplated tax. And, without inquiring whether a similar cause may not still more deeply and permanently affect a nation at war with the United States, it seems to follow that, so far as relates to America, the losses and privations caused by the war should not be aggravated by taxes beyond what is strictly necessary. An addition to the debt is doubtless an evil; but experience having now shown with what rapid progress the revenue of the Union increases in time of peace; with what facility the debt formerly contracted has, in a few years, been reduced; a hope may confidently be entertained that all the evils of the war will be temporary, and easily repaired; and that the return of peace will, without any effort, afford ample resources for reimbursing whatever may have been borrowed during the war.

The credit of the United States is also unimpaired, either at home or abroad; and it is believed that loans to a reasonable amount may be obtained on eligible terms. Measures have been taken to ascertain to what extent this may be effected abroad. And it will be sufficient here to suggest, that the several banks of the United States may find it convenient, after the ensuing year, and as the diminished commerce of the country may require less capital, to loan to Government a considerable portion of their capital stock, now computed at about forty millions of dollars.

It might be premature to enter into a particular detail of the several branches of revenue which may be selected in order to provide for the interest of war-loans, and to cover deficiencies, in case the existing revenue should fall below seven millions of dollars. A general enumeration seems at present sufficient.

1. Not only the duty on salt and the Mediterranean duties may be immediately revived, but the duties on importation generally, may, in case of war, be considerably increased, perhaps doubled, with less inconvenience than would arise from any other mode of taxation. Without resorting to the example of other nations, experience has proven that this source of revenue is, in the United States, the most productive, the easiest to collect, and the least burthensome to the great mass of the people. In time of war, the danger of smuggling is diminished; the scarcity of foreign articles prevents the duty ever falling on the importer; the consumers are precisely those members of the community who are best able to pay the duty; and the increase of domestic manufactures, which may be indirectly affected, is in itself a desirable object.

2. Indirect taxes, however ineligible, will doubtless be cheerfully paid as *war taxes*, if necessary. Several modifications of the system formerly adopted, might, however, be introduced, both in order to diminish some of the inconveniences which were experienced, and particularly to ensure the collection of the duties.

3. Direct taxes are liable to a particular objection, arising from unavoidable inequality, produced by the general rule of the constitution. Whatever difference may exist between the relative wealth and consequent ability of paying of the several States, still the tax must, necessarily, be raised in proportion to their relative population. Should it, however, become necessary to resort to that resource, it is believed that a tax, raised upon that species of property, in each State, which, by the State laws, is liable to taxation, as had originally been contemplated by Congress, would be preferable to a general assessment, laid uniformly on the same species of property in all the States, as was ultimately adopted.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *November 5th, 1807.*

D.

An estimate of the principal redeemed of the debt of the United States, from the 1st October, 1806, to the 30th September, 1807, inclusively, showing the redemption of the principal of the said debt, from the 1st April, 1801, to the 30th September, 1807.

	Redemption from 1st Oct. 1806, to 30th of September, 1807.	Redemption from 1st April, 1801, to 30th Sept. 1806, per the Secretary's report of 5th Dec. 1806.	Total principal redeemed, from 1st April, 1801, to 30th Sept. 1807.
<i>On account of the domestic debt.</i>			
The amount of warrants issued on the treasurer of the U. States, on account of the interest of the domestic debt, of the reimbursement of the old six per cent. and deferred stocks, and of purchases of the eight per cent. and exchanged six per cent. stocks, from 1st October, 1806, to the 30th September, 1807, exclusive of \$36,934 49, repaid into the treasury, and \$2,499 63, commissions to agents purchasing stock, was			\$5,834,423 03
Deduct interest which accrued during the same period, calculated quarter yearly,			\$2,923,196 87
And loss on the purchase of stock,	(b) 15,078 20		2,938,275 07
	(a) \$2,896,147 96	\$6,479,745 84	\$9,375,893 80
Reimbursement of the navy six per cent. stock,	-	711,700 00	711,700 00
Ditto, of the five and a half per cent. stock,	1,847,500 00	-	1,847,500 00
Ditto, of the four and a half per cent. stock,	176,000 00	-	176,000 00
Payments made in certificates of the debt of the United States, on account of lands,	5,211 20	262,018 16	267,229 36
Payments made to foreign officers, and for certain parts of the domestic debt,	2,146 36	74,331 50	76,477 86
Payments on account of domestic loans,	-	3,440,000 00	3,440,000 00
<i>On account of the foreign debt,</i>	-	10,236,108 05	10,236,108 05
	4,927,005 52	21,203,903 55	26,130,909 07
Funds having previously been provided in Europe, the warrants issued on the Treasurer of the United States for that object, from 1st October, 1806, to 30th September, 1807, were less than the amount of interest arising; the difference, therefore, forms a deduction.			
The interest accruing from 1st October, 1806, to 30th September, 1807, was, on the Dutch debt, including commissions and charges,			\$66,632 60
On the Louisiana stock, including commissions,			677,666 47
			\$744,299 07
Amount of warrants, exclusive of \$24,614 71, repaid into the Treasury, and \$1,992 65, commissions to agents purchasing bills of exchange, was			\$486,058 13
Add gain on exchange,			9,427 58
	495,485 71		248,813 36
	\$4,678,192 16	\$21,203,903 55	\$25,882,095 71

COMPENSATION OF INSPECTORS OF THE CUSTOMS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 23, 1807.

Mr. GEORGE WASHINGTON CAMPBELL, from the Committee of Ways and Means, to whom were referred the petitions of the inspectors of the Customs of the ports of Baltimore, New York, and Boston, made the following report:

That, previous to the third day of March, 1797, the compensation allowed to inspectors of the customs was fixed by law at a sum not exceeding one dollar and sixty-six cents to each, for every day he should be actually employed in aid of the customs; and, by an act of that date, their pay was raised to a sum not exceeding two dollars for each day they should be employed in like manner; and, by an act passed the second of March, 1799, the same compensation, last mentioned, was allowed them, to be paid by the collector, out of the revenue, and charged to the United States. It appears by a report made by the Secretary of the Treasury on this subject, that the pay of all the inspectors employed during the year 1804, amounted to \$129,608, being about one per cent. on the nett receipts in the treasury. It also appears, that, in all the large ports (except Charleston) the inspectors are employed almost every day during the year, which is not the case in the smaller ports, where they are, a great portion of their time, without employment. From this circumstance, it results, that the amount of compensation received by inspectors in the large ports, during the year, far exceeds that received by those in the small ports; and, although the necessary expenses of living and supporting families, in large towns, are generally greater than those in small, yet the difference of the annual compensation in favor of those inspectors residing in the former, as already stated, would probably be equal to the excess in their expenses, and, therefore, render their situation, at least as eligible, as that of those residing in the latter.

The Committee are apprised, that, during the existence of contagious or epidemical diseases in populous towns, the inspectors residing therein incur additional expenses, and are, in the discharge of their duties, necessarily exposed to personal dangers: they duly appreciate these circumstances, and are induced to believe that, when such events occur, and are made known to the National Legislature, they will be disposed to make such additional compensation to those who may be affected thereby, as their situations may require.

The Committee are sensible of the importance of the duties to be performed by the inspectors of the customs, and how much the security of the revenue depends upon the capacity, integrity, and attention, of those officers; they highly appreciate the good faith with which they are stated to have performed the services required of them; and would feel disposed to render their situations more eligible, by augmenting their compensation so as to meet the necessary increase of expenses in living, if, in their opinion, existing circumstances would justify the measure. But, upon a view of the facts above stated, and considering the present state of the nation is such as renders it uncertain how soon there may be a demand for all our resources, the Committee are of opinion that it would not be advisable, at this time, to incur additional expenditures in collecting the revenue, by increasing the compensation of the officers engaged therein.

They, therefore, submit to the House the following resolution:

Resolved, That the petitioners have leave to withdraw their petitions.

TREASURY DEPARTMENT, *January 14th*, 1806.

SIR:

I have the honor to enclose a report on the petitions of the inspectors of the customs for the ports of Baltimore, Philadelphia, and New York, which were referred to me by the House of Representatives, on the 5th and 23d December, 1805, and 11th January, 1806.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the *House of Representatives*.

The Secretary of the Treasury, to whom were referred the petitions of the inspectors of the Customs of the ports of New York, Philadelphia, and Baltimore, respectfully submits the following report:

The pay of the inspectors, which, previous to the 4th day of March, 1797, was at the rate of one dollar and sixty cents a day, was, by act of that date, fixed at the rate of two dollars for every day they shall be actually employed in aid of the customs.

It appears by the annexed statement, that the pay of all the inspectors employed during the year 1804, amounted to \$129,608, or about one per cent. on the nett receipts in the treasury, and that, in all the large ports, Charleston excepted, the inspectors are, in fact, employed almost every day during the year—an arrangement which, though not practicable in the smaller ports, is not attended with any additional expense in those where it has been adopted, as may be perceived by comparing the whole amount of compensation allowed, and of revenue collected in each port. A less number of inspectors is employed in those ports; and, as they are constantly employed, their annual compensation is greater. But, although the inspectors of the largest ports are, by that arrangement, better paid, generally, than those of the small ones, it is true that the expenses of living, with them, are generally greater; and, it is apprehended that the greatest difficulty in fixing a reasonable rate of compensation arises from that difference in the rate of necessary expenses which exists between the different ports. The pay which is sufficient, in many places, to engage the services of persons fully competent, hardly affords the means of a scanty subsistence in others—an observation which is made less with any intention of suggesting a distinction in the rate of allowance, which would, perhaps, be invidious, than for the purpose of anticipating the objection to a general increase, which might be expected from those quarters where two dollars a day must be considered as an ample compensation. The only case where the propriety of such a distinction is respectfully submitted, is that of contagious or epidemical diseases, during which additional expenses are incurred by the inspectors, and they are, in the discharge of their duties, necessarily exposed to personal danger.

Of the general increase in the expenses necessary for the support of a family, which may have taken place since the year 1797, and on which the propriety of a general additional allowance depends, the Secretary of the Treasury is not a competent judge. It will be sufficient for him to say, that a view of the revenue, derived from customs, affords evident proofs that it is most faithfully paid and collected. Next to that good faith, which has so honorably characterised the conduct of the importers, the security of the revenue, principally, rests on the character of the officers employed in the collection; the capacity, attention, and integrity of the inspectors, particularly, forms one of its principal guards; and, it is undoubtedly important that the compensation may be sufficient to engage, as heretofore, the services of men of that description.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, 14th January, 1806.

A Statement exhibiting the total number of inspectors employed, on an average, in the several ports of the United States, during the year 1804; also, the amount of their compensation, and the number of days each inspector was, on an average, employed.

10th CONGRESS.]

No. 269.

[1st SESSION.]

PROTECTING DUTIES ON PAINTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 3, 1807.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of Joseph Du Cayla, made the following report:

The petitioner states, that he has purchased the exclusive right, secured by patents, of making, constructing, using, and vending to others, to be used, the beautiful yellow and also the green coloring matter or paint. As a further encouragement, he prays that additional duties may be imposed on the importation of paints.

Your committee are of opinion that, if the discovery is as useful as the petitioner represents it to be, he has the fairest prospect of success. He enjoys the exclusive right, secured by patents, to all profits that can be produced from the exercise of the art or discovery of manufacturing or preparing colors.

He likewise derives, from the high protecting duties on paints, the additional advantage of extending the use and the sale of his manufactures. To increase the duties on paints, will have the tendency not only of raising the price of paints, but that also of giving to the petitioner a monopoly.

The committee, therefore, recommend the adoption of the following resolution:

Resolved, That the prayer of the petitioner is unreasonable, and ought not to be granted.

[1st SESSION.]

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 7, 1807.

To the Honorable the Senate and House of Representatives of the United States of America in Congress assembled, the petition of the subscribers, citizens of the United States and inhabitants of the city of New York, members of "the Journeymen Hatters Society" of that city, respectfully sheweth:

That your petitioners have served regularly as apprentices to the hatting business, and are now working as journeymen to the said trade, and did expect, by their industry and attention to that art, to gain an honest livelihood for themselves and families; that your petitioners, having full confidence in your honorable body, that you will give every encouragement and protection to the manufactures of the United States, and lend every lawful assistance to those citizens thereof, who are immediately dependent on the encouragement which your honorable body may give to those manufactures, beg leave to state, that necessity compels them to approach your honorable body in humble petition, praying that an additional impost duty may be laid on hats. And as reasons therefor, your petitioners beg leave to state that, by the constant importations of that article, our home manufactures in that particular have diminished, and probably will continue to suffer, and perhaps finally go to ruin. Your petitioners further represent, that the present duty laid on hats is so inconsiderable, that mercantile men, particularly in this city, are enabled to import, and actually do import, from Europe, and sell, hats, at a less price than those of American manufacture; which obliges many, who have served a long time as apprentices and journeymen to the said trade, to abandon it, and resort to other means for supporting themselves and families. And your petitioners beg leave further to state to your honorable body, that the materials in this country, used for making hats, are equal, if not superior, to foreign produce of the same; and they are confident that the hats of the United States are superior to the European manufacture of the same article.

Wherefore, and inasmuch as your petitioners are attached to the liberties of this country, and are willing to hazard every thing for the maintenance of its rights and independence, they pray that your honorable body will, after having taken into consideration these circumstances, grant the prayer of your petitioners, and lay an additional impost upon the importing of hats from foreign countries, whereby your petitioners, and many others, similarly circumstanced, would be relieved from their present embarrassment, and the daily expectation of being deprived of employment in that art, which it has been their study for years to acquire.

Signed in behalf of the Society.

JAMES McCABE, *President.*

AARON COATES, *Secretary.*

[1st SESSION.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 18, 1807.

To the Honorable the Senate and House of Representatives of the United States in Congress assembled, the memorial of the subscribers, merchants, and manufacturers of copper, inhabitants of the city of New York, respectfully sheweth:

That your memorialists have been informed that a petition has been presented to Congress, praying that a duty may be imposed on copper, in sheets and plates, imported into the United States; and your memorialists, believing that the imposition of such duty would in effect prohibit the importation of those articles, and would tend to the inconvenience and injury of the public, although it might, in some measure, contribute to the emolument of a few individuals, they take the liberty of suggesting the following reasons why the prayer of the said petition should not be granted.

That there is not in the United States, to the knowledge of your memorialists, any copper mine, which, at the present time, can furnish the raw material for the manufacture of copper; and that, consequently, the manufacturing of sheet copper, copper plates, and raised bottoms of copper, in this country, must, at present, be confined to the scanty supply furnished from the collection of old copper, and the occasional importations of copper in pigs from South America: for your memorialists do aver, without fear of contradiction, that the difference in price between unwrought copper, and that manufactured into sheets, plates, and raised bottoms, in Europe, will not allow of the importation of copper in pigs, for the purpose of being manufactured, in this country, into those articles, unless the importation of such manufactured articles are prohibited, or made subject to an impost duty.

That, from the circumstance of the duty now imposed on manufactured articles of copper, while unwrought copper remains free from duty, the American manufacturer is enabled to undersell the like articles, manufactured in Europe; and in consequence thereof, manufactured articles of copper are now very seldom imported; but considerable quantities, manufactured in this country, are yearly exported to the West Indies. That, although copper in sheets has been free from import duty, yet, in consequence of an export duty in Great Britain, of four per cent., and the incidental charges of importation, most of the ships, built in this country, and intended to be copper sheathed, are sent abroad for that purpose.

That, in case a duty is laid upon copper in sheets, plates, and raised bottoms, the greater part of the utensils, in the manufacture of which those articles are used, such as stills, boilers, &c. will be imported in a manufactured state, and their prices consequently enhanced.

Your memorialists beg leave further to represent to your honorable body, that it would operate greatly to the advantage of the manufacturers of copper, in this country, if the duty on zinc or spelter, old copper, old brass, and old pewter, was discontinued; and your memorialists may be permitted to remark, that those articles can only be considered as raw materials. And your memorialists further pray your honorable body that round copper plates, and raised bottoms of copper, may be permitted to be imported free from duty, as those articles cannot be considered in a more manufactured state than copper in sheets.

And your memorialists will ever pray, &c.

RICHARD WHITTINGHAM, and others.

NEW YORK, *November 20, 1807.*

10th CONGRESS.]

No. 272.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 24, 1807.

HOUSE OF REPRESENTATIVES, *December 7th, 1804.*

SIR:

I beg leave to enclose you the petition of Walter Channing, surviving partner of the house of Gibbs and Channing, of Newport, Rhode Island, stating to Congress that they imported a quantity of saltpetre, in May, 1803, upon which the collector of Newport charged a duty, when, in their opinion, the article was free, by the laws of Congress, passed 10th August, 1790, and May 2, 1792. The opinion of respectable counsel has been obtained, as you will observe, and they all seem to agree that saltpetre ought to be considered as still free of duty; and, on my own part, I must confess that the acts of June 14th, 1797, and April, 1798, do not strike me, at the first view, as intended to repeal the former act, declaring the article free. The question remains, Was saltpetre exempt from duty when the act of 1798 expired, and is it now free of duty? The collector of the revenue at Newport has exacted an ad valorem duty on the cargo imported by Gibbs and Channing, and, in three other custom houses, the collectors have not charged any duty on saltpetre; and yet it would seem they ought to have done it, if the article is really chargeable with a duty. May I request the favor of you to look at the petition, and the papers which accompany it, and will you have the goodness to give the Committee of Commerce and Manufactures your opinion on the subject? Can relief be afforded to the petitioners through your Department, provided you consider saltpetre as free of duty? Are the collectors throughout the United States at this moment in the collection of any duty on the article in question? and, if so, what is the rate of duty, and when did it commence? Any information on the subject will particularly oblige the committee.

I have the honor to be, with the highest respect, yours, &c.

JACOB CROWNINSHIELD.

HON. ALBERT GALLATIN, *Secretary of the Treasury United States.*

To the Honorable the Senate and House of Representatives of the United States in Congress assembled, Walter Channing, surviving partner of the house of Gibbs and Channing, of Newport, in the State of Rhode Island, merchant, respectfully sheweth:

That, on the 3d day of May, 1803, the said Gibbs and Channing imported, in the ship Mount Hope, John Boit master, from the Isle of France, thirteen hundred fifty eight bags of saltpetre; that, at the time of said importation, the article of saltpetre was free of duty, being permanently exempted by the acts of Congress of the 10th August, 1790, and May 2d, 1792; which acts, so far forth as they provide for said exemption, as your petitioner is advised, and verily believes, then were, and still remain, in full force and effect. That, on the 6th June, A. D. 1803, entry was made of said ship and her cargo, at the custom house for the district of Newport, when the collector demanded a duty of twelve and a half per cent. ad valorem on the saltpetre aforesaid, and included the same in the gross estimate of the amount of duties on the cargo of said ship, and required the said Gibbs and Channing to give bonds for the same, to which they objected, but were obliged to submit; an entry of said ship and cargo being not otherwise attainable. The said Gibbs and Channing believing that there was no law which authorized the exaction of said duty on saltpetre, and the collector persisting in requiring the same, they made a representation of the demand, by letter, on the 7th of July, A. D. 1803, to the Secretary of the Treasury, a copy whereof was transmitted by the Comptroller to the collector, requiring him to make a statement of the case, which was accordingly done; whereupon, the Comptroller decided that he coincided with the collector in opinion that saltpetre was then chargeable with an ad valorem duty; that, in conformity to this coincidence of opinion, the collector charged a duty on said saltpetre of twelve and a half per cent. ad valorem, making said duty eighteen hundred twelve dollars thirty seven cents, which sum he included, with the duties on the other goods imported by said Gibbs and Channing, in said ship Mount Hope, in three bonds, which were given on the entry; that the said Gibbs and Channing, after a candid investigation of the opinion offered by the Comptroller, and the reasons in support of it, could not see any sufficient cause to alter the opinion they had first formed, that saltpetre was by law permanently exempted from duty; but, lest they might err in an opinion opposed to so high authority, they submitted to counsel of the first eminence in this State, the case,

as stated by the collector, and the Comptroller's opinion thereon; who, after an examination of the same, and the laws relative to that article, gave a deliberate opinion, in writing, "that saltpetre may be imported into the United States free of duty." At the same time, the said Gibbs and Channing obtained from the custom houses at Salem, Boston, New York, and Philadelphia, official certificates and advices, that, at the time of the importation of the saltpetre aforesaid, the article saltpetre was considered, at the aforesaid custom houses, free of duty, and so admitted. In the progress of the investigation which the said Gibbs and Channing caused to be made, relative to the duty exacted from them as aforesaid, it appeared by an official certificate from the custom house at Boston, that the former Comptroller of the Treasury, in a circular letter to all the collectors, dated May 30, 1800, had officially instructed them that "saltpetre was to be considered as permanently exempted from duty by the acts of Congress of the 10th August, 1790, and May 2d, 1792." This circular letter your petitioner candidly believes had escaped the recollection of the collector, when he required the aforesaid duty, and when he stated the case to the Comptroller, as aforementioned. From a consideration of this deliberate opinion, and direction of the former Comptroller, of the practice of the custom houses in conformity thereto, with the opinion of counsel so respectable, the said Gibbs and Channing were induced to make a representation of the same to the present Comptroller, in a letter dated September 17, 1803, in which, after communicating the particulars of the preceding information, they requested that, inasmuch as the constitution declares "that all duties, imposts, and excises, shall be uniform throughout the United States," the administration of the laws relative thereto ought to be uniform; and that, as an exemption from duty, in relation to salt petre, had been granted to others, the same ought to be extended to the said Gibbs and Channing. To this representation the Comptroller replied, that "the suggestion, that the exemption of saltpetre from duty had been admitted to some and denied to others, was too remote from probability to be susceptible of belief;" that "it was a case concerning which he could not doubt, and that, if he was wrong, the error could be corrected by the ensuing Legislature, and that he did not consider the case as decided by his predecessor." About the time this answer of the Comptroller was received, George Gibbs, the senior partner of said house of Gibbs and Channing, deceased, when the whole business devolved on your petitioner, who sought the opinion of other counsel in this State, and of the most eminent counsel in the Commonwealth of Massachusetts, all of whom concurred in opinion, "that saltpetre was still free from duty." Thus supported by the deliberate opinion of every professional man to whom the question had been submitted, your petitioner conceived it to be a duty which he owed to the heirs of his deceased partner, to himself, and his fellow citizens, to pursue every legal and temperate measure to obtain redress. With this view your petitioner, prior to the first bond falling due, proposed to the collector that the question, "whether saltpetre was, or was not, exempt from duty, by law," should be submitted to a court of competent jurisdiction, whose decision your petitioner would cheerfully abide; and that, as some delay of payment of the aforesaid duty charged on saltpetre would necessarily take place, before a decision of the suit on the bond could be had, your petitioner further suggested, that, as the refusal of payment did not result from inability to pay, or opposition to the laws, but merely from a dispute about a legal question, on which respectable opinions differ, and it being of a duty never before demanded, that a credit at the custom house ought not to be denied him, while the right to demand such duty was in the legal course of judicial investigation. At the same time, to obviate every possible objection to this equitable claim, your petitioner offered to pay the amount of duties on all the goods, except that charged on saltpetre, and this, with the interest and probable costs, he offered to deposite in bank, and place the cashier's receipt therefor in the hands of the collector; or he would pay or deposite the whole, in any other mode the collector might devise, provided the right of legal investigation of the question should be reserved, and the credit of Gibbs and Channing at the custom house should not, in the mean time, be denied. These reasonable proposals, as your petitioner conceived them to be, were not acceded to, and he, to save the credit of his surety and that of the house of Gibbs and Channing, was compelled to pay the whole of the first bond, without having a day in court for a legal decision thereon. Prior to the payment of the second and third bonds, your petitioner renewed his application as aforesaid, in both which he was refused, and has been thus, against his consent, and every effort in his power, consistent with the credit and safety of his house, and that of his surety, forced to pay eighteen hundred twelve dollars thirty seven cents, being the amount of the aforesaid duty illegally charged on said saltpetre. From the concession of the Comptroller, in a letter to the collector, of the 14th December last, "that the laws which relate to duties on saltpetre are susceptible of different constructions," from the very respectable, numerous, and concurrent legal opinions, in contrariety to his decision; and it being a known fact that no duty ever was exacted on saltpetre, from the first institution of the Government, until it was imposed on the house of Gibbs and Channing, your petitioner had reason to expect that the Comptroller would not only have yielded to his repeated and urgent applications, for a legal investigation of the litigated duty, without a denial of credit, but that he would have been equally solicitous with your petitioner to have had his opinion tested by the proper judicial tribunal; so that no citizen should have just cause of complaint. Denied this privilege, your petitioner, under a firm and conscientious conviction that saltpetre was, and still is, by law, exempt from duty, respectfully craves leave to lay his case before the National Legislature, and to solicit that the same exemption, which has, through the custom houses, been extended to other importers of saltpetre, may be extended to the house of Gibbs and Channing; and that restitution may be made to them of the aforesaid sum of eighteen hundred twelve dollars and thirty-seven cents which they have been compelled to pay for the duty, illegally charged on the saltpetre by them imported as aforesaid, together with interest thereon; or that Congress will be pleased to provide by law for a judicial investigation of the right to exact said duty; or to grant to your petitioner such other relief in the premises, as, in your wisdom, justice shall seem to require. And your petitioner, as in duty bound, will ever pray.

WALTER CHANNING,

Surviving partner of the house of Gibbs and Channing.

NEWPORT, November 24th, 1804.

CASE.

Messrs. Gibbs and Channing, in the month of May, 1803, imported, in their ship Mount Hope, a large quantity of saltpetre, in the port of Newport.

They demanded an entry of said saltpetre, *duty free*; the collector refused, and demanded bonds for an ad valorem duty on said article.

Question. Is saltpetre subject to a duty, on importation into the United States?

Answer. Congress passed a law, 10th August, 1790, imposing specific duties on certain specific articles, and an ad valorem duty on certain enumerated and on unenumerated articles. This law, in terms, exempts from duty the article saltpetre. Congress passed another law 2d May, 1792, which provides that all articles which are excepted and exempted from duty by the act "making further provision for the payment of the debts of the United States," (which is the act above mentioned, passed 10th August, 1790) "shall continue to be excepted and exempted." Both these acts are permanent.

On the 14th June, 1797, Congress passed another act, entitled "An act prohibiting, for a limited time, the exportation of arms and ammunition, and for encouraging the importation thereof." This act prohibited the exportation (among other things) of *saltpetre*, and exempted from duty the same articles, together with saltpetre, for the time limited.

On the 7th day of April, 1798, Congress passed another act, to continue in force the act last before mentioned, for a further time. Both these acts have long since expired. These are all the laws relative to this subject. *The case then comes to this question: Whether the exemption of salt petre from duty, provided by the acts of '90 and '92, is still in force?* That exemption is still in force, unless it be considered as repealed by the acts of '97 and '98. These latter acts are considered to have this effect by the collector, whose opinion is adopted by the Comptroller. In support of this construction it is said, *That the laws of '97 and '98, in this particular, are repugnant to the laws of*

'90 and '92, and therefore the former is to be considered as repealed. If two provisions of two different laws are of such a nature that they cannot both be executed, the latter may be considered as repealing the former. But the acts of '90 and '92 require the exemption in question; so do the acts of '97 and '98. Both require the same thing. There is no repugnancy then. *But it is replied, the exemption by the former is permanent, and by the latter temporary.* This shews that the acts are different, not that they are repugnant. Admitting them, however, to be repugnant, the latter is to be considered as repealing the former so long only as the latter are in force. The repeal or determination of the latter revives the former, (4 Ins. 325. 1 Blk. Com. 90. This principle is recognised in the instance of this very law. The law of '92 imposes on lead, for instance, a specific duty of one cent per pound. The law of '97 exempts this article from duty. These provisions are repugnant, and the latter did necessarily repeal or suspend the former. The same specific duty is now collected on this article. Why? Because the expiration of the law of '98 revives the law of '92; otherwise, and on the construction contended for, lead should only pay an ad valorem duty. If the determination of the law of '97 revives the law of '92 in part, why not entirely?

It is also said that certain expressions in the latter acts strongly infer an intention in the Legislature, that the exemption should cease.

The words relied on are contained in the 2d section of the act of '98. The section is as follows: "And be it further enacted, That the 5th section of said act, except so much thereof as relates to the importation of sulphur and saltpetre, be, and is hereby, continued in force for one year, from and after the 14th June next, and from thence to the end of the next session of Congress thereafter, and no longer: *And that so much of said 5th section as relates to the importation of sulphur and saltpetre be, and is hereby, continued in force for one year, and after the 14th June 1800, and from thence to the end of the next session of Congress thereafter, and no longer.*" The words underscored are the expressions alluded to. The object of the section is two-fold: to continue the 5th section of the preceding act, as to certain articles, for one period, and as to the other articles, to continue it for a different period. The design is to provide for the continuance and determination of both parts of the law. The expression, "and no longer," denotes merely that the law is then absolutely to cease. It is a customary form in all temporary acts; all, then, that can be necessarily inferred, is, that the Legislature intended the act should cease, and of course the exemption, so far as it could be claimed under that act.

An argument against the construction insisted on by the collector and Comptroller, may be derived from attention to views of the Legislature, in passing those several laws. The inducement to the acts of '97, continued by the act of '98, was the danger of a war, and the prudence of providing the country with the means of defence. The provisions were all framed to that end; and as the occasion might be temporary, the law very properly was made so, and was suffered to expire with the reason that produced it. The exemption from duty of saltpetre, provided by the acts of '90 and '92, was to favor the importation of a raw material, and to encourage a useful manufacture. It was dictated by the standing policy of the Government. It was made permanent, because the policy was so on which it was founded. It ought not to be presumed that the Legislature intended to defeat this policy, unless such intention is expressed, or necessarily implied.

It may be demanded why saltpetre is mentioned at all in the acts of '97 and '98. To this it may be answered, it was necessary to be mentioned, as the exportation of it was prohibited. Still, it may be said it was not necessary to be mentioned as an article exempted from duty on the importation. It probably was so mentioned from inattention in the Legislature to the acts of '90, and '92. This supposition is confirmed by a clause in the act of '98. It enacts that saltpetre shall be free of duty for the time mentioned, "any thing in any former law to the contrary notwithstanding." The probability thence is extremely strong, that the former law, exempting this article from duty, was not then recollected. At any rate, it will shew that the Legislature were bent on this exemption; and as they were not then at all considering the expediency of limiting existing exemptions, it is not to be presumed they had particularly in view the limitation of this.

Mr. Steel, the former Comptroller, gave a deliberate opinion on this point, and decided that saltpetre was free of duty after the expiration of the acts of '97 and '98. This opinion is stated in his letter, dated the 30th May, 1800, which was circular, and addressed to all the collectors in the United States. The paragraph alluded to is in these words:

"It may be useful to observe, that all the prohibitions and exemptions contained in the act of Congress, passed on the 14th June, 1797 entitled 'An act prohibiting, for a limited time, the exportation of arms and ammunition, and for encouraging the importation thereof,' and which were revived and continued by an act, passed on the 7th April, 1798, ceased and determined at the end of the last session of Congress. All the articles mentioned in that act (excepting *sulphur and saltpetre, which are permanently exempted by the acts of 10th August, 1790, and 2d May, 1792*) are therefore restored to the same footing, as to importation and exportation, as they were before the passing thereof."

The practice has been in conformity to that opinion, and the importation of saltpetre has been free of duty into all the ports of the United States, until this instance, in this port. This construction, and this practice under it, may not be conclusive on this point, but it certainly may be offset to the authority on the other side. Upon the whole, we are all clearly of opinion that saltpetre may be imported into the United States free of duty.

B. BOURNE,
JAMES BURRILL, Jr.
ASHER ROBBINS.

NEWPORT, September 2, 1803.

Mr. F. Parsons's opinion is requested on the following questions:

- 1st. Is saltpetre, imported into the United States after May 3d, 1802, liable to pay any duty?
- 2d. If it is not, what remedy has the importer, provided the collector should insist upon payment?

OPINION.

Answer, First. The answer to this question depends upon the construction of the several statutes of the United States, imposing duties on imported articles. In the three first acts of Congress laying duties upon imported articles, saltpetre is excepted, and I do not conceive that any doubt can arise upon the freedom of that article from duty, until the passing of the act of June 14, 1797, prohibiting, for a limited time, the exportation of arms and ammunition, and encouraging the importation thereof. In the 5th of this act, it is enacted that all saltpetre, which shall be imported into the United States within the term of two years, from and after the passing of that act, shall be free of duty, any thing in any former law to the contrary notwithstanding. As saltpetre was already free of duty, and would have so remained had this act not passed, no exemption of it from duty could be derived from this act. It was, therefore, so far as related to saltpetre, nugatory, or at most a cumulative provision in its favor *ex abundanti*. Another act afterwards passed, on April 7, 1798, continuing this act, in the 2d section of which it is enacted that so much of the 5th section of the former act as relates to the importation of saltpetre, be continued in force for one year, from and after the 14th June, 1800, and to the then next session of Congress, *and no longer*. This session terminated May 3d, 1802. Now it appears to me very clear that, until May 3d, 1802, saltpetre derived no exemption from this last act, because, had it never have been passed, that article would have been free from duty, as none had, before that time, been imposed on it. The only question remaining is, whether a law continuing an act to a certain time, and no longer, which act exempts from duty a certain article, already free, is to be construed as laying a duty on that article. It is my opinion that no such construction can be admitted. The words, *and no longer*, are mere surplussage; without them, the act would have expired the same day. The act does not provide that saltpetre shall be exempted from duty to that day, and no longer, but that a clause of an act, which

related to the importation of that article, already free from duty, should be in force no longer. If saltpetre is now liable to a duty, it is by virtue of an act which is now expired. If, while in force, it was considered as repealing the former acts, they are now revived by the death of the repealing act. If, while in force, it was only cumulative to the former acts, its repeal can not affect the acts to which it is cumulative. Indeed, it is my opinion that saltpetre, imported after May 3d, 1802, is still free from duty, and I have no doubt but what arises from information, that the present Comptroller is of a different opinion.

Secondly. The regular way is to pay all the duties but on saltpetre; to refuse that payment, and let the collector put the bond in suit. And I should suppose that, when the delay of payment results merely from a dispute about a legal question, in which respectable opinions differ, the credit at the custom house would not be suspended.

THEOP. PARSONS.

November 19, 1803.

Extract of a letter from Mr. J. Parker to Gibbs and Channing, dated Boston, August 24, 1803.

“ I have just received yours of the 20th, and have applied at the custom house; General Lincoln not being there, I obtained the enclosed from the deputy collector. He says they do not demand any duties on saltpetre.”

CUSTOM HOUSE, BOSTON, August 24, 1803.

SIR:

Your question respecting duties on saltpetre may be answered by a reference to a circular letter from the Comptroller of the Treasury, dated May 30, 1800, which shows why saltpetre and sulphur are exempt from duty. They were permanently exempted by an act of Congress, August 10, 1790, and May 2d, 1792, and are now on the same footing as if the subsequent acts never existed.

I am, very respectfully, your obedient servant,

BENJAMIN WOOD, *Deputy Collector.*

JOHN PARKER, Esq.

Copy of a letter from Clement Biddle, Esq. to Gibbs and Channing, dated Philadelphia, August 30, 1803.

GENTLEMEN:

Enclosed is the certificate from our custom house. Mr. Graff, deputy collector, who has been the deputy and chiefly executing the business from the beginning, tells me that no duty has been ever charged on saltpetre; being always entered free.

I am, with great esteem, your obedient servant,

CLEMENT BIDDLE.

PORT OF PHILADELPHIA.

These are to certify, that there was imported into this district on the 2d April, 1803, by Joseph S. Lewis and Co. in the schooner Camilla, Rosseter, master, from Calcutta, the following merchandise, viz. one hundred and eleven bags of saltpetre, free of duty, according to law. Given under my hand, and seal of office, at the custom house, this thirtieth day of August, in the year of our Lord 1803.

JOHN GRAFF, *Deputy Collector.*

W. MACPHERSON, *S. Officer.*

Copy of a letter from Messrs. George Crowninshield and Sons, dated Salem, August 29, 1803.

GENTLEMEN:

In answer to yours of the 20th inst. we have to inform, that only one ship has entered this port with saltpetre this season, and it was admitted free, which appears by the certificate of our collector, herewith enclosed.

We remain, your humble servants,

GEORGE CROWNINSHIELD & SONS.

MESSRS. GIBBS AND CHANNING.

District of Salem and Beverly,

PORT OF SALEM, August 26, 1803.

This certifies, that, on the sixteenth day of May, of the present year, the ship Franklin, Moses Townsend, master, from Calcutta, entered at this port, having on board, one hundred and three bags saltpetre, which was admitted free of impost.

Given under my hand and seal, at Salem, the day and year above written.

WILLIAM R. LEE, *Collector.*

TREASURY DEPARTMENT, December 24, 1804.

SIR:

In answer to your letter of the 7th instant, I have the honor to enclose copies of two letters from the Comptroller of the Treasury to the Secretary, which show the course that was pursued, and the reasons in support of the construction adopted by that officer, in relation to the duty on saltpetre.

Under all the circumstances of the question, when it came before me, in May last, it appeared proper to sustain that construction; leaving it with Congress to provide a legislative remedy, if they thought either the opinion entertained at the treasury erroneous, or the existing provisions inexpedient. An ad valorem duty is, since September, 1803, collected in every port.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HONORABLE JACOB CROWNINSHIELD, *Chairman of the Committee on Commerce and Manufactures.*

Extract of a letter from the Comptroller, dated December 21, 1804.

The limitation of the exemption of saltpetre from duty, by the act of the 7th of April, 1798, expired on the 3d of May, 1802. After that period a diversity of opinion prevailed among the collectors of the customs; some requiring the duty from the importers, whilst others were of opinion that the article still continued exempt from duty. It was not known at the treasury that this difference in opinion, on the construction of the laws relating to the subject, existed, until the case of Gibbs and Channing occurred at Newport. The collector for that port being of opinion

that the article was subject to duty, required it to be paid. Application was made to this Department for a decision of the question. On examining the subject, it was my opinion that the limitation of the exemption expired on the 3d of May, 1802, and the collector was instructed accordingly. The reasons of my opinion are briefly stated in a letter of the 2d of May last to you, a copy of which you will herewith receive, and to which you are referred. I have not altered my opinion. When the law declares that all sulphur and saltpetre which shall be imported into the United States from a foreign country, shall be free of duty until a certain specified day, *and no longer*, in my judgment the exemption must cease on that day, although by a prior act there was no limitation of the exemption. The language of the act of 1798 justifies the construction which I have given, and the negative expressions used clearly manifest the intention of the Legislature.

Messrs. Gibbs and Channing, finding that the duty was insisted on by the collector, executed bonds to secure the payment of it; requesting, at the same time, to be indulged with the usual credit at the custom house, although they should refuse payment, and a suit on their bonds should become necessary to recover the duty. This the collector refused to grant without the approbation of the Comptroller. He addressed me on the subject, and he was instructed to grant their request, as will appear by my letter to him in reply, an extract of which here follows:

Extract of a letter from the Comptroller of the Treasury to William Ellery, Collector of Newport, Rhode Island, dated 14th December, 1803.

“Your letter of the 2d instant is before me. From your representation of the ability and punctuality of Messrs. Gibbs and Channing, I have no doubt but that their refusal to pay the whole of their bonds taken for duties, arises wholly from the circumstance that the duties on the article of saltpetre are included in those bonds. As the laws which relate to duties on saltpetre are susceptible of different constructions, and as the subject is now under the consideration of Congress, I think it proper that they should be indulged with a credit at the custom house, as usual, until a decision shall take place in the case.”

Notwithstanding this construction, Messrs. Gibbs and Channing thought proper to discharge their first bond before a trial was had, or, perhaps, it may have been before a suit was commenced. So that it was in consequence of their own act, and not from any rigor on the part of the treasury, that a legal decision of the question did not take place.

After some time had elapsed, and subsequent to a circular letter from this office, dated 17th September, 1803, to establish a uniform practice at the custom houses, Messrs. Gibbs and Channing again made application to the collector, requesting an amicable suit, and that they should be indulged with credit, as usual, in the mean time. The collector refused to comply, (and I conceive with propriety) deeming the application improper after the circular letter on the subject; and knowing also that a bill which had been brought into the Senate, during the last session, for the purpose of exempting the article, had been rejected by that branch of the Legislature.

Since the circular letter beforementioned, an *ad valorem* duty has been charged on it, and paid, I believe, without exception, throughout the United States, wherever imported. No instance of a refusal has ever come to my knowledge.

If, in the opinion of the Legislature, the circumstances of the country require that saltpetre should be imported, free of duty, without doubt they will pass a law to that effect.

TREASURY DEPARTMENT, *Comptroller's Office, May 2, 1804.*

SIR:

I have not heretofore had leisure to attend to your request, in consequence of General Smith's letter, that I would assign the reasons of my opinion, that saltpetre is not exempt from duty. They are now briefly stated.

By an act of Congress, passed on the fourth day of July, 1789, ch. 2, sec. 1, saltpetre is declared to be free of duty.

By an act of the 10th of August, 1790, ch. 39, sec. 1, saltpetre is again exempted from duty, without limitation of time.

By an act of the 2d of May, 1792, ch. 27, sec. 2, sulphur, among other articles, is added to the list of exemptions.

By an act of the 14th June, 1797, ch. 2, sec. 5, it is enacted, that all sulphur and saltpetre, and many other articles which should be imported into the United States, from any foreign country, within the term of two years from the passing of the act, should be free of duty.

By the act of the 7th of April, 1798, ch. 44, sec. 2, it is provided, that so much of the 5th section of the act of 1797, as relates to the importation of sulphur and saltpetre, be continued in force for one year from the 14th of June, 1800, and from thence to the end of the next session of Congress thereafter, *and no longer*.

It is under the act of 1790, before referred to, and the two last mentioned, that I considered it liable to duty, the exemption, being limited and restrained, by the act of 1798, to the end of the first session of Congress after the expiration of one year from the 14th of June, 1800, in other words, to the third of May, 1802.

The first case which occurred was at Newport, in Rhode Island, where the collector, construing the laws as I do, required an *ad valorem* duty on saltpetre, which had been imported by Messrs. Gibbs and Channing, of that place. As they claimed the exemption, the subject was referred to the Comptroller. The collector was directed by me to insist on the duty.

I consider it a just rule of construction, and which will not be denied, that all the acts which relate to the same subject, are to be considered as one act, and such construction should prevail as will give effect to every part, if it can consistently be done, and a prior act is repealed by a subsequent one, which is repugnant to it, especially where negative expressions are used, although there are no express words of repeal. If we give effect to the last act, which passed in 1798, it must operate as a repeal of so much of the first section of the act of 1790 as exempts, and of the second section of the act of 1792, which continues the exemption, of saltpetre and sulphur, without limitation of time. The act of 1798 provides that so much of the 5th section of the act of 1797, as relates to the importation of sulphur and saltpetre, shall be continued in force for one year after the 14th of June, 1800, and from thence to the end of the next session of Congress thereafter, *and no longer*. The negative expressions used shew the intention of the Legislature as plainly as if the act of 1790 had been repealed in express terms. A contrary construction will render wholly nugatory the two last acts, which is contrary to the established rules of interpretation. The acts of 1797 and 1798 must be considered as void of meaning altogether, if a different construction is to prevail. Why should the articles of sulphur and saltpetre have been introduced, at all, if it was not the intention of the Legislature to limit the exemption?

The counsel for Messrs. Gibbs and Channing contended for the exemption, on the ground that, when a repealing law is itself repealed, the old law revives and emerges into force. The rule is admitted, but it does not apply: the cases are dissimilar. The act of 1797 is not repealed by the act of 1798. The limitation of the exemption by the first, is *extended* by the last of these acts. They contended, also, that, as saltpetre had never been, by any act, directly subjected to duty, it should, after the times limited by these acts, revert to the same state it was in before the limitation was made, and be free of duty; but this appears to me to be fallacious and inconclusive. An exemption from duty for a limited period, implies, with a force not to be resisted, that the duty must be paid, after the limitation expires. It has also been contended that Congress, when they passed the acts of 1797 and 1798, did not know, or did not recollect, the act which exempted saltpetre generally; but this is a supposition too improbable to be seriously urged. And it may be added that it is immaterial whether they have purposely or unintentionally used expressions which amount to a repeal of the law making the exemption.

Since my letter to the collector of Newport, the duties on this article have been generally paid throughout the United States. Whether it is expedient and necessary *now* to apply to the Attorney General for his opinion on the question, remains for you to determine.

I have the honor to be, with great respect, sir, your obedient servant,

G. DUVAL.

ALBERT GALLATIN, Esq. *Secretary of the Treasury.*

[1st SESSION.]

MEDITERRANEAN FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 29, 1807.

TREASURY DEPARTMENT, *December 28th*, 1807.

SIR:

I had the honor to receive your letter, requesting my opinion respecting the propriety of continuing, for a limited time, the duties called the "Mediterranean fund."

I believe, that, in case of war, the revenue will be so much affected, as to render additional duties or taxes necessary; and, although the deficiency may not be sensibly felt during the year 1808, it is proper to provide, at this time, for the year 1809, because the receipts of that year will, in a great degree, depend on the amount of duties accrued during 1808. The non-importation act, or any other measure of a similar nature, will also produce a diminution of revenue, which must be supplied from some other quarter. It is, therefore, only in case, not merely of a continuance of peace, but of an adjustment of differences, and of a repeal of commercial prohibitions and restrictions, that we may calculate on a revenue equal to the estimated amount. In the mean while, extraordinary appropriations have already been made; and the rate of expenditure will, during that state of suspense, be, necessarily, considerably increased.

With that view of the subject, believing the Mediterranean duties to be as eligible, at least, as any other mode of taxation, and it being also more convenient to continue an existing tax than to impose a new one the continuance of that revenue, for a limited time, and whilst the issue of the existing state of affairs remains uncertain, appears to be a provident and wise measure.

As to the amount of the fund itself, I have nothing to add to the information already given. It is evident that it will be affected by any decrease of importation, in the same proportion as the other duties ad valorem.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HONORABLE G. W. CAMPBELL, *Chairman of the Committee of Ways and Means.*

10th CONGRESS.]

[1st SESSION.]

MINT.

COMMUNICATED TO THE SENATE, JANUARY 8, 1808.

To the Senate and House of Representatives of the United States:

I communicate, for the information of Congress, the report of the Director of the Mint, of the operations of that establishment during the last year.

TH: JEFFERSON.

January 8, 1808.

MINT OF THE UNITED STATES, *January 1st*, 1808.

SIR:

At the commencement of the present year, I have the honor of laying before you a report of the operations of the mint, during the last year.

From the enclosed statement of the treasurer, it will appear that, during that period, there have been struck at the mint, gold coins, to the amount of four hundred and thirty-seven thousand four hundred and ninety-five dollars; silver coins, to the amount of five hundred and ninety-seven thousand four hundred and forty-eight dollars and seventy-five cents; and copper coins, to the amount of nine thousand six hundred and fifty-two dollars and twenty-one cents: making the whole amount, *one million and forty-four thousand five hundred and ninety-five dollars and ninety-six cents*; and the number of pieces, *two millions seven hundred and thirty-one thousand three hundred and forty-five*; a sum far exceeding the issues of any former year, since the establishment of the institution.

There are, at this time, in the vaults of the mint, gold and silver bullion, deposited for coinage, to the full amount of two hundred and fifty thousand dollars; and of copper planchettes, in cents and half cents, nearly thirty tons; nor can there be any doubt, that, from the banks in this city, and other sources, there will be a continued ample supply.

You will permit me, sir, to mention, that the act of Congress for continuing the mint at Philadelphia will expire on the fourth day of March next. The attention of Congress will, therefore, it is respectfully hoped, be seasonably directed to that object.

I have the honor to be, with sentiments of the greatest respect and esteem,

Your obedient faithful servant,

R. PATTERSON.

THOMAS JEFFERSON, *President of the United States.*

[1st SESSION.]

ASSAYS OF FOREIGN COINS.

COMMUNICATED TO THE SENATE, JANUARY 19, 1808.

TREASURY DEPARTMENT, *January 16th*, 1808.

SIR:

I have the honor to transmit, herewith, a report prepared in obedience to the directions of the act, entitled "An act regulating the currency of the foreign coins in the United States."

I have the honor to be, very respectfully, Sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the PRESIDENT of the Senate.

The Secretary of the Treasury, in obedience to the directions of the act, entitled "An act regulating the currency of the foreign coins in the United States," respectfully reports:

That assays of the foreign gold and silver coins made current by the act aforesaid, have been made at the mint of the United States; the result whereof will appear by the letter of the Director of the Mint, dated 24th December, 1807, and herewith transmitted.

That it may be thence inferred—

1st. That the gold coins of Great Britain and Portugal, the French crowns and Spanish milled dollars, have not, by the act aforesaid, been rated above their intrinsic value.

2d. That, although the gold coins of France and Spain have, by the act, been rated at the rate of one hundred cents for every twenty-seven grains and two-fifths of a grain of the weight thereof, twenty-seven grains and two-fifths of a grain of the gold coins of France, are worth only ninety-nine cents and three-fourths of a cent; and twenty-seven grains and two-fifths of a grain of the gold coins of Spain are worth only ninety-five cents and three-fourths of a cent.

3d. That, although the parts of a Spanish milled dollar have, by the act, been rated at the rate of one hundred cents for every seventeen pennyweights and seven grains of the weight thereof, that weight, in pistareens, or fifths of a dollar, coined prior to the year 1738, is worth only ninety-nine cents, and in pistareens coined subsequent to the year 1773, is worth only ninety cents and one-tenth of a cent.

4th. That the crowns of France and the parts thereof, have, by the act, been rated at the rate of one hundred and ten cents for every eighteen pennyweights and seventeen grains thereof, but that that weight in five francs pieces, (and it is understood that all the other modern silver coins of France are of the same standard) is worth only one hundred and eight cents and three-fifths of a cent.

And that, in order to reduce those several descriptions of foreign coins to their true value, according to the assays lately made, it would seem proper that they should, hereafter, pass current at the following rates, viz:

Gold coins of France, at the rate of one hundred cents for every twenty-seven grains and one half of a grain of the actual weight thereof.

Gold coins of Spain and the dominions of Spain, at the rate of one hundred cents for every twenty-eight grains and five-eighths of a grain of the actual weight thereof.

Spanish pistareens, at the rate of one hundred cents for every nineteen pennyweights and five grains of the actual weight thereof.

Five francs pieces of France, at the rate of ninety-three cents for every sixteen pennyweights of the actual weight thereof, and in proportion for subdivisions of five francs pieces.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, *January 14th*, 1808.

MINT OF THE UNITED STATES, *December 24th*, 1807.

SIR:

Agreeably to your desire, I have caused assays to be made of the various species of foreign gold and silver coins (as far as could be procured) required by the act of Congress, passed the 10th of April, 1806; the result of which, according to the assayer's report, is as follows:

I. *Gold Coins of Great Britain.*

	Car.	Gr.
No. 1. Made from seven pieces, of dates prior to 1806,	-	22 0
2. Made from seven ditto, of the year 1806,	-	22 0
None of 1807 could be procured.		

II. *Gold Coins of Portugal.*

Made from ten pieces, of dates prior to 1806,	-	22 0
None of subsequent dates could be procured.		

III. *Gold Coins of France.*

No. 1. Made from three pieces, of Lewis XV.	-	21 2
2. Made from three ditto, of Lewis XVI.	-	21 2½
3. Made from two twenty-five franc pieces, of the years 1812 and 1813,	-	21 2½
4. Made from three do. do. do. of the year 1826,	-	21 2½
None of the year 1807 could be procured.		

IV. *Gold Coins of Spain.*

No. 1. Made from ten pieces, of dates prior to 1806,	-	20 3½
2. Made from five ditto, of the year 1806,	-	20 2¾
3. Made from three ditto, of the year 1807,	-	20 3¼

V. *Silver Coins of France.*

	Oz.	Dwt.	Gr.
No. 1. Made from five crowns of Lewis XVI.	10	19	12
2. Made from three five franc pieces, of the years 5, 6, 8, None of subsequent dates could be procured.	10	15	12

VI. *Silver Coins of Spain.*

No. 1. Made from three dollars, of dates prior to 1806,	10	15	00
2. Made from two ditto, of the year 1806,	10	15	06
3. Made from two ditto, of the year 1807,	10	15	00
4. Made from five pistareens, of dates between 1708 and 1737,	10	12	18
5. Made from five ditto, or five-fifths of a dollar, of dates between 1773 and 1778,	9	13	12

From the above report it may be inferred—

1. That the gold coins of Great Britain and of Portugal, being of the same quality or standard with those of the United States, are, by the act of Congress, rated at their true intrinsic value, of twenty-seven grains to one hundred cents.

2. That all the other gold coins have been rated above their intrinsic values. For, comparing them with the standard of the gold coins of the United States, the following will be the results:

Gold coins of France being 21 carats $2\frac{1}{2}$ grains fine; $27\frac{81}{173}$ grains, or $27\frac{468}{17300}$, will be equal in value to 100 cents; and gold coins of Spain, averaging about 20 car. 3 gr. fine; $28\frac{52}{87}$ gr. or $28\frac{326}{10000}$, will equal 100 cents; whereas, by act of Congress, $27\frac{2}{3}$ gr. $27\frac{400}{10000}$, both of the French and Spanish gold coins, are made equal in value to 100 cents.

It may, however, be observed, that all foreign gold coins have now nearly ceased to circulate as a currency in the United States. Deposits of these are still, indeed, frequently made in our banks; but are thence, either sent to the mint for coinage, or re-issued for the purpose of exportation.

3. That the French crowns and Spanish milled dollars have not been overrated; but, in fact, if of full weight, would exceed their legal value by a small fraction of a cent.

4. That the French five franc pieces, the quality being inferior to that of the French crowns 18 dwt. 17 gr. instead of 110 cents, (the legal value of a French crown) would be in value only 108 cts. 6 mills.

5. That of the Spanish pistareens, or fifths of a dollar, 17 dwt. 7 gr. of those of 10 oz. 12 dwt. 18 gr. fine, would only be worth 99 cts. 1 mill, and of those of 9 oz. 13 dwt. 12 gr. no more than 90 cts. 1 mill; whereas, by law, a Spanish dollar of the above weight, (and in proportion for the parts of a dollar) is valued at 100 cents.

I have the honor to be, &c.

R. PATTERSON.

The Honorable ALBERT GALLATIN. *Secretary of the Treasury.*

10th CONGRESS.]

No. 276.

[1st SESSION.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 19, 1808.

SIR:

TREASURY DEPARTMENT, *January 18, 1808.*

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1804, 1805, and 1806.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

A Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, in the years 1804, 1805, and 1806, compared with the amount of Duties collected on the same, respectively.

10th CONGRESS.]

No. 277.

[1st Session.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 21, 1808.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of Paul and Joseph W. Revere, of Boston, in the State of Massachusetts, made the following report:

The petitioners state, that they have, by great application, acquired the knowledge of melting and refining copper ores, and of manufacturing of copper into sheets, bolts, nails, &c., for fastening ships; and that they have, at a great expense, erected furnaces, mills, and other works, for manufacturing the above articles. To encourage them, they solicit that a duty of 17½ per centum ad valorem may be imposed on copper in sheets, as they have no doubt that they can supply the whole quantity at present imported into the United States. They likewise solicit that old copper may, in future, be imported free from duty.

The committee, with a view to possess themselves of information on the subject submitted to their consideration, have delayed to make a report thereon to the present time.

While they are directed, by inclination and a sense of duty, to foster and encourage such manufactures as promise utility to the public, they are conscious of the difficulty of affording to each a just portion of encouragement.

The petitioners have two objects in view. The first is, to procure the imposition of an ad valorem duty of 17½ per centum on the importation of copper in sheets, which is now free from duty. The second is, that old copper, which ought to be considered a raw material, should not be subject to the payment of a duty on importation. To induce the National Legislature to impose the aforementioned duty on copper in sheets, the petitioners state that they have, at considerable expense, erected works which will enable them to supply copper in sheets, commensurate to the demand of the United States. Should this assertion on the part of the petitioners influence Congress to accede to their proposition, and the quantity of copper in sheets furnished by them prove to be insufficient for the demand, the copper smiths and braziers, a respectable class of manufacturers, would sustain injuries that would require time and a correct course of procedure to repair. The copper smiths and braziers are satisfied with the encouragement given to them, by the protecting duties on foreign manufactures of copper, and with the privilege they possess by law of importing copper in sheets, &c. free from duty, which enables them not only to supply all copper utensils necessary for the use and consumption of the United States, but likewise to export to foreign markets a considerable quantity of their manufactures. The salutary operation of the laws in support of those manufacturers is evident: a competition is established among them, and their manufactures, at a moderate price, are to be had on demand.

This state of prosperity may receive a check by an incautious modification of the laws which have produced it. Subjects of this description should never be approached with a rash and innovating hand, lest the ease and comforts of the citizens should be diminished, to prove the efficacy of experiments, as yet, of doubtful issue. The copper smiths and braziers of New York and Philadelphia, in their memorials presented to the House of Representatives, and referred to the committee, assert with confidence, that a supply of copper in sheets, equal to the demands they have for that article, cannot be furnished by the petitioners,

An assertion made with so much confidence, by men whose constant occupations afford the certain means of forming a correct judgment, is deserving of serious attention; and were it not supported by information drawn from other sources, should prevent the doing of any act, that might put to hazard the flourishing state of manufactures, which have supplanted foreign articles of the same kind. The committee have had no satisfactory evidence offered to them, that copper in sheets, in quantity sufficient for the use and consumption of the United States, can be supplied by the petitioners, or that the quality of the same is equal to that which is imported. It becomes the duty of the committee, in order to ascertain whether Legislative interference can, at this time, be justified by existing circumstances, not only to weigh the facts furnished them, but also, to guard sedulously against mischiefs that have too often their origin in hasty Legislative acts, which, not unfrequently, in attempting to give encouragement to manufacturing establishments, fasten on the community oppressive monopolies. The committee being aware that a manufactory, single and without competition, is apt, by having the command of the market, to make an improper use of it, are solicitous to keep the sources of supply as open and as free as possible. In refusing to recommend the imposition of a duty on copper manufactured into sheets, equal to that which is imposed on copper manufactures, the committee are gratified in recollecting that the petitioners receive no inconsiderable encouragement in making copper bolts, spikes, and nails, from the protecting duties payable on those articles when imported. The committee are of opinion that advantages will accrue, not only to the petitioners, but likewise to the community, by permitting the importation of old copper free from duty.

They, therefore, recommend the adoption of the following resolutions:

Resolved, That so much of the petition as prays for the imposition of seventeen and a half per centum ad valorem as a duty on copper manufactured into sheets, is unreasonable, and ought not to be granted.

Resolved, That so much of the petition as prays that old copper may be considered as a raw material, and that the importation thereof, into the United States, may be free from duty, is reasonable, and ought to be granted.

10th CONGRESS.]

No. 278.

[1st Session.]

DRAWBACK OF DUTY ON REFINED SUGAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 4, 1808.

To the Senate and House of Representatives of the United States of America, in Congress assembled, the memorial of the refiners of sugar within the United States, respectfully sheweth:

That, by an act of Congress, passed on the 5th day of June, 1794, a duty of two cents per pound was laid upon all sugars refined within the United States; but, for the encouragement of commerce as well as of domestic manufactures, a provision was inserted in the act, allowing a drawback of the duty so laid, upon all such refined sugar as should be exported to any foreign port or place, and directing that three cents per pound should be added to the drawback, on account of duties paid upon the importation of the raw material.

That, when the Legislature found it expedient to increase the duty upon the importation of raw sugar, the acts, passed successively on the 3d day of March, 1797, and the 13th day of May, 1800, evinced the same policy, by the allowance of an equivalent drawback upon the exportation of sugar refined within the United States.

That, under these regulations, there was allowed upon the exportation of sugar, refined within the United States, a drawback of two cents, on account of the excise upon refined sugar; and a drawback of five cents on account of the import duty upon raw sugar; when the act of Congress for the repeal of the internal taxes was passed, by the operation or construction of which the right of drawback on account of the excise, (the tax that was discontinued by the repeal) and the right of drawback on account of the import, (a tax in no wise effected by the repeal) were indiscriminately abolished.

That your memorialists, anticipating from this change of system, the eventual failure of an important domestic manufacture, deem it a duty to the community as well as to themselves, respectfully, but earnestly, to call the attention of Congress to the subject. It has hitherto, indeed, been the aim of the National Government to collect its revenues from the natural and ordinary consumption of the country, without clogging the industry and enterprise of its citizens, who are engaged in an arduous competition to supply the wants of other nations, through the medium of manufactures and commerce. The difficulties arising from the hazard and expense of new establishments, from the comparative high price of labor, and from the countervailing efforts of great commercial rivals, sufficiently justify this display of Legislative patronage and indulgence; but, even on the strictest principle of fiscal policy, it is surely wise, as well as liberal, to cherish and protect the infancy of those institutions, whose maturity must, on any emergency, afford the surest means of public revenue, as well as constitute the strongest basis of national independence.

That your memorialists with sincerity represent, that the manufacturers and exporters of refined sugar have already experienced very injurious effects from the discontinuance of the drawback, without the consolation of perceiving that the slightest public advantage has been or can be produced. In addition to the unavoidable difficulties which have been briefly stated, they have found it impracticable to manufacture refined sugar for exportation, subject to a heavy duty upon the raw material; while other countries are engaged in the manufacture, free from such impositions, with greater capitals, with more experience, with less expense, and, in some instances, (as in England) with the aid of a bounty from the Government. Already a beneficial and lucrative branch of commerce, for the exportation of refined sugar to the Mediterranean, to the West Indies, and even to places on the continent of Europe, has been cut off. The expensive establishments which were formed throughout the United States, with a view to that commerce, are hastening to decay and ruin. And even the supply of refined sugar for our domestic consumption, under such circumstances of discouragement, will probably be transferred to foreign hands, for foreign emolument.

That your memorialists, with perfect deference, solicit a revisal of the act which has produced these fatal consequences to their manufactures—not in order to obtain a bounty, but simply to be relieved from a grievance. They are not aware, indeed, of any principle of public policy that is opposed to the object of their memorial, and they are confident that such regulations may be devised as will effectually obviate the danger of fraud and deceit. If, however, the cultivation of sugar, in Louisiana, should be suggested as a new obstacle, it is respectfully answered, that the sugar raised there, both on account of its price and its quality, is seldom used by refiners; that, even if used by refiners, the cultivator (whose interest ought not to be exclusively regarded) will have a sufficient advantage in the market by selling his produce free from duty; and that, in such cases, an illicit attempt to obtain a drawback would easily be detected, and should be severely punished.

That, with these impressions, your memorialists confidently appeal to the wisdom, patriotism, and justice, of Congress, praying that the right of drawback may be renewed on all such sugar, refined, within the United States, from raw sugar of foreign growth, as shall be exported to any foreign port or place.

Refiners of sugar in the city of Baltimore.

10th CONGRESS.]

No. 279.

[1st SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 5, 1808.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their report of the 5th of February, 1807, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the fourth day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

GEO. CLINTON, *President of the Senate,*
J. MARSHALL, *Chief Justice of the United States,*
JAMES MADISON, *Secretary of State,*
ALBERT GALLATIN, *Secretary of the Treasury,*
C. A. RODNEY, *Attorney General U. States.*

WASHINGTON, February 5, 1808.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That the balance remaining unexpended at the close of the year 1805, and applicable to payments falling due after that year, which balance, as appears by the statement B, annexed to the last annual report, amounted to one million six hundred and forty-seven thousand four hundred and seventy-five dollars and eighty-nine cents,	\$1,647,475 89
Together with the disbursements made during the year 1806, out of the treasury, on account of the principal and interest of the public debt, which disbursements, as appears by the statement C, annexed to the last annual report, amounted to eight millions nine hundred and forty-eight thousand and six dollars and ninety cents,	8,948,006 90
And with a farther sum, arising from a profit on the remittances from America to Europe, purchased in the year 1806, which profit, as appears by the statement D, annexed to the last annual report, amounted to thirty-five thousand six hundred and ninety-seven dollars and seventy-seven cents,	35,697 77

And, also, with a further sum arising from the difference between the amount in stock of the public debt purchased by the commissioners of the sinking fund in the year 1806, and the moneys applied to the said purchases, amounting, as appears by the statement L, annexed to the last annual report, to four hundred and thirty-seven dollars and ninety-six cents, - - - - 437 96

And amounting, altogether, to ten millions six hundred and thirty-one thousand six hundred and eighteen dollars and fifty-two cents, - - - - - \$10,631,618 52

Have been accounted for in the following manner, viz.

I. There was repaid into the treasury, during the year 1806, on account of the principal of protested bills, as appears by the statement E, annexed to the last annual report, a sum of six thousand dollars, - - - - - \$6,000 00

II. The sums actually applied, during the same year, to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amount, as will appear by the statement A, to eight millions seven hundred and thirty-nine thousand two hundred and sixty dollars and forty-two cents, viz:

1. Paid in reimbursement of the principal of the debt, - - - - - \$4,828,479 00

2. Paid on account of the interest and charges on the same, - - - - - 3,910,781 42

8,739,260 42

III. The balance remaining unexpended at the close of the year 1806, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the statement B, to one million eight hundred and eighty-six thousand three hundred and fifty-eight dollars and ten cents, - - - - - 1,886,358 10

\$10,631,618 52

That, during the year 1807, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt, viz:

I. On account of the reimbursement and interest of the domestic debt, - - - - - \$5,833,441 32

II. On account of the domestic unfunded debt, - - - - - 2,119 53

III. On account of the principal and interest of the foreign debt, and of the interest on the Louisiana stock, - - - - - 511,904 99

Amounting, altogether, as will appear by the annexed list of warrants, C, to six millions three hundred and forty-seven thousand four hundred and sixty-five dollars and eighty-four cents, - - - - - 6,347,465 84

Which disbursements were made out of the following funds, viz:

I. From the funds constituting the annual appropriation of eight millions of dollars for the year 1807, viz:

From the fund arising from the interest on the debt transferred to the commissioners of the sinking fund, as per account I, - - - - - 958,292 04

From the funds arising from the sale of public lands, being the amount of moneys paid into the treasury from the 1st October, 1806, to the 30th September, 1807, as per account K, - - - - - 654,319 39

From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels, - - - - - 4,672,068 06

Amounting, altogether, to - - - - - 6,284,679 49

Which sum of - - - - - 6,284,679 49

Together with the sum advanced during the year 1806, on account of the appropriation for the year 1807, and amounting, as appears by the last annual report, to 1,003,790 70

Makes in the whole, - - - - - 7,288,470 19

Leaving, at the close of the year 1807, an unexpended balance of - - - - - 711,529 81

To complete the annual appropriation for the year 1807, of - - - - - 8,000,000 00

II. From repayments into the treasury on account of remittances purchased for providing for the foreign debt, and of advances made to commissioners of loans, and to agents for the purchase of the public debt, as will appear by the statement E, viz:

Repayment of the purchase money and advances, - - - - - 61,189 66

Damages and interest recovered, - - - - - 364 54

61,554 20

III. From the moneys appropriated by law for paying commissions to agents employed in the purchase of remittances for the foreign debt, being the amount paid at the treasury during the year 1807, for that object, as will appear by the statement C, - - - - - 1,232 15

That the abovementioned disbursements, together with the above stated balance of - - - - - 6,347,465 84

Which remained unexpended at the close of the year 1806, and with a sum arising from profit on remittances from America to Europe, purchased in the year 1807, and amounting, as will appear by the statement D, to - - - - - 1,886,358 10

And amounting, altogether, to eight millions two hundred and forty-three thousand two hundred and fifty-one dollars and fifty-two cents, - - - - - 9,427 58

And amounting, altogether, to eight millions two hundred and forty-three thousand two hundred and fifty-one dollars and fifty-two cents, - - - - - \$8,243,251 52

Will be accounted for in the next annual report, in conformity with the accounts which shall then have been rendered to the Treasury Department.

That, in the meanwhile, the manner in which the said sum has been applied, is estimated as followeth:

I. The repayments into the treasury on account of principal, have, during the year 1807, amounted, as by the abovementioned statement E, to - - - - - 61,189 66

II. The sums actually applied during the year 1807, to the principal and interest of the public debt, are estimated as followeth:

1. Paid in reimbursement of the principal of the public debt, - - - - - 3,729,163 39

2. Ditto, on account of interest and charges on the same, - - - - - 3,633,408 66

7,362,572 05

As will appear by estimate F.

III. The balance remaining unexpended at the close of the year 1807, and applicable to payments falling due after that year, is estimated, as per estimate G, at - - - - - 819,489 81

\$8,243,251 52

That, in conformity with the proceedings and resolutions of the commissioners of the sinking fund, of the 23d of March, 1807, a copy whereof, M, is annexed, \$866,700 eight per cent. stock, were purchased for \$890,520 75 specie; and \$300,007 62 exchanged six per cent. stock, were purchased for \$293,454 22 specie; as will appear by statement L.

That the whole of the unexpended balance of the annual appropriation of eight millions of dollars, for the year 1807, and amounting, as above stated, to \$711,529 81, will be wanted in aid of the annual appropriation of eight millions of dollars for the present year, for the purpose of effecting the payments on account of interest on the public debt, and of reimbursing the stock bearing an interest of eight per cent. which becomes redeemable on the first day of January, 1809.

And that the statement H exhibits the amount of stock transferred to commissioners of the sinking fund, in trust for the United States, to the 31st of December, 1807, including the sum of \$5,934 24 transferred in the year 1807, in payment for public lands.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, February 4, 1808.

A.

Statement of the application, during the year 1806, of the funds provided for the payment of principal and interest of the public debt.

I. Payments on account of the principal of the public debt.

1. Of the domestic debt, viz:

Reimbursement of old six per cent. stock,	-	-	-	-	\$1,083,740 01
Reimbursement of deferred stock,	-	-	-	-	367,772 29

As per treasury report No. 19,518,

Amount of six per cent. and deferred stocks purchased by the commissioners of the sinking fund, per statement L, annexed to last annual report,	-	-	-	-	\$1,451,512 30
	-	-	-	-	17,517 61

Reimbursement of the whole of the Navy 6 per cent. stock,	-	-	-	-	711,700 00
---	---	---	---	---	------------

Reimbursement of the whole of the 5½ per cent. stock,	-	-	-	-	1,847,500 00
---	---	---	---	---	--------------

2. Unfunded registered debt, including arrearages of interest reimbursed,	-	-	-	-	249 09
---	---	---	---	---	--------

3. Of the foreign debt, viz:

				<i>Guilders.</i>	
4th instalment of the loan of 3,000,000, of Jan. 1, 1792,	600,000				
2d instalment of the loan of 3,000,000, of Jan. 1, 1794,	600,000				
6th instalment of the loan of 2,000,000, of Feb. 1, 1784,	250,000				
4th instalment of the loan of 2,950,000, of June 1, 1792,	550,000				

	2,000,000 at 40 cts.	800,000 00
--	----------------------	------------

\$4,828,479 00

II. On account of interest and charges, viz:

1. On the domestic debt.

Interest for the year 1806, on the several species of the domestic funded debt, as settled at the treasury,	-	-	-	-	(a.) \$3,119,187 65
---	---	---	---	---	---------------------

Interest on Louisiana stock domesticated,	-	-	-	-	300 00
---	---	---	---	---	--------

2. On the foreign debt.

	<i>Guilders.</i>
Interest paid on Dutch debt at Amsterdam,	244,000
Premiums on loan of 1st Feb. 1784,	22,500

	266,500 at 40 cts.	\$106,600
--	--------------------	-----------

Interest on Louisiana stock from 1st July, 1805, to 1st July, 1806, viz:

	<i>Guilders.</i>
Payable in Amsterdam,	\$300,000
Payable in London,	(b.) 374,700

674,700

Commissions and charges, viz:

At Antwerp,	-	-	<i>Guilders,</i> 480 19 10 at 40 cts.	(c.) 192 39
-------------	---	---	---------------------------------------	-------------

At Amsterdam, including Louisiana stock,	-	-	7,539 4 0 at 40 cts.	3,015 68
--	---	---	----------------------	----------

At London, on Louisiana stock,	£421 10 8 at 4s. 6d.	(b.) 1,873 48
--------------------------------	----------------------	---------------

Commissions on purchase of bills in America,	-	-	4,912 22
--	---	---	----------

791,293 77

3,910,781 42

\$8,739,260 42

NOTES TO STATEMENT A.

(a.) The amount of interest payable in the year 1806, by the treasury statement, is \$3,119,187 53 To which is here added this sum, being a difference in the calculation of dividends, and settlement of accounts in the year 1806, 12

\$3,119,187 65

(b.) By an error in the bankers' accounts at London, the sum actually charged by them for interest and charges on the Louisiana stock, is £33 18s. 5d. more than is here stated; which error arose from their having charged, on the 1st January, 1806, interest for the preceding half year on \$6,250,000, while the interest actually payable by them was only on \$6,245,000; the sum of \$5,000 having been domesticated, and the interest made payable in America. This error in the amount of interest is \$150, equal to £33 15 0 And the commission overcharged on that sum, 3 5

£33 18 5

(c.) No expenditures for charges took place at Antwerp during the year 1806, the whole of the debt due there having been discharged in 1805; but the accounts of Mr. De Wolf, the banker at that place, having been received and adjusted since the last annual report of the sinking fund, it has been found that the balance due to him for commissions and charges, on the final payment of the loan at Antwerp, was *Guilders*, 480 19 10 more than had been estimated; which sum, to make the general accounts correspond, is here introduced as a charge in 1806.

TREASURY DEPARTMENT, Register's Office, January 25, 1808.

JOSEPH NOURSE, Register.

B.

Statement of the provision, made before the 1st day of January, 1807, for the payment of the principal and interest of the Public Debt falling due after the year 1806.

I. On account of the Foreign Debt.			
1st. Cash in the hands of commissioners and agents in Europe, viz:			
In Amsterdam, on 31st Dec. 1806, as per treasury report, No. 19,382, (a.)	- - - - -	G. 3,420,796 5 3	
From which deduct a balance due the commissioner in Antwerp, per treasury report, No. 19,332, - - - - -	- - - - -	1,248 1 0	
		<u>3,419,548 4 3</u>	
		at 40 cents, \$1,367,819 28	
In London, per account rendered, of December 31st, 1806, £43,935 0 5, (b.) at 4s. 6d.	- - - - -	195,266 76	
			1,563,086 04
2d. Remittances outstanding, viz:			
Amount paid for at the treasury, and remitted to Amsterdam, before the 1st January, 1807, but not received by the commissioners till after that day, - - - - -	Guilders 780,000	at 40 cents,	312,000 00
3d. Amount of payments made at the treasury, before the 1st January, 1807, for bills which have been protested for non-payment, and which, on that day, had not been repaid into the treasury, (c.) - - - - -			
			37,857 00
			1,912,943 04
II. Deduct amount short provided on account of the Domestic Debt, as follows:			
The demands unsatisfied on the 1st January, 1807, were the following, viz:			
1st. The dividends payable by commissioners of loans, including the dividend due on that day, and exclusive of dividends no longer demandable at their offices, - - - - -			
			1,475,926 45
2d. Unclaimed dividends payable at the treasury, - - - - -			
			21,114 83
			1,497,041 28
The provision made for the above object was as follows:			
1st. Cash due from commissioners of loans deceased and out of office, - - - - -			
			8,156 52
2d. Cash in the hands of commissioners of loans in office, - - - - -			
			1,460,899 82
3d. Amount over advanced at the treasury, for reimbursement of the 5½ per cent. stock, - - - - -			
			1,400 00
			1,470,456 34
Leaving the sum short provided, on 1st Jan. 1807, to meet all the payments on account of the domestic debt, - - - - -			
			26,584 94
Total amount of provision for public debt remaining unapplied on 31st Dec. 1806,			
			\$1,866,358 10

NOTES TO STATEMENT B.

- (a) The balance in the hands of the commissioners at Amsterdam, by the treasury report referred to, is G. 3,422,017 15 3
 In which is included a sum of G. 1,221 10, transferred by the commissioners, in the year 1806, from the account of Robert R. Livingston, (being a balance remaining to his credit, of moneys remitted for the purchase of books for Congress) and placed to the credit of the account of Dutch debt. This sum, at the end of the year 1806, not having been transferred in a corresponding manner, on the books of the treasury, is deducted from the balance then stated to be in the hands of the commissioners on account of the Dutch debt, 1,221 10
G. 3,420,796 5 3
- (b.) The balance stated in the bankers' accounts, (adding the dividend of Jan. 1, 1807, charged by them one day before it was payable) is £43,901 2, to which is added, £33 18 5, for an over charge made by them in their account of Dec. 31, 1805, as explained in note (b.) to statement A. above.
- (c.) Statement of protested bills, outstanding Dec. 31, 1806.
- | | | | | |
|--|------------------|---------------------------|-----------------|--------|
| Purchased before 1802, | A. Brown's bill, | for G. 60,000 | \$24,000 | |
| Purchased in 1802, | { | Brown and Hackman's bill, | 60,000 | 24,000 |
| | | Beal Owings' bill, | 20,000 | 8,000 |
| | | <u>G. 140,000</u> | <u>\$56,000</u> | |
| Deduct a partial repayment made on the above bills, in 1805, - - - - - | | | | |
| | | | 18,143 | |
| Leaves the sum in statement B, - - - - - | | | | |
| | | | <u>\$37,857</u> | |
- The protested bills, outstanding December 31, 1805, per note (a.) to statement B, annexed to the annual report, dated Feb. 4, 1807, amounted to - - - - - \$43,857
 Since that time, no bills have been protested; and the amount repaid in 1806, per statement E, annexed to the report of Feb. 4, 1807, amounted to - - - - - 6,000
 And left outstanding, on 31st Dec. 1806, as here stated, - - - - - \$37,857

TREASURY DEPARTMENT, Register's Office, January 25, 1808.

JOSEPH NOURSE, Register.

F.

An estimate of the application made in the year 1807, of the funds provided for the payment of the principal and interest of the Public Debt.

I. On account of the Principal.			
1st.	Amount of eight per cent. and exchanged six per cent. stock, purchased by the commissioners of the sinking fund, per statement L, herewith,	\$1,166,707 62	
2d.	Reimbursement of the six per cent. and deferred stocks, estimated at	1,484,336 24	
3d.	Reimbursement of the four and a half per cent. stock	176,000 00	
4th.	Reimbursement of the unfunded registered debt, including arrearages of interest,	1,481 77	
5th.	Reimbursement of the debt due to foreign officers, including arrearages of interest,	637 76	
6th.	Reimbursement of the foreign debt, viz:		
	Guilders at 40 cts.		
	Last instalment of loan of 3,000,000, of January 1, 1792,	600,000	
	Third instalment of loan of 3,000,000, of January 1, 1794,	600,000	
	Last instalment of loan of 2,000,000, of February 1, 1784,	500,000	
	Last instalment of loan of 2,950,000, of June 1, 1792,	600,000	
	2,300,000=	920,000 00	
			\$3,729,163 39
II. On account of interest and charges.			
1st.	Interest on the domestic funded debt, estimated, for 1807, at	\$2,849,567 38	
2d.	Interest on Louisiana stock, domesticated,	840 00	
3d.	Commissions to agents for purchase of stock,	2,900 38	
4th.	Difference between moneys applied to purchase of stock, and the amount of stock purchased,	17,267 35	
5th.	Interest and charges on foreign debt, viz:		
	Guilders at 40 cts.		
	At Amsterdam,	158,000	
	Premiums at Amsterdam, (on loan of Feb. 1, 1784)	50,000	
	Charges at Amsterdam,	2,176 10	
	210,176 10=	\$84,070 60	
	Interest and charges on Louisiana stock, in London and Amsterdam,	677,530 80	
		761,601 40	
	Commissions to agents in America, for purchasing bills,	1,232 15	
			3,633,408 66
			\$7,362,572 05

G.

An estimate of the funds provided, before the 1st January, 1808, for the payment of the principal and interest of the public debt, falling due after that day.

1. On account of the foreign debt.

Cash in the hands of commissioners and agents in Europe, December 31, 1804, per preceding statement B,	-	-	-	-	\$1,563,086 04
Remittances, outstanding on 31st December, 1806, per same statement,	-	-	-	-	312,000 00
The remittances made during the year 1807, per preceding statement D, are as follows, viz:					
To Amsterdam,	-	guilders, 307,195 10, at 40 cents,	-	\$122,878 20	
	-	francs, 79,999 50, at $5\frac{3333}{10000}$ per dollar,	-	15,000 00	
				<u>137,878 20</u>	
To London, £86,000 at 4s. 6d.	-	-	-	-	382,222 22
					<u>520,100 42</u>
Total to be accounted for,					
The amount applied during the year 1807, per preceding estimate F, is calculated	-	-	-	-	\$2,395,186 46
to have been, for principal,	-	-	-	-	920,000 00
For interest and charges,	-	-	-	-	761,601 40
					<u>1,681,601 40</u>
The balance in the hands of commissioners and agents in Europe, or in the remittances outstanding, may, therefore, be estimated, on 31st December, 1807, to be					
	-	-	-	-	\$713,585 06
The amount of protested bills outstanding on the same day was as follows, viz:					
Purchased before and in 1802,	{	A. Brown's bill,	-	G. 60,000	\$24,000
		Brown & Hackman's do.	-	60,000	24,000
					} In suit
				<u>48,000</u>	
Of which there had been received, in part, previous to 1807,	18,143				
And in the year 1807,	-	-	-	16,500	
				<u>34,643</u>	
Remains outstanding,	-	-	-	-	<u>13,357 00</u>
					<u>726,942 06</u>

2. On account of the domestic debt.

Cash in the hands of agents, for the purchase of stock on the 31st Dec. 1807, per statement L, herewith,	-	-	-	-	110,804 92
From which deduct unclaimed dividends demandable at the treasury, and not yet advanced to the bank for payment to the creditors, estimated at	-	-	-	-	<u>18,257 17</u>
					<u>92,547 75</u>
					<u>\$819,489 81</u>

RECAPITULATION.

The balance remaining unexpended Dec. 31, 1806, per preceding statement B, was	-	\$1,886,358 10
Amount advanced from the treasury, in the year 1807, per preceding statement C,	-	6,347,465 84
Profit in foreign exchange, in the year 1807, per preceding statement D,	-	9,427 58
		<u>\$8,243,251 52</u>
The amount estimated to have been applied to the public debt, in 1807, per preceding estimate F, is		
Repayments into the treasury, in 1807, on account of the principal of advances for the domestic debt and of foreign bills of exchange protested, per preceding statement E,	-	61,189 66
Provision in advance, applicable to the payments of the year 1808, per preceding estimate G,	-	819,489 81
		<u>\$8,243,251 52</u>

H.

A General Statement of the several Stocks transferred to the United States, to 31st December, 1807, the interest on which, by the acts of the 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

	Old six per cent. stock.	Three per cent. stock.	Deferred 6 per cent. stock.	Five per cent. stock.	5½ per cent. stock.	4½ per ct. stock.	Four per cent. stock.	Navy 6 per ct. stock.	8 per cent. stock.	Exchanged 6 per ct. stock.	Amount of the several species of stock.
Reimbursement of the foreign debt, to the 31st Dec'ber, 1806, of the Navy 6 per cent. stock,	-	-	-	\$7,480,000	-	\$820,000	\$2,500,000	-	-	-	\$10,800,000 00
of the five and one half per cent. stock,	-	-	-	-	-	-	-	\$711,700	-	-	711,700 00
of the four and one half per cent. stock,	-	-	-	-	\$1,751,742 53	-	-	-	-	-	1,751,742 53
Purchased with moneys received on account of surplus duties, to the end of 1790,	\$439,016 12	\$401,072 90	\$631,786 86	-	-	176,000	-	-	-	-	†1,471,875 88
Purchased on account of the loan of \$2,000,000, of 12th August, 1790,	353,604 95	31,731 94	137,588 66	-	-	-	-	-	-	-	522,925 55

TREASURY DEPARTMENT, Register's Office, 25th January, 1808.

JOSEPH NOURSE, Register.

M.

At a meeting of the Commissioners of the Sinking Fund, on the 23d day of March, 1807.

Present: JAMES MADISON, Secretary of State,
ALBERT GALLATIN, Secretary of the Treasury,
CÆSAR A. RODNEY, Attorney General.

The Secretary of the Treasury laid before the Board a report, dated the 21st of March, 1807, which was read, and is as follows:

"That the payments to be made during the year 1807, on account of the public debt, are estimated as followeth, viz:

Annual interest and reimbursement of 8 per cent. on 41,800,000 dollars nominal amount of the six per cent. and deferred stocks,	- - - - -	\$3,344,000
Interest on 19,020,000 dollars, 3 per cent. stock,	- - - - -	50,600
do. on 6,360,000 dollars 8 per cent. do.	- - - - -	508,800
do. on 80,000 dollars, 1796 6 per cent. do.	- - - - -	4,800
do. nine months, on 176,000 dollars, 4 $\frac{1}{2}$ per cent. do.	- - - - -	6,000
do. on 6,250,000 dollars, Louisiana stock, in London, including commission,	- - - - -	276,800

Remittances wanted to complete the payments in Holland, to the 1st January, 1808, inclusive, \$4,811,000
39,000

Leaving a sum of \$4,850,000
3,150,000

To be applied in order to complete the annual appropriation of \$8,000,000

And that the said sum of 3,150,000 dollars, may be applied—

1st. To the reimbursement of the four and a half per cent. stock, amounting to 176,000 dollars, and which is the only species of debt redeemable at the pleasure of the United States, not yet reimbursed.

2d. To the purchase, at the rates fixed by law, of the eight per cent. stock.

3d. To the purchase of the new six per cent. stock, which may be created by the subscriptions of the old six per cent. deferred, and three per cent. stocks, in conformity with the act, entitled "An act supplementary to the act, entitled "An act making provision for the redemption of the whole of the public debt of the United States," passed February 11, 1807."

Whereupon, it was *Resolved*,

1st. That the Secretary of the Treasury forthwith give public notice of the reimbursement of the four and a half per cent. stock, for the first day of October next, and of the eight per cent. stock, for the first day of January, 1809.

2d. That the sum, which, after making the current payments for the years 1807 and 1808, and after reimbursing the four and a half per cent. stock, as aforesaid, shall remain to complete the annual appropriation of eight millions for those two years, be applied, the President of the United States assenting thereto, to the purchase of the eight per cent. stock, and of the six per cent. stock, which may be created by subscriptions made under the provisions of the act mentioned in the preceding report, not exceeding for either the rates fixed by law.

3d. That such of the cashiers of the Bank of the United States, and of its offices of discount and deposite, as the Secretary of the Treasury shall designate for that purpose, be the agents, under the superintendence of the said Secretary, for making the said purchases; that the said purchases be made at private sale; but that the names of the agents, and the prices given for the stock, or stocks, be published.

4th. That John H. Purviance be appointed agent in London, and John B. Rittenhouse be appointed agent in Amsterdam, to perform the duties prescribed by the acts above mentioned.

JAMES MADISON, *Secretary of State.*

ALBERT GALLATIN, *Secretary of the Treasury.*

C. A. RODNEY, *Attorney General.*

Attest, EDWARD JONES, *Secretary to the Commissioners of the Sinking Fund.*

10th CONGRESS.]

No. 280.

[1st SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 9, 1808.

Mr. NEWTON, from the Committee on Commerce and Manufactures, to whom was referred the petition of Samuel Miller, of Wiscasset, in the District of Maine, in the State of Massachusetts, in behalf of himself and others, made the following report:

The petitioners state that they imported from Liverpool, in the ship *Golden Rule*, 9,464½ bushels of salt. They also state, that the ship arrived at quarantine ground, near the harbor of Boston, on the 29th day of June, 1807; on the 2d of July following, she entered the harbor of Boston, and on the next day entry was made of her cargo at the custom house. The petitioners complain, that the collector compelled them to bond the duties on the salt, at twenty cents per bushel, when the law, at the time the entry was made, authorized the exaction of not more than twelve cents per bushel. The petitioners pray that Congress will interpose their powers, and direct a remission of eight cents per bushel, which has been illegally demanded by the collector.

The committee are of opinion that the case which the petitioner presents comes properly under the cognizance of the judiciary. The bonds given to secure the duties on the salt are not, as yet, due. The petitioners have it in their power to raise a question for legal decision, by making a tender of the sum which they think is legally due, and by withholding the payment of that which appears to them to be illegally demanded. The committee are therefore of opinion that the case of the petitioners is not entitled to the interposition of the extraordinary powers of Congress.

The committee recommend the adoption of the following resolution:

Resolved, That the petitioners have leave to withdraw their petition.

10th CONGRESS.]

No. 281.

[1st SESSION.]

CONFLICTING CLAIMS UNDER THE CONVENTION WITH FRANCE, OF THE 30TH APRIL, 1803.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 5, 1808.

TREASURY DEPARTMENT, *March 6th*, 1808.

SIR:

I had the honor to receive your letter of the 4th instant, respecting the bills drawn in favor of Denton, Hall, and Nathan brothers.

I think that it would be very difficult for Congress to investigate the claims of the several parties; nor does it seem proper to give the authority to the accounting officers. It is their province to settle accounts between the United States and individuals, but not to decide on the conflicting claims of individuals, in cases where the United States have no immediate concern. I coincide, therefore, fully, in your opinion, of placing the money in such a manner that the claims may be decided by a court of justice; and I presume that nothing more is necessary than to direct the treasury to pay the amount to the Bank of the United States, to be subject there to the decision of the district or circuit court of the United States for that district where Mr. Hall (the only person named in the bills who resides in America) now resides.

If that mode be adopted, it would be desirable that it should be extended to the bills in the name of Joseph Sands, also deposited in the treasury, and mentioned in Mr. Mollien's letter. This case is at least as complex as

that of Denton, Hall, and Nathan, and there are no others of that description. I enclose the copy of a letter from Denton to Mr. Hall, communicated this day to me, and from which it would appear that Denton revokes Mr. Wellman's power, and appoints Mr. Hall, his attorney.

I am, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

HON. DAVID HOLMES, *Chairman of the Committee of Claims.*

TREASURY DEPARTMENT, *February 18th, 1808.*

The Secretary of the Treasury, to whom was referred the petition of Timothy Wellman, Jr. respectfully reports—

That, previous to the year 1800, Christopher Denton, Edward Hall, and Nathan brothers, had furnished supplies to the colonial Government of St. Domingo, and had received as an acknowledgment of the debt, thereby contracted, certain documents, called *ordonnances*, which, though not punctually paid, were proper evidences in support of one of those claims against the French Government, the payment of which was assumed by the United States, under the "Louisiana convention."

That, although it does not appear that the abovementioned persons were co-partners in trade, yet, each party did not receive *ordonnances* in his own name for his share of the supplies; but those papers were issued promiscuously, sometimes in the name of one of the parties, and sometimes in the joint names of two or more of them.

That the said Denton, Hall, and Nathan brothers, appear to have afterwards divided the said *ordonnances* amongst themselves, according to their respective proportion of supplies, but still without regard to the names inserted in the body of the *ordonnances*; nor did they at the time make any reciprocal assignments so as to enable each to receive his share in his own name.

That what *ordonnances* fell to the share of Nathan brothers, is not known, their claim not having been liquidated under the Louisiana convention, owing, as it is said, to a failure on their part, in presenting the claim, within the limited time, to the proper officer at Paris.

That the *ordonnances* which fell to Edward Hall's share, being partly in his own, and partly in Denton's name, the claim, though presented by the said Hall's sole agent, was liquidated by the French Government, in the joint name of Hall and Denton, and bills, amounting to 138,478 93-100 francs, were accordingly drawn, under the Louisiana convention, by the minister of the United States at Paris, on the treasury of the United States, in favor of Hall and Denton; the payment of which bills was necessarily suspended at the treasury, until Mr. Hall had procured from Denton, an authority to receive payment, copy of which, A, is hereto annexed; which being produced, the bills were, in October last, paid to the said Hall.

And that the *ordonnances* which fell to Denton's share, being partly in his own, partly in Denton's, and partly in Nathan brothers' name; the claim, though presented by the agent of Timothy Wellman, Jr. attorney in fact for Denton, was liquidated by the French Government in the joint name of Denton, Hall, and Nathan brothers; and bills in their joint name, and amounting to 150,117 francs and 4 centimes, were accordingly drawn by the minister of the United States at Paris, on the treasury of the United States; and, by agreement between him and the minister of the French public treasury, transmitted to the treasury of the United States, in order that the rights of the parties interested might be there ascertained before payment. A copy of the bills, of Mr. Armstrong's letter of advice, and of Mr. Mollien's (the minister of the French public treasury) letter and observations, marked B, is hereunto annexed.

Timothy Wellman, Jr. claims payment of those bills, (which are still deposited in the treasury) by virtue of a power of attorney from Christopher Denton, copy of which, marked C, is annexed, and which is considered at the treasury sufficient to authorize him to receive payment, provided that the bills can be considered as Denton's sole property.

Edward Hall, by an affidavit dated 3d July, 1805, copy of which, marked D, is annexed, has stated that the *ordonnances* then in the hands of said Denton, or of said Wellman, or of his agent in Paris, were the sole property of the said Denton, although made payable to Nathan brothers, or to Denton and Hall, and that neither the Nathans, nor he the said Hall, has any right, title, or interest, therein. That affidavit is considered at the treasury as sufficient and conclusive authority to pay to Denton, or to his attorney, Wellman, the above stated bills, so far as relates to any claim on the part of Hall, and notwithstanding the insertion of his name in the body of the bills. Mr. Hall has, however, by letters dated in November, 1806, and April, 1807, copy of which, marked E, is annexed, requested that the bills should not be paid without his approbation. But this application being founded on an alleged debt from Denton to him, cannot affect the property of Denton in these bills, as acknowledged by himself; and those which were Hall's property, having, as above stated, been actually paid to him, though drawn in his and Denton's name, there would be no hesitation in paying immediately to Mr. Wellman, as attorney of Denton, the bills now in the treasury, had they been drawn in the name of Denton and Hall alone.

But the difficulty which has prevented the payment, is the insertion of the name of Nathan brothers in the body of the bills: for, although it is believed, from all the circumstances of the case, that they are truly the exclusive property of Denton, yet the only legal evidence that Nathan brothers have no claim or interest in them, being the abovementioned affidavit of Edward Hall, this, although sufficient against himself, has not been considered, either by the French Government, or at the treasury of the United States, as conclusive evidence against Nathan brothers. And the Secretary of the Treasury being directed by the act of the 10th November, 1803, to pay the amount of the claims, the payment of which have been assumed by the Louisiana convention, on the orders of the minister of the United States at Paris, he has not thought himself authorized to deviate from the tenor of such orders (or bills) by paying their amount without an endorsement, authority, or release, from the persons in whose favor they were drawn; and although Nathan brothers have never claimed payment of these bills, yet no permission or release has been obtained from them.

As it was expressly provided, by the Louisiana convention, that the said claims should be paid by the United States, on the orders drawn by their minister at Paris, and that, in each litigated claim, the French Government should decide definitively; and as the name of Nathan brothers was inserted in the said orders or bills, in conformity with the liquidation made by the French Government, the authority of Congress to interfere in favor of the petitioner, so as to authorize payment without the endorsement or release of the said Nathan brothers, is derived from the transmission of the bills to the treasury assented to by the French Government, and with the intention, as expressed in Mr. Mollien's letter, that the rights of the persons interested should there be ascertained.

It only remains for the Legislature to decide, whether the facts admitted in Mr. Mollien's observations, and those stated in Edward Hall's affidavit, be sufficient to direct that payment should be made in whole or in part to Denton's attorney, notwithstanding the insertion of Nathan brothers' name in the bills. But it is respectfully suggested that, if that course shall be adopted, it will be proper to require the petitioner to give a bond of indemnity, with sureties, for the whole of what he may receive: for there are no means of ascertaining the portion of the bills which may be claimed by Nathan brothers, if such claim should ever hereafter be set up by them.

All which is respectfully submitted.

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

COPY OF BILLS.

No. 1017. Exchange for 37,500 francs.

PARIS, 2d January, 1807.

Pay, on demand, this my first of exchange, (second and third of the same tenor and date unpaid) to the order of Nathan frères, Denton, and Hall, (in pursuance of a liquidation by the Government of France, in this case provided, by the convention between the United States and France, of the 30th April, 1803, the 10th of Floreal, year 11) thirty-seven thousand five hundred francs. Per advice from the undersigned minister plenipotentiary of the United States.

JOHN ARMSTRONG.

To the Treasurer of the United States, Washington.

No. 1018. Same tenor and date, except payable at *thirty days*.No. 1019. Same tenor and date, except payable at *sixty days*.No. 1020. Same tenor and date, except payable at *ninety days*, and is for thirty-seven thousand six hundred and seventeen francs four centimes.

PARIS, 2d January, 1807.

SIR:

I have this day drawn on you, in favor of Nathan frères, Denton, and Hall, (in pursuance of a liquidation by the Government of France, in this case provided by the convention between the United States and France, of the 30th of April, 1803, the 10th of Floreal, year 11) for the following sums, viz:

No. 1017. 37,500. Thirty-seven thousand five hundred francs, at sight.

No. 1018. 37,500. Thirty-seven thousand five hundred francs, at thirty days.

No. 1019. 37,500. Thirty-seven thousand five hundred francs, at sixty days.

No. 1020. 37,617.4. Thirty-seven thousand six hundred and seventeen francs, at ninety days.

JOHN ARMSTRONG,
Minister Plenipotentiary of the United States.

To the Treasurer of the United States, Washington,

See the papers appended.

J. A.

[TRANSLATION.]

PARIS, 31st December, 1806.

I have the honor to transmit you, sir, the account in which are included the two payments to be effected; one of the liquidation made in favor of Nathan brothers, Denton, and Hall; the other, of the balance of the liquidation in favor of Joseph Sands. These payments will be made, as your excellency has proposed in your two last notes of the 20th and 24th of this month, upon the acquittances of Mr. Warden, designated by you to give them to the public treasury; the drafts for the payment of these two liquidations being afterwards transmitted to the treasury of the United States, the rights of the persons interested will there be easily ascertained. I annex to the account some observations relating to the liquidation of Nathan brothers, Denton, and Hall; they may be useful for the illustration of this business.

I pray your excellency to accept the assurance of my high consideration.

MOLLIEN.

To GENERAL ARMSTRONG, &c.

Observations upon the liquidation made in favor of Nathan brothers, Denton, and Hall.

The documents for this liquidation have been produced by Mr. Skipwith, who presented them in the name of Timothy Wellman, Jr. as transferee of Christopher Denton, of Baltimore.

These documents consist of ordonnances delivered at St. Domingo, in the joint names of Nathan brothers, Denton, and Hall. The transfer to Wellman was not established, neither was the exclusive property of Denton proved. The liquidation, therefore, ought to be made, as it has been made, in favor of all those who were designated in the original documents, *Nathan brothers, Denton, and Hall*.

Another liquidation had been made in the name of *Denton and Hall*, for 134,331 61-100 francs. Mr. O'Mealy claimed it, in behalf of Edward Hall, whose powers he held. This payment was made to him in bills, to the order of Denton and Hall, under the Nos. 442, 443, 444, and 445, and under assurances from his excellency the minister plenipotentiary of the United States, that he would transmit the bills to the treasury of the United States.

Mr. Skipwith has, also, claimed payment of the liquidation made in the name of Nathan brothers, Denton, and Hall. But there is this difference between Mr. Skipwith and Mr. O'Mealy, that the latter had at least a regular power from Edward Hall, while Mr. Skipwith does not offer such a one on the part of Denton, nor of Wellman.

However, General Armstrong having authorized Mr. Warden to give an acquittance for this liquidation, and to transmit the bills which may be drawn, to the treasury of the United States, the payment is effected in bills drawn in the joint names of Nathan brothers, Denton, and Hall, in the same manner as the liquidation was made.

It appears that Nathan brothers, Denton, and Hall, have transacted business together, at St. Domingo; that they afterwards divided between themselves the ordonnances which belonged to them jointly; those which fell to Hall, were in the name of Denton and Hall, and they have been liquidated in their joint names.

The treasury of the United States has refused to pay, upon the acquittance of *Hall alone*, the bills drawn in his name, and that of Denton. The acquittance of Denton has been required, or his declaration that he had no pretensions to the bills. Edward Hall, by an act executed on the 23d of July, 1805, before John Gill, notary at Baltimore, has declared, that the ordonnances belonging in common to Nathan and Denton, have been divided between them; that he, Hall, nor Donata Nathan, nor Joseph Nathan, have any pretensions to the ordonnances which are in the hands of Christopher Denton, or of captain Timothy Wellman, Jr. or of his agent at Paris; that these ordonnances are the property of the said Denton, alone, although payable to Nathan brothers, Denton, and Hall. This declaration was fully sufficient no longer to make any procurator or acquaintance necessary from Hall, for the payment of the 150,117 4-100 francs; but it was not available as to the interest of Nathan brothers.

On the other hand, Mr. O'Mealy has presented, in the name of Edward Hall, a petition, in which he announces that Denton, now in England, refuses to make, in favor of Hall, the same declaration that Hall has made for him.

He complains that, in this way, Denton perpetuates the obstacle which prevents the payment to Hall, of the bills drawn in their name; and he demands that the payment claimed by Denton, or in his name, may be suspended, until he shall fulfil the reciprocal obligation, which Hall has already performed, by the act of July 23d, 1805.

Finally, one of the Nathans, now in Europe, refuses, it is said, to acknowledge that neither he or his brother have any pretensions to this liquidation, although included in the decree which has fixed it. It appears that the portion of the ordonnances which fell to the share of Nathan brothers, has not been included in the liquidation of the American debts, owing, as it is said, to the circumstance, that the bearer of their papers did not arrive in France till a long time after the operations of this liquidation were closed.

These observations, and the further information which the parties concerned may be able to furnish, afford the means of adjusting their respective rights.

To the Congress of the United States, the petition of Benjamin Stoddert and John Mason, trustees of Francis Lewis Taney, respectfully sheweth:

That the said Taney, formerly a merchant in Georgetown, being embarrassed in his affairs, in consequence of the non-payment of large sums due him from the Government of France, did, on the 29th July, 1796, convey to your petitioners, in trust, for the benefit of his creditors, all his said debts, and likewise a claim on Joseph Sands, an American citizen, then resident in Paris.

That the creditors of Taney were principally those who had endorsed his bills and notes, or had become his bail in suits to recover money borrowed, to enable him to make the shipments to France, from which his claims, thus transferred to his trustees, arose.

That, soon after executing his trust deed, the said Taney embarked for France, to use his personal influence in adjusting his affairs: for he calculated on a considerable surplus after paying off his debts. But his trustees thought it most prudent to place the power of receiving payment in other hands, and accordingly appointed Mr. Joseph Fenwick their attorney for this purpose, requesting him, however, to avail himself of Mr. Taney's services in ascertaining the sums due.

That, about the year 1794, said Taney contracted with the officers of the French Government for the delivery of a large quantity of leather, in France, and took into partnership with him, in the transaction, Comfort Sands, of New York, and a Mr. Waldo, and these three appointed Joseph Sands, the son of Comfort Sands, their agent in France for the delivery of the leather, and receipt of payment, and the said Comfort Sands advanced to Taney a sum of money, equal probably to his proportion of the adventure.

That the French Government, not paying for the leather agreeable to contract, Comfort Sands brought suit in Philadelphia, where Taney happened to be, for the recovery of the money he had advanced, the payment of which Taney resisted, on the ground that Sands was to take his reimbursement, in the hands of his son, out of the money arising from the leather. Bail was procured by your petitioners and others, who ultimately had to pay Comfort Sands, on the suit, upwards of eighteen thousand dollars.

That, in the mean time, Taney had come to a settlement at Paris, with Joseph Sands, by arbitration, and it was awarded and acknowledged by Sands, on the 19th August, 1797, that there remained in his hands, due to Taney, 31,616 livres, 3 sous, 5 deniers, to be paid in specie; 39,458 livres 4 9 in Government protested bills, and livres 86,761 16 5, payable in the debt due from the French Government, and standing on the Government books in the name of Joseph Sands.

A transfer was not made at the time of the debt, because (as it is presumed) on all such transfers about 5 per cent. on the amount was required to be paid in specie to the officers of the Government, and at this period, 5 per cent. in specie amounted to as much as the market value of the debt.

That, under the Louisiana convention, there was liquidated, in the name of Joseph Sands, upwards of 500,000 francs, no part of which was due to himself, as he was the mere agent of others, as is acknowledged by himself, by accounts in the Treasury Department.

That bills have been paid at the treasury, drawn by our minister at Paris, for all of the debt in Joseph Sands' name, except for about 119,854 livres, which is about the amount of the livres 86,761 14 5, Taney's part of the debt on the Government books, in Sands' name, with the interest allowed on settlement under the Louisiana convention.

That, on the suggestion of Mr. Fenwick, the attorney of the trustees, as he informs them, the truth of which is confirmed in a letter from Mr. M'Pherson at Paris, the attorney of Sands, to the Secretary of the Treasury, General Armstrong has sent bills for 119,854 francs, drawn in the name of Joseph Sands, to our treasury, for the rightful owners.

That your petitioners entertain no doubt of being able to prove, before any competent tribunal, that they are the rightful owners. That the plea set up by Joseph Sands against their claim, to wit: that, in 1798, he transferred to James Swan, on Taney's order, the sum due to Taney, but in fact due to the trustees, is fallacious. That the said Swan knew at the time, and more than a year before, that Taney had no control over the debt, and that, so early as the 1st of August, 1797, several months before the pretended transfer to Swan, Joseph Sands must also have known it, if neither from his father, Taney himself, nor from Fenwick, the attorney of the trustees, from the circumstance of the deed itself from Taney, to his trustees, having been filed in the office of the American consul general at Paris, for the information of all concerned. But, in truth, illegal and impotent as such a transfer from Sands to Swan, on Taney's authority, in 1798, must appear, had such transfer been really made, your petitioners have no doubt of being able to ascertain, if needful, that no such transfer was made, and that the whole debt, as standing on the French Government books, as due to Joseph Sands, in 1797, when the settlement was made with Taney, actually remained due until the final adjustment, under the Louisiana convention. It is a circumstance conclusive against the said Swan, in this pretended transaction, to deprive your petitioners, and the creditors of Taney, of their just claim, that, in 1804, he exhibited against Taney, before the commissioners under the Louisiana convention, an account commencing before 1796, for a large sum, and actually got paid by bills drawn by our minister in favor of the cashier of the French Government, out of a debt liquidated under the convention, due to Taney, in which account, thus exhibited by Swan, no credit is given for any transfer of debt by Joseph Sands, as will appear by reference to a true copy of the account in the Treasury Department.

Wherefore, your petitioners respectfully pray, that Congress may be pleased to take such order in the business as in their wisdom they may deem most proper to procure a due investigation of the case, and to ensure justice to the parties.

And your petitioners will, as in duty bound, ever pray, &c.

BENJAMIN STODDERT,
JOHN MASON.

March 8, 1808.

10th CONGRESS.]

No. 282.

[1st Session.]

PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 14, 1808.

TREASURY DEPARTMENT, April 9, 1808.

Sir:

I have the honor to transmit a statement of the public debt on the 1st days of January, 1791, to 1807, respectively, together with sundry explanatory statements and notes, prepared in pursuance of the resolution of the House of Representatives, of the 8th of January, 1807.

The amount of the public debt of the United States, unprovided for, on the days abovementioned, respectively, and also the estimated amount of the said debt on the 1st day of January, 1808, together with the progress and decrease of the same, during certain periods, will appear from the following table:

	Amount of debt.	Years.	Increase.	Decrease.
1st January, 1791, - - -	\$75,169,974 21	1791 }		
" 1792, - - -	76,373,767 16	1792 }	\$2,418,023 72	
" 1793, - - -	77,587,997 93	1793 }	- -	\$1,591,827 37
" 1794, - - -	75,996,170 56	1794 }	5,646,102 40	
" 1795, - - -	78,149,937 83	1795 }		
" 1796, - - -	81,642,272 96	1796 }		
" 1797, - - -	80,934,023 54	(a) }	- -	4,242,363 61
" 1798, - - -	78,494,165 75	1798 }		
" 1799, - - -	77,399,909 35	1799 }	4,600,258 01	
" 1800, - - -	81,633,325 74	1800 }		
" 1801, - - -	82,000,167 36	1801 }		
" 1802, - - -	78,754,568 70	1802 }	- -	7,268,244 51
" 1803, - - -	74,731,922 85	1803 }	10,621,720 37	
" 1804, - - -	85,353,643 22	1804 }		
" 1805, - - -	80,534,058 65	(a) }	- -	20,653,643 22
" 1806, - - -	74,542,957 62			
" 1807, - - -	67,731,645 62	1807 }		
" 1808, - - -	64,700,000 00			

During the first ten years of that period, the debt has increased near seven millions of dollars. It has been diminished more than seventeen millions during the last seven years.

I have the honor to be, very respectfully, sir, your most obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

A.

Statement of the debt of the United States, on the 1st January, in the years 1791, 1792, 1793, 1794, 1795, 1796, 1797, 1798, 1799, 1800, 1801, 1802, 1803, 1804, 1805, 1806, and 1807.

	1791.	1792.	1793.	1794.	1795.	1796.	1797.	1798.
Foreign debt,	(a.) \$12,812,831 92	\$14,561,871 41	\$15,494,248 08	\$14,308,411 16	\$14,727,710 85	\$11,939,000 00	\$11,939,000 00	\$11,059,000 00
Domestic debt:	(b.) 1,143,106 28	6,359,296 47	37,722,628 07	37,790,327 02	41,705,774 79	41,273,425 27	40,769,901 28	40,143,208 49

VI. Louisiana six per cent. and American claims assumed by the Louisiana Convention.

Years.	Louisiana six per cent. incurred.	American claims assumed, &c.	
		Assumed.	Discharged.
1803	\$11,250,000	\$3,750,000	
1805	- - - - -	- - - - -	\$1,692,586 62
1806	- - - - -	- - - - -	1,517,342 50
Total,	\$11,250,000	\$3,750,000	\$3,209,929 12

GENERAL RECAPITULATION

Of Payments on account of, and of Additions to, the Public Debt.

I.

In relation to the several species of Debt.

1. Commutation of debts which made no alteration in the real amount.

Foreign Debt, viz:

Balance due on the French debt, funded at 5½ and 4½ per cent. by which operation those stocks were credited, - - - - - \$2,024,900 00

Unfunded debt on 1st January, 1791, which was funded subsequent to that day, and prior to the 1st January, 1807, viz:

The total amount of unfunded debt, funded during that period, amounted, as per recapitulation of No. 5 of this statement, to - - - - - \$61,819,848 74

From which deduct debts which had accrued subsequent to 1st January, 1791, and included in that sum, and amounting, as per said recapitulation, to - - - - - 1,425,881 21

60,393,967 53

\$62,418,867 53

2. Actual Payments.

On foreign debt, (deducting 5½ and 4½ per cent. stocks) - - - - - \$17,638,632 47

Six per cent. and deferred stocks, - - - - - 13,421,004 63

Three per cent. - - - - - 628,234 33

Five and half per cent. - - - - - 1,848,900 00

Eight per cent. - - - - - 119,300 00

Navy six per cent. - - - - - 711,700 00

Temporary loans, - - - - - 10,376,595 56

Unfunded debt, including the American claims assumed by Louisiana convention, - - - - - 6,541,191 92

51,285,558 91

3. Debts contracted.

Foreign debt, viz:			
Dutch loans,	- - - - -	\$8,262,000 00	
Interest for 1791, on Spanish debt,	- - - - -	8,700 55	
		<u>8,270,700 55</u>	
Six per cent. and deferred, being two-thirds of the interest accrued for the year 1791, on the assumed debt, and funded in said stocks,	- - - - -	575,378 51	
Three per cent. viz:			
One-third of the interest accrued for 1791, on the assumed debt, and funded in said stock,	- - - - -	287,689 26	
Interest accrued from 1791 to 1794 on States' balances, and funded in said stock,	- - - - -	562,813 44	
		<u>850,502 70</u>	
Six per cent. stock credited in 1796,	- - - - -	80,000 00	
Eight per cent. stock,	- - - - -	6,481,700 00	
Navy six per cent. stock,	- - - - -	711,700 00	
Temporary loans,	- - - - -	10,376,595 56	
Unfunded debt, exclusive of American claims assumed by the Louisiana convention,	- - - - -	2,693,903 71	
Debt contracted by the purchase of Louisiana,	- - - - -	15,000,000 00	
		<u>45,040,481 03</u>	

II.

By years exclusive of commutation.

Years.	Actual payments.	Additions.	Increase.	Decrease.
1791	\$3,324,842 86	\$5,089,291 00	\$1,764,448 14	
1792	2,056,208 86	5,180,918 24	3,124,709 38	
1793	3,189,932 63	1,264,703 36	-	\$1,925,229 27
1794	2,420,520 74	4,740,703 36	2,320,182 62	
1795	2,949,415 32	5,964,000 00	3,014,584 68	
1796	2,097,692 74	400,000 00	-	1,697,692 74
1797	2,835,950 21	-	-	2,835,950 21
1798	1,027,324 42	207,465 07	-	819,859 35
1799	1,144,075 42	5,711,700 00	4,567,624 58	
1800	1,419,943 55	1,481,700 00	61,756 45	
1801	2,325,418 55	-	-	2,325,418 55
1802	3,657,945 95	-	-	3,657,945 95
1803	5,627,565 42	15,000,000 00	9,372,434 58	
1804	4,114,970 38	-	-	4,114,970 38
1805	6,588,879 84	-	-	6,588,879 84
1806	6,504,872 02	-	-	6,504,872 02
	<u>\$51,285,558 91</u>	<u>\$45,040,481 03</u>	<u>\$24,225,740 43</u>	<u>\$30,470,818 31</u>

Principal of the debt on 1st January, 1791, as per statement A,	- - - - -	\$75,463,476 52
Debts contracted from 1st January, 1791, to 1st January, 1807, as per above,	- - - - -	45,040,481 03
		<u>120,503,957 55</u>
Deduct actual payments during the same period, as per above,	- - - - -	51,285,558 91
		<u>\$69,218,398 64</u>

C.

Statement of the provision made before the first days of January, of the years 1791—1807, respectively, for the payment of the principal of the public debt, paid afterwards, and for the payment of interest which accrued on that debt subsequent to such days, respectively.

Provision made before the 1st January, 1791.

Cash in the hands of the commissioners at Amsterdam on the 31st December, 1790,	G. 1,115,751 10 8, at 40 cents,	\$446,300 63
Deduct interest which accrued on the Dutch loans to 31st December, 1790, and paid subsequent to that day,	- - - - -	152,798 32
		<u>\$293,502 31</u>

Provision made before the 1st January, 1792.

Cash in the hands of the commissioners at Amsterdam, on the 31st December, 1791,	G. 2,874,652 4 00	
Ditto in the hands of C. J. M. De Wolf,	717,765 17 14	
	<u>3,592,418 1 14, at 40 cents,</u>	1,436,967 24
Deduct interest accrued on 31st December, 1791, and paid subsequent to that day, viz:		
On the domestic funded debt,	- - - - -	\$175,915 30
Do unfunded debt,	- - - - -	158,803 59
Dutch Debt,	- - - - -	245,623 67
Beaumarchais' claim, one year,	- - - - -	2,467 18
		<u>582,809 74</u>
		<u>\$854,157 50</u>

Provision made before the 1st January, 1793.

1. Cash in the hands of the commissioners at Amsterdam on the 31st December, 1792,	-	-	-	-	G. 1,852,486 14, at 40 cents,	\$740,994 68
2. Proceeds of 5,000 shares of the Bank of the United States, sold in 1796, 1797, and 1802, and applied to the redemption of the public debt and domestic loans,	-	-	-	-	-	2,671,860 00
						3,412,854 68

Deduct interest accrued to 31st December, 1792, and paid subsequent to that day, viz:

On the domestic funded debt,	-	-	-	-	\$179,407 92	
Do. unfunded debt,	-	-	-	-	48,350 53	
Dutch debt,	-	-	-	-	314,800 35	
Temporary loans,	-	-	-	-	100,725 41	
Beaumarchais' claim, two years,	-	-	-	-	4,934 36	
						648,218 57
						\$2,764,636 11

Provision made before the 1st January, 1794.

1. Cash in the hands of the commissioners at Amsterdam, on the 31st December, 1793,	-	-	-	-	G. 819,190 4 12	
Ditto in the hands of C. J. M. De Wolf,	-	-	-	-	5,800 11 8	
						824,990 16 4
Ditto transferred in 1802, from Gov. Morris' account, being a balance of 105,000 guilders, remitted for paying the interest on the debt due foreign officers,	-	-	-	-	41,787 10 8	
						866,778 6 12, at 40 cents,
						346,711 33
2. Remittances paid at the treasury before 31st December, 1793, credited by the commissioners in 1794,	-	-	-	-	G. 100,000 00 00, at 40 cents,	40,000 00
3. Proceeds of 5,000 bank shares, as above,	-	-	-	-	-	2,671,860 00
						3,058,571 33

Deduct interest accrued to 31st December, 1793, and paid subsequent to that day:

On the domestic funded debt,	-	-	-	-	43,334 31	
Do. unfunded debt,	-	-	-	-	22,020 93	
Dutch debt,	-	-	-	-	326,275 00	
Temporary loans,	-	-	-	-	228,305 33	
Beaumarchais' claim, three years,	-	-	-	-	7,401 55	
						627,337 12
						\$2,431,234 21

Provision made before the first January, 1795.

1. Cash in the hands of the commissioners at Amsterdam, on the 31st December, 1794,	-	-	-	-	G. 957,500 10 12	
Ditto in the hands of C. J. M. De Wolf,	-	-	-	-	444 5 0	
Ditto transferred in 1802, from Gov. Morris' account, as above,	-	-	-	-	41,787 10 8	
						999,732 6 4, at 40 cents,
						399,892 92
2. Proceeds of 5,000 bank shares, as above,	-	-	-	-	-	2,671,860 00
3. Excess of advances to commissioners of loans, on account of interest accruing on the domestic funded debt, beyond the amount demandable,	-	-	-	-	-	14,713 92
						3,086,466 84

Deduct interest accrued to 31st December, 1794, and paid subsequent to that day, viz:

On the domestic unfunded debt,	-	-	-	-	15,673 54	
Dutch debt,	-	-	-	-	374,608 34	
Temporary loans,	-	-	-	-	88,666 67	
Beaumarchais' claim, four years,	-	-	-	-	9,868 73	
						488,817 28
						\$2,597,649 56

Provision made before the 1st January, 1796.

1. Remittances paid at the treasury in 1795, for the payment of the principal and interest of the Dutch debt, credited by the commissioners at Amsterdam, in 1796.						
Six per cent. stock purchased of the Bank of the United States, and remitted for the payment of the principal and interest of the Dutch debt, in 1795.						
\$640,000 six per cent. stock produced,	-	-	-	-	Guilders, 1,330,268 7	
Whereof, credited in 1795,	-	-	-	-	1,058,043 5	
						272,225 2
At 40 cents,						\$108,890 04
Payments made at the treasury in 1795, for shipments credited in 1796,	-	-	-	-	-	127,500 00
						236,390 04
2. Six per cent. stock, afterwards transferred to the commissioners of the sinking fund.						
The whole amount of six per cent. stock, purchased for remittance, was	660,000					
Whereof was sold,	640,000					
The residue was returned to the treasury, and credited the commissioners of the sinking fund, in first quarter of 1800,	-	-	-	-	-	20,000 00
3. Proceeds of 5,000 bank shares,	-	-	-	-	-	2,671,860 00
						2,928,250 04

Deduct interest accrued to 31st December, 1797, and paid subsequent to that day, viz:

On the domestic unfunded debt,	-	-	-	-	-	-	-	\$21,631 80
Dutch debt,	-	-	-	-	-	-	-	339,608 34
Temporary loans,	-	-	-	-	-	-	-	121,437 50
Beaumarchais' claim, seven years,	-	-	-	-	-	-	-	17,270 26
								<u>499,947 90</u>
								<u>\$734,363 37</u>

Provision made before the 1st January, 1799.

1. Amount transferred, in 1802, from Gouverneur Morris' account, being the balance of guilders, 105,000, remitted for the payment of interest on the debt due to foreign officers,	-	-	-	-	-	-	-	Guilders, 41,787 10 8
Deduct balance due the commissioners at Amsterdam, 31st December, 1798,	-	-	-	-	-	-	-	Guilders, 33,129 15 2
Do. to C. J. M. De Wolf,	-	-	-	-	-	-	-	35 14 0
								<u>33,165 9 2</u>
								8,622 1 6
								At 40 cents, 3,448 83
2. Remittances in bills of exchange, paid at the treasury in 1798, credited by the commissioners in 1799,	-	-	-	-	-	-	-	Guilders, 600,000, at 40 cents, 240,000 00
3. Payments at the treasury before 31st December, 1798, for remittances which have been protested for non-payment, and, on that day, not repaid into the treasury,	-	-	-	-	-	-	-	11,100 00
4. Six per cent. stock, afterwards transferred to the commissioners of the sinking fund,	-	-	-	-	-	-	-	20,000 00
5. Proceeds of 2,200 bank shares,	-	-	-	-	-	-	-	1,287,000 00
								<u>1,561,548 83</u>

Deduct interest accrued 31st December, 1798, and paid subsequent to that day, viz:

On domestic funded debt,	-	-	-	-	-	-	-	\$65,525 88
Do. unfunded debt,	-	-	-	-	-	-	-	22,050 09
Dutch debt,	-	-	-	-	-	-	-	337,275 00
Temporary loans,	-	-	-	-	-	-	-	108,200 00
Beaumarchais' claim, eight years,	-	-	-	-	-	-	-	19,737 44
								<u>552,788 41</u>
								<u>\$1,008,760 42</u>

Provision made before the 1st January, 1800.

1. Cash in the hands of the commissioners at Amsterdam, on the 31st December, 1799,	-	-	-	-	-	-	-	Guilders, 341,621 1 15
Do. transferred from the account of Gouverneur Morris,	-	-	-	-	-	-	-	41,787 10 8
								<u>383,408 12 7</u>
								At 40 cents, 153,363 45
2. Remittances paid at the treasury before 31st December, 1799, credited by the commissioners, in 1800,	-	-	-	-	-	-	-	Guilders, 840,000
Bills of exchange paid at the treasury before 31st December, 1799, which, having been protested for non-payment, were replaced, with damages, in bills credited by the commissioners in 1800,	-	-	-	-	-	-	-	57,900
								<u>897,900</u>
								At 40 cents, 359,160 00
3. Payments at the treasury before 31st December, 1799, for remittances, which have been protested for non-payment, and, on that day, not repaid into the treasury,	-	-	-	-	-	-	-	Guilders, 120,000
								At 40 cents, 48,000 00

10th CONGRESS.]

No. 283.

[1st SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, ON THE 20TH OF APRIL, 1808.

To the Senate and House of Representatives of the United States of America, in Congress assembled, the memorial of the stockholders of the Bank of the United States respectfully sheweth:

That, by an act of Congress, passed on the 25th of February, 1791, the subscribers to the capital stock of the Bank of the United States, their successors and assigns, were incorporated for a term of years, which will expire on the fourth day of March, in the year one thousand eight hundred and eleven.

That, contemplating the extensive operations of the bank, the intimate connexion of the institution with the public credit and finances, and the dispersed and distant residence of many of the stockholders, your memorialists deem it a duty to the Government, and to the commercial world, as well as to themselves, to submit, at this period, to the Legislative consideration, the expediency of protracting the duration of their charter. Without an early assurance upon this subject, every motive of prudence and justice will enforce the adoption of adequate measures, to prevent the dangers and mischiefs of a sudden dissolution of the corporation. The different branches, as well as the principal bank, must immediately co-operate in those measures. The facilities now enjoyed for the collection of the revenue, and the payment of the public debts or engagements, will be, unavoidably, impaired. And it will readily be perceived, that the activity of a capital, amounting to ten millions of dollars, cannot possibly cease, without producing great disappointment and embarrassment in the trade and commerce of the Union.

That, while your memorialists use the precaution of the present address, they reflect, with pleasure, upon the honorable claim to the patronage of the Government, founded upon the public services which the institution has already performed: Thus,

It has enriched the treasury, by the share which the Government subscribed to its capital stock: for the subscription was made through the medium of a loan from the bank itself, (obtained at an annual interest less than the amount of the annual dividend) and when a sale of stock was effected, the profit realised by the Government exceeded a sum of six hundred and fifty thousand dollars.

It has aided the Government to maintain inviolate the public faith and credit, both at home and abroad: for, it has, on various applications, advanced to the amount of many millions of dollars, (at an interest sometimes of six, and sometimes at five per cent.,) in anticipation of the public revenue.

It has enabled the Government to collect its revenue, and to perform its pecuniary engagements, with ease, economy, and security: for offices of Discount and Deposit have been established in every eligible position; not always for the general emolument of the institution, but, sometimes, (on the suggestion of the Secretary of the Treasury) for the peculiar accommodation of the public. The great mass of revenue has been thus carefully collected, and the interest of the public debt has been punctually paid; while, with equal promptitude, the public money has been transferred from the bank to the offices, or from one office to another, in such proportions, and at such times, as the arrangements of the Government required. And these operations (manifestly hazardous, inconvenient, and expensive) have, hitherto, been performed upon the responsibility of the institution, without a pecuniary compensation or charge.

That your memorialists, indulging in this retrospect, cannot be insensible to the advantages which they, also, have derived from a fiscal intercourse between the Government and the bank. It is not, however, the amount of the public deposits that has essentially contributed to those advantages: for, the amount of the deposits so fluctuates, is liable to such changes of place, and, in its transfer, is attended with so much care and cost, that it can hardly be regarded as a profitable item in the estimates of a discount day. Nor are the advantages of public patronage discernible in the emoluments arising from the general business of the bank: for its dividends have always been moderate, (frequently less, and seldom more, than eight per cent. per annum) and usually inferior to the dividends of similar establishments. But your memorialists cheerfully acknowledge, that the confidence of the Government, founded upon a constant knowledge of the interior management and condition of the bank, has attracted the confidence of Europe, as well as of America, towards the institution; has conferred upon it a character of dignity and stability; and has enabled its directors to set an example of prudence, candor, and impartiality, honorable to themselves, and beneficial to the community.

That your memorialists presume not to enlarge upon the national policy of their institution, either with a view to a continuance of the blessings of peace, or to the possible vicissitude and exigence of war. The officers of state can best represent the public uses of a bank, upon extraordinary as well as ordinary occasions; and the wisdom of the Legislature will, doubtless, embrace, in its decisions, all the considerations of present convenience and future safety. But, at a crisis of some apprehension and alarm, your memorialists respectfully accompany the expression of a cordial attachment to the honor, tranquillity, and happiness, of their country, with an assurance that the Government may confidently rely, in every emergency, upon the prompt and legitimate aid of the institution.

That, under these impressions, and with these dispositions, your memorialists solicit a renewal of their charter, for an additional term of years; and they are persuaded that the reasons which have been assigned will induce the Legislature to make an early and a favorable decision upon the subject.

Signed by order and on behalf of the general meeting of the stockholders of the Bank of the United States.

SAMUEL BRECK, *Chairman.*

Attest,

PASCHALL HOLLINGSWORTH, *Secretary.*

PHILADELPHIA, *January 6th*, 1807.

[NOTE.—For report of the Secretary of the Treasury, see No. 298.]

10th CONGRESS.]No. 284.[1st SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 25, 1808.

TREASURY DEPARTMENT, *April 23, 1808.*

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the seventh section of the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed on the 2d of April, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the *House of Representatives.*

TREASURY DEPARTMENT, *Comptroller's Office, April 23, 1808.*

SIR:

The statements marked A, B, and C, which accompany this letter, have been prepared pursuant to the seventh section of an act of Congress, of the 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." They contain all the information relative to the transactions of the mint, which the settlements made at the treasury enable me to give.

I have the honor to be, with great respect, sir, your obedient servant,

G. DUVALL.

ALBERT GALLATIN, Esq.

A.

Statement exhibiting the balance of gold and silver remaining in the hands of the officers of the mint on the 31st December, 1806; the amount of deposits from 1st January to the 31st December, 1807; the different species of coins made and paid on account of deposits; allowances for wastage, and the balance remaining in the hands of the officers of the mint on the said 31st December, 1807, to be accounted for on a future settlement.

10th CONGRESS.]

No. 285.

[2d SESSION.]

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, NOVEMBER 21, 1808.

To the Honorable Senate and House of Representatives of the United States in Congress assembled, the petition of the subscribers, twine and line manufacturers, inhabitants of the district of Massachusetts, humbly shows:

That they are enabled to manufacture an ample sufficiency of twine and lines, of every description, and of the first quality, for the supply of the United States, and as cheap as they can be imported; but that foreign articles of this description are attainable at such extensive credit, as the infancy of such an establishment, in this country, will not admit of. That the same impediment will always operate in bar of such an establishment, unless the fostering hand of Government can be extended in aid of the exertions of the manufacturers of our country.

Your petitioners, therefore, pray, that, whenever the wisdom of Congress shall judge it expedient to repeal the present existing non-importation law, that an increase of duties may be laid on twine and lines, imported into the United States from foreign countries, so that the manufacturers of this country may be placed on such a footing of preference, or at least of equality, as may encourage their progress.

Your petitioners are by no means desirous of obtaining the prayer of their petition, by any means, or on any terms, which might operate against the interests of the purchasers and users of their manufactures; and only pray, therefor, with such provisos as may secure the purchasers of their manufactures against the impositions and unjust exactions to which they might otherwise be liable from the manufacturers. And, as in duty bound, will pray.

Petitioners' Names.	Places of abode.	Quantity of articles which each can manufacture annually.	
		Dozens of Lines.	Pounds of Twine.

NOTE.—Massachusetts district probably uses three thousand dozen lines and ten thousand dozen twine; equal to about one hundred thousand pounds weight; which is annually consumed in the United States.

Of the lines, Massachusetts probably uses three-fourths of all that is wanted in the United States.

This branch of business would give employ to upwards of one thousand persons, *and independence to our country, in one respect.*

The lines being manufactured from hemp, the twine from flax will be of some advantage to the agriculturist, and promote the raising of those highly important articles here.

No. 286.

[2d SESSION.]

REVENUE CUTTERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 2, 1808.

TREASURY DEPARTMENT, November 29, 1808.

SIR:

I had the honor to receive your letter of the 22d instant, respecting the proposed increase of the cutter establishment.

I think that, solely with a view to the execution of the ordinary revenue laws, three additional cutters would be sufficient, viz: one for the District of Maine, one for Rhode Island and the southern coast of Massachusetts, and one for Ocracock, in North Carolina. The vessel which has been employed for ten years, as a revenue boat, in the last place, is necessarily, from the nature of the adjacent waters, and of the service she must perform, of a size nearly equal to that of some of the cutters; and so far as relates to that port, the change would be only nominal; but it is desirable, in order that a commission may be given to the captain and mates, the vessel being often obliged to be at sea.

But, for the purpose of carrying into effect laws which prohibit exportation and restrain importations, more efficient means must be used than are now authorized. And amongst these an increase of revenue cutters is necessary, in addition to the assistance of gun boats, which are better calculated as a stationary force, and for the purpose of stopping, in certain places, than of pursuing, vessels. We want small fast sailing vessels, ten of which will require a less number of men than the smallest frigate, and will cover much more ground. For you will be pleased to observe, that there are but six vessels belonging to the navy, under the size of frigates; and that number is inadequate to the extent of coast, and number of harbors to be watched. An easy draught of water is also a material considera-

tion. But it seems to me that it cannot be doubted, that, if all the navy was employed in that service, they are not sufficient, in point of number, for the object, and that ten or twelve small vessels, in addition, will form a very useful appendage. I propose that they should be revenue cutters, because, in time of peace, and when employed solely in carrying the laws into effect, they will be under the control of the collectors; which, in relation to that object, is preferable; and because, in case of war, they might, according to the existing laws, be placed under the direction of the Navy Department. Their size would vary from 70 to 130 tons; they would carry from six to ten four-pounders, or, if they can be procured, twelve-pounder carronades; and be manned with from fifteen to thirty men each, which is amply sufficient for the object in view.

The expense of building such vessels, coppered and completely fitted for sea, will be, exclusively of the guns, from eight to twelve thousand dollars. The expense of keeping them in service must depend on the wages of seamen. Supposing these at fifteen dollars a month, the annual expense of each vessel may, on an average, be estimated as follows:

Pay of one captain and three mates,	-	-	-	-	-	\$1,620 00
Pay of twenty seamen, at fifteen dollars,	-	-	-	-	-	3,600 00
Rations, estimated at twenty-five cents,	-	-	-	-	-	2,640 00
Repairs and contingencies of every description,	-	-	-	-	-	1,140 00
						\$9,000 00

The cost of twelve vessels would, therefore, on an average, be 120,000 dollars; and their annual support 108,000 dollars. I must add, that this estimate is predicated on a supposition that we would increase the force of these new cutters beyond what has heretofore been usual: for the annual maintenance of those now in service does not cost more than six thousand dollars each. Nor must the proposed expense be considered as altogether additional: for we would then be enabled to substitute the new cutters to a number of armed revenue boats, which have, this year, under existing circumstances, been authorized in many instances, in addition to those usually employed.

No other appropriation is requisite than one similar to that made by the 97th section of the collection law of March 2, 1799. But, if thought preferable, the expense may be paid from moneys in the treasury. The form is immaterial, and it is a mere matter of form.

I have the honor to be, with great respect, sir, yours, &c.

ALBERT GALLATIN.

THOMAS NEWTON, Esq. *Chairman of the Committee of Commerce and Manufactures.*

10th CONGRESS.]

No. 287.

[2d SESSION.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, DECEMBER 16, 1808.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

The nett revenue arising from duties on merchandise and tonnage, which accrued during the year 1806, amounted to - - - - - \$16,615,430
 And that which accrued during the year 1807 amounted, as will appear by the statement A, to - - - - - 16,059,924
 The same revenue, after deducting that portion which arose from the duty on salt, and from the additional duties constituting the Mediterranean fund, amounted, during the year 1806, to - - - - - 14,848,784
 And during the year 1807, to - - - - - 14,375,855

But it is ascertained that the nett revenue which accrued during the three first quarters of the year 1808, did not exceed eight millions of dollars, and is daily decreasing.

The statement B exhibits in detail the several species of merchandise, and other sources, from which that revenue was collected during the year 1807.

It appears, by the statement C, that the sales of the public lands have, during the year ending the 30th September, 1808, amounted to about 200,000 acres; and the payments by purchasers to near 550,000 dollars. The proceeds of sales in the Mississippi territory, being, after deducting the surveying and other incidental expenses, appropriated, in the first place, to the payment of a sum of 1,250,000 dollars, to the State of Georgia, are distinctly stated.

It appears, by the statement D, that the payments on account of the principal of the public debt have, during the same period, amounted to only 2,335,000 dollars. But the payments from the treasury, for the annual reimbursement of the six per cent. and deferred stocks, and for the final reimbursement of the 8 per cent. stock, will (exclusively of a sum of 730,000 dollars, already in the hands of the Treasurer, as agent for the Commissioners of the Sinking Fund) amount, during the last quarter of this year, to 5,376,000 dollars: making the total of public debt reimbursed, from the 1st of April, 1801, to the 1st of January, 1809, about thirty-three millions six hundred thousand dollars, exclusive of more than six millions, paid during the same period, in conformity with the provisions of the treaty and convention with Great Britain, and of the Louisiana convention.

The public debt will, on the 1st day of January, 1809, amount to 56,647,663 dollars; consisting of the following items:

Old six per cent. stock, nominal amount \$20,706,603 22, unredeemed	-	-	-	-	-	\$ 11,919,877 57
Deferred stock, nominal amount \$11,717,476 92, unredeemed	-	-	-	-	-	9,386,627 08
New six per cent. stock, exchanged at par for old six and deferred,	-	-	-	-	-	5,993,343 50
New six per cent. stock, arising from conversion of three per cent. stock, at 65 new six, for 100 three per cent. stock,	-	-	-	-	-	1,859,770 70
1796 six per cent. stock,	-	-	-	-	-	80,000 00
Louisiana do.	-	-	-	-	-	11,250,000 00
						\$ 40,489,618 85
Total six per cent. stock,	-	-	-	-	-	16,158,044,42
Three per cent. stock,	-	-	-	-	-	
						\$ 56,647,663 27

The interest on the whole debt, and the annual reimbursement on the six per cent. and deferred stocks, will, for the ensuing year, amount to 4,226,000 dollars, leaving, in order to complete the annual appropriation of 8,000,000 dollars, a sum of 3,774,000 dollars, applicable to the reimbursement of the new exchanged six per cent. stock. The whole of that and of the other new six per cent., arising from the conversion of three per cent. stock, amounting together to 7,853,000 dollars, would thus be reimbursed within two years. And after the 1st day of January, 1811, the whole annual amount payable on account of interest and annual reimbursement, could not, during the seven ensuing years, exceed 3,756,000 dollars. But, under existing circumstances, it is believed that the reimbursement of that new six per cent. stock will be nominal, and must be effected by incurring a new debt, to an equal amount.

The actual receipts into the treasury, during the year ending on the 30th September, 1808, as they principally arose from the revenue accrued during the preceding year, (and the payments on account of drawback having been diminished by the embargo,) have been greater than those of any preceding year, and amounted to \$17,952,419 90

And the specie in the treasury, on the 1st October, 1807, amounted to - - - 8,529,573 08

Making, together, - - - - - \$26,481,992 98

The disbursements, during the same period, have amounted to \$12,635,275 46; consisting of the following items:

Civil department, and miscellaneous expenses,	\$1,258,967 18	
Foreign intercourse, and payment of American claims, assumed by the Louisiana convention,	406,499 37	
Military and Indian departments, including fortifications and the expenses of the new army,	3,023,759 55	
Naval department, including the appropriation of \$677,064 47, to cover the deficit of the preceding year,	2,257,064 47	
Public debt, principal and interest, (the greater part of the payments for the year 1808 falling, as already stated, in the last quarter) have amounted only to	5,688,984 89	
		12,635,275 46
Leaving a balance in the treasury, on the 30th September, 1808, of		13,846,717 52
		<u>\$26,481,992 98</u>

The cash in the hands of collectors and receivers, and the outstanding revenue bonds, which will almost altogether fall due prior to the first of January, 1810, may, after deducting the debentures yet unpaid, and the expenses of collection, be estimated to have amounted, on the 30th September, 1808, to - - \$10,500,000

Making, together with the balance in the Treasury on that day, of - - - 13,846,000

An aggregate of - - - - - \$24,346,000

Although the expenses of the present quarter cannot at present be precisely ascertained, they will not, including the reimbursement of 5,376,000 dollars, on account of the principal of the public debt, exceed 8,346,000

Leaving, on the 1st day of January, 1809, a sum of - - - - - \$16,000,000

Sixteen millions of dollars, in cash or bonds, payable during the year 1809, and applicable to the expenses of that year. It is presumed that the receipts arising from importations and payments for lands, subsequent to the 30th September, 1808, will not be greater than the deductions on account of bad debts, and of the extension of credit on certain articles.

The expenses of the year 1809 would, according to the appropriations already made, and to the usual annual estimates, amount to thirteen millions of dollars, consisting of the following items:

1. Civil list and miscellaneous expenses,	\$900,000
2. Foreign intercourse,	200,000
3. Grants by Congress, and other miscellaneous unforeseen demands,	150,000
4. Military and Indian departments,	2,736,000
5. Naval department,	1,014,000
6. Annual appropriation for the public debt,	8,000,000
	<u>\$13,000,000</u>

Leaving a surplus of only three millions of dollars for defraying all the expenses for fortifications, military stores, increase of the army and navy, or otherwise incident to a state of actual war, or of preparations for war.

The annual appropriation on account of the public debt, amounting to eight millions, and the interest for the year 1809, being less than three millions of dollars, an authority to borrow five millions would only create a new debt equal to the principal of old debt reimbursed during that year, and appears sufficient to provide for any deficiency arising from extraordinary expenses which may be thus authorized by Congress.

It thus appears, that, notwithstanding the general warfare of the belligerent Powers against neutral nations, and the consequent suspension of commerce which took place in the latter end of the year 1807, and notwithstanding the increased rate of expenditure naturally arising from that state of things, the ordinary revenue will have been sufficient to defray all the expenses of the years 1808 and 1809, including, for 1808, a reimbursement of debt exceeding six millions of dollars, and without making any addition to that debt in 1809. The measures necessary to be adopted, in order to make a timely provision for the service of the ensuing years, depend on the course which the United States will pursue in relation to foreign aggressions. And that being yet unascertained, it becomes necessary to examine the several alternatives left to the choice of Congress.

Either the navigation of the ocean will be abandoned by the United States, or it will be resumed.

The first supposition is that of a continuance of the embargo of the vessels of the United States, and admits of two alternatives:

1. Either a provision, generally forbidding exportations, may continue to make part of the system, in which case importations, whether expressly interdicted or not, must, for want of means of payment, be also discontinued.
2. Or exportations and corresponding importations may be permitted in foreign vessels.

The second supposition also offers two, and only two alternatives. It may, indeed, be admitted, that the decrees of France can be enforced only in her own territories, and in those of her allies; that, however efficient in preventing any commerce between the United States and herself, those decrees cannot materially affect that between her enemies and the United States; and may, therefore, in that respect, be disregarded. But Great Britain having the means of enforcing her orders on the ocean, the navigation of that element cannot be resumed without encountering those orders; and they must either be submitted to or resisted. There can be no middle way between the two courses.

3. Either America must accept the portion of commerce allotted to her by the British edicts, and abandon all that is forbidden—and it is not material whether this be done by legal provisions, limiting the commerce of the United States to the permitted places—or by acquiescing in the capture of vessels stepping beyond the prescribed bounds.

4. Or the nation must oppose force to the execution of the orders of England; and this, however done, and by whatever name called, will be war.

Of those four alternatives, the second and third differ neither in principle nor in their effect on the revenue. As both plans consist in permitting partial exportations and importations, it must be acknowledged that, objectionable as that course may be in other respects, if considered merely in relation to the fiscal concerns of the Union, it will, for the moment, be attended with less difficulties than either the present system or war. For, however narrow the limits to which, on that plan, the exportations and importations of the United States may be reduced, yet there will still be some commerce, and some revenue arising from commerce. And, as in pursuing that humble path, means of defence will become unnecessary, as there will be no occasion for either an army or a navy, it is believed that there would be no difficulty in reducing the public expenditures to a rate corresponding with the fragments of impost which might still be collected. If that course be adopted, no other provision seems necessary than an immediate reduction of expenses.

The system now in force, and war, however dissimilar in some respects, are both considered as resistance. Nor is it believed that their effect on national wealth and public revenue would be materially different. In either case, a portion, and a portion only, of the national industry and capital, heretofore employed in the production, transportation, and exchange of agricultural products, or in the foreign carrying trade, can immediately be diverted to other objects. In case of a continuance of the embargo and non-exportation, either a less quantity of commodities must be produced, or a portion will accumulate until the freedom of commerce shall be restored. In case of war, that surplus will be exported; and although a part must be lost by capture, a portion of the returns will be received. If the embargo and suspension of commerce shall be continued, the revenue arising from commerce will, in a short time, entirely disappear. In case of war, some part of that revenue will remain; but it will be absorbed by the increase of public expenditure. In either case, new resources, to an amount yet unascertained, must be resorted to. But the assertion that that amount will be nearly the same, in either of the two alternatives of embargo or war, is correct only on the supposition that the embargo and non-exportation are, after a certain time, to be superseded by war, unless foreign aggression shall cease; and that rendering therefore preparations for war necessary, they require a rate of expenditure far beyond that of a peace establishment.

If, however, the embargo and non-intercourse are to have equal continuance with the belligerent edicts, indefinite as that is; if it be determined to rely exclusively on that measure, and, at all events, not to risk a war on account of those aggressions; preparations for war will become useless, and the extraordinary expenses need not be incurred. In that case, the expenditure for the year 1809 ought not to exceed the sum of thirteen millions of dollars, which, as has been stated, is requisite for the support of the present establishment. And this would leave for the service of the year 1810, the above-mentioned surplus of three millions, and the proposed loan of five millions, which, together, would be sufficient to defray the peace establishment, and to pay the interest on the public debt during that year. Thus two years more would be provided for, without either increasing the public debt or laying any new taxes. It is certainly only with a view to war, either immediate or contemplated, that it will become necessary to resort, at least to any considerable extent, to extraordinary sources of supply.

Legitimate resources can be derived only from loans or taxes; and the reasons which induce a belief that loans should be principally relied on in case of war, were stated in the annual report of last year. That opinion has been corroborated by every subsequent view which has been taken of the subject, as well as by the present situation of the country. The embargo has brought into, and kept in the United States, almost all the floating property of the nation. And whilst the depreciated value of domestic products increases the difficulty of raising a considerable revenue by internal taxes, at no former time has there been so much specie, so much redundant unemployed capital, in the country. The high price of public stocks, and, indeed, of all species of stocks, the reduction of the public debt, the unimpaired credit of the General Government, and the large amount of existing bank stock in the United States, leave no doubt of the practicability of obtaining the necessary loans on reasonable terms.

The geographical situation of the United States, their history since the Revolution, and, above all, present events, remove every apprehension of frequent wars. It may, therefore, be confidently expected, that a revenue derived solely from duties on importations, though necessarily impaired by war, will always be amply sufficient, during long intervals of peace, not only to defray current expenses, but also to reimburse the debt contracted during the few periods of war.

No internal taxes, either direct or indirect, are, therefore, contemplated, even in the case of hostilities carried against the two great belligerent Powers. Exclusively of the authority which must, from time to time, be given to borrow the sums required, (always providing for the reimbursement of such loans within limited periods) and of a due economy in the several branches of expenditure, nothing more appears necessary than such modifications, and increase of the duties on importations, as are naturally suggested by existing circumstances.

1. Although importations have already considerably diminished, and may, under the system now in force, shortly be altogether discontinued, no reasonable objection is perceived against an increase of duties on such as may still take place. Had the duties been doubled on the 1st of January, 1808, as was then suggested, in case of war, the receipts into the treasury, during that and the ensuing year, would have been increased nine or ten millions of dollars. Those articles of most universal consumption, on which an increase of duty would be inconvenient, are generally either free of duty or abundant.

It is, therefore, proposed, that not only the Mediterranean duties, which will expire on the 1st day of January next, should be continued, but that all the existing duties should be doubled on importations, subsequent to that day.

2. The present system of drawbacks also appears susceptible of modifications. The propriety of continuing generally that provision of the embargo laws, which allows a drawback on articles exported more than one year after they have been imported, is doubtful. A modification might check speculations and monopolies. The diminution of importations has afforded sufficient profits on most of the articles which had been imported; and a provision which would have a tendency to bring into market, and to lessen the price of those articles, would be generally beneficial.

3. The causes which induced the adoption of a partial non-importation act, have ceased to exist. The object then in view, has merged into a far more important one. The selection of interdicted articles was founded on the possibility of obtaining them in other countries than England, and does not agree with existing circumstances. The act producing now no other effect than to increase the temptations, and to produce habits of smuggling, impairs and injures the revenue. A general non-intercourse with that country would supersede that partial measure, and might be executed with greater facility. And, it is believed that, under every event, its repeal will be beneficial, and that a permanent increase of duties on articles selected with the view to those which may be manufactured in the United States, would be preferable.

4. It is believed that the present system of accountability of the military and naval establishment, may be rendered more prompt and direct, and is susceptible of improvements, which, without embarrassing the public service, will have a tendency more effectually to check any abuses by subordinate agents. Provisions to that effect are rendered more necessary by the probable increase of expense in those departments.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *Register's Office*, 30th November, 1808.

JOSEPH NOURSE, *Register*.

10th CONGRESS.]

No. 288.

[2d SESSION.]

MINT.

COMMUNICATED TO THE SENATE, JANUARY 5, 1809.

To the Senate and House of Representatives of the United States:

I communicate, for the information of Congress, the report of the Director of the Mint, of the operations of that establishment during the last year.

TH: JEFFERSON.

January 5, 1809.

MINT OF THE UNITED STATES, *January 2d, 1809.*

SIR:

I have the honor, once more, of laying before you an annual report of the operations of the mint.

From the treasurer's statement, herewith transmitted, it will appear, that, during the last year, there have been struck at the mint, 1,368,600 pieces of silver coin, amounting to \$684,300; 58,288 pieces of gold coin, amounting to \$284,665; and 1,509,000 pieces of copper coin, amounting to \$13,090, making in the whole, 2,935,888 pieces of coin, amounting to \$982,055.

The gold and silver bullion at this time in the mint, deposited for coinage, amounts to upwards of \$250,000; and I have good ground to assure you, sir, that, even in the present embarrassed state of commerce, the banks in this city alone, will be able to furnish an ample supply of bullion for a long time to come.

I have the honor to be, with sentiments of the greatest esteem,

Your most obedient, faithful servant,

R. PATTERSON.

THOMAS JEFFERSON, *President of the United States.*

A Statement of the Coins struck at the Mint of the United States, from the 1st of January to the 31st of December, 1808, viz:

BENJAMIN RUSH.

10th CONGRESS.]

No. 289.

[2d SESSION.]

ANNUAL RECEIPTS FOR SEVENTEEN YEARS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JAN. 7, 1809.

TREASURY DEPARTMENT, *January 4, 1809.*

SIR:

I have the honor, in compliance with the resolution of the House of Representatives of the 20th ultimo, to transmit a statement of the sums annually received at the treasury of the United States, since the commencement of proceedings under the constitution; and also, a statement exhibiting the annual amount of the respective branches of the customs and the charges thereon.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

10th CONGRESS.]

No. 290.

[1st Session.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 13, 1809.

SIR:

TREASURY DEPARTMENT, *January 11, 1809.*

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1805, 1806, and 1807.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

A Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, in the years 1805, 1806, and 1807, compared with the amount of Duties collected on the same, respectively.

SPECIES OF MERCHANDISE.	IN THE YEAR 1805.		IN THE YEAR 1806.		IN THE YEAR 1807.

TREASURY DEPARTMENT, Register's Office, January 9, 1809.

JOSEPH NOURSE, Register.

10th CONGRESS.]

No. 291.

[2d SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 6, 1809.

WASHINGTON, February 4, 1809.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their report of the 5th of February, 1808, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the third day of the present month, and in the statements therein referred to, which are herewith transmitted and prayed to be received as part of this report.

JOHN MILLEDGE, *President of the Senate, pro tempore.*ALBERT GALLATIN, *Secretary of the Treasury.*CÆSAR A. RODNEY, *Attorney General of the United States.*

The Honorable the PRESIDENT of the Senate.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That the balance remaining unexpended at the close of the year 1806, and applicable to payments falling due after that year, which balance, as appears by the statement B, annexed to the last annual report, amounted to one million eight hundred and eighty-six thousand three hundred and fifty-eight dollars and ten cents, - - - - - \$1,886,358 10

Together with the disbursements made during the year 1807, out of the treasury, on account of the principal and interest of the public debt, which disbursements, as appears by the statement C, annexed to the last annual report, amounted to six millions three hundred and forty-seven thousand four hundred and sixty-five dollars and eighty-four cents, - - - - - 6,347,465 84

And with a further sum, arising from a profit on the remittances from America to Europe, purchased in the year 1807, which profit, as appears by the statement D, annexed to the last annual report, amounted to nine thousand four hundred and twenty-seven dollars and fifty-eight cents, - - - - - 9,427 58

And amounting, altogether, to eight millions two hundred and forty-three thousand two hundred and fifty-one dollars and fifty-two cents, - - - - - \$8,243,251 52

Have been accounted for in the following manner, viz:

I. There was repaid into the treasury, during the year 1807, on account of the principal of protested bills of exchange, of moneys heretofore advanced for the payment of interest and reimbursement of the funded domestic debt, and of moneys advanced for the purchase of stock, as appears by the statement E, annexed to the last annual report, a sum of sixty-one thousand one hundred and eighty nine dollars and sixty-six cents,	\$61,189 66
II. The sums actually applied, during the same year, to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amount, as will appear by the statement A, to seven millions three hundred and sixty-one thousand three hundred and forty-three dollars and seventy-seven cents, viz:	
1. Paid in reimbursement of the principal of the debt,	\$3,727,168 97
2. Paid on account of the interest and charges on the same,	3,634,174 80
	7,361,343 77
III. The balance remaining unexpended at the close of the year 1807, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the statement B, to eight hundred and twenty thousand seven hundred and eighteen dollars and nine cents,	820,718 09
	\$8,243,251 52

That, during the year 1808, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt, viz:

I. On account of the reimbursement and interest of the domestic debt,	\$9,405,621 29
II. On account of the domestic unfunded debt,	49 20
III. On account of the principal and interest of the foreign debt, and of the interest on the Louisiana stock, and on exchange and converted stocks, payable in Europe,	924,343 11

Amounting, altogether, as will appear by the annexed list of warrants C, to ten millions three hundred and thirty-thousand and thirteen dollars and sixty cents,

\$10,330,013 60

Which disbursements were made out of the following funds, viz:

I. From the balance remaining unexpended at the end of the year 1807, of the annual appropriation of eight millions of dollars for that year, which was paid at the treasury, out of the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels, and which balance, as stated in the last annual report, amounted to	\$711,529 81
II. From the funds constituting the annual appropriation of eight millions of dollars, for the year 1808, viz:	
From the fund arising from the interest on the debt transferred to the commissioners of the sinking fund, as per statements I,	\$1,035,028 93
From the funds arising from the sale of public lands, being the amount paid into the treasury from the 1st October, 1807, to 30th September, 1808, as per statement K,	600,508 29
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of vessels,	6,364,462 78
Amounting, altogether, to	8,000,000 00
III. From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of ships or vessels, advanced in part, and on account of the annual appropriation for the year 1809,	1,547,301 48
IV. From repayments into the treasury, on account of remittances purchased for providing for the foreign debt, and of advances made to commissioners of loans, and agents for the purchase of stock, as will appear by the statement E, viz:	
Repayment of principal advanced from the treasury,	\$68,795 11
Damages and interest recovered,	2,366 70
	71,161 81
V. From the moneys appropriated by law, for paying commissions to agents employed in the purchase of remittances, for the Dutch debt, (the commissions, for the purchase of remittances on account of interest on Louisiana stock, and on exchanged and converted stocks, payable in Europe, having been paid out of the annual appropriation of eight millions of dollars) being the amount paid at the treasury, during the year 1808, for that object, as will appear by the statement C,	20 50

10,330,013 60

That the abovementioned disbursements, together with the above stated balance, which remained unexpended at the close of the year 1807, of

820,718 09

And amounting, altogether, to eleven millions one hundred and fifty thousand seven hundred and thirty-one dollars and sixty-nine cents,

11,150,731 69

Will be accounted for in the next annual report, in conformity with the accounts which shall then have been rendered to the Treasury Department.

That, in the meanwhile, the manner in which the said sum has been applied is estimated as followeth:

I. The repayments into the treasury, on account of principal, have, during the year 1808, amounted, as by the above mentioned statement E, to	68,795 11
II. The sums actually applied, during the year 1808, to the principal and interest of the public debt, are estimated as followeth:	
1st. Paid in reimbursement of the principal of the public debt,	6,986,963 40
2d. Paid on account of interest and charges on the same,	3,434,531 09
	10,421,494 49

As will appear by the estimate F.

III. The balance which remained unexpended at the close of the year 1808, and applicable to payments falling due after that year, is estimated, as per estimate G, at	660,442 09
	\$11,150,731 69

That, in conformity with the proceedings and resolutions of the commissioners of the sinking fund, of the 23d March, 1807, a copy whereof, marked M, was annexed to the last annual report, a further sum of eight per cent. stock was purchased during the year 1808, amounting to 190,000 dollars, for \$193,100 75 specie, as will appear by the statement L.

That, in pursuance of the act of February 11, 1807, books were opened on the 1st of July, 1807, at the several loan offices, and at the treasury, and continued open until the 17th day of March, 1808, for the reception of subscriptions of the old six per cent., deferred, and three per cent. stocks, and the issue of new six per cent. stocks in

lieu thereof, and that agents were appointed to receive subscriptions of the same at London and Amsterdam, pursuant to the 4th section of the said act.

That the amount of old stocks surrendered, and new stocks issued, in consequence of these subscriptions, is exhibited in the annexed statement M, by which it appears that there were surrendered—

Certificates of old six per cent. stock, of the nominal amount of	-	-	-	-	\$7,435,767 61
Certificates of deferred six per cent. stock, of the nominal amount of	-	-	-	-	1,940,672 01
In lieu of which certificates of <i>exchanged stock</i> for the unredeemed amount of the said certificates of old six per cent. and deferred stocks, were issued, amounting to	-	-	-	-	6,294,051 12
And there were surrendered certificates of three per cent. stock, amounting to	-	-	-	-	2,861,309 15
In lieu of which certificates of <i>converted stock</i> were issued, amounting to	-	-	-	-	1,859,850 70

And that the statement H exhibits the amount of stock transferred to the commissioners of the sinking fund, and to the Treasurer of the United States, in trust for said States, to the 31st December, 1808, including the sum of \$272 35 cents, transferred in the year 1808, in payment for public lands.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *February 3, 1809.*

A.

Statement of the application, during the year 1807, of the funds provided for the payment of the principal and interest of the Public Debt.

I. Payments on account of the principal of the public debt.

1. Of the domestic debt, viz:

Reimbursement of old six per cent. stock,	-	-	-	-	\$1,092,826 51
Do. deferred stock,	-	-	-	-	369,515 31
As per treasury report, No. 20,805,	-	-	-	-	1,462,341 82
Do. of the whole of the four and half per cent. stock,	-	-	-	-	176,000 00
Amount of exchanged stock, purchased by the commissioners of the sinking fund, per statement L, annexed to last annual report,				\$300,007 62	
Do. of eight per cent. stock, purchased by do. per do.				866,700 00	
					<u>1,166,707 62</u>

2. Reimbursement of unfunded registered debt, including arrearages

of interest,	-	-	-	-	1,481 77
Do. of debts due to foreign officers, including do.					637 76
					<u>2,119 53</u>

3. Reimbursement of the foreign debt, viz:

					<i>Guilders.</i>
Last instalment of loan of 3,000,000 of January 1, 1792,				600,000	
Third do. do. 3,000,000 of January 1, 1794,				600,000	
Last do. do. 2,000,000 of Feb'y 1, 1784,				500,000	
Last do. do. 2,950,000 of June 1, 1792,				600,000	

Guilders, 2,300,000 at 40 cents, 920,000

\$3,727,168 97

II. On account of interest and charges.

1. On the domestic debt.

Interest for the year 1807, on the several species of the domestic funded debt, as settled at the Treasury,	-	-	-	-	(a) 2,849,819 59
Do. on Louisiana stock, domesticated,	-	-	-	-	840 00
Commissions paid to agents for purchase of stock,	-	-	-	-	2,900 38
Difference between moneys applied to purchase of stock and the amount of stock purchased,	-	-	-	-	17,267 35

2. On the foreign debt.

Interest paid on Dutch debt at Amsterdam,	158,000
Premium on loan of 1st February, 1784,	50,000

Guilders, 208,000 at 40 cents, \$83,200 00

Interest on Louisiana stock, from 1st July, 1806, to July, 1807, viz:

Payable in Amsterdam, guild's, 750,000 00 at 40 cts.	\$300,000 00
In London, £84,246 15 at 4s. 6d.	374,430 00
	<u>674,430 00</u>

Commissions and charges, viz:

					<i>Guilders.</i>
At Amsterdam, including Louisiana stock, 6,082 15 at 40 cts.	\$2,433 10				
At do. loss in exchange on a bill drawn at Paris,	450 05 at do. 180 10				
At London, on Louisiana stock, (b) £421 04 7 at 4s. 6d.	1,872 13				
	<u>4,485 33</u>				
Commissions to agents in America for purchasing bills,	1,232 15				
	<u>763,347 48</u>				

3,634,174 80

\$7,361,343 77

NOTES TO STATEMENT A.

(a) The amount of interest payable in 1807, by the treasury statement, is	-	-	-	\$2,849,819 41
To which is here added this sum, being a difference in the calculation of dividends on the books of the commissioner of loans for Massachusetts, in the 3d quarter of 1807,	-	-	-	18
				<u>\$2,849,819 59</u>

(b) The bankers at London charge, in their accounts, a commission, amounting to £425 15s. 4d. which is erroneous, and is occasioned by their charging, in their account for the half year, ending June 30th, 1807, a commission on the amount of moneys *received* by them, instead of charging it, as they ought, on the amount *paid*.

TREASURY DEPARTMENT, *Register's Office, February 3, 1809.*

JOSEPH NOURSE, *Register.*

B.

Statement of the provision made, before the 1st day of January, 1808, for the payment of the principal and interest of the Public Debt falling due after the year 1807.

I. On account of the Foreign Debt.

1. Cash in the hands of commissioners and agents in Europe, viz:

In Amsterdam, on 31st December, 1807, per treasury report, No. 20,388 (a) -	Guilders, 1,280,958 15 3	
From which deduct a balance due the commissioner in Antwerp, which had not been paid at the end of the year 1807, -	- 1,248 1	
	<u>1,279,710 14 3</u>	
	At 40 cents,	\$511,884 28
In London, per account rendered, of December 31st, 1807, (b) -	£45,267 0 10	
	At 4s. 6d.	201,186 85
		<u>\$713,071 13</u>

2. Amount of payments made at the treasury before the 1st January, 1808, for bills which have been protested for non-payment, and which, on that day, had not been repaid into the treasury, (c) -	13,357 00	
		<u>726,428 13</u>

II. On account of the Domestic Debt.

Cash in the hands of agents for the purchase of stock, on the 31st December, 1807, per statement L, accompanying last annual report, - 110,804 92
From which deduct amount short provided for the payment of dividends on the domestic debt, as follows:

The demands on this account, unsatisfied on the 1st January, 1808, were the following, viz:

1. Dividends payable by commissioners of loans, including the dividend due on that day, and exclusive of dividends no longer demandable at their offices, -	-	1,391,005 95
2. Unclaimed dividends payable at the treasury, -	-	13,801 53
		<u>1,404,807 48</u>

The provision made for these objects was as follows:

1. Cash due from commissioners of loans deceased, and out of office, -	-	\$10,050 34
2. Cash in the hands of commissioners of loans, in office, -	1,378,230 18	
3. Amount over advanced at the treasury for payment of dividends, -	-	12 00
		<u>1,388,292 52</u>
		<u>16,514 96</u>

Leaving the sum short provided on the 1st January, 1808, for the payment of dividends on the domestic debt, - 94,289 96

Total amount of provision for the public debt, remaining unapplied on the 31st December, 1807, \$820,718 09

NOTES TO STATEMENT B.

(a.) The balance in the hands of the commissioners at Amsterdam, by the treasury report referred to, is - Guilders, 1,282,180 05 3
In which is included a sum of Guilders, 1,221 10 transferred by the commissioners in the year 1806, from the account of Robert R. Livingston, (being a balance remaining to his credit, of moneys remitted for the purchase of books for Congress,) and placed to the credit of the account of the Dutch debt. This sum, though passed in the treasury books to the proper account by warrant, dated December 31st, 1807, did not appear in the statement annexed to the sinking fund report of last year, among the funds provided in the year 1807, for the Dutch debt. It appears among the funds provided in 1808, by the statement herewith, marked D. It is therefore to be deducted from the balance stated to be in the hands of the commissioners on the 31st December 1807, - 1,221 10 0

Leaving, as here stated, - Guilders, 1,280,958 15 3

(b.) The balance stated in the banker's accounts, (adding the dividend of January 1st, 1808, charged by them one day before it was payable) is - £45,228 11 5

To which is added an error as explained in note (b.) to statement A, accompanying the last annual sinking fund report, not yet corrected by the bankers in their accounts, - 33 18 5

And a further sum, for an error in their accounts for the half year ending June 30th, 1807, as explained in note (a.) to statement A, above, - 4 10 9

Making, as here stated, - £45,267 0 7

(c.) Statement of protested bills outstanding December 31st, 1807.

Purchased before 1802. A. Brown's bill for -	Guilders 60,000 =	\$24,000
Purchased in 1802. Brown & Hackman's do. -	60,000	24,000
	<u>120,000</u>	<u>48,000</u>

On which the following partial re-payments were made previous to 31st December, 1807, viz:

In the year 1805, as heretofore stated, -	\$18,143
And in the year 1807, per statement E, annexed to the annual report of last year, -	16,500
	<u>\$34,643</u>

Leaves the sum in statement B, - \$13,357

The protested bills outstanding December 31, 1806, per note (c.) to statement B, annexed to the annual report, dated February 4, 1808, amounted to	\$37,857
Since that time no bills have been protested; and the amount repaid in 1807, per statement E, annexed to the report of February 4, 1808, amounted to	24,500
And left outstanding, on 31st December, 1807, as here stated,	<u>\$13,357</u>

TREASURY DEPARTMENT, Register's Office, February 3, 1809.

JOSEPH NOURSE, Register.

JOSEPH NOURSE, Register.

F.

An Estimate of the application made, in the year 1808, of the funds provided for the payment of the principal and interest of the Public Debt.

I. *On account of the principal.*

1. Amount of eight per cent. stock, purchased by the commissioners of the sinking fund, per statement L, herewith,	\$190,000 00
2. Reimbursement of six per cent. and deferred stocks, estimated at -	1,254,014 20
3. Do of the whole of the eight per cent. stock,	5,302,900 00
4. Do of the unfunded registered debt, including arrearages of interest,	49 20
5. Do of foreign debt, viz: Fourth instalment of loan of G. 3,000,000, of 1st January, 1794, 600,000 guilders, 40 cents per guilder,	200,000 00
	<u>\$6,986,963 40</u>

II. *On account of interest and charges.*

1. Interest on the domestic funded debt, estimated, for 1808, at	\$2,688,684 89
2. Do on Louisiana stock domesticated,	2,805 00
3. Commissions to agents for purchase of stock,	475 00
4. Difference between moneys applied to purchase of 8 per cent stock, and the amount of stock purchased,	3,100 75
5. Interest and charges on foreign debt, viz:	
Interest on exchanged and converted stocks, payable in London and Amsterdam, (1st July and 1st October, 1808)	5,394 94
Interest on Dutch debt at Amsterdam, guilders, 60,000	
Charges on ditto, ditto,	1,015
	<u>61,015 at 40 cents=24,406 00</u>
On Louisiana stock in London and Amsterdam, interest and charges,	675,670 00
	<u>705,470 94</u>
Loss in exchange, per statement D, herewith,	32,170 38
Commissions to agents in America for purchasing bills,	1,824 13
	<u>739,465 45</u>
	<u>3,434,531 09</u>
	<u>\$10,421,494 49</u>

G.

An Estimate of the funds provided, before the 1st January, 1809, for the payment of the principal and interest of the Public Debt falling due after that day.

I. *On account of the Foreign Debt.*

Cash in the hands of commissioners and agents in Europe, on the 31st December, 1807, per preceding statement B,	\$713,071 13
The remittances made during the year 1807, per preceding statement D, are as follow, viz:	
To Amsterdam,	G. 1,045,695 13 12, at 40 cents, \$418,278 27
To London,	£ 106,215 16 7, at 4s. 6d. 472,070 33
	<u>890,348 60</u>
	Total to be accounted for, 1,603,419 73
The amount applied, during the year 1808, per preceding estimate F, is calculated to have been,	
for principal,	\$240,000 00
For interest and charges,	705,470 94
	<u>945,470 94</u>
The balance in the hands of agents in Europe, or in remittances outstanding, may, therefore, be estimated, on 31st December, 1808, to be	657,948 79
The amount of protested bills outstanding on the same day, was as follows, viz:	
Purchased before, { A. Brown's bill,	G. 60,000 = \$24,000 }
and in, 1802, { Brown and Hackman's do.	60,000 = 24,000 } In suit.
	<u>48,000</u>
Of which there has been received in part,	34,643
Remains outstanding,	<u>13,357 00</u>
	<u>671,305 79</u>

II. *From which deduct, on account of the Domestic Funded Debt:*

For unclaimed dividends, demandable at the treasury, and not yet advanced to the bank for payment to the creditors, estimated at	10,863 70
	<u>\$660,442 09</u>

RECAPITULATION.

The balance remaining unexpended 31st December, 1807, per preceding statement B, was	\$820,718 09
Amount advanced from the treasury in the year 1808, per preceding statement C, was	10,330,013 60
	<u>\$11,150,731 69</u>
The amount estimated to have been applied to the public debt in 1808, per preceding estimate F, is	\$10,421,494 49
Repayments into the treasury in 1808, on account of the principal of advances for the domestic debt, per preceding statement E,	68,795 11
Provision in advance, applicable to the payments of the year 1809, per preceding estimate G,	660,442 09
	<u>\$11,150,731 69</u>

H.

A General Statement of the several stocks transferred to the United States, to the 31st December, 1808, the interest on which, by the acts of 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

[2d SESSION.]

ALLOWANCES TO FISHING VESSELS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 10, 1809.

TREASURY DEPARTMENT, January 16, 1809.

SIR:

I have the honor to return the petitions on the subject of the allowances to fishing vessels. The enclosed copy of a letter from the Comptroller will show the grounds on which he decided. I think the construction correct, but that the petitioners, particularly the collectors who paid the full allowances, are entitled to legislative relief. The enclosed statement will show the total amount of claims, if they are allowed.

Two similar petitions having been referred to the Committee of Ways and Means, permit me to request that you will communicate this letter, and its enclosures, to the chairman of that committee.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

HON. THOMAS NEWTON,
Chairman of the Committee of Commerce and Manufactures.

TREASURY DEPARTMENT, Comptroller's Office, January 13, 1809.

SIR:

I return the petitions laid before you by the chairman of the Committee of Ways and Means, and by the chairman of the Committee of Commerce and Manufactures; with the grounds on which the decision was made at the treasury, which gave rise to the petitions.

The collectors of the customs in Massachusetts generally continued to pay the full bounty allowed by different acts of Congress, to the owners and crews of fishing vessels until the first day of January, 1808, notwithstanding the additional bounty granted by the act of 8th July, 1797, was made by the act of 12th April, 1800, to depend for its continuance upon the existence of the act laying an additional duty upon salt, which was repealed after the 30th of June, 1807, by the act of the 3d March, 1807.

The reasons which governed the collectors in their construction of the laws, are stated in the petitions, the principal of which is, that the salt used by them was imported and purchased prior to the 30th June, 1807, after which the additional duty was repealed.

It is admitted that the acts referred to are not free from ambiguity; and it is more than probable, that the greater part of the salt used by the petitioners, was imported and purchased by them prior to the 1st July, 1807. But it is conceived that the decision of the question does not depend upon the fact, whether the additional duty was paid on the salt used or not. If it did, it would be decided differently in reference to different claimants, because it is not even alleged that all the salt used had paid the additional duty. How far the equity of the claim entitles the petitioners to the relief prayed, must rest with the Legislature.

Upon a consideration of the question, it occurred to me as the correct construction, that the proviso in the second section of the act of the 12th April, 1800, was in full force, and was not repealed by the act of 3d March, 1807; that the proviso in the second section of the act last mentioned relates to bounties or allowances other than the *additional* allowance, which, by a distinct, special, and negative provision, was limited in its duration to the continuance of the additional duty on salt, which was repealed after the 30th of June, 1807.

When two statutes differ, the first must give way to the last: and this upon a principle of universal law, that *leges posteriores priores contrarius abrogant*. But this is to be understood only when the last is couched in negative terms, or when its matter is so clearly repugnant that it necessarily implies a negative. But if both acts be merely affirmative, and the substance such that both may stand together, then the latter does not repeal the former, but they both may have a concurrent efficacy. It is deemed unnecessary to enlarge.

The schedule which has been prepared, and is now transmitted, will show the extent of the additional allowance, if admitted.

I have the honor to be, &c.

ALBERT GALLATIN, Esq.

[2d SESSION.]

ACCOUNTABILITY OF DISBURSING OFFICERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, ON THE 15TH OF FEBRUARY, 1809.

TREASURY DEPARTMENT, February 4, 1809.

SIR:

I beg leave, for the information requested by the Committee of Ways and Means, respecting the present mode of advances and accountability of public moneys in the War and Navy Departments, respectfully to refer to the letter and report of the Secretary of the Treasury to the Committee of Investigation, dated March 1st and 2d, 1802, and to the report of that committee to the House. But in suggesting, in conformity with the request of the committee, such provisions as may render the accountability of those Departments more prompt and efficient, and have a tendency to check abuses by subordinate agents, experience and a wish to propose only such alterations as are essentially important, and cannot, in any degree, impede the public service or derange the general system, induce me to submit, for the present, only, the following regulations:

I. That all the warrants drawn by the Secretaries of War and of the Navy, upon the Treasurer of the United States, should specify the particular appropriation to which the same should be charged; that the advances thus made should, in conformity therewith, be charged in the books of the Accountants, to accounts corresponding with the appropriations; and that the persons to whom the advances are made should render distinct accounts for each branch of expenditure, according to such appropriations.

That rule is observed in relation to all the disbursements of money by, and expenditures settled directly at, the treasury, and is attended with no inconvenience whatever. Its extension to the War and Navy Departments will introduce the requisite correspondence between the accounts kept in the several Departments, and, in conformity with the constitution, prevent the application of public moneys to other objects than those for which they have been appropriated.

II. That all permanent agents employed in purchasing supplies, or who receive and disburse public moneys, should, in every instance, be recognized by law, and appointed in such manner as may be provided by law; that their compensation, as well as that of all other officers, should be fixed by law; that they should give security for the moneys advanced to them, and that they should, whenever practicable, keep such moneys in a bank designated for that purpose, and make monthly returns of their cash account, which would be checked by the returns made by such bank.

III. That all the contracts or purchases, whether made by the Treasury, War or Navy Departments, or by their agents, should be made public, and be approved by the President of the United States.

I also think that the accountability would be rendered much more prompt and efficient, if the Accountants of the War and Navy Departments were considered, in every respect, as auditors of accounts for the same; that is to say, if each individual account as it is audited by either, was sent immediately to the Comptroller for settlement. According to the present mode, the Accountants render quarterly accounts which embrace all the individual accounts they may have audited during the quarter. Those quarterly accounts are then settled by the Auditor and Comptroller in the usual manner; but that system is attended with great delays: and the treasury settlement has become little more than a matter of form, individuals being paid either in advance, or, at farthest, when the account is adjusted by the Accountant. The provision which authorizes an immediate appeal from the Accountant to the Comptroller, forms an exception, but can operate only in favor of individuals, and never in favor of the United States.

I fear, however, that this important alteration cannot take place without the creation of a new officer in the treasury, to whom should be given the superintendence of the revenue. For the office of the Comptroller being now burthened with that laborious branch, in addition to his legal duties of settling definitively all accounts, of recovering all the debts due to the United States, and of directing and superintending all the suits instituted for that purpose, of acting as commissioner of loans for the treasury, &c., it would be impossible for him to settle, in an efficient manner and with the necessary despatch, each individual account sent from the War and Navy Departments, unless he was relieved by a new officer from the general superintendence of the revenue. I am even of opinion that, supposing the accountability of the War and Navy to remain as it is, the public service would be much promoted, public accounts generally be settled with greater despatch, and delinquents be sooner brought to account, if the suggested office was established. And the superintendence of the lands which has grown into an extensive and complex system, might be annexed to it with equal advantage to the public and to individuals.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Honorable GEORGE W. CAMPBELL, *Chairman of the Committee of Ways and Means.*

10th CONGRESS,]

No. 294.

[2d SESSION.]

DRAWBACK OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 16, 1809.

Mr. NEWTON made the following report:

The Committee of Commerce and Manufactures submit a report on the following cases.

James Wilson Jr. of Charleston, South Carolina, states that he exported to Havanna nineteen hundred and sixty two bushels of salt, which was entitled to the benefit of the drawback. He also states that he failed to obtain his debenture from the collector, in consequence of a misconception of the law; instead of giving bond before or within ten days after the clearance, as the law directs, he did not offer to execute the bond until after the sailing of the vessel, on the supposition that the ten days were to be computed from the time of sailing.

Jacob Ritter Jr. of the city of Philadelphia, states that, on the 16th of day of June 1806, he shipped on board the Fair American for Amsterdam, sixty-four cannisters of sugar, entitled to the benefit of drawback. The petitioner could not obtain his debenture, inasmuch as he failed to comply with the requisites of the law. He also states that he had been for five years a supercargo; most of this period of time out of the United States, and, of course, little conversant in the mode of transacting business at the custom house, or of the forms required by law on the re-exportation of merchandise entitled to a drawback of the duties.

Robert Peter Branu, a citizen of the United States, residing in the city of Philadelphia states that, on the 25th of September, 1800, he shipped five boxes of merchandise marked B and C entitled to a drawback of the duties on board the schooner Liberty for Carthagenia (Spanish Main) that he sailed on board the schooner as supercargo, and in the hurry of his departure, he omitted to take the qualification and sign the bond, as prescribed by law, in consequence of this omission he failed, on his return, to obtain his debenture from the collector.

J. Creighton of the city of New York in behalf of his son who is under the age of twenty-one years, states, that his son James Creighton Jr. shipped certain articles of merchandise entitled to drawback, on board the brig Penelope for the Havanna in the month of October 1806, on board of which vessel he embarked to prosecute the voyage. He also states that James Creighton, Sen. through the hurry of business and oversight, neglected to comply with the requisites prescribed by law, the petitioner further states that his son is absent from the United States.

James Thompson of the city of New York states that, in the months of August and September 1807, he imported from England sundry goods, viz. three bales of plains, nine cases of blankets, seven bales of baizes, one bale of cloth, two trunks of calicoes, and one box of cambric muslins, and that the said goods were regularly entered at the custom house, and duties secured. The petitioner also states, that the above mentioned goods were exported to Havanna in the ship Cuba, and that he has been refused his debenture by the collector, inasmuch as he did not comply with the requisites of the law to entitle him to it. The petitioner acknowledges that he was acquainted with the provisions of the law; but that his non-compliance with them was owing to the hurry of business, he states that he has paid one million of dollars into the treasury for duties, and that he never failed before in his observance of the law.

The abovementioned petitioners pray that the Legislature will take their cases into consideration, and authorise by law the issuing of debentures to them respectively.

The committee have given full consideration to the cases made out by the petitioners, and they are of opinion, that negligence, forgetfulness and misconception of the law, are inadmissible pleas, and cannot bring the cases within the scope of legislative interference and equity. When a law is in force, it is the duty of all to become acquainted with its provisions, and to comply with its injunctions. If pleas of this sort be admitted, the Legislature would be converted into a tribunal, to receive excuses for, and to justify and sanction, a non-observance of the laws. The committee are of opinion, that the National Legislature ought not to interpose its extraordinary powers, but in cases where a non-compliance with the law, has been in consequence of the sickness of the parties, the prevalence of the yellow fever in our cities, the omissions on the part of the officers of the customs, or some misfortune or occurrence not within the control of the parties.

The committee, therefore, recommend the adoption of the following resolution.

Resolved, That the petitioners have leave to withdraw their petitions.

10th CONGRESS.]

No. 295.

[2d SESSION.]

REMISSION OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 18, 1809.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the memorial of Read and Jephson, and Charles Seton of the city of York, made the following report:

The memorialists state that, on the 15th of February 1806, they despatched the American ship *Bellona*, Thomas Briscoe master, with a valuable cargo on a trading voyage to the coast of Africa. That Thomas Briscoe died, prior to the disposition of the outward cargo, and that the necessary arrangements for the completion of the object of the voyage devolved on a Mr. Peter Winthrop, who was sent out as an assistant to Thomas Briscoe, and the command of the ship on James Collings the mate. The memorialists further state, that, through the carelessness and mismanagement of Peter Winthrop and James Collings, they have sustained considerable loss in the disposition of the outward cargo and have also been subject since the arrival of the *Bellona* in the United States, to pay duties for merchandise not imported in the said ship. The memorialists state that the entry was made from the manifest, and that the cargo fell short of the quantum of merchandise specified in the manifest. This difference in the quantum of merchandise called for by the manifest, and that which was actually discharged from the *Bellona*, is accounted for by the memorialists in the following manner.

They say that the manifest of the cargo was made by Peter Winthrop and James Collins with a view to deceive the memorialists, and to cover the waste committed by them of the outward cargo. The *Bellona* arrived at the port of Charleston, (South Carolina) at the commencement of the year 1807, and after being refitted, proceeded under the command of William H. Barrett.

The memorialists pray a proportional abatement of the duties.

This case presents a new subject to the committee for consideration. They have bestowed on it much reflection, and they are aware of the delicacy and difficulty inherent in all questions relating to commerce. In making a decision they have sedulously endeavored to hold the scales of justice in equipoise between the memorialists on the one part, and the United States on the other. The committee with regret, hear, that the memorialists have suffered any loss from the carelessness and mismanagement of those to whom they committed the conduct of their affairs, but the committee consider themselves as restrained at this distance of time, wanting only a few days of being two years, since the arrival of the *Bellona*, and the entry of her cargo at New York, to open the question for investigation. They are conscious that, if they were to sanction such a practice, the revenue would be liable to many and great impositions. The memorialists cannot complain, as they had a remedy by the fifty second section of the act to regulate the collection of duties on imposts and tonnage, if they had availed themselves of it. By that section of the law, provision is made for the correction of entries which shall have been incomplete, or without the specification of particulars, either for want of the original invoice or invoices or for any other cause, on a compliance with the requisites therein specified. The law gave the relief now sought, but required that the mistake should be rectified instantaneously, while every circumstance was fresh in the memory of those entrusted with the collection of the duties, and while the cargo remained in the custody of the proper officers. Independent of these reasons, which in the opinion of the committee fully justify them in not sustaining this case, a train of circumstances occur to render a recommendation of this case to legislative interposition, highly improper. It is stated by the memorialists that the ship *Bellona* in returning from the coast of Africa instead of making for New York, the port of her destination, through the ignorance or misconduct of the master, was carried to Charleston in which port she was refitted, and from thence sailed for the port of New York. From the characters given of the master and the assistant, the probability is that the memorialists as well as the United States, may have been defrauded, the first of their property, and the last of the duties after the ship's arrival in the United States. As no information touching this subject is before the committee from the collectors either of Charleston or of New York, at which port the cargo was entered, it would be in violation of every principle of jurisprudence for the committee to decide against the United States, on ex-parte evidence.

The committee, therefore, submit the following resolution:

Resolved, That the prayer of the memorialists ought not to be granted.

10th CONGRESS.]

No. 296.

[2d SESSION.]

EXTRA ALLOWANCES TO THE COMMANDER-IN-CHIEF OF THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 22, 1809.

Mr. RANDOLPH, from the committee appointed "to inquire whether any advances of money have been made to the Commander-in-chief of the army, by the Department of War, contrary to law, and, if any, to what amount," presented the following documents:

DEPARTMENT OF WAR, *Accountant's Office*, February 13, 1809.

SIR:

In obedience to your request as chairman of a committee of the honorable the House of Representatives, I have the honor to enclose the following statements and copies of documents, in relation to the allowances and advances of money and of supplies received through the Department of War, by Brigadier-General James Wilkinson, since the passage of the act of March 16, 1802, viz:

Statement A of moneys allowed, and of supplies received by Brigadier-General Wilkinson, since the passage of the act of 16th March, 1802, in his capacity as Brigadier-General.

Statement B showing the moneys allowed and paid to Brigadier General Wilkinson, as Indian commissioner, from 12th July, 1801, to 1st June, 1804,

Statement C showing the expenses incurred by General Wilkinson, and Governor C. Claiborne, as commissioners for taking possession of Louisiana.

Statement D copy of the account of James Wilkinson, as Brigadier-General, taken from the books of this office, since 16th March, 1802.

Documents connected with statement A.

- No. 1. Copy of a letter from the Secretary of War to the Comptroller of the Treasury.
 2. Copy of a letter from the Comptroller of the Treasury to the accountant of the War Department.
 3. Copy of a letter from the accountant to the Comptroller of the Treasury.
 4. Copy of the opinion of the Attorney General.
 5. Copy of the account of Brigadier General James Wilkinson, for extra allowances of rations, &c. from the 13th September, 1806, to 24th May, 1807.

Documents connected with statement D and a summary of the statements marked A B C and D.

6. Copy of a letter from the accountant of the War Department, to Brigadier-General James Wilkinson, dated 28th February, 1808.
 7. Copy of a letter from the same to the same, dated 23d March, 1808.
 8. Copy of a letter from the same to the same, dated 16th November, 1808.

All which are respectfully submitted.

I have the honor to be, very respectfully, sir, your most obedient servant,

WM. SIMMONS, Acct. Dep. War.

The Honorable JOHN RANDOLPH *Chairman of a Committee of the House of Representatives United States.*

A.

Statement of moneys which have been allowed and paid to Brigadier General James Wilkinson, and the objects of such allowances and payments since the 16th March, 1802, over and above the pay of two hundred and twenty-five dollars a month, prescribed and limited by the 4th section of the Act of Congress of that date, and of the supplies which have been furnished to him in his capacity as Brigadier General.

Dates of entry on the books.		Amount.
June 11, 1805.	For pay, subsistence, and forage, received by General Wilkinson, from March 16, 1802 to May 31, following, that being the date to which that portion of the troops in the vicinity of the General were paid up to, under the old establishment, by an arrangement of the War Department,	\$613 54
	His pay, agreeably to the act of March 16, 1802, at \$225 per month, during the same period, would have amounted to	566 13
	Difference,	47 41
Jan. 13, 1809.	For the following allowance of \$2,033 16, made him by the Secretary of War, which was disallowed at this office on the principle of its being contrary to the law of the 16th March, 1802, fixing his allowance as brigadier general, and for reasons more fully detailed in my letter to the Comptroller, under date of the 10th January, 1809, and afterwards admitted by the accounting officers of the treasury, on the opinion of the Attorney General of the 9th January, 1809, viz:	
	For extra allowance of 36 rations per day at Natchitoches, from the 13th to the 30th September, 1806, 18 days, at 17½ cents per ration,	113 40
	For do. at said place, from 1st October to 11th November, 1806, 42 days, 2,016 rations at 18 cents,	272 16
	For do. at New Orleans, from 12th November, 1806 to 24th May, 1807, 194 days, 9,312 rations at 15 cents,	1,047 60
	For an allowance of quarters, stables, &c. when on command in New Orleans, for which he received no compensation, from 25th November, 1806, to the 24th May, 1807, six months, at \$100 per month,	600 00
		2,033 16
		\$2,080 57
May 31, 1806.	NOTE.—Subsequent to the 31st May, 1802, the pay of General Wilkinson, at the rate of \$225 per month, has been received through the paymaster of the army. Supplies which have been furnished General Wilkinson, and charged his account, as contrary to the law of the 16th March, 1802, viz:	
	For amount paid by Moses Hook, captain and assistant military agent, for a New Orleans boat to transport the general and his family,	100 68
	For amount paid by ditto, for painting said boat, and for an awning and other materials,	88 97
	For amount advanced him by ditto, for transportation of his baggage from Washington city, Baltimore and Philadelphia, to Pittsburg,	262 96
May 1, 1807.	For amount paid by Lieutenant William Piatt, assistant military agent, for transportation of his baggage from the rapids on Red river to Natchitoches,	25 00
April 30, 1808.	For supplies made him by requisition on Captain George Peter, assistant military agent at fort M ^c Henry, which have been passed to the credit of William Linnard, military agent, and now brought to the debit of the general, he not being entitled by law to any part thereof, viz:	
	Eight cords of wood for November and December, 1807,	\$54 00
	Forage consumed by his horses at fort M ^c Henry, out of that purchased for the public horse, as well as on his own order, per letter of Captain Peter,	10 00
		64 00

STATEMENT A—Continued.

Date of entry on the books.		Amount.
Dec. 13, 1808.	For the following articles furnished on his requisitions, agreeably to the certificate of Abraham D. Abrahams, military agent at New Orleans, viz:	
	8 cords of wood in 1806, at \$5 50, - - - -	\$44 00
	96 bushels corn, - - - -	72 75
	11 barrels shelled corn, at \$3, - - - -	33 00
	75 Do. in the cob, at 1, - - - -	75 00
	10 Do. do. at 1 50, - - - -	15 00
	2 Do. shelled, at \$3 50 - - - -	7 00
	5 loads of hay, at 12, - - - -	60 00
	61½ cords wood, at 5½, - - - -	336 87
	1 hoe, 1 garden rake and 3 lines, - - - -	5 50
	1 stove complete, - - - -	25 00
	5 trunks to pack papers in, - - - -	27 00
	701 12	
	For 2 cords of wood furnished at Carlisle by Richard Parker, contractor, 22d September, 1808, at \$2 50, - - - -	5 00
		1,247 73
		\$3,328 30

DEPARTMENT OF WAR, *Accountant's Office*, February 13, 1809.WILLIAM SIMMONS, *Accountant Department War*.

No. 1.

Copy of a letter from the Secretary of War to the Comptroller of the Treasury.

WAR DEPARTMENT, January 6, 1809.

Sir:

Having understood that the accountant of this department has doubted the legality of an allowance I had, with the approbation of the President of the United States, directed to be made to General Wilkinson, as commanding officer at New Orleans, and its dependencies, I take the liberty of stating the facts, and the authorities under which the allowance has been made.

In the 5th section of the act fixing the military peace establishment, passed March 16, 1802, the President is authorized to allow the commanding officers of posts, such additional number of rations, as he shall deem proper.

The commanding officer at New Orleans, has been allowed treble the ordinary number of rations for an officer of his rank, with quarters, &c. and it has been agreed that General Wilkinson should be allowed an addition of treble the ordinary number of rations allowed to a brigadier-general, together with an allowance for quarters. In the compensation General Wilkinson receives by law, as brigadier general, the usual rations were estimated; but it is presumed that this cannot justly bar him from an extra allowance under circumstances, which, in the opinion of the President of the United States, would entitle any other officer to an extra allowance of rations. This allowance to him for quarters at the expense of the United States, is nothing more than what is granted to all other officers according to their respective grades, although there never has been any law for furnishing officers or soldiers with quarters, any more than for tents or fuel; but universal usage and the necessity of the case have long since sanctioned the practice. I shall not consider it expedient to give any other reasons on this subject to the accountant, than those already given, but have thought it my duty to make this statement to you, to aid in any opinion you may please to give.

I am, very respectfully, your obedient servant,

H. DEARBORN.

To the COMPTROLLER of the Treasury.

No. 2.

TREASURY DEPARTMENT, *Comptroller's Office*, January 9, 1809.

Sir:

The account which you will herewith receive, was enclosed to me in a letter from the Secretary of War, of which a copy is also sent.

As the accounting officers of the treasury are authorized to revise settlements made in your office, and not to decide on claims in the first instance, it is necessary that you should admit or disallow the claim, in order that it may be finally decided on in this department. It is therefore submitted to your decision.

I am, sir, respectfully, your obedient servant,

G. DUVALL.

WILLIAM SIMMONS, Esq.

No. 3.

DEPARTMENT OF WAR, *Accountant's Office*, January 10, 1809.

Sir:

The account of Brigadier General James Wilkinson, covered by your letter of the 9th instant, to be acted upon in this office, had been some days before exhibited to me for allowance, and was objected to, because I conceived the claim expressly prohibited by law.

The 4th section of the act fixing the military peace establishment, passed the 16th March, 1802, contains the following clause: "And be it enacted, that the monthly pay of the officers, non-commissioned officers, musicians and privates, be as follows, to wit: to the brigadier general, two hundred and twenty-five dollars, which shall be his full and entire compensation, without a right to demand or receive any rations, forage, travelling expenses, or other perquisite or emolument whatsoever, except such stationary as may be requisite, for the use of his department."

Now, the claim of Brigadier General Wilkinson, being for thirty-six rations per day, at Natchitoches, from 13th September, 1806, to 11th November, following, and at New Orleans, from 12th November, 1806, to 24th May, 1807, and for quarters, stables, &c. at the latter place, from 25th November, 1806, to 24th May, 1807, I have, of course, conceived as I have above stated, that its allowance was prohibited by law.

The clause contained in the 5th section of the above act, authorizing such additional number of rations to the commanding officer of each separate post, as the President of the United States may direct, I did not conceive was intended to include the brigadier general, after the prohibitory clause contained in the preceding section, and such must have been the opinion heretofore held by others; for I found, on examination, that Colonel Cushing received double rations, as commanding officer at Natchitoches, for the great part of the time charged by the General at that place, and that Lieutenant Colonel Freeman and Colonel Cushing, received triple rations at New Orleans, together including nearly the whole period charged by the General at the latter place, and in no instance, within my recollection, have double rations been allowed to two officers for the same period, at the same post. Indeed, the clause of the section last referred to, would seem to forbid it; because it limits the direction of the President of the United States, to the allowance of additional rations to the commanding officers of *each separate post*.

The item for quarters, stables, &c. while at New Orleans, in my opinion, is also prohibited by the 4th section of the act first mentioned, and in conformity with this opinion held by me ever since the passing of this act, I have uniformly charged to the personal account of General Wilkinson, all sums paid by agents of this department, for fuel, forage, transportation, &c. for his use, and at this time, his account stands charged with a considerable amount composed of such items, as well as other moneys of long standing, unaccounted for.

Under these impressions, I do not feel myself authorized to admit any part of the account, and, therefore, return it herewith, to be revised by the accounting officers of the treasury, as suggested in your letter.

I have the honor to be, &c.

WILLIAM SIMMONS.

G. DUVALL, Esquire, *Comptroller of the Treasury*.

No. 4.

WASHINGTON, January, 9, 1809.

SIR:

The case referred to me for my opinion as stated in your note of the 6th instant, is not free from difficulty. At first view, it presented serious embarrassment. On mature reflection, however, I concur in the opinion you have formed.

The 4th section of the act of the 16th of March, 1802, declares, "That the monthly pay of the officers, non-commissioned officers, musicians, and privates, be as follows, to wit: the brigadier general, two hundred and twenty-five dollars, which shall be his full and entire compensation, without a right to demand or receive any rations, forage, travelling expenses, or other perquisite or emolument whatsoever, &c." These expressions are broad and comprehensive, and if taken alone, would exclude the allowance granted. But, to put a just interpretation on any clause contained in a statute, you must look beyond the insulated section. The entire act must be taken into view, and such a construction formed, as will give effect to every part.

Though, in relation to other commissioned officers, this section provides only for their pay, yet, in the case of the brigadier general, it fixes a certain sum, as his full and entire compensation for pay, rations, forage, travelling expenses, and any other perquisite or emoluments, to which, by virtue of his office and in his capacity of brigadier general, he may be entitled. The terms perquisite and emolument, are well understood. A perquisite, means something gained by a place or office over and above its settled wages. An emolument, is any advantage or profit arising from the particular office held.

The scale assumed by Congress, when they fixed the monthly pay of the brigadier general at two hundred and twenty-five dollars, as a full and entire compensation, included, no doubt, a just estimate of the usual allowance for rations, forage, and travelling expenses, to an officer of that grade. If this section established only his monthly pay, and, as in the case of other commissioned officers, the act had positively fixed and ascertained in subsequent sections, the allowance for rations, forage, &c. it would have amounted, I apprehend, to the same thing as it does at present. Those officers, for whose pay, rations, &c. provision is made, in this manner, are, I conceive, as completely excluded thereby in their respective capacities, considered merely as officers of a certain grade in the ordinary line of duty, from additional compensation in any shape, as the brigadier general in his distinct and substantive quality as such, by the expressions in relation to his monthly pay, being a full and entire compensation. When a statute declares positively, that an officer shall receive a certain pay and a precise number of rations, &c. the affirmative expressions imply and import a negative, that he shall not receive any more than what is thus limited and prescribed. The law thus fixes his full and entire compensation by specifying, particularly, every article of which it shall consist.

Notwithstanding this, it will be conceded that officers are entitled to quarters and to fuel in proportion to their rank when the army goes into winter quarters; or to tents, when encamped. When marching by land with the army or proceeding by water, the wagons or vessels proper for transporting their necessary baggage or camp furniture, would be provided at the public expense, and would not be deducted from their compensation. This, I believe to be the universal usage and custom.

The allowance made to General Wilkinson, is not in his capacity of brigadier general, but in his quality of commander of a separate post. By the 5th section of the act abovementioned, the President is authorized to allow, to the commanders of separate posts, such number of rations as he may, from time to time, think proper to direct, having respect to the special circumstances of each post. Officers of different grades may be ordered by the President, as commander-in-chief, to different posts. The brigadier general, as well as a colonel or other inferior officer, nay, the importance of a particular post, may point him out to the President as the most suitable person. He is obliged, when ordered, to repair to the place, a situation, perhaps, the least desirable. His command is limited to the defence and protection of the post assigned. I can perceive no solid distinction in reason or common sense, between his case and that of any other officer. They are equally subject to the superior control of the commander-in-chief and must obey when he orders. The births may not be those of their own seeking. In this new capacity or peculiar office, Congress have thought proper to vest in the President, a discretion on the subject of rations. By virtue of this power, the President, through you, as his regular organ, has thought proper to allow General Wilkinson, whilst commanding at "New Orleans, treble rations." In doing this, I understand he has followed the example set in similar cases, and particularly the precedent established in the instance of Colonel Freeman, who commanded at the same post. Upon the best consideration I have been enabled to give the case, I believe the practice to be correct and legal.

Yours very respectfully,

C. A. RODNEY.

The SECRETARY of War.

No. 5.

Dr. *The United States, to General James Wilkinson,*

To extra allowance of thirty-six rations per day, at Natchitoches, from 13th to 30th September, 1806, being eighteen days, eight hundred and sixty-four rations, at seventeen cents five mills per ration,	\$113 40
To do. at Natchitoches, from 1st October to 11th November, 1806, inclusive, being forty-two days, two thousand and sixteen rations, at eighteen cents per ration,	272 16
To do. at New Orleans, from 12th November, 1806, to 24th May, 1807, being one hundred ninety-four days, nine thousand three hundred and twelve rations, at fifteen cents per ration,	1,047 60
To allowance for my quarters, stables, &c., when on command in New Orleans, for which I have received no compensation, from the 25th November, 1806, to 24th May, 1807, inclusive, being six months, at one hundred dollars per month,	600 00
	<u>\$2,033 16</u>

JAMES WILKINSON.

Admitted.

H. DEARBORN.

TREASURY DEPARTMENT, *January 11, 1809.*

The within account has been admitted by the Secretary of the War Department, with the approbation of the President of the United States, under the 5th section of the act of the 16th March, 1802, and is sanctioned by the opinion of the Attorney General, and may, therefore, be passed to the credit of General Wilkinson, in the books of the accountant for the Department of War.

G. DUVALL, *Comptroller.*R. HARRISON, *Auditor.*

B.

Statement of Moneys allowed and paid to Brigadier General James Wilkinson, as Indian Commissioner, viz:
Compensation.

Compensation as commissioner to treat with the Cherokees at Southwest Point, from 12th July to 10th September, 1801, at eight dollars per day,	\$488
Ditto, to treat with the Chickasaws near Wolf river, from 11th September to 28th October, 1801, at eight dollars per day,	384
Ditto, to treat with the Choctaw nation, at fort Adams, from 29th October to 31st December, 1801, at eight dollars per day,	512
Ditto, to treat with the Choctaw commissioners for carrying into execution the treaty of fort Adams, from January 1st to 22d March, 1802, at eight dollars per day,	648
Ditto, to treat with the Creek nation at fort Wilkinson, from 23d March to 18th July, 1802, at eight dollars per day,	944
Ditto, to treat with the Choctaw Indians at Old Fort Confederation, from the 19th July, 1802, to 20th October following, at eight dollars per day,	752
Ditto, as commissioner to determine and mark the Choctaw boundary line near the Mississippi, from 21st October, 1802, to 28th February, 1803, at eight dollars per day,	786
Ditto, as commissioner to determine, survey, and mark, the boundary of the Choctaws, west of the Mobile and Tombigby rivers, and the boundary of the Creeks, east of the Alabama and the Tensaw rivers, from 1st March to 3d December, 1803, at six dollars per day,	1,668
Ditto, as commissioner returning from Mobile to New Orleans on his way to the city of Philadelphia, his place of residence, from 4th to 16th December, 1803, thirteen days, at eight dollars per day,	104
Compensation as commissioner from the 25th April, the day he left New Orleans, to the 1st June, 1804, when he arrived in Philadelphia, thirty-seven days, at eight dollars per day,	296
	<u>\$6,582</u>

Personal Expenses as Commissioner, viz:

Amount of expenditures from the Oconee to the Choctaw nation, at a conference held with said nation at fort Confederation, and while passing through the same, from 30th August to 28th October, 1802,	606 51
Expenditures when in search of Mr. Purcell, for information respecting the Indian boundaries, from 17th July to 11th August, 1802,	308 55
Payment to William T. McCormick for sundry supplies of groceries, for the use of the commissioners,	224 38½
Expenditures while perambulating, and establishing the Choctaw boundary line, agreeably to the treaty at fort Adams, from 2d December, 1802, to 28th February, 1803,	184 45
Payments for his expenses and charges incident to establishing the Choctaw and Creek boundaries on the Tombigby, Mobile, and Alabama rivers, from 10th July, to 20th November, 1803,	885 70½
For amount of his account of expenses from New Orleans to the seat of Government, and while remaining there on business relative to his duties as Indian commissioner,	505 69
	<u>2,715 29</u>

Expenses other than personal, viz:

Payments on account of the survey of the route from Bayou Pierre to the Choctaw nation, in 1802,	120 20
Payment to William T. McCormick for medicine for the troops, from 31st March, to 27th November, 1802,	12 87½
Payments to sundry soldiers under command of Lieutenant Edmund P. Gaines, for extra pay as laborers, while engaged on the Choctaw line of demarcation in November and December, 1802,	252 50

Payment to servant and attendant, having charge of public horses and baggage, from 1st July, 1802, to 1st March, 1803,	160 00
Expenditures while perambulating, and establishing the Choctaw boundary line, agreeably to the treaty of fort Adams, from 2d December, 1802, to 28th February, 1803,	656 09
Payments made by him for charges incident to establishing the Choctaw and Creek boundaries on the Tombigby, Mobile, and Alabama rivers, from 10th July, 1803, to 20th November following,	1,950 43½
	3,152 10
	\$12,449 39

NOTE.—It is to be understood that the compensation, &c. of General Wilkinson, as Indian commissioner, entered in this statement, commences with his appointment, the 12th July, 1801, because the whole was included in one settlement at this office, and the expenditures between that date and the 16th March, 1802, could not be distinctly separated.

Expenses incident to forming the treaty of fort Wilkinson, taken from the account of Wilkinson, Hawkins, and Pickens, joint commissioners for holding a treaty with the Indian tribes south of the Ohio, viz:

Commissioners' table and other expenses, viz:	
For articles for subsistence of themselves, their attendants and horses, per account of Alexander Macomb, secretary, per abstract A,	3,956 98
For articles of household and table furniture, culinary vessels, &c. per abstract A,	445 15
Sundry payments by Alexander Macomb, secretary, per voucher No. 2, in his account, to Samuel C. Hall, for expenses incident to the support of the commissioners' table, for which there are no specific vouchers, per abstract A,	624 07
	5,026 20
For the purchase of provisions and supplies furnished belonging to the factory, by Jonathan Halsted, United States' factor, for the use of the commissioners' table, and for the Indians attending the treaty at fort Wilkinson, per abstract No. 4, and vouchers with Halsted's account,	5,942 35
For articles furnished the commissioners and the chiefs of the Creek nation of Indians attending the treaty, out of the United States' factory, per abstract No. 1, and vouchers, with Halsted's account,	764 08
Expenditures made on account of the commissioners, exclusive of those for the purchase of provisions, and, principally, upon their orders, per abstract No 3, in Halsted's account,	1,620 15
Payment made by said Halsted for incidental expenses, in procuring provisions, &c.	108 00
Payments made by Alexander Macomb, secretary, for transportation, pay of guides, expresses, cooks, and others employed during the execution of the commission, and in assembling the Indians at the treaty, &c. per abstract B,	665 46
For washing done for the commissioners and their secretary, per abstract B,	163 72
For payments by Alexander Macomb, to Nathaniel Evans and Lieutenant Walback, for contingent expenses incident to the treaty, for which there are no specific vouchers, per abstract B,	41 75
Payments for expenses and allowances for services of interpreters and attendants, and travelling expenses of the commissioners, per abstract B,	662 90
	9,968 41
Amount of expenditures by the quartermaster general for the purchase of horses, mules, transportation of Indian goods, and other disbursements in relation to the treaties,	14,994 61
	3,121 50
	\$18,116 11

DEPARTMENT OF WAR, *Accountant's Office, February 13, 1809.*

WILLIAM SIMMONS, *Accountant Department War.*

C.

Abstract of expenditures made by Lieutenant Josiah Taylor, assistant military agent, under the directions of Brigadier General James Wilkinson and Governor William C. C. Claiborne, Commissioners appointed to take possession of Louisiana, in the years 1803 and 1804.

For 418½ lbs loaf sugar,	11,350 Spanish cigars,	6½ gallons vinegar,
30 " lump sugar,	8 bottles of capers,	2 bottles vinegar maille,
44 " brown sugar,	1 box of brandy fruits,	2 bottles pickles,
844 bottles of claret,	1 " raisins,	3 bottles of olives,
196½ gallons Madeira wine,	487½ lbs. of ham,	148¼ lbs. of cheese,
4 " sherry wine,	2 tubs of rounds of beef,	17 lbs. of hog's lard,
1 quarter cask Madeira wine,	1 bottle of Cayenne pepper,	24 lbs. of butter,
144 bottles of champagne,	3 lbs. black pepper,	20 bunches of onions,
50 " white wine,	20 " chocolate,	30 lbs. of flour,
100 " hermitage wine,	10 bottles of mustard,	2 barrels of flour,
588 " red wine,	47 " sweet oil,	1 sheep,
6 " cordials,	3 lbs. vermicelli,	3 barrels of potatoes,
1 " bitters,	16 " of almonds,	1¾ bushels of salt,
67 gallons brandy,	40 " of rice,	300 lbs. of bread,
81 bottles of porter,	12 beeves' tongues,	1 tierce Irish beef,
1 case of gin,	¼ lb. mace,	180 lbs. of beef,
258 bottles of ale,	¼ lb. cloves,	1 barrel of onions,
3 barrels of cider,	¼ lb. nutmegs,	4 cases of tea,
5 gallons of rum,	¼ lb. cinnamon,	450 lbs. of corn blades,
2½ " whiskey,	1 English cheese,	96 barrels corn,

7 loads of hay,	1 looking glass,	9 decanters,
162½ lbs. coffee,	16 lights of glass,	6 salt cellars,
5¼ lbs. first quality tea,	210½ lbs. spermaceti candles,	24 wine glasses,
48 cords of wood,	1 barrel hominy,	24 tumblers,
6 dozen knives and forks,	42 lbs. of tallow candles,	2 pitchers,
3 pair plated candlesticks,	228 feet of plank,	6 dishes,
2 pair snuffers,	4½ lbs. of Castile soap,	60 plates,
12 barrels of charcoal,	1 filtering stone,	1 lantern,
30 lbs. of bar iron,	24 cordial glasses,	1 set dining china.
1 pair of andirons,	42 goblets,	

Also, forage for five public horses, riding express from Fort Adams to New Orleans, sundry groceries, not enumerated, dinners for twelve persons for ten days, furniture not enumerated, two tables, cakes, macaroons, confectionary and preserves, pies, tarts, puddings, cakes, biscuit, and cabbages, confectionary furnished at different times, sugar plums, washing table cloths and napkins, nine turkeys, eighteen capons, and thirty fowls, medicine, &c.

NOTE.—The above disbursements were made between the 7th December, 1803, and 24th April, 1804, per vouchers, from No. 1, to 99, and amount to - - - - - \$5,127 37

John M. Wight, for provisions and other articles purchased in the market for the use of the commissioners' table, from 26th January, to the 22d April, 1804, inclusively,	-	1,378 10
Ditto, for ditto, on the 23d April, 1804,	-	11 50
Ditto, for sixty loaves bread, purchased for ditto,	-	3 75
Ditto, for his salary as steward to the commissioners, from 16th January, to 23d April, 1804, inclusively, 99 days at one dollar per day,	-	99 00

DR.			
1808.		To Quartermaster department, 1807, for the following supplies made him by Captain George Peter, at fort McHenry, which have been passed to the credit of William Linnard, military agent, and now brought to the debit of the general, he not being entitled by law to any part thereof, viz:	
		4 cords of wood for November, 1807, at 7 dollars per cord,	\$28 00
		4 cords of wood for November, 1807, at 6½ dollars,	26 00
		For amount of forage consumed by his horses, while at fort McHenry, out of that purchased for the public horse, as well as on his own order, per letter to Captain Peter,	10 00
			<u>64 00</u>
July 29,		To Caleb Swan, paymaster of the army: For warrant No. 1212, drawn by the commander-in-chief, for his pay for July and August, 1808, in advance, per receipt 28th June, 1808,	450 00
September 9,		To warrants on the treasurer, For warrant No. 743, transmitted to him at Carlisle, on account of translating sundry French military works, for the use of the War Department,	200 00
Oct. 31.		To Robert Brent, paymaster of the army: For warrant No. 10, drawn by the Secretary of War, for his pay in advance, from September 1, 1808, to February 28, 1809, per receipt July 14, 1808,	1,350 00
Dec. 13.		To Abraham D. Abrahams, military agent: For this sum, advanced him on account of the public service, per receipt, dated January 10, 1807, for which he is accountable,	2,500 00
		NOTE.—Of the above sum it appears, by a receipt of M. Girard, dated 27th March, 1807, that one hundred and fifty dollars were applied by him for the public service; and, by the receipt of P. Rubell, that two hundred dollars were to be employed in secret police service.	
		To quartermaster's department, furnished him by A. D. Abrahams, military agent, per certificate, viz:	
		8 cords of wood in 1806, at \$5 50,	\$44 00
		96 bushels of corn in 1806,	72 75
		11 barrels shelled corn, at three dollars,	33 00
		38 barrels of corn in the cob, at one dollar,	38 00
		37 do. do.	37 00
		10 do. at one dollar and fifty cents,	15 00
		2 do. shelled, at three dollars and fifty cents,	7 00
		5 loads of hay, at twelve dollars,	60 00
		61½ cords of wood, at five dollars and fifty cents,	336 87
		1 garden rake, one hoe, and three lines,	5 50
		1 stove, complete,	25 00
		5 trunks, to pack papers,	27 00
			<u>584 37</u>
		To Richard Parker, contractor: For amount of two cords of wood, furnished at Carlisle the 22d September, 1808, at two dollars and fifty cents,	5 00
Nov. 21.		To Robert Brent, paymaster of the army: For warrant No. 161, drawn by the Secretary of War, for his pay in advance, for March, April, and May, 1809, three months, at two hundred and twenty-five dollars,	675 00
1809, Jan. 26.		To Robert Brent, paymaster of the army: For warrant No. 249, drawn by the Secretary of War, for his pay in advance, for June, July, August, September, October, and November, 1809, six months, at two hundred and twenty-five dollars,	1,350 00
Feb. 6.		To Ninian Pinckney, district paymaster: For this amount, paid him on account of his pay and emoluments, per receipt, dated December 3, 1807,	250 00
			<u>\$25,437 41</u>
		To balance due the United States, per contra,	<u>\$7,891 03</u>

NOTE.—It may be proper to remark, that, in addition to the balance above stated, John Wilkins, jun., late quartermaster-general, has transmitted to this office a list of moneys, stated by him to have been advanced on public account, for which he claims credit, and in which General Wilkinson's name appears, for \$3,879 71, which, added to the balance above stated, will constitute the sum of \$11,770 74.

ACCOUNTANT'S OFFICE, *February 20, 1808.*

SIR:

On the adjustment of the accounts of the military agents and their assistants, it appears that disbursements have been made on your account, which the act of Congress fixing the military peace establishment does not authorize. I have, consequently, been compelled to charge all such disbursements to your personal account, thereby considerably increasing the balance standing to your debit on the books of this office.

Of this circumstance I have thought it my duty to acquaint you, and to suggest the propriety of a settlement of your public accounts while your presence at the seat of Government may afford the means of facilitating such settlement.

I am, &c.

WILLIAM SIMMONS.

Brigadier General J. WILKINSON, *Washington City.*

No. 7.

ACCOUNTANT'S OFFICE, *March 23, 1808.*

SIR:

I have received your letter of the 16th instant, and, in reply, have to observe, that it was not my intention, by the letter addressed to you on the 20th ultimo, to bring into view any of the irregular expenditures which have been made by your orders, arising under the peculiar circumstances you have mentioned. Those to which my letter had reference, are the payments made by the military agents and their assistants, from time to time, for the transportation of your baggage, purchase of fuel, forage, &c. on your personal account; allowances which are positively forbidden by the 4th section of the law fixing the military peace establishment, under date the 16th March, 1802. It was also the object of that letter, to bring to your view the balance of \$2,901 13, standing to your debit on settlement of your account 11th June, 1805, both of which items, together with the sum of seven hundred dollars received from Lieutenant Hook, on the 14th May, 1805, and a draft drawn by you on this department, the 4th October, 1806, expressed for the contingent services, and omitted to be credited by you in any account rendered to this office, I deem it my duty to request that you will account for as early as practicable.

I am, &c.

WILLIAM SIMMONS.

Brigadier General J. WILKINSON, *City of Washington.*

No. 8.

ACCOUNTANT'S OFFICE, *November 16, 1808.*

SIR:

In reply to your letter of the 10th instant, requesting to be informed what was the daily allowance admitted for your services when engaged as a commissioner on Indian affairs, in 1801, '2, and '3, I have the honor to state, that your account on that head has been credited with the following amounts, viz:

Compensation as commissioner for holding treaties with the Cherokee, Choctaw, and Creek Indians, from 12th July, 1801, to 20th October, 1802, 466 days, at \$8,	\$3,728
Compensation as commissioner to determine and mark the Choctaw boundary line, from 21st October, 1802, to 3d December, 1803, 409 days, at \$6,	2,454
Compensation while on your route from Mobile to New Orleans, from 4th to 16th December, 1803, and from New Orleans to Philadelphia, from 25th April to 1st June, 1804, 50 days, at \$8,	400

It will be understood, that the above compensations are in addition to the expenses of your table, as commissioner, and travelling expenses, and also in addition to your pay as commander-in-chief.

While on the subject of your accounts, permit me again to call your attention to the contents of my letter to you of the 23d March last, and to add, that, since that date, the debits of your accounts have considerably increased, the amount of which will constitute one of the items in the list of balances about to be laid before Congress, unless previously accounted for.

I am, &c.

WILLIAM SIMMONS.

Brigadier General J. WILKINSON, *City of Washington.*

Summary Statement of the allowances and advances of money made by the Department of War to Brigadier General James Wilkinson, including the supplies received from him by agents of the War Department, since the passage of the act of March 16, 1802, other than the monthly pay of \$225 00, and the stationary allowed by that act.

Amount of Statement A,

Showing the moneys which have been allowed and paid to General Wilkinson, and the objects of such allowances and payments, since the 16th of March, 1802, over and above the pay of \$225 per month, prescribed and limited by the fourth section of the act of Congress of that date, and of the supplies which have been received by him in the capacity of Brigadier General, viz:

Amount of allowances made to General Wilkinson,	\$2,080 57
Amount of supplies received by him from agents of the department, and brought to his debit in the account current herewith, marked D, the amount of which is included in the balance standing to his debit, on that statement,	\$1,247 73

Amount of Statement B,

Showing the moneys allowed and paid to Brigadier General James Wilkinson, as Indian commissioner, commencing on the 12th July, 1801, the date of his appointment, and ending the 1st June, 1804, the date of his return to Philadelphia, viz:

Compensation as commissioner, from 12th July 1801, to 16th December, 1803, and from 25th April to the 1st of June, 1804,	\$6,582 00
Personal expenses as commissioner,	2,715 29
	9,297 29
Expenditures other than personal, having relation to the formation of the treaties and running the boundary lines, &c.	3,152 10

Expenses of Wilkinson, Hawkins, and Pickens, joint Commissioners, viz:

Articles for subsistence of themselves, their attendants, and horses, household and table furniture, and table expenses, - - - - -	\$5,026 20	
Other expenditures for provisions supplied the commissioners and the Indians attending the treaty, (which could not be separated) and also pay of interpreters and attendants, &c. &c. - - - - -	9,968 41	
	<u>14,994 61</u>	
Disbursements by the Quartermaster General, - - - - -	3,121 50	18,116 11

Amount of Statement C.

Showing the expenses incurred by General Wilkinson and Governor Claiborne, commissioners for taking possession of New Orleans, viz:

Table and house expenses of the commissioners, from 7th December, 1803, to 24th April, 1804, - - - - -	\$6,320 22	
Household furniture for the commissioners, - - - - -	200 50	
Pay of steward to the commissioners, from 16th January to 23d April, 1804, - - - - -	99 00	
	<u>6,619 72</u>	

Amount of Statement D.

Showing the state of James Wilkinson's account as Brigadier General, on the books of this office, since the 16th March, 1802, which includes the advances made to him by the War Department, and by the several agents, together with the supplies received by him subsequent to that date, as far as accounts and information have been received at this office, exhibiting a balance due the United States, - - - - -		7,891 03
In addition to the balance of \$7,891 03, it may be proper to remark, that the late Quartermaster General, John Wilkins, Jr. has forwarded to this office a list of moneys stated by him to have been advanced on public account, for which he claims a credit, and on which General Wilkinson's name appears, for \$3,879 71, which, added to the above sum would constitute a balance to the debit of General Wilkinson, of \$11,770 74. The vouchers for the advance not having been forwarded by the Quartermaster General, the account has not been acted upon, - - - - -		3,879 71
		<u>\$19,268 89</u>

10th CONGRESS.]

No. 297.

[2d SESSION.]

ACCOUNTABILITY IN THE NAVY DEPARTMENT.

COMMUNICATED TO THE SENATE, FEBRUARY 25, 1809.

Mr. GILES communicated the following letter and statement from the Secretary of the Navy:

SIR:

The enclosed is a hasty sketch of the ideas suggested to me in reading the bill before the Senate, entitled "A bill further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments."

Respectfully,

ROBERT SMITH.

February 25, 1809.

Warrants drawn by the Secretary of the Navy upon the Treasurer of the United States, do, at this time, and for many years have, specified the particular appropriation or appropriations to which the same should be charged. This is the established usage of the Navy Department, and there are to it but a few exceptions, in cases of inevitable necessity, wherein bills have been drawn to defray contingent expenses, incurred on a distant station.

The moneys paid by virtue of such warrants, are charged in the books of the Accountant of the Navy, in such manner and form as the Treasury Department have, and from time to time may prescribe, the Accountant of the Navy having ever considered himself, as to the forms of keeping his accounts, altogether under the controlling superintendency of the Treasury Department.

It is, at present, the duty of all navy agents to make their requisitions upon the Navy Department, for moneys, agreeably to the specifications of the appropriation law, and to render, monthly, distinct accounts of the application of all moneys, according to the appropriation or appropriations under which the same shall have been drawn. Papers A and B are copies of the instructions to the navy agents, upon this subject.

In this, first section, I find the following provision: "Nor shall any credit be allowed to either of them, (agents) except for expenses authorized by law, and for the amount appropriated for the same." Under such restrictions, no agent would make a purchase, or, indeed, incur any expense, without having money in hand to meet it, because he could not know the exact state of the appropriation out of which such expense was to be paid; or, if he knew the unexpended balance of each appropriation, he could not know what dispositions the Department might have made respecting such balances; he would, therefore, never make a purchase without having in hand, money of the appropriation under which such purchase would fall. What would be the effect?

Suppose, in time of war, a public vessel should arrive at any port distant from the seat of government, viz: New Orleans; should be in want of repairs and supplies, and should be on important service, which requires her departure from such port with the least possible delay; her commander calls upon the agent for the requisite supplies, which amount to \$2,000 worth of provisions and \$3,000 of repairs; the agent has in hand, money enough for the

repairs, but not for the provisions, he must then write to the Secretary of the Navy for money for the provisions, and before he gets an answer from the Secretary, three months may have expired. In this case, the vessel would be detained three months for want of provisions; and, if the agent should have a balance of \$5,000 in his hands, out of any other appropriation than that of provisions, it would not prevent the detention of the vessel: for, if he applied any part of that \$5,000 to the purchase of provisions, he could not be allowed credit for such purchase. The agent could not, in this case, or in any other, negotiate a bill on the Department, because he would never know the exact state of the appropriations.

Would it be possible for the Secretary of the Navy to keep the agents precisely informed as to the actual balances on hand, of each and every appropriation; or could he convey such information in any useful degree? Although he might direct, daily, returns of each and every warrant, upon each and every appropriation, to be made to the agents, still, before such returns could reach them, and particularly those at a distance, the balances would be considerably reduced by the daily drafts upon them, and might, possibly, be exhausted.

If it were possible to convey such information as would enable the agents to ascertain the exact balances on any day of the year, this would not remove the objection stated. No agent could tell, without previous instructions from the Secretary of the Navy, how far he could safely draw upon such balances, as he could not possibly know what other agents might have drawn for. Suppose a balance of \$40,000, on account of repairs, and that the agents at New York, Norfolk, Charleston, and New Orleans, know of this balance; that, at each of these places, there are one or more vessels requiring repairs; how can each agent know what the others may want? No one of them can judge; they will, therefore, all write for instructions to the Secretary of the Navy, and wait to receive them before they commence the requisite repairs. Under the provisions of this section, it would be the duty of the Secretary of the Navy to instruct the agents to this effect.

Such instructions, as to public vessels on foreign stations, would, in a still greater degree, impede the public service. Such a vessel might be detained in port six months, at an expense of \$50,000, for want of \$6,000, for provisions and repairs, as the agent would not undertake to make an advance for the Government to such an amount; because, if he did, and should happen to exceed the appropriation, he would not have credit for the same.

The provision in the latter part of this section, which authorizes the President, "during the recess of Congress," on the application of the Secretary, and not otherwise, to direct "a portion of the moneys appropriated for a particular branch of expenditure, to be applied to another branch of expenditure, in the same department," would not remove these difficulties. This provision would be found a deception, in practice; it would not enable an agent to make such application of moneys, without a previous special instruction from the Secretary of the Navy. Hence, "the public service would be nearly as much impeded" with, as without this provision. The agents would not presume upon the sanction of the President, and draw on the Department; that would be applying the money before the President is consulted; whereas, the President can only sanction such application before it is made. He has not power to do it afterwards. But, if this objection could be removed, it might happen that the bill would arrive at the seat of government, not "in the recess," but during the session of Congress; in such case, the President would have no right to give his sanction. What, then, would be the consequence? The bill is drawn payable at sight; the appropriation on which it is drawn is insufficient to pay it; it cannot, therefore, be paid; the holder protests the bill, and resorts to the drawer for payment of principal, interest, costs, and damages.

The provisions of the second section may be useful. It may be proper, however, for me to observe, that I know of no "injurious delays," on the part of the accountant of the Navy, in the settlement of accounts.

As to the provisions of the third section, not knowing how many agents the War Department will require, I can form no opinion as to the number that may remain to the Navy Department. I would only respectfully submit to the consideration of Congress, whether the number of essential agents of one department should, at all, be affected by the number that may be deemed necessary to a distant department of the Government. Under the limitations contemplated, serious injuries to the public service might, and probably would happen. A public vessel might, by stress of weather, or any other cause, be compelled to put into a port where there is no agent. The commanding officer, in such case, would not undertake to purchase supplies himself; he knows nothing about the state of the appropriations, and would not choose to put to hazard all his pay, probably all his fortune. He must write to the Secretary of the Navy for instructions; and hence would result injuries, necessarily produced by such unavoidable delays, and by the appointment of some temporary agent, who would, probably, be ignorant of his duties.

The Navy Department has, hitherto, distributed the advantages of public expenditures, so that every part of the Union has participated. Under the provisions of this section, those advantages would be monopolized by the towns in which the Department would have agents. In these towns all purchases would be made.

With respect to the provisions of the fourth section, it is proper, and it is at present prescribed by law, that the Comptroller of the Treasury shall give instructions to the accountant of the Navy, as to the forms of rendering accounts, and as to his giving such forms to the navy officers and agents; and this, I presume, is the intention of this section. It is not, I trust, intended, that such forms shall be sent directly from the Treasury Department to agents of the Navy Department.

The fifth section provides, that "no purchase or contract for supplies or services, shall be made without the President's approbation," &c.

Is a piece of kentege to be purchased, the President must previously approve the purchase; is a laborer or a seaman to be hired, the President must previously approve the hiring. What does the duty of approving or disapproving a purchase imply? It implies a knowledge of the quality, value, use, and quantity required, of each and every article, the purchase of which is to be approved or disapproved. If such knowledge is not possessed, the duty cannot be properly performed.

But, independently of the impropriety—the unfitness of imposing such duties upon the first magistrate of the nation—what would be the effect, in practice? In some few cases, it might be partially done; in most cases it would occasion great losses and delays. In cases of purchases at the seat of Government, it might be partially done; but, in purchases required at distant ports, it would, obviously, produce great delays. Suppose a public vessel is at Gibraltar, and requires supplies; not a single purchase could be made without the previous approbation of the President; and, indeed, under the provisions of this section, not a man could be entered, to supply the place of one that might have deserted, or died, or have been killed in action.

The President, it is provided, may approve, either before or after the purchase, &c. This subsequent approbation of the President, to purchases, &c. will not be considered as a matter of course; he will exercise his judgment, and approve or reject, as it shall dictate. Who then would make a purchase, at the hazard, 1st, of losing the whole amount, because there might not be funds; 2d, of having his purchases disapproved by the President? No agent could, especially at a distance, make a condition with the vender, that, if the President did not approve the purchase, the articles should be returned to him without any compensation; because no person would sell under such circumstances.

I take this occasion to suggest for consideration, whether it would not be an improvement of the present system, if the several Departments of the Government were, by law, required to make to Congress, annual reports of the expenditures of the respective Departments, so that Congress might see, whether, in any case, they varied in object, or transcended in amount, the estimates upon which the appropriations are founded; and, if they did, that a satisfactory explanation might be therefor made.

A.

*Circular to the Navy Agents.*NAVY DEPARTMENT, *9th March, 1803.*

The appropriation law of the present year, changing the classifications made by the law of the last year, renders it necessary that you should receive additional instructions, as to your future conduct, in making requisitions, and in the manner of expending them.

The law of the present year appropriates—

For the pay and subsistence of the officers and pay of the seamen, - - - -	\$283,993 00
For provisions, - - - - -	157,360 20
For medicines, instruments, and hospital stores, and all expenses on account of the sick, - - - -	7,700 00
For the purchase of ordnance and other military stores, - - - - -	15,000 00
For repairs of vessels, store rent, and other contingent expenses, - - - - -	182,000 00
For timber, ordnance, and other materials for 74 gun ships, and transportation, - - - - -	114,425 00
For the erection of sheds and navy yards, including docks and other improvements, the pay of superintendents, storekeepers, clerks, and laborers, - - - - -	48,741 87

There are other appropriations, which, however, either relate to the marine corps, or are for deficiencies in the appropriations for 1802, for objects which are comprehended under the above heads.

I have commenced, and shall progress, in the expenditures, under the determination not to exceed either of the particular sums appropriated. I cannot, therefore, lay my injunctions on you in terms too forcible, to be extremely particular in designating, in your requisitions, the objects upon which the expenditures are to be made, that we may, at all times, be able to ascertain under what heads of appropriation to make remittances. It will also be expected, that you will always give a prospective detail of the expenditures as they are contemplated; that we may make remittances with a full understanding of the objects for which they are made, and thus be enabled to avail ourselves, if necessary, of the whole sums appropriated, without exceeding either in the expenditures.

In your letters of requisition, you will be pleased to exclude all matter irrelative to the requisition. Should it be necessary to write to the Department on other points at the same time that you write for a remittance, be pleased to communicate them in a separate letter.

We shall pay no money upon your requisitions unless made in conformity to the preceding arrangements, and I confidently rely upon your exertions to enable me to carry these arrangements into complete effect.

The accountant of the navy will give you instructions as to expenditures.

I am, respectfully, sir,

ROBERT SMITH.

B.

NAVY DEPARTMENT, *Accountant's Office.*

SIR:

The system adopted at this office, for arranging the expenditures of the Department, requires that the several objects and expenditures should be kept separate and distinct, as they fall under the following heads, viz:

- Pay of the navy, &c.
- Provisions.
- Hospital.
- Contingent.
- Ordnance.
- Navy yards and docks.
- Pay of superintendents, storekeepers, &c.
- Gun Boats.

The first of these heads will embrace all payments made on account of the pay or subsistence of officers, or the pay of seamen.

The second will include all payments for, or on account of, provisions.

The third, all medicines, instruments, and hospital stores.

The fourth, all expenditures, of whatever nature, on account of repairs to vessels, and, indeed, all other expenses not falling under any of the other specific heads.

The fifth, all ordnance or military stores purchased for, or on account of, the navy.

The sixth, all expenses, of whatever nature, incurred in the improvement of the navy yards, docks, and wharves.

The seventh, the salaries and wages of superintendents, storekeepers, &c.

The eighth, all expenses, of whatever nature, incurred in building and equipping gun boats.

The form, herewith transmitted, is framed on the principles of this system, agreeably to which, you will render your accounts to this office, *monthly*. It may also be necessary to observe, that it will be proper to accompany your summary statement by abstracts for expenditures on account of each vessel, or other specific object, extending in your summary in one line the aggregate amount expended on the particular object. And further, that, as the commanding officers are held responsible for regulating all expenses on account of the vessel under their immediate command, no supplies can be furnished, but by the direction, or with the concurrence, in writing, of the officer commanding; and, in all cases where articles are delivered, or services of any kind rendered, to a vessel, it will be the duty of the commanding officer to receipt for the articles, and to certify that the services were rendered; and this evidence, in addition to bills with receipts, stating the amount paid for all expenditures whatever on account of the vessel, will be necessary, to entitle you to credit at this office. And for all expenditures, of whatever nature, bills and receipts will be required. It also may not be unnecessary to observe, that all receipts must be signed by the person entitled to receive, and that the receipt of one person for another will not be admitted, unless accompanied by an order, in writing.

No payments or advances are to be made to any officer of the navy, on account of pay, &c., unless particularly instructed from this Department.

Herewith, you will also receive a *form* for the return of public stores. The object of this return is to exhibit a clear and distinct view of the number, quality, and value, of the articles purchased, and not immediately expended, or delivered; and also those received from agents or vessels of war, arranged in appropriate columns. *Quarterly returns* of these accounts will be made to this office, exhibiting the number, quantity, and value, of the several articles on hand at the beginning of the quarter, the articles purchased within the quarter, and also those received from other navy agents or vessels of war, as well also those that may be delivered within the quarter, thereby showing the balance of articles remaining on hand, at the end of the quarter. Vouchers for all deliveries must also accompany the return.

Respectfully, I am, &c.

NAVY DEPARTMENT, *Accountant's Office, February 24, 1809.*

The foregoing is a copy of instructions that issue from this office to the navy agents, in relation to the manner of keeping and exhibiting their accounts, varying the heads of expenditure, from time to time, as it may be necessary to correspond with the specific appropriations.

This system it was thought advisable, *by this Department*, to adopt, in the year 1803, and it has been pursued ever since. Antecedent to that time, the accounts were kept under heads of expenditure, according to instructions from the Comptroller of the Treasury, without regarding the specific heads of appropriation.

THOMAS TURNER, *Accountant.*

10th CONGRESS.]

No. 298.

[2d SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, ON THE 3D OF MARCH, 1809.

The Secretary of the Treasury, to whom was referred the memorial of the stockholders of the Bank of the United States, praying for a renewal of their charter, which will expire on the 14th day of March, 1811, respectfully submits the following report:

The Bank of the United States was incorporated by act of March 2d, 1791, with a capital of ten millions of dollars, divided into 25,000 shares, of 400 dollars each. Two millions of dollars were subscribed by the United States, and paid in ten equal annual instalments. Of the eight millions of dollars subscribed by individuals, two millions were paid in specie and six millions in six per cent. stock of the United States. Two thousand four hundred and ninety-three of the shares belonging to Government were sold in the years 1796 and 1797, at an advance of 25 per cent.; two hundred and eighty-seven were sold in the year 1797, at an advance of 20 per cent., and the other two thousand two hundred and twenty shares in the year 1802, at an advance of 45 per cent.; making together, exclusively of the dividends, a profit of 671,860 dollars to the United States. The greater part of the six per cent. stock, originally paid by the stockholders, has since been sold by the bank: a portion has been redeemed by Government, by the operation of the annual reimbursement, and the bank retains, at present, only a sum of 2,231,598 dollars, in six per cent. stock.

About eighteen thousand shares of the bank stock are held by persons residing abroad, who are, by the charter, excluded from the right of voting. The stockholders resident within the United States, and who have the exclusive control over the institution, hold only seven thousand shares, or little more than one fourth part of its capital. They appoint annually twenty-five directors of the bank itself, which is established at Philadelphia; and those directors have the entire management of the discounts and other transactions of the institution in that city, and the general superintendence and appointment of the directors and cashiers of the offices of discount and deposite, established in other places. There are at present eight of those offices, viz: at Boston, New York, Baltimore, Norfolk, Charleston, Savannah, the city of Washington, and New Orleans. The two last were established at the request of the Secretary of the Treasury.

The profits of a bank arise from the interest received on the loans made, either to Government or to individuals; and they exceed six per cent., or the rate of interest at which the loans are made, because every bank lends, not only the whole of its capital, but, also, a portion of the moneys deposited for safe keeping in its vaults, either by Government or by individuals. For every sum of money thus deposited, the party making that deposite either receives the amount in bank notes, or obtains a credit on the books of the bank. In either case he has the same right, at any time, to withdraw his deposite; in the first case, on presentation and surrender of the bank notes; in the other case, by drawing on the bank for the amount. Bank notes and credits on the books of the bank, arise, therefore, equally from deposites, although the credits alone are, in common parlance, called deposites; and the aggregate of those credits, and of the bank notes issued, constitutes the circulating medium substituted by the banking operations to money; for payments from one individual to another are equally made by drafts on the bank, or by the delivery of bank notes. Experience has taught the directors what portion of the money thus deposited they may lend, or, in other words, how far they may, with safety, extend their discounts beyond the capital of the bank, and what amount of specie it is necessary they should keep in their vaults. The profits, and, therefore, the dividends of a bank, will increase in proportion as the directors will increase loans of the moneys deposited, and suffer the amount of specie on hand to diminish. Moderate dividends, when not produced by some particular cause, which checks the circulation of bank paper, are the best evidence of the safety of the institution, and of the wisdom of its direction.

The annexed table of all the dividends made by the Bank of the United States, since its establishment, shows that they have, on an average, been at the rate of $8\frac{3}{4}$ (precisely $8\frac{13}{16}$) per cent. a year, and proves, that the bank has not, in any considerable degree, used the public deposites for the purpose of extending its discounts.

From what has been premised, it appears that the property of a bank in full operation consists of three general items, viz: 1st. outstanding debts, consisting principally of the notes payable at sixty days, which have been discounted at the bank; 2dly, specie in the vaults; 3dly, buildings necessary for the institution. On the other hand, the bank owes, 1st. to the stockholders, the amount of the capital stock originally subscribed, payable only in case of the dissolution of the institution; 2dly, to Government or individuals, the whole amount of moneys deposited, payable on demand, and including both the credits on the bank books, commonly called deposites, and the bank notes in circulation. The account is balanced by the amount of undivided profits and accruing discounts, which constitute the fund for defraying current expenses, for paying subsequent dividends, and for covering contingent losses.

The following statement of the situation of the Bank of the United States, including its branches, exhibits the true amount of public stock, which is still held by the institution, of the cost of its buildings, and lots of ground, and of the undivided surplus or contingent fund, subsequent to the dividend made in January last. But the amount of loans to individuals, or discounts, of specie in the vaults, and of moneys deposited, including both the credits on the bank books, commonly called deposites, and the bank notes in circulation, is taken on a medium; and, so far as relates, on the credit side of the account, to specie on hand, and, on the debit side, to deposites, is several millions of dollars less than it happens to be at this moment; both having been swelled much beyond the average by the embargo, and by the unusually large balance in the treasury, which is principally deposited in the bank. Some minor items, arising from accidental circumstances, are omitted, for the sake of perspicuity.

[NOTE.—For memorial, see No. 283.]

Cr.	
I. Debts due to the bank, viz:	
1. Six per cent. stock of the United States, being the residue of that part of the original subscription paid in public stocks, which is still held by the bank,	\$2,230,000
2. Loans to individuals, consisting chiefly of discounted notes, payable at sixty days, and, in some instances, of bonds and mortgages taken in order to secure doubtful debts,	15,000,000
3. Due by banks incorporated by the States,	800,000
	\$18,030,000
II. Specie in the vaults,	5,000,000
III. Cost of lots of ground and buildings erected,	480,000
	\$23,510,000
Total credits,	
	\$23,510,000
Dr.	
I. Capital stock of the bank, payable to the stockholders, whenever the institution may be dissolved,	
	\$10,000,000
II. Moneys deposited, viz:	
1. Credits on the bank books, commonly called deposits, including the deposits both by Government and by individuals,	8,500,000
2. Bank notes in circulation,	4,500,000
	13,000,000
	\$23,000,000
Total debtor,	
	\$23,000,000
Balance, being the amount of undivided profits, commonly called the "contingent fund," and applicable to cover losses which may arise from bad debts or other contingencies, and to extra dividends,	
	\$510,000

It sufficiently appears, from that general view, that the affairs of the Bank of the United States, considered as a moneyed institution, have been wisely and skilfully managed.

The advantages derived by Government from the bank, are nearly of the same nature with those obtained by individuals, who transact business with similar institutions, and may be reduced to the following heads:

1. *Safe-keeping of the public moneys.*—This applies not only to moneys already in the treasury, but, also, to those in the hands of the principal collectors, of the commissioners of loans, and of several other officers, and affords one of the best securities against delinquencies.

2. *Transmission of public moneys.*—As the collectors will always, in various quarters of the extensive territory of the Union, either exceed or fall short of the expenditures in the same places, a perpetual transmission of money, or purchases of remittances at the risk and expense of the United States, would become necessary, in order to meet those demands; but this is done by the bank, at its own risk and expense, for every place where one of its branches is established, which embraces all payments of any importance.

3. *Collection of the revenue.*—The punctuality of payments introduced by the banking system, and the facilities afforded by the bank to the importers indebted for revenue bonds, are amongst the causes which have enabled the United States to collect, with so great facility, and with so few losses, the large revenue derived from the impost.

4. *Loans.*—Although the prosperity of past years has enabled Government, during the present administration, to meet all the public demands without recurring to loans, the bank had, heretofore, been eminently useful in making the advances, which, under different circumstances, were necessary. There was a time, when, exclusively of the six per cent. stock held by the institution, as part of the original subscription, the loans obtained by Government from the bank, amounted to 6,200,000 dollars. And a similar disposition has been repeatedly evinced, whenever the aspect of public affairs has rendered it proper to ascertain whether new loans might, if wanted, be obtained.

The numerous banks now established, under the authority of the several States, might, it is true, afford considerable assistance to Government in its fiscal operations. There is none, however, which could effect the transmission of public moneys with the same facility, and to the same extent, as the Bank of the United States is enabled to do, through its several branches. The superior capital of that institution offers, also, a greater security against any possible losses, and greater resources in relation to loans. Nor is it eligible, that the General Government should, in respect to its own operations, be entirely dependent on institutions over which it has no control whatever. A National Bank, deriving its charter from the National Legislature, will, at all times, and under every emergency, feel stronger inducements, both from interest and from a sense of duty, to afford to the Union every assistance within its power.

The strongest objection against the renewal of the charter seems to arise from the great portion of the bank stock held by foreigners—not on account of any influence it gives them over the institution, since they have no vote—but of the high rate of interest payable by America to foreign countries, on the portion thus held. If the charter is not renewed, the principal of that portion, amounting to about 7,200,000 dollars, must, at once, be remitted abroad; but, if the charter is renewed, dividends, equal to an interest of about 8½ per cent. a year, must be annually remitted in the same manner. The renewal of the charter will, in that respect, operate, in a national point of view, as a foreign loan, bearing an interest of 8½ per cent. a year.

That inconvenience might, perhaps, be removed, by a modification in the charter, providing for the repayment of that portion of the principal by a new subscription to the same amount, in favor of citizens; but it does not, at all events, appear sufficient to outweigh the manifest public advantages derived from a renewal of the charter.

The conditions in favor of the public, on which this should be granted, are the next subject of consideration.

The nett profit annually derived by the stockholders, from a renewal of the charter, is equal to the difference between the annual dividends and the market rate of interest. Supposing this to continue at six per cent. during the period granted by the extension of the charter, and the dividends to be on an average at the rate of 8½ per cent., that profit will be 2½ per cent. a year. If the charter be extended twenty years, the value of the privilege will be equal to an annuity of 2½ per cent. on the capital, that is to say, 250,000 dollars, for twenty years; and such annuity being payable semi-annually, is worth almost 2,890,000 dollars. This, however, would be much more than any bank would give for a charter, as it would leave it nothing but the right of dividing at the rate of six per cent. a year, which the stockholders have without a charter. It is believed, that they would not be willing to give even half that sum for the extension; and that about 1,250,000 dollars may be considered as the maximum, which could be obtained, if it was thought eligible to sell the renewal of the charter for a fixed sum of money.

It is, however, presumed, that the decision on the conditions, which may be annexed to an extension of the charter, will be directed by considerations of a much greater importance than the payment of such sum into the treasury. The object will, undoubtedly, be to give to the institution all the public utility of which it is susceptible, and to derive from it permanent and solid advantages, rather than mere temporary aid. Under these impressions, the following suggestions are respectfully submitted:

I. That the bank should pay interest to the United States, on the public deposits, whenever they shall exceed a certain sum, which might perhaps be fixed at about three millions of dollars.

II. That the bank should be bound, whenever required, to lend to the United States a sum not exceeding three-fifths of its capital, at a rate of interest not exceeding six per cent.; the amount of such loan or loans to be paid by the bank in instalments, not exceeding a certain sum, monthly, and to be reimbursed at the pleasure of Government.

III. That the capital stock of the bank should be increased to thirty millions of dollars, in the following manner, viz:

1. Five millions of dollars to be subscribed by citizens of the United States, under such regulations as would make an equitable apportionment amongst the several States and territories.

2. Fifteen millions to be subscribed by such States as may desire it, and under such equitable apportionment amongst the several States as may be provided by law; and a branch to be established in each subscribing State, if applied for by the State.

3. The payments, either by individuals or States, to be either in specie or in public stock of the United States, at such rates as may be provided by law.

4. The subscribing States to pay their subscription in ten annual instalments, or sooner if it suits their convenience, but to receive dividends in proportion only to the amount of subscription actually paid; and their shares of bank stock not to be transferable.

IV. That some share should be given in the direction to the General and State Governments, the General Government appointing a few directors in the general direction, and the Government of each subscribing State appointing a few directors in the direction of the branch established in such State.

The result of that plan would be, 1st., that the United States, receiving an interest on the public deposits, might, without inconvenience, accumulate, during years of peace and prosperity, a treasure sufficient to meet periods of war and calamity, and, thereby, avoid the necessity of adding, by increased taxes, to the distresses of such periods. Secondly, that they might rely on a loan of eighteen millions of dollars, on any sudden emergency. Thirdly, that the payment of the greater part of the proposed increase of capital, being made in ten annual instalments, that increase would be gradual, and not more rapid than may be required by the progressive state of the country. Fourthly, that the bank itself would form an additional bond of common interest and union, amongst the several States.

All which is respectfully submitted.

ALBERT GALLATIN.

No. 299.

[2d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 3, 1809.

TREASURY DEPARTMENT, *March 2*, 1809.

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing a mint, and regulating the coins of the United States," passed on the 2d of April, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Comptroller's Office*, *March 1st*, 1809.

SIR:

The statements accompanying this, marked A, B, and C, have been prepared pursuant to the seventh section of an act of Congress, passed on the 2d day of April, 1792, entitled "An act estblishing a mint, and regulating the coins of the United States." They contain all the information relative to the transactions of the mint, which the settlements made at the treasury enable me to give.

I have the honor to be, with great respect, sir, your obedient servant,

G. DUVALL.

ALBERT GALLATIN, Esq.

A.

Statement exhibiting the balance of Gold and Silver remaining in the hands of the officers of the Mint on the 31st December, 1807; the amount of deposits from 1st January to 31st December, 1808; the different species of coins made and paid on account of deposits, allowances for wastage, and the balance remaining in the hands of the officers of the Mint on the said 31st December, 1808, to be accounted for on a future settlement.

DR.

The Mint of the United States in account of Copper purchased from the commencement of the Institution to the 31st December, 1808, with the United States.

CR.

	AVOIRDUPOIS WEIGHT.		TROY WEIGHT.			COST OF COPPER.			TROY WEIGHT.			Value of Copper at the rate of 7 dwt. to a cent.	
	lbs.	oz.	lbs.	oz.	grs.	Dolls.	Cts.		lbs.	oz.	dwt.	Dolls.	Cts.
To amount of rough copper and copper planchettes, purchased from the commencement of the institution to the 31st December, 1807, per statement marked B, accompanying the Comptroller's letter of the 23d April, 1808, - - - - -	-	-	768,889	2	2	214,575	13		701,339	6	13	226,474	88
Deduct this sum, being so much overcharged on the cost of copper in the annual statement for the year ending December 31, 1805, it then appearing by the treasurer's account, that a certain insurance on copper that had been made at the rate of two per cent. ought to have been made at the rate of two guineas; but, it now appears, that two per cent. was correct. (See the 2d quarterly account of the mint for the year 1808,) - - - - -	\$16	71											
Also, this sum, received of David Stewart and Son's protested bill, charged to copper coinage in the year 1801. (See the same quarterly account) - - - - -	949	23											
						965	94						
						213,609	19						
Add this sum, being a deduction on an invoice of copper, say on £3,756 3s. 7d. sterling, instead of on £3,546 11s. 7d. at 2½ per cent. (See the fourth quarterly account for the year 1808,) - - - - -	-	-				23	52						
						£13,632	71						
Balance, being the amount gained in the coinage of copper since the establishment, - - - - -	-	-				34,705	79						
			768,889	2	2	248,338	50		768,889	2	2	248,338	50

By amount of rough copper and copper planchettes, accounted for per statement marked B, accompanying the Comptroller's letter of 23d April, 1808, - - - - -

By amount of cents and half cents charged by the treasurer of the mint, as delivered to the Treasurer of the United States, during the year 1808, viz:

	<i>Cents.</i>	<i>Half Cts.</i>	
In the 1st quarter,	105,000	and 24,000,	equal to \$1,170 00
2d do.	133,500	and 73,000,	do. 1,700 00
3d do.	481,000	and 20,000,	do. 4,910 00
4th do.	239,500	and 93,070,	do. 2,860 35

Balance on 31st December, 1808, viz:

Cents and half cents in the hands of the treasurer of the mint; cents, 162,500, and half cents, 356,930, equal to, - - -

Copper planchettes, fit for striking, in the hands of the chief coiner, - - - - -

Copper planchettes in the hands of the treasurer of the mint on the 31st December, 1807, which does not appear to have been paid over to the chief coiner in his accounts before me, the one for the 4th quarter 1808, being wanting, - - -

Profit and loss for this quantity of copper unaccounted for, - - -

COMPTROLLER'S OFFICE, February 28, 1809.

G. DUVALL, Comptroller.

C.

Summary Statement exhibiting the value of Coins made at the Mint; the amount of disbursements on account of the establishment; the amount allowed for wastage; the amount retained of deposits; and the amount gained on the coinage of Copper from the commencement of the institution to the 31st December, 1808.

	Dollars.	Cents.	Dollars.	Cents.
Value of gold, silver, and copper coins, made at the mint to 31st December, 1807, - - - - -	-	-	6,481,653	68
Do. of gold coins made from 1st January to 31st December, per account herewith, marked A, - - - - -	284,665	00		
Do. of silver coins made from 1st January to 31st December, per said account A, - - - - -	684,300	00

No. 300.

[2d SESSION.]

BALANCES DUE FROM INDIVIDUALS ON THE 30TH JUNE, 1808.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 3, 1809.

TREASURY DEPARTMENT, *March 2, 1809.*

SIR:

In obedience to a resolution of the House of Representatives of the 20th April last, I have the honor to transmit a statement of the balances which are charged on the books of the treasury for advances made prior to the 30th day of June, 1808.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

Balances due on Personal Accounts in the books of Receipts and Expenditures of the United States, on the 30th June, 1808.

FIRST CLASS,

Including the accounts of all persons no longer in office, or whose agencies have ceased.

ADVANCES ON ACCOUNT OF THE CIVIL LIST.

46

Names.	Capacity.	Amount.	Remarks.
†† Daniel C. Brent, - - -	Late marshal of the District of Columbia, - - -	\$18,802 58	Account settled, balance reduced to \$68 11.
Michael Baldwin, - - -	Ditto, ditto, Ohio, - - -	1,294 36	
Samuel Bradford, - - -	Ditto, ditto, Massachusetts, - - -	1,281 24

Ditto, - - -	paying interest, - - -	708,944 80	Accounts rendered to December, 1808.
Ditto, - - -	reimbursing 4½ per cent. stock, - - -	213,479 37	
Isaac Neufville, - - -	paying Navy 6 per cent. stock, - - -	2,500 00	
Ditto, - - -	paying interest, - - -	304,861 93	Accounts rendered to September, 1807.
James Davidson, - - -	paying dividends of interest unclaimed, - - -	399,343 57	
Ditto, - - -	on books of treasury, - - -	1,215,459 34	Accounts settled to Sept. 1, 1808; balance reduced to \$83,355 27.
Ditto, - - -	purchasing 5½ per cent. stock, - - -	1,028,000 00	Ditto; balance reduced to \$56,700.
Ditto, - - -	paying interest on unfunded registered debt, - - -	41 79	
Ditto, - - -	purchasing Navy 6 per cent. stock, - - -	80,600 00	Accounts settled; balance reduced to \$600.
George Simpson, - - -	Cashier of Bank of the U. States, agent for paying dividends of interest, - - -	532,131 15	Accounts rendered to December, 1808.
William and J. Willink & Co. - - -	Commissioners at Amsterdam, account current, - - -	512,872 10	Ditto, June, do.
MILITARY ESTABLISHMENT.			
William Simmons, - - -	Accountant of the War Department, - - -	\$3,703,340 63	Accounts rendered to June 30, 1808; balance on that day, \$3,327,403 99.
Thomas T. Tucker, - - -	Agent of the War Department, - - -	1,263,020 55	Ditto, to December 31, 1808, \$118,727 74.
NAVAL ESTABLISHMENT.			
Thomas Turner, - - -	Accountant of the Navy Department, - - -	\$5,597,421 06	Accounts rendered to Sept. 30, 1808; balance on that day, \$1,719,838 52.
Thomas T. Tucker, - - -	Agent for the Navy Department, - - -	525,586 38	Ditto, ditto, \$42,953 41.

11th CONGRESS.

No. 301.

[1st Session.]

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, ON THE 2D OF JUNE, 1809.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report:

The nett revenue arising from duties on merchandise and tonnage, which accrued during the year 1807, amounted, as appeared by the last annual statement, to

\$ 16,060,000

A correct statement of that revenue, for the year 1808, cannot be prepared at this time, but may be estimated, as will appear by the estimate A, to about

10,270,000

The revenue arising from the same sources, which accrued during the first quarter of this year, did not much exceed one million of dollars; and although considerable importations may be expected from Great Britain and the West Indies, during the last six months of this year, yet, considering that there will be no arrivals from China and the East Indies, and the situation of the commercial intercourse of the United States with the rest of the world, it is not probable that the revenue, accruing during the year 1809, will exceed that of the year 1808.

The specie in the treasury, on the 1st October, 1808, amounted to

\$ 13,846,717 52

And the receipts, during the last three months of that year, as appears by the statement B, to

3,586,316 99

\$ 17,433,034 51

The disbursements, during the same period, have amounted, including 6,105,000 dollars paid in reimbursement of the principal of the public debt, to

\$ 7,491,339 79

Leaving a balance in the treasury, on the 1st January, 1809, of

9,941,694 72

\$ 17,433,034 51

The cash in the hands of Collectors and Receivers, and the outstanding revenue bonds, amounted, on the 1st January, 1809, to

\$ 9,880,000

From which, deducting for the expenses of collection and for the drawbacks payable during the year 1809,

3,000,000

Leaves, for the probable receipts of the year 1809, exclusively of the inconsiderable sums which may be received on account of the revenue accruing during that year, a sum of

6,880,000

Making, together with the balance in the treasury, on the 1st of January, 1809, of

9,941,000

An aggregate of sixteen millions eight hundred and twenty-one thousand dollars, applicable to the expenditures of this year,

\$ 16,821,000

The expenses of the year 1809 are, in conformity with the existing appropriations, estimated at fourteen millions five hundred thousand dollars, consisting of the following items:

Civil list, including the expenses of this session of Congress, miscellaneous expenses and foreign intercourse,

\$ 1,342,000

Military and Indian departments, viz:

Appropriation for the army and Indian department,

2,765,000

Appropriation for fortifications,

475,000

Arms and military stores,

550,000

3,790,000

Naval department, this year's appropriation,

2,915,000

Public debt, (1,547,000 of the appropriation of 8,000,000 of dollars for the year 1809 having been paid in advance in the year 1808, in order to effect the reimbursement of the whole of the 8 per cent. stock)

6,453,000

\$ 14,500,000

It must, however, be observed, that the estimate of the sums, payable in the course of this year, on account of drawbacks, is conjectural; and that the exportations, particularly of colonial produce, would, if the restrictions laid by the continental Powers of Europe on neutral commerce were removed, produce a much greater defalcation in the nett receipts into the treasury, than the sum assumed in the preceding estimate. In order to guard against any inconvenience arising from that contingency, and for the purpose of keeping always a moderate sum in the treasury, it may be necessary to borrow a sum equal to the amount of the principal of public debt which will be reimbursed during the year, and which will exceed three millions of dollars.

By the 10th and 19th sections of the act making further provision for the support of public credit, and for the redemption of the public debt, passed on the 3d of March, 1795, the commissioners of the sinking fund are authorized, from time to time, to borrow, and the Bank of the United States to lend, sums equal to the reimbursement of the public debt. But some doubts having arisen whether the powers vested by those two sections are applicable to the new six per cent. stocks, issued by virtue of the act of February 11th, 1807, in exchange of the old six per cent. deferred, and three per cent. stocks, it is desirable that the authority should be expressly extended, by law, to that case; and no other provision seems necessary for the public service of this year.

It would be premature to attempt, at this time, an estimate of the receipts and expenditures of the year 1810. It is sufficient to observe, that, although the receipts may exceed those of the present year, it is highly improbable that they should be equal to the expenditures of that year, which, unless the military and naval establishments should be reduced, will amount to sixteen millions of dollars. But it is believed that the revenue will, after that year, be adequate to discharge the annual expenses.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, June 1st, 1809.

A.

An Estimate of the duties which accrued on merchandise, tonnage, and passports, of debentures issued for drawback on foreign merchandise exported, of payments for bounties and allowances, and for the expenses of collection, during the year 1808.

1808.	DUTIES ON			Debentures issued. (a)	Bounties and Allowances.	Gross Revenue.	Expenses of Collection.	Nett Revenue.
	Merchandise.	Tonnage.	Passports.					
1st quarter,	\$4,285,766	\$32,607	\$166	\$198,895	\$185,395	\$3,934,249	\$154,874	\$3,779,375
2d quarter,	3,124,217	31,151	-	30,244	5,640	3,119,484	120,519	2,998,965
3d quarter,	1,867,069	26,923	212	14,259	3,608	1,876,337	142,995	1,733,342
4th quarter,	1,878,991	29,116	98	4,851	2,052	1,901,302	142,530	1,758,772
	11,156,043	119,797	476	248,249	196,695	10,831,372	560,918	10,270,454

(a) On account of drawbacks for exportations made prior to the embargo.

B.

Dr. Account of the Receipts and Expenditures of the United States, from the 1st October to the 31st Dec. 1808. Cr.

To expenditures under the following heads, viz:		1808. October 1.	
<i>Civil department,</i>		By balance in the hands of the Treasurer this day,	13,847,835 26
Comprising compensation to the President, Vice President, Senate, and House of Representatives, Judges, Officers of Government, Commissioners of Loans, &c.	178,275 62	Deduct warrants drawn prior to that day, and which then remained unpaid,	1,117 74
<i>Miscellaneous.</i>		By receipts into the treasury from Duties on imports and tonnage, Duties on stills, and other internal revenue,	3,409,638 43
Surveys of public lands,	5,069 81		959 59
Public buildings in the city of Washington,	15,500 00	<i>Direct Tax.</i>	
Light house establishment,	17,616 54	From the supervisors of the following districts:	
Miscellaneous expenses,	2,973 01	Kentucky,	1,700 00
Ascertaining land titles in Louisiana,	5,639 20	South Carolina,	611 09
Military pensions,	3,000 00		2,311 09
Annuities and grants,	500 00	<i>Public Lands.</i>	
Mint establishment,	4,000 00	From—	
Marine hospital establishment,	11,680 60	Zaccheus Biggs, Steubenville,	34,569 73
Unclaimed merchandise,	559 62	Peter Wilson, do.	1,199 76
Road from Cumberland, in Maryland, to the State of Ohio,	400 00	Levi Barber, Marietta,	3,248 72

<i>Intercourse with foreign nations.</i>		Sam'l Finley, Chillicothe,	5,920 09
Diplomatic department,	4,243 16	Isaac Van Horne, Zanesville,	8,630 41
Relief and protection of American seamen,	230 00	Nathaniel Ewing, Vincennes,	406 98
<i>Payments under treaties.</i>		Lemuel Henry, fort St. Stephens,	620 00
American claims assumed under the second convention with France,	50,619 59	John Sloane, Canton,	12,571 55
Treaties with the Mediterranean Powers, generally,	5,202 15	John Henderson, Washington, Mississippi territory,	500 00
	60,294 90		93,072 99
<i>Military establishment.</i>		Fees on letters patent—from Thos. T. Tucker, Treasurer of the United States,	900 00
Military department,	216,190 40	Cents and half cents coined at the mint—from Benj'n Rush, treasurer of the mint,	2,860 35
Arming and equipping the militia,	100,000 00	Stamp duties and penalties—from David Gelston, collector, New York,	10 25
Fortifications of ports and harbors,	300,000 00		
Trading houses with the Indians,	750 00		
	616,940 40		

pose an extensive nation; that her citizens are scattered over an immense extent of country, having various soils and climates, with pursuits adapted or varied to their different local situations. And a government, framing laws for this scattered population, must necessarily consult the wants and necessities of every part of it, to promote the general good of the whole. A reference to the report of Mr. Secretary Jefferson will evince, that enlarged and liberal views of this kind induced Congress to grant bounties to the fisheries. But views of another nature seem also to have influenced that body. The encouragements given to their own fishermen, by foreign nations, and the restrictions laid upon our oils and fish, in foreign ports, had threatened the fisheries with destruction; and the question came before Congress, whether that business should be abandoned entirely, or supported by the nation at large. The same question the subscribers consider as occurring in the present instance. Independent of the superiority which the British manufacturer possesses, in the low price of labor, the experience and skill of his workmen, and the strength of his capital, he enjoys advantages which are not known to an American manufacturer, in the bounties given by Government to those who grow the raw material, and to those who export the manufactured article. Whether an American manufacturer can resist a combination of advantages so unfavorable to his interests, without aid from Government, appears to the petitioners as problematical indeed.

Your petitioners deem it material to represent, that the non-importation act, by creating a demand for the articles which that act prohibited, has changed the direction of much capital, and caused the erection of buildings, which must now become waste, without the interposition of Congress. That if it be important to encourage manufactures, and if they promote national wealth, by encouraging internal industry; if they keep money at home, by preventing it from going abroad for foreign productions; if they give life to the industry of the farmer, the planter, and the mechanic; there can be no question upon the subject. *This is the time to encourage them effectually.* If those which are erected be suffered to go waste; if those recently established die with the law which gave them being; an age will pass away before other citizens will embark in the same business. Ill success, upon the part of one manufacturer, will prevent others from engaging in the same pursuit; success that crowns every measure with popularity, produces herds of imitators and followers.

Nor can it be an unimportant consideration with Congress, that the encouragement of domestic manufactures will have a tendency to transplant the arts and capital of Europe to this country, by holding out inducements to artists and manufacturers to remove here.

The subscribers cannot quit the subject without some remarks upon the peculiar situation of the country in which they live. Kentucky is rich in soil, but at a distance from the seas. She is capable of producing hemp for the whole supply of the United States—an article perhaps as much wanted as any other, both by the Government, and by private citizens, engaged in every pursuit in life; which, to an enormous amount, is annually imported from the northern parts of Europe, and which cannot easily be procured, in case of war. If the manufacturers of Kentucky were sufficiently encouraged, they would induce the farmers to cultivate it, so as to furnish a never-failing resource, whether in peace or war. The proximity of Kentucky to Ohio and Indiana subjects her to continual drains of treasure for United States' lands. Large sums are annually taken off for foreign productions, and merchants in the Atlantic States, who are the real collectors of the revenue, pay, for Kentucky, her quota to the treasury. Protected as she is by the Union, with this arrangement she is satisfied. But when the fishermen of the East are not only encouraged by protecting duties, but also by bounties; when, comparatively speaking, no public moneys are expended here, but all at Washington, and on the sea board, in salaries, buildings, fortifications, upon the army, and on the navy, for the protection of commerce, in which, from her local and insular situation, she cannot participate; she would be better pleased if she was indemnified, for these disadvantages, by some encouragement of her industry; and that, perhaps, can best be done, with public benefit, by protecting duties to the manufacture of what promises to be her staple article.

Wherefore, &c.

JOHN ALLEN, and others.

[11th CONGRESS.]

No. 303.

[1st SESSION.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 14, 1809.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of Andrew Foster and Jacob P. Geraud, submitted the following statement of facts:

The petitioners, citizens of the United States, and residing at New York, state that they are the exclusive owners of the ship Clara, which sailed, on or about the 8th of January, 1809, under the command of Joshua Farrell, as master, from the port of New York, to that of New Orleans. When the said ship was under way, on her voyage to New Orleans, as the petitioners were informed, Joshua Farrell, the master, received on board two female slaves, the property of a certain J. B. Dupré, a passenger, and landed them at New Orleans. That, in consequence of this act of the master, the said ship Clara was seized and libelled, for contravening the ninth section of the act, entitled "An act to prohibit the importation of slaves into any port or place within the jurisdiction of the United States, from and after the first of January, in the year 1808," and was condemned as forfeited, by the district court of the United States for the district of Orleans. The petitioners aver that they had no agency in this transaction; that the said Joshua Farrell acted without their knowledge or instructions. Andrew Foster, one of the petitioners, states that, a day or two previous to the sailing of the ship, Joshua Farrell, the master, informed him that Mr. Dupré, a passenger, wished to take with him two black servants, and was desirous of knowing what charge he, the said Farrell, should make for their passage. The said Foster states that this conversation was casual, and that no other communication was made. The petitioners state, the unlawful procedure of the said Farrell was without their knowledge or concurrence, and that, for his misconduct or omission, they are made to suffer, innocently.

They cannot but believe that the conduct of the said Farrell was the result of ignorance.

From the facts stated in the petition, and the documents accompanying the same, the Committee of Commerce and Manufactures are of opinion that the case presented for consideration is a hard one, and that the petitioners are free from the imputation of any intentional violation of law, or of conniving at one—the object being too insignificant, their portion of the passage money of two slaves, to induce such a belief.

In this light, the case evidently appeared to the attorney who conducted the prosecution on the part of the United States. So impressed was he with a conviction of their innocence, and their just title to relief, that he, on his own responsibility, took their promissory note for the sum for which the ship Clara sold, payable in September next, in order to afford an opportunity to the petitioners of making application to Congress for a remission of such part of the forfeiture as has accrued to the United States.

Should the United States remit their claim to the petitioners, yet they will be considerable losers, as the informers against the ship Clara will be entitled to their share of the money arising from her sale. Joshua Farrell, the master, is still liable for a penalty of one thousand dollars for each slave, landed, contrary to law, and to imprisonment for his misconduct, or omission of a duty enjoined by law. The committee are of opinion that the case is such a one as to justify the interposition of the extraordinary and equitable powers of the National Legislature. In obedience to this impulse, they beg leave to report a bill for the relief of the petitioners.

11th CONGRESS.]

No. 304.

[1st Session]

POWERS OF THE COMMISSIONERS OF THE SINKING FUND.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JUNE 23, 1809.

TREASURY DEPARTMENT, June 20, 1809.

SIR:

I have the honor, in obedience to the resolution of the House of Representatives of the 17th instant, to transmit copies of the following documents, viz:

A. Proceedings of the Commissioners of the Sinking Fund, at a meeting held on 18th March, 1809, directing the application of a sum, not exceeding 2,250,000 dollars, to the reimbursement of the principal of the exchanged six per cent. stock, and authorizing the Secretary of the Treasury to borrow, with the approbation of the President of the United States, and in conformity with the provisions of the 10th section of the act "making further provision for the support of public credit, and for the redemption of the public debt," a sum equal to that of the principal of the exchanged six per cent. stock, which might be thus reimbursed.

B. Letter from the Secretary of the Treasury to the President of the Bank of the United States, dated 21st March, 1809, inquiring whether the proposed loan might be obtained from the bank; and, also, whether the bank would assent to a coterminous reimbursement of the whole amount of exchanged six per cent. stock owned by that institution.

C. Answer of the President of the Bank of the United States, dated 24th March, 1809; stating that it appears to the Board of Directors, that they are not authorized, by the act of 1795, to make a loan for the reimbursement of the stock created by the act of 1807; that the bank will agree to the loan, provided it is not wanted for a more distant period than the time when the present charter of the bank will expire; and provided also, a law be obtained, giving them authority to make it; and that the Board prefer a reimbursement of only so much of the exchanged six per cent. stock which they own, as may fall to the lot of the bank.

D. Proceedings of the commissioners of the sinking fund, at a meeting held on the 26th December, 1795, authorizing a loan of 500,000 dollars, pursuant to the first section of the act abovementioned, passed the 3d of March, 1795.

E. Contract with the Bank of the United States, dated 31st December, 1795, for a loan of 500,000 dollars, obtained from that institution, in pursuance of the last mentioned proceedings of the commissioners of the sinking fund.

F. Proceedings of the commissioners of the sinking fund, at a meeting held on the 15th December, 1798, authorizing a loan of 200,000 dollars, pursuant to the provisions of the act abovementioned, passed the 3d of March, 1795.

G. Contract with the Bank of the United States, dated 17th December, 1798, for a loan of 200,000 dollars, obtained from that institution, in pursuance of the last mentioned proceedings of the commissioners of the sinking fund.

No other loans have ever been obtained under either the first or tenth section of the act of 3d March, 1795, nor can I find, in the minutes of the commissioners of the sinking fund, any other proceedings touching the exercise or construction of the duties or powers contained in those sections.

It appears by the document A, that the commissioners of the sinking fund, at their meeting of the 18th March, 1809, construed the words "*public debt*," in the 10th section of the act of 3d March, 1795, as embracing the exchanged six per cent. stock; and considered the section, generally, as authorizing them to borrow, with the approbation of the President, the sum requisite for the reimbursement of that part of the principal of the public debt, if there was, in their opinion, reason to apprehend that all the demands on the treasury, including such reimbursement, could not be discharged, unless a loan to that amount was obtained.

I. The commissioners of the sinking fund did not decide that the words "*public debt*," in that section, comprehended any debt which did not exist on the 3d day of March, 1795, when the law was passed; nor even any portion of the debt then existing, which might (as in the case of the three per cent. stock, converted, by virtue of the act of 11th February, 1807, into a six per cent. stock) have been subsequently altered, either in the amount of its capital, or in the rate of interest payable thereon. The construction which they gave to the law, applied only to the six per cent. stock issued, by virtue of the 2d section of the act of 11th February, 1807, in exchange of the old six per cent. or deferred stocks. No alteration whatever was produced by that exchange, either in the amount of principal, in the rate of interest, in the time of paying the interest, or in the manner of transferring the debt. The only change is the manner in which the principal should be reimbursed; and that certainly did not alter the nature of the debt. This exchanged stock is, therefore, in the opinion of the commissioners, precisely the same debt which existed in March, 1795, and to which the powers vested in them, by that act, are strictly applicable. But, although the grounds on which a different opinion was entertained by the bank, are not to this moment understood; it appeared eligible, in a case where doubts were suggested, to apply to Congress for an explanatory act, and, in the mean while, to suspend any further proceedings respecting the proposed loan. The resolution of the commissioners of the sinking fund has not, therefore, been yet submitted to the President of the United States for his approbation.

II. The commissioners of the sinking fund are, by the 10th section of the act of 3d March, 1795, empowered and required, *if necessary*, to borrow, with the approbation of the President of the United States, the sums requisite for the reimbursements of the principal of the public debt. The general expressions, "*if necessary*," have been taken by the commissioners, as confining the power, thus vested in them, not to the case, when the sums which they are directed to pay, annually, might exceed the probable receipts into the treasury for that year, but to that of those receipts being insufficient to discharge all the annual expenditures, including the payments of the sinking fund. The question of priority of payment in favor of that fund was not taken into consideration, because, although the obligation to pay, at this time, eight millions of dollars, annually, on that account, is indisputable, it is equally *necessary* that all the other expenses, authorized and directed by Congress, should be paid. The meaning and object of the section appeared, indeed, so obvious, that no doubt had suggested itself on that subject previous to its late discussion.

The first section of the act authorizes the commissioners of the sinking fund to borrow, from time to time, such sums, in anticipation of the revenues, (not exceeding, in one year, one million of dollars) as may be *necessary* for the payment of the interest on the public debt. The restrictive word is the same in this as in the 10th section of the act. If it be insisted that the necessity of borrowing can never exist in this case, unless the revenues appropriated should fall short of the sums payable on account of the interest, there has been no year, since the law passed, in which such loan could have been legally made. It will appear, by reference to the documents D and E, that, in December, 1795, a loan of 500,000 dollars was, by virtue of the first section of the act of 3d March, 1795, authorized by the commissioners of the sinking fund, approved by the President, and obtained from the bank. The necessity of the loan is made to rest, not on a comparative view of the revenues appropriated for the payment of the interest, and of the sums payable on account of that interest, but on the general state of the treasury, and on a general view of the receipts and expenditures for the three last quarters of 1795, and for the year 1796. The amount of revenues which were pledged for the payment of interest, are there estimated, for the year 1796, at near six millions, and the amount of interest at only four millions of dollars.

The papers F and G refer to a loan of 200,000 dollars, obtained in December, 1798, from the bank, for the purpose of reimbursing an instalment of the principal of the loan of two millions of dollars, had of the bank, pursuant to

the 11th section of the act of incorporation. The loan is, through some error of the transcriber, stated to be by virtue of the 6th section of the act of 3d March, 1795; which section does not confer any authority to borrow money. And the loan was evidently made under the tenth, and not under the first section of the act: for it is intended for the purpose of reimbursing an instalment of principal, and not for paying the interest on the public debt; and it was also made for a term of four years, (though reimbursable sooner, at the pleasure of the United States) which could not have been done under the power vested by the first section, which directs an absolute reimbursement within a year from the time of each loan. This loan was made, because there was "no surplus of revenue in the treasury applicable to the payment of the said instalment;" by which is not meant that surplusses of revenue were alone appropriated for that object: for so much of the duties on imports, and spirits distilled, and stills, as would be sufficient to pay the instalments of that two millions loan, were appropriated by the 8th section of the act of 3d March, 1795; and the commissioners were directed, by the 11th section of the same act, to reimburse the said instalments as they became due. Nor was there, in the year 1798, any deficiency in the revenues appropriated for the payment of interest and principal, which the commissioners of the sinking fund were directed to make: for, the revenues pledged, exceeded, by three millions of dollars, the payments made on that account. But, at that time, as at present, the necessity of recurring to the authority to borrow, vested, by the act, in the commissioners, resulted from a deficiency in the general receipts, which, during that year, fell short of the general expenditures.

Under those impressions, it was stated, in the report made on the 1st instant, that it might be necessary to borrow a sum equal to the amount of the principal of the public debt, reimbursed during the year 1809; and that, provided the authority vested by the act of 3d March, 1795, should be expressly extended to the stock issued under the act of 11th February, 1807, no other provision seemed necessary for the public service of this year. And as, in the statement and estimates from which those conclusions were drawn, the moneys actually in the treasury at the commencement of the year, are stated at near ten millions of dollars; and the demands on account of public debt, for this year, at less than six millions and a half; the report was, evidently, founded on the supposed correctness of the construction abovementioned. But, if that construction shall be deemed incorrect, and, if the powers vested in the commissioners, by the 10th section of the act of 3d March, 1795, shall be considered, by Congress, as applicable only to the case when the moneys in the treasury, together with the probable receipts for the year, shall fall short of eight millions of dollars, the provision suggested by the report (and which was intended only to remove a doubt respecting the nature of the debt to which the powers were applicable) will not be sufficient. It will then be necessary to pass a law, giving an express authority to borrow the money which may be wanted.

I must acknowledge that, so far as relates to the extinguishment of the debt, and independent of the question respecting the true construction of the law, I perceive no material difference between the two modes. Whenever the expenses of a nation shall exceed its revenues, loans must, in some shape or another, be obtained; and the important question is, whether all the expenses incurred be really necessary, or even useful. On the decision of that question, the Secretary of the Treasury has no control. If he had, there would certainly be no necessity to borrow money in time of peace.

Permit me to add some observations explanatory of the letter written to the president of the bank, on points not immediately embraced by the resolution of the House.

There were two reasons why it was thought more eligible, in this instance, to negotiate a loan with the bank, than with individuals. It is still uncertain when, and to what amount, the money may be wanted. A contract with individuals requires previous notice and arrangements, and is absolute, so as to compel Government to receive the amount lent, according to the terms of the contract. But, with the bank, it was sufficient to ascertain whether the loan could, if wanted, be obtained from that institution; the contract might be delayed till it was ascertained whether, and to what amount, the loan was necessary; and it might be avoided altogether, if not actually necessary. The reimbursement would also be made with more convenience, and some interest saved, because the repayments may be made to the bank, from time to time, and in any sums whatever, according to the situation of the treasury.

In proposing to the bank that they should give notice to the treasury of their wish to be reimbursed the whole amount of their exchanged six per cent. stock, my object was to facilitate the loan, since, by that operation, there would have been no real payment, but only a commutation of debt; and, also, to accommodate, so far as was consistent with the public interest, those individuals, who, by accepting the terms of the act of February, 1807, had become owners of exchanged six per cent. stock, and who, that stock being above par, could not desire to be reimbursed. As it related to the bank, that consideration was immaterial, as it was not presumed that they wanted to sell their stock.

I have the honor to be, with great respect, sir, your most obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

A.

Proceedings of the Commissioners of the Sinking Fund, at a meeting held on 18th March, 1809.

At a meeting of the Commissioners of the Sinking Fund, held on the 18th March, 1809,

Present: ROBERT SMITH, *Secretary of State*,
ALBERT GALLATIN, *Secretary of the Treasury*,
C. A. RODNEY, *Attorney General United States*.

The Secretary of the Treasury laid before the Board a report, dated the 18th day of March, 1809, which was read, and is as follows, viz:

“ That there was paid, during the year 1808, in order to complete the reimbursement of the eight per cent. stock, a sum of	\$1,547,000
On account of the public debt, for the year 1809, in advance, and on account of the annual appropriation of	8,000,000
Leaving a sum of	6,453,000
Which must, in conformity with existing laws, be applied, during the present year, to the payment of the principal and interest of the public debt.	
That the payments to be made during the present year, on account of the interest on the debt, including the annual reimbursement of the six per cent. and deferred stocks, were estimated at	4,226,000
Leaving a sum of	\$2,227,000

Which, the market price of stocks being above the rate fixed by law for purchases, can only be applied to the reimbursement of the exchanged six per cent. stock, in conformity with the provisions of the act supplementary to the act, entitled ‘An act making provision for the redemption of the whole of the public debt of the United States.’

And that, considering the probable amount of receipts and expenditures, during the present year, it is not believed that all the demands on the treasury, including the abovementioned sum of \$2,227,000, can be discharged, unless a loan can be obtained, equal to the amount of principal of the public debt thus reimbursed.”

Whereupon,

Resolved, That a sum not exceeding \$2,250,000, be applied, during the present year, to the reimbursement of the principal of the exchanged six per cent. stock, in conformity with the provisions of the act last abovementioned.

Resolved, That the Secretary of the Treasury be authorized, with the approbation of the President of the United States, to borrow a sum equal to that of the principal of the public debt which may be thus reimbursed, in conformity with the provisions of the 10th section of the act, entitled "An act making further provision for the support of the public credit, and for the redemption of the public debt."

R. SMITH, *Secretary of State*,
ALBERT GALLATIN, *Secretary of the Treasury*,
C. A. RODNEY, *Attorney General of the United States*.

B.

Letter from the Secretary of the Treasury to the President of the Bank of the United States.

TREASURY DEPARTMENT, *March 21st*, 1809.

SIR:

The commissioners of the sinking fund having directed the reimbursement of a sum not exceeding \$2,250,000, of the new exchanged six per cent. stock, and authorized, in conformity with the 10th section of the act "making further provision for the support of public credit, and for the redemption of the public debt," passed 3d March, 1795, a loan to the amount of principal thus to be reimbursed, I beg leave to inquire, 1st. Whether the Bank of the United States will be disposed to lend that sum, in two equal instalments, viz: on 1st October next, and on the 1st January, 1810, being the times at which I intended to effect the reimbursement? 2dly. Whether the Bank will assent to be reimbursed the whole amount of said exchanged six per cent. stock, which they own, at the times abovementioned?

The two propositions may be considered as independent, one of the other, it being, however, understood that, if the bank does not wish to make the loan, it would suit Government better not to reimburse the bank exclusively, but only according to lot, in common with other stockholders.

If the bank will assent to make the loan, but refuse to receive the reimbursement, (so far only excepted as may be determined by lot) it will not be material that the sum lent should be paid by the bank into the treasury, precisely in two instalments, as abovementioned. The times and amounts of payments may, in that case, be arranged, when a formal agreement shall be entered into, so as to answer the wants of the treasury, and the convenience of the bank. It is only in case the bank will accede to both propositions, that, as there will be no real payments, but only a commutation of exchanged six per cent. stock into a temporary loan, it will be necessary that the loan should be made on the same days, and for the same sums as the reimbursement.

If the bank will accede to both proposals, it will be seen, by reference to the 8th section of the act supplementary to the act, entitled "An act making provision for the redemption of the whole of the public debt of the United States," passed the 11th February, 1807, that an exclusive reimbursement of the exchanged six per cent. stock, held by the bank, cannot take place, unless notice be given to this Department, in writing, of the wish of the institution to be thus reimbursed; and that notice must reach me prior to the 30th instant, as I must otherwise determine, by lot, what certificates of that stock shall be reimbursed, and give public notice thereof, in conformity with the second section of the same act, on or before the first day of next month. I am sensible that this is pressing for an answer within a shorter time than may be convenient, but, under the pressure of current business, I did not attend to this operation till within the last three days. I therefore request that you will have the goodness to lay the subject immediately before the Board, and to favor me with the answer. If that answer be in the affirmative, I will thank you to enclose in it the notice, in writing, asking for the reimbursement, in order that such notice, unconnected with any other subject, may be filed as a voucher, authorizing me to reimburse, in conformity therewith.

I have the honor to be, &c.

ALBERT GALLATIN.

DAVID LENOX, Esq.

President of the Bank of the United States, Philadelphia.

C.

Letter from the President of the Bank of the United States to the Secretary of the Treasury.

BANK OF THE UNITED STATES, *March 24th*, 1809.

SIR:

I lost no time in laying before the Board of Directors, your letter of the 21st instant, which I had the honor of receiving yesterday. To the first of your inquiries, namely: "Whether the Bank of the United States will be disposed to lend that sum (\$2,250,000) in two equal instalments, viz: on the 1st October next, and on the 1st January, 1810," I am desired to state, that there is every disposition on the part of this Board to comply with the wishes of Government but it appears to them that they are not authorized, by the act of 1795, to make a loan for the reimbursement of the stock created by the act of 1807; besides, there are considerations which now present themselves, of much importance to the institution, arising from the short duration of the charter, with which a loan, reimbursable at the pleasure of the United States, may interfere. To evince, however, the friendly disposition of the Board, they do not hesitate to agree to the loan, provided it is not wanted for a more distant period than the time when the present charter of the bank will expire, at an interest of six per cent. per annum, and provided also, a law is obtained, at the next session of Congress, giving them authority to make it.

To your second inquiry, viz: "Whether the bank will assent to be reimbursed the whole amount of the exchanged six per cent. which they own, at the times mentioned," I have to reply, that the Board prefer accepting such proportion only, as may fall to the lot of the bank. In returning this answer to your letter, I hope it may be perfectly satisfactory, and an additional proof of the desire of this Board to comply with the views of Government on every occasion, when not incompatible with the interest of the institution.

I have the honor to be, sir, your very obedient servant,

D. LENOX, *President*.

The Honorable ALBERT GALLATIN, Esq.

D.

Proceedings of the Commissioners of the Sinking Fund, at a meeting held on the 26th December, 1795.

At a meeting of the Commissioners of the Sinking Fund, on the 26th day of December, 1795,

Present: The PRESIDENT of the Senate,
The SECRETARY of State,
The SECRETARY of the Treasury.

A report of the Secretary of the Treasury was read, as follows:

"That, to provide for the payment of the interest on the public debt, which will fall due at the close of the present year, it will be necessary to anticipate the appropriated revenues to the amount of five hundred thousand dollars.

"The authority to make a loan for this purpose, is contained in the first section of an act, passed on the 3d day of March, 1795, entitled 'An act making further provision for the support of public credit, and for the redemption of the public debt.'

"The Secretary proposes, that the said loan be had of the Bank of the United States, for one year, to bear interest from the 1st day of January, ensuing, at the rate of six per centum per annum, to be refunded out of the proceeds of the duties on goods, wares, and merchandise, imported, on the tonnage of ships and vessels, and upon spirits distilled in the United States, and stills, which may accrue to the end of the present year, and be then uncollected.

"That the commissioners may be satisfied, as to the real state of the treasury, at the latest period to which the accounts have been settled, he takes the liberty to lay before them, a copy of his report, made to the House of Representatives, on the 14th instant, in which the receipts and expenditures for the three first quarters of the present year are exhibited, and also, a view of the probable receipts and expenditures for the year 1796.

"Wherefore, the said Secretary requests that the board of commissioners of the sinking fund would resolve, that an application be made to the President of the United States, for his permission to the Secretary of the Treasury to borrow five hundred thousand dollars, on the terms and conditions before mentioned, to be applied in the manner herein proposed."

Whereupon, it was resolved, unanimously, That the sum of five hundred thousand dollars be borrowed by the Secretary of the Treasury, for a term not exceeding one year, at the rate of interest not exceeding six per centum per annum, to commence on the first of January, 1796, pursuant to the first section of the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt;" and that this resolution be laid before the President of the United States, for his approbation.

JOHN ADAMS, *President of the Senate,*
TIMOTHY PICKERING, *Secretary of State,*
OLIVER WOLCOTT, JR. *Secretary of the Treasury.*

December 20th, 1795.

GEO. WASHINGTON.

E.

Contract between the Commissioners of the Sinking Fund and the Bank of the United States.

Articles of agreement between Oliver Wolcott, jr., Secretary of the Treasury, in behalf of the Commissioners of the Sinking Fund, of the one part; and the President, Directors, and Company, of the Bank of the United States, of the other part; made and concluded the thirty-first day of December, in the year of our Lord one thousand seven hundred and ninety-five.

Whereas, by the act, entitled "An act making further provision for the support of the public credit, and for the redemption of the public debt," passed the 3d day of March, in the present year, the commissioners of the sinking fund, with the approbation of the President of the United States, are authorized and empowered to borrow, or cause to be borrowed, from time to time, such sums, in anticipation of the revenues appropriated, not exceeding, in one year, one million of dollars: And whereas the said commissioners of the sinking fund, by their resolution of the twenty-sixth of December, one thousand seven hundred and ninety-five, approved by the President of the United States, did unanimously agree, that the sum of five hundred thousand dollars should be borrowed by the Secretary of the Treasury, for a term not exceeding one year, at a rate of interest not exceeding six per centum per annum, to commence on the first of January, one thousand seven hundred and ninety-six, pursuant to the act above recited:

Now, therefore, these presents witness, that, pursuant to the authority aforesaid, it hath been, and is hereby, agreed, by and between the said parties of the first and second part, as follows, viz:

First. The said President, Directors, and Company, shall lend to the United States, the sum of five hundred thousand dollars, to be advanced on the first day of January, one thousand seven hundred and ninety-six.

Second. The said sum, so to be advanced as aforesaid, shall bear interest at the rate of six per centum per annum, from the date before mentioned, payable on the first day of July, one thousand seven hundred and ninety-six, and on the first day of January, one thousand seven hundred and ninety-seven.

Third. The United States shall reimburse or repay to the said Bank of the United States, the said sum of five hundred thousand dollars, with the interest which shall be due thereon, on or before the first day of January, in the year one thousand seven hundred and ninety-seven, reserving, nevertheless, to the United States, the right of reimbursing, at their pleasure, the whole, or any part of the said sum, which shall have been so lent and advanced, after giving one month's notice to the President of the said bank, of the sum intended to be reimbursed.

In testimony whereof, the said Secretary of the Treasury hath caused the seal of the treasury to be affixed to these presents, and hath hereunto subscribed his hand; and the said President, Directors, and Company, [SEAL.] have also caused the seal of the Bank of the United States to be affixed to the same, the day and year aforesaid.

[SEAL.]

OLIVER WOLCOTT, *Secretary of the Treasury.*
THOS. WILLING, *President of the Bank of the United States.*

F.

Proceedings of the Commissioners of the Sinking Fund, at a meeting held on the 15th December, 1798.

At a meeting of the Commissioners of the Sinking Fund, on the fifteenth day of December, 1798,

Present: The HONORABLE JOHN LAURENCE, *President of the Senate,*
The SECRETARY of State,
The SECRETARY of the Treasury,
The ATTORNEY GENERAL of the United States.

The Secretary of the Treasury laid before the Board a report, dated the fourteenth day of December, 1798, which was read, and is as follows:

"That, by the eleventh section of the act of Congress, passed on the third day of March, 1795, entitled 'An act making further provision for the support of public credit, and for the redemption of the public debt,' the commissioners of the sinking fund are required to reimburse, to the Bank of the United States, the instalments due upon the loan of two millions of dollars, had of the said Bank, pursuant to the eleventh section of the act by which the same was incorporated, as the said instalments shall respectively accrue.

"That, on the last day of December, in the present year, the instalment of the aforesaid loan, being two hundred thousand dollars, will fall due to the said bank.

"There being no surplus of revenue in the treasury applicable to the payment of the said instalments, the Secretary requests, that application be made to the President of the United States, for his permission to borrow the sum of two hundred thousand dollars, for a term not exceeding four years, to be applied to the purpose aforesaid; and, therefore, submits the following resolution:

"Resolved, That the sum of two hundred thousand dollars be borrowed by the Secretary of the Treasury, pursuant to the sixth section of the act, passed on the third day of March, 1795, entitled 'An act making further provision for the support of public credit, and for the redemption of the public debt,' and that the proceeds of the said loan be applied, by the said Secretary, to the payment of the seventh instalment of the loan of two millions of dollars, borrowed under the act, entitled 'An act to incorporate the subscribers to the Bank of the United States:' *Provided,* That the said loan shall, nevertheless, be reimbursable at the pleasure of the United States, and shall bear interest at a rate not exceeding six per centum per annum, and that this resolution be laid before the President of the United States for his approbation.

"All which is respectfully submitted, by

OLIVER WOLCOTT, *Secretary of the Treasury.*

"TREASURY DEPARTMENT, December 15th, 1798."

Whereupon, it was resolved, that the said report be accepted, and that the resolution aforesaid be laid before the President of the United States for his approbation.

JOHN LAURENCE, *President of the Senate, pro tem.*

PHILADELPHIA, *December 17th, 1798.*

Approved:

JOHN ADAMS.

Recorded from the original minutes on the file, by

EDWARD JONES,

Secretary to the Commissioners of the Sinking Fund.

G.

Contract between the Commissioners of the Sinking Fund and the Bank of the United States.

Articles of agreement between Oliver Wolcott, Secretary of the Treasury, in behalf of the Commissioners of the Sinking Fund, of the one part; and the President, Directors, and Company, of the Bank of the United States, of the other part; made and concluded the twenty-eighth day of December, in the year of our Lord one thousand seven hundred and ninety-eight.

Whereas, by the act, entitled "An act making further provision for the support of public credit, and for the redemption of the public debt," passed the third day of March, one thousand seven hundred and ninety-five, the Commissioners of the Sinking Fund, with the approbation of the President of the United States, are authorized and empowered to borrow, or cause to be borrowed, from time to time, such sums, in anticipation of the revenues appropriated, not exceeding one million of dollars: And whereas the said Commissioners of the Sinking Fund, by their resolution, of the fifteenth of December, one thousand seven hundred and ninety-eight, approved by the President of the United States, did unanimously agree that the sum of two hundred thousand dollars shall be borrowed by the Secretary of the Treasury: *Provided, nevertheless,* That the said loan shall be reimbursable at the pleasure of the United States, and shall bear interest at a rate not exceeding six per centum per annum:

Now, therefore, these presents witness, that, pursuant to the authority aforesaid, it hath been, and is hereby, agreed, by and between the said parties of the first and second part, as follows, viz:

First. The said President, Directors, and Company, shall lend to the United States the sum of two hundred thousand dollars, to be advanced on the first day of January, one thousand seven hundred and ninety-nine.

Second. The said sum, so to be advanced as aforesaid, shall bear interest at the rate of six per centum per annum, from the date beforementioned, payable half yearly to the said parties of the second part, during the continuance of the said loan, if the same shall be required.

Third. The United States shall reimburse, or repay to the said Bank of the United States, the said sum of two hundred thousand dollars, with the interest which shall be due thereon, on or before the first day of January, which will be in the year one thousand eight hundred and three, reserving, nevertheless, to the United States, the right of reimbursing, at their pleasure, the whole, or any part of said sum, which shall have been so lent and advanced, after giving one month's notice to the President of the said Bank, of the sum intended to be reimbursed.

In testimony whereof, the said Secretary of the Treasury hath caused the seal of the treasury to be affixed to these presents, and hath hereunto subscribed his hand; and the said President, Directors, and Company, have also caused the seal of the Bank of the United States to be affixed to the same, the day and year aforesaid.

THOMAS WILLING, *President.*

11th CONGRESS.]

No. 305.

[2d SESSION.]

STATE OF THE FINANCES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 8, 1809.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

The duties on merchandise and tonnage, which accrued during the year 1807, amounted, after deducting the expenses of collection, to	\$26,126,648
From which, deducting for debentures issued on account of re-exportations,	10,067,191
Left, for the nett revenue accrued during that year,	<u>\$16,059,457</u>

The same duties, during the year 1808, amounted, after deducting the expenses of collection, to	10,581,559
From which, deducting for debentures issued, and which, on account of the embargo, did not exceed	249,396

Leaves, for the nett revenue accrued during that year, as will appear by the statement A,	<u>\$10,332,163</u>
---	---------------------

The statement B exhibits in detail the several species of merchandise, and other sources, from which that revenue was collected during the year 1808; and the statement Aa gives a comparative view of the importations and re-exportations of the several species of merchandise for the years 1807 and 1808, showing, thereby, distinctly, the effect of foreign aggressions and commercial restrictions on the importations of foreign articles.

From the returns already received for the three first quarters of the present year, and from the general knowledge of the importations made during the two last months, it is believed that the gross amount of duties on merchandise imported, during the whole year, will, after deducting the expenses of collection, amount to about ten millions of dollars.

But, as the debentures issued, on account of re-exportations, (principally of colonial produce) will amount to about 3,500,600 dollars, the nett revenue, accrued during the year 1809, cannot be estimated at more than six millions and a half.

It appears, by the statement C, that the sales of public lands have, during the year ending on the 30th September, 1809, amounted to 143,000 acres, and the payments by purchasers to near 500,000 dollars. The proceeds of sales in the Mississippi territory being, after deducting the surveying and other incidental expenses, appropriated in the first place to the payment of a sum of 1,250,000 dollars to the State of Georgia, are distinctly stated.

It appears, by the statement D, that the payments on account of the principal of the public debt have, during the same period, amounted to near 6,730,000 dollars; the reimbursement of the eight per cent. stock having taken place on the first of January last. But the aggregate of payments on account of principal and interest will not, for the two years 1808 and 1809, exceed the sum of sixteen millions of dollars appropriated by law.

The same statement shows that about 34,796,000 dollars of the principal of the debt have been reimbursed during the eight years and a half, commencing on the first of April, 1801, and ending on the 30th September, 1809, exclusively of more than six millions of dollars paid in conformity with the provisions of the convention with Great Britain and of the Louisiana convention.

The actual receipts into the treasury, during the year ending on the 30th of September, 1809, have amounted to	\$9,315,753 16
Making, together with the balance in the treasury, on the 1st October, 1808, and amounting to	13,846,717 52
An aggregate of	<u>\$23,162,470 68</u>

The disbursements, during the same year, have consisted of the following items, viz:	
Civil department, including miscellaneous expenses, and those incident to the intercourse with foreign nations,	\$1,439,633 23
Military and Naval establishments, including the Indian department, viz:	
Military, including arms and fortifications,	3,366,403 12
Navy,	2,379,267 80
Indian department,	292,303 84
	<u>6,037,974 76</u>
Interest on the Public debt,	3,126,149 15
	<u>10,603,757 14</u>
Reimbursement of principal of the public debt,	6,729,777 53
	<u>17,333,534 67</u>
Amounting, together, as will appear more in detail by the statement E, to	5,828,936 01
And leaving in the treasury, on the 30th September, 1809, a balance of	<u>\$23,162,470 68</u>

Whence it appears that the expenses of Government, exclusively of the payments on account of the principal of the debt, have exceeded the actual receipts into the treasury, by a sum of near thirteen hundred thousand dollars; and that that deficiency, as well as the reimbursement of the principal of the debt, have been paid out of the sums previously in the treasury, or, in other words, out of the surplus of the revenue of the preceding years.

The outstanding revenue bonds may, after deducting the expenses of collection, and allowing for bad debts, be estimated to have amounted, on the 30th of September, 1809, to \$7,500,000

The duties on the importations, during the last quarter, will not, probably, after making a similar deduction, fall short of 2,800,000

All those will fall due prior to the first day of January, 1811, and make, together with the balance in the treasury, on the 30th September, 1809, and amounting, as above stated, to 5,800,000

An aggregate of	\$16,100,000
The expenses of the present quarter, though not yet precisely ascertained, will not, probably, including the payments on account of the public debt, exceed	3,600,000

Leaving, on the first day of January, 1810, a sum of	<u>\$12,500,000</u>
--	---------------------

About twelve and a half millions of dollars, in cash or bonds, payable during the year 1810, and applicable to the expenses of that year. This estimate, however, is founded on the supposition that the amount of debentures, payable in that year, will not exceed two millions of dollars, and that the receipts, during the year, arising from importations subsequent to the first of January next, and from the sales of land, will be sufficient to pay those debentures, and to leave at all times in the treasury, at least one million of dollars.

Estimating the expenses of a civil nature, both domestic and foreign, for the year 1810, at the same amount actually expended for those objects during the preceding year, or at about,

And adding thereto the annual appropriation of	\$1,500,000
--	-------------

For the public debt, (of which sum about three millions seven hundred and fifty thousand dollars will be applied to the final reimbursement of the exchanged six per cent. stock) it follows that, unless the aggregate of the expenses for the military and naval establishments, should be reduced to about	8,000,000
---	-----------

	<u>3,000,000</u>
--	------------------

	<u>\$12,500,000</u>
--	---------------------

A loan will be necessary to make up the deficiency. That state of the treasury had been anticipated; and, for that reason, an increase of duties had been respectfully submitted in the last annual report. But, should that measure be now adopted, it would not, on account of the terms of credit allowed for the payment of duties, supersede the necessity of a loan for the service of the year 1810, commensurate with the extent of those establishments, and with the appropriations which may be made for their support by Congress. No precise sum is suggested, since this must vary according to the plans which may be adopted in relation to foreign nations, and will particularly depend on the decision of Congress on the question of war or peace. It is sufficient to state, that, if the actual expenditure of the year 1810, for all military and naval purposes, should be estimated at the same sum which was disbursed by the treasury, for those objects, during the year ending on the 30th September, 1809, and exceeding, as above stated, six millions of dollars, the deficiency, according to the preceding estimates, would amount to three millions; on which supposition, it would seem prudent, in order to provide against any deficiency in the receipts, beyond what has been estimated, to authorize a loan of four millions of dollars.

In the event of war, the necessity of rendering it efficient, and of calling for that purpose into action all the resources of the country, is too obvious to require any comment. On that subject nothing will, at this time, be added by this Department to the suggestions respectfully submitted in the two preceding annual reports. Loans, reimbursable by instalments, and at fixed periods, after the return of peace, must constitute the principal resource for defraying the extraordinary expenses of the war. For the support of public credit, the basis on which rests the practicability of obtaining loans on reasonable terms, it appears necessary that the revenue should, in the mean while, be equal to the interest on the public debt, including that on the new loans, and to all the current expenses of Government, calculated on a peace establishment, or, for the present, to about eight millions of dollars. An immediate and considerable increase of the existing duties will, it is believed, be requisite for that purpose, in order to cover the defalcation which a maritime war must necessarily produce in a revenue almost exclusively depending on commerce. That increase appears preferable, in the present situation of the United States, to any other source of taxation, and is not, in time of war, liable to the objection of its encouraging smuggling. It is only in the event of that revenue being still more affected by a war than is apprehended, that a resort to internal taxes, either direct or indirect, may become necessary.

If war should not be resorted to, it does not appear requisite, unless Congress should resolve on a permanent increase in the military and naval establishments, in time of peace, to lay, at present, any additional duties, beyond a mere continuance of the two and a half per cent. known under the name of "Mediterranean Fund." It has already been stated, that an increase of the impost would not supply the deficiency which may take place in the year 1810; and exclusively of the reimbursement of the loan which may be wanted for the service of that year, all

The national expenses, calculated on a peace establishment and on the average of the actual expenditures of the six years 1802 to 1807, will not exceed ten millions of dollars for the year 1811, and eight millions after that year: for, the only portion of the existing debt, which, according to law, it will be practicable, after the year 1810, to reimburse, will, exclusively of the annual reimbursement of the six per cent. and deferred stocks, consist only of the converted six per cent. stock, which amounts to less than two millions of dollars. The payments on account of the annual appropriation of eight millions of dollars, for the debt, cannot, for that reason, (except for the purpose of reimbursing the loan which may be wanted for the service of the year 1810) much exceed six millions of dollars in the year 1811, and four millions of dollars, annually, after that year. The expenses, for the year 1811, and the ensuing years, may, therefore, if calculated on a peace establishment, be estimated as followeth, viz:

Civil expenses, domestic and foreign,	\$1,500,000
Military and naval establishments, (including the Indian department) calculated on the average of the actual expenditure for those objects during the six years, 1802—1807, as will appear by the statement F, about	2,500,000
Interest on the public debt, including the annual reimbursement on the six per cent. and deferred stocks,	4,100,000
Total of the annual expenses, after the year 1811,	8,100,000
Reimbursement of the converted six per cent. stock,	1,860,000
Total of expenses for the year 1811,	\$9,960,000

Whatever may be the decision of Congress, in other respects, there is a subject which seems to require immediate attention. The provisions adopted for the purpose of carrying into effect the non-intercourse with England and France, particularly as modified by the act of last session, under an expectation that the orders of council of Great Britain had been revoked, are inefficient, and altogether inapplicable to existing circumstances. It will be sufficient to observe, that exportation by land is not forbidden; and that no bonds being required from vessels ostensibly employed in the coasting trade, nor any authority vested by law which will justify detention, those vessels daily sail for British ports, without any other remedy but the precarious mode of instituting prosecutions against the apparent owners. It is unnecessary, and it would be painful, to dwell on all the effects of those violations of the laws. But, without any allusion to the efficiency or political object of any system, and merely with a view to its execution, it is incumbent to state, that, from the experience of the two last years, a perfect conviction arises, that, either the system of restriction, partially abandoned, must be reinstated in all its parts, and with all the provisions necessary for its strict and complete execution, or, that all the restrictions, so far, at least, as they affect the commerce and navigation of the citizens of the United States, ought to be removed.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury,*

TREASURY DEPARTMENT, *December 7th, 1809,*

A.

Statement exhibiting the amount of duties which accrued on merchandise, tonnage, passports, and clearances; of debentures issued on the exportation of foreign merchandise; of payments for bounties and allowances, and for expenses of collection, during the years 1807 and 1808.

Years.	DUTIES ON			Debentures issued.	Bounties and allowances.	Gross Revenue.	Expenses on collection.	Nett Revenue.
	Merchandise.	Tonnage.	Passports and clearances.

11th CONGRESS.]

No. 306.

[2d SESSION.]

ASSAYS OF FOREIGN COINS.

COMMUNICATED TO THE SENATE, DECEMBER 12, 1809.

The Secretary of the Treasury, in obedience to the directions of the act, entitled "An act regulating the currency of foreign coins in the United States," respectfully reports:

That assays of the foreign gold and silver coins, made current by the act aforesaid, have been made, in the course of the present year, at the mint of the United States; the result whereof is shown in the annexed letter of the Director of the Mint, dated June 29th, 1809, which is prayed to be received as part of this report.

All which is respectfully submitted.

ALBERT GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *December 8th, 1809.*

MINT OF THE UNITED STATES, *June 29th, 1809.*

SIR:

I have the honor to acknowledge the receipt of your letter of 31st ultimo, and have, according to your desire, caused assays to be made of the several species of foreign coin, made current in the United States by act of Congress; having particular respect to coins of the latest date and importation, so far as these could be procured and discriminated.

The result of these assays, according to the assayer's report, is as follows:

I. *Gold coins of Great Britain.*

											C. grs.
No. 1,	made from 10 pieces of promiscuous dates prior to	1806,	-	-	-	-	-	-	-	-	22 0
2,	" " 5 do. dated	1806,	-	-	-	-	-	-	-	-	22 0
3,	" " 4 do. dated	1808,	-	-	-	-	-	-	-	-	22 0

II. *Gold coins of France.*

No. 1,	made from 10 pieces of promiscuous dates prior to	1806,	-	-	-	-	-	-	-	-	21 2½
2,	" " 2 do. dated	1806,	-	-	-	-	-	-	-	-	21 2½
3,	" " 2 do. dated	1807,	-	-	-	-	-	-	-	-	21 2¼
4,	" " 5 do. dated	1808,	-	-	-	-	-	-	-	-	21 2¼

III. *Gold coins of Spain.*

No. 1,	made from 10 pieces of promiscuous dates prior to	1806,	-	-	-	-	-	-	-	-	20 3¼
2,	" " 5 do. dated	1806,	-	-	-	-	-	-	-	-	20 2¾
3,	" " 5 do. dated	1807,	-	-	-	-	-	-	-	-	20 3½
4,	" " 5 do. dated	1808,	-	-	-	-	-	-	-	-	20 3½

IV. *Gold coins of Portugal.*

No. 1,	made from 10 half joes of promiscuous dates prior to	1806,	-	-	-	-	-	-	-	-	22 0
2,	" " 5 do. dated	1806,	-	-	-	-	-	-	-	-	22 0
3,	" " 2 moidores, old dates,	-	-	-	-	-	-	-	-	-	21 3½
4,	" " 2 do. dated	1805,	-	-	-	-	-	-	-	-	21 3¾

V. *Silver coins of France.*

Made from 10 crowns of dates prior to	-	-	-	1806,	-	-	-	-	-	-	Oz. dwt. grs.
											10 18 0

VI. *Silver coins of Spain.*

No. 1,	made from 10 dollars of promiscuous dates prior to	1806,	-	-	-	-	-	-	-	-	10 15 6
2,	" " 5 do. dated	1806,	-	-	-	-	-	-	-	-	10 15 0
3,	" " 5 do. dated	1807,	-	-	-	-	-	-	-	-	10 15 12
4,	" " 5 do. dated	1808,	-	-	-	-	-	-	-	-	10 15 12
5,	" " 5 do. (Ferd. VII.) dated	1809,	-	-	-	-	-	-	-	-	10 15 6
6,	" " 9 parts of dollars of several denominations and dates,	-	-	-	-	-	-	-	-	-	10 15 12

From the foregoing report it appears—

1. That the gold coins of Great Britain, and the half joes of Portugal, being of the same quality with those of the United States, viz: 22 carats fine, or $\frac{1}{2}$ part alloy, are, by act of Congress, rated at their true intrinsic value of 27 grs. to 100 cents.

2. That the moidores appear to be of somewhat inferior quality, and, according to the average of the foregoing assays, would require about $\frac{1}{10}$ of a grain more to the 100 cents than the legal weight.

3. That the gold coins of France, averaging 21 c. $2\frac{3}{8}$ grs., would require about $\frac{1}{100}$ of a grain to the 100 cents more than the legal weight of $27\frac{2}{3}$ grs.

4. That the gold coins of Spain, averaging 20 c. $3\frac{9}{32}$ grs., would require about $1\frac{13}{100}$ grs. to the 100 cents more than the legal weight of $27\frac{2}{3}$ grs.

It may, however, be observed, that the Spanish gold coins of 1806, both by the assay of the present year, and by that made in 1807, appear to be considerably inferior in quality to those either of former or subsequent dates, and, therefore, taking the average from the other dates, $28\frac{47}{100}$ grs. would be equal in value to 100 cents; that is, $1\frac{7}{100}$ more than the law requires.

5. That the silver French crown, quality 10 oz. 18 dwt., and weighing 18 dwt. 17 grs., compared with the standard and weight of the silver coins of the United States, would be equal in value to $109\frac{36}{100}$ cents, nearly, or $\frac{14}{100}$ of a cent less than the value established by law.

6. That the Spanish silver dollar, the average quality of which is 10 oz. 15 dwt. 8 grs. if of the full weight of 17 dwt. 7 grs. would be equal in value to $100\frac{3}{8}$ cents nearly, or $\frac{3}{8}$ of a cent more than the value established by law.

It may, however, sir, be remarked, that very little foreign coin, except Spanish dollars and parts, is now circulating in the United States; and, therefore, any further regulations of our Government on that subject, would, I presume, be now unnecessary.

I have the honor to be, with sentiments of the greatest respect and esteem, your obedient faithful servant,

R. PATTERSON.

Honorable ALBERT GALLATIN, *Secretary of the Treasury.*

11th CONGRESS.]

No. 307.

[2d Session.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 13, 1809.

SIR:

TREASURY DEPARTMENT, December 12, 1809.

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1806, 1807, and 1808.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives.

A Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, in the years 1806, 1807, and 1808, compared with the amount of Duties collected on the same, respectively.

TREASURY DEPARTMENT, Register's Office, December 11, 1809.

JOSEPH NOURSE, Register.

11th CONGRESS.]

No. 308.

[2d SESSION.]

DIRECT TAX.

COMMUNICATED TO THE SENATE, DECEMBER 28, 1809.

TREASURY DEPARTMENT, December 27, 1809.

SIR:

I have the honor, in obedience to the resolution of the Senate of the 18th instant, to transmit a statement of the payments which have been made, by the respective States, of the direct tax; together with explanatory notes, showing what sums remain unaccounted for, and whether in the hands of the supervisors or collectors, or still uncollected.

I have the honor to be, with the highest respect, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the PRESIDENT of the Senate.

Statement of the payments made by the several States, of the Direct Tax, granted by act of Congress of the 14th July, 1798, showing the balances due on the 30th September, 1809, and in whose hands the said balances remain, as far as can be ascertained from the accounts at the Treasury.

	Quota per act of July 14, 1798.	Amount of the assessment.	Addition for interest and cost.	Charges of collection, as allowed on settlement.	Losses by insolvencies, removals, &c.	Payments into the Treasury, to 30th Sept. 1809.	Balances due from the several States.	
New Hampshire, *	\$77,705 30	\$77,968 14	- -	\$4,899 87	- -	\$71,967 71	\$1,100 56	Cash in the hands of Nathaniel Rogers, late supervisor, for the recovery of which, suit has been ordered.

NOTES.

(a.) *Massachusetts.* \$8,431 25.—This is the amount of tax assessed on ten districts in Maine, for which Mr. Jackson, the former supervisor, could procure no persons to act as collectors. It was transferred in 1806, and placed under the superintendence of Joshua Wingate, jun. collector of the customs at Bath, who has been unable to this time to obtain collectors for six of the ten districts. In the other four districts, collections have been made, but it is not known at the treasury whether they have been completed, the accounts in proper form not having been received. On the 30th June, 1809, there was in Mr. Wingate's hands, on this account, \$2,104 47.

(b.) *Rhode Island.* \$3,789 16.—Of this sum, John S. Dexter, late supervisor, owes \$38 90, arising from charges disallowed in the settlement of his accounts. After the office of supervisor was discontinued in Rhode Island, the business was transferred to William Peck, marshal of the district, who has rendered no accounts in relation to this business since the 30th September, 1806, at which time the balance of \$3,750 26, for which he was accountable, consisted of the following particulars:

Amount uncollected.	First	district.	John A. Collins, collector,	-	-	-	\$925 81
Do.	Second	do.	John Allen, do.	-	-	-	59 22
Do.	Fourth	do.	Nicholas E. Durfee, do.	-	-	-	424 71
Do.	Eighteenth	do.	Peleg Rhoades, do.	-	-	-	58 98
Do.	Twentieth	do.	Daniel S. Dexter, do.	-	-	-	827 62
Do.	Twenty-third	do.	James Pain, do.	-	-	-	173 64
Do.	Twenty-fourth	do.	Duty Smith, do.	-	-	-	36 18
Do.	Twenty-eighth	do.	Rleet Brown, do.	-	-	-	212 37
Do.	Twenty-ninth	do.	Block Island, no collector,	-	-	-	275 57
							<u>2,994 10</u>
Cash in hands of collectors, (sundry small sums)				-	-	-	132 90
Cash in hands of supervisor,				-	-	-	623 26
							<u>\$3,750 26</u>

No particular information was given respecting the uncollected balances, except in the 20th and 29th districts. D. S. Dexter, collector of the 20th district, had been discharged from prison by act of Congress, and Mr. Peck stated that he could get nobody to undertake the collection of this balance. For the 29th district, (Block Island) no collector had been or probably ever would be obtained. Since the 30th September, 1806, Mr. Peck has been repeatedly urged to render his accounts, but without effect. There is reason to believe, that he has since received a considerable portion of the sum then reported as uncollected.

(c.) *Vermont.* \$8,198 34.—Of this sum, there is due from Nathaniel Brush, late supervisor, \$4,862 62, for the recovery of which, suit has been ordered. John Willard, marshal of the district, to whom the business was transferred on the suppression of the office of supervisor, has rendered his accounts to the 31st December, 1808. These accounts have not yet been adjusted, but they acknowledge a balance of cash in Mr. Willard's hands, of \$2,393 11, and in the hands of two collectors, (William Mattocks \$67 97, and Ephraim Hurlbut \$150 10) \$218 07, both of whom have claims for the amount. The residue of the balance due from the district, while under Mr. Willard's superintendence, is charged for losses, and expenses of collection. It is proper to state that Mr. Willard claims a balance due to him on his internal revenue account, very nearly equal to the amount remaining in his hands on the direct tax account, as here stated.

(d.) *New York.* \$1,293 07.—This sum, together with an addition of \$452 75, recovered for interest, has been accounted for by Mr. Osgood, as follows:

Sum due by Gilbert Drake, a collector of direct tax, discharged from prison by act of Congress, of 3d March, 1807,	-	-	-	-	-	-	\$414 82
Bank notes lost in the mail by collector Chappel,	-	-	-	-	-	-	215 00
Sundry small sums due from collectors of thirty-two districts, who claim credits for property assessed, and not found, insolvencies, removals of slaves, and taxables, amount paid for printer's bills, and sundry other charges, not regularly admitted at the treasury, for the want of legal proof,	-	-	-	-	-	-	1,116 00
							<u>\$1,745 82</u>

(e.) *New Jersey.* \$854 04.—Of this sum, James Linn, late supervisor, owes \$817 22. He has been specially requested to pay this balance, but has not done it. The remainder, \$36 82, is due from Oliver Barnet, late marshal and acting supervisor.

(f.) *Pennsylvania.* \$9,385 23.—Of this sum, \$2,292 23, is due from Henry Miller, late supervisor, for which judgment has been obtained. Peter Muhlenburg, late collector, owes \$32 35. There is a question respecting commissions, which may alter this last sum. The residue of the sum due from this district, is due by Tench Coxe, the acting supervisor, and the officers under his direction. He has rendered his accounts to the 31st December, 1808, which have not yet been examined and adjusted at the treasury. At that time, the sums due from the several officers, as stated by Mr. Coxe, were as follows:

Benjamin Mifflin, collector,	-	-	-	-	241 23	
James McKean, do.	-	-	-	-	265 82	
Cadwallader Griffith,	-	-	-	-	355 74	Execution issued.
Daniel St. Clair,	-	-	-	-	478 28	do. property sold; money not yet paid.
Matthew Wilson,	-	-	-	-	629 35	Judgment.
George Buchler,	-	-	-	-	2,580 21	Execution issued.
Samuel Postlethwaite,	-	-	-	-	134 43	
J. Cadwallader,	-	-	-	-	33 64	
James Brice,	-	-	-	-	146 33	In suit.
George Wilson,	-	-	-	-	802 65	Execution issued.
Eight collectors, (small sums)	-	-	-	-	40 10	
					<u>5,707 78</u>	
Tench Coxe, acting supervisor,	-	-	-	-	1,657 21	
					<u>7,364 99</u>	
And there was due to sundry collectors, for over payments,	-	-	-	-	351 51	
					<u>\$7,013 48</u>	

There has since been paid into the treasury \$1,330, on this account.

(g.) *Maryland.* \$4,149 22.—Daniel Delozier, surveyor of the port of Baltimore, to whom the business was transferred on the abolition of the supervisorship, has rendered his accounts to the 31st December, 1808. At that time, the balances due from the collectors, as stated in his accounts, were as follows, viz:

Joseph Ford, collector,	-	-	-	-	\$264 34	
Benj. H. Mackall,	-	-	-	-	56 57	Since paid.
Thomas Harwood,	-	-	-	-	217 46	Money in the hands of deputy marshal.
William Alexander,	-	-	-	-	3 49	
Isaac Dixon,	-	-	-	-	542 55	Since paid.
John Ritchie,	-	-	-	-	99 32	
James Arthur,	-	-	-	-	262 36	Warrant in hands of the marshal.
John Bennett,	-	-	-	-	2 55	
Evans Willing,	-	-	-	-	935 98	Property sold; money not yet paid.
John Green,	-	-	-	-	25 16	
					<u>2,409 78</u>	
Daniel Delozier, acting supervisor,	-	-	-	-	226 87	
					<u>2,636 65</u>	
Balances due three collectors,	-	-	-	-	29 84	
Due from officers,	-	-	-	-	<u>2,606 81</u>	

The remainder of the sum of \$4,149 22 has been allowed for losses by insolvencies, removal of slaves, errors in assessments, property not found, and expenses of collection.

(h.) *Virginia.* \$445 60.—On the abolition of Supervisor's office, the business was transferred to Joseph Scott, Marshal of Virginia, who has rendered accounts to the 31st December, 1808. Between that time and the 30th September, 1809, payments were made into the treasury, which reduced the nominal balance to \$445 60. It is not known whether this sum is in the hands of Mr. Scott, or of Alexander Hawthorn, a collector.

(i.) *North Carolina.* \$7,438 36.—The account of William Polk, late supervisor, to the 31st December, 1808, and, since that time, those of Beverly Daniel, marshal of the district, to whom the business has been transferred, to the 30th September, 1809, are at the treasury, but have not been examined and adjusted. The balance, as stated by the acting supervisor, on the 30th September, 1809, consisted of

Cash in his own hands,					\$2,715 00
Due from John Armstrong, Collector,	1,394 85
Lewis Hunter, ditto,	1,884 04
					<u>\$5,993 90</u>

The difference between this sum, and the balance stated as due from the district, being \$1,444 46, together with a further sum of \$1,394 86 for tax on property heretofore omitted in the abstracts, has been charged for losses by removal of slaves, property not found, insolvencies, commissions to collectors, and other charges of collection, since the year 1806, which is the latest period to which the accounts have been regularly adjusted at the treasury.

(k.) *South Carolina.* \$33,504 55.—Daniel Stevens, the supervisor, has rendered his accounts to the 31st December, 1808, at which time there remained of the tax uncollected,

Cash in the hands of collectors,	-	-	-	-	\$15,152 66
Cash in his own hands,	-	-	-	-	10,265 29
					<u>3,932 67</u>
					<u>\$29,350 62</u>

Between that time and the 30th September, 1809, there was paid into the treasury, \$2,589 78, and there was, on the 30th September, 1809, in the supervisor's hands, \$5,493 53. Sundry expenses of collection, principally charged by the supervisor subsequent to the settlement of his accounts at the treasury, and, therefore, not yet admitted to his credit, amounting to \$6,743 71, form a deduction from the balance of \$33,504 55, above stated, so that only about \$26,760 may be considered as due on the 30th September, 1809. The sales of the property of defaulters has been made some time since, and this balance ought speedily to be collected.

(l.) *Georgia.* \$27,594 88.—John Mathews, supervisor of Georgia, died in 1805, without having ever rendered an abstract of the tax as assessed on the several districts, or any other regular accounts. In June, 1806, the business was transferred to James Alger, commissioner of loans, who died in 1808, without having rendered any accounts whatever. No regular adjustments, consequently, have been made at the treasury, and the precise quota of the State, therefore, is placed in the column for the amount of the assessment. In the present year, a person has been sent from the treasury, to take and state these accounts, at Savannah; and the work has been accomplished as far as the materials that could be found would afford. From this statement, it appears that the amount of the assessment was \$38,808 94, varying a few dollars only from the quota of the State. That there was, on the 30th June, 1809, cash in the hands of collectors, amounting to \$6,977 93, and a further balance in their hands, consisting either of cash or uncollected taxes, (but of which could not be ascertained) of \$18,526 27. There was also due from Mr. Alger, \$1,201 12, and to Mr. Mathews, the former supervisor, \$283 33, making the whole balance due from the State, \$26,421 29. Some of the collectors claim credits for payments to Mr. Mathews, which he has not acknowledged to have received; and there are other difficulties in the way of final settlement, but which, it is hoped, may be obviated, and such a settlement effected.

(m.) *Kentucky.* \$18,459 51.—The accounts of James Morrison, supervisor, to the 30th June, 1809, have been received at the treasury. From his having applied some of his payments to his internal revenue accounts, which, at the treasury, have been considered as made for direct tax, his account exhibits a greater balance on that day, than the sum here stated, viz. \$20,120 12, consisting of the following particulars, viz:

Taxes uncollected,	-	-	-	-	\$3,330 33
Cash in the hands of collectors,	-	-	-	-	8,066 44
Cash in the supervisor's hands,	-	-	-	-	8,723 35
					<u>\$20,120 12</u>

The greatest part of the uncollected taxes consists of taxes on lands which have been exposed to sale, and for which no bidders could be found, and on slaves, the owners of which cannot be found. The cash in the hands of collectors, is as follows:

George Mansell,	-	-	-	-	\$3,291 21
Daniel L. Morrison,	-	-	-	-	650 79
John Harbison,	-	-	-	-	1,155 57
Joseph Ballinger,	-	-	-	-	1,161 29
John Crow,	-	-	-	-	168 01
James Macconnel,	-	-	-	-	1,177 58
Peter Macher,	-	-	-	-	285 18
Thomas L. Patterson,	-	-	-	-	176 81
					<u>\$8,066 44</u>

Collectors Harbison and Ballinger have absconded, their securities are insolvent, and the sums due from them will be lost. The marshal has collected a part of the other balances, and they are considered by the supervisor as safe. He has been directed to pay the balance due by him into the treasury, without delay.

(n.) *Tennessee*. \$340 33.—The accounts of John Overton, late supervisor, have been settled, and this sum reported to be due from him. It was principally a suspension of some charges for explanation, and will be eventually allowed. The only sum really due, if any, is \$46 10, charged by him for commission as *inspector*, and disallowed by the Comptroller of the Treasury.

11th CONGRESS.]

No. 309.

[2d SESSION.]

MINT.

COMMUNICATED TO THE SENATE, JANUARY 10, 1810.

To the Senate and House of Representatives of the United States:

The Director of the Mint having made to me his report of the operations of the mint, for the year one thousand eight hundred and nine, I lay the same before you for your information.

January 5th, 1810.

JAMES MADISON.

MINT OF THE UNITED STATES, *January 1st, 1810.*

SIR:

I have the honor of laying before you, a report of the operations of the mint for the last year.

From the treasurer's statement, herewith transmitted, it will appear that, during this period, there have been issued from the mint, of gold coins, in half eagles, 33,875 pieces, amounting to \$169,375; of silver coins, in half dollars and dimes, 1,450,520 pieces, amounting to \$707,376; and of copper coins, in cents and half cents, 1,377,439 pieces, amounting to \$8,001 53; making, in the whole, two millions eight hundred and sixty-one thousand eight hundred and thirty four-pieces of coin; amounting to eight hundred and eighty-four thousand seven hundred and fifty-two dollars fifty-three cents.

The supply of bullion is still abundant; nor is there any apprehension of a deficiency.

I have the honor to be, sir, with sentiments of the most perfect respect and esteem,

Your obedient faithful servant,

R. PATTERSON.

An Abstract of the ordinary expenses of the Mint of the United States, from the 1st of January to the 31st of December, 1809, viz:

	Salaries.	Wages.	Incidental.	Totals.
Quarter ending 31st March, 1809, - - - -	2,650	1,841 82	217 21	4,709 03
30th June, 1809, - - - -	2,650	1,907 45	815 99	5,373 44
30th September, 1809, - - - -	2,650	1,891 70	680 33	5,222 03
31st December, 1809, - - - -	2,650	1,826 08	1,218 33	5,694 41
	10,600	7,467 05	2,931 86	
		Amount,	- -	\$20,998 91

MINT OF THE UNITED STATES, *Treasurer's Office, Philadelphia, 30th December, 1809.*

BENJAMIN RUSH.

Total amount of copper coins, - - -				8,001 53
2,861,834 pieces of all the coins.	Amount of all the coins struck in 1809,			\$884,752 53

MINT OF THE UNITED STATES, *Treasurer's Office, Philadelphia, 30th December, 1809.*

BENJAMIN RUSH.

11th CONGRESS.]

No. 310.

[2d SESSION.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 11, 1810.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of Levin Jones, owner and master of the schooner Wolf, of Baltimore, made the following report:

The petitioner states that his schooner has been seized at Norfolk, Virginia, for bringing to that place from Charleston, S. C. certain French passengers and their slaves. These unfortunate people were driven from the island of Cuba, and were destined for the port of Norfolk, but the vessel on board of which they embarked was wrecked on Crooked Island. They were taken from the wreck by Captain John Weaver, of the brig Harriet and Martha, and landed at Charleston. Petitioner states that, at the request of the collector of Charleston, and other gentlemen of great respectability, he took the Frenchmen and slaves and landed them at Norfolk, with the permission of the mayor.

In doing what he did, he states he was influenced by no other motive than that of humanity towards the unfortunate sufferers.

The committee do not hesitate, from the proof before them, to exonerate the petitioner from any intention of violating the law. No case can better claim the equitable interposition of Congress. The schooner of the petitioner was seized because the slaves were not inserted in the manifest, in pursuance of the ninth and tenth sections of the act, entitled "An act to prohibit the importation of slaves into any port or place within the jurisdiction of the United

States, from and after the first day of January, in the year of our Lord one thousand eight hundred and eight," passed the 2d of March, 1807; the necessity of doing which, the petitioner was not aware, nor was he reminded by the collector of Charleston, with whose knowledge he had taken the slaves on board, that the law required him to insert their names in the manifest.

If the slaves had been carried to Norfolk, the port for which they were destined when they were embarked at St. Jago de Cuba, the vessel importing them would not have been forfeited under the "Act for the remission of certain penalties and forfeitures, and for other purposes," passed the first session of the eleventh Congress. The case of the ship Clara, the property of Andrew Foster and Jacob P. Giraud, to which the National Legislature extended relief, is, in principle, the same with the present. The committee are of opinion that any penalty and forfeiture, which may have been incurred by the petitioner, ought to be remitted.

They, therefore, recommend the adoption of the following resolution:

Resolved, That the prayer of the petitioner is reasonable, and ought to be granted.

11th CONGRESS.]

No. 311.

[2d SESSION.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 16, 1810.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of Jeremiah Reynolds, of the State of Maryland, and owner of the schooner called the Victory, of Havre de Grace, made the following report:

The petitioner states that he took on board of his vessel, at Curaçoa, in September last, certain French passengers, with six slaves, the property of the passengers. The Frenchmen, in their affidavits, state, that it was their intention, when they were driven from Cuba, to come to the United States, but that they were prevented for want of an opportunity. In this dilemma they embarked for the town of St. Domingo, in the island of Hispaniola. That, on their arrival at this last mentioned place, they found it in the possession of the united forces of Great Britain and Spain. Not being permitted to land, they were compelled to go to Curaçoa. At this last place they were admitted to land, but not before they had given security to take the first opportunity that offered for the United States. The petitioner does not, from any document before the committee, appear to have been constrained by the constituted authorities of Curaçoa to take on board of his vessel the French passengers and their slaves. The petitioner, in consequence of bringing the slaves, the property of the Frenchmen, to New Orleans, has incurred heavy penalties, and subjected his vessel to forfeiture.

The affidavits accompanying the petition were taken with the knowledge of Philip Grimes, the United States' attorney for the Orleans territory.

The committee are of opinion that the case of the petitioner is not embraced by the provisions of the law remitting certain penalties and forfeitures, and for other purposes, passed the first session of the eleventh Congress, as that law relates to voyages direct from Cuba. Had the petitioner brought the passengers with their slaves from Cuba, he would have incurred neither penalty nor forfeiture. This case differs from those which have been sustained by Congress, in this circumstance, only—the passengers, with their slaves, were, in the cases relieved, brought from Cuba; in the present, from Curaçoa. The cause of this was not the fault of the French passengers. When they were forcibly expelled from Cuba, no passage could be procured for the United States; of course they were compelled to seek shelter in some other island, until an opportunity should offer. At Curaçoa they were permitted to land, first giving security to leave the island as soon as possible. In this situation the petitioner found them, and, on their application, took them, with their slaves, to New Orleans, where he landed them. From this view of the petitioner's case, the committee are clearly of opinion that it is within the scope and protection of the principle on which relief was extended by the aforementioned law. The want of an asylum for the distressed refugees, gave existence to that law.

The present case is therefore fairly entitled to the same equitable interposition of Congress, as the Frenchmen could find no refuge in any of the islands, and the committee are convinced that the same measure of justice should be meted, not only to the petitioner, but likewise to the French passengers. With these impressions, the committee do not hesitate to recommend the adoption of the following resolution:

Resolved, That the prayer of the petitioner is reasonable, and ought to be granted.

11th CONGRESS.]

No. 312.

[2d SESSION.]

DEFALCATION OF THE COLLECTOR OF NEW ORLEANS, AND THE CLAIM OF T. PICKERING, LATE SECRETARY OF STATE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 30, 1810.

COLLECTOR'S OFFICE, CUSTOM HOUSE, *New Orleans*, October 17, 1808.

SIR:

Should the embargo be raised during the ensuing session of Congress, it will be necessary at the time to make some arrangement at this port for the payment of the drawback of duties on the goods imported last fall, particularly of the ships Baltic and Eleanor, that paid upwards of one hundred thousand dollars; and several other cargoes, that were specially imported for the Spanish market, and are still on hand, waiting only that event, to send them to Vera Cruz. As the duties will have been paid, debentures must issue payable in fifteen days after the vessel sails, and I shall not have sufficient public moneys on hand to meet them.

I am, respectfully, sir, your obedient servant,

WILLIAM BROWN, *Collector*.

Honorable ALBERT GALLATIN, *Secretary of the Treasury*.

TREASURY DEPARTMENT, *March 9, 1809.*

SIR:

It is probable, after raising of the embargo, that drawbacks on the exportation of merchandise from New Orleans, to a very considerable amount, will become payable by the collector, and that they will much exceed the amount of moneys coming into his hands. Under these circumstances, I have to request that, on the application of the collector, you will advance to him, for the payment of drawbacks, a sum not exceeding one hundred thousand dollars, which sum, or such part of it as he may find necessary to take, the collector is directed to refund to the bank, out of the first moneys which shall subsequently come into his hands. In the mean time, the drafts of the Treasurer, on the institution, shall be so regulated, that no real advance of moneys, beyond the deposits belonging to the Government, shall be made.

The advances thus to be made to the collector are not to be charged in the books of the bank to the account of the Treasurer of the United States, but I will thank you to note at the foot of the monthly return of the treasurer's account, which is made to this office, the amount advanced to the collector, and to continue this note at the foot of each return, shewing the sum in advance to the collector at the end of each month, until he shall have repaid to the bank the entire sum advanced in consequence of this letter.

I am very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

JOSEPH SAUL, Esq., *Cashier of the Branch Bank, New Orleans.*

TREASURY DEPARTMENT, *March 9, 1809.*

SIR:

To enable you to pay the debentures for drawback on merchandise which may be exported from New Orleans after the 15th of this month, I have requested the cashier of the office of discount and deposite, at New Orleans, to advance to you a sum not exceeding one hundred thousand dollars, of which you are to take only such sum as may be necessary, in addition to the moneys already in, and which may come into, your hands, for duties at the custom house. Whatever sums you may draw from the bank in consequence of this credit are to be replaced by you out of the first moneys which shall subsequently be received. At the foot of your weekly returns you will please to note the amount of the sums which may be drawn from the bank, and will continue such note until the amount shall have been repaid.

I am, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

WILLIAM BROWN, Esq., *Collector, New Orleans.*

DR. { *Thomas T. Tucker, Esq. Treasurer of the United States, in account with the Office of Discount and* } CR.
 Deposite, New Orleans.

1809, Oct. 31. To amount to new account, \$521,153 87 | 1809, Oct. 1. By balance from old account, \$521,153 87

N. B. The sum of one hundred thousand dollars was advanced to William Brown, Esq. collector of this district, on the fourth instant, per instructions contained in Mr. Gallatin's letter of the 9th of March, 1809.

Errors excepted.

OFFICE OF DISCOUNT AND DEPOSITE, *New Orleans, October 31st, 1809.*

JOSEPH SAUL, *Cashier.*

N. B. Enclosed is William Brown's receipt.

TREASURY DEPARTMENT, *December 4, 1809.*

SIR:

I have this day received eight weekly returns from you, from the 1st July to 31st August last, with sundry other returns, some of which bore the post mark of November 13th. As the standing instructions of this Department, respecting weekly returns, and the particular instructions to you upon that subject, contained in my letter of the 26th of June last, have not been complied with, I take the liberty to repeat, that it is indispensable that the weekly returns should be weekly made, and put in the post office immediately after the end of the week to which the return relates.

I have also this day received, from the cashier of the office of discount and deposite, your receipt for one hundred thousand dollars, taken up from him, under the authority contained in my letter of the 9th of March last. It was not my intention, and the tenor of that letter implies it, that the whole of this sum should be drawn at once; but that, after the moneys in your hands were exhausted, you should draw on the bank, from time to time, to meet the debentures, as they should be presented to you for payment. If, therefore, you have not paid away, for debentures, the whole of that sum of one hundred thousand dollars, together with the sums remaining from your collections, and which appear to have amounted, on the 31st of August, to twenty-three thousand dollars, you will be pleased, immediately on the receipt of this letter, to refund to the office of discount and deposite such sum as may remain in your hands; and will continue, as fast as any moneys come into your hands, to apply them, from week to week, to the reduction of the balance of the advance from the bank, until it is wholly repaid.

I have received no statement of the debentures issued, nor any intimation from you of their amount. From the time when the money was taken up by you, I presume they were issued in the month of September. No statement for that month has been received, although the statement of debentures issued in the subsequent month of October came to hand by the last mail. This is an irregularity which ought not to have taken place. As you are not ignorant of the manner in which all your returns to this Department ought to be made, I must request your particular attention that no omissions or irregularities be permitted hereafter to occur.

You will be pleased to acknowledge the receipt of this letter by the first mail after its arrival.

I am, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

WILLIAM BROWN, Esq., *Collector, New Orleans.*

TREASURY DEPARTMENT, *December 4th, 1809.*

SIR:

I have this day received from you the return of the treasurer's account with your institution, for the 31st of October last, in which was enclosed Mr. Brown's receipt for one hundred thousand dollars. It was not my intention that he should draw the whole of this sum at once; unless, indeed, he should be called upon to pay debentures at once, not only to that amount, but also to the additional amount of the whole sum remaining in his hands from his collections, during the last eight or nine months. I have this day written to Mr. Brown, directing him to refund, immediately, to the bank, any portion of the sum advanced, which may not have been paid away by him for debentures; and to continue, from week to week, to apply the amount of his collections to the reduction of the balance of the advance, until it is wholly repaid.

I am, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

JOSEPH SAUL, Esq., *Cashier of the Office of Discount and Deposite, New Orleans.*

OFFICE OF DISCOUNT AND DEPOSITE, *New Orleans, November 20, 1809.*

SIR:

A circumstance has occurred, of a most extraordinary nature—the elopement of William Brown, collector of this port. It is presumable he has carried with him about 90,000 dollars, in doubloons, which he had obtained by means of the credit given him by you on this office. On the 4th day of October, the amount was, at his request, placed to his credit on our books, as well as on his own bank book, and drawn for agreeably to the account herewith. He left this city on Tuesday, about twelve o'clock, and stated to his deputy that he was going to leave town for a few days, which he was in the habit of doing, his wife's friends living about 25 miles up the coast. Not a lip of suspicion existed until Thursday, nor would it in all probability for many days, only from the following circumstance: He had a note due in this bank for 600 dollars; at near three o'clock, I sent over to the custom house, and his deputy refused to pay it, with the message that the collector had left no word about it, and he did not know where he was gone. I then saw the naval officer: he told me he did not know, nor could account for, Mr. Brown's absence, except he was gone up to his wife's friends. I expressed my astonishment at the deputy's refusing to pay his note, and asked him if he knew the cause. He then told me, confidentially, that, although he could not for a moment suspect the honesty or motives of Mr. Brown, there was something strange in his leaving at the moment he did, when his services and presence were particularly required at the custom house. The circumstance of the advance of the 100,000 dollars then occurred to me. I asked him if he knew of the advance. He said he knew of the order from you, but did not know that the collector had made use of it. I asked him if the business of the custom house required the advance. He answered no. I told him Mr. Brown had drawn a considerable proportion of it, and went immediately to bank to see the state of his account on our books, when I was surpris'd to find he had nearly drawn the whole balance, within the last few days, which had remained to his credit on the 31st day of October, by checks payable to the Louisiana bank, for which it since appears he got doubloons, stating they were to be shipped, on account of Government, in an unarmed vessel, therefore enjoined secrecy on the cashier. My suspicions were then excited, and I called on the president of our bank, and stated the circumstances to him. After some conversation, we agreed, delicate as the affair would be, if our suspicions should prove without foundation, no time ought to be lost in making them known to the Governor. He immediately summoned all the officers of the custom house before him: their evidence, and its being proven that he had secretly become the purchaser of a felucca or English pilot boat, which had sailed on the day he, the collector, went away, left no doubt but he had gone in her. The Governor then sent for Commodore Porter, who immediately despatched a row boat, with an officer and six armed men, after the felucca. Accounts just arrived from the Balize state, that she, the felucca, was lying there on Thursday morning, waiting for a wind, and that the wind would be fair that afternoon, it having changed about mid-day. I am, therefore, fearful, he will make his escape. The consternation excited in this city by this shameful affair, is beyond all calculation: for he was looked up to as a model of honesty and correctness in office; and, although some might doubt his prudence in his private affairs, I believe not a soul in community doubted his honesty.

I am, sir, very respectfully, your obedient,

JOSEPH SAUL, *Cashier.*

The Honorable A. GALLATIN, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *January 19, 1810.*

SIR:

The accounts of Timothy Pickering, late Secretary of State, are now under the consideration of the Comptroller of the Treasury, for adjustment and decision. It appears that the following sums were expended by Mr. Pickering, beyond the sums drawn by him from the treasury, under the several appropriations to which they respectively refer, viz:

Prize causes,	-	-	-	-	-	-	-	\$13,231 83
British treaty,	-	-	-	-	-	-	-	27,094 35
Spanish treaty,	-	-	-	-	-	-	-	32,747 36
Paid on account of General Lafayette,	-	-	-	-	-	-	-	5,509 57
								\$78,583 11

As there are no existing appropriations for those several objects, Mr. Pickering cannot receive credit at the treasury for those expenditures, unless new appropriations be made by law to that effect.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Honorable JOHN W. EPPES, *Chairman of the Committee of Ways and Means.*

11th CONGRESS.]

No. 313.

[2d SESSION.

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 5, 1810.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their last report, of the 4th of February, 1809, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the second day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

GEORGE CLINTON, *President of the Senate.*
 ALBERT GALLATIN, *Secretary of the Treasury.*
 CÆSAR A. RODNEY, *Attorney General U. S.*

WASHINGTON, *February 3, 1810.*

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund—

That the balance remaining unexpended, at the close of the year 1807, and applicable to payments falling due after that year, which balance, as appears by the statement B, annexed to the last annual report, amounted to eight hundred and twenty thousand seven hundred and eighteen dollars nine cents,

\$820,718 09

Together with the disbursements made during the year 1808, out of the treasury, on account of the principal and interest of the public debt; which disbursements, as appears by the statement C, annexed to the last annual report, amounted to ten millions three hundred and thirty thousand and thirteen dollars sixty cents,	\$10,330,013 60
And amounting, together, to eleven millions one hundred and fifty thousand seven hundred and thirty-one dollars sixty-nine cents,	<u>\$11,150,731 69</u>
Have been accounted for in the following manner, viz:	
I. There was repaid into the treasury, during the year 1808, on account of the principal of moneys heretofore advanced for the payment of interest and reimbursement of the funded domestic debt, and of moneys advanced for the purchase of stock, as appears by the statement E, annexed to the last annual report, a sum of sixty-eight thousand seven hundred and ninety-five dollars eleven cents,	\$68,795 11
II. The sums actually applied, during the same year, to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amount, as will appear by the statement A, to ten millions four hundred and thirty thousand eight hundred and thirty-three dollars twenty-five cents, viz:	
1. Paid in reimbursement of the principal of the debt, and including the whole of the 8 per cent. stock,	\$6,988,222 01
2. Paid on account of the interest and charges on the same,	3,442,611 24
	<u>\$10,430,833 25</u>
III. The balance remaining unexpended at the close of the year 1808, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the statement B, to six hundred and fifty-one thousand one hundred and three dollars thirty-three cents,	651,103 33
	<u>\$11,150,731 69</u>
That, during the year 1809, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt, viz:	
I. On account of the interest and reimbursement of the domestic funded debt,	\$5,750,065 22
II. On account of the domestic unfunded debt, viz:	
Payment of registered debt,	\$258 11
Payment of debts due to foreign officers,	13,307 41
	<u>13,565 52</u>
III. On account of the interest on the Louisiana stock, and on exchanged and converted stocks, payable in Europe,	689,067 78
Amounting, altogether, as will appear by the annexed list of warrants, marked C, to six millions four hundred and fifty-two thousand six hundred and ninety-eight dollars fifty-two cents,	<u>\$6,452,698 52</u>
Which disbursements were made out of the following funds, viz:	
I. From the funds constituting the annual appropriation of eight millions of dollars, for the year 1809, viz:	
From the fund arising from the interest on the debt transferred to the Commissioners of the Sinking Fund, as per statement I,	\$1,434,773 72
From the funds arising from the sale of public lands, being the amount paid into the treasury, from the 1st October, 1808, to the 30th September, 1809, as per statement K,	462,395 23
From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of vessels,	4,554,297 42
Amounting, altogether, to	<u>6,451,466 37</u>
Which sum of	6,451,466 37
Together with the sum advanced during the year 1808, on account of the appropriation for the year 1809, amounting, as per last annual report, to \$1,547,301 48, but which ought to have been stated, as explained in the note at the foot of this report, at	<u>1,548,533 63</u>
Makes the amount of the appropriation for the year 1809, of eight millions of dollars,	<u>\$8,000,000 00</u>
II. From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of vessels, advanced, in part, and on account of the annual appropriation of eight millions for the year 1810,	\$1,087 79
III. From repayments into the treasury on account of remittances purchased to provide for the interest on the Louisiana stock, as will appear by the statement E, viz:	
Repayment of principal advanced from the treasury,	\$93 20
Costs recovered,	51 16
	<u>144 36</u>
	<u>6,452,698 52</u>
That the abovementioned disbursements, together with the above stated balance, which remained unexpended at the close of the year 1808, of	651,103 33
And amounting, altogether, to seven millions one hundred and three thousand eight hundred and one dollars eighty-five cents,	<u>\$7,103,801 85</u>
Will be accounted for in the next annual report, in conformity to the accounts which shall then have been rendered to the Treasury Department.	
That, in the meanwhile, the manner in which the said sum has been applied is estimated as followeth:	
I. The repayments into the treasury, on account of the principal, have, during the year 1809, amounted, as by the abovementioned statement E, to	\$93 20
II. The sums actually applied, during the year 1809, to the principal and interest of the public debt, are estimated as followeth:	
1. Paid in reimbursement of the principal of the public debt, and including the last instalment of the Dutch debt,	3,826,479 26
2. Paid on account of interest, and charges on the same,	2,915,776 76
	<u>6,742,256 02</u>
As will appear by the estimate F.	

III. The balance which remained unexpended at the close of the year 1809, and applicable to payments falling due after that year, is estimated, per estimate G, at	361,452 63
	<u>\$7,103,801 85</u>

That, in conformity to the proceedings and resolutions of the Commissioners of the Sinking Fund, of the 18th of March, 1809, a copy whereof, marked L, is hereunto annexed, there was reimbursed, on the 1st of October, 1809, in the manner prescribed by the 8th section of the act of February 11, 1807, a portion of the exchanged six per cent. stock, created by virtue of that act, amounting to	1,151,469 11
And there was paid, for the reimbursement of a further portion of the same, on the 1st of January, 1810, the sum of	1,090,749 13
Amounting, together, to	<u>\$2,242,218 24</u>

Which sum of \$2,242,218 24, forms a part of the sum of \$3,826,479 26, above stated, as the amount of principal of the public debt reimbursed in the year 1809.

That the loan authorized by the last of the above resolutions of the commissioners, has not been made, there having been no necessity for resorting to it.

And that the statement H exhibits the amount of stock transferred to the Commissioners of the Sinking Fund, and to the Treasurer of the United States, in trust for said States, and standing to their credit on the books of the treasury, on the 31st December, 1809, no stocks having been transferred in payment for lands during the year 1809.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, *February 2, 1810.*

NOTE, in relation to the advance, during the year 1808, of the sum of \$1,548,533 63, on account of the appropriation of \$8,000,000, for the year 1809.

This advance was stated, in the annual report to the Commissioners of the Sinking Fund, dated February 3, 1809, at the sum of	\$1,547,301 48
To which is to be added the sum of \$1,232 15, which was stated in the report, dated February 4, 1808, as having been paid during the year 1807, out of the additional appropriation made by the 5th section of the act of April 29, 1802, for the payment of commissions to the agents employed in the purchase of remittances for the Dutch debt, when, in fact, the said sum was not paid out of that appropriation, but out of the appropriation of eight millions of dollars, it having been paid for commissions on the purchase of remittances for interest on the <i>Louisiana stock</i> , which are not embraced by the 5th section of the act of April 29, 1802. This sum, therefore, as it diminishes the amount short advanced in the year 1807, on the appropriation of eight millions, forms an addition to the amount over advanced at the end of the year 1808, on account of the appropriation of eight millions, for the year 1809, and is here added,	1,232 15
	<u>\$1,548,533 63</u>

A.

Statement of the application, during the year 1808, of the funds provided for the payment of the principal and interest of the Public Debt.

I. *Payments on account of the principal of the Public Debt.*

1. Of the domestic debt, viz:	
Amount of eight per cent. stock purchased by the commissioners of the sinking fund, per statement L, annexed to last annual report,	\$190,000 00
Reimbursement of old six per cent. stock,	\$899,434 72
Ditto of deferred stock,	355,838 09
	<hr/>
As per treasury report No. 22,058,	1,255,272 81
Ditto of the whole of the eight per cent. stock,	5,302,900 00
2. Ditto of unfunded registered debt, including arrearages of interest,	49 20
3. Ditto of the foreign debt, viz:	
Fourth instalment of the loan of 3,000,000 guilders, of January 1, 1794, guilders 600,000, at 40 cents,	240,000 00
	<hr/>
	6,988,223 01

II. *On account of interest and charges.*

1. On the domestic debt,	
Interest for the year 1808, on the several species of the domestic funded debt, as settled at the treasury, (a)	2,695,404 36
Ditto on Louisiana stock domesticated,	2,805 00
Commissions paid to agents for the purchase of stock,	475 00
Difference between the amount of moneys applied to the purchase of eight per cent. stock and the amount of stock purchased,	3,100 75
2. On the foreign debt.	
Interest on converted and exchanged stock payable at Amsterdam, July 1 and October 1, 1808, guilders 2,741 14 8, at 40 cents,	1,096 69
Interest on converted and exchanged stock payable at London, July 1 and October 1, 1808, £967 1 11, at 4s. 6d.	4,298 20
	<hr/>
	5,394 89
Interest on Louisiana stock from 1st of July, 1807, to 30th June, 1808, viz:	
Payable in Amsterdam, guilders 750,000, at 40 cents,	300,000
Ditto in London, £83,997, at 4s. 6d. per dollar,	373,320
	<hr/>
	673,320
Interest paid on the Dutch debt at Amsterdam, guilders 60,000, at 40 cents,	24,000

Commissions and charges, viz:			
At Amsterdam, including Louisiana stock, guilders 5,625 6 8, at 40 cents per guilder,	-	2,250 13	
At London, on Louisiana stock, £419 19 9, at 4s. 6d.	-	1,866 60	
			4,116 73
Loss in exchange,	-	-	32,170 38
Commissions to agents in America, for purchasing bills,	-	-	1,824 13
			<u>740,826 13</u>
			<u>3,442,611 24</u>
			<u>\$10,430,833 25</u>

NOTE TO STATEMENT A.

(a) The amount of interest for the year 1808, per the treasury statement, is	-	-	\$2,695,401 36
To which is here added, for amount of dividend on navy six per cent. stock, charged by the commissioner of loans for Virginia, in 1805, but suspended from his credit at that time, for want of a receipt, now admitted to his credit,	-	-	3 00
			<u>\$2,695,404 36</u>

TREASURY DEPARTMENT, Register's Office, February 2d, 1810.

JOSEPH NOURSE, Register.

B.

Statement of the provision, made before the 1st day of January, 1809, for the payment of the principal and interest of the public debt, falling due after the year 1808.

I. On account of the foreign debt.			
1st. Cash in the hands of commissioners and agents in Europe, viz:			
In Amsterdam on 31st Dec., 1808, (a.) guilders 168,595 10 11, at 40 cts.	\$67,438 21		
In London on same day, (b.)	-	£44,598 15 8, at 4s. 6d.	198,216 82
			<u>265,655 03</u>
2d. Remittances outstanding, viz:			
Amount paid for at the treasury, and remitted to Amsterdam before the 1st January, 1809, but not received by the commissioners till after that day,	-	G. 738,443 16 08, at 40 cts.	295,377 53
Amount paid for at the treasury, and remitted to London before the 1st January, 1809, but not received by the bankers till after that day,	-	£21,500, at 4s. 6d.	95,555 55
			<u>390,933 08</u>
			656,588 11
3d. Amount of payments made at the treasury, before the 1st January, 1809, for bills which have been protested for non-payment, and which, on that day, had not been repaid into the treasury, as explained in the last annual report, statement B,			
			<u>13,357 00</u>
			669,945 11
II. Deduct amount short provided on account of the domestic debt, as follows:			
The demands unsatisfied on the 1st January, 1809, were the following, viz:			
1st. Dividends payable by the commissioners of loans, including the dividends due on that day, and exclusive of dividends no longer demandable at their offices,			
	-		1,351,349 67
2d. Unclaimed dividends payable at the treasury,			
	-		16,467 72
			<u>1,367,817 39</u>
The provision made for the above objects was as follows, viz:			
1st. Cash due from commissioners of loans, deceased and out of office,			
	-	9,729 56	
2d. Cash in the hands of commissioners of loans in office,			
	-	1,339,234 05	
3d. Amount over-advanced at the treasury, for the payment of dividends,			
	-	12 00	
			<u>1,348,975 61</u>
Leaving the sum short provided on the 1st January, 1809, to meet all the payments on account of the domestic debt,			
	-		<u>18,841 78</u>
Total amount of provision for the public debt, remaining unapplied on the 31st December, 1808,			
			<u>\$651,103 33</u>

NOTES TO STATEMENT B.

(a.) The balance in the hands of the bankers at Amsterdam, on the 31st December, 1808, per treasury report, No. 21,779, was	-	-	-	Guilders, 469,113 05 03
But in this sum was included sundry sums paid to the bankers, by individuals, in 1808, under agreements with the Secretary of the Treasury, which were not paid for at the treasury, till 1809, and appear as a part of the remittances made to Amsterdam in that year, as detailed in the statement D, accompanying the present report. These are, therefore, in the present statement, to be deducted from the balance, appearing by the treasury report to be in the hands of the bankers at the end of the year 1808, and amount to	-	-	-	300,517 14 08
And leave the sum above stated,	-	-	-	<u>G. 168,595 10 11</u>
(b.) The balance in the hands of the bankers at London, on the 31st December, 1808, per treasury report No. 21,566, was	-	-	-	£702 18 06
In that treasury settlement, credit was allowed the bankers, conformably to their charges, for the dividends on Louisiana, exchanged, and converted stocks, payable on the 1st day of January, 1809; but as those payments belong to the year 1809, the amount thus charged is considered, in this report, as being in their hands on the 31st December, 1808. The amount of these dividends, with the commission on the Louisiana interest, is	-	-	-	43,895 17 02
And makes the sum above stated,	-	-	-	<u>£44,598 15 08</u>

TREASURY DEPARTMENT, Register's Office, February 2, 1810.

JOSEPH NOURSE, Register.

1251,	June 24,	Cranston, Alexander, and Smith, for cost of protest, on four bills of exchange drawn by them under arrangement that they were not to be paid for at the treasury until paid in Holland, per report No. 21,698, - - - - -	- - -	40 75	40 75
			<u>\$93 20</u>	<u>\$51 16</u>	<u>\$144 36</u>

TREASURY DEPARTMENT, Register's Office, January 31, 1810.

JOSEPH NOURSE, Register.

F.

An estimate of the application, made in the year 1809, of the funds provided for the payment of the Principal and Interest of the Public Debt.

I. *On account of the Principal.*

1. Reimbursement of six per cent. and deferred stocks, estimated at	-	-	\$1,330,695 50
2. Ditto of exchanged six per cent. stock,	-	-	2,242,218 24
3. Ditto of the unfunded registered debt, including arrearages of interest,	-	\$258 11	
Reimbursement of debts due to foreign officers, including ditto,		13,307 41	
			<u>13,565 52</u>
4. Of the foreign debt, viz:			
Last instalment of the loan of 3,000,000 guilders, of Jan. 1, 1794, Gs. 600,000, at 40 cts.	240,000 00		
			<u>\$3,826,479 26</u>

II. *On account of Interest and Charges.*

1. Interest on the domestic funded debt, estimated for 1809, at	-	-	\$2,177,154 40
2. Interest on Louisiana stock, domesticated,	-	-	4,050 00
3. Interest and charges on foreign debt, viz:			
Interest on exchanged and converted stocks, payable in London and Amsterdam,	-	-	\$34,616 56
On Dutch debt, at Amsterdam—Interest, G. 30,000			
Charges, 620			
			<u>12,248 00</u>
On Louisiana stock, in London and Amsterdam, interest and charges,	674,400 00		
			<u>\$721,264 56</u>
Loss in exchange, per statement D, herewith,	-	-	11,569 14
Commissions to agents in America, for purchasing bills,	-	-	1,738 66
			<u>734,572 36</u>
			<u>2,915,776 76</u>
			<u>\$6,742,256 02</u>

G.

An estimate of the funds provided, before the 1st January, 1810, for the payment of principal and interest of the public debt falling due after that day.

I. *On account of the Foreign Debt.*

Cash in the hands of commissioners and agents in Europe, on 31st Dec. 1808, per preceding statement B, \$656,588 11
The remittances made during the year 1809, per preceding statement D, are as follow, viz:

To Amsterdam,	-	-	Guilders, 906,066.12.8	
Of which there was protested for non-payment,			233.00.0	
			<u>Guilders, 905,833.12.8</u>	
To London,	-	-	£70,500	at 4s. 6d. 313,333 33
				<u>675,666 78</u>
				<u>\$1,332,254 89</u>
The amount applied during the year 1809, per preceding estimate F, is calculated to have been—				
For principal,	-	-	-	\$240,000 00
For interest and charges,	-	-	-	721,264 56
				<u>961,264 56</u>
The balance in the hands of agents in Europe, or in remittances outstanding, may, therefore, be estimated, on the 31st December, 1809, to be				370,990 33
The amount of protested bills outstanding on the same day, was, as per last annual report—				
Balance unrecovered of A. Brown's, and Brown and Hackman's bills, for 120,000 guilders,				13,357 00
				<u>\$384,347 33</u>

II. *From which deduct, on account of the domestic funded debt,*

For unclaimed dividends, demandable at the treasury, and not yet advanced to the bank for payment to the creditors, estimated at	-	-	-	22,894 70
				<u>\$361,452 63</u>

H.

A General Statement of the several stocks transferred to the United States, to the 31st December, 1809, the interest on which, by the acts of 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

	Old six per cent. stock.	3 per cent. stock.	Deferred 6 per cent. stock.	5 per cent. stock.	Five and a half per cent. stock.	Four and a half per cent. stock.	4 per cent. stock.	Navy 6 per cent. stock.	8 per cent. stock.	Exchanged 6 per cent. stock.	Converted 6 per cent. stock.	Amount of the several species of stock.

K.

Statement of moneys drawn by the agent to the trustees for the redemption of the Public Debt, in the year 1809, being an account of moneys received into the treasury from sales of public lands, pursuant to the act of the 3d March, 1795, agreeably to statements made at the Treasury.

1809, December 23.	Warrant No. 1,859, per treasury statement, No. 22,313,	-	-	-	\$462,395 23
--------------------	--	---	---	---	--------------

TREASURY DEPARTMENT, *Register's Office, January 31, 1810.*

JOSEPH NOURSE, *Register.*

L.

At a meeting of the Commissioners of the Sinking Fund, held on the 18th March, 1809:

Present: ROBERT SMITH, *Secretary of State.*
ALBERT GALLATIN, *Secretary of the Treasury.*
C. A. RODNEY, *Attorney General U. S.*

The Secretary of the Treasury laid before the Board a report, dated the 18th day of March, 1809, which was read, and is as follows, viz:

That there was paid, during the year 1808, in order to complete the reimbursement of the eight per cent. stock, a sum of	-	-	-	-	1,547,000
In advance, and on account of the annual appropriation of	-	-	-	-	8,000,000
On account of the public debt for the year 1809, leaving a sum of	-	-	-	-	\$6,453,000
Which must, in conformity with existing laws, be applied, during the present year, to the payment of the principal and interest of the public debt.					
That the payments to be made during the present year, on account of the interest on the debt, including the annual reimbursement of the six per cent. and deferred stocks, were estimated at					4,226,000
Leaving a sum of	-	-	-	-	<u>\$2,227,000</u>

Which, the market price of stocks being above the rate fixed by law for purchases, can only be applied to the reimbursement of the exchanged six per cent. stock, in conformity with the provisions of the act, supplementary to the act, entitled “An act making provision for the redemption of the whole of the public debt of the United States.”

And that, considering the probable amount of receipts and expenditures during the present year, it is not believed that all the demands on the treasury, including the abovementioned sum of \$2,227,000, can be discharged, unless a loan be obtained equal to the amount of the principal of the public debt thus reimbursed.

Whereupon,

Resolved, That a sum not exceeding \$2,250,000 be applied, during the present year, to the reimbursement of the principal of the exchanged six per cent. stock, in conformity with the provisions of the act last abovementioned.

Resolved, That the Secretary of the Treasury be authorized, with the approbation of the President of the United States, to borrow a sum equal to that of the principal of the public debt which may be thus reimbursed, in conformity with the provisions of the tenth section of the act, entitled “An act making further provision for the support of public credit, and for the redemption of the public debt.”

R. SMITH, *Secretary of State.*
ALBERT GALLATIN, *Secretary of the Treasury.*
C. A. RODNEY, *Attorney General U. S.*

Attest,
EDWARD JONES, *Sec'y to the Commissioners of the Sinking Fund.*

No. 315.

[2d SESSION.

BANK OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 19, 1810.

Mr. MONTGOMERY, from the committee to whom was referred the petition of the stockholders of the Bank of the United States, made the following report:

That, in proceeding to the consideration of the said petition, your committee instructed their chairman to address a letter to the Secretary of the Treasury, requesting him to furnish such information or observations as he might think proper, in relation to the subject matter thereof, as connected with the financial and commercial interests of the United States. In reply to which, the Secretary, by his letter to the chairman, referred your committee to his former report on the said subject, made to the Senate of the United States, in obedience to the order of that House.

Your committee have been attended by agents of the petitioners, who, in addition to the matters contained in the petition, have suggested to your committee that the object of the petitioners was to obtain the renewal of the charter in its present form; that, for this renewal, the bank is willing to make compensation, either by loans, at a rate of interest, or by a sum of money to be agreed upon, or by an increase of the capital stock, by a number of shares to be taken and subscribed for by the United States, to an amount adequate to the compensation to be agreed upon for such renewal.

These agents also suggested, that they were fully authorized and empowered to offer and conclude the terms, specifically connected with those propositions.

Your committee not feeling themselves authorized to enter into such terms, and judging that the extent of those propositions would better apply to the details of a bill, than to the adoption of a principle to be first settled by the House, have, therefore, foreborne to inquire into the extent of the propositions, and, without expressing an approbation or rejection of these offers, or giving an opinion as to the plan and reasoning of the Secretary of the Treasury, your committee, in order that the opinion of the House on this great national question may be declared previous to entering into the details connected with the subject, recommend the following resolution:

Resolved, That it is proper to make provision for continuing the establishment of the Bank of the United States, with offices of discount and deposite, under the regulations necessary for the beneficial administration of the national finances, during such time, and on such conditions, as may be defined by law.

11th CONGRESS.]

No. 316.

[2d SESSION.

ALLOWANCE OF DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 21, 1810.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of George Armroyd and Co. made the following report:

The petitioners state that, on the 10th of July, 1807, certain goods, wares, and merchandise, were imported in the schooner Christianstadt, into the United States, viz. at Wilmington, in the district of Delaware, and that the same were afterwards transported, coastwise, in the sloops Carolina and Ann, to Philadelphia.

That, on the 2d day of October, 1809, Mr. Percival, one of the partners of the firm, made application, at the custom house of Philadelphia, to know whether the merchandise was then entitled to drawback: the deputy collector and naval officer, on examination, determined that the merchandise was entitled to the drawback, and would continue so if shipped on the 3d or 4th of October.

That, on the 3d of October, the merchandise was shipped for a foreign port, after having previously obtained the export permits. The petitioners further state, that, at the usual period, certificates for debentures were issued, subscribed by the deputy collector and naval officers, and delivered to the petitioners, to enable them to receive, from the collector at Wilmington, the amount of the drawback, and that, on the application of the petitioners to the collector of Wilmington, for the amount of the debentures, he refused to pay the same, alleging as a reason, that the merchandise had been too long within the United States to be entitled to the drawback of duties. All the facts set forth in this statement are supported by custom house certificates. Two letters, one from the Comptroller of the Treasury, and the other from the deputy collector of the custom house at Philadelphia, accompany the petition. By the computation of the Comptroller, the time during which the merchandise was entitled to a drawback, had expired by a day, but, from the calculation made by the deputy collector and naval officer of Philadelphia, the exportation took place two days within the period allowed for transshipments of merchandise with benefit of drawback.

The committee are of opinion, that the drawback of duties in this case, as made out by George Armroyd and company, ought to be allowed, inasmuch as they were induced to make the shipment of merchandise for a foreign market, under a conviction that the same was entitled to the allowance of a drawback of duties, by the decision of the deputy collector and naval officer of the custom house at Philadelphia, whose province it is to superintend importations and exportations of merchandise.

The committee are disposed to exact a strict compliance with law, in matters of great public concern, when the party acts spontaneously, or from advice of persons not clothed with the insignia of office; but, under the circumstances of this case, they do not admit that it comports either with the honor or justice of the National Legislature, to take advantage of an error, if error it be, committed by citizens acting in conformity to the decision of its authorized agents. It appears, from the documents before the committee, that George Armroyd and Co. would never have exported the merchandise, had they not been previously assured, by the proper authority, that the drawback of duties would be allowed. The difficulty in this case arises in a great measure in the three following circumstances: 1st. The time allowed for the exportation, with an allowance of the drawback, being made up of parts of different years. 2d. The deduction of the time during which the embargo was in force, viz: from the 22d of December, 1807, to the 15th of March, 1809. And 3dly. The intervention of leap year.

The committee are not disposed to rest the claim of the parties to the justice of the National Legislature on either of the three points stated.

Their decision is founded on the official acts of the deputy collector and naval officer of the port of Philadelphia. The letter of Mr. Graff, the deputy collector, clearly proves that the petitioners acted fairly, and in strict conformity to the usage of the custom house.

Though the committee make their decision in favor of the parties, on the grounds stated, yet, they are satisfied it might be made to depend, with great propriety, on the other points. The calculation of the Comptroller of the Treasury, contained in his letter, to which the committee beg leave to refer, differs from that made by officers of the customs at least by a day. According to strict and fair computation, it appears that the additional day in leap year should be given as a day of grace to the petitioners. If there had been no embargo, part of leap year would have been computed in the time allowed for the exportation with benefit of drawback. It never was the intention of the Legislature to narrow the privilege of exportation with the allowance of drawback of duties, existing at the time the embargo was laid, as is clearly evinced by the passage of the law, to prevent the time, during which the embargo should be in force, being computed as making part of the term of twelve calendar months, during which, goods, wares, or merchandise, imported into the United States, must be exported, in order to be entitled to a drawback of the duties paid on the importation. If there had been no suspension of foreign trade, the impression on the committee, from the statement of the deputy collector, Mr. Graff, is, that the additional day would have been allowed to the petitioners.

From this view of the case, the committee respectfully submit the following resolution:

Resolved, That the prayer of the petitioners is reasonable, and ought to be granted.

TREASURY DEPARTMENT, *Comptroller's Office*, December 8, 1809.

SIR:

Your letter of the fourth, with one from Mr. Graff, relative to an exportation of merchandise imported into the district of Delaware, and exported from Philadelphia, is received.

The collector of Delaware has been informed that the exportation was not made in time, and therefore, that the merchandise was not entitled to drawback.

The date of importation was the 10th of July, 1807, and the export entry was on the 3d of October, 1809. Including the day of importation and that of exportation, and excluding the time that the embargo was in force, there will remain 366 days.

Now, as 366 days are made up of parts of the years 1807 and 1809, and the intermediate was leap year, there can be no question but that the goods were exported too late by one day. The law requires that an exportation for drawbacks shall be made in twelve calendar months, and those months will always be comprehended in 365 days, except in leap year, in which 366 days are contained.

Enclosed is a copy of the calculation made at the treasury.

I am, sir, respectfully, your obedient servant,

G. DUVALL.

JOHN STEELE, Esq.

PHILADELPHIA, December 4, 1809.

SIR:

On the 2d of October last, whilst yet acting as your deputy, Mr. Percival, of the house of George Armroyd and company, came to your office, (you were just then absent) and asked me whether goods imported on the 10th of July, 1807, were entitled to drawback, and when the time would expire. There was a considerable press of business at the time, and I asked him, have you tried the time, and do you say they are entitled to drawback? He answered he had, and that they were entitled thereto. I think I replied, if you are sure, there is no occasion for me to try; make out your entries, and get permit to ship your goods. He answered, that he wished me to examine, as a little while past I had declared the time to have expired in the case of some other goods, when he thought they were entitled to drawback. I did try, and made the time to expire on the 3d or 4th; at same time, I gave the date to the deputy naval officer, and he agreed with me. He said they were ready to ship the goods then, but the vessel was in the hands of the carpenters, and as there appeared some time to spare, and the goods could be laden on board in a few hours, they did not take out the export permit until the following day; and had I not, on the solemn declaration I had taken, not to suffer the revenue of the United States to be defrauded, been satisfied the goods were entitled to drawback, I never would have issued the permits, qualified the exporter to his entries, suffered the export bonds to be signed, and then have issued the certificates to obtain the drawback in Delaware district, all which has been done. The deputy naval officer, under like conviction, did sign the export permit and certificate No. 2. I feel much concern to find that the collector of Delaware has refused to issue the debentures, and that the certificates No. 2, have been returned. This, I believe, is the only act of mine, since you have been in office, which is likely to give you trouble; and I regret it more particularly, that it should have happened on the eve of my declining my situation as your deputy. The bonds were signed on the 5th, of course. The certificates were of that date, in order to enable the collector to know when the debentures ought to be made payable. I am not yet convinced that these goods are not legally entitled to drawback. What says the law? vol. 4, sec. 75, page 395. "Drawbacks shall be allowed and paid on all goods, wares, and merchandise, imported into the United States, whereupon the duties shall have been paid, or secured to be paid, as, within twelve calendar months after payment or security given, shall be exported to any foreign port or place," &c. The collector of Delaware makes twelve calendar months to consist of 365 days. They sometimes contain 366 days. But, sir, the law has always been construed so as to take in the date of the month of importation, of the following year, viz. Goods imported on the 10th of July, in one year, if shipped on the 10th of July, in the following, have always received the drawback. Your books will show many instances of this kind, and no demur has ever been made at the treasury. The law does not say within one year from the date of importation, but within twelve calendar months after payment, &c. A question would here arise, which I believe has never been agitated, when the twelve calendar months legally expire. A imports goods in a vessel entered at the custom house on the 10th of July, 1809; he enters his goods on the 15th, and pays the duties. B has goods in the same vessel, and he secures the duties on the 20th. Quere. Do the twelve calendar months expire on the 15th, 20th, or the 10th of July, 1810? But, admitting the true construction of the law to be after the date of importation, the calculation might be made in two ways, which appear to be just and legal—say, in this case,

	Months.	Days.
After the 10th of July, 1807, to 31st of same month,	0	21
August, September, October, November,	4	0
To December 21,	0	21
After 15th March, to 31st same month, 1809,	0	16
April, May, June, July, August, September,	6	0
October, 1st to 3d,	0	3
Say ten months and sixty-one days,	10	61

Or thus, which is according to common usage, viz:

	Months.	Days.
After 10th of July, to 10th December, 1807,	5	00
To 21st December,	0	11
After 15th March, to 15th September, 1809,	6	00
To October 3d,	0	18
	11	29

Eleven months and twenty-nine days. This appears to be the law; it does not say 365 or 366 days. Suppose the law to say within three calendar months from the date of importation.

January 1st, to March 31st, would be 90 days for three calendar months; February 1st, to April 30th, would be 89 days for three calendar months; March 1st, to May 31st, would be 92 days for three calendar months.

The collector of Delaware's calculation is certainly incorrect. I cannot be persuaded but that the exporters George Armroyd and Co. are legally entitled to the drawback in question, and I respectfully request you will be pleased to lay this statement before G. Duvall, Esq. Comptroller of the Treasury, who, I trust, will, under the peculiar circumstances of the case, and giving the law a liberal construction, be induced to admit the claim, and direct payment thereof, by the collector of the district of Delaware.

Respectfully, I am, sir, your obedient servant,

JOHN GRAFF.

JOHN STEELE, Esq. Collector of the district of Philadelphia.

11th CONGRESS.]

No. 317.

[2d SESSION.]

REMISSION OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 21, 1810.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petition of William W. Weymouth, of the city of Richmond, in the State of Virginia, made the following report:

The petitioner states that, on or about the year 1803, Mrs. Lucy Redford, widow and Executrix of James Redford, deceased, of Henrico county, in the State of Virginia, authorized the petitioner to apprehend a negro man, named Oliver, belonging to the estate of the said James Redford, deceased, and who was supposed to be living in New York. The petitioner states, that he found the said slave in New York, that he had him apprehended, and proved, to the satisfaction of Jacob Delamontagnie, one of the justices of the police office, in the said city of New York, that Oliver was a fugitive slave, on which he was committed to the custody of the keeper of bridewell; that, on or about the 3d of March, 1809, the said slave was delivered to him, to be removed to his owner, residing in Virginia aforesaid. The petitioner further states, that, at the time last mentioned, he was master of the schooner Weymouth, bound from New York to Richmond, and that he took the slave on board, for the purpose aforementioned, and set sail for Richmond; but that, before he cleared the harbor of New York, two persons came on board; one of which was a deputy sheriff, and, by force or virtue of a real or pretended authority, took the said slave from the vessel, and carried him back to the city.

The petitioner further states, that he has been arrested, at the suit of the United States, and one Isaac Sherman, in an action of debt for the penalty of one thousand dollars, for not having, previous to the departure of the schooner from the port of New York, made out and subscribed duplicate manifests of having such slave on board, according to the directions of the ninth section of the act, entitled "An act to prohibit the importation of slaves into any port or place within the jurisdiction of the United States, from and after the first day of January, in the year 1808."

The Committee of Commerce and Manufactures do not hesitate to decide in favor of the petitioner. It is a case clearly made out, and is in every respect entitled to the same relief which was granted to Levin Jones, this session of Congress. As the cases are similar in principle, though differing in circumstances, the committee beg leave to refer to the report made in favor of Levin Jones, and solicit that it may be taken as part of this report.*

The committee recommend the adoption of the following resolution:

Resolved, That leave be given to report a bill for the relief of William W. Weymouth.

[2d SESSION.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 16, 1810.

TREASURY DEPARTMENT, *March 15, 1810.*

SIR:

I have the honor to transmit, herewith, a letter from the Comptroller of the Treasury, accompanied with sundry statements, which have been prepared in obedience to the act, entitled "An act establishing the mint, and regulating the coins of the United States," passed on the 2d of April, 1792.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

TREASURY DEPARTMENT, *Comptroller's Office, March 14, 1810.*

SIR:

The statements herewith, marked A, B, and C, have been prepared pursuant to the seventh section of an act of Congress, passed 2d of April, 1792, entitled "An act establishing a mint, and regulating the coins of the United States." They contain all the information relative to the transactions of the mint, which the settlements made at the treasury enable me to give.

I have the honor to be, sir, with great respect, your obedient servant,

G. DUVALL.

ALBERT GALLATIN, Esq.

A.

		387,414 29.5
Deduct amount gained on the coinage of copper, from the commencement of the institution to the 31st December, 1809, per statement herewith, marked B,	- -	37,331 52.5
Nett amount chargeable to the coinage of gold, silver, and copper, from the commencement of the institution to the 31st December, 1809, including the cost of lots, buildings, machinery, &c.	- -	\$350,082 77

COMPTROLLER'S OFFICE, March 3, 1810.

ANDREW ROSS, Clerk.

11th CONGRESS.]

No. 319.

[2d SESSION.]

LOANS AND ADDITIONAL DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 21, 1810.

January 8th, 1810.

SIR:

Having stated, in your several reports, that loans would constitute the principal resource of the United States for defraying extraordinary expenses, the Committee of Ways and Means have instructed me to request that you will report your opinion as to the most eligible mode of obtaining money by loan; keeping in view, both the facility of borrowing sums, commensurate with the exigencies of the United States, and the ultimate extinguishment of the debt contracted.

You have already given your opinion in favor of an increase of duties on importation. To what extent can this be carried with safety? Can any other resources, except taxes and loans, be relied on, for immediate revenue?

I have the honor to be, with respect, your most obedient,

JOHN W. EPPES.

ALBERT GALLATIN, Esq. Secretary of the Treasury.

TREASURY DEPARTMENT, February 26, 1810.

SIR:

I have the honor to submit the following observations in answer to the several objects of inquiry embraced by your letter of the 8th ultimo. The amount of extraordinary expenses which may be authorized by Congress being yet unascertained, it is not, even at this time, practicable to state, with precision, the sum which may be wanted on loan for the service of this year. And, in relation to ensuing years, it would be premature to lay down any general rules respecting the most eligible mode of borrowing sums of money, commensurate with the exigencies of the United States in case of war. It is, therefore, thought sufficient, for the present, to point out some of the most obvious means of effecting loans generally, leaving it a subject of subsequent consideration to decide, according to existing circumstances, on the most eligible mode, and on the arrangement of details.

The inquiries of the Committee of Ways and Means apply to the three following points: 1st. What is the most eligible mode of obtaining money by loan, keeping in view both the facility of borrowing sums, commensurate with the exigencies of the United States, and the ultimate extinguishment of the debt contracted? 2dly. To what extent can an increase of duties on importation be carried with safety? 3dly. Can any other resources, besides taxes and loans, be relied on for immediate revenue?

LOANS.

1st. The commissioners of the sinking fund will, out of the annual appropriation of eight millions of dollars for the payment of the debt, reimburse, in 1810, the residue of the exchanged six per cent. stock, amounting to \$3,750,000, and in 1811, the whole of the converted six per cent. stock, amounting to \$1,860,000 dollars. It is probable that the owners of those two species of stock would consent to re-loan the amount, provided it was made irredeemable for a few years.

2d. It has already been stated, in the annual report of November 5th, 1807, referred to in that of this year, "that the several banks of the United States might find it convenient, as the diminished commerce of the country might require less capital, to loan to Government a considerable portion of their capital stock, then computed at about forty millions of dollars." Such temporary loans can be obtained only to a limited amount, but they are convenient in two respects: 1st. They do not diminish the facility of obtaining other loans from individuals, inasmuch as they do not increase the amount of stock at market. 2dly. Being redeemable at will, and in any sums which may suit the convenience of Government, interest is paid only as long as the money is wanted; and the extinguishment of the debt contracted, is rendered more easy and certain.

3d. Loans may be obtained from individuals to an extent commensurate with the national capital, and limited by the existing demand for that capital for private purposes. The terms must vary according to circumstances, always giving the preference to the most simple form that can effect the object. A portion of the public lands may, perhaps, if necessary, either as a premium, or by giving an option to subscribers, be advantageously applied in facilitating loans, or improving their terms.

4th. Treasury notes, bearing interest, and payable to order, one year after date, may be annually issued, to a moderate amount, and be put in circulation, both through the medium of banks, and in payment of supplies. A portion would be absorbed during the year by the payment of public lands and revenue bonds, and the redemption of the residue be provided for by the loan of the ensuing year. This annual anticipation of the revenue, though liable to abuse, may, if kept within strict bounds, facilitate both the collection of the revenue and the loans themselves.

In relation to the extinguishment of the debt contracted, those who borrow can do nothing more than to provide and pledge funds sufficient for that object, and to give such a form to the debt as may not impede its redemption. To render it irredeemable for no longer time than is necessary in order to obtain the money; to make it reimbursable by instalments, at fixed periods; never to create, for the sake of diminishing the annual interest, a greater nominal amount of stock than the sum actually borrowed; and above all, never to incur expenses which are not actually necessary for the defence or welfare of the country; are principles essential for a nation which does not contemplate a system of perpetual and increasing debt. But, for its actual reimbursement, we must principally depend on the return of prosperous circumstances, on the growing resources of the country, and on the wisdom of our successors. The artificial provisions of a sinking fund may always be rendered inefficient by the necessities or extravagance of Government. The real amount of a national debt cannot be diminished, unless the aggregate of revenue, including the funds assigned to the sinking fund, and exclusively of new loans, exceeds the aggregate of expenditures, other than those for the payment of the principal of the debt. Favorable circumstances, and a rigid economy in the current expenses, have enabled the United States to reimburse, during the last eight years, one half of the debt created by the Revolutionary war, and during some of the ensuing years. Similar circumstances, and an adherence to the same principles, will be requisite to secure the actual reimbursement of the debt which it may now be necessary to contract. But, that Government will possess resources amply sufficient for that object, cannot be doubted. The proceeds of the public lands would, alone, slowly, perhaps, but certainly, extinguish a much greater debt than the United States have it now in their power to create. And it is sufficiently ascertained that the national wealth of the United States, and, therefore, the means of raising revenue, increase in a ratio still more rapid than their population—a population which almost doubles every twenty years.

These considerations, connected with others, stated at large in the annual reports of November, 1807, and December, 1808, have produced a conviction that loans might, without danger, be resorted to as the principal resource for supporting a war. Permit me, at the same time, to observe, that the suggestion has been confined to that object alone, and that, excepting the case of war, either immediate or contemplated, it appears consistent with sound policy to raise, during the year, the means of defraying all the national expenses, borrowing no larger sum than the amount of principal of old debt paid during the year. The propriety of providing, even in time of war, a revenue equal to the annual expenses on a peace establishment, the interest of the existing debt, and that on the loans which may be raised, has, also, been suggested in former reports.

INCREASE OF DUTIES.

On that subject, but little can be added to the opinions expressed on former occasions. I still think that this source of revenue is, in the United States, and at this time, the most productive, the easiest to collect, the least burthensome to the great mass of the People; and that the duties on importation, generally, may, in case of war, be doubled, without inconvenience or danger.

In time of peace, and particularly under existing circumstances, habits of smuggling might be promoted by so great an increase. But the precise rate which may, with safety, be adopted, can only be a matter of opinion, to be tested by experience. I would not hesitate, however, to mention an additional duty of five per cent. on merchandise paying ad valorem duties, and an increase of $33\frac{1}{3}$ per cent. on the existing duties on all other articles, as attended with very little danger, and preferable to any other new source of taxation. A renewal of the duty on salt, which produced six hundred thousand dollars a year, may be exceptionable in other respects, but, on account of the bulk of the article, is liable to no objection in the present view of the subject.

It was stated, in the annual report of December last, that an increase of duties would not, on account of the terms of credit allowed for the payment of duties, supersede the necessity of a loan for the service of this year. The amount of that loan might, of course, be diminished, if no credit, or a credit of only sixty days, was allowed for the payment of the proposed additional duties.

PUBLIC LANDS.

These constitute the only great national resource exclusively of loans and taxes. They have already been mentioned as forming a fund for the ultimate extinguishment of the public debt; and the possibility of their being used as a means of facilitating loans, has been suggested. A portion might also be usefully applied as a bounty to officers and soldiers, whenever it may become necessary to raise a considerable force. But, as an object of immediate revenue, I much doubt whether this can be materially increased without a radical change in the present system.

Not less than ten land offices are now in full operation, offering a great choice of good lands, situated in various climates, and suited to the habits of the citizens of every portion of the Union. They are sold at the rate of two dollars an acre, or rather at one dollar and sixty-four cents, if paid for at the time of purchase, and in tracts of one hundred and sixty acres. As much is sold as there is actual demand for land in similar situations at that price. The sales are, however, almost exclusively confined to those who are, or intend to become, actual settlers, and all the money which can be raised by that description of purchasers, is annually paid to the United States. In order to increase immediately the amount of sales, a different capital from that which has heretofore been applied to that ob-

ject, the capital of persons who will purchase for the purpose of selling again, with a profit, must be brought into action. But it is evident that no person will purchase lands, at the present price, as an object of speculation, whilst the United States continue to sell at the same price in small tracts. To effect the proposed object, it would be necessary not only to reduce the price, but to make a difference between that of lands sold in large tracts, and that asked for small tracts, sufficient to encourage purchases on an extensive scale. That alteration might produce an additional revenue, but appears to me extremely injurious in other respects. The present system of sales has been tried, and answers the expectations of the Legislature. A gradual increase must, notwithstanding some temporary fluctuations, necessarily take place. On that I would rely; nor would I venture to suggest any other change than that already proposed on a former occasion—a moderate and general reduction of prices, discontinuing, at the same time, all sales on credit, but continuing to sell, at the same rate, large or small tracts of land.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Hon. JOHN W. EPPES, *Chairman of the Committee of Ways and Means.*

Extract from the Annual Report of the Secretary of the Treasury, dated November 6, 1807.

“It will be sufficient to state, 1st. That it appears necessary to provide a revenue at least equal to the annual expenses on a peace establishment, the interest of the existing debt, and the interest on the loans which may be raised. 2d. That those expenses, together with the interest of the debt, will, after the year 1808, amount to a sum less than seven millions of dollars, and, therefore, that, if the present revenue, of fourteen millions five hundred thousand dollars, shall not be diminished more than one half by a war, it will still be adequate to that object, leaving only the interest of war loans to be provided for.

Whether taxes should be raised to a greater amount, or loans be altogether relied on, for defraying the expenses of a war, is the next subject of consideration.

Taxes are paid by the great mass of the citizens, and immediately affect almost every individual of the community; loans are supplied by capitals previously accumulated by a few individuals. In a country where the resources of individuals are not generally and materially affected by the war, it is practicable and wise to raise by taxes the greater part at least of the annual supplies. The credit of a nation may, also, from various circumstances, be, at times, so far impaired, as to leave no resource but taxation. In both respects, the situation of the United States is totally dissimilar.

A maritime war will, in the United States, generally and deeply affect, whilst it continues, the resources of individuals; as not only commercial profits will be curtailed, but principally because a great portion of the surplus of agricultural produce necessarily requires a foreign market. The reduced price of the principal articles exported from the United States will operate more heavily than any contemplated tax. And, without inquiring whether a similar cause may not still more deeply and permanently affect a nation at war with the United States, it seems to follow, that, so far as relates to America, the losses and privations, caused by the war, should not be aggravated by taxes, beyond what is strictly necessary. An addition to the debt is doubtless an evil: but experience having now shown with what rapid progress the revenue of the Union increases in time of peace, with what facility the debt, formerly contracted, has, in a few years, been reduced, a hope may confidently be entertained that all the evils of the war will be temporary, and easily repaired; and that the return of peace will, without any effort, afford ample resources for reimbursing whatever may have been borrowed during the war.

The credit of the United States is also unimpaired, either at home or abroad; and it is believed that loans, to a reasonable amount, may be obtained on eligible terms. Measures have been taken to ascertain to what extent this may be effected abroad. And it will be sufficient here to suggest, that the several banks of the United States may find it convenient, after the ensuing year, and as the diminished commerce of the country may require less capital, to loan to Government a considerable portion of their capital stock, now computed at about forty millions of dollars.

It might be premature to enter into a particular detail of the several branches of revenue, which may be selected, in order to provide for the interest of war loans, and to cover deficiencies in case the existing revenue should fall below seven millions of dollars. A general enumeration seems at present sufficient.

1. Not only the duty on salt and the Mediterranean duties may be immediately revived, but the duties on importation, generally, may, in case of war, be considerably increased, perhaps doubled, with less inconvenience than would arise from any other mode of taxation. Without resorting to the example of other nations, experience has proven that this source of revenue is, in the United States, the most productive, the easiest to collect, and the least burthen-some to the great mass of the people. In time of war, the danger of smuggling is diminished; the scarcity of foreign articles prevents the duty ever falling on the importer; the consumers are precisely those members of the community who are best able to pay the duty; and the increase of domestic manufactures, which may be indirectly affected, is, in itself, a desirable object.

2. Indirect taxes, however ineligible, will, doubtless, be cheerfully paid as war taxes, if necessary. Several modifications of the system formerly adopted might, however, be introduced, both in order to diminish some of the inconveniences which were experienced, and, particularly, to ensure the collection of the duties.

3. Direct taxes are liable to a particular objection, arising from the unavoidable inequality produced by the general rule of the constitution. Whatever difference may exist between the relative wealth, and consequent ability of paying, of the several States, still the tax must necessarily be raised in proportion to their relative population. Should it, however, become necessary to resort to that resource, it is believed that a tax raised upon that species of property in each State, which, by the State laws, is liable to taxation, as had originally been contemplated by Congress, would be preferable to a general assessment, laid uniformly on the same species of property in all the States, as was ultimately adopted.”

Extract from the Annual Report of the Secretary of the Treasury, of December 10th, 1808.

“It is certainly only with a view to war, either immediate or contemplated, that it will become necessary to resort, at least to any considerable extent, to extraordinary sources of supply.

Legitimate resources can be derived only from loans or taxes; and the reasons which induce a belief that loans should be principally relied on, in case of war, were stated in the annual report of last year. That opinion has been corroborated by every subsequent view which has been taken of the subject, as well as by the present situation of the country. The embargo has brought into, and kept in the United States, almost all the floating property of the nation. And whilst the depreciated value of domestic products increases the difficulty of raising a considerable revenue by internal taxes, at no former time has there been so much specie, so much redundant unemployed capital, in the country. The high price of public stocks, and indeed of all species of stocks, the reduction of the public debt, the unimpaired credit of the General Government, and the large amount of existing bank stock in the United States, leave no doubt of the practicability of obtaining the necessary loans on reasonable terms.

The geographical situation of the United States, their history since the Revolution, and, above all, present events, remove every apprehension of frequent wars. It may, therefore, be confidently expected, that a revenue derived solely from duties on importations, though necessarily impaired by war, will always be amply sufficient, during long intervals of peace, not only to defray current expenses, but also to reimburse the debt contracted during the few periods of war.

No internal taxes, either direct or indirect, are therefore contemplated, even in the case of hostilities carried on against the two great belligerent Powers. Exclusively of the authority which must, from time to time, be given to

borrow the sums required, (always providing for the reimbursement of such loans within limited periods) and of a due economy in the several branches of expenditure, nothing more appears necessary than such modifications, and increase of the duties on importations, as are naturally suggested by existing circumstances.

Although importations have already considerably diminished, and may, under the system now in force, shortly be altogether discontinued, no reasonable objection is perceived against an increase of duties on such as may still take place.

Had the duties been doubled on the 1st of January, 1808, as was then suggested, in case of war, the receipts into the treasury, during that and the ensuing year, would have been increased nine or ten millions of dollars. Those articles, of most universal consumption, on which an increase of duty would be inconvenient, are generally either free of duty, or abundant; it is therefore proposed, that not only the Mediterranean duties, which will expire on the first day of January next, should be continued, but that all the existing duties should be doubled on importations subsequent to that day."

11th CONGRESS.]

No. 320.

[2d SESSION.

BALANCES AND UNSETTLED ACCOUNTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 23, 1810.

Mr. QUINCY made the following report:

The Committee to whom was referred the report of the Comptroller of the Treasury, transmitting a statement of the unsettled accounts of the Treasury, War, and Navy Departments, in conformity with the act passed the 3d of March, 1809, have taken that subject into their consideration, and have deemed it their duty particularly to inquire into the actual state of those balances, which, by that report, appear of great nominal amount, and of which no account had been rendered, notwithstanding a considerable length of time had, in many cases, elapsed, since the termination of those services, on which the public moneys had been originally advanced. It appeared to your committee due, both to the individuals charged with those balances and to the public, that all the knowledge possessed by the officers of the treasury, tending to reduce the amount of those nominal balances, should be ascertained and communicated, to the end that, on the one hand, injurious suspicions should not be allowed to circulate under the sanction of a treasury statement; and, on the other, that real delinquency should not remain concealed, or find countenance in the number and greatness of these unsettled balances. Your committee, therefore, addressed a letter to the Comptroller of the Treasury, containing a list of the names of all those individuals who appeared, from his report, to have "rendered no account," and whose accounts, from the greatness of the balances stated, required, in the opinion of the committee, a more distinct elucidation, and requested, in relation to these accounts, a particular statement of all credits, which, either from informal evidence, or from the operation of the laws relative to appropriation and expenditure, or from known services rendered, were, within the knowledge of the officers of the treasury, just and certain offsets against the nominal balance stated, in his report, as due from each individual. The letters marked A and B, annexed to this report, contain the information requested from the Comptroller of the Treasury, and compress, as far as the knowledge of the officers of the treasury authorizes, the sphere of apparent delinquency of each of those individuals.

The greatness of these nominal balances, and the length of time which had been permitted to elapse, with respect to some of them, without account rendered or demanded, indicated, in the opinion of your committee, a state of accountability for public moneys, not sufficiently safe for the public, nor just to individuals. The laws, also, relative to this subject, appeared to them, upon examination, susceptible of amendment. They establish no fixed periods, within which receivers of public moneys shall account with the treasury. They leave the time of calling receivers of public moneys to account wholly to the discretion of the Comptroller of the Treasury. They require, in order to charge the debtor with costs, a previous notice from the Comptroller, which protracts and embarrasses the enforcing adjustment of accounts. The tendency of these defects in the law has been to render receivers of public moneys negligent in rendering their accounts, and to expose the officers of the treasury to inconvenience in compelling settlement. By entrusting so wide and general a discretion to those officers, there is thrown upon them an unnecessary and inexpedient responsibility. With respect to receivers of public moneys, in foreign countries, the effect has often been to procrastinate any settlement of their account until their return to the United States; when, from the length of time which has intervened, and the difficulty of rectifying mistakes or deficiencies in vouchers, at a distance from the place where expenditure was incurred, an expeditious and satisfactory adjustment is almost always difficult, and sometimes impracticable. Your committee, therefore, addressed a letter to the Secretary of the Treasury, making inquiry whether, in his opinion, the provisions of the law, relative to the accountability of the agents and receivers of public moneys, both at home and in foreign countries, were as complete as the public good requires, or as the nature of each particular service will permit, and requesting that, if the present system, in his opinion, was susceptible of any practical amendment, so as to ensure a more regular and punctual adjustment of the public accounts, that he would furnish your committee with a statement of such as he thought advisable. The letters marked C and D, annexed to this report, contain the reply of the Secretary of the Treasury to that letter. In conformity with the principles recommended by him and the Comptroller, your Committee have prepared a bill, which accompanies this report, and which they ask leave to present for the consideration of the House

A.

TREASURY DEPARTMENT, *Comptroller's Office*, February 28, 1810.

SIR:

On the receipt of your letter, of the 25th ultimo, application was immediately made to the Department of State, for the information required by the committee. This information is communicated by a letter, dated yesterday, from the head of that Department. Hence the cause of the delay which has taken place.

The report which I had the honor to submit to the House of Representatives, at an early period of the session, in obedience to the second section of the act of the third of March, eighteen hundred and nine, entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments," contained all the information which the Treasury Department afforded. To prevent improper and unfavorable impressions, I thought it necessary to observe, that "some of the balances standing on the books of the treasury, although nominally large, will, without doubt, be greatly lessened, if not wholly extinguished, when a settlement shall take place, particularly those against foreign ministers and agents; the advances having been made on account of salary and other official expenditures." Any further remark was deemed unnecessary.

The information received from the Department of State, enables me to be more particular with respect to those persons, a list of whose names is contained in your letter; that is to say:

	Nominal balance.
James Monroe, - - - - -	\$81,555 63
Charles Pinckney, - - - - -	66,117 84
William Pinkney (as minister plenipotentiary) - - - - -	42,117 78
William Smith, - - - - -	34,964 69
Joseph Donaldson, jr. - - - - -	490,139 55
Christopher Gore, - - - - -	53,222 22
*Christopher Gore and Wm. Pinkney, - - - - -	40,943 59
William Pinkney (as commissioner) - - - - -	55,646 41
Samuel Sitgreaves, - - - - -	15,247 20

On the settlement of the accounts of Mr. Monroe, he will be credited with his salary, viz: nine thousand dollars per annum, from the 12th of January, 1803, to the 15th November, 1807; an outfit equal to a year's salary; and a quarter's salary for the expenses of returning home. He will also be entitled to credit for a salary of one thousand three hundred and fifty dollars per annum, paid to the Secretary of Legation, during the period of service. Also, for contingent expenditures, such as postages, couriers, &c. usually allowed in similar cases.

Mr. Charles Pinckney will be credited with the same amount for outfit, and for salary from the 10th of July, 1801, to the 2d October, 1805, and a quarter's salary for the expenses of returning. Also, with one thousand three hundred and fifty dollars per annum to a Secretary of Legation, during his term of service, and for the usual contingent expenditures.

Similar allowances will be passed to the credit of Mr. William Pinkney, when his account as minister plenipotentiary shall be rendered, after the termination of his mission.

Mr. Smith's mission, as minister plenipotentiary at Lisbon, commenced on the 18th of July, 1797, and ceased on the 9th of September, 1801. He will be entitled to similar credits.

Mr. Gore's account as a commissioner, under the 7th article of the treaty of 19th November, 1794, has since been settled, and the balance due from him to the United States is ascertained to be \$900 69.

Mr. William Pinkney, as a commissioner, under the same treaty, will be entitled, on the settlement of his account, to credit for salary, from the 17th of May, 1796, to the 23d day of February, 1804, and for a quarter's salary for the expense of returning. The salary fixed by law is \$6,667 50 per annum.

Mr. Sitgreaves was a commissioner under the 6th article of the same treaty. His compensation commenced on the 20th of November, 1798, and ceased on his return from London, which was, as stated in his letter, in June, 1801. The salary fixed by law, is four thousand four hundred and forty-five dollars per annum. This Board ceased to act on 31st July, 1799; but it was the intention of the then President, that his salary should be continued until his return from London, whither he had been sent on the business of the Board. This intention appears in a letter from the Secretary of State, to Rufus King, Esq. of the 8th of February, 1800, an extract of which is here given: "I give Mr. Sitgreaves a letter, desiring him to draw on you for his expenses, which are to be defrayed by the United States. He will, besides, receive *here*, his salary as a commissioner under the 6th article of the British treaty." Under this authority, Mr. Sitgreaves conceives that he is not liable to account. In his letter to me, he observes, "It must be obvious that such an arrangement excluded all idea of accountability; and that, from the nature of the case, it would be impossible, or, if possible, could not have been expected, that I should keep or render an account or vouchers for the numberless items of detail which enter into the expenses of a gentleman abroad." My view of the circumstances of this case, however, being different from that of Mr. Sitgreaves, I shall persist in requiring an account from him.

Mr. Donaldson was appointed consul of the United States, at Tripoli and Tunis, on the 28th of March, 1795, and on the 10th of July, 1797, he was superseded, in both appointments, by Mr. Cathcart, at the former place, and by Mr. Eaton at the latter. These gentlemen, however, did not sail from the United States until December of the following year.

Mr. Donaldson was also employed in ascertaining and agreeing upon the provisional or preliminary articles of a treaty with Algiers; and he was authorized, under the directions and instructions of Colonel Humphreys, to cause the money appropriated by law for that purpose, to be paid at Algiers, in the manner to be agreed upon. Mr. Donaldson, while employed in these agencies, was allowed his expenses, and one hundred dollars per month. After he was established as consul, he was entitled only to the salary limited by law. I have no information as to the precise time when his consulate ceased, nor has any account of the money paid by him, under the treaty with the regency of Algiers, been rendered.

The amount standing to the debit of Mr. Donaldson, was ascertained upon the settlement of the accounts of bankers and other foreign agents, as particularized below.

Thomas Pinckney, - - - - -	\$444 44
Richard O'Brien, - - - - -	2,000 00
J. and F. Baring & Co. - - - - -	186,405 93
J. Bulkeley & Son, - - - - -	614 27
Parish & Co. - - - - -	75,671 91
H. and A. Fonnereau, - - - - -	140,000 00
J. Dohrman & Co. - - - - -	85,000 00
	490,139 55

The foregoing accounts, except the two first, were settled in the month of August last.

The correspondence with foreign ministers and agents, during their residence abroad, is with the Department of State. Upon their return to the United States, their accounts are usually rendered to that Department, and from thence transmitted to the Treasury Department. Where a balance appears against a foreign minister or agent, upon the books of the treasury, he is called upon by the Comptroller, to render his accounts. There is no fixed period for the performance of this duty. In the exercise of his discretion, the officer must be governed by a knowledge of the character and circumstances of the agent, the nature of his service, and the probability of the result of an adjustment of his accounts. With respect to the practice which has obtained in such cases, it is scarcely necessary to add to what has been premised. A letter from this office, dated 27th of September, 1803, to Colonel Humphreys, affords, I believe, the first instance of a call on a minister of the United States, to render his accounts. A few settled promptly; and an adjustment of the accounts of others, after they were rendered, were unavoidably postponed, for want of the requisite vouchers.

An abstract of the proceedings of the board of commissioners under the 7th article of the treaty of 1794 has been received from the Department of State. By this abstract, it appears that the expenses of the Board, including the salary of the fifth commissioner, amounted to £21,802 17 6 sterling, which sum, at the rate of \$4 44, to the pound sterling, is equal to \$96,804 76.5. The abstract does not show what part of this account was paid by the commissioners of the United States. It appears, however, that, upon a final adjustment of the accounts of the Board, in London, on the 23d of February, 1804, there remained a surplus of £526 4 9, to be returned to the Government of the United States.

I have the honor to be, sir, with great respect, your obedient servant,

G. DUVALL.

JOSIAH QUINCY, Esq.

*In the schedule accompanying the report, as prepared by the Register of the Treasury, *Christopher Gore and others*.

B.

TREASURY DEPARTMENT, *Comptroller's Office*, March 9, 1810.

SIR:

Since my letter of the 27th ultimo to you, Mr. Gore has remitted the balance due from him to the United States. His account is closed on the books of the treasury.

I have the honor to be, with great respect, sir, your obedient servant,

G. DUVALL.

JOSIAH QUINCY, Esq. *Chairman, &c.*

C.

TREASURY DEPARTMENT, *March 14*, 1810.

SIR:

I communicated your letter, of 3d ultimo, to the Comptroller of the Treasury, with a request that he would state those amendments to existing laws, which, in his opinion, would ensure a more regular and punctual adjustment of the accounts of public agents and other receivers of public moneys. I now have the honor to transmit his answer, to which I have nothing to add beyond what I had verbally suggested, viz: An express provision, directing all public agents, or other receivers of public moneys, to render quarterly accounts, if residing within the United States, and at least annually, if abroad. In case of failure, the Comptroller should be authorized, for the reasons he states, to institute suit, without being obliged to give the notice now required by law.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Hon. JOSIAH QUINCY, *Chairman &c. in Congress.*

D.

TREASURY DEPARTMENT, *Comptroller's Office*, March 7, 1810.

SIR:

I have had under consideration that part of your letter of the 6th ultimo, requesting my opinion with respect to any improvement which may be made in the present system regulating the settlement of accounts and collection of the balances due to the United States.

The system appears to me to be susceptible of amendment. The acts which at present exist, and prescribe the rules to be observed, in recovering debts due to the United States, are,

1st. An act for the more effectual recovery of debts due from individuals to the United States, passed on the 3d day of March, 1795; and

2d. An act to provide more effectually for the settlement of accounts between the United States and receivers of public money, passed on the 3d of March, 1797.

The first of those acts, in prescribing the preliminaries to a suit, in order to charge the debtor with the costs, is too circuitous and dilatory in its provisions. Letters by mail are subject to casualties, and the delay or mistake of a day frustrates the whole proceeding. I think it would be sufficient, after a debtor had refused to render his accounts at the period required by law, to fix a stated period, say three months, beyond which he should not be indulged, and if his accounts should not be rendered in that time, he should be liable to pay costs, in case of suit, which it should be the duty of the Comptroller to order, after the expiration of three months.

It should also be made the duty of the accountants of the War and Navy Departments, in all cases where persons entrusted with the expenditure of public money should die, resign, or otherwise cease to be employed, to make, forthwith, a separate report, in each case, to the accounting officers of the treasury, in order that a suit might be directed for the recovery of the balance, after adjustment. If this be prescribed by law as a duty, it would produce a more ready compliance than instructions to the same effect, from this Department.

The great object to be obtained is to prescribe regulations which will coerce public debtors to render their accounts regularly, at stated periods. After they are rendered, there is seldom any difficulty in adjusting them.

The accounts of all foreign ministers, and other agents, should be rendered to the Department of State, and from thence should be transmitted, without delay, to this Department, for settlement.

All which is respectfully submitted.

I have the honor to be, with great respect, sir, your obedient servant,

G. DUVALL.

ALBERT GALLATIN, Esq.

11th CONGRESS.]

No. 321.

[2d Session.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, ON THE 4TH OF APRIL, 1810.

The Secretary of the Treasury, in obedience to the resolution of the Senate, of the second instant, respectfully reports:

That the statement annexed to the report made to the Senate, on the second day of March, 1809, contained all the dividends made by the Bank of the United States, from its establishment to the date of the report, as stated to the treasury by the bank.

That the annexed table, A, being a transcript of the abovementioned statement, with the addition of the dividends made on the first day of July, 1809, and on the first day of January last, embraces not only the ordinary semi-annual dividends of four per cent. but also all the extra dividends which are within the knowledge of this Department, and which, it is believed, have ever been made by the bank; making, in the whole, an average of $8\frac{1}{8}$ per cent. a year.

That there remained to the credit of the bank, after payment of the dividend made on the first day of January last, a surplus of \$409,410, consisting of two items, viz: \$125,000 designated by the name of "General Bank Estate," intended as an offset against the decay and presumed loss, in case of sale, of the real estate of the bank, that estate having been paid for from the capital stock, and not from the profits of the bank; and \$284,410 designated by the name of "Contingent Fund," intended, in the first place, to cover losses arising from bad debts not yet actually lost; and the residue of which, if any, will be applicable to another extra dividend.

That the nominal profit resulting to the bank, from each of its offices of discount and deposite, could not be ascertained without an investigation of all the weekly returns made to this Department; and that there are no returns from which the actual loss sustained by each office can be known.

But that the statement B shows the permanent capital given to each office of discount and deposite; the balance due in account current by the offices, to the bank, (exclusive and in addition to the said permanent capital) on the 27th day of March last; the amount of the notes actually discounted and due to the bank by the last returns,

specifying the amount discounted at Philadelphia, and at each office, respectively, and an estimate of the gross amount of the annual expenses and losses of the bank, including its several offices; by which it appears that the annual expenses, being about \$125,000 a year, the ascertained losses must, in the whole, have amounted to about \$35,000 a year.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, *April 3d, 1810.*

11th CONGRESS.]

No. 322.

[2d SESSION.

REMISSION OF PENALTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 7, 1810.

Mr. NEWTON, from the Committee of Commerce and Manufactures, to whom was referred the petitions of Hugh Smith, Philip and Nicholas Rogers, Jun. John P. White, and William A. Caldwell, William Gaston, James Jones, and James Hathaway, made the following report:

Hugh Smith, a merchant of Alexandria, District of Columbia, states that, on the 13th of August, 1808, he became bound with McClanahan, in a bond to the United States, in the penalty of sixteen thousand six hundred and ninety-six dollars, conditioned that Andrew Stewart, master of the Brig Catharine, should not, in transporting a cargo of flour to Boston, violate the embargo laws. The petitioner is a glass and china merchant, no otherwise engaged in navigation than barely to import such articles as above stated; and in a few instances, to ship tobacco on commission. During the operation of the embargo, he made no shipments, either directly or indirectly.

His acquaintance with McClanahan was in consequence of an intimacy between their wives, previous to marriage; McClanahan, at the time the petitioner became his security, bore a good character.

The petitioner being sick, and confined to his house, did not learn, until a considerable time after signing the bond, that a few persons who attended to the manner of shipping the cargo, and the supply of provisions, and water taken on board the Brig Catharine, suspected the honesty and fair intentions of McClanahan.

Capt. Stewart, instead of going to Boston, went to Barbadoes, at which island he arrived, as the petitioner has every reason to believe, with the connivance of McClanahan, on the 15th November, 1808.

As soon as the petitioner was informed of this last fact, he wrote to the Secretary of the Treasury, stating the facts to him. The Secretary of the Treasury, in his own hand writing, makes the following note on the back of the petition. "I have no doubt of the innocence of the petitioner. The District Attorney of Virginia has been instructed to prosecute McClanahan, but he is not supposed to be able to pay the penalty. It is true, as stated by the petitioner, that he gave the first information to this Department, and wrote the several letters mentioned in the petition."

The petitioner, on the 31st of March, 1810, presented to the House a copy of the certificate, signed by James Sullivan, Governor of Massachusetts, addressed to the collector of the port of Alexandria, in the District of Columbia, certifying that 1400 barrels of flour were wanting for supplies, to which reference is made for further particulars. The petitioner does not, in his petition, state that he was induced to become McClanahan's security in consequence of the Governor's certificate. The petitioner sustains a good character.

Henry Woodward, a merchant residing at Tappahannock, in the State of Virginia, states that he has never been engaged in navigation further than to ship the produce of the country to merchants residing in the United States, for the purpose of making remittances. That, in consequence of a letter addressed to him by Samuel Lyon, of Baltimore, he became security for Joseph Shutz, in the bond executed by Thomas West and Joseph Shutz, to the United States, in the penalty of sixteen thousand dollars, on the 10th of January, 1809, conditioned that the schooner Jane, of Baltimore, of which the said Thomas West was master, should not proceed to any foreign port or place, and that the cargo should be landed in some port of the United States.

The memorialist was influenced, in a great measure, to become security to the bond, in consequence of seeing a letter, addressed to the collector of Tappahannock, by William S. Stone, of Fredericksburg, recommending the said Shutz as a person worthy of confidence. Samuel Lyon has since failed.

The cargo was not landed in any port or place of the United States. The petitioner's character is well supported, and the committee entertain no doubts as to the truth of the facts set forth in the petition. The Secretary of the Treasury makes the following note on the back of the petition: "I have no doubt of the innocence of the petitioner." Several letters accompany the memorial, to which the committee beg leave to refer.

Philip Rogers, and Nicholas Rogers, Jun. merchants, of the city of Baltimore, state, that they were joint owners of one half of the brig Sally, whereof a certain Henry Travers was captain, and also half owner; that the said brig sailed on the 2d of September, 1808, from the port of Baltimore, to the port of Charleston, South Carolina, and conditionally to the port of Savannah, Georgia, with a cargo of flour, and some other articles, partly shipped by Philip Rogers and the said Travers.

It is also stated by Nicholas Rogers, that he owned but a fourth part of the said brig, as a donation from his father, Philip Rogers; that he owned no part of the cargo; that he was absent when the said brig was loaded for Charleston; and that he left the sole management of this matter to his father, to whom the greatest part of the cargo belonged. That Capt. Travers, previous to the sailing of the said brig, received from Philip Rogers, by a letter, dated 1st September, 1808, positive instructions to dispose of the flour, &c. at Charleston or Savannah, all which will appear by reference to the letter contained in the body of the petition. The petitioners further state, that the said Travers, on arrival at Charleston, sold a very small part of the cargo there; that he proceeded, thence, to Savannah, first giving, as his securities, Messrs. John P. White and William A. Caldwell, in conformity to law. The petitioners state that the said Travers, instead of going to Savannah, proceeded to Kingston, in Jamaica, in violation of law, and the positive instructions given to him by Philip Rogers. The last mentioned petitioner states, that he received from Capt. Travers, for the sale of the brig's cargo at Kingston, not more than \$3,304, the said Travers retaining all the profits for himself. The petitioners state that they are sued for \$9,120, in the district court of Maryland, and Caldwell & White, in that of South Carolina, and also, that they hold themselves bound, in case of recovery against Caldwell & White, to indemnify them. The petitioners further state, that Capt. Travers is dead, leaving property to the amount only of two thousand dollars. They pray that the penalties incurred by them and Caldwell & White, through the misconduct of the said Travers, may be remitted.

The petition of John P. White and William A. Caldwell is the same case with the one now stated, as reference to the petition will show.

The Secretary of the Treasury states, in a note on the petition, the following remarks: "Judge states the facts to be true. Observe, however, that Travers, who violated the law, was employed by the petitioners as their captain."

William Gaston, a citizen of the State of Georgia, states, that, in the course of trade and mercantile concerns, he became acquainted with Robert Charles, of New York, owner of the brig Eliza and Mary; that the said brig, consigned to the petitioner, had made several voyages from Georgia to New York, loaded by the petitioner. That, in January, 1809, the said brig arrived in the port of Savannah, having the persons of Robert Charles, the owner, and Abraham Grimshaw, James Hutchinson, and Joseph Musgrove, passengers on board; Abraham Hall being the master. Grimshaw, Hutchinson, and Musgrove, were separately introduced to the petitioner, and recommended, as strangers, to him. These last mentioned persons agreed to load, with cotton, the said brig or New York; while loading, the petitioner received from Augusta, 54 bales of cotton, with directions to sell or ship the same to New York; the price being low at Savannah, he shipped the same on board the said brig. On the 21st of January, 1809, the said brig was ready for sea, having on board 301 bales of cotton—247 the property of Grimshaw, Hutchinson, and Musgrove, and 54 that of Messrs. Phelps and Howard, of Augusta. The petitioner states that, at the instance of the owner and these men, to-wit, Grimshaw, Hutchinson, and Musgrove, he went to the custom house, and cleared the said brig, and gave bonds, together with Uel Merrill, a merchant of the said city, as his security, to which bonds the master of the said brig was also a party, for the safe arrival of the said brig in New York, dangers of the sea excepted, with a full, fair, and perfect confidence, that the real destination was for that port, and that the said brig was prosecuting

a lawful voyage. On the 24th of January, 1809, the said brig proceeded to sea, having on board her owner and Musgrove, leaving Grimshaw and Hutchinson in Savannah. On the 25th, the day following the sailing of the brig, the two last mentioned persons called on the petitioner, and purchased the 54 bales of cotton then on board the said brig, belonging to Phelps and Howard, offering therefor, a price equal to that of the New York market, on a credit, which offer the petitioner accepted. On the same day, Grimshaw and Hutchinson took their passage for New York, and proceeded down the river to sea; previous to brig's sailing, Grimshaw, Hutchinson, and Musgrove, had engaged with the petitioner for the storage of 300 bales of cotton, to furnish a cargo for the said brig, on her return to Savannah. Immediately after the departure of Grimshaw and Hutchinson, the petitioner was informed of some things that excited suspicion, which, on examination, he found too well supported; he immediately applied to counsel for advice, and as the vessel on board of which Grimshaw and Hutchinson had embarked, was detained by contrary winds, he took out process, and had the same served, at the suit of the United States, for an infraction of the embargo laws. The petitioner acknowledges that the said brig went to Liverpool, which fact, as soon as it was ascertained, he made collector acquainted with—was always ready to give any evidence in his power to bring the guilty to punishment. The petitioner sustains a fair and good character. The Secretary of the Treasury makes the following note on the petition: "The Judge does not positively state the facts to be true; and although he inclines, from Gaston's character, to believe him innocent, he alleges some reasons why the petitioner ought not to become security."

The petition of James Jones, of Hertford county, in the State of North Carolina, and of James Hathaway, the elder, of Edenton, in the same State, states that, sometime in the month of November, 18—, a schooner, called the Federal Jack, arrived at Edenton, from Boston; she was commanded by Joseph Lewis, who appeared to be an owner or part owner; that her company was made up of a certain Bordin Turner and — Young, and two negroes. Captain Lewis brought a certificate signed by the deputy collector and deputy naval officer of Boston, endorsed upon one of the ships papers, in the following words: "It is the intention of the owners of this vessel to bring back a cargo of pitch, tar, and turpentine, rice and corn, for the consumption and use of this district." The petitioners state that, after purchasing a cargo, Capt. Lewis being in apparent distress, as he could not sail, on account of having no person to become his security, that the petitioners, after much persuasion and difficulty, became security for relanding the cargo in some port or place in the United States, on the following conditions: that the persons belonging to the said schooner should leave her, and put on board another captain and company; this arrangement was acceded to, and the vessel sailed, in the month of January, 18—, for Boston, under the command of Daniel S. Brooks, with Preston Hathaway, and the said two negroes, for her company; Lewis, Turner, and Young, departed from Edenton about the same time, intending, as they pretended, to travel to Boston by land. The petitioners became bound, in a bond to the United States, in the sum of \$9,384, as securities for the re-landing the cargo in the United States.

Young, Turner, and Lewis, instead of proceeding on to Boston by land, went to Washington, North Carolina, and thence to Ocracock, and on the arrival of the Federal Jack at the inlet, went on board of her. The petitioners state that Capt. Brooks being apprehensive of those persons, he informed the captain of the revenue cutter at that place, that he believed it was the intention of Young, Turner, and Lewis, to go off with the vessel and cargo, in violation of the embargo laws, and had them removed from the schooner; it is also stated, that, while the vessel was passing the bar, and under the direction of the pilot, and while Capt. Brooks was engaged in the cabin, writing, Turner and Young got again on board the Federal Jack, and took the schooner from him. Capt. Brooks was thereupon compelled to leave the vessel, in the pilot boat, and the said Turner and Young, retaining Preston Hathaway and the two negroes, proceeded on their voyage. The petitioners state that they have heard nothing of the said schooner; that they are sued for the penalty of the bond, and pray to have the same remitted. The Secretary of the Treasury says, in a note on the petition, "the collector states the facts to be true."

The committee are of opinion that the reasoning in support of remitting the penalty incurred by Anthony Buck is infinitely more applicable to the petitioner, Hugh Smith, although, in support of his case, he did not rely on the Governor's certificate that flour was wanting for the consumption of Boston, as an inducement to his becoming the security of McClanahan. The committee, induced by the same reasons which they urged in support of the case of Anthony Buck, to which they beg leave to refer, (a.) ask permission respectfully to submit the following resolution:

Resolved, That the prayer of the petitioner, Hugh Smith, is reasonable, and ought to be granted.

The committee have given to the cases of Henley Woodward, Philip Rogers, and Nicholas Rogers, Jun. John P. White and William A. Caldwell, William Gaston, and of James Jones and James Hathaway, due attention and consideration.

The committee cannot perceive, in the evidence offered in support of the above cases, any thing peculiarly hard, or that the petitioners have, by any act of the Government, been induced to do a thing, which the exercise of their own judgments, without its interference, would have resisted. If the committee had indulged a disposition of bringing into disrepute penal laws; if they were conscious that no time nor occasion could justify a resort to them for salutary purposes, or their enforcement, when enacted, they would not fail to seize the present opportunity of making a stand against this branch of jurisprudence; but, as they are convinced that this Government cannot be supported without the aid of penal statutes, they are clearly of opinion that such laws, when passed, should be enforced. They therefore respectfully submit the following resolution:

Resolved, That the petitioners have leave to withdraw their petitions.

[(a.) NOTE.—The following is the report, in the case of ANTHONY BUCK, referred to in the foregoing:]

The Committee of Commerce and Manufactures, to whom was referred the petition of Anthony Buck, of Fredericksburg, in Virginia, respectfully submit the following report:

Anthony Buck and a certain James A. Stuart, in 1808, became, jointly and severally, bound in a bond to the United States, the condition of which was, that James A. Stuart, master of the Sally Barker Windsor, of Hingham, in Massachusetts, should proceed from Fredericksburg to Hingham, with a cargo of flour, &c.; and, also, that the said Stuart should, in no instance, violate the provisions of the embargo laws. The following statement of facts is made out from documents in the possession of the committee.

To prevent evasions and violations of the embargo laws, the President was invested with powers to limit the shipment of provisions to certain places, in larger quantities than was necessary for the supply thereof. The letter of the President to certain Governors, of 6th May, 1808, is as follows: "The evasions of the preceding embargo laws went so far towards defeating their objects, and chiefly by vessels clearing out coastwise, that Congress, by their act of April 25th, authorized the absolute detention of all vessels bound coastwise, with cargoes exciting suspicions of an intention to evade those laws. There being few towns on our sea coast which cannot be supplied with flour from their interior country, shipments of flour become generally suspicious, and proper subjects of detention. — is one of the few places on our sea board, which needs supplies of flour by sea, for its own consumption. That it may not suffer by the cautions we are obliged to use, I request of your Excellency, whenever you deem it necessary, that your present, or any future stock should be enlarged, to take the trouble of giving your certificate in favor of any merchant in whom you have confidence, directed to the collector of any port usually exporting flour, from which he may choose to bring it, for any quantity which you may deem necessary for consumption, beyond your interior supplies, enclosing to the Secretary of the Treasury, at the same time, a duplicate of the certificate, as a check on the falsification of your signature. In this way we may ensure a supply of the real wants of your citizens, and, at the same time, prevent those wants from being made a cover for the crimes against their country, which unprincipled adventurers are in the habit of committing. I trust, too, that your Excellency will find an apology for

TREASURY DEPARTMENT, *October 24, 1808.*

SIR:

Your letter of 22d instant has been laid before the President. He does not think it proper to direct the collector of Tappahannock to deviate, in this instance, from the general rules by which he has heretofore been governed.

I am, very respectfully, &c.

ALBERT GALLATIN.

Mr. ANTHONY G. BUCK, *Fredericksburg.*

TREASURY DEPARTMENT, *October 24th, 1808.*

SIR:

I enclose a certificate of the selectmen of Hingham, directed to you, and copy of a letter written this day to Mr. Buck, of Fredericksburg, who had transmitted that paper. I do not know on what grounds that paper was issued, and if it shall be found necessary to ascertain the extent of shipments of flour and corn requisite for the consumption of Massachusetts, other steps will be taken for that purpose.

I am, very respectfully, &c.

ALBERT GALLATIN.

LAURENCE MUSE, Esq. *Collector, Tappahannock.*

11th CONGRESS.]

No. 323.

[2d SESSION.

REVENUE BONDS OUTSTANDING.

COMMUNICATED TO THE SENATE, APRIL 17, 1810.

TREASURY DEPARTMENT, *April 16, 1810.*

SIR:

I have the honor, in obedience to the resolution of the Senate, of the 13th instant, to transmit a statement of the outstanding revenue bonds, amounting, on the first day of January last, to \$9,600,000.

But in that are included all the bad debts which have accrued on revenue bonds, from the commencement of this Government to that day. These, together with the debentures issued prior to the first day of January last, and remaining unpaid on that day, are estimated at one million of dollars, at least, and must be deducted from that nominal amount. The expenses of collection may be estimated at about four hundred thousand dollars.

The balance remaining in the treasury on the first day of January last, amounted to \$3,817,976 54.

It may not be improper to add, that the estimates of the probable receipts of this year, as stated in the annual report made at the commencement of the present session of Congress, will not, so far as is now known, differ materially from the actual receipts, unless the exportations of foreign produce should exceed what had been presumed. The total amount of debentures payable in the year 1810, had been there estimated at two millions of dollars; and those paid before the first of April, amounted, already, to \$1,360,000.

I have the honor to be, &c.

ALBERT GALLATIN.

The Honorable the PRESIDENT *of the Senate.*

Statement of bonds for duties on merchandise imported, outstanding at the several custom houses on the 1st January, 1810, taken from the accounts current of the collectors, as rendered to the treasury.

[2d SESSION.]

RECEIPTS AND PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 17, 1810.

TREASURY DEPARTMENT, April 16th, 1810.

SIR:

I have the honor, in obedience to the resolution of the House, of the 11th instant, to transmit a statement of the annual receipts into the treasury, from the 4th day of March, 1789, to the 31st day of December, 1809; and a statement of the amount of debt annually incurred and reimbursed during the same period.

I have the honor to be, with great respect, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

Statement of the annual receipts into the Treasury, from the 4th March, 1789, to 31st December, 1809.

Years,	Customs,	Internal Revenue.	Direct Tax,	Public Lands.	Miscellaneous.	Loans.	Total.
From 4th March, 1789, (to 31st Dec. 1791	4,399,472 99	- -	- -	- -	10,478 10	361,391 34	4,771,342 43

MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 19, 1810.

TREASURY DEPARTMENT, April 17, 1810.

SIR:

In obedience to the resolution of the House, I have the honor to transmit a report, in part, on the subject of American manufactures.

Some important information has been obtained, but is, in general, partial and defective; and it would have been desirable that the report might have been delayed till the next session.

Permit me to observe, that the approaching census might afford an opportunity to obtain detailed and correct information on that subject, provided that the deputy marshals were directed by Congress to collect it, and to make returns in such form as would be prescribed.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Honorable the SPEAKER of the House of Representatives.

The Secretary of the Treasury, in obedience to the resolution of the House of Representatives, respectfully submits the following report, in part, on the subject of domestic manufactures:

The following manufactures are carried on to an extent which may be considered adequate to the consumption of the United States, the foreign articles annually imported being less in value than those of American manufacture belonging to the same general class, which are annually exported, viz:

Manufactures of wood, or of which wood is the principal material.

Leather, and manufactures of leather.

Soap, and tallow candles.

Spermaceti oil and candles.

Flaxseed oil.

Refined sugar.

Coarse earthen ware.

Snuff, chocolate, hair powder, and mustard.

The following branches are firmly established, supplying, in several instances, the greater, and, in all, a considerable, part of the consumption of the United States, viz:

Iron, and manufactures of iron.

Manufactures of cotton, wool, and flax.

Hats.

Paper, printing types, printed books, playing cards.

Spirituous and malt liquors.

Several manufactures of hemp.

Gunpowder.

Window glass.

Jewelry and clocks.

Several manufactures of lead.

Straw bonnets and hats.

Wax candles.

Progress has also been made in the following branches, viz:

Paints and colors, several chemical preparations and medicinal drugs, salt, manufactures of copper and brass, japanned and plated ware, calico printing, queens and other earthen and glass wares, &c.

Many articles, respecting which no information has been received, are undoubtedly omitted; and the substance of the information obtained, on the most important branches, is comprehended under the following heads:

Wood, and Manufactures of Wood.

All the branches of this manufacture are carried to a high degree of perfection, supply the whole demand of the United States, and consist principally of cabinet ware, and other household furniture, coaches and carriages, either for pleasure or transportation, and ship building.

The ships and vessels, above twenty tons burthen, built in the United States during the years 1801 to 1807, measured 774,922 tons, making, on an average, about 110,000 tons a year, and worth more than six millions of dollars. About two thirds were registered for the foreign trade, and the remainder licensed for the coasting trade and fisheries.

Of the other branches, no particular account can be given. But the annual exportations of furniture and carriages amount to 170,000 dollars. The value of the whole, including ship building, cannot be less than twenty millions of dollars a year.

Under this head may also be mentioned pot and pearl ash, of which, besides supplying the internal demand, 7,400 tons are annually exported.

Leather, and Manufactures of Leather.

Tanneries are established in every part of the United States, some of them on a very large scale—the capital employed in a single establishment amounting to one hundred thousand dollars. A few hides are exported, and it is stated that one-third of those used in the great tanneries of the Atlantic States are imported from Spanish America. Some superior or particular kinds of English leather and morocco are still imported; but about 350,000 pounds* of American leather are annually exported. The bark is abundant and cheap; and it seems, by the annexed communication, marked A, that hides cost, in America, 5½ cents, and in England, seven cents a pound; that the bark used for tanning, costs, in England, nearly as much as the hides, and in America not one-tenth part of that sum. It is, at the same time, acknowledged, that much American leather is brought to market, of an inferior quality, and that better is generally made in the middle than in the Northern or Southern States. The tanneries of the State of Delaware employ, collectively, a capital of one hundred and twenty thousand dollars, and ninety workmen, and make, annually, one hundred thousand dollars' worth of leather. Those of Baltimore amount to twenty-two, seventeen of which have, together, a capital of 187,000 dollars, and tan, annually, 19,000 hides, and 25,000 calf skins.

Morocco is also made in several places, partly from imported goat skins, and principally from sheep skins. And it may be proper here to add, that deer skins, which form an article of exportation, are dressed and manufactured in the United States, to the amount required for the consumption of the country.

The principal manufactures of leather are those of shoes and boots, harness and saddles. Some inconsiderable quantities of the two last articles are both imported and exported. The annual importation of foreign boots and shoes, amounts to 3,250 pair boots and 59,000 pair of shoes, principally kid and morocco. The annual exportation of the same articles, of American manufacture, to 8,500 pair of boots and 127,000 pair of shoes. The shoe manufactures of New Jersey are extensive. That of Lynn, in Massachusetts, makes 100,000 pair of women's shoes annually.

The value of all the articles annually manufactured in the United States, which are embraced under this head, (leather) may be estimated at twenty millions of dollars.

Soap, and Tallow Candles.

A great portion of the soap and candles used in the United States is a family manufacture. But there are also several establishments, on an extensive scale, in all the large cities, and several other places. Those of the village of Roxbury, near Boston, employ, alone, a capital of one hundred thousand dollars, and make, annually, 370,000 pounds candles, 380,000 pounds brown soap, and 50,000 pounds windsor and fancy soap, with a profit, it is said, of 15 per centum on the capital employed.

The annual importations of foreign manufacture, are, candles, 158,000 pounds, soap, 470,000 pounds.

The annual exportations of domestic manufacture, are, candles, 1,775,000 pounds, soap, 2,220,000 pounds.

The annual value manufactured in the United States, and including the quantity made in private families, for their own use, cannot be estimated at less than eight millions of dollars.

Spermaceti Oil and Candles.

The establishments for this manufacture are at Nantucket and New Bedford, in Massachusetts, and at Hudson, in New York. Besides supplying the whole of the domestic consumption, they furnished, annually, for exportation to foreign countries, 230,000 pounds of candles, and 44,000 gallons of oil. The whole quantity, annually manufactured, amounted to about 300,000 dollars. But the exclusion from foreign markets has lately affected the manufacture.

Refined Sugar.

The annual importations of foreign refined sugar amount, for the years 1803 to 1807, to 47,000 pounds.

The annual exportation of American refined sugar, amount, for the same years, to 150,000 pounds.

The then existing duty was, in the year 1801, collected on 3,827,000 pounds; and as the manufacture has kept pace with the increase of population, the quantity now annually made may be estimated at five millions of pounds, worth one million of dollars. The capital employed is stated at three millions and a half of dollars; and as the establishments have increased in number, some of them have declined in business. It is believed that, if a drawback, equivalent to the duty paid on the importation of the brown sugar used in the refined sugar exported, was again allowed, the foreign demand, particularly of Russia, would give a great extension to this branch. A special report has been made on that subject to the committee of commerce and manufactures.

*Unless otherwise stated, the importations and exportations are in this report taken on the average of the years 1806 and 1807.

COTTON, WOOL, AND FLAX.

I. *Spinning Mills and Manufacturing Establishments.*

The first cotton mill was erected in the State of Rhode Island, in the year 1791; another, in the same State, in the year 1795; and two more, in the State of Massachusetts, in the years 1803 and 1804. During the three succeeding years, ten more were erected or commenced, in Rhode Island, and one in Connecticut; making, altogether, fifteen mills erected before the year 1808, working, at that time, about eight thousand spindles, and producing about three hundred thousand pounds of yarn a year.

Returns have been received of eighty-seven mills, which were erected at the end of the year 1809; sixty-two of which (forty-eight, water, and fourteen, horse, mills) were in operation, and worked, at that time, thirty-one thousand spindles. The other twenty-five will all be in operation in the course of this year, and, together with the former ones, (almost all of which are increasing their machinery) will, by the estimate received, work more than eighty thousand spindles at the commencement of the year 1811.

The capital required to carry on the manufacture, on the best terms, is estimated at the rate of one hundred dollars for each spindle; including both the fixed capital applied to the purchase of the mill-seats, and to the construction of the mills and machinery, and that employed in wages, repairs, raw materials, goods on hand, and contingencies. But it is believed that no more than at the rate of sixty dollars for each spindle is generally actually employed. Forty-five pounds of cotton, worth about 20 cents a pound, are, on an average, annually used for each spindle; and these produce about thirty-six pounds of yarn, of different qualities, worth, on an average, one dollar and twelve and a half cents a pound. Eight hundred spindles employ forty persons, viz: five men and thirty-five women and children. On those data, the general results for the year 1811, are estimated in the following table:

Mills.	Spindles.	Capital employed.	Cotton used.		Yarn spun.		Persons employed.		
			No.	Dollars.	Pounds.	Value.	Pounds.	Value.	Men.
87	80,000	4,800,000	3,600,000	720,000	2,880,000	3,240,000	500	3,500	4,000

The increase of carding and spinning of cotton by machinery, in establishments for that purpose, and exclusively of that done in private families, has, therefore, been fourfold, during the two last years, and will have been tenfold in three years. The table B shews the situation and extent of those several mills, and that, although the greater number is in the vicinity of Providence, in Rhode Island, they are scattered and extending throughout all the States. Those situated within thirty miles of Providence, are exhibited in the table C, and the statement marked D gives the details of one of the establishments, as furnished by the proprietors.

The seventeen mills in the State of Rhode Island, included in the table C, which were in operation, and worked 14,290 spindles in the year 1809, are also stated to have used, during that year, 640,000 pounds of cotton, which produced 510,000 pounds of yarn; of which, 124,000 pounds were sold for thread and knitting; 200,000 pounds were used in manufactures attached to, or in the vicinity of, the mills; and the residue was either sold for wick, and for the use of family manufactures, or exported to other parts. Eleven hundred looms are said to be employed in weaving the yarn spun by those mills into goods, principally of the following descriptions, viz:

- Bed ticking, sold at 55 to 90 cents per yard;
- Stripes and checks, sold at 30 to 42 cents per yard;
- Ginghams, sold at 40 to 50 cents per yard;
- Cloth, for shirts and sheeting, sold at 35 to 75 cents per yard;
- Counterpanes, at 8 dollars each.

Those several goods are already equal, in appearance, to the English imported articles of the same description, and superior in durability; and the *finishing* is still improving. The proportion of fine yarns is also increasing.

The same articles are manufactured in several other places, and particularly at Philadelphia, where are also made, from the same material, webbing and coach laces, (which articles have also excluded, or will soon exclude, similar foreign importations) table and other diaper cloth, jeans, vest patterns, cotton kerseymers and blankets. The manufacture of fustians, cords, and velvet, has also been commenced in the interior and western parts of Pennsylvania, and in Kentucky.

Some of the mills, above mentioned, are also employed in carding and spinning wool, though not to a considerable amount. But almost the whole of that material is spun and wove in private families; and there are yet but few establishments for the manufacture of woollen cloths. Some information has, however, been received, respecting fourteen of these, as stated in table E, manufacturing, each, on an average, ten thousand yards of cloth a year, worth from one to ten dollars a yard. It is believed that there are others, from which no information has been obtained; and it is known that several establishments, on a smaller scale, exist in Philadelphia, Baltimore, and some other places. All those cloths, as well as those manufactured in private families, are generally superior in quality, though somewhat inferior in appearance, to imported cloths of the same price. The principal obstacle to the extension of the manufacture is the want of wool, which is still deficient, both in quality and quantity. But those defects are daily and rapidly lessened, by the introduction of sheep of the merino and other superior breeds; by the great demand for the article; and by the attention now every where paid by farmers to the increase and improvement of their flocks.

Manufacturing establishments, for spinning and weaving flax, are yet but few. In the State of New York, there is one, which employs a capital of 18,000 dollars, and twenty-six persons, and in which about ninety thousand pounds of flax are annually spun and wove, into canvass and other coarse linen. Information has been received respecting two, in the vicinity of Philadelphia, one of which produces, annually, 72,000 yards of canvass, made of flax and cotton; in the other, the flax is both hackled and spun by machinery; thirty looms are employed; and it is said that 500,000 yards of cotton bagging, sail cloth, and coarse linen, may be made annually.

Hosiery may also be considered as almost exclusively a household manufacture. That of Germantown has declined, and it does not appear to have been attempted on a large scale in other places. There are, however, some exceptions; and it is stated that the island of Martha's Vineyard exports, annually, nine thousand pair of stockings.

II. *Household Manufactures.*

But by far the greater part of the goods made of those materials, (cotton, flax, and wool,) are manufactured in private families, mostly for their own use, and partly for sale. They consist principally of coarse cloth, flannel, cotton stuffs, and stripes of every description, linen, and mixtures of wool with flax or cotton. The information received from every State, and from more than sixty different places, concurs in establishing the fact of an extraordinary increase, during the two last years, and in rendering it probable that about two-thirds of the clothing, including hosiery, and of the house and table linen, worn and used by the inhabitants of the United States, who do not reside in cities, is the product of family manufactures.

In the Eastern and Middle States, carding machines, worked by water, are every where established, and they are rapidly extending southwardly and westwardly. Jennies, other family spinning machines, and flying shuttles, are also introduced in many places; and as many fulling mills are erected as are required for finishing all the cloth which is woven in private families. (See note F and statement G.)

Difficult as it is to form an estimate, it is inferred, from a comparison of all the facts which have been communicated, with the population of the United States, (estimated at six millions of white and twelve hundred thousand black persons) that the value of all the goods made of cotton, wool, and flax, which are annually manufactured in the United States, exceeds forty millions of dollars.

The manufacture of cards and wire is intimately connected with this part of the subject. Whittemore's machine for making cards has completely excluded foreign importations of that article. It will appear, by the communication H, that the capital employed in that branch may be estimated at 200,000 dollars; and that the annual consumption amounted; till lately, to twenty thousand dozen pair of hand cards, and twenty thousand square feet of cards for machines, worth together about 200,000 dollars. The demand of last year was double that of 1808, and is still rapidly increasing. But the wire itself is altogether imported, and a very serious inconveniency might arise from any regulation which would check or prevent the exportation from foreign countries. It appears, however, by the communication I, that the manufacture may, and would be, immediately established, so as to supply the demand both for cards and other objects, provided the same duty was imposed on wire, now imported duty free, which is laid on other articles made of the same material. The whole amount of wire, annually used for cards, does not at present exceed twenty-five tons, worth about 40,000 dollars.

Hats.

The annual importations of foreign hats amount to	- - - - -	\$350,000 00
The annual exportation of American hats to	- - - - -	100,000 00

The domestic manufacture is, therefore, nearly equal to the home consumption. The number made in the State of Massachusetts is estimated, by the hat company of Boston, at four times the number required for the consumption of the State: and from other information it would appear, that, in that State alone, the capital applied to that branch is near three millions of dollars, the number of persons employed about four thousand, and the number of hats annually made, 1,550,000; of which, 1,150,000 are fine hats, worth, on an average, four dollars each, and 400,000 felt hats, worth one dollar each. That the manufacture is still profitable, appears from a late establishment on Charles river, calculated to make, annually, 35,000 hats, at five dollars a piece, and to employ 150 workmen.

The quantity made in Rhode Island, is stated at 50,000, worth \$5 each, exclusively of felt hats. Connecticut and New York make more than is necessary for their consumption; the largest establishment being that of Danbury, where 200 persons are employed, and to the amount of 130,000 dollars annually manufactured. In Vermont, the manufacture supplies the consumption. It is stated by the hatters of Philadelphia, that 92,000 hats, worth five dollars each, are annually made there, in addition to which, 50,000 *country* hats, worth three dollars each, are annually sold in the city. In various quarters, the scarcity of wool is complained of, as preventing the making of a sufficient quantity of coarse hats. From all the information which has been received, it is believed that the value of all the hats, annually made in the United States, is near ten millions of dollars. (See note K.)

Paper and Printing.

Some foreign paper is still imported, but the greater part of the consumption is of American manufacture; and it is believed that, if sufficient attention was every where paid to the preservation of rags, a quantity equal to the demand would be made in the United States. Paper mills are erected in every part of the Union. There are twenty one in the States of New Hampshire, Vermont, Rhode Island, and Delaware, alone, and ten in only five counties of the States of New York and Maryland. Eleven of those mills employ a capital of two hundred thousand dollars, and 180 workmen, and make, annually, 150,000 dollars' worth of paper.

Printing is carried on to an extent commensurate with the demand. Exclusively of the numerous newspapers, which alone form a considerable item in value, all the books for which there is an adequate number of purchasers, are printed in the United States. But sufficient data have not been obtained to form an estimate of the annual aggregate value of the paper made, and of the printing and book binding executed in the United States, other than what may be inferred from the population. The manufactures of hanging paper, and of playing cards, are also extensive; and that of printing types, of which there are two establishments, the principal at Philadelphia, and another at Baltimore, was fully adequate to the demand, but has lately been affected by the want of regulus of antimony.

Manufactures of Hemp.

The annual importations of foreign hemp, amounted to 6,200 tons. But the interruption of commerce has greatly promoted the cultivation of that article in Massachusetts, New York, Kentucky, and several other places; and it is believed that a sufficient quantity will, in a short time, be produced in the United States.

The manufacture of ropes, cables, and cordage, of every description, may be considered as equal to the demand, the exportations of American manufacture, for 1806 and 1807, having exceeded the average of 6,500 quintals, and the importations from foreign ports, having fallen short of 4,200 ditto.

Exclusively of the rope walks in all the sea ports, there are fifteen in Kentucky alone, which consume about one thousand tons of hemp a year; and six new works were in a state of preparation for the present year.

The manufactures of sail duck, formerly established in Rhode Island, in Connecticut, and at Salem, have been abandoned or suspended, partly on account of the high price of hemp, and partly for want of capital. Some is still made; and the species of canvass, commonly called cotton bagging, is now manufactured, in various places, on an extensive scale. An establishment at Philadelphia, employs eight looms, and can make, annually, 17,000 yards of duck, or 45,000 yards of cotton bagging. There are thirteen manufactures in Kentucky, and two in West Tennessee. The five at or near Lexington, make annually 250,000 yards of duck and cotton bagging.

Spirituos and Malt Liquors.

The duty on licensed stills, amounted, in 1801, to \$372,000, and, on account of omissions, might be estimated at \$450,000. As the duty actually paid on the spirits distilled in those stills, did not, on an average, exceed five cents per gallon, the quantity of spirits distilled during that year, from grain and fruit, (exclusively of the large gin distilleries in cities) must have amounted to about 9,000,000 of gallons, and may, at present, the manufacturing having increased, at least, in the same ratio as the population, be estimated at twelve millions of gallons. To this must be added about three millions of gallons of gin and rum, distilled in cities; making an aggregate of fifteen millions of gallons.

The importations of foreign spirits, are, nevertheless, very considerable, having amounted, during the years 1806 and 1807, to 9,750,000 gallons a year, and yielding a nett annual revenue to the United States, of \$2,865,000.

The quantity of malt liquors made in the United States is nearly equal to their consumption.

The annual foreign importations amount only to	- - - - -	185,000 gallons.
--	-----------	------------------

And the annual exportations of American beer and <i>cider</i> to	- - - - -	187,000 do.
--	-----------	-------------

But the amount actually made, cannot be correctly stated. It has been said, that the breweries of Philadelphia consumed, annually, 150,000 bushels of malt; and, exclusively of the numerous establishments on a smaller scale, dispersed throughout the country, extensive breweries are known to exist in New York and Baltimore.

From those data, the aggregate value of spirituous and malt liquors, annually made in the United States, cannot be estimated at less than ten millions of dollars.

Iron, and Manufactures of Iron.

The information received respecting that important branch is very imperfect. It is, however, well known, that iron ore abounds, and that numerous furnaces and forges are erected, throughout the United States. They supply a sufficient quantity of hollow ware, and of castings, of every description; but about 4,500 tons of bar iron are annu-

ally imported from Russia, and probably, an equal quantity from Sweden and England together. A vague estimate states the amount of bar iron annually used in the United States, at fifty thousand tons, which would leave about forty thousand for that of American manufacture. Although a great proportion of the ore found in Vermont, Pennsylvania, Maryland, and Virginia, be of a superior quality, and some of the iron manufactured there, equal to any imported, it is to be regretted, that, from the demand, and from want of proper attention in the manufacture, much inferior American iron is brought to market. On that account, the want of the ordinary supply of Russian iron has been felt in some of the slitting and rolling mills. But, whilst a reduction of the duty on Russian iron is asked from several quarters, it is generally stated that a high or prohibitory duty on English bar, slit, rolled, and sheet iron, would be beneficial; that which is usually imported on account of its cheapness, being made with pit coal, and of a very inferior quality.

The annual importations of sheet, slit, and hoop iron, amount to five hundred and sixty-five tons; and the quantity rolled and slit in the United States, is estimated at seven thousand tons. In the State of Massachusetts alone, are found thirteen rolling and slitting mills, in which about 3,500 tons of bar iron, principally from Russia, are annually rolled or slit. A portion is used for sheet iron and nail rods for wrought nails; but two-thirds of the whole quantity of bar iron flattened by machinery in the United States, is used in the manufacture of *cut nails*, which has now extended throughout the whole country, and, being altogether an American invention, substituting machinery to manual labor, deserves particular notice. The details on that subject will be found in the communications L and M; and it will be sufficient here to state, that the annual product of that branch alone, may be estimated at twelve hundred thousand dollars, and that, exclusively of the saving of fuel, the expense of manufacturing cut nails, is not one-third part of that of forging wrought nails. About two hundred and eighty tons are already annually exported, but the United States continue to import, annually, more than fifteen hundred tons of wrought nails and spikes. An increase of duty on these, and a drawback on the exportation of the cut nails is generally asked for.

A considerable quantity of blistered, and some refined steel, are made in America; but the foreign importations exceed 11,000 cwt. a year.

The manufactures of iron consist principally of agricultural implements, and of all the usual work performed by common blacksmiths. To these may be added anchors, shovels, and spades, axes, scythes, and other edge tools, saws, bits, and stirrups, and a great variety of the coarser articles of ironmongery; but cutlery, and all the finer species of hardware, and of steel work, are almost altogether imported from Great Britain. Balls, shells, and cannon, of small caliber, are cast in several places; and three foundries for casting solid, those of the largest caliber, together with the proper machinery for boring and finishing them, are established at Cecil county, Maryland, near the city of Washington, and at Richmond, in Virginia; each of the two last may cast 300 pieces of artillery a year, and a great number of iron and brass cannon are made at that, near the seat of Government. Those of Philadelphia and near the Hudson river, are not now employed. It may be here added, that there are several iron foundries for casting every species of work wanted for machinery, and that steam engines are made at that of Philadelphia.

At the two public armories of Springfield and Harper's ferry, 19,000 muskets are annually made. About 20,000 more are made at several factories, of which the most perfect is said to be that near New Haven, and which, with the exception of that erected at Richmond by the State of Virginia, are all private establishments. These may, if wanted, be immediately enlarged, and do not include a number of gunsmiths employed in making rifles, and several other species of arms. Swords and pistols are also manufactured in several places.

Although it is not practicable to make a correct statement of the value of all the iron and manufactures of iron, annually made in the United States, it is believed to be from twelve to fifteen millions of dollars. The annual importations from all foreign countries, including bar iron, and every description of manufactures of iron or steel, are estimated at near four millions of dollars.

Copper and Brass.

Rich copper mines are found in New Jersey, in Virginia, and near lake Superior; but they are not now wrought. The principal manufactures of that material, are those of stills and other vessels; but the copper in sheets and bolts is almost universally imported, the only manufacture for that object, which is at Boston, not receiving sufficient encouragement, although a capital of \$25,000 has been invested in a rolling mill and other apparatus. The true reason is, that those articles are imported free of duty; and the owners seem to be principally employed in casting bells and other articles.

Zinc has been lately discovered in Pennsylvania; and there are a few manufactures of metal buttons, and various brass wares.

Manufactures of Lead.

Lead is found in Virginia and some other places, but the richest mines of that metal are found in Upper Louisiana, and also, it is said, in the adjacent country, on the east side of the Mississippi. They are not yet wrought to the extent of which they are susceptible, and, after supplying the Western country, do not furnish more than two hundred tons annually to the Atlantic States.

The annual importations from foreign countries of red and white lead, amount to 1,150 tons.

And those of lead itself, and of all other manufactures of lead, to 1,225 tons.

The principal American manufactures are those of shot, and colors of lead. Of the first, there are two establishments on a large scale at Philadelphia, and another in Louisiana, which are more than sufficient to supply the whole demand, stated at six hundred tons a year. Five hundred and sixty tons of red and white lead, litharge, and some other preparations of that metal, are made in Philadelphia alone. A repeal of the duty of one cent. per pound on lead, and an equalization of that on the manufactures of lead, by charging them all with the two cents per pound laid on white and red lead, is asked by the manufacturers.

Various other paints and colors are also prepared in Philadelphia, and some other places.

Tin, japanned, plated Wares.

The manufacture of tin ware is very extensive, and Connecticut supplies the greater part of the United States with that article; but the sheets are always imported. The manufacture of plated ware, principally for coach makers and saddlers, employs at Philadelphia 73 workmen; and the amount annually made there, exceeds one hundred thousand dollars. There are other similar establishments at New York, Baltimore, Boston, and Charleston.

Gunpowder.

Saltpetre is found in Virginia, Kentucky, and some other of the Western States and Territories; but it is principally imported from the East Indies. The manufacture of gunpowder is nearly, and may at any moment be made altogether adequate to the consumption; the importation of foreign powder amounting only to 200,000 pounds, and the exportation of American powder to 100,000 pounds. The manufacture of Brandywine, which employs a capital of \$75,000 and 36 workmen, and is considered as the most perfect, makes alone 225,000 lbs. annually, and might make 600,000 lbs. if there was a demand for it. Two others, near Baltimore, have a capital of \$100,000, and make 450,000 lbs. of a quality said lately to be equal to any imported. There are several other powder mills in Pennsylvania and other places; but the total amount of gunpowder made in the United States, is not ascertained.

Earthen and Glass Ware.

A sufficient quantity of the coarser species of pottery is made every where; and information has been received of four manufactures of a finer kind lately established. One at Philadelphia, with a capital of \$11,000, manufactures a species similar to that made in Staffordshire, in England, and the others, in Chester county, in Pennsylvania, in New Jersey, and on the Ohio, make various kinds of queensware.

Information has been obtained of ten glass manufactures, which employ about 140 glass blowers, and make annually twenty-seven thousand boxes of window glass, containing, each, 100 square feet of glass. That of Boston, makes crown glass equal to any imported: all the other make green or German glass, worth 15 per cent. less; that of Pittsburgh, uses coal, and all the others, wood for fuel.

The annual importations of foreign window glass, amount to 27,000 boxes; the extension of the domestic manufacture, which supplies precisely one half of the consumption, being prevented by the want of workmen.

Some of those manufactures, make also green bottles and other wares; and two works, employing together six glass blowers, have been lately erected at Pittsburgh, and make decanters, tumblers, and every other description of flint glass of a superior quality.

Chemical Preparations.

Copperas is extracted, in large quantities, from pyrites in Vermont, New Jersey, and Tennessee. About 200,000 pounds of oil of vitriol and other acids, are annually manufactured in a single establishment at Philadelphia. Various other preparations and drugs, are also made there, and in some other places; and the annual amount exported, exceeds 30,000 dollars in value.

Salt.

The salt springs of Onondaga and Cayuga, in the State of New York, furnish about 300,000 bushels a year; and the quantity may be increased in proportion to the demand. Those of the Western States and Territories, supply about an equal quantity; that known by the name of the Wabash Saline, which belongs to the United States, making now 130,000 bushels. Valuable discoveries have also lately been made on the banks of the Kenhawa. But the annual importation of foreign salt amounts to more than three millions of bushels, and cannot be superseded by American salt, unless it be made along the sea coast. The works in the State of Massachusetts are declining, and cannot proceed, unless the duty on foreign salt should again be laid. It is necessary to shelter the works from the heavy summer rains by light roofs moving on rollers. This considerably increases the expense; and it appears that the erection of ten thousand superficial square feet, costs one thousand dollars, and that they produce only two hundred bushels a year. A more favorable result is anticipated on the coast of North Carolina, on account of the difference in the climate; and works covering 275,000 square feet have been lately erected there.

Miscellaneous.

Respecting the other manufactures enumerated in the former part of this report, no important or correct information has been received, except as relates to the two following:

Straw bonnets and hats are made with great success; and a small district in Rhode Island and Massachusetts, annually exports to other parts of the Union, to the amount of 250,000 dollars. See communication N.

Several attempts have been made to print calicoes; but it does not seem that the manufacturers can, without additional duties, stand the competition of similar foreign articles. The difficulties under which they labor are stated in the petition of the calico printers of Philadelphia to Congress. A considerable capital has been vested in an establishment near Baltimore, which can print 12,000 yards a week and might be considerably extended, if the profits and the demand afforded sufficient encouragement.

From that imperfect sketch of American manufactures, it may, with certainty, be inferred that their annual product exceeds one hundred and twenty millions of dollars. And it is not improbable that the raw materials used, and the provisions and other articles consumed, by the manufacturers, create a home market for agricultural products not very inferior to that which arises from foreign demand. A result more favorable than might have been expected from a view of the natural causes which impede the introduction, and retard the progress of manufactures in the United States.

The most prominent of those causes are the abundance of land compared with the population, the high price of labor, and the want of a sufficient capital. The superior attractions of agricultural pursuits, the great extension of American commerce during the late European wars, and the continuance of habits after the causes which produced them have ceased to exist, may also be enumerated. Several of those obstacles have, however, been removed or lessened. The cheapness of provisions had always, to a certain extent, counterbalanced the high price of manual labor; and this is now, in many important branches, nearly superseded by the introduction of machinery; a great American capital has been acquired during the last twenty years; and the injurious violations of the neutral commerce of the United States, by forcing industry and capital into other channels, have broken inveterate habits, and given a general impulse, to which must be ascribed the great increase of manufactures during the two last years.

The revenue of the United States, being principally derived from duties on the importation of foreign merchandise, these have also operated as a premium in favor of American manufactures, whilst, on the other hand, the continuance of peace, and the frugality of Government, have rendered unnecessary any oppressive taxes, tending materially to enhance the price of labor, or impeding any species of industry.

No cause, indeed, has, perhaps, more promoted, in every respect, the general prosperity of the United States, than the absence of those systems of internal restrictions and monopoly which continue to disfigure the state of society in other countries. No law exists here, directly or indirectly, confining man to a particular occupation or place, or excluding any citizen from any branch, he may, at any time, think proper to pursue. Industry is, in every respect, perfectly free and unfettered; every species of trade, commerce, art, profession and manufacture, being equally opened to all, without requiring any previous regular apprenticeship, admission, or licence. Hence the progress of America has not been confined to the improvement of her agriculture, and to the rapid formation of new settlements and States in the wilderness; but her citizens have extended their commerce through every part of the globe, and carry on with complete success, even those branches for which a monopoly had heretofore been considered essentially necessary.

The same principle has also accelerated the introduction and progress of manufactures, and must ultimately give in that branch, as in all others, a decided superiority to the citizens of the United States over the inhabitants of countries oppressed by taxes, restrictions and monopolies. It is believed that, even at this time, the only powerful obstacle against which American manufactures have to struggle, arises from the vastly superior capital of the first manufacturing nation of Europe, which enables her merchants to give very long credits, to sell on small profits, and to make occasional sacrifices.

The information which has been obtained is not sufficient to submit, in conformity with the resolution of the House, the plan best calculated to protect and promote American manufactures. The most obvious means are bounties, increased duties on importation, and loans by Government.

Occasional premiums might be beneficial; but a general system of bounties is more applicable to articles exported than to those manufactured for home consumption.

The present system of duties may, in some respects, be equalized and improved, so as to protect some species of manufactures without effecting the revenue. But prohibitory duties are liable to the treble objection of destroying competition, of taxing the consumer, and of diverting capital and industry into channels generally less profitable to the nation than those which would have naturally been pursued by individual interest left to itself. A moderate increase will be less dangerous, and, if adopted, should be continued during a certain period; for the repeal of a duty once laid, materially injures those who have relied on its permanency, as has been exemplified in the salt manufacture.

Since, however, the comparative want of capital, is the principal obstacle to the introduction and advancement of manufactures in America, it seems that the most efficient, and most obvious remedy would consist in supplying that capital. For, although the extension of banks may give some assistance in that respect, their operation is limited to a few places, nor does it comport with the nature of those institutions to lend for periods as long as are requisite for the establishment of manufactures. The United States might create a circulating stock, bearing a low rate of interest, and lend it at par to manufacturers, on principles somewhat similar to that formerly adopted by the

States of New York and Pennsylvania, in their *loan offices*. It is believed that a plan might be devised by which five millions of dollars a year, but not exceeding, in the whole, twenty millions, might be thus lent, without any material risk of ultimate loss, and without taxing or injuring any other part of the community.

All which is respectfully submitted.

TREASURY DEPARTMENT, *April 17th*, 1810.

ALBERT GALLATIN.

A.

Extract of a letter from Wm. Edwards, of Northampton, to the Postmaster at that place, dated November 29, 1809.

Having been regularly bred to the business of tanning, and this having been my sole occupation for twenty-five years, I have been led to reflect, with much regret, upon the general inferiority of American leather, compared with most European, and particularly English manufactured. A want of capital has been the great cause of the depressed state of this manufacture. The hide, in its natural state, is a mass of fibres; the interstices between the fibres is filled with a fleshy substance; to expel these without injuring the fibres, and then to fill the vacuum completely and entirely with what the chemists call tannin, contained in bark, is the whole art of tanning. To do this effectually, years of time is necessary, and repeated applications of fresh bark to the hide at proper periods. The establishment which I have made in this county will receive sixteen thousand full grown hides, and requires a capital of one hundred thousand dollars. We have three tanneries, for the convenience of collecting bark, rather than do all our business at one place, which would necessarily soon produce a scarcity of bark, we use such a quantity—say one cord to six hides; we have six hundred and seventy-two vats, three bark mills, which grind our bark by water, between two stones, as corn is ground. We have the same number of hide mills which go by water for softening foreign hides, taking off the hair, and working the hides. Also, three rolling machines, which also go by water. These produce a very advantageous effect in perfectly extending and consolidating the soal leather after it is tanned, and supersedes the necessity of the shoemaker's hammering the leather; saves entirely the labor and waste attending that part of the shoemaker's business, and gives the leather a closeness of texture by far beyond hammering or any other plan now practised. Also I have found much advantage by applying heat, by means of a copper cylinder, adapted to the purpose, passing through vats, we call leeches, in which we make the last effort to extract the tannin from the bark, after the bark, with a decoction, has been for from thirty to ninety days applied to the hide. Most of the above methods I have originated, and from long experience, find the success attending them has abundantly equalled my expectations.

Much saving of labor and bark, is gained by these improvements, as must be obvious to any person who has a slight knowledge either practical or theoretical of the business. Our forests abound with bark; our beeves afford many hides, and large quantities are imported from the Spanish dominions, part of which are manufactured, and part are re-exported. Slaughter hides are sometimes exported, which ought to be prohibited, if practicable. I have known, and I believe it not uncommon, that quantities of hides and bark have been exported to England, and the leather made from these hides imported and used in this country. The manufacture of leather in the Middle States is far in advance beyond either the Northern or Southern States. A heavy duty on green or slaughter hides, if constitutional, and a small duty, say one cent. per lb. on the exportation of foreign hides—a heavy impost duty on leather of every kind and in every shape, with an aid of capital, and perhaps a bounty on improvements, made public, would have a tendency to encourage the manufacture of leather. Also a law appointing inspectors of slaughter hides, to guard against the great injury they now in many places sustain, by the carelessness or wantonness of the butchers in hacking and cutting them. In the city of New York, there is a loss from this source of twenty per cent. at least, without a particle of gain. Also a law appointing inspectors of leather, to prevent tanners from using an improper quantity of lime in the process, and offering their leather in market, when only partially tanned, would be very useful. The tanners in Boston and its neighborhood practise this method, much to the injury of the article, and in that way to the public. The same hide, well manufactured, will assuredly be worth double to the consumer, than if poorly manufactured. Yet mankind are so much the creatures of habit, and such the nature of the business, the difference will not be readily discovered by a superficial observer. One-third of the hides tanned in the United States are imported hides. These come from the Spanish colonies almost wholly. Hides in England are uniformly higher than in this country—4s. 6d. per stone is the least price I have seen stated, that is something more than seven cents per pound. Their bark in England costs more than their hides; that is, bark sufficient to tan a hide costs more than the hide. My slaughter hides cost me five and a half cents per lb. and my bark costs me one thirteenth so much as the hide. Leather would be an important article of exportation even to England, if it could be admitted there by paying no more duty than their manufactured articles pay in this country. The manufacture of leather is by no means completed when it goes from the hands of the tanner. The currier, the shoemaker, saddler, harnessmaker, and several other tradesmen fit it for various uses after the tanner has performed his operations.

In addition to this list of mills, there are several intended to be erected the ensuing spring; for some the mill seats are already purchased. I am well informed that, by next April, there will be upwards of 40,000 spindles in operation; and, it is expected that the whole number above mentioned will be in operation in the course of one year.

THOS. COLES, Collector.

D.

Statement of a Cotton Manufactory, owned by

, near Providence.

Year of establishment.	Capital employed.		No. of spindles employed.	No. of looms employed.		Number of persons employed.				Number of pounds of cotton annually consumed.	Quantity and quality of yarn spun, and cloth wove, annually.					Greatest number of spindles which might be employed.
	The first year.	At the present time.		In the manufactory.	In neighboring private families.	In the manufactory.		In neighboring private families.			YARN.		CLOTH.			
						Males.	Females.	Males.	Females.		No. of pounds.	Quality.	Yards wove in the manufactory.	Yards wove in neighboring private families.	Quality.	
1806	\$20,000	\$56,000	960	9	70	24	29	50	75	40,000 lbs.	35,000	(a.)	10,000	58,000	(b.)	2,000

REMARKS.—This establishment suffered much in the outset, in being put to much expense by English workmen, who pretended to much more knowledge in the business than they really possessed. At present only two are employed, and Americans, as apprentices, &c. are getting the art very fast.

No dividend of profits is expected for a considerable time, and, from the want of experience in the durability of the machinery, &c. are at a loss to calculate what they may expect; they, however, calculate, under a proper care of government, and the growing disposition of the American citizens to consume the fabrics, to make it a good business.

PROVIDENCE, August 31, 1809.

(a.) One and two, for weaving, knitting, sewing, &c. &c.

(b.) Tickings, sheetings, shirtings, stripes, checks, gingham, duck, coverlid, bagging, diaper, &c.

E.

Statement of Manufactures of Woollen Cloth, of which an account has been received.

STATES.	TOWNS.	CAPITAL.	Number of workmen.	No. of y'ds annually made.	Species of Goods.	REMARKS.
New Hampshire,	New Ipswich,	\$10,000	8 to 10	Not stated.		
Massachusetts,	Byfield,	Not stated,	20	15,000	Cloth, baize, flannel,	Declining; good wool scarce.
Rhode Island,	Warwick,	\$9,000	28	10,000	Cloth, $\frac{3}{4}$ to $\frac{7}{8}$ wide, sold for 83 cents. to three dollars,	Only 900 yards of 1st quality can be made; employs 26 looms--profitable.
Ditto,	Portsmouth,	\$3,000	Not stated,	10,000	Cloth, worth 75 cents to \$2 25,	Profits 12 to 15 per cent.
Connecticut,	Humphreysville,	Not stated,	Do.	Not stated,	Broadcloths, and others,	Wool of Merino breed.
New York,	Poughkeepsie,	do.	Do.	Do.	Ditto,	Ditto.
Delaware,	Brandywine,	\$11,000	12	8,000	Ditto,	Ditto.
Ditto,	Ditto,	Not stated,	Not stated,	5,000	Coarse cloth.	
Maryland,	Baltimore,	\$20,000	20	15,000	Some broadcloth.	
Ditto,	Ditto,	-	56 looms,	-	Various descriptions,	All small establishments.
Ditto,	Elkton,	\$16,000	20	8,000	Cloth, worth \$1 50 to \$5,	Good wool scarce.
Ditto,	Frederick,	Not stated,	29	Not stated,	Woollen cloths and mixtures.	
Pennsylvania,	Philadelphia,	Not stated,	Not stated,	27,000	Cassinet, a mixt. of wool & cot.	
Ditto,	Ditto,	Sundry other small	establishments.	-		
Ditto,	Germantown,	Not stated,	-	-	Coarse cloth and cassinet,	Wool purchased from skin-dressers.

NOTE F.

Amongst numerous other facts, the following are particularly stated:

	Carding Machines.	Fulling Mills.	Yards annually woven	Cotton and Flax.
			<i>Cloth and Flannel.</i>	
In New Hampshire, -	One for every 250 families.	140	800,000	Considerable.
Vermont, -	135	163	1,040,000	1,315,000 yards.
Berkshire, Mass. -	-	-	100,000	Considerable.
Ontario co. N. Y. -	18	18	140,000	Ditto,
York county, Maine,	8	8	70,000	120,000lb. of flax and cotton spun and woven.

Of the cloth and flannel thus wove, about two-thirds are cloth, generally worth more than one dollar a yard, and the remainder flannel.

In Delaware, 150,000 lbs. wool annually spun and woven in private families. Large exportations of linen from the western counties of Pennsylvania, and some from Kentucky, and several places in the Eastern and Middle States. Eighty thousand yards brought for sale, in 1809, to Pittsburgh alone; and the number of looms in that town has increased, since the year 1807, from 17 to 44. In the lower counties of Virginia, North Carolina, generally, and the upper counties of South Carolina and Georgia, almost the whole of the summer clothing, for every description of persons, is of household manufacture; and almost all the slaves are entirely clothed in the same manner. The scarcity of wool alone prevents an adequate supply from the same source for winter clothing. The number of stores for the sale of foreign goods, has, in Matthews county, Virginia, from the year 1802, decreased from fifteen to one. At a general review of militia, last summer, in North Carolina, where more than fifteen hundred persons were on the ground, there were not forty who were not entirely clothed with *homespun*.

G.

Household Manufactures in New Hampshire.

In almost every town, (of six miles square, or a district containing one or more towns) having a population of 200 or 300 families, there is a carding machine and fulling mill. The cost of a carding machine is about 500 dollars. One described to me, cards, annually, 6,000 pounds of wool, at 7 cents per pound, attended by one hand. This mode of carding relieves the house-spinner of one-half the labor of a day, for the sum of 3½ cents.

Every farmer's house is provided with one or more wheels, according to the number of females.

Every second house, at least, has a loom for weaving linen, cotton, and coarse woollen cloths, which is almost wholly done by women.

Manufactures of these kinds amount, probably, on an average, per family, to from 100 to 600 yards in a year, without an hour's loss of labor to the field.

Considerable quantities of coarse flaxen cloth, worth from 15 to 20 cents per yard, thus manufactured in families, are sold to traders in country villages or in towns, and sent for a market to the Southern States, on which a profit is made by the trader.

A specimen of the cost and profit on the employ of a Fulling Mill, in the county of Cheshire, in dressing cloths for household manufactures.

Yearly supply of cloths, for dressing and dying:

Of fustian or cotton, - - - - -	Yards, 1,000
Woollen, merely to be pressed, - - - - -	1,700
Do. to be dyed, fulled, &c. - - - - -	4,000

Yards, 6,700

The charge and sum received for dressing the above, \$1,225

The expense of labor, &c. as follows:

The proprietor states his service, at - - - - -	\$110
Two men employed four months, at \$20, - - - - -	160
Two apprentices, the same time, - - - - -	80
Cost of dye stuff, &c. - - - - -	175
Other expenses, - - - - -	75

600

Leaving a balance to the mill of - - - - - 625 — \$1,225

The cost of the mill and machinery, is stated to be, - - - - - \$1,500

The foregoing may be considered as a sample of the clothiers' mills in New Hampshire, of which there are about one hundred and forty in the State; some, probably, may do less, and others much more than the above.

The cost of manufacturing eighteen pounds of wool into twenty yards of cloth, as follows:

18 pounds of wool, (best common) at 50 cents, - - - - -	\$9 00
Carding, oiling, &c. - - - - -	1 44
Spinning, - - - - -	2 80
Weaving, - - - - -	1 60
Dressing colored black, - - - - -	6 00

\$21 24

This cloth, three quarter yards wide, (cost, per yard 106 cents) is thick and firm, is finer than English cloths of six quarter yards wide, sold, at retail stores, at \$3 50 per yard, and is twice as durable.

H.

Extract of a letter from William Whittemore, of West Cambridge, to the Collector of Boston, dated 24th November, 1809.

The machinery with which we now manufacture all kinds of wool and cotton cards that have been called for, were invented by Amos Whittemore, in the year 1797; he then obtained the exclusive privilege of using said machines, by letters patent, for fourteen years. Amos Whittemore and myself were jointly concerned in the first machines that were built, and are still the sole proprietors of the patent. Congress, at their last winter session, extended the patent fourteen years, by a special act. We have fifty-five of those patent machines, thirty-seven of which are now in use; these machines, with the other apparatus necessary to carry on the business to its present extent, have cost us about forty thousand dollars. We have now employed, in the factory, upwards of forty hands; we manufacture, weekly, one hundred and eighty dozen pair of hand cards, and two hundred square feet of cards for the woollen and cotton factories, which, together, amount to about two thousand dollars. Had it been in our power, the year past, to have supplied ourselves with card wire, the amount of the cards manufactured in our factory would have exceeded three thousand dollars per week; for we should have had all our machines in use. The building, in which we now carry on the business, has cost us ten thousand dollars; fifty thousand dollars, at least, is necessary for a capital to carry on the business to the extent, exclusive of buildings and machinery. We have been obliged to make great sacrifices to obtain money to enable us to carry on the business, so as to be able to answer the demand for cards; our moneyed institutions have afforded but little support to domestic manufactures. The wire is the only article necessary to the manufacture of cards, but what our own country produces, and that might be manufactured here as good, and nearly as cheap, as in England. We have so far satisfied ourselves (by experiment) that nothing, but want of capital, has prevented us from setting up that business. The iron made on lake Champlain, is found to be as good for wire, if not superior, to any ever imported. The wire, to supply our factory one year, will, in England, cost about fifteen thousand dollars, and the expenses of importing about ten per cent., (it being free of duty); perhaps about the same quantity is used, annually, in the other card manufactories in the United States. There is no doubt, in my mind, from the observations made since I have been in the manufacturing business, that, had the same support been afforded manufacturers, generally, that has been to trade and commerce, our manufactories, at this time, would have been carried on much more extensively, and would have generally afforded a profit to those concerned. Since the obstructions to our foreign trade, the manufactories of our country have increased astonishingly; the demand for wool and cotton cards, the present season, has been twice as great as it has been any year preceding. Since the receipt of your letter, my time has been so constantly occupied with the concerns of the manufactory, that I have not been able to make out any statement of it before. I have endeavored to give a general description of our manufactory; time would not permit me to be more particular.

I.

WORCESTER, November 29, 1809.

SIR:

Having invented a cheap and simple method of manufacturing wood screws from iron wire, I obtained a patent for the same from the United States, in July last, and finding it extremely difficult, by any means within my power, to obtain wire of suitable sizes, I was induced to attempt the manufacturing of it; and, as a necessary appendage, to connect this business with that of screw making, the process being so easy and simple that two men of common capacity can manufacture from rods, about the size of common nail rods, three hundred weight of assorted screw wire per day; in the same time a man, with two boys, can make from the wire twenty groce of screws of a quality very much superior to those usually imported. The expense of constructing screw machines upon the principles of my patent is small, and the capital now employed, (the business being yet in its infancy,) but in one year, with the capital I can command, it would be in my power to erect as many machines as would enable me to supply the United States with that article, and of a quality much superior to any ever imported, and at as low a rate as are now paid for those imported of an inferior quality.

The manufacture of iron and brass wire has been often attempted within the United States with success, and can be carried on to a very great extent; but all the undertakers, in consequence of foreign wire being imported free of duty, have, without exception, abandoned the business; if I depended on foreign wire for the manufacturing of screws I should not be an advocate for a duty on it; but, as I make my own wire, its free importation does not affect me, as relates to the quantity appropriated to that particular use; but it very seriously affects me in a much more enlarged and extensive point of view; but if a duty of 15 or 20 per cent., ad valorem, was laid on the importation of foreign wire, the capital within the control of the company, now interested with me in this business, would enable me immediately to extend my machinery to a magnitude sufficiently extensive to meet the consumption of coarse wire within this State. The manufacture of card wire also, of which there is a great consumption within the United States, could be made to equal advantage, and would follow in course on account of the demand for it, provided manufacturers were aided by the above mentioned duty on foreign wire; but if they should extend their works, anticipating that encouragement from Government, and it should not be given, they would suffer great loss and disappointment.

The malleability of the American iron renders the United States perfectly independent of all other countries for that first of all raw materials, and it is only by the patronage of Congress that industry and the arts can be so extensively cultivated as to take the greatest advantage, not only of this article, but of other raw materials which the great resources of our country furnish. The prevailing spirit of enterprise at the present time, in the exertion and extension of manufacturing establishments, is much owing to the measures heretofore adopted by Government; and I feel confident that few articles can be made in this country to so great advantage as iron wire, and that no sufficient reason can be adduced why this article should be exempt from duty more than many others, to the particular and very great injury of our own citizens. I am, however, much encouraged to hope that the measures Government now appear to be taking, will be efficient in patronising the very laudable exertions of its citizens in the production of articles indispensable to our necessities, and, especially those that are produced from the raw materials of our own country.

And the only patronage required in this business, is, that the article of iron wire should be subjected to the same duty that other articles of iron manufactures are subjected to when imported from Great Britain.

I am, most respectfully, sir, your most obedient and very humble servant,

Hon. HENRY DEARBORN, Esq.

ABEL STOWELL.

I am satisfied that wire of all kinds can, and would very soon be manufactured in this neighborhood, sufficient for the consumption of the United States, if a duty should be laid on imported wire equal to what is paid on foreign articles generally. If Congress should deem it expedient to lay a duty on wire, I have good reason for believing that a considerable capital would be immediately vested in the manufactory of that article.

H. DEARBORN.

P. S. The wood screws manufactured by Stowell and those concerned with him, are superior in quality to imported ones; and I presume that there is no doubt, in the minds of those who have become acquainted with the facility with which they are now made, but that a sufficient quantity will be made for the use of the United States, if suitable encouragement is afforded by the Government for the manufacturing of wire.

H. D.

business is better understood and conducted, and the quality of cut nails is so much improved, that little seems to be wanted in order to success, but the protection and patronage of Government. By the best information I can obtain, I find that, on an average of the last three years, the quantity of nails and brads manufactured within the State, may be computed at no less than two thousand tons per year, of which about seventeen hundred and fifty tons have been cut, the residue hammered.

The foreign relations of our country, for some years past, have been so contingent, that the price of iron has been fluctuating between ninety-five and one hundred and forty dollars per ton, whilst the consumption of nails has been diminishing, and of course the demand for them; and, notwithstanding foreign nails have been prohibited, yet the quantity on hand when the prohibition commenced, added to the quantity since manufactured in the United States, with a great diminution of exports, has left no chance for them to rise in proportion to the rise of the raw material. The manufacturer's profit is, therefore, less than it was prior to the rise on iron. During the present contest with Great Britain, both the French and Spanish colonies, in America and the West Indies, have received considerable supplies of nails from the United States, and particularly cut nails, which they preferred for many purposes. Reference to the custom-house books will probably show the difference between the imports and exports, and the result, the expediency or inexpediency of encouraging, by drawback, the exportation of them.

In the event of a peace in Europe, and a free trade between Great Britain and the Spanish colonies, the former, perhaps, could supplant the American supply of this article in the markets of the latter, were not Congress to grant some encouragement, either by drawback or bounty, to the exporter.

The fact is, that American iron, although the ore is excellent, is brought to market and sold in an unfinished state; it is not sufficiently hammered to be sound, and it is hammered in a state so cold, that the seams and cracks, of which there are many, do not close and weld; the iron, therefore, to the worker or consumer, is worth less by ten dollars per ton, than iron finished in the style of Russia or Sweden; and this is not all, for the ends of the bars of American iron are so unsound, that they are only fit for snap iron, and, in fact, are cut off and sold as such by the manufacturer, who pays full price for them, losing thereby five dollars and twenty-five cents, besides loss sustained by transportation and frequent handling. This being the case, and the manufacturer not being disposed to a reform, I should be sorry to be left in their hands, or be subject to their pleasure, so much as I would be, if our Government would adopt any effectual measures to prevent the importation of iron, under the mistaken impression that our country is at present capable of producing a sufficient quantity for its own consumption. Any thing that would tend permanently to advance the price of iron, by increasing the demand, would tend to increase its inferiority in point of intrinsic value; for, when any article in our markets of home manufacture produces the highest price, and is in demand, it is frequently hurried off hand in a very unfinished and slovenly manner, even in such an imperfect state, as would not in common times sell at any price; it is therefore necessary, that our country should be protected from impositions of this kind, and that, instead of prohibiting the importation of iron, as some would have it, it should continue to be encouraged, until we can be supplied at home with less hazard. These occasional remarks you can think of, and, if proper, use them to advantage.

M.

BOSTON, 13th August, 1809.

The importance, in Massachusetts, of nail machinery, and of all that relates to rolling and slitting mills, with which nail machinery is immediately connected, requires that a particular account should be given of them.

In old countries, nails are forged; here, they are cut, and it is curious to trace the progress of American genius through the various steps of this invention. Twenty years ago some men, now unknown, and then obscure, began by cutting slices out of old hoops, and by a common vice griping those pieces, headed them with several strokes of the hammer. Gradually slitting mills were built, and the shears and the heading tools were perfected; yet much labor and expense were requisite to make nails. In a little while, Jacob Perkins, Jonathan Ellis, and a few others, put into execution the thought of cutting and of heading nails by water; but, more intent upon their machinery than upon their pecuniary affairs, they were unable to prosecute the business. At different times, different men have spent fortunes in improvements, and, it may be said with truth, more than a million of dollars; but at last these joint efforts are crowned with complete success, and we are now able to manufacture, at about one-third of the expense that wrought nails can be manufactured for, nails which are superior to them for at least three-fourths of the purposes to which nails are applied, and which, for seven-eighths of those purposes, are as good. The machine made use of by Odiorne, that lately invented by Jonathan Ellis, and a few others, present very fine specimens of American genius.

To northern carpenters it is well known, that, in almost all instances, it is not necessary to bore the wood before driving a cut nail; all that is required is to place the cutting edge of the nail across the grain of the wood. It is also true, that cut nails will hold better in the wood. These qualities are, in some instances, worth twenty per cent. of the value of the article, which is equal to the whole expense of manufacturing it. For sheathing and drawing, cut nails are full as good as wrought nails; only in one respect are the best wrought nails a little superior to cut nails, and that is where it is necessary they should be clinched. The manufacture of cut nails was born in our own country, and has within its bosom advanced through all the various stages of infancy to manhood, and, no doubt, we shall be soon able, by receiving proper encouragement, to render them superior to wrought nails in every particular.

The principal business of rolling and slitting mills is rolling nail plates. They also serve to make nail rods, hoops, tires, sheet iron, and sheet copper. In this state we have not less than twelve, viz:

At Dover, one owned by the Boston iron and nail factory, which is composed of John and Samuel Welles, and R. Whiting.

At Plymouth, one owned by Samuel Spear, W. Davis, and Nathaniel Russell.

At Dover, Beverly, Ambsbury, one each, all incorporated companies, owned, in part, I presume, by William Gray, Samuel Gray and Osgood,

At Newton, one owned by Rufus Ellis, General Elliot and others.

At Norton, one.

At Taunton, three owned by Leonard and Crocker and others.

At Bridgewater, two.

These mills could roll and slit 7,000 tons of iron a year. They now, it is presumed, roll and slit, each year, about 3,500 tons, 2,400 tons of which probably are cut up into nails and brads. These 3,500 tons sell for as much as 700,000 dollars, and we may call American labor and profit three-fifths of it, when foreign iron is employed, and the whole of it, when our iron is made use of.

It is useless to observe that the consumption of cut nails has increased in proportion as their manufacture has been brought to perfection. As late as ten years ago it was very small, and the increase has been much less rapid than it would have been had the rivalry of foreign nails not stood in the way.

The English iron imported into this country, either in bars or in nail plates, or in nail rods, or in hoops, is not good for any thing, nor are tires manufactured with it of any use. Out of the ore they roll the iron into bars, without hammering it, which saves them much expense; but the consequence is, that although the ore be good, and although the iron looks well, yet it is not compact at all; has no strength, and is good, as the razors of Peter Pindar, "to sell but not to use." The fact is, the British never employ it in their own country, nor can a man, while he is buying a hoop, or a tire, or a cut nail, distinguish whether it was made out of English iron. To prevent this species of fraud it is necessary that Government should prohibit, entirely, the importation of English bar iron, nail plates, nail rods, &c. This will also encourage the manufacture of our own iron. At particular times America has been filled with the refuse of English nails and brads, and then the American manufacturer has been obliged to stop his

works and subject to losses, and the consumer, deceived by the name of English nails, has bought this refuse greatly to his injury. It is, therefore, highly important to prohibit the importation of English nails and brads of all the kinds which can be replaced immediately by American, and this includes all except fine drawn nails, upon which an extra duty of one cent per pound might be placed, and if no part of this extra duty were drawn back, it would by thus much encourage the exportation of American nails.

Nor can the Legislature be restrained from prohibiting foreign nails and brads, by a fear that the American manufacturers will be unable to furnish the quantity wanted: for almost immediately they could manufacture half as many again as they now do, and, in six months, could increase this to any quantity desired; nor is it to be feared that the prices will be advanced by monopoly, as the different patent rights of improved nail machinery are owned by a great many individuals totally disconnected, and as some pretty good machines are common to all. It is also well to state, in addition, that cut nails have been exported in considerable quantities, and gone to a good market: whilst they were not so well made, they were sold in foreign ports without a profit; in Havana, and in many other places, they now actually prefer 4d. cut nails of a good quality, to the best English nails with which they have usually been supplied. I cannot leave off this subject without adding one word more about English iron. It may be the plan of the English, when selling it to us, to bring into discredit American cut nails, and other American manufactured articles. Unfortunately a great proportion of those articles, and especially cut nails, has been manufactured out of that iron, and probably it ever will be, because the articles cost less, look full as well, and sell as well to those who never bought any before. It is almost impossible for many people to distinguish between good and bad cut nails, and some are led to prefer giving a higher price for English wrought nails, which are no better than cut nails manufactured out of any iron but English. I have already observed that the mills in Massachusetts could manufacture 7,000 tons of iron, while they only manufacture 3,500 tons. This arises mostly from the rivalry with imported articles of the same kind, a rivalry which the legislature may do away at once.

It need not be mentioned that the iron manufacturers have, on exportation, an equitable right to a drawback of the duty on imported iron.

In Massachusetts originated the project to manufacture cut nails, and there it has first been brought to its present state of perfection. Lately manufactories have been erected to a considerable extent in New York, Pennsylvania, and Maryland, and unquestionably they will rapidly multiply there, and soon be spread all over the country, if the encouragements are given by the legislature, which are suggested in this sketch. If the legislature should determine to allow a drawback of the duty on iron when manufactured, it might be well to render the thing more simple to change that duty, which is now ad valorem, into a specific duty by the pound. Say, for example, make it one cent per pound.

N.

WRENTHAM, October 1, 1809.

Straw Bonnets.

This business commenced in this town in the year 1801; at that time the English straw bonnet had become the fashionable out-door head-dress of the ladies in the large towns, who are allowed always to take the lead in the fashions. The prices demanded for them were so great as to prevent the farmers' daughters purchasing them. A young lady, stimulated with a desire to appear not less fashionable than those who were better able, or more willing to pay an extravagant price for a bonnet, conceived that she might, with her own ingenuity and industry, fabricate one for herself, equal in quality and less in expense, than an English bonnet would cost. The bonnet was soon completed; and was thought to be no way inferior to the English. This first successful effort of the young lady soon commanded customers, who were furnished with bonnets at about half the price which were paid for those imported.

The demands for these bonnets increasing, others were induced to try their ingenuity. These small attempts were generally crowned with success. In a few months the manufacture of bonnets exceeded the domestic demand for them. The surplus were entrusted to the care of a man who frequented the market at Boston, with the common productions of the country, who made such returns as to not only encourage the first adventurers to continue the business, but to induce others also to become adventurers, so that, at the end of one year, the bonnet business had become an important article of traffic in this vicinity. Since which the business has annually increased, and the demand for hats and bonnets becomes more and more extensive. The principal part of this business is done in the towns of Wrentham, Franklin, Medway, Medfield, Billingham, Walpole, Sharon, and Foxborough. Some towns in the counties of Bristol and Worcester have likewise entered into this business. This concise history of a manufactory, which owes its commencement to mere accident, may not be uninteresting to you; in which I have been a little particular to show from what small beginnings an important article of merchandise may be produced. Could you have believed that the annual amount of straw hats and bonnets made in the town of Wrentham alone is equal to 100,000 dollars? This, I suppose, to be within bounds. For the amount in the other towns in the county of Norfolk, abovementioned, I add 100,000 dollars more; this sum is perhaps much too small. Bristol and Worcester manufacture to a considerable amount, and the business has commenced, I have been informed, in the other parts of the State.

It is to be understood that the above sum of 200,000 dollars is exclusive of hats and bonnets made and worn by those who manufacture them. These bonnets and hats are exported not only to New York, Philadelphia, Baltimore, Virginia North Carolina, Charleston, South Carolina, Savannah, and New Orleans, but to several of the West India Islands.

11th CONGRESS.]

No 326.

[3d Session.

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE, DECEMBER 12, 1810.

In obedience to the directions of the act supplementary to the act, entitled "An act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report and estimates:

REVENUE.

The nett revenue arising from duties on merchandise and tonnage, which accrued during the year 1808, amounted to	\$10,348,000
--	--------------

The nett revenue arising from the same sources, which accrued during the year 1809, amounted, as will appear by the statement (A,) to	\$6,527,000
---	-------------

The statement (B,) exhibits, in detail, the several species of merchandise and other sources from which that revenue was derived during the year 1809.

It is ascertained that the nett revenue arising from the same duties, has, for the three first quarters of the year 1810, exceeded 7,500,000 dollars; and it is believed that it will not, for the whole year, fall short of twelve millions. The sales of public lands north of the river Ohio, have, during the year ending on the 30th September, 1810, as appears by the statement (C,) amounted to 159,000 acres, and the payments by purchasers, to 610,000 dollars. The same statement shows, that the total amount of sales from the establishment of the land offices in the year 1800, to the 30th September, 1810, have amounted to 3,168,000 acres, which have produced 6,681,000 dollars; of which sum, 1,646,000 dollars remain due by purchasers. The sales in the Mississippi Territory, being (after deducting expenses,) appropriated, in the first place, to the payment of 1,250,000 dollars to the State of Georgia, are distinctly stated.

RECEIPTS AND EXPENDITURES.

1. Year ending on the 30th September, 1810,

The actual receipts into the Treasury during the year ending on the 30th of September, 1810, have amounted to	\$ 8,688,861 17
Making, together with the balance in the Treasury, on the 1st of October, 1809, and amounting to	5,828,936, 01
An aggregate of	<u>\$ 14,517,797 18</u>
The disbursements during the same year have consisted of the following items, viz:	
Civil Department, including miscellaneous expenses, and those incident to the intercourse with foreign nations,	\$ 1,249,200 06
Military and Indian Departments,	\$ 2,514,523 75
Navy,	1,674,735 50
Interest on the public debt,	4,189,259 25
	<u>2,735,898 91</u>
Total current expenses,	\$ 8,174,358 22
Payments on account of the principal of the public debt,	2,884,409 24
Amounting together, as will appear more in detail by the statement (E,) to	11,058,767 46
And leaving in the Treasury, on the 30th September, 1810, a balance of	3,459,029 72
	<u>\$ 14,517,797 18</u>

It therefore appears, that the actual receipts into the Treasury have exceeded the current expenses of Government, including therein the interest on the debt, by a sum of five hundred thousand dollars. The expenses had, during the preceding year, exceeded the receipts by a sum of thirteen hundred thousand dollars. The difference arises, not from an increase in the receipts, but from a diminution in the expenses, particularly those of the Military and Naval Departments.

2. Last quarter of the year 1810.

The receipts for that quarter will, it is believed, be more than sufficient to defray the current expenses and interest on the debt accruing during the same period. But the payments to be made on account of the principal of the debt, in order to complete the annual appropriation of eight millions of dollars, amounting to more than 5,100,000 dollars, a loan first negotiated for 3,750,000 and afterwards reduced to 2,750,000 dollars, became necessary. The receipts and disbursements for that quarter are, therefore, estimated as follows:

Receipts into the Treasury from the ordinary revenue,	\$ 2,500,000
Proceeds of the loan receivable on the 31st December, 1810,	2,750,000
Balance in the Treasury on the 1st October, 1810,	3,460,000
	<u>\$ 8,710,000</u>
Expenses, civil, military and naval, estimated	\$ 1,570,000
Interest accruing on the domestic debt,	500,000
	<u>\$ 2,070,000</u>
Payments on account of the public debt, in order to complete the annual appropriation of eight millions, and including the reimbursement of 31st December, 1810, on the six per cent. and deferred stocks, and that of same date, of 3,751,125 exchanged six per cent. stock,	4,640,000
	<u>6,710,000</u>
Probable balance in the Treasury on 31st December, 1810,	2,000,000
	<u>\$ 8,710,000</u>

3. Year 1811.

The outstanding revenue bonds, after deducting the expenses of collection, and allowing for bad debts, will not, probably, on the 1st January, 1811, fall short of eleven millions and a half of dollars, the actual receipts for the year 1811, on account of the sales of lands, may be estimated at five hundred thousand; and it is presumed that the portion of the revenue arising from importations subsequent to the present year, which will be received in 1811, will be more than sufficient to pay the debentures payable in that year. The actual receipts into the Treasury during that year, may, therefore, be estimated at

Estimating the expenses of Government for the year 1811, not to exceed the amount actually expended during the year ending on the 30th September, 1810, that is to say—	
Expenses of a civil nature, both domestic and foreign,	\$ 1,240,000
Military and Naval departments,	4,190,000
	<u>5,430,000</u>
And adding thereto the interest on the public debt, estimated at	2,550,000
The aggregate of the current expenses, exclusively of the payments on account of the principal of the debt, would not exceed	7,980,000
The payments on account of the principal of the debt will be applicable to the annual reimbursement on the six per cent. and deferred stocks, to the re-payment of the loan of 2,750,000 dollars effected this year, and to the reimbursement, in part, of the converted six per cent. stock; and must, in order to complete the annual appropriation of eight millions of dollars, amount to	5,450,000
Making for the whole amount of the expenditures of the year 1811,	<u>\$ 13,430,000</u>

Or about one million of dollars more than the receipts for the same year.

If, therefore, this estimate could be relied on, an authority to borrow one million of dollars would be sufficient to enable Government to pay all the current expenses, and to reimburse nearly four millions and a half of the principal of the debt, leaving at the same time in the treasury a balance of two millions of dollars, a sum not greater than what, under existing circumstances, it is eligible to reserve. But a deficiency may take place in the receipts, if the amount of debentures should exceed what has been estimated; and the expenses for the military and naval departments, (which, according to the estimates of those departments, and exclusively of the sum necessary for fortifications, amount to 4,916,000 dollars,) may be greater than the amount actually expended during the year ending on the 30th September, 1810. In order to provide for these and other unforeseen contingencies, the propriety of authorizing a reloan, not exceeding, in the whole, the amount of the principal of the debt reimbursed during the same year, is respectfully submitted.

PUBLIC DEBT.

It appears by the statement D, that the payments on account of the principal of the public debt, have amounted, during the year ending on the 30th day of September, 1810, to 2,884,000 dollars; and during the nine years and a half ending on the same day, to near 37,700,000 dollars, exclusively of more than six millions of dollars paid in conformity with the provisions of the convention with Great Britain and of the Louisiana convention.

Taking the calendar year 1810, by itself, the principal of the debt actually reimbursed will amount to 5,163,376 dollars, viz:

Annual reimbursement of six per cent. and deferred stocks, - - - - -	\$1,412,251
Reimbursement of the six per cent. exchanged stock, - - - - -	3,751,125
	5,163,376
From which, deducting the loan from the bank, of - - - - -	2,750,000
	<u>\$2,413,376</u>

The loan authorized by the act of last session, had, at first, been negotiated in the latter end of May, for 3,750,000 dollars; but the expenses having proven less than had been supposed, it was, by mutual consent, reduced in October to 2,750,000. With that object in view, in order that no greater sum should be ultimately borrowed than might be necessary, and also, in order to avoid as long as practicable, an increase of stock in the market, and that of a more permanent species of debt, a temporary loan from the Bank of the United States was preferred to any other mode. It is reimbursable on the last day of December, 1811, with a reservation that the bank may, in case of a non-renewal of its charter, demand an earlier payment, on giving three months' notice. This condition may, if enforced, save some interest to the public, and can produce no inconvenience, as there will be no greater difficulty in effecting a new loan, (if necessary,) in the middle than in the latter end of the year. The documents F, G, H, I, show both the object and the terms of the loan.

From what has been stated, it appears that no other provisions are necessary for the year 1811, than a continuance of the additional $2\frac{1}{2}$ per cent. duty, commonly called the Mediterranean fund, and an authority to borrow a sum probably much less, and certainly not greater, than the amount of the principal of the public debt which will be reimbursed during the year. But, as in conformity with the act of 1st May, 1810, the importation of articles, the growth, produce, or manufacture of the dominions, colonies, and dependencies of Great Britain, will be prohibited after the 2d day of February next, if that nation shall not, before that time, so revoke or modify her edicts, as that they shall cease to violate the neutral commerce of the United States, some provisions appear necessary for the purpose of supplying the deficiency in the revenue arising from that cause, and of giving to that measure all the efficacy of which it is susceptible.

The probable defalcation in the revenue cannot, for obvious reasons, be at this time estimated with any degree of precision. The experience of the ensuing year can alone afford sufficient data for a permanent and detailed plan, adapted to that state of things, and calculated to ensure perseverance in the system as long as may be thought proper. But, in the mean while, it appears essential to lay the foundation of such plan, and to guard in time against any great deficit in the receipts of the year 1812. It is believed that, under existing circumstances, it would be sufficient to render those receipts equal, or nearly equal, to the current expenditure, including therein the interest on the public debt, and estimated at about eight millions of dollars; and, with a view to that object, a considerable and immediate increase of the present duties on importations is respectfully suggested.

It is not less important that the act should be free of legal difficulties and of well founded objections, and that it should be enforced by every practicable means. On that subject, the following observations are submitted:

1. The law of 1st May, 1810, has neither expressly defined the edicts, the revocation of which is expected, nor made a notification by the President the evidence and the sole evidence of the fact. It follows, that in case of an unsatisfactory modification of her edicts by Great Britain, the decision of the question itself, whether the non-importation be actually in force or not, will be left to the courts; whence delays and embarrassments will arise, which will considerably impede the operation of the law.

2. The non-importation is to take place on the 2d day of February next, if a revocation shall not have taken place before that day. But this may have taken place, and not be known on that day in the United States. If the Collectors abstain from seizing merchandise imported after that day, until the fact shall have been ascertained, and the edicts shall not have been revoked, the merchandise will escape forfeiture, and the law, during that period, will be inoperative. If they seize, and the edicts shall have been revoked, the seizures will have been illegal, and the Collectors will be liable to personal suits. This inconvenience may be remedied by a provision directing that, during that period, it shall be the duty of the Collectors to make seizures, but that the goods shall be restored to the parties on their giving bond with sureties for the value.

3. No exception has been made by the act in favor of vessels which had sailed for the British East Indies prior to the President's proclamation; and the short period of three months from the date of that proclamation to the day when the law is to take effect, will occasion forfeitures or heavy losses in cases of bona fide American property in England, paid for or ordered prior to the proclamation. It seems, in every point of view, eligible, that cases clearly foreseen should be provided for by law, instead of being left to executive discretion.

4. It is believed that an abandonment by the United States of their share of the penalties and forfeitures which may be incurred, and the distribution of these, according to the circumstances of the case, amongst the Collectors, the other custom house officers, the Inspectors, who heretofore have had no share, and the informers, would ensure a greater degree of zeal and vigilance in detecting and preventing infractions of the law.

5. Some additional provisions will be necessary to enforce the law on the northern frontier of the United States: amongst which may be reckoned, the erection of some new collection districts, particularly on the river St. Lawrence, and in the eastern part of the State of Vermont; an increase of salary to the Collectors in that quarter, inasmuch as, under the non-importation, that part of their compensation which is derived from fees, will be considerably reduced, and that which arises from commissions altogether lost; and an authority to the armed force of the United States to make seizures. And it must be added, that the peculiar situation of those districts will render condemnations extremely difficult, unless the obligation be imposed on persons claiming merchandise seized there, to prove that the same was legally imported.

All which is respectfully submitted.

ALBERT GALLATIN.

A.

A Statement exhibiting the amount of duties which accrued on Merchandise, Tonnage, Passports, and Clearances of Debentures issued on the exportation of foreign Merchandise, of payments for Bounties and Allowances, and for expenses of Collection, during the years 1808 and 1809.

TREASURY DEPARTMENT, December, 1810.

D.

An estimate of the principal redeemed of the Debt of the United States, from the 1st October, 1809, to 30th September, 1810; showing the redemption of the Principal of the said debt, from 1st April, 1801, to 30th September, 1810.

	Redemption from 1st October, 1809, to 30th September, 1810.	Redemption from 1st April, 1801, to 30th Sept'r, 1809, per the Secretary's report of 7th December, 1809.	Total redemption, from 1st April, 1801, to 30th September, 1810.
<i>On account of the Domestic Debt.</i>			
The amount of warrants issued on the Treasurer of the United States, on account of the interest of the domestic debt, and of the reimbursement of the old 6 per cent., deferred 6 per cent., and exchanged 6 per cent. stocks, from the 1st October, 1809, to the 30th September, 1810, was	-	-	\$4,486,365 27
Deduct reimbursement of exchanged 6 per cent. stock, as stated below,	-	-	1,090,749 13
			<u>3,395,616 14</u>
Deduct interest which accrued during the same period, calculated quarter yearly,	-	-	2,028,144 63
Reimbursement of the old 6 per cent. and deferred stocks,	\$1,367,471 51	10,638,227 50	\$12,005,699 01
Do of the navy 6 per cent. stock,	-	711,700 00	711,700 00
Do of the 5½ per cent. stock,	-	1,847,500 00	1,847,500 00
Do of the 4½ per cent. stock,	-	176,000 00	176,000 00
Do and purchase of 8 per cent. stock,	-	6,359,600 00	6,359,600 00
Do and purchase of exchanged 6 per cent. stock,	1,090,749 13	1,451,476 73	2,542,225 86
Payments made for lands, in certificates of the debt of the United States,	-	268,240 70	268,240 70
Do made to foreign officers, and for certain parts of the domestic debt,	241 65	89,850 93	90,092 58
Do made on account of domestic loans,	-	3,440,000 00	3,440,000 00
<i>On account of the Foreign Debt.</i>			
The amount of warrants issued on the Treasurer, exclusive of \$1,702 55, commissions to agents purchasing bills of exchange, was	-	-	\$1,131,998 68
Deduct interest accruing thereon, viz:			
On Louisiana 6 per cent. stock, including commissions,	-	-	671,998 27
On exchanged 6 per cent. stock, payable in Europe,	-	-	5,779 09
On converted 6 per cent. stock, do.	-	-	17,604 55
And charges on remittance	10,928 69	-	-
Deduct gain on do.	258 87	-	-
	<u>10,669 82</u>		
	706,051 73		
	(a.) 425,946 95	9,813,495 38	10,239,442 33
	<u>\$2,884,409 24</u>	<u>\$34,796,091 24</u>	<u>\$37,680,500 48</u>

(a.) This statement being made, by deducting from the total amount of payments at the treasury, the amount of interest accruing during the same year, it follows, that, whenever the payments for the purchase of remittances happen to exceed the interest, the difference is considered as a payment on account of principal, though no principal may be actually paid during the same year. But, on the other hand, if the interest should happen to exceed the remittances made in the year, the difference is considered as an increase of debt. Thus, in the statements (D) for the years 1807 and 1809, the following deductions were made on that account, as follows:

1807,	\$248,813 36
1809,	214,001 11

462,814 47

Which are now nearly supplied by the sum of \$425,946 95, in this statement. The general result, for a number of years, and that for each year, so far as relates to the payments at the treasury, are correct. But the ultimate application of these payments, for each year, necessarily differs so far as relates to the foreign debt, from the treasury payments, and is correctly stated in the annual reports of the commissioners of the sinking fund.

TREASURY DEPARTMENT, Register's Office, December 7th, 1810.

JOSEPH NOURSE, Register

F.

At a meeting of the Commissioners of the Sinking Fund, held on the 26th day of April, 1810.

Present: JOHN GAILLARD, *President of the Senate, pro tempore.*

ROBERT SMITH, *Secretary of State.*

ALBERT GALLATIN, *Secretary of the Treasury.*

CÆSAR A. RODNEY, *Attorney General of the United States.*

The Secretary of the Treasury reported to the Board—

“That the payments to be made during the present year, on account of the interest of the debt, including the annual reimbursement of six per cent. and deferred stocks, are estimated at—

Leaving a sum of - - - - - \$4,100,000

- - - - - 3,900,000

In order to complete the annual appropriation of - - - - - \$8,000,000

Which, the market price of stocks, being above the rate fixed by law for purchases, can only be applied to the reimbursement of the six per cent. exchanged stock, amounting to \$3,751,125 26, in conformity with the provisions of the act supplementary to the act, entitled "An act making provision for the redemption of the whole of the public debt of the United States."

Whereupon, resolved, That the residue of the exchanged six per cent. stock be reimbursed during the present year, in conformity with the act last mentioned.

JOHN GAILLARD, *President of the Senate, pro tempore.*
ROBERT SMITH, *Secretary of State.*
ALBERT GALLATIN, *Secretary of the Treasury.*
C. A. RODNEY, *Attorney General of the United States.*

Attest,
EDWARD JONES, *Secretary to the Commissioners of the Sinking Fund.*

G.

JAMES MADISON, *President of the United States of America,* to ALBERT GALLATIN, *Secretary of the Treasury.*

By virtue of the act, entitled "An act authorizing a loan of money for a sum not exceeding the amount of the principal of the public debt, reimbursable during the year one thousand eight hundred and ten," passed on the first day of May, one thousand eight hundred and ten.

I do hereby authorize and empower you, by yourself, or any other person or persons, to borrow, on behalf of the United States, of the Bank of the United States, any sum, not exceeding, in the whole, three millions seven hundred and fifty thousand dollars, and to make, or cause to be made for that purpose, such contract as shall be necessary, and for the interest of the said States, pursuant to the act aforesaid. And for so doing, this shall be your warrant.

Given under my hand, at Washington, this twenty-eighth day of May, in the year of our Lord one thousand eight hundred and ten.

JAMES MADISON.

H.

Articles of agreement between Albert Gallatin, Secretary of the Treasury of the United States, of the one part, and the President, Directors, and Company of the Bank of the United States, of the other part, made and concluded the thirtieth day of May, one thousand eight hundred and ten.

Whereas, by the act, entitled "An act authorizing a loan of money for a sum not exceeding the amount of the principal of the public debt, reimbursable during the year one thousand eight hundred and ten," passed the first day of May, eighteen hundred and ten, the President of the United States is authorized and empowered to borrow, or cause to be borrowed, of the Bank of the United States, a sum not exceeding the amount of the principal of the public debt, reimbursable during the year one thousand eight hundred and ten:

And, whereas, the President of the United States, by his warrant, bearing date the twenty-eighth day of May, one thousand eight hundred and ten, and directed to the said party of the first part, did authorize and empower him to contract with the said parties of the second part, for a loan of three millions seven hundred and fifty thousand dollars, in conformity with the provisions of the act aforesaid:

Now, therefore, these presents witness, that, pursuant to the authority aforesaid, it hath been, and is hereby agreed, by and between the said parties of the first and second part, as followeth, viz:

First, The said President, Directors, and Company, shall lend to the United States the sum of three millions seven hundred and fifty thousand dollars, to be advanced at their banking house in Philadelphia, on the thirty-first day of December, one thousand eight hundred and ten.

Second, The said sum, so to be advanced as aforesaid, shall bear interest at the rate of six per centum per annum, from the date beforementioned, payable quarter yearly to the said parties of the second part, during the continuance of the said loan.

Third, The United States shall reimburse, or repay to the said Bank of the United States, the said sum of three millions seven hundred and fifty thousand dollars, with the interest which may be due thereon, on the thirty-first day of December, one thousand eight hundred and eleven; reserving, nevertheless, to the said parties of the second part, (in case they do not obtain a renewal of their charter at the next session of Congress) the right to demand and receive repayment at an earlier period, they giving three months' previous notice to the party of the first part, of such their intention.

In testimony whereof, the said Secretary of the Treasury hath caused the seal of the Treasury to be affixed to these presents, and hath hereunto subscribed his hand; and the said President, Directors, and Company, have also caused the seal of the Bank of the United States to be affixed to the same, the day and year aforesaid.

ALBERT GALLATIN, *Secretary of the Treasury.*
D. LENOX, *President of the Bank of the United States.*

I.

Whereas, by an agreement between the Secretary of the Treasury of the United States, and the President, Directors, and Company of the Bank of the United States, dated the thirtieth day of May, one thousand eight hundred and ten, it was stipulated on the part of the President, Directors, and Company aforesaid, that they would lend to the United States the sum of three millions seven hundred and fifty thousand dollars, to be paid in Philadelphia, on the thirty-first day of December, one thousand eight hundred and ten:

And, whereas, the two contracting parties have lately agreed, that the amount of the loan stipulated to be made to the United States, in the agreement before recited, shall be reduced:

Now, therefore, these presents witness, that the sum to be loaned to the United States by the President, Directors, and Company of the Bank of the United States, on the thirty-first day of December ensuing, shall be fixed at two millions seven hundred and fifty thousand dollars; any thing in the former agreement to the contrary notwithstanding.

In testimony whereof, the Secretary of the Treasury hath caused the seal of the Treasury to be affixed to these presents, and hath hereunto subscribed his hand; and the President, Directors, and Company of the Bank of the United States, have also caused the seal of the said Bank to be affixed to the same, this fifteenth day of October, one thousand eight hundred and ten.

ALBERT GALLATIN, *Secretary of the Treasury.*
D. LENOX, *President of the Bank of the United States.*

11th CONGRESS.]

No. 327.

[3d Session.]

DUTIES AND DRAWBACKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 17, 1810.

SIR:

TREASURY DEPARTMENT, December 13, 1810.

In obedience to the permanent order of the House of Representatives, passed on the third of March, 1797, I have the honor to transmit a statement exhibiting the amount of duties and drawbacks on goods, wares, and merchandise, imported into the United States, and exported therefrom, during the years 1807, 1808, and 1809.

I have the honor to be, very respectfully, sir, your obedient servant,

ALBERT GALLATIN.

The Hon. the SPEAKER of the House of Representatives of the United States.

A Statement exhibiting the amount of Drawback payable on sundry articles exported from the United States, in the years 1807, 1808, and 1809, compared with the amount of Duties collected on the same, respectively.

TREASURY DEPARTMENT, Register's Office, December 6, 1810.

JOSEPH NOURSE, Register.

11th CONGRESS.]

No. 328.

[3d SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, DEC. 18, 1810.

To the Senate and House of Representatives of the United States of America, in Congress assembled, the memorial of the Stockholders of the Bank of the United States, respectfully sheweth:

That, by an act of Congress, passed on the 25th of February, 1791, the subscribers to the capital stock of the Bank of the United States, their successors and assigns, were incorporated for a term of years, which will expire on the 4th day of March next.

Aware of the evils which must result from the sudden termination of the operations of an institution, intimately and extensively connected with the commercial interests of the nation, with the public credit, and the fiscal concerns of the Government, your memorialists submitted to the tenth Congress, an application for the extension of their charter. The wisdom of Congress having, hitherto, declined a decision upon the subject, it becomes the duty of your memorialists again to submit it to the legislative consideration, and to repeat their prayer, that the charter of incorporation under which they have hitherto existed, may be renewed.

Had your memorialists consulted merely their own convenience and security, under the uncertainty in which the success of their application has since that time remained, prudence would have required them gradually to call in their funds, as a measure of precaution, in case of a dissolution. But, considerations of public utility, which have always influenced the conduct of this institution, and a belief that the general interest required, and would, therefore, obtain a continuance of its incorporation, have postponed the adoption of a measure, in whatever manner effected, productive, as they apprehend, of great public as well as private distress.

The superior information of the Legislature, renders it unnecessary for your memorialists to detail the general benefits of banking institutions. The experience and the practice of all nations, in modern times, sufficiently prove their utility to trade, their aid in the management of the national revenues, and their necessity in times of public emergency and general calamity. In no country have these benefits been more forcibly exemplified, or more fully experienced, than in the United States. The truth of this remark, is obvious in the amount of the productive capital of the country, above the quantity of the precious metals, in the rapid advancement of agriculture, manufactures, and commerce, the solidity of private as well as public credit, the ease with which the moneyed operations of the Government, of societies, and of individuals, to an immense amount are carried on; the accumulation of wealth, and the general prosperity of the nation. It is not intended to suggest, that the creation of banks has, of itself, produced these effects; the activity, energy, and enterprise of the people, under the protection of a wise and able Government, have co-operated in their production; but, without the augmentation of the active capital of the country, and the other facilities to business produced by banking institutions, that activity, energy, and enterprise, would have but feebly operated. That the public opinion, the correct arbiter of the public interest, coincides with that of your memorialists, is evidenced by the institution and the increase of banks in every State of the Union.

In producing these beneficial effects, your memorialists reflect with pleasure, that the Bank of the United States has contributed in an eminent degree. Its early institution, its extensive and combined operations, and the weight of its capital, at the same time that they afforded it the opportunity of being acquainted with the trading interests of the Union, gave it, also, the means of essentially advancing them, while its disposition to do so has always kept pace

with its ability. Not restricted to any particular district, it has acted as the general guardian of commercial credit, and by preventing the balance of trade in the different States from producing a deficiency of money in any, has obviated the mischiefs which would have been thereby produced. It has fostered and protected the banking institutions of the States, and has aided them, when unexpectedly pressed; its disposition towards them is manifested in the quantum of its capital, of which they have generally had the use, not much less in amount than one tenth of the whole.

In its accommodations to individuals it has been liberal, but, at the same time, discreet, with a view as well to their safety as its own. By means of it, the merchant, and the manufacturer, have been enabled to push their operations to an extent far exceeding what would have been practicable without it; judicious and prudent enterprise has been encouraged, rash and prodigal adventure has been discountenanced, and a sufficient fund being provided, from which reasonable loans could be obtained, usury has been prevented, and usurious lenders repressed.

Its importance in the administration of the finances, and its utility in the operations connected with the public credit, have been fully established.

It has afforded a place of deposit for the public moneys, without expense, and without hazard to the Government.

It has aided in the collection of the revenue, by introducing a punctuality in the payment of duties, otherwise unattainable, and by accommodating with loans, those who had such payments to make; thereby assuming upon itself the risk, which otherwise had been borne by the Government.

It has, at all times, upon its own responsibility, and at its own expense, transmitted the public moneys from one part of the Union to another, so as to meet the exigencies of the Government, and, from the surplus revenue of one place, to supply the deficiency of another. By this means the Government has always been enabled, with convenience, to pay the interest on the public debt, and to meet its other demands, at such places as its engagements required; an operation which, without such an aid, would have been productive of trouble, hazard, and expense to the Government, and would still have been liable to disappointment.

It has, by its loans, enabled the Government to comply punctually with its engagements, when deficiencies or delays have occurred in the revenue, and has thus enabled it to maintain inviolate the public faith and credit, both at home and abroad. There have been periods when the nation found it necessary to borrow largely from this institution, and, at one time, had upon loan considerably more than three-fourth parts of its active capital.

It has, for the accommodation of the Government, established branches at places disadvantageous to its business, and from which no profit was expected to be derived.

Most of these operations have been attended with inconvenience, and with expense to the bank, but they have always been performed with alacrity and cheerfulness.

While your memorialists thus recount the aids they have afforded, they feel no disposition to forget the advantages they have received from the Government in return. The support which it has given to the bank, and the confidence which it has reposed in it, founded upon a knowledge of its management and condition, have conferred upon it a stability, a dignity, and a splendor which have preserved its credit from suspicion, and have secured to it the confidence of Europe, as well as America.

Thus, mutually aiding and aided by the Government, has the Bank of the United States, for twenty years, continued its operations, and during that time, has obtained the general acknowledgment that its affairs have been conducted with honor and dignity, with impartiality and candor, with liberality and prudence.

To the original motives for the institution of this bank, the success of experiment is now added, and with the existing proofs of its uses and its services, every consideration of policy and of justice, urge its continuance. Independent of the positive evils its dissolution would produce to the community, the Government would at least be deprived of those advantages it has hitherto derived from its existence, unless they could be supplied from some other quarter, either by the banks established by the several States, or by a bank upon a foundation altogether new. As to the State banks, your memorialists are fully sensible of the benefits resulting from their establishment, and of their sufficiency for the purposes of their institution, the local accommodation of the places in which they exist. But their capitals are by no means adequate to the demands of the General Government, in a time of emergency; a time when the ordinary claims of their own State Governments, and of their own particular customers, would be increased and entitled to preference. Neither could the transmission of the public moneys, from one quarter of the Union to another, be effected with sufficient ease and dispatch, or to the requisite extent, by banks of limited capital, having no connexion with, nor direction over, each other.

Nor would it be prudent in the Government, to trust the deposit of its funds, to the extent to which they sometimes exist in a variety of institutions, united by no common bond, and in no degree responsible for each other; over whose conduct the General Government could have no control, into whose management and condition it could not legally inquire, and which those institutions, even if disposed, could not legally communicate. Independent of the hazard to which the public moneys might be subjected by mismanagement, a power would be placed in hands, which, from want of responsibility, and want of control, might be used to injurious purposes.

In addition, the dignity of the Government seems to require its fiscal operations to be conducted through the medium of an institution organized by itself, of whose ability to answer all the purposes of revenue and public credit, no doubt can exist; of whose situation and proceedings a competent knowledge can be had; over whose conduct a sufficient degree of control to prevent wilful misconduct should exist, and upon whose disposition to assist the Government in times of exigency, reliance may be confidently placed. Such an institution is the Bank of the United States, and such it will remain, if continued in its present form. The amount of its capital gives it sufficient power; its situation is periodically communicated to the Treasury Department: over its proceedings the Government possesses a powerful control, by the extent of its deposits: of its disposition to yield every legitimate assistance to the Government, it has given the strongest evidences, and to ensure the continuance of this disposition, its interest and its duty combine.

If a National Bank be thus conducive to the interests of the community, and of importance to the Government, no obvious motive suggests itself to your memorialists against the continuance of the present bank. At any time, and especially at the present, when so large a portion of American property remains unproductive in Europe, so great a reduction in the amount of the active capital of the country as the dissolution of the bank would occasion, must be attended with great and general injury, from the depreciation in the value of property, the stagnation of business, and the check to commercial enterprise, which would result from it. And in stopping the operations of such an engine, one of two consequences must be produced, either that in discharging the debts due to the bank, great sacrifices must be made, and every resource of the merchant drained, or, in the failure to pay them, an irreparable blow must be given to commercial credit and punctuality.

Nor is it easy to calculate the effects, which the destruction of the bank would produce in the loss it would occasion to the public revenue, to charitable institutions, widows, children, and others, interested in the stock; from the pressure to which the other banks must be inevitably subjected, from the want of confidence it would create in the stability of our institutions, and from the general derangement of credit.

Under these views and impressions, your memorialists solicit the renewal of their charter; and upon the wisdom and justice of the Legislature, and its regard for the rights and interests of its citizens, they rely for its concession.

Signed on behalf of the stockholders.

DAVID LENOX, *President.*

PHILADELPHIA, *December 10, 1810.*

11th CONGRESS.]

No. 329.

[3d SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, DECEMBER 24, 1810.

To the Senate and House of Representatives in Congress of the United States, the memorial of the subscribers, members of the Chamber of Commerce of Philadelphia, respectfully represents:

That your memorialists regard, with interest and concern, the approach of that period at which the charter of the Bank of the United States will expire; and that, from an intimacy with the institution, and an immediate knowledge of its direction; from a view of the interests plainly interwoven with its existence, and an anticipation of the ruin which must follow its dissolution, they are induced, on this occasion, to address you.

Your memorialists, in presenting to your view such considerations as they deem to be urgent for a renewal of the charter of the Bank of the United States, design to confine themselves to such facts, circumstances, and impressions, as are immediately within their own experience and observation. They are sensible that it would be unnecessary to urge upon your consideration any inducement for the continuance of the bank, which may be drawn from its convenience and aptitude to the financial operations of the Government; nor do they deem it proper to obtrude upon your deliberations, arguments in favor of the constitutional existence of an institution, which, for twenty years, has had the support of legislative and judicial sanction, and the express respect of our united confederacy. They are aware that these points are of the first importance, and that they, with every other national consideration connected with the question of renewal, will command your pointed attention; their views simply are, to present before you such facts, connected with the interest of the citizen, and the well-being of the community, as, in their conception, lay the foundation for practical reasoning in favor of a prolongation of the charter.

The Bank of the United States derives its existence from an act of Congress, passed in February, 1791, coeval with the organization of the Government, and its arrangement of the system of revenue and finance; it had its origin, not from individual solicitation, interest, or speculation, but directly from the Government itself, and avowedly for its purposes. By the striking declaration of its charter, that "a Bank of the United States shall be established," and the still more striking provisions which it contains, in relation to the payment of three-fourths of its capital in the public debt; to the inspection of its accounts and transactions, by the officer at the head of the treasury; to the receipt of its bills, or notes, in all payments to the United States; to its loans to the government of a particular State, or a foreign Prince; by a direct investment of interest on behalf of the nation, to the extent of one-fifth of its capital; and by a positive pledge of the faith of Government, for its exclusive existence under the laws of the United States, were impressed upon it the most unquestionable features of national character, and lasting continuance. From its origin, its form, and its principles, its duration has been confidently trusted to, in the purchase of its stock, in the establishment of similar institutions, and in the extension of commercial enterprise.

In the purchase of its stock, your memorialists regard, within the immediate sphere of their connexion and observation, an interest, to the amount of one million of dollars, in the citizens of Pennsylvania. This interest, extending to the proportion of one-tenth part of the capital of the bank, and, as is stated, to one-third part of the stock holden in the United States, has been principally invested at an advance upon the original subscription, which has been paid from faith in the management, and confidence in the duration of the institution. This interest, in a large proportion, also, it may be truly stated, is the property and dependence, invested upon a principle of security and confidence, of widows, orphans, and charitable associations. To stockholders of this description, the dissolution of the bank must inevitably produce a loss of income and interest, to which they look for support, and of capital, to an extent which no calculation can ascertain. And your memorialists cannot but think, that a sacrifice of interest of such a description can never be required, and will never be made, but to answer national purposes the most important.

To the extent of nearly seven millions, your memorialists understand, the stock of the bank to be holden by foreigners, or persons not residing within the United States. That there has existed no objection, either of policy, or propriety, on the part of the Government, to the holding of this stock by aliens, is evinced by the charter's containing no prohibition, and by the recent sale, directly to foreigners, of that portion of the stock holden by the United States. That this extensive interest has been invested from a firm reliance upon the continuance of the bank, cannot be doubted; with what propriety, and upon what foundation, that reliance has been placed, your memorialists do not undertake to decide, but content themselves with expressing their confidence, that your wisdom and justice will scrupulously guard the faith of the Government from every imputation.

In the establishment of similar institutions under the sanction of the different State governments, your memorialists conceive that there has been displayed a reliance upon the continuance of the Bank of the United States. In all parts of the Union, where this bank or its branches exist, other banking associations have been established, the interest and concerns of which are materially interwoven with the existence of the National Bank. In the city of Philadelphia, the capital of the banks, exclusive of that of the Bank of the United States, amounts to nearly six millions of dollars, in which the State of Pennsylvania has an interest to the amount of nearly two millions of dollars, and citizens of the State to almost the whole of the residue.

From the collection of the bonds for duties, at the Bank of the United States, it unavoidably results, that there is in that bank a great and constant accumulation of the paper of the other banks. This cause, combined with its weight of capital and extensive deposits, has given to the Bank of the United States an obvious importance in the connexion with other banks, which now renders its continuance almost indispensable to their safety; for, your memorialists are without fear of contradiction when they assert, that, if the Bank of the United States be dissolved, an effect, extensively and deeply injurious, will be felt by all other banking institutions within the range of its operations. In their apprehension, it is impossible that the Bank of the United States should exact payment from its debtors, and close its concerns, without its producing all the evils of prostrated credit, and general delinquency. In these evils the other banks must largely share, and from them must most severely suffer.

Your memorialists, on this point, submit to your consideration, that neither the individuals, who have thus extensively embarked their interests in other institutions, nor the Governments which have brought them into being, and made them the depositories of the public wealth, could have ever contemplated their exposure to this incidental injury, or, perhaps destruction, by the dissolution of the National Bank; and even if such an exposure might have been contemplated, the event could only be anticipated to proceed from the most pressing public exigency, or a sure calculation of the greatest public gain.

In the extension of commercial enterprise, your memorialists present to your view, further and stronger evidence of reliance upon the continuance of the bank. The establishment of the bank may justly be regarded as the era which marks the rise of commercial credit, confidence, and enterprise. A recurrence to the state of our country, antecedently to this establishment, will show the truth of the remark, and leave no doubt upon the mind, as to the instrumentality of the bank in effecting the change. The formation of the bank called into circulation a mass of torpid wealth, opened large and liberal sources of accommodation to enterprise, and enforced, and insured, punctuality in commercial dealing; the effect was soon and sensibly felt by the commerce and agriculture of the country, and its salutary character has been shown, in the general diffusion of confidence and prosperity. No sooner was the bank established upon that sure foundation, on which faith in its permanence and direction caused it to rest, than its stock advanced in value, and attracted a large amount of foreign capital to the country; from the introduction of this foreign capital, which was invested at a high advance, proceeded these important results: that the citizen

realized a gain in the advance paid by the foreigner, and the country was enabled to trade upon the foreign capital at an interest below its market value. Other institutions rose upon the liberated capital of the citizen, and a general system of accommodation gave a spring to enterprise; the merchant, mechanic, and manufacturer, whose probity and industry inspired confidence, was enabled to obtain the means of exertion, and to extend his transactions. The borrowers have calculated with confidence upon a continuance of the loan, so long as they are deemed safe for its repayment, and have not anticipated a demand which may find them unprepared, and cost them a sacrifice of either property or credit.

It is upon this foundation, that extensive commercial and manufacturing concerns have arisen in the country; and large investments have been made upon the faith of a continuance of general credit. To dissolve the Bank of the United States, is not only to check, but to destroy, this credit, inasmuch, as not only that bank, but all others at all connected with it, must compel the payment of their debts. In such an event, it cannot be supposed that the debtors could find adequate resources to enable them to meet their engagements; and an extensive delinquency would mark the loss of the banks, and the destruction of credit.

Your memorialists are aware that it may be urged, that the limitation in the charter of the Bank of the United States was a standing admonition to the various interests connected with that institution, that a period was appointed for its legal existence, which it could not reasonably be expected to pass. From the existence of this limitation, open and notorious to all, it is argued, that no injustice can arise from the refusal of Government to grant a continuance of privileges, beyond the time for which they were originally conferred; but your memorialists are confident that they speak the language of general opinion, when they state, that the limitation was designed as a check, by which the institution might be controlled, as a guard against the mischiefs of a defective administration, or as a point of time when it might come to an end, if it were required, by decisive reasons of public necessity; but that it never was designed, and never has been received, as the period of its dissolution, if its administration was marked by ability, integrity, and impartiality, and its existence productive of public good.

To the administration of the bank, your memorialists freely yield the testimony of their decided approbation; so far as the transactions of the bank have been open to their observation, its direction has displayed a liberal desire to subserve the great objects of the institution, by diffusing, with impartiality, its accommodations to the greatest extent, compatible with its fundamental interests. It is but justice to this direction, further to add, that during the current year, a crisis of the greatest interest to the bank, as your memorialists fully believe, its accommodations have not been contracted within the limits appointed by sound considerations of safety and propriety.

How far the convenience of the Government may be affected by the dissolution, or by a material alteration of the bank, your memorialists do not undertake to declare; they entertain, however, the strongest persuasion, that considerations, not only of great convenience, but of necessity, as regards the interest of individuals, and the prosperity of the community, urge the continuance of the bank. On this point your attention is earnestly solicited to the existing state of the country; its unavoidable reliance upon accommodations from the banks; the use, convenience, and importance of the Bank of the United States, in its present form, to the community, and the evils which impend from its destruction.

In a view of the state of the country, at the present moment, as connected with this subject, the following particulars, they trust, will receive your attention: The commerce of the United States, from a combination of causes, has been, for a period of no inconsiderable duration, subject to great embarrassments. During the current year, this embarrassment has been much increased, and the merchant is laboring under the pressure of a heavy sequestration of property abroad, and a failure of resources at home. Of the property which is sequestered, a large proportion had long lain unproductively on the merchants' hands, and was exported with the hope of being converted into the means by which his engagements might be met. Under such circumstances, the reliance of many is necessarily upon a temporary use of the capital found in the banks, to which they have confidently trusted, as a resource, whilst their credit shall continue, and until their property shall be relieved.

In the current year the exportation of specie from the United States has been to its accustomed extent, and the importation has been inconsiderable in amount. This circumstance has, of course, tended to increase the embarrassment of the merchant, inasmuch as it has necessarily contracted his accommodations. From these causes it has resulted, that the demand for money is uncommonly great, and the means for supplying that demand are unusually limited.

In this state of things, the mercantile part of the country, sees before it, in the coming year, an extraordinary amount of debt to the United States, for duties, a large proportion of which, is payable upon goods that have hitherto been unproductive; and it anticipates the privation of that aid, which the bank has always been accustomed to give towards the payment of the Custom House bonds. In addition to this, with the expiration of the charter of the Bank of the United States, it sees a suspension of the circulation of fifteen millions of dollars, the stated amount of its ordinary accommodations. It sees an accumulation of the precious metals in the bank, to the amount of its capital; it sees seven millions of that capital withdrawn from the country; and it sees, that payment of duties can no longer be made to the Government in the notes of the National Bank, but that payment must be made in specie. With this prospect, and the additional certainty, that accommodation and confidence will be universally succeeded by exaction and distrust, your memorialists are persuaded, that it will be in vain for individuals, for the chartered institutions, or the Government itself, to expect the fulfilment of engagements, or to rely upon the performance of contracts.

To the minds of your memorialists, the Bank of the United States, in its present form, presents a striking character for its use, convenience, and importance to the community. In addition to the various points of view in which its value has been already considered, its uses are further to be regarded, in its affording a convenient and safe medium of circulation throughout the United States; and in the facilities which it grants, by means of its drafts, in the transposition of funds from one part of the country to another, with perfect security. In a national and individual point of view, its utility is also displayed, in having and exercising, by means of its peculiar connexion of several branches in one common interest, the power of guarding against the inconvenience and evil, which might result from the balance of trade between different parts of the Union, producing a local deficiency of the circulating medium. But, above all, your memorialists regard as inestimable, an institution which, in its ample resources, possesses the power, and in the independent and liberal spirit of its direction, manifests the will, effectually to aid both Government and the private citizen, in a case of sudden and serious emergency.

To predict, with certainty, the extent of the evils which must inevitably flow from a dissolution of the bank, is beyond the power of your memorialists. They conceive that, among these evils, however, may certainly be placed an extensive and aggravating loss, by all persons interested in the banking associations of the country, a destructive disregard of punctuality in the performance of contracts, both towards the Government and the citizen; a wide spreading bankruptcy, which will be felt by the commercial, manufacturing, and agricultural interests; a diffidence of the stability of Government, both at home and abroad, and a prostration of that confidence and credit, which have so happily and successfully administered to the enterprise and prosperity of the country.

From the view which your memorialists have taken of this subject, and the observations which they have submitted to your consideration, it is apparent, that their earnest prayer to you is, that a renewal of the charter of the Bank of the United States may be granted; and a confirmation thereby be given to public confidence, private tranquility, general credit, and national prosperity.

CONDY RAGUET,
And one hundred others.

11th CONGRESS.]

No. 330.

[3d Session.]

ASSAYS OF FOREIGN COINS.

COMMUNICATED TO THE SENATE, DECEMBER 27, 1810.

The Secretary of the Treasury, in obedience to the act, entitled "An act regulating the currency of foreign coins in the United States," respectfully reports:

That the assays of the foreign gold and silver coins, made current by the said act, have been made at the Mint of the United States, conformably thereto; the result whereof is shown in the letter of the Director of the Mint, dated December 19, 1810, which is annexed to this report, and which is prayed to be received as part thereof.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, December 24, 1810.

MINT OF THE UNITED STATES, December 19, 1810.

SIR:

I have the honor to acknowledge the receipt of your letter of 22d ultimo, and have, according to your desire, caused assays to be made of the several species of foreign coins, made current in the United States by an act of Congress, passed the 10th of April, 1806, and the following, according to the Assayer's report, is the result:

Gold coins of Great Britain.

No.	Quantity	Description	Year	C.	grs.
No. 1,	made of 5 pieces	of promiscuous dates prior to	1806,	-	-

6,	" 5 do.	dated	1810,	-	-	-
				10	15	0

From the foregoing assays, it appears—

1. That the gold coins of Great Britain, and Portugal, being of the same quality with those of the United States, viz: 22 carats fine, or $\frac{1}{12}$ part alloy, are, by the act of Congress, rated at their true intrinsic value of 27 grs. to the dollar or 100 cents.

2. That the gold coins of France, averaging 21 c. $2\frac{3}{8}$ grs., (very nearly) would require $27\frac{52}{100}$ grains to the 100 cents, instead of the legal weight of $27\frac{40}{100}$ grs.

3. That the gold coins of Spain, averaging about 20 c. 3 grs., would require $28\frac{62}{100}$ grs. to the 100 cents, instead of the the legal weight of $27\frac{40}{100}$ grs.

4. That the silver French crown, weighing, as the law required, 18 dwt. 17 grs., and of the quality 10 oz. 19 dwt., as per assay, would, compared with the quality and weight of the silver coins of the United States, be equal in value to about $\frac{30}{100}$ parts of a cent, more than that established by law.

5. That the Spanish silver dollar, of the legal weight of 17 dwt. 7 grs. and of the quality of 10 oz. 15 dwt. 6 grs. the average per assay, would, by a like comparison with the silver coins of the United States, be equal in value to about $\frac{23}{100}$ parts of a cent more than the value established by law.

It may, however, be observed, that the foreign silver coins, especially those that have been long in circulation, are seldom of the above weights; and, therefore, their value, as current by tale, will be generally less than that stated above.

I have the honor to be, with great respect and esteem, your most obedient servant,

R. PATTERSON.

The Honorable ALBERT GALLATIN, *Secretary of the Treasury of the United States.*

11th CONGRESS.]

No. 331.

[3d SESSION.]

CURRENCY OF FOREIGN COINS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 27, 1810.

Mr. QUINCY, from the committee to whom was referred the bill from the Senate, "to suspend the second section of the act, entitled 'An act regulating foreign coins, and for other purposes,'" made the following report:

That the general design of the bill being to increase the current money of the United States, by authorizing foreign gold and silver coins again to become a legal tender, is important in its object, and may be beneficial in its consequences. It is very apparent, that the denial to foreign coins of the privileges of currency, and of being a legal tender, has, at once, the combined effect of circumscribing the just sphere of mercantile action, and of encouraging the exportation of that species of coin, to which these privileges are denied. In the present circumstances of the United States, it seems peculiarly unadvisable to permit any statute prohibitions to continue, which have a tendency to produce such an effect. The statute currency of the United States, which now consists only of the coinage of the mint of the United States, and of Spanish milled dollars and parts of dollars, is, also, probably insufficient for the ordinary necessities of domestic exchange, and is certainly wholly inadequate to support any peculiar embarrassment of our circulating medium, which, in the event of the dissolution of the Bank of the United States, cannot but be anticipated. Your committee were, therefore, of opinion, that foreign gold coins ought to be made current money and a legal tender.

Your committee, having caused a letter to be addressed to the Secretary of the Treasury, in relation to the former statute rate at which foreign coins were made current, received from him the two letters accompanying this report. From which it appears, that the gold coins of Spain and its dominions, had been estimated by the former statute of the United States, at a rate of four per cent. above their intrinsic value; in other words, that the quantity of pure gold contained in twenty-seven grains and two-fifths of a grain of Spanish standard coin, instead of being equal in value to *one hundred cents*, the statute rate, was only equal in value to about *ninety-six cents*.

Upon receiving this information, two general inquiries were suggested for the consideration of the committee. 1st. Whether, in again vesting Spanish gold coin with the character of current money of the United States, it were expedient to establish the old statute rate, now discovered to be erroneous, or, whether a new statute rate for it should be established, which should conform to its intrinsic value? 2d. Upon the supposition that it should be deemed advisable to enact a new statute rate for it, conformable to its intrinsic value, whether, as a loss of four per cent. upon all the Spanish gold in the United States, would thus be incurred, by the present holders, in consequence of no fault of theirs, but solely by reason of the erroneous estimate of a law of the United States, any moral or equitable considerations required that this loss should be assumed by the United States?

Concerning the first object of inquiry, the committee will attempt to add nothing to the satisfactory elucidation contained in the letter of the Secretary of the Treasury, and only express their entire concurrence with his opinion, that "the statute rate of these coins should be made to conform with their intrinsic value."

With respect to the second inquiry, which the Secretary represents as "of a more doubtful nature," the committee were of opinion, that, whatever equitable considerations might exist, the attempt to apply relief, under the particular circumstances of this loss, was inexpedient, and, for the most part, impracticable. For, it is very apparent, that there is no foundation or color for indemnification, on account of any receipts of these coins, subsequent to the 10th of April, 1809, when the law making them a legal tender expired. Now, so far as it respects individuals, the cases (if such in fact exist) in which the present holders of those coins received them, antecedent to that period, must be so extremely rare, as to render a general provision for their relief, scarcely necessary. And, as to banks, such is the successive circulation of specie through their vaults, that it is hardly to be supposed, that any one institution in the United States could distinguish the amount of this species of coin, which it had received prior to the 10th of April, 1809, from that which it had received subsequently. And, although, in a few instances, this might be the case, yet, it seems far better that in these, the loss should remain where it has fallen, than that the community should be exposed to the multiplied frauds and inconveniences which the attempt to indemnify, upon any general principle, would inevitably introduce.

Your committee, upon recurring to the acts existing on the subject of the bill from the Senate, in connexion with the proposed alteration in the rate of Spanish gold coins, found that the operation of the respective provisions would be embarrassing and confused, in their nature, and inconvenient in their form. The bill from the Senate, proposed to suspend the second section of "An act regulating foreign coins and for other purposes." This act passed on the 9th of February, 1793, and the effect of this suspension was, to revive the provisions of an act passed on the 10th of April, 1806. Whether the intended, would be the legal result, your committee had some doubt. But they had none that the proposed, was a very inconvenient circuit, to a direct object. They were also of opinion, that it was highly expedient that all the provisions, touching a subject of such universal concern, should be concentrated in one bill, and divested of every thing which might embarrass research. They, therefore, report the whole bill from the Senate stricken out, after the enacting clause, and propose an amendment, comprehending all the provisions necessary on the subject of the currency of foreign coins.

[Strike out from the word "that," in the second line, and insert,]

From and after the passage of this act, foreign gold and silver coins shall pass current as money within the United States, and be a legal tender for the payment of all debts and demands, at the several and respective rates following, and not otherwise, viz:

The gold coins of Great Britain and Portugal, of their present standard, at the rate of one hundred cents for every twenty-seven grains of the actual weight thereof; the gold coins of France, of their present standard, at the rate of one hundred cents for every twenty-seven grains and an half of a grain of the actual weight thereof; the gold coins of Spain, and the dominions of Spain, of their present standard, at the rate of one hundred cents for every twenty-eight grains and sixty hundredths of a grain of the actual weight thereof. Spanish milled dollars, at the rate of one hundred cents for each, the actual weight whereof shall not be less than seventeen pennyweights and seven grains, and in proportion for the parts of a dollar. Crowns of France, at the rate of one hundred and ten cents for each crown, the actual weight whereof shall not be less than eighteen pennyweights and fifteen grains and an half of a grain, and in proportion for the parts of a crown. And it shall be the duty of the Secretary of the Treasury, to cause assays of the foreign gold and silver coins made current by this act, to be had at the mint of the United States at least once in every year, and to make a report of the result thereof to Congress, for the purpose of enabling them to make such alterations in this act as may become requisite from the real standard value of such foreign coins. And it shall be the duty of the Secretary of the Treasury, to cause assays of the foreign gold and silver coins, of the description made current by this act, which shall issue subsequently to the passage of this act, and shall circulate in the United States, at the mint aforesaid, at least once in every year, and to make report of the result thereof to Congress, for the purpose of enabling Congress to make such coins current, if they shall deem the same proper, at their real standard value.

Sec. 2. *And be it further enacted*, That, at the expiration of three years from and after the passing of this act all foreign gold coins, and all foreign silver coins, except Spanish milled dollars, and parts of such dollars, shall cease to be a legal tender as aforesaid.

Sec. 3. *And be it further enacted,* That the act, entitled "An act regulating the currency of foreign coins in the United States," and also every section and parts of sections of any act or acts heretofore passed relative to the currency of foreign coins in the United States, be, and the same are hereby, repealed.

SIR:

TREASURY DEPARTMENT, *December 17th, 1810.*

I had the honor to receive your letters of the 14th and 15th instant. The assays for the year 1810 are daily expected, but not yet received. I, therefore, beg leave to refer the committee, to those made according to law, in the year 1809, the result of which is exhibited in the letter of 29th June, 1809, from the Director of the Mint, annexed to the report from this department, of 8th December, 1809.

It appears from those assays that the intrinsic value of all foreign coins, the gold coins of Spain excepted, which were made a legal tender by the act of 10th of April, 1806, either agrees precisely with the legal value fixed by that act, or differs from it by so small a fraction, as to render any alteration in that respect unnecessary. But the difference in the value of Spanish gold coins is considerable.

It will be recollected, that the value of gold coins of the United States is established in conformity with the following principles, viz:

1st. The unit, or silver dollar, contains $371\frac{1}{4}$ grains of pure silver.

2d. The comparative value of gold and silver is in the ratio of 15 to 1; that is to say, that fifteen ounces of pure silver, are, according to law, equal in value to one ounce of pure gold.

3d. The standard gold, or that of which gold coins of the United States are made, contains eleven parts of pure gold and one part of alloy; or one-twelfth part of its weight is alloy.

Thence it follows, 1st that $24\frac{3}{4}$ (being the 15th part of $371\frac{1}{4}$) pure gold, are equal to one dollar. 2dly, that 27 grains of standard gold of the United States, containing $24\frac{3}{4}$ grains of pure gold, are also equal to one dollar.

In fixing the rate at which foreign coins should pass, the object was to ascertain the standard, or quantity of pure gold contained in a given weight, and to place them, according to that intrinsic value, exactly on a par with coins of the United States. The act of 10th of April, 1806, was predicated on the supposition that $27\frac{3}{4}$ grains of Spanish standard gold contained $24\frac{3}{4}$ grains of pure gold, and were, therefore, equal in value to 27 grains standard gold of the United States, or to one dollar current money of the United States. But that supposition is proven by the assays to have been erroneous; the standard of Spanish gold coins being worse, or containing more alloy, than was then believed. That standard varies according to the years of the coinage. The coins of the year 1806, are the lowest and worst by more than four and a half per cent., than the value fixed by the act of 10th of May, 1806. Those of the year 1807, are worse than those of the year prior to 1806; and those of the year 1808, are worse than those of 1807. Those of the years prior to 1806, though better than the subsequent coinages, are almost three and a half per cent. worse than the value fixed by the act of May, 1806.

Taking the general average of the several coinages, it appears that they should be taken at the rate of $28\frac{53}{100}$ grains, (instead of $27\frac{3}{4}$) for one dollar; and that the difference between their intrinsic value and, that fixed by the act of April, 1806, is almost four per cent. ($3\frac{22}{100}$ per cent.)

If, therefore, the act should be revived, without any alteration, every person receiving those coins in payment, would, in fact, be compelled to receive only ninety-six instead of one hundred cents on every dollar paid to him. The unavoidable effect of putting in circulation any one species of coin, at a rate higher than its known intrinsic value, is to invite its importation and increased circulation, and to drive out of circulation the other species. Every bank, if called on to pay its notes in specie, will, in that case, pay with that species of coin; and the whole paper circulating medium must, after a while, be depreciated in the same proportion. The only guard against the abuse, and consequent depreciation of bank paper, is a strict adherence to the principle, that payment may, at any time, be demanded in specie, rated at its intrinsic value.

On the other hand, it is not less true, that the gold coins of Spain, were made a legal tender by law, for a certain number of years, at a higher rate than they were really worth; that, to the very last day of that period, every person was compelled to receive them in payment, at that rate; and that, at the expiration of the period, a quantity of that gold necessarily remained in the hands of some persons, on whom the loss falls, by the unavoidable effect of the law, and without any fault of theirs. It is in order to relieve those persons, that it is proposed to make the loss fall on the community, by reviving the law, without alteration; that is to say, by putting again the coins in circulation, at a higher rate than their intrinsic value.

The two questions put by the committee, are, whether, the statute rate of these coins should not be made to conform with their intrinsic value, and whether, in order to relieve individuals from the loss resulting from the late erroneous legal estimate of their value, it would not be eligible that the difference should be paid by Government.

To the first question, I can have no hesitation, for the above mentioned reasons, to answer in the affirmative. The second question is of a more doubtful nature. But if it shall be thought just, that the loss should fall on the community, rather than on individuals, it will certainly be preferable to pay at once the difference, rather than knowingly to make the coins again a legal tender, at a higher rate than they are worth. Should that measure be adopted, the mode proposed by the committee, viz: to direct the mint to receive that species of gold, for a short time, at the former statute rate, the United States paying the difference, appears also the most simple and eligible manner of effecting the object. The following provisions are, in that case, respectfully suggested:

1st. That, as the assays of the coins of the years 1809 and 1810, have not yet been received, and, as Spanish gold ceased to be a legal tender early in the year 1809, the revival of the law making them a legal tender should apply only to coins coined prior to the year 1809.

2d. That, for the same reasons, the statute value should be fixed at a rate not higher than the average, of the assays heretofore made; that is to say, that they should pass at a rate not higher than $28\frac{53}{100}$ grains, for one hundred cents.

3d. That, for the same reasons, the obligation on the mint to receive those coins, at their former statute rate, should be limited to coins coined prior to the year 1809.

4th. That, as the indemnification to the individuals, arises from equitable considerations, and not from an absolute legal obligation, the period during which the coins shall be received at the mint, at their former statute value, be made so short as to preclude the possibility of embracing speculative importations. One month from the passing of the law would seem sufficient.

5th. That no such coin shall be thus received at the mint, at its former statute value, unless proof, or at least an affidavit be made, that the persons claiming the benefit of the provision, had actually received the same at that value prior to the time when the law making it a legal tender expired.

It will also be necessary, in that case, that an appropriation should be made to enable the mint to carry the provision into effect. The amount of that appropriation, should be at the rate of four per cent. on the supposed amount of Spanish gold now in the United States, which may be embraced by such provisions. But, having no knowledge whatever of that amount, I cannot suggest any precise sum.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Honorable JOSIAH QUINCY, *Chairman, &c. in Congress.*

TREASURY DEPARTMENT, *December 24th, 1810.*

SIR:

This year's assays, have been received, and will be sent to-morrow to Congress. These make the average for French gold coins $27\frac{52}{100}$ grains, and for Spanish coins, $28\frac{62}{100}$. It must also be observed, that French crowns were

rated too low. Instead of its being necessary that they should weigh 18 pennyweights and 17 grains, they ought to be received, if weighing 18 pennyweights and $15\frac{1}{2}$ grains; it appearing from the assays, that, if of the first mentioned weight, they are worth 110 cents and $\frac{36}{100}$ of a cent, instead of 110 cents.

I have the honor to be, respectfully, sir, your obedient servant,

ALBERT GALLATIN.

Honorable JOSIAH QUINCY, *in Congress.*

11th CONGRESS.]

No. 332.

[3d SESSION.]

MINT.

COMMUNICATED TO THE SENATE, JANUARY 7, 1811.

To the Senate and House of Representatives of the United States:

I communicate, for the information of Congress, the report of the Director of the Mint, of the operation of that establishment during the last year.

JAMES MADISON.

January 7, 1811.

MINT OF THE UNITED STATES, *January 1, 1811.*

SIR:

I have the honor of laying before you a report of the operations of the Mint for the last twelve months.

During that period, as appears by the Treasurer's statement, herewith transmitted, there have been struck at the mint—

Of gold coins, in half eagles, 100,287 pieces, amounting to \$501,435.

Of silver coins, in half dollars and dimes, 1,282,631 pieces, amounting to \$638,773 50.

Of copper coins, in cents and half cents, 1,673,500 pieces, amounting to \$15,660.

Making, in the whole, three millions fifty-six thousand four hundred and eighteen pieces of coin, amounting to one million one hundred and fifty-five thousand eight hundred and sixty-eight dollars and fifty cents.

Of bullion, for coinage, which has hitherto been furnished chiefly by the Bank of the United States, there still continues to be an ample supply.

I have, sir, the honor to be, with sentiments of perfect respect and esteem,

Your most obedient faithful servant,

R. PATTERSON.

JAMES MADISON, *President of the United States.*

A Statement of the Coins struck at the Mint of the United States, from the 1st of January to the 31st of December, 1810, inclusive, viz:

				GOLD COINS.		Amount in dollars and cents.	Total.
				Half Eagles.			
Quarter ending 31st March,	-	-	-	22,060		\$110,300 00

MINT OF THE UNITED STATES, *Treasurer's Office, Philadelphia, 31st December, 1810.*

BENJAMIN RUSH.

11th CONGRESS.]

No. 333.

[3d Session.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, JANUARY 8, 1811.

To the Senate and House of Representatives of the United States, the memorial of the President and Directors of the Bank of New York, respectfully sheweth:

That, viewing with solicitude the question now before your honorable houses, for the renewal of the charter of the Bank of the United States, they feel it their duty to express, with all submission, their sentiments upon the subject.

They will not presume to enter into any general discussion of the utility of banking institutions, but will confine their observations to those points, which their situation, as directors of a bank, gives them, perhaps, peculiar advantages in judging of.

They view the institution of the Bank of the United States, as highly useful to the State banks. From the extent of its capital, its numerous branches, and, above all, from the protection of the Government, it is enabled to facilitate remittances to every part of the United States, to equalize the balance of specie capital among the different cities, and, in cases of any sudden pressure upon the merchants, to step forward to their aid, in a degree which the State banks are unable to do. It is also able to assist any State institution, which, from peculiar circumstances, may require it.

The bank of New York having been established prior to the incorporation of the Bank of the United States, the directors have witnessed, from the very commencement of the branch bank in this city, the influence of such an institution, as well as the conduct of those, to whose management it has been entrusted during that whole period, and your memorialists declare, with confidence, that, in their opinion, that power has been uniformly exerted with prudence, as it respected the public; with great liberality as it respected other institutions.

At any period, great inconveniences must result from the sudden withdrawing a considerable portion of the active capital of a commercial country; but, in the opinion of your memorialists, such an event would be attended with peculiar distress, at the present time, when, from the aggressions of foreign Governments, such immense sums have been sequestered, and, in various ways, detained, in Europe and when the merchants, from the embarrassments of commerce in almost every quarter, are deprived of their usual resources. It is well known that there never has been a greater demand for money in the commercial cities than at the present time, although it appears that the Bank of the United States has not yet commenced that reduction of its loans, which must take place, in case of the charter not being renewed. The demands already made upon the State banks have pressed them to their utmost limits, and, from these causes, they will be utterly unable to supply, in any considerable degree, that aid which has hitherto been afforded by the Bank of the United States. The consequences must be, very great and individual distress, and heavy losses, as well to the revenue as to all the moneyed institutions. The renewal of the charter of the Bank of the United States will render such reductions unnecessary, and, by relieving the apprehensions now excited through almost every class of the community, restore that confidence so essential to the system of public credit, under which the United States have so much prospered.

Your memorialists, therefore, cannot but hope and solicit that the charter of the Bank of the United States may be renewed.

M. CLARKESON, *President.*

Attest.

CHARLES WILKES, *Cashier.*

11th CONGRESS.]

No. 334.

[3d Session.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 10, 1811.

The Secretary of the Treasury, in obedience to the resolution of the House of Representatives, of the 3d instant, respectfully reports:

That the annexed statements, marked A, B, and C, contain all the information which the returns made to the Treasury afford on the subjects embraced by the resolution aforesaid.

It appears, by the statement A, that the debts due from individuals and bodies corporate to the Bank of the United States, consisted, at the respective dates of the several returns, of the following items, viz:

Bills and notes discounted, and bonds due by individuals,	-	-	-	-	\$15,126,187 04
Balance due by other banks in account, after deducting the sums due by the Bank of the United States and its branches, to several other banks,	-	-	-	-	1,318,024 29
Bank notes of other banks, on hand,	-	-	-	-	511,909 06
Treasury drafts not yet collected,	-	-	-	-	31,466 01
Overdrawn,	-	-	-	-	32,579 07
Converted six per cent. stock,	-	-	-	-	23,066 23
					<hr/>
					17,043,231 70
To which, adding the loan to the United States,	-	-	-	-	2,750,000 00
					<hr/>
Makes, for the aggregate of debts due to the bank,	-	-	-	-	\$19,793,231 70

In a few instances, which are noted in the statement A, the amount due on bonds, and also that of notes discounted, which have been put in suit, is distinctly stated in the returns made to the treasury; but the aggregate alone is given in most of them, and they do not, in any instance, distinguish the amount "considered as standing accommodation to the customers of the bank and its branches." A recurrence to the 16th regulation of the 7th section of the act incorporating the bank, will show, that the only statements that can be required by the officer at the head of the treasury, are those of the *amount* of the capital stock of the corporation, of the debts due to the same, of the moneys deposited therein, of the notes in circulation, and of the cash in hand; and that he has no right to ask for the account of any private individuals, or for any other than the above mentioned general statements. Nor has the Secretary of

the Treasury any knowledge whatever of the accounts and operations of the bank, but what is derived from the official statements transmitted to him in conformity with the above mentioned provision in the charter.

The statement B shows the amount of notes of the said bank, and its branches, in circulation at the date of the latest returns, to have been 5,157,378 dollars and 83 cents.

The Treasurer's accounts, annually laid before Congress, show correctly the amount of public moneys deposited in the various banks, on the last day of each quarter. But that amount is daily fluctuating, and cannot be stated with perfect precision, except on the quarterly statements of those accounts. The Treasurer furnishes, however, the Secretary of the Treasury with a weekly estimate of the cash on hand, and where deposited, as taken from the latest received returns. A copy of that furnished on the 7th instant, marked C, is herewith transmitted, together with remarks showing what portions of the revenue are generally deposited in the Bank of the United States and its branches, and what portions are deposited in other banks.

It is probable that the amount of specie in the treasury will, on the first day of March next, exceed 2,500,000 dollars, and that the proportion deposited in the banks, other than that of the United States and its branches, will not materially vary from what it is at present. But it is impracticable to form any correct estimate of the probable amount at that time in each place, respectively, since that is always regulated by the want of funds in each place, for the current service, according to which the public moneys are daily transferred by drafts, from place to place, as the occasion may require.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, *January 9, 1811.*

REMARKS.

(a.) The Collectors of Philadelphia, New York, Boston, Baltimore, Norfolk, and Charleston, are directed by act of 10th May, 1800, to deposit for collection in the Bank of the United States, or one of its branches, all the revenue bonds. After the establishment of the branches at Savannah and New Orleans, the same regulation was adopted in those two places. The greater part of the revenue collected in North Carolina and Massachusetts is, also, ultimately drawn into the branches of Charleston, Norfolk, and Boston. And it must also be noted that the notes of the bank are, by the 10th section of the act of incorporation, made receivable in all payments to the United States.

(b.) The deposits in these banks arise from payments made by several Collectors of the District of Maine, and of the State of Rhode Island.

(c.) The deposit in this bank arises from the occasional collection of the surplus revenue in the States of Rhode Island and Connecticut.

(d.) The deposits in these banks arise altogether from payments made on account of the sales of public lands, by the Receivers of public moneys.

(e.) The deposit in this bank arises from occasional drafts on some Collectors in Virginia, and from the receipt of moneys paid at the treasury for lands, patents, &c. in bank notes not receivable at the Office of Discount and Deposit, Washington.

(f.) This deposit arises from the payments made by the Collector of Alexandria.

* Viz: Sum advanced on 31st December, 1810, on account of the loan to the United States, not yet included in the bank return to the Treasurer; the latest received being dated December 29th,	\$500,000 00

11th CONGRESS.]

No. 335.

[3d Session.]

MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 11, 1811.

The Secretary of the Treasury, in obedience to the resolution of the House of Representatives of the 2d instant, respectfully reports:

That the whole expense of the Mint of the United States, since its first establishment to the end of the year 1809, has amounted, as will appear by the annexed statement, marked A, to - - - \$387,414 24
 That the profits on the copper coinage, have, during the same period, amounted to - - - 37,331 52
 As will appear by reference to the statement marked B, transmitted to Congress on the 15th day of March, 1810, [see No. 318,] together with the annual report of the Comptroller on that subject.

Leaving for the nett expense of the Mint, - - - - - \$350,082 77

That the gold coined at the mint, during the same period, amounts in value, to - - - \$3,763,597 50
 The silver coined during the same period, to - - - 4,370,846 50
 And the copper coined during the same period, and paid into the Treasury, to - - - 211,702 21

Making, altogether, in value, - - - - - \$8,346,146 21

As will appear by the above mentioned statement A.

And that there are no documents in the Treasury by which the actual rate per cent. of expense in refining gold-bullion below the standard fineness, can be ascertained; the deduction authorized in that case by the 5th section of the act of the 3d of March, 1795, being the only item which is stated in the accounts rendered by the officers of the mint, and its not being known whether that deduction is equal to the actual expense incurred.

It may not be improper to observe, 1st, that in the official statements of the profits on copper coinage, that coinage is not charged with any portion of the general expenses of the mint; and that although this cannot be correctly stated, it is evident, from a comparative view of the number of pieces coined at the mint, that it must exceed the whole amount stated as the nominal profit on that coinage. 2d. That the first cost of buildings and apparatus, being a charge on the whole coinage, and that of the precious metals having considerably increased, the rate per cent. of expense on the whole coinage has diminished, and continues every year to diminish.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, January 10, 1811.

11th CONGRESS.]

No. 336.

[3d SESSION.]

ENCOURAGEMENT TO MANUFACTURES.

COMMUNICATED TO THE SENATE, JANUARY 22, 1811.

To the honorable the Congress of the United States, the memorial of the subscribers, citizens of the town of Lexington, and county of Fayette, and State of Kentucky, respectfully sheweth:

That the present situation of the mechanics and manufacturers of the United States, is peculiarly interesting to the people generally, and well deserves the attention of Congress. In all the acts and deliberations of your honorable body, it appears to your memorialists, that a predilection for the interest of commerce has always been discoverable, whilst little has been done in favor of the internal industry of the country. Your revenue system, it must be confessed, has afforded it some partial protection; but that system appears to have been calculated only for the purposes of revenue; and, as powerfully as it might be made to encourage domestic manufactures, no act seems to have been adopted with that view; on the contrary, commerce has met with your exclusive protection and support. To prove this, let us refer to the immense sums which have been expended in the fortification of the sea-ports; to the establishment of a navy; to the expenditures occasioned by our intercourse with foreign nations; to the duties which have been laid on foreign tonnage; to the bounties which protect the fisheries; to the credits given to merchants at our custom houses; and, in fine, to the many sacrifices which have been made to commerce. We do not, however, condemn that policy which gives bounties and protection to the merchant; nor, though local in its operation, to the support which is afforded to the fisherman. We feel, upon those subjects, as Americans should do. Remote as we are situated from the seats of commerce, we do not repine at those regulations which are made for its benefit, and are content when any species of enterprise and industry is encouraged by the Government: for we know well, that the United States compose an extensive nation; that our citizens are scattered over an immense country, having various soils and climates, with as various pursuits adapted thereto; and that a Government forming laws for this population, must consult the wants and necessities of each, and, by attending to particulars, promote the general good of the whole. We complain only because the protection and encouragement of industry is not made universal, and extended to every pursuit which is known in our country. If it be just in a Republic, established for the common good, to give to any one pursuit bounties, encouragement, and protection, we hold it as an undeniable truth, that all other pursuits are equally entitled to them.

That the industry of the mechanics and manufacturers should likewise be protected, appears from other and powerful considerations.

The rapid accumulation of wealth which the United States have made since the wars of the French Revolution, was occasioned by an *unnatural* extension of commerce, and an *unnatural* demand for the productions of our agriculture. The labor there withdrawn from agriculture, the ravages of contending armies, and the destruction of the commercial navy of continental Europe, created a demand for our produce, and gave such employment to our shipping, and such encouragement to our merchants, as to occasion that rapid accumulation of wealth, and those internal improvements, which have even astonished ourselves and been the wonder of the world. Upon the continuance of this state of things, we are not to depend. An eternal war in Europe is not to be expected—the state is unnatural; and experience shows, that one party must give way when its resources are exhausted, or it is humbled by the victories of its enemy. When this period arrives, what has heretofore been the life of our industry, will no longer animate it, and we shall be compelled to look to other resources, to preserve the wealth which we have acquired. But how can it be preserved, if we do not change our system, and Congress does not give another direction to the industry of the country? Where shall we find a market for the productions of our soil? And where will our shipping find employment?

A brief view of the history of our commerce, we conceive, will place this subject in a proper point of view.

Before our Revolutionary war, our markets were in the dominions of Great Britain, and such of the colonies of European Powers, as we could obtain admittance into by smuggling. After the peace of 1783, we lost the regular market of the former; and the latter being precarious in its nature, was of little moment. Such were the colonial and commercial systems of Europe, as not to permit the introduction into their dominions, of articles which they could produce themselves, unless in seasons of scarcity; so that during the period of time which elapsed between the acknowledgment of our independence and the commencement of the French Revolution, all of our citizens who depended upon foreign commerce, were often reduced to great distress. The importation of foreign commodities drained us of our treasures; and our other commerce did not bring us back a correspondent proportion of the precious metals. Have we discovered that there exists in the breast of the rulers of Europe, any disposition to abandon, upon the return of peace, their systems of commerce? Even during the wars which have raged for a few years past, they have renewed their prohibitions whenever they could do without us. In times of peace, the Powers of Europe can supply themselves and their colonies with all the provisions which they may have occasion for. Their

colonies can rival us in tobacco, and in all the raw materials which they want for manufactures. In their ports we are, therefore, to expect a permanent market for a small part of our productions only, and but an uncertain and temporary one for the bulk of them. Asia and Africa want nothing from us. We hazard nothing, then, when we assert, that after the wars of Europe are over, foreign markets will not be found for our surplus produce, and that we shall be compelled to look at home for the reward of our labor. Another fact, perhaps, ought not to pass unnoticed: Our country is rapidly increasing in population, and its surplus produce for exportation must increase in an equal ratio. Not so the demand of foreign markets. All those circumstances combine, in the opinion of your memorialists, to show the policy of directing the industry of our citizens into such channels as will not be affected by the edicts, regulations, and wars of Europe; and to prepare, in time, for that change in business, which must take place, (and to the general distress of the country,) when a peace there will put an end to our carrying trade, and destroy the markets for our produce.

A change like this, in the direction of capital and labor, (it moreover appears to your memorialists,) will have a beneficial effect upon our foreign relations. If our most important market be at home, so large a proportion of our property will not be subjected to the depredations of the pirates of the ocean; and the people, less embarrassed by the interruptions of commerce, will more readily unite in measures calculated to vindicate the honor, and assert the rights of the nation. To prove this, let us appeal to facts; the most recent, and of course, the most convincing have happened within a few years. The edicts of France and England, which produced the embargo, occasioned, also, the interruption of that commerce, upon which much labor depended for employment, the merchant for his profits, and the farmer for the sale of his productions. Some capital was idle, many vessels were rotting in our ports, produce found no market, and the plough in some places was abandoned. Patriotism would prompt us to suffer for our country. But the sailor cannot feed himself in port; the farmer dislikes to lose his crops; the merchant looks with impatience upon blasted prospects and ruined fortunes; and few will be content to live on patriotism, whilst their families are starving. Had our acting capital given life to domestic pursuits; had it given employment to labor; had our provisions been consumed, and our raw materials been fabricated, by domestic artisans, instead of the farmer being compelled to look abroad in search of a market for both, we should not have felt so much the pressure of the embargo, nor would our interest have warred with our patriotism. This is the course of human events, and history proves, that the rulers of nations have always been obliged to accommodate their differences with others, upon better or worse conditions, according as the contest bore heavy or not upon their own people. Were the citizens of the United States, however, in the situation alluded to, how different would be the attitude which our Government could assume. And how much less would foreign Powers calculate upon exciting a clamor against it by the interruption of our commerce, or the general stagnation of our business.

That the interest of the country coincides with the political and national considerations, which we have enumerated in support of domestic manufactures, has been the opinion of the most enlightened statesmen of whom America can boast, and, moreover, appears, from very obvious reasons.

Upon the quantum of its labor, is said to depend the wealth of a nation. But, to create wealth, labor must be productive; and those pursuits, which put most of it into action, seem best calculated to make it so. There is no pursuit, (agriculture excepted,) which has an effect of this nature, equal to that of the mechanic and manufacturer. The manufacturer works up our raw materials, and consumes our provisions. What he earns is kept at home, and is almost immediately circulated again, by various channels, through society. The merchant is by no means so useful a character; part of his gains are sent abroad, and paid away to foreigners. The mechanic and manufacturer, likewise, contribute to make the country really independent, by furnishing those supplies which we should otherwise be dependent for on foreign nations. The nation which produces but a small part of what she can consume, or grows but few articles, we have already seen, must always be a dependent one. Her wants cannot be regularly supplied, and her business appears subjected to embarrassment. Say, that her pursuit is commerce: when that is interrupted, as, for example, it has been for the last sixteen years in Holland, and how soon will she become impoverished and distressed. Let her pursuit be exclusively agriculture; and the depression of markets (which has often been the case, with respect to our provisions, tobacco, and cotton,) will paralyze the industry and enterprise of the nation. Whereas, the multiplication and diversity of pursuits, would give a country resources which others could not deprive her of; and the industry of one part of it would cherish, invigorate and support that of another. Nor can it be an unimportant consideration, that the increase of manufactures would tend to keep at home the precious metals, the principal and the most convenient as well as the most useful representative of wealth and labor.

Desirable, however, as it may be to encourage manufactures, it can be done effectually only by Congress. The mechanic and the manufacturer in the United States has to contend with obstacles unknown to the foreigner. The British manufacturer, his great competitor, is protected by prejudice, by the course of business, by the low price of labor, and the skill of his workmen, but above all, by the strength of his capital, and the bounties and encouragement given to him by his Government. And upon almost all heavy articles, as to which an American has the best opportunity of rivalling him, *those bounties and encouragements are more than equal to the freight, charges and insurance upon the manufactured article.* The American manufacturer is at present poor; he has buildings to erect, workmen to teach, and powerful prejudices to overcome: his limited capital often makes it necessary for him to force markets, whilst his opponent can wait for, or command one at pleasure. Indeed, it is to be feared, that the foreigner will purposely seek opportunities to depress markets, in order to remove the American out of his way. Such have often been the effects of the jealousy of trade. Permit us, whilst upon this subject, to remind your honorable body of the celebrated contest between the British and Dutch, with the imperial East India Company; where the former, by depressing the prices of commodities, succeeded in annihilating or ruining the latter, supported as it was by the weight and treasures of the emperor Joseph; a fate which may attend many establishments in America.

When we ask for adequate protections from Congress to our own manufactures, we are aware of jealousies which will be excited against us. Why, it will be asked, tax one portion of the people to benefit another? We answer, for the benefit of the whole, and to equalize the imposts which are laid to support Government. Imposts, levied with this view, is but taking from one pocket what is abundantly repaid to the other. Whatever gives life to the domestic industry of the country, benefits every man in it. Whatever sums are paid to keep our resources at home is not lost. As in the human frame, it is like the veins returning blood to the heart, whereby the whole system may be replenished. Such are the lessons furnished by experience. How has Great Britain become the first commercial and manufacturing nation in the world? By her superior arts and industry? No! In these she is rivalled by her great competitor. *By her system of restriction and protection.* By those regulations which encourage her own commerce and manufactures, and by depressing those of foreign nations. What she can make and produce herself, she suffers no country to supply her with. By these means, she has made the industry of all nations her tributary, and by these means she has monopolised the commerce, and manufactured for the world. But the effect of our own discriminating duties upon foreign tonnage, and that protecting system which has raised the fisheries of New England from insignificance, to be the first in the world, show sufficiently the effects produced upon the industry of a nation by this system of restriction and protection. Admitting, however, that a system like this may operate as a tax upon the industry of one part of the country, at the expense of another, it cannot long be so. When the domestic manufacturer shall have acquired experience, and his laborers are completely instructed in their business; and when, by industry and success, he shall have acquired capital sufficient to enable him to extend his business; the natural effect will be, to reduce his prices to a very moderate profit; and lower, often, than what the same article could be afforded for from abroad.

But would not good policy dictate, that the United States should meet restriction, by restriction and contend in this way against all nations who wish to make our labor and industry tributary to them? Shall we not be blind to our own interest if we omit doing so? Repeatedly have our public characters declared, that manufactures should be encouraged; and praised have those citizens often been who have established them. But they must have something more substantial to support them than praise. If foreign Governments can prevent them (as we have shewn they can, and probably will do) from being productive to the proprietors, experience will show the manufacturer, that his money has been

expended in vain; and ill success will deter others from the same pursuit. This latter consideration, we hope will have its due weight with Congress, especially when the circumstances are recollected under which our most considerable manufactories were established. The non-importation act, but particularly the embargo act, by interrupting the trade of Europe, created a demand for articles which could not be obtained from abroad, and to supply which many workshops were erected. Out of one establishment arose another. If Congress are disposed to encourage them, *now is the time*. A moment so favorable to do so may not occur for years; since many citizens are disposed to engage in them, if those which are erected prove successful. Success crowns every step with popularity, and produces imitators and followers; whereas, misfortune has a contrary effect. Damped would this spirit be, if the expected settlement of our differences with foreign nations, were to occasion such an influx of foreign commodities as to undersell our manufacturers. Then those buildings, workshops and warehouses, upon which so much labor and money has been expended, would lie waste, and their proprietors, with the loss of purse, would have the additional mortification of being considered merely as projectors.

But should our disputes with foreign nations end in war, and at this moment, when new codes of maritime law are hourly proclaimed, and the peaceful pursuits of all neutral nations are interrupted by the great belligerent Powers of Europe; when old States are daily overturned, and new kingdoms are as often erected; we cannot calculate upon preserving peace for a moment: would not a Congressional act for the permanent support of the mechanics and manufacturers of the country much encourage those citizens who are disposed to devote their capital to those pursuits, and as much assist our Government in the vigorous prosecution of war? You have made provision for the permanent support of a navy; and in any war in which you might engage, this must be used as a great means to annoy an enemy. Your navy, as well as the shipping of the United States, have heretofore depended upon foreigners for the supply of cordage and sail cloth. You must have clothing also for the navy and army, and depend upon the internal resources of the country for the supply of those articles. The people must likewise depend upon the home market for the supply and sale of every thing.

The mechanic and manufacturer, with the protection which Congress could promise, would work with spirit, confidently expecting a constant remuneration for their labor. Whether, however, this protection should be afforded by bounties, or by prohibitory, or protecting duties upon all articles which the country can produce, or in whole or in part by loans, as recommended by the present Secretary of the Treasury, the subscribers will not presume to point out. We will, however, state that, as capital is much wanted by mechanics and manufacturers, a combination of those means, might be attended with salutary effects.

As citizens of the State of Kentucky, permit us to add a few considerations, arising out of the local situation of our country. Kentucky is rich in soil, but remotely situated from the seats of commerce. Her proximity to Indiana and Ohio, subjects her to continual drains of treasure for the purchase of United States' lands. Large sums of money are annually sent off for foreign productions; and the merchants of the United States, who are the real collectors of the revenue, pay our duties to the treasury. Protected as we are by the strong arm of, and attached to, the Union, with this arrangement we are satisfied. But when the fisheries of New England are not only protected by duties, but encouraged by bounties; when, comparatively speaking, no public moneys are expended here, but all at Washington and on the sea board, for the support of Government and the protection of a commerce, in which, from our local and insular situation, we cannot participate; we think we have a rightful and just claim to some indemnification; and this can only be given to us by encouraging and protecting our internal industry.

Wherefore we pray that Congress will take this subject into consideration, and, as in duty bound, we shall ever pray, &c.

LEWIS SANDERS,

And one hundred and twelve others.

[3d SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 22, 1811.

In the General Assembly of the Commonwealth of Pennsylvania.

The People of the United States, by the adoption of the Federal Constitution, established a General Government for special purposes, reserving to themselves, respectively, the rights and authorities not delegated in that instrument. To the compact thereby created, each State acceded, in its character as a State, and is a party; the United States forming, as to it, the other party. The act of union, thus entered into, being, to all intents and purposes, a treaty between sovereign States. The General Government, by this treaty, was not constituted the exclusive or final judge of the powers it was to exercise: for if it were so to judge, then its judgment, and not the constitution, would be the measure of its authority.

Should the General Government, in any of its departments, violate the provisions of the constitution, it rests with the States, and with the People, to apply suitable remedies.

With these impressions, the Legislature of Pennsylvania, ever solicitous to secure an administration of the Federal and State Governments, conformably to the true spirit of their respective constitutions, feel it their duty to express their sentiments upon an important subject now before Congress, viz: the continuance or establishment of a bank. From a careful review of the powers vested in the General Government, they have the most positive conviction, that the authority to grant charters of incorporation, within the jurisdiction of any State, without the consent thereof, is not recognized in that instrument, either expressly, or by any warrantable implication: Therefore,

Resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania, in General Assembly met, That the Senators of this State, in the Senate of the United States, be, and they are hereby, instructed, and the Representatives of this State, in the House of Representatives of the United States, be, and they hereby are, requested, to use every exertion, in their power, to prevent the charter of the Bank of the United States from being renewed, or any other bank from being chartered by Congress, designed to have operation within the jurisdiction of any State, without first having obtained the consent of the Legislature of such State.

Resolved, That the Governor be, and he hereby is, requested, to forward a copy of the above preamble and resolution to each of the Senators and Representatives of this State in the Congress of the United States.

JOHN WEBER, *Speaker of the House of Representatives.*
P. C. LANE, *Speaker of the Senate.*

In the House of Representatives, January 11, 1811.

Read and adopted. Attest:

GEORGE HECKERT, *Clerk of the House of Representatives.*

In Senate, January 11, 1811.

Read and adopted. Attest:

JOSEPH A. M'JIMSEY, *Clerk of the Senate.*

11th CONGRESS.]

No. 339.

[3d SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 26, 1811.

The General Assembly of Virginia view, with the most serious concern, the late attempts which have been made to obtain from Congress a renewal of the charter incorporating the Bank of the United States.

This Assembly are deeply impressed with the conviction, that the original grant of that charter was unconstitutional; that Congress have no power, whatever, to renew it; and that the exercise of such a power would be not only unconstitutional, but a dangerous encroachment on the sovereignty of the States: Therefore,

Resolved, That the Senators of this State, in the Congress of the United States, be instructed, and our Representatives most earnestly requested, in the execution of their duties, as faithful representatives of their country, to use their best efforts in opposing, by every means in their power, the renewal of the charter of the Bank of the United States.

January 22d, 1811. Agreed to.

ROBERT TAYLOR, *Speaker of the Senate.*
 JS. BARBOUR, *Speaker of the House of Delegates.*

Teste:

J. PLEASANTS, JUN. *Clerk of the House of Delegates.*

11th CONGRESS.]

No. 340.

[3d SESSION.]

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, ON THE 31ST OF JANUARY, 1811.

To the Senate and House of Representatives in Congress of the United States, the memorial of the subscribers, citizens of Philadelphia, respectfully sheweth:

That it is with increasing solicitude, and the deepest concern, that your memorialists reiterate their petition to Congress for a renewal of the charter of the Bank of the United States. With the extreme of anxiety have they awaited the decision of this most important question, and, with real distress do they witness the ascendancy of sentiments opposed to the continuance of the bank. Before a final determination shall, however, exclude all hope, they deem it their indispensable duty to lay before you a view of the distress which has already commenced, and of the wide spreading ruin which has been but faintly anticipated, but the certainty of which is now plain to every eye, and to accompany this view with their renewed and urgent entreaties, that this overwhelming mischief may yet be staid.

Your memorialists experience within themselves, and learn with calamitous certainty from abroad, that, from the uncertainty and suspense of the public mind, and an apprehension of the evils which must flow from a dissolution of the bank, confidence is visibly and substantially impaired, and credit almost suspended. From a neighboring and sister city, the most distressing intelligence assures them, that, as against the evils of this absence of confidence and suspension of credit, even extraordinary resources afford no security.

It has become too plain to admit of doubt, with the most incredulous, that confidence and credit are intimately and essentially connected with the continuance of the Bank of the United States, and that, if they are prostrated by the dissolution of that institution, the country must experience, to its lasting reproach, and, perhaps, its incurable injury, a general disregard of pecuniary engagements. Your memorialists, therefore, consider it as a fact no longer doubtful, or disputable, that, if the bank be dissolved at the expiration of its present charter, and, in truth, unless the public confidence be speedily restored, universal distress and incalculable loss must and will prevail.

Your memorialists do not conceive that they are pleading, particularly, the cause of the Bank of the United States, nor that of a few, or even many individuals, by commercial relation connected with the bank. They do not conceive, that it is, merely, the cause of a few commercial towns and cities, or of a scanty portion of our population, but, that it is a cause and a question with which are connected, and in which are involved, interests of the highest import, extending through the whole community. The direct effect of an event impairing confidence and credit, unquestionably is, upon the merchant and trader; they, and their immediate connexions, are the first to suffer; but the evil must pervade the country. They, therefore, feel themselves justified, on such an occasion, and at such a crisis, in the most earnest and urgent terms again to address you.

From the pressing and peculiar exigencies of the time, brought about by the fear of a dissolution of the bank, and from a perfect persuasion of the near approach of all the evils which have been anticipated, your memorialists have deemed themselves bound to make this appeal to your wisdom, and to present it by a deputation of their fellow-

citizens. This deputation, intimately acquainted with the situation, sentiments, and feelings of your memorialists, they respectfully request may be heard by counsel, on this momentous subject. Finally, it is the earnest and pressing prayer of your memorialists, that effectual means may be immediately adopted to restore public confidence, by a renewal of the charter of the Bank of the United States, for a term which shall assure its duration; or, if that be not granted, that the public suffering may be alleviated by a continuance of the institution for a period which will permit it gradually to close its concerns.

JOSEPH NORTH,
And eight hundred and sixty-seven others.

11th CONGRESS.]

No. 341.

[3d SESSION.]

PROTECTION TO MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 31, 1811.

To the Honorable Senate and House of Representatives of the Congress of the United States, the petition of the undersigned manufacturers of morocco leather, so called, in the town of Charlestown, in the State of Massachusetts, humbly shows:

That there is annually manufactured, within the United States, nearly eight hundred thousand skins, into what is commonly called morocco leather. That, of this quantity, one hundred and fifty thousand skins are annually manufactured in said town of Charlestown.

That the principal article used in said manufacture is the sumach, which is a plant indigenous to this country; and that, in the collection and preparation of said plant, and in the various processes of the said manufacture, many people are employed, most of whom depend on such employment for their daily bread.

That the quantity of said article, manufactured as aforesaid, is apprehended to be fully sufficient for the demand in this country, and is capable of an unlimited extension; and that the quality thereof is equal, if not superior, either in point of beauty or durability, to any produced in foreign countries, not excepting Morocco itself, where said manufacture was first invented. That, notwithstanding the ample supply of said article, manufactured in these States, there have been imported thereinto, annually, great quantities of morocco leather, by reason of which the markets have been overstocked, and the article sold at a price at which it cannot be afforded. That, by this means, your petitioners are greatly discouraged, and, should the practice continue, they, and all others who are engaged in the same business, in this country, will be compelled to abandon it, and be thereby reduced to great distress.

Your petitioners beg leave further to represent, that, before the introduction of the manufacture of this article here, large sums were annually exported to purchase it in foreign countries.

That, in consequence of our increased population, should the manufacturers here be discouraged by the competition of foreigners, the use of this convenient and serviceable article must either be relinquished, or the people of the United States must purchase it at an enhanced price.

Whereas, should said manufacture be continued, in this country, there can be no doubt that said article would be found, in the market, as cheap as it would be if it was wholly imported, without those fluctuations of price which always attend imported goods.

Wherefore, your petitioners humbly pray, that your honorable body, to whom, in this case, they can alone look for relief, would provide a remedy for the evil of which they complain, either by prohibiting the importation of morocco leather, so called, from foreign countries, or by imposing such a duty thereon as shall discourage its importation, except in the case of an actual or apprehended scarcity thereof in the United States, which it is confidently expected never will occur.

And your petitioners, as in duty bound, will ever pray, &c.

ELIJAH MEAD, *and others.*

CHARLESTOWN, 15th January, 1811.

11th CONGRESS.]

[3d SESSION.]

SINKING FUND.

COMMUNICATED TO THE SENATE, FEBRUARY 4, 1811.

The Commissioners of the Sinking Fund respectfully report to Congress as follows:

That the measures which have been authorized by the Board, subsequent to their last report, of the 3d of February, 1810, so far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury, to this Board, dated the first day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

GEO. CLINTON, *President of the Senate.*R. SMITH, *Secretary of State.*ALBERT GALLATIN, *Secretary of the Treasury.*C. A. RODNEY, *Attorney General U. S.*WASHINGTON, *February 2d, 1810.*

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund:

That the balance of moneys advanced on account of the public debt, remaining unexpended at the close of the year 1808, and applicable to payments falling due after that year, which balance, as appears by the statement B, annexed to the last annual report, amounted to six hundred and fifty-one thousand one hundred and three dollars thirty-three cents, - - - - - \$651,103 33

Together with the sums disbursed during the year 1809, from the treasury, on account of the principal and interest of the public debt, which sums, as appears by statement C, annexed to the last annual report, amounted to six millions four hundred and fifty-two thousand six hundred and ninety-eight dollars fifty-two cents, - - - - - 6,452,698 52

And amounting, together, to seven millions one hundred and three thousand eight hundred and one dollars eighty-five cents, - - - - - \$7,103,801 85

Have been accounted for in the following manner:

I. There was repaid into the treasury, during the year 1809, on account of the principal of moneys heretofore advanced for the payment of the foreign debt, as appears by the statement E, annexed to the last annual report, a sum of ninety-three dollars twenty cents, - - - - - \$93 20

II. The sums actually applied during the same year to the payment of the principal and interest of the public debt, as ascertained by accounts rendered to the Treasury Department, amount, as will appear by the statement A, to six millions seven hundred and forty two thousand seven hundred and eight dollars ninety-seven cents, viz:

1. Paid in reimbursement of the principal of the debt, including the last instalment of the Dutch debt, - - - - - \$3,825,564 06

2. Paid on account of the interest and charges on the public debt, - - - - - 2,917,144 91

6,742,708 97

III. The balance remaining unexpended at the close of the year 1809, and applicable to payments falling due after that year, as ascertained by accounts rendered to the Treasury Department, amounted, as will appear by the statement B, to three hundred and sixty thousand nine hundred and ninety-nine dollars sixty-eight cents, - - - - - 360,999 68

\$7,103,801 85

That, during the year 1810, the following disbursements were made out of the treasury, on account of the principal and interest of the public debt, viz:

I. On account of the interest and reimbursement of the domestic funded debt, - - - - - \$7,157,298 08

II. On account of the interest on the Louisiana stock and on exchanged and converted stocks, payable in Europe, - - - - - 844,674 35

Amounting, together, as will appear by the annexed list of warrants, marked C, to eight millions and one thousand nine hundred and seventy-two dollars forty-three cents, - - - - - \$8,001,972 43

Which disbursements were made out of the following funds, viz:

I. From the funds constituting the annual appropriation of eight millions of dollars for the year 1810, viz:

From the fund arising from the interest on the debt transferred to the credit of the Commissioners of the Sinking Fund, as per statement I, - - - - - \$1,646,578 84

From the fund arising from the sales of public lands, being the amount paid into the treasury from 1st October, 1809, to 30th September, 1810, as per statement K, - - - - - 672,417 90

From the proceeds of duties on goods, wares, and merchandise, imported, and on the tonnage of vessels, - - - - - 5,679,915 47

Amounting, altogether, to - - - - - 7,998,912 21

Which sum of - - - - - 7,998,912 21

Together with the sum advanced during the year 1809, on account of the appropriation for the year 1810, amounting, as per last annual report, to - - - - - 1,087 79

Makes the amount of appropriation for the year 1810, of eight millions of dollars. - \$8,000,000 00

II. From repayments into the treasury on account of advances to Commissioners of Loans, as will appear by the statement E, viz:

Repayment of principal advanced from the treasury, - - - - - \$2,639 37

Interest recovered, - - - - - 420 85

3,060 22

That the above mentioned disbursements, together with the above stated balance which remained unexpended at the close of the year 1810, of - - - - - 8,001,972 43

360,999 68

And amounting, together, to eight millions three hundred and sixty-two thousand nine hundred and seventy-two dollars eleven cents, - - - - - \$8,362,972 11

Will be accounted for in the next annual report, in conformity to the accounts which shall then have been rendered to the Treasury Department.

That, in the mean while, the manner in which the said sum has been applied, is estimated, as followeth:

I. The repayments into the treasury, on account of the principal, have, during the year 1810, amounted, as by the above mentioned statement E, to	\$2,639 37
II. The sums actually applied, during the year 1810, to the principal and interest of the public debt, are estimated as follows:	
1. Paid in reimbursement of the principal of the public debt, and including the whole of the exchanged six per cent. stock,	\$5,163,476 93
2. Paid on account of interest and charges on the same,	2,698,664 10
	7,862,141 03
As will appear by the estimate F.	
III. The balance which remained unexpended, at the close of the year 1810, and applicable to payments falling due after that year, is estimated, per estimate G, at	498,191 71
	\$8,362,972 11

That, in conformity to the resolution of the Commissioners of the Sinking Fund, of April 26th, 1810, there was reimbursed, at the close of the year 1810, the residue of the exchanged six per cent. stock, amounting to \$3,751,125 26; which sum of \$3,751,125 26, forms a part of the sum of \$5,163,476 93, above stated, as the amount of the principal of the public debt reimbursed in the year 1810.

And that the statement H exhibits the amount of stock transferred to the Commissioners of the Sinking Fund and to the Treasurer of the United States, in trust for said States, and standing to their credit on the books of the treasury, on the 31st December, 1810, no stocks having been transferred in payment for lands during the year 1810.

All which is respectfully submitted.

ALBERT GALLATIN.

TREASURY DEPARTMENT, *February 1st, 1811.*

A.

Statement of the application, during the year 1809, of the funds provided for the payment of the principal and interest of the public debt.

I. *Payments on account of the principal of the Public Debt.*

1. Of the domestic debt, viz:		
Annual reimbursement of old six per cent. stock,	\$953,133 44	
Do. do. of deferred do.	376,646 86	
	1,329,780 30	
Reimbursement of exchanged six per cent. stock, in the manner prescribed by the 8th section of act of Feb. 11, 1807,		2,242,218 24
Do. of unfunded registered debt, including arrearages of interest,	258 11	
Do. of debts due to foreign officers, including do.	13,307 41	
	13,565 52

Fifth and last instalment of the loan of 3,000,000 guilders, of 1st January, 1794, 600,000 guilders, at 40 cents		240,000 00
		3,825,564 06

II. *Payments on account of interest and charges.*

1. On the domestic debt.		
Interest for the year 1809, on the several species of the domestic funded debt, as settled at the treasury, (a)		2,176,248 39
Do. on Louisiana stock domesticated,		4,050 00
2. On the foreign debt.		
Interest on converted and exchanged stocks, payable at Amsterdam, guilders 7,987 18 at 40 cents,	\$3,195 16	
Do. do. do. do. do. at London,	31,383 42	
£7,061 5 5, at 4s 6d.		34,578 58
Interest on Louisiana stock from July 1, 1808, to June 30, 1809, viz:		
Payable in Amsterdam, guilders 750,000, at 40 cents,	300,000	
Do. London, £83,619, at 4s 6d.	371,640	
	671,640 00	
Do. paid on the Dutch debt at Amsterdam, guilders 30,000, at 40 cts.		12,000 00
Commissions and charges, viz:		
At Amsterdam, including Louisiana stock, guilders 8,654 18 8,		
at 40 cents,	3,461 97	
At London, on Louisiana stock, £418 1 9, at 4s. 6d.,	1,858 17	
	5,320 14	
Loss in exchange,		11,569 14
Commissions to agents in America for purchasing bills		1,738 66
		736,846 52
		2,917,144 91
		6,742,708 97
(a) This sum is stated in the treasury report No. 23,242, as amounting to		2,176,258 11
From which is here deducted, for correction of sundry small errors,		9 72
		\$2,176,248 39

TREASURY DEPARTMENT, *Register's Office, 1st February, 1811.*

JOSEPH NOURSE, *Register.*

B.

Statement of the provision made, before the 1st day of January, 1810, for the payment of the principal and interest of the public debt falling due after that day.

I. On account of the foreign debt.

1. Cash in the hands of commissioners and agents in Europe, viz:			
In London, on 31st December, 1809, £45,500 8 6, at 4s. 6d.	-	-	\$202,224 11
Deduct amount due the commissioners in Amsterdam on the same day, guilders, 96,258 14 13, at 40 cents,	-	-	38,503 50
			<u>\$163,720 61</u>
2. Remittances outstanding, viz:			
Amount paid for at the treasury, and remitted to Amsterdam before 1st January, 1810, but not received by the commissioners till after that day, guilders, 512,488 18, at 40 cents,	-	-	204,995 56
3. Amount of payments made at the treasury before the 1st January, 1810, for bills which have been protested for non-payment, and which, on that day, had not been repaid into the treasury, as explained in the report of February 3d, 1809,	-	-	13,357 00
			<u>\$382,073 17</u>

II. Deduct amount short provided on account of the domestic debt, as follows:

The demands unsatisfied on the 1st of January, 1810, were the following, viz:

1. Dividends payable by the Commissioners of Loans, including the dividend due on that day, and exclusive of dividends no longer demandable at their offices,	-	1,221,033 65
2. Unclaimed dividends payable at the treasury,	-	48,379 80
		<u>\$1,269,413 45</u>

The provision made for the above objects was as follows, viz:

1. Cash due from Commissioners of Loans, deceased and out of office,	\$6,697 16
2. Ditto in the hands of Commissioners of Loans in office,	1,206,167 47
3. Ditto in the hands of the treasurer, as agent for the Commissioners of the Sinking Fund,	35,463 33
4. Cash over advanced at the treasury for the payment of dividends,	12 00
	<u>1,248,339 96</u>

Leaving the sum short provided on 1st January, 1810, to meet all payments on account of the domestic debt,
 21,073 49 |

Total amount of provision for the public debt, remaining unapplied on 31st December, 1809,
 \$360,999 68 |

TREASURY DEPARTMENT, *Register's Office*, 1st February, 1811.

JOSEPH NOURSE, *Register*.

C.

List of Warrants drawn according to law, during the year 1810, on the Treasurer of the United States, on account of the payments of interest on Louisiana Stock.

F.

An Estimate of the application made, in the year 1810, of the funds provided for the payment of the principal and interest of the Public Debt.

I. On account of the principal:				
1. Reimbursement of 6 per cent. and deferred stocks, estimated at	-	-	\$1,412,351 67	
2. Reimbursement of the exchanged 6 per cent. stock,	-	-	3,751,125 26	
				<u>\$5,163,476 93</u>
II. On account of interest and charges:				
1. Interest on the domestic funded debt, estimated at	-	-	1,986,057 50	
2. Interest on Louisiana stock domesticated,	-	-	7,020 00	
3. Interest and charges on foreign debt, viz:				
Interest on exchanged and converted stocks, payable in London and Amsterdam,	-	-	\$25,245 58	
Interest and charges on Louisiana stock, payable in do. and do.	-	-	672,000 00	
			<u>697,245 58</u>	
Charges on remittances, per statement D, herewith,	-	-	6,231 84	
Commissions to agents in America for purchasing bills,	-	-	2,059 18	
			<u>705,586 60</u>	
				<u>2,698,664 10</u>
				<u>\$7,862,141 03</u>

G.

An Estimate of the funds provided, before the 1st of January, 1811, for the payment of principal and interest of the Public Debt falling due after that day.

I. On account of the foreign debt:				
Cash in the hands of commissioners and agents in Europe, and remittances outstanding on 31st December, 1809, per preceding statement B,		-	-	\$368,716 17
The remittances made during the year 1810, per preceding statement D, are as follows, viz:				
To Amsterdam, 557,500 guilders, at 40 cents,	-	-	\$223,000 00	
To London, £138,000, at 4s. 6d.	-	-	613,333 33	
			<u>836,333 33</u>	
Total to be accounted for,	-	-	-	1,205,049 50
The amount applied, during the year 1810, per preceding estimate F, is calculated to have been, for interest and charges in Europe,	-	-	-	<u>697,245 58</u>
The balance in the hands of agents in Europe, or in remittances outstanding, may, therefore, be estimated, on 31st December, 1810, to be	-	-	-	507,803 92
The amount of protested bills outstanding on the same day, was, as per preceding reports, balance unrecovered of A. Brown, and Brown & Hackman's bills, for 120,000 guilders,	-	-	-	13,357 00
				<u>521,160 92</u>
II. From which deduct on account of the domestic debt:				
For unclaimed dividends demandable at the treasury, and not yet advanced to the Bank for payment to the creditors,		-	-	22,969 21
				<u>\$498,191 71</u>

H.

A General Statement of the several stocks transferred to the United States, to the 31st December, 1810, the interest on which, by the acts of 8th May, 1792, and 3d March, 1795, is appropriated for the redemption of the public debt.

	Old six per cent. stock.	3 per cent. stock.	Deferred 6 per cent. stock.	5 per cent. stock.	Five and a half per cent. stock.	Four and a half per cent. stock.	4 per cent. stock. 11th CONGRESS.]

No. 343.

[3d Session.

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, ON THE 4TH OF FEBRUARY, 1811.

The Memorial of the Inhabitants of Pittsburg, Pennsylvania, against the renewal of the Charter of the United States' Bank, to the Senate and House of Representatives in Congress of the United States, respectfully sheweth:

That your memorialists are "the People of the United States," from whom emanates all the power which you possess; that we have appointed you to guard, not to alienate our rights; that our constitution never authorized Congress to establish a bank, under the control of individuals, for their own benefit, or to alienate *the power of the purse* more than the power of the sword. The act of February, 1791, chartering the bank, might, with equal justice and safety, have given to a corporation the power of the army, with its appointments.

We feel deeply humbled, that, under the full blaze of Revolutionary light, one half of the delegated power of the nation was given to a company, independent of our suffrages; but we rejoice that its charter will be terminated with your present session, and that it cannot be revived, provided the Congress shall be, as it professes, attached to the eternal principles of our Revolution, and to the clear dictates of our constitution.

After the Bank of the United States had enjoyed twenty years of prosperity, had divided, in that term, four millions over six per cent., and had held in bondage thousands of our citizens, who dared not to act according to their consciences, from fear of offending the British stockholders and federal directors, we had hoped that they would have quietly closed their concerns, and waited for another turn of fortune, till other classes of citizens of, at least, equal merit, had each shared their four millions; but we have seen, with indignation, a *studied* delay in the collections of that bank, indicating a determination to gain a renewal under stress of weather; a *studied* pressure on individuals and on State banks, in order to gain auxiliaries; and a *studied* memorial, containing, in smooth language, the most daring insults on the dignity and independence of a free People.

The memorial makes no direct claim of right to renewal, but it recounts many works of righteousness, which we beg leave to examine. It opens a modest proposal for the surrendry of our independence, by declaring that the bank had continued business for public good, and under an impression that the general interest would require a renewal of the charter! It next compliments your honors on a degree of superior information, which the stockholders are not in the habit of attributing. It then craves for the bank much of the credit really due to the actual labor and skill of your memorialists. While we have been traversing the ocean, or improving the earth, or advancing the arts, they have been dividing more than eight per cent. for all facilities, and, after this dividend, will have, on winding up, a balance in their favor, over the amount of capital, of \$4,711,236.

Though the United States' Bank has derived its breath and daily support from the bounty and long-suffering of the Congress, yet the memorial opens an unexpected score of debits, against the Government and People, which nothing short of renewal can discharge; and if the debits be correct, the new score for twenty years, will be far beyond our ability. The bank has accommodated individuals, State banks, the commercial, manufacturing and agricultural interests, and the national treasury. It has removed specie to places where it was wanted, and has divided only eight and one fourth per cent. for all these sacrifices to public good! It has furnished places of deposite for millions of the public money, and has suffered the inconvenience of lending, on this deposite, for their own benefit. It has patriotically lent to Government its paper, which drew no interest, and received in exchange, Government paper, drawing an interest. It has even suffered the Government to receive its paper for all bonds and dues. "It has, for the accommodation of the Government, established branches at places disadvantageous to its business, and from which no profit was expected to be derived."

Permit your memorialists to pause, and, by a view of the capital and loans of the branches of the United States' Bank, to estimate the value of this last claim on the Government.

	<i>Capital.</i>	<i>Loans.</i>
Boston,	\$700,000	\$998,859
New York,	1,800,000	4,175,847!
Baltimore,	600,000	1,349,550
Washington,	200,000	485,285
Norfolk,	600,000	880,170
Charleston,	600,000	1,409,916!
Savannah,	500,000	1,054,113
New Orleans,	300,000	611,516
	<u>\$5,300,000</u>	<u>\$10,965,256</u>

Nearly eleven millions lent on a capital of five millions three hundred thousand! A serious disappointment to men, who *expected no profit*. Republics are said to be ungrateful. We are certainly so on the present occasion.

The memorial next proceeds to associate the bank with the Government, claiming to be a necessary and indivisible part of it, showing the insufficiency of State banks to answer the dignified purposes of their institution; and, after repeating, for the tenth time, the awful calamities awaiting their dissolution, they commend the hard case of moneyed aristocracies and of rich widows and orphans, interested in their stock, to the wisdom and justice of the Legislature. They again hold up the awful terrors of "a general derangement of credit," and pray for a renewal of their charter.

Now, may it please the Congress, this bank memorial is for a grant, worth, to the stockholders, six millions, and to federalism and British influence sixty millions; and if the memorial contained the truth, there could have been no occasion of presenting it; but you, in your wisdom and superior intelligence, would have humbly petitioned David Lenox, president, and the directors and stockholders of the United States' Bank, to please to accept a renewal of their charter for eternity, or such shorter term as their honors should appoint.

But that memorial does not contain the whole truth. All its claims for services are more than balanced by enormous profits. Its threats of ruin to our establishments, in case of winding up, are balanced by the consideration, that, in their collections of *fifteen millions*, the stockholders will consult their own interest; they will not collect beyond the ability of their debtors; they will prefer the paper of State banks to private notes; and they will not press the State banks, so as to prevent their aiding the debtors of the United States' Bank. Whenever this bank shall withdraw from circulating medium its five millions in bills, it must pay for those five millions in specie, or the bills of State banks, in either of which cases the circulating medium will be restored. Whenever the deposits of more than *four millions* shall be withdrawn from its vaults, they will be either thrown into circulation, or placed in other banks. As to their being drawn from the country, let it be recollected that foreigners do not place their funds here, to remain inactive, merely because the United States' Bank is a safe place of deposite. But a portion of the deposits is by debtors of the bank, who will easily adopt a mode of transferring them in the ledger. As to the withdrawing of seven millions by foreigners, we cannot flatter ourselves with the prospect; but, if that should be the case, the Government can supply its place with paper, which will answer all the purposes of specie for all business, within our own country. We regard the repeated alarms in the memorial as not only groundless, but as a kind of threatening, ill suited to your dignity and our independence.

The bank memorial is a public declaration that the Government and People of the United States are held in duress by the memorialists, and that the continuance of our independence rests on their willingness to continue their bank operations. It contains an insulting history of favors to us, greater than their royal master ever urged upon the colonies. It declares that, in the management of the power of the purse, for twenty years, it has done every thing for us, and has rendered itself necessary to our future existence. Its silent language is, "Though we fail to conquer you by the sword, we hold you suspended by the purse strings. We demand your gratitude for such use of our funds as we have condescended to permit you to pay for; and now, if the power is to be withdrawn from us, all your establishments of commerce, finance, agriculture, and the arts, shall fall with us."

This language is not from a band of patriots, who undertook to aid the nation, in the first struggles of self-government, but of men, who, by subtlety and intercession, obtained a charter, and who have become masters of the headwaters of corruption, through the ill-placed bounty of the first Congress. Their delay to close their affairs, according to law, was not for public good, but in preparation for a sudden onset upon a short session of your honorable body. Hence their *well-timed subscriptions* to some republican presses. Hence the silence of federal presses, lest discussion should awake, in your constituents, the spirit of 1776. Hence the artificial depression of stock, *not in market*, and the petitions from interested companies and individuals crowding upon you. Hence the thronging of your avenues, and the artful sounding of every senator and member. Hence the intimations, that a million and quarter should be placed in your treasury, as a consideration for the ruin of your constituents; and hence the shameless assertion, that our President, who gained his elevation by his able opposition to the charter of the bank, and other ruinous measures, is now in favor of renewal.

The bank memorial, with its accompaniments, is an alarming commentary on the original charter. The actual depreciation of our silver and gold, by the United States' Bank, is not to be compared with the attempt to depreciate the sterling virtue and republican integrity of our people.

HENRY PHILLIPS,
JOSEPH M'CLURG,

And seventy-eight others.

BANK OF THE UNITED STATES.

COMMUNICATED TO THE SENATE, ON THE 5TH OF FEBRUARY, 1811.

SENATE CHAMBER, *January 29, 1811.*

SIR:

The Committee of the Senate, to whom has been referred the memorial of the President and Directors of the Bank of the United States, praying for a renewal of their charter, have directed me to request you to state to the committee, whether, in your opinion, the renewal of the said charter will greatly facilitate the collection of the revenue, and promote the public welfare. In complying with this request, it is expected that you will furnish the committee with the facts and reasoning upon which your opinion has been formed, together with such information upon this subject as may be in your possession.

I am, sir, respectfully, your most obedient and very humble servant,

WM. H. CRAWFORD.

The Honorable ALBERT GALLATIN.

TREASURY DEPARTMENT, *January 30, 1811.*

SIR:

Having already, in a report to the Senate, of 2d March, 1809, expressed my opinion in favor of a renewal of the charter of the Bank of the United States, an opinion which remains unchanged, I can only add a few explanatory remarks in answer to the inquiries of the committee, as stated in your letter of yesterday.

The banking system is now firmly established; and, in its ramifications, extends to every part of the United States. Under that system, the assistance of banks appears to me necessary for the punctual collection of the revenue, and for the safe keeping and transmission of public moneys. That the punctuality of payments is principally due to banks, is a fact generally acknowledged. It is, to a certain degree, enforced by the refusal of credit at the custom house, so long as a former revenue bond, actually due, remains unpaid. But I think, nevertheless, that, in order to ensure that precision in the collection, on which depends a corresponding discharge of the public engagements, it would, if no use was made of banks, be found necessary to abolish, altogether, the credit now given on the payment of duties—a measure which would affect the commercial capital, and fall heavily on the consumers. That the public moneys are safer by being weekly deposited in banks, instead of accumulating in the hands of collectors, is self-evident. And their transmission, whenever this may be wanted, for the purpose of making payments in other places than those of collection, cannot, with any convenience, be effected, on a large scale, in an extensive country, except through the medium of banks, or of persons acting as bankers.

The question, therefore, is, whether a bank, incorporated by the United States, or a number of banks, incorporated by the several States, be most convenient for those purposes.

State banks may be used, and must, in case of a non-renewal of the charter, be used by the treasury. Preparatory arrangements have already been made to that effect; and it is believed that the ordinary business will be transacted, through their medium, with less convenience, and, in some respects, with perhaps less safety than at present, but without any insuperable difficulty. The difference, with respect to safety, results from the organization of the Bank of the United States, by which it is responsible for the money deposited in any of its branches, whilst each of the State banks, which may be employed, will be responsible only for the sums in its own hands. Thus, the Bank of the United States is now answerable for the moneys collected at New Orleans, and deposited there in its branch—a security which will be lost under a different arrangement. Nor will the United States have any other control over the manner in which the business of the banks may be conducted, than what may result from the power of withdrawing the public deposits; and they will lose that which a charter, or a dependence on the General Government for a charter, now gives over the Bank of the United States. The facility of obtaining such accommodations as may, at times be wanted, will, for the same reason, be lessened, and the national power will, to that extent, be impaired. It may be added, that, even for the ordinary business of receiving and transmitting public moneys, the use of a State bank may be forbidden by the State; and that loans to the United States are, by many of the charters, forbidden, without a special permission from the State.
