STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE JANUARY 3, 1825.

TREASURY DEPARTMENT, December 31, 1824.

SIR: I have the honor to transmit a report prepared in obedience to the "Act supplementary to the act to establish the Treasury Department."

I have the honor to be, with great respect, sir, your obedient servant,

WM. H. CRAWFORD.

The PRESIDENT of the Senate.

REPORT.

In obedience to the directions of the "Act supplementary to the act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report:

I. OF THE PUBLIC REVENUE AND EXPENDITURE FOR THE YEARS 1823 AND 1824.

| Military service, including fortifications, ordnance, Indian department, revolutionary and military pensions, arming the militia, and arrearages prior to January 1, 1817..... | 4,548,374 49 | |
| Naval service, including the gradual increase of the Navy..... | 2,172,671 34 | |
| Awards under the Florida treaty..... | 4,775,671 99 | |
| Public debt..... | 8,274,528 91 | |
| And the expenditures during the fourth quarter are estimated at.... | 10,374,445 13 | |
| Viz: | | |
| Civil, diplomatic, and miscellaneous..... | \$580,870 11 | |
| Military service, including fortifications, ordnance, Indian department, revolutionary and military pensions, arming the militia, and arrearages prior to January 1, 1817..... | 765,346 35 | |
| Naval service, including the gradual increase of the Navy..... | 734,343 82 | |
| Public debt..... | 8,293,884 85 | |
| Making the total estimated expenditure of the year 1824..... | | 31,938,147 86 |
| And leaving in the Treasury, on the 1st of January, 1825, an estimated balance of.... | | 4,506,668 91 |

It is to be observed, however, that this balance is not to be considered as subject to appropriation, as there is about an equal amount of unsatisfied appropriations, which, though not called for in the year 1824, are necessary for the objects for which they were severally made, and which are, therefore, an existing charge upon the means of the Treasury.

2. OF THE PUBLIC DEBT.

| | |
|---|-----------------|
| The funded debt which was contracted before the year 1812, and which was unredeemed on the 1st of October, 1823, amounted (statement No. 1) to..... | \$16,597,318 58 |
| And that which was contracted subsequently to the 1st of January, 1812, and was unredeemed on the 1st of October, 1823, amounted (No. 2) to..... | 73,854,545 45 |
| Making the total amount of funded debt unredeemed on the 1st of October, 1823..... | 90,451,864 03 |
| In the fourth quarter of that year there was added in Treasury note six per cent. stock..... | 716 75 |
| Making an aggregate of..... | 90,452,580 78 |
| And there was paid in the reimbursement of deferred six per cent. stock..... | 274,565 88 |
| Reducing the funded debt, on the 1st of January, 1824, (statement No. 2,) to..... | 90,178,014 90 |
| From that day to the 1st of October last there was added, in four and a half per cent. stock, under the act of May 24, 1824..... | 5,000,000 00 |
| Making an aggregate of..... | 95,178,014 90 |
| During the same period there was paid the residue of the deferred six per cent. stock..... | \$357,546 26 |
| And in purchasing the seven per cent. stock..... | 4,123,397 10 |
| Making together..... | 4,480,943 36 |
| And reducing the funded debt, on the 1st of October, 1824, (No. 3,) to..... | 90,697,071 54 |
| In the fourth quarter of the year it is estimated there will be added, in four and a half per cent. stock, under the act of May 26, 1824..... | 2,500,000 00 |
| Making an aggregate of..... | 93,197,071 54 |
| And during the same period it is estimated there will be paid for the redemption of the residue of the seven per cent. stock..... | 4,483,093 17 |
| And of the exchanged six per cent. stock..... | 2,668,974 99 |
| Making together..... | 7,152,068 16 |
| Which will reduce the funded debt unredeemed on the 1st of January, 1825, (including \$7,000,000 five per cent. stock subscription to the Bank of the United States, for which the stock of the bank held by the Government is considered an equivalent,) to..... | 86,045,003 38 |
| The amount of Treasury notes outstanding on the 1st of October, 1824, is estimated (No. 4) at..... | 19,756 00 |
| And the amount of Mississippi stock unredeemed on that day, including awards not applied for, (No. 5,) at..... | 14,016 53 |

By the preceding exhibition of the fiscal operations of the year it will be perceived that, if the expectations formed respecting the fourth quarter should be realized, the receipts will have exceeded the estimate presented at the last session of Congress by about \$800,000. The only failure has been in the proceeds of the public lands, and that has been the result of a disappointment in regard to the relinquished lands; great portions of which were supposed to offer strong inducements to purchasers in their fertility and situation, and other circumstances. But, not only has the quantity sold been less than was anticipated, but owing, it is believed, in a great measure, to combinations of capitalists, by which actual settlers were deterred from competition, the price has not, with few exceptions, exceeded the minimum price fixed by law. It is to be observed, however, that the actual receipts from that source of revenue during the present year will exceed those of the preceding year; and it is estimated that those for the ensuing year will not be less.

The gross amount of duties on imports and tonnage, which accrued from the 1st of January to the 30th of September last, inclusive, is estimated at \$19,000,000, and that of the whole year at \$22,500,000. Of this sum, that portion which accrued in the first half of the year exceeds by about \$630,000, and that in the three quarters by about \$1,200,000, the portions which accrued in the corresponding quarters of the preceding year.

The debentures issued during the first three quarters of the present year amounted to \$2,952,000, which is less by \$460,000 than the amount issued during the corresponding period of the preceding year; and the amount of debentures outstanding on the 30th of September last, and chargeable upon the revenue of 1825, was \$1,004,000, which is less by \$401,000 than was, on the same day in 1823, chargeable upon the revenue of 1824.

The amount of bonds in suit on the 30th September last was \$2,909,000, which is \$92,000 more than was in suit on the same day of the preceding year. Deducting from the whole amount of duties outstanding on bonds and otherwise on the 30th of September last, the debentures actually chargeable upon them and the bonds in suit, it is estimated that the sum payable after the expiration of the present year will be about \$12,200,000. This amount, however, is subject to debentures which may still be issued; but, as an allowance has already been made for those which are now chargeable upon it, no considerable deduction on that account is to be expected. A portion of the amount, also, is not payable until 1826;

but the residue, together with so much of the duties accruing in the fourth quarter of the present and in the whole of the next year as may be received during that year, will, after deducting the expenses of collection, constitute the receipts from the customs during the year 1825.

The productiveness of the customs, however, depends upon the state of the foreign commerce of the nation. It is estimated that in the year ending on the 30th of September last the value of domestic articles exported was \$49,684,710, which exceeded by \$2,529,302 the amount exported in the preceding year; and that the value of foreign articles exported was \$25,243,782, which was less by \$2,294,840 than the amount exported in the preceding year. The value of imports during the same period is estimated at \$78,516,183, which exceeds the imports of the preceding year by \$936,916.

For three years past the average annual value of imports has been \$79,778,997; that of foreign articles exported \$25,026,201; and that of domestic articles exported \$48,904,732. The little fluctuation that has taken place in these years, and the improvement in the last year, may be regarded as indications that the commerce of the country is tending to a regular and sound state. If no extraordinary events should occur to interrupt it, it is reasonable to infer that there will be no material or unfavorable change in the ensuing year.

For the two years ending on the 31st December, 1823, the average annual gross amount of duties on imports was \$23,227,835. This sum, upon the annual average value of the whole importations for the three years ending on the 30th of September, 1824, was 29.12 per cent.; and upon the average amount of importations, after deducting the exports of foreign articles, it was 42.42 per cent. For the same two years the average annual net amount of duties, including tonnage, &c., was \$18,758,931; and, for the reasons already stated, it may be presumed that, independent of any influence which the new tariff may have upon the revenue, the amount which will be received into the Treasury from customs during the year 1825 will be about equal to that sum.

The operation of the new tariff upon the revenue cannot now be correctly estimated. On one important branch of imports, those from beyond the Cape of Good Hope, its provisions will not take effect until the 1st of January next. As it is only since the 1st of July last that it has been in operation in regard to other importations, and as the Collectors are allowed by law three months for rendering their accounts, the addition caused by the new tariff cannot, even for that portion of the imports and for one quarter of the year, be stated with perfect accuracy. It is believed, however, that the investigation which has been made with a view to that object affords data for estimating its effects with sufficient exactness for the present purpose. It has been found that, upon the whole importations (estimating their value at the rates adopted in forming the statistical report) in the three quarters of the year ending on the 30th of June, 1824, the gross amount of duties was 27.45 per cent.; and that, if the rates of the present tariff had been applied to the same importations, the duties would have amounted to 30.30 per cent., which is equal to an increase upon the amount of duties of 10.39 per cent. (statement K.) It also appears that, in eight of the principal ports of the United States, the rate of duties upon the whole amount of importations during the third quarter of the year 1823 was 28.36; and during the corresponding quarter of the year 1824 it was 30.98 per cent., (statement L.) But it is to be observed that in the third quarter of 1824 the importations from beyond the Cape of Good Hope were not subjected to the increased rates of the new tariff. These, it is estimated, would have made the rate of duties in that quarter 31.40 per cent., which is equal to an increase upon the amount of duties of 7.57 per cent. The new tariff may, perhaps, have some effect upon the importation of those articles which pay high rates of duty, and for which articles of a lower rate may be substituted. But, as the value of the imports depends more upon the ability of the importing country to pay than upon the amount of duty levied upon the articles imported, it is not probable that, under the present circumstances of the commerce of the United States, there will be any diminution in the aggregate. Upon the whole, therefore, it is believed that the revenue derived from imports will be increased by the operation of the new tariff in a ratio nearly equal to that in which it is estimated to have been increased during the third quarter of the present year in the ports above mentioned, or about $7\frac{1}{2}$ per cent. This increase, however, will produce less augmentation in the actual receipts into the Treasury during the year 1825 than in subsequent years.

With these views of the subject, the receipts into the Treasury during the year 1825 are estimated as follows:

| | |
|--|------------------------|
| Customs | \$20,000,000 00 |
| Lands | 1,000,000 00 |
| Bank dividends | 350,000 00 |
| Miscellaneous and incidental | 150,000 00 |
| Making together | 21,500,000 00 |
| And the residue of the loan authorized by the act of the 26th of May last .. | 2,450,000 00 |
| Forming an aggregate of | \$23,950,000 00 |

The expenditures of the year are estimated as follows:

| | |
|---|----------------------|
| Civil, diplomatic, and miscellaneous | 1,685,026 76 |
| Military service, including fortifications, ordnance, Indian department, revolutionary and military pensions, arming the militia, and arrearages prior to the 1st January, 1817 | 5,013,283 60 |
| Naval service, including the gradual increase of the navy | 3,044,789 31 |
| Public debt, including a payment of \$7,654,570 93 of principal | 11,962,063 97 |
| Making together | 21,705,163 64 |
| Which will leave in the Treasury, on the 1st of January, 1826, after satisfying all the demands of the year 1825, a surplus estimated at | <u>2,244,836 36</u> |

On the first of January, 1826, a large amount of debt incurred by the late war, viz: \$19,000,000 of the 6 per cent. stock of the year 1813, will be redeemable. As it is not probable that the surplus means of the year 1826 will more than equal the amount of the sinking fund for that year, only \$7,000,000 of that stock can be discharged out of the ordinary revenues of the year. On the 1st of January, 1827, the 6 per cents of 1814, another portion of the war debt, amounting to \$13,000,000, will become redeemable, and in that year, also, it is probable that not more than \$7,000,000 of the principal can be discharged. There will then remain in those two years \$13,000,000, which cannot be paid out of the revenue of those years. In 1828 the amount of principal redeemable will probably not exceed the means of the Treasury. In the years 1829 and 1830 no part of the public debt is redeemable, and in 1831 less than \$19,000. Policy would seem to suggest, with a view both to the convenience of the Government and the advantage of the community, that the excess of debt which cannot be discharged in 1826 and 1827 should be thrown in equal portions upon those years in which nothing is payable. For the present, however, it may be sufficient to confine such an arrangement to the excess of the year 1826. From the state of the money market and the high credit of the Government no doubt is entertained that the \$12,000,000 required to provide for the excess of the debt on the 1st of January, 1826, may be borrowed at 5 per cent., reimbursable in 1829 and 1830. And if such an arrangement is approved, it is respectfully proposed that authority be given by law for that purpose.

The same object might, perhaps, be accomplished by an exchange of the stock redeemable on the 1st of January, 1826, for a five per cent. stock redeemable in 1829 and 1830. But it is believed that better terms may be obtained by a loan. A proposal for a loan invites competition from all the moneyed capitalists, including the Bank of the United States; whereas an exchange of stock confines the demand for the new stock to the holders of the old stock, who constitute not only a small portion of the capitalists, but a portion interested in preventing the accomplishment of the exchange. Moreover, the experience of the Government during the last two years justifies the preference for a loan. In 1822 a law was passed authorizing an exchange of \$26,000,000 of the seven per cents and of the six per cents of the years 1812, 1813, 1814, and 1815, for a five per cent. stock, redeemable in the years 1830, 1831, 1832, and 1833, and only \$56,704 77 were exchanged; and under the act of the last session, authorizing an exchange of \$15,000,000 of the six per cents of 1813, only \$3,308,307 45 were exchanged.

Should the suggestion herein offered be adopted, for disposing of the excess of debt redeemable in 1826 and 1827, the amount of public debt redeemable in each year will be as follows:

| | | | |
|----------|-------------|----|--|
| In 1825, | \$7,654,570 | 93 | of 6 per cents. |
| In 1826, | 7,002,356 | 62 | of 6 per cents. |
| In 1827, | 7,001,437 | 63 | of 6 per cents. |
| In 1828, | 9,490,099 | 10 | of 6 per cents. |
| In 1829, | 6,000,000 | 00 | proposed to be at 5 per cent. |
| In 1830, | 6,000,000 | 00 | proposed to be at 5 per cent. |
| In 1831, | 6,018,901 | 59 | proposed to be at 5 per cent. |
| In 1832, | 6,018,900 | 72 | of which \$1,018,000 72 are at 5 per cent. and \$5,000,000 at 4½ per cent. |
| In 1833, | 6,673,055 | 31 | all at 4½ per cent., except \$18,901 59 at 5 per cent. |
| In 1834, | 1,654,153 | 73 | at 4½ per cent. |
| In 1835, | 4,735,296 | 30 | at 5 per cent. |

This includes all the public debt of the United States, except \$7,000,000 of five per cent. stock, subscribed to the capital of the Bank of the United States, and \$13,296,231 45 of three per cents, both of which are payable at the pleasure of the Government. As, under the foregoing view of the debt, all that will be redeemable after the year 1828 will be at an interest of five per cent. or less, and as the five per cent. stock subscribed to the bank is reimbursable in such portions as the Government may please, any surpluses which may remain in 1829 and subsequent years, after discharging the debt redeemable and proposed to be made redeemable in those years, may be applied to the payment of that stock; or if it be deemed advisable to reserve any such surpluses for other objects, there is no doubt that a sum sufficient to pay off that stock may be obtained at 4½ per cent., or even at a lower rate of interest, reimbursable in 1834, in which year, it will be perceived, only a small sum is redeemable.

According to this exhibition of the subject, reckoning the principal and interest of the public debt until its extinction at about \$111,000,000, independent of the stock subscribed to the bank, which may always be considered as offset by the Government shares in the bank, it will be perceived that, by allowing \$10,000,000 annually, with an additional million in the first year, the whole of the public debt of the United States will be extinguished by the end of the year 1835.

In speaking of the public debt, it may be proper to notice the reduction that has been effected during the last eight years, both in the amount of principal and rate of interest. On the 1st of January, 1817, the whole debt of the United States was \$123,491,965 16, of which \$115,257,805 48 were funded, bearing an average interest of 5.56½ per cent. per annum. On the 1st of January next the whole debt will be \$86,045,003 18, bearing an average interest of 5.23¼ per cent. per annum; which shows a reduction of \$37,446,961 98 of principal, and of 0.33¼ per cent. in the average rate of interest.

It is also deemed proper to state that the loan of \$5,000,000 for the payment of the awards under the Florida treaty, and the loan of \$5,000,000 for paying the six per cent. stocks of 1812, both of which were authorized at the last session of Congress at 4½ per cent., have been taken by the Bank of the United States at par. The means of discharging the awards under the Florida treaty were required so soon after the authority was given to make the loan as not to leave time sufficient for receiving proposals from a distance, and the offer of the bank for the whole loan at par was accepted. For the subsequent loan various proposals were received, amounting in the whole, independently of that of the bank, to \$2,554,586 37, at rates varying between par and 4½ per cent. premium, and forming an average premium of 0.97½ per cent. on the whole amount offered, as appears by statement M, herewith transmitted. The proposal of the bank was for the whole sum at par. Although the individual offers are apparently more favorable than that of the bank, yet taking into consideration that the Government is the proprietor of one-fifth of the capital of the bank, and that a portion of the means of the bank, equal to the amount of the loan, would otherwise have been unemployed, the offer of the bank at par was decidedly the most advantageous to the Government, being, as is explained in statement N, equal to an individual offer of 4½ per cent. premium.

That during the progress of the redemption of the public debt a considerable amount may be applied, by a judicious management of the public revenue, to other than the ordinary objects of expenditure, is

apparent, as well from a retrospect of what has been done in the last eight years, as by a comparison between the probable receipts and expenditures in subsequent years.

| | |
|--|------------------|
| For the eight years commencing on the 1st of January, 1817, the total means of the Treasury, including a balance on hand on that day of \$22,033,519 19, and the sum of \$16,336,747 34 since derived from loans, may be estimated at | \$210,275,899 11 |
| And the total expenditure at | 205,769,230 20 |
| Of this amount, nearly one-half will have been applied to the payment of the principal and interest of the public debt, viz..... | 101,365,900 67 |
| To the payment of claims under the Florida treaty..... | 4,891,368 56 |
| To the pensioners of the Revolution..... | 9,400,000 00 |
| To the erection of fortifications..... | 4,200,000 00 |
| To the increase of the Navy..... | 6,000,000 00 |
| And to the payment of demands arising out of the late war, not less than..... | 4,500,000 00 |
| Leaving for all other objects of expenditure, including the civil list, intercourse with foreign nations, Army and Navy, pensions, arming the militia, building of light-houses, extinction of Indian titles, and surveying of public lands, &c., &c., &c..... | 75,400,000 00 |
| Which sum, divided among the eight years, is (per annum) about | 9,425,000 00 |

It will be perceived that, excluding the loans, the annual average receipts in those years may be estimated at \$21,700,000; and, upon the data already shown, the annual revenue in subsequent years may also be estimated at \$21,500,000. Should no important change be made in the existing national establishments, the ordinary annual expenditures, exclusive of what may be required for the erection of fortifications and the increase of the Navy, may be estimated at about \$18,500,000. Thus, after providing for the annual demands for the payment of the principal and interest of the public debt and for all the ordinary expenses of the Government, there will remain for the next eleven years an annual surplus of about \$3,000,000, which, after the extinction of the debt in the year 1835, will receive an annual addition of the \$10,000,000 now appropriated to the public debt; which surpluses may be applied to such objects, conducive to the common defence and general welfare of the nation, as may be within the constitutional powers of Congress, and as they, in their wisdom, may deem proper.

All which is respectfully submitted.

WM. H. CRAWFORD.

ENTRIES FOR BENEFIT OF DRAWBACK OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1825.

The Committee of Ways and Means, to whom was referred a resolution of the House of Representatives of the twenty-eighth of December, instructing them "to inquire into the expediency of so modifying the act of Congress in relation to export entries, for the benefit of drawback, as to vest in the Secretary of the Treasury a discretion to grant relief in cases of unintentional non-conformity with the existing provisions of the said act," reported:

That by the act of Congress entitled "An act to regulate the collection of duties on imports and tonnage," passed the 2d of March, 1799, a drawback, as prescribed by law, is allowed and paid on all goods, wares, and merchandise, imported into the United States, whereupon the duties shall have been
