

# AMERICAN STATE PAPERS.

## MILITARY AFFAIRS.

18TH CONGRESS.]

No. 271.

[1ST SESSION.

RELATIVE TO THE SERVICES AND ACCOUNTS OF COLONEL WILLIAM DUANE, OF THE UNITED STATES ARMY.

COMMUNICATED TO THE SENATE DECEMBER 3, 1823.

DEPARTMENT OF WAR, *March 3, 1823.*

SIR: In compliance with a resolution of the Senate directing "the Secretary of War to inform the Senate of the original amount of a judgment lately obtained by the United States, in the district court of the eastern district of Pennsylvania, against Colonel William Duane, and what credits have been allowed to the defendant since the date of the judgment, the dates of such credits, by whom given, and under what authority," I have the honor to transmit herewith reports of the Third and Fifth Auditors, which furnish the information required.

I have the honor to be your obedient servant,

J. C. CALHOUN.

The PRESIDENT of the Senate of the United States.

TREASURY DEPARTMENT, *Third Auditor's Office, March 3, 1823.*

SIR: In pursuance of your reference to this office of the resolution of the Senate of the United States, of the 1st of March, 1823, directing "the Secretary of War to inform the Senate of the original amount of a judgment lately obtained by the United States, in the district court of the eastern district of Pennsylvania, against Colonel William Duane, and what credits have been allowed to the defendant since the date of the judgment, the dates of such credits, by whom given, and under what authority," I have the honor to submit the enclosed statement.

With great respect, your obedient servant,

PETER HAGNER, *Auditor.*

Hon. J. C. CALHOUN, *Secretary of War.*

*Statement of credits allowed to Colonel William Duane, on settlements of May 9, 1822, furnished in pursuance of the directions of the Secretary of War accompanying the resolution of the Senate of the United States, of March 1, 1823, viz:*

Amount of moneys advanced to sundry officers on account of the recruiting service, not heretofore admitted, now allowed by the accounting officers.....	\$665 00
Amount paid by him in 1814, for rent of a rendezvous, for two subpoenas, and for postage of public letters, now allowed by the accounting officers:.....	66 04
Amount of his account for sundry printing, advertising, and forms furnished, from March 23, 1813, to January 3, 1815, allowed by the Secretary of War.....	1,020 54
	<hr/>
	1,751 58
	<hr/>
Amount of his account reported for suit.....	4,317 74
Additional debit—to Lieutenant James Young.....	55 00
	<hr/>
Total amount of debits.....	4,372 74
From which deduct the above credits.....	1,751 58
	<hr/>
Present balance remaining at the debit of Colonel William Duane on the books of the Third Auditor.....	2,621 16
	<hr/>

I have no knowledge of any judgment having been obtained by the United States against Colonel William Duane; that information is with the Agent of the Treasury. The amount of the original balance reported for suit on the 5th of October, 1819, was \$4,317 74, which, by the settlement above mentioned, was reduced to \$2,621 16. In relation to the suit, the Agent's last report, contained in the list of balances transmitted to Congress from this office, is as follows: "Proceedings stayed till March 3, 1823, to give him an opportunity to bring a claim before Congress which was rejected by the War Department."

PETER HAGNER, *Auditor*.

TREASURY DEPARTMENT, *Third Auditor's Office, March 3, 1823.*

TREASURY DEPARTMENT, *Fifth Auditor's Office, March 3, 1823.*

SIR: To enable you to comply with the resolution of the Senate, of which you sent me a copy, relative to the suit against Colonel Duane, I have the honor to enclose a copy of a letter addressed by me to Charles J. Ingersoll, esq., the district attorney at Philadelphia, of the 14th of May last, from which you will be able to ascertain the sum for which suit was brought, as well as the actual situation of the suit at this time. To this letter I have added a copy of one from Colonel Duane to me, in which he refers to claims he intended to bring before Congress.

I have the honor to be, with great respect, sir, your obedient servant,  
S. PLEASANTON, *Agent of the Treasury*.

Hon. JOHN C. CALHOUN.

TREASURY DEPARTMENT, *Fifth Auditor's Office, May 14, 1822.*

SIR: I herewith transmit a supplementary statement of the account of Colonel William Duane, by which you will perceive that the balance heretofore reported against him of \$4,317 74, for which suit was instituted, is now reduced to the sum of \$2,621 16. You will make such an entry on the judgment as will exhibit the reduced amount now claimed.

Colonel Duane has represented that he has other claims which the War Department prefers should be brought to the consideration of and decided by Congress, which he intends to bring before it at its next session, to an amount exceeding what we claim of him under the judgment. You will suspend all judicial proceedings in his case until the close of the next session of Congress, thus affording him an opportunity of obtaining the interposition of Congress in the final settlement of his accounts.

Respectfully, I have the honor to be, your obedient servant,  
S. PLEASANTON, *Agent of the Treasury*.

C. J. INGERSOLL, *United States Attorney, Philadelphia.*

WASHINGTON, *May 14, 1823.*

SIR: It appearing upon a re-examination of my accounts in the War Department that the first account presented against me for \$7,000 was reduced to \$4,000 in consequence of my being charged erroneously with \$3,000 transferred by me to Colonel Gibson, and that by sundry subsequent items passed to my credit upon authentic vouchers, the debt of \$4,000 for which I was sued has been reduced to \$2,600, and that of this ostensible debt I am charged with \$500, being the amount of a sum borrowed by me from General Bloomfield the 26th of March, 1813, and repaid by me to him on the 3d of April next following, which sum being deducted from the ostensible debt would leave only \$2,100 in demand against me out of the \$4,000 for which I was sued; and having reason to believe that \$1,000 of this last apparent balance is not justly chargeable, I think it fit to place the facts before you; and further, that I have two considerable claims against the government, one of which, for \$3,600, I have provided sufficient evidence to substantiate, besides another for a like amount, all of which I mean to place before Congress at the next session by petition; I beg leave to suggest that it would be no more than justice to relieve me from the oppressive and injurious effects of a judgment suspended over me, when it is already shown that nearly one-half of the amount is already abandoned and that a great part of the remainder palpably unlawfully charged to me, while the claims on my part so amply exceed all the original claims for which I was sued.

I am, sir, your obedient servant,

WM. DUANE.

STEPHEN PLEASANTON, *Fifth Auditor*.

BARRACKS AT OLD LAZARETTO, *June 31, 1809.*

SIR: Captain David Brearley's troop of dismounted cavalry having been reduced in number by the transfer of twenty men to the company of infantry of the 6th regiment, commanded by Captain Davis, lately embarked from this station for Orleans, I have directed him to proceed to recruit his corps without delay to the complement required by law; but no funds being at my command I am not competent to supply him. He goes to Trenton to-morrow under a general beating order, and will take the towns between Trenton and Elizabethtown in his circuit as the good of the service may require.

I propose also, in order to complete the infantry corps of Captain Pennell, to detach his first lieutenant just joined him to recruit in the counties of Chester, Lancaster, and Berks, where his family influences and connexions will enable him to expedite the completion of the company. Funds for this service will also be required; and some arrangement should be made to facilitate duties of this nature at this station, which is particularly favorable for the recruiting service.

I have addressed the paymaster general on the subject, and will thank the Secretary of War to issue such orders as may be deemed best calculated to facilitate the duties. In fact, the trust placed in me as superintendent of this district by the commander-in-chief is of little more efficacy than what my personal zeal and industry to promote the service enables me to do; and I have paid money out of my own pocket rather than there should be inconvenience or complaint against the department.

Captain Pennell has not been furnished with the instructions, nor with all the forms required for an officer in the recruiting service; nor have I any, nor instructions to provide any, nor forms for any other than the inspection rolls which I have procured from the records of the adjoining garrison. If copies in duplicate were sent to me, and specific orders for furnishing such blanks as may be requisite, there would be no difficulty on this score; but as matters stand it is not practicable for an officer to comply with the forms required, because he is not instructed with forms nor the time and manner of forwarding them.

I have the honor to be, with respect, your obedient servant,

WM. DUANE, *Lt. Col. U. S. Army, Commanding Fort Mifflin, &c.*

The SECRETARY OF WAR.

OLD LAZARETTO, *February 1, 1809.*

SIR: In my letter of yesterday, from this place, I omitted to transmit the enclosed return of clothing of Captain D. Brearley's troops. He departed this morning for Trenton. I renew my entreaty that the funds requisite for him to recruit, and for Captain Pennell's lieutenant, be ordered without delay. Perhaps a direction to the military agent to make the requisite advances would be the best expedient, and that officer's report would be a good record in the first instance—my check on the issue, a sufficient control on the proposed or actual mode of disbursements.

I have the honor to be, &c.,

WM. DUANE,

*Lieut. Colonel, Commanding Fort Mifflin and Dependencies.*

The SECRETARY OF WAR.

OLD LAZARETTO, *Fort Mifflin, May 1, 1809.*

SIR: Captain Findley, of the rifle regiment, and Lieutenant Hamilton, of the same company, have addressed to me the letters of which I have the honor to enclose the originals. General Wilkinson, on giving me the superintendence of the recruiting service in this district, required me to correspond and execute the duties which might be required for the public service; and I have hitherto attended to it, in strict conformity with the regulations, as far as was in my power. No funds were ever placed at my disposal for this service; I have therefore referred the letters to the War Department, leaving it to your determination how to act in the case, whether by a direct address to the officer left to recruit or through me.

The letters enclosed will be my vouchers for the amount of so much postage, and an equal amount in replying to these officers.

Discipline at this station is in a very forward and pleasing state. I expect by the 4th of July, for the number of men, as well-disciplined a corps, and as capable of executing any manœuvre at command, as any that can be found in any country.

By Mr. Weightman, of Washington city, who leaves this place in two or three days, I shall have the honor to transmit a copy of my *Military Library* as a present to the War Office. Should you, on perusal, deem it worthy of recommendation, or the purchase of any copies, Mr. Weightman, at Washington, will be able to provide any number that may be required. General Dearborn intimated an intention of taking a number of copies as soon as it should be finished. There is no other work in the language which contains the new tactics, and the discipline of every species of troops, in so compact a form.

I have the honor to be, sir, your obedient servant,

WM. DUANE,

*Lieut. Colonel, Commanding Fort Mifflin and Dependencies.*

WM. EUSTIS, Esq., *Secretary of War.*

BARRACKS AT OLD LAZARETTO, *near Fort Mifflin, May 18, 1809.*

SIR: The inconvenience felt here for want of a guard-house, or place for the guard, and for the detention of persons guilty of temporary irregularities, induced me to call upon the military agent to put the place best adapted for a guard-house into a state suitable for the purpose, which he has declined. There is a frame building exactly on the angle which covers both the entrances to the enclosure here, which wants only plastering, the formation of a platform for a guard-room bed, and the stopping up of a window on the outside, and opening a door into the guard-room, to have a most complete, commodious, and suitable guard-house. My purpose in addressing this note is to obtain your sanction for this purpose. The late Secretary of War, confiding in my zeal for the public service, gave me an unlimited authority to do all that I should deem proper and expedient to render the place suitable to its intention and advantageous to the public interest. I am persuaded that, without any more than the expense of a very small quantity of extra rations, I have rendered this place a service equal to \$5,000 value, if it were to be to-morrow sold at auction, and I have preserved the men in health, activity, free from excesses, and strict in their discipline; yet all not only satisfied, but daily more attached to the service.

If the same confidence were to be reposed in me, I flatter myself I could add to the value, convenience, health, and beauty of this place only by employing a few laborers for a few weeks to ditch the front of the station on the Delaware and Schuylkill; this is the proper season to do it, both to keep the men in action and to avert the intermittents which follow hot weather where there is stagnant water. Under

the miscellaneous appropriations for garrisons an allowance might be made for this important place, and the public would, on the best principles of economy, preserve health, improve property, and possess an establishment which, I am persuaded, would redound to the credit as well as profit of the government.

Permit me to ask your sanction to the following improvements, absolutely necessary:

Authority to make a guard-bed, open a door, close a window, and plaster the guard-room;

Authority to employ four or five ditchers a few weeks to aid and direct the fatigue parties in banking out the river;

And to erect a small kitchen for cooking the victuals of the officers, there being no kitchen. There are bricks to a considerable amount belonging to the public at the arsenal, which would answer for this purpose, and render this position a complete garrison for 300 or 400 men, upon an emergency.

I have the honor to be, sir, your obedient servant,

WILLIAM DUANE, *Lieutenant Colonel, Commanding District.*

WILLIAM EUSTIS, Esq., *Secretary of War.*

PHILADELPHIA, *November 1, 1810.*

SIR: By the mail of yesterday I forwarded the two volumes of the French cavalry system; by to-morrow's mail the translation will go in five parcels.

The translation is made in a literal manner, by a person unacquainted with military affairs; to make use of it a person must be thoroughly conversant in the subject and competent to use the terms analogous in our language and military idiom.

Should the War Department not think proper to publish the whole French treatise, I shall cheerfully undertake it myself at a proper season.

I am, sir, your very humble servant,

WILLIAM DUANE.

The SECRETARY OF WAR.

PHILADELPHIA, *November 6, 1809.*

SIR: The soldiers belonging to Captain Brearley's dragoons, and the soldiers of the infantry company, 6th regiment, commanded by Lieutenant Muhlenberg, made application to obtain their half bounty, that is, the six dollars allowed to each on joining their corps. They have agreed to lay the money out in the purchase of stout leather boots; and I have got boots made for them, each a pair. Forty-three pairs were this day delivered, and will be delivered to the men to-morrow on parade.

The purpose of this letter is to request an order for the amount of the six dollars each, for the men now in garrison here. Either direct to the accountant or to the military agent here, to be passed to the proper account. Mr. Reading Howell has also called on me this moment for the amount of his bill, sixty-one dollars, for the chart of the Delaware, executed last year. I really, beside the personal mortification, feel a little for the public credit in matters of this kind.

A bill for a boat, which I was ordered to obtain, and which has been in use now a year, I have paid out of my personal funds (\$200) rather than the public administration should be censured. I do not mention this as a matter of merit, but with a view of showing that my application is not a mere importunity, but a matter of duty and propriety.

The soldiers have each subscribed a paper of agreement to appropriate the six dollars of the bounty to the purchase of the boots; their receipts shall be forwarded as soon as the money shall be paid the citizens who have made the articles, which are of an excellent quality.

I have the honor to be, sir, your obedient servant,

WILLIAM DUANE, *Lieutenant Colonel, Commanding Fort Mifflin, &c.*

WILLIAM EUSTIS, Esq., *Secretary of War.*

PHILADELPHIA, *January 10, 1810.*

SIR: I have received yours of the 6th instant, to which I reply, that I am not solicitous to have the publication of the French system of cavalry, because I am aware it would not yield any pecuniary profit; but I should, nevertheless, aid in its publication; nor would any *advance* be required if the War Department would only say what number of copies it would take; and the greater number it would take, the lower the price would be. The whole, I think, might be brought into one volume, plates and all, and this would reduce the price a full third. If government would take 1,000 copies, say at four dollars, there would be no payment requisite but on delivery; if 2,000 copies, three dollars the copy, payable on delivery, and 3,000 copies, two and a half dollars.

I have, however, given my opinion as to the indispensable change of phrase and modification to the infantry system, which is absolutely indispensable, and without which any change would be only to make very bad worse.

With regard to the uniform, (having before given my ideas of the uniform very succinctly,) I did not think it was required to accompany the box with any further opinions. Will you permit Captain Irvine and myself to fit up a company of the new raised troops by having the clothing cut at the arsenal here, the leather caps made, and the men dressed as soldiers should be? If what we do should be afterwards not approved, it will be only wearing out the year's clothing as if it were adopted.

The coat with red facings, and cord of cotton at the button-holes, is the one that I would recommend; it is of the cut of the marine corps coat, which is, in fact, a cut borrowed from the French infantry. The French infantry cap, of which I have just received a specimen from General Armstrong, is nearly of the

form of the leather one which I recommended, and of which I had two patterns made. I would use the honest, simple *buck's tail* of old times, instead of a feather, for the rank and file, and for the officers, too, put on grand parade. I would have each soldier to have a pair of white and a pair of blue pantaloons.

I understand that the black belt and front cartridge box which I recommended are not so well approved of. These are matters that may be improved afterwards, if requisite. The cross and white belts, therefore, might stand as they now are formed, only that there should be a short strap to hitch the pouch to the right hip button if the hinder pouch is preserved.

The firelocks should have slings, and in case of war there should be a leather case to cover the lock, and a broad strap to cover the barrel, so as to guard the hand while loading from the heat of the gun in quick fire.

I think all the corps should have coats of the same color, cut, and length; artillery and rifle corps, yellow mounting or lace; infantry and cavalry, white; the feather (if any) to be different in each, and the length for rank and file inflexibly fixed.

These are my ideas on the uniform; but permit me to offer a single observation more important than all: If the clothing and its making and cutting be continued in its present hands; if the man employed to purchase has the right also to choose the inspector, and to laugh at the idea of rejecting any article, however miserable, all your efforts to render the soldier comfortable or the uniform creditable to you or the government will be absolutely futile; and let me say that in case of a war the enemy could not have a more useful ally than the person who has at present the charge of that important branch of public duty.

I will in a few days take the liberty of presenting to you my reflections on the subject more at large, in conformity with your intimation in the letter now before me.

I am, sir, with great respect, your obedient servant,

WM. DUANE.

WILLIAM EUSTIS, Esq., *Secretary of War.*

SIR: Mr. Weightman, of Washington city, will hand this to you, together with a copy of my Military Library, mentioned in a note addressed to you a few days ago. It has had a very general circulation, and has met the approbation of many capable persons. The storm out of which it arose has blown over for the present—for how long it is not possible to anticipate. The work which I present, I persuade myself, would have been found of infinite advantage had we been forced into war, and should we at any time within twenty years, I am satisfied that this work will have diffused a stock of information on military subjects which was very much wanted, and which must be of some use. I have prepared for press small hand books or manuals, calculated for the mere parade duties for *infantry, cavalry, and artillery*; that is, three small works, such as contain the mere parade practice of exercise and manœuvre, without the speculative or theoretic parts of tactics.

I have suspended the publication of these under an expectation that the adoption of a new system, which was in preparation last year, would have enabled me to conform the exercise to that which should have been adopted by the War Office. If there is any prospect of accomplishing what was then contemplated, I would suspend the publication still; if not, I shall even proceed, and then the books, which will be small, light, and conformable to the exercises in the Library, shall go to press. I only intimate this as a matter of information. When I shall have the pleasure of seeing you in a few days hence, I shall take the liberty of calling your attention to the subject.

I take this opportunity of informing you that the map of the Delaware, which I was directed by General Dearborn to procure for the use of Fort Mifflin, has been completed; the expense is \$61, which I will thank you to direct the military agent to pay to Mr. Reading Howell.

I am, sir, with respect, your obedient servant,

WM. DUANE.

WILLIAM EUSTIS, Esq., *Secretary of War.*

ADJUTANT GENERAL'S OFFICE, *Fourth Military District, Philadelphia, June 14, 1813.*

SIR: The funds placed in my hands for the recruiting service are expended. I have requested funds from the paymaster, and notified the accountant of the War Department some time of the small balance which remained. After Wednesday I shall not be able to proceed in this duty without funds, having already advanced cash of my own.

I beg leave to represent that the recruiting service very materially interferes with my duties as adjutant general. Obligated to be absent in different parts of the district, which may probably be frequent, the accounts fall in arrear, and my correspondence is often delayed a week later than it should be; and so incessant is the attention required to this service that I have not been able to attend to the discipline of the new levies at the stations on the Delaware as I should wish. Permit me to solicit that the recruiting service be committed to some other officer. The general to whom I have performed the functions of aid, adjutant, and inspector, has now an inspector, an aid, and a brigade major, none of whose duties requires the activity required from my station.

I am, sir, with great respect, your obedient servant,

WM. DUANE, *Adjutant General.*

General JOHN ARMSTRONG, *Secretary of War.*

ADJUTANT GENERAL'S OFFICE, *Fourth Military District, Philadelphia, June 18, 1813.*

SIR: The recruiting service is in a state of suspense in this district through the want of funds. Should it be intended not to continue the recruiting, a considerable expense will be saved in charges for music and rendezvous, now going on without funds to discharge the debts as incurred.

I have called upon the paymaster for \$10,000, and requested \$5,000 on account of contingencies.

There are now nearly 500 men at the stations on the Delaware and with parties in this district. I beg leave to suggest that, if it should be deemed proper, 200 men of the 32d might be placed in charge of Fort Mifflin, and the whole of the new five years' levies might go to the north. Should this course be thought advisable, it will be necessary to make some provision for the payment of the men of *different corps*, as there are recruits of the following regiments: Light artillery; 2d artillery; 3d artillery; 1st infantry; 2d, 5th, 16th, 20th, and 22d infantry, and riflemen, which latter should all be transferred. The regulations of the pay department require payment to be made under conditions with which it is impossible to comply in many cases within my knowledge. Some rule by which the soldier should be paid, the paymaster indemnified, and the service promoted, is absolutely necessary.

I have the honor to be, sir, your obedient servant,

WM. DUANE, *Adjutant General.*

General JOHN ARMSTRONG, *Secretary of War.*

18TH CONGRESS.]

No. 272.

[1ST SESSION.]

ON THE APPLICATION OF NEW YORK FOR THE RECONVEYANCE OF THE BATTERY OF CASTLE CLINTON IN THAT CITY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 9, 1824.

The Committee on Military Affairs, to whom was referred the memorial of the mayor and aldermen of the city of New York, praying that Congress would pass an act authorizing the President to reconvey Castle Clinton, as well as the land on which it is built, without paying for the estimated labor of the erection of this work, reported:

That they have carefully considered the circumstances stated by the memorialists, and have likewise referred to the act passed on the 30th of March, 1822, under which your committee think that the President is vested with so ample a discretion that no new law is necessary, or a revision of the one already past, to enable him to act in the premises of the said petition.

The act of 1822 authorizes the President to reconvey the land on which Castle Clinton is erected, and directs that the fortress be dismantled and the materials sold. The dismantling the fortress, of course, has reference to the removal of the cannon and munitions of war, and does not contain a direction that the castle should be demolished. The President is therefore fully at liberty to sell the materials as they at present stand; nor is he bound by any precepts in the act, either express or implied, to estimate the value of the labor employed in the erection of the castle. The preservation of this work, not at the expense of the United States, but in conformity with the wishes of the corporation of New York, would be desirable from the several considerations which are stated by the memorialists; and although the location of the castle militates with one of the approved rules of modern defence, yet in time of war, if the outer works, erected for the protection of New York, were forced, this fortress, garrisoned by the local militia of the city, might be serviceable.

Your committee, believing that the discretion to act on this subject is properly vested in the President, beg leave to offer the following resolution:

*Resolved*, That the Committee on Military Affairs be discharged from the further consideration of the memorial of the mayor and aldermen of the city of New York.

18TH CONGRESS.]

No. 273.

[1ST SESSION.]

MILITARY ROAD FROM FORT ST. PHILIP TO THE ENGLISH TURN IN LOUISIANA.

COMMUNICATED TO THE SENATE JANUARY 13, 1824.

DEPARTMENT OF WAR, *January 10, 1824.*

SIR: In pursuance of the resolution of the honorable Senate of the United States of the 17th January, 1821, referring to me, to be considered and reported upon, "the memorial of the general assembly of the State of Louisiana in relation to a military road from Fort St. Philip to the English Turn," I have the honor to present herewith a report of the chief engineer, dated the 9th instant, which fulfils the object contemplated by the resolution.

Respectfully submitted,

J. C. CALHOUN.

HON. JOHN GAILLARD, *President of the Senate pro tem.*

ENGINEER DEPARTMENT, *January 9, 1824.*

Sir: Lieutenant Chase, of the corps of engineers, has recently examined the banks of the river Mississippi from New Orleans to Plaquemine Turn, with a view to the selection of a route for a road between those places. The right bank of the river, affording a shorter route and a soil more favorable for construction, has been preferred, and a sketch of the direction of the route selected, together with an estimate in detail of the cost of completing the road, adapted to the different circumstances under which it may be effected, have been received.

I have the honor to present herewith a copy of the sketch, and the substance of the estimate above mentioned. It will be perceived by the former that the road is divided into three sections. The first section, extending from New Orleans to the point marked A, at the plantation of Mr. Johnston, a distance of forty-five miles, is now provided with a road practicable for light carriages, but not for heavy carriages or artillery. The same road extends through the second section, from A to B, a distance of five miles, but is not practicable for carriages of any kind. There is no road whatever in the third section, extending from B to Plaquemine Turn, a distance of twenty miles. The route selected will embrace the road passing through the first and second sections, as just described, which it is proposed to enlarge and improve, so as to render it practicable for heavy carriages and artillery. To effect this in the first section will require 10,560 days of labor, besides the hire of overseers and the cost of tools. Supposing the labor to be contributed gratuitously from the plantations contiguous to the road, in consideration of the advantage that will accrue to them from its improvement, the only expense will be, for 495 days' hire of overseers, at \$1 50..... \$742 50  
And for the cost of tools, (spades and wheelbarrows)..... 700 00

Making the total cost, exclusive of the expense of labor..... 1,442 50  
Should the planters refuse to contribute the labor, it might be hired at fifty cents per day, which would add to the cost..... 5,280 00

And enhance the total cost to..... 6,722 50  
The expense of the second section would be, for 1,760 days of labor, at 50 cents per day..... \$880 00  
And for hire of overseers and tools..... 60 00

Making the total cost of..... 940 00  
The expense of the third section would be, for 7,744 days of labor, at \$1 per day, \$7,744 00  
And for hire of overseers and tools..... 700 00

Making the total cost..... 8,444 00

And the aggregate cost of the three sections..... 16,106 50  
But should it be thought that the road passing through the first section would answer in its present state, the deduction of the amount estimated for its improvement..... 6,722 50

Would diminish the aggregate cost to..... 9,384 00

The foregoing is furnished in pursuance of your instructions, predicated upon a resolution of the Senate, dated the 17th of January, 1821. Early measures were taken to obtain the information required for the fulfilment of those instructions, but owing to unavoidable circumstances it has been delayed until this time.

Respectfully submitted,

ALEXANDER MACOMB, *Major General, Chief Engineers.*

Hon. J. C. CALHOUN, *Secretary of War.*

*To the Congress of the United States, in Senate and House of Representatives convened:*

The memorial of the general assembly of the State of Louisiana respectfully sheweth: That Fort St. Philip, situate on the eastern bank of the river Mississippi, about sixty miles below the city of New Orleans, is a post of the utmost importance to the defence of this State, being the only fortress to oppose the approach of an enemy to the city in that direction. That although during the late invasion the skill of the officers and valor of the men forming its garrison baffled the attempt of the enemy in that quarter, yet the safety of that place was more than once endangered by the extreme difficulty of communicating with it during the time of the siege. This difficulty arises from the nature of the ground between the fort and the English Turn. It consists of a strip of land along each bank of the river, in some places extremely narrow, and in all subject to inundations during the rise of the river, when not protected by an embankment. These embankments are made by individuals who own the lands where they have been granted, but are neither permanent nor extensive enough to rely upon when so great a stake as that of the public safety is at issue; a great proportion, too, of the lands being still public property, no embankment whatever is made on them, and wherever they occur the communication is completely cut off.

The event of an enemy possessing himself of the one bank of the river, which happened during the late war, and may again occur, renders it necessary that the communication should be provided for on both sides of the river.

Your memorialists therefore think it a measure of high importance to the defence of the State that provision should be made for making a military road from Fort St. Philip to the English Turn, on both sides of the river. And they have the satisfaction to assure the government of the United States that, in their opinion, the expense of executing this necessary work will, in a great measure, be defrayed by the increased value of the lands belonging to the public which lie on the course of the projected road.

Your memorialists therefore pray that measures may be taken (either by the labor of the troops or in such other way as may be deemed proper) to construct a road on both sides of the river, from Fort St. Philip to the English Turn.

A. BEAUVAIS, *Speaker of the House of Representatives.*  
J. POYDRAS, *President of the Senate.*

This is to certify that the foregoing is a true copy of the original, deposited in the office of the secretary of state. Given under my hand and the seal of the State this 13th day of December, 1820, and of the independence of the United States the forty-fifth year.

By the governor:

J. VILLERE.

H. LAVERGNE, *Secretary of State.*

18TH CONGRESS.]

No. 274.

[1ST SESSION.]

RECOMMENDATORY OF THE CONSTRUCTION OF A MILITARY ROAD FROM FORT ST.  
PHILIP TO THE ENGLISH TURN IN LOUISIANA.

COMMUNICATED TO THE SENATE JANUARY 23, 1824.

Mr. JACKSON, from the Committee on Military Affairs, to whom was referred the report of the Secretary of War respecting a military road from Fort St. Philip to the English Turn, reported:

That your committee have had the same under consideration and fully agree in the sentiment expressed in the memorial of the legislature of the State of Louisiana, that Fort St. Philip is a post of the utmost importance to the defence of New Orleans, being the only fortress to oppose the approach of an enemy to that city by the river Mississippi, and that that fort may be very much endangered by reason of the extreme difficulty of communicating with it; that during the late siege by the British forces this difficulty was sensibly felt, and it was greatly feared that it might lead to its capture for the want of a road by which it could be reinforced. Your committee therefore view a military road leading from Fort St. Philip to the English Turn as absolutely necessary to the defence of New Orleans and to the safety of that fortress in a state of war, and have reported a bill authorizing the President to cause the said military road to be made agreeably to the report of the engineer department and the memorial of the legislature of Louisiana, herewith presented for the information of the Senate.

18TH CONGRESS.]

No. 275.

[1ST SESSION.]

ON THE SERVICES OF THE MILITIA OF MASSACHUSETTS DURING THE WAR OF 1812-15  
AND CLAIM OF THAT STATE FOR PAY THEREFOR.

COMMUNICATED TO THE SENATE FEBRUARY 23, 1824.

*To the Senate and House of Representatives of the United States:*

I herewith transmit to Congress certain documents relating to a claim of Massachusetts for services rendered by the militia of that State in the late war, and for which payment was made by the State. From the particular circumstances attending this claim I have thought it proper to submit the subject to the consideration of Congress.

In forming a just estimate of this claim it will be necessary to recur to the cause which prevented its admission, or the admission of any part thereof, at an earlier day. It will be recollected that when a call was made on the militia of that State for service in the late war, under an arrangement which was alike applicable to the militia of all the States and in conformity with the acts of Congress, the executive of Massachusetts refused to comply with the call, on the principle that the power vested in Congress by the Constitution to provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions, was not a complete power for those purposes, but conditional and dependent on the consent of the executives of the several States; and also that when called into service, such consent being given, they could not be commanded by a regular officer of the United States, or other officer than of the militia, except by the President in person. That this decision of the executive of Massachusetts was repugnant to the Constitution of the United States and of dangerous tendency, especially when it is considered that we were then engaged in a war with a powerful nation for the defence of our common rights, was the decided opinion of this government; and when the period at which that decision was formed was considered, it being as early as the fifth of August, eighteen hundred and twelve, immediately after the war was declared, and that it was not relinquished during the war, it was inferred by the Executive of the United States that the decision of the executive of that State was alike applicable to all the services that were rendered by the militia of the State during the war.

In the correspondence with the governor of Massachusetts at that important epoch, and on that very interesting subject, it was announced to him by the Secretary of War that if the militia of the State were called into service by the executive of the State and not put under the command of the major general of the United States, as the militia of the other States were, the expense attending their service would be chargeable to the State and not to the United States. It was also stated to him at the same

time that any claim which the State might have for the reimbursement of such expenses could not be allowed by the Executive of the United States, since it would involve principles on which that branch of the government could not decide.

Under these circumstances, a decision on the claim of the State of Massachusetts has hitherto been suspended, and it need not be remarked that the suspension has proceeded from a conviction that it would be improper to give any sanction by its admission, or by the admission of any part thereof, either to the construction of the Constitution contended for by the then executive of that State, or to its conduct at that period towards the general government and the Union.

In January, eighteen hundred and twenty-three, the representatives in Congress from Massachusetts and Maine suggested by memorial that the constitutional objection could not apply to a portion of the claim, and requested that the accounting officer of the government might be instructed to audit and admit such part as might be free from that objection. In all cases where claims are presented for militia service it is the duty and the practice of the accounting officer to submit them to the department for instruction as to the legality of the claim—that is, whether the service had been rendered by order of the competent authority or otherwise, under circumstances to justify the claim against the United States, admitting that the evidence in support of it should be satisfactory. To this request there appeared to be no well-founded objection under the reservation as to the constitutional principle, and accordingly an order was given to the accounting officers of the treasury to proceed in auditing the claim with that reservation.

In conformity with this arrangement, the executive of Massachusetts appointed two citizens of that State commissioners to attend to the settlement of its claim, and who, in execution of the trust reposed in them, have presented to the accounting officer of the treasury that portion comprehending the services of the fifth division of the militia of the State, which has been audited and reported for consideration subject to the objection above stated. I have examined this report, with the documents presented by the commissioners, and am of opinion that the services rendered by that division were spontaneous, patriotic, and proper, necessary for self-defence to repel, in some instances, actual invasion, and in others to meet by adequate preparation invasions that were menaced. The commissioners of the State having intimated that other portions of service stood on similar ground, the accounting officer has been instructed, in auditing the whole, to do it in such manner as to enable the department to show distinctly under what circumstances each portion of service was rendered, whether voluntary, called out by invasion, or the menace of invasion, or by public authority; and in such case whether the militia rendering such service was placed under the authority of the United States or retained under that of the State.

It affords me great pleasure to state that the present executive of Massachusetts has disclaimed the principle which was maintained by the former executive, and that in this disclaimer both branches of the legislature have concurred. By this renunciation the State is placed on the same ground, in this respect, with the other States, and this very distressing anomaly in our system is removed. It is well known that the great body of our fellow-citizens in Massachusetts are as firmly devoted to our Union, and to the free republican principles of our government, as our fellow-citizens of the other States. Of this important truth, their conduct in every stage of our revolutionary struggle, and in many other emergencies, bears ample testimony; and I add, with profound interest and a thorough conviction, that although the difficulty adverted to in the late war with their executive excited equal surprise and regret, it was not believed to extend to them. There never was a moment when the confidence of the government in the great body of our fellow-citizens of that State was impaired; nor is a doubt entertained that they were at all times willing and ready to support their rights and repel an invasion by the enemy.

The commissioners of Massachusetts have urged, in compliance with their instructions, the payment of so much of their claim as applies to the services rendered by the fifth division, which have been audited, and I should have no hesitation in admitting it, if I did not think, under all the circumstances of the case, that the claim, in all its parts, was cognizable by Congress alone. The period at which the constitutional difficulty was raised by the executive of the State was in the highest degree important, as was the tendency of the principle for which it contended, and which was adhered to during the war. The public mind throughout the Union was much excited by that occurrence, and great solicitude was felt as to its consequences. The Executive of the United States was bound to maintain, and did maintain, a just construction of the Constitution; in doing which, it is gratifying to recollect that the most friendly feelings were cherished towards their brethren of that State. The executive of the State was warned, in the correspondence which then took place, of the light in which its conduct was viewed, and of the effect it would have, so far as related to the right of the Executive of the United States, on any claim which might afterwards be presented by the State to compensation for such services. Under these circumstances, the power of the Executive of the United States to settle any portion of this claim seems to be precluded. It seems proper, also, that this claim should be decided, on full investigation before the public, that the principle on which it is decided may be thoroughly understood by our fellow-citizens of every State, which can be done by Congress alone, who alone also possess the power to pass the laws which may be necessary to carry such decision into effect.

In submitting this subject to the calm and enlightened judgment of Congress, I do it with peculiar satisfaction, from a knowledge that you are now placed, by the course of events, in a situation which will enable you to adopt such measures as will not only comport with the sound principles of our government, but likewise be conducive to other the highest interests of our Union. By the renunciation of the principle maintained by the then executive of Massachusetts, as has been done by its present executive and both branches of the legislature in the most formal manner, and in accordance with the sentiments of the great body of the people, the Constitution is restored in a very important feature—that connected with the public defence; and in the most important branch, that of the militia, to its native strength. It is very gratifying to know that this renunciation has been produced by the regular, orderly, and pacific operation of our republican system, whereby those who were in the right at the moment of difficulty, and who sustained the government with great firmness, have daily gained strength until this result was accomplished. The points on which you will have to decide are, what is fairly due for the services which were actually rendered? By what means shall we contribute most to cement the Union and give the greatest support to our most excellent Constitution? In seeking each object separately we are led to the same result. All that can be claimed by our fellow-citizens of Massachusetts is, that the constitutional objection be waived, and that they be placed on the same footing with their brethren in the other States—that, regarding the services rendered by the militia of other States for which compensation has been

made, giving to the rule the most liberal construction, like compensation be made for similar services rendered by the militia of that State.

I have been led to conclude, on great consideration, that the principles of justice, as well as a due regard for the great interests of our Union, require that this claim, in the extent proposed, should be acceded to. Essential service was rendered in the late war by the militia of Massachusetts, and with the most patriotic motives. It seems just, therefore, that they should be compensated for such services in like manner with the militia of the other States. The constitutional difficulty did not originate with them, and has now been removed. It comports with our system to look to the service rendered and to the intention with which it was rendered, and to award the compensation accordingly, especially as it may now be done without the sacrifice of principle. The motive in this instance is the stronger, because well satisfied I am that by so doing we shall give the most effectual support to our republican institutions. No latent cause of discontent will be left behind. The great body of the people will be gratified, and even those who now survive, who were then in error, cannot fail to see with interest and satisfaction this distressing occurrence thus happily terminated. I therefore consider it my duty to recommend it to Congress to make provision for the settlement of the claim of Massachusetts for services rendered in the late war by the militia of the State, in conformity with the rules which have governed in the settlement of the claims for services rendered by the militia of the other States.

JAMES MONROE.

WASHINGTON CITY, *March 26, 1822.*

The undersigned, representatives from the States of Massachusetts and Maine, ask liberty, in conformity to instructions from their respective governments, to invite the attention of the President of the United States to the claim which the State of Massachusetts several years since presented to the general government for a reimbursement of the moneys advanced by the former to militia called into service during the last war with Great Britain by the direction and on account of the said general government.

The history of this claim is already known to the President, and it is not the intention of the undersigned now to trouble him with a discussion of its merits; but they confine themselves to respectfully and earnestly requesting him to instruct the proper executive department to entertain such a discussion, and

\* There will be found in this collection, and printed in this number, the documents communicated by the Secretary of War to the House of Representatives the 20th February, 1817, and also the report of the committee of that House of the 10th of March, 1818, and the documents communicated therewith to the House.

to permit the undersigned thereat to produce such proofs and reasons as to them may appear proper, in order to establish the legality and justice of the claim in question, according to the true meaning of the laws applicable to the subject, and to the practical construction already given to those laws in similar cases. They also respectfully ask that the said department may be fully authorized to liquidate and allow all, or any part, of said claim which, in its opinion, shall have been so established.

The undersigned have the honor to be, with great respect, the President's very obedient servants,

William Eustis,	Ezekiel Whitman,
Jeremiah Nelson,	William D. Williamson,
John Reed,	Aaron Hobart,
Samuel C. Allen,	J. W. Dwight,
Timothy Fuller,	Francis Baylies,
Samuel Lathrop,	Benjamin Gorham,
Joshua Cushman,	Jona. Russell,
Jos. Dane,	Lewis Bigelow,
Mark Langdon Hill,	Gideon Barstow.
Enoch Lincoln,	

The foregoing is a true copy of the memorial which Mr. M. L. Hill and myself presented, personally, to the President, March 29, 1822.

BENJ. GORHAM.

*Mr. Lloyd to the Secretary of War.*

Mr. Lloyd has the honor to state to the Secretary of War that he was permitted by the President of the United States, when he recently waited on him, as one of the committee from the delegations in Congress from Massachusetts and Maine, in reference to the claim of the said States for the services of the militia during the late war, to leave with the President a brief recapitulation of the circumstances attendant on that claim, which, from the appearance of the file of papers on the table of the honorable Secretary, he is apprehensive was not among them. If this apprehension be correct, presuming the subject has been referred by the President to the Department of War, he takes the liberty to request the favor of Mr. Calhoun to receive from the President and peruse the said historical sketch which, though informally drawn, is believed to be correct, and may serve, in a concise form, to recal to his remembrance the leading facts in the case.

Mr. Lloyd avails of the occasion to offer to Mr. Calhoun the assurance of his very high respect.

THURSDAY, *January 25, 1823.*

BOSTON, *November 22, 1822.*

SIR: I have the honor to submit to your excellency the following statement, made in compliance with the request of honorable Mr. Lloyd, senator in Congress from this State, in his note dated the 15th of October past. I should have prepared this document at an earlier day, had not other official duties of importance prevented, and had not Mr. Lloyd also assured me that the information called for would be in season if received the first of December.

It has also required much more time than I expected to prepare a statement giving all the events and facts in detail which were requested. A general and pretty correct view might have been given in much less time. But it was believed that such a statement would not have furnished the information desired, and it was also presumed that Mr. Lloyd was well acquainted with the great outlines of the subject, and knew the *total* amount of the expenditures of the State in the late war.

Although I was not wholly ignorant of the general course pursued by the government of Massachusetts, the number of militia called out at different periods for the public defence and safety, the places where they were *chiefly* stationed, as well as the amount advanced by the State for these services, yet, as I had never been engaged in ascertaining the *details* of expenses, nor had ever been required to inspect the documents relating thereto, I found it necessary to examine a great many papers in order to obtain the requisite results.

Mr. Lloyd wishes to know "what particular towns and places were attacked or believed to be in imminent danger of attack, at what places the militia were stationed for defence, what was the number and what the term of service of each separate detachment so called out for the public service, and what the respective expenses of each of these several detachments."

It is proper to observe that I do not vouch for the *perfect accuracy* of the statement in every *minutiae*; as the muster and pay rolls have not *all* been seen, I am unable to state in all instances the number of days some of the militia were in service or the *precise* amount of expenses for arms and ammunition supplied by the several towns on the sea-coast for the use of the militia, a part of which it is to be remembered were returned to the arsenal of the Commonwealth, and for which the United States were not charged. But as the sum total of expenses is given, and *generally* the separate sums paid for the militia when in service, this want of precision in the *details* will not, it is hoped, be considered a material defect in the statement.

First, "as to the places invaded or supposed to be in danger of invasion." It is difficult to give an accurate and specific reply in reference to this inquiry; for although there are official documents to show what places were really attacked, it is not easy to ascertain what others were in great and imminent danger in all cases. There were no doubt some unfounded alarms during the war, and applications sometimes were made to the executive for men and arms when there was no certainty of invasion. In some of these cases, through the prudence of the commissioners for sea-coast defence, these requests were not granted, and considerable expense was thus prevented the State and nation. But in some instances, perhaps, military stores and munitions of war were furnished on the *urgent* request of the inhabitants, believing themselves to be in immediate danger, when no attack was made or meditated by the enemy.

It is most abundantly evident, however, that a sound discretion was exercised, and that no expenses of this sort were incurred except where the citizens were very generally in great fear of invasion. I am able, however, to state, with sufficient accuracy perhaps for the purpose Mr. Lloyd may have in view by his request, what places were attacked, or so greatly exposed and in danger as to justify the expense incurred in the measures adopted for the protection and defence of the State.

Soon after the declaration of war, it will be recollected that the governor, though he did not call out and dispose of the militia as requested by the United States officer, (as the detachment had not been completed agreeably to an order of April preceding, as he believed the exigency did not exist which obliged him to place the militia under the command of officers of the United States, and as it was the opinion of all judicious men that more efficient defence would be provided by keeping the militia at home, as well as less expense incurred and less distress brought upon the people, than by marching and placing them as proposed by the military officer of the general government,) yet soon after the declaration of war the governor did issue an order, July 3, for the militia through the State to be in readiness to repel any attack which might be made, and authorizing general and field officers to call out their men when necessary for the defence of any place invaded or threatened. This measure was pronounced to be wise and efficient, as well as most consistent with the character and rights of the militia, considering the existing state of things, by distinguished individuals of both political parties.

The extent of our sea-coast liable to attack, from Dartmouth, bounding on Rhode Island, round Cape Cod, Plymouth, and Boston bay, Salem, Marblehead, Cape Ann, and Newburyport, and from Kittery to Calais, in Maine, is estimated at nearly six hundred miles. "A person deputed by the towns of Eastport and Robbinstown," says the governor, "applied for arms and ammunition, and requested that three companies of militia might be called out for their protection; for, though they did not immediately apprehend an invasion by a large authorized British force, they considered themselves exposed to predatory attacks. Orders were accordingly given for arms and ammunition, and three companies were ordered out." "If the President was acquainted with the situation of the State," he adds, "I think he would not wish to call out our militia, as proposed by General Dearborn."—(Letter to the Secretary of War, August 5, 1812.)

In the month of August, (5th,) however, as the eastern towns in Massachusetts bordering on New Brunswick and Passamaquoddy bay, viz: Calais, Perry, Robbinstown, Lubec, and Eastport, were exposed to depredations from the British, and the people were in a state of great alarm, a battalion of militia, consisting of three companies, was ordered out for the defence of that frontier. They were marched at a distance of one hundred and one hundred and twenty miles, the population of that extreme part of the State being very thin and scattered; and previously to their arrival the militia belonging to the towns above mentioned were ordered into service for the defence of her people, by virtue of the general order of July 3. These militia consisted of four companies belonging to Colonel Shed's regiment, who were called out, and performed duty as watches and guards alternately for nearly a month, the expense of which amounted to \$2,850. The battalion, consisting of three companies, which marched from a distance, was ordered to be put under the command of General Boyd, an officer of the United States. But before they were received into the service of the United States, and provision made for them by the general government, which was about three weeks from the time they began their march, their pay, rations, &c., amounted to \$11,130, and was advanced by the State of Massachusetts. Eleven thousand dollars were received in 1817 from the United States on account of the expenses of the detachment of the battalion sent to Eastport, the vouchers for which are now ready for transmission to the War Department.

During the residue of 1812 very little expense was incurred, there being no further calls for the militia, and no fears entertained of an attack from the enemy in any part of the State. But, under an apprehension that attacks might be made on the seaboard in the spring or summer of 1813, the legislature, when in session in February, authorized the executive to adopt measures of defence for the maritime towns, there being very few regular troops in the State, even in the forts belonging to the United States. The first of March three gentlemen of the highest respectability and of great military skill were appointed to carry these measures into effect, and in the course of the season many applications were made to them for fire-arms and other military stores and munitions of war from towns on the Atlantic coast and bays and harbors connected therewith, when there were apprehensions of invasions, as will be particularly mentioned hereafter. And to the most of these places military stores were furnished, and in some cases special authority given to call out the militia, although the general order of July 3, 1812, was still in force, and considered adequate to any emergency. The quartermaster general was also directed by the commissioners to purchase various military articles, to enable them to supply the towns on the sea-coast, and the greater part of \$50,000 put under their control was expended early in 1813 for these purposes; for, although there was then even no immediate danger of a formidable invasion, some British vessels were hovering on the coast at various points, which gave alarm to the people, and imposed an obligation on government to furnish the means of defence.

The commissioners acted under the belief expressed in their report to the governor and council in June following, (and their opinion was sanctioned by almost an unanimous voice of the citizens,) that it was unnecessary to place large forces at particular points for any long period, as the places of attack were most uncertain, and a very great extent of coast was equally exposed to the enemy.

In the month of March there was an alarm at Mount Desert, below Penobscot, and a detachment of the militia was ordered out from the town of Ellsworth, in the vicinity, for the defence of the inhabitants. The expense of this affair was \$511.

Several cannon and a large quantity of powder were furnished to the town of Kennebunk in April, 1813, and in May small arms and cartridges and shot for cannon and other articles were furnished Portland by request of the selectmen, as several British ships were near that place, and the people generally were apprehensive of an attack. The United States troops at this time stationed there were few, and the fort not supposed sufficient to prevent vessels of force from approaching to the town. The militia were ordered into service at this time at Portland, but were soon discharged as the fears of the citizens subsided.

Bath, Wiscasset, Castine, and other towns on the bay of Penobscot, applied for arms and ammunition in the month of April, and were furnished to considerable amount; and during this month, on account of the alarms which existed, Major General King gave directions for two companies to be detached at Wiscasset, and one at Boothbay, who were discharged after a few days. Expenses a little short of \$1,000.

August, 1813, the United States officer at Portland requested aid of the militia in the fort under his command; and Major General King was of opinion, expressed in a letter to the adjutant general at this time, that it would be necessary to call out the militia at Wiscasset and Bath and other places in that

quarter, as there were few United States troops, and the people were apprehensive of some sudden attacks. He was referred to the order of the governor of July 3, 1812, as a sufficient authority for calling out the militia at any time or place, as the exigency should require. Two companies were ordered into service at Portland accordingly early in September, and continued in service for two months. The expenses of this detachment for pay, rations, &c., were \$6,846 65.

By advice of Major General King, Brigadier General Payson, of Wiscasset, ordered out militia also in September; as there were British vessels near the mouth of Sheepscot river, the people were alarmed, and only eight men in the United States fort there. But they were soon discharged.

In February, 1814, the legislature provided for continuing the board of commissioners for sea-coast defence, and authorized the executive to furnish means of protection to any part of the State in danger of invasion, or exposed to attack from the enemy.

In April, on the representation of Captain Bainbridge, who apprehended an attack at Marblehead, where the frigate Constitution was then lying, two companies of artillery and a company of light infantry were ordered out from Boston, and preparing to march, when intelligence arrived that they would not be needed.

Captain Bainbridge, fearing an attack on the navy yard at Charlestown, requested aid from the militia. The whole Boston brigade, consisting of 3,000 men, were inspected, and General Welles, commanding the brigade, gave assurances that the whole, or any portion of them, should be called out at the shortest notice; a company of militia from Charlestown, and a company of light infantry from Boston, were successively ordered into service to guard the navy yard, which remained there and at Chelsea for some time, as there was an apprehension the enemy might enter the harbor by night and fire the vessels and buildings of the United States there situated. Commodore Bainbridge was perfectly satisfied with the preparations made for defence by the executive and the officers of the militia.

During the same month (April, 1814) Captain Hull was apprehensive of an attack on the vessels of the United States at Portsmouth, and applied to General Dearborn for protection. General Dearborn requested the militia of Massachusetts might be ordered out for the purpose, as the militia of New Hampshire were destitute of arms, and in a state of insubordination. Orders were promptly issued for calling out 250 men from York, Kittery, &c., and more if necessary from the 6th division. The term of service was short; but more were ordered out in September, 1814, the whole being 840 men, and expense amounted to \$14,174 97.

In the course of this month (April, 1814) there were alarms at various other places; and the inhabitants, believing there was great and immediate danger of attack, applied to the commissioners for sea-coast defence, and to general officers of the militia, who were authorized by the governor's order of July 3, 1812, to furnish men in case of emergency. Among these were Portland, Castine, Bristol, Wiscasset, Bath, and some towns on Cape Cod. On these occasions detachments of the militia were ordered out for a short time, and munitions of war were also furnished them as requested.

In June, 1814, there was an alarm at Salem, and cannon and other military articles were purchased and forwarded to that important place to a great amount.

During this month (June, 1814) applications were made for ammunition, arms, and guards, at Cohasset, Saco, Portland, York, Wiscasset, Bath, Boothbay, and Camden, and from the citizens of Boston. Saco and some other places were furnished with military stores. The militia were called out at Saco, where the enemy landed and destroyed some property; a company was stationed at Cohasset, and afterwards a second company for some weeks; a regiment was stationed on Boston common for a few days, and then ordered to South Boston, near Dorchester Point, where they were continued for several weeks; two companies were called out at Portland, and kept some time in service; the enemy's vessels being near that place, and but a few United States troops in fort.

A British man-of-war being off Sheepscot river, the militia ordered out by Major General King, at Boothbay, viz: two companies, and kept in service for several weeks; several companies detached at Wiscasset; also, on statement of Major General King, part of these men were placed in the fort on Sheepscot river, under command of the United States officers.

About this time (in June or 1st of July) an agreement was made by the adjutant general and General Cushing, commander of the United States troops in this district, (General Dearborn being with the northern army,) on request of General Cushing, to call out the militia, if required, for the defence of Boston harbor; the militia to be under the immediate command of an officer of the militia, but subject to the direction and control of General Cushing.

This officer was soon removed to another station, and General Dearborn again (July) resumed the command of this district. But when, soon after, he requested 1,200 of the militia to be called into the service of the United States, the adjutant general was instructed to make a similar agreement. An arrangement was made accordingly, which shows the disposition of the executive to act in concert with the United States troops for the public defence. But difficulties afterwards arose, which made it prudent, if not necessary, to deviate from this arrangement. The organization proposed by General Dearborn was altogether different from that of the militia, by which the militia companies would be totally deranged, taken from officers of their own choice, and subject to the immediate command of officers who were entire strangers to them. The officers of the United States would, also, by this arrangement, have command of militia officers of higher rank; so that, in truth, the difficulty was not merely being commanded by officers of the general government, but having the militia officers deprived of all command, and United States officers placed over them and their men, contrary to the spirit and intention of the Constitution.

In some instances, however, this plan was effected, and in others it was attempted, though without success. The militia were placed in Fort Warren, in Boston harbor, under Brigadier General Dearborn, and the detachment was subject to the command of Major General Dearborn, the chief military officer of the United States in this district. At Portland a regiment of militia, called out for the defence of that place and vicinity, was ordered into the service of the United States, under the command of Brigadier General Chandler, but the men refused, and the officers remonstrated, without any regard to political considerations, and it was apprehended that the most serious effects would have been produced had resort been had to coercion to accomplish the plan proposed, and the public service most essentially injured at that very critical juncture.

The difficulties which arose at Portland were occasioned by the removal of General Chandler from that port to Portsmouth, after the amicable arrangement between him and Colonel Sumner had been made,

the militia ordered out, and the colonel, pursuing the object of his mission, had left Portland to confer with Generals Sewall and King at the Kennebec.

Major General King was also authorized, in July, 1814, to call out the militia and place them in the forts at Edgcomb and Phippsburg, if the officers of the United States should request it. In some cases this was actually done. He also acted in concert with Brigadier General McCobb, in his division, who was also a colonel in the United States service.

In June the majors general of the 5th division, including the counties of Bristol, Plymouth, and Barnstable; of the 2d division, containing the county of Essex; the 6th division, comprising York county; and 12th division, including Cumberland county, all bordering on the sea-coast, were ordered to keep guards at any exposed ports and harbors, and have the militia in vicinity in constant readiness to march at the shortest notice, for the defence of any place attacked.

Soon after this, and early in July, 1814, the alarm became extensive and general on the whole sea-coast, from Dartmouth and New Bedford, near the State of Rhode Island, the towns on Cape Cod, the maritime towns in Plymouth county, the town of Boston, the capital of the State, and other places situated on the same bay and harbor, Marblehead, Lynn, Salem, Beverly, Gloucester, Ipswich, Newburyport, the maritime towns in the county of York, in Maine, and the whole coast easterly to Passamaquoddy bay, on which are situated Kennebunk, Saco, Portland, Cape Elizabeth, Harpswell, Brunswick, Bath, Georgetown, Phippsburg, Woolwich, Wiscasset, Edgcomb, Boothbay, Bristol, Waldoborough, Friendship, Cushing, Thomaston, St. George, Camden, Belfast, Prospect, Castine, Deer Isle, Isleborough, Eden and Mount Desert, Surry, Ellsworth, Gouldsborough, Trenton, Addison, Machias, &c., and many places adjoining towns on the sea-coast, were also alarmed, and called for arms, ammunition, and other means of defence. The British ships-of-war were hovering on our coast in various parts; all were exposed and in danger of attack.

It was, at that time, especially considered that Boston offered the enemy an important object for enterprise. The British admiral had denounced all our cities and towns, and menaced them with destruction; and the wealth and the navigation of Boston, the naval depot at Charlestown, and the presence of a number of large ships of the United States navy, held out a strong temptation for the prowess and cupidity of the enemy's fleet and army. The whole of this acting force, then on our coast, from the Chesapeake to Passamaquoddy, if assembled, would form a powerful armament. Boston was a central point; the season of the year was favorable, and a coup-de-main on that town must have afforded him stronger hopes than any other object within his contemplation, for ardent and brilliant actions. Including the troops in the Chesapeake, Nova Scotia, Eastport, Castine, and those on the coast, continually harassing our sea-coast the number of men, counting marines, and from 800 to 1,000 seamen, his aggregate force was estimated at the time to amount to 8,000—a force, under existing circumstances, (destitute of regular troops, our forts naked and impotent, without magazines of provisions and forage, the United States without a military chest or credit, a navy yard open and accessible, a ship of the line afloat, but unarmed and unmanned, frigates and some other smaller vessels of war unprepared for action,) sufficient, if not to effect the object, to spread terror and dismay at its approach through all the New England States.

The alarm and danger continued from this time till the month of November, a period of more than four months. In several places the enemy landed and committed depredations on the property of the citizens, and the United States troops were not sufficient to man the forts. Arms and ammunition were furnished to most of the maritime towns, and at many places detachments of militia were stationed for a longer or shorter period, and in greater or less numbers, as the danger seemed to justify and require. Especially in towns where the navigation was considerable, and the harbors admitted of approach by the enemy's vessels, the militia were ordered out, but when the alarm and danger ceased, they were immediately discharged. In other towns the militia belonging respectively to them were considered sufficient, and kept in constant readiness for service. A detachment of several companies was ordered to New Bedford and Fairhaven within the period above mentioned; at Wareham, Falmouth, and several towns on Cape Cod, the militia were ordered into service; also at Plymouth, Duxbury, Scituate, and Cohasset, at Marblehead, Lynn, Salem, Gloucester, and Newburyport, and the militia of the inland towns in Essex county, were called out in rotation twice a week for discipline, that they might be prepared to act with effect, should the exigency require it. Several towns in Maine also had detachments of militia stationed in them for the protection of the inhabitants and their property, viz: Saco, Cape Elizabeth, where the militia built a fort, Portland, Bath, Wiscasset, Camden, &c. These remained in service, some only for a few days and some for two or three weeks. Land was purchased at Portland and some other places, much exposed, for gun-houses, and houses were erected at the expense of the State. Noddle's Island, in Boston harbor, and Dorchester Heights, which command a great part of that harbor, were fortified at great expense. These were considered important for the defence of Boston and the United States navy yard at Charlestown. Captain Bainbridge advised to these measures, for it was believed the enemy's vessels might pass the forts belonging to the United States, and that the chief object would be to destroy the property in the navy yard.

In August and September, 1814, the alarm still increased, and the danger of invasion was considered so great and imminent that the executive of the Commonwealth issued new orders for the whole of the militia to be in constant readiness to march when called for to defend any place on the sea-coast which might be attacked; and five regiments of infantry from the interior, besides two battalions of artillery and several independent and rifle companies, were stationed at South Boston and Dorchester, under the command of a major general. A regiment was also stationed at Cambridgeport, from the interior, to act as the exigency might render their service necessary. The Boston brigade was under arms two days in a week; and, on suggestion and at desire of Major General Dearborn, all the militia within twenty miles of the capital were kept in constant preparation for service. A detachment, under Brigadier General Dearborn, was ordered into the immediate service of the United States, and placed in one of the forts in Boston harbor, subject to the command of Major General Dearborn, the United States officer of the district. During this period, on account of a sudden alarm, 2,500 men were marched to Boston common, from the county of Norfolk, after a notice of only twenty-four hours. This large detachment of militia continued in service, in the vicinity of Boston, about six weeks, when a part of them were discharged, as it was fully believed the danger of invasion was not so great as when they were called out, and the apprehensions of the people had, in some degree, subsided; and a few weeks after the whole of the militia from the interior were ordered home.

When the alarm was the greatest, and an attack most apprehended on the capital and navy yard, several hulks were sunk in the harbor to embarrass and prevent the approach of the enemy's ships. This was a considerable expense.

Early in September Castine fell into the hands of the enemy, who made an attack on it with a large fleet and several transports of regular troops from Halifax. The towns on the western shores of Penobscot bay, in the county of Lincoln, adjoining the coast, and in Cumberland county, were greatly alarmed, and were undoubtedly in imminent danger of invasion. Two regiments of militia were ordered into service at this crisis in the western part of Hancock, where the enemy also landed; and eastern part of Lincoln county, including Belfast, Camden, Thomaston, St. George, and Cushing, and at Wiscasset and vicinity, on Sheepscot river; and at Bath, Georgetown and vicinity, on Kennebec river, the greater part of the 11th division, commanded by Major General King, and a considerable part of the 8th division, under command of Major General Sewall, comprising towns more interior, were called into service at different times in the months of September and October. The men of the 8th division had to march twenty and forty miles; about 5,500 of them were called out, in the whole, during this period of alarm, but not that number at one time. Their pay amounted to \$39,214 89, and their rations, allowance for clothing, &c., \$66,742 46. The pay for men in the 11th division, commanded by Major General King, during this period was \$40,513 97, and their rations, clothing, &c., \$99,752 02. The militia of these two divisions were called out for the defence of the several seaports above mentioned, on Sheepscot and Kennebec rivers, by immediate orders of Majors General Sewall and King; but, in most cases, and the large detachments, by special advice of the executive, who were consulted on the occasion, and under the direct agency of an aid of the governor, despatched into Maine, at this season of alarm and danger, for assisting in measures of defence, and with assurances that all reasonable and just expenses would be allowed.

For the defence of Portland, the most populous town in Maine, and more exposed to attack from the ships of the enemy than any other place, perhaps, in that part of the country, General Richardson, commanding officer of the 12th division, in that vicinity, was directed to call out as many men as should be supposed necessary; and, after consulting the selectmen and committee of Portland, and corresponding with the adjutant general on the subject, he at first ordered 1,250 of militia to protect that place, and soon after, the alarm increasing, more men were detached, for the same object, from the 12th, and also from the 13th division, comprising the towns of the interior. The number of men in service from the 12th division, during the months of September and October, was 3,863, and their pay, rations, &c., amounted to \$109,171 44; from the 13th division, at different times, for the same period, 1,895, and their pay, rations, &c., \$21,916 77. When Colonel Sumner, aid of the governor, was despatched into Maine early in September, as already stated, to authorize and assist in measures of defence, and for calling out the militia in that part of the State, it was proposed to place the militia, called out in the service of the United States, both at Boston and Portland. The agent of the executive, therefore, immediately on his arrival at Portland, conferred with General Chandler, of the United States army, on the subject, and it was agreed to put the militia there under his command; but the militia, both men and officers, remonstrated against this arrangement, and it was accordingly relinquished, and protection afforded altogether by the militia of the 12th and 13th divisions.

From the 6th division, at this period, 840 men were ordered into service at different places in the county of York, and for defence of Portsmouth, where several United States ships were then lying, the pay, rations, &c., for which amounted to \$14,174 97.

From the 10th division, under command of General Cobb, in the course of the summer of 1814, 494 men were in the public service, whose pay and rations amounted to \$6,709 40.

And for pay, rations, and other expenses of militia ordered out in different parts of Maine this season, and not included in the foregoing particulars, amounting to the number of 1,307, the government of Massachusetts advanced \$26,260 59.

In the 5th division, which comprises the counties of Plymouth, Bristol, and Barnstable, the expenses for guards and detachments of the militia, their rations and contingencies, at the places before mentioned, amounted to \$34,886 61.

In the 2d division, in the county of Essex, for men at Salem, Marblehead, Lynn, Beverly, Gloucester, Newburyport, &c., the expense was \$17,580 35, exclusive of a large amount for cannon and military stores, &c.

The detachment at South Boston, Dorchester, and Cambridgeport, were from the 1st, 3d, 4th, 7th, and 9th divisions; the expenses of which are included in the amount paid for that detachment, which is stated to be \$233,185 91.

#### RECAPITULATION.

The number of militia called out at different times and places in Massachusetts, during the war, is estimated at 20,940.

The amount of wages for them.....	\$133, 922 59
Subsistence .....	98, 786 18
Forage .....	4, 515 12
Medical and hospital expenses .....	3, 364 56
Allowances for clothing.....	34, 641 42

Whole expenses in Massachusetts proper and district of Maine.....	\$843, 293 06
Amount of expenses to be borne by this State, and not charged United States, for articles on hand.....	21, 119 09
Claimed of United States.....	<u>822, 173 97</u>

Let me here observe that the expense for a division, consisting of 4,530 men in the service of the United States, for a year, for their pay, rations, forage, and clothing, (exclusive of contingencies,) is \$1,096,710. This State had in service during the whole war 44,000 men, viz: a division and two regiments were in service at and near Boston for nearly two months, including the time of marching and returning home; two regiments some time in September and October, 1814, at the forts in Boston harbor, under Brigadier General Dearborn, and a regiment at Boston and Dorchester in July, 1814; besides the several companies and battalions at New Bedford, Cape Cod, Plymouth, Cohasset, Salem, Marblehead, Cape Ann, and Newburyport, as before stated.

In Maine, at Portland and vicinity, a great part of the 13th and almost the whole of the 12th divisions were in service; some, indeed, only for a few days, but many for several weeks. Detachments were also called into service at Saco, York, Kennebunk, and at Kittery, near the mouth of Portsmouth harbor. At Bath and other places on Kennebec river, and at Wiscasset and other places on Sheepscot river, very large detachments were in service, viz: almost the whole of 11th division, and three regiments from 8th division. Also, at Camden, Belfast, St. George, Thomaston, &c., two regiments were in service some time; a part of one nearly two months at the western towns on Penobscot bay.

Presuming that Mr. Lloyd does not propose to use this exhibit in the shape here given, before Congress, as a document *perfectly* accurate in all its details, but only for his own purpose, on which to form any argument or statement he may make, I have not been so minute in my examination, and in the account here offered, as would be necessary, if this paper were designed to vouch for the correctness of the view presented, as to those places *actually attacked*, the *precise number* of men in each and every case called into service, and the period, even as to the very days, they were stationed at a given place. All this would require an accountant to be employed from two to three months. I still hope the statement will be as *particular* as was wished, and that it may serve the object which Mr. Lloyd has in view.

I shall add a paper, giving some particulars of expense at certain places and at specified times, which I have thought might be useful as a specimen of the respective sums paid for certain definite service.—(See document annexed.)

It would not be proper, perhaps, for me to obtrude any remarks touching the correctness of the policy of the executive of Massachusetts, in the time of danger to which these papers relate, or the equity of her claims on the general government for a reimbursement. But a review of the conduct and measures pursued, according to this statement, certainly manifests a disposition in the government of Massachusetts to afford all possible aid for the defence of the country, and that the reluctance to dispose of the militia, in all cases, as requested by Major General Dearborn, was owing to constitutional scruples and consistent with the most ardent patriotism. When the militia were first called for, the exigency mentioned in the Constitution did not exist; means, however, were immediately taken to prepare for defence, and afterwards, when danger did exist, protection was ably and promptly provided. A good understanding was also had with the officers of the navy of the United States, and every aid and facility rendered them for which they made application. An agreement was made with General Cushing, an officer of the United States, who commanded this military district, for placing the militia under his direction, and for calling them out at his instance when there should be real danger of invasion. With General Chandler, of the United States army, commanding at Portland, the like arrangement was made, but was prevented from being carried into effect by the objections and remonstrances of the militia themselves, both officers and men. Even with Major General Dearborn such an arrangement was at one time made, (July, 1814.) The militia were ordered out for that purpose, but such difficulties presented to the operation, from the feelings of the militia, and not from any views of the executive, that the plan was given up as impracticable and hazardous. And yet the suggestions and wishes of Major General Dearborn were complied with in various instances in consulting for the protection of the State and of the vessels and property of the United States within our territory. It is believed that the objections which were made by the militia were not founded on any oppugnance to entering the United States service, but from an apprehension that they were degraded by having United States officers placed over them unconstitutionally. This was the ground urged by Governor Strong as a reason for withholding troops from General Dearborn, as stated in a communication to the War Department in 1814. The same thing operated at Portland, where no difficulty would have occurred had General Chandler retained his command. More than a moiety of the officers were decided democratic republicans, all of them were proud to serve in their country's defence, but they felt the independent spirit of free citizens and the just pride of officers of the militia of Massachusetts, and shrunk only from degradation and disgrace.

It is also to be noticed that the policy and measures of the government of Massachusetts, in the manner in which it provided for the defence of the people by the militia, were approved by distinguished characters among the republican party, who pronounced the means efficient, seasonable, and economical. There certainly was no intention to oppose or embarrass the measures of the general government, as Governor Strong often publicly declared, and his reluctance to comply with *all* the requisitions of General Dearborn, in the particular way pointed out, may justly be resolved into a sincere desire to conform to the Constitution and to preserve the rights of the citizens and of the militia.

Very respectfully,

A. BRADFORD, *Secretary.*

His Excellency Governor Brooks.

Document referred to.

Paid for artillery company at Beverly, in September and October, 40 days, and for hire of horses for field-pieces.....	\$891 05
For supplies and rations of two companies of 11th division, at Phippsburg, ordered out by General King, September and October.....	836 74

For pay to 1st regiment, 1st brigade, 1st division, in Boston, September and October.....	3,221 87
For pay to 2d regiment, 1st brigade, 2d division, at Ipswich and Gloucester, in September, 1814	779 88
S. Spear for spades, shovels, pickaxes, &c., and making posts, Noddle's island and Dorchester	864 00
For blankets, sheets, &c., for hospital.....	156 62
For harness, saddlery, &c.....	1,241 25
Deputy quartermaster at Bath, 10th division, for various articles of a military kind, and men's rations, September, 1814.....	1,088 33
For three companies, in September and October, 1814, at Saco, marched from interior, rations, &c., one month each.....	1,489 38
For military stores at Duxbury and Plymouth, company in fort, one month, in September and October—company at Plymouth one month.....	732 26
For artillery companies at Plymouth and Scituate, one month, in September and October, and Cohasset, at alarm, and for services of staff officers, in June to October, 1814.....	1,669 02
For a company at Beverly, from September 20th to November 2, by order of major general of 2d division.....	1,308 51
For expenses incurred by Salem for rations, guards, transporting of artillery, &c.....	1,787 21
For a guard at Manchester one month, in September and October.....	383 40
For 5th division, under Captain Goodwin, including Plymouth, Bristol, and Barnstable, in September, October, November, and December, for guards, companies, and parts, artillery, &c.	34,886 61
For 2d division, under General Hovey, Essex, for guards, detachments, &c., at Marblehead, Lynn, Beverly, Salem, Gloucester, Manchester, Ipswich, Newbury.....	17,580 35
For 1st division, General Crane, Boston, Dorchester, Milton, &c.....	22,528 59
15,000 men, and upwards, were called into service at different times and places, besides those large detachments which were stationed at Boston, Portland, Bath, and Wiscasset. This includes those called out at short notice and for short periods, viz: at New Bedford, Fairhaven, several towns on Cape Cod, and other maritime places; and to most of these towns, also, were furnished arms, ammunition, &c.	
From General Sewall's division, the 10th, on Kennebeck river, 5,500 men were ordered into service, at different times, in August, September, and October, 1814.	
From 11th division, under General King, 10,000 men (calculating that many were out at several different times) were in service in the course of the war, chiefly in August, September, and October, 1814, many, indeed, only for a few days.	
From 12th division, under General Richardson, there were 4,000 of the militia in service at Portland, in September and October and November, a part of them, indeed, only for short periods.	
From 10th division, 500, and from 6th division, in York county, 850, at different periods; and in the whole, at other places in Maine, in small detachments, and for short periods, 1,300.	
A detachment of militia were kept in the fort at Noddle's island till February, 1815, when news of peace arrived.	
Amount allowed towns and individuals, and paid in 1815 and 1816, not before exhibited....	6,700 00
Expenses of forts at Noddle's island, Dorchester heights and point.....	22,300 00
A fort was built at Cox's Head, near the mouth of Kennebeck river, under direction of General King, and guard kept there from September, 1824, to February, 1815, consisting of from 30 to 50 men, being, in the whole, 6,037 days' service.	
Paid Colonel Cutter, of 1st regiment, 2d brigade, 11th division, for men out at various times in June and July, 1814, at Wiscasset and Edgecombe.....	2,574 94
Paid Colonel Cutter, of 1st regiment, 2d brigade, 11th division, for men out in September, 1814	4,803 64
For a battalion from the 1st and 2d regiment, same brigade and division, in September, at Wiscasset and vicinity.....	3,432 75
Paid Colonel Day, of 2d regiment, same brigade and division, for men at different times in June and July, 1814.....	1,188 64
Paid Colonel Day, of 2d regiment, same brigade and division, for service in September, 1814	3,262 91
Paid Colonel Thatcher, of 3d regiment, same brigade and division, for service in September, 1814, at Thomaston, St. George, &c.....	2,488 79
Paid Colonel Thatcher, of 3d regiment, same brigade and division, for November, 1814....	1,062 91

Paid Colonel Cummings, of 4th regiment, same brigade and division, in September, 1814, at Thomaston, Camden, &c.....	\$3,129 57
Paid Colonel Foote, of 5th regiment, same brigade and division, in whole, from July, &c., to November, 1814, for Camden, Thomaston, St. George, Northport.....	6,857 66
Paid Lieutenant Colonel Thatcher, of artillery battalion, same brigade and division, at Thomaston .....	1,373 70
Paid Major McCrate, commander of battalion of cavalry, 2d brigade, 11th division, at Wiscasset.....	859 62
Paid brigadier general and his staff, 2d brigade, 11th division.....	1,223 80
Paid Lieutenant Colonel Thomas, 1st brigade, 11th division, at different times in July to October, Brunswick, Bath, Harpswell, &c.....	6,063 65
Paid Colonel Merrill, of 3d regiment, 1st brigade, 11th division, September and October, 1814, at Bath and Georgetown and vicinity.....	5,275 80
Artillery of same brigade and division.....	1,089 80
Paid Brigadier General McCobb, of 1st brigade, 11th division, and staff.....	418 69
Paid aid of major general, 11th division.....	83 87
<hr/>	
All the above in 11th division, in Maine. Total.....	45,566 71
Eighth division, 1st brigade, a regiment detached September, 1814, at Bath, &c., Colonel Swett .....	12,078 17
Eighth division, 2d brigade, a regiment, Colonel Sherwin, for defence of Wiscasset.....	11,957 53
Eighth division artillery, from same division, at Wiscasset.....	1,656 35
Tenth division, 1st brigade, 2d regiment, at Belfast and vicinity, September, 1814.....	3,875 92
<hr/>	
Pay, whole amount.....	75,134 68
<hr/>	
Some contingencies and miscellanies to be added.	

DEPARTMENT OF WAR, *January 31, 1823.*

SIR: I am directed by the President to say that he has considered the memorial of the members of Congress from Maine and Massachusetts, addressed to him in relation to the claims of the State of Massachusetts against the United States, on account of militia called out in the late war, and to inform you, agreeable to your request, that the Third Auditor of the Treasury Department has been directed to take up the claims for auditing, in conformity to principles which have been established and applied in the settlement of similar claims.

In informing you of the reference of the accounts to the Auditor it may, however, be proper to state that the settlement must be subordinate to the general views in relation to the constitutional power of the general government over the militia of the State, which were taken by the department when the accounts were originally presented and discussed on its general merits.

So soon as the correspondence with the agents of the several States, who have had claims for militia called out in the late war, can be examined, abstracts of the rules under which the settlement of the accounts have been made will, agreeably to your request, be furnished you.

I have the honor, &c.,

JOHN C. CALHOUN.

HON. JAMES LLOYD, *Senate of the United States.*

DEPARTMENT OF WAR, *February 1, 1823.*

SIR: In transmitting the enclosed copy of a letter addressed to the Hon. Mr. Lloyd, relating to the claim of Massachusetts against the United States, for militia called out in the late war, I am directed by the President to say that you will take up this claim for adjustment as early as practicable, subject to general principles expressed in the letter to Mr. Lloyd.

I have, &c.,

J. C. CALHOUN.

P. HAGNER, Esq., &c.

DEPARTMENT OF WAR, *March 26, 1823.*

SIR: I now transmit to you copies of all the communications from this department which contain the rules which have been adopted in the settlement of the accounts of the several States against the United States for disbursements during the late war.

It may be proper, however, to state that these rules have all been considered as subordinate to the general principles connected with the constitutional powers of the general government over the militia of the States, which were established by the department when the accounts of Massachusetts were originally presented and discussed on their general merits.

The illness of Mrs. Calhoun will, I apprehend, prevent me from visiting the south this summer, as I intended; and the agents of the State may consult their own convenience as to the time of presenting and discussing its claim.

I have the honor, &c.,

J. C. CALHOUN.

HON. JAMES LLOYD.

WASHINGTON CITY, July 15, 1823.

SIR: We have the honor, herewith, to exhibit a portion of the Massachusetts claim, being for services performed and expenses incurred without formal requisition on the part of the United States, but on emergencies of invasion, or imminent danger of invasion, within the county of Plymouth, the oldest county in our State, and the adjacent counties, constituting the militia district, denominated the fifth division.

It will be found, on examination of the documentary evidence connected with the exhibit, that this portion of our claim falls clearly within the description of services recognized by the Executive of the Union, and allowed to other States which had rendered like services under the same circumstances; that the services constituting this portion of our claim were called for by the people; that a large assailable property was exposed to plunder; that many towns were imminently in danger of devastation; and that the alarming movements of the enemy furnished sufficient cause for well-founded fears of invasion. Regarding, as the national Executive does, each and every part of a State as equally the object of its protection, it is confidently believed that the amount of expenditures for the protection of this interesting portion of the State and of our country will be readily allowed.

As this is the first time any specification of this portion of the claim, or, indeed, of any other, except for \$13,000, on which \$1,000 were promptly allowed and advanced, has ever been presented, we shall hold ourselves in readiness to attend at a moment's warning to make any explanation of the documents which you may deem necessary.

We are, with sincere respect, sir, your obliged humble servants,

GEORGE SULLIVAN,  
JOSEPH H. PEIRCE.

Hon. J. C. CALHOUN, *Secretary of War.*

DEPARTMENT OF WAR, September 5, 1823.

SIR: You will receive, herewith enclosed, a copy of a letter from the President of the United States, by which you will see his views in relation to the Massachusetts claim. You will, as soon as practicable, examine such items of the claims as the commissioners may present, and report to this department the amount which would have been due, according to the rules heretofore established, if the troops had been in service under the authority of the general government.

I have, &c., &c., &c.,

J. C. CALHOUN.

PETER HAGNER, Esq., *Third Auditor of the Treasury Department.*

DEPARTMENT OF WAR, November 5, 1823.

The Secretary of War's compliments to Messrs. Sullivan and Peirce, and encloses to them a copy of the report of the Third Auditor upon the claim of the State of Massachusetts.

MESSRS. SULLIVAN & PEIRCE, *Agents, &c.*

TREASURY DEPARTMENT, *Third Auditor's Office, November 4, 1823.*

Pursuant to the letter of the honorable Secretary of the Department of War to the Third Auditor, dated September 5, 1823, enclosing a letter of the 1st of the same month, addressed to the Secretary by the President of the United States, in relation to the claim of the State of Massachusetts, and directing the Third Auditor, in conformity with the views expressed in the President's letter, to "examine such items of the claim as the commissioners may present, and report to the department the amount which would have been due, according to the rules heretofore established, if the troops had been in service, under the authority of the general government." The Third Auditor reports:

That accounts and vouchers have been exhibited by the commissioners, for payments made by the State, for pay and subsistence of militia, belonging to the 5th division, commanded by Major General Nathaniel Goodwin, called into service at various periods and places, during the year 1814, and for sundry incidental expenses, amounting altogether to \$63,410 40.

That an examination thereof has been made, and the vouchers found to be very irregular, when compared with such as were rendered in cases where the militia were mustered into and out of service by the United States officers; the rolls filed as muster-rolls being in numerous instances merely inspection-rolls, naming the men and describing their accoutrements, without showing either the commencement or termination of service, and the certificates of service thereon not being dated till some time after the period of discharge; and in many others they are, as appears by the lieutenant colonel's certificates on them, abstracts of the originals in his possession. The accounts of the several towns for rations provided for the militia are also very informal, there being no ration returns, nor, in most cases, any receipts, *given at the time of delivery*; but in lieu thereof certificates from the officers, dated some time afterward, acknowledging that the towns did supply the numbers charged for to their commands. These accounts, moreover, are not (a few instances excepted) supported by any vouchers for the cost of the provisions, or evidencing that the towns, respectively, paid as high a rate for the rations as they received from the State, viz: twenty cents each; besides, during the period within which the militia, for whom they are represented to have been furnished, were in service, the United States contract price in Massachusetts was only seventeen cents per ration; and if those militia had been in service, under the authority of the general government, they would, of course, have been supplied by the contractor, and at no greater expense to the United States.

That, on the examination, deductions have been made amounting to \$19,848 20; the causes for which are explained in a detailed statement herewith; and of these deductions a portion, amounting to \$9,315 17

consists of charges either inadequately vouched, or being of a description which, to warrant their allowance, would have required explanatory evidence, and the special sanction of the Secretary of War; and the residue of such deductions would, it is considered, have been inadmissible.

And that (in addition to so much of the last-mentioned sum as might ultimately have been rendered admissible) the sum of \$43,562 20, being the difference between the aggregate of the claim presented and of the deductions, is the "amount which would have been due, according to the rules heretofore established, if the troops had been in service under the authority of the general government," provided that the vouchers, notwithstanding the defects noticed, should be deemed sufficient, and that 20 cents per ration would, under the circumstances, be allowable.

PETER HAGNER, *Auditor*.

The Hon. SECRETARY OF WAR.

WASHINGTON, *November 10, 1823.*

SIR: By the report of the Third Auditor, which we had the honor to receive from you last week, it appears that of \$63,410 40 the Auditor considers \$10,533 03 as inadmissible, and \$9,313 17 as suspended; and the residue, \$43,562 20, as liable to three specific objections: 1st. Informality in the muster-rolls. 2d. Defect in ration returns. 3d. Overcharge of three cents per ration.

In respect to the first and second it would be enough, perhaps, to say, that the informality and defect noticed occurred in the Pennsylvania claim; and were, in that case, obviated upon consideration, "that the money had, as appeared in that case, and as appears also in this," been paid by the State, out of its own "funds; that the accounts had been brought before the legislature of the State, and after a full investigation on the part of those intimately acquainted with all the circumstances, the accounting officers were clothed with powers to allow the accounts, as they are now charged to the United States." Reference is respectfully made to the letter from the Department of War to the Third Auditor, under date the 16th November, 1820, obligingly placed by copy within our reach; and reference is also made to the letter from the Department of War to the Third Auditor, under date of 24th July, 1818, containing decisions to the same effect, of that department, on the claim of Virginia. And reference is also made to the letter of the Hon. William H. Crawford, Secretary of War, under date the 15th of April, 1816, to the governor of North Carolina, where also it appears that informality is not an insuperable objection.

But, independently of all precedent, payment by the States, out of their own funds, is the best evidence to the national government of the number of days of service performed, and the quantity of rations supplied; because State governments cannot be mistaken in respect to these, having the best means of information, and can have no motive to misrepresent these facts.

The decisions of the Department of War, as well by your predecessor as yourself, sir, have, however, made a final and satisfactory disposition of all cases of this sort. And although regulations, devised to guard against fraud or inconvenience, ought not to be disregarded, yet, where no fraud is imputable and no inconvenience is suggested, a mere informality, which can be ascribed only to the novelty of circumstances, cannot, it is believed, be considered as controlling the obligations of justice.

With respect to the third objection—overcharge of rations. As the discussion of this might lead to the production and investigation of evidence tending to retard the progress of the claim, it would be more agreeable to us to consider that the three cents on each ration are suspended; and, for like reasons, we would consider that the items included in the sum of \$19,843 20 are also suspended for the present.

The actual state, then, of this portion of the claim is the admission of the facts that "if the troops have been in service, under the authority of the general government, the amount which would have been due, according to the rules heretofore established," is \$43,562 20, less three-twentieths of the sum of rations included in this amount; and also that the services of the militia were performed, with the exceptions contained in the remarks of the Third Auditor, at the times and places mentioned in the pay-rolls, respectively.

We have the honor, &c.,

GEORGE SULLIVAN.  
JOSEPH H. PEIRCE.

Hon. JOHN C. CALHOUN, *Secretary of War*.

DEPARTMENT OF WAR, *November 13, 1823.*

GENTLEMEN: I have received your letter of the 10th instant relative to the claim of Massachusetts against the government, and have submitted it to the President of the United States, who directs me to say, in reply, that the objections to the muster-rolls, made by the Third Auditor in his report of the 4th instant, are considered as obviated, as, by the pay-rolls to which they refer, the time which the troops were in service is clearly ascertained. The objection to the ration returns is also obviated, as by the pay-rolls before mentioned the amount of rations issued can be obtained. As regards the price of the ration, the President is disposed to accord to your suggestion of allowing, at present, seventeen cents each, and leaving the other three cents each as a suspended item.

I am authorized by the President to say that, previous to a final decision upon this claim, he will receive any views you may wish to offer upon the constitutional question.

I have the honor, &c.,

J. C. CALHOUN.

Messrs. G. SULLIVAN and J. H. PEIRCE, *Agents, &c., Washington City*.

WASHINGTON, *November 17, 1823.*

SIR: We have the honor to acknowledge the receipt of your favor of the 13th instant.

In pursuance of the course of proceedings prescribed by the letter of the President, mentioned in the Third Auditor's report, we would proceed to establish the necessity or expediency of the services included

in this portion of the claim now under consideration, as a preliminary to any views on the constitutional question. The propriety of this is obvious; for, until the services are admitted to have been necessary or expedient for the defence of the State, there will be no ground on which the constitutional question can be raised.

On reference to the principles upon which the services of militia in other States have been recognized by the Executive of the United States, where such militia were not called out upon requisition, nor placed under command of any officers of the United States, it appears in the letter from the Department of War to the Third Auditor, under date of February 14, 1818, respecting the claim of Maryland, that the expenditures by States for militia services of the usual character in such cases, and properly vouched, are to be admitted, when the militia have been called out on actual invasion or well grounded fears of invasion.

The same principle is distinctly prescribed as the rule of admission and allowance of claims in the letter of the Department of War to Colonel Ferris Pell, agent of the State of New York, under date of March 30, 1818, to both of which letters, obligingly placed by copy in our hands, we respectfully refer. It only remains, then, to show that at the times and places when and where the services under consideration were performed there was actual invasion, or well founded fears of invasion.

Referring to the pay-rolls mentioned in our letter of the 10th instant, which were subjected to careful investigation by the State legislature in respect to the occasion, as well as the amount of the services they evidence, it appears that these were performed in the several places mentioned in the pay-rolls, during the summer and fall of 1814. It might also be made appear, from the same documents, that, in many instances, the troops were called out on actual invasion, and in all instances on actual alarm. But the notorious presence of the enemy, and his frequent threatening movements near the places mentioned as the scenes of service, seem to preclude the necessity of any minute detail on this subject. Indeed, the allowance and payment by the State out of her own funds, under circumstances in some respects peculiar to herself, seems, of itself, to be the best possible evidence; and we doubt not, under any circumstances, ought to be considered the best evidence to the national government that the services were not only called for by the people on well founded fears of invasion, but that they were discontinued at the earliest moment which the security of the citizens and their property would allow. Nevertheless, we would respectfully submit, under this head, the subjoined documents, as plenary evidence of every circumstance which the most scrupulous regard to the interests of the Union can exact, in proof of the necessity and expediency of these services.

It appears from the subjoined communications, marked B, between General Nathaniel Goodwin, commanding the 5th division, and the various civil authorities, committees of safety, &c., within his command, that the inhabitants in the places to which the troops were called were, in some instances, laid under contribution by the enemy, themselves actually invaded, their towns bombarded, their vessels cut out of harbor; and that the inhabitants of the whole seacoast within that division were agitated with alarm from the frequent, and, in some places, daily appearance of the enemy, throughout the time within which these services were called for and performed. The "orders," marked A, also subjoined, corroborate substantially these communications. This brief view of the facts and circumstances tending to show the well founded fear of invasion which called out the militia of the 5th division to perform the services in question, and (what is also manifest from these documents) the careful regard to public economy which dismissed them as soon as the danger withdrew, is respectfully submitted to the President, as fully justifying a belief, on his part, that the services which are admitted to have been performed were necessary or expedient for defence of the State against the enemy. On the admission of this fact, we presume, according to the course of the Executive of the nation with other States having claims for militia services during the late war, no objection will remain to the recognition by the President of these services of the State of Massachusetts, now under consideration, excepting that alluded to in your letter of the 13th instant, as arising out of the constitutional question.

We have the honor to be, sir, very respectfully, your humble servants,

GEORGE SULLIVAN.  
JOSEPH H. PIERCE.

Hon. JOHN C. CALHOUN, *Secretary of War.*

## A

### COPIES OF ORDERS.

5TH DIVISION—MAJOR GENERAL GOODWIN.

No. 1.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 18, 1812.*

The major general directs that the general order of the 3d instant be communicated, and that each officer of a company be furnished with a copy of it. He requires all officers and soldiers to have their arms and accoutrements in complete order, and the troops in readiness to march at the shortest notice. The captains and commanding officers of companies will immediately follow the directions in the militia law for all those soldiers who are unable to furnish themselves with arms and accoutrements.

There are some deficiencies in the equipments of the detached troops, which the major general orders completed without delay.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

## No. 2.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, December 21, 1812.*

The major general, taking into consideration the peculiar situation of our common country, at this difficult, distressing, and alarming crisis, particularly the situation of the 5th division, which he has the honor to command, the limits of which embrace an extensive seacoast, extending nearly from the entrance of Boston harbor, the whole length of Cape Cod, up the sound, to the line of the State of Rhode Island, including Nantucket, Martha's Vineyard, &c., the distance of several hundred miles—the united efforts of the militia being the only dependence for defence, should the enemy attempt to burn, destroy, or plunder our defenceless towns and villages, in this very extensive seacoast—the major general, though unwilling to harass, or call his troops upon duty oftener than is commonly practiced, but, considering the exigencies of the times, thinks himself in duty bound to know the actual state of his division. He therefore orders and directs that the several brigadier generals, or commanding officers of brigades, order all the troops within their respective commands to parade, in all the month of January next, by battalions, towns, or companies, as they may direct, for military duty; particularly for examination of arms and accoutrements; noticing on each return the number of muskets or firelocks that are fit for use, of a sufficient calibre for a ball of the 18th part of a pound, agreeably to the provisions of law, and make returns thereof on or before the 20th February next, without fail.

The brigadier generals will order the brigade majors, adjutants, and such officers as they may appoint, to attend to the above examinations of arms, &c., that the object may be carried into complete effect.

The major general flatters himself that no exertions will be wanting, either in the officers or privates, when they take into consideration the duty they owe their country, themselves, and families, to be completely equipped with every necessary for a soldier to take the field at the shortest notice, and to be at all times ready in case of a sudden attack on any part of our seacoast, or elsewhere, to march with cheerfulness to the relief of their brethren.

Should there be any invasion in any part of this division, the officers will be governed by the direction of the commander-in-chief on that subject, as stated in the general order of the 3d day of July last. The brigade quartermasters of the first and second brigades will make a return of the state of the magazines for the present year.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

## No. 3.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, May 27, 1814.*

The major general is surprised and astonished to find that the general order of the 3d day of July, A. D. 1812, and the division orders of the 18th of the same month, have not been transmitted down to the subordinate officers, as therein directed.

He again orders and directs the said order be complied with without delay, as all concerned must be responsible therefor; it being absolutely necessary, when our shores are daily invaded by the enemy.

He therefore orders, upon any alarm being given at the approach of an enemy, on or near our shores, threatening invasion within any of the harbors, or inlets, or upon any of the towns and villages within the limits of the 5th division, the officers and soldiers of the militia of said towns, &c., will immediately repair to their several alarm posts, armed and equipped, assemble and parade, and there wait for further orders from their superior officers, if timely to be obtained. Should the necessity of the case be such that it will not admit of delay in the opinion of the commanding officer present, he will immediately march with his troops under his command to the place or places invaded or in danger, and afford all the aid and assistance in his power to those in danger or distress, and to repel by force of arms all such hostile invaders.

When so marched, the commanding officer will give information to the nearest superior officer.

## GENERAL ORDERS.

[EXTRACT.]

HEADQUARTERS, *Boston, June 16, 1814.*

The constant alarm excited and kept up by the predatory course of warfare lately adopted on our seaboard renders it necessary that guards should be kept up at some of the places, those particularly exposed by having quantities of shipping lying therein. To facilitate the execution of such a purpose, and to render the necessary aid as prompt and efficacious as possible, his excellency the commander-in-chief directs me to signify it to you as his pleasure that you furnish to every town whose situation from the present pressure of the war is exposed to surprise and immediate danger, such military forces, and more especially such guards by night, as its peculiar situation and circumstances require.

By order of his excellency the commander-in-chief.

JOHN BROOKS, *Adjutant General.*

## No. 4.—SIGNALS ESTABLISHED.

JUNE 20, 1814.

In case the enemy's ships are in sight, a flag hoisted on the staff as usual. If barges are approaching, you will give notice by firing. If they appear to the northward of the Gurnet, you will fire one gun. If to the northward and eastward of the Gurnet you will fire two guns in quick succession. If within the

Gurnet, you will fire three guns in quick succession. Should they appear to be landing on Monument Ponds fire two guns in quick succession, one in two minutes after, and one in four minutes.

In case the enemy should appear to be landing on Salt-house beach or any other part of the shore, between the Gurnet and Branches' point, fire three guns in quick succession, one in two minutes, one in four minutes, and one in six minutes.

---

#### SIGNALS WITHIN THE HARBOR.

If the row-guard fire three guns and set fire to the tar barrel on the beach, you will set fire to the one on Captains' Hill, and the one on Monk's Hill will be lighted on the firing of an alarm.

---

#### No. 5.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 16, 1814.*

Three of the enemy's ships being in sight, at anchor on our coast off the harbor, burning and destroying vessels and small craft, with their barges moving in every direction, and have actually invaded the harbor of Scituate, and destroyed some of their shipping, and by their menacing attitude the major general, as also the inhabitants, are apprehensive of an attack on the towns of Plymouth and Duxbury, and are of opinion we are in imminent danger of being invaded.

The major general therefore orders and directs Major John B. Thomas, of the first regiment, first brigade, to furnish, by detail, two sergeants and twelve privates, from the militia companies in this town, armed and equipped, with three days' provision, to parade to-morrow afternoon at six o'clock in the square by the court-house, to do duty as guards and sentinels in the town of Plymouth.

Major John B. Thomas will also order Captain Alden, of the town of Duxbury, to detail from the company under his command one sergeant and twelve privates, armed and equipped as aforesaid, to serve as guard to the town of Duxbury. The above troops will obey such orders as they shall, from time to time, receive from their superior officers.

NATHANIEL GOODWIN, *Major General 5th Division.*

Major JOHN B. THOMAS, *1st Regiment.*

---

#### No. 6.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 19, 1814.*

The major general orders and directs a detachment of one company, completely equipped with arms, accoutrements, &c., furnished with three days' provision, to be made immediately to mount guard in the towns of Plymouth, Kingston, and Duxbury, and detached from said towns as follows, viz :

Towns.	Captains.	Lieutenants.	Ensigns.	Sergeants.	Corporals.	Musicians.	Privates.	Total.
Plymouth.....	1	0	1	2	3	2	36	45
Kingston.....	0	0	0	1	1	0	11	13
Duxbury.....	0	1	0	1	2	2	18	24
	1	1	1	4	6	4	65	82

The commanding officer detailed from each town will make application to his respective selectmen for supplies agreeable to law; they are also directed to call on the major general for further orders without delay. Major John B. Thomas, of the 1st regiment, is specially directed to carry the above order into immediate effect. By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

---

#### No. 7.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 23, 1814.*

The major general orders an additional detachment to be made from the town of Kingston, of one sergeant and six privates, to mount guard in said town; they will receive orders, and be put under the command of Captain Atwood Drew. By order.

N. HAYWARD, *Aide-de-Camp.*

Major JOHN B. THOMAS.

## No. 8.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 20, 1814.*

In consequence of the exposed situation of the towns of Plymouth and Duxbury to a sudden attack from the enemy, the major general has ordered a detachment from the 1st regiment, 1st brigade, to mount guard on the sea-board, in this vicinity, and hereby orders all the troops composing the 5th division to hold themselves in readiness to march at a moment's warning to such a place or places as may be invaded; the necessary orders will be issued by the commanding officers of brigades, regiments, &c., directing an immediate inspection of the troops, and furnish them with all deficiencies.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

## No. 9.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 21, 1814.*

The major general orders you to detach a battalion of infantry from your regiment, completely equipped, and consisting of one major, three captains, three lieutenants, three ensigns, twelve sergeants, six musicians, and one hundred and twenty rank and file, to march, without delay, to New Bedford, for the defence of that vicinity, and place themselves under the orders of Lieutenant Colonel Benjamin Lincoln, of the 2d brigade.

The battalion will take with them three days' provision, and call upon the selectmen for further supplies and equipage, agreeable to law. In the above detachment, you will not take any men from the towns of Wareham or Rochester.

By order of the major general 5th division.

S. HAYWARD, *Aide-de-Camp.*Lieutenant Colonel ABIEL WASHBURN, *4th Regiment 1st Brigade.*

## No. 10.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 22, 1814.*

Your letter, by express, I have this moment received, stating the situation of your place requires all your energy in these difficult times. I flatter myself you are competent to the duty imposed, and presume, should the enemy attempt an attack you will give a good account of them.

Under the present excitement, I think you are justified in calling in the troops to your aid and assistance in defence of the place; you will retain them no longer than the exigency of the case requires, and, being on the spot, you must be the best judge.

Upon your representation, and considering the weakness of the United States garrison, together with the possibility of an attack from the enemy, I have ordered the company of artillery from Norton, and a battalion of infantry, under the command of a major, from Colonel Abiel Washburn's regiment, being the nearest your place, to be placed under your command, as by the order enclosed.

You will direct the troops to mount guard day and night; if more remains than is necessary for that purpose, you will place them in the fort, with a sufficient number of others to man that fortress, by permission of the commanding officer there, as it appears that the United States troops stationed there are insufficient to defend it. Should the number of troops that I have ordered in your opinion be insufficient for the defence of New Bedford and its vicinity, you will order a further supply or detachment from your regiment, from those most remote, or from those residing nearest you belonging to the 2d brigade. In case you should be invaded, upon any alarm, I presume the militia generally would march to your assistance; orders have been already given to that purpose. You will dismiss the troops, or most part thereof, when you shall judge the safety of the place will permit. But as necessity obliges us, for our defence, to make those supplies of men, &c., which in justice and good faith should have been made by the general government, we must have strict regard to economy, and no expense should be incurred but what in your opinion is indispensable. Upon the arrival of the above detachment, you can dismiss some that are there, if you judge expedient, and call in others; you must exercise your judgment; I hope soon to hear from you.

NATHANIEL GOODWIN, *Major General 5th Division.*Lieutenant Colonel BENJAMIN LINCOLN, *2d Brigade.*

N. B. Immediate attention is required to the order for the revocation of the order to elect a brigadier general for the 2d brigade.

N. G.

## No. 11.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 21, 1814.*

The major general orders Major Coggshall's battalion of artillery to march immediately to New Bedford, with their field-pieces, apparatus, &c., and place themselves under the orders of Lieutenant Colonel Lincoln, for the defence of that town and its vicinity. The battalion will take with them three days' provision, and call upon their respective towns for further supplies.

As part of the field officers in the 2d brigade are detached and on duty for the defence of New Bedford, and probably will not be dismissed at the time ordered for the election of brigadier general for that brigade, the major general directs a postponement of said election until further orders.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

## No. 12.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 20, 1814.*

You are ordered and directed to detach one sergeant, one corporal, and nine privates, from that part of the company that is most remote from the seaboard, to mount guard at the harbor, in the town of Wareham; to perform duty, and plant sentinels also by night and day at such places as you shall judge necessary for the safety of said place.

You will call on the selectmen of said town of Wareham to supply your guard with provisions, camp utensils, &c.

When so detached, you will make out a roll of their names and forward to me. You will make such signals as the committee of defence of said town shall give you.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

Sergeant SAMUEL SAVERY.

## No. 13.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 20, 1814.*

You are directed to detach from the company under your command one corporal and three privates to mount guard at the Great Hill in Wareham, to do duty as sentinels by day and night.

You will call on the selectmen for provisions and camp utensils for the same.

You will make such signals as the committee of defence of said town shall give you.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

Captain ISRAEL FEARING, jr.

## No. 14.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 22, 1814.*

The major general orders you to detach from Captains Ruggles and Combs's companies, in the town of Rochester, one ensign, two sergeants, two corporals, and twenty-four privates, armed and equipped, with three days' provision.

The ensign, with one sergeant, one corporal, and fifteen privates, will march immediately to the harbor at Mattapois and mount guard for the defence of that place.

The other sergeant, corporal, and nine privates will perform the same duty at Sippican harbor; both guards to be under the orders of the ensign, who will advise with the committee of safety in the town of Rochester in designating the most suitable places for posting the sentinels.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

Lieutenant Colonel ABIEL WASHBURN, *4th Regiment 1st Brigade.*

## No. 15.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 24, 1814.*

You are directed to detach from Captains Wethrell and Howland's companies, of your regiment, two sergeants, two corporals, and eighteen privates, armed and equipped, with three days' provision, to mount guard for the defence of Scituate and the North river, at such points and places as you shall judge proper to guard, and watch day and night until further orders.

You will furnish them with proper signals, and give them such orders from time to time as you shall judge necessary to answer the purpose intended; you will divide them into two guards, appointing one sergeant to each, and return me a roll containing their names. The detached officers will call upon the selectmen of the town of Pembroke to supply them with provisions and camp utensils according to law.

NATHAN'L GOODWIN, *Major General 5th Division.*

Lieutenant Colonel CHARLES TURNER.

## No. 16.—AFTER ORDER.

When you think the guards unnecessary you will give me information, that they may be discharged. Notwithstanding the guard, the inhabitants should look out; should any assistance be wanting on the seaboard, you will order out the company of artillery, commanded by Captain Jacobs, and if necessary that of Captain Smith, of Abington.

NATHANIEL GOODWIN, *Major General.*

Colonel CHARLES TURNER.

## No. 17.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 27, 1814.*

SERGEANT SAMUEL SAVERY: I received your return of men detached agreeably to orders; as it respects the rations you mention, the selectmen are to supply your guard with provisions and camp utensils, as before directed; the monthly pay, I do not know exactly what it is.

You will visit your guards, especially by night, and see that they do their duty faithfully as in camp. You will also give them a watchword every night. If any person appear that you think suspicious, you will confine him or them, and deliver them over to the civil authority for examination. You will give me information, from time to time, of the movements of the enemy that occur.

NATHANIEL GOODWIN, *Major General.*

## No. 18.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, June 29, 1814.*

You are directed to detach from the company of artillery under your command a lieutenant and one of your pieces, with apparatus complete, with a sufficient number of non-commissioned officers and matrosses to manage the same, and march immediately to the harbor of Scituate for the defence of that place and its vicinity; and put themselves under the command of Colonel Charles Turner, there to remain till further orders.

You will return me a roll of the above, including their names.

Colonel Turner will forward this order to Captain Jacobs, and give the necessary order to the said detachment.

You will use your endeavors that a sufficient number of exempts enter as volunteers, to form a cover for this artillery, to prevent surprise.

NATHANIEL GOODWIN, *Major General 5th Division.*

Lieut. Col. CHARLES TURNER.

## No. 19.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 1, 1814.*

The major general orders you to make the following detachment from the 1st regiment to relieve the troops now stationed in the towns of Duxbury and Kingston, viz:

Towns.	Sergeants.	Corporals.	Privates.	Total.
Halifax.....	1	1	10	12
Plympton.....	1	1	10	12
Kingston.....	1	0	6	7
				31

The lieutenant and two musicians, now on duty at Duxbury, will remain, and the above detachment, ordered from Halifax and Plympton, will relieve the non-commissioned officers and privates stationed at Duxbury, next Wednesday, the 6th instant; and the sergeant and six privates, to be detachment from Kingston, will relieve the guard now stationed in that town on the day mentioned above.

The sergeants commanding detachments ordered from Halifax, Plympton, and Kingston, will call upon the respective selectmen for provisions, &c., agreeably to law.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

Lieut. Col. JOHN B. THOMAS.

## No. 20.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 4, 1814.*

The major general extremely regrets the necessity of retaining in service so large a detachment of militia, for the defence of New Bedford and its vicinity. On the arrival of the two companies you have detached from the 3d regiment and 2d brigade you will discharge the troops belonging to the 4th regiment, 1st brigade, under the command of Major Pierce; should your force be insufficient to protect your town, the number must be augmented by a new draft, it being extremely inconvenient for farmers to be long absent from home at this busy season of the year.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

Lieutenant Colonel BENJAMIN LINCOLN.

## No. 21.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 5, 1814.*

The major general orders the following detachment to be made from the 3d brigade :

From 1st regiment, one sergeant, two corporals, and sixteen privates. From 2d regiment, one sergeant, one corporal, and six privates ; total 27.

For sentinels, to be posted in the towns named below :

Sandwich, one corporal and four privates ; Barnstable, Hyannis, and Yarmouth, one sergeant, two corporals, and twelve privates ; Brewster and Harwich, one sergeant, one corporal, and six privates.

The detachment to be armed and equipped, and furnished with three days' provision. The detached officers will call upon the selectmen of their respective towns for further supplies, agreeably to law.

Brigadier General Lothrop will order the sentinels posted in such places in Sandwich, Barnstable, Hyannis, and Yarmouth, as he may consider most advantageous, and Major Cobb will perform the same service in Brewster and Harwich.

A return of the detachment will be made to the major general without delay. It is immaterial whether the men are obtained by enlistment or detachment.

By order of the major general 5th division.

NATHAN HAYWARD, *Aide-de-Camp.*

## No. 22.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 9, 1814.*

You will detach one corporal and three privates, to do duty as guards in the town of Plymouth, under the command of Captain Atwood Drew.

By order of the major general 5th division.

NATHAN HAYWARD, *Aide-de-Camp.*

Lieutenant Colonel JOHN B. THOMAS.

## No. 23.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 17, 1814.*

The major general orders you to make the following detachments from Captains Handy and Loring's companies, in the town of Rochester, to relieve the troops now stationed at Mattapois and Sippican harbor, in said town, viz: one ensign, one sergeant, two corporals, and twenty-four privates.

The detached ensign, one sergeant, one corporal, and fifteen privates to do duty at Mattapois, and mount guard for the defence of that place.

The other sergeant, corporal, and nine privates are directed to perform the same duty at Sippican harbor ; both guards to be subject to the orders of the ensign.

Ensign Vaughan, with his detachment, now doing duty, will be discharged on the arrival of the above troops, and he will return a roll of his command, and accept the thanks of the major general for their prompt attention to orders.

By order of the major general.

NATHAN HAYWARD, *Aide-de-Camp.*

Lieutenant Colonel A. WASHBURN.

## No. 25.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 14, 1814.*

If any of the soldiers of your company wish to enlist into a company to manage a field-piece or other cannon in a fort or breastwork in the town of Wareham, and attend and do duty there—the number not to exceed ten—you will relieve them from ordinary duty.

You will make a detachment from your company of twelve privates to do duty as guards, to watch by night and day in the town of Wareham, to relieve those twelve now doing duty there, and put themselves under the command of Sergeant Savery, who is already detached and on duty. When detached, and arrived at their posts, you will discharge the twelve now doing duty there.

If the men doing duty as sentinels on the Great Hill wish to be discharged, you will relieve them by a new detachment.

NATH'L. GOODWIN, *Major General 5th Division.*

Captain JEREMIAH BUMPUS.

## No. 26.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 20, 1814.*

The major general orders you to detach immediately, from the 1st regiment, 1st brigade, two corporals and twenty-one privates, armed and equipped, and furnished with three days' provision, to march to Duxbury to relieve the same number of men, on duty in that town, from Plympton and Halifax, viz:

	Sergeant.	Corporals.	Privates.
From the town of Carver.....	1	0	11
From the town of Plympton.....	0	1	5
From the town of Halifax.....	0	1	5
Total.....	1	2	21

The officers commanding the guard at Duxbury will discharge those men now on duty from Plympton and Halifax on the arrival of the above detachment.

By order of the major general.

NATHAN HAYWARD. *Aide-de-Camp.*

#### No. 27.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 23, 1814.*

In compliance with the general order of the 18th instant, the major general directs the following detachment made immediately from his division:

##### ARTILLERY.

	Lieutenants.	Sergeants.	Corporals.	Musicians.	Matrosses.	Total.
First brigade.....	1	2	1	1	24	29
Second brigade.....	1	1	1	0	16	19
	2	3	2	1	40	48

##### INFANTRY.

	Captain.	Lieutenants.	Ensign.	Sergeants.	Corporals.	Musicians.	Privates.	Total.
First brigade.....	0	1	1	2	2	0	36	42
Second brigade....	1	1	0	4	4	2	52	64
	1	2	1	6	6	2	88	106

The troops detached from the 1st brigade will march to Plymouth on the 4th of August next, and those from the 2d brigade to Fairhaven on the 6th, as their places of rendezvous. The non-commissioned officers and soldiers are to be well armed and equipped, and each man to carry with him a knapsack and blanket, and furnished with three days' provision. The captain commanding the detachment for Fairhaven will, on his arrival, report himself to Colonel Benjamin Lincoln, and receive further orders.

By order of the major general 5th division.

NATHAN HAYWARD, *Aide-de-Camp.*

#### No. 28.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 23, 1814.*

You will deliver Captain Joseph Bates, from your park of artillery, the pair of iron 3-pounders, with the apparatus and ammunition for the defence of Fairhaven, and take a receipt for the same.

I recommend that you take the greatest part, if not all, of your quota of the present detachment of men from the Norton company.

N. GOODWIN, *Major General 5th Division.*

Major JOHN COGGSHELL, *Battalion Artillery, 2d Brigade.*

#### No. 29.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 23, 1814.*

The major general presumes that you have discharged the detachment of guards doing duty at Russel's Mills, and reduced the others at Westport and Ponigansett, and also the troops from the third regiment of the second brigade, and called in some of your regiment to supply their places, (in part)

agreeably to his directions when he left you, and retain no more troops than is sufficient for guards, sentinels, &c., viz:

Forty for the harbor, cove, and sentinels at Russell's hill and Head river; forty to be stationed at the fort; twenty-one at Ponigansett and Westport, making about one hundred in all.

He expects orders in a few days respecting the further disposition of the troops, of which he will give you information. You will observe by orders accompanying this that part of the detachment is to be stationed at Fairhaven. You will lose no time or exertion in having the detachment from your brigade completed and marched to the place of rendezvous as directed. To expedite the business, he has forwarded you sixty general orders and sixty blank rolls, to be distributed.

NATH'L GOODWIN, *Major General 5th Division.*

Lieutenant Colonel BENJ. LINCOLN, *2d Regiment 2d Brigade.*

#### No. 30.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, July 25, 1814.*

You are directed to order the officers commanding the guard-boat (as row-guards in the harbor) to stop, detain, and keep until morning, all boats, craft, &c., that attempt to pass up by either of the piers, or by Beach Point, in the night, or order them to come to anchor below the piers.

Also, to stop all other boats and craft that attempt to pass out of the harbor by the said beach in the night, if, upon hailing, they do not give proper and satisfactory answers.

You will order sufficient fatigue parties, day by day, to dig entrenchments and build fortifications at such places as shall be pointed out to you.

NATHANIEL GOODWIN, *Major General 5th Division.*

Captain ATWOOD DREW, *commander of the guard in Plymouth, Kingston, and Duxbury.*

#### No. 31.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, August 2, 1814.*

I have this day received an order from the adjutant general of the United States to place the troops drafted from my division into the forts on the Gurnet, in Plymouth, and Fairhaven, by the proportion already made. Therefore, on the arrival of those I have ordered to Fairhaven, when they have reported themselves to you, they will be ordered to the fort at Fairhaven.

NATHANIEL GOODWIN, *Major General 5th Division.*

Lieutenant Colonel BENJAMIN LINCOLN.

#### No. 32.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, August 10, 1814.*

You will make the following detachment from Captains Loring and Handy's companies, in the town of Rochester, to relieve the troops now stationed at Mattapois and Sippican harbor, in said town, viz:

Ensign, 1; sergeants, 2; corporals, 2; privates, 24; total 29.

The detached ensign, one sergeant, one corporal, and fifteen privates, to do duty and mount guard at Mattapois, for the defence of that place.

The other sergeant, corporal, and nine men, are directed to perform the same duty as guards at Sippican; all to be subject to the orders of the ensign.

The ensign now doing duty with his detachment to be discharged on the arrival of the above troops. He will also return a roll of his command.

By order of the major general.

N. HAYWARD, *Aide-de-Camp.*

Lieut. Col. A. WASHBURN.

#### No. 33.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, August 10, 1814.*

The major general orders the companies of infantry belonging to the town of Plymouth to parade at their several alarm posts at seven o'clock this afternoon, armed and equipped; there wait till further orders.

Captain Bartlett's company will parade at Eel river bridge, to serve as a cover to Captain Davis's company of artillery, who will be there.

NATHANIEL GOODWIN, *Major General.*

Lieut. Col. JOHN B. THOMAS.

N. B. Ordered, all dismissed at ten o'clock, to parade at three o'clock next morning.

No. 34.

PLYMOUTH, August 2, 1814.

Sir: Major General Goodwin has this day received your letter of the 28th July, and directed me to inform you that the due proportion of militia from the 5th division, destined for the Gurnet, are ordered to arrive there on Thursday next, the 4th instant, and those for Fairhaven on Saturday the 6th.

Lieutenant Pope, commanding officer of the Gurnet, has just informed General Goodwin that yesterday he delivered to his troops the last pound of provisions in the garrison, and the general wishes you to write him by return of mail in what manner the detachment will receive subsistence.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

GEORGE P. PETERS, Esq.,  
*Acting Adj. Gen. United States District No. 1.*

No. 35.

PLYMOUTH, August 5, 1814.

Sir: Lieutenant James Dyar, commanding a detachment of artillery consisting of twenty men, officers included; also Lieutenant Ebenezer Whitman, of a detachment of infantry, consisting of forty, including officers, all from the 1st brigade, 5th division, will report themselves to you with those under their command, which you will receive into quarters in the fort at the Gurnet, as by direction of Major General Dearborn to me of the 28th ultimo.

The troops arrived here yesterday I have billeted, and gave them rations of rum for two days; also one barrel of beef and two barrels of bread sent with them.

N. GOODWIN, *Maj. Gen. 5th Division.*

Lieut. SAMUEL C. POPE, *Commanding Gurnet Fort.*

No. 36.

*Abstract return of the troops detached agreeable to general orders of the 13th July, and division orders of the 23d July, 1814.*

N. GOODWIN, *Maj. Gen. 5th Division.*

JOHN BROOKS, Esq., *Adjutant General.*

## No. 37.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, August 19, 1814.*

Captain Weston Jenkins, of the artillery, is directed to enlist one good sergeant and twelve men, to mount guard at the harbor of Falmouth and its vicinity, for the defence of the same, to keep guard day and night, at such places as he and the committee of the town shall designate; having by night a signal of tar, &c., at each post, to give the alarm. The troops to be entitled to the same pay and rations as other troops for similar services. If Captain Jenkins cannot enlist the above men, Colonel David Nye is ordered to detach the same number from his regiment, from that part most remote from the seaboard, and place them under the care of Captain Jenkins, and the selectmen of Falmouth will furnish the said troops with provisions and camp utensils. A return of the names of the men will be made as soon as they arrive at their places of destination.

By order of the major general 5th division.

NATHAN HAYWARD, *Aide-de-Camp.*

Captain WESTON JENKINS

## No. 38.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, August 21, 1814.*

The major general orders the following detachment to be made immediately for the towns of Plymouth, Kingston, and Duxbury, to mount guard for the defence of said towns.

	Sergeants.	Corporals.	Privates.	Total.
For Plymouth.....	2	2	35	39
For Duxbury.....	2	1	25	28
For Kingston.....	1	0	3	4
	5	3	63	71

The troops to be completely armed and equipped.

The officers detached from each town will apply to their respective selectmen for provisions and camp utensils, agreeable to law.

On the arrival of the detachment, Captain Atwood Drew will discharge all the men doing duty in the aforesaid towns. Lieutenant Colonel John B. Thomas, of the 1st regiment, 1st brigade, will carry this order into immediate effect.

By order of major general 5th division.

N. HAYWARD, *Aide-de-Camp*

## No. 39.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, August 29, 1814.*

Lieutenant Colonel Charles Turner, of the 2d regiment, 1st brigade, is directed to detach from the regiment under his command two sergeants and twelve privates, to mount guard for the defence of Scituate and its vicinity, and place them in the following manner, viz:

	Sergeants.	Privates.	Total.
At the harbor.....	1	7	8
At North river landing and Cedar point.....	1	5	6
	2	12	14

And is ordered to discharge from service the corps of artillery commanded by Lieutenant Barrell, jun., and the infantry detachment doing duty as guards at Scituate, with the thanks of the general for their prompt obedience to orders.

Lieutenant Barrell and Sergeant Perry will each return a pay-roll of their separate commands.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

## No. 40.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 8, 1814.*

In compliance with the general order of the 6th instant, for one company of artillery and five companies of light infantry, from the 5th division, to march to the town of Boston, completely armed, equipped,

and furnished with knapsacks, blankets, and three days' provision, the major general orders the companies detached from the following regiments of infantry and battalions of artillery :

LIGHT INFANTRY.

*First brigade.*—One company from the 1st regiment, and two companies from the 3d regiment.  
*Second brigade.*—One company from the 3d regiment, and one company from the 4th regiment.

ARTILLERY.

	Captains.	Lieutenants	Sergeants.	Musicians.	Matrosses.	Total.
From the company in Abington, 1st brigade.....	1	1	2	1	20	27
From the company in Norton, 2d brigade.....	....	1	2	1	20	26
	1	2	4	2	40	53

Captain Smith, of the artillery, is directed to take with him his two field-pieces and apparatus. The above troops are to be inspected immediately, and each company march to Boston with all possible expedition; and the captains will report themselves to the adjutant general, from whom they will receive further orders.

The major general directs the commanding officers of brigades to give the necessary orders to have their troops inspected agreeable to general orders.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

No. 41.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 13, 1814.*

Lieutenant Colonel Benjamin Lincoln, commandant of the 2d brigade, is ordered and directed to detach one major of infantry from his brigade, agreeably to the within order, to repair to Boston immediately; on his arrival to report himself and wait to J. Brooks, adjutant general.

NATH'L GOODWIN, *Major General 5th Division.*

Lieutenant Colonel BENJ. LINCOLN.

No. 42.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 11, 1814.*

One of the lieutenants of the Abington company of artillery is on duty at the Gurnet, the other absent out of the State, and there not being twenty matrosses but what are now in service, the major general directs you to alter the division orders of the 8th instant, so far as to detach two lieutenants, two sergeants, two corporals, one musician, and all the matrosses in the Norton company of artillery not on duty at Fairhaven, to march to Boston without delay.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

NATH. GOODWIN, *Major General 5th Division.*

## No. 44.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 13, 1814.*

Lieutenant Colonel John B. Thomas, of the 1st regiment 1st brigade, is directed to order out a battalion of his regiment, consisting of the troops from Plymouth, Kingston, and Duxbury, to parade and perform camp duty, for improving in discipline, &c., two days in succession in each week, to commence on Monday, the 19th, until further orders.

The selectmen of the aforesaid towns to furnish the troops with camp equipage; in particular with tents, or sails in lieu thereof.

NATHANIEL GOODWIN, *Major General 5th Division.*

Colonel JOHN B. THOMAS.

## No. 45.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 16, 1814.*

You will make the following detachment from Captains Loring and Handy's companies, in the town of Rochester, to relieve Ensign Mendel, and those under his command, doing duty at said town for the defence of Mattapoiset and Sippican harbor, viz:

One ensign, two sergeants, two corporals, and twenty-four privates; total, twenty-nine.

The detached ensign, one sergeant, one corporal, and fifteen privates to mount guard at Mattapoiset.

The other sergeant, corporal, and nine privates to perform the same duty as guards at Sippican harbor, all subject to the orders of the ensign. Ensign Mendel, now doing duty with his detachment, to be discharged on the arrival of the above troops, and he will return a roll of his late command.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

Lieutenant Colonel A. WASHBURN, *4th Regiment 1st Brigade.*

## No. 46.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 17, 1814.*

The major general orders and directs that the following detachment be made immediately from the 1st and 2d brigades:

Brigades.	Lieut. Cols.	Majors.	Adjutants.	Captains.	Lieutenants.	Ensigns.	Sergeants.	Corporals.	Musicians.	Privates.	Total.
From the town of Bridgewater, 1st brigade..	1	1	1	4	4	4	16	16	2	320	369
From the town of Middleborough.....	....	1	....	4	4	4	16	16	2	320	367
From the 4th regiment 2d brigade.....	....	....	....	2	2	2	8	8	2	130	154
	1	2	1	10	10	10	40	40	6	770	890

He also orders the rifle company commanded by Captain Joshua Howe, of Abington, in the 3d regiment 1st brigade; and the company of artillery commanded by Captain Jacobs, of the 2d regiment 1st brigade, with his pieces and apparatus complete. All the above troops to march to the town of Plymouth, without loss of time, for the defence of said town and its vicinity. The troops to be completely armed and equipped, with three days' provision and camp utensils, agreeably to law.

Brigadier General Lazell, of the 1st brigade, and Lieutenant Colonel Commandant Benjamin Lincoln, senior officer of the 2d brigade, will use every exertion to carry this order into effect with all possible despatch.

The detached lieutenant colonel will take his quartermaster sergeant and sergeant major. A return of the detachment will be made as soon as completed, and the detachment from each regiment will rendezvous at Plymouth without delay.

The company of riflemen and artillery will march immediately on receipt of the order.

The detached officers will call upon the selectmen of their respective towns to furnish them with provisions and camp utensils, according to law, excepting tents, as barracks will be procured for their reception.

By order of the major general 5th division.

NATHAN HAYWARD, *Aide-de-Camp.*

---

No. 47.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 23, 1814.*

The major general directs that the division order of the 13th instant, requiring the battalion from the 1st regiment, 1st brigade, to parade for camp duty, &c., two days in a week, is hereby countermanded; all persons concerned will govern themselves accordingly.

NATH. GOODWIN, *Major General 5th Division.*

Colonel JOHN B. THOMAS.

---

No. 48.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 22, 1814.*

You are detached as adjutant of the troops stationed in Plymouth under the command of Colonel Caleb Howard, and directed to repair to this town without delay. This order has received the sanction of Colonel Washburn, who is absent.

By order of the major general of the 5th division.

N. HAYWARD, *Aide-de-Camp.*

Adjutant C. KEITH.

---

No. 49.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 19, 1814.*

You are directed by the major general to provide quarters for a company of artillery, to be stationed at the fort at Eel river. You will also procure twelve horses suitable for artillery service, to be held in requisition. They must be appraised. A reasonable compensation will be allowed for their services, and amount of appraisal, if lost or injured.

By order of the major general of the 5th division.

N. HAYWARD, *Aide-de-Camp.*

THOMAS RUSSELL, *Quartermaster Artillery.*

---

No. 50.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 19, 1814.*

The major general directs you to detach, without delay, from the 2d brigade, one major, four captains, four lieutenants, four ensigns, and two hundred and eighty non-commissioned officers and privates, to be formed into four companies, and stationed at New Bedford and Fairhaven and its vicinity, in such a manner as you may think most advantageous for the defence of said towns. You must also exercise your own discretion as to the propriety of discharging the troops now stationed at New Bedford, on the arrival of the above detachment. You will order the troops to bring three days' provisions; the detached officer to call on the selectment.

By order of the major general.

N. HAYWARD, *Aide-de-Camp.*

Lieutenant Colonel BENJAMIN LINCOLN, *New Bedford.*

---

No. 51.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 20, 1814.*

The major general has appointed you barrack-master to the detached troops stationed in this town and its vicinity, under the command of Colonel Caleb Howard, of the 3d regiment, 1st brigade, and 5th division.

By order of the major general of the 5th division.

N. HAYWARD, *Aide-de-Camp.*

Captain JOHN PATY.

## No. 52.—GARRISON ORDERS.

HEADQUARTERS, *Plymouth, September 24, 1814.*

All the troops detached from the 1st and 2d brigades, agreeable to the division order of the 17th instant, whether artillery or other corps, will consider themselves under the immediate command of Colonel Caleb Howard, and obey his orders.

By order of the major general of the 5th division.

NATHAN HAYWARD, *Aide-de-Camp.*

## No. 53.—GARRISON ORDERS.

HEADQUARTERS, *Plymouth, September 24, 1814.*

Colonel Howard will direct that particular attention be given to the signals that should be made from the fort on the Gurnet, as by the order of June 20, a copy of which is enclosed; as also those within the harbor, viz: by the row-guard at or near the beach by firing three muskets and setting fire to the tar barrel on said beach, or three guns from the fort on the wharf; a fire on Captain's hill in Duxbury; a fire about two miles west of High cliff on Monk's hill, or three guns from the fort on Eel river.

NATHANIEL GOODWIN, *Major General 5th Division.*

Colonel CALEB HOWARD.

## No. 54.—GARRISON ORDERS.

HEADQUARTERS, *Plymouth, June 24, 1814.*

The major general directs that the following number of officers and soldiers be the regular detail for guard duty, till further orders, from the detached troops under Colonel Howard:

Subalterns three, sergeants seven, corporals eight, privates ninety-nine; total, one hundred and seventeen.

Two guard houses will be established called the northern and southern guards. The first will post sentinels at the gunpowder houses, and between High Cliff and Hobshole brook, including a sergeant and nine men, to join the guards at Eel river, to consist of subalterns two, sergeants four, corporals five, privates sixty-three; total, seventy-four.

The southern guards will place sentinels on the beach and between Elkanah Finney's and the Pine hills, near the head of Henry Warren, esquire's, farm. The guard, exclusive of the sergeant and nine men named above, will be composed of—

Subalterns one, sergeants three, corporals three, privates thirty-six; total, forty-three.

One drummer and fifer will be ordered to march off parade with each guard and return with the relieve guard, excepting on Sundays. The sentinels must be vigilant and pay particular attention to communicate all signals of alarm from the Gurnet, row and beach guards, and the firing of tar barrels on the beach, Monk's and Captain's hills; also the discharge of signal guns at Duxbury and the fort at Eel river. At the same time it is necessary to caution the sentinels against false alarms, or discharging their muskets without being confident of the approach of an enemy.

Doctor James Thacher is appointed surgeon and the Reverend James Kendall chaplain to the detached troops stationed in this town and its vicinity, under the command of Colonel Caleb Howard.

The reason why the detached troops are wholly taken from the interior is to strengthen the force on the seaboard; and, in order to receive the benefit of that arrangement, no substitute will be admitted whose habitancy is in either of the towns of Plymouth, Kingston, or Duxbury.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

## No. 54.—GARRISON ORDERS.

HEADQUARTERS, *Plymouth, September 24, 1814.*

The major general directs you to order a company of infantry to Eel river to be stationed near the bridge; Captain Paty, barrack-master, will accompany the captains and show them the quarters provided for their reception.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

Colonel CALEB HOWARD.

## No. 54.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, September 24, 1814.*

Lieutenant Colonel John B. Thomas, of the 1st regiment 1st brigade, is directed to discharge this day Captain Drew and the detachment doing duty in this town under his command, except the row-guard.

By order of the major general 5th division.

N. HAYWARD, *Aide-de-Camp.*

## AFTER ORDER.

Captain Drew will discharge only such part as he shall judge expedient for the present, the whole to be discharged the 3d day of October next.

N. GOODWIN, *Major General*.

## No. 55.—GARRISON ORDERS.

HEADQUARTERS, *Plymouth, October 1, 1814.*

The major general directs the senior officers of the detached troops in this town and its vicinity to communicate to his command that the pay and subsistence of all persons on furlough will cease during the time they are absent from duty.

By order of the major general, 5th division.

NATHAN HAYWARD, *Aide-de-Camp*.

Colonel CALEB HOWARD, *Commanding detached troops*.

## No. 56.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, October 4, 1814.*

You are directed to enlist ten men to serve in the row-guard in this town, and to stand sentinels on Beach Point, and return their names to me.

NATHANIEL GOODWIN, *Major General 5th Division*

Sergeant CHARLES GOODWIN.

## No. 57.—GARRISON ORDERS.

HEADQUARTERS, *Plymouth, October 8, 1814.*

Colonel Caleb Howard will discharge from the detachment under his command, from those from Bridgewater and Middleborough, doing duty in this town and its vicinity, about one-half of the troops, officers included, so as to arrange and form the remainder of them into four companies, to consist of 50 privates each, properly officered.

October 10.—Colonel Howard is directed to detach one company, properly officered, from his detachment, to march to Duxbury, there to be stationed until further orders.

By order of the major general.

NATHAN HAYWARD, *Aide-de-Camp*.

Colonel CALEB HOWARD.

## No. 58.—GARRISON ORDERS.

HEADQUARTERS, *Plymouth, October 12, 1814.*

The major general revokes the order of the 10th instant, directing one company of the detachment to march to Duxbury. He orders Lieutenant Colonel Howard to discharge, day after to-morrow, the two companies belonging to Bridgewater, and the two companies from Middleborough, from any further duty, and they will make up their pay-roll, including the time it takes to march to their respective homes. Majors Mitchell and Ward are also discharged.

The troops will accept the thanks of the general for their prompt obedience to orders; also, for their soldierlike conduct while in camp, and are dismissed from service with his warmest approbation.

By order of the major general, 5th division.

NATHAN HAYWARD, *Aide-de-Camp*.

Colonel CALEB HOWARD.

## No. 59.—GARRISON ORDERS.

HEADQUARTERS, *Plymouth, October 15, 1814.*

Colonel Caleb Howard will discharge, on Monday morning next, the remainder of the troops or detachment doing duty under his command, in the town of Plymouth, viz:

Captain Edward F. Jacobs's company of artillery, Captain Howe's company of riflemen, and Captains Daggett and Cushman's companies of infantry. Colonel Howard will consider himself and staff officers also discharged from further service.

The major general is highly gratified at the promptitude discovered by the troops of the detachment to the late draft by the division order of the 17th ultimo, for which the officers and soldiers will please accept his thanks, as also for their soldierlike appearance.

He flatters himself, should a like circumstance occur to require their aid and assistance, they will cheerfully submit to some privations, and march to the defence of this ancient town, or any other that shall be invaded. He bids you all farewell.

NATHANIEL GOODWIN, *Major General 5th Division.*

Colonel CALEB HOWARD, *Commanding in Plymouth.*

No. 60.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, October 15, 1814.*

In compliance with orders received from the commander-in-chief, you are hereby directed to discharge immediately the four companies of militia now doing duty at New Bedford, Fairhaven, and its vicinity, that were detached agreeable to my order to you of the 19th of September last.

If you want troops to defend your place, your committee will apply directly to the commander-in-chief, he having resumed all the power to himself, and most properly, at least I presume so, by the late order. You will advise me of the receipt of this by the first mail.

NATH'L GOODWIN, *Major General 5th Division.*

Colonel B. LINCOLN, *New Bedford.*

No. 61.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, October 17, 1814.*

Colonel Abiel Washburn, of the 4th regiment, 1st brigade, is directed to discharge Ensign Mendall and the troops under his command, doing duty as guards at the two harbors of Rochester, from any further service.

The ensign will return a pay-roll of himself and men.

By order of the major general.

N. HAYWARD, *Aide-de-Camp.*

No. 62.—GARRISON ORDERS.

HEADQUARTERS, *Plymouth, October 19, 1814.*

You will enlist twelve men and a corporal, to serve as sentinels at the forts in this town, and make return of their names.

NATH. GOODWIN, *Major General 5th Division.*

Sergeant CHARLES GOODWIN.

No. 63.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, October 19, 1814.*

You will order Lieutenant Prince Bradford and his detachment, doing duty in the town of Duxbury, to be discharged on the morrow from any further service.

By order of the major general of the 5th division.

N. HAYWARD, *Aide-de-Camp.*

Lieutenant Colonel JOHN B. THOMAS.

No. 64.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, October 19, 1814.*

You will detach from the company under your command one sergeant and ten privates, to do duty as row-guards for the harbor of Duxbury and its vicinity, and put them on duty the 20th instant.

There are ten men more wanted for sentinels on the shore; if you can furnish them from your company you will do it, and return their names to me; they will be under the command of the sergeant you will detach for the row-guard. If you cannot accomplish this, you will inform me that I may order otherwise.

NATH. GOODWIN, *Major General 5th Division.*

Captain GERSHOM BRADFORD, *of the Sea Fencibles in Duxbury.*

## No. 65.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, October 20, 1814.*

You will discharge all the troops immediately that were stationed as guards at Yarmouth and Harwich. Presume you have discharged those doing duty at Brewster at the time the town compromised with the British. Inform me if they are wanted on the south side of Barnstable, Oyster Island, New Harbor, and Hyannis, considering the advanced season of the year.

NATHL. GOODWIN, *Major General.*

Brig. Gen. EBENEZER LOTHROP.

## No. 66.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, October 26, 1814.*

You are directed to discharge all the men doing duty as guards under your command at the harbor of Wareham, including yourself.

You will also discharge the guard at the Great Hill, (so called,) and forward me rolls of the same without delay.

NATHANIEL GOODWIN, *Major General 5th Division.*

Sergeant SAMUEL SAVERY, Jr.

## No. 67.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, October 26, 1814.*

You will order Sergeant Harlow and the privates under his command, doing duty as guards in the town of Kingston, to be discharged, and to make up his pay-roll from the 3d day of October instant.

NATHANIEL GOODWIN, *Major General.*

Lieutenant Colonel JOHN B. THOMAS

## No. 68.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, October 28, 1814.*

You will discharge about half the men stationed at Scituate as guards, from such posts as you shall judge best.

Inform me whether the other is wanting, and, in your opinion, what length of time, taking into consideration the season of the year.

N. B.—Let those you discharge make even months, say five. Suppose you will discharge those at Carter's landing first.

NATHANIEL GOODWIN, *Major General.*

Lieutenant Colonel TURNER.

## No. 69.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, October 28, 1814.*

You are directed to discharge six of the men you have stationed at Falmouth as guards, the remainder to be kept on duty a little longer, if you think they are wanted; otherwise, discharge the whole.

NATHANIEL GOODWIN, *Major General 5th Division.*Captain W. JENKINS, *of the Artillery, at Falmouth.*

## No. 70.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, November 5, 1814.*

You will discharge all the troops doing duty in the town of Scituate, without loss of time, from any further service; and direct the pay-roll to be forwarded of the services they have performed.

NATHANIEL GOODWIN, *Major General 5th Division.*

Lieutenant Colonel CHARLES TURNER.

## No. 71.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, November 5, 1814.*

You are directed to discharge all the men doing duty as guards in Barnstable and Sandwich, that a regular pay-roll be made and forwarded of all the duties performed in the various towns, agreeable to the orders of July last.

NATHANIEL GOODWIN, *Major General 5th Division.*

Brigadier General LOTHROP.

## No. 72.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, November 5, 1814.*

You are directed to deposit the cannon and ammunition, with the apparatus, at the fort in Duxbury, in some safe place, with the advice of the committee of defence of that town, and to discharge the sergeant and nineteen men on duty there as row-guards and sentinels, and direct the sergeant to make out a pay-roll for the time employed.

NATH'L GOODWIN, *Major General 5th Division*  
 Captain GERSHOM BRADFORD, *Sea Fencibles, Duxbury.*

## No. 75.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, November 5, 1814.*

You are directed to discharge the troops doing duty under your command as guards at Beef Hill Fort. You will also consider yourself discharged, and return me a roll of the duty performed.

NATH'L GOODWIN, *Major General 5th Division.*  
 Sergeant FINNEY LEACH.

## No. 76.—DIVISION ORDERS.

HEADQUARTERS, *Plymouth, November 5, 1814.*

You are directed to discharge the row-guards and sentinels at the fort and shore, doing duty under your command, and to make out a pay-roll of their time and service, including yourself, and to consider yourself also discharged. You will deposit the cannon and ammunition, with the apparatus, in some safe place or places, under the committee of defence and selectmen of the town.

NATH'L GOODWIN, *Major General 5th Division.*  
 Sergeant CHARLES GOODWIN.

## No. 77.—COMMONWEALTH OF MASSACHUSETTS.

PLYMOUTH, *February 24, 1817.*

The foregoing are copies from record of orders issued respecting the late war, from the year 1812 to 1814.

NATHANIEL GOODWIN,  
*Major General 5th Division Massachusetts Militia.*

N. B.—For some reason the commander-in-chief was pleased to devolve on me the great responsibility of the care and management of the division, respecting furnishing aid, protection, and assistance to all towns, &c., that should be invaded or in danger of attack and depredation by the enemy. This was of no small moment and caused me no little anxiety, the division having a very extensive seacoast, nearly from the harbor of Boston, round Cape Cod, to the line of Rhode Island, a distance of several hundred miles, comprising a great number of harbors, bays, and inlets, some of easy access by ships, others by cutters, barges, &c., more or less liable to the depredations of the enemy.

Although pressed and urged by applicants, with repeated solicitations in every instance, I endeavored not to grant a greater number of forces than, in my opinion, was absolutely necessary for their defence. In all cases I exercised my best judgment and discretion; my knowledge of the situation of the coast and harbors was a fortunate circumstance in aiding my decisions, (but, for the most part, unsatisfactory to the applicants,) constantly bearing in mind the necessity of economy and frugality, not failing of urging and recommending it to all under my command.

NATHANIEL GOODWIN,  
*Major General 5th Division Massachusetts Militia.*

The preceding documents, marked A and numbered 1 to 77, inclusive, are true copies of the originals signed by and received from Major General Nathaniel Goodwin, of the fifth local division of the militia of Massachusetts.

BOSTON, *June 14, 1823.*

JOSEPH H. PEIRCE.

B.

*Copies of communications from Major General Nathaniel Goodwin, 5th division.*

No. 1.

FALMOUTH, *March 16, 1814.*

SIR: Being actually invaded, I have called out the militia under my command for the defence of this town, viz: from the three companies in Sandwich, about sixty men, officers included, for three days, with provisions for that time, then discharged them. On the bombardment of the town, I called the remainder

of the militia in Sandwich, and Captain Crocker's in Barnstable, and afterwards made other detachments while the British ships lay in Tarpaulin Cove and off the harbor, which I hope will meet your honor's approbation, it being agreeable to your orders of July, 1812.

General N. GOODWIN.

DAVID NYE,  
*Lieutenant Colonel, commanding 1st regiment, 3d brigade.*

No. 2.

HEADQUARTERS, *Plymouth, April 14, 1823.*

SIR: I approve of your conduct in defending the town of Falmouth when invaded, and think it most expedient to call upon those troops nearest the place invaded, either by companies or a less number, as occasion requires; but in such cases you should give information to the commander of the division to which you belong.

I have heard transiently of this affair, but nothing officially. You must, in such cases, march to the defence of any place invaded within your command, but always give the commanding officer of the division notice, that he may have some knowledge of the disposition of his troops.

Yours, &c.,

Lieutenant Colonel DAVID NYE, *1st Regiment, 3d Brigade.*

No. 3.

SANDWICH, *June 30, 1814.*

SIR: The town of Sandwich, feeling themselves in imminent danger, have convened in public town meeting and chosen a committee for the purpose of applying to the proper authority for a guard sufficient to give the alarm in case of the landing of an enemy. I therefore request, in behalf of said committee, that you will take our situation into your consideration and order such a number of soldiers as you may think would be adequate to our situation; for instance, say fifteen or twenty men, commanded by a lieutenant; by the request of the committee, I beg leave to name Benjamin Bartles as lieutenant. Our reasons are not vague; we have had two attacks, and have been continually on the alarm for want of proper authority to give the alarm.

I am your obedient, humble servant,

Major General GOODWIN.

JOHN FREEMAN, *Major, and one of the Committee.*

N. B.—A part of this guard must be stationed on Buzzard's bay or Minister's Neck. Please to give me an answer.

No. 4.

FALMOUTH, *July 4, 1814.*

DEAR SIR: This town was one of the first in this Commonwealth that applied to the executive for aid against the enemy, but have not obtained any relief, but being now informed that the legislature has appropriated a considerable sum for the purpose of defending the seacoast.

The situation of this town, we trust, is so well known to your honor that we need only mention the peculiar circumstances to engage your immediate attention. Lying on the Vineyard sound, where the largest ships of the enemy's fleet can come, from which they make frequent depredations upon the shores, and further destruction is every day expected.

Our vessels are frequently taken from our harbors, and we are in daily expectation of our houses being set on fire. As well as in other places, we have been under the necessity to keep up a guard, for a long time, at the expense of the town, which is exceedingly burdensome to the town. Being informed that your honor is authorized to make such arrangements as is, in your opinion, necessary for the said coast within your division, the subscribers request, in behalf of the town, your immediate attention, and that we be supplied with two companies of soldiers for the defence of this town, for your honor need not be informed that this town is very extensive on the bay side as well as on the sound.

The subscribers flatter themselves that you will take their case in your wise consideration, and grant them such relief as you in your wisdom may think proper.

N. B. We wish for an answer as soon as may be.

DAVID NYE, *Lt. Col. Com. 1st Reg. 3d Brig. 5th Div.*  
WESTON JENKINS, *Captain Artillery.*  
TIMOTHY PARKER, *Captain Infantry.*

NATHANIEL GOODWIN, Esq.

No. 5.

HEADQUARTERS, *Plymouth, July 19, 1814.*

GENTLEMEN; On my return from New Bedford I received your communication of the 14th instant, and observe the contents as it respects your request for two companies of militia for the defence of your place.

When you take into consideration the situation of your harbor, of its being so easy of access to men-of-war and ships of force, who can bombard and demolish your town at pleasure, it is my opinion it would not, in any case, answer your purpose—being confident that ten times that number would be inadequate for its defence, without some forts or batteries with heavy pieces of ordnance planted therein. As that mode of defence comes more immediately under the cognizance of Congress, I wrote you, July, 1812, and recommended you to petition that honorable body for that important purpose, as nothing short of a good fort or forts can afford you that protection you need. If they, in their wisdom, do not see fit to provide for our defence, suppose we must suffer, it not being in my power to furnish a force of that magnitude. Therefore, am under the necessity to decline granting your request; and being confident that a few men will be of no service—perhaps by some indiscretion of a sentinel they might be provoked to fire upon your town—should recommend you to fix signals, both day and night, to alarm the country around you, it being practiced here and elsewhere; see that your troops are ready to march at the shortest notice. Presume the village will make a stand until your neighborhood arrive. With the vigilance of yourself and officers I hope that you will be secure.

Yours, &c.,

NATHANIEL GOODWIN, *Major General 5th Division.*

To the GENTLEMEN COMMITTEE OF SAFETY, *Falmouth.*

---

No. 6.

PLYMOUTH, *July, 1814.*

SIR: Since my last, have received yours of the 7th respecting the guards; concluded the number was sufficient (from the best information I could obtain) to serve as sentinels by your fixing signals by night with a light with tar, or some combustible materials, for Barnstable harbor, Hyannis, and Yarmouth, adjoining it; none for Yarmouth in the bay. You can try the experiment; if more should be wanted, it will be an after consideration.

We are reducing them generally at most places. We must be as economical as possible; the expense of defence is very great. Refer you to Major B. for more particulars.

Yours,

NATHANIEL GOODWIN, *Major General.*

Brigadier General E. LOTHROP.

---

No. 7.

BARNSTABLE, *July 1, 1814.*

SIR: The committee, chosen by the town of Barnstable, to consult on the best means to be used for the defence of said town against the common enemy, met on the 1st day of July instant, having received from Captain Chipman some information of the probability of having some assistance from the State through your means.

Consider it necessary to have twenty men employed as sentinels, with such officers as you shall think proper, which I conceive is as small a number as can be dispensed with, under the present situation of our town.

Sir, it is the request of said committee that the same may be detached from the militia, or engaged for the service in the manner you shall think proper, and put under the direction of said committee to place them in such places as they think proper for its safety and defence.

BENJAMIN HATCH, *Chairman of the Committee.*

General NATHANIEL GOODWIN.

*Ordered,* For Sandwich, Barnstable, Hyannis, Yarmouth, Brewster, and Harwich, 2 sergeants, 3 corporals, 22 privates—total 27.

---

No. 8.

BARNSTABLE, *July 7, 1814.*

SIR: Your note and order of the 5th instant I have received and duly considered, wishing to delay the execution of the same till I can communicate my opinion and the real situation to you of your sea-coast at Barnstable and Yarmouth. You direct a detachment of one sergeant, two corporals, and sixteen privates, for the towns of Barnstable and Yarmouth. Taking into view the extent of sea-coast in both towns, and on both sides of the towns, the distance being thirty-six miles at best, it is necessary that twenty-six or thirty men should be draughted for both towns, to accomplish the intention of your order.

I therefore earnestly request a larger number of men may be granted us here, for the preservation of our families and property, as the enemy are daily hovering around our wharves and demanding property, which demands have been complied with.

I am, sir, yours, respectfully, &c.,

EBENEZER LOTHROP, *Brig. Gen. 3d Brigade.*

## No. 9.

BARNSTABLE, *August 10, 1814.*

SIR: I beg leave to inform you that it is absolutely necessary that there should be the following number of men detached as sentinels in the towns hereafter named, viz: Chatham, six, for two harbors much exposed, there being about forty sail of vessel there; four men for Orleans, equally exposed on two sides, and two harbors; eight men for Eastham and Wellfleet; making eighteen in the whole.

Wish you to take this into your consideration, and when you duly weigh, feel confident you'll order it accordingly.

Yours,

General GOODWIN.

EBEN. LOTHROP, *Brig. Gen. 3d Brigade.*

## No. 10.

FALMOUTH, *August 17, 1814.*

SIR: The petition of the subscribers, a committee appointed by the town of Falmouth, at a meeting legally warned and held, humbly shows that, from the commencement of the war to the present time, the town has been frequently in a state of alarm, and several times actually invaded, whereby the inhabitants have been greatly harassed and fatigued, by standing guard, throwing up breastworks, &c., to defend themselves from the enemy, put to great expense in furnishing provisions, &c., to such as came to our assistance.

Beg leave to represent to you, we request a suitable number of men to guard and help protect us in this our exposed situation; you knowing our situation, are capable of judging the number necessary. Captain Jenkins, our agent, will give you any further information you require; we do humbly hope you'll not disappoint our expectations, as you have furnished other towns in distress.

ABNER DAVIS,  
 BENJ. SANFORD,  
 EBEN. NYE,

*Committee of Safety.*

THOS. FISH, JR.,  
 SOL. GREEN, *Selectmen.*

DAVID NYE,  
*Lt. Col. Comdt. 1st Reg. 3d Brigade.*

Major General GOODWIN.

N. B.—Granted one sergeant, twelve men.

## No. 11.

BARNSTABLE, *September 3, 1814.*

SIR: Captain Daniel Howes, one of the selectmen of Dennis, informs me he is requested by the said town—that they are very much alarmed; that the British barges and tenders are about every day; and that they have in Sewel harbor, on the north side of Dennis, about fifteen sail of vessels exposed, which they expect every day will be burnt and destroyed; they therefore request that four men be detached as sentinels, to guard the shore, to give alarm, &c.; therefore hope you will grant their request by giving orders accordingly.

General GOODWIN.

N. B.—Not granted.

SANDWICH, *July 14, 1814.*

DEAR SIR: The committee appointed by the town addressed you some time since, requesting you to detach a guard of fifteen or twenty men for the security of the seaboard in this town, and we have yet been unacquainted with your decision on this subject.

I am not one of that committee, but take the liberty to address you on this topic, and request you to grant their request, if any way compatible with your public duty.

We had an alarm the night before last, and a whole company of militia on duty during a whole night; and the barges and tenders of the enemy are daily looking into our harbors, and not a sentinel on shore to give the alarm, in case they should land at night.

Your early attention is requested to this subject, as the feelings of our community are strongly excited by the consideration of our defenceless state. It is thought that fifteen men are necessary for this town, as a guard, at least.

Yours, respectfully,

General GOODWIN.

WENDELL DAVIS.

## No. 13.

PLYMOUTH, *July 16, 1814.*

SIR: I received yours of the 14th instant; have just time to inform you I have not been unmindful of Sandwich, having given General Lothrop orders to furnish a guard of one corporal and four privates, as sentinels, which I deem sufficient at present.

Yours, &amp;c.,

NATHANIEL GOODWIN.

WENDELL DAVIS, Esq.

## No. 14.

BARNSTABLE, *September 26, 1814.*

SIR: Yours of the 24th instant I have received; will inform you that Major Garrett has just arrived from the lower part of the brigade from inspecting the magazines; found them all filled, and in good order. From the best information I can obtain—he having seen Major Cobb—we may expect assistance from Brewster, (notwithstanding the compromise,) Harwich, and Orleans; the other towns below we dare not depend upon. Orders have sometime since been delivered to Colonel Snow to have his regiment inspected and ready to march at a moment's warning. Should Barnstable be invaded, and they should assist us, it would be a pleasing circumstance.

But, all things considered, we are in great want of ordnance, ammunition, &c.; besides 150 troops stationed at this town, as many as twenty are wanted to stand sentinels, keep guard, exercise the artillery, &c., if we can obtain them from the government, having sent on a petition to the governor, with an express, for assistance. This in great haste.

Your humble servant,

EBENEZER LOTHROP, *Brigadier General.*

General GOODWIN.

## No. 15.

HIS BRITANNIC MAJESTY'S SHIP SPENCER, *Cape Cod Bay, September 17, 1814.*

GENTLEMEN: It being my intention to retaliate, as far as lays in my power, the conduct of the American forces towards the defenceless towns in Upper Canada, I call upon you to come forward with a contribution for the preservation of your salt-works, which, as I consider of great public utility, will be otherwise destroyed.

I have desired the officer in charge of the flag to demand the very moderate sum of four thousand dollars as a contribution to guarantee their future safety, and which, if not immediately complied with, or a hostage forwarded till the sum be produced, will be deemed sufficient cause for my proceeding instantly to put in execution my promised threat, which, as it was made known on the 15th instant, through the selectmen of Eastham, makes it unnecessary that a longer time should be allowed.

I am, gentlemen, your obedient servant,

ISAAC CLARK,  
THOMAS SEABURY,*Committee of Safety.*

## No. 16.

*Captain Baggett's agreement with the town of Brewster.*

These may certify all whom it may concern: That the inhabitants and proprietors of the salt-works at Brewster have come forward with a contribution to prevent the destruction of their salt-works and town, and I do hereby acknowledge to have received the same as a contribution; and do also guarantee the safety of the said salt-works and town of Brewster during the present war, provided the ground upon which the said works and town are erected shall continue private property, and not be occupied by the government of the country as a public work; the said contribution being four thousand dollars.

Given under my hand, on board his Britannic Majesty's ship Spencer, Cape Cod bay, this 30th day of September, 1814.

RICHARD BAGGETT, *Captain.*

The above is a true copy taken from the original, now on file, this 4th day of April, 1815.

JOSEPH SMITH, *Clerk of the town of Brewster.*

## No. 17.

ORLEANS, *September 26, 1814.*

DEAR SIR: As general of our militia of this State, we, the inhabitants of the town of Orleans, think it our duty to address you.

Our situation as a town is particularly distressing and alarming. We are almost entirely in a defenceless state. Our two neighboring towns have made an accommodation with the enemy by paying large sums of money—large, we say, for such towns as these. We, as a town, feel unwilling and unable to follow their example in this respect. And we are doubtful whether the paying such tribute, and making such agreement with the enemy, be consistent with our duty to our country or our adherence to the Constitution. The town of Eastham has informed us officially that they cannot assist us with their militia in case we are invaded. Thus circumstanced, our situation is particularly critical. We therefore have thought it our duty to send you this representation of our case by a special messenger, desiring your advice what method is safest and best for us to pursue. If we ransom our town, this money will enable the enemy to prosecute the war against other towns with more vigor; and we have serious doubts whether such a proceeding would be honorable or just. We have confidence in your judgment, and wish you to send your written advice. We wish you to inform us whether you can assist us in case of a threatened attack. We are very anxious to obtain one company of artillery, with two light pieces of cannon. We wish for a detachment of militia, to stand guard in this town, or any other part of the regiment as shall be most convenient. Done in behalf of the town.

Yours, with affection,

D. JONSON, *Chairman of the Committee.*

Major General GOODWIN.

## No. 18.

FALMOUTH, *October 8, 1814.*

DEAR SIR: I beg leave most respectfully to inform your honor that, on the 6th instant, about eleven o'clock in the evening, I received information from the committee of safety that six vessels of the enemy had that afternoon come hard in Tarpaulin cove, and that, in their opinion, the neighboring militia ought to be called in to our assistance; and I sent orders to the officers commanding the infantry at Sandwich to march immediately to the defence of this town, which they immediately complied with by furnishing about 150 men. The number of vessels have increased every day since they first appeared, which was one 74, three frigates, one brig, and one schooner; yesterday they were joined by two more. This day it is said that one or two others have joined the fleet; but we have not been able to obtain any considerable information respecting them, only that they are frequently passing off and on this morning. And it would seem that the vessels had fallen in there, and that they were no particular fleet, and Admiral Hotham was bound to Halifax; and most of the fleet being under sail, and appearing to be going off from thence, I ordered the troops to be dismissed.

Yours,

DAVID NYE, *Lieutenant Colonel Commandant.*

## No. 19.

ORLEANS, *December 26, 1814.*

SIR: Having had the honor some time since of seeing you in Boston, and at the same time of presenting to you a memorial from the town of Orleans requesting your advice and assistance, as we were apprehensive of a demand for a contribution to be paid the enemy, which took place after my return home; the next day we received a letter from Captain Baggett, in usual form, to pay him, or order, \$1,000, which demand has not been complied with, on account of Baggett's going off this coast about that time, and we have not heard from him since, and we were in hopes not to be troubled any more this winter. You have heard, it is probable, that the New Castle has been aground at the cape, the consequence of which has brought the enemy upon us in a very sudden manner. On Monday last, 19th instant, in the dusk of the evening, a barge with 22 men came to the creek where our vessels lay, and immediately entered on board four of our vessels, and hoisted sail on them before they were discovered by the people, and began to fire on the houses and people on the shore. Four or five of the militia stood the fire of the enemy for a considerable time before others could come to their assistance, and at length they drove them from two sloops, (after they had set fire to them,) and killed one and wounded two of the enemy, without any loss of life on our part. But they took away with them one sloop and one schooner, laden partly with salt. This expedition has cost the enemy nine prisoners, driven on shore (in the schooner they took from Orleans) at Yarmouth, and two men and twelve barges at Orleans, besides the killed and wounded.

You recollect when I saw you in Boston you promised me that, on your return to Plymouth, you would write immediately an answer to the despatch which I delivered to you; and, also, an answer to the petition which, through you, was delivered to the governor, for a further supply of muskets; we have not received an answer to either, as we expected.

Our situation has become, if possible, more embarrassing—not being in a situation to help ourselves, and thinking that you might, through multiplicity of business, forget us, I am requested to write you on the subject, and remind you of your former promise, and make a statement of our present circumstances, and again request your advice, in writing, as soon as possible. And please look again at the despatch which I presented you, and be pleased to consider what can be done for us; and should you think of any thing for our benefit, it will be most thankfully received. One more chest of arms, I think, would be

useful, and we had reason to expect them long before this time; and you gave me encouragement that a detachment of men should be made from the militia of Orleans, sufficient, at least, for a sentry, as they have been under the necessity of watching, for a long time, without pay; when at the same time, the next town has had a watch paid by the government; which, they think, has the appearance of partiality.

Sir, yours, most respectfully,

Majr General N. GOODWIN.

WM. MYRICK, Jr.

---

No. 20.

ORLEANS, *December 28, 1814.*

SIR: We, the undersigned, committee in behalf of the town of Orleans, in the county of Barnstable, do petition his excellency the governor for assistance, (as you will see by public papers we have been attacked by the enemy,) beg, sir, that you would use your influence with his excellency to afford us some assistance, as the enemy threatens to destroy our town.

Your obedient humble servants,

JOHN KENRICK,  
GIDEON S. SNOW,  
JONATHAN BASCOM,  
*Committee of Safety.*

Major General N. GOODWIN.

---

No. 21.

PLYMOUTH, *January 8, 1815.*

GENTLEMEN: On my return from Boston, received your communication, together with one from Mr. Myrick, stating the situation of your place. The reason that I did not answer the letters and request last fall was, that I delivered the papers to the committee of defence for the sea-coast, in Boston, presuming they would have answered it, it being within their province.

It is with regret that I am apprised of your troubles and difficulties; all I can say is, that I recommend you to write to the governor on the subject.

Was in hopes the enemy would let us remain in peace, at least, for the winter; there are no bounds to their cruelty. Your militia deserve credit for their heroic conduct, in retaking some of the vessels, and repelling the hostile invaders from their shore.

NATHANIEL GOODWIN.

WM. MYRICK, *and Committee of Safety of Orleans.*

---

No. 22.

SCITUATE, *June 11, 1814—8 o'clock p. m.*

SIR: This morning about sunrise several barges from two British ships-of-war entered Scituate harbor and set fire to six schooners; two were afterwards extinguished. They took two out with them, and compelled Jesse Dunbar, esq., to pilot them out of the harbor. About 3 o'clock p. m. they gave up one, called a packet, after taking out all things of value. While on shore they warned all persons against firing, or opposing them; threatening, in that case, to burn the houses, &c. Esquire Dunbar reports they are in want of provisions, and if the inhabitants will bring them beeves, or direct them to the shore, they would pay for them; or otherwise, they would get them, if they could obtain them, by any means. Finding nearly the whole of the two lower companies in Scituate, at and near the harbor, I shall send Major Collamore to take charge of them, to prevent any rash step, should the enemy land to-morrow morning; and by no means to attack them imprudently. I have also called on the commanding officers of the two other companies in Scituate to appear at three o'clock to-morrow morning.

Not having any command of the artillery company, I have requested Captain Jacobs to turn out with his company, if possible, early to-morrow morning. I shall run no risk in opposing them, unless I can obtain sufficient assistance, but shall wait your orders respecting any further or other arrangements. Considering the defencelessness of the harbor, I shall make no movements, without orders, which shall involve the destruction of the harbor.

The Rev. Mr. Turner has gone on board the ship with a flag for the purpose of ascertaining whether they intend destroying the houses, &c. The aforesaid barges went into Cohasset and took out or burnt a vessel. You will please send such orders as you shall judge proper.

With respect, I am your humble servant,

CHARLES TURNER, Jr.,  
*Lieut. Col. Comdt. 2d Regiment 1st Brigade, 5th Division.*

Major General NATHANIEL GOODWIN.

---

No. 23.

SCITUATE, *June 13, 1814—3 o'clock p. m.*

HONORED SIR: After despatching to you intelligence of what had transpired, and given the necessary orders, I went to the harbor before sunrise of the 12th. Captain Jacobs's company of artillery, and, indeed, all the companies in Scituate, except one, arrived in the vicinity. Mr. Dunbar being satisfied, from

the declaration of the commander of the Bulwark, that no injury would be done or attempted to the persons or buildings of the inhabitants, unless in case of annoyance by discharging single muskets from behind rocks or trees, without having a force sufficient to meet them on the principles of honorable warfare, and as no intent to land appeared the companies were authorized to return, after agreeing on alarm posts and signals for assembling at the shortest notice.

At one o'clock p. m. yesterday I received a pressing request from Colonel Webb, of the 2d regiment 1st brigade and 1st division of the militia then at Cohasset, with three or four companies for the defence of that place, to assist him with two companies of infantry, and, if possible, with one company of artillery. Considering the situation of the enemy at that time, I ordered Captain Peak's company to repair to Cohasset, to be under the command of Colonel Webb; and at 3 o'clock p. m., having received your orders, I gave orders for Captain Jacobs's artillery to march to Cohasset. The ships have left their station, near our harbor, and are in the vicinity of Cohasset. At half-past one o'clock p. m. this day Colonel Webb again requested more assistance, and he, considering Captain Peak's proximity to the shore, has discharged his company. In consequence of his request, I have ordered the two westerly companies, in Scituate, to march there as soon as may be, and sent an order to Major White to send Captain Smith's company of artillery to be on the ground at 8 o'clock to-morrow morning to relieve Captains Jacobs and Derby, who will himself be relieved Thursday noon. I have distributed the division order of the 27th May, yesterday, and particularly enjoined on those companies in Marshfield to regard the signals from the Gurnet when communicated to them.

I am, sir, with much respect, your humble servant,

CHARLES TURNER, JR., *Lieutenant Colonel.*

Major General NATHANIEL GOODWIN.

---

No. 24.

PLYMOUTH, *June 14, 1814—4 o'clock p. m.*

SIR: Received yours by mail, and observe the contents; considering we are all embarked in one cause, think you perfectly justified in affording Colonel Webb all the aid in your power. I would recommend to the selectmen of each town on the seaboard to cause guards and sentinels to be placed on such parts of the coast as to prevent surprise. Herewith enclose a copy of signals agreed upon and communicated for the government of the whole.

This day received information that the enemy, with several barges and about 160 men, entered Wareham harbor on the 13th at 10 o'clock forenoon, destroyed most all the shipping afloat, vessels on the stocks, and also set fire to the cotton factory. Before the militia could be assembled they made off. They are apprehensive of another attack, but I hope not.

We are making all the preparations in our power to prevent the enemy from landing in our harbor by keeping row guards, sentinels, &c., with a considerable train of artillery, &c. The signals being made, you, with your regiment, will repair to that part that shall appear to be invaded. You will inform the officers on the shore of the signals.

Yours,

N. GOODWIN.

Lieutenant Colonel SUMNER.

---

No. 25.

SCITUATE, *June 24, 1814.*

HONORED SIR: Sunday evening last one ship and two brigs and several small craft came to anchor near Scituate harbor. Upon application of the inhabitants near the harbor, on Monday morning I ordered the middle company in Scituate to march to the harbor and keep guard twenty-four hours, and also the company in Hanover to relieve them on Tuesday morning; at the same time the owners of shipping on the North river being apprehensive their vessels would be burnt, I directed Captain Talman to furnish a sergeant's guard for three nights.

The town chose a committee of defence to join the selectmen. The committee had sent Dr. Cushing Otis and Thomas Cushing, being one of the selectmen, to make application in behalf of the committee for assistance from government. One object was to obtain cannon to keep boats, &c., out of the harbor; to obtain small arms for several of the militia, who were, in effect, unarmed; and, after, to obtain some permanent force as a rallying point and to give regular alarms. The adjutant general stated that all the cannon less than 18-pounders were disposed of; he furnished a chest of arms and appendages, and referred the subject of a permanent guard to Major General Goodwin. This morning the committee called on me to request your honor to order, by detachment, a permanent guard for the town; and suggested that the adjutant general presumed that a sergeant's guard would be reasonable, for even a company would not render a call on the militia unnecessary, but a permanent guard would be better able to give regular signals than parts of companies of militia who might be sent for a night, and who would, as has been the case, give alarms unnecessarily. At the request of Dr. Otis and Thomas Cushing, in behalf of the committee of this town, I am induced to send this request, that we might have a sergeant's guard, that signals might be regularly given when necessary and the militia not liable to be alarmed on every report circulated by an individual. The inhabitants at and near the harbor have removed the most of their effects, and are constantly alarmed and on the watch. Your compliance with the wishes of the committee and selectmen will be satisfactory to the town, and greatly relieve the militia generally from the embarrassments of frequent alarms and the uncertainty of signals.

I am, sir, with great respect, your humble servant,

CHAS. TURNER, JR., *Lieutenant Colonel.*

Major General GOODWIN.

No. 26.

HEADQUARTERS, *Plymouth, July 2, 1814.*

SIR: Any arrangement you can make with the ship-owners to reduce the number of men necessary for guards, and in any degree lessen the expense to the State, ought to be done. You are the best judge where sentinels are proper to give the alarm to the inhabitants in case the enemy should land. You will retain no more men on duty, at this busy season for farmers, than is necessary for the object. The selectmen of Pembroke must be referred to the militia law respecting supplies, as I have no means of furnishing the detachment than is there pointed out.

Yours, in haste,

NATH. GOODWIN, *Major General.*

Lieutenant Colonel CHAS. TURNER.

No. 27.

SCITUATE, *July 9, 1814.*

SIR: On the morning of the 6th instant a fishing boat from North river was called alongside the British ship *Nymph*, the captain of which sent a memorandum of sundry articles of sauce and provisions to a considerable amount, retaining a man from the boat as hostage for their delivery. Lieutenant Barrell, commanding at the harbor, consulted with the committee of defence. It was determined they would not comply with the request. They then sent a flag to the ship, stating the impropriety of furnishing provisions, &c., and requested the discharge of the hostage—the ship lying off the mouth of the harbor, as near as she could get. The committee and myself agreed to prepare for defending ourselves; made an alarm, and called upon the troops in town and its vicinity; soon collected five companies infantry and one of artillery, which we thought sufficient force to oppose what the *Nymph* could land, although the *Bulwark* was in sight. About 12 o'clock at night the flag-boat returned, saying the selectmen had misunderstood the demand. They wanted not provisions, but some sauce and vegetables; supposed they would not deny them, as it was owing to their forbearance the inhabitants of Boston, &c., had fresh fish, and hundreds of fishermen were kept from starving and their boats not destroyed; concluded by saying that their future conduct would be regulated by the decision of the committee. The captain, in conversation with the flag-officer, declared he would burn the village that night, and gave orders to prepare the mortars, &c. After the captain of the *Nymph* had made a memorandum on the letter from the selectmen he then sent it on board the *Bulwark*, and after consultation together, and the intercession of Major Collamore, the bearer of the flag, they agreed not to burn the village that night. On the seventh morning the committee met to consider the subject further respecting vegetables; but finding the *Bulwark* steering over to the north shore and the *Nymph* easterly, and most out of sight, I then discharged the militia and artillery called in for this purpose.

*July 11.*—The hostage has returned, being discharged off Cape Cod, with the captain of the *Nymph's* declaration that he will burn the village. Should he attempt it with his heavy cannon, &c., we have nothing that will reach him; shall be reduced to the necessity of keeping aloof rather than place them as a mark.

Your humble servant,

CHARLES TURNER, JR., *Lieutenant Colonel.*

General GOODWIN.

No. 28.

SCITUATE, *July 19, 1814.*

HONORED SIR: Considering the unprovoked destruction of the shipping at Scituate harbor, the exposed situation of the village, the daily threats of the enemy on our coast, and that a landing within the harbor can only be effectually opposed with artillery, the inhabitants of the village and its vicinity have uniformly been anxious to obtain additional means of defence in that line; under those impressions, the selectmen and committee of defence made application to the adjutant general and committee of council; they obtained a chest of small arms and equipments, but were told that cannon of such calibre as would be proper for that situation were not on hand, although manufacturing them was progressing; in the mean time, referred the selectmen and committee to your honor, to supply them with such guards as you should judge proper under all circumstances. The infantry guard may be esteemed sufficient to give alarm, and to serve as an immediate supply to the artillery already granted, until the militia should collect, which has hitherto been prompt and with apparent alacrity; the artillery already granted is esteemed a valuable defence; still, however, the inhabitants wish, if practicable, an addition, and of heavier metal.

Being myself at Boston last week, I conversed with the adjutant general as to the probability of their being able to obtain an additional piece or two, but learn that the manufacture, although progressing, will not warrant a supply in a short time; he, however, doubted whether, until the war should assume a different aspect, it would be worth while to add to that species of defence. In conversation subsequently with General Dearborn on that subject, he stated that although it was not in his power to place men at Scituate, yet, if the inhabitants could obtain men to manage it, he would furnish a 12-pound cannon on a travelling carriage with ammunition and apparatus complete. On my return, I have laid the subject before the selectmen and committee; and Deacon Thomas Cushing, being one of the selectmen, and myself are by them directed to make you this statement, and to request, so far as may be consistent with a due regard to the whole, that you would have us, say fifteen men, competent to the immediate management and firing such a piece of artillery, which, with what they now have, they would esteem a valuable defence

for their harbor. We have reason to believe that the small force we now have, with the piece of artillery, has a good effect to protect the place against the intrusion of barges, but that small piece will not reach the chops of the harbor. The detachment of the militia contemplated for the United States will, perhaps, in a short time, enable this place to be supplied with a reasonable number of men, according as circumstances may render it proper.

We are, sir, with respect, your humble servants,

CHARLES TURNER, JR.  
THOMAS CUSHING.

General N. GOODWIN.

No. 29.

PLYMOUTH, July 20, 1814.

SIR: I received yours of the 19th instant, and observe the contents; as it respects the additional number of guards, I do not feel myself justified in granting them. Every town must expect to be subject to some privations in the present state of affairs. Certainly there is not less patriotism in Scituate than in other towns; the prevailing practice is, for the exempts to volunteer and man the forts and cannon, whether provided by the towns or by government. In this place we have five forts, with thirteen pieces of ordnance, wholly manned by this kind of troops, well organized, except sixteen of the train band in them all; all we have received from government is one nine-pounder with some ammunition. We depend upon our guards and sentinels to give the signals as you do, relying on our neighbors to march to our assistance, of which we have experienced their readiness and promptitude, and presume will again if necessary.

Your humble servant,

NATHANIEL GOODWIN.

Messrs. CHARLES TURNER and THOMAS CUSHING, *Scituate*.

No. 30.

DUXBURY, June 8, 1814.

SIR: We are informed you have orders from the supreme executive of this Commonwealth to deliver this town one piece of artillery mounted on a travelling carriage, with every equipment, for the defence of our harbor; you will please deliver the same to Captain Thomas Chandler.

Your humble servants,

HENRY CHANDLER,  
REUBEN DELANO,  
*Selectmen of Duxbury.*

General NATH. GOODWIN.

No. 31.

DUXBURY, July 4, 1814.

SIR: The committee of safety for Duxbury wish you to instruct the officers commanding the few troops here to place sentries around our harbor in the following manner, viz: one at Captain's Hill, one at Bradford's wharf, one at the fort, one at E. Weston's wharf, one at Powder Point; also direct him to furnish a row-guard, as we feel very unsafe, and direct him to comply with the regulations of the committee.

Your humble servant,

EZRA WESTON, *Chairman of the Committee of Safety.*

General N. GOODWIN.

No. 32.

PLYMOUTH, July 19, 1814.

GENTLEMEN: I am credibly informed the row-guard from your place do not attend their duty regularly; to what cause it is owing I am ignorant, but hope it is not to any difference of opinion in your honorable body has prevented so desirable an object, as it is of more importance than all the other guards. I have complied with your request excepting that of uniting civil and military, and given the officers orders accordingly, respecting arrangement of sentinels. Should any alteration be wanted, you will give me information.

I am, gentlemen, your humble servant,

N. GOODWIN, *Major General.*

EZRA WESTON AND OTHERS, *Committee of the town of Duxbury.*

No. 33.

DUXBURY, September 10, 1814.

SIR: We, the committee of safety for the said town, in addition to what we have heretofore stated respecting the defence of this town, think it very important, at this alarming crisis, that sentries should

be posted at every point in our harbor, as our safety greatly depends on having timely notice if the enemy should attempt to land at this place; we therefore think it highly important that a sentry should be posted at Sandy point, it being the southernmost point of land in our harbor, and nearest to Plymouth beach; of course any alarm given from the row-guard can be heard much sooner at this place than any other. Lieutenant Bradford, who commands the few men here, informs us he has not men sufficient to furnish a sentry at this Sandy point. We are therefore very desirous that you would make an arrangement to furnish him with four men more, by detachment or otherwise, as you may judge proper, and you will greatly oblige your very humble servants,

General NATH. GOODWIN.  
Not granted.

EZRA WESTON,  
REUBEN DREW,  
NATH. WINFOR,  
*Committee of safety for Duxbury.*

---

No. 34.

At a meeting of the town of Plymouth, legally assembled and held at the court-house in said town, September 13, 1814, the petition of Mr. Isaac Le Baron and forty-one others was read, and is as follows:

*To the selectmen of the town of Plymouth:*

GENTLEMEN: We, the subscribers, inhabitants of said town, request you to call a meeting of said town at three o'clock in the afternoon of this day, to advise, consult, and determine on the ways, means, and measures necessary to be adopted to repel any attack the enemy may make on this town.

Then voted that the selectmen and committee of safety be requested to call upon the major general, and request him to call to the immediate protection of this town a portion of militia from the country, as he may judge sufficient for its defence.

A true copy of record from Plymouth town book 4, page 25.

Attest.

EPHRAIM SPOONER, *Town Clerk.*

The subscribers, selectmen and committee of safety of the town of Plymouth, pursuant to the foregoing vote, do request the major general of the 5th division to order out, for the defence and protection of the said town and its vicinity, such a portion of the militia as he shall judge necessary for that purpose; the time having arrived, in our opinion, and that of all wise and prudent men, that we are in danger of an invasion from the enemy; and it has become imminent and alarming, there being a large British force in our bay, daily in sight from the town, taking and destroying even our little fishing vessels, and they have landed at Brewster and other towns in the bay; put some under heavy contributions, and threatening others; their boats and barges have landed several times, one of which was sunk by the small fort at the entrance of our harbor; and from information which we can fully rely upon, it is the intention and determination of the squadron to attack our fort, make a landing at the same time, and destroy the shipping lying at our wharves, in doing which they must destroy a great part of the town; under these impressions the inhabitants of all ages and situations are moving into the country with their families and effects. We do therefore think it indispensably necessary for you to call in some troops to our aid and assistance, such a number as will be necessary to repel an attack; while you are affording aid to other towns within your command, we trust that you will not leave us defenceless at this critical and important crisis; therefore we rely on your granting our request.

WM. DAVIS, *Chairman of the Selectmen.*

HENRY WARREN, *Chairman Committee of Safety.*

PLYMOUTH, September 13, 1814.

---

No. 35.

Notwithstanding the foregoing application for assistance, (and many previous ones,) it being my native town and place of residence, I did not order out any troops before I consulted with his excellency the commander-in-chief and the commissioners for the seacoast defence at Boston, personally, on the subject.

NATH. GOODWIN.

---

No. 36.

NEW BEDFORD, June 21, 1814.

SIR: The bearer of this, Lieutenant Frederick Mayhew, I send to you express, to communicate the situation of this place. Sir, we are in a state of great alarm. On the morning of the 13th instant, at daybreak, about nine barges full of men appeared in our harbor. By information since received, it appears that there were in the barges about four hundred men. I immediately called out three companies of our militia in this vicinity, and in the evening, the enemy disappearing, they were discharged. On the 16th I received a communication from the *selectmen* of our town, with a request to call out 500 men from the regiment under my immediate command, to protect this town and harbor, which request I complied with. We have now about 350 men under arms in this town and Fairhaven; under these circumstances I thought proper to send an express to you for advice and direction, and should be extremely gratified was it convenient for you to visit us in these times of agitation. We every hour expect an attack—our force is very small—we have a small fort with seven guns and twenty-three men and boys, and two gun-boats, with about twenty men and boys, which are all the defence our general government has thought proper to furnish

us. We have a great amount of property in this port, upwards of fifty ships and brigs, together with a great number of small vessels, exposed to the enemy. We have but very little means of defence, only one small company of artillery, and six small pieces of cannon, and very little ammunition. I have sent an express to the governor, who will probably return by way of your place. Under those circumstances I wish for orders by this express, if convenient.

Yours, very respectfully.

BENJAMIN LINCOLN, *Lt. Col. 2d Reg. 2d Brigade.*

Major General GOODWIN.

*Answered* by the division orders of this date; furnished with a detachment from the 4th regiment, 1st brigade, of a battalion of three companies under the command of a major.

---

No. 37.

NEW BEDFORD, *July 3, 1814.*

SIR: Agreeably to your orders the detachment from Colonel Washburn's regiment have arrived, under the command of Major Pierce, also the artillery from Norton, and are on duty—their prompt attention to order and discipline does them honor. I have to state however that, in consequence of your instructions, I have ordered out two companies from the 3d regiment in this brigade, being nearest to us, for the purpose of relieving those now on duty from the 2d regiment, and to supply the places of others discharged. It being my opinion the number on duty is inadequate for the defence of so important a place as this, having already had a great proportion of the troops from the 2d regiment on duty, the pressing calls of their families and little plantations were such as induced me to discharge more than I otherwise should. Last evening I received a communication from Captain Shepherd and Colonel Deane, of the 3d regiment, which induces me to think they will not join as ordered. We have only 390, officers included—have hove up a battery at the Smoking rocks, to annoy the enemy, should they again attempt to enter our harbor. We need some lumber to complete the battery and to mount the guns that we have taken out of some vessels in the river—wish to know if I should be justified in procuring the same. The commandant of the United States garrison is opposed to the militia being quartered there. If that fortress is to be defended, it must be without the walls; there is not men sufficient to defend it. Should the enemy get possession, they will command both sides of the river. The enemy are in sight of the harbor continually.

Yours,

BENJAMIN LINCOLN, *Lieutenant Colonel*

General GOODWIN.

---

No. 38.

NEW BEDFORD, *July 21, 1814.*

SIR: Nothing of much importance has occurred since you left this place, excepting a small affair at Westport harbor. On Friday night last a British barge, with 30 or 40 men, entered there; but our small guard stationed there being vigilant, after exchanging a few rounds with them, they thought best to return to the ship. The British force in our sound has been recently augmented. I have this day ordered a detachment of 170 men, officers included, Monday next, from the 3d regiment, and shall discharge those on duty from the 2d regiment—have stationed 18 at Slocum's river, and reduced the guard on Sconticut Point to four, with tar barrels, and placed the others in various places. The whole number of troops is 210, artillery included. A considerable alarm has been excited by the augmentation of the British force off the harbor, and the recent arrival of the privateer "Yankee," which has been very mischievous to the enemy, and their determination to obtain her keeps them off here in expectation of taking her. I am strongly importuned by our citizens to call in more force, and I wish your instructions on that head.

If troops are taken, I would suggest the propriety of taking them from the interior. The inhabitants met yesterday and agreed to furnish me with materials to complete the small fort, also a guard-boat.

Yours, &c.

BENJAMIN LINCOLN, *Lieutenant Colonel.*

General GOODWIN.

---

No. 39.

HEADQUARTERS, *Plymouth, July 23, 1814.*

SIR: I should have written to you before this had I not waited for an answer from the adjutant general, which I have not as yet received. But, sir, I presume you have discharged the detachment of guards doing duty at Russell's Mills, and reduced the others at Westport and Ponigansett, and also the troops from the 3d regiment, and called in some of the 2d regiment to supply their places, (in part,) agreeable to my direction when I left you, and you will retain no more troops than is sufficient for guards, sentinels, &c., viz: 40 for the harbor, cove, sentinels at Russell's Hill, and head of the river; 40 to be stationed at the fort, 21 at Ponigansett and Westport; making, in the whole, about 100.

I expect orders daily respecting the distribution of the troops, and will give you information. You will observe, by orders accompanying this, that part of the detachment is to be stationed at Fairhaven. You will lose no time or exertion in having the detachment from your brigade completed and

marched to the place of rendezvous, as directed; to expedite the business, forward you 50 general orders, and 60 blank rolls, to be distributed.

Yours, with due respect,

NATH. GOODWIN, *Major General 5th Division.*

Lieutenant Colonel BENJAMIN LINCOLN.

N. B.—You will endeavor to cultivate harmony with the officer commanding the United States fort, that you may act in concert in case of an attack

No. 40.

NEW BEDFORD, July 24, 1814.

The subscribers, selectmen of the town of New Bedford, and the committee of public safety for said town, beg respectfully to represent that, in consequence of the recent conduct of the enemy in their former attempt on this place, they are apprehensive of an attempt in meditation for the destruction of the shipping in this port; and as the small force stationed here is not adequate to an efficient defence against any considerable force coming against the place, the subscribers beg leave to suggest the necessity of a detachment of five hundred men, at least, a number which the colonel commandant of this regiment has stated to us as necessary for the defence of New Bedford, Fairhaven, Dartmouth, and Westport.

We will also beg leave respectfully to suggest the expediency of discharging from detachment the artillery company of this town, if not, indeed, the infantry also. The expense of detaching and keeping under pay one hundred men from the interior is no more to the Commonwealth than if the same number were detached from this town; whereas the benefit of the defence of the place, in case of an attack, may be great from that number detached from the interior, and would be no greater from the militia detached from our immediate vicinity than if they were not detached, as it is to be presumed their exertion would be equally prompt in either case; there can therefore be no benefit to be derived, but much expense may be incurred by detaching men from this town to do military duty.

Were not these reasons sufficient to operate the discharge of the militia detached from this place, we would state that the artillery company, especially, has been detached a long time, and the men are anxious to be discharged, sensible that they have performed more than their portion of duty.

With sentiments of the highest respect, we have the honor to be, sir, your most obedient servants,

ROGER HASKELL,  
SAMUEL PERRY, *Selectmen.*

WILLIAM HATHERWAY,  
CORNELIUS GRIMMEL,  
R. H. CROCKER,  
LEMUEL WILLIAMS, JR.,  
JAMES WASHBURN,  
JOHN A. PARKER,  
LEWIS LUDLAM,

*Committee of Safety.*

NATHANIEL GOODWIN, Esq., *Major General, &c.*

No. 41.

PLYMOUTH, July 29, 1814.

GENTLEMEN: Previous to the receipt of your letter of the 25th instant the commander-in-chief had ordered a detachment, making such provision for Fairhaven, &c., as General Dearborn has thought proper to request.

It has, in some measure, anticipated your request, and I presume will in part quiet your fears. I have directed Colonel Lincoln to retain a sufficient number of troops for sentinels, to be planted at the several posts assigned, of which he will give you information; those, together with signals by night, will answer every purpose to alarm your town and the country.

It has not yet been contemplated by the commander-in-chief or the committee of preparation and defence to furnish an efficient force, either for your place or any other, to contend with a large force of the enemy, not imagining that will be the case, unless the enemy are greatly reinforced; should that be the case, no doubt, provision will be made.

We, in this place, are almost constantly on the alarm. From four to six men-of-war in sight every day, taking our small craft, &c.

You recollect the guard at Dartmouth beat off a barge. They answered as good a purpose as if a regiment had been stationed there. If the sentinels are alert upon their posts we need not fear any danger from a sudden attack.

We man five forts by exempts, as before mentioned you. It is very extraordinary that all the town of New Bedford cannot furnish exempts sufficient to man one small fort.

Have ordered Captain Hall's company of artillery discharged, agreeably to your request. The distribution of the detached troops not yet being known, shall wait the further orders of the commander-in-chief respecting New Bedford, Plymouth, &c. You may rely on my doing everything in my power for the safety of your place and its vicinity, consistent with my duty.

I am, with every sentiment of esteem, gentlemen, your most obedient, humble servant,

NATH'L GOODWIN, *Major General 5th Division.*

The SELECTMEN and COMMITTEE OF SAFETY, *New Bedford.*

No. 42.

NEW BEDFORD, *July 31, 1814.*

SIR: To relieve the troops we have now on duty from my regiment I have this day ordered a detachment from the 4th regiment, one company of seventy-seven men, officers included, which was our only alternative, or be left without men. Should this proceeding not suit your approbation, you will please give immediate advice, and the order shall be countermanded. The people here all very much alarmed. It is reported that an expedition is fitting by the enemy for this place, which I hope will prove to be nothing but report.

They attempted to destroy all our property, and succeeded in part, by burning a number of our vessels; then returned aboard their shipping before we could collect any force against them.

We wish for some assistance, and understand a company of United States flying artillery is in Plymouth. We wish you to send them, if possible.

In behalf of the inhabitants of Wareham:

CURTIS TOBEY.  
BARTLETT MURDOCK.

General GOODWIN.

No. 45.

PLYMOUTH, *June 14, 1814.*

Having received information by express that the enemy are harassing and distressing the village at your place, have ordered Captain Cole to march. All the militia have had orders, a long time since, to march, without delay, to any place invaded, or in danger. Lieutenant Washburn, of the United States flying artillery, will be with you, and afford you, as soon as he possibly can, all the assistance in his power. You will pay him every attention, he being a gentleman, and supply him with forage, &c.

Should the enemy continue, you will send to the adjacent towns for aid, and give me information. You will take command until some superior officer arrives.

NATHANIEL GOODWIN, *Major General.*

Captain ISRAEL FEARING, Jr.

No. 46.

PLYMOUTH, *June 21, 1814.*

You are directed to detach one sergeant, one corporal, and nine privates, to mount guard at the harbor in Wareham, to perform duty as sentinels by night and day, as you and the committee of safety shall judge best.

N. GOODWIN, *Major General.*

Sergeant SAMUEL SAVERY.

No. 47.

JUNE 20, 1814.

SIR: You are directed to detach from the company under your command one corporal and three privates, to mount guard at the great hill in Wareham. You will give them such signals as the committee of safety and yourself shall agree upon.

Yours,

N. GOODWIN, *Major General.*

Captain ISRAEL FEARING, Jr.

No. 48.

ROCHESTER, June 19, 1814.

SIR: By the request of the inhabitants of Mattapoisett, I take the liberty to address you, having previously wrote to Colonel Washburn, and received no answer. Our request is, if consistent with your orders, to have some assistance, by a detachment from the militia of this regiment. Our situation is this: the British ships are almost all the time in the Vineyard Sound; the Nimrod has approached our harbor, destroyed Wareham, and threaten destruction to this place; we have forborne calling for men as long as possible, but the case now becomes serious, and without some assistance we shall fall a sacrifice to our enemy. The militia and inhabitants of this place have been under arms for some time, and are almost exhausted with fatigue.

Mr. Gideon Barstow, the bearer, can give you all the information.

With due obedience, sir, I remain your humble servant,

DANIEL B. LORING, *Captain.*

Major General GOODWIN.

JUNE 22.

Ordered, 1 sergeant, 1 corporal, and 15 privates, for the above harbor.

N. GOODWIN, *Major General.*

No. 49.

ROCHESTER, August 9, 1814.

SIR: We, the undersigned, feel it a duty incumbent on us to make known to your honor that the last detached men in said town ought to be relieved, on the principles of the first detachment, as the last has served as long as the first; and, as most of the men are farmers, the season of the year loudly calls them on their farms; we therefore pray that your honor would issue your orders for a third detachment, as soon as circumstances will admit, to supply in the stead of those who are in actual service.

We further think it necessary and highly important to have an *addition of ten men* added to the number at Sippican harbor, as there is no guard on the east neck of said harbor, which prevents passing an alarm to Wareham; and the most important place has been neglected, which is Sippican great hill, for the purpose of a good lookout and signals, all for the want of men.

We would further request, if consistent, that you would fix a limited time for the next detachment, as the men would calculate accordingly.

We are, with respect, &amp;c.,

TIMOTHY MILLER,  
ROWLAND LUCE,  
*Committee of Safety.*  
CALEB HANDY,  
*Captain of Infantry.*

General NATHANIEL GOODWIN.

Not granted.

N. GOODWIN, *Major General.*

No. 50.

PLYMOUTH, July 29, 1814.

SIR: I received yours of the 21st instant, with its enclosures. I am sorry you ordered so large a number of men from your regiment; they cannot be wanted. I stated to you in my last, of the 23d instant, a number that I imagined necessary, and is about the same number of men as when with you.

On the arrival of the detached artillery and infantry, you will discharge Captain Hall's company of artillery, and all the troops doing duty at Fairhaven and New Bedford, excepting the sentinels necessary to be detained, as named to you in my last, those with the assistance of night signals, viz: 9 at Sconticut; 6 at foot of the rocks; 3 at Light-house point; 3 at the westerly point of the cove; 10 row-guard across the cove to Darnmouth shore; 3 up the cove; 3 at Russell's Hill; 3 at the head of the river; 21 at Darnmouth and Ponigansett; varying their positions as you may judge best.

I am happy to be informed your committee are to supply materials to enable you to finish your little fort. I hope soon to hear they have manned it with exempts; surely they cannot be so blind to their own interest, safety, security, and protection, as not to do it.

Since writing the above I have received yours of the 28th of the number of men within stated, now on duty, with two sergeants and a corporal, who are desirous of being released. You will draft some from the 4th regiment to supply their places. However, I should prefer delaying it until the pleasure of the

governor is known, as it respects detaining that species of troops employed as guards, &c. It is possible the drafted militia may be employed for that service.

Your humble servant,

Lieut. Col. BENJAMIN LINCOLN.

NATHANIEL GOODWIN, *Major General.*

No. 51.

NEW BEDFORD, *August 22, 1814.*

SIR: This will be handed you by Major Pope, with the return of the troops that have done duty here. I have now the same number of troops as when I wrote last, being about 80. Their time will soon expire; I wish your orders from what regiment they shall be relieved. Our fort is nearly completed.

23d.

This morning three British barges appeared at the point of Scoticut neck. Our guard gave the alarm; I ordered three companies out for a few hours, and dispersed them. The gun-boats in the harbor got under way, and proceeded after the barges, but to no effect. One of the barges took a sloop opposite Dartmouth harbor, a little eastward of Clerk's point. There is one ship, a brig, and some tenders now off here.

The owners of the sloop Rover are very grateful for the trouble you have taken in recovering her from those men in Duxbury, who had no claim to her, as you mention Sir George Collier has informed you by a flag.

Your, respectfully,

General GOODWIN.

BENJ. LINCOLN, *Lieutenant Colonel.*

No. 52.

NEW BEDFORD, *September 3, 1814.*

SIR: Agreeably to your orders, I have detached one company from the 3d regiment, for one month, to relieve those of the 4th regiment. I have discharged all the men from Westport. Have now on duty, at Clark's Cove, Scoticut, with signals, in all 69.

Our inhabitants are much troubled for their safety, and have petitioned me, from the town of Fairhaven, for a company to be stationed there, (whom I have referred to you.) The United States fort is well manned, and we have erected a 4-gun battery east of that fort, yet if the enemy should attack us, they may do much damage before we could call in aid, and New Bedford is in a similar situation. This will be handed you by Captain Gibbs, one of the committee of safety. Our people are not, as yet, willing to purchase a boat for the row-guard. I have furnished the fort at the rocks with four long 6-pounders, but no powder or shot, and the town unwilling to purchase any if they could be obtained. I am in hopes, if an attack should be made, to find some ammunition and volunteers. The Quakers are unwilling to assist.

Your humble servant,

General GOODWIN.

BENJ. LINCOLN, *Lieutenant Colonel.*

No. 53.

PLYMOUTH, *September 5, 1814.*

SIR: Yours per Captain Gibbs this day; have considered his request for men, but, as I have before observed, the governor has never contemplated to station a sufficient force at any place to meet the enemy, supposing that to be the duty of the general government; the intention only has been to plant sentinels to give the alarm.

The mode of warfare being totally different from what was expected, perhaps the commander-in-chief and council may judge it necessary to alter and pursue a different course, now the enemy are attacking us on all sides. Considering the situation of New Bedford and Fairhaven, being accessible for ships and boats at several points, I do not think it an object of attention.

Having already afforded such aid as I imagined was necessary and sufficient for guards and sentinels to give the alarm, do not conceive it my duty, under my present directions, to grant any further force.

If the town imagine men are wanted, why not apply to the governor on such an emergency? No doubt he will mete out to them equal justice. The cost of defence has already exceeded every calculation. Should advise you to give orders to the militia near you to hold themselves in constant readiness to march, at the shortest notice, to your assistance, if required. If you have discharged all the men at Westport, where have you stationed the rest? Being only four at Scoticut, there must be 50 at New Bedford; that is more than was intended.

If a boat is not furnished for a row-guard, you will discharge ten men that were designed for that purpose. Why does not your committee from both towns apply to headquarters for powder, &c.?

You had much better dismantle your forts than to keep them in such a situation. In case the enemy should get possession they would turn the guns against you.

Your humble servant,

NATH. GOODWIN, *Major General 5th Division.*

N. B.—You will make the above known to the committee.

Lieutenant Colonel B. LINCOLN.

Men not granted.

No. 54.

NEW BEDFORD, *September 20, 1814.*

SIR: This will be handed you by Captain R. Crocker and Mr. John A. Parker. These gentlemen, as members of our committee of safety for the town of New Bedford, who intend visiting Boston previous to seeing you to consult the governor on the propriety of placing a force at this place to protect us from invasion. These gentlemen will state to you the feelings of the people in this place with respect to our situation. We are in daily expectation of an attack, the enemy having collected, and are collecting, troops on an island opposite our port, with an intention, as we believe, of attacking us.

I would suggest the propriety of ordering out the whole or part of my regiment two days in each week, for discipline and examination, to be paid for their services. I mention this for your consideration. The people here are in great anxiety; they begin to think the place abandoned by the government to inevitable destruction of such an immense property as now lies in this place.

I am extremely sorry to hear that Plymouth is so much threatened by the enemy.

Yours, &c.,

B. LINCOLN, *Lieutenant Colonel.*

General GOODWIN.

No. 55.

NEW BEDFORD, *September 20, 1814.*

SIR: The enemy have not invaded us as yet, although more or less of them are continually in sight every day, peeping into our harbor. One of our selectmen has been to the governor with a petition from the committee of safety, with that of Fairhaven, for a sufficient force to be placed here, but got no encouragement. The inhabitants are very much dissatisfied, as there are troops stationed in considerable numbers in places of less importance than this, and even sent troops out of the State.

Your orders came too late to dispense with a captain and take a lieutenant, as I had previously given the order; for I wish to make every saving to government. We have received some ammunition from Boston for our little forts; but we can do but little with them without men. I have the promise of volunteers in case of an attack, yet I think it very uncertain whether I get a man on such an occasion. I have given strict orders to the militia in this vicinity to repair to our assistance in case of an alarm; but, as no regular troops are stationed here to co-operate with them, cannot place much dependence. Considering every circumstance, our prospects are very gloomy, and have nothing to expect but sure destruction of our ships and property, and that very soon. I am continually applied to for more force by the inhabitants; know not what to do; must hope for the best.

Your humble servant,

BENJ. LINCOLN, *Lieutenant Colonel.*

General GOODWIN.

No. 56.

NEW BEDFORD, *October 9, 1814.*

SIR: Since writing you I have received some commissions for the cavalry and the 3d regiment infantry from your office, without any particular communications from you. Sir, we are in a state of considerable agitation at this time by the appearance of a number of enemy's vessels now in our sound. On Thursday last came in one 74 and three frigates, and two brigs; since which are added two or three more. We can discover troops on the islands, opposite this place, on drill. What their intention is I cannot learn. On their first appearance I made out orders to call in for our assistance seven companies from my regiment, but have not as yet distributed said orders—am waiting the movements of the enemy. I expect they will attack us. The company from the 3d regiment was discharged from duty in this place on the 5th instant, the pay-roll of which, together with the company from the 4th regiment and a small guard stationed at Westport, I herein enclose.

We have the four companies from the 1st and 3d regiments, ordered here conformably to division orders of the 19th ultimo, three of which are stationed in New Bedford, and one in Fairhaven. They consist of about twenty short of the number ordered, owing to sickness, desertion, &c. I wish to know if it would meet your approbation to call out one more company for this place from my regiment, and place them under Captain Stall, to instruct them in the discipline of carriage guns. There are two 6-pound guns on travelling carriages belonging to the artillery here, which cannot be used by the company should we be invaded. Could we have a company to those guns, they may do us much service.

BENJ. LINCOLN, *Lieutenant Colonel.*

Major General N. GOODWIN.

No. 57.

PLYMOUTH, *September 19, 1814.*

Enclosed is an order providing for the defence of your place. I believe the time has arrived that we must make preparations to defend ourselves, being left by that government who is bound in duty and good faith to protect us. The late depredations of the enemy, by their unheard-of mode of warfare, not practiced by any civilized nations, leave us no hopes or expectation of lenity from them. We are left to

make every exertion in our power to repel a hostile, invading foe. I hope the late disasters will teach them moderation and a just sense of propriety. They, by way of excuse, say we set them the example. They have landed at Eastham, and taxed the salt works \$1,200; also at Brewster \$4,000. If you can give Major Popé the command of this detachment, presume you will. Last week, in Boston, General Dearborn informed me he had consented to the exchange of Kingman. It is highly important to have a good officer to command that fortress. Suppose the term of the last detachment from the 3d regiment has nearly expired, you will use your own judgment respecting detaining them till that time.

You will make the detachment from that part of your brigade most remote, if compatible with your former draughts of duty, (not make a general detail.) Should you be assailed by the enemy, you will alarm the country. Do not neglect your night signals. I have received no answer to my two last letters of the 20th August and 3d instant.

Colonel B. LINCOLN.

NATHL. GOODWIN, *Major General.*

No. 58.

PLYMOUTH, *February 24, 1817.*

The foregoing are copies of communications received from several towns, committees of safety, military officers, &c., in the 5th division of militia.

The numerous personal interviews by deputations, &c., from the same source, for aid and assistance, is not in my power to recollect.

NATHANIEL GOODWIN,  
*Major General 5th Division Massachusetts Militia.*

BOSTON, *June 14, 1823.*

The preceding documents, marked B, Nos. 1 to 58, inclusive, are true copies of the originals, signed by and received from Major General Nathaniel Goodwin, of the 5th local division of the militia of Massachusetts.

JOSEPH H. PEIRCE.

DEPARTMENT OF WAR, *December 23, 1823.*

GENTLEMEN: I enclose to you herewith a copy of the decision of the President of the United States in relation to the claim of the State of Massachusetts for the military service of the 5th division of the militia of that State.

I have instructed the Third Auditor to proceed in the auditing the accounts with as little delay as possible, and beg leave to suggest the propriety of your sending in all the accounts and vouchers in your possession as soon as possible.

The accounts, &c., are herewith returned.

I have the honor, &c.,

J. C. CALHOUN.

MESSRS. SULLIVAN & PEIRCE, *Agents, &c., Washington City.*

WASHINGTON, *December 22, 1823.*

SIR: I have examined, with great attention, the report of the Third Auditor of public accounts on the claims of the 5th division of the Massachusetts militia for services rendered in the late war, with the communications of the commissioners of that State on the subject, and, according to the view presented, am of opinion that the services to which they refer were called for by the exigencies of the times, and were intended to repel, in many instances, actual invasion, and in the others the troops were called out on well-founded apprehension of it; that they were spontaneous movements of those who were exposed to danger, and for the purpose of self-defence. I am, however, of opinion that it would not be proper to decide on any particular class of claims until the whole has been audited, so that the merits of each, under their various classifications, may be distinctly seen and perfectly understood. The crisis at which the constitutional difficulty respecting the command of the militia occurred between the government of the United States and the government of Massachusetts was momentous, and the principle involved in the conduct of the executive of that State, by impairing the constitutional power of the general government over the militia in war, was of the most dangerous character. It is, therefore, of the highest importance that every circumstance connected with that occurrence, in its application to these claims, should be fully known and duly weighed before a decision is made on any one of its classes. Under this impression, and with a view to such decision by the competent authority, instructions will be given to the accounting officer of the government to proceed in auditing all the accounts with the least delay possible.

JAMES MONROE.

The SECRETARY OF WAR.

WASHINGTON, *February 23, 1824.*

SIR: Herewith are transmitted copies of Governor Eustis's letters of the 19th December and 17th January last. By the former he makes a full disavowal of the principles and conduct of a former administration of the State of Massachusetts during the late war, and by the latter he directs that payment be asked on account of the services of the fifth division, admitted to have been necessary in defence of the State.

The investigation made of that portion of the claim shows, in his view, a distinct acknowledgment of debt for the services of the fifth division. The President, upon proofs which preclude all doubt, admits, by his letter of the 22d December, the necessity of these services in defence of the State. The performance of such services by the militia of a State is an execution by one State of the obligation of all, "to provide for the defence of each against invasion." Such State, therefore, is entitled, under the Constitution, to reimbursement by all, in their joint character of a nation. Admission of this necessity is an admission of the constitutional right to reimbursement, and is in effect a full recognition of the debt. It is only on this principle that claims of other States for like services have been or can be allowed; and it is believed the President would order payment for the services under consideration without delay if no questions of high importance to the welfare of the Union had arisen between the government of the State and of the nation. The denial by the former of all power in the President and in Congress to decide on the existence of those emergencies on whose occurrence the Constitution places the militia at the command of the national government, subjected that government to the uncertain and irresponsible opinions of the commanders-in-chief of the several States. It effectively deprived the national government of all means of enforcing the laws of the nation without the previous consent of the commanders-in-chief, unless by a standing army. These principles and the conduct adverted to by the President in his letter have been renounced by the people of Massachusetts as of dangerous tendency. This renunciation has been laid before the President, and Governor Eustis, under the authorization of the legislature, directs the disavowal to be made in the most explicit terms, as appears by his instructions of the 19th December. This is done without the least reserve, from a firm conviction that the people of Massachusetts would freely make the same renunciation if no claim were pending before the national government.

By this disavowal the constitutional question to which your letter of the 13th November directs the attention of the agents is put at rest; this erroneous construction of the Constitution is abandoned; it is considered by the citizens of Massachusetts as repugnant to the primary principles and subversive of the chief object proposed in the substitution of this instrument for the act of confederation. No objection, therefore, now exists, or is opposed by the Executive of the United States, to immediate payment of the sum ascertained to be due, except that suggested by the President in the conclusion of his letter of the 22d December. Had the nature of the services which constitute this claim been known to the President, he would not have deemed a postponement of his decision on this portion expedient, merely with a view of seeing the facts and circumstances connected with other portions; for all other portions which the people of Massachusetts claim of right under the Constitution are like those already presented, necessary in defence of the State. There is, obviously, no connexion between the facts and circumstances of individual services: as each is proven the occasion and necessity of each must be established; and the want of necessity in others can furnish no objection to the allowance of this portion, which is admitted to have been necessary in terms that place the fact beyond all question.

All objections being obviated, the right of Massachusetts to payment of this acknowledged debt, in the same manner as like claims of other States have been paid, by the order of the Executive, is most respectfully urged upon the President. He has the power, and the means are at his command, placed there by appropriation of Congress, without distinction of States. Why, then, it is respectfully asked, should payment of this just and acknowledged and unobjectionable debt be longer withheld by the Executive of the Union? The disposition of the Executive to meet the just expectations of the people of every State is known, and great reliance is placed on that for the President's early compliance with this request, if not inconsistent with the duties of his high station.

My colleague being indisposed, I have the honor to transmit the copies of Governor Eustis's letters of the 19th December and 17th January, agreeably to the President's expectation.

I remain, very respectfully, sir, your humble servant,

GEORGE SULLIVAN.

Hon. JOHN C. CALHOUN, *Secretary of War.*

SPEECH OF GOVERNOR EUSTIS TO THE LEGISLATURE OF MASSACHUSETTS.

*Gentlemen of the Senate, and gentlemen of the House of Representatives:*

I congratulate you on the return of this anniversary, on this assemblage of the several branches of government, and on the blessings of health, peace, and prosperity, which it has pleased God to continue to us. Honored by the suffrages of our fellow-citizens, and entering on the several duties assigned to us by the constitution, we should bear constantly in mind that to preserve and promote the interest and happiness of the great body of the people is the sole object of our appointment, and the only legitimate end of all good government.

The change of political sentiment evinced in the elections of the present year forms a new era in the history of this Commonwealth. By the free suffrages of her enlightened and independent citizens, this ancient and respectable State is restored to the confidence of her sister States, and to her just influence in the national councils; has resumed her station as an efficient member of the confederacy, and added strong guarantees to its energy and permanency.

The long-continued opposition to the federal government, more especially the measures pursued in this State during the eventful and critical period of the late war; the withholding from the general government the constitutional means of defence; the paralyzing influence exercised over the means and agents of that government, which occasioned double sacrifices of life and treasure, while the citizens of other States were exerting their utmost energies against a common enemy, and when a gallant army and navy were covering themselves with glory, and retrieving and establishing, on an imperishable basis, the na-

tional character, on the ocean and on the land, must ever be regretted. At this portentous crisis, when our liberties and independence were at hazard, an unhallowed spirit of party was permitted to prevail over the vital interests of the country; an unauthorized combination was formed, and meetings held in a neighboring State, which, whatever may have been the professed object, had the certain effect of encouraging the enemy, of discouraging and impairing the means and resources of the country, and of alienating the minds of the citizens from that "unity of government" which, in the emphatic language of Washington, "constitutes us one people, is the main pillar in the edifice of our real independence, the support of our tranquillity at home, our peace abroad, of our safety, of our prosperity, of that very liberty which we so highly prize." These measures and this course had cast a reproach on the good name of the State, which is now disavowed and removed. Massachusetts is at length restored to the American family. Her character is redeemed in the estimation of the patriots of our own country, and of every statesman in Europe. The rising generation, who could have had no agency in this disloyal course, appear to have taken an honorable and an earnest interest in its disavowal.

That this is a just cause of joy and congratulation will be admitted by all honest, independent minds, to whatever political party they may have been attached, by every one who takes an interest in the reputation of his native State, who appreciates the virtue of his ancestors, who traces in the history of our glorious revolution their dear-bought fame, and who values the precious legacy which they have transmitted to prosperity.

This review of the past is not intended to renew contentions or to rekindle animosities which have too long disturbed the public mind; still less to revive a spirit of party, the decline of which is favored by the circumstances of the country, and by the very liberal spirit which appears to pervade the community; but that from the past useful lessons may be derived to direct the future; that we may be induced to cultivate a spirit of concord, to cherish a love of country, to look to the confederacy as the ark of our political safety, to extend to the general government a proper confidence, to maintain the constitutional powers and rights of the State government in their full extent, to frame and administer the laws with a single eye to the public good, and to render equal justice to all men.

The anxious eyes of enlightened statesmen in every quarter of the globe are directed to observe the progress of civil liberty in this country. Our education and habits acquired in our primary schools, where the children of all have equal access to the means of knowledge and information, and in which the moral force of the whole community is brought forth, furnish a cement to the physical strength derived from the labors of the husbandman, the mechanic, the mariner, and the manufacturer, and hold together the humble, the middling, and the rich, in one indissoluble bond of mutual interest. This keystone of our political arch, laid by our venerable ancestors, sustained them in all their conflicts, carried us triumphantly through the revolutionary war, became a substitute for means and resources deemed indispensable by other nations, and remain to us a column of strength unknown in ancient or modern times.

The bill of rights which makes a part of our constitution declares that "a frequent recurrence to the fundamental principles of the constitution, and a constant adherence to those of piety, justice, moderation, temperance, industry, and frugality, are absolutely necessary to preserve the advantages of liberty and to maintain a free government." The same instrument provides that "wisdom and knowledge, as well as virtue, diffused generally among the body of the people, being necessary for the preservation of their rights and liberties, and as these depend on spreading the opportunities and advantages of education in the various parts of the country and among the different orders of the people, it shall be the duty of the legislatures and magistrates, in all future periods of this Commonwealth, to cherish the interests of literature and the sciences, and all the seminaries of them, especially the University at Cambridge, public schools, and grammar schools in the towns; to encourage private societies and public institutions by rewards and immunities for the promotion of agriculture, arms, sciences, commerce, trades, manufactures, and the natural history of the country; to countenance and inculcate the principles of humanity and general benevolence, public and private charity, industry and frugality, honesty and punctuality in their dealings, sincerity, good humor, and all social and generous affections among the people."

By recurring to these principles, which in their nature and origin are democratic, which form the basis and true conservative power of all our constitutions, both State and federal—observing the injunctions and cherishing the liberal and generous sentiments here inculcated—the several branches of the government will, with the blessing of Heaven on their endeavors, fill their respective circles of duty satisfactorily to themselves and acceptably to their constituents. The example of wisdom and moderation exhibited by the distinguished citizen who has retired to the walks of private life, after having filled the chair of state for the last seven years in a manner which has added lustre to his revolutionary fame, falls with peculiar force on his immediate successor.

On a first accession to the government, and in a session which convenience and custom have rendered short, it will not be expected that many subjects will be proposed or acted upon; the multiplication or alteration of the laws should be avoided, as far as public convenience will admit. Instances will, however, occur requiring the interposition of the legislature, of which they will judge.

The militia, the great bulwark of our defence, deserving at all times attention and support, is at this period entitled to peculiar consideration. Experience has taught us that in wars between European nations the maritime rights of this country are disregarded, and we have been compelled to support them by force. From present appearances there is great reason to apprehend the same course and the same consequences; to be prepared for them is the dictate of sound policy. The national government will provide the means of protection on the ocean, and is making annually valuable additions to our stock of military knowledge by a well-regulated academy; and it remains with the States to cultivate and improve their militia. It may be affirmed without fear of contradiction that the population of the United States, from the first settlement of the country to the present day, has never afforded five thousand native citizens who will voluntarily enlist in the regular service in time of peace, unless there is a well-founded expectation of immediate hostilities. This circumstance, so illustrative of the abundant means of rewarding labor and enterprise and of raising our youth to higher destinies, admonishes us of the necessity of cherishing a spirit of discipline among the great body of the people, and proves at the same time that the militia is, in the first instance at least, our right, our only efficient arm of defence.

The state of the treasury will necessarily command attention. When it shall be ascertained, the legislature will be enabled to determine whether any reduction in the expenditures is required.

An adjustment of the claim of this Commonwealth on the government of the United States, for services rendered by the militia during the late war, must be of great importance to our finances. When it shall

have been examined, a statement will be made in order that the legislature may judge of the expediency of any further proceedings on their part.

In all measures for the promotion of the common interests, I shall at all times be happy to co-operate.  
WILLIAM EUSTIS.

*Answer of the house of representatives of Massachusetts to the governor's speech.*

MAY IT PLEASE YOUR EXCELLENCY: The house of representatives reciprocate your excellency's congratulations on the return of this, our anniversary, and its concomitant blessings; and we trust that in the discharge of the duties assigned to us by our constituents, we shall have a single eye to the interest and happiness of the people.

The change of the political sentiment evinced in the late elections forms indeed a new era in the history of our Commonwealth; it is the triumph of reason over passion; of patriotism over party spirit. Massachusetts has returned to her first love, and is no longer a stranger in the Union. And it is with peculiar pleasure we recognize in her chief magistrate one who contended first for the freedom and independence of these States, and afterwards for the continuance of their sovereignty and existence as a nation, and whose whole life has been devoted to his country.

We rejoice that, though during the late war such measures were adopted in this State as occasioned double sacrifice of treasure and of life, covered the friends of the nation with humiliation and mourning, and fixed a stain on the page of our history, a redeeming spirit has at length arisen to take away our reproach and restore to us our good name, our rank among our sister States, and our just influence in the Union. And while we rejoice that the rising generation, who could have had no agency in those measures, appear to have taken so earnest and so honorable an interest to redeem our character, we rejoice also that our redemption has come whilst most of those whose heads were bowed down with affliction are yet in existence, and can once more look up and behold the cheering light which shines on their native State.

Though we would not renew contentions or irritate wantonly, we believe there are cases when it is necessary we should "wound to heal." And we consider it among the first duties of the friends of our national government, on this return of power, to disavow the unwarrantable course pursued by this State during the late war, and to hold up the measures of that period as beacons, that the present and succeeding generations may shun that career which must inevitably terminate in the destruction of the individual or the party who pursues it, and may learn the important lesson that in all times the path of duty is the path of safety, and that it is never dangerous to rally around the standard of our country.

With your excellency, we are sensible that the eyes of the world are on America, noting the progress of civil liberty. In no part of our country is a prouder display of the means of knowledge and information than in Massachusetts, nor are the effects less strikingly exhibited in the intelligence and moral habits of the people. It is, therefore, both our duty and our pleasure to foster all our literary institutions, especially our "public schools and grammar schools, in the towns," as enjoined upon us in the bill of rights. And we trust the foundations of literature and the sciences, of religion and morality, which have been laid so broad and deep by our venerated ancestors, will not be undermined or removed until long after we and our children, and their posterity for ages yet to come, shall have slept with our fathers.

The house of representatives appreciate the wisdom and moderation of your excellency's predecessor, who is followed to his retirement with the gratitude of this whole people. They will never forget his personal sacrifices and services in the war of the revolution, and the sacrifice of a son who bore up his name in the "late war that terminated with so much glory to our nation."

We are sensible of the expediency of a short session at this time, and the inexpediency at all times of needless alteration or modification of the laws. But we shall endeavor to interpose in such cases as may require our attention.

The sentiments of your excellency concerning the militia are deserving of particular attention. Impressed with the importance of the subject, at an early day of the session a committee was raised to deliberate and report on it, and in due time we shall give it that attention and support which it is entitled to at all times, and especially the present. The battles of Lexington, Bunker Hill, Bennington, and New Orleans will forever remain recorded monuments that the militia is the great bulwark of our defence.

The house of representatives will make due inquiry into the state of the treasury and expediency of the reduction in the expenditures.

There is no subject connected with the finances of the State which excites a more general and more lively interest than that of our adjustment of the claims of this Commonwealth on the government of the United States for services rendered by the militia during the late war; and we shall be happy to co-operate with your excellency in this and in all measures for the advancement of the common interests and the promotion of the general good.

*Answer of the senate of Massachusetts to Governor Eustis's speech. May session, 1823.*

MAY IT PLEASE YOUR EXCELLENCY: The senate unite most cordially with your excellency in the grateful recognition of the distinguished blessings which this Commonwealth is permitted to enjoy. Fully concurring with your excellency in the principles upon which the government of this Commonwealth ought to be administered, this branch of the legislature will adopt with firmness and independence the wisest and best measures, as far as may be, in the just confidence that an intelligent and high-minded people will consider the duties of this body best discharged when the general interest is most extensively assured.

It is truly a subject of congratulation for the people of this State that the administration of government is avowedly in unison with that of the nation; and while the great body of the people of the Commonwealth regret that it has ever been otherwise, they rejoice in the satisfaction now felt that all differences in sentiments, in feelings, and interests between this State and the nation are in course of amicable coincidence and adjustment.

The senate cannot but concur with your excellency in the eminent utility of an occasional review of the past. They sincerely believe that your excellency, in adverting to certain events connected with the late war, which now unfortunately make a part of the history of the State, has done it with an *honest* desire that "from the past useful lessons may be derived to direct the future" for the public good. When, therefore, the events are spoken of, let them be regarded as a historical monument for the *admonition* of those in whom the people confide, that a period of accountability will arrive when they who advise must respond for the skill and judgment with which they have directed the affairs of State. Let them be regarded also as a monument for the instruction of the people; that implicit confidence in any men, or set of men, is the surrender of a freeman's birthright—freedom of opinion and of suffrage; that the affairs of government are not beyond the comprehension of the people; and it is their *duty* to themselves and their children calmly and honestly to investigate the tendency and consequences of important measures. And while the people profit in the contemplation of this monument, they will perceive many reasons for reciprocal forbearance and forgiveness among themselves; they will remember that no human being is always right; that the frank disavowal of error is manly, and that those men are inconsistent whose actions are at variance with their principles.

In the spirit of harmony and union which so happily prevails in the nation there is reason to believe that the people of this State, especially the rising generation, will ardently unite in cherishing national feelings, national pride, and an exalted sense of national honor, commingling, however, with these, and maintaining a just sense of the dignity and welfare of this Commonwealth.

A recurrence to the fundamental principles of the constitution is at all times useful; and in fulfilling this duty at the present time the Senate are gratified in acknowledging the constitutional obligation of cherishing in an especial manner the University at Cambridge—so early the object of solicitude and munificence with the founders of this Commonwealth, so justly the object of pride and veneration with their descendants. But the obligation of cherishing primary schools and other seminaries of learning and religion is not less imperative on the legislature of this State.

In the recollection of the many virtues which rendered your immediate predecessor eminent among patriots, a just tribute of gratitude and respect will be paid by all hearts throughout the Commonwealth. Amidst the conflicts of party his councils breathed the spirit of moderation, and his voice was ever on the side of the nation's honor. His services, like the influence of his manners, will be long felt and remembered in this Commonwealth, but in no instance more eminently than in the conduct of our military institutions. Coinciding with him, as your excellency does, in the high importance of maintaining the militia as the only safe means of defence and security, the Senate with great pleasure anticipate that its efficiency and its influence on the morals, the habits of order and subordination which have worked its progressive improvement, will exalt its offices still higher as objects of honorable ambition to the rising generation.

In respect to the fiscal concerns of this Commonwealth, it is considered that they who bear the taxes have a right to exact of their representatives and agents that the expenditure of public moneys shall never be of doubtful expediency, and this body will watch over this object of legislation with fidelity and with due regard to that wise frugality which is enjoined by the constitution.

The Senate will be ever ready to co-operate with your excellency in any measure for the public good. Among the various objects of interest none is of more moment to the fiscal concerns of the Commonwealth than the early adjustment of the claim on the United States for services rendered by the militia during the late war. It is hoped that objections hitherto made to the allowance of these expenditures will be considered as removed, and that the general government of the Union will perceive a propriety in making an early and amicable arrangement of the subject with this Commonwealth.

In reiterating their assurances of cordial co-operation with your excellency in all measures for the public good, the Senate beg leave to superadd that they shall emulate the firmness and independence with which it is confidently believed your excellency will discharge the various and arduous duties of the office to which you have been elected by the *free suffrages of a free and sovereign people*.

---

## COMMONWEALTH OF MASSACHUSETTS.

RESOLVE respecting claims against the United States, February 11, 1823.

*Resolved*, That his excellency the governor, by and with the advice of council, be, and he is hereby, authorized to appoint an agent or agents in behalf of the Commonwealth, as soon as he shall deem it necessary to make such an appointment, to proceed to Washington for the purpose of stating, prosecuting, and advocating the claims of the Commonwealth upon the United States for expenditures for militia services during the late war, and to perform all such services in reference to such claims, under the instructions of the executive, as the circumstances of the said claim and the course adopted in regard to the same by the officers of the United States government may from time to time require, and to provide for the payment of such agent or agents and for such other expenses incident to the case as may arise in the statement and prosecution thereof.

BOSTON, December 19, 1823.

GENTLEMEN: Should objections on the part of the federal government to a part of the claim be urged on account of the refusal of a former governor to order out the militia on a requisition of the President, in addition to the representations you were instructed to make, and to the necessary inferences flowing from the facts and circumstances therein stated, you may with great truth and justice add the most positive assurance that the people of this State have, by their suffrages, (the infallible test of public sentiment,) and by the public declaration of their immediate representatives, as will appear by reference to the authenticated copies of their proceedings in all branches of the legislature, positively and

specifically disavowed and disapproved the conduct of the former governor on this occasion, as well as the opinion delivered by the judges of the supreme court to the governor and all others who advised to the course which was pursued.

Respectfully,

GEORGE SULLIVAN, Esq.  
JOSEPH PEIRCE, Esq.

W. EUSTIS.

It is confidently believed that if it were practicable to take the opinion of the people in their primary assemblies at this moment, nineteen twentieths of them at least would confirm the statement herein given.

W. EUSTIS.

BOSTON, *January 17, 1824.*

GENTLEMEN: I have received your letters, (which having been laid before the legislature are not under my immediate inspection,) together with the accompanying documents, relative to the claim of the Commonwealth. That the several items should be audited is undoubtedly necessary; but inasmuch as it has been considered expedient to examine and audit in the first instance those of them which were unobjectionable, and as a part of them have been audited and admitted to be unexceptionable, and as there is every probability that other items now under investigation will fall under the same description, I am not able to assign any satisfactory reason why an acknowledgment and payment should not immediately follow their admission.

In the event of objections being raised to the admission of any other items or parts of the claim, such parts or items will necessarily be judged and determined on their own merits. The former appear to rest exclusively on their own basis; the services rendered are similar to those rendered by other States who have long since been remunerated; nor does there appear any sufficient reason for longer delay as it respects Massachusetts. The idea of postponing the payments actually found due until every item shall have been audited, which will require a considerable length of time, does not comport with that prompt justice which I had flattered myself we should have experienced through your agency. Satisfied of the zeal and ability with which you have prosecuted the claim, and that this state of the business has arisen from circumstances not under your control, I am still induced to request you would make another effort to change the face of it; that you would urge on the administration the justice of liquidating our claims as they are allowed, and without waiting for the exhibition and audition of others to which they may object.

To obviate any difficulty respecting minute charges, they may be suspended for future consideration on the specific allowance which the War Department may think proper to make in the first instance. On accounts of more considerable amount, in which doubts may arise respecting the admission of a part or parts of them, an advance may be received proportionate to the amount deemed admissible, leaving the balance for future adjustment, as has been the practice of the government in other instances.

I am, gentlemen, your humble servant,

W. EUSTIS.

HON. GEORGE SULLIVAN,  
JOSEPH H. PEIRCE, Esq., *Agents, &c.*

[The following documents, to include letter from William Jones, April 27, 1814, were communicated to the House of Representatives February 20, 1817.]

DEPARTMENT OF WAR, *February 18, 1817.*

SIR: In obedience to a resolution of the House of Representatives of the 14th instant, directing the Secretary of War "to lay before the House any information in the possession of that department relative to the claims of the State of Massachusetts, for payment of the expenses of the militia ordered out by the executive authority of the State during the late war," I have the honor to transmit the enclosed documents. That marked A is a copy of the communication, with the accompanying documents, made to this department by James Lloyd and William H. Sumner, esqs., agents on the part of the State of Massachusetts; B is a copy of the answer given by this department to that communication; and C is a copy of a communication made by the Secretary of War to the chairman of the Military Committee of the Senate on February 7, 1815, with the accompanying documents.

I have the honor to be, with great respect, your obedient servant,

GEORGE GRAHAM, *Acting Secretary of War.*

HON. HENRY CLAY, *Speaker of the House of Representatives.*

A.

WASHINGTON, *February 3, 1817.*

SIR: In the conferences we have had the honor to have with you, in relation to the claim of the State of Massachusetts for expenses incurred and supplies furnished for the service of the militia of that State for the general security and protection during the late war, with the adjustment of which claim we have been charged, it has been our wish, as we have before made known to you, to conduct the examination and settlement of the account with the respect and reference always due to the highest public functionaries of the nation, and to pursue that course which, while it would do justice to the State we on this occasion have the honor to represent, would also best comport with the convenience and wishes

of the Executive of the United States, to whom, in the first instance, we considered it most proper to apply.

We understand, from the laws passed in the years 1795 and 1814, authorizing, under certain circumstances, detachments of the militia, on the requisition of the President of the United States, that the expenses incurred in consequence of such requisitions have been liquidated and paid by the general government; and that where the militia has been ordered by State authority into service, without the request of the President, and the occasion has, in the opinion of the Executive of the United States, justified the call for their services, a subsequent recognition has been considered as equal to a previous requisition; and that on this construction of the powers given, by the laws before mentioned, to the President, very large claims have been admitted and paid, in whole or in part, either by advances or on final adjustment, to several of the States who have presented them.

On this ground, therefore, and justly presuming on the distribution of that equal and exact justice to all the members of this great family of States which alone could furnish the vital principle of their Union, and which, undoubtedly, will govern the conduct of the general government on this and on all other occasions, we have hoped that the account we had the honor to present would have been admitted, at least to an investigation on its merits; and that, as the simplest and most easy method of examination that presented itself, we should be allowed to take up the several items which composed it in succession, in the order in which they had been arranged, and to offer them for admission or rejection, accordingly as the judgment or sense of duty of the head of the department, or the proper officer designated for the purpose, might determine, not expecting that a claim for any expense would be allowed, unless it were shown that the occasion called for its being incurred, that the service was both effectively and economically rendered, and that it has been fully and honorably paid for by the State.

This course we regret extremely to find is not acceptable to the Executive, if we were correctly impressed by the conversations which we had the honor to hold with you; the result of which we understand to be, that the expenses not having been incurred under the authority of the United States, and the governor of Massachusetts having omitted to place the militia of the State under the officers of the general government, no account of this kind could be received for examination at the department without an antecedent recognition by the President of the United States of the several cases under which the expense arose.

We cannot but lament this course being now taken, because we do not learn that it has been asked in any other instance to be pursued so much in detail as we now presume it to be required in reference to the claim of Massachusetts; *because* it will unavoidably entail a considerable delay in classing anew the various expenses of the same bodies of militia as they were at different times called into service, under separate heads or occasions, and may require a minuteness of evidence in support of the urgency of being employed which the notoriety of the occasions at the time they occurred, and the line of conduct understood to be adopted towards other claims, were not supposed to require; and which evidence is not, even now, in all its parts, probably in existence as a matter of record, and must, therefore, in many instances, still remain to be collected in an official or authentic shape, if this rigor in point of form should be adhered to.

It is undoubtedly true, and neither a wish is felt nor a direction been received to conceal the fact, that a difference of opinion has unfortunately existed between the general government of the United States and the government of Massachusetts, respecting the constitutional powers in the former in relation to the control of the militia of several States in the Union; and it is greatly to be deprecated that a difference in the construction of constitutional powers should ever excite other sentiments than those of a reciprocal respect, and a mutual disposition, after dispassionate consideration, to amend what may be defective, and to provide a remedy for the evils of the future from the inconvenience of the past; and, more especially should this be the case in a government founded on the choice of enlightened freemen, to secure the enjoyment of rational liberty to themselves and their posterity, and the chief preservation of the purity and consequent duration of which must spring from the jealous vigilance with which all questionable expansions of power ought to be viewed, either on the part of the general government or that of the States; and which disposition, therefore, instead of meeting the frowns, would appear to be entitled to the support and encouragement of every friend of the present form of government, and who would wish to maintain and transmit it, resting on its existing foundations, pure and unimpaired to distant generations; and in a more particular manner should this disposition of mutual respect and deference for conflicting opinions prevail, where the event has happily proved the evils apprehended to flow from them to be those of imagination rather than of reality, and when the present prosperous circumstances of the country admit the people of the United States, the legitimate fountain of all power, peaceably to adopt that corrective which their ardent desire to secure and preserve their own rights, and those of the general and State governments, as defined by their respective constitutions, will undoubtedly induce them to apply, should they consider the occasion as requiring it.

The point in discussion, that of the constitutional control of the militia, and the extent to which it has been given to the general government, or is retained by the States, respectively, has, from the first adoption of the federal Constitution, been, perhaps, a question more doubtful and interesting in its nature, and has given rise to a greater diversity of opinion among the most eminent statesmen of the country, and probably allows of a more honest difference of sentiment, than can be brought into controversy under any other provision of that Constitution.

Without meaning to sustain or scarcely to enter into the argument, it is, on the one hand, conceded, that a denial of the *construction* given by the general government would lessen the powers, and, under certain circumstances, materially impair the strength of the nation, while, on the other, the admission, to the fullest extent of the doctrines, that the Executive of the Union is to be the only judge of the emergencies under which the militia is to be brought into the service of the United States, at the time and in the manner which it might think expedient, and that, when so brought into service, the militia can, by the junction of a large number of their men to a mere skeleton of regular troops, be, in fact, officered by the United States, and that the executives of the several States, contrary to their own belief in the existence of such emergencies, would be bound to bow before this tribunal, erected in the breast of a single individual, and to yield implicit obedience to such opinion, must, after the surrender by the several States of the principal sources of their revenue, place them entirely at the mercy or disposition of any future tenant of power—strip the individual States of their physical as well as fiscal force, and you would scarcely leave them in possession of even the remnant of that sovereignty and self-dependence which some of them undoubtedly supposed they had retained; but, it is repeated, it is not intended to discuss

this question further than to prove that, with the most correct views, different sentiments may honestly and intelligibly exist with regard to it; and that, at any rate, the opinion adopted for the time by Massachusetts was one fairly and deliberately formed by the governor of a large and respectable State, himself a statesman of forty years' experience in the highest offices in the country, and with the advice of his council; was corroborated by a judicial tribunal, commanding the highest respect where known, and who are, by the constitution of the State, bound to give their opinion "upon important questions of law, and upon solemn occasions" to the executive; was an opinion confirmed by the legislature and sanctioned by the people by their reiterated support and election to office of the same public agents who adopted and avowed it—an opinion, therefore, entitled to great respect, under all circumstances, and meriting every consideration which the most deliberate judgment could give to it, and perhaps requiring the settlement of a point so interesting in itself, and so open to controversy, in the mode pointed out by the Constitution, by an amendment explanatory of its powers, as applied to the rights of the general government and the States, in the employment of the militia, in the cases contemplated by the Constitution.

This course has already been recommended by the executive of a highly respectable State, (South Carolina,) not interested in the immediate question, to be adopted by its legislature, and seems to be that best founded in reason and expediency; and the one which might be attended with the happiest effects hereafter in preventing misconstructions or collisions of opinion, when they might become injurious to the public safety if the subject were left in its present unsettled state. At any rate, in a government yet in its infancy; in a government of experiment, which had never before tested or attempted to exercise its powers in a foreign war, and under a state of public sentiment unprecedented in former times, it cannot be wished or expected by any part of the community that a difference of opinion relative to the extent of constitutional powers, sanctioned as was that formed by the State of Massachusetts, whether correct or erroneous in itself, can be suffered, after the services have been rendered and the protection wanted in a great measure obtained, to remain as lasting source of irritation, or to operate as a pecuniary mulct upon a brave and free people, *who* first reared the standard that ultimately, by the common efforts of the nation, waved triumphantly over the established independence of the country, and who, in that war, as well as in the last, furnished their full proportion of those who filled its armies and fought its battles.

Still less, if possible, can it for a moment be believed that a claim thus founded, on a necessary and unavoidable defence for the general safety against a common enemy, and not amounting in the whole to one-third of the sum which is contributed towards the revenues of the United States in a single year by a single port of the State that advanced it, can be retained as a lure for political subserviency, or its liquidation be withheld for the advancement of party purposes—a doctrine too discreditable to receive a moment's confidence, and requiring from the undersigned an apology for its introduction only to be derived from the public avowal and recommendation that has been made of it, and the expression of their perfect conviction that it will meet, both from the high officers of government and from the people of the United States, the reprobation it deserves.

We cannot, therefore, but feel confident that the rightful and constitutional remedy before noticed, if it should appear, in the good judgment of Congress, to be needful, will be resorted to, and that the claim of the State of Massachusetts will be admitted and repaid by the general government. Under the influence of these impressions, we beg leave to state, as the origin of this claim, and as matter of notoriety, that at the commencement of the war the regular troops, perhaps not exceeding at the time a man to a mile of the exposed sea-coast of Massachusetts, were, at a very early period, withdrawn to the northern frontier; that after the first year of the war the maritime border of the State was frequently threatened by the enemy; that a part of it was actually invaded, and a very commanding naval and military position in it, unassailable when once fortified and possessed, without a superior naval force, except with great and nearly inevitable destruction, was secured and retained by the enemy—thus cutting off and keeping, in some degree, under his control a large division of the State, depriving it of the power of military co-operation, or of a safe and easy intercourse with the capital of the government; that the harbors along the coast were frequently annoyed, expeditions for further conquest menaced, and preparations made for effecting it; that several ports in the State were entered, the vessels in them, in some instances, burnt; that small defenceless towns were laid under contribution; that predatory incursions and alarms constantly prevailed; and that the security and protection of the inhabitants of the State from further aggression and insult were derived from the services of the militia, in the way in which they were rendered, and in which, from various circumstances, there is reason to believe the defence of the State by the militia could alone have been made effectual.

The circumstances relative to the calls for the service of the militia having been communicated to Congress by the department, and for the greater part printed, we will not trespass upon your time further in relation to them than to remark that the first call was made in consequence of the letter of the Hon. William Eustis, written prior to the declaration of war, and when that event still remained suspended in a very doubtful scale; and that none of the constitutional emergencies did at the time exist, or were expected by the government of Massachusetts speedily to occur; nor did they occur to any extent of importance until two years after the request of General Dearborn, on the 22d of June, under the authority given him on the 12th of that month. But shortly after the declaration of war, to wit, on the 3d day of July, 1812, the executive of Massachusetts issued the general order, (No. 1.) which accompanies the present communication, for the purpose of placing the militia of the Commonwealth in the most effective possible state, "exciting their love of country, and exhorting them to be obedient to the provisions and intentions of the laws in every respect, and to be ready, with alacrity and effect, to defend their constitutional rights and liberties," and apprising them, in case of invasion, or imminent danger thereof, they were to march without delay; and when in the actual service of the United States to be placed under the orders of the President thereof. This order was sent the same day it was issued, to General Dearborn; and shortly after this a body of militia, consisting of three companies, was placed in the service of the United States, at Eastport, under the orders of General Boyd.

The next request received by the governor was in July, 1814, when the probability of attack having increased, the general requested that eleven hundred men might be ordered out for the defence of the more exposed parts of the sea-coast. This order was complied with, the troops placed under the authority of the United States, and the service performed; part of the said troops, to the number requested by General Dearborn, having been stationed at Castine and Machias prior to the capture of those places by the enemy.

On the 5th September, 1814, General Dearborn again made a requisition on the governor of Massachusetts for a body of militia, when the general order, (No. 2,) herewith presented, was issued, on the 6th

of the same month, and every measure taken to guard against the attacks of the enemy. A considerable body of the *elite* of the militia from the interior was ordered into immediate service, and marched and encamped on the seaboard, and the whole of the militia were enjoined to hold themselves in constant readiness, and were called upon, "by every motive of love of country, of honor, and sympathy for their fellow-citizens who might be suffering the perils of war, to maintain the most perfect state of preparation, and to move, when called to the scene of action, with the utmost celerity." But the difficulties which had arisen and the complaints that had been made, for placing the militia in the immediate service of the United States, under United States officers, on former occasions, had been such as to induce the belief it would be inexpedient, if not hazardous, to repeat the order without having the power to enforce it. An arrangement was, however, subsequently made with General Dearborn, to place part of the militia in the forts of the United States in the harbor of Boston under the direction of his son, General H. A. S. Dearborn, and the very efficient body of troops before mentioned were stationed in the vicinity of the forts to reinforce and support them.

A fourth requisition was made by General Dearborn to guard the prisoners at Pittsfield, but the same causes operated as in the other case, in addition to the belief that, in the midst of a thickly settled population, the danger of escape from the existing guard, or of insurrection, did not require a compliance with the call; the event verified the soundness of the opinion.

These are all the calls for the militia which are known to have been made, and it is believed it can be shown that the omission to place the militia in the service of the United States was a matter of form rather than of fact; that the protection of the country was never for a moment abandoned, and that the militia were assembled and in readiness to act whenever emergencies appeared to require them; that the arrangements adopted were judicious, and in several instances predicated upon the wishes of the officers of the United States, or of those who had the confidence of the general government, or who were at the time or subsequently taken into its service, as will appear from the correspondence of Generals Dearborn, King, and H. A. S. Dearborn, and of Commodore Bainbridge and Captain Hull, of the navy, presented in the papers marked 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15; and also from the letter of the Hon. Wm. Jones, late Secretary of the Navy.

It can be demonstrated, also, that the services of the militia, so rendered, were both frugal and effective, as large bodies of troops were never unnecessarily called into service, nor retained in it longer than the occasion required; that the constant appearance and probable knowledge of preparation and readiness to repel attack prevented the advances or further depredation of the enemy, while the propriety of this mode of defence has been admitted, as we conceive, not only by the correspondence before referred to, and by the payments made under similar circumstances to other States, but also by the dictum of a former Secretary of War, promulgated at a period when, from the absence of all causes of irritation, the most dispassionate judgment could be formed, "that it is lawful for the governor of a State, when the State may be invaded, or in imminent danger of invasion, to be the judge of the degree and duration of the danger, and to apportion the defence to the exigencies that presented," as appears from the report of General Dearborn, made to the House of Representatives of the United States February 3, 1803, and also from the opinion of General Knox, when in the same office, as expressed in his letter of June 10, 1793, to the governor of Georgia. And the utility and necessity of the said services of the militia, as they were rendered, is still more fully and strongly confirmed by the fact that when so ordered into service they received the recognition of General Dearborn, by the supplies of muskets and munitions of war he, in certain cases and to a considerable extent, furnished them with, on loan or otherwise, from the stores of the United States, and which had been requested of him expressly for the use of such bodies of militia ordered into service for the general defence of the seaboard.

The foregoing embraces the chief outline of the claim we have been instructed to present; and we proceed now, in compliance with the suggestion of the department, to state that, so far as we have at present at command the means of judging, it may be classed under the following heads, to wit:

1. For the expenses of the militia who were called out by their respective officers in consequence of an attack or threat to lay small towns and defenceless places under contribution, or who rallied suddenly against the depredatory incursions of the enemy's ships and barges—most of whom were in service only a few days at any one time, having been discharged as soon as the danger ceased—and for the pay and subsistence of small guards and detachments ordered out at the suggestion of General Dearborn for the defence of several small villages whose shipping and property were much exposed.

2. For the payment and supplies of the militia who were detached and ordered into the service of the United States, from the time they were mustered in their several companies until they arrived at their places of rendezvous, and for the rations and supplies furnished them after they were received into the service of the United States, none having been provided for them at the time.

3. For the pay and supplies of the militia marched for and employed in the defence of the Penobscot frontier, after the country east of that river was taken possession of by the enemy.

4. For the expense of the militia who were detached, agreeably to the request of the superintendent of the military district, and offered to be placed in the service of the United States, organized according to law, which offer was accepted but a short time before the period for which they were detached had expired; by reason of which, and the inability of the contractor on the station to furnish the supplies, they were retained in the service of the State.

5. For the expense of the militia at Portland, who were called into service at the request of the committee of safety of that town at a time when the enemy's fleet, with troops on board, was lying on the coast; when great alarm existed in the town, and an attack was momentarily expected; when the principal reliance for the defence of the town was on the militia; and when the sea-coast must have been protected by them or abandoned to the will of the enemy.

6. For troops employed for the defence of important exposed places, some of which were attacked, and for the defence of which no troops were requested to be placed in the service of the United States.

7. For troops which, at the request of the committee of safety of various towns, in time of alarm, were marched in for the defence of those places, more than those which were placed or offered to be placed in the service of the United States for the defence of such places, and who were immediately discharged on the cessation of danger.

8. For troops that were called in for the defence of Boston, besides those placed in the forts of the United States, and who were stationed in its vicinity to reinforce the garrisons of those forts in case of attack, and to prevent the enemy from obtaining possession of the heights adjoining, which commanded the forts, the town, and the United States navy yard.

9. For troops which, at the request of the several naval commanders at Boston and Portsmouth, and at the suggestion of General Dearborn, were called out for the protection of the United States 74-gun ships building at those places, and for the defence of the ships-of-war of the United States which were chased into port; part of the evidence in reference to which may be seen in the letters of General Dearborn, Commodore Bainbridge, and Captain Hull, and of Adjutant General Brooks, who, in consequence of the directions of the Executive, promptly complied with the request made, ordered some of the most effective and valuable corps in the State into service, and informed the commodore that the governor was "fully disposed to do everything in his power to aid in defending the navy yard and the ships in the harbor which his authority by the Constitution would admit."

10. For an allowance to the militia for arms and clothing, and the use of their horses when in service.

11. For the cost of procuring small arms which were distributed among the militia; of mounting and transporting pieces of heavy ordnance, purchasing ammunition, tents, military stores and equipage; for barracks built and hired for the troops, and damage done to individuals in their property by erecting forts and occupying their buildings as barracks.

12. For the expenses of materials furnished for building platforms, magazines, furnaces, pickets, &c., in forts and batteries erected in conformity with the advice and suggestions of naval and military commanders of the United States.

13. For the pay and supplies of the militia who were employed in fatigue duty in repairing, extending, and strengthening the United States forts in various places, and for the cost of the materials therefor; and for shot and other supplies of ammunition furnished to the commanders of those forts.

14. For the pay and rations of the militia in the most exposed and important towns on the seaboard, who were called out two days in the week for discipline and exercise, agreeably to the wishes of the officers of the United States.

15. For the purchase of several large ships, and preparing them to be sunk in the main channel of Boston harbor, in concurrence with the opinion of the naval and military commanders in the service of the United States, for the security of the navigation, towns, and navy yard; which vessels were sold after the peace, and the proceeds credited to the United States.

The preceding specification offers to view, sir, the principal heads of charges incurred and paid by the State for the general defence and security during the late war which at present occur to us. But we will omit at this time to burden you with voluminous documents in their support, as we understand the judgment with regard to them is to rest on principles and not on details, and to be determined by the authority given to the existing laws of the United States, the usage under them, and the opinion of the Executive. The vouchers in support of the claim shall be promptly furnished as soon as we can ascertain what may be wanted, and can procure them from Massachusetts; but as we came unprepared for the exhibit, under the form that has been prescribed, and are unwilling longer to delay this note for the receipt of further documents, we ask leave to be considered as reserving to the State, or its agents, the right hereafter to extend, alter, or amend it, as a fuller development of the circumstances of the several items of the account, or the evidence in their support, may require.

Under this illustration of the claim, we have now the honor to request you would be pleased to inform us whether the expenses which have arisen under the heads before enumerated, and which have been paid by the State, will be admitted to an examination at the War Department; and if the whole should not be so admitted, what part may be considered by the Executive as entitled to payment on the proof, hereafter to be produced, being satisfactorily established.

We will only extend the present letter by making known our readiness and desire to afford any further personal or other explanation on the subject to which it relates whenever you may have the goodness to inform us it would be acceptable to you to receive it; and we also avail ourselves of the occasion to express the due sense we entertain of the urbanity and courtesy we have individually experienced, both from the State and War Departments, in the intercourse we have had with them on the business committed to our charge.

Requesting from you, sir, the favor of an answer as soon as the importance of the subject and your other various avocations will permit, we have the honor to be, with sentiments of great consideration, your respectful and obedient servants,

JAMES LLOYD.  
WM. H. SUMNER.

Hon. GEO. GRAHAM, *Acting Secretary of War.*

B.

DEPARTMENT OF WAR, *February 9, 1817.*

GENTLEMEN: Your communication of the 3d instant, in relation to the claim of the State of Massachusetts for the reimbursement of expense incurred and for supplies furnished for the service of its militia during the late war, has received the consideration due to it.

As it appears that, with one exception, the militia on whose account the expenses were incurred were called out and kept in service by the State authorities independently of the authority of the United States, and were withheld from the command of the officers of the United States placed by the President within the military district of which Massachusetts formed a part, with authority to call for and take militia into the service of the United States, the claim with which you have been charged is excluded from the recognition of the executive authority of the United States by the principles explained in the answer of the Secretary of War to the communication of the governor of Massachusetts of September 7, 1814, copies of which are herewith enclosed. Those principles have been kept in view by the Executive of the United States in all cases where expenses incurred by a State on account of militia services have been assumed.

It follows from these observations that no part of the claim presented by you in behalf of the State of Massachusetts can be assumed by the Executive, except for such expenses as were incurred "for the payment and supplies of the militia who were detached and ordered into the service of the United States,

from the time they were mustered in their several companies until they arrived at their places of rendezvous, and for the rations and supplies furnished them after they were received into the service of the United States, none having been provided for them at the time."

I have the honor to be, &c.,

GEO. GRAHAM.

MESSRS. JAMES LLOYD and WM. H. SUMNER.

C.

COMMITTEE CHAMBER, *January 7, 1815.*

SIR: The Committee of the Senate on Military Affairs, having observed that differences exist between the authorities of the United States and of some of the individual States, respecting the relative command of the officers of the regular army and of the militia, when called to act together in certain cases, has instructed me to ask for such information upon that subject as may be in the possession of your department, and to inquire whether, in your judgment, some legislative provision might not be adopted which would tend to heal such differences, to prevent the recurrence of others from the same cause, and to facilitate the operations of your department in that respect.

Be pleased, sir, to accept the assurances of my high consideration, &c.

WM. B. GILES, *Chairman.*

HON. JAMES MONROE, *Secretary for the Department of State.*

DEPARTMENT OF WAR, *February 11, 1815.*

SIR: I have had the honor to receive your letter of the 7th ultimo, stating that the military committee of the Senate had observed that difficulties had arisen between the authorities of the United States and some of the individual States respecting the relative command of the officers of the regular army and of the militia when called to act together, and were desirous of such information on the subject as this department might possess, and of its opinion whether some legislative provisions might not be adopted which would tend to heal such differences, to prevent the recurrence of the like for the same causes, and to facilitate the operations of the department in other respects.

My late indisposition will, I trust, explain satisfactorily to the committee the cause of the delay of my answer, which I have much regretted.

In complying with the request of the committee, it has appeared to me advisable to communicate all the documents in this department relating to the objects of its inquiry. By a detailed view of the several measures which have been adopted by the President since the war, for the defence of the country, in the discharge of the duties imposed on him by the Constitution and laws of the United States, of the objections to those measures by the executives of some of the States, and of the correspondence between this department, and the military authorities acting under it, with the executives of such States, the committee will see the grounds of the differences which have attracted attention, and be enabled to judge how far any legislative interposition may be useful or proper.

The paper A contains a copy of the letters of the Secretary of War to the governors of several States, detailing their respective quotas of militia under the acts of Congress.

B is a copy of a report of the Secretary of War to the military committees of the Senate and House of Representatives, bearing date on the 21st day of December, 1812, communicating a division of the United States into military districts, then contemplated by the Department of War, with the reasons for it; which division, with certain modifications, was afterwards adopted. This report treats on some subjects not immediately within the scope of the call of the committee; yet treating in all its parts on the important subject of defence, and thereby intimately connected with the object of the call, I have thought that a view of the whole paper at this time would not be unacceptable.

C is a copy of the answers of the governors of several of the States to the Department of War, on the requisitions made for parts of their quotas of militia under the several acts of Congress, and of the correspondence which passed between them and the Department of War, and the commanders of the military districts acting under it, within which those States were.

D is a copy of the correspondence between the governor of New Jersey and the Department of War, relating to the appointment of the governor of New York to the command of the military district No. 3; a copy of this correspondence is presented, to communicate to the committee every circumstance that has occurred relating to the command of the militia in the service of the United States.

It appears by these documents that the governors of Massachusetts, Connecticut, and Rhode Island, have objected to the requisitions made on their several States for parts of their respective quotas of militia, on the following grounds: 1st. That the President has no power to make requisition for any portion of militia for either of the purposes specified by the Constitution, unless the executive of the State, on whose militia such call is made, admits that the case alleged exists, and approves the call. 2d. That when the militia of a State should be called into the service of the United States, no officer of the regular army has a right to command, or other person not an officer of the militia, except the President of the United States in person. These being the only difficulties which have arisen between the Executive of the United States and the executives of any of the individual States, relative to the command of the militia, known to this department, are, it is presumed, those respecting which the committee has asked information.

By these documents it is also shown that certain portions of the militia were called out by the executives of these States, and a part of them put into the service of the United States. These doctrines were, nevertheless, adhered to. I do not go into a detail on these points, deeming it unnecessary, as all the facts will be found in the documents.

Respecting, as I do, and always have done, the rights of the individual States, and believing that the preservation of those rights, in their full extent, according to a just construction of the principles of our

Constitution, is necessary to the existence of our Union and of free government in these States, I take a deep interest in every question which involves such high considerations. I have no hesitation, however, in declaring it as my opinion that the construction given to the Constitution by the executives of these States is repugnant to its principles, and of dangerous tendency.

By the Constitution, Congress has power to provide for calling forth the militia to execute the laws of the Union, suppress insurrection, and repel invasions; to provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States; reserving to the States, respectively, the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

The President is likewise made commander-in-chief of the army and navy of the United States, and of the militia of the several States when called into the actual service of the United States.

The power which is thus given to Congress by the people of the United States, to provide for calling forth the militia for purposes specified in the Constitution, is unconditional. It is a complete power, vested in the national government, extending to all these purposes. If it was dependent on the assent of the executives of the individual States it might be frustrated. The character of the government would undergo an entire and radical change. The State executives might deny that the case had occurred which justified the call, and withhold the militia from the service of the general government.

It was obviously the intention of the framers of the Constitution that these powers, vested in the general government, should be independent of the States' authorities, and adequate to the ends proposed. Terms more comprehensive than those which have been used cannot well be conceived. Congress shall have power to provide for calling forth the militia to execute the laws of the Union. What laws? All laws which may be constitutionally made. Whatever laws are adopted for that purpose, within the just scope of that power, which do not violate the restraints provided in favor of the great fundamental principles of liberty, are constitutional, and ought to be obeyed. They have a right to provide for calling forth the militia to suppress insurrections. This right is also unqualified. It extends to every case of insurrection against the legitimate authority of the United States. It may be said that the government may abuse its authority, and force the people into insurrection in defence of their rights. I do not think that this is a probable danger under our system, or that it is the mode of redress, even if such abuse should be practiced, which a free people, jealous of their rights, ought to resort to. The right which they have to change their representatives in the legislative and executive branches of the government at short intervals, and thereby the whole system of measures, if they should think proper, is an ample security against the abuse, and a remedy for it, if it should ever occur. Congress have also a right to provide for calling forth the militia to repel invasions. This right, by fair construction, is, in my judgment, an exemplification of the power over the militia to enable the government to prosecute the war with effect, and not the limitation of it, by strict construction, to the special case of a descent of the enemy on any particular part of our territory. War exists, the enemy is powerful, his preparations are extensive, we may expect his attacks in many quarters. Shall we remain inactive spectators of the dangers which surround us, without making the arrangements suggested by an ordinary instinctive foresight for our defence? A regular army, in sufficient extent, may not exist. The militia is the principal resource. Is it possible that a free people would thus intentionally trammel a government which they had created for the purpose of sustaining them in their just rank, and in the enjoyment of all their rights as a nation, against the encroachments of other powers, more especially after they had experienced that reliance could not be placed on the States individually, and that, without a general government thus endowed, their best interests would be sacrificed, and even their independence insecure? A necessary consequence of so complete and absolute a restraint on the power of the general government over the militia would be to force the United States to resort to standing armies for all national purposes. A policy so fraught with mischief, and so absurd, ought not to be imputed to a free people in this enlightened age. It ought not, more especially, to be imputed to the good people of these States. Such a construction of the Constitution is, in my opinion, repugnant to their highest interests, to the unequivocal intention of its framers, and to the just and obvious import of the instrument itself.

The construction given to the Constitution by the Executive is sanctioned by legislative authority, by the practice of the government, and by the assent and acquiescence of all the States, since the adoption of the Constitution to the period of the late unhappy differences, respecting which the committee has desired to be informed. By the law of 1795 the President is authorized to call forth the militia for the purposes mentioned in the Constitution by a direct application to the militia officers, without any communication with, or reference to, the executives of the individual States; and penalties are prescribed for carrying the law into effect, should resort to them be necessary. It merits attention, in regard to the question under consideration, that the power given to the President to call forth the militia is not made dependent by this law on the fact of an invasion having actually occurred, but takes effect in case of imminent danger of it. In the year 1795 the President of the United States, on the certificate of a judge of the Supreme Court that an insurrection existed in the western parts of Pennsylvania, called out the militia of several of the States, including the militia of Pennsylvania, to suppress it; which call was obeyed. In this instance, the assent of the governor of Pennsylvania to the existence of an insurrection was not asked. General Washington, who then held the office of Chief Magistrate, relied exclusively on the powers of the general government for the purpose. The opinion of the same Chief Magistrate, of the power of the general government over the militia, was also made known by another distinguished act of his administration. By report of General Knox, the then Secretary of War, to Congress, this doctrine is maintained to the utmost extent, and exemplifications of it insisted on, which prove that, from the nature of our population, the militia was the force which, in his judgment, ought principally to be relied on for all national purposes.

In the instances under consideration, powers are granted to Congress for specified purposes in distinct terms. A right to carry powers thus granted into effect follows of course. The government to whom they are granted must judge of the means necessary for the purpose, subject to the checks provided by the system. It adopts a measure authorized, supervises its execution, and sees the impediments to it. It has a right to amend the law to carry the power into effect. If any doubt existed on this point in any case on general principles, and I see cause for none, it cannot in the present, a power having been explicitly granted to Congress by the Constitution to pass all necessary and proper laws for carrying into execution the powers which are vested in the general government.

Equally unfounded, in my opinion, is the other objection of the executives of the States above mentioned, that when the militia of a State are called into the service of the United States no officer of

the regular army, or other person not a militia officer, except the President of the United States in person, has a right to command them.

When the militia are called into the service of the United States all State authority over them ceases. They constitute a part of the national force, for the time, as essentially as do the troops of the regular army. Like the regular troops, they are paid by the nation. Like them, their operations are directed by the same government.

The circumstance that the officers of the militia are appointed by and trained under the authority of the State, individually; (which must, however, be done according to the discipline prescribed by Congress,) produces no effect on the great character of our political institutions, or on the character and duties of the militia when called into the service of the United States.

That the President alone has a right to command the militia in person, when called into the service of the United States, and that no officer of the regular army can take the command in his absence, is a construction for which I can see nothing in the Constitution to afford the slightest pretext. Is it inferred from the circumstance that he is appointed commander-in-chief of the militia when called into the service of the United States? The same clause appoints him commander-in-chief of the land and naval forces of the United States. In construction of law he is commander-in-chief, though not present. His presence is not contemplated in either case. Equally necessary is it in the one as in the other. What has been the practice under the Constitution, commencing with the first Chief Magistrate and pursuing it, under his successors, to the present time? Has any President ever commanded in person either the land and naval forces or the militia? Is it not known that the power to do it is vested in him principally for the purpose of giving him the control over military and naval operations, being a necessary attribute of the executive branch of the government? That, though he might take the command of all the forces under it, no President has ever done it? That a provision for the actual command is an object of legislative regulation, and the selection of the person to whom committed of the executive discretion?

Under the commander all the officers, of every species and corps, regular and militia, acting together, take rank with common consent and perfect harmony, according to an article of war, sanctioned by the Constitution. By this article the officers of the regular army take rank of those of the militia of the same grade without regard to the dates of their commissions; and officers of any and every grade of the militia take rank of all officers of inferior grade of the regular army. When these troops serve together they constitute but one national force. They are governed by the same articles of war. The details for detachment, guard, or any other service, are made from them equally. They are, in truth, blended together as much as are the troops of the regular army when acting by themselves only.

The idea advanced by the honorable judges of Massachusetts, that where the regular troops and militia act together, and are commanded by the President in person, who withdraws, there can be no chief commander, of right, of either species of force, over the whole, but that the regulars and militia, as implied, may even be considered as allied forces, is a consequence of the construction for which they contend. It pushes the doctrine of State rights further than I have ever known it to be carried in any other instance. It is only in the case of powers who are completely independent of each other, and who maintain armies and prosecute war against a common enemy for objects equally distinct and independent, that this doctrine can apply. It does not apply to the case of one independent power who takes into its service the troops of another, for then the command is always at the disposal of the power making war and employing such troops, whether regular or militia. How much less does it apply to the case under consideration, where there is but one power and one government, and the troops, whether regular or militia, though distinguished by shades of character, constitute but one people, and are, in fact, countrymen, friends, and brethren.

The President is in himself no bond of union in that respect. He holds his station as commander-in-chief of the land and naval forces, and of the militia, under a Constitution which binds us together as one people, for that and many other important purposes. His absence would not dissolve the bond. It would revive discordant, latent claims, or become a signal for disorganization.

The judicious selection of the chief commander for any expedition or important station is an object of high interest to the nation. Success often depends on it. The right to do this appears to me to have been explicitly vested in the President, by the authority given to Congress to provide for calling forth the militia, for organizing, arming, disciplining, and governing them, when employed in the service of the United States, and by the powers vested in him as Chief Executive of the United States. The rights of that highly respectable and virtuous body of our fellow-citizens are, I am persuaded, completely secured, when the militia officers commanding corps are retained in their command, a major general over his division, a brigadier over his brigade, a colonel over his regiment, and the inferior officers in their respective stations. These rights are not injured or affected by the exercise of the right of the Chief Magistrate; a right incident to the executive power, equally applicable to every species of force, and of high importance to the public to appoint a commander over them of the regular army, when employed in the service of the United States, if he should deem it expedient. The rights of the militia officers, and those of the general government, are strictly compatible with each other. There is no collision between them. To displace militia officers for the employment of regulars, or to multiply commands of a separate character, especially of small bodies, for that purpose would be improper. In dividing the United States into military districts, and placing a general of the regular army in command in each, with such portion of the regular force, artillery and infantry, as could be spared from other service, it was the object of the President to afford the best protection to every part of the Union that circumstances would admit of, with the least burden which might be possible to the people. These commanders were specially charged with the defence of their respective districts. It was enjoined on them to watch the movements of the enemy, to communicate to the government, and to execute its orders in summoning to the field, on menace of invasion, such portions of the quotas of the militia of each State, within their respective districts, as had been provided for by act of Congress, and detailed by this department, as were thought necessary.

When this arrangement was entered into, it will be observed that there were no menaces of immediate invasion, and few militia in the field. It was intended as a measure of precaution, to guard against possible but, as was hoped and presumed, distant dangers. The Executive then had no alternative between that arrangement and any other. The militia officers of rank afforded none, they were at home; for the Executive has no power, under existing laws to call them into the field without a command of men suited to their rank; and even when thus called forth, their term of service must expire with that of the men whom they command. These facts show that nothing was more remote from the intentions of the government than to disregard the just claims of our fellow-citizens of the militia. They show also how difficult it is to provide, by

any arrangement which can be adopted, for a general and permanent defence of our cities and seaboard, without employing officers who are always in service in the principal commands at least for the purpose.

It is admitted that, by the increased pressure of the war, in consequence of which much larger bodies of militia have been called into service, and with them many general officers of experience and merit, these difficulties have proportionably diminished. Of these officers several have been already advanced to distinguished commands with great satisfaction to their fellow-citizens, and advantage to their country. The committee may be assured that opportunities of this kind, regarding the obligation of a just responsibility, will be seized by the Executive with pleasure.

How far these differences may be healed, or the recurrence of the like in future be prevented by legislative provisions, the committee, on a full view of these documents, and on a due consideration of the whole subject, will be able to decide. It is proper, however, to remark that the division of the country into military districts, so far as relates to that special object, requires no legislative sanction, if, indeed, it admits of one. The definition of boundary was intended for the purpose of prescribing a limit to the civil duties, if they may be so called, rather than the military, of the commander of each district; rather to the period preceding an invasion, with a view to the necessary preparatory measures for repelling it, than after it should take place. An invasion by a large force would probably require the concentration of all our troops along the sea-coast who might be brought to act in it; in such an event all limitations of boundary to the several commanders would cease, the march of the enemy would regulate that of our armies, who would from every quarter be directed against them.

I have the honor to be, &c.,

JAMES MONROE.

---

A.

*Copy of a letter from William Eustis, Secretary of War, to the governors of States, dated*

WAR DEPARTMENT, *April 5, 1812.*

I am instructed by the President of the United States to call upon the executives of the different States to take effectual measures to organize, arm, and equip, according to law, and hold in readiness to march at a moment's warning, their respective proportions of one hundred thousand militia, officers included, by virtue of an act of Congress, passed the 10th instant, entitled "An act to authorize a detachment from the militia of the United States."

This, therefore, is to require your excellency to take effectual measures for having ——— of the militia of ——— (being her quota) detached and duly organized in companies, battalions, regiments, brigades, and divisions, within the shortest periods that circumstances will permit, and as nearly as possible in the following proportions of artillery, cavalry, and infantry, viz: one-twentieth part of artillery, one-twentieth part of cavalry, and the residue infantry.

There will, however, be no objection on the part of the President of the United States to the admission of a portion of riflemen, duly organized into distinct corps, and not exceeding one-tenth part of the whole quota of the States, respectively. Each corps should be properly armed and equipped for actual service.

When the detachment and organization shall have been effected, the respective corps will be exercised under the officers set over them, but will not remain embodied, or be considered as in actual service, until, by subsequent orders, they shall be directed to take the field.

Your excellency will please to direct that correct muster-rolls and inspection returns be made of the several corps, and that copies thereof be transmitted to this department as early as possible.

---

*Copy of a letter from William Eustis, esq., Secretary of War, to the governor of Massachusetts, dated*

WAR DEPARTMENT, *June 12, 1812.*

SIR: I am directed by the President to request your excellency to order into the service of the United States, on the requisition of Major General Dearborn, such part of the quota of the militia of Massachusetts, detached conformably to the act of 10th April, 1812, as he may deem necessary for the defence of the sea-coast.

---

*Copy of a letter from William Eustis, Secretary of War, to his excellency Caleb Strong, governor of Massachusetts, dated July 21, 1813.*

SIR: By information received from Major General Dearborn it appears that a detachment from the militia of Massachusetts for the defence of the maritime frontier, required by him under the authority of the President, by virtue of the act of the 10th of April, 1812, have not been marched to the several stations assigned them.

Inasmuch as longer delay may be followed with distress to a certain portion of our fellow-citizens, and with injurious consequences to our country, I am commanded by the President to inform your excellency that this arrangement of the militia was preparatory to the march of the regular troops to the northern frontier. The exigencies of the service have required, and orders have accordingly been given to Major General Dearborn, to move the regular troops to that frontier, leaving a sufficient number to man the guns in the garrisons on the seaboard. The execution of this order increases, as your excellency cannot fail to observe, the necessity of hastening the detached militia to their several posts, as assigned

by General Dearborn; in which case they will, of course, be considered in the actual service and pay of the United States.

The danger of invasion which existed at the time of issuing the order of the President increases, and I am especially directed by the President to urge this consideration to your excellency, as requiring the necessary order to be given for the immediate march of the several detachments specified by General Dearborn to their respective posts.

---

*Circular letter from John Armstrong, Secretary of War, to the governors of the respective States, dated July 4, 1814.*

SIR: The late pacification in Europe offers to the enemy a large disposable force, both naval and military, and with it the means of giving to the war here a character of new and increased activity and extent.

Without knowing with certainty that such will be its application, and still less that any particular point or points will become objects of attack, the President has deemed it advisable, as a measure of precaution, to strengthen ourselves on the line of the Atlantic, and (as the principle means of doing this will be found in the militia) to invite the executives of certain States to organize and hold in readiness for immediate service a corps of ninety-three thousand five hundred men, under the laws of the 28th of February, 1795, and 18th of April, 1814.

The enclosed detail will show your excellency what, under this requisition, will be the quota of \_\_\_\_\_ As far as volunteer uniform companies can be found they will be preferred.

The expediency of regarding (as well in the designating of the militia as of their places of rendezvous) the points, the importance or exposure of which will be most likely to attract the views of the enemy, need but be suggested.

A report of the organization of your quota, when completed, and its place or places of rendezvous, will be acceptable.

I have the honor to be, &c.

---

C.

Boston, August 5, 1812.

SIR: I received your letter of the 21st of July, when at Northampton, and the next day came to Boston: The people of this State appear to be under no apprehension of an invasion. Several towns, indeed, on the sea-coast, soon after the declaration of war, applied to the governor and council for arms and ammunition, similar to the articles of that kind which had been delivered to them by the State in the course of the last war, and, in some instances, they were supplied accordingly. But they expressed no desire that any part of the militia should be called out for their defence; and, in some cases, we were assured such a measure would be disagreeable to them.

You observe, in your last letter, that the danger of invasion which existed at the time of issuing the orders of the President increases. It would be difficult to infer, from this expression, that, in your opinion, danger is now very considerable, as the President's order must have been issued before war was declared, your former letter being dated the 12th of June, and General Dearborn's, who was then in Boston, on the 22d of that month; besides, it can hardly be supposed that, if this State had been in great danger of invasion, the troops would have been called from hence to carry on offensive operations in a distant province; however, as it was understood that the governor of Nova Scotia had, by proclamations, forbid any incursions or depredations upon our territories, and as an opinion generally prevailed that the governor had no authority to call the militia into actual service, unless one of the exigencies contemplated by the Constitution exists, I thought it expedient to call the council together, and, having laid before them your letter and those I had received from General Dearborn, I requested their advice on the subject of them.

The council advised "that they were unable, from a view of the Constitution of the United States, and the letters aforesaid, to perceive that any exigency exists which can render it advisable to comply with the said requisition; but, as upon important questions of law, and upon solemn occasions, the governor and council have authority to require the opinion of the justices of the supreme judicial court, it is advisable to request the opinion of the Supreme Court upon the following questions, viz:

"1. Whether the commanders-in-chief of the militia of the several States have a right to determine whether any of the exigencies contemplated by the Constitution of the United States exist, so as to require them to place the militia, or any part of it, in the service of the United States at the request of the President, to be commanded by him pursuant to acts of Congress."

"2. Whether, when either of the exigencies exists authorizing the employing the militia in the service of the United States, the militia thus employed can be lawfully commanded by any officer but of the militia, except by the President of the United States."

I enclose a copy of the answers given by the judges to these questions.

Since the council were called, a person deputed by the towns of Eastport and Robbinston, on our eastern boundary, at Passamaquoddy, applied to me, representing that they had no apprehensions of an invasion by an authorized British force, but that there were many lawless people on the borders, from whom they were in danger of predatory incursions; and requesting that they might be furnished with some arms and ammunition, and that three companies of militia might be called out for their protection. The council advised that they should be supplied with such arms and ammunition as were necessary for their present defence, which has been ordered. They also advised me to call into the service of the United States three companies of the detached militia, for the purpose above mentioned. I have this day issued an order for calling out three companies of the detached militia, to be marched forthwith to Passamaquoddy,

and to be commanded by a major; two of the companies will be stationed at Eastport, and one company at Robbinston, until the President shall otherwise direct

I have no intention officially to interfere in the measures of the general government, but if the President was fully acquainted with the situation of this State, I think he would have no wish to call our militia into service in the manner proposed by General Dearborn.

It is well known that the enemy will find it difficult to spare troops sufficient for the defence of their own territory, and predatory incursions are not likely to take place in this State; for, at every point except Passamaquoddy, which can present an object to those incursions, the people are too numerous to be attacked by such parties as generally engage in expeditions of that kind.

General Dearborn proposed that the detached militia should be stationed at only a few of the ports and places on the east; from the rest a part of their militia were to be called away. This circumstance would increase their danger; it would invite the aggressions of the enemy, and diminish their power of resistance.

The whole coast of Cape Cod is exposed as much as any part of the State to depredations; part of the militia must, according to this detaching order, be marched from their homes, and yet no place in the old colony of Plymouth is assigned to be the rendezvous of any of the detached militia. Every harbor or port within the State has a compact settlement, and generally the country around the harbor is populous. The places contemplated in General Dearborn's specifications as the rendezvous of the detached militia, excepting in one or two instances, contain more of the militia than the portion of the militia assigned to them. The militia are well organized, and would, undoubtedly, prefer to defend their fire-sides, in company with their friends, under their own officers, rather than to be marched to some distant place, while strangers might be introduced to take their places at home.

In Boston the militia is well disciplined, and could be mustered in an hour, upon any signal of an approaching enemy; and in six hours the neighboring towns would pour in a greater force than an invading enemy will bring against it.

The same remark applies to Salem, Marblehead, and Newburyport, places whose harbors render an invasion next to impossible. In all of them there are, in addition to the common militia, independent corps of infantry and artillery, well disciplined and equipped, and ready, both in disposition and means, to repair to any place where invasion may be threatened, and able to repel it, except it should be made by a fleet of heavy ships, against which nothing, perhaps, would prove any defence until the enemy should land, when the entire militia would be prepared to meet them.

Kennebunk is unassailable by anything but boats, which the numerous armed population is competent to resist. Portland has a militia and independent corps, sufficiently numerous for its defence; and the same is the case with Wiscasset and Castine.

Against predatory incursions the militia of each place would be able to defend their property, and in a very short time they would be aided, if necessary, by the militia of the surrounding country. In case of a more serious invasion, whole brigades or divisions could be collected seasonably for defence. Indeed, considering the state of the militia in this Commonwealth, I think there can be no doubt that detaching a part of it, and distributing it into small portions, will tend to impair the defensive power.

I have thus freely expressed to you my own sentiments, and so far as I have heard they are the sentiments of the best informed men. I am fully disposed to afford all the aid to the measures of the national government which the Constitution requires of me, but I presume it will not be expected or desired that I shall fail in the duty which I owe to the people of this State, who have confided their interests to my care.

I am, sir, with respect, your most obedient and humble servant,

CALEB STRONG.

Hon. WILLIAM EUSTIS, *Secretary of War.*

*To his excellency the Governor and the honorable the Council of the Commonwealth of Massachusetts:*

The undersigned, justices of the supreme judicial court, have considered the questions proposed by your excellency and honors for their opinion.

By the constitution of this State the authority of commanding the militia of the Commonwealth is vested exclusively in the governor, who has all the powers incident to the office of commander-in-chief, and is to exercise them personally, or by subordinate officers under his command, agreeably to the rules and regulations of the Constitution and the laws of the land.

While the governor of the Commonwealth remained in the exercise of these powers the federal Constitution was ratified, by which was vested in the Congress a power to provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions, and to provide for governing such part of them as may be employed in the service of the United States, reserving to the States, respectively, the appointment of the officers.

The federal Constitution further provides that the President shall be commander-in-chief of the army of the United States, and of the militia of the several States when called into the actual service of the United States.

On the construction of the federal and State Constitutions must depend the answers to the several questions proposed. As the militia of the several States may be employed in the service of the United States for the three specific purposes of executing the laws of the Union, of suppressing insurrections, and of repelling invasions, the opinion of the judges is requested, whether the commanders-in-chief of the militia of the several States have a right to determine whether any of the exigencies aforesaid exist, so as to require them to place the militia, or any part of it, in the service of the United States, at the request of the President, to be commanded by him pursuant to acts of Congress.

It is the opinion of the undersigned that this right is vested in the commanders-in-chief of the militia of the several States.

The federal Constitution provides that whenever either of those exigencies exists the militia may be employed, pursuant to some act of Congress, in the service of the United States; but no power is given, either to the President or to Congress, to determine that either of the said exigencies do in fact exist. As this power is not delegated to the United States by the federal Constitution, nor prohibited by it to the

States, it is reserved to the States, respectively; and from the nature of the power, it must be exercised by those with whom the States have, respectively, intrusted the chief command of the militia.

It is the duty of these commanders to execute this important trust, agreeably to the laws of their several States, respectively, without reference to the laws or officers of the United States, in all cases, except those specially provided in the federal Constitution. They must, therefore, determine whether either of the special cases exists, obliging them to relinquish the execution of this trust, and to render themselves and the militia subject to the command of the President. A different construction, giving to Congress the right to determine when these special cases exist, authorizing them to call forth the whole of the militia, and taking them from the commanders-in-chief of the several States, and subjecting them to the command of the President, would place all the militia, in effect, at the will of Congress, and produce a military consolidation of the States, without any constitutional remedy against the intentions of the people when ratifying the Constitution. Indeed, since passing the act of Congress of February 28, 1795, chapter 101, vesting in the President the power of calling forth the militia when the exigencies mentioned in the Constitution shall exist, if the President has the power of determining when those exigencies exist, the militia in the several States is, in effect, at his command, and subject to his control.

No inconvenience can reasonably be presumed to result from the construction which vests in the commanders-in-chief of the militia in the several States the right of determining when the exigencies exist obliging them to place the militia in the service of the United States. These exigencies are of such a nature that the existence of them can be easily ascertained by, or made known to, the commanders-in-chief of the militia; and, when ascertained, the public interest will produce prompt obedience to the acts of Congress.

Another question proposed to the consideration of the judges is, whether, when either of the exigencies exists, authorizing the employing of the militia in the service of the United States, the militia thus employed can be lawfully commanded by any officer but of the militia, except by the President of the United States.

The federal Constitution declares that the President shall be commander-in-chief of the army of the United States. He may, undoubtedly, exercise this command by officers of the army of the United States, by him commissioned according to law. The President is also declared to be the commander-in-chief of the militia of the several States when called into the actual service of the United States. The officers of the militia are to be appointed by the States, and the President may exercise his command of the militia by officers of the militia duly appointed; but we know of no constitutional provision authorizing any officer of the army of the United States to command the militia, or authorizing any officer of the militia to command the army of the United States. The Congress may provide laws for the government of the militia when in actual service; but to extend this power to the placing them under the command of an officer not of the militia, except the President, would render nugatory the provision that the militia are to have officers appointed by the States.

The union of the militia in the actual service of the United States with troops of the United States, so far as to form one army, seems to be a case not provided for or contemplated in the Constitution. It is, therefore, not within our department to determine on whom the command would devolve, on such an emergency, in the absence of the President. Whether one officer, either of the militia or of the army of the United States, (to be settled according to military rank,) should command the whole; whether the corps must be commanded by their respective officers, acting in concert as allied powers, or what other expedient should be adopted, are questions to be answered by others.

The undersigned regret that the distance of the other justices of the supreme judicial court renders it impracticable to obtain their opinions seasonably upon the questions submitted.

THEOPHILUS PARSONS.  
SAMUEL SEWALL.  
ISAAC PARKER.

*Extract of a letter from General Dearborn to the Secretary of War, dated*

MILITARY DISTRICT No. 1, *Headquarters, Boston, July 14, 1814.*

SIR: From the exposed and unprotected situation of the military posts in this harbor and the seaboard of this State generally, and the threats and daily depredations of the enemy, I have concluded it my duty to exercise the authority vested in me by the President of the United States by requesting the governor to order out a detachment of artillery and infantry.

A copy of my letter to Governor Strong and of his answer are enclosed.

*Letter from Major General Dearborn, of the United States army, to his excellency Caleb Strong, governor of the State of Massachusetts, dated*

MILITARY DISTRICT No. 1, *Headquarters, Boston, July 8, 1814.*

SIR: The existing state of alarm on the seaboard of this Commonwealth, arising from the daily depredations committed by the enemy on our coast, renders it desirable to afford some additional protection to the citizens generally on the sea-coast, and especially to the principal towns and villages; and by virtue of authority derived from the President of the United States I deem it my duty at this time to request that your excellency will be pleased to give the necessary orders for having detached, as early as circumstances will permit, armed and equipped as required by law, one major of artillery, two captains, eight lieutenants, thirteen sergeants, eleven corporals, six musicians, and two hundred privates; and one lieutenant colonel of infantry, two majors, ten captains, thirty subalterns, one adjutant, one quartermaster, one paymaster, one sergeant major, one quartermaster sergeant, two principal musicians, fifty sergeants, fifty corporals, twenty musicians, and nine hundred privates, to remain in the service of the United States for the term of three months, unless sooner discharged by order of the President of the United States. As it will be necessary to have the artillery and infantry placed at the different posts on

the seaboard of this State, it would be desirable that, as far as practicable, they would be detached from the vicinity of the respective posts. The intended distribution of the detachment will be communicated to the adjutant general of the State, previous to his issuing the necessary orders. The proportion of officers, non-commissioned officers, musicians, and privates, is in conformity with the present regulations of the Department of War, from which I am not authorized to admit of any material deviation.

---

*Copy of a letter from his excellency Caleb Strong, governor of the State of Massachusetts, to General Dearborn, dated*

NORTHAMPTON, July 12, 1814.

SIR: This morning I received your letter of the 8th instant. As you propose to communicate to General Brooks your views concerning the particular destination of the militia to be called out for the defence of the towns on the seacoast of this State I have written to him on the subject.

Your suggestion that the men should be detached as far as may be from the vicinity of their respective posts I think is perfectly proper, and I have no doubt you will be able to make such arrangements with General Brooks as will be satisfactory.

---

*Extract of a letter from General Dearborn to the Secretary of War, dated*

MILITARY DISTRICT No. 1, *Headquarters, Boston, September 5, 1814.*

SIR: Having received such information as is entitled to full credit that the enemy with a formidable naval and land force has arrived in Penobscot bay and taken possession of Castine, and presuming his force, after forming a place of arms at Castine, will, with such reinforcements as he may receive from Halifax, in addition to the naval force now in Boston bay, attempt the destruction of the public ships and other public and private property on the seaboard, I have deemed it necessary to request the governor of this State and New Hampshire to order out for the defence of Boston harbor, Portsmouth, Portland, and that part of the district of Maine between Kennebunk river and Penobscot, five thousand two hundred infantry and five hundred and fifty artillery, for the term of three months, unless sooner discharged.

---

*Extract of a letter from H. Dearborn to the Secretary of War, dated*

MILITARY DISTRICT No. 1, *Headquarters, Boston, October 15, 1814.*

SIR: In obedience to the direction in your letter of the 27th ultimo, on the 2d instant I made a formal requisition on Governor Strong for three hundred militia to guard the prisoners at Pittsfield; and I enclosed to him a copy of your letter for the purpose of showing him the necessity of his compliance. Having waited until yesterday morning without any answer of your excellency, I directed one of my aids to call on the adjutant general of the State to ascertain whether he had received any order for making out the detachment for Pittsfield. The answer was that no direction had been received from the governor to make such detachment.

---

*Copy of a letter from his excellency Caleb Strong, governor of the State of Massachusetts, to the Secretary of War, dated*

BOSTON, September 7, 1814.

The troops of the United States, which at different periods were stationed on the seacoast of this State, have been afterwards ordered to join the army on the western frontiers, so that very few have remained in the State. We have therefore found it necessary, in the course of the last and present year, to call out small bodies of the militia as guards to the towns most exposed. As the danger has increased the number of detached militia has been augmented, and I have now issued the enclosed general order for the protection of Boston and the towns and property in its neighborhood, and shall immediately issue an order of a similar kind for the security of the district of Maine.

A few weeks since, agreeably to the request of General Dearborn, I detached eleven hundred militia for three months for the defence of our seacoast, and placed them under his command as superintendent of this military district; but such objections and inconveniences have arisen from that measure that it cannot now be repeated. The militia called out on this occasion will be placed under the immediate command of the major general of militia.

I will thank you, sir, to consult with the President, and inform me whether the expenses thus necessarily incurred for our protection will be ultimately reimbursed to this State by the general government; and I shall be particularly obliged if you will favor me with an answer as soon as may be, as the legislature of the State will meet on the 5th of the next month.

## GENERAL ORDERS.

COMMONWEALTH OF MASSACHUSETTS, *Headquarters, Boston, September 6, 1814.*

The war between the United States and Great Britain having lately become more destructive, in consequence of violations of our territory, which continue to menace our cities and villages, the shipping in our harbors, and private property on shore, his excellency the commander-in-chief orders the whole of the militia to hold themselves in readiness to march at a moment's warning, with arms, ammunition, and accoutrements, as the laws of the United States and of this State require. Every man must likewise be provided with a good knapsack and blanket. Captains of companies must realize it to be one of their most solemn and imperative duties to see the law respecting arms and equipments efficaciously executed; but the commander-in-chief relies on the concurring aid of all the general and field officers in encouraging the company officers in the discharge of their duty. The major generals and commanding officers of divisions will give the necessary orders for an immediate inspection of their several regiments, by companies. Every instance of deficiency of arms or equipments should be forthwith supplied by the delinquent individual, or by the town to which he may belong, agreeably to the requirements of the militia law.

The officers commanding regiments, battalions, and companies of artillery, will pay special attention at this interesting moment, to the state of their field-pieces, their carriages and tumbrils, and see that everything appertaining to them is in the most perfect order for marching and for action, and particularly that suitable horses are always engaged and ready at any moment to be attached to their pieces, that they may be moved to any point required with celerity. All the companies of artillery now to be called into immediate service, besides the requisite supplies of fixed and other ammunition, will be furnished by the quartermaster general with prolonges and bricoles. The legislature of this State, always proud of its militia, has been particularly liberal in its artillery establishment; and the commander-in-chief promises himself that, emulating the brilliant example of Knox and his heroic associates in the artillery of the revolution, they will be equally distinguished for their discipline as soldiers and for their gallantry in the field.

Under possible events the cavalry of the several divisions may be in requisition. Every motive, therefore, of love of country, of honor and sympathy for their fellow-citizens who may be suffering the perils of war, will prompt them to maintain the most perfect state of preparation, and to move, when called to the scene of action, with all the rapidity of which cavalry is susceptible. The general officers and the field officers of cavalry, as well as the company officers, will direct their attention to the quality of the horses, and suffer no man to be mounted but upon a horse sound and fit for actual service. A few bad horses may occasion irretrievable disaster.

The commander-in-chief, having thus called the attention of all officers and soldiers of the militia to the observance of their several duties at this eventful crisis, the more effectually to meet impending danger, orders that all the flank companies, whether of light infantry, grenadiers, or riflemen, of the first and second brigades of the 1st division; two companies, viz: the one at Andover and the other at Havrehill, of the 2d division; all the companies of the 3d division excepting the two companies in Charlestown; four companies of the 4th division; five companies of the 5th division; eight companies of the 7th division; and two companies of the 9th division, do immediately march to the town of Boston, unless (in the meantime) otherwise directed. Each company will march to its place of destination by itself, without waiting for any other corps.

These companies, when assembled, will be arranged into regiments, or otherwise, as circumstances may dictate, and, with the addition of twelve companies of artillery, will form the elite or advance corps of the Massachusetts militia. The field officers to command the regiments, and a general officer to command the whole, will hereafter be designated in the general orders. The several companies of artillery to be annexed to the advance corps will be furnished by the following divisions, viz: two companies from the first brigade and one company from the second brigade of the 3d division; four companies from the 4th division; one company from the 5th division; and four companies from the 7th division.

Besides the above-mentioned companies, the commander-in-chief orders a detachment of sixteen companies of infantry to be immediately made from the 4th division, properly officered and arranged into two regiments, which will march to Boston without the least unnecessary delay. Major General Mattoon is charged with the arrangement of the regiments. From the 9th division the commander-in-chief orders eight companies of infantry to be detached, properly officered, formed into a regiment, and marched to Boston. Major Generals Mattoon and Whiton will assign field officers for the troops, to be detached from their respective divisions; and the commander-in-chief relies on their experience and zeal to carry this order into the most prompt and energetic effect. As soon as the troops shall commence their march each major general will give notice of it to the adjutant general.

All the troops must be well armed, accoutred, and equipped, and provided with ammunition, provisions, knapsacks, and blankets, as the law requires. The men will be supplied with rations when they arrive at the place of destination, and will receive pay from the time of their being embodied.

The security of the town and harbor of Boston being an object of primary importance, the commander-in-chief, while he wishes to direct the principal energies of the State to the attainment of this end, is solicitous to render the militia of Boston itself as efficient as possible. With this view he orders the infantry of the 3d brigade of the 1st division, commanded by Brigadier General Welles, to be called out by regiments in rotation two days successively, for the purpose of improving their discipline, already respectable, and of enabling them to practice the higher duties of the field.

This order is committed to Brigadier General Welles, whose knowledge in tactics and animated zeal in the service of his country must insure to his exertions the highest effect. The order will be continued in operation until revoked. The flank companies of this brigade will be reserved for other service.

The troops called into actual service by this order will serve three months after they arrive at the ultimate rendezvous, unless sooner discharged.

By his excellency's command:

JOHN BROOKS, *Adjutant General.*

*Copy of a letter from James Monroe, Secretary of War, to his excellency Caleb Strong, governor of Massachusetts, dated September 17, 1814.*

SIR: I have had the honor to receive your excellency's letter of the 7th instant. The attack of the enemy on Baltimore, and probable eventual attack on other places, with the heavy duties incident thereto pressing on this department, have prevented my answering it at an earlier day.

It may be satisfactory to your excellency for me to explain the views and principles on which the government has acted in regard to the defence of our eastern frontier.

It was anticipated, soon after the commencement of the war, that while it lasted every part of the Union, especially the seaboard, would be exposed to some degree of danger, greater or less, according to the spirit with which the war might be waged. It was the duty of the government to make the best provision against that danger which might be practicable, and it was proper that the provision should continue while the cause existed.

The arrangement of the United States into military districts with a certain portion of the regular force, artillery and infantry, under an officer of the regular army of experience and high rank in each district, with power to call for the militia, as circumstances might require, was adopted with a view to afford the best protection to every part that circumstances would admit.

It was presumed that the establishment of a small force of the kind stated, constituting the first elements of an army in each district, to be aided by the militia in case of an emergency, would be adequate to its defence. Such a force of infantry and artillery might repel small predatory parties and form a rallying point for the militia at the more exposed and important stations in case of more formidable invasion. A regular officer of experience stationed in the district, acting under the authority and pursuing the will of the government, might digest plans for its defence, select proper points for works, and superintend the erection of them; call for supplies of ordnance, for tents, and camp equipage; for small arms and other munitions of war; call for the militia and dispose of the whole force. These duties, it was believed, could not be performed with equal advantage by the officers of the militia, who, being called into service for short terms, would not have it in their power, however well qualified they might be in other respects, to digest plans and to preserve that chain of connexion and system in the whole business which seemed indispensable. On great consideration, it was deemed the most eligible that could be adopted under the authority of the United States; indeed, none other occurred that could be placed in competition with it. In this mode the national government acts by its proper organs, over whom it has control, and for whose engagements it is responsible.

The measures which may be adopted by a State government for the defence of a State must be considered as its own measures, and not those of the United States. The expenses attending them are chargeable to the State, and not to the United States.

Your excellency will perceive that a different construction would lead into the most important, and, as is believed, into the most pernicious consequences. If a State could call out the militia, and subject the United States to the expense of supporting them at its pleasure, the national authority would cease as to that important object, and the nation be charged with expenses in the measures producing which the national government had no agency, and over which it could have no control. This, however, though a serious objection to such a construction, is not the most weighty. By taking the defence of the State in its own hands, and out of those of the general government, a policy is introduced on the tendency of which I forbear to comment. I shall remark only that if a close union of the States, and a harmonious co-operation between them and the general government are at any time necessary for the preservation of their independence and of those inestimable liberties which were achieved by the valor and blood of our ancestors, that period may be considered as having arrived.

It follows, from this view of the subject, that if the force which has been put into service by your excellency has been required by Major General Dearborn, or received by him and put under his command, that the expenses attending it will be defrayed by the United States. It follows, likewise, as a necessary consequence, that if this force has been called into service by the authority of the State, independently of Major General Dearborn, and be not placed under him as commander of the district, that the State of Massachusetts is chargeable with the expense, and not the United States. Any claim which the State may have to reimbursement must be judged of hereafter by the competent authority, on a full view of all the circumstances attending it. It is a question which lies beyond the authority of the executive.

Your excellency will perceive that this government has no other alternative than to adhere to a system of defence which was adopted on great consideration, with the best view to the general welfare, or to abandon it, and with it a principle held sacred, thereby shrinking from its duty at a moment of great peril, weakening the guards deemed necessary for the public safety, and opening the door to other consequences not less dangerous.

By these remarks it is not intended to convey the idea that a militia officer of superior grade, regularly called into service, shall not command an officer of the regular army of inferior grade when acting together. No such idea is entertained by the government. The militia are relied on essentially for the defence of the country. In their hands everything is safe. It is the object of the government to impose on them no burdens which it may be possible to avoid; and to protect them in the discharge of their duties, in the enjoyment of all their rights.

The various points which are attacked and menaced by the enemy, especially in this quarter, where they are waging, in considerable force, a predatory and desolating warfare, makes it difficult to provide, immediately, for all the necessary expenditures. Any aid which the State of Massachusetts may afford to the United States to meet those expenditures will be cheerfully received, and applied to the payment and support of the militia of that State in the service of the United States.

It will be proper that the money thus advanced should be deposited in some bank in Boston, that the disbursement of it may be made under the authority of the government of the United States, as in similar cases elsewhere. Credit will be given to the States for such advances, and the amount be considered a loan to the United States.

I have the honor to be, &c.

## No. 1.

*Documents accompanying the communication from James Lloyd and William H. Sumner to the Secretary of War, dated February 3, 1817.*

## GENERAL ORDERS.

COMMONWEALTH OF MASSACHUSETTS, *Headquarters, Boston, July 3, 1812.*

War having been declared by the government of the United States against Great Britain and Ireland, and the dependencies thereof, the commander-in-chief calls upon the militia of Massachusetts duly to notice the solemn and interesting crisis, and exhort them to meet the occasion with constancy and firmness.

When war is commenced no human foresight can discern the time of its termination, or the course of events that must follow in its train. But the path of duty is the path of safety. Providence seldom abandons to ruin those who, to a just reliance on the superintending influence of Heaven, add their own vigilant and strenuous exertions to preserve themselves. At the present moment, therefore, the commander-in-chief earnestly recommends to the officers of every grade a close and persevering attention to the duties resulting from their several stations, particularly that they acquire and maintain a perfect knowledge of the condition of their respective commands, and see, as far as is in their power, that their men are duly armed and equipped; that the time allotted to training be devoted to the instruction of non-commissioned officers and soldiers in the exercise of arms, and in the practice of evolutions, as prescribed in the established regulations; and that the provisions and intentions of the laws being in every respect fulfilled, they may be ready with alacrity and effect to defend their country, their constitutional rights, and those liberties which are not only our birthrights, but which, at the expense of so much blood and treasure, were purchased in the late revolution.

From the docility, from the good sense and patriotism of the non-commissioned officers and soldiers, the commander-in-chief is led to expect a patient submission to the instructions of their officers, prompt obedience to orders, and the practice of all those military and masculine virtues which adorn the soldier and exalt the man.

To all the militia, both officers and soldiers, the commander-in-chief would superadd an earnest exhortation, as they are citizens as well as soldiers, to cultivate a spirit of candor, of friendship, and mutual forbearance, and an ardent love of country, that shall elevate them above all sinister views, and eventually secure to them and their children the blessings of peace, of liberty, and good government.

The commander-in-chief requires that particular attention be paid to the town magazines; that they are fully provided with ammunition, military stores, and utensils, which the law directs; and the brigade quartermasters are required to perform their duty with promptitude and exactness.

In such divisions as have not completed the detachment of ten thousand men called for by the general orders of the 25th day of April last, the major generals or commanding officers of those divisions are enjoined to attend to that service without delay, and to make and complete the detachments from their respective corps of their several quotas of the said ten thousand men, and to make return of the same as speedily as may be to the adjutant general. The said generals and other officers will take care that the militia so detached are duly provided with the efficient arms and accoutrements necessary for actual service. The militia detached by the orders above alluded to, after they are formed conformably to said orders, will hold themselves in readiness to march on the shortest notice, pursuant to the orders to be given by the commander-in-chief, unless in case of actual invasion or imminent danger thereof, in which case, without waiting for such orders, they will march without delay to the defence of any part or parts of this Commonwealth that shall be so invaded or in imminent danger of invasion; and when in the actual service of the United States will be under the command of the President, agreeably to the Constitution of the United States.

And whereas the quota of ten thousand militia required aforesaid, being to be raised from the several divisions and corps throughout the Commonwealth, cannot be assembled in time to repel a sudden invasion, and to embody them previously and keep them in constant service would be extremely burdensome, and even if assembled would not be adequate to the defence of the numerous points of a coast of several hundred miles in extent, the commander-in-chief further orders and directs that the generals and other officers of the whole militia of the Commonwealth, bearing in mind the possibility of a sudden invasion, hold themselves and the corps of militia under their respective commands in constant readiness to assemble and march to the defence of any part or parts of the Commonwealth, pursuant to the orders to be given by him, but without waiting for such orders in case of actual invasion or such imminent danger thereof as will not admit of delay.

By the general orders above-mentioned, of the 25th of April last, three major generals and six brigadier generals were assigned to command in that detachment, without being regularly detailed from the roster. The commander-in-chief therefore orders that the following general officers, being detailed from the roster as the law directs, be appointed to command in said detachment, in lieu of the general officers named in the general orders aforesaid, viz:

*Western division.*—Major General Ebenezer Mattoon, Brigadier General Caleb Burbank, Brigadier General Isaac Maltby.

*Eastern division.*—Major General Henry Sewall, Brigadier General John Blake, Brigadier General David Payson.

*Southern division.*—Major General Joseph B. Varnum, Brigadier General Ebenezer Lathrop, Brigadier General William Hildreth.

By order of the commander-in-chief.

WILLIAM DONNISON, *Adjutant General.*

## No. 2.—GENERAL ORDERS.

COMMONWEALTH OF MASSACHUSETTS, *Headquarters, Boston, September 6, 1814.*

The war between the United States and Great Britain having lately become more destructive, in consequence of violations of our territory by the force of the enemy, which continue to menace our cities

and villages, the shipping in our harbors, and private property on shore, his excellency the commander-in-chief orders the whole of the militia to hold themselves in readiness to march at a moment's warning, with arms, ammunition, and accoutrements, as the laws of the United States and of this State require. Every man must likewise be provided with a good knapsack and blanket. Captains of companies must realize it to be one of their most solemn and imperious duties to see the law respecting arms and equipments efficaciously executed; but the commander-in-chief relies on the concurring aid of all the general and field officers in encouraging the company officers in the discharge of their duty. The major generals and commanding officers of divisions will give the necessary orders for an immediate inspection of their several regiments, by companies. Every instance of deficiency of arms or equipments should be forthwith supplied by the delinquent individual, or by the town to which he may belong, agreeably to the requirements of the militia law.

The officers commanding regiments, battalions, and companies of artillery will pay special attention, at this interesting moment, to the state of their field-pieces, their carriages, and tumbrils, and see that everything appertaining to them is in the most perfect order for marching and for action, and particularly that suitable horses are always engaged and ready at any moment to be attached to their pieces, that they may be moved to any point required with celerity. All the companies of artillery now to be called into immediate service, besides the requisite supplies of fixed and other ammunition, will be furnished by the quartermaster general with prolonges and bricoles. The legislature of this State, always proud of its militia, has been particularly liberal in its artillery establishment, and the commander-in-chief promises himself that, emulating the brilliant example of Knox and his heroic associates in the artillery of the revolution, they will be equally distinguished for their discipline as soldiers and for their gallantry in the field.

Under possible events, the cavalry of the several divisions may be in requisition. Every motive, therefore, of love of country, of honor and sympathy for their fellow-citizens, who may be suffering the perils of war, will prompt them to maintain the most perfect state of preparation, and to move when called to the scene of action with all the rapidity of which cavalry is susceptible. The general officers and the field officers of cavalry, as well as the company officers, will direct their attention to the quality of the horses, and suffer no man to be mounted but upon a horse sound and fit for actual service. A few bad horses may occasion irretrievable disaster.

The commander-in-chief, having thus called the attention of all officers and soldiers of the militia to the observance of their several duties, at this eventful crisis, the more effectually to meet impending danger, orders that all the flank companies, whether of light infantry, grenadiers, or riflemen, of the 1st and 2d brigades of the 1st division, two companies, viz: the one at Andover and the other at Havrehill, of the 2d division; all the companies of the 3d division, excepting the two companies in Charlestown; four companies of the 4th division; five companies of the 5th division; eight companies of the 7th division; and two companies of the 9th division, do immediately march to the town of Boston, unless (in the meantime) otherwise directed. Each company will march to its place of destination by itself without waiting for any other corps.

These companies, when assembled, will be arranged into regiments, or otherwise, as circumstances may dictate; and, with the addition of twelve companies of artillery, will form the elite or advance corps of the Massachusetts militia. The field officers to command the regiments, and a general officer to command the whole, will hereafter be designated in general orders. The several companies of artillery to be annexed to the advance corps will be furnished by the following divisions, viz: two companies from the 1st brigade, and one company from the 2d brigade of the 3d division; four companies from the 4th division; one company from the 5th division; and four companies from the 7th division.

Besides the above-mentioned companies, the commander-in-chief orders a detachment of sixteen companies of infantry to be immediately made from the 4th division, properly officered, and arranged into two regiments, which will march to Boston without the least unnecessary delay. Major General Mattoon is charged with the arrangement of the regiments. From the 9th division, the commander-in-chief orders eight companies of infantry to be detached, properly officered, formed into a regiment, and marched to Boston. Major Generals Mattoon and Whiton will assign field officers for the troops, to be detached from their respective divisions; and the commander-in-chief relies on their experience and zeal to carry this order into the most prompt and energetic effect. As soon as the troops shall commence their march each major general will give notice of it to the adjutant general.

All the troops must be well armed, accoutred, and equipped, and provided with ammunition, provisions, knapsacks and blankets, as the law requires. The men will be supplied with rations when they arrive at the place of destination, and will receive pay from the time of their being embodied.

The security of the town and harbor of Boston being an object of primary importance, the commander-in-chief, while he wishes to direct the principal energies of the State to the attainment of this end, is solicitous to render the militia of Boston itself as efficient as possible. With this view he orders the infantry of the 3d brigade of the 1st division, commanded by Brigadier General Welles, to be called out by regiments, in rotation, two days successively, for the purpose of improving their discipline, already respectable, and of enabling them to practice the higher duties of the field.

This order is committed to Brigadier General Welles, whose knowledge in tactics and animated zeal in the service of his country must insure to his exertions the highest effect. The order will be continued in operation until revoked. The flank companies of this brigade will be reserved for other service.

The troops called into actual service by this order will serve three months after they arrive at their ultimate rendezvous, unless sooner discharged.

By his excellency's command.

JOHN BROOKS, *Adjutant General.*

No. 3.

NAVY YARD, *Charlestown, April 6, 1814.*

DEAR SIR: Your politeness in consenting to receive signals from the navy yard under my command merits my thanks, and may be of the highest importance to this useful establishment, in consequence of which I have the honor to enclose you the code of signals, and avail myself of this opportunity to express

the gratification I received on Sunday last, in witnessing the ready disposition of the adjutant general of the Commonwealth, (General Brooks,) of yourself, and the military under your command, to afford aid in defence of the frigate Constitution, supposed in imminent danger.

The great activity displayed on that occasion proves that an attack cannot be made by the enemy with impunity, even to the out harbors of this part of the country.

I am, dear sir, very respectfully, your obedient servant,

Hon. General WELLES, *Boston.*

WILLIAM BAINBRIDGE.

No. 4.

NAVY YARD, *Charlestown, April 20, 1814.*

DEAR SIR: I have the pleasure to acknowledge the receipt of yours of the 19th instant, enclosing to me a transcript of a brigade order issued to the troops under your command. The arrangement therein made, and the assurances in your letter of the support of three thousand effective men, are truly gratifying to me, and claim my official acknowledgments, to which I beg leave to add my personal thanks for the very handsome manner in which you have attended to my requests, and to offer my best wishes for yourself and the troops under your command.

I have the honor to be, with great esteem, your obedient servant,

Brigadier General WELLES, *Boston.*

WILLIAM BAINBRIDGE.

No. 5.

*Extract of a letter from Governor Strong to General Brooks, dated*

*BOSTON, June 12, 1814.*

DEAR SIR: I have this moment received your letter, enclosing one from Commodore Bainbridge to you, and am fully disposed to do everything in my power to aid his views in defending the town and navy yard and the ships in the harbor so far as my authority by the Constitution warrants; and in the present case I see no difficulty in complying with his or General Cushing's verbal request, which you stated to me yesterday, that a company of militia should be called out to guard the approach by Chelsea to the navy yard, and also that, in case of imminent danger of an attack, a requisite number of the militia be called to Forts Independence and Warren, to be commanded by General Cushing, as he proposed, and to be discharged when the danger ceases.

No. 6.

*Extract of a letter from Adjutant General J. Brooks to Major General William King, dated*

*ADJUTANT GENERAL'S OFFICE, Boston, July 1, 1814.*

SIR: In relation to any posts occupied by the United States troops as forts, I am instructed by the commander-in-chief to observe to you that, should application for aid, in case of danger from the approach of an enemy, be made to you by the officer commanding them, from an authority derived from the President of the United States, you forthwith furnish the number of men required.

It will not be expected, however, that an officer of the militia of superior grade to the United States officer commanding at any such post should be assigned to that service. The idea of two independent commands at one military station is absurd. Among officers of the same grade precedence to the national commission will be expected, but beyond this, I presume, the United States government would never expect a concession.

No. 7.

*Extract of a letter from Governor Strong to General Brooks, dated*

*NORTHAMPTON, July 12, 1814.*

DEAR SIR: I have just received the enclosed letter from General Dearborn, in which you will observe he requests that the necessary orders may be issued for detaching a number of the militia for the defence of the seacoast in this State. It appears to me that the danger which is now apprehended of invasion will justify a call of this kind by the national government, and a compliance with it on my part.

General Dearborn proposes to communicate to you his views concerning the particular destination of the militia that may be detached. His suggestion that they should be taken, as far as may be, from the vicinity of the respective posts I think is perfectly proper. The militia, in that case, will be less burdened, and will feel more responsibility, for young men, at a great distance from their homes, are apt to forget what is due to their own character, and the restraints of a moral kind which regulate their conduct.

As a number of the militia have been lately called out to defend the towns on the coast, perhaps the same men may be designated as a part of the force required by General Dearborn; or, if not, and others are provided to supply their places, those now in service may be dismissed. If you can make such arrangements with General Dearborn as were proposed by General Cushing it will be satisfactory.

## No. 8.

MILITARY DISTRICT No. 1, *Headquarters, Boston, August 12, 1814.*

SIR: The citizens of the town of Duxbury and Cohasset are very desirous of having some small force stationed for the defence of their respective villages and vessels, and it is probable that similar applications will be made from other places on the seacoast. If practicable, it would be very desirable to have such small detachments as may be required in such cases turned out from the immediate vicinity of the several places, respectively, without the formality of troubling his excellency the governor on every such occasion; will you be so obliging as to inform me whether an authority is, or probably may be, vested in yourself, or in any committee of which you are a member, for giving the necessary orders for turning out such small detachments as I have alluded to, say of twenty-five or fifty men, for such places as it may be deemed necessary or expedient to afford such protection to? It is not easy to decide at present, or probably at any one time, the precise number of places that it may be expedient to post such detachments at, or the number of men for each. The movements of the enemy, and his measures from time to time, must, in a considerable degree, determine what shall be proper or necessary to be done on our part; hence the convenience of having small detachments from the militia made in the most prompt and convenient manner.

If neither yourself nor any committee of which you are a member now possess such authority as I have mentioned, would not his excellency the governor probably think it advisable to grant the necessary authority; any communication you may please to make in reply to my observations will confer a favor on your very humble servant,

H. DEARBORN.

Major General JOHN BROOKS, *Adj. Gen. of the State of Mass.*

## No. 9.

BOSTON, *September 6, 1814.*

SIR: Will you permit me to suggest to you the propriety of your proposing to his excellency the expediency of having orders issued for placing the whole of the militia, within twenty or thirty miles on the seashore, on the alert, and in perfect readiness for marching on the shortest notice, and having suitable signals established for giving notice for turning out, and being ready to march.

We ought not, under present circumstances, to neglect any practical measures for adding to our means of defence.

I am, sir, your obedient, humble servant,

H. DEARBORN.

Major General Brooks.

## No. 10.

*Extract of a letter from General Dearborn to Captain Hull, dated*

HEADQUARTERS, *Boston, September 14, 1814.*

I understand that the major generals of the militia have received orders from the governor to turn out any number of their respective divisions that they may deem necessary. I would therefore suggest to you the expediency of calling on Major General Goodwin, of Berwick, for such a number of his division as you may deem necessary, by stating to him the imminent danger that the public and private property in that vicinity is in if the enemy should effect a landing at York or Kittery, and requesting him to afford the aid you may propose, to be posted on or near the seashore, near the most probable places for troops to land, and to throw up on the most suitable sites some temporary breastworks. It is at present very inconvenient for me to leave this place.

## No. 11.

BOSTON, *October 1, 1814.*

SIR: In the month of May last I held a conversation with Brigadier General Cushing, at that time the superintendent of military district No. 1, on the subject of a detachment of militia being called out by your excellency and placed under his command, for the defence of the seacoast, and particularly of the towns and forts in the harbor.

In this conversation he stated to me the incompetency of the United States troops for manning even one of those fortresses, and expressed great solicitude to have such a number of men furnished him by the State as to secure the forts under his care from surprise. The general at the same interview observed that he was fully sensible of the feelings of the militia officers in being placed under the command of the United States officers. But to obviate that difficulty, as far as was in his power, he added that, in case of an attack or alarm, he should immediately repair to one of the forts himself, and that the other fort should be committed to the defence of the militia, which should be subject to the command of no officer of the United States army but himself.

In another conversation with General Cushing, some little time afterwards, the same ideas were expressed.

With entire respect, I have the honor to be, sir, your excellency's most obedient servant,

J. BROOKS.

His Excellency CALSB STRONG.

## No. 12.

BATH, June 27, 1814.

SIR: Your letters under the date of the 23d instant are now before me. No more of the militia have been retained in service than is necessary to guard the various points and narrow passes on our rivers. When we were first alarmed some of the companies were ordered into the forts, which were almost destitute of men, presuming they would be more useful there than in any other situation. But as I had no instructions that would authorize me to place them under the command of any officers of the United States, they were, therefore, when in these forts under the command of their own officers. It is so manifestly improper that in the same fort there should be officers acting independently of each other, that, unless it is the intention of the government of the United States immediately to place the necessary number of men in the forts at Georgetown, Edgcomb, and Damariscotta, the most acceptable service they can render the people on these rivers is to withdraw what troops they have, as interested individuals could do no more voluntarily than there is now done by the United States, and these persons would act at least in concert with the militia. There is now on these rivers more than forty thousand tons of shipping; the owners have commenced moving their vessels up the rivers; when this is effected the number of militia out can be reduced. But the least number that now will satisfy the people is one company for the various passes on the Kennebec, one on the Damariscotta, Bristol, and Boothbay, and one at Wiscasset and on the Sheeps-cut; to the latter place the force will be so much less than is expected, that in my order to General Payson I shall permit him to exercise a discretion to let two companies remain until I obtain an answer to my letter of 24th instant, provided he should think it absolutely necessary.

As there is no other place where there is any number of vessels, so there is no other within my division where I think there is much danger.

General Payson forwarded to me this day a letter from Colonel Foote. Three companies on the first alarm were ordered out by Colonel Foote and discharged, with the exception of forty-five men; I shall direct the discharge of twenty-five more, which I think will leave to that section of country about their proportion. That the people will complain generally in this section of the country that they have not the necessary number of men, I have no doubt; but as the alarms may be frequent and of considerable continuance it is better that there should not be too many on duty at the same time.

I have attended at all the places within my division where any considerable number of troops have been out, for the purpose of discharging as many as it would be prudent to discharge immediately; and in discharging as many as I have done, I have acted in opposition to the advice of all the magistrates and generally a large proportion of my own officers.

I am sensible that the expense of defending our coast must be great; the property exposed is also great at the three places which I have named; the shipping alone is worth more than a million of dollars.

I shall keep the commander-in-chief advised particularly of whatever occurs within the district of my command; also of the number of troops which may be employed. Should they at any time exceed the number required, or should they be too much reduced in the opinion of the commander-in-chief, I shall expect to be immediately advised.

I am, sir, very respectfully, your obedient servant,

WM. KING, Major General 11th Division.

Hon. JOHN BROOKS, Adjutant General, Boston.

## No. 13.

BATH, July 8, 1814.

SIR: I acknowledge with great pleasure the receipt of your letter under date the 5th instant. To defend the people on the seaboard of my division from the depredations of the enemy, and to do this in a way that would be likely to meet the approbation of the commander-in-chief, has been my object; it is, therefore, with great satisfaction I received the information that the measures which I have pursued are approved of by his excellency.

The attacks of the enemy have been so rapid in succession at various points on the seaboard, as well as in the rivers, that almost in every instance the troops were at first alarm ordered out by the captains commanding companies, agreeably to the order of the commander-in-chief of July, 1812.

These troops having been discharged by my orders immediately on the enemy's retiring, and before the fears of the people had subsided, they have endeavored to get up an opinion that every officer acting under the general order of 1812 must be his own judge, not only as to turning out his men, but the time they should continue in service. This course would have relieved me from a great proportion of responsibility—the most unpleasant part of my duty—but the expense to the government would have been so much increased that I had not a moment's hesitancy in deciding in all the cases as they occurred. A word from you on the subject will put an end to these doubts. Since my letter of the 4th the Tenedos has left the harbor of Boothbay, and no other vessel appearing there to take her place, Reed's company has been discharged. Potter's company, detached to do duty as guards on the Sheeps-cut and at Boothbay, has been ordered on that service, and the forty men who took the place of Potter's company on the Sheeps-cut have been discharged.

The enemy having landed at Harpswell and taken some stock from the inhabitants, I have ordered a guard from the company doing duty on this river to that place.

There are now on duty three companies, in addition to the twenty men, each from Colonel Thather's and Colonel Foote's regiments. Considering the extent of coast to be guarded, and that it is indented with navigable bays and rivers, a less number, I think, could not be relied on to do the duty contemplated. As the measures now to be adopted may be of some continuance, an opinion from the commander-in-chief on this occasion will be very satisfactory to me.

I am, sir, respectfully, your obedient servant,

WM. KING, Major General 11th Division.

Hon. JOHN BROOKS, Adjutant General, Boston.

## No. 14.

BELFAST, *September 8, 1814.*

SIR: Since my letter of the 5th instant I proceeded to Wiscasset, learning that the British were fortifying Belfast. I immediately ordered out Colonels Cummings and Thatcher's regiments, and a battalion each from Day and Cutter's regiments, to take up their line of march without delay for this place. When I arrived at Warren, on the 6th, I received information from Belfast that the enemy were leaving that place and had taken the west passage on their way to Camden. Colonel Foote's regiment was out; I ordered Thatcher's to that place, when I left them on the 7th, in the morning, with orders for their discharge as soon as the vessels left Glam Cove, which were there at anchor.

The vessels which left Belfast, with three others from Castine, passed Camden on the 6th, at night, and early on the morning of the 7th, in all ten sail, in sight of the regiments of Thatcher and Foote. Believing that there would not be an attack made upon Camden, and as Cummings's regiment was within a few miles of Belfast, I ordered him to that place, where I met him on the afternoon of the 7th.

I also met at Belfast a regiment commanded by Colonel Ulmer, who requested me, in the absence of the major general of the 10th division, and being also deprived of the services of the general of brigade, (Blake,) to direct the movements of his regiment, which I have consented to until the pleasure of the commander-in-chief shall be made known to me. I shall recommend to the officers commanding regiments within General Blake's brigade a compliance with the general orders of July, 1812, and shall endeavor to get such a force together as will prevent the enemy from taking down the Penobscot the vessels, all of which they consider as prizes of war.

I have sent an express to General Sewall, advising him of the situation of things on the Penobscot, and have named to him that two or three of his regiments, if immediately ordered to the Penobscot, to strike the river at Bangor, would be of great service at the present moment, particularly if commanded by him in person.

I am sensible of the very great responsibility which I take upon myself, in the first place in leaving the district of my local command at a time when an attack may soon be expected, and also in consenting to organize and command troops with whom I am unacquainted, and who are very far from being well equipped.

As no effective movement can be made with the troops now under my command until the arrival of General Sewall, or a reinforcement from his division, I shall avail myself, probably, in two or three days which may elapse, to visit Bath and Wiscasset, to put these places in the very best possible state of defence.

I have the honor to be, sir, very respectfully, your obedient servant,

WM. KING, *Major General 11th Division.*

HON. JOHN BROOKS, *Adjutant General, Boston.*

FORT INDEPENDENCE, *September 25, 1814.*

SIR: Your communication of the 23d has been received and attentively perused. On this and Governor's Island there are a sufficient number of men for manning all the works which are now erected or begun.

The defenceless positions on Governor's Island referred to have been examined some time since, and works are planned for their defence, which I shall lay out on the morrow and cause to be erected.

I shall be very glad to receive assistance from the citizens in labor; and, should it be afforded, it is desirable that each man should bring a spade, shovel, pickaxe, or wheelbarrow. If a party could be sent, of one, two, or three hundred men, on Tuesday, they can be employed to advantage, as it is highly important that the batteries and such works as cover them should be finished as soon as possible. On this island I have laid out, in advance of the southeast bastion, a battery for three mortars, which will be finished within three days. I have likewise laid out a work for the cover of the south battery on Governor's Island, which was commenced yesterday morning; a corner to the west water battery was commenced some days since, and is in great forwardness. I have received 1,500 pikes from the laboratory in Albany, which were sent to the two garrisons by the order of Major General Dearborn, for the defence of the curtains and bastions of the fort, and the parapet of the batteries. All the forts and batteries under my command will, by the morrow or next day, have an ample supply of ordnance stores of every kind.

If it could be effected, it is very desirable that the Boston and Charlestown sea fencibles should be stationed in the batteries to be erected on the east and north sides of Governor's Island every other week alternately, with their cannon and equipments. Two mortars will be placed on Governor's Island, and furnaces are and will be erected for heating shot sufficient to supply all the guns with hot shot which can be brought to bear on ships at the same moment in all the works on the island.

I have directed, and have now making, a new kind of wad for the curtains between Dearborn and Winthrop bastions, which are in rear of the water battery on Fort Independence, and for the hot shot, which will obviate the difficulties you have mentioned.

I have this day written Commodore Bainbridge in relation to the position of the United States ships, and expressed an opinion that if the hulks are immediately sunk, and it shall be found the channel is sufficiently obstructed to prevent the near approach of the ships of the enemy, it is advisable to have the Independence and Constitution moored above them to co-operate with the garrison.

I should like to have a consultation with the committee who have in charge the sinking of the hulks, as to the site.

The signals which have been established to announce the approach of the enemy are three guns, in the day time, from Forts Independence and Warren; and, in the night, three guns from each fort, and a tar barrel lighted on the crown of the counterscarp, opposite the west curtain of Fort Warren.

To discover the approach of the enemy, a guard-boat is sent from this fort every night, near the mouth of the harbor, with rockets as signals. I recommend that the troops which are to reinforce Forts Independence and Warren, on the event of an alarm, be stationed on Dorchester Point, in the old work, which should be repaired. Boats in sufficient number should be stationed there for transporting the troops, which should be sent to the two islands in the following proportions, viz: two-thirds to Governor's Island, and the remainder to Fort Independence. There should be a large proportion of field artillery with case shot,

You may be assured that everything in my power will be done to make a successful defence of the works which I have the honor to command. It gives me great pleasure to learn the determination of the Executive in relation to the absolute necessity of rendering these fortresses impregnable, and you may be assured I shall be happy to co-operate with the military board in such arrangements as may be thought advisable for the protection of the capital of Massachusetts, and the preservation of the honor of our common country.

On the event of an alarm, Major General Dearborn will assume the command of the two forts, and take the immediate command of one, and the other will be assigned to me.

I am, very respectfully, your obedient servant,

H. H. DEARBORN.

TH. H. PERKINS, Esq.

NAVY DEPARTMENT, *April 27, 1814.*

SIR: The proofs of zeal and alacrity to repel meditated attacks of the enemy, evinced by the correspondence enclosed in yours of the 20th,\* are extremely gratifying, and insure the safety of the flourishing town on that seaboard, and naval property which the enemy is so desirous to destroy.

I am, very respectfully,

WM. JONES.

Commodore BAINBRIDGE, *Commanding naval officer, Charlestown, Massachusetts.*

*Report of the select committee of the House of Representatives of the United States to whom was referred a resolution relating to the claim of Massachusetts for expenditures of their militia for services during the late war, made March 10, 1818.*

The select committee to whom was referred the resolution relating to the claims of the State of Massachusetts for expenditures of their militia for services during the late war, respectfully report:

That the claims of the State of Massachusetts are for the reimbursement of expenditures made by her for the militia employed in the defence of the country during the late war, and for incidental expenses. A portion of her claims for moneys advanced for these purposes has been admitted and paid by the Department of War. But the accounts and vouchers for the residue are excluded from an examination by that department under a construction of the laws relative to the subject, adopted by the executive government. At the commencement of the late war the United States divided into military districts, to the command of each of which an officer was assigned. And by the principles established for the admission and settlement of claims for the services of militia, the allowance of such as have not arisen for detachments made upon the requisitions of this officer, and actually received by him and put under his command, is conceived by the executive to "lie beyond its authority." "And any claim," in the language of the late Secretary of War, "which a State may have to reimbursement (for other services of its militia) must be judged of by the competent authority, on a full view of all the circumstances of the case." The claims in question, upon a statement of their general outlines, made by the agents of Massachusetts to the Department of War, are not considered as warranted by a *literal* conformity to the above-mentioned principles, inasmuch as it does not appear that the portion of militia whose services and expenses are the foundation of the demand, were formally received by the commander of the military district, or placed under his actual command. The claimants insist that the causes which prevented the most *literal* compliance with the executive arrangements, in every instance, are susceptible of a clear and satisfactory explanation, and that there was, in fact, a *substantial* conformity to the orders and views of the general government on all occasions, and a zealous co-operation with its officers in the measures of defence, the troops of the State having been, in some instances, yielded to the command of the United States officers, and in *all* placed in a state of readiness to be transferred to their command in season for any emergency.

Congress, then, is the only authority competent to "judge, upon a full view of all the circumstances," of the merits of the claim, or to authorize some department or judicatory to take cognizance of it for the purpose of examination and decision; and it thus becomes necessary to exhibit a general view of such principal facts as may contribute to aid the investigation.

The services for which reimbursement is claimed commenced, with inconsiderable exceptions, in July, 1814, and terminated in the autumn of that year, and transactions prior have no apparent relation to the subject of this claim. Those prior circumstances have reference to a law of the United States passed in April, 1812, and to the orders from the Executive, founded on that law, which, having expired in April, 1814, all orders issued on that basis which were unexecuted of course became obsolete. And from April, 1814, to July following, there appeared to have been in existence no orders or requisitions of the executive government of the United States affecting the militia of Massachusetts.

A brief narration, however, of facts antecedent to that period, accompanied by documents in support of its accuracy, may conduce to a more ready and perfect understanding of the whole subject.

It appears that so early as June, 1812, prior to the declaration of war, the Secretary of War, by order of the President, called upon the executive of Massachusetts to detach, on the requisition of Major General Dearborn, such part of the militia as he might think necessary for the defence of the sea-coast, in consequence of which that officer required a detachment of forty-one companies. An opinion being at this time entertained by the governor of Massachusetts that no danger of invasion existed, and that, under such circumstances, the militia ought not to be placed at the disposal of an officer of the United States, having himself few or no troops under his command, with the advice of his counsel, required the opinion of the judges of the supreme court on those two questions. Their opinion confirmed his con-

\*The correspondence between General Welles, of Boston, and Commodore Bainbridge.

struction of the Constitution, and his reasons for declining a compliance with the requisitions were signified to the Secretary of War by letter, August 5, 1812.

Events proved that no danger of invasion existed at that period, and no detrimental consequence resulted from this collision of opinion between the Executive of the United States and of Massachusetts. The detachment required (though no doubt providently intended) would have caused great inconvenience to the militia and needless expense to the United States, and have impaired instead of strengthening the measures of defending the sea-coast, as parts of the force must have been withdrawn from some districts to protect others, while the whole was exposed, and the forces of the State were in universal readiness to defend their homes and to march upon the shortest notice.

It is alleged by the claimants that the opinions of the executive and of the highest tribunal of the State, formed upon great deliberation and on a solemn occasion, must at least be considered as proceeding from an *honest conviction*, in whatever estimation their correctness may be held. And in confirmation of this position, reliance is placed upon the fact that immediately upon the foregoing requisition, orders were issued by the executive of Massachusetts "for placing the militia in the most effective possible state," and apprising them "that in case of invasion, or imminent danger thereof, they were to march without delay, and when in the actual service of the United States to be placed under the orders of the President thereof." This order was sent, the same day it was issued, to Major General Dearborn, and shortly after this a body of militia, consisting of three companies, was placed in the service of the United States at Eastport, on the frontier, under the orders of General Boyd.—(See note of Messrs. Lloyd and Sumner, of February 3, 1817, to Mr. Graham, in this collection.) These suggestions and facts might be entitled to a fair and deliberate consideration if the doctrines maintained by the State authorities had continued to influence its proceedings at the period to which the present claim relates; at which time, in the view taken by the committee, circumstances had so changed that those opinions, though never formally renounced, do not appear to have furnished the rule of conduct of the government of Massachusetts. If this view should be sanctioned as correct, it will follow, as already intimated, that these preceding constitutional doubts and expositions, and the measures and motives connected with them, may be excluded from this inquiry. On the 4th of July, 1814, (the law of April, 1812, and all orders emanating from it in Massachusetts having become *functi officio*,) a general requisition was issued by the Secretary of War to the State executives, (under the laws of February, 1795, and April 18, 1814,) to hold in readiness 95,000 men, and on the 8th of the same month a requisition was made by General Dearborn upon the executive of Massachusetts for a detachment of 1,100 men. This requisition was *immediately complied with; the men were placed under his actual command, and the claims for their services have not been disputed.*

This is considered by the claimants (and, as the committee conceive, with justice) as constituting a *new epoch* in the relations between the government and State, to which all the posterior measures ought to be referred.

On the 5th of September, 1814, *another requisition* was made by Major General Dearborn for *four thousand six hundred and fifty* men, exclusive of officers. Of these it was his object to station 2,200 for the defence of Boston, 1,100 for Portland, 1,100 for Kennebec, and 250 for York. On the sixth of that month a general order was issued by Governor Strong comprehending preparations more extensive than General Dearborn at that time required. On the seventh of that month the governor writes to the Secretary of War, enclosing him the order, and reminding him that he had lately detached 1,100 men at the request of General Dearborn, but THAT SUCH OBJECTIONS AND INCONVENIENCES had arisen from that measure that it could not then be repeated, and that the militia called out on this occasion would be placed under the command of a major general of the militia. To this communication the letter from the Secretary of War of September 17, 1814, is an answer.

These facts present to view the question principally affecting the claim. Were the objections and inconveniences alluded to by the government of Massachusetts in the last-mentioned letter real or pretended? Did they arise from a disposition to enforce the opinions avowed two years before, or from causes altogether independent of these opinions, and for which that governor was not responsible?

If these difficulties were altogether imaginary, and the fruit of a determination to contravene the authority of the United States over the militia, it would seem to be just that the State should defray its own expenses; but if the constitutional objections formerly relied upon were at the time not only waived, but a sincere desire for co-operation with the government of the United States in the defence of the State was manifested by the adoption of the most effectual measures, and if the deviations from the established arrangements of the national government were both nearly formal and justifiable under the pressure of the emergency, the claim would be relieved from all objections which oppose the reference of it to the proper department for settlement upon equitable principles.

Various considerations and facts connected with the transactions of this period will be found conducive to a just decision on this question. And, in the first place, there seems to be no sufficient reason to infer that the executive government of Massachusetts, having, by its compliance with the requisition of July for 1,100 men, waived the objections formerly urged against placing the force under the command of the United States officers, after more than two years had been afforded for deliberation, should afterward, in the short space of sixty days, *revert to those objections*. Again, on the 17th and 18th of September, 1814, and after Governor Strong had written the foregoing letter to the Secretary of War of the 7th of that month, *another requisition*, for one thousand one hundred and sixty-two men, was made by Major General Dearborn and complied with by the governor, and the men placed at his disposal.

Besides these, the corps of two hundred and fifty men required by Major General Dearborn for the defence of York, and in aid of Commodore Hull, were detached under his orders.

Further, as a considerable portion of the force required was intended for the defence of the district of Maine, an officer was deputed by the governor, with instructions to make arrangements for placing the troops required under the officers of the United States, if the same could be done without exciting discontent and collisions among them, which would have been fatal to the service. For this purpose this officer made the most faithful exertion to reconcile the militia to this measure, and had so far succeeded as to have organized a corps of eleven hundred men to be placed under the command of General Chandler, the officer commanding in that quarter next in rank to General Dearborn, and would probably have completed a similar arrangement for the whole; but while proceeding towards the accomplishment of this object, that officer was ordered upon another service, and thereupon symptoms of discontent and jealousy were manifested by the officers and men, so entirely and violently adverse to the transfer of command from their own officers to those of the United States of subordinate grades, having few or no United

States troops under them, that it was judged inexpedient and dangerous to expose the service to the collisions which were menaced from these sources at a period of great peril and alarm, while the enemy were hovering on the coast.

It is proper also to remark that the militia of Massachusetts had been organized, agreeably to the laws of the United States, into companies of sixty-four privates each. When called into actual service General Dearborn conceived it to be his duty, under the orders he had received, to disregard this regulation and organize the companies anew by consolidating them into companies, at sometimes of ninety privates, and at other times into companies of one hundred privates, and into regiments of ten companies each, dismissing or refusing to pay the supernumerary officers thus occasioned. Thus, too, the militia were transferred from the command of officers of their own election, as provided for by the laws of Massachusetts, to the command of those whom they had not elected. It may easily be conceived that these changes in a system established by law had a tendency to create uneasiness among the troops, and to impair the harmony of action and *esprit du corps* of train bands which had been so long habituated to a different system of drill and tactics, also prescribed by the laws of the United States.

It may be remarked, further, that it appears to have been a point conceded on the part of the executive of Massachusetts when regular forces and militia are united, each having in command officers of equal grade, that the officer of the regular forces would be entitled to the command. But the claimants state that when the requisition in July, 1814, was complied with, the eleven hundred men then placed in the service of the United States were by General Dearborn placed in detachments of from one to two hundred each in the different forts and garrisons along the maritime frontier of Massachusetts; and that wherever they were so stationed an officer of the United States army of equal grade of that of each detachment, although there were few if any regular troops at that time in such garrison, was, nevertheless, assigned to it; thereby superseding the militia commandant in the command of each detachment. This statement your committee, from the circumstances of the times, and from evidence of a general nature before them, are induced to believe to have been substantially correct. And these are some of the more prominent among the reasons which operated in September following to render it hazardous to the service, if not impossible in fact, to subject the militia to the control of the officers of the United States.

It further appears that arrangements for defence were made in a spirit of perfectly apparent harmony; first, between the governor and General Cushing, and afterwards between General Dearborn and the committee of military defence of the State of Massachusetts; that this officer was consulted on all important occasions, and that his plans were adopted, or the proceedings of the committee were by him approved; that his son, a brigadier general in the Massachusetts militia, was placed in a command subject to the orders of his father, and by an understanding between him and the State executive, which gave the latter the effective command of the harbor of Boston; that a portion of those troops not actually placed under his command were held in readiness to be so placed at a moment's warning, in virtue of the same arrangement, and were at the same time stationed in the best possible position for effectual co-operation; that at the request of Commodore Bainbridge three thousand militia were held in readiness by General Welles for the defence of the United States navy yard and ships; and that the Secretary of the Navy approved of the preparations for the protection of the harbor and public property, expressed the most unequivocal approbation and satisfaction in the proofs of "zeal and alacrity" displayed on the occasion; that the people of Boston and the neighboring country turned out almost in mass to work upon the fortifications in aid of the officers and troops of the United States; and that the whole force of the State was upon the alert and in a state of preparation to engage in the defence of the country against invasion.

The objections which subsisted among the militia to being detached under the command of officers of the United States do not appear to have proceeded from hostility to those officers, nor to have been confined to any political party. They arose principally from the belief that a new organization, upon which the commanding officer insisted, would be exceedingly inconvenient, by separating officers from men who had been habituated to mutual confidence, by discharging some of the former as supernumeraries, and by depriving those who remained, in some instances, of their command and their rank.

Upon a deliberate examination of the facts and documents connected with the claim, the committee are led to conclude that the only colorable objection to its allowance is the omission of the governor of Massachusetts to place the militia in all instances under the actual and immediate command of General Dearborn. The governor, however, in retaining them under their own officers does not appear to have been influenced by the constitutional objections by which his measures were actuated at an earlier period and under different circumstances. Inconveniences and objections did exist, for which he was not responsible, but which he manifested a disposition to obviate by a literal compliance with the requisitions of the United States in some instances, and by substituting the best arrangements in his power, when attempts to enforce such a compliance would have been, in his belief, repugnant to sound discretion. As, therefore, the services of the militia were called for by the United States and faithfully performed, and the deviation from an exact conformity to the letter of the executive requisitions in all cases was attributable to causes which were incident to the novelty of the case, and against the recurrence of which provision may be made by law for the more perfect organization of the militia, they therefore report as their opinion that the accounting officer of the War Department be directed to audit and settle the claim of said State upon such terms and in such manner as may embrace the merits of said claim; and they ask leave to report a bill for that purpose.

JONATHAN MASON, *Chairman.*

HEADQUARTERS, *Boston, June 22, 1812.*

Sir: I have received instructions from the President of the United States to call on your excellency for such part of the quota of the militia of Massachusetts, which was detached conformably to the act of Congress of April 10, 1812, as I may deem necessary for the defence of the sea-coast; and I now have the honor of requesting your excellency to order fourteen companies of artillery and twenty-seven companies of infantry into the service of the United States, for the defence of the posts and harbors in this State, and the harbor of Newport, in the State of Rhode Island. The companies are intended for the following posts and harbors in the following proportions: For Passamaquoddy, one company of artillery and four companies of infantry, to be commanded by a major. For Machias, one company of artillery. For Castine

one company of artillery and two companies of infantry, to be commanded by a major. For Damariscotta and Wiscasset, two companies of artillery. For Portland, two companies of artillery and three companies of infantry, to be commanded by a major. For Marblehead, Salem, Cape Ann, and Newburyport, two companies of artillery and two companies of infantry. For Boston, four companies of artillery and eight companies of infantry, with a lieutenant colonel and one major. For the defence of Rhode Island, eight companies of infantry, with a lieutenant colonel and one major. Having received official information that war has been declared by Congress against Great Britain, your excellency will perceive the expediency of giving facility to such measures of defence as the crisis demands; and as the defence of the sea-coast of New England is, by the general government, confided to my direction, I shall, with confidence, rely on all the aid and support that the respective governors of the New England States can afford, and in a special manner on that of the commander-in-chief of the important State of Massachusetts. And I shall at all times receive, with the greatest pleasure and readiness, any advice or information that your excellency may be pleased to communicate.

With respectful consideration, I am, sir, your obedient servant,

His Excellency CALEB STRONG.

H. DEARBORN.

MILITARY DISTRICT No. 1, *Headquarters, Boston, September 5, 1814.*

SIR: The movements and force of the enemy on our eastern coast appearing to require considerable additional defence or force, I have deemed it my duty to request his excellency the governor of this State, as well as the governor of New Hampshire, to order out, from the two States, five thousand two hundred infantry, and five hundred and fifty artillery. From this State the infantry amount to upwards of four thousand two hundred, and four hundred and fifty artillery, exclusive of officers, non-commissioned officers, and musicians, to be organized and to rendezvous as stated in the enclosed detail. To prevent any unnecessary delay, it will be desirable that some of the principal officers should be ordered to the respective rendezvous, as early as may be, to receive and organize the troops as they may arrive, in companies or detachments; it will be necessary that the infantry appear well armed and equipped, and with a suitable supply of ammunition, and that the artillery companies have their field pieces, with their tumbrils and ammunition complete.

I am, sir, with respect, your obedient and humble servant,

Major General JOHN BROOKS.

H. DEARBORN.

*To Major General Alfred Richardson, commanding the militia called out for the defence of the town of Portland.*

The undersigned ask leave to represent that, by general order of the date of the twentieth day of September current, they are given to understand that a detachment of the militia, to the amount of eleven hundred artillery and infantry, is to be made, and placed under the command of Brigadier General Chandler, an officer of the United States, and in the service of the same.

Against this disposition of any part of the militia of this Commonwealth, the undersigned ask leave respectfully to remonstrate; and in doing this, they would request that the course of conduct which they consider it their duty to pursue may not be attributed to any motive dishonorable to the *soldier* or disreputable to the man. The promptness and alacrity with which they have assembled at this place, at the moment when danger was threatening their fellow-citizens of the metropolis, is an assurance that they are ready to defend their country from invasion, and have courage to preserve it unpolluted by any hostile foot. They therefore, in remonstrating against this arrangement, think they have a claim to be heard, and that the reasons which may be offered may be candidly weighed by the major general, and that an ultimate decision may not be made without mature deliberation and reflection.

And first, your remonstrants are opposed, in principle, to the arrangement, inasmuch as they consider it unconstitutional and subversive of the sovereignty of the Commonwealth of Massachusetts.

The Constitution of the United States provides that the President shall be commander-in-chief of the militia of the several States when called into actual service of the United States. But we believe that this command is to be exercised by the officers of the militia appointed by the States, and in this way only.

This construction the undersigned consider as sanctioned by the opinion of the supreme judicial court, delivered to his excellency the governor in August, A. D. 1812.

Having thus shown, in the opinion of your remonstrants, the constitutionality of the contemplated arrangements, the undersigned will be excused for pointing out some of the evils which may result from a different construction. General Chandler is himself a subordinate officer, and can make no pledge which he may not be compelled to violate, or violate obligations paramount to any which he may stipulate, with regard to the station of troops under his command. The undersigned, therefore, consider that, when once under the command of an United States officer, it will not be in the power of any officer in this Commonwealth to prevent their being marched to any post where the President may please to direct. They may be compelled to abandon the defence of those whom they volunteered to protect, and marched from their families to some place more assailable by the enemy, or deemed more important by the President of the United States. The probability that they will be strengthened by the desire manifested to have the militia at the control of the United States officers.

Again, it is a well-known fact that the officers of the United States hold the militia in the most sovereign contempt. They have no regard to their local habits or feelings. By a law of the United States, officers of the United States of the same grade take rank of the militia when incorporated with them. In this way the old and honorable militia officer is liable to be commanded by the stripling, for whom family influence or political motives may have procured a commission. Where have we pledged that the many incumbents of offices in the army of the United States, whom we see in our streets, without

men to command, may not be incorporated with us and our troops, and thus we be reduced to a cipher, and our men in effect given up to the caprice of those who have no sympathy with their situation? Can General Chandler give such a pledge? We think not. He himself may be bound by others orders, whatever may be his disposition.

We are not insensible that the proposed arrangement is intended to save expense to the Commonwealth. But we apprehend the United States are and will be bound by the national compact to pay the expense of our defence, whether the militia is put under the control of the United States officers or are commanded by their own.

If the United States have the injustice to refuse a claim so well founded, we can only say that the objects of the national compact are at an end.

But shall his excellency the governor give up his prerogatives and those of the Commonwealth because the United States are unjust? On principles of economy, then, we cannot agree that the proposed arrangement has any advantage above any other; and should the United States be so unreasonable as to refuse to let the militia defend those posts which are exclusively within their control unless the militia will be put under United States officers, and this, too, when it is acknowledged that the United States have no adequate force to defend those posts, we can only say, it is time they were surrendered into other hands.

The officers of the militia will not conceal the repugnance which they have to bring themselves and having their men exposed in posts from their weakness wholly inadequate to any effectual defence. For these and many other reasons which might be mentioned, the undersigned respectfully remonstrate against the arrangement proposed by general orders of the twentieth day of September, and to give Major General Richardson a clear understanding of the repugnance which they and the troops under their respective commands feel in submitting to be placed under the command of General Chandler or any other officer of the United States; at the same time pledging themselves to be ready for any danger or emergency, while they can be commanded by their own appropriate officers—the men of their choice.

Pelatah Smith, major.	Joseph Colly, lieutenant.	William Benjamin, ensign.
Stephen Blake, captain.	Elijah Hurton, lieutenant.	Domminicus Record, ensign.
Stephen Pratt, lieutenant.	Stephen Berry, captain.	Eben. Tessender, jr., lieutenant.
Ebenezer Rawson, major.	Aaron Ingalls, ensign.	Benjamin Woodman, ensign.
Philip Eastman, captain.	Eber Rice, lieutenant.	Daniel Hall, lieutenant.
Henry Frost, captain.	James Steel, major.	Richard Cook, ensign.
Samuel Robinson, captain.	I. B. Osgood, brigade major.	Asa Mansfield, captain.
Henry Farewell, captain.	Robert Andrew, jr., ensign.	John Smith, lieutenant.
Jonathan Bernis, captain.	John Kilborn, captain.	Samuel True, ensign.
James Charles, captain.	William Morrison, captain.	William Ingalls, lieutenant.

Five majors, ten captains, eight lieutenants, and seven ensigns; total, 30.

PORTLAND, *September 24, 1814.*

HEADQUARTERS, *Boston, September 17, 1814.*

DEAR SIR: In conformity with your note of this date, the following sketch will show the number and grade of the officers for 1,000 infantry and 200 artillery, exclusive of a brigadier general, which I take for granted is to be the one I proposed.

*Infantry.*—2 lieutenant colonels, 2 majors, 10 captains, 30 lieutenants, 10 ensigns, 1 adjutant, 1 quartermaster, 1 paymaster, 1 surgeon, 2 surgeons' mates, 1 sergeant major, 1 quartermaster sergeant, 2 principal musicians, 50 sergeants, 40 corporals, and 20 musicians; total, 174.

*Artillery.*—1 major, 2 captains, 8 lieutenants, 12 sergeants, 12 corporals, and 4 musicians; total, 39.

I am, sir, respectfully, your very humble servant,

H. DEARBORN.

Major General Brooks, *Adjutant General.*

*Extract from the United States militia law, passed May 8, 1792.*

"SEC. 3. *And be it further enacted,* That, within one year after the passing of this act, the militia of the respective States shall be arranged into divisions, brigades, regiments, battalions, and companies, as the legislature of each State shall direct; and each division, brigade, and regiment shall be numbered at the formation thereof, and a record made of such numbers, in the adjutant general's office in the State; and when in the field or in service in the State, each division, brigade, and regiment shall, respectively, take rank according to their numbers, reckoning the first or lowest number highest in rank. That, if the same be convenient, each brigade shall consist of four regiments, each regiment of two battalions, each battalion of five companies, each company of sixty-four privates. That the said militia shall be officered by the respective States as follows: To each division one major general and two aides-de-camp, with the rank of major; to each brigade one brigadier general, with one brigade inspector, to serve also as brigade major, with the rank of a major; to each regiment one lieutenant colonel commandant; and to each battalion one major; to each company one captain, one lieutenant, one ensign, four sergeants, four corporals, one drummer, and one fifer or bugler; that there shall be a regimental staff, to consist of one adjutant and one quartermaster, to rank as lieutenants; one paymaster, one surgeon, one surgeon's mate, one sergeant major, one drum major, and one fife major."

"SEC. 7. *And be it further enacted,* That the rules of discipline approved and established by Congress, in their resolution of the 29th of March, one thousand seven hundred and seventy-nine, shall be the rules of discipline to be observed by the militia throughout the United States, except such deviations from the said rules as may be rendered necessary by the requisitions of this act or by some other unavoidable circumstances. It shall be the duty of the commanding officer at every muster, whether by battalion, regiment, or single company, to cause the militia to be exercised and trained agreeably to the said rules of discipline."

MEDFORD, June 12, 1814.

MY DEAR SIR: Your letter of this date I have just received and laid before his excellency the commander-in-chief, and I have this moment been instructed by him to call out a company of militia to guard the approach to the navy yard by the way of Chelsea; Brigadier General Austin, of Charlestown, is charged with executing that order. The commander-in-chief is fully disposed to do everything in his power to aid you in defending the navy yard and the ships in the harbor which his authority by the Constitution warrants. I shall see you to-morrow, and make some further communications on the subject of defence.

I am, with sentiments of great respect and esteem, my dear sir, your obedient servant,

J. BROOKS.

Commodore WILLIAM BAINBRIDGE.

A true copy. Attest:

E. MATTOON, *Adjutant General.*

18TH CONGRESS.]

No. 276.

[1ST SESSION.]

## ON THE SERVICES AND ACCOUNTS OF COLONEL WILLIAM DUANE, OF THE ARMY.

COMMUNICATED TO THE SENATE MARCH 23, 1824

Mr. JOHNSON, of Kentucky, from the Committee on Military Affairs, to whom was referred the memorial of Colonel William Duane, reported:

That the claims of the petitioner may be divided into classes: 1. Claims for military works. 2. Claims suspended for want of sufficient regular vouchers and want of vouchers supposed to be lost.

The first claim comprehends a system of infantry and a system of cavalry discipline. The claim for the infantry does not appear to be sustained by such evidence as the committee deem necessary; and although the committee entertain no doubt as to the credibility of the memorialist and as to the essential service rendered his country by the publication of his military works, and although his declarations as to the infantry system, and the claim arising from it, are corroborated by some other circumstances, such as his having possession of the copperplates furnished by the War Department, the committee are apprehensive of the consequences which might arise from the admission of such evidence, and therefore they recommend the rejection of this item.

The claim for the cavalry system of discipline, prepared and published by the petitioner, is supported by evidence more definite and absolute, as will appear by the documents herein referred to and made a part of this report, consisting of the affidavit of the petitioner, the letters of Doctor Eustis, General Armstrong, General Parker, and similar documents; and it appears that the book was prepared and offered to the government as early as 1815, and that the same never having been taken off the hands of the petitioner, they were ultimately sacrificed at auction by him, from the necessity of the case, in 1820. One thousand copies seem to have been the number contemplated by the parties, from the best evidence the committee can obtain, and that the selling price per volume was \$3 75; the committee consider it but just to allow the petitioner at the rate of \$3. 75 for one thousand copies, deducting therefrom the amount of sales which he received for them.

In the second class of claims there is only one item which the committee can undertake to settle, the other suspended items amounting to upwards of \$3,000. It is believed that the authority to settle such claims, consistently with justice, is vested in the accounting officers of the proper department, and with them to leave it. The item alluded to consists of a sum of \$500 borrowed by the petitioner from General Bloomfield on the 27th March, 1813, and repaid on the 5th of April following. The whole transaction rests upon the statement of the account of the petitioner himself, where he gives himself debit and credit, producing a balance as to this item, and General Bloomfield never did raise any account against the government for the same; but no notice was taken of the transaction by him in presenting his accounts, yet the credit of \$500 was carried to his account as a credit upon the statement of the account of the petitioner himself, which ought to have been taken altogether, which would have left the transaction as if it had never taken place, for the statement or confession of a party must be taken together or not at all. A document is herewith published to show that the accounting officer expresses that a different course would have been pursued if all the facts had been known at the time. The estate of General Bloomfield is responsible for the \$500, and the petitioner has a right to the credit for the same amount. With this view of the subject the committee ask leave to report a bill, and to refer to documents marked A, B, C, D, E, F, G, H, and I, and request them to be published as a part of this report.

A.

*The United States War Department to William Duane, Dr.*

1810. To preparing and publishing, by directions from the Hon. William Eustis, Secretary of War, communicated through Colonel Whiting, acting adjutant general, the French system of cavalry, with considerable additions, commenced under Secretary Eustis and completed under Secretary Armstrong, 1,000 copies as agreed upon, at \$3 75 the copy, engravings included..... \$3, 750 00

Brought forward..... \$3, 750 00

*Supra, Cr.*

Dec. 17, 1810. By cash received of Secretary Eustis, for particular translations from German system and French for the said work, as per warrant No. 3082 to R. C. Weightman, of this date..... 100 00

3, 650 08

I certify and declare that the work above stated in account is the only cavalry work prepared or proposed by the War Department during the administrations of the Hon. William Eustis and General John Armstrong; that it was commenced by the direction of Secretary Eustis, and that the French copy was furnished by the Secretary in the first instance, and the copy of the plates from which the engravings were made was also furnished by Secretary Eustis; and that I was not at the time in the military service, nor under any obligation to prepare any military work for the public but for adequate compensation, and that such was the understanding and agreement between the War Department and myself.

WM. DUANE.

B.

William Duane, of the city of Philadelphia, deposeth and saith that during the several administrations of the United States War Department of General H. Dearborn, William Eustis, and General John Armstrong, he was directed and authorized to provide and publish various practical treatises on military discipline, for the use of the army and militia of the United States; that among which, in consequence of orders imparted to this deponent by Colonel John Whiting, acting adjutant general, and of several communications, in person and by letter, with Adjutant General Whiting and William Eustis, esquire, Secretary of War, this deponent was induced to undertake and provide a translation from the French cavalry system of 1804, from books furnished by the Secretary of War for that purpose; and that this deponent superadded thereto various useful matters appertaining to the duties of the cavalry not to be found in the French system, but specially intended and adapted to introduce important knowledge and uniformity of principles and knowledge in the public service of the United States; that upon the receipt of orders to print the work, there were presented to this deponent from the War Department two other translations of the French cavalry system, which had been likewise made by order of the department, by two officers of the United States army; and that it was intimated to this deponent that the treatise provided by this deponent was preferred to the other two, and that it was submitted to the entire discretion and judgment of this deponent to adopt any part of either of the other two translations, should he deem it suitable, and to render the work complete; that upon the formation of an agreement for the execution of this work, the principle of charge was determined in this manner: Colonel Whiting having asked this deponent at what price such a work would be sold in London, this deponent answered, that such a work, plates included, would not be sold at less than eight or ten dollars; but that here it might be executed at about half that sum for an edition of one thousand copies, and a less sum if the edition were to be double that number; and that upon forming an estimate of the cost of paper, letter-press, and copperplate printing, engraving, and binding in boards, this deponent stated to Colonel Whiting that he would undertake to provide one thousand copies at three dollars and three quarters per volume, and was thereupon directed to execute the work; and that he did thereupon place the engravings in proper hands for execution, and caused to be executed and printed the engravings, at a very heavy expense, and had made considerable progress in the letter-press printing, when General John Armstrong succeeded to the War Department, to whom this deponent made report of the actual state of the work, and was by him directed to proceed to its completion, subject to certain alterations, which were made according to his orders, and that it was so completed; but that owing to causes not pertinent to this deposition, the work was not taken off the hands of this deponent, nor was he ever paid more than \$100 on account of the said work; and that in consequence of the work being left on his hands and the return of peace, and of other causes, the demand for this and other military works ceased; and this deponent having been unable to obtain remuneration, was under the necessity of disposing of the work, at sundry times, by auction, in the best manner that he was able; but that the prices obtained amounted to a great sacrifice, being short of the prime cost of the paper and of the cost of the engraving, expended on the work by this deponent; and further this deponent saith not.

WM. DUANE.

WASHINGTON CITY, D. C., May 6, 1822.

Personally appeared before the subscriber, one of the justices of the peace in and for the county of Washington, in the District of Columbia, William Duane, and made oath that the facts stated in the above affidavit are substantially true. Given under my hand and seal the day and year above.

C. WHARTON.

C.

PHILADELPHIA, August 27, 1819.

Sir: At the close of the war I presented to the Acting Secretary, (James Monroe, esq.,) four several accounts for services rendered under orders and engagements of the government. One only of those accounts was paid; a second was retained, duly certified by the accountant of the department, and remains unpaid; the other two accounts were deferred, the Acting Secretary informing me personally that the funds of the department were too low to admit of it. In the subsequent fluctuations and changes of the

heads of the department, my applications were unheeded, owing, as I apprehended, to causes foreign from the public concerns, and my property has been ever since retained. The pressure of general distress compels me to make one more effort; and all I seek is the simple reimbursement of my expenditures made in perfect reliance on the good faith of the government, and in doing which I rendered many services for which I claim no reward.

That there should be no obstacle through deficiency of information, I shall narrate, as concisely as practicable, the origin and the nature of my claims. Long before the war I was consulted, among others, on the state of the discipline of the military force. The then commander-in-chief, and the late General (then Colonel) Pike, were consulted, and recommended the introduction and adoption of the French infantry system. There was no translation, at that period, in the English language, and I was encouraged to provide one, which I did, and submitted it to the War department. The affair of the Chesapeake being apparently settled by negotiation, the apprehension of war subsided, and the publication of the infantry system was suspended. The Secretary of War suggested to me that, beside the consideration of expense, it would be preferable to provide an elementary book, of the size and price of the tract of Steuben, which, by being within the purchase of every man, would operate at the same time as an antidote to the inveterate prejudices which prevailed, and at the same time lay the foundation for the modern improvements in military discipline. Upon this intimation I prepared the *Hand Book* for infantry, which was approved, and which, in fact, laid the foundation of that discipline which (though attempts were made to deprive me of the credit of it) has superseded ancient errors, and now prevails throughout the Union, however modified or varied, to conceal the source from whence the instruction was derived. For this book I was to be remunerated by the purchase of a given number of copies; and this was the bill for which I received payment, after delivering the books, on the order of the acting Secretary (Monroe.)

Besides these works, I prepared, at the desire of the War Department, a *Hand Book* for riflemen; this book was, also, the basis of all the discipline in those corps; and the President was pleased, upon its publication, to appoint me a lieutenant colonel in the first rifle regiment. My acceptance was a sacrifice on my part, but, content with the honor, I never sought any other remuneration, nor do I now, for this work.

Seeing, by my intercourse in the army, the utter want of information among the officers, not only on the common history but the duties of officers, I suggested, by a special memoir to the War Department, the necessity of providing a general and uniform system for every corps of the army, the organization of the staff, and of the topographical department; the functions of the two latter were then unknown but by vague report. Their importance was not yet understood, and I undertook, upon a promise of indemnification against loss, to provide a portable work, which should serve as a guide for the officer of every arm, and give correct ideas on the various details of duty. In three months I prepared and published the *Military Library*, in two volumes; and to this work the army, and many of our generals, owe all the knowledge which they possessed, for there was no book of the kind in the English language. The utility of this work procured it a rapid demand, and, as I suffered no loss, I was content with the good which had been rendered, and sought no compensation from the government, nor do I now, for this work.

To prepare these works I was under the necessity of providing myself with more than two hundred volumes, principally French, and in the progress of the other works I undertook, with the promise of indemnity, to prepare a Military Dictionary; which I accomplished at the expense of \$4,000, independent of labor.

I shall take the liberty of enclosing some memoirs, presented at various times to the department, of which were printed only a few copies, to be placed in the hands of intelligent men; besides several others which were never printed. A reference to the military institutions of the times will shew the resemblance of features.

The last works were the completion of the infantry system, in conformity with the original design of a consonant and uniform military system, and the cavalry system. For the infantry system the department furnished me with the copper-plates. But it has remained on my hands to this hour, and exhibits the evidence of that injustice which is so frequently, in republics, the result of envy and jealousy of men who display any unusual activity, or render difficult services.

The cavalry system originated in the same way: the Secretary of War (Dr. Eustis) sent to me at Philadelphia, to consult me on the best system for the United States service. I recommended that which I deemed best, the new French system; and a copy of it was sent to me from the department, with a request to provide a translation, which was soon done. In about three months after my copy had been in the War Department it was returned to me, with the flattering information that it was preferred to two other translations, made contemporaneously, by two other officers in the army, and requesting me to publish my version; and should I find anything in either of the other translations to consult my own judgment in the adoption. The engravings were placed in the hands of six different engravers; and the text was about half printed when General Armstrong entered the department. I immediately apprised him of the service I was engaged in, which he approved, but directed me to omit the latter part of the work, which contained the evolutions of large squadrons of cavalry; although the plates were all ready, I obeyed, and finished the work; which remains also on my hands to this moment.

This is the history of my literary services for the War Department; my claim does not extend beyond the indemnity for the two last books, the complete *infantry* and *cavalry* systems, of which I prepared 1,000 copies of each, and seek no more than to be paid for those works, and to give the books for their value; and such a number of the Dictionary as equity and justice entitle me to expect.

In addressing you in your present station I do not think it proper to say anything of the movements which were made to injure me after rendering such essential service, and to do which there was not then one man in the country who united the necessary qualifications with the habits of composition that were indispensable.

I shall enclose an account in form, and shall look to the good faith of the government for the payment. I think it fit to state that I was deterred from presenting other claims by the indifference which I had experienced in relation to these.

I am, sir, with respect, your obedient servant,

WM. DUANE.

J. C. CALHOUN, Esq., *Secretary of War.*

## D.

ROXBURY, July 8, 1820.

SIR: In reply to your letter of the 30th of June, I recollect the request or engagement with Colonel Duane to cause to be translated from the French a system of cavalry exercise, and I also recollect signing a warrant for one or two hundred dollars as a compensation therefor. Whether this was a full compensation I am not certain; my impression is that it was, but at this distance of time I cannot decide with certainty. The issuing of the warrant, which must be on record, by designating the time may, by a recurrence to the books in the office, open information on the subject. I do not believe there was a written contract; my impression is that on a verbal statement from Colonel Duane of the expense of the translation, which appeared reasonable, he was verbally authorized to procure it. I also recollect delivering to Colonel Duane two volumes of French cavalry exercise, loaned to me by Colonel Fenwick, whether prior or subsequent to the translation before mentioned I am not certain. The return of the two volumes, with the translation, mentioned in my letter of December 13, 1810, must, I think, have been the return of two volumes from Captain Walbach and not those from Colonel Fenwick. By General Parker I have been requested to state whether I recollect authorizing the late Colonel Whiting, then acting adjutant general, to have prepared and published in Philadelphia a system of cavalry exercise. To this I answered that I did not recollect giving an order or instruction to that effect, although such may have been actually the case. It is, however, just to add that if Colonel Whiting entered into an engagement for that purpose, I should have been perfectly satisfied that he had acted on proper authority, and from his well known character should have felt myself in duty bound to fulfil his engagement.

There is a circumstance relative to the claims in question which appeared to me necessary to a just decision and which you will pardon me for mentioning, that is—to ascertain, as far as may be practicable, what part of the works or books charged to the department have been delivered to the department, or to the army, and whether any, and if any, what part, has been sold on account of the publisher. This suggestion I request may be considered confidential.

With great respect, I have the honor to be, sir, your obedient servant,

W. EUSTIS.

HON. J. C. CALHOUN, *Secretary of War.*

## E.

WASHINGTON, April 27, 1822.

I am now satisfied that Colonel Duane was authorized and requested by me, in the year 1810, to translate a system of cavalry exercise from a French treatise, with plates, for the use of the army and militia, and that it was my intention to have the work published on account of the United States.

W. EUSTIS.

## F.

*Extract of a letter from General J. Armstrong to the adjutant and inspector general, dated Red Hook, January 27, 1820.*

"I received your letter of the 25th instant, in relation to Colonel Duane's claim. I believe the basis of the claim to be good; that is, I well remember that when I took the direction of the War Department I understood that he (Duane) was engaged in translating or preparing for the press the French system of cavalry exercise, &c., at the request or under the direction of my predecessor, and I also recollect that, so believing, I urged him to finish it, with the exception of the evolutions prescribed for large bodies of cavalry, which I did not think useful or necessary to our petty establishment of a single regiment"

## G.

Having been called on by Colonel William Duane, in January, 1820, for a certificate in relation to his preparing and publishing a translation of the French System of Cavalry Exercise, &c., by order of the War Department, when I was chief clerk in that department, I referred him to the records, and to Mr. Eustis and Mr. Armstrong, under whom the work was commenced and finished. I, however, wrote to both those gentlemen. I believe the first answered me that he had no very distinct recollections on the subject. (On examining my files I find I cannot refer to his letter.) I enclosed the following extract of General Armstrong's letter to Colonel Duane, in hopes he might have his accounts settled without further reference to me, viz:

*Extract of a letter from General J. Armstrong, late Secretary of War, to the adjutant and inspector general, dated Red Hook, January 27, 1820.*

"DEAR SIR: I received your letter of the 20th instant in relation to Colonel Duane's claims. I believe the basis of the claim to be good; that is, I well remember that when I took the direction of the War Department I understood that he (Duane) was engaged in translating and preparing for the press the

French System of Cavalry Exercise, &c., at the request, or under the direction, of my predecessor; and also recollect that, so believing, I urged him to finish it, with the exception of the evolutions prescribed for large bodies of cavalry, which I did not think useful or necessary to our petty establishment of a single regiment."

Being now again called on by Colonel Duane I feel it to be a duty to state that, among the other arrangements preparatory to the most efficient prosecution of the late war, a system of cavalry exercise was deemed important, and several officers were required by the War Department to give their attention to that subject. Their partial reports and translations were transmitted to Colonel Duane, who did not then belong to the army, for his revisal and publication, in the fall or winter of 1812-'13. The uncertainty, in my mind, under which of the secretaries this arrangement was made, induced me to write to both to enable me to answer more satisfactorily, in case I should be again called on.

General Armstrong's statement convinces me that the work was commenced before he took the direction of the War Department; and I can only account for the expense not being paid by the recollection that the fondness for change of everything relating to the service, at that time, having made the book *unfashionable* before it was introduced into the army. It is proper further to state that I believe the copper plates\* for the engravings were furnished by the War Department, and should, in my opinion, be taken into consideration in adjusting the claim of Colonel Duane.

D. PARKER.

WASHINGTON, April 25, 1822.

---

H.

WASHINGTON, April 3, 1822.

DEAR SIR: I have conversed with Dr. Eustis. He cannot recollect the number of copies which was ordered of the cavalry system which Colonel Duane was directed to print, &c., by your predecessors. Doctor Eustis thinks one thousand copies are not an unreasonable number to suppose was ordered, as he had a view to the militia as well as to the regular army. I presume the affidavit of Colonel Duane will be sufficient, with the corroborating proof.

Your obedient servant,

R. M. JOHNSON.

HON. SECRETARY OF WAR.

---

I.

TREASURY DEPARTMENT, *Third Auditor's Office*, May 14, 1822.

SIR: I have received your letter of the 13th instant. In relation to the sum of \$500, charged to your account by the late accountant, in January, 1814, I cannot take the same view that you do of it. Your acknowledgment of that sum having been received by you from General Bloomfield, in your account current of moneys received and expended, was considered tantamount to a receipt, and you were charged and that officer credited, and his accounts settled accordingly. A credit could not be given to you for the same amount chargeable to him, though included in the same statement, unless you produced his receipt, or a like acknowledgment had been made in his account; neither of which was the fact. His not having charged you with the money could not be considered conclusive that he was not entitled to a credit. In another case, where the amount was much larger, say \$3,000, that sum was passed to your credit, on the acknowledgment, in his account current, of the late Colonel Gibson as having been received from you, when you had neither rendered his receipt therefor or charged the amount in any statement rendered to this office. I do not hesitate, however, to state that if the transaction of the \$500, with all its present lights, had been before the accountant, the debit would, doubtless, have been suspended until explanation could have been had to the satisfaction of both parties. You must be sensible that, without an acknowledgment now from General Bloomfield, I should not be authorized to admit the amount to your credit by charging the amount to his account.

As you are doubtful of the accuracy of the statement of your accounts, and it is the object of the department to afford every information in elucidation of the official statement, I will cause a particular statement of every item of debit and credit which has been passed to be furnished to you, by comparing of which with your own statements you may be enabled to satisfy yourself of their correctness.

I return, as you request, the rejected vouchers last rendered by you, with a statement of the causes of their disallowance, and accounting for the difference between the balance you acknowledge and that stated in the official statement as passed by the Comptroller. The memorandum which accompanied these documents is considered in the light of a statement, the original of which, therefore, is filed with your account. I send you, however, a copy, which, I presume, will answer your purposes.

Respectfully, &c.,

PETER HAGNER, *Auditor*.

WILLIAM DUANE, Esq., *Late Colonel United States Army, Washington City.*

\* The copper-plates furnished by the War Department were those of the infantry system, as was explained in my letter to the War Department of February 22, 1819; and my account and letter of August 27, 1819.

18TH CONGRESS.]

No. 277.

[1st Session.]

## RELATIVE TO A SITE FOR A NATIONAL ARMORY ON THE WESTERN WATERS.

COMMUNICATED TO THE SENATE APRIL 16, 1824.

*To the House of Representatives:*

I transmit to the House of Representatives a report of the Secretary of War, containing the information requested by a resolution of the House, dated the 25th ultimo, showing the reason why the engineers appointed to examine the most suitable site for a national armory on the western waters have not made their report.

JAMES MONROE.

APRIL 16, 1824.

DEPARTMENT OF WAR, *April 10, 1824.*

The Secretary of War, to whom was referred the resolution of the House of Representatives, of the 25th ultimo, requesting the President of the United States "to lay before the House, as soon as convenient, any information he may have in his possession, showing the reason why the engineers appointed 'to examine the most suitable site for a national armory on the western waters' have not made their report," has the honor to transmit herewith a copy of a report of the Ordnance Department, which contains the information required.

J. C. CALHOUN.

The PRESIDENT of the *United States.*ORDNANCE OFFICE, *April 10, 1824.*

SIR: In compliance with your instructions, I transmitted a copy of the resolution of the House of Representatives, of the 25th ultimo, to the commissioners appointed to examine suitable sites for an armory on the western waters; and have the honor to communicate, herewith, their report, in answer to said resolution.

I have the honor to be, &amp;c.,

GEO BOMFORD, *Lieutenant Colonel, on Ordnance duty.*Hon. J. C. CALHOUN, *Secretary of War.*PITTSBURG, *Pennsylvania, April 3, 1824*

SIR: I have this day received your letter of the 29th March, enclosing a resolution of the House of Representatives, requesting the President of the United States "to lay before the House any information he may have in his possession, showing the reason why the engineers appointed to examine the most suitable site for a national armory on the western waters have not made their report."

I can only state, in answer, that the magnitude of the task has been beyond our ability to accomplish within the limits of the time prescribed.

In conformity with our instructions, and the requisitions of the act under which we were appointed, we commenced our operations at the earliest day in our power, and were diligently employed in making examination, from the Muscle Shoals of the river Tennessee to the Ohio Pife Falls of the Youghiogony, until late in December last. The returns of the surveyors were delayed from various causes, and were not all received until March. We have been since unremittingly engaged in arranging their details, and making such calculations and estimates as are, in our opinion, essential to a correct understanding of the peculiar and relative advantages of some of the proposed sites; which either possess, or are supposed to possess, the most prominent claims to preference.

I am unable to state, with any degree of precision, the time it will yet require to complete the report. I have hardly any hopes of seeing it finished before the end of the present month; and we can only pledge ourselves for the continuance of the same assiduity and effort with which we have heretofore labored in the performance of the duty confided to us.

I have the honor, &amp;c.,

W. M'REE.

Colonel GEORGE BOMFORD, *Commanding Ordnance Department.*

18TH CONGRESS.]

No. 278.

[1ST SESSION.

## ON THE CLAIM OF MASSACHUSETTS FOR SERVICES RENDERED BY THE MILITIA OF THAT STATE DURING THE WAR OF 1812-15.

COMMUNICATED TO THE SENATE MAY 3, 1824.

The Committee on Military Affairs, to whom was referred the message of the President of the United States "on the claim of Massachusetts, for services rendered by the militia of that State during the late war with Great Britain," report :

That, in considering the subject submitted to their investigation, they have been fully impressed with its intrinsic importance, and its association with events which were once the occasion of much sensibility and excitement. They trust, however, that they have approached the discussion devoid of all prejudice, with an honest desire in doing justice to sustain those great principles of concord and power which are essential to the durability of this Union.

Your committee deem it entirely unnecessary that they should recite all the circumstances comprising a history of this claim, as they are generally known to the nation, and are to be found in an authentic shape in the documents accompanying the President's message. To this source your committee would ask a special reference.

It will be sufficient for present purposes to premise that a large portion of the claim of Massachusetts does not appear to be affected by those constitutional difficulties which have so long, in the consideration of the Executive of the United States, operated as an impediment to its adjustment.

Your committee are unanimously of opinion that the services rendered by the militia of Massachusetts, which may be considered beyond all exception, and as entitled to remuneration, are comprised in a class of cases, in which, by the spontaneous impulse of the militia, with or without the sanction of the executive of that State, or with or without a requisition on the part of the officer of the United States commanding the department, they assembled, either for the purpose of repelling actual invasion, or under a well-founded apprehension of invasion. It is, in fact, on this principle, and this principle only, that the claims for militia services of the various States have been audited and allowed at the Department of War. Services of this description, patriotically performed, ought not to be prejudiced by a pre-existing difference of opinion between the executive of Massachusetts and the commanding officer of the United States forces as to an abstract construction of the Constitution, when such a difference of opinion appears to have had no sort of effect on the extent and character of the services afforded. But, on the other hand, your committee are equally unanimous in declaring that, in all cases where the acts of the executive of Massachusetts gave a direction to the services of the militia of that State, in opposition to the views of the general government, the claim for such services is altogether inadmissible, for these the government of Massachusetts may be considered to have incurred an ulterior and exclusive responsibility to her own people.

Your committee waive the discussion of the question, how far the renunciation, on the part of the executive and legislature of the State of Massachusetts, of the constitutional principles on which the then governor of that State acted in the early stages of the war, is necessary to the allowance of any portion of the claims of the State, for the services in question. These claims, when first presented for adjustment, (immediately after the late war,) were considered rather in the mass, than in reference to the particular items of which they are composed. In fact, at that early period, the principles on which the claims for militia services ought to be audited and allowed were but imperfectly fixed. The subsequent presentation and examination of the claims of the several States for such services have shed much light on this subject, and have afforded many advantages at the present moment in examining those of Massachusetts. Distinctions, important to the elucidation of principles, and to the ascertainment of justice have been taken and sustained, which might naturally have been overlooked at the commencement of the discussion.

Your committee, however, cannot abstain from indulging in one remark, that if the fact of the government of Massachusetts having declined, for some years subsequent to the late war, to renounce the unconstitutional doctrines of her then executive, as developed in the opinions of the judges of her supreme judicial court, can be supposed ever to have borne upon that portion of the claim which the committee have recommended for payment, the recent disavowal of her present executive and legislature furnishes at least a belief that all danger of a future collision between the general government and the States, in reference to the authority of the former over the militia of the latter, has been permanently removed. In this light the committee cannot but regard the renunciation as honorable to the chief magistrate and legislature of Massachusetts, and as highly useful in fixing the true interpretation of the Constitution on an interesting and important point. This disavowal, in consonance, as it is affirmed, with the sentiment of the great mass of the people of Massachusetts, is indeed a reiteration of the language which was expressed by the senate of that State, as early as October, 1812, at the moment when the unfortunate irritation between the national and State functionaries was most exasperated, and when remuneration for these services formed neither a subject of calculation or desire.

Your committee, in conclusion, recommend that in all cases where the militia of the State of Massachusetts were called out, in conformity with the desire of an officer of the general government, or to repel actual invasion, or under a well-founded apprehension of invasion, during the late war, the claim of the State for such militia services be allowed, under the usual rules of auditing and allowing similar claims; provided the number of troops so called out were not in undue proportion to the exigency.

Your committee likewise recommend that the claims of Massachusetts for militia services, not comprehended in the above description of cases, be disallowed. And in conformity with the foregoing principles ask leave to report a bill.

18TH CONGRESS.]

No. 279.

[1st Session.]

NAMES OF THE OFFICERS OF THE ARMY BREVETTED, AND COMPENSATION ON ACCOUNT OF SUCH RANK.

COMMUNICATED TO THE SENATE MAY 11, 1824.

To the House of Representatives:

I herewith transmit to the House of Representatives a report of the Secretary of War, containing the information called for by the resolution of March 10, requesting the names of all the officers of the army who have been brevetted, stating their lineal rank and brevet rank, when brevetted, and the amount of money paid to each, and when paid; which report, with the accompanying documents, contain the information desired.

JAMES MONROE.

MAY 12, 1824.

DEPARTMENT OF WAR, May 10, 1824.

The Secretary of War, to whom was referred the resolution of the House of Representatives of the 10th of March last, requesting the President of the United States "to lay before this House the names of all the officers of the army who have been brevetted, stating their lineal rank and brevet rank, when brevetted, and the amount of money paid to each on account of his brevet rank, and when paid," has the honor to transmit herewith a report of the adjutant general, marked A, and statements of the Second and Third Auditors of the Treasury, marked B and C, which contain the information required.

All which is respectfully submitted.

J. C. CALHOUN.

The President of the United States.

A.

Alfred Mordecai .....	None .....	Second lieutenant .....	July 1, 1823.

NOTE.—The officers on the above list, whose lineal and brevet rank is of the same grade, hold brevet commissions of a prior date to that of their lineal or regimental rank.

CHS. J. NOURSE, *Acting Adjutant General.*

ADJUTANT GENERAL'S OFFICE, *March 13, 1824.*

TREASURY DEPARTMENT, *Second Auditor's Office, May 8, 1824.*

SIR: I herewith transmit a statement exhibiting the names of all the officers of the army who have been brevetted, showing their lineal and brevet rank, when brevetted, the amount of money paid to each on account of his brevet rank, and when paid; furnished in obedience to a resolution of Congress of the 10th of March, 1824, as far as can be ascertained from the accounts on file in this office.

It may be proper to state that, as there has been no specific appropriation for the brevet pay of officers, the only way the information required could be obtained was by examining the abstracts and vouchers of all the accounts of paymasters that have been settled in this office, and that of the late accountant of the War Department, since the 8th of May, 1816.

I have the honor to be, very respectfully, your obedient servant,

WILLIAM LEE.

Hon. J. C. CALHOUN, *Secretary of War.*

TREASURY DEPARTMENT, *Third Auditor's Office, April 19, 1824.*

SIR: I have the honor to transmit you herewith a statement of payments and allowances to the officers of the army who have been brevetted, on account of their brevet rank; showing the amount paid or allowed to each, and when paid, as far as the same can be ascertained from the accounts and vouchers in this office; furnished in pursuance of the resolution of the House of Representatives of March 10, 1824, and your letter of the 12th ultimo.

Very respectfully, I am, sir, your obedient servant,

PETER HAGNER, *Auditor.*

Hon. J. C. CALHOUN, *Secretary of War.*

## B.

Statement exhibiting the names of all the officers of the army who have been brevetted, showing their lineal and brevet rank, when brevetted, the amount of money paid to each on account of his brevet rank, and when paid, furnished in obedience to a resolution of Congress of March 10, 1824, as far as can be ascertained from the accounts on file in the office of the Second Auditor of the Treasury.

			17 61

The foregoing statement is predicated upon the list of officers of the army brevetted, as furnished by the Acting Adjutant General; the payments and allowances stated are those which have been settled through this office, in relation to which it may be proper to state that, prior to March 3, 1817, when the office of the Third Auditor was established, all accounts of the army, relating to the peace establishment, were by law settled by the accountant, now Second Auditor, and, consequently, from July 1, 1815, (the time at which it is understood the resolution contemplates this statement to commence,) to March 3, 1817, the statement of the Second Auditor will exhibit the allowances and payments called for by the resolution; after that date the accounts of the Quartermaster's department were, by law, transferred to this office, from which this statement has been prepared.

PETER HAGNER, Auditor.

TREASURY DEPARTMENT, *Third Auditor's Office*, April 19, 1824.

18TH CONGRESS.]

No 280.

[2D SESSION.]

## ON A REORGANIZATION OF THE QUARTERMASTER GENERAL'S DEPARTMENT OF THE ARMY.

COMMUNICATED TO THE SENATE DECEMBER 27, 1824.

The Committee on Military Affairs, to whom was referred a resolution of the House of Representatives instructing it "to inquire into the expediency of providing for the appointment of an additional number of deputy and assistant quartermasters general, in order to secure a more effective responsibility in the disbursement of property in that department," reported:

That the attention of your committee was directed to this subject at the last session not only by the judicious reflections of the Quartermaster General, in his communication to the Secretary of the War Department, but by the imperative instructions of this House, in a resolution of analogous import to the one under which they have now the authority to act.

Your committee beg leave to present for your consideration the information which was at that period collected by a call on the War Department, on which your committee had not time at the last session to report. A recent communication, however, this session with the same department has satisfied them that its views are unchanged as to the necessity of a reorganization of this branch of the staff for the purpose of obtaining more entire accountability in its various disbursements.

Independently of the utility of giving a higher and more permanent efficiency to so essential a department of the army, on the successful administration of which so much of its energy and comfort mainly depend, the change proposed by the bill which your committee have herewith the honor to report is calculated to subserve the purposes of a present economy, the saving resulting from which will very far transcend the expense necessarily incurred in providing for the appointment of an additional number of quartermasters.

Your committee ask leave to refer you to the accompanying communication, in which the policy of a reorganization of the Quartermaster General's department in certain particulars is set forth in a statement which appears to them entirely satisfactory.

DEPARTMENT OF WAR, *February 12, 1824.*

SIR: In reply to your letter of the 29th ultimo, I have the honor to transmit herewith a copy of a report of the Quartermaster General relative to the "expediency of providing by law for an additional number of quartermasters and assistants to be employed in the Quartermaster General's department," with the views of which I entirely concur.

I have the honor to be your obedient servant,

J. C. CALHOUN.

HON. JAMES HAMILTON, JR., *Chairman Military Committee, House of Reps.*QUARTERMASTER GENERAL'S OFFICE, *Washington, February 9, 1824.*

SIR: In my annual report I adverted to the necessity of some further legislative provision to render more perfect the accountability in the Quartermaster's department.

At the reduction of the army, in 1821, all the officers then charged with the preservation and issue of clothing and camp equipage were discharged from the service. Whether this was an oversight or intentional is not important at this time to inquire; but the consequence was, that the purchasing department, in everything except the provision at the principal depot at Philadelphia, was left without officers to perform those duties which the service could not dispense with. As a measure of necessity, the charge, preservation, and issue of those supplies were, by your order, assigned to the Quartermaster's department, which added a third to its duties, while its force had been diminished in more than that ratio. This state of things has been productive of much embarrassment to both branches of service thus united, not because they were insusceptible of union, but from the limited number of officers attached to the department, and the absence of all legal provision.

To the duties of preserving and issuing, already adverted to, it will be recollected that there was assigned to the department in its administrative character the laborious duty of prescribing and enforcing a system of accountability for all supplies derived from the purchasing department.

As the accountability for those supplies extends to the whole army, and as the chief of the department has never been stationed at Washington, where, alone, the administrative duties could be sufficiently performed, there is abundant reason to fear that heavy losses have been sustained by the public for want of a proper system of accountability for the clothing and equipments of the troops. During the late war, as well as previous to it, there may be said to have been no accountability for public property, nor indeed any system by which those who were even disposed to account for whatsoever they had received could be governed in arranging their accounts.

The act fixing the military peace establishment, approved March 16, 1802, provided, it is true, that the pay department, in addition to its other duties, should have the charge of the clothing of the army; but it does not appear that any attempt was ever successfully made to carry into effect the provisions of that act. Indeed, from the organization of the pay department, and the situation of the army, the measure would have been impracticable; those provisions were, therefore, finally repealed, and no effort appears to have been made to enforce accountability for clothing until 1816. In September of that year an attempt

was made to correct the evil by introducing into our service a part of the British clothing system, in which the value of the clothing was added to the monthly or annual pay of the soldier, and he was charged the regulated price for every article issued to him. The pay department was charged with enforcing the new system; but its principles, though plausible in theory, were found in practice like most of those borrowed from foreign services, without regard to the difference of circumstances, to be entirely inapplicable to the state of our army, dispersed, as it was, in small detachments throughout the Union. It was impossible to have a paymaster at each post; the officers of that department were, therefore, necessarily itinerant, and could not in justice be held accountable for property which, from the nature of their situation, it was impossible they could secure from damage or depredation. But even had the system been correct in principle, it was wrong in most of its details; of which a single fact will be sufficient to convince any practical military man, or indeed any other, who shall take the trouble to examine the subject for a moment. When the system was first announced, it provided that no clothing should be furnished except on the certificate or report of an inspector.

Inspections were required to take place at the end of every two months. Now, if, by any accident, a soldier should have lost his cap or coat on the first day of January, neither could have been replaced until the inspection on the last of February. Though that glaring defect was partially remedied in 1817, other defects were uncorrected, in consequence of which the voice of the army was opposed to the system, and it was repealed.

The efforts made during the last two years, under the authority of the regulations of the War Department, issued in July, 1821, (which contain most of the provisions recommended in this report,) have, it is believed, been productive of much improvement. All estimates for clothing for the troops pass through this office, where they are examined, and, if more be required than the circumstances warrant, deductions are made from the estimate. All accounts for clothing also pass through the office; but, though these circumstances are powerful checks upon all persons who receive public property, I feel the want of legal provision to enable me to enforce a system which, to be effectual, should contain authority to mulct delinquents.

It is a fact worthy of notice that, while our statute-books abound with laws relating to *money* accountability, there is scarcely a line in relation to that of *property*. With a view to supply this deficiency, and to obtain for the department an organization better suited to its new and increased duties, I submit a detail of the provisions which I consider indispensably necessary to secure the public interests.

I propose that provision be made by law that the Quartermaster's department, in addition to its own proper duties, receive from the purchasing department, and distribute to the army, all clothing, camp and garrison equipage required for the service; and that it be the duty of the Quartermaster General, under the direction of the Secretary of War, to prescribe and enforce a system of accountability for all clothing and equipage, as well as quartermasters' stores, issued to the army. That every officer of the army who shall have clothing, camp and garrison equipage, or quartermasters' stores, for the use of his command, or for issue to the troops, render to the Quartermaster General, at the expiration of each regular quarter of the year, quarterly returns of such supplies, according to the forms which may be prescribed, accompanied by the requisite vouchers for any issue that shall have been made; which return and vouchers, after due examination by the Quartermaster General, be transmitted for settlement to the proper officer of the Treasury Department.

That it be made the duty of all officers, charged with the issue of clothing or other supplies, carefully to preserve the same from waste or damage; and that, in case of deficiency on final settlement of any article of supply, the value thereof be charged against the delinquent, and deducted from his monthly pay, unless he show to the satisfaction of the Secretary of War, by one or more depositions, setting forth the circumstances of the case, that the deficiency was occasioned by unavoidable accident, or was lost in actual service, without any fault on his part. And, in case of damage, that he be subject to charge for the damage actually sustained, unless he show, in like manner, to the satisfaction of the Secretary of War, that due care and attention were given to the preservation of the supplies, and that the damage did not result from neglect.

That it be the duty of every captain or commanding officer of a company or detachment of the army to open, in a book to be kept for that purpose, an account against each individual of his command, wherein shall be carefully charged all the clothing and equipage issued by him to the said individual; and that, at the expiration of the soldier's term of enlistment, a statement of his clothing account, exhibiting the number and kind of each article received by him, the time when and from whom received, be furnished by the captain or commander of the company or detachment from which the soldier shall be discharged, on which statement the paymaster shall settle, paying the soldier, at the established prices, for any articles authorized by regulations which he may not have received, and deducting from his monthly pay the value of any articles which he shall have received beyond the established allowance. That in all cases the statement shall accompany the paymaster's accounts to the Treasury Department, and be subject to comparison with the original receipt rolls there on file; and in case it shall appear, on comparison, that any article for which the officer shall have received a credit on the soldier's receipt roll is omitted in the statement, the value of the articles thus omitted shall be charged against the officer by whom the statement shall have been made, and deducted from his pay.

That to enable the Quartermaster's department to carry into effect the proposed system of accountability, there be appointed three additional quartermasters and eight assistants, to be taken from the line of the army, with the same rank and compensation as are provided for like grades by the act entitled "An act to fix and reduce the military peace establishment of the United States," approved the 2d of March, 1821, and that the assistants be entitled also to receive the allowance of forage heretofore authorized to regimental and battalion quartermasters.

The necessity for the increase proposed in the number of officers for the department has been sensibly felt for the last two years. Prior to the year 1821, when the clothing duties were provided for elsewhere, there were at my disposal eighteen quartermasters and assistants, besides the same number of regimental and battalion quartermasters. At present there are but twelve of the former and none of the latter, they having been abolished at the reduction, while their duties, as well as those of the clothing department, were necessarily thrown on the limited number of regular assistants. The extent and importance of the latter duties may, perhaps, be estimated by this general remark, that clothing and equipage are received at Philadelphia by the officers of the Quartermaster's department, and thence transported to its destination and issued to the army; while it is the object of the system proposed to trace those supplies through the various intermediate agents, from the main depot till they reach the consumer, and thence by a

regular chain to a final accountability at the treasury. The details of these operations involve great labor, both in regard to the executive agents and the department in its administrative duties, and, besides, a considerable pecuniary responsibility is incurred.

The propriety of the additional quartermasters being authorized is too obvious to need demonstration. Those stations, by holding out the prospect of promotion to the assistants, would induce many of those possessing the requisite abilities to remain in the department. The allowance of forage to the assistants is absolutely necessary. Any one acquainted with the duties of a quartermaster must know that they cannot be duly discharged on foot. Those officers, least of all others in the army, can dispense with the service of horses; besides, they have taken the place of the regimental and battalion quartermasters, to whom forage has always been allowed, and it is but just, having regard to the necessities under which they labor, that the same allowance be accorded to them.

In regard to the disbursing officers of the army we have heretofore pursued a mistaken policy. The pay department is the only one whose subordinate officers receive a compensation bearing any proportion to their duties and responsibilities. The assistant quartermasters are charged with duties equally responsible and laborious with theirs, and their compensation is one-third less. It is also less than that allowed to the majority of clerks in this city, who have no pecuniary responsibility, and whose duties are not more laborious than theirs. The changes which I have recommended in compensation, though trifling in amount, are important to the officers, as well as to the service. If adopted, the officers will be able to devote their whole time and attention to their official duties, by which means alone can efficient service be expected, or can economy and punctuality be introduced and maintained.

I have the honor, &c.,

THOS. S. JESUP, *Quartermaster General.*

HON. JOHN C. CALHOUN, *Secretary of War.*

18TH CONGRESS.]

No. 281.

[2D SESSION.]

RELATIVE TO A GRADUAL INCREASE OF THE CORPS OF ENGINEERS AND TOPOGRAPHICAL ENGINEERS OF THE ARMY.

COMMUNICATED TO THE SENATE JANUARY 24, 1825.

The Committee on Military Affairs, to whom were referred that part of the President's message relating to the proposed increase of the corps of engineers, and so much of the communication of the Department of War recommending the equalization of the rank, pay, and emoluments of the several principal professors of the Military Academy at West Point, as well as certain additional appointments necessary for the efficiency of the same, reported:

That they have carefully considered the topics embraced in the inquiry, and have arrived at the conclusion that however requisite at a future period a more enlarged organization of the corps of engineers and topographical engineers may be, that at present it seems to them the more judicious policy to provide for a multiplication of the subordinate grades in both corps, by which the materials for an increase, as they may be wanted for the public service of the higher officers, will be supplied in the best manner. With this view they have in the bill which accompanies this report made provision for a gradual reception of two lieutenants into each corps annually for the ensuing four years, at the discretion of the President, from those cadets at West Point who at their graduation evince the highest aptitude for this service. This arrangement will immediately enable the department to supply in some degree the assistants that are required at the fortifications, and supersede the necessity, to the extent of the appointments made annually, of citizen sub-assistants or overseers of work, being hired at a price much exceeding the pay of a subaltern of the army of the United States.

The committee think it unnecessary to discuss the expediency of equalizing the rank and pay of the different professors and teachers at West Point, or of establishing by law a professorship of chemistry at that institution and certain assistants, together with a requisite provision for the appointment of a sword master, modeller, steward at the hospital, and the fatigue party of laborers, &c., because it would be merely to repeat the reasons in detail for these necessary arrangements so strongly enforced in the report of the board of managers, which are to be found in part the second of the executive papers of this session, to which your committee beg leave to refer, and in conclusion to remark that the bill which they now report, in conformity with these recommendations, embraces such objects as they think of immediate and indispensable utility, and as calculated to give higher efficiency to an institution to which the best feelings as well as the best hopes of the country are strongly attracted.

18TH CONGRESS.]

No. 282.

[2D SESSION.]

## ON THE ERECTION OF MONUMENTS TO THE MEMORIES OF GENERALS WOOSTER AND DAVIDSON, OF THE ARMY OF THE REVOLUTION.

COMMUNICATED TO THE SENATE FEBRUARY 17, 1825.

The Select Committee to whom was referred the message of the President of the United States of March 17, 1824, in relation to the payment of a sum allowed by a resolution of Congress for the erection of a monument to the memory of General David Wooster, and who were instructed to inquire into the expediency of making an appropriation to carry into effect a resolution of Congress desiring the governor and council of North Carolina to erect a monument to the memory of General Davidson, reported:

That on the 17th day of June, 1777, Congress "resolved that a monument be erected to the memory of General Wooster, with the following inscription: 'In honor of David Wooster, brigadier general in the army of the United States. In defending the liberties, and in bravely repelling an inroad of the British forces to Danbury, in Connecticut, he received a mortal wound on the 27th day of April, 1777, and died on the 2d day of May following. The Congress of the United States, as an acknowledgment of his merit and services, have caused this monument to be erected;' and that the executive power of the State of Connecticut be requested to carry the foregoing resolution into execution, and that five hundred dollars be allowed for that purpose." And that, on the 20th day of September, 1788, Congress "resolved that the governor and council of the State of North Carolina be desired to erect a monument, at the expense of the United States, not exceeding the value of five hundred dollars, to the memory of the late Brigadier General Davidson, who commanded the militia of the district of Salisbury, in the State of North Carolina, and was killed on the 1st day of February, in the same year, fighting gallantly in the defence of the liberty and independence of these States."

The committee have ascertained that neither of the monuments mentioned in the resolutions above recited has been erected.

The message of the President referred to the committee, and a communication from the Register of the Treasury, hereto annexed, satisfactorily prove that the sums allowed by Congress to carry into effect those resolutions have never been paid.

The committee do not deem it necessary particularly to advert to the distinguished merits and services of men whose eulogy is found in the legislative acts of the venerable founders of this republic. On that point the proceedings of Congress, in the opinion of the committee, are conclusive.

The devotion of Wooster and Davidson to the cause of freedom and self-government consigned them to a premature but honorable grave, and the committee will not forbear to express their regret that the design of their patriotic associates in that arduous and glorious cause to honor their memories has never been consummated. This omission can only be accounted for on the presumption that the limited means within the control of Congress or the legislatures of the several States at that time were imperiously demanded for other objects of deep and present interest, and vitally connected with the national existence.

Although the public exigencies of that period might justify such temporary omission, and the application of all the public funds to other objects of paramount concern, yet, in the opinion of the committee, the obligation created by those resolutions remains with undiminished force, inasmuch as the sum necessary for the erection of the monument has never been paid to the executive power of the States immediately interested.

The committee consider that lapse of time, in cases like those under consideration, furnishes no reason against doing that which it was originally the acknowledged duty of the government to have performed; and, in their opinion, it is incumbent on the national legislature immediately to make provision for the execution of a work the further neglect of which will be inconsistent with the sentiments that actuate the people of this Union. This opinion is strengthened by the consideration that in the resolutions which have been recited the committee see a pledge of the national faith, the fulfilment of which is due alike to the honor of the illustrious body by which those resolutions were passed and the memory of the distinguished general officers whose lives were sacrificed on the altar of their country.

The committee therefore ask leave to report a bill.

*To the House of Representatives of the United States :*

In compliance with a resolution of the House of Representatives of the 17th of February last, requesting "information whether any measures have been taken for carrying into effect the resolution of Congress of June 17, 1777, directing a monument to be erected to the memory of David Wooster, a brigadier general in the army of the United States, who fell in defending the liberties of America, and bravely repelling an inroad of the British forces to Danbury, in Connecticut," I have caused the necessary inquiries to be made, and find by the report of the Register of the Treasury that no monument has been erected to the memory of that patriotic and gallant officer, nor has any money been paid to the executive of Connecticut on that account.

MARCH 17, 1824.

JAMES MONROE.

TREASURY DEPARTMENT, *Register's Office, February 7, 1825.*

I certify that the sum of five hundred dollars granted by a resolution of Congress of September 20, 1781, for the purpose of carrying into effect the erection of a monument to the memory of Brigadier General Davidson, hath not been paid from the treasury of the United States.

JOSEPH NOURSE, *Register.*

18TH CONGRESS.]

No. 283.

[2D SESSION.

## ON THE AUDIT OF THE CLAIM OF MASSACHUSETTS FOR THE SERVICES OF THE MILITIA OF THAT STATE DURING THE WAR OF 1812-'15.

COMMUNICATED TO THE SENATE FEBRUARY 22, 1825.

*To the Senate and House of Representatives of the United States:*

I transmit herewith a report from the Secretary of War, with a report to him from the Third Auditor, of the settlement, in the amount stated, of the claims of the State of Massachusetts for services rendered by the militia of that State in the late war, the payment of which has hitherto been prevented by causes which are well known to Congress. Having communicated my sentiments on this subject fully in a message bearing date on the 23d of February, 1824, it is unnecessary to repeat in detail here what I then advanced. By recurring to that message and to the documents referred to in it, it will be seen that the conduct of the executive of that State, in refusing to place the militia thereof at that difficult conjuncture under the direction of the Executive of the United States, as it was bound to do by a fair construction of the Constitution, and as the other States did, is the great cause to which the difficulty adverted to is to be ascribed. It will also be seen, on a view of those documents, that the executive of the State was warned at the time, if it persevered in the refusal, that the consequences which have followed would be inevitable; that the attitude assumed by the State formed a case which was not contemplated by the existing laws of the United States relating to militia services; that the payment of the claims of the State for such services could be provided for by Congress only, and by a special law for the purpose. Having made this communication, while acting in the Department of War, to the governor of Massachusetts, with the sanction and under the direction of my enlightened and virtuous predecessor, it would be improper, in any view which may be taken of the subject, for me to change the ground then assumed, to withdraw this great question from the consideration of Congress, and to act upon it myself. Had the Executive been in error, it is entitled to censure, making a just allowance for the motive which guided it. If its conduct was correct, the ground then assumed ought to be maintained by it. It belongs to Congress alone to terminate this distressing incident on just principles, with a view to the highest interests of our Union.

From the view which I have taken of the subject I am confirmed in the opinion that Congress should now decide on the claim, and allow to the State such portions thereof as are founded on the principles laid down in the former message. If those principles are correct, as on great consideration I am satisfied they are, it appears to me to be just in itself and of high importance that the sums which may be due in conformity therewith should no longer be withheld from the State.

JAMES MONROE.

WASHINGTON, February 21, 1825.

DEPARTMENT OF WAR, February 21, 1825.

SIR: Agreeably to your direction I transmit herewith a report of the Third Auditor of the Treasury on so much of the Massachusetts claim as has been fully audited, relating to the services of the militia belonging to the divisions commanded by Majors General King and Sewall.

I have the honor to be your obedient servant,

J. C. CALHOUN.

The PRESIDENT of the United States.

## REPORT.

The Third Auditor having, conformably to the letter of the honorable Secretary of War, dated May 29, 1824, apprising him of the President's having directed that he should proceed in auditing the accounts of the State of Massachusetts, and be governed in auditing them "by the principles contained in the bill reported by the Military Committee of the House of Representatives in relation to the claims of the State for militia services," and according to which bill such claims are to be audited and settled under the usual rules, in all cases where the "militia were called out at the desire or instance of an officer of the national government, or to repel actual invasion, or under a well-founded apprehension of invasion: *Provided*, the number of militia so called out and assembled were not in undue proportion to the exigency," audited a portion of the accounts referred to, he submits, with regard to one branch of the claim, the following report:

On examination of the vouchers for expenditures by the State for services of militia belonging to the 11th division, commanded by Major General William King, it has been found that, for the defence of various places on the maritime frontier of his district, viz: between the Kennebec and Penobscot rivers, there were called into service, about the 20th of June, 1814, numerous companies and detachments, constituting altogether, including officers, a force of nearly two thousand five hundred men. The calls under which these militia assembled appear to have been made principally by the officers commanding regiments, detachments, or companies, in pursuance of Governor Strong's general order of July 3, 1812, directing the militia, in case of actual invasion or imminent danger thereof, to march, without waiting for orders from the commander-in-chief, to the defence of the place or places invaded or in imminent danger of invasion, and to have been occasioned by the British ship-of-war the *Bulwark*, of seventy-four guns, being off the coast, with several barges having troops on board, and who made various attempts to land, as will be found more fully explained in the accompanying packet.

The militia thus called out were discharged after a few days' service, and on the 30th of June, in consequence of renewed attempts to effect a landing from the enemy's barges, several companies were again called out and kept in service for a few days. The services in these cases seem to be clearly of a description intended to be provided for by the bill. Whether the number of troops called out was in undue proportion to the exigency, and if it was, to what extent, are questions for the consideration of the Executive.

The amount disbursed for these services is ..... \$5,445 19  
And the deductions therefrom amount to ..... 1,901 85

It appears also that small detachments from General King's division were in service as guards at various places within his district, under orders issued by him, to whom an authority for calling out troops for that purpose was given by a general order of the governor of the State, dated June 23, 1814, of which a copy is herewith. Some of these were kept in service until August, when a detachment, including officers, of about one thousand three hundred militia (and to which the claim of the State does not extend, the detachment having been paid and supplied by the general government) was placed in the United States service for three months' duty at different posts on the sea-shore of the State, agreeably to a requisition made on Governor Strong by General Dearborn on the 8th of July, 1814, and of which detachment two companies were from General King's division. Copies of General King's orders, under which these guards were in service, will be found in a manuscript book herewith, and explanations relative to their services will be found in his letters filed in the before-mentioned packet. There is no evidence of the guards having been called out at the desire or instance of any officer of the national government, and whether their services be of a kind intended to be provided for by the bill is a point for the Executive to decide.

The payments for their services amount to ..... \$4,990 97  
And the deductions to ..... 1,467 88

In September, 1814, there appears by the rolls to have entered into the service of the State, for defence of the seaboard of General King's district, various regiments and detachments from his and Major General Sewall's divisions, a particular statement whereof, with remarks explaining by what orders the same were called out and discharged, is hereinafter exhibited, viz:

*Two regiments, commanded by Lieutenant Colonels Samuel Thatcher and E. Foote—force, including officers, 950.*—Called into service by orders issued on the 2d of September, 1814, by General Payson, who commanded the 2d brigade of General King's division, in consequence, as is expressed in the orders, of the occupation of Castine and Belfast by the enemy. These places are not within the limits of the before-mentioned district.

Pursuant to an order of General King, dated September 7, these regiments were soon thereafter discharged, except one company from Lieutenant Colonel Foote's regiment, which remained in service until October 11.

*A regiment commanded by Lieutenant Colonel Comings, 374.*—Called out, as stated on the rolls, by Lieutenant Colonel Comings. No order produced. In service from the 3d to the 19th September, when a division order for its discharge was issued.

*A regiment commanded by Lieutenant Colonel Day, 524; a regiment commanded by Lieutenant Colonel Cutter, 559.*—One battalion of each of these regiments was called into service by an order issued by General King on the 5th September, and the remaining battalions thereof, by another order issued by him on the 9th of September. Agreeably to his order of September 22; Lieutenant Colonel Day's regiment was discharged on the next following day; and to his order of September 27, the regiment of Lieutenant Colonel Cutter (save two companies, which, pursuant thereto, were detached for fifteen days' further service, as hereinafter specified) was discharged on the 28th of the same month.

*A regiment of artillery commanded by Lieutenant Colonel E. Thatcher, 114.*—Of this regiment, a company commanded by Colonel Haskell was called out by General King's order of the 5th of September, and was discharged on the 9th; the residue was called out by his order of the latter date, and was, under his order of the 27th September, shortly afterwards discharged.

*A battalion of cavalry commanded by Major McGrate, 70.*—Called out by General King's order of the 5th of September, and, agreeably to his order of the following day, one of the companies commanded by Captain Chism was then discharged, the other company was discharged on the 9th of that month. Captain Chism's company re-entered the service on the 10th, (pursuant, as is stated on the roll, to a battalion order of that date, but which is not produced,) and was again discharged on the 24th; from that time, about twenty-five men, detached from both companies, were kept in service until the 5th of October, when the number was reduced to ten, and these were discharged on the 25th of that month.—(See division orders of the 22d and 27th September.)

*A regiment commanded by Lieutenant Colonel Reed, 396; a regiment commanded by Lieutenant Colonel Thomas, 440; a regiment commanded by Lieutenant Colonel Merrill, 611; a battalion of artillery commanded by Major Holden, 92; a battalion of cavalry commanded by Major Amies, 58.*—General King, by a division order, dated September 5, directed Brigadier General McCobb to detach from his brigade three companies, to rendezvous at Bath, without delay. On the same day two orders were issued by General McCobb, each professing to be in obedience to this division order; one of them calling into service at Bath three companies of Lieutenant Colonel Reed's regiment, commanded by Captains Davenport, Pettes, and Motherwell, and the other requiring that one company from each of the regiments of Lieutenant Colonels Reed, Thomas, and Merrill, should be detached to Bath, and that Major Amies, with his battalion, should also rendezvous there.

Under these orders, militia appear to have entered the service, as follows, viz: the companies of Captains Davenport, Pettes, and Motherwell, on the 5th of September, Major Amies's battalion on the 6th, and a company from each of the regiments of Lieutenant Colonels Thomas and Merrill on the 7th September.

General McCobb, on the 9th, issued another order, calling into service at Brunswick, without assigning any cause, a company of Lieutenant Colonel Thomas's regiment, commanded by Captain Dunning, and that company appears to have entered on duty forthwith. The remaining parts of the three regiments, and the battalion of artillery, appear to have entered the service on or soon after the 10th of September, pursuant to General King's order to General McCobb of that date; and the whole of these regiments, and the battalions of artillery and cavalry (save five men of the latter, who were retained in the service until

the end of October) were discharged conformably to the orders of General King, dated 27th, 28th, and 30th of September, and 4th of October.\*

A regiment commanded by Lieutenant Colonel John Stone, 754; a regiment commanded by Lieutenant Colonel Blasdell, 512; a regiment commanded by Lieutenant Colonel Fairbanks, 380; a regiment commanded by Lieutenant Colonel Sweet, 396; a regiment commanded by Lieutenant Colonel McGaffey, 423; a regiment commanded by Lieutenant Colonel Sherwin, 484; a regiment commanded by Lieutenant Colonel Waugh, 512; a regiment commanded by Lieutenant Colonel Moor, 553; a battalion of artillery commanded by Major Chandler, 173; a company of cavalry commanded by Captain Eastman, 45.—Called out by Major General Sewall's order of the 11th of September. Lieutenant Colonel Fairbanks's regiment was discharged on the 18th of September, by what authority does not appear, and the other regiments and battalions of artillery, save such portions thereof as were detached for forty days, as hereinafter expressed, were, agreeably to General Sewall's order of the 23d September, discharged on that and the next two or three following days. The cavalry were discharged by degrees between that time and the 6th of November.†

The occasions for these calls are explained in the documents filed in the packet before-mentioned. It does not appear that any of the militia were ordered out at the instance or desire of an officer of the national government. Major General Dearborn, it will be seen, in consequence of information he had received of the occupation of Castine by the enemy, issued, on the 4th of September, 1841, a requisition upon the governor of the State for several detachments to be received into the United States service; and whereof one was to consist of one thousand infantry and one hundred artillery, for the defence of the seaboard between Kennebeck and Penobscot rivers, being, as is before noticed, the district commanded by Major General King. No direction appears to have been given by the governor for a compliance with this requisition, and none of the militia in this district were placed in the United States service after it was issued. How far these circumstances may operate to exclude from the provision intended by the bill the whole or a portion of the claim for these militia services, it is for the Executive to determine. If the requisition is to be considered the criterion whereby to judge of the adequate number of militia to be called out for the defence of the district before-mentioned, (and it appears by the correspondence to have formed the basis of a decision by the State authorities as to the force proper to be kept in service within that district,) then it seems obvious that the number of troops called out was greatly "in undue proportion to the exigency." It will be seen that the application made to General Sewall by the town of Wiscasset was for "about one thousand men." The foregoing particular shows that, under the order issued by him, in consequence of that application, the force in service from his division was more than fourfold the number asked for. The proportion of field and staff and company officers, from both divisions, far exceeded, too, the number that could have been, under the United States rules of organization, received into their service, even for so large a force as had been thus assembled.

The disbursement for the services of these militia amount to..... \$65,807 42  
And the deductions therefrom to..... 15,584 98

On September 10, 1844, W. H. Sumner, esq., appears to have been constituted an executive agent for providing defensive means in the district of Maine, and to have been despatched there with instructions from the governor, and from the commissioners for seacoast defence; copies of which, and of various letters detailing his proceedings under the same, will be found in the before-mentioned packet, and whereby it appears that an arrangement having reference to General Dearborn's last mentioned requisition was entered into between the agent and Generals King and Sewall, and relative whereto General Chandler of the United States army was consulted.

Pursuant to this arrangement, there entered on duty within General King's district, on or soon after the 24th of September, from General Sewall's division—

*Force, including officers.*

A regiment commanded by Lieutenant Colonel Sweet..... 604  
A regiment commanded by Lieutenant Colonel Sherwin..... 567  
A company and detachment of artillery commanded by Captain Randlet and Lieutenant Vickers.... 93  

---

1,264

And which remained in service for forty days. It will be seen that propositions were made for placing these militia in the United States service, and that General Dearborn consented to receive them into that service, on their being organized into two battalions instead of two regiments; this, however, not having been complied with the militia remained in the State service.

The expenditures for their services amount to..... \$25,339 34  
And the sums deducted therefrom to..... 6,386 66

Under General King's order of September 27, 1844, there entered and remained on duty for forty days four companies from his division, commanded by Captains Flint, Reed, Curtis, and Kinney, constituting a force, including officers, of about 256 men; and under the same order, four other companies from his division, commanded by Captains Adams, Goodwin, Sproul, and Winslow, having therein, including officers, 291 men; and also Lieutenant Colonel Cutter, and four other officers of his staff, were in service on Squaw island for 15 days. And under orders issued, as stated on the rolls, by Lieutenant Colonel S. Thatcher, there were in service a detachment of 34 men, commanded by Lieutenant Levi Soul, for 40 days; a detachment of 12 men, commanded by Ensign J. McIntyre, for 31 days; and a detachment of 12 men commanded by Sergeant Bradford, for 23 days. It does not appear that the services of any of these militia were rendered at the desire or instance of any officer of the national government.

The payment for their services amount to..... \$6,834 32  
And the deductions therefrom to..... 1,662 88

\* All the before-mentioned militia belonged to General King's division; and for the command thereof he, his two brigadier generals, and the officers of their respective staffs, appear to have been in the State service—11.

† The eight regiments, battalion, and company last mentioned belonged to General Sewall's division; and for the command thereof, there were in service, the major general, two brigadier generals, and the officers of the division, and each of the brigade staffs—9.

On November 2, 1814, (being before the aforesaid 40 days had expired,) an order appears to have been issued by Lieutenant Colonel Foote, wherein, after reciting that the enemy's force, consisting of a frigate, a brig-of-war, and a bomb-ketch, was then off Camden, and that the commodore had demanded of the citizens the restoration of a sloop-of-war and cargo, seized by the officers of the revenue, or the payment of £20,000 for the same, and had threatened, in case of non-compliance, to destroy the village and lay waste the whole coast; directions were given for the immediate assembling at Camden of several companies of Lieutenant Colonel Foote's regiment, and which appear to have assembled accordingly on that and the next following day. At the same time, five companies of Lieutenant Colonel Samuel Thatcher's regiment and a small detachment of artillery, presumed to have been called out on the same occasion, though the order is not produced, also assembled. These companies, and several field and staff officers, forming a force of nearly 500 men, remained in service till the 7th November, and were then discharged.

The payment for their services amount to..... \$1,305 28  
And the deductions therefrom to..... 310 12

The several disbursements before-mentioned, amounting altogether to \$109,722 52, are such as appertain to the paymaster's department, and are, of course, exclusive of those for supplies procured for the aforesaid militia in the subsistence, quartermaster's, ordnance, and medical departments, the vouchers for which it has been impracticable to examine, and the investigation whereof, from their great irregularity, will necessarily occupy much time.

Of the aggregate of the deductions, being \$27,314 47, a portion, amounting to between three and four thousand dollars, consists of payments either insufficiently vouched or not allowable without special sanction; the residue, being composed of sums paid for clothing and use of arms to which militia are not entitled by any law of the United States, other payments unauthorized by law or regulation, overpayments and double payments, is considered to be inadmissible.

PETER HAGNER, *Auditor*.

[19TH CONGRESS.]

No. 284.

[1ST SESSION.]

ANNUAL REPORT OF THE SECRETARY OF WAR, SHOWING THE OPERATIONS OF THE  
 MILITARY ESTABLISHMENT OF THE UNITED STATES IN 1825.

COMMUNICATED TO CONGRESS WITH THE MESSAGE OF THE PRESIDENT OF DECEMBER 6, 1825.

DOCUMENTS FROM THE DEPARTMENT OF WAR.

WAR DEPARTMENT, *December 1, 1825.*

SIR: Conformably to usage, I submit a report on the administration of this department during the current year. For information in detail I refer to the accompanying reports, prepared agreeably to my instructions, on the various branches of the public service, and marked from A to K.

Number A is the report of Major General Brown. It presents the number and condition of the army, and the positions occupied by its different parts. The character of the army, for the excellence of its discipline, is so satisfactory as to entitle the officers to commendation. Desertion, however, from the extent to which it prevails, is a serious evil. The state of society, which presents so many advantageous pursuits to our citizens, as also the difficulty of apprehension, may possibly render the evil remediless, yet its results are so injurious to the army, and constitute so heavy an item to our expenditures, that any measures promising a preventive should be adopted. I therefore recommend the plan proposed, of detaining a small portion of the monthly pay of the privates till their final discharge.

To this effect legislative aid is required. The good effects resulting from the establishment of the school of practice at Fortress Monroe are daily developed in the increasing improvement of the artillery corps, that important arm of the public force. To realize the anticipations which suggested that establishment the use of a few horses is indispensable, for the double purpose of acquiring a practical knowledge of artillery and cavalry exercise. When it is recollected that in modern tactics these arms have had the most decisive influence on the fate of battles, the small additional expense proposed to be incurred for the procurement of means, without which they must be deficient in practical knowledge, bears no proportion to the manifest advantages which such an addition could not fail to produce.

No maxim is believed to be sounder than that which inculcates the propriety of adapting a military peace establishment to an eventual state of war. Economy and the genius of our institutions equally require that such an establishment should be reduced to the smallest number which a just regard to a future state of war will admit. Such an organization as will, without entrenching on this maxim, furnish the means of extension in the event of necessity is therefore highly desirable. Destitute as we are of cavalry, that part of the military science is in danger of being lost. We are equally without the means of a knowledge of the artillery field exercise. These defects will in part be remedied by the proposed plan, as the whole artillery corps will successively have the advantage of this school of practice. Each officer will understand the cavalry as well as the artillery exercise, and, in the event of war, will present ample materials for appointments to office in the corps of cavalry.

Documents B, C, D, E, F, and G are reports from the Quartermaster General, Commissary General of Subsistence, Paymaster General, Surgeon General, Commissary General of Purchases, and Ordnance departments, by reference to which it will be seen that the administrative branches of the army have been conducted with zeal and success. And although unexpected calls have been made on some of these departments from military movements in the south, the expenditures have still been confined within the appropriations; and it is due to the chiefs as well as the inferior officers in these branches of the public service to notice particularly that every disbursing officer, as far as returns have been received, has discharged his duty with fidelity by the punctual application of the funds committed to his care, so that not a cent has been lost to the government.

In executing so much of the law of the last session as appropriates \$100,000 for the armament of new fortifications, the course pursued heretofore by the Executive of obtaining cannon by private contract was adopted in preference to advertising for bidders. The reasons which induced the adoption of this course, after much consideration, are presented in the documents accompanying the report of the Ordnance department, and are communicated for the purpose of presenting the subject to the consideration of Congress.

Document H is the report of the engineer department. Accompanying it is the report of the visitors of the Military Academy at West Point. The warm commendations the latter contains, coming from such

highly respectable authority, must be particularly gratifying to the American people. It is the nursery of this country of the military art on the cheapest plan, as well as the most efficient, furnishing annually a supply of officers for the army of great promise, equal to the demand produced by vacancies. To the military science proper are added many auxiliary acquirements, some of which are adapted to the walks of civil life, particularly civil engineering, which, from the efforts everywhere making by the general and State governments for internal improvements, promises to be among the most beneficial acquisitions in the whole range of science. But what imparts to this institution its predominant advantage over every other establishment for the improvement of our youth is the high moral character of the pupils, the result of an impartial though inexorable police, aided by the insulated situation of the institution, which separates it from the world, and as a consequence from the objects of temptation. The high esteem which this institution enjoys is indicated by the thousands applying for admission. The painful duty of rejecting twenty-nine thirtieths, many of whom are well qualified, is mitigated only by the reflection that, in designating the fortunate candidates, the rule of selection will be founded on impartiality and equality, to fortify which a cadet, whenever a fit candidate is presented, will be appointed from every congressional district in the Union. This establishment, to render it complete, requires legislative aid. In addition to the improvements suggested by the visitors, many of which are highly necessary, and for such estimates will be submitted, I recommend the purchase of a few horses. The same reasons already urged, showing the advantages resulting from the use of horses at Fortress Monroe, will apply with equal force in favor of such an addition to the Military Academy; to which may be added that, as the cadets are confined four years to the Point without horses, the art of riding itself must be greatly impaired, if not lost. United with its military advantages will be the exercise it furnishes, so friendly to the health of the cadets.

By reference to the report of the engineer department, it will be seen our system of fortifications is progressing as successfully as could be expected. Some delay and embarrassment have resulted from the very limited number of officers belonging to the engineer corps, an increase of whose numbers is required by the increasing duties they have to perform. The law, entitled "An act to procure the necessary surveys, plans, and estimates upon the subject of roads and canals," has received the attention its importance required. Three great projects have engaged the chief attention of the corps of civil and topographical engineers; the proposed connexion of the eastern and western waters by the Ohio and Chesapeake canal; the practicability of uniting the waters of lake Memphramagog with the Connecticut river, of improving the navigation of that river and its tributary streams; and the national road from this place to New Orleans. The reconnoissance of the first had been completed, and the board of engineers is preparing a full report on the subject. In causing a reconnoissance to be made upon the second object, I was led thereto as well by considerations of its national importance as the request of many of the States interested in the navigation of that river. Although the reconnoissance and examination have been completed, the report of the officer engaged in that service has not yet reached the department, as the details to accompany it have not been prepared.

The location of the road from this place to New Orleans has deservedly excited a very great interest, especially in those regions through which there was even the most remote possibility of its being carried. Memorials have been presented in favor of a great variety of routes. Although these have been respectfully considered, it is believed that the principal routes may with propriety be reduced to three. One by the capitals of the southern States; the second, the direct line which approaches, as near as practicable, the range of mountains nearly parallel therewith; and the third, crossing the Blue Ridge at the most convenient pass, (supposed to be Rock Fish Gap, in the county of Albemarle,) and pursuing the valley between the north and south mountains, passing the neighborhood of Knoxville, and thence to its final destination. The two first routes have been explored; the third is now in a course of inspection, and hopes are entertained that during the present session a full report, containing all the necessary information, may be made to Congress.

The execution of the law of last session entitled "An act for the continuation of the Cumberland road" was referred to this department. The superintendent being appointed during the extra session, steps were immediately taken to carry the law into effect. The site of the road not having been fixed upon, and great diversity of interest producing a correspondent diversity of opinion, interposed some difficulty in fixing the most eligible route. After yielding to the petition of a number of respectable citizens so far as to cause an inspection of a new route, which resulted in an unfavorable report, the one formerly recommended was adopted. Contracts have been already made for about twenty-eight miles of the road, and which are in course of execution. In directing the manner of its being made the McAdam plan was adopted, recommended by its cheapness and superior quality. The superiority of this mode over that formerly pursued in the construction of turnpike roads is ascertained most satisfactorily, by twenty years' experience in Great Britain; the evidence of which is found in the approbation of the executive and legislative branches of that government, both having liberally rewarded the inventor, and also from a small experiment made in this country. The result, as far as we have proceeded in the execution of this measure, has exceeded our most sanguine expectations. By dividing the road into very small sections, so as to enlarge the sphere of competition and to exclude speculations, the cost is reduced to \$4,300 per mile, presenting a most favorable comparison with the expense incurred, being \$12,900 a mile, in the construction of the road on this side of the Ohio.

I refer to the reports of the quartermaster general, and of the engineer department, for the measures which have been adopted in execution of the several acts of Congress directing the surveys and construction of roads, as also of sundry improvements in the navigation of the United States.

Various applications have been presented from different parts of the United States, asking the aid of topographical engineers in inspecting and reporting upon projects of internal improvement, which it was impossible to comply with, from the very limited number of that corps, each of which has been engaged on service. It is submitted whether the corps itself should not be placed on a similar basis with that of the engineer corps, and to be successively increased within a prescribed maximum according to the discretion of the President, which would find security for its judicious exercise in the calls that might be made on the services of that corps, and the talents that time might successively offer for selection.

Document marked K is the report on Indian affairs. The act of Congress approved May 4, 1824, authorizing treaties with the tribes on the Missouri, has been successfully executed by the commissioners, Messrs. Atkinson and O'Fallon, who have made treaties with the Poncars, Teton, Yancton, Yanctonics, Angallallas, Saones, and Hunkpapas, tribes of the Sioux—the Chayennes, the Ricaras, the Mandan Minctares, and Crow Nation of Indians; treaties have also been concluded, by Governor Clark, with the Osages

and Kansas, by which one hundred millions of acres of land have been disencumbered of the Indian title; and also with the Shawnees, for exchange of lands in Missouri.

Deadly feuds and hostilities having raged for years among various tribes, which threatened their extermination, and which proved fatal to some of our citizens, the Congress of the United States, animated by the most laudable wish to put an end to them, appropriated a sum of money for the purpose of meeting the expense of a treaty, and the Executive appointed Governors Clark and Cass as mediators among these tribes, who were so fortunate as to reconcile them to each other, and to re-establish peace by adjusting their boundaries and removing other causes of discord, so as to justify a hope that it will not be again disturbed. The effect of our policy of furnishing the means of education to the Indian youths is disclosed in the report, by which it will be seen that in this year 1,159 have profited by our liberality. The pacific relations between every tribe and the citizens of the United States have been preserved without the slightest violation, as far as this department is informed. The situation of the Creeks claim, on account of its importance, a more particular notice, which will be the subject of a special report.

Respectfully submitted,

JAMES BARBOUR.

The PRESIDENT of the United States.

A.

HEADQUARTERS OF THE ARMY, *Washington, November 17, 1825.*

SIR: In compliance with your instructions of the 3d ultimo, I have the honor to lay before you the following returns and statements, viz :

A.—A statement of the organization of the army, agreeably to the act of Congress of the 2d of March, 1821.

B.—A return of the strength of the army, from the last regimental and other returns received at headquarters.

C.—A return showing the distribution of the troops in the eastern department.

D.—A return showing the distribution of troops in the western department.

E.—A statement showing the number of men enlisted, the amount of money advanced for the purposes of recruiting, and the amount for which recruiting accounts have been rendered for settlement, from October 1, 1824, to September 30, 1825.

By statement E it will appear that the sum of \$12,593 01 remains unexpended in the hands of the recruiting officers. This amount is in a course of application to the recruiting service, and will doubtless, in due season, be regularly accounted for.

Subsequent to the date of my communication of the 20th November, 1824, a lucid and comprehensive report was received from Brevet Major General Gaines of his inspection of the left wing of the eastern department, made during that year, and embracing the posts of New-York Harbor, Fort Howard, Michilimackinac, Fort Brady, Fort Gratiot, Detroit, Niagara, Sackett's Harbor, and Boston, the arsenals at Rome, Watervleit, Watertown, and the arsenal and armory at Springfield.

During the early part of the present year, General Gaines proceeded on a tour of inspection of the southern posts of the eastern department, but his services having been required by government, for other objects, his inspection has not been completed.

From Brevet Major General Scott no report of inspection has been received. A portion of his time has also been employed by government during the past year, in duties of a special nature.

Colonel Wool has just completed a tour of inspection, embracing the posts of St. Augustin, Savannah, Charleston, New York, New London, Newport, Boston, Portsmouth, Portland, Eastport, West Point, Delaware, Baltimore, Sackett's Harbor, Niagara, Detroit, Mackinac, Green bay, and the Saut of St. Marie; besides the forts at Plattsburg, Salem, Beverly, Marblehead, and Fort Mifflin, which are not occupied by troops. Also the arsenals at Washington City, Pikesville, Frankford, Watertown, Wartervleit, Rome, and Detroit. Colonel Wool is proceeding to the inspection of the posts at the south and west.

Colonel Archer has inspected the posts of New Orleans, Baton Rouge, Cantonment Jesup, Cantonment Towson, and Cantonment Gibson; being prevented by sickness from completing his tour to the north and west.

The reports of inspections performed by the commanding officers of the artillery regiments are not yet received.

The general condition of the army, with respect to its administration, discipline, and efficiency, continues as favorable as can be expected from the dispersed state of its distribution, and from the partial efficacy of the present limited means of coercion and restraint.

As a remedy to the former evil, so far as it operates upon the artillery regiments—the establishment of the school of practice at Fortress Monroe—though laboring under the want of legislative aid, has, it is believed, already given the most favorable earnest of the advantages that may be expected from concentration. Among the numerous benefits to be derived from this institution there appears to me none more important than those to be reaped by the graduates of the Military Academy, in the incipient formation of their ideas and character, with reference to the practical duties of their profession. Propriety and uniformity in the discharge of these duties have long been considered as desiderata, and can be secured only through the agency of a supplemental school.

The evil of desertion throughout the army continues undiminished from the want of sufficient means to check its progress. While on this subject, I am induced to call your attention to my communication of the 20th November, 1824, addressed to the War Department, in which are suggested some plans for the extenuation of this evil; and as my reflection has been more matured I have been led the more strongly to confide in their probable efficacy.

In addition to the proposition then recommended of retaining a portion of the soldier's pay until his discharge, the better to secure his fidelity, I would advise that, as an encouragement to faithful service, and as the surest method of preserving the best materiel for the ranks, additional pay be allowed to the soldier as a condition of his re-enlistment. This plan has been adopted in almost every foreign service, and, it is believed, with invariable success.

I would also take the liberty of referring you to my letter to the Secretary of War of December last, containing certain propositions for the advancement of the non-commissioned grades of the army. I have recommended that the monthly pay of the sergeant major and quartermaster sergeant of each regiment, and that of the first sergeant of each company, be increased to *fifteen* dollars, and that the monthly pay of every other sergeant be increased to *ten* dollars. This increase of pay would scarcely be perceived in the general appropriation under this head, while its beneficial influence on the mass of the army would be incalculable.

In order to command the talent and ability requisite in the station of a non-commissioned officer, it is necessary to hold forth a consideration proportioned to the importance of the object desired; and in the sphere of life from whence the candidates for this station are to be derived, the only inducement that can prove effectual is an adequate pecuniary emolument.

The *commissioned* officer finds his reward in the honor which clothes his profession, in a refined spirit of chivalry congenial with its character, and in that ready passport to the highest circles of society guaranteed to him by his commission. But there are no incentives like these to operate upon the non-commissioned grades, while from their exertions, not less than from those of the commissioned, will result the moral and physical efficiency of the rank and file. Indeed, there is no individual of a company, scarcely excepting the captain himself, on whom more depends for its discipline, police, instruction, and general well being, than on the first sergeant. This is a grade replete with cares and with responsibility. Its duties place its incumbent in constant and direct contact with the men, exercising over them an influence the more powerful as it is immediate and personal; and all experience demonstrates that the condition of every company will improve or deteriorate nearly in proportion to the ability and worth of its first sergeant.

By securing talent and intelligence, therefore, for the non-commissioned grades, the general mass of the army may be improved, and these qualities can be procured only by offering an adequate inducement to persons of proper character in civil life who would find in this inducement an object to enter the military; or else by stimulating the ambition of the rank and file to qualify themselves for stations now rendered more respectable on account of the additional value with which they will have been invested by the measure I propose.

If, in a country like ours, it shall be considered most wise to maintain in time of peace the small military establishment which is now authorized, I trust there is good cause to believe that the people will see and feel the importance of making that establishment as perfect as might be expected from the unequalled materials on which the nation has to draw.

I have the honor to be, sir, with the highest respect, your obedient servant,

JAC. BROWN.

HON. JAMES BARBOUR, *Secretary of War.*

A.

## B.

QUARTERMASTER GENERAL'S OFFICE, *Washington, November 26, 1825.*

SIR: In obedience to your order, dated the 9th instant, I have the honor to report the receipts and disbursements of this department, during the first, second, and third quarters of the present year.

On the 1st day of January last there remained in the hands of officers of the department, applicable to the service of the present year, the sum of.....		\$28,225	47
In the first quarter of the year, the remittances amounted to.....	\$60,459	64	
In the second quarter to.....	82,002	90	
In the third quarter to.....	108,145	00	
Amount of remittances in the three quarters.....		250,607	54
During the same period there was received for rents of old barracks at Sackett's Harbor.....	91	25	
For farm and houses at Green Bush.....	120	00	
		211	25
Refunded to quartermasters by deserters.....		92	00
Proceeds of sales of damaged public property.....		519	08
Making the whole amount to be accounted for.....		279,655	34
The disbursements in the first quarter amount to.....	81,179	25	
In the second quarter.....	78,574	80	
In the third quarter, so far as accounts have been received.....	59,568	46	
		219,614	04
Whole amount to be accounted for.....		279,655	34
Amount of accounts rendered.....		219,614	04
Leaving a balance to be accounted for.....		66,041	30

The accounts of all the officers acting in the department during the first and second quarters, except those of the officer who accompanied the expedition to the Yellowstone, have been received, examined, and sent to the Treasury for settlement. Those of forty-three officers have been received for the third quarter, a part of which have been sent to the Treasury, and the remainder are in a course of examination at this office. The accounts from seven posts have not yet been received, but are expected in the course of the present, or early in the next month. These posts are New Orleans, Pensacola, Fort Brooke, Fort Gibson, Fort Armstrong, Fort Crawford, and Fort Snelling.

The remittances to the officers doing duty at those posts during the third quarter amounted to \$33,500, and I estimate their disbursements for the same period at nearly that sum, say \$30,000, which would leave in the hands of officers on the 30th of September, on account of the department, \$30,041 30 applicable to the present quarter, all of which it is believed will be applied to the service before the close of the year.

By comparing the remittances during the first and second quarters with the accounts received, it will be seen that the money accountability is as perfect as it can be made. The accountability for property of the department will admit of but little improvement, but that of clothing is extremely defective, and I fear that it cannot be improved unless the force of the department be augmented.

Of the roads confided to the superintendence of this department that from Pensacola to St. Augustine, authorized by an act of Congress approved the 28th day of February, 1824, will, it is believed, be completed by the last of January. When it was commenced in September 1824, your predecessor intended to have it opened entirely by the labor of the troops; but discovering that a sufficient number of men could not be spared from other duties to finish it in a reasonable time, he directed that a part should be done by contract. In June last, when the troops were withdrawn from the road, they had completed it from Pensacola to the Ochlockney, a distance of one hundred and sixty-five miles, at an expense of only \$9,583 32. The section of the road from the Ochlockney to the river St. John's, a distance of one hundred and eighty-five miles, was put under contract in December last. The contractor stipulated for \$13,500, to complete it before December 30, 1825. By the last accounts, such progress had been made that I have reason to believe the contractor will be able to deliver it to the department completed agreeably to the contract, early next month. There will then remain to be opened only the distance from Picolata, on the river St. John's, to St. Augustine, about seventeen miles, which it is believed may be done with the balance of the appropriation.

Of the roads authorized by the same act to be surveyed that from Suwaney to Cape Sable, the southwestern extremity of the peninsula of Florida, has been surveyed to Charlotte Harbor, one hundred and twenty-seven miles south of Tampa Bay, by Captain Clark, of this department, with a detachment of troops. The party was compelled to return without completing the survey, in consequence of the country south of Charlotte river being entirely impassable. Captain Clark ascended that river upwards of sixty miles, and found the country everywhere inundated. Between Charlotte harbor and Tampa Bay, the route lies through a country generally low, and intersected by innumerable streams and bayous. There are several fishing establishments at the harbor, in which about fifty Spaniards and Indians are employed. A road through that country would be at this time of little value in a military point of view, nor would it ever be of much importance, unless Charlotte harbor should become the resort of pirates, which is not probable, as it is entirely out of the range of commercial intercourse.

The survey of the route from St. Augustine to Cape Florida has been completed. Colonel Gadsden, the commissioner appointed to perform that service, is of opinion, from a minute examination of the country, (and I concur in the opinion,) that the improvement of the inland navigation, as far as the southern point of Indian river, would effect the objects which the government has in view by a road, at a less expense; for military purposes it would be superior, and as a convenience to future settlements in that part of Florida it would be preferable. The only expense to be incurred in improving the navigation would be the opening of a canal between Indian and Mosquito rivers, a distance of not more than one mile. Were that done, and the old Spanish road from St. Augustine to Smyrna repaired, the communication would be uninterrupted to the river St. Lucie, which is two-thirds of the distance to Cape Florida, and is, perhaps, the ultimate limit of population on the Atlantic coast. But whether the government determine to open a communication south of St. Augustine or not, I consider it highly important that a good road be made from the St. Mary's river to St. Augustine.

Annexed are the reports of Colonel Gadsden, marked A, B, and C, which contain much valuable information in relation to the country south of St. Augustine.

For those surveys Congress appropriated three thousand dollars, of which nine hundred and twenty-seven dollars and eighty-five cents remain unexpended.

The northern section of the road authorized from Coleraine, in Georgia, to Tampa Bay, in Florida, by an act of Congress approved the 3d day of March last, will be commenced in the course of next month. By the last accounts received from Tampa Bay I have reason to believe the troops are now employed upon the southern section of that road. The whole country through which it must pass is low and flat. The labor of making it will, consequently, be greater than had been anticipated. The sum already appropriated, will, however, be sufficient to make a practicable road for carriages of every description in the dry season of the year; but to make the causeways and bridges necessary in the wet season, and to construct a road equal to that from Pensacola to St. Augustine, a further appropriation of six thousand dollars will be necessary.

A road is much required from Natchitoches to Fort Towson, on Red river, and thence to Fort Gibson, on the Arkansas. Those posts are highly important, whether they be considered in relation to the military defence of the southwestern frontier in the event of war, or their influence over the Indian tribes in their vicinity during peace. At present they are almost without communication, both with the interior and with other posts. The distance from Natchitoches to Fort Towson is about three hundred and twenty miles, and thence to Fort Gibson is about one hundred and fifty miles. A good road could be made by the troops at a trifling expense. As it regards the military defence of that frontier, I consider the improvement of the navigation of the Red river a matter of the first importance; it might be done by the troops, and I confidently believe the difference of the expense for the supply of Fort Towson would in five years equal the sum necessary to complete the work.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Brigadier General and Quartermaster General.*

Hon. JAMES BARBOUR, *Secretary of War.*

## A.

KERVILLE TOMOKA, *November 5, 1824.*

SIR: I have surveyed and marked the route of the contemplated road to Cape Florida, as far as this place, a distance of forty-four and a half miles from St. Augustine. After examination, I have selected, as the most favorable route thus far, *the old King's road to New Smyrna*, which is still in a tolerable state of preservation, and might be placed in complete repair at a comparatively small expense. The principal labor to be bestowed upon it would be in bridging of the small creeks over which it passes, which do not exceed ten in number, and all of them narrow, not exceeding from thirty to fifty feet in width.

I have deemed it advisable to make this hasty and partial report, that Congress may be able to act on the subject should circumstances prevent my final reports from being received in time. I think this road would be important, even should it be found impracticable to extend it to the cape. It would open a communication between the settlements on Tomoka to St. Augustine, and encourage emigration to the Moschetto and Indian river, a frontier which it would be all-important to populate as early as practicable. I am inclined to the opinion that \$2,000, with two companies, would place this road, as far as the Tomoka, in very good repair.

With respect, your obedient servant,

JAMES GADSDEN.

General JESUP.

## B.

KERVILLE TONECKA, *December 21, 1824.*

SIR: I have to report to you my return to this place, having failed in accomplishing the objects of my commission. The day after my departure from hence, we encountered most inclement weather, which, in conjunction with the inundated character of the country in which we were operating, the uncommon warmth of the season, the badness of the weather, and the unavoidable fatigue we were exposed to, soon generated disease in my camp, which increased to such an alarming degree, on my arrival at the St. Lucie river, as to leave me but three effective men—a number not even sufficient for the necessary attentions to the sick. Finding it therefore impossible to advance, the only alternative left was to retreat by short marches, halting as often as necessary, upon my old blazes. I have thus succeeded in returning my party, with the loss of two buried in the wilderness, to this place. Notwithstanding the distressing circumstances which have thus embarrassed my operations, I have succeeded in making, in my opinion, the most direct practicable route of a road as far as the St. Lucie river, and about two-thirds of the distance to Cape Florida, if not the whole of the distance contemplated by the act of Congress.

The St. Lucie is unquestionably beyond the ultimate limit of population on the Atlantic border of Florida, (excepting such establishments as may be made for the object of wrecking and fishing near the cape,) and, from the character of the country, far south of any point from which an enemy would attempt hostile operations. Both for military purposes, therefore, and as a convenience to future inhabitants on the Atlantic border, the route of a road has been marked to its full extent. I am inclined to the opinion, however, after a somewhat minute examination of the country, that the improvement of the inland navigation, as far as the southern point of Indian river, would effect the objects which government have in view by a road at a much less expense. For military purposes it would be superior, and as a convenience to future settlement on the Atlantic coast of Florida, it would be preferable. The only land fit for cultivation is on the immediate margins of the rivers, which, strictly speaking, are inlets from the sea and run parallel with it. The inland navigation would be bringing the means of transportation to the very door of each inhabitant, while the road, from the nature of the ground, must necessarily be from one to two miles west of each settlement. A road could not, from the flat character of the country, be accomplished without much labor and consequent expense; without calculating the possible loss of lives, from operating in a country unfriendly to those not acclimated.

The population from the real poverty of the country south of the Moschetto river cannot be dense, and consequently will not be capable of preserving the road from dilapidation after completed. The only expense to be incurred in the inland navigation, to the extent noted, will be in opening a canal at the Haul Over, between Indian river and the Moschetto, the distance of which is represented not to exceed one mile. With these impressions, I suggest to your consideration the propriety of first placing in complete repair the old King's road, which has been marked by me as far as Tomoka, and may be traced, without much difficulty, beyond to Smyrna; and, secondly, that of opening a canal at the Haul Over. The first operation may be performed at a comparatively trifling expense; it is already in a tolerable condition, the old causeways only requiring repair, and the small creeks which it crosses to be bridged. These are all of inconsiderable width, averaging, perhaps, from twenty-five to thirty feet. I have not the time, by this opportunity, as I am anxious to despatch my sick to St. Augustine, to furnish you with an estimate of probable cost in detail; but if soldiers are to be employed in the operation, I hesitate not in expressing it as my opinion that, with judicious management, \$5,000 will accomplish the object.

As to the second operation, *the canal at the Haul Over*, I will report to you after a personal examination of the situation. I have sent to town for a reinforcement of men, and the interval I shall employ in making the necessary examinations, when I will write you on the subject.

In marking the Indian boundary, I shall necessarily be compelled to approach within thirty or forty miles of the point on the St. Lucie where my recent operations terminated.

I contemplate, therefore, obliquing to that position, and continue the route of the road as contemplated, if practicable. From all the information, however, I have been able to collect, it would seem that the St. Lucie is within thirty miles of the most southern point to which a road can be made. Beyond that the country is cut up by lagoons and morasses, and so impassable as to compel the Indians to seek the sea and beach in order to effect a journey to the cape. These uncertainties, however, will be ascertained from personal inspection, when you will receive a detailed report from me, embracing all the objects to which my attention has been directed by your communication.

I conclude with reiterating my suggestion as to the propriety of obtaining an appropriation this session of Congress for the road as far as Tonecka or Smyrna. If the government hereafter should persist in extending it to the cape, much will have been already performed, and the whole operation cannot be performed in a single season. The distance from St. Augustine to Tonecka, 44½ miles; from Tonecka to Spruce creek, 15½ miles; Spruce creek to Smyrna, 7 miles; total, 67 miles.

With respect, your obedient servant,

JAMES GADSDEN.

Brigadier General THOMAS S. JESUP, *Quartermaster General.*

C.

*Report of the survey of a road from St. Augustine to Cape Florida by Colonel Gadsden.*

CHARLESTON, *South Carolina*, August 20, 1825.

SIR: In my previous communications to you I have reported the obstacles encountered, the sickness and death which afflicted my party, and the disasters generally which attended my first operations in surveying the route of a road from St. Augustine to Cape Florida. After having, under complicated embarrassments, penetrated to the St. Lucie river, two-thirds of the distance contemplated, disease in my camp rendered my party unfit for active service, and compelled me to retrograde to the settlements on Tomoka. Having reorganized my corps, my second efforts were attended with more success, and I now report to you in detail the result of my labors and observations in the performance of the duties of the commission received from the department over which you preside.

The country south of St. Augustine, to the very extremity of the promontory of Florida, is alluvial, and has been formed by successive encroachments on the Atlantic. A chain of inlets or sounds and fresh water lakes extend north and south for the greater part of the distance, separated from the ocean by a narrow barrier of sea beach and sand hills, and communicating with it at intervals by contracted and shallow entrances. On the west of these inlets and lakes is a parallel chain of sand hills, from one quarter to half a mile wide, intersected by inconsiderable pine flats and oak hammocks, the western base of which is washed by another succession of smaller lakes or saw-grass ponds and swamps, occasionally connected with each other by natural canals. To the west of these ponds commence the pine planes and saw-palmetto flats common to low latitudes, varying in the character of their surface and elevation, and more intersected by grassy and cypress ponds as you descend south, until they are lost in communication with the everglades, or submerged flats of the cape, spotted with small islands of pine, palmetto, &c. Immediately west of these pine planes is an immense grassy savannah, inundated the greater part of the year, and forming the source of the river St. John's. This great basin, receiving the overflowings of all the interior swamps and ponds, branches to the east and west, and discharges its accumulated waters by many minor streams, which disembogue into the Atlantic ocean and Gulf of Mexico. It is an inexhaustible reservoir, tributary to almost all the rivers which intersect and flow through the promontory of Florida. Those on the eastern coast, and which are among the principal obstructions to the opening of a road to Cape Florida, are the Tomoka, Spruce, Elbow, Crane, Turkey, St. Sebastian, St. Lucie, Jupiter, Rio Seco, Middle, New, Rantones, and Miami rivers. The route of the road surveyed is on the pine lands described as lying between the sand hills and second chain of minor lakes or ponds on the east, and the great basin of the St. John's, west, until opposed at Jupiter inlet by the everglades, and from thence on the sand beach of the ocean as the only practicable communication with the cape. The beach at low tide is spacious and firm, and the lakes, sometimes approaching within sixty, and never receding more than 250 yards from the ocean, furnish an abundant supply of fresh water. An attempt to penetrate by the everglades proved unsuccessful; the whole surface of the earth was covered with water from four and five inches to two and three feet in some places. For two days my party waded through these submerged flats, and with the greatest difficulty could a spot be found sufficiently extensive and free from water, for dry it was not, on which to pitch our tents. On the last night we had to elevate our blankets from the water, which flowed beneath our bodies, with sticks, palmetto leaves, &c. The route blazed crosses the streams which have been enumerated at points where they are fordable, or where they present facilities for ferries or bridges; and ferries will be only necessary on the Tomoka, St. Sebastian's, St. Lucie, Middle, and New rivers. A more eastern route, so as to edge the western base of the second chain of sand hills, which have been noticed, would present the best ground for a road, and many of the difficulties on the route marked, from ponds, flats, &c., requiring causewaying, might be avoided. But in this case greater labor would have to be encountered in removing an impenetrable growth of scrubs, palmetto, &c., and more ferries become necessary over rivers of no inconsiderable magnitude. Thus, Elbow, Crane, and Turkey creeks, which are but minor streams and fordable where crossed by the road, are, in less than one mile to the east, swollen into rivers of eighty and one hundred yards wide, with deep and precipitous banks, while the St. Sebastian's and St. Lucie, the one about twenty-five and the other eighty yards wide at the points designated for ferries, nearer their mouths widen into rivers of a half and of a mile in extent. These difficulties however would not weigh in consideration with the superior character of the ground otherwise obtained, if the country was such as to encourage a hope of the frequency of travelling, or the density of population ever presenting sufficient inducements to individuals to keep up ferries at the points designated. The whole country south of the Moschetto offers but feeble allurements to an agricultural population, and this opinion is somewhat strengthened by the fact of there being no evidences, within that distance, of old Indian settlements; scattering hunting camps alone indicate the purposes to which that district had been hitherto appropriated.

The only land fit for cultivation is on the immediate margins of the rivers or inlets, inconsiderable as to extent and of light sandy soil, barely sufficient to raise the ordinary subsistence in grain for small families whose energies may be directed to other than agricultural objects. The resources of the southern district of Florida are limited to ranges for stock of cattle, to wrecking, and the fisheries; objects in themselves opposed to a dense population, and only inviting to that class of adventurous emigrants who

attach little value to roads, and would prefer, in their neighborhood communications, making use of those channels provided by nature. These channels are in the chain of inlets and lakes which have been noticed as extending, with but partial interruptions, the whole length of the coast from St. Augustine to Cape Florida. Thus the waters of the Matanzas flowing into St. Augustine harbor and those of the Moschetto or Halifax approach within eight miles of each other, while the southern extremity of the latter are separated from those of Indian river by a narrow isthmus of less than one mile in width. Indian river, in the high waters, is connected by a natural canal with a large lake south, which, with very inconsiderable labor, may be made to communicate, through the Rio Seco and Middle, with New river, discharging into the Atlantic only 20 miles north of Cape Florida. But by only opening the communication by a canal through a low level surface, requiring no locks, between the Matanzas and Moschetto or Halifax and the latter inlet and Indian river, a distance of but nine miles, a safe inland communication along the eastern coast of Florida from St. Augustine south, for upwards of 200 miles, may be secured to the country, the benefits of which may be extended north as far as Charleston, South Carolina, by another canal of about 10 miles in extent, uniting the waters of the North river with those of the St. John's. Connected with this imperfect general sketch of that portion of the eastern section of Florida which has come under my observation in the survey of the road assigned me, I subjoin a more minute description, in divisions, of the whole distance according to the variety of character in the country, with a geographical sketch, estimate of probable costs of construction of roads, &c.

#### *Description.*

From Solanos ferry, west of St. Augustine, by the route of the old King's road, to Tomoka, 44½ miles. For the first 25 miles, generally flat pine lands intersected by three creeks, Moultrie, Three Runs, and Mill, the first about 15 feet wide and easily bridged; the second, from swamps on both sides, intersected by small branches, about 200; and the third about 70 yards wide. Within the same distance five old causeways, the whole not exceeding 250 yards in extent, will require repairing. The last 9½ miles to Tomoka, sandy, black-jack, scrub, and spruce pine ridge, occasionally diversified with pine flats, and spotted with small ponds, and intersected by nine small creeks running to the east, and from fifteen to twenty-five feet wide, all easily bridged. Tomoka river, about forty-five yards wide and favorable for a ferry, high bluffs on the south, and marsh on the north bank, with an old causeway about 200 yards wide and easily repaired. The situation owned by Mr. Andeson, who resides on the spot, and willing to establish a flat for the accommodation of travellers so soon as the road can be opened.

From Tomoka to Spruce creek, 15 miles 32 chains, crosses near the Tomoka a small branch tributary to the same. Level pine lands, interspersed with saw-palmetto flats and low, wet, grassy planes, with scattering growth of dwarf pine trees, occasionally spotted with cypress ponds and swamps. The greater part of this distance will require causewaying.

From Spruce creek to Indian river, 33 miles 76 chains, Spruce creek, including the Cabbage tree and Hammock margins which are subject to overflow and will require causewaying, is about 200 yards wide. The first ten miles low, wet, pine, saw-palmetto flats, interspersed with cypress ponds and grassy planes, converted from their lowness, after heavy rains, into ponds. For the next six miles cypress swamps and saw-grass ponds, diversified occasionally with saw-palmetto and bay-bush flats. These are the sources of Indian river, and unavoidable as extending west, and communicating with the savannahs and tributaries of the St. John's river. The last seven miles pine and saw-palmetto planes, singularly spotted with saw and flag grass ponds, and occasionally diversified with sea-sand hills and pine land swells, with an undergrowth of broom-grass—their superior elevation only detected by their comparative dryness. The greater part of this distance will require causewaying, and the labor in rendering practicable for wheel carriages a road through the cypress swamps, heads of Indian rivers, will be considerable.

Ridge of Indian river, 23 miles 40 chains. For one half of this distance high ridged, diversified with sea-sand undulations, and occasionally indented with ponds. The last half level pine lands, comparatively dry, spotted as usual with ponds. To Elbow creek, 15 miles 40 chains; to Crane creek, 9 miles 40 chains; to Turkey creek, 11 miles 10 chains; to St. Sebastian's, 5 miles 20 chains; to St. Lucie, 34 miles 55 chains; the whole distance 76 miles 5 chains; generally pine planes, diversified with occasional swells of saw-palmetto lands and interspersed with grassy flats, spotted with cypress and bay ponds. A large portion of this distance will require causewaying; the base, however, being sand, a solid foundation for a road may be obtained. Elbow, Crane, and Turkey creeks are narrow, from 15 to 20 feet wide, where crossed, and seldom otherwise than favorable; they may with great facility be bridged. The St. Sebastian's and St. Lucie are deep, with perpendicular banks; the sites, however, are favorable for ferries, the former about 25 and the latter 80 yards wide. From St. Lucie to Jupiter river, 30 miles 50 chains. The country similar in general character to that just described; the ponds, however, increasing in number and magnitude, and the dry land scarcer as you descend south, crossing in the distance four small streams, easily bridged, tributaries to a southern branch of the St. Lucie. Jupiter river, about 35 yards wide, subject apparently to great freshets, but may be bridged.

From Jupiter river to sea beach, 8 miles 20 chains, crossing the canal or communication between the lakes south and Jupiter inlet north, a grassy channel about 70 yards wide, with a rapid current from the lake, subject to overflowing when the lake is full, though generally fordable, with firm, sandy bottom. The first four miles flat pine lands comparatively dry, the last sea-sand undulations.

On beach to Rio Seco, 35 miles 15 chains; Middle river, 5 miles 30 chains; mouth of New river, 13 miles 43 chains; west point of Bear cut, opposite Cape Florida, (bay about 3 miles wide,) 20 miles 45 chains. The whole distance 74 miles 48 chains. The beach at low tide is spacious and firm, with the ocean on the east, and sand hills and chain of fresh water ponds or lakes on the west, sufficiently convenient to furnish to the traveller an abundant supply of water. The sand hills do not present the naked appearance of more northern latitudes but are generally covered with grass, and occasionally crowned with a thick overshadowing growth of sea or mangrove grape. From being exposed generally to a wind, blowing uniformly from the same quarter, regularity has been given to their figure, and instead of the sea-sand undulations common to the north, and the dazzling reflection of light from the convex and concave inequalities of their surface, these ridges present the appearance of artificial parapets, with their scarps and berms all seemingly sodded with the skill of an engineer. The Rio Seco has been closed by a sand bar which has been formed across its mouth, and similar sandy seals have been placed very recently upon Jupiter and Little Matanzas inlets. The whole Atlantic coast of Florida presents evidences of these struggles between the sands, set in operation by the agitations of the ocean and the currents of the rivers,

the one striving to close and the other to maintain an outlet for their waters. Middle river is now fordable at its mouth, and a sand bar forming across the New river has already diminished the depth of water at its entrance to less than four feet. Middle river will, more than probable, suffer the fate of the Rio Seco, Jupiter, &c., and this decrease in the number of the outlets to the lakes, necessarily diverting an accumulated discharge of water through the channel of New river, may alone counteract the operations of the sea on its entrance.

*Estimate of cost of construction of road, &c.*

80 m. 00 c.	From St. Mary's river, by Jacksonville, to Solano's Ferry, principally repairing old road, bridges, &c. . . . .	\$5, 000
42 m. 40 c.	From Solano's Ferry to Tomoka, with causeways and bridges. . . . .	4, 000
15 m. 32 c.	From Tomoka to Spruce creek. . . . .	1, 500
33 m. 76 c.	From Spruce creek to ridge of Indian river. . . . .	4, 500
23 m. 40 c.	From ridge of Indian river. . . . .	1, 000
76 m. 05 c.	From ridge of Indian river to St. Lucie river, bridging Elbow, Crane, and Turkey creeks, ferries on the St. Sebastian's and to St. Lucie. . . . .	8, 500
30 m. 50 c.	From St. Lucie to Jupiter river. . . . .	3, 000
8 m. 20 c.	From St. Lucie to beach. . . . .	1, 000
74 m. 48 c.	From Beach to Bear cut, opposite Cape Florida, for road —O—; two flats, one at Middle, the other at New river. A Mr. Cooley and Williams reside at this place, either of whom will keep a ferry. Middle river is generally fordable at its mouth. . . . .	200
<hr/>		
386 m. 71 c.	From St. Mary's river to Cape Florida. . . . .	28,700
<hr/>		
306 m. 71 c.	From St. Augustine to Cape Florida, as surveyed. . . . .	23,700
80 m. 00 c.	From St. Mary's to St. Augustine, on old road. . . . .	5,000
<hr/>		
386 m. 71 c.		28,700
<hr/>		

The above estimate is founded on the labor being performed by soldiers, receiving only their extra pay.

Should it be deemed advisable to open the road, for the present, only to Smyrna, the route of the road marked will have to be abandoned at the Tomoka Ferry, and the Old King's road followed, or a more eastern route selected, so as to cross Spruce creek at or near its connexion with the Halifax. The facilities, however, of crossing this creek, from its width and margins of marsh, are diminished on approaching its mouth. On the Old King's road there is the remains of a causeway, which may be repaired without much labor. I am inclined, however, to the opinion that the superior advantages of a more eastern route will more than counterbalance any greater difficulties which may be encountered from crossing the creek still nearer its mouth. If the road be opened to Smyrna, it may be continued at a very inconsiderable expense, should it be deemed important, along the high ridge of the South Halifax sound to the Haul Over, at Indian river, thus avoiding the bad cypress swamps near the heads of this stream.

The great width of Indian river at the Haul Over, and for many miles above, presenting more the appearance of an inland sea, is the only objection to the selection of this direction for a road to Cape Florida. In other respects, for that distance, it possesses a decided preference over the route surveyed and marked. Crossing Indian river at this point, however, the road would be continued from thence on the survey which has been made. It may be here necessary to state that I do not consider my blazes as undeviating guides to those who may be intrusted with the construction of the road, but as merely designating a line of operations from which any deviations may be made which subsequent and more minute examinations of the adjacent country might render advisable. The objects of my commission were more to ascertain the practicability and probable cost of a highway between St. Augustine and Cape Florida than to survey and mark every aberration from a direct line which might be necessary to avoid obstacles and for the selection of the best ground. This operation would have required a more minute examination of the whole country than was practicable with the exploring party under my command, and the unavoidable disasters which interrupted our early movements, and can be better performed by the roadmakers keeping always in advance, and on the flanks of the laborers, a small intelligent examining party. Such was the character of the country in many places that it was impossible to keep on ground where the road ought to run. A thick, impenetrable growth of saw palmetto, bay, scrub, and briar bushes, matted together, often forced my party to seek a passage through ponds and savannahs, and abandon the higher grounds, thus obstructed, for the lower lands, where the waters only had been able to check the luxuriant growth of these southern latitudes.

From the detail now furnished you will be able to form your own opinion as to the cost, practicability, and advantage of a road from St. Augustine to Cape Florida, agreeably to the examination which has been made under an act of Congress. Whatever differences of opinion may be entertained on the subject of the whole extent, none I hope will exist as to the great necessity of opening immediately the highway south as far as New Smyrna. The route of the King's road may be selected, which will require little more expense than for the repairs of the old causeways and bridges over the smaller branches and creeks. To extend, however, as much as practicable the benefits of this communication, and to open a passage for emigrants to the Atlantic as well as western coast of a territory, the populating of which is a policy of national importance, I would suggest to your consideration the propriety of commencing operations at the St. Mary's river, so that the road may branch from Georgia *west* to the Bay of Tampa, as has been sanctioned by appropriation, and *east* along the Atlantic border to the extent which may be approved. The immediate operation as far as New Smyrna will be necessarily connected with any subsequent extension of the communication to the cape which the government of the United States may think advisable, and will cost, as estimated, \$11,000, divided thus:

From St. Mary's to St. Augustine . . . . .	\$5,000
From St. Augustine to Tomoka . . . . .	4,000
From Tomoka to Smyrna. . . . .	2,000
<hr/>	
Total. . . . .	11,000
<hr/>	

The communication to Cape Florida may be extended hereafter, either by opening and improving the inland passage by the lakes and sounds which have been described, or by the road which has been surveyed. For the accommodation of any population which may be induced to settle south of the Moschetto, the inland communication would be preferable; and I am inclined individually to the opinion it would even prove so for all military defensive operations which events might render necessary. A road sufficiently practicable for rapid military movements, and for the necessary unimpeded transportation of heavy ordnance, baggage-wagons, &c., south of Smyrna, could not be constructed but at a cost greatly exceeding the estimate which has been furnished, with a continued annual expense to keep it in a proper state of repair. The population on the route will probably never be sufficient to contribute to this important object, while the inducements to individuals to keep up the necessary ferries will scarcely ever be adequate.

This communication contains, however, only the hasty observations and speculations of an individual on a country, made under many unfavorable circumstances. However just may be his inferences from the existing state of things as to the uncertainty of the immediate concentration of a population south of the Moschetto, it is not improbable that the improvement in the science of agriculture now attracting general attention, and the discovery of some new southern staple, the unknown value of some native production, with the successful introduction of fruits, tropical and European, adapted to a climate supplying the deficiency of a light sandy soil, connected with the inexhaustible reservoirs of valuable fish, extensive ranges for cattle, and a seabeach annually enriched by the misfortunes of the enterprising, may, in these combined objects of fruit, fish, stock, and wrecking, under a mild and salubrious climate, present strong allurements to emigrant adventurers, and particularly to a class of citizens where capital being tonnage, and where ploughing is confined to the deep, may convert Cape Florida and the coast into a southern nursery for seamen. The object, therefore, of opening a communication to the southern extremity of Florida, whether by the inland passage noticed in this communication or by the road which has been surveyed, will, it is hoped, be steadily held in view as connected with those great internal national works now attracting general attention, and which have become identified with the most approved policy of the republic.

I remain, with great respect, your obedient servant,

JAMES GADSDEN.

General THOMAS S. JESUP, *Washington City.*

[Appended to this report in the original is a map of the survey.]

C.

OFFICE OF COMMISSARY GENERAL OF SUBSISTENCE, *Washington, November 25, 1825.*

SIR: In compliance with your orders of the 12th instant, I have the honor to submit a statement of the moneys remitted and charged to contractors, and assistant and acting assistant commissaries, during the first, second, and third quarters of the present year, together with the balances on hand December 31, 1824, amounting in the aggregate to..... \$364, 307 74  
 And the disbursements made by them for the same period, amounting to..... 333, 382 29

Leaving a balance to be accounted for in the fourth quarter of..... 30, 925 45

And making the balances due to government on the 30th of September, 1825, \$7,611 63 less than on the 31st of December, 1824.

Of the sum of \$30,925 45 due on the 30th of September, \$7,000 were remitted to the assistant commissaries at New Orleans and St. Louis in the last month of the third quarter to meet the disbursements at those posts in the fourth quarter of the year, and \$2,620 71 were ordered to be transferred to the quartermaster's funds at Detroit, where it was wanted for the expenditures of that department; leaving in the hands of the assistant commissaries at all the other posts, including Tampa Bay, Fort Armstrong, Council Bluffs, St. Peter's, Mackinac, and the Saut de St. Marie, too remote to receive the accounts for the third quarter, the sum of \$21,304 74, part of which has already been expended on account of that quarter, and the residue will remain entirely applicable to the expenditures of the fourth quarter of the year, during which period the greater portion, if not the whole amount, will be disbursed.

Very respectfully, your most obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

HON. JAMES BARBOUR, *Secretary of War.*

Statement exhibiting the moneys remitted to contractors from January 1 to September 30, 1825, the sums charged to them on account of failures, the amount retained to cover purchases that may arise from failures, and the amount accounted for by them; the balances in the hands of the assistant and acting assistant commissaries of subsistence on December 31, 1824; the moneys remitted to them in the first, second, and third quarters of 1825; the sums charged to them on account of sales to officers on the frontier posts; sales of empty barrels, boxes, &c.; and the amounts accounted for by them for the same period; together with the balances in their possession at the expiration of the third quarter of the year.

Names.	Balances on hand Dec. 31, 1824.	Remitted.	Charged on account of failures, sales to officers, &c.	Total amount charged.	Accounted for.	Balances in possession of assistant commissaries Sept. 30, 1825.	Balances due to the assistant commissaries September 30.	Retained from contractors, to cover purchases.	Remarks.

PAYMASTER GENERAL'S OFFICE, *War Department, November 28, 1825.*

SIR: I have the honor herewith to submit a report in detail of the money advanced to the several paymasters of the army within the first three quarters of the present year, amounting to \$794,308 71, of which the sum of \$753,839 11 has been accounted for, leaving a balance of \$40,469 60 to be settled within the fourth quarter.

From the reports of paymasters I am authorized to state that by this time all the troops have been paid to the first of September, and that the *whole* amount of advances within the first three quarters will be accounted for without loss to the government before the close of the year.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

HON. JAMES BARBOUR, *Secretary of War.*

*Statement of the amount of money drawn from the appropriations for the pay department and remitted to the disbursing officers on account of payments for the first three quarters of the year 1825, the amount unexpended and deducted from the estimates for the fourth quarter, the balance to be accounted for, and the periods to which the troops have been paid and accounts rendered.*

Names of paymasters.	Amount of funds re- mitted on the first three quarters of the year.	Amount unexpended, and deducted from the estimates for the 4th quarter.	Balance remaining to be accounted for.	Periods to which the troops have been paid and accounts ren- dered.	Remarks.	
David S. Townsend.....	\$30,300 00	.....	.....	September 1, 1825.....	\$708 82 due Paymaster Townsend.

PAYMASTER GENERAL'S OFFICE, *November 28, 1825.*

## E.

SURGEON GENERAL'S OFFICE, *October 27, 1825.*

SIR: In compliance with your order of the 3d instant, I have the honor to report that the amount of money disbursed in the medical department during the first three quarters of the present year was \$20,245 32, and that the whole has been regularly settled and accounted for without delay or loss. Of this sum a small amount was applied to the payment of an old claim, so that the current expenses of the department have been precisely the same as during the previous year.

The annual requisitions were received at the stated period, and the supplies immediately put up for the several posts. They were reported to be of the best quality, and were purchased on the most reasonable terms.

The returns and reports required by the regulations have been duly received. All public property has been satisfactorily accounted for, and the hospitals appear to have been amply supplied in every respect.

The number of deaths reported during the first two quarters was but fifty-four; of which fifteen were from consumption, four from intemperance, and eleven from casualties; leaving but twenty-four from all other causes during the six months. The whole number reported during the same period of the previous year was fifty-three.

All the officers of the medical staff are on duty or under orders for their respective stations except one assistant surgeon, who is on furlough in consequence of ill health; and the reports from various sources, official and unofficial, concur with the trifling bill of mortality in showing that a faithful and diligent attention to duty has been, with scarce an exception, added to no ordinary degree of professional talent and acquirement.

Very respectfully, your obedient servant,

JOS. LOVELL, *Surgeon General.*

HON. JAMES BARBOUR, *Secretary of War.*

## F

COMMISSARY GENERAL'S OFFICE, *Philadelphia, November 18, 1825.*

SIR: In obedience to your instructions dated on the 3d October, 1825, I have prepared, and now have the honor to enclose, eight statements, as follows, viz:

No. 1. Of moneys drawn from the appropriation for the purchasing department during the first three quarters of 1825.

No. 2. Of moneys drawn from the appropriation for the purchase of woollens for 1826, in advance, during the same period.

No. 3. Of moneys received and disbursed during the same period on account of the purchasing department.

No. 4. Of moneys received and disbursed during the same period on account of the appropriation for the purchase of woollens in advance for 1826.

No. 5. Of moneys drawn from the appropriation for building a brick and stone wall around the arsenal lot during the same period.

No. 6. Of moneys received and disbursed during the same period on account of arsenals.

No. 7. Of moneys received and disbursed on account of contingencies during the same period.

No. 8. Being a comparative statement of the cost of clothing for the army of the United States during the years 1824, 1825, and 1826; all of which I hope will meet with your approbation.

These statements, with the exception of No. 6, have been ready for some days, but I was desirous to have settled and introduced the masons' account therein, which would have accounted for nearly the whole of the money; and as large advances were made to them previous to 30th September, 1825, the expense of building the wall ought to have been embraced; but, to prevent imposition, I have been under the necessity of having the work inspected, measured, and valued, and will therefore detain the statements no longer on that account, although it exhibits moneys in my hands that have been long since paid to Cromwell, Andrews & Co., the contractors.

With great respect, I have the honor to be, sir, your most obedient servant,

C. IRVINE, *Commissary General of Purchases.*

HON. JAMES BARBOUR, *Secretary of War.*

COMMISSARY GENERAL'S OFFICE, Philadelphia, November 18, 1825.

HON. JAMES BARBOUR, Secretary of War.

C. IRVINE, Commissary General of Purchases.

G.

ORDNANCE DEPARTMENT, November 29, 1825.

SIR: In compliance with your instructions, I have the honor to communicate herewith the papers marked A, B, C, D, E, and F, which contain the statements required.

Statement A exhibits an account of the remittances through this department in the year 1824, showing the amount under each head of appropriation received and expended by each disbursing officer, and the balance remaining in the hands of each at the close of the year.

By this statement it appears that the total amount of money remitted through this department during the year 1824 was.....	\$638,798 82
And that the amount of accounts rendered during the same period was.....	617,838 62
Leaving a balance in the hands of disbursing officers at the close of the year of.....	20,960 20

The whole of which was accounted for in the first quarter of 1825, except a balance due from the estate of a deceased officer, which is in course of payment.

Statement B exhibits an account of the moneys transmitted to the several disbursing officers at the armories and arsenals during the first three quarters of the present year, the amount of the accounts rendered by them during the same period, and the balances remaining unexpended in the hands of each at the close of the third quarter.

By this statement it appears that the total amount of moneys transmitted was.....	\$360,450 11
The amount of accounts rendered.....	353,247 63
The amount remaining unexpended in the hands of disbursing officers at the close of the third quarter, and applicable to the service of the fourth quarter.....	7,202 48

The accounts of all the disbursing officers of this department have been rendered up to the 30th September last, excepting in one case, where the officer died a short time previous to that date.

Statement C shows the number and description of arms and accoutrements procured, and the expenditures made, under the act for arming and equipping the militia, during the first, second, and third quarters of the present year.

The arms procured are 5,630 muskets, and 3,660 rifles, with 1,500 rifle flasks.

The amount drawn from the treasury on this account is.....	\$131,963 01
Amount collected on account of advances made to contractors prior to the year 1819.....	3,695 00
Total value of arms procured.....	135,658 01

Statement D exhibits an account of the work done, and supplies procured, at the several arsenals and armories during the year ending September 30, 1825. By this statement it will be seen that 29,500 muskets, and 1,000 rifles have been manufactured at the national armories during the year. This number exceeds, by about 3,000, the product of any former year, and the arms are equal in quality to any heretofore made.

In addition to the particulars exhibited in this statement, much other business has been done, which cannot be stated in a tabular form; such as the repair of the public buildings, the arrangement and preservation of the military stores, and the improvement of the depots generally, to which due attention has been given.

The work done under the appropriation for arsenals, which is not exhibited in this statement, is as follows, viz: at the arsenal in Washington, D C., there has been erected one building, 100 by 30 feet, two stories high; one building, 75 by 25 feet, two stories high; one building, 45 by 22½ feet, two stories high; and two small buildings, 25 by 19 feet, one story high; all of which are substantial brick buildings.

At the arsenal in Watervliet, N. Y., but a small portion of the appropriation has been expended. It was found, after the appropriation was made, that building materials could not be procured upon favorable terms so late in the season. It was considered necessary, also, that additional ground should be purchased, before all the buildings contemplated at this post should be commenced. For these reasons it was deemed most advisable to defer erecting the buildings until the next season. Arrangements have, however, been made for procuring the necessary materials, preparatory to an early commencement next spring.

The amount appropriated for the arsenal at Baton Rouge has been transmitted to that post, and will effect the object contemplated.

Statement E exhibits the number and description of ordnance and ordnance stores issued from the arsenals to the army and military posts, during the three first quarters of the present year.

Statement F exhibits a view of the operations at the United States lead mines in the vicinity of Potosi, Missouri, and near Fever river, an eastern branch of the Upper Mississippi. By this statement, it appears that the amount of lead produced at those mines, during the first nine months of the present year, was 887,298 pounds; and that the amount received by the United States, for rent of mines, during the same period, was 104,113 pounds. If to the latter be added the amount which it is estimated will accrue on the ore already raised, and which it is supposed will be smelted during the present quarter, the rents will be augmented to 192,113 pounds.

The number of leases granted is twenty-seven, the greater part of which were given during the present year. The business is therefore in its incipient state at present, and it is estimated that in the next year the product of the mines now in operation will amount to three or four million pounds, yielding a rent to the United States of about three hundred and fifty thousand pounds.

The rents have been fixed at a very low rate, being but ten per cent. on the lead produced at the mines, while the duties on imported lead are more than twenty-five per cent. It is supposed therefore that additional leases will be applied for, and that five million pounds will be made at the United States mines next year, which will yield a rent of half a million pounds.

It may be proper to add that it is not contemplated to sell any of the lead which has been or which may be received on account of rent, but to deposit it in the arsenals for public use.

Contracts have been entered into for cannon and shot for the new fortifications, to the extent authorized by the appropriation made on the 2d of March last. The contractors are engaged in the business, but have not yet made any deliveries.

These contracts were made by this department in the usual manner, after having been submitted to and approved by the proper authorities. The contracts for cannon were made upon proposals invited by letters addressed to the proprietors of all the foundries where cannon had been made for the public service, and which were then in operation. The contracts for shot were made upon proposals obtained by public advertisement. It may not be irrelevant to advert briefly to the considerations which led to this course.

All the existing cannon foundries, as well as the manufactories of small arms, had been established under the assurances of continued support from the government, if their terms and the quality of their work should prove satisfactory. These foundries have accordingly continued to furnish all the ordnance required for the public service, both for the War and Navy Departments. The experience acquired in a practice of many years enables them to furnish ordnance of a more safe and durable description and of a better quality, generally, than could be expected from new establishments. The cannon foundries now established are capable of furnishing more ordnance than is required in the public service. It was not therefore considered either advantageous to the public interest or just to those who had relied upon the promised support of the government to depart from the course long since established and uniformly pursued for a number of years, by inviting proposals from persons unaccustomed to the business, and thereby encouraging the establishment of additional cannon foundries which the wants of the public service did not require and could not sustain. The course uniformly pursued in procuring the public supplies, both of small arms and of cannon, was therefore adhered to by the government.

As there are no foundries designed for the manufacture of shot exclusively, and as most of the ordinary foundries of the country are competent to make them, without incurring any material additional expenses, proposals for them were invited by public advertisement, from the belief that competition, in this case, would be advantageous to the public interest, without the hazard of receiving for the public service articles of an inferior quality.

I have the honor to be, sir, very respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel on Ordnance service.*

HON. JAMES BARBOUR.

*Report of the operations of the Engineer department during the year ending September 30, 1825, accompanied by documents marked K, L, M, and N.*

ENGINEER DEPARTMENT, *November 21, 1825.*

SIR: I have the honor to present the following as the annual report of the operations conducted under the direction of the Engineer department during the year ending on the 30th of September last, and to refer to it, as affording the information required to be furnished, by the instructions contained in your letter of the 3d ultimo, on the subjects of fortifications, internal improvements, and the Military Academy; and I beg leave to refer to the general estimate of funds required for conducting the operations under the Engineer department, during the next year, for information respecting the office of the chief engineer, which subject was also included in the instructions.

The fiscal operations of the Engineer department, referring to the several subjects to be embraced by this report, as above stated, are exhibited in the accompanying table marked K. The amounts available for the respective operations, as derived from the appropriations passed at the last session of Congress; the balances of former appropriations undrawn from the treasury, and the balances remaining in the hands of agents on the 30th of September, 1824; the amounts applied to the respective operations during the year ending on the 30th of September last; the balances undrawn from the treasury, and those remaining in the hands of agents on the 30th of September last; and the amounts of accounts for disbursements applied to the respective operations during the year ending on the 30th of September last, which have been rendered and settled, are shown in this table. The aggregate cost of the several fortifications, and other operations under construction on the 30th of September last, and the amounts requisite for their completion, respectively, are also shown. The accounts rendered and settled embrace all the disbursements made under the Engineer department during the year ending on the 30th of September last, with the exception of a small amount, and exhibit satisfactory evidence of the faithful application of the moneys advanced for expenditure during that period, except the small amount for which accounts have not been rendered, as above stated; of the faithful application of which amount the reports of the progress of the operations to which it has been applied leave no room to doubt.

The fortifications for which plans have been projected by the board of engineers, and which have not yet been commenced, are arranged in the accompanying table, marked L, in three classes, referring to the order in which they should be commenced; and the estimate of the expense of its construction is stated opposite to each.

The board of engineers for fortifications were occupied during the early part of last winter in completing the memoirs and estimates for the fortifications projected for the defence of Portland, Salem,

Marblehead, Boston, Canonnicut island, the Patuxent river, and for Bogue point, and the mouth of Cape Fear river, in North Carolina; in preparing an estimate for the repair of Fort Delaware; in examining the plans and models of machines for removing snags, sawyers, and other impediments of that nature, from the Ohio and Mississippi rivers, and in selecting that which they conceived to be entitled to the premium of one thousand dollars, which was offered by advertisement for the plan or model which should be preferred by the board of engineers. In the month of March the board was temporarily dissolved, and since that period the members have been separately employed in inspecting the forts on the Gulf of Mexico, Forts Monroe and Calhoun, Fort Delaware, and the fort at New Utrecht point, called Fort Hamilton, and in examining the island of Nantucket.

The results exhibited in the table marked K, respecting the application to fortifications and other operations under construction, of the funds available for the service of the year ending on the 30th of September last, are derived from statements exhibiting, in minute detail, all the means applied, whether of materials or workmanship, and the cost of each kind, under each head, respectively. From these statements, and from memoirs and drawings illustrative of them, which are also in the possession of this department, the following summary of the operations adverted to has been collated.

Of these operations there were commenced this year the fortification on Oak island, at the mouth of Cape Fear river, and that on Bogue point, near Beaufort, both in North Carolina, and the works on George's island, in the harbor of Boston, intended for its preservation as a site of a fortification.

The appropriations for commencing these operations were made after it had been reported by this department that officers of engineers could not be spared to superintend them without neglecting other important operations then going on. With respect to the works in Boston harbor there was no difficulty, their superintendence, under the general supervision of Colonel Totten, of the corps of engineers, having been committed to a person who had acquired the requisite qualification while employed at fortifications. But it was proper to have engineers for the fortifications in North Carolina, and, the whole corps being employed, it was not easy to determine whence they could be taken without injury to the public interests. It was at length decided to transfer an officer from the Gulf of Mexico, on account of the operations in that quarter being less active during the summer, then commencing, and the fall season.

The officer so transferred reached North Carolina in July, and, having purchased the site at Oak island, commenced the preliminary examinations prescribed by the regulations for testing the accuracy of the surveys and levellings of the site, the adaptation of the plan to them, the accuracy of the estimate, the resources of the country, &c. A report, to contain the result of those examinations, is in the course of preparation, but is not expected to reach here until late in next month.

In the month of September the same officer proceeded to Bogue point, for the purpose of purchasing the site and making the requisite preliminary examinations, but having failed to effect the former, he returned to Oak island. Another officer has since been assigned to the superintendence of the work at Bogue point. He arrived there on the 1st instant, and will lose no time in purchasing the site and in making the examinations and arrangements preliminary to commencing the construction.

The sea-wall for the preservation of George's island has been but recently commenced, and will not probably be advanced during the remainder of this season beyond the laying of the foundations. It had been attempted early in the summer, by advertising for proposals, to have the stone, the only material required, supplied and laid by contract; but the rates of the proposals received were much higher than had been anticipated, and it was considered very doubtful if lower terms could be procured in Boston for a length of time, as an unusual demand for materials and workmanship existed, and was likely to be maintained there. It was suggested that there would be a great saving by deferring the commencement of the work until next year; but as the expense was deemed to be of secondary importance in comparison with even a partial fulfilment of the object to which it was to be applied, and moreover, as the circumstances under which the appropriation for defraying the expense of effecting that object was made appeared to indicate that its early application was contemplated and desired, it was determined to go on with the work. The advertisements which had been issued having failed to produce proposals for furnishing the stone required from the neighborhood of Boston, upon terms that could be accepted, the quarries at Cape Ann were examined, and the quality of stone they could furnish being satisfactory, arrangements were made for procuring the requisite supply of stone from them, upon comparatively reasonable terms.

The fortification at Brenton's point, which has been named Fort Adams, was commenced last year under an appropriation for purchasing the site and collecting materials. This year, besides the completion of a very minute survey and levelling of the site which had been commenced last year, the construction of extensive wharves for landing materials, the construction of cranes, and other labor-saving machinery, and the conducting of other auxiliary operations, the excavations of earth and stone for the foundations, and the laying of the same in stone masonry, were effected in nearly the whole extent of the eastern, northern, and western fronts, and the superstructure of the scarp wall of the eastern and northern fronts was also commenced, and in some parts carried to the height of nearly five feet. The three fronts commenced are on the water side, and the remaining two fronts which have not been commenced are on the land side of the fort. The greater part of the funds applicable to this work which remain unexpended have been reserved to fulfil contracts which will not be completed until next year.

The fortifications at New Utrecht, which has been named Fort Hamilton, like Fort Adams, was commenced last year under an appropriation for purchasing the site and collecting materials. The land requisite, in addition to that already owned by the United States, to complete the site of this work has not yet been procured, and the progress of the work has been in consequence somewhat retarded. The legislature of New York having authorized the appointment of assessors to value the land, no doubt existed that possession would be obtained through them, and the plan of operations for the year was adapted to that event. When, however, the survey of the land to be procured was made, agreeably to the boundaries laid down in the act of the legislature for the purpose of enabling the assessors to see the land and judge of its value, it was perceived, for the first time, that the boundaries did not join those of the United States land, there being two narrow triangular slips intervening, and that one of those slips embraced a part of the land intended to be occupied by the constructions which were included in the plan of operations. The assessors valued the land included within the boundaries designated by the act of the legislature of New York, and an attempt was made to purchase the intervening slips from the owner, but without effect. The governor of New York has been requested to apply to the legislature of New York, at its next session in January ensuing, for an amendment of the act of its last session that will remove the difficulty above stated. The boundaries designated in the act of the legislature of New York corresponded with those stated in the original application to the governor of New York, and the error of

that statement arose from reliance being placed upon the correctness of determining with instruments upon a map, the lines referring to the boundaries, instead of resorting to the deed of the land owned by the United States, to the boundaries of which those designated were intended to be joined. Notwithstanding the derangement of the plan of operations produced by the difficulty above stated, very good progress in the work has been made during the year. A substantial sea-wall to secure the site from abrasion, has been built; the railway, commenced last year, for conveying materials from the wharf to the top of the bank, has been finished, and saves one-third of the expense of transportation; and the foundations of the scarp and counterscarp of nearly one-half of the work, exclusive of the gorge, and of a caponiere in the ditch have been laid, and the walls have been built up several feet.

Of the appropriation of the last session of Congress for completing the unfinished parts of Fort Delaware, and repairing injuries that had occurred at that place, about one-half has been advantageously applied. The report of a recent inspection of the work done this year represents it to have been executed in the best manner, and that the results intended to be produced by the repairs have been in a degree, and will be ultimately fully realized.

The work done at Fort Monroe during this year has been very considerable and in due proportion to the sum expended, the amount of which was, on the 30th of September last, nearly equal to the amount of the appropriation for the year. The operations are organized in a manner that admits of the various branches into which they are divided being conducted with the utmost regularity, whether conjointly with or independently of each other.

The superstructure of Fort Calhoun was not commenced last year, and could not be commenced this year for the want of an officer to superintend it. A large balance, which remained unexpended, of the appropriation of last year, and the greater part of the appropriation of this year, have, however, been advantageously applied in the formation of the mole, in collecting materials for the superstructure, in the erection of cranes, and the completion of the permanent wharf to facilitate the landing of materials, and the establishment of railways to aid in the transporting of them to the places where they were to be used, in the erection of buildings for workshops and quarters, and in other auxiliary preparations necessary to be provided previously to commencing the superstructure.

The works at Mobile Point have progressed successfully during the year, but have been attended with extraordinary expense, in consequence of the rise in the price of cotton having caused a correspondent rise in the price of labor. The expenditure has been in due proportion to the amount applicable, and would have been greater but for the interruption produced by the failure in the supply of materials from the north, which had been relied on. The citadel has been completed, with the exception of a small portion of the carpentry, and a wharf has also been completed. All the foundations, except those of one front, have been laid, and the walls of the superstructure have been raised, in some parts, to the height of three feet.

At Chef Menteur the progress of the operations has been much obstructed by the unusual quantity of rain which fell during the year; yet the means of the contractors have been so ample and well organized as to have enabled them to overcome every difficulty, and, by the quantity of work executed, to have absorbed nearly the whole appropriation on the 30th of September last. The advances which had been made to the contractors on their commencing the work at the Rigolets, and which amounted to upwards of eighty thousand dollars, have been in the progress of gradual redemption, and were finally redeemed on the 30th of September last.

The arrangements for procuring materials, and otherwise facilitating the progress of the work, which were made at Fort Jackson last year, and which were expected to produce the most favorable results upon the operations during this year, were rendered, in a great measure, unavailing, in consequence of the site of the work being almost constantly inundated. During the year, ending on the 31st of May last, it had rained one hundred and twenty days, and the unprecedented quantity of one hundred and seven inches had fallen within that time; added to this there were two overflows from the sea and three violent storms, the effect of which, and the excessive rains, was to destroy, on several occasions, parts of the levee or embankment for excluding the adjacent waters from the site of the work. Four powerful pumps, upon the plan of the Archimedes screw, were found to be insufficient to keep out the water from the excavations required to be made in preparing for laying the foundations. Under these circumstances; it became impossible to lay the whole of the foundations, and it was with great difficulty that about a fifth of them was laid. Besides these several causes of embarrassment, there were, on three occasions, mutinous combinations among the mechanics and laborers, or "turning out," as they term it, for an increase of wages, and their unreasonable demands having been resisted, a number left the work, and injurious delay ensued until others could be procured. These events, combined with the unhealthfulness of the climate, which rendered unavoidable the suspension of the works from June until November, a period exceeding four months, have been the cause of so large a balance of the appropriation remaining unexpended. The weather being dry during the present fall, it may be expected that in a very short time after the resumption of operations the remainder of the foundations will have been laid, and by the month of February the balance of the appropriation will have been absorbed. Should that prove to be the case, the best part of the working season—that is, four months, from February to May, inclusive—will be lost, unless the appropriation which may be contemplated for next year, or a part of it, should be granted at the commencement of the session of Congress.

This remark applies to the works at Mobile Point and Chef Menteur, as well as the new work at Bayou Bienvenue, for the commencement of which an appropriation will be asked this year. Indeed, it would save expense and greatly facilitate the operations of all of the fortifications if appropriations for them, entire or partial, could be obtained at the commencement of the session of Congress.

The board of engineers for internal improvements were employed, during the early part of last winter, in preparing the report of their operations during the last year, which was submitted to Congress and published, and in preparing instructions for the several brigades to be employed this year in making the requisite surveys to enable the board to fulfil the objects of their examinations of last year in relation to the proposed routes for canals to connect the Chesapeake and the Ohio and the Ohio and Lake Erie.

Pursuant to the instructions of the War Department, the board, consisting of General Bernard and Mr. David Shriver, in the further prosecution of the objects contemplated by the act of Congress of the 30th of April, 1824, "to procure the necessary surveys, plans, and estimates on the subject of roads and canals," set out, on the — of March last, from this place, to commence a reconnoissance and examination of the country between the seat of government of the United States and New Orleans, with a view of selecting the most eligible site for locating the great national road contemplated to be constructed

between the two cities. The board was directed, in considering this subject, to take into view three routes, viz:

1st. The Atlantic, or the route passing through the capitals of the southern States, as Richmond, Raleigh, Columbia, Milledgeville, &c.

2d. The intermediate route, comprehending all the routes west of the first and east of the mountains.

3d. The western route, or the route through the valley of the mountains west of the Blue Ridge.

In determining which of these routes should be preferred, the board was instructed to take into view every consideration which ought to have weight, such as the comparative distances of the several routes, the facilities and cheapness of construction, the political, commercial, and military advantages, and the transportation of the mail.

The board made an examination of the first and second routes, but was unable to proceed to the examination of the third, or the route west of the mountains, owing to the indisposition of Mr Shriver and the necessity of General Bernard's attending to the subject of the Ohio and Chesapeake canal; but as great anxiety was manifested by the inhabitants west of the mountains that the western route should be examined this season, in order that a report might be made on the subject of the road to Congress this session, if possible, Captain Poussin, of the topographical engineers, and Lieutenant Trimble, who were both employed on the examination of the other routes as assistants to the board, and who were deemed fully competent to the duty, were, in obedience to your instructions, ordered to make the examination. Captain Poussin and Lieutenant Trimble left this on the — of October last, to commence their operations, and it is expected they will return in time to enable the board to make its report before the rising of Congress.

The board was also required, while at New Orleans, to examine the communications between the Mississippi and Lake Pontchartrain, with the view of ascertaining the practicability of connecting them by a canal, to be navigable by sloops, that would possess greater commercial and military advantages than those afforded by the communication through the Bayou St. John and Canal Carondelet, which does not enter the Mississippi. The board examined two routes: one through the city of New Orleans, and in the direction of the Canal Marigny, to debouche into Lake Pontchartrain about two miles east of the mouth of Bayou St. John; the other from the plantation of Mr. Trémé, on the Mississippi, about two miles below New Orleans, to enter Lake Pontchartrain about five miles east of Bayou St. John.

The report of the board, which is to furnish the results of those examinations, will be prepared after the report upon the Chesapeake and Ohio section of the Chesapeake and Erie canal, and the report respecting the route for a national road between the seat of government and New Orleans shall have been completed; and no exertion will be omitted to have them ready to be laid before Congress during the ensuing session. Some time will elapse, however, before the reports and drawings connected with the surveys of this year, relating to the canal route above-mentioned, can be prepared; and as they will present a great mass of materials, and much time will be required to digest and collate them, it will not be practicable, within the limited time that can be bestowed upon them, to prepare, in time to be laid before the ensuing Congress, a very full report upon the subject to which they relate. A general project and preparatory estimate for the Chesapeake and Ohio section of the canal, containing information sufficient to authorize the commencement of operations, should they be sanctioned, will, if possible, be completed. These several subjects will be attended to in the order of their relative importance: the canal route between the Chesapeake and Lake Erie first; the national road next; and lastly the route for a canal between the Mississippi and Lake Pontchartrain.

Two brigades of topographical engineers and one brigade of civil engineers were employed this season upon the Chesapeake and Ohio section of the canal to connect the Chesapeake and Lake Erie, and have completed all of the surveys upon that section requisite to enable the board to select the most eligible route, determine a general line of direction for the canal, and make a preparatory project and estimate, upon which the operations may be commenced.

The surveys connected with the Deep creek route across the summit level, required to be executed by one of the brigades of topographical engineers, having been finished early in the season, the brigade, in pursuance of the instructions of the board, commenced the survey of another route across the summit level, from Wills' creek to Castleman's river; and while that was going on a part of the brigade, in the fulfilment of instructions direct from this department, examined and ascertained the levels and distances of a route to pass the summit level by the way of Cheat river.

Two brigades of topographical engineers were employed this season on the route between the Ohio and Lake Erie. One of the brigades was required to survey a route descending from Pittsburg to the mouth of the Big Beaver, and ascending the valleys of Big Beaver and the Chenango to pass near Conneaut Lake, and descending to terminate at the mouth of Elk creek, on Lake Erie; and also to survey a line, for feeder, from French creek to Conneaut lake. Minute surveys of all parts of this route which presented any difficulties have been completed, and general experimental lines have been surveyed of the remainder, including the valleys of the Chenango and Big Beaver, to the mouth of the latter, and thence to Pittsburg. The surveys embraced by the instructions to the other brigade, from the mouth of the Ashtabula, on Lake Erie, through the Champion swamp, and along the valley of the Mahoning to Big Beaver, have been completed.

The survey of a route for a canal between Buzzard and Barnstable bays, in Massachusetts, which was commenced last year, was completed this season.

The brigade of civil engineers which, in pursuance of your orders, was instructed to examine the communications between Lake Memphremagog, in Vermont, and Connecticut river, and also between Lake Connecticut and the tide waters of the river Connecticut, and to make the surveys requisite for determining whether it would be practicable and expedient to unite, by canals, the waters of those communications, respectively, and for selecting the most eligible routes, and preparing projects and estimates for the same, has effected the several objects of those instructions, and has also examined the communication between the rivers Connecticut and Merrimack.

A limited topographical brigade has been employed this season in making surveys at the island of Nantucket, which may subserve the immediate purpose of ascertaining if a harbor for the protection of shipping can be formed there by the establishment of a pier, and the ultimate purpose of affording the requisite preliminary information for projecting a system of defence, should it be determined at any time hereafter to be necessary. The survey was commenced late in the season, and no report has as yet been received of the progress made in its execution.

Another topographical brigade was divided between Marblehead and Holmes' Hole, to carry into effect the objects of an appropriation of the last session of Congress for making surveys at those places

to ascertain the practicability and utility of improving these harbors by the erection of piers. The surveys at both places have been completed.

The execution of the plan projected by the board of engineers for deepening the channel leading into the harbor of Presque Isle was commenced at a late period in the last season, and has been continued during the present season. The results produced by the work which has been done afford abundant evidence of the feasibility of the plan, and of the ultimate fulfilment of its object on the completion of the work. The work may be completed in the course of next summer, should an appropriation be made of the sum estimated to be necessary for that purpose.

The works for the security of Plymouth beach, which were commenced last year, late in the season, under the superintendence of an officer of the corps of engineers, have been continued this year with an appropriation made at the last session of Congress, under the general superintendence of Colonel Totten, of the corps of engineers, and the immediate superintendence of a gentleman, a respectable inhabitant of Plymouth, who had paid particular attention to the work during its progress last year. The appropriation of this year has been very advantageously applied, and although extremely limited, has produced highly important results. The appropriation asked for next year, if granted, will complete the work, and afford permanent security to the beach.

The experiment for the removal of the sand bar in the Ohio, near the town of Henderson, which could not be carried on last year, though arrangements had been made for the purpose, because of the river not having subsided to the usual level at its lowest stage, has been conducted this year under favorable circumstances, and is expected to produce the desired effect by the officer superintending it.

The officer who has superintended the execution of the contract for the removal of snags, sawyers, planters, and other impediments of that nature to the navigation of the Ohio and Mississippi, has reported that the contractor had faithfully executed his contract on that part of the Ohio extending from Pittsburg to Louisville.

Very satisfactory progress has been made in the continuation of the Cumberland road, from Canton to Zanesville, which was commenced this season. Some interruption occurred in the early part of the season in making a thorough examination of a different route from that which had been recommended by the commissioners, and adopted in compliance with representations in its favor which were signed by the owners of the land through which it was desired that it should pass. The examination resulted in the confirmation of the selection which had been made by the commissioners. That point having been settled, contracts, for which proposals had been previously required by advertisements, were entered into for executing twenty-eight miles and eighty-eight poles of the distance, from Canton towards Zanesville, which it was estimated would be as great a distance as the existing appropriation would allow of being undertaken at present. Nearly the whole extent of road embraced by the contracts has been cleared, cut, graded, and shaped, so as to be ready for receiving the first course of metal, as it is called, meaning the stone broken to a small size, agreeably to the McAdam plan. It is not intended to lay on the first course, to consist of a thickness of three inches, until May next; the second course, also of three inches, will be laid after the first course shall have become consolidated and compacted by the pressure of a heavy roller, and it is believed will be found, after having been compacted by the same process, to afford the requisite solidity to the road. If it should prove to be otherwise, a third course of three inches will be laid.

The continuation of the Cumberland road west of Zanesville has been laid out as far as Columbus, a distance of fifty-three miles. The commissioner under whose direction the work has been performed represents the location to be more favorable than had been anticipated, and especially with regard to the first twenty miles west of Zanesville, which pass through a very hilly region. The laying-out of the road, as above stated, was not commenced until the season had considerably advanced, the commissioner having been occupied in the early part of the season in examining the route between Zanesville and Canton, which had been presented to the consideration of government for competition with that which had been selected by the commissioners.

The commissioners appointed to lay out a road from Detroit to Chicago have reported the same to have been executed, and promise at an early day to send their report and drawings relating to it.

No reports have been received from the commissioners appointed to lay out roads from Little Rock to Cantonment Gibson, and from St. Louis to the confines of Mexico; and nothing therefore is distinctly known of the progress which may have been made in the prosecution of those operations, although it is understood the former has been completed and the latter nearly so.

A brigade of topographical engineers was employed this year on the coast of South Carolina, in the continuation of surveys requisite to aid the projection of a system of fortifications for the defence thereof.

The Military Academy has maintained during this year the high standing to which it had previously obtained. The report of the last examination of the board of visitors, which is herewith submitted, marked M, represents its condition in a very favorable light, and suggests improvements and additions, some of which require legislative provision for their accomplishment. The number of cadets at this time attached to the Military Academy amounts to 258, and the number which has been graduated and attached to the army and marine corps this year amounts to 37.

In addition to what is now taught at the Military Academy, I beg leave to suggest the advantage of introducing a system of equitation, and also the exercises and manoeuvres of cavalry and light artillery. Although cavalry does not constitute a part of the present military establishment, in the event of war it must be resorted to as a powerful means of attack and defence; and it is evident that the possession of a competent number of well-trained officers in this arm would be of incalculable advantage to the service in forming a good corps of cavalry whenever it may be required. Besides these advantages, the instruction is deemed essential to the staff and artillery officers, and the exercises cannot but prove highly beneficial to the health of the students at the Military Academy. It could be introduced at an expense not considerable when compared with the advantages that may be expected to be derived from it, as will be seen by the enclosed estimate, marked N, for the purchase, keeping, and equipment of fifty horses, the number deemed fully adequate to the contemplated purposes of instruction.

The operations conducted under the general direction of the Engineer department have progressively increased for several years. Those of the last year greatly exceeded those of the year before, and have been exceeded by those of this year in a still greater ratio. The corps of engineers and topographical engineers are relied on chiefly for conducting these operations, and their numbers are so limited that it was thought expedient, the year before last, to apply to Congress for an augmentation of them. If it was expedient then to augment the strength of these corps, it is now obviously much more so, and must become

more and more so for several years henceforward. The operations of this year, notwithstanding that they have been so much greater than they had been at any former period, have been limited in comparison with what they may be expected to become in the course of a few years. The fortifications for which plans have been already projected, and which, in the accompanying table, are arranged in the first class, which refers to those which should be commenced without delay, are 18 in number, and of themselves, if they were under construction, would require more than twice the number of officers now in the corps of engineers to attend to them properly. The fortifications for Charleston and Pensacola, for which plans have not yet been projected, would also belong to the first class. Should it be determined upon a further development of the present views of the nation in relation to internal improvements, that the government should undertake the construction of roads and canals, the improvement of rivers and harbors, &c., these objects would give further employment to the corps of engineers, of extent nearly equal to that of the fortifications. The duties of the topographical engineers would be increased nearly in the same ratio with those of the corps of engineers. Many of the surveys upon which plans of fortifications have been projected, have not been and were not intended to be sufficiently minute to be relied on for the location of the works, and others will be required to be made for that purpose. All of the surveys connected with canal routes which have been made have been intended merely to afford the information requisite to determine upon the practicability and the general line of direction of such routes, and other surveys, far more minute, will be required for the location of the canals. Many routes for roads and canals, but little if at all inferior in national importance to those already surveyed, remain to be surveyed. These operations, with others now contemplated, which are of less importance but are still entitled to the consideration of the government, would afford constant employment, for many years, to treble the number of topographical engineers now in service. It has been found by experience that the skill requisite to carry on works of the nature adverted to in a proper manner can be acquired only by a regular course of instruction in the theory, with long and faithful experience in the practice. The means at present at the disposal of the Engineer department are the corps of engineers, consisting of twenty-two officers, the topographical engineers, consisting of ten officers, aided by occasional details of officers of artillery and infantry, who have been graduated at the Military Academy, and the occasional employment of civil engineers when required. The only portion of this force that has a specific organization is the corps of engineers. The topographical engineers have no regimental form, and the employment of the civil engineers is temporary. In all regular establishments it is necessary and convenient that there should be order and form, and that there should be different grades in the officers, suitable to the circumstances of the service to be performed; indeed it is essential to discipline and a just accountability and responsibility in the various branches of duty. The propriety of recommending an increase of the corps of engineers, and the organization of the topographical engineers into a corps similar to the present establishment of the corps of engineers, is therefore respectfully submitted to your consideration. The enlargement and formation of these corps should be gradual, and none should hereafter be permitted to enter either who had not been graduated at the Military Academy, and they should be appointed, in the first instance, to the lowest grades, and be advanced or promoted with a view to particular merit, without regard to rank or seniority.

All which is respectfully submitted,

ALEX. MACOMB, *Major General, Chief Engineer.*

Hon. J. BARBOUR, *Secretary of War.*

Exhibiting the fiscal concerns of the Engineer department for the year ending September 30, 1825, in which the funds which had accrued within that period, and the manner of their accruing, are stated, and accounted for, by showing their application; and showing, also, the amounts expended upon the several works under construction; and the amounts requisite to complete them.

Designation of the appropriations and the objects to which they are applicable.	Funds available for the service of 1825, and whence derived.			Amounts available accounted for.			Cost of the several works on September 30, 1825.	Amount requisite to complete the several works.
	From appropriations for 1825.	From balances of former appropriations, undrawn from the Treasury, and remaining in the hands of agents on Sept. 30, 1824, and accruing from moneys refunded.	Aggregate available.	Amount applied corresponding with accounts rendered and settled to Sept. 30, 1825.	Amount undrawn from the Treasury, and remaining in the hands of agents, Sept. 30, 1825.	Aggregate accounted for, and corresponding with the aggregate available.

	782,972 56	373,969 08	1,156,941 64	661,339 22	495,602 42	1,156,941 64	.....	.....

Remarks.—The amount stated in the above table, as the amount of expenditure, and of accounts rendered and settled for the year ending September 30 last, at Mobile Point, corresponds with the latter, which does not include the amount of the accounts for the month of September. The expenditure has been reported to have amounted to \$123,056 13; the difference between that amount and the amount stated being, it is supposed, the amount of the expenditure in the month of September. The statements in the report of the progress made during the year, in the operations at Fort Jackson, accounts for the balance unexpended being of so large an amount as that stated.

K.—Exhibiting the fiscal concerns of the Engineer department, &c.—Continued.

*Copy of a letter from the president of the board of visitors, transmitting to the Secretary of War the report of the board.*

MILITARY ACADEMY, *West Point, June 23, 1825.*

SIR: I do myself the honor to enclose you the report of the board of visitors of this seminary.

I remain, with great consideration, &c., &c.,

J. HAMILTON, Jr., *President of the Board.*

HON. JAMES BARBOUR, *Secretary of War.*

*Copy of a letter from the Secretary of War to the Hon. James Hamilton, Jr., president of the board of visitors.*

DEPARTMENT OF WAR, *August 8, 1825.*

SIR: I have received and read with satisfaction the report of the board over which you presided. It confirms me in the very favorable opinion I had formed, from my own observation, while with you a short time during the examination. The evidence of the prosperity of the institution furnished by the report of the board, formed, as it was, by distinguished citizens from different parts of the Union, must be highly gratifying to the nation. The changes and improvements suggested in the report will receive my particular attention, with a view of presenting them to the proper authority for adoption, as far as they may be deemed proper and practicable. Be the organ of my thanks to the members composing the board for the patience and zeal they displayed in the protracted examination, and for the able manner in which they have presented the results of their investigations.

With assurance of my respect, I am, &c.,

JAMES BARBOUR.

Colonel J. HAMILTON, Jr.,

*President of the Board of Visitors, Military Academy, West Point, Northampton, Mass.*

## REPORT OF THE BOARD OF VISITORS.

UNITED STATES MILITARY ACADEMY, *West Point, June 22, 1825.*

SIR: The undersigned, agreeably to your invitation, have repaired to the United States Military Academy at West Point, and attended to the annual examination of the cadets. The journal, which is herewith transmitted, will furnish a particular account of our proceedings as a board of visitors. In conformity with the duty enjoined upon us by the fourteenth paragraph of the regulations of the academy, and in compliance with your request, as expressed in the circular letter of invitation addressed to us, we have made the condition of the academy, in all its branches, a subject of careful attention, and beg leave to submit the following statements as the result of our observation and inquiry:

1. Our attention was first directed to the system of instruction and the subjects connected with it. The general course of studies pursued in the academy may be learned from the paper marked (*a*), which is herewith submitted to the department. In this paper the various studies pursued by the different classes are stated, the text books, where any are used, are named, and the instructors designated, to whom the different sections in the several classes are entrusted. The board of visitors beg leave to make a few remarks relative to the various branches of study embraced in this synopsis in the order in which they occur:

1. *Engineering*, in its two branches, civil and military. The appearance of the class in these branches is deserving of all praise. The promptness with which the diagrams, illustrating the most important and difficult problems, were drawn on the black board, and the clearness and fluency with which their analysis and demonstration were performed, were in the highest degree creditable both to the cadets and their teachers in this department. The drawings exhibited by the class in the two branches of engineering, also bore testimony not merely to a great familiarity with the subject, but to a high degree of skill in drawing. The board deem it, however, superfluous to enlarge on this topic, as they understand that a series of these drawings, executed by the cadets, has already been forwarded to the Department of War.

The board understand a considerable portion of the instruction in this department to be given without a text book in the lectures of the accomplished teacher at the head of it. In that part of the instruction which is given from text books the authors followed are Gay de Vernon and Isanzin. The board are not acquainted with any works better adapted to the purpose than those of these two distinguished ornaments of the French Polytechnic school. It might, however, be desirable that the work of Gay de Vernon should be used in the original.

To place this department on a proper footing a suite of models of works in civil and military engineering is indispensable; and to this end a recommendation will be made in another part of this report.

In order to give the most satisfactory specimen of the high attainments of the cadets in these branches the board beg leave to subjoin a few problems from among many others that were drawn and solved in the examination; they are contained in the paper annexed, marked (*b*.)

2. The course of mineralogy, owing to the recent appointment of the instructor, is as yet in a progressive state. Connected with the nature which devolves on a corps of engineers, the study of mineralogy is of great practical importance, and is worthy of being very diligently pursued at the academy. To this end, however, a cabinet of minerals is indispensable; and a small appropriation for this object would be among the most useful services that could be rendered to the institution. It is, of course, necessary, in order to render this department complete, that instruction in geology should be added to it; and this will probably be done in the course of the ensuing year. When it is considered that all the instruction in

mineralogy, geology and chemistry will be included in one department, it will readily be admitted that to place that department on a suitable footing provision should be made for a permanent professor and assistant professor. The high character of Dr. Torrey, the present incumbent in this department, furnishes additional reasons for the proposed establishment, which is particularly recommended to the favorable consideration of the government.

3. In the branches of geography, history, and ethics, no examination has been had during the present visitation of the academy. This department by the existing regulations is intrusted to the chaplain. The late chaplain of the academy resigned his place in the month of October last. His successor in office, the Rev. Mr. McIlvaine, repaired to the post in May last, and has not entered upon his duties as an instructor. After the departure of the former chaplain the instruction in this department was given by Lieutenant Findley till the month of April, when he was ordered away on professional duty by the government. It appears, accordingly, that during a portion of the year only the class has enjoyed the full means of instruction in this department, and since the departure of Lieutenant Findley has not been instructed in it at all. Under these circumstances the board of visitors have thought it expedient to dispense with the examination in that department.

By the regulations of the academy it is the duty of the chaplain, besides attending to the religious instructions of the Sabbath, to conduct the cadets through a course of geography, descriptive, physical, and statistical, of history universal, and of the United States in particular; of moral philosophy, and the elements of national and political law. It is decidedly the opinion of the board that to bring a department so extensive into practical operation additional means of instruction must be provided. The subjects are not only too extensive but too various in their nature to be taught with success by one individual, particularly one intrusted with the arduous duties of chaplain.

Whether some part of the study included under the head of this department—for instance, the geography—might not advantageously be pursued at an earlier period than the fourth year deserves consideration.

4. *Tactics.*—The remarks of the board on this department are delayed to a subsequent part of this statement.

5. *Philosophy.*—The paper marked (*a*) will afford the names of the text books used in this branch. Enfield's Institutes is an imperfect work, and here, as elsewhere, used from necessity alone. The board are not without hopes that a proper elementary treatise on natural philosophy will before long be offered to the American seminaries. The professor in this department, Colonel Mansfield, being absent on furlough, the examination was conducted in his place by Professor Davies and the assistant professors in the department. The cadets gave satisfactory evidence of their knowledge of magnetism, electricity, optics, and astronomy, though their attainments were perhaps less conspicuous in these branches of natural philosophy than in some other parts of the course of studies. There might have been exhibited a more perfect familiarity with the practical application of the principles of these portions of science. At the same time, however, full evidence was given of great proficiency in the theory of the higher and more difficult portions of natural philosophy, as will appear from the inspection of a few of the problems which were drawn, solved, and demonstrated with the greatest readiness and precision at the blackboard, and which are contained in the paper marked (*b*.)

It ought to be particularly observed, under this head, that the philosophical apparatus of the academy is altogether deficient. It is impossible that the progress of the cadets in this department should correspond with its relative importance on the list of sciences till this defect is supplied. A list of articles indispensably wanted may be found in the paper (*c*) annexed to the report of the board of visitors of the last year, and communicated with the documents accompanying the message of the President to Congress, December 7, 1824, to which the board beg leave accordingly to refer.

6. In the branch of chemistry the majority of the class gave proofs of an extensive and accurate acquaintance with the principles and facts of the science as contained in the text book. Each cadet was thoroughly examined on several different heads of the subject; and the appearance of the sections, particularly the first, was highly deserving of praise. The board are again compelled to advert to the want of an apparatus. A well-provided apparatus is wanted in no science more than in chemistry. It cannot be taught in a manner to satisfy the demands of the public service without a laboratory properly fitted up for the performance of all the experiments and the preparation of all the products required for the illustration of a complete chemical course. The board are pleased to be able to state that the establishment of a lyceum of national history, with the approbation of the superintendent, affords a proof of the zeal and interest of the cadets in the studies of this department from which much may be hoped when ample means of cultivating it shall have been provided.

7. The specimens exhibited by the cadets of the second and third classes in the drawing of landscapes and topography, and of the human figure, showed great proficiency in this branch of practical education. Some of the drawings of landscapes and fortresses, executed with the pen, possessed all the clearness and relief of delicate engravings on copper. For the further improvement in a branch closely connected with the discharge of military and engineering duty, the board deem it highly desirable that a set of casts from the antique (the only substitute in drawings of the human figure for living subjects) should be provided for the academy. The expense of such a set of casts would be trifling in itself, and wholly insignificant, compared with the advantage which would result from such an addition to the apparatus of the academy.

8. The branch of mathematics is next in order, and may justly be considered one of the leading departments in the academy. The board deem it no more than justice to state that the condition of this department leaves nothing to desire. In all its branches, from the elementary rules of algebra to problems of great difficulty in the integral and differential calculus, the examination afforded proof of an admirable method of instruction, and of rare proficiency. The appearance of the cadets in descriptive geometry—a branch peculiarly adapted to a military school—was highly gratifying, for the rapidity and elegance with which they conducted their investigations on the blackboard in the solution of a great variety of difficult problems, requiring long and intricate demonstrations, and involving many substitutions. In the application of algebra to geometry, in the principles of analytical plane and spherical trigonometry, in the doctrines of perspective shades and shadows, and the integral and differential calculus, the proficiency of the cadets exceeded anything which the board have had occasion to witness in any other American seminary. Nor were their performances less creditable in orthographic and stereographic projection, and the principles of stone cutting—a part of the course which, the board believe, is exclusively taught by the lectures of the professor, with exercises on the blackboard, and without the basis of a text book.

To give the most satisfactory proof of the progress made by the cadets in this department, a selection of problems, contained in the annexed paper, marked (b), are submitted by the board, from among many others promptly analyzed, drawn, and demonstrated, in the examination room, without previous preparation.

9. It remains to speak of the department of the French language. The regulations of the academy require that the cadets be taught to pronounce the French language tolerably, and to translate French into English, and English into French, accurately. No specimens were given, in the course of the examination, of the proficiency of the cadets in translating English into French. The board, however, entertain no doubt, from the accuracy and ease with which a very considerable portion of the cadets performed the translation from French into English, that a short practice in the reverse process would enable them to translate English into French with proportionate facility. There is no part of the course of studies pursued at West Point in which the proficiency made by the cadets depends so much on the preliminary qualifications with which they enter the academy. Cadets who enter, previously acquainted with the Latin and French, or the Latin alone, make great progress, under the tuition of the teachers of French in the academy. Those who enter without a knowledge of any language but the English cannot, without great efforts, if at all, keep pace with their fellow students previously imbued with a knowledge of other languages. Meantime, the importance of the French course in this institution is undoubted. Some of the text books used are in that language. The best works in several departments of science exist also in French alone. In addition to this, considering that the other instruction given in the academy is almost exclusively in exact and physical science, the study of the French is one of the chief means afforded the cadets of acquiring that knowledge of the general principles of language and style which is essential to the education of the officer. The board are, therefore, strongly of opinion that provision should be made for additional instruction in French, by the establishment of another assistant teacher.

An opinion was several years since expressed by Lieutenant Colonel Thayer, the superintendent of the academy, that there was, and ever must be, a number of cadets more capable and more advanced than the rest, who can devote a part of their time, without neglecting their prescribed studies, to other branches of science and literature.—(See document 88, communicated to Congress February, 1820.) In most of the branches this difference in talents and qualifications is met by the division into sections, and by the superior character of the course, in the same department, which is taught to the higher sections of the same class. There is no branch where, with equal diversity of talent, greater difference in previous qualification exists than in the French. While the first sections proceed with great ease over all that is required of them, the lower sections unavoidably make moderate acquirements in the language. It would seem an obvious inference from these facts that the higher sections might advantageously devote a portion of their time to the acquisition of another language, or the further study of those which they have previously learned. The majority of the cadets who compose the first section have probably brought with them some knowledge of the Latin language, which cannot but be regarded as highly valuable, both for itself as a part of liberal education, and for its great use as a basis in acquiring the modern tongues of the south of Europe. In the present state of things, not only are the cadets who bring with them a knowledge of the Latin in great danger of losing it, and thereby, in this respect, going back instead of forward in the work of improvement, but the facility with which the same description of cadets acquit themselves in the French department has been found occasionally to lead to habits of inattention, first in that study, and gradually in the others. An efficient remedy for these evils would be to make provision, either for the further instruction in Latin of those who come to the academy acquainted with that language, or for the instruction of the higher French sections in the Spanish language. This could be effected by selecting for the additional assistant teacher of French a person skilled in both the languages. The circumstance that the southern frontier of our country, from the Atlantic to the Pacific ocean, is bordered by a population speaking the Spanish, and that some of our most important public relations are likely to exist with other countries and governments where that language prevails, unite with the considerations of expediency, already mentioned in recommending the course which has been hinted at.

The duty of the board of visitors, as prescribed by the fourteenth paragraph of the regulations of the academy, has seemed to demand of them some inquiry into the general system of means by which the honorable and gratifying results disclosed in the examination have been attained.

Much, no doubt, is to be ascribed to circumstances in a high degree peculiar to this institution; its immediate connexion with the government of the United States; the moral influence which this connexion imparts to the officers of instruction; the natural situation of the academy on a spot extremely favorable to its purposes; and the national spirit and character which pervade the institution. While, however, their due influence is ascribed to these causes, the board feel obliged to attribute the extensive acquisitions of the cadets to the skill and fidelity of the teachers, and to the judicious mode in which the classes are divided for instruction. As it would be impossible, on account of numbers, to teach a whole class collectively, each of the four classes is divided into convenient sections, according to the talents, previous acquirements, and ambition of the cadets. Whenever justice requires it cadets are transferred from one section to another, and continual application is thus necessary to maintain a distinguished character and place.

To perfect the system of generous competition, the cadets, after such semi-annual examination, are arranged on the roll, and take their seats according to merit. In doing this, general conduct is considered, as well as progress in knowledge; so that every one who aspires to distinction is led to be vigilant over his daily department. It is also the custom each week to make a report of the best and the most deficient in each section, and this report is transmitted to the Department of War. If, after a semi-annual examination, any are found grossly deficient, they are turned back to go over their courses again; and if at the next examination they are still found wanting, they are dismissed from the institution. Great justice and impartiality are exercised, as far as the board could judge, in making out the roll of merit. The rank assigned to each cadet is the result of a trial publicly conducted, and the greatest publicity is given to this result by printing and distributing the roll of cadets, arranged according to merit. The influence of such a system in exciting to honorable exertion needs not to be enforced. The board are therefore of opinion that the system of dividing into sections, according to the relative capacity of the members of the classes, is practically excellent, and worthy of being carefully and vigorously maintained, and that public gratitude is due to the superintendent of the academy and to the academic staff for having introduced so powerful yet so simple an instrument of emulation and discipline, which requires only to be better known in order to be universally adopted in our establishments for education.

The board forbear to enlarge, as they cheerfully should do did the limits of this statement permit, on the excellent method of instruction which prevails in the academy. The use of the blackboard is

universal in all the studies which admit of its application. This method consumes more time and is more laborious than the ordinary one, but for these very reasons more efficacious. It makes it impossible to advance without an understanding of each successive step, and it prevents altogether a delusive reliance on the memory. Nothing was more satisfactorily evinced in the course of the examination than the fact that not text books alone, but the sciences themselves, are taught in the academy.

The board having, in the course of the preceding remarks, had occasion to suggest some improvements in the establishment of the academy, beg leave to refer to the document annexed, marked (c,) containing these, with several other proposed modifications deemed essential to the greatest practicable welfare of the institution. Many of the articles contained in it have been recommended on several former occasions by boards of visitors, by the chief engineer, and by the War Department. Most of the proposed alterations and additions to the present establishment of the academy were embraced in the provisions of a bill reported to the House of Representatives at their last session by the military committee. The printed copy of this bill, being the paper marked (d,) is herewith submitted, and it is the opinion of the board that this bill, with such alterations as may be necessary to render it conformable to the plan of organization in the paper marked (c,) should be strongly recommended to the War Department, in order that the influence of the department may be used to procure its enactment by the next Congress. The board forbear to enter into the discussion of the several provisions of the bill, but they will only observe that they esteem those relating to the rank and emolument of the superintendent and the equalization of the rank and emolument of the professors as of primary importance.

The board have already had occasion to observe that provision is absolutely necessary to be made for a cabinet of minerals, and for a philosophical apparatus in all its branches. The minerals now in the cabinet are the private property of the acting professor. The only provision absolutely essential is such as may be necessary to procure a suite of foreign minerals. Under the patronage of the Department of War, and through the agency of the officers in the United States service who have received or will have received their education at the academy, the professor will have the means of forming, at little expense, a collection of American minerals. It cannot be doubted that the officers of the army stationed in different parts of the country will feel it a matter of pride and duty to contribute in this way to the advancement of the institution where they have themselves enjoyed the most signal public patronage.

With regard to the philosophical apparatus, the board recommend that, in addition to the instruments specified in the list already referred to, it be particularly recommended to the Department of War to cause to be deposited at West Point the valuable collection of instruments purchased for the United States in Europe by Mr. Hasler, and now remaining at Washington, as the board understand, unemployed, and of course exposed to injury from rust and other causes.

Finally, the board deem it advisable that suitable provision be made for the increase of the library. The present collection, respectable, though not abundant, in the amount of books contained in it, is complete in no one department, though nearly so in that of military science. The interests of the public service require that the means of moderate annual increase should be provided, in order that the institution may be furnished with copies of the standard works which it needs but does not possess, and of the new publications which are continually appearing on subjects connected with the branches of useful science taught in the academy.

It has hitherto been found necessary to employ a number of the cadets as assistant teachers. This practice is attended with a loss of time and other disadvantages to the cadets thus withdrawn from the regular duties of their class, and has never been viewed but in the light of a necessary evil. In proportion as it becomes practicable to obtain from among the officers graduated at the academy a sufficient number of assistant teachers, the board are of opinion that the employment of cadets in that capacity should wholly cease.

Much of the efficiency and success of the system depend on the greatest practicable equality among the cadets in the qualifications and ages at the time of entering the academy. Great disparity must necessarily exist in both respects. To keep this disparity within reasonable limits, and in order that the public resources may not be lavished on subjects unprepared for this place, the board are of opinion that the preliminary requisitions required by the law should be vigorously enforced by the academic staff, and that no person should be admitted as a cadet who is under fifteen or over eighteen years of age on the first day of June of the year of admission.

II. The next general subject which engaged the attention of the board was the civil economy of the academy in its various branches. The public property of this place having been increased by recent purchases, and its value augmented by various improvements, it was deemed, in the first place, expedient to make general inquiry into the tenure by which it is held, the nature and purpose of the private tenements which have been erected upon it, and the extent of the jurisdiction which is and ought to be exclusively exercised over it by the United States.

It was found that the lands now owned by the United States at this post consist of about two thousand acres, held by deeds from individuals, and no ground exists for questioning the validity of the titles.

The private dwellings, which are becoming more numerous, are generally of small dimensions, of wooden materials, and have been erected at the cost of the individuals intending to occupy them, with the express but verbal understanding of unconditional liability to be at any time removed at the pleasure of the superintendent. This understanding and condition have applied as well to the tenement itself as to the tenant, and have served as a security of the good conduct of the latter. These buildings are occupied chiefly by tradesmen, whose occasional labors are convenient and necessary, and who, having the means of accommodating small families, possess more domestic habits and better moral character than might be expected in a more transient class which would otherwise be necessary to perform the mechanical offices required by the existing population of the place. But to obviate the inconvenience which would arise from any claim that might hereafter be set up to a permanent or transmissible interest in any improvements made on the premises by individuals, as well as to prevent any feeling or allegation of injury by any tenant on his removal, or by the representatives of any on his decease, it is recommended that the superintendent be instructed to take, as well from the present as from all future occupants, a written recognition of the unlimited power of the United States, acting by the superintendent of the academy for the time, to remove or in any way to dispose of any house, tenements, or other fixture or improvement which they may have heretofore erected, or may hereafter erect, on the public grounds, and an acknowledgment of their liability and willingness, in person, family, and effects, to be ejected from the premises at the pleasure of the superintendent.

In regard to jurisdiction, it is found, as far as the board can learn, that no application has been made by the general government to the authorities of the State of New York for the cession of its jurisdiction,

as in the case of other military posts. No doubt is entertained by the board that such a cession would be readily made; more especially as, from the peculiarly isolated situation of the academy, no inconvenience could result to the citizens of the State from the relinquishment of the jurisdiction. Beside the fitness, on general grounds, of the possession by the United States of the jurisdiction of the post, a practical evil has been menaced by incipient measures taken by the local authorities toward laying off a public highway through the parade ground, which, if effected, would overthrow the establishment, and render it altogether impracticable to exercise that exclusive control which is indispensable to the admirable system of moral and military discipline which has hitherto been maintained under the present organization of the academy. The board, therefore, have no hesitation in recommending that application be made, without loss of time, by the proper department of the general government to the authorities of the State of New York for the cession of its jurisdiction over the property of the United States connected with the academy.

On inquiry into the existing arrangements for the accommodation of those employed in the important and responsible stations connected with the academy, it was the opinion of the board that an extension of the same was not only desirable but necessary. The additional accommodations needed are first, and most especially, two double houses to be built of stone, fifty by forty feet each, and two stories high, which, with kitchens in the basement, it is estimated would cost altogether thirteen thousand dollars. Some of the higher officers of the institution are now dwelling in old wooden tenements which are in a state of irreparable decay. There are not less than thirteen officers who are either destitute of separate accommodations for a family, or who are inhabiting such as are, in all respects, uncomfortable and insufficient.

The want and importance of a constant supply of good water is a subject which has engaged the attention of the board, not only in connexion with the health of the post, and all the purposes of household economy, but also for the sake of the means which should ever be present of extinguishing fires. These, in the nature of things, must be expected to occur in an establishment which, beside the ordinary uses of fire, requires several hundred lights to be burning at the same time. For the water now used a precarious dependence is had on one pump and two distant springs that not unfrequently fail in dry seasons, and the use of which is always expensive by the waste both of time and labor. These evils can be removed by recourse to a copious and unfailing fountain of good water at the distance of one thousand yards from the academy, and at an elevation of fifty feet above its plane. The water of this spring might be conducted to the public buildings in iron pipes, which may be procured at fifty cents per foot, deliverable on the premises; and it is estimated that this object may be accomplished at an expense not exceeding two thousand dollars. This sum, in the judgment of the board, is not to be calculated against all the advantages and conveniences it would procure, and especially against the means of rescuing from destruction by fire the public buildings and their valuable contents.

The next object to which the board would invite the attention of the Department of War is the pressing want of a more commodious place for public worship. On this point they feel the less necessity to dwell, as the inadequacy of the apartment now used, but not originally designed for that important purpose, has been the subject of personal observation to the honorable Secretary of War during his recent visit of inspection at this post. If it be deemed the duty of the government to provide, in all cases where it can be properly done, for the religious observance of the Sabbath by all persons in its service, this duty would seem peculiarly strong at a place of education, where those whose principles and characters are yet unformed are to receive the moral and religious impressions which may remain through life.

It is also believed by the board to be highly expedient and necessary that fire-proof apartments should be constructed for the safe-keeping and use of the library and philosophical and chemical apparatus. To these objects apartments are now appropriated which were not designed for them, and are not of the peculiar construction adapted to them, and which, moreover, are much wanted for their original purposes, connected with the instruction of the cadets.

In the opinion of the board, an appropriation of twelve hundred dollars is necessary for levelling and improving the public grounds, both for the military exercises of the cadets, and for the cleanliness and comfortable use of the buildings. The sum appropriated for the erection of these buildings having proved barely sufficient for that purpose, the grounds were necessarily left almost in their natural condition; and there is now no force at the command of the superintendent for that improvement of the public grounds which, to say nothing of neatness and proper ornament, is essential to their practical convenience, in a military view, and the comfort and health of the post in the wet season.

In reference to the bill of fare provided for the cadets, by contract with the steward, it is understood that no alteration has been made during the past year. A view of its constituent articles is presented in the annexed paper, marked (*e.*) The quality of the provisions, and the manner in which they are served up, have been observed by the board with entire satisfaction; and it is their opinion that the steward has fulfilled the terms of his contract with fidelity.

III. The last general subject which occupied the attention of the board is that of the military instruction, military administration, and police of the academy. The result of their inquiry into this department is, that the military instruction, in all its branches, scientific, and practical, is conducted with skill, and is consequently productive of a proficiency and excellence worthy of the highest praise.

The military instruction begins with the very elements of the art. The drill of the recruit here practically comprehends a careful inculcation of all the rules adapted to give to the cadets a fine military carriage of the body, an accurate and cadencer step, and a perfect knowledge of the manual. The consequence is, that, in the lesson of the platoon, the files exhibit a precision in the facings, turnings, and wheelings, which prepares them for the manœuvres of the battalion, which are performed with a promptness, elegance, and accuracy, not surpassed by the efforts of veteran troops.

Independently of these exercises, which are performed in the field by all the cadets, the first or graduating class afforded unequivocal testimony of an extensive knowledge of the evolutions of the line, by demonstrating a series of the most complete manœuvres on the blackboard in diagrams, which were explained with great facility and copiousness of illustration. The different methods of forming column of attack; displaying column of grand divisions; the passage of lines; the mode of retiring by battalions; forming the columns of attack and squares, while retiring, to meet the assaults of cavalry; the various modes of passing a defile, advancing and retiring, with an exhibition of the several eschelon movements, form but a small portion of the demonstration which this class made of their proficiency in the tactics of the field. They also displayed a very eminent portion of knowledge in the rules of castramentation; the order of marches; the composition and distribution of troops performing such marches, in reference to the

face of the country; character of the enemy, and natural and artificial impediments; in the duties of advance, flank, and rear guards; convoys and detachments, and in the different orders of battle as relative to offensive and defensive operations. These examinations were conducted by Major Worth, and furnished the best proofs of his personal assiduity and skill, as well as of the excellence of his method of instruction.

The school of field artillery, as well as the service of artillery generally, is taught by lessons from Lallemand's admirable treatise. In this department of the drill the cadets displayed very respectable attainments, altogether creditable to the officer, Lieutenant Kinsley, to whom this branch of their instruction is confided.

The discipline of the academy, whilst founded on the most perfect subordination, nevertheless partakes of the character of a parental kindness and supervision, which adds a temperate mildness to the sanctions of military rule calculated to render those sanctions more impressive and effectual. The board have every reason to believe that instances of abuse of authority are as rare as those of obstinate disobedience.

The police of the academy leaves but little to be desired beyond that which will be obtained when a more copious command of water is procured, in conformity with the plan already proposed by this board. At present it is exhibited in an attention to the cleanliness of the persons, neatness of the apparel and accoutrements of the cadets, and in the perfect order in which the barracks are kept. Indeed, the youthful form nowhere exhibits a finer physical development than it does at this seminary, where the appearance of vigorous health and muscular energy afford the best testimony of the existence of those regulations which are adapted to promote them.

The subsistence of the cadets, their clothing, and all things appertaining to the commissariat of the institution, are placed on so judicious a footing as to require on the part of the board no suggestions for alteration with a view to amendment. They would, however, recommend that the quartermaster's department at this post should be so organized as to render this officer immediately accountable to the Quartermaster General at Washington, and not to the Engineer department. The board are not induced to make this suggestion under the belief that there are any abuses attributable to the excellent officer now charged with this department at this station, but from considerations connected with the system and uniformity of this branch of the staff and the necessity of its responsibility to a common head. They also think, and would strongly recommend, that the superintendent of this academy should be directly responsible to the Secretary of War, and that there should be no intermediate responsibility to the Engineer department; and, if necessary, that the superintendent should be made a part of the general staff of the army. For this purpose they would urge the expediency of a legislative enactment on the part of Congress, and that the portion of the law be repealed which limits the choice of the President to the corps of engineers in selecting a superintendent for this academy.

The board concur in the strong recommendation of the board of visitors of the last year of the proposed increase of the rank as well as pay of the present superintendent, although it is a subject on which, from considerations of delicacy, they have refrained from conferring with Colonel Thayer. When it is recollected how much of the time and talents of this valuable officer is employed in the duties of this post, the comprehensive relations and vast responsibility, as well as the expenses, to which his station necessarily subjects him, the board are of opinion that the pay and emoluments of a colonel of cavalry are quite as little as he ought, on every consideration of justice, to receive.

The board recommend, as indispensable to the health of the cadets, the erection of a hospital. At present the sick, at the hazard of their lives and the privation of the necessary comforts, remain in their rooms with their associates. On the disastrous consequences resulting from such an arrangement, in the event of a contagious disease, and before it could be arrested, the board deem it unnecessary to dwell.

It is recommended that a gun-house and laboratory be erected, and, as soon as the former is finished, that a new and complete division of field artillery be supplied for the instruction of the cadets.

The board of visitors feel themselves called on, as a matter of decided expediency, to recommend that two dollars per month of the pay of the cadets be stopped, (in addition to any other deduction which is now made,) and paid back at the end of the four years to those who graduate, to furnish their equipment as officers, and to others at the time of their leaving the academy, to defray their expenses in going home.

The board also recommend that the cadets who are employed as assistant teachers should not, in any event, be excused from the military services and duties of the academy, and that they should conform strictly to the uniform prescribed for the academy.

The board would further recommend that the *practical* instruction in artillery be restricted to the school of the piece, while the *theoretical* instruction may be extended at the discretion of the superintendent. They finally recommend an academic military uniform for all the professors and assistants.

Such is the result of the observation and inquiry which the board of visitors have been enabled to make.

It is respectfully submitted to the Department of War in the hope that the numerous suggestions for proposed improvements will be regarded, not as implied intimations of great existing defects, but as hints for the means of increased and extended usefulness. The board have attended the examination with constantly excited feelings of pride and pleasure in the prosperity of this great American institution. They have found it in an excellent state. They believe the best spirit prevails among the cadets. They have seen the proofs of the most meritorious discharge of an arduous but honorable trust on the part of the academic staff, and they should think they failed in their own duty did they close this report without paying a sincere tribute to the ability, devotedness, and success with which all the interests of the academy are administered by the superintendent.

We have the honor to remain, very respectfully, sir, your obedient servants,  
 JAMES HAMILTON, Jr., *President of the Board.*  
 EDWARD EVERETT, *Secretary of the Board.*

ABR'N EUSTIS, Lieutenant Colonel 4th Artillery, J. B. WALBACH, Bvt. Lieut. Colonel 1st Artillery, JOHN F. PARROTT, O. B. BROWN, J. S. SKINNER, HUGH MERCER, C. DEWEY, GEORGE BANCROFT,	}	<i>Members.</i>

*Synopsis of the course of studies at the Military Academy.*

Department.	Section.	Names of instructors.	Subjects of study and text books.
<b>CLASS I.</b>			
Engineering .....	1	Capt. Douglass, professor.....	Gay de Vernon's Science of War and Fortification, Sganzin's Treatise on Civil Engineering, Perspective Shades and Shadows, Stone Cutting.
	2	Lieut. Mordecai, assistant professor.....	Same as for the first section.
Mineralogy .....		Dr. Torrey, professor.....	Cleaveland's Mineralogy.
Geography, History, and Ethics.....		Rev. Mr. Picton, professor, and Lieut. Findley, assistant professor.	Morse's Geography, Tyler's Elements of History, &c.
Tactics.....		Major Worth .....	Rules and Regulations for the Field Exercise and Manœuvres of Infantry.
<b>CLASS II.</b>			
Philosophy .....	1	Professor Mansfield .....	Gregory's Mechanics, Newton's Principia, Enfield's Institutes.
	2	Lieut. S. Smith, assistant professor.....	Bridge's Mechanics, Enfield's Institutes.
	3	Lieut. Parrott, acting assistant professor...	Same as for second section.
Chemistry .....	1	Professor Torrey and Lieut. Prescott.....	Henry's Chemistry.
	2	.....do.....do.....	Do.
	3	.....do.....do.....	Do.
	4	Professor Torrey and Cadet Bache.....	Do.
Drawing of landscapes and topography.	Whole class.	Mr. Gimbrede, teacher, and Cadet Mackay, assistant teacher.	
<b>CLASS III.</b>			
Mathematics .....	1	Professor Davies and Lieut. Ross.....	Surveying, Descriptive Geometry, Conic Sections, Perspective Shades and Shadows, Biot's Geometric Analytique, Lacroix Calcul, Differential et Integral.
	2	Lieut. Webster, assistant professor.....	Surveying, Descriptive Geometry, Conic Sections, Perspective Shades and Shadows, Biot's Geometrie Analytique, Bourcharlot's Calcul, Differential et Integral.
	3	Lieut. Green, acting assistant professor ...	Surveying, Plane and Spherical Analytical Trigonometry, Descriptive Geometry, Perspective Shades and Shadows, Conic Sections, Hutton's Fluxions.
French.....	1 and 2	Mr. Berard, first teacher.....	Gil Blas, Charles XII.
	3 and 4	Mr. Du Commun, second teacher.....	Gil Blas.
Drawing of the human figure.		Mr. Gimbrede; teacher; Cadet Brisbane, assistant teacher.	
<b>CLASS IV.</b>			
Mathematics .....	1	Lieut. Mahaw, acting assistant professor..	Lacroix's Algebra, Legendre's Geometry, Plane and Spherical Analytical Trigonometry, Crozet's Descriptive Geometry.
	2	Cadet Bowman, acting assistant professor.	Same as for the first section.
	3	Cadet Brown, acting assistant professor ..	Lacroix's Algebra, Legendre's Geometry, Plane and Spherical Analytical Trigonometry, and part of Descriptive Geometry.
	4	Cadets Bartlett and Bryant.....	Lacroix's Algebra, Legendre's Geometry.
French.....	1 and 2	Mr. Berard, first teacher.....	Berard's Leçons Françaises, first volume of Gil Blas.
	3 and 4	Mr. Du Commun, second teacher.....	Do. do.
	5	Cadet C. G. Ridgely, assistant teacher.....	Do. do.

(b.)

## SPECIMENS OF PROBLEMS SOLVED BY THE CADETS IN PHILOSOPHY AND MATHEMATICS.

*Selection of problems and exercises in civil engineering.*

1. Explain the practical theory of the equilibration of arches and their abutments, and find, by a practical method, the position and depth of the joints of an equilibrated arch.
2. Determine the figure of the voussoir of an annulo-radiant groin.
3. Explain the graphic method for determining the quantity of *deblais* and *remblais* in the deep cuttings and embankments of canals.
4. Explain the different substitutes for the chamber locks which may be employed in a system of small canals.
5. Determine the figure of the voussoir of an oblique rampant arch, penetrating an annular vault.
6. Draw and explain the works of an artificial harbor.

*Problems in military engineering.*

1. Illustrate the general principles of commandment and relief, and adjust the relief of the elements of Cormontaigne's front accordingly.
2. Explain the works and the journal of the attacks from the third parallel to the storming of the breach of *enclent*.
3. Illustrate the measures of defence during the two periods of attack proper.
4. Draw and explain at large the detail of Mouze's modified front.

5. Explain the theory of defilement applied to permanent fortification, and determine the planes of defilement for the entire front of Cormontaigne's system.
6. Draw and explain the front of Cohorus's system of fortification.

*Problems in philosophy.*

1. Find the place of a body in its orbit, knowing the time in which it passes its apsides.
2. Investigate the motions of three bodies which revolve around each other and around their common centre of gravity.
3. Find the difference between the centripetal forces which will cause a body to revolve in a fixed and in a movable orbit, supposing the orbit to revolve about its centre of force.
4. Find the motion of the apsides in orbits approaching very near to circles.
5. Define the times of ascent and descent of bodies along right lines, the centripetal force varying according to any law, and the quadrature of curves being granted.
6. The centripetal force varying according to any law, and the quadrature of curves being granted, find the trajectories in which bodies will move, as well as the times of their motion in the trajectories found.

*Problems in different branches of mathematics.*

1. Make the projections of the screw and determine the lines of shade on the surfaces of the threads, the shadows cast on those threads, and the shadows cast by the different parts of the screw on a given plane.
2. Put in perspective an arch formed by the intersection of two equal cylinders, whose axes are at right angles, also the pedestals on which they rest; find the perspective of the different shadows on its interior, as also the shadows which it casts on a given plane.
3. Explain the base and modulus of a system of logarithms, and compare the logarithm of a given quantity in one system with the logarithm of the same quantity in any other system.
4. Show what the differential of the logarithm of any quantity in any system is equal to, and the manner in which it is found.
5. Analyze a curve from its most general equation, find the points of rebroussement, of inflection, and where the tangents are parallel or perpendicular to the axis of Abscissa.
6. Explain the method of integrating monomial and binomial expressions, rational and irrational functions, and the general process of integrating by parts and by series.
7. Find the solidity and the surface of the solid, generated by the revolution of the cycloir about its base.
8. Show the application of the calculus to the rectification of curves.

(c.)

Statement of the ordinary expenses of the Military Academy, showing a comparative view of the present, and a proposed plan of organization for the Military Academy.

Present organization.	Pay.	Amount of pay and emoluments.	Proposed organization.*	Pay.	Amount of pay and emoluments.
1 professor of natural and experimental philosophy .....	Pay and emoluments of a lieutenant colonel.....	\$1,699 24	1 professor of natural and experimental philosophy and astronomy.	Brevet rank, pay, and emoluments of maj. cavalry	\$1,716 00
1 professor of engineering .....	Pay and emoluments of a major .....	1,506 24	1 professor of engineering .....	.....do.....do.....do.....do.....	1,716 00
1 professor of mathematics .....	.....do.....do.....do.....	1,506 24	1 professor of mathematics .....	.....do.....do.....do.....do.....	1,716 00
1 surgeon, acting professor of chemistry and mineralogy.....	Ten dollars per month extra.....	120 00	1 professor of chemistry and mineralogy.....	.....do.....do.....do.....do.....	1,716 00
1 professor of ethics, and chaplain .....	Pay and emoluments of a major .....	1,506 24	1 chaplain and professor of ethics and belles lettres.....	.....do.....do.....do.....do.....	1,716 00
1 professor of the French language .....	Pay and emoluments of a captain.....	1,724 24	1 assistant professor of natural and experimental philosophy and astronomy.	Rank, pay, and emoluments of capt. of infantry..	120 00
1 teacher of drawing .....	.....do.....do.....do.....	862 12	1 assistant professor of engineering.....	.....do.....do.....do.....do.....	120 00
1 first lieutenant, assistant professor of philosophy .....	Extra pay to equal captains.....	120 00	1 assistant professor of mathematics .....	.....do.....do.....do.....do.....	120 00
1 first lieutenant, assistant professor of mathematics .....	.....do.....do.....do.....	120 00	1 assistant professor of chemistry and mineralogy.....	.....do.....do.....do.....do.....	120 00
1 second lieutenant, assistant professor of engineering.....	.....do.....do.....do.....	180 00	1 teacher of French.....	Rank of capt., pay and emoluments of maj. of inf.	1,506 24
1 sword master .....	Sixty dollars per month .....	720 00	2 assistant teachers of French .....	Rank of lieut., pay and emoluments of capt. of inf.	1,724 24
10 cadets, acting assistant professors .....	Ten dollars per month for each.....	1,200 00	1 teacher of drawing .....	Rank of capt., pay and emoluments of maj. of inf.	1,506 24

\* The assistant professors of philosophy, engineering, mathematics, and chemistry, being officers of the army, the difference only between their pay as such and their pay as captains of infantry is inserted in the column of pay and emoluments.

(d.)

*Copy of a bill reported by the Military Committee at the last session of Congress, providing for the gradual increase of the corps of engineers, and for equalizing the rank, pay, and emoluments of the professors of the Military Academy at West Point, and for other purposes.*

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That from and after the passing of this act the President of the United States be, and he is hereby, authorized to increase the corps of engineers and the topographical engineers by an annual addition of two lieutenants to each, over and above the present established number of officers of each corps, until both of the said corps shall respectively receive an addition of four first and four second lieutenants, which said additional lieutenants shall be taken from the most distinguished of the graduates of the Military Academy.

Sec. 2. *And be it further enacted,* That the pay and emoluments of the officers of each of the said corps shall be equal to those allowed to the officers of light dragoons under the act of the twelfth of April, one thousand eight hundred and eight, except so far as it relates to the rations allowed to subalterns by said act, in lieu of which the lieutenants of both corps of engineers shall be entitled to receive the same subsistence as is now allowed to subalterns of the army.

Sec. 3. *And be it further enacted,* That the President be, and he is hereby, authorized to appoint a professor of chemistry and mineralogy to the Military Academy, and that the chaplain of the said institution shall be professor of ethics and belles lettres.

Sec. 4. *And be it further enacted,* That the professors attached to the Military Academy shall, from and after the passing of this act, receive, each, pay and emoluments equal to those of a major of light dragoons, and that all the professors, with the exception of the chaplain, shall have the rank of major, but which rank is not to entitle them to any authority, nor shall it take effect at any place except at West Point, and in connexion with the Military Academy.

Sec. 5. *And be it further enacted,* That the principal teacher of the French language and the teacher of drawing shall each receive pay and emoluments equal to those of a major of infantry, and shall have rank corresponding with their pay, to be limited, however, in like manner as is provided in the case of the professors.

Sec. 6. *And be it further enacted,* That there shall be appointed one assistant professor of chemistry and mineralogy and two assistant teachers of the French language, and one assistant teacher of drawing; one sword and riding master; one modeller, one fireworker, and one armorer.

Sec. 7. *And be it further enacted,* That the assistant professors and assistant teachers shall each receive pay and emoluments equal to those of a captain of infantry; that the sword and riding master shall receive pay and emoluments equal to that of a lieutenant of infantry; that the modeller shall receive fifty dollars a month; that the fireworker and armorer receive each thirty dollars a month; and that the assistant professors and assistant teachers, and the sword and riding masters, shall have rank corresponding with their pay, to be limited, however, in like manner as is provided in the case of the professors and teachers.

Sec. 8. *And be it further enacted,* That the superintendent of the Military Academy shall receive pay and emoluments equal to those of a colonel of engineers, as is authorized by this act, and shall have a rank corresponding therewith, to be limited, however, in like manner as is provided in case of the professors.

Sec. 9. *And be it further enacted,* That the superintendent of the Military Academy, under the direction of the Secretary of War, be authorized to enlist for a term of years, unless sooner discharged, one sergeant, two corporals, and twelve privates, to be employed as laborers in the service of the Military Academy, and who shall be entitled to the same pay and emoluments as are now, or hereafter shall be, provided for non-commissioned officers and privates of artillery.

Sec. 10. *And be it further enacted,* That there shall be attached to the hospital of the said Military Academy one steward, with the pay and emoluments of a cadet; one matron, who shall be allowed ten dollars per month, and a ration per day for five attendants, including a cook, nurses, and washers, at eight dollars per month each, and one ration per day.

Sec. 11. *And be it further enacted,* That so much of the act passed the twenty-ninth of April, eighteen hundred and twelve, entitled "An act making further provision for the corps of engineers," as provides that one paymaster shall be taken from the subalterns of the corps of engineers be, and the same is hereby, repealed, and that the paymaster so authorized and provided be attached to the pay department, and be, in every respect, placed on the footing of the other paymasters of the army.

Sec. 12. *And be it further enacted,* That at the meetings of the academic staff the members who shall constitute the same shall take precedence according to their pay and emoluments and the dates of their appointments, respectively.

Sec. 13. *And be it further enacted,* That the officers, non-commissioned officers, and other persons authorized to be appointed, hired, or enlisted by this act, shall be subject to the rules and articles of war.

(e.)

*Bill of fare, copied from the contract.*

*Breakfast.*—Good coffee with milk and sugar, fresh bread and butter, smoked beef\* or ham, and radishes in the season for them.

*Supper.*—Young Hyson tea, of a good quality, with milk and sugar, and fresh bread and butter.

*Dinner* for Sunday, Tuesday, and Thursday, fresh meat, either beef, veal, or mutton, well roasted, with good bread and potatoes, and two of the following vegetables, properly boiled, viz: beets, onions, cabbage, turnips, or carrots; but as a substitute for one of them, (except potatoes, which shall always be given,) green peas or beans shall be furnished in the season for them.

\*Gold beef is sometimes substituted.

For Monday and Saturday, corned beef and pork, well boiled, good bread, with the same vegetables as for Sunday, also a pudding with sauce.  
 For Wednesday, good meat soup, boiled meat and rice, with bread and vegetables the same as on Sunday, also a pudding with sauce.  
 For Friday, fresh fish, (when it can be procured,) with bread, vegetables, &c., or a dinner as specified for Sunday, when fish cannot be procured.  
 N. B.—In 1817, \$12 per month was paid by each cadet for board. The present price is \$10 per month.

N.

*Estimate of the expense of horses required for the purpose of instructing the cadets at the Military Academy in equitation, and the cavalry and light artillery exercises and manœuvres.*

FOR THE FIRST YEAR, SAY 1826.

For the erection of stables for fifty horses.....	\$1, 200 00
For the purchase of fifty horses, at \$100.....	5, 000 00
For the forage of fifty horses.....	3, 000 00
For shoeing and other incidental expenses.....	300 00
For fifty saddles and bridles, at \$10.....	500 00
For halters and equipments for the menage or riding school.....	100 00
	10, 100 00

FOR THE SECOND YEAR, AND THEREAFTER.

For forage for fifty horses, at \$60 each.....	3, 000 00
For shoeing and other incidental expenses.....	200 00
For replacing horses which may be condemned as unfit for service, or which may die.....	400 00
	3, 600 00

19TH CONGRESS.]

No. 285.

[1ST SESSION.]

APPLICATION OF INHABITANTS OF PENDLETON COUNTY, KENTUCKY, FOR A NATIONAL ARMORY ON THE WESTERN WATERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 19, 1825.

*To the Congress of the United States:*

The undersigned petitioners of the county of Pendleton, in the State of Kentucky, represent: That, having understood that your honorable body contemplated the establishment of a national armory on the western waters, beg leave to call your attention to a proper situation in this county, on the Licking river, called the Horse-shoe Bend, about twenty-six miles from Cincinnati, and about eleven or twelve miles below Falmouth, in the State of Kentucky; about thirty miles from Cinthiana, on the south fork of Licking river; about forty miles from Paris, and about sixty from Lexington. That your petitioners will furnish to your honorable body evidence as authentic as can be required as to the advantages of such a location:

1st. They refer to documents hereto annexed, marked A, B, C, and D; and they refer to Colonel James Johnson, their representative in Congress, who has made the examination and survey personally; that their representative has had great experience in water-works; and the facts which he will detail to your honorable body will be founded on personal knowledge and long and matured experience.

2d. Your petitioners assert that a fall can be obtained of twenty-one feet water with a dam of ten feet.

3d. That the water of said river is always competent to carry on all the works of a national armory at the driest season of the year.

4th. That said works will never be interrupted by the back water from the Ohio.

5th. That from the Ohio river, the twenty-six miles, there is a safe navigation to said Horse-shoe Bend.

6th. That the nearest point of the Horse-shoe Bend, on Licking river, to the Ohio river, is eight miles only.

7th. That twenty acres, to include the site and water, will be given to Congress.

8th. That any quantity of woodland can be obtained at a low price—say one or two dollars per acre.

9th. It is in a healthy situation.

10th. The country affords iron ore and stone coal and iron works.

11th. The site is very much in the centre of the population of the west, being contiguous also to three States—Ohio, Indiana, and Kentucky.

12th. And without going into more detail, they invite a comparison with any other point on the western waters; and if the facts are doubted, they wish an examination to be made by officers properly

appointed, and to let the establishment depend upon these facts; and, in duty bound, your petitioners will ever pray.

---

A.

We certify that we will give to the United States a sufficiency of ground to establish the United States western armory, provided it is established at the Horse-shoe Bend, on Licking river, and provided it does not exceed twenty acres of land. The title of the land is good. We know of no conflicting claim on the land. Witness our hands this 12th November, 1825.

JAMES KIRBY.  
WM. WHEELER.

---

B.

SEPTEMBER 24, 1825.

DEAR SIR: Agreeable to information from you, received by Mr. Joseph Deacons, to measure and level Licking river at a certain place known and described as the Horse-shoe, in Pendleton county, about eleven miles below Falmouth, (on the forks of Licking,) we, the undersigned, proceeded, on the 23d instant, to level the same the distance of two miles round, and find there to be eleven or twelve feet fall; we then measured across from where we commenced levelling to where we ended or stopped, and find the distance to be about one hundred and thirty poles through a common licking beach bottom; there are also two ravines or guts, or, otherwise, deep gullies, that head together, which will greatly assist in digging, or opening a way through or across. We can also inform you that the place lies about twenty-six miles from Newport or Cincinnati, and across to the Ohio, at the mouth of Stepstone, about eight miles, where a good way may easily be had; the place lies adjacent to a well-timbered part of the country. And we can further certify to you that no commissioner was ever on the place, nor were we, while they were in that part of the State, ever informed anything concerning it that we know of. We are informed that one of the commissioners stated while he was at Newport that he was told that the back water from the Ohio river frequently came to this place; there are some of us that have lived in the neighborhood upwards of twenty-five years, and we can certify that we never saw the back water from the Ohio there at all.

With the highest respect, we remain yours, &c.,  
Robert Taylor,  
Drummond Wheeler,  
William Yelton,  
Pope Williams,  
John Ellis,  
Charles Yelton,

Horatio Willette,  
Gabriel Amis,  
Henry Ellis,  
James Fryer,  
Silas Shoemaker,  
Charles Williams,

Benjamin Shoemaker,  
Samuel Lockwood,  
James Sothard,  
James Kirby,  
William Wheeler.

Colonel JAMES JOHNSON.

[C is a map of the country.]

---

The Horse-shoe Bend, on Licking river, contains between two and three hundred acres of high bottom land, the average height of which above low-water mark is along the line of the canal considered about forty-two feet; the natural fall is eleven feet. A dam, then, across Licking river at the head-gates ten feet high will produce a fall of twenty-one feet. The bed of the river where the dam will be built is a smooth limestone rock, over which a strong, tight, and permanent dam can be erected. The timber and rock are so near and so abundant that a dam can be built with but little cost. The length of canal is eight hundred and twenty-five yards from actual measurement. The depth of the canal, and that entirely of earth, will not exceed thirty-seven feet. The bottom of the canal will be twelve feet wide, and the top eighty feet wide.

A deep ravine runs along the line on which the canal will run, which reduces the expense of excavation very considerably. It is not even probable, from the appearance of the ground, and from an examination of the deep ravine it confirms the probability, that in excavating the canal there will be any interruption of rock. The commissioners report that the highest rise of water in Licking river a few miles below the Horse-shoe Bend was about thirty feet. This may be the fact, but it is equally a fact that such a rise does not happen oftener, upon an average, than once in ten years, if as often; and when it does happen, such is the regular descent of Licking river that in a few days the water runs off and leaves it in its common stage. A dam ten feet high, when added to the natural fall of eleven feet, will make the aggregate fall where the water-wheels will be placed twenty-one feet; eight feet of this head will be all sufficient to operate on and drive the works. At Harper's Ferry they retain eight feet head-water, which produces all the power needed.

From this data it will be seen that there remains of the twenty-one feet head thirteen feet between the lowest part of the water-wheels and the surface of low water in the bed of the river. The river then must rise thirteen feet before the back water will interfere with the water-wheels, which will very seldom

happen, and when it does so happen it is of very short duration, on account of the regular descent of the bed of the river.

But this casual circumstance can be effectually remedied by the use of reaction wheels. The buck water from the Ohio never reaches the Horse-shoe Bend by some five or six miles, as admitted and stated by the commissioners; Cruiser's creek, and Bernen's creek, which is some miles below the Horse-shoe Bend, are the highest points that the back water from the Ohio ever reaches; reaction wheels will run with sufficient power at this site to drive all the wheels and machinery when the river rises to its highest point. When the water rises at the toll-race it will also rise at the head-gates in nearly an equal proportion, so that the head and fall continue entirely sufficient to drive reaction wheels.

The ground where the buildings will be erected is never inundated by freshets from the river; it is elegant level land, and houses can be laid off in regular order, with streets, and every house can with great convenience have a good garden attached to it, which makes it vastly superior in this respect to Harper's Ferry. There the houses for the work hands are built in groups, without the least order or system, and not a foot of ground can be occupied for gardens for the work hands, except one or two; and such is the narrow state of the low ground that the whole establishment is much confined.

At the Horse-shoe Bend no such difficulty exists; the owners of the land and water have agreed to give both to government.—(See document marked A.)

The whole of the sixty-one houses necessary for the establishment, and the land occupying the canal, will not exceed eight acres, which will have twelve acres for gardens and yards. Any quantity of land may be purchased at and near the site at a price not exceeding two dollars per acre.

## D.

*Estimate of expense of locating the national armory on Licking river, at the Horse-shoe Bend, in Pendleton county, Kentucky.*

Excavations of earth for forebays, races, and wall, entire of shops and foundation.....	\$1, 620 44
<i>For canal</i>	
155,916 $\frac{2}{3}$ cubic yards, at 20 cents.....	31, 183 33 $\frac{1}{3}$
Walls for forebays, races, and wall next the river.....	5, 000 00
For arches, &c.....	758 36
Canal wall at the shops.....	4, 000 00
Head-gate near the dam of canal, including wall.....	1, 000 00
Two bridges over the canal, at \$100 each, and four bridges over forebays, at \$25 each.....	300 00
Dam, ten feet high, 462 feet long, made of stone hammered.....	14, 040 00
Sixty-one buildings, including quarters for officers and workmen; workshops, with fixtures for machinery, &c.....	137, 556 10
Machinery, tools, patterns, &c.....	14, 522 00
Miscellaneous articles.....	1, 549 00
Add for contingencies 10 per cent.....	21, 152 09
One thousand acres of land contiguous to works.....	1, 500 00
	234, 181 32 $\frac{1}{3}$
Deduct for ravine.....	5, 000 00
Aggregate.....	229, 181 32 $\frac{1}{3}$

I do certify that the facts contained in the foregoing petition, and the documents marked A, B, C, D, are correct; and this I know of my own personal knowledge: that I did, at the request of the petitioners and many others, attend upon the premises and superintend the survey; examined the ground and the volume of water in November last, and in the driest season that ever has been known in the State of Kentucky, and made the levelling myself. The estimate of expense has been made upon the best data that could be obtained, and I have no doubt the estimate is amply sufficient.

JAMES JOHNSON.

*Estimate, taken from the report of the commissioners, showing the aggregate amount of expense which the armory would cost at each site, viz:*

Cypress creek, Alabama, (page 16).....	\$232, 365 25
Harpeth river, Tennessee, (page 19).....	357, 940 41
Below Shippingport, Kentucky, (page 25).....	394, 813 66
Above Shippingport, Kentucky, (page 28).....	505, 067 72
Below Jeffersonville, Indiana, (page 31).....	319, 479 25
North Bend, Ohio, (page 34).....	374, 572 40
Zanesville, Ohio, (page 35).....	312, 973 65
Falls of Beaver, Pennsylvania, (page 40).....	279, 849 91
Youghiogany, Pennsylvania, (page 43).....	204, 699 66
Bowman's creek, Kentucky, (page 155).....	398, 535 31

[1ST SESSION.]

## APPLICATION OF COLONEL WILLIAM KING TO BE RESTORED TO HIS RANK IN THE ARMY.

COMMUNICATED TO THE SENATE DECEMBER 19, 1825.

*To the honorable the Senate of the United States:*

The memorial of William King, of the State of Alabama, who claims to be of right, and in fact, a colonel in the army of the United States, is respectfully presented:

Your memorialist begs leave respectfully to state that it is now nearly six years since he was suspended from his rank and command as colonel of the fourth United States regiment of infantry by the sentence of a *spurious* court-martial, before which he was tried in 1819 on divers charges, conceived in malice, supported by intrigue, and founded, for the most part, (where they had foundation to rest upon,) on facts, in themselves harmless and venial, or on transactions that had their origin in the most perfect devotedness to what was conceived to be the line of duty and the best interests of the public service.

Your memorialist will not detain your honorable body to show that the court before which he was tried was as imperfect and illegal in its organization as its finding was contrary to fact, and its sentence unjust and unmerited. That it acted under the authority of a self-made president, was composed of seven junior officers when the law imperatively required thirteen superior ones; that five out of the seven had been subjected to the galling indignity of having your memorialist, during the recent war with Great Britain, promoted over their heads; that one, the heir apparent of the commission of your memorialist, declared, weeks before the meeting of the court, and three hundred miles from where its sessions were held, his unfriendly feelings towards the accused to be such that he should object to himself as a member; but, instead of pursuing this honorable course, he quietly took his seat at the board, after lulling the suspicions of your memorialist to rest by the most seeming good will. That another member was in a state of intoxication during the whole session of the court, and on one occasion so brutally drunk and ungovernable that it became necessary to bind him hand and foot, and in that ignominious state he was thrown into his bunk to sober. That the self-made president of the court was a mere puppet in the hands of the accuser, feasted with him, slept with him, imbibed his prejudices, loaned himself to the propagation of his scandal against the character of the accused, and, in a word, well-nigh made himself a party to the case on which he was sitting in judgment.

Nor will your memorialist trespass upon your time to explain and justify the minor charges alleged against him. He will not even dwell upon the charge of having given orders to shoot deserters taken in the fact—a charge which had rendered him the object of public indignation; presuming upon which the court ventured their outrage upon justice and the discipline of the army. That your memorialist did give special orders, in three several instances, to shoot deserters he has ever avowed, and he rests his justification upon the circumstances of his situation. With a handful of men he had been left to defend a province just wrested by force of arms from a foreign power, with which he was bound to consider his country at war; for the territory of this power had been violated, her soldiery slaughtered, her strongholds carried at the point of the bayonet, and their garrisons left in his charge as prisoners of war to be sent home. In this state of things desertion prevailed to an extent rarely before known to the American army—men went off in squads with their arms in their hands; and your memorialist felt himself called upon, by every consideration that could have weight with a soldier, to adopt measures calculated to check the evil without being fastidiously nice as to their legality. *No person suffered under the orders of your memorialist;* and although the court-martial made him responsible for the fate of a deserter, who was shot by the party sent in pursuit of him, yet the fact was in evidence before the court that the order under which this individual was shot was given by a most gallant and meritorious officer, since dead, entirely on his own responsibility, and at a time when your memorialist was seventy miles distant, and for which no accountability could attach to him, unless, as the court in their wisdom seem to have thought, in criminal as in civil jurisprudence one man may assume and be made answerable for the acts of another. On no other principle can your memorialist be held responsible for the fate of the deserter in question.

Your memorialist rests his cause entirely upon its own merits, and not on any extraneous circumstance, otherwise he might tell you that for eleven years he served his country with a zeal and fidelity second to no man. That by five years of assiduous devotion to the duties of his profession on the banks of the Mississippi, he found himself, at the commencement of the late war with Great Britain, in some measure qualified to be useful; and that he was useful let the fact of his having been, with the advice and consent of the honorable body to which he now addresses himself, raised from the grade of lieutenant to the rank of colonel in the short space of twelve months answer. Nor was this promotion obtained by personal intrigues, or through the interest of friends. Your memorialist bears about his person, and will carry with him to the grave, the most incontestable evidence that it was the reward of services performed in the presence of the enemy. He might further tell you that, up to the day of his arrest, he confidently believed he had passed through life without reproach and without suspicion. Nor was he singular in this opinion. He boldly avers it was common throughout the army; but in a moment this fair character, which he would gladly have laid down his life to preserve unsullied, was loaded with obloquy by the machinations of his enemies and the prejudices of his judges.

That the sentence passed upon your memorialist, whether righteous or unrighteous, legal or illegal, was commensurate with every offence imputed to him, even his bitterest enemies have not hesitated to admit. It has been fulfilled to the very letter, and your memorialist claims to be once more a colonel in the army of the United States.

Under the act of 1820, reducing the military establishment, the name of your memorialist was dropped from the army list contrary to the true intent and meaning of the law, as your honorable body have once solemnly decided. He therefore approaches your august presence, as the palladium of the soldier's rights in search of justice, and prays that your honorable body will consider him of right, and in fact, a colonel in the army of the United States, and will accordingly withhold your advice and consent to any nomination to fill a vacancy in the rank of colonel which may now exist, or hereafter occur in the army of the United States, tending in any manner to prejudice the rights and interest of your memorialist.

And he will, &c., &c.

WILL. KING.

[1ST SESSION.]

## FORTIFICATION OF THE HARBOR OF PENSACOLA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 23, 1825.

DEPARTMENT OF WAR, *December 22, 1825.*

SIR: I have the honor to transmit herewith a communication from the chief engineer, and beg leave to refer to it for the information called for by a resolution of the House of Representatives, dated the 20th instant, respecting "surveys and estimates in the possession of this department in relation to fortifications at the entrance of Pensacola bay."

I have the honor to be, sir, with perfect respect, your most obedient servant,

JAMES BARBOUR.

Hon. JOHN W. TAYLOR, *Speaker of the House of Representatives of the United States.*

ENGINEER DEPARTMENT, *December 22, 1825.*

SIR: In pursuance of your order to furnish the information called for by a resolution of the House of Representatives, dated the 20th instant, respecting "surveys and estimates in possession of the department in relation to fortifications at the entrance of Pensacola bay," I have the honor to present herewith a copy of a letter from General Bernard, dated the 19th of September last, which contains all of the desired information in the possession of the Engineer department at this time, with the exception of the fact that the survey and chart of soundings to which it refers have been completed.

The projects and estimates for those fortifications have not been commenced for the reasons given in the letter above stated, and it is the opinion of the board of engineers that it will be necessary for them to examine the ground before those required for the immediate defence of the naval depot can be determined on. This examination will, if possible, be made in the course of the ensuing year, and the attention of the board will be applied to the preparation of the projects and estimates as early as practicable.

Respectfully submitted.

ALEXANDER MACOMB, *Major General, Chief Engineer.*

Hon. J. BARBOUR, *Secretary of War.*

NEW YORK, *September 19, 1825.*

SIR: Agreeably to your communication, I have the honor to transmit to you the information requested by the honorable Secretary of the Navy, relative to the defences to be erected at Pensacola.

In January, 1822, Captain Elliot, naval commissioner, Colonel Totten and myself, members of the board of engineers, have made an examination of Pensacola, with a view to defend the bay and ascertain the facilities it would afford, in competition with other bays on that coast, to the establishment of a naval depot.

As to the first object, it was found that the entrance of the bay might easily be defended by the erection of two forts: one at the Barrancas, the other on the opposite shore. But before planning those forts, it was necessary to procure an accurate survey of the bay, of the surrounding ground, and a chart of soundings. Major Kearney, then at Mobile bay, was immediately intrusted with those surveys and soundings; his work is about to be completed.

As to the second object, the naval depot, it was desirable that the most eligible site upon that coast should be ascertained. The bay of Tampa, from the best informations obtained, seemed to be the only one which could contend with Pensacola as a road of rendezvous and naval depot. Major Young, of the topographical engineers, was directed to make the surveys and soundings of that bay, but the death of that officer suspended their execution.

The naval commissioners and the board of engineers, having not yet received the foregoing surveys and soundings, were unable, to this day, to report as to the defences and naval establishment to be erected at Pensacola.

From the letter of the honorable Secretary of the Navy it appears that the government has decided that the naval depot on the Gulf of Mexico should be at Pensacola, and has appointed naval commissioners to select a site for a navy yard at that place. That decision makes Pensacola the road of rendezvous, and the depot of our navy upon the Gulf of Mexico.

Such an establishment will therefore require two sorts of defensive works: those to defend the entrance of the bay, the others to shelter from an attack by land the navy yard and the ships at anchor in the bay. The works destined to fulfil the first object have been just pointed out; as to those which should accomplish the other objects, they cannot be designated until the naval commissioners shall have recommended the site of the navy yard; the system of those works will altogether depend upon the location of that navy yard, and the topographical circumstances of the adjacent ground.

It becomes, therefore, desirable that the site adopted for the navy yard should not only enjoy the naval requisites, but also require, for its protection, as few defensive works as possible. To shelter it from attacks by water would not suffice; it must also be defended against attempts made by land—objects which are to be attained either by the natural strength of the position, or by fortification, or by both combined.

We must remark on that subject that Pensacola does not seem to be possessed of the same local advantages which led the naval commissioners and the board of engineers to recommend Charlestown, Massachusetts, and Burwell bay, on James river, as naval depots of the first class upon our Atlantic

maritime frontiers. Owing to local circumstances those navy yards need no artificial defences in their vicinity. But the state of things is different at Pensacola. There a navy yard will find itself in the same predicament as most of the European navy yards; that is to say, near to the sea shore and easy of access by land. Besides, owing to the nature of the sandy country surrounding Pensacola, the population in that quarter shall never be able to afford, alone, competent means to defend the navy yard against a sudden attack.

The navy yard at Pensacola will, therefore, require to be fortified, and the only efficient, but expensive, system, in such a case, shall consist of a chain of detached and advanced works, the object of which is to keep out of range the incendiary batteries of the invader, and prevent him from burning the establishments on the first days of his landing; and, besides that chain, a line of fortification around the perimeter of the navy yard to resist a regular attack. The strength of those defensive works must be calculated for a duration of resistance sufficient to allow to the forces of the country the time necessary to reach Pensacola and relieve the defenders of the works. As to the extent and number of those works the local circumstances of the site will decide.

Whilst Pensacola is destined to become the stronghold of our navy upon the Gulf of Mexico—to protect the outlets of the Mississippi, and, therefore, the commerce of exportation and importation of the western States, these States will furnish Pensacola with naval supplies and articles of consumption. It was with such a view that the naval commissioner and the board of engineers recommended in their report (1822) the opening of a sloop canal connecting the Mississippi with Lake Pontchartrain. Besides the military advantages of affording the facilities to concentrate the forces of the country in time of emergency, either to New Orleans, or Mobile, or Pensacola; besides the commercial relations which then will take place between the western States and those of the Mississippi and Alabama, that canal will procure to the naval station of Pensacola the great advantage of receiving, without any annoyance, and at a cheap rate, in time of war, the naval supplies and ammunitions necessary to its establishments. With such a canal, and a small one from Mobile bay to the bay of Pensacola, the communication would become short and easy, and in time of emergency Pensacola might avail itself of the large resources that a city like New Orleans can afford.

Such are the only informations I am able to furnish on this subject at the present stage of the operations intrusted to the naval commissioners and the board of engineers. I wish that they could answer the object of the honorable Secretary of the Navy.

I have the honor to be, sir, very respectfully, your obedient servant,

BERNARD, *Brigadier General, Member Board Engineers.*

Major General A. MACOMB, *Chief Engineer, Washington City.*

19TH CONGRESS.]

No. 288.

[1ST SESSION.]

ON THE CLAIMS OF MASSACHUSETTS ON ACCOUNT OF THE SERVICES OF THE MILITIA OF THAT STATE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1826.

Mr. HAMILTON, from the Committee on Military Affairs, in obedience to a resolution of this House referring to them the documents on its files relating to the claims of the State of Massachusetts for certain military services rendered by that State during the late war, reported :

That they have had the subject under consideration, and find in the printed documents of this House, in the 5th volume of Executive papers, No. 83, that, on the 23d day of February, 1824, the then President of the United States transmitted a message to Congress strongly recommending the allowance of the said claims; which message your committee have appended to this report, and ask leave to refer to the documents accompanying it, which are to be found in the authority to which they have referred. It appears, moreover, that this message, in connexion with the documents accompanying it, were referred to the Committee on Military Affairs, who, in the course of the session of that year, made a report, which your committee beg leave to adopt as forming the substantial grounds on which they are prepared to report favorably on the allowance of the militia claims of Massachusetts to a certain extent; and, in order that this report may be read in immediate connexion with the little they have now to add on the subject, they beg leave to embody the same in this document, which is as follows :

“The Committee on Military Affairs, to whom was referred the message of the President of the United States ‘on the claim of Massachusetts for services rendered by the militia of that State during the late war with Great Britian,’ beg leave most respectfully to report :

“That, in considering the subject submitted to their investigation, they have been fully impressed with its intrinsic importance, and its association with events which were once the occasion of much sensibility and excitement. They trust, however, that they have approached the discussion devoid of all prejudice, with an honest desire, in doing justice, to sustain those great principles of concord and power which are essential to the durability of this Union.

“Your committee deem it entirely unnecessary that they should recite all the circumstances comprising a history of this claim, as they are generally known to the nation, and are to be found, in an authentic shape, in the documents accompanying the President’s message. To this source your committee would ask a special reference.

“It will be sufficient for present purposes to premise that a large portion of the claim of Massachusetts

does not appear to be affected by those constitutional difficulties which have so long, in the consideration of the Executive of the United States, operated as an impediment to its adjustment.

"Your committee are unanimously of opinion that the services rendered by the militia of Massachusetts, which may be considered beyond all exception, and as entitled to remuneration, are comprised in a class of cases in which, by the spontaneous impulse of the militia, with or without the sanction of the executive of that State, or with or without a requisition on the part of the officer of the United States commanding the department, they assembled, either for the purpose of repelling actual invasion, or under a well-founded apprehension of invasion. It is, in fact, on this principle, and this principle only, that the claims for militia services of the various States have been audited and allowed at the Department of War. Services of this description, patriotically performed, ought not to be prejudiced by a pre-existing difference of opinion between the executive of Massachusetts and the commanding officer of the United States forces, as to an abstract construction of the Constitution, when such a difference of opinion appears to have had no sort of effect on the extent and character of the services afforded. But, on the other hand, your committee are equally unanimous in declaring that, in all cases where the acts of the executive of Massachusetts gave a direction to the services of the militia of that State, in opposition to the views of the general government, the claim for such services is altogether inadmissible; for these the government of Massachusetts may be considered to have incurred an ulterior and exclusive responsibility to her own people.

"Your committee waive the discussion of the question, how far the renunciation, on the part of the executive and legislature of the State of Massachusetts, of the unconstitutional principles on which the then governor of that State acted in the early stages of the war, is necessary to the allowance of any portion of the claims of the State for the services in question; these claims, when first presented for adjustment, (immediately after the late war,) were considered rather in the mass, than in reference to the particular items of which they are composed.

"In fact, at that early period the principles on which the claims for militia services ought to be audited and allowed were but imperfectly fixed. The subsequent presentation and examination of the claims of the several States for such services have shed much light on this subject, and have afforded many advantages at the present moment in examining those of Massachusetts. Distinctions important to the elucidation of principles, and to the ascertainment of justice, have been taken and sustained, which might naturally have been overlooked at the commencement of the discussion.

"Your committee, however, cannot abstain from indulging in one remark, that if the fact of the government of Massachusetts having declined for some years subsequent to the late war to renounce the unconstitutional doctrines of her then executive, as developed in the opinions of the judges of her supreme judicial court, can be supposed ever to have borne upon that portion of the claim which the committee have recommended for payment, the recent disavowal of her present executive and legislature furnishes at least a belief that all danger of a future collision between the general government and the States in reference to the authority of the former over the militia of the latter, has been permanently removed. In this light the committee cannot but regard the renunciation as honorable to the chief magistrate and legislature of Massachusetts, and as highly useful in fixing the true interpretation of the Constitution on an interesting and important point. This disavowal, in consonance, as it is affirmed, with the sentiment of the great mass of the people of Massachusetts, is indeed a reiteration of the language which was expressed by the senate of that State as early as October, 1812, at the moment when the unfortunate irritation between the national and State functionaries was most exasperated, and when remuneration for these services formed neither a subject of calculation nor desire.

"Your committee, in conclusion, recommend that in all cases where the militia of the State of Massachusetts were called out in conformity with the desire of an officer of the general government, or to repel actual invasion, or under a well-founded apprehension of invasion, during the late war, the claim of the State for such militia services be allowed under the usual rules of auditing and allowing similar claims, provided the number of troops so called out were not in undue proportion to the exigency.

"Your committee likewise recommend that the claims of Massachusetts for militia services not comprehended in the above description of cases be disallowed. And, in conformity with the foregoing principles, ask leave to report a bill."

To this report your committee are not aware that it is necessary to add anything in the way of commentary, except to explain the grounds on which the bill now reported differs in some respects from the bill which accompanied the report in question.

It will be seen in that report that the committee report favorably, unequivocally, on the allowance of all claims for services rendered by the militia of Massachusetts during the late war, "in cases where they were called out in conformity with the desire of an officer of the general government, or to repel actual invasion, or on a well-founded apprehension of invasion, provided the number of troops so called out were not in undue proportion to the exigency."

They, however, qualify this allowance by the following avowal: "That they are equally unanimous in declaring that in all cases where the acts of the executive gave a direction to the services of the militia of that State in *opposition* to the views of the general government, the claim for such services is altogether inadmissible."

As that committee have not in their report afforded an explanation of what they considered services, in opposition to the views of the general government, your committee deem it their duty to make a single remark in illustration of this qualification, and to institute it as a matter of cardinal discrimination in the bill herewith reported.

This, they apprehend, may be better done by stating their own opinion than in conjecturing that of all their predecessors.

To them it appears that in all cases where *specifically* the command was refused to be given to an officer of the general government applying for the same in each particular service of this description for which compensation may be asked, it should be withheld. For in cases of this kind, as it has been justly observed, the government of Massachusetts incurred an ulterior responsibility to her own people by assuming, in terms of her own, her own defence.

But in all other cases where, in *point of fact*, there was no refusal on the part of the government of Massachusetts to place her troops under the command of an officer of the general government, but where, at the same time, services were rendered indispensably necessary to her defence, either "to repel invasion, or under a well-founded apprehension of invasion," that her people have, under the Constitution of this country, a just claim for compensation, by virtue of that provision which guarantees a common defence to all the States.

That the State of Massachusetts should receive compensation for services performed under the requisition of an officer of the general government, or at his desire, in the exercise of a sound discretion, has never, your committee believes, been denied, however long even this may have been injuriously withheld. For services of this description, as well as those performed by her sons to repel the invasion, or the threatened invasion of her territorial limits by our enemy under circumstances where, *in point of fact*, there was not nor could not be a refusal on her part to place the troops so serving under the command of an officer of the general government. Your committee ask leave to report a bill providing for their remuneration, under discriminations, however, which they deem salutary and important.

19TH CONGRESS.]

No. 289.

[1ST SESSION.]

## ON A RE-ORGANIZATION OF THE QUARTERMASTER GENERAL'S DEPARTMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 5, 1826.

Mr. HAMILTON, from the Committee on Military Affairs, to whom was referred the documents from the Department of War accompanying the President's message, reported :

That they have taken into consideration the necessity there urged, and so frequently before urged by that department on the deliberations of Congress of providing for the Quartermaster General's department a more perfect organization ; and beg leave to report as the result of their inquiry into this subject the annexed communication from the Quartermaster General, which they consider as furnishing very conclusive proof that the organization he recommends will be highly beneficial ; and in accordance with which they beg leave to report a bill.

WAR DEPARTMENT, *December 27, 1825.*

Sir : In reply to your letter of the 22d instant in relation to a re-organization of the Quartermaster's department, I herewith transmit a report of the Quartermaster General, with the views of which I entirely concur.

I have the honor to be your most obedient servant,

JAMES BARBOUR.

Hon. J. HAMILTON, Jr., *Chairman Mil'y Com. House of Reps., &c., &c.*QUARTERMASTER GENERAL'S OFFICE, *Washington City, December 26, 1825.*

Sir : In reply to the letter of the honorable chairman of the Military Committee of the House of Representatives, referred by the Secretary of War to this office on the 23d instant, I have the honor to state that I find no reason to change the opinion expressed in my several reports recommending an increase of the officers of the Quartermaster's department, and some legal provision for the accountability for public property ; on the contrary, the experience of every day has demonstrated the necessity of the change proposed.

The department at present consists of thirteen officers and four storekeepers, and to perform its various duties more than fifty officers and agents have been necessarily employed during the year. To command that experience necessary not only to a prompt accountability but to a judicious application of the funds and property of the public, permanency of appointment if not of station is highly requisite. Where officers not of the department are employed changes are frequent and duties often badly performed, as well from the inexperience of those employed as from the fact that those holding temporary situations cannot be made to feel that high responsibility which attaches to every permanent office.

Two officers of the department have been constantly employed for more than a year in surveying and superintending the construction of roads in Florida. To make one of the surveys in that Territory authorized by Congress an officer could not be spared and the employment of a citizen became necessary. A call has lately been made upon the department for an officer to superintend the road authorized from Memphis, in Tennessee, to Little Rock, in Arkansas, with which it would be impossible to comply, unless one were to be withdrawn from a station where his duties are indispensable to the public service. To meet this call I have been compelled to ask that an officer be detailed from one of the regiments. In former reports I recommended the appointment of three additional quartermasters and eight assistants ; I would now recommend in place of one of the quartermasters two additional assistants, making two quartermasters and ten assistants. If this increase be authorized I feel confident, with the aid which I shall be able to derive from the subsistence department at many of the smaller posts, that every duty appertaining to this department will be efficiently performed, and that the accountability for property of every description will be made as perfect as that for money.

The whole expense of the proposed change will be less than eight thousand dollars, a sum trifling in amount when compared with the advantages to be obtained by its expenditure.

The more important duties of the assistant quartermasters necessarily require them to be mounted ; and if forage be not allowed to them by law, the public will often be compelled to furnish both horses and forage, or their duties will be imperfectly performed.

In addition to the assistant quartermasters I would recommend that forage for one horse each be allowed to ten of the assistant commissaries of subsistence; the posts or places at which it is to be allowed to be designated by the Secretary of War. The additional expense will only be nine hundred and sixty dollars per annum.

The annexed papers, numbered from one to five, are copies of or extracts from reports on the same subject.

I would respectfully suggest whether the objects contemplated by the 3d section of the bill reported by the Military Committee at the last session might not be better accomplished by regulation, under the general power conferred by the first section.

And I am, sir, respectfully, your obedient servant,

THOS. S. JESUP, *Quartermaster General.*

HON. JAMES BARBOUR, *Secretary of War.*

---

No. 1.

*Extract from the Quartermaster General's report to the War Department, dated November 22, 1823.*

I feel it my duty, before closing my report, to point out briefly some of the defects in the organization of the department, and to suggest such changes as experience has shown to be necessary.

In 1820, when the military frontier was not so extensive as at present, there was attached to the department, in addition to the Quartermaster General and two deputies, sixteen assistants, besides eighteen regimental and battalion quartermasters. The act of Congress of March 1821, re-organizing the army, abolished the regimental and battalion quartermasters, and reduced the number of assistants from sixteen to ten, so that of thirty-seven officers thirteen only were retained. The same act reduced the purchasing department to one commissary general and two storekeepers, and the duties relative to the administration and accountability of army clothing were necessarily transferred to the Quartermaster's department, thus nearly doubling its labors and responsibility, though its force had been reduced nearly two-thirds. The law, it is true, authorized the employment of subsistence commissaries in the Quartermaster's department, but they have the duties of their own department to perform, which, at stations where their services are most necessary, give them sufficient employment. Besides, the experience of every department proves that the only way to insure strict accountability is to confine officers to the duties of their own branches of service—to compel them to perform them, and positively to prohibit their interference with those of others. The reduction of the rank and file of the army from ten to six thousand men by no means warranted a corresponding reduction in the disbursing department; for it is well known to every intelligent military man that the labors of most branches of the staff, and particularly of the Quartermaster's department, depend not on the number of troops in service but on the number and remoteness of the posts occupied, the extent of the frontiers, and the dispersed state of the military resources of the nation.

The officers at present attached to the department are entirely inadequate to the proper and efficient discharge of the duties required of them, and the compensation of the assistants, on whom necessarily devolves most of the laborious details of the department, does not bear a just proportion to their duties and responsibility.

The officers of that grade now in the department are equal in capacity and intelligence to those of any other grade or corps in the army, but I fear that, unless measures be adopted to render their situation more desirable, they will, for the most part, abandon their stations and return to their companies. They should be allowed a compensation which would not only afford them a competent support, but be an equivalent for the talents and labor required in the discharge of their duties. But, it may be said, let those who are dissatisfied retire—there are others who would gladly fill their places—true, there are—and if the importance of a station depended upon the number of applicants to fill it, and the merit of those applicants upon the clamorous assertion of their pretensions, this might be good reasoning—but every day's experience proves that the number of applicants does not depend upon the value of the station sought: reduce the compensation one-half, and they would not be diminished. The difference would then consist in the character and not in the number, for even if an office be set up to the *lowest* bidder there will always be bidders enough.

I would therefore propose that, in addition to the officers now attached to the department, there be authorized three quartermasters and eight assistants, to be taken from the line of the army. This change, with an allowance of forage to the assistants, by presenting sufficient inducements to men of character to enter and remain in the department, would better secure a strict accountability than all the restrictive laws on the statute book. It is called for by every consideration of policy as well as economy; for the best guarantee the nation can have for the proper application of its funds will be found in the honor, intelligence, and abilities, of its officers. Let it not be said that the system of bonding affords this guarantee—experience proves the contrary. It may secure the payment of duties at the custom-house, or afford ultimate security against defaulters, but can never insure good faith in the public expenditures.

---

No. 2.

*Extract from a report dated February 9, 1824.*

At the reduction of the army in 1821 all the officers then charged with the preservation and issue of clothing and camp equipage were discharged from the service. Whether this was an oversight or intentional is not important at this time to inquire; but the consequence was that the purchasing department, in everything except the provision at the principal depot at Philadelphia, was left without officers to perform those duties which the service could not dispense with. As a measure of necessity, the charge, preservation, and issue of those supplies were, by your order, assigned to the Quartermaster's department, which added a third to its duties, while its force has been diminished in more than that ratio. This

state of things has been productive of much embarrassment to both branches of service thus united; not because they were unsusceptible of union, but from the limited number of officers attached to the department and the absence of all legal provision.

To the duties of preserving and issuing, already adverted to, it will be recollected that there was assigned to the department, in its administrative character, the laborious duty of prescribing and enforcing a system of accountability for all supplies derived from the purchasing department.

As the accountability for those supplies extends to the whole army, and as the chief of the department has never been stationed at Washington, where alone the administrative duties could be efficiently performed, there is abundant reason to fear that heavy losses have been sustained by the public for want of a proper system of accountability for the clothing and equipment of the troops. During the late war, as well as previous to it, there may be said to have been no accountability for public property, nor, indeed, any system by which those who were even disposed to account for whatsoever they had received could be governed in arranging their accounts.

The act fixing the military peace establishment, approved March 16, 1802, provided, it is true, that the pay department, in addition to its other duties, should have the charge of the clothing of the army, but it does not appear that any attempt was ever successfully made to carry into effect the provisions of that act. Indeed, from the organization of the pay department, and the situation of the army, the measure would have been impracticable. Those provisions were, therefore, finally repealed, and no effort appears to have been made to enforce accountability for clothing until 1816. In September of that year an attempt was made to correct the evil by introducing into our service a part of the British clothing system, in which the value of the clothing was added to the monthly or annual pay of the soldier, and he was charged the regulated price for every article issued to him. The pay department was charged with enforcing the new system, but its principles, though plausible in theory, were found in practice, like most of those borrowed from foreign services, without regard to the difference of circumstances, to be entirely inapplicable to the state of our army, dispersed as it was in small detachments throughout the Union. It was impossible to have a paymaster at each post; the officers of that department were, therefore, necessarily itinerant, and could not in justice be held accountable for property which, from the nature of their situation, it was impossible they could secure from damage or depredation. But even had the system been correct in principle, it was wrong in most of its details, of which a single fact will be sufficient to convince any practical military man, or, indeed, any other, who shall take the trouble to examine the subject for a moment. When the system was first announced it provided that no clothing should be furnished except on the certificate or report of an inspector.

Inspections were required to take place at the end of every two months. Now, if by any accident a soldier should have lost his cap or coat on the first day of January, neither could have been replaced until the inspection on the last day of February. Though that glaring defect was partially remedied in 1817, other defects were uncorrected, in consequence of which the voice of the army was opposed to the system, and it was repealed.

The efforts made during the last two years under the authority of the regulations of the War Department, issued July, 1821, (which contain most of the provisions recommended in this report,) have, it is believed, been productive of much improvement. All estimates for clothing for the troops pass through this office, where they are examined, and if more be required than the circumstances warrant deductions are made from the estimate. All accounts for clothing also pass through the office, but, though these circumstances are powerful checks upon all persons who receive public property, I feel the want of a legal provision to enable me to enforce a system which, to be effectual, should contain authority to mulct delinquents.

It is a fact worthy of notice that, while our statute books abound with laws relating to *money* accountability, there is scarcely a line in relation to *property*. With a view to supply this deficiency, and to obtain for the department an organization better suited to the new and increased duties, I submit a detail of the provisions which I consider indispensably necessary to secure the public interests.

I propose that a provision be made by law that the Quartermaster's department, in addition to its own proper duties, receive from the purchasing department, and distribute to the army, all clothing, camp and garrison equipage required for the service; and that it be the duty of the Quartermaster General, under the direction of the Secretary of War, to prescribe and enforce a system of accountability for all clothing and equipage, as well as quartermaster's stores, issued to the army; that every officer of the army who shall have clothing, camp and garrison equipage, or quartermaster's stores, for the use of his command, or for issue to the troops, render to the Quartermaster General, at the expiration of each regular quarter of the year, quarterly returns of such supplies, according to the forms which may be prescribed, accompanied by the requisite vouchers for any issue that shall have been made; which return and vouchers, after due examination by the Quartermaster General, be transmitted for settlement to the proper officer of the Treasury Department.

That it be the duty of all officers charged with the issue of clothing or other supplies carefully to preserve the same from waste or damage, and that in case of deficiency, on final settlement, of any article of supply, the value thereof be charged against the delinquent, and deducted from his monthly pay, unless he show, to the satisfaction of the Secretary of War, by one or more depositions setting forth the circumstances of the case, that the deficiency was occasioned by unavoidable accident, or was lost in actual service, without any fault on his part; and, in case of damage, that he be subject to charge for the damage actually sustained, unless he show in like manner, to the satisfaction of the Secretary of War, that due care and attention were given to the preservation of the supplies, and that the damage did not result from neglect.

The necessity for the increase proposed in the number of officers for the department has been sensibly felt for the last two years. Prior to the year 1821, when the clothing duties were provided for elsewhere, there were at my disposal eighteen quartermasters and assistants, besides the same number of regimental and battalion quartermasters. At present there are but twelve of the former and none of the latter, they having been abolished at the reduction, while their duties, as well as those of the clothing department, were necessarily thrown on the limited number of regular assistants. The extent and importance of the latter duties may, perhaps, be estimated by this general remark that clothing and equipage are received at Philadelphia by the officers of the Quartermaster's department, and thence transported to its destination, and issued to the army, while it is the object of the system proposed to trace those supplies through the various intermediate agents from the main depot till they reach the consumer, and thence, by a regular chain, to a final accountability at the treasury. The details of these operations involve great

labor, both in regard to the executive agents and the department in the administrative duties, and besides a considerable pecuniary responsibility is incurred.

The propriety of the additional quartermasters being authorized is too obvious to need demonstration. Those stations, by holding out the prospect of promotion to the assistants, would induce many of those possessing the requisite abilities to remain in the department. The allowance of forage to the assistants is absolutely necessary. Any one acquainted with the duties of quartermaster must know that they cannot be duly discharged on foot. Those officers, least of all others in the army, can dispense with the service of horses; besides they have taken the place of the regimental and battalion quartermasters, to whom forage has always been allowed; and it is but just, having regard to the necessities under which they labor, that the same allowance be accorded to them.

In regard to the disbursing officers of the army we have heretofore pursued a mistaken policy. The pay department is the only one whose subordinate officers receive a compensation bearing any proportion to their duties and responsibility. The assistant quartermasters are charged with duties equally responsible and laborious with theirs, and their compensation is one third less. It is also less than that allowed to the majority of clerks in this city, who have no pecuniary responsibility, and whose duties are not more laborious than theirs. The changes which I have recommended in compensation, though trifling in amount, are important to the officers as well as to the service. If adopted the officers will be able to devote their whole time and attention to their official duties, by which means alone can efficient service be expected or can economy and punctuality be introduced and maintained.

### No. 3.

QUARTERMASTER GENERAL'S OFFICE, *Washington, March 8, 1824.*

SIR: On the Quartermaster's department, more than on any other branch of the staff, depends the promptness and effect of every military operation. The greater portion of the disasters which have attended our arms since the revolution may be traced to the ignorance or inefficiency of this department. Until lately it was thought that every man who was able to write a good hand and cast accounts was qualified to be a quartermaster, but experience has proved that other qualifications are necessary, that service and military experience, united to habits of business, are indispensable. This branch of the staff may be said to be in its infancy in all the services of continental Europe, but, from their political organization, those nations experience no inconvenience from this defect, for the civil power is there subservient to the military, and whenever it becomes necessary to act all the energies of the country are controlled by the military commander, but happily for this nation the civil power is here paramount; but this circumstance furnishes one of the strongest arguments for the efficient organization of all the departments connected with the movement and supply of the army. The military here, whether militia or regular, must rely on themselves. Whatever be the wants of the service, or the circumstances of the country, they can derive from the civil power no other than voluntary aid. The staff, and particularly the Quartermaster's department, should therefore be so organized as to control, so far as the service shall require and according to the laws, the resources of the country.

This can be effected only by giving to the department officers sufficient to perform all the various duties required, and by allowing to those officers a compensation adequate to their support, and thereby enabling them to devote their whole time and attention to their official duties.

There are now in the Union, in addition to the stations of the officers at present attached to the department, eleven posts where quartermasters are necessary, particularly if the proposed system of accountability for public property be carried into effect. The law authorizes the employment of commissaries in the quartermaster's department, and they are employed at the smaller posts with advantage to the service, but it is found that at those posts where there are several companies, and consequently where their services are most required, their own duties give them sufficient employment.

It may be asked "Would not eleven assistants perform the duties of the department as well as three quartermasters and eight assistants?" I answer that the additional rank would add to the efficiency of the department by presenting higher inducements for young officers of talent and character to enter and remain in it. Besides, there are at least five stations in the country which, from their central positions, &c., involve more duty and responsibility than the rest. Compensation should always bear a just proportion to the responsibility incurred and the duty performed. But, as it is, while none of the assistants receive too much, or even enough, some of them receive the same compensation for duties at ordinary posts as those at stations of great importance. This very essential defect would be corrected by the proposed organization.

The annexed statement exhibits the additional expense which will be incurred by the proposed change; also the number of officers of which the department, should the change take place, will consist, as well as the number in service at the reduction of 1821, whose duties are now performed by the Quartermaster's department.

I am, sir, &c.,

*Estimate of the additional expense which would be incurred by the proposed change in the organization of the Quartermaster's department.*

Three quartermasters, to be taken from the rank of captains in the line—difference of compensation .....	\$1,440 00
Eight assistant quartermasters, to be taken from the line of the army .....	1,920 00
Forage for three quartermasters and eighteen assistants, the latter of whom are not at present entitled to the allowance, but whose duties render it indispensable .....	4,608 00
Per annum .....	<u>7,968 00</u>

The above is the total additional expense, beyond the present, which the proposed change would occasion. The organization would then be efficient for all the proper duties of the department, and competent to the discharge of the additional duties incident to the clothing accountability, the latter of which alone, prior to 1821, occupied the individual attention of six issuing commissaries and ten military storekeepers, at an annual expense of \$17,800. Without considering the increased efficiency of the department for its own proper duties, the importance of which is too obvious to need illustration, there would still be a clear reduction from the standard of 1821, of the cost of performing the clothing duties, equal to \$10,000 per annum. It need not be apprehended that the increase proposed would restore things, in point of expense, to what they were before the reduction of 1821. Such will not be the case; for, with little more than half the former force of the department, we shall, by the improved organization, be competent to the discharge of our own duties, in addition to those of issuing and accounting for clothing and camp equipage, which heretofore cost \$17,800 per annum.

The following will exhibit the two organizations, and show at once their difference in point of number. There is a much greater difference in expense, occasioned by most of the officers of the proposed organization being taken from the line, at but little *additional* cost. They can be very well spared from the line, and would be infinitely benefitted by staff duties.

## ORGANIZATION PRIOR TO 1821.

Quartermaster's department proper—	
Quartermaster General.....	1
Deputy quartermasters general .....	2
Assistant deputies.....	16
Regimental quartermasters.....	11
Battalion quartermasters.....	8
Engaged in clothing duties, which will be done by the Quartermaster's department—	
Issuing commissaries.....	6
Military storekeepers.....	10
	16
Total number.....	54

## PROPOSED ORGANIZATION.

Quartermaster General.....	1
Quartermasters .....	5
Assistant quartermasters .....	18
	24
Total number.....	24

The result, within a few hundred dollars, is, that the former organization exceeded that proposed about \$31,000 per annum, while the one proposed exceeds the present but \$7,968.

## No. 4.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, March 29, 1824.*

SIR: In addition to the remarks which I have already offered to the Committee on Military Affairs in relation to the necessity for some increase in the force of the Quartermaster's department, it has occurred to me that the subjoined statement, tending to show the practical operation of the present defective system, would not be unacceptable; I therefore ask your indulgence for a moment.

The disbursements of the department at the following enumerated stations are at present done, of necessity, by special agents, altogether temporary, and in whose appointments the head of the department has no agency. They are generally appointed *acting* quartermasters by the commanding officer of the post, and are liable to change as often as their own inclination or his caprice may suggest. They are not bonded either for the faithful performance of their duties, or for the ultimate security of the funds which are necessarily confided to them; nor can they, being temporary agents, be required to do so.

It not unfrequently happens that there are three or four changes in the course of a year, which, of itself, is a very serious inconvenience, for funds are sometimes remitted to one who, before the draft gets to hand, is relieved, and has left the station; and the money, being payable to his order, cannot be obtained by his successor without a delay, which occasions still further inconvenience to the public service. In addition to this, it is impossible to enforce the proper measures of administration in the concerns of the department, where the agent remains so short a time in service, and is succeeded by one equally without experience. A letter of instruction, relating to some measure growing out of the examination of an officer's accounts, is not unfrequently addressed to him, but finds him relieved from the duties, and probably at another station. His successor falls, perhaps, into the same error, and when apprised of the impropriety, pleads inexperience or the want of instructions on the subject.

These are the posts referred to and at which the duties are really important, viz:

1st. Council Bluffs, on the Missouri; 2d. Falls of St. Peter, on the Mississippi; 3d. Falls of St. Marie, outlet of Lake Superior; 4th. Green Bay, Michigan; 5th. Fort Smith, on the Arkansas; 6th. Natchitoches, on Red river; 7th. Prairie de Chien; 8th. Norfolk, Virginia.

The agents at these posts are not commissaries, for experience proved that they could not do the joint duties of the two departments. They are lieutenants and merely *acting* in the Quartermaster's department for the time. They receive \$10 per month in addition to their pay in the line of the army. The same expense or nearly so is therefore incurred as if they were all regular appointments in the department, while it is notorious that the duties are not half so efficiently performed, nor economy so much regarded as it would be under the proposed organization.

There are three other stations at which the duties are performed by commissaries, but so lamely that it is very desirable to separate them. These are Charleston, Sackett's Harbor, and Old Point Comfort; at the latter there will shortly be concentrated a considerable body of troops for practice; and there is no disposable officer of the department to station there.

In closing I cannot refrain from remarking that, in my humble judgment, the public service would be essentially benefitted and economy promoted by the passage of a bill embracing the changes recommended to the honorable committee in a former communication.

I am, respectfully, sir, your obedient servant,

T. S. JESUP, *Quartermaster General.*

Hon. J. HAMILTON, *Chairman of Committee Military Affairs.*

No. 5.—*Extract of a report dated November 27, 1824.*

In my last annual report I adverted to the necessity of increasing the number of officers of the department. I find no reason to change the opinion then expressed; on the contrary, the experience of the last year has demonstrated its correctness. If the department be worth retaining at all, it is certainly worth an efficient organization. As at present organized, the officers are so limited in number as to be entirely inadequate to the prompt discharge of the various duties required of them.

No. 290.

[1ST SESSION.]

APPLICATION OF THE CAPTAINS OF THE ARMY AT FORTRESS MONROE FOR AN INCREASE OF PAY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 9, 1826.

*To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:*

Your memorialists, who are captains in the army of the United States and stationed at Fortress Monroe, ask leave to state to your honorable body a few facts and reasons in favor of an augmentation of the pay of their grade.

Your memorialists believe themselves warranted in saying that few grades in the army are more important to its discipline and welfare than theirs. The captains have the immediate command of the soldiers, and have a direct influence over all their movements and conduct. The execution of all orders relating to the soldiers depends much upon the ability and promptitude of the captains.

Excepting disbursing officers, there are no officers in the army, it is believed, who are burdened with such pecuniary responsibilities as the captains, for they are held accountable for all the arms, clothing, and other public property, appertaining to a company. In every other instance such accountability is counterbalanced by some extra pay.

It is an established principle in common transactions, and is doubtless so in legislation, that recompense shall be commensurate with service. Your memorialists believe that the full benefit of this principle has not been extended to them. While their duties, and particularly their responsibilities, have been gradually increased by various military regulations and legislative acts, and while these regulations and acts have conferred additional emoluments and privileges upon other grades, particularly upon the subaltern grades, the grade of your memorialists has not only derived no advantages from them, but has been deprived of many which it before enjoyed. During the late war, and previously, almost every staff appointment was open to captains as well as to officers of other grades, but at this time they are excluded from every staff appointment taken from the line, (according to the law,) excepting one. Your memorialists believe that such a practice prevails in no other service, and that it operates unfairly, and sometimes injuriously, in ours.

Your memorialists are aware that the rules of other services are no guide for us, still they deem it not impertinent to the present case to quote the relative value of a captain's and a lieutenant's commission in Britain and in France, whence we have derived our best military regulations, and most of our instructions in tactics. A captain's commission in a British regiment of cavalry is rated at £2,950, while a first lieutenant's in the same regiment is rated at £1,500. About the same disparity exists in this respect throughout the British service. In the French service a captain's monthly pay is more than seventy-five per centum greater than that of a first lieutenant's.

Some of your memorialists have now been in the army for nearly twenty years, and all of them served through the late war. Promotion is so slow during a time of peace that few of them, even if they spend their lives in the service, can anticipate reaching a higher grade. The allowances they receive are believed to be precisely the same which have been accorded to their grade from the revolution down to the present time, while every article of supply, which they are obliged to purchase, whether of food, raiment, or military equipment, has been almost constantly augmenting in value.

Your memorialists, without adducing further arguments in support of their request, submit it to the justice and liberality of your honorable body.

19TH CONGRESS.]

No 291.

[1ST SESSION.]

RULES FOR THE ADJUDICATION OF CLAIMS FOR MILITIA SERVICES, AND REPORT OF  
THIRD AUDITOR ON THE CLAIM OF MASSACHUSETTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 9, 1826.

DEPARTMENT OF WAR, *January 7, 1826.*

SIR: Pursuant to a resolution of the House of Representatives, of the 4th instant, directing the Secretary of War to report to that House "the rules which have governed that department in allowance of claims for the services of the militia of the several States, rendered since the adoption of the present Constitution; also to communicate to this House the reports of the Third Auditor, not before communicated, relative the claim of the Commonwealth of Massachusetts for the services of its militia during the late war," I have the honor to transmit herewith copies and extracts of letters from the records of this department, marked 1, 2, 3, and 4, which contain all the general rules known to the department, which have governed in allowance of claims for the services of the militia of the several States, adjusted under the sanction of the Executive.

I also transmit herewith such reports of the Third Auditor, relative to the claim of Massachusetts, for services of militia during the late war, marked 5 to 16 inclusive, as have not been before communicated to the House.

For information connected with the first part of the resolution I would respectfully refer to the report of this department, No. 65, State Papers, Reports, Vol. II, of the 1st session of the 14th Congress.

I have the honor to be, your obedient servant,

JAMES BARBOUR.

HON. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

DEPARTMENT OF WAR, *March 7, 1816.*

SIR: In obedience to the resolution of the House of Representatives of the 21st ultimo, I have the honor to transmit the enclosed documents. In addition to the sum advanced to the State of Virginia by the Paymaster General, the sum of four hundred thousand dollars have been paid to that State for expenses incurred by the employment of the militia in its defence. The claims of that State have been admitted on the ground that the governor of Virginia was invested with discretionary power by the War Department to call forth the militia in such numbers as the emergency should require; and that the force actually employed was, at that time, not believed by the Secretary of War to be excessive. It is now believed that the number of militia kept in service, when compared with that called into the field by the President for the defence of Baltimore against the same hostile force, which could be brought to act against the capital of Virginia from various points, was not beyond what the emergency required. The force here referred to and the expense intended to be sanctioned are those which the letter of the commissioners and the statement of the adjutant general of that State, herewith enclosed, exhibit. The claims of North Carolina and Rhode Island have been sanctioned because they are founded upon expenses actually incurred upon militia called out under the authority of the United States, or had received the sanction of that authority after they were called into service. The claims exhibited by Delaware and New Hampshire have been suspended until evidence, shall be produced to show that the emergency was such as to require the service without waiting the intervention of the executive authority of the Union.

The State of New York has Exhibited claims for arms and ammunition furnished the militia or captured by the enemy in our military depots; and also for additional pay allowed their militia when in the public service. The claims of Virginia embrace items of the former, and that of New Hampshire of the latter character. No decision has been made upon these claims, but it is believed that the powers of the department do not extend to their liquidation and admission without further legal provision for that purpose.

It is believed that no other State has presented any specific claim for money expended upon militia service during the war; but it is proper to state that, in the correspondence between the governor of Massachusetts and the Secretary of War, it was distinctly declared that reimbursement would not be made of any expenses incurred upon militia called into service by the State authority, with the declared intention of excluding the authority of the United States over such militia force.

Time and reflection, so far from having changed the opinion then formed, have tended only to strengthen and confirm it. The several States have a right, in time of war, to raise and maintain regular troops; more strongly have they the right to employ their militia in military operations, where it can be done without infringing the rights of the national Executive over the same force. But it never can be admitted that expenses incurred by raising and supporting regular troops can be a charge against the nation; and it is equally clear that expenses incurred upon militia service under State authority, with the declared intention of directing and controlling that force to the exclusion of the national authority, can form no such charge. No claims of this nature will be recognized by the Executive branch of the government, unless provision shall be made by law for that purpose.

I have the honor, &c.

WM. H. CRAWFORD.

HON. HENRY CLAY, *Speaker of the House of Representatives.*

*Extract of a letter from the Hon. John C. Calhoun, Secretary of War, to Peter Hagner, Esq., Third Auditor, relative to the Virginia claim for the militia, ordered out during the late war, dated January 24, 1818.*

In the foregoing decisions, I have adopted the general principle that the troops having been judiciously and promptly called into service, and fully recognized by the general government, a necessary consequence results, that all expenses incident thereto, coming within the usage of the army, are admissible as charges against the United States.

DEPARTMENT OF WAR, *February 14, 1818.*

SIR: In the settlement of the claims of the State of Maryland for militia services you will admit all of the expenditures by the State that are of the usual character in such cases, and properly vouched, where the militia have been called out on actual or well-founded fear of invasion.

I have the honor to be, &c.

JOHN C. CALHOUN.

PETER HAGNER, Esq., *Third Auditor.*

*Extract of a letter from the Secretary of War to Colonel Ferris Pell, dated March 30, 1818.*

I have examined the statement which you have presented of the claims of the State of New York against the United States for disbursements on account of the militia in the late war. In the settlement of similar accounts it has been established by this department, as a principle, that the United States are liable for all the disbursements made by the State on account of the militia called out by the authority of the United States, provided such disbursements were for the usual military supplies, and such as are authorized by law for the militia. The same principle applies where the militia have been called out by State authority, and afterwards recognized by the President, or where they have been called out on a sudden invasion, or well-founded fear of invasion. All disbursements must be regularly and properly vouched.

*Supplementary report No. 1.*

TREASURY DEPARTMENT, *Third Auditor's Office, April 25, 1825.*

The Third Auditor, in continuation, and upon the principles on which his report to the Secretary of War, of January 12, 1825, was founded, has the honor to submit the following supplementary report in relation to the accounts of the State of Massachusetts for military expenditures during the late war.

On examination of the vouchers for expenditures by the State for services of the militia belonging to the 6th division, commanded by Major General Ichabod Goodwin, it has been found that the following detachments were called into service in the summer and autumn of 1814 at the places and under the circumstances hereinafter stated.

Detachments.	Force, including officers.	Remarks.
Major John Spring's command . . . .	390	On the 17th of June, 1814, Brigadier General John M'Donald issued an order directing Major Spring to call out a sufficient force to repel the enemy, (who, it seems, had previously "landed in or near Saco, and destroyed some property.") It appears from the rolls that Major Spring did, on the 16th of June, and under the sanction of the foregoing order, call out, besides his own staff, seven companies, all of which rendezvoused at Saco. Three of the companies were discharged on the 18th, three on the 20th, and the other June 21, 1814. Major Spring and his staff officers were paid to different dates, subsequent to the 21st, but none later than the 27th of June, except Major Spring himself, who has been paid to include the 31st of July, 1814.
A guard commanded by Lieutenant Seth S. Fairfield—		This guard was stationed at Jordan's point, Biddeford, in pursuance of an order issued by Brigadier General John M'Donald on the 20th of June, 1814; from which time to September 23, 1814, it was kept up by relief guards, in pursuance of orders. Though not organized under it, it is presumed that this guard, as well as the one hereinafter mentioned, was continued in service under Adjutant General Brookes' letter to General Goodwin, of the 24th of June, 1814, stating "that the constant alarm excited and kept up by the predatory course of warfare, lately adopted by the British cruisers on our seaboard, renders it necessary that guards should be kept at some of the places more particularly exposed, by having quantities of shipping lying therein."
From June 20 to July 27 . . . .	42	
From July 27 to August 25 . . . .	21	
From August 25 to Sept. 23 . . . .	20	
Maj. Samuel Merrill's command . . . .	128	Upon the representations of the selectmen of the towns of Saco and Biddeford, of the alarmed state of the inhabitants on that "part of the seaboard," Major General Goodwin issued an order on the 16th of September, 1814, directing Brigadier General M'Donald to strengthen the guards at Biddeford and Saco harbor, if he should, on repairing to those places, think such a measure necessary. Accordingly, on the 17th of September, Brigadier General M'Donald issued an order directing Major Merrill and three light infantry

*Supplementary report No. 1—Continued.*

Detachments.	Force, including officers.	Remarks.
Captain Appleton's company.....	58	companies to repair forthwith to Saco; and by the rolls it appears that Major Merrill and Captain Woodman's company arrived at Saco on the 19th, and Captain Small's company on the 20th of September, 1814; and that the Major and Captain Woodman's company were discharged on the 12th October, and Captain Small's company on the 17th of October, 1814. By Captain Stimson's rolls it appears that his company arrived at Biddeford on the 19th of September, and was discharged on the 12th of October, 1814. On the 3d of October, 1814, Major General Goodwin issued an order directing Brigadier General McDonald to detach two companies, to consist of fifty men each, one for the relief of the companies stationed at Biddeford and Saco, and the other for the relief of the company stationed at Arundel. Under this order it appears that two companies, consisting, (including officers,) one of fifty-eight men, and the other of fifty-two men, were detached, under the command of Captains Daniel Appleton, jr., and Solomon Strout, and that the former continued in service from the 10th of October to the 10th of November, and the latter from the 13th of October to the 12th of November, 1814, when they were discharged, under an order of the Major General bearing date the 4th November, 1814.
Captain Strout's company.....	52	
A guard commanded by Lieuts. O. Walker, G. Wheelwright, and David Maxwell—		By an order issued on the 19th of June, 1814, by Lieutenant Colonel Mitchell, a guard, to consist of one lieutenant, two sergeants, two corporals, and sixteen privates, was detailed and stationed at Kennebunk. This guard, under the order of 19th June, and subsequent ones, was continued in service from the date of the first order till the 3d of October, 1814, when it was finally discharged.
From June 19 to June 29.....	21	
From June 29 to July 9.....	21	
From July 9 to August 8.....	21	
From August 8 to September 8..	20	
From September 8 to October 3..	21	According to the rolls this was a detachment from Captain Isaac Lyman's company of York Sea fencibles, and continued in service from the 25th of July to the 25th of October, 1814. On the rolls it is stated that the services were rendered in pursuance of division orders of July 21, August 20, and September 10, 1814. The orders referred to have not been produced, nor does it appear where or for what purpose the services of this detachment were required.
A detachment commanded by sergeant John S. Thompson.....	21	

Including a few days' pay and emoluments charged at different periods during the time the foregoing services were rendered by Major General Goodwin, Brigadier General McDonald, and Brigade Major Simon Fogg, and some miscellaneous expenditures connected with the foregoing services, the expenditures on account of the sixth division in the pay department amount to \$6,419 47, and the deductions therefrom amount to \$2,346 43.

In the event of the services of this division being recognized upon the principles laid down in the bill reported by the Military Committee of the House of Representatives, a considerable portion of the deductions would be admissible upon receiving special sanction and being further vouched.

For reasons similar to those assigned in the report of the 12th January, 1825, the vouchers appertaining to the subsistence, quartermaster's, ordnance, and medical and hospital departments of this division have not been examined.

It may be proper to state that on the 22d of September, 1814, Adjutant General Brooks, apparently in accordance with Major General Dearborn's requisition of September 4, 1814, ordered Major General Goodwin to detach from his division 200 infantry and 50 artillerymen for the defence of Portsmouth, New Hampshire, and to place the detachment under the command of Colonel Walbach, of the United States army. The order appears to have been carried into effect by General Goodwin immediately thereafter. The services of this detachment, having been paid for by the United States, forms of course no part of the claim of Massachusetts.

On September 6, 1814, General Dearborn suggested to the executive of Massachusetts the propriety of issuing orders "for placing the whole of the militia within twenty or thirty miles of the sea-shore, on the alert, and in perfect readiness for marching on the shortest notice." Of the executive's compliance with this suggestion there is no evidence found; and unless it should be inferred that the services rendered subsequent to the date of that suggestion were in accordance with it, there is no evidence to warrant a belief that any part of the services described in this report were rendered "at the desire or instance of an officer of the national government." Whether "actual invasion," or "a well-founded apprehension of invasion," is sufficiently established by the facts herein set forth to have warranted the services performed

by this division, are questions for the executive to determine, as well as whether the numbers called out at the different periods set forth were warranted by the "exigency" of the time when the services were rendered.

PETER HAGNER, *Auditor*.

Hon. JAMES BARBOUR, *Secretary of War*.

*Supplementary report No. 2.*

TREASURY DEPARTMENT, *Third Auditor's Office, May 11, 1825.*

In accordance with the principles upon which his report to the Secretary of War of January 12, 1825, was founded, the Third Auditor has the honor to submit the following supplementary report in relation to the accounts of the State of Massachusetts for military expenditures during the late war:

On examination of the vouchers for expenditures by the State for services of the militia belonging to the 12th and 13th divisions, commanded by Majors General Alford Richardson and Levi Hubbard, it has been found that the following detachments were called into service from said divisions, in the year 1814, for the defence of the town of Portland and its vicinity.

Divisions.	Force, including officers and servants.	Remarks.
TWELFTH DIVISION.		
Major General Richardson and staff. . .	7	In service from the 8th September to the 9th November, 1814.
Lieut. Col. Jos. E. Foxcroft's regiment, 1st brigade . . . . .	614	In service from the 10th to the 24th September, 1814.
Brig. Gen. Jas. Irish and staff. . . . .	12	In service from the 7th to the 20th September, 1814.
Lt. Col. I. Hobb's regiment, 2d brigade. Lt. Col. John Burbank's regiment, 2d brigade . . . . .	569	In service from the 8th to the 20th September, 1814.
Lieut. Col. M. Nicholl's regiment, 2d brigade . . . . .	653	In service from the 7th to the 20th September, 1814.
Lieut. Col. M. Nicholl's regiment, 2d brigade . . . . .	376	In service from the 7th to the 19th September, 1814.
Captains C. Barnes's and P. Varnum's companies of artillery, 2d brigade. . .	53	In service from the 7th to the 19th September, 1814.
Lieut. N. Leighton's detachment of cavalry . . . . .	24	In service from the 12th to the 26th September, 1814.
Captain I. Leighton's detachment of artillery . . . . .	21	In service from the 12th to the 26th September, 1814.

## REPORT—Continued.

Divisions.	Force, including officers and servants	Remarks.
THIRTEENTH DIVISION.		
Brig. Gen. John Turner and staff, 1st brigade .....	4	In service from the 12th to the 27th September, 1814.
Lieut. Col. W. Ryerson's regiment, 1st brigade .....	456	In service from the 13th and 14th to the 24th September, 1814.
TWELFTH DIVISION.		
Lieut. Col. S. Holland's regiment, 1st brigade .....	397	In service from the 13th and 14th to the 24th September, 1814.
Lieut. Col. C. Clark's regiment, 1st brigade .....	540	In service from the 13th and 14th to the 24th September, 1814.
Major Greenwood and staff, (cavalry,) 1st brigade .....	5	In service from the 14th to the 16th September, 1814.
Capt. S. Buckram's company, (cavalry,) 1st brigade .....	38	In service the 14th and 15th September, 1814.
Capt. W. B. Bray's company, (cavalry,) 1st brigade .....	35	In service from the 13th to the 22d September, 1814.
Capt. D. Cooledge's company (cavalry.)	37	In service from the 13th to the 15th September, 1814.
Major A. Blossom's artillery, 1st brigade .....	96	In service from the 12th and 13th to the 24th September, 1814.
Brig. Gen. John McMillan and staff, 2d brigade .....	4	In service from the 13th to the 24th September, 1814.
Lieut. Col. Jas. Steele's regiment, 2d brigade .....	342	In service from the 12th and 13th to the 24th September, 1814.

It appears from Major General Richardson's affidavits that the foregoing services were rendered, in consequence of his having received, prior to September 6, 1814, "a pressing communication from the committee of safety and defence, requesting" him, "with all possible despatch, to call out" his "division, for the protection of that town and harbor, (Portland,) then threatened by the enemy." The troops from the 13th division marched to Portland in consequence of an application from General Richardson to the brigadier generals of that division. General Richardson's application was made in conformity to a letter from Adjutant General John Brooks to him, bearing date September 9, 1814. From the letter just referred to, it is obvious that General Richardson was left free to exercise his discretion and judgment in calling out, from his own and the 13th division, whatever force he might deem necessary for the defence of Portland.

*Lieutenant Colonel William Ryerson's detached regiment, 1,299 strong.*

It appears, from Colonel Sumner's letters of September 15 and 25, to Adjutant General Brooks, (transmitted with my report of January 12, 1825,) that, prior to September 24, 1814, a consultation was held by him (as agent for defensive measures in Maine) with the committee of safety, &c., of Portland, General Richardson, and General Chandler, of the United States army, as to the force it would be advisable to retain in service for the defence of Portland; and that it was decided that 1,000 infantry and 100 artillery, (being the numbers for which General Dearborn had previously made a requisition on the executive of the State,) exclusive of officers, should be detached and placed in the service of the United States. Accordingly, on September 19, a division order was issued, to carry into effect the arrangement; and by September 24, 1814, the detachment appears to have been organized, and Colonel Ryerson assigned to the command thereof, and the residue of the militia, previously in service, discharged. It further appears, by one of Colonel Sumner's letters, before referred to, that many of the officers of the detachment having determined not to report themselves to any United States officer, he requested General Richardson to take the command of said detachment. Colonel Sumner states that it was absolutely necessary for General Richardson to take command of the detachment, as Lieutenant Colonel Ryerson, who had been detailed for that purpose, instead of Colonel Foxcroft, who, it was supposed, would have been, was qualified for fatigue duty only. This detachment was discharged on November 4, 5, 6, and 7, 1814, in pursuance of General Richardson's orders. What effect, if any, the foregoing circumstances will have to exclude the services of this detachment from the provisions of the bill reported by the Military Committee of the House of Representatives is a question for the Executive to determine.

Detachments.	Force, including officers.	Remarks.
Lieutenant Clark Dyer's detachment of cavalry.	20	In service from September 26 to October 29, 1814. This detachment was called out for the defence of Portland, under an order issued by General Richardson, on September 23, 1814.
Captain E. Andrews's company....	75	This company was called out, pursuant to an authority from the governor of the State, on July 4, 1814, and was stationed at Fort Burrows (Portland) as a guard for the town and harbor, and was continued in service for that purpose until September 2, 1814, when it was discharged by General Richardson's order.
A corporal's guard at North Yarmouth, as a watch.	31	This guard consisted of a corporal and three privates, which was kept up by a new guard every two days, from September 11 to 21, 1814, in pursuance of Lieutenant Colonel Sam. Walker's orders.
Similar guard at the same place....	44	This guard appears to have been detailed from the 13th division, and was kept up in the same way as the preceding one, from September 12, 1814, to October 25, 1814, in pursuance of the same officer's orders.
Lieutenant Oliver Bray's detachment of volunteers.	60	These detachments were in service from November 5, 1814, to February 23, 1815. The large detachment was discharged on November 25, 1814, from which time the latter commenced, and continued in service until February 23, 1815.
Similar detachment, commanded by Sergeant John Lowell.	15	

It appears, by General Richardson's first order, bearing date November 5, 1814, that the object in raising these volunteers was "for the protection of the forts, ordnance, munitions of war, and other property belonging to the Commonwealth," at Portland.

Including some miscellaneous expenditures which were blended with, and have been examined in connexion with, the vouchers appertaining to the pay department of the 12th and 13th divisions, the expenditures on account of those divisions in the pay department amount to \$56,311 35, and the deductions therefrom amount to \$16,444 57½.

In the event of the services of those divisions being recognized upon the principles laid down in the bill reported by the Military Committee of the House of Representatives, a portion of the deductions would be admissible upon receiving special sanction and being further vouched.

For reasons similar to those assigned in the report of the 12th January, 1825, the vouchers appertaining to the subsistence, quartermaster's, and medical and hospital departments of these divisions have not been examined.

With the exception of the circumstances stated in relation to the detachment organized and placed under the command of Colonel Ryerson, there is no evidence of any other part of the services described in this report having been rendered "at the desire or instance of an officer of the national government." Whether "actual invasion" or "a well-founded apprehension of invasion" is sufficiently established by the facts herein set forth, and the documents mentioned in the annexed schedule, to have warranted the services performed by the 12th and 13th divisions, are questions for the Executive to determine, as well as whether the numbers called out were warranted by the "exigency" of the time when the services were rendered.

HOD. JAMES BARBOUR, *Secretary of War.*

*A schedule of documents elucidatory of the foregoing report, and upon which it is in part founded.*

*Supplementary report No. 3.*

TREASURY DEPARTMENT, *Third Auditor's Office, June 18, 1825.*

Upon principles similar to those on which his report of the 12th January, 1825, was founded, the Third Auditor has the honor of submitting the following supplementary report in relation to the claim of the State of Massachusetts for military services and expenditures during the late war :

On examining the vouchers for expenditures by the State for services of the militia belonging to the 10th division, or Major General David Cobb's command, it has been found that Brigadier General John Brewer, who commanded the second brigade of said division, (in consequence of an application from L. Trescott, collector of the district of Passamaquoddy, and the committees of safety of the towns of Eastport and Robbinston,) did, on the 15th of July, 1812, issue an order for the third regiment, commanded by

Lieutenant Colonel Oliver Shead, and the company of artillery at Eastport, to perform "military duty for the purpose of defending the lives and property of the inhabitants within the bounds of said regiment, and repelling any invasion of the enemy." In accordance with this order Lieutenant Colonel Shead, with his field and staff officers, and the following companies, appear to have entered and continued in service for the periods stated :

*Force.*

Lieutenant Colonel Shead and staff, in service from 21st July to 1st September, 1812.....	12 men.
Captain J. Keen's company, in service from 21st July to different dates in August, and some few as late as the 1st September, 1812.....	59 "
Captain J. N. Perry's company, in service from 21st July to 1st September, 1812.....	43 "
Captain J. W. Reynolds's company, in service from 21st July to 29th July, 1812.....	42 "
Captain Thomas Vose, jr.'s, company, in service from 21st July to 4th August, 1812.....	46 "
Sergeant A. Gregouss's company, in service from 21st July to 1st September, 1812.....	26 "
Lieutenant B. Wilder's company, in service from 21st July to 7th August, 1812.....	21 "
Captain Wm. Hill's company of artillery, in service from 21st July to 1st September, 1812...	28 "
	<hr/>
Total force .....	<u>277</u> "

It appears from General Dearborn's letter of the 1st July, 1812, to Colonel Trescott, that he had made a requisition on the executive of Massachusetts for one company of artillery and four companies of infantry for the defence of the sea-coast of that section of the State, but that "the governor had declined or neglected to comply with the requisition."

The payments to Colonel Shead's regiment and Captain Hill's company of artillery, for monthly pay and officers' subsistence and forage, on account of the foregoing services, amount to \$2,627 02.

In reference to the foregoing services, it may be proper to state that the executive of Massachusetts did, on the 5th August, 1812, (apparently at the request of General Dearborn,) issue an order addressed to Major General Henry Sewall, in which said Sewall was directed to detach, for the defence of Eastport and its vicinity, a major, adjutant, and quartermaster, and three full companies of infantry. This detachment was accordingly made, and the three companies composing it were commanded by Captains Thomas Vose, jr., Thomas George, and Joshua Chamberlain. Captain Vose's company was taken from Colonel Shead's regiment, and was in the service of the State at Eastport when the order for this detachment was issued. Captains George's and Chamberlain's companies appear by the rolls to have been organized on the 11th August, 1812, but having a considerable march to perform, did not reach Eastport till about the last of the month. It appears that the whole detachment was received into the United States service on the 1st September, 1812, from which time to the time of its discharge it was paid by District Paymaster Freeman, of the United States army. But from the 11th to the 31st August, 1812, Captains George's and Chamberlain's companies were paid by the State of Massachusetts, and forms part of her claim against the United States. These two companies constituted a force of 144 men, (officers included,) and their pay, as charged by the State for the time stated, amounts to \$650 69, and the deductions therefrom to \$67 83.

It will be observed that no part of Colonel Shead's regiment remained in service later than the 1st September, 1812, about which time Brigadier General John Brewer states that the battalion of detached troops arrived, which occasioned the discharge of Colonel Shead's regiment.

The fact of the foregoing detachment having been ordered for the defence of Eastport was communicated by Governor Strong to the Secretary of War, in a letter bearing date the 5th August, (the day on which the order was issued,) and was again referred to by the governor in another letter to the Secretary, bearing date the 21st of August, 1812.

It further appears from the vouchers that in the month of March, 1813, a detachment commanded by Lieutenant Colonel John Black, amounting to (including officers) 130 men, was in service from seven to nine days for the defence of the island of Mount Desert. It is stated by A. Bradford, esq., in his report of the 22d November, 1822, to the executive of Massachusetts relative to the services of the militia of said State during the late war, that this detachment was ordered out in consequence of an alarm at that place, but what the circumstances were that produced the alarm are not stated.

The disbursements to this detachment amount to.....	\$511 79
And the deductions therefrom to.....	39 89

It further appears that on the 2d September, 1814, Colonel Jacob Ulmer issued an order for assembling his regiment forthwith at Belfast. The regiment was accordingly assembled to the number of 458, (officers included,) and continued in service till the 21st of the same month, when it was discharged by Colonel Ulmer's order of that date. From the statements of Adjutant William Salmond and Lieutenant Lot Ryder, it appears that Colonel Ulmer's regiment was called out in consequence of the capture of Castine, on the 1st September, 1814, and in consequence of the enemy's having landed from 500 to 700 troops at Belfast on the same day.

The disbursements to this regiment amount to.....	\$3,905 65
And the deductions therefrom to.....	761 01

On the 1st September, 1814, Brigadier General John Blake and Lieutenant Colonel Andrew Grant issued orders for sundry companies of the 1st brigade to repair forthwith to Hampden, with a view of protecting the shipping at that place, the enemy being hourly expected there to destroy it. Under these orders it appears by the rolls that thirteen companies, amounting to (including General Blake and Major George) 551 men, assembled and continued in service, generally, for three days.

The disbursements to these troops amount to.....	\$1,305 64
And the deductions therefrom to.....	254 07

On the 18th July, 1814, a general order was issued by the executive of Massachusetts in accordance with General Dearborn's requisition for detailing a detachment of 200 artillery and 900 infantry, exclusive of officers, for the service of the United States. Of this detachment one company of 90 privates, with the requisite officers, were to be detailed from the 10th division, and were directed to march to Castine. A

division order to carry into effect the foregoing general order was accordingly issued on the 6th August, 1814, and by an order bearing date the 12th of the same month the detachment was directed to rendezvous on the 26th, from which time to the 3d September, 1814, a part of Captain Isaac Perry's company, consisting of eleven men, were paid by the State for services alleged to have been rendered at Castine, under the aforesaid orders.

The amount paid said men is ..... \$50 20  
Deducted therefrom..... 9 09

For reasons similar to those assigned in former reports, the vouchers appertaining to the subsistence, quartermaster's, and medical and hospital departments of this division have not been examined.

The circumstances stated with respect to each particular service, described in this report, in connexion with the documents enumerated in the annexed schedule, exhibits all the evidence that has been found among the papers or accounts of the State in relation to the services of the 10th division, having been rendered "at the desire or instance of an officer of the national government."

Whether "actual invasion" or "a well-founded apprehension of invasion" is sufficiently established by the facts herein set forth, and the accompanying documents, to have warranted the services performed by this division, are questions for the Executive to determine, as well as whether the numbers called out were warranted by the "exigency" of the time when the services were rendered.

PETER HAGNER, *Auditor*.

HON. JAMES BARBOUR, *Secretary of War*.

Brigade order, dated August 10, 1812.  
Lieutenant Colonel Oliver Shead's letter to Major Joseph Whitney, dated August 13, 1812.

*Supplementary report No. 4.*

TREASURY DEPARTMENT, *Third Auditor's Office, July 12, 1825.*

In accordance with the principles upon which his report of the 12th of January, 1825, was founded, the Third Auditor has the honor of submitting the following supplementary report in relation to the claim of the State of Massachusetts for military services and expenditures during the late war:

On examining the vouchers for payments made by the State to the militia of the 2d division, or Major General Amos Hovey's command, it appears that the following services were rendered in the years 1814 and 1815, at the places and under the circumstances hereinafter detailed:

Captain B. Haskell's company, 76 men, in service at Gloucester from June 21 to September 20, 1814.  
Captain B. Haskell's company, 78 men, in service at same place (in continuation) from September 20 to November 7, 1814.

Captain Moses Witcher's company, 90 men, in service at same place from September 19 to November 7, 1814.

In town meeting, on the 13th of June, 1814, it appears the inhabitants of the town of Gloucester resolved to call on the executive of the State for two companies for the defence of said town. Whether application was made to the executive, or whether any order was issued by the executive to Major General Hovey, does not appear; but it does appear that a division order was issued on the 16th, a brigade order on the 17th, and a regimental order on the 18th of June, 1814, for detaching one company, and, by the last-mentioned order, Captain Benjamin Haskell was assigned to the command thereof. The selectmen of the town of Gloucester, having understood that Colonel Appleton had received orders to discharge Captain Haskell's company, addressed a letter to Major General Hovey, on the 8th of August, 1814, in which they represented the liability of the place to sudden attacks, and requested that the company might be continued in service. On the next day (August 9, 1814) General Hovey addressed a letter to the selectmen, acknowledging the exposed situation of the place, and informed them that the order for discharging the company had been countermanded. On the 16th of September, 1814, an order was issued by the governor directing Major General Hovey to detach another company, to be stationed at Gloucester, for the term of

ninety days, and also assigning Major Robert Elwell, jr., to the command of all the detached troops at that place. In obedience to this order, Major Elwell appears to have assumed the command at Gloucester on the 15th, and on the 19th of September, 1814, Captain Moses Witcher's company appears to have arrived there, and, with the major and Captain Haskell's company, to have continued in service till the 7th of November, 1814, when the whole detachment appears to have been discharged. In reference to the foregoing services, the selectmen of the town of Gloucester state, under date of September 21, 1814, that during the summer and autumn of 1814 the enemy's vessels were almost daily within shot distance of the town, that they were constantly attempting to land, and on one or two occasions did land, but were repulsed by the militia.

Detachments.	Force.	Remarks.
Captain Joseph Hooper's company . .	109	In June, July, and August, 1814, twenty of the number performed guard duty at Beverly from three to fifty-nine days. The residue of the company rendered from one to six days' service in September and October, 1814, under a general order bearing date the 16th September, 1814, which will be particularly noticed hereafter.
Captain Aaron Foster's company . . .	172	Sundry days' services as guard at Beverly, between the 20th June and 7th October, 1814. It is stated on the rolls that the services were rendered under general orders of the 14th and 20th June, 1814, and 19th September, 1814.
Captain Nath'l Lamson's company . .	353	Sundry days' services as guards at same place, between the 14th June and 7th October, 1814, according to the rolls. These services were rendered under the same general orders that are referred to in Captain Foster's case.
Lieutenant John Davis's company . .	32	Services as guards at Beverly from the 21st August to 21st September, 1814, agreeably to general order of the 17th August, 1814.
Captain Abraham Lord's company . .	104	Sundry days' service as guards at Beverly, between the 22d June and 11th October, 1814, agreeably to general orders of the 17th and 27th June, 1814, and 18th September, 1814.
Lieut. Col. Brimblecomb's regiment. .	358	From one to three days' services as guard at Lynn, in June, July, and August, 1814, agreeably to division order of 27th June, 1814.
Captain Thos. R. Williams's company .	71	From one to five days' services as guards at Salem Neck, in June, July, and August, 1814, agreeably to division order of 11th June, 1814.
Captain Israel Williams's company .	70	For two days' services at Salem, as guards, in July, 1814, agreeably to general orders of 9th and 23d July, 1814.
Captain David Davis's company . . . .	73	For two days' services as guards at Salem, in July and August, 1814, agreeably to a regimental order of 1st July, 1814.
Captain Nathan Blord's company . . .	109	From one to five days' services as guards at Salem, in July, 1814, agreeably to a regimental order of 3d July, 1814.
Captain Sam'l Mansfield's company . .	102	From one to six days' services as guards at Salem, in June, July, and August, 1814, agreeably to general order of 16th June, 1814.
Captain Jas. Chas. King's company . .	54	From two to ten days' services as guards at Salem, in June, July, and August, 1814, agreeably to a regimental order of June 10, 1814.
Captain Joseph Edwards's company .	45	For five days' services as guards at Salem, in July and August, 1814, agreeably to general order of 9th July, 1814.
Captain Thomas Oake's company . . .	72	From one to four days' services as guards at Salem, in June and July, 1814, agreeably to regimental orders of 30th June and 17th July, 1814.
Lieutenant John Howard's company .	57	From one to four days' services as guards at Salem, in July, 1814, agreeably to orders of 6th, 9th, 24th, and 27th July, 1814.
Captain B. Morgan's company . . . . .	71	From one to three days' services as guards at Salem Neck, in June, July, and August, 1814, agreeably to division order of 11th June, 1814.
Captain Wm. B. Dodge's company . .	72	From one to four days' services as guards at Salem, in June, July, and August, 1814, agreeably to general order of 16th June, 1814.
Major B. T. Reed's battalion . . . . .	274	Sundry days' services at Marblehead, between 3d April and 5th August, 1814, agreeably to division orders of 3d April and 14th June, 1814.
Sergeant's guard . . . . .	268	This was a succession of guards at Fort Phillips, on Plumb island, from the 21st June to 8th October, 1814, agreeably to division order of 18th June, 1814.

## REPORT—Continued.

Detachments.	Force.	Remarks.
Subaltern's guard.....	31	For services at same place, (took the place of the sergeant's guard,) from the 8th October to the 7th November, 1814, agreeably to division order of 3d October, 1814.
Subaltern's guard.....	31	For services at same place, from the 7th November to the 7th December, 1814, agreeably to brigade order of 1st November, 1814.
Sergeant's guard.....	14	For services at same place, (took the place of the subaltern's guard,) from the 13th December, 1814, to the 11th February, 1815, agreeably to division order of the 9th December, 1814.
Sergeant's guard.....	14	For services at same place, from the 11th February to the 10th March, 1815, agreeably to division order of 9th December, 1814.
Lieutenant Daniel Friend's company.	31	For services as guards at Beverly, from the 21st September to the 22d October, 1814, agreeably to a regimental order of 12th September, 1814.
Corporal's guard.....	7	For services at Fort Lee, from the 9th November, 1814, to the 7th January, 1815, agreeably to division order of the 8th November, 1814.
Corporal's guard.....	8	For services at same place, from the 8th January to the 7th March, 1815, agreeably to division order of the 2d January, 1815.

From the documents referred to in the annexed schedule it appears that the foregoing guard services were performed in consequence of the constant state of alarm that existed along the sea-coast, of Major General Hovey's command, during the summer and autumn of 1814. The guards at the different places enumerated appear generally to have been established on applications to that effect from the selectmen and committees of safety of the different towns. From the manner in which the pay-rolls are made up, it might be inferred that the guard at a particular place consisted of several hundred men at the same time; but as no order has been found authorizing at any one place a larger guard than a subaltern, it is presumed that the respective rolls embraces the names of all who were detailed from the regiment, battalion, or company, during the time a guard was kept up at any one place. This presumption is strengthened by the fact that, although the guards at Beverly, Salem, &c., were kept up from about the middle of June till the 5th of August, 1814, yet no individual is made up for more than a few days' pay, and many for only one.

Captain J. Putnam's company, 44 men, in service at Beverly from the 22d September to 31st October, 1814.

Captain Jedediah Farnum's company, 78 men, in service at Beverly from the 20th September to 2d November, 1814.

The foregoing companies entered the service of the State under an order of the adjutant general bearing date the 16th of September, 1814.

By the same order, under which Captains Putnam and Farnum's companies entered the service, "the several companies and regiments in the towns of Salem, Marblehead, Beverly, Gloucester, Newbury, Newburyport, Amesbury, and Salisbury," were directed to "be assembled for the purpose of instruction in military tactics two days in each week until further orders" Under this order the following services appear to have been paid for by the State :

*Force*

Captain Wm. B. Dodge's company.....	69	for 5 days in September and October, 1814.
Captain Samuel Mansfield's company.....	73	5.....do.....do.....do.....do.
Captain Thomas R. Williams's company.....	42	5.....do.....do.....do.....do.
Captain Davis's company.....	61	5.....do.....do.....do.....do.
Captain Nathan Blood's company.....	67	5.....do.....do.....do.....do.
Captain Philip Wells's company.....	58	6.....do.....do.....do.....do.
Captain James Charles King's company.....	60	5.....do.....do.....do.....do.
Captain Israel Williams's company.....	91	6.....do.....do.....do.....do.
Captain Benjamin Morgan's company.....	51	6.....do.....do.....do.....do.
Lieutenant Colonel Joseph White's field and staff officers	10	7.....do.....do.....do.....do.
Captain Joseph Edwards's company.....	45	5.....do.....do.....do.....do.
Captain Thomas Oake's company.....	52	5.....do.....do.....do.....do.
Captain John Howard's company.....	43	5.....do.....do.....do.....do.
Captain S. White's company.....	56	5.....do.....do.....do.....do.
Captain J. Peadody's company.....	33	6.....do.....do.....do.....do.

According to the rolls, all the foregoing troops assembled at Salem.

Lieutenant Colonel Levi Dodge's field and staff officers 6.....6.....do.....do.....do.....do.

According to the roll, Colonel Dodge's field and staff officers assembled at Beverly.

Lieutenant Colonel James Appleton and staff.....	17	for 4 days in September and October, 1814.
Lieutenant Isaac Dennison's company.....	29	4.....do.....do.....do.....do.
Captain David Elwell's company.....	78	2.....do.....do.....do.....do.
Captain John Harris's company.....	35	4.....do.....do.....do.....do.

Sergeant Samuel Haskell's company.....	25, for 4 days in September and October, 1814.
Captain Caleb Williams's company.....	26...4...do.....do.....do.
Captain Charles Tarr's company.....	44...4...do.....do.....do.
Captain John Smith's company.....	34...4...do.....do.....do.
Captain Isaac Tucker's company.....	22...4...do.....do.....do.
Captain James S. Sayward's company.....	45...8...do.....do.....do.

According to the rolls, all of the foregoing troops assembled at Gloucester.

Major B. T. Reed's battalion, 264, for 9 days in September and October, 1814.

This battalion assembled at Marblehead.

Lieutenant John Moody's company, 29, for 2 days in October, 1814.

Lieutenant Colonel P. Merrill's regiment, 240, for 2 days in October, 1814.

Captain J. Stickney's company, 60, for 4 days in October, 1814.

According to the rolls, the foregoing troops assembled at Newburyport.

Lieutenant Colonel Benjamin Evans's regiment, 294, for 4 days in September and October, 1814.

According to the rolls, this regiment assembled at Salisbury.

Captain B. Merrill's company, 26, for 3 days in September and October, 1814.

Lieutenant Colonel Hale's regiment, 369, for 4 days in September and October, 1814.

According to the rolls, the foregoing troops assembled at Newbury.

It appears from the general order under which the foregoing services were rendered that the object of assembling the militia, as stated, was "for the greater security of the seaports within the second division, and to render as efficient as possible the internal military strength of those places."

Sergeant Jacob Noyes's videttes, 12, in service from the 5th to the 22d October, 1814.

Sergeant Elijah Upton's videttes, 12, in service from the 7th to the 21st October, 1814.

These videttes were ordered into service by Major General Hovey (in pursuance of a letter to him from Adjutant General J. Brooks, bearing date September 26, 1814) for the purpose of establishing a communication between the major general and the adjutant general's office, and with the commanding officers of brigades and regiments of his division

Including some charges for rations and other miscellaneous items, which have been blended with the paymaster's department, the expenditures on account of the 2d division in the pay department amount to \$25,929 92, and the deductions therefrom to \$14,939 92.

Should the whole of the services rendered by the 2d division be recognized under the principles laid down in the bill reported by the Military Committee of the House of Representatives, a large portion of the deductions would be admissible upon receiving special sanction and being further vouched.

For reasons similar to those assigned in my report of January 12, 1825, the vouchers appertaining to the subsistence, quartermaster's, and medical and hospital departments of this division have not been examined.

There is no evidence of any part of the services described in this report having been rendered "at the desire or instance of an officer of the national government." Whether "actual invasion," or "a well-founded apprehension of invasion," is sufficiently established by the facts herein set forth and the documents enumerated in the annexed schedule to have warranted all the services charged to the United States on account of the 2d division, are questions for the Executive to determine, as well as whether the "exigency" of the times warranted the numbers that were in service at the different places, and under the circumstances herein enumerated.

Though apparently not connected with the foregoing services, it may be proper to state that, on July 8, 1814, Major General Dearborn, of the United States army, made a requisition on the executive of Massachusetts for 200 artillerists and 900 infantry, exclusive of officers, to be placed in the service of the United States for the protection of the seacoast of that State against the depredations of the enemy; and on July 18, 1814, a general order was issued by the adjutant general of the State directing a detachment to be made in accordance with General Dearborn's requisition. Including officers, 215 of the infantry was to be detached from the 2d division. The necessary orders in relation to this part of the detachment appear to have been issued by Major General Hovey on July 22, 1814. This portion of the detachment was directed by General Hovey to rendezvous at Salem on August 2, 1814. Whether this detachment performed service within the limits of the 2d division, or what disposition was made of it after it rendezvoused at Salem, it is not practicable to ascertain with any certainty from the files of this office.

PETER HAGNER, *Auditor*.

HON. JAMES BARBOUR, *Secretary of War*.

*Supplementary report No. 5.*

TREASURY DEPARTMENT, *Third Auditor's Office, July 28, 1825.*

Upon the same principles on which his report of the 12th of January, 1825, was founded, the Third Auditor has the honor of submitting the following supplementary report in relation to the claim of the State of Massachusetts for military services and expenditures during the late war.

On examining the vouchers of that part of the claim designated in the accounts rendered as the 9th division, or Major General Joseph Whiton's corps, it appears that payments have been made by the State for services rendered in the autumn of 1814, by the following troops, for the defence of Boston and its vicinity:

	Force.
Major General J. Whiton and staff, in service from September 18 to November 2, 1814.....	7
Brigadier General Jac. Bliss and staff, in service from September 15 to November 8, 1814.....	5
Brigadier General I. Maltby and staff, in service from September 8 to November 7, 1814.....	6
Lieutenant Col. E. Foote's regiment of infantry, in service from September 13 to October 26, 1814.	602
Lieutenant Col. S. K. Chamberlain's regiment of infantry, in service from September 14 to October 20, 1814.....	672
Major Jas. Lewis's battalion of artillery, in service from September 10 to October 29, 1814.....	174
Major W. Ward's battalion of riflemen, in service from September 10 to October 29, 1814.....	126
Lieutenant Colonel Edwards's regiment of artillery, in service from September 8 to October 29, 1814	398
Lieutenant Colonel J. Valentine's regiment of infantry, in service from September 10 to October 29, 1814.....	530
Lieutenant Colonel T. Longley's regiment of infantry, in service from September 13 to October 30, 1814.....	649
Lieutenant Colonel S. Town's regiment of infantry, in service from September 11 to October 30, 1814	559
Total force of Major General Whiton's corps.....	3, 728

On the 6th September, 1814, an order was issued by the executive of Massachusetts directing sundry detachments of troops to march immediately to Boston for the defence of that place; and, under that order, all of the foregoing troops assembled and were organized, and by an order bearing date the 11th of September, 1814, the whole was placed under the command of General Whiton.

On the same day that the foregoing order of the 6th September was issued it appears that Major General Dearborn, of the United States army, addressed a letter to Adjutant General Brooks, suggesting the propriety of his proposing to the governor "the expediency of having orders issued for placing the whole of the militia within twenty or thirty miles of the sea-shore on the alert, and in perfect readiness for marching on the shortest notice." The order of the governor, besides detailing the foregoing detachment for the immediate defence of Boston, directed "the whole of the militia to hold themselves in readiness to march at a moment's warning." But, as General Dearborn's letter is not referred to in the order there is no evidence of its having been issued in consequence of his suggestion to Adjutant General Brooks. On the 7th of September, 1814, the governor of Massachusetts addressed a letter to the Secretary of War, in which he enclosed his general order of the preceding day "for the protection of Boston and the towns and property in its neighborhood," and requested the Secretary to consult the President and inform him "whether the expenses thus necessarily incurred" would be ultimately reimbursed to the State by the general government. On the 17th September, 1814, the Secretary of War replied to the governor's letter of the 7th, and, after setting forth the arrangements which had been made at an early period of the war for the general defence of the country, he informed him "that if the force which has been put into service by your excellency has been required by Major General Dearborn, or received by him and

put under his command, that the expense attending it will be defrayed by the United States." The Secretary further stated that "it follows, likewise, as a necessary consequence, that if this force has been called into service by the authority of the State, independently of Major General Dearborn, and be not placed under him as commander of the district, that the State of Massachusetts is chargeable with the expense, and not the United States. Any claim that the State may have to reimbursement must be judged of hereafter by the competent authority on a full view of all the circumstances attending it."

On the 4th September, 1814, it appears that Major General Dearborn made a requisition on the executive of Massachusetts for 2,000 infantry and 200 artillery "exclusive of the town of Boston," to be placed in the service of the United States for the defence of the town, harbor, and vicinity of Boston. Of the executive's compliance with this requisition there is no evidence.

On the 17th September, 1814, Adjutant General Brooks addressed a letter to Major General Dearborn, in which the latter was informed that the executive of Massachusetts had authorized a detachment to be placed under General Dearborn's orders in forts Independence and Warren, in conformity to a previous suggestion from General Dearborn, and requested General Dearborn to furnish him with a sketch of the number and grade of officers that would be wanted on that service: accordingly, on the same day, General Dearborn furnished a sketch of the officers that would be required to command 1,000 infantry and 200 artillery. And on the next and two following days the detachment, corresponding with General Dearborn's sketch, appears to have been organized and placed in the service of the United States in forts Independence and Warren, where it continued in service till the last of November, 1814, when it was discharged. This detachment was paid by Major Freeman of the United States army, and of course forms no part of the State's claim on account of General Whiton's corps.

There is no evidence that "actual occasion" did exist at or in the immediate vicinity of Boston at the time of issuing the order under which General Whiton's corps assembled, but that there might have been "a well-founded apprehension of invasion" there is reason to infer from the circumstance of Major General Dearborn's having made on the 4th September, 1814, a requisition on the governor of the State for upwards of 2,000 troops for the defence of Boston and its vicinity. Whether the force commanded by General Whiton in connexion with that which was in the service of the United States was warranted by the "exigency" of the times is a question for the executive to determine.

Including some charges appertaining to the quartermaster's, medical, and hospital departments, which have been blended with the paymaster's department, the payments by the State to General Whiton's corps on account of the paymaster's department amount to \$96,748 12, and the deductions therefrom to \$32,164 73.

In the event of the services of this corps being recognized a part of the deductions will be admissible upon being further vouched, and upon the quartermaster's, and medical, and hospital charges (all of which have been deducted) being examined.

For reasons similar to those stated in previous reports the vouchers appertaining to the subsistence, quartermaster's, medical, and hospital departments, and contingent expenditures on account of General Whiton's corps have not been examined.

PETER HAGNER, *Auditor*.

HON. JAMES BARBOUR, *Secretary of War*.

*Schedule of documents accompanying the foregoing report.*

General order of the governor of Massachusetts, dated September 6, 1814.

General order of the governor of Massachusetts, dated September 11, 1814.

Letter from Adjutant General J. Brooks to General Dearborn, dated September 17, 1814.

Letter from General Dearborn to Adjutant General Brooks, dated September 17, 1814.

*Supplementary report No. 6.*

TREASURY DEPARTMENT, *Third Auditor's Office, August 1, 1825.*

The Third Auditor has the honor of submitting the following supplement to his report of January 12, 1825, in relation to the claim of the State of Massachusetts for military services and expenditures during the late war.

On examining the vouchers designated in the accounts of the State as the 3d division, or Major General Joseph B. Varnum's command, it appears that the following services have been paid for by the State on account of said division:

Captain N. Shattuck's company, 64 men, in service from 11th to 15th September, 1814.

Captain Aaron Stevens's company, 41 men, in service from 10th to 13th September, 1814.

Captain T. Cumings's company, 56 men, in service four days in September, 1814.

Captain E. Maynard's company, 49 men, in service from 10th to 13th September, 1814.

Captain John Reed's company, 64 men, in service from 11th to 13th September, 1814.

Captain John Hardy's company, 60 men, in service from 10th to 14th September, 1814.

The foregoing companies belonged, it appears, to the second brigade of the 3d division, and it seems, were ordered by Brigadier General Coburn to march to Boston, under the general order of September 6, 1814, which order will be found among the papers that accompanied the report on Major General Whiton's corps. Whilst those companies were on their march to Boston, say on the 12th of September, 1814, a division order was issued by General Nathaniel Austin, directing them to return to their homes, "without waiting for orders from their immediate superiors in the brigade." From General Austin's order it appears that the foregoing companies had been ordered to Boston by General Coburn, in consequence of the general order of September 6, 1814, being misunderstood by him.

*A guard at Chelsea bridge, 356 men.*—According to the pay-roll, this was a succession of nightly guards kept up at Chelsea bridge from the 12th to the 23d of June, 1814, pursuant to a letter from the adjutant general of Massachusetts to Brigadier General Nathaniel Austin, dated June 12, 1814. For the first two or three nights this guard consisted of a captain's command, and for the residue of the time of a subaltern's command. This guard appears to have been ordered in consequence of an application from Commodore Bainbridge "for aid in protecting and defending the navy yard, &c." Commodore Bainbridge, in his letter

if June 13, 1814, to Adjutant General Brooks, states that "the force of the enemy in Boston bay justifies, in my opinion, apprehensions of an attack being made on this place, and calls for united exertions to repel it."

*A sergeant's guard at the State arsenal in Charlestown, 69 men.*—On the 24th of September, 1814, Adjutant General Brooks directed General Austin to furnish a guard for the arsenal in Charlestown, "to consist of one sergeant, one corporal, and twelve privates, to be relieved weekly, until further orders." And, according to the pay-roll, a sergeant's guard was forthwith stationed at the arsenal, and kept up by relief guards, from the date of the adjutant general's order until October 25, 1814.

Including payments to brigade majors and adjutants (considered inadmissible) for recording, copying, and distributing military orders, &c., the payments by the State to the 3d division on account of the paymaster's department amount to \$1,463 57, and the deductions therefrom to \$690 41.

For reasons similar to those assigned in previous reports the vouchers appertaining to the subsistence, quartermaster's, and medical and hospital departments of the third division have not been examined.

PETER HAGNER.

HON. JAMES BARBOUR, *Secretary of War.*

*Schedule of documents to accompany the foregoing report.*

General Austin's division order, dated September 12, 1814.

Letter from Adjutant General J. Brooks to General Austin, dated June 12, 1814.

Letter from Adjutant General J. Brooks to General Austin, dated September 24, 1814.

*Supplementary report, No. 7.*

TREASURY DEPARTMENT, *Third Auditor's Office, August 2, 1825.*

The Third Auditor has the honor of submitting the following supplement to his report of January 12, 1825, in relation to the claim of the State of Massachusetts for military services and expenditures during the late war:

On examining the vouchers for payments made by the State to the 7th division, or Major General Caleb Burbank's command, it appears that the only service rendered by said division was rendered by a company commanded by Captain Ezra Sawyer. Captain Sawyer's company, including officers, consisted of fifty-four men, and was in service from the 11th to the 15th of September, 1814.

It does not clearly appear from the rolls for what purpose this company entered the service, but as a part of Major General Whiton's corps for the defence of Boston was drawn from the 7th division it is presumed that this, like certain companies of the 3d division, marched to Boston through mistake, and like them were ordered to return home.

The payments to this company and to Brigade Major Solomon Carter for copying and distributing orders (the latter considered inadmissible) amount to \$129 51, and the deductions therefrom to \$61 31.

PETER HAGNER, *Auditor.*

HON. JAMES BARBOUR, *Secretary of War.*

TREASURY DEPARTMENT, *Third Auditor's Office, September 17, 1825.*

SIR: I received on the 18th ultimo a communication from George Sullivan, esq., agent of the Massachusetts claims, accompanied by a list of references to certain vouchers of the accounts of the State, by which it was alleged it would appear that expenditures had been made by the State on account of fortifications and other defences of the harbors and shores of that State during the late war, and requesting that the amount paid thereon might be reported to you.

The vouchers thus designated by Mr. Sullivan have accordingly been referred to, and it appears therefrom that the sum of \$56,121 21 was actually paid by the State for the objects stated—principally on works at and in the vicinity of Boston and on objects connected with the defence of that city. Of the foregoing sum of \$56,121 21 the sum of \$35,644 14 was for the purchase of hulks, which it appears were intended to be sunk in the ship channels in the event of the enemy's approach to that city rendering such a step necessary. It is proper to add that those hulks were sold after the war terminated and the proceeds, say \$27,592 83, has been credited in the accounts exhibited against the United States by the State of Massachusetts.

I have the honor, &c.

PETER HAGNER, *Auditor.*

HON. JAMES BARBOUR, *Secretary of War.*

TREASURY DEPARTMENT, *Third Auditor's Office, August 29, 1825.*

SIR: In addition to the services heretofore reported upon it appears that the State of Massachusetts has charged to the United States the services of a guard, consisting of one sergeant, two corporals, and twelve privates, which was kept up by weekly relief guards from May 22 to October 13, 1813, in pursuance of the accompanying general order, issued by the executive of Massachusetts on the 21st of May, 1813. It appears by the rolls that the services of this guard were in accordance with the order

under which it was organized, rendered at the gun-house of "the park of artillery on the common" of Boston.

The payments to this guard on account of monthly pay, subsistence, and clothing amount to \$1,241 88, and the deductions therefrom to \$214 29.

I have, &c.

PETER HAGNER, *Auditor*.

HON. SECRETARY OF WAR.

TREASURY DEPARTMENT, *Third Auditor's Office, August 26, 1825.*

SIR: It has been found on further examination of the accounts of the State of Massachusetts for military services and expenditures during the late war that a detachment, consisting of two companies, and numbering one hundred and forty men, (officers included,) which was in service at Portland for the term of two months, in the months of September, October, and November, 1813, was omitted in my report of the 31st of May last, on the 12th and 13th divisions, to the former of which said detachment belonged.

This detachment was commanded by Captains A. W. Atherton and James Farmer, and appears by the rolls to have been stationed at Jordan's Point or Fort Burrows in pursuance to orders issued by Brigadier General James Irish; the orders, however, have not been produced, nor can it be discovered (with any certainty) from the correspondence which has been exhibited in support of the State's claim what peculiar circumstances rendered the services of this detachment necessary.

The payments to Captain Atherton, who was appointed paymaster to this detachment, embracing monthly pay, officers' subsistence, medicines and hospital stores, clothing of non-commissioned officers and privates, fuel, and articles for barracks, allowances to soldiers for fatigue duty, &c., amount to \$4,603 17, and the deductions therefrom to \$1,772 26.

It is proper to remark that there is no evidence of payment by Captain Atherton of any part of the money placed in his hands to the individuals to whom it was due. The examination which has been made has been confined to the monthly pay of the officers and men and the subsistence of the former. There is no data on file by which the other items, on account of which funds were placed in Captain Atherton's hands, could at this time be correctly examined.

Herewith you will receive three letters, viz:

One from General King to Adjutant General Brooks, dated August 30, 1813.

One from General Richardson to Joseph H. Pierce, dated February 10, 1817.

One from Daniel Tucker to Joseph H. Pierce, dated February 13, 1817.

The postscript to General King's letter shows that British prisoners had been ordered from posts in his division to Portland shortly before the detachment under the command of Captains Atherton and Farmer entered the service; and the letters of General Richardson and Mr. Tucker, besides referring to said detachment, will tend to elucidate the services of the 12th and 13th divisions heretofore reported upon.

I have the honor to be, sir, with great respect, your obedient servant,

PETER HAGNER, *Auditor*.

HON. JAMES BARBOUR, *Secretary of War*.

BATH, *August 30, 1813.*

SIR: I received a letter from Brigadier General Payson under date 27th instant, advising me that he had been notified by the commandant of the forts at Edgcomb, Damariscotta, and St. George, that the United States troops would be withdrawn in two days from those forts, excepting a second lieutenant and six or seven invalid soldiers at Edgcomb, two privates at Damariscotta, and that the fort at St. George was to be abandoned altogether.

I wrote General Payson for answer that I knew of no law or order that would authorize an interference of ours on this particular occasion, but as it could never have been contemplated by either the legislature of the United States or that of this State, that the United States troops would be voluntarily withdrawn in time of war from these garrisons, particularly as munitions of war and other property of the United States, to a large amount, still remains in them, and as there is also a considerable number of British prisoners of war that would take the command if they desired it; that considering the very extraordinary situation in which we were placed, that in case the deputy marshal should make application to him for a detachment to guard the prisoners, and that the magistrates should also unite in the request for the defence and safety of the country, I should recommend to him to order out not exceeding twenty soldiers, with a suitable officer to command them, at Edgcomb; and that should similar applications be made from St. George and Damariscotta, I should recommend a compliance, the number of men to each not to exceed ten.

I stated to General Payson that he must not consider the recommendation as in the nature of an order, but that I should share the responsibility of the measure with him. This I was the more readily inclined to do, as these forts are within the particular district of his command, and his having a perfect knowledge of all the circumstances would enable him to decide understandingly.

I have this day received a letter from General Payson under date the 29th, in answer to mine of the 28th. He states that the marshal and the magistrates having made the request, he had ordered out, to guard the prisoners and for the defence of the place, one lieutenant, one sergeant, and eighteen men, to be stationed at the battery at Edgcomb.

I expect an application will be made to me this day for a detachment for the fort at Jurgetown. Every soldier, I understand, has been withdrawn from it, and that the deputy marshal has employed a few men merely to guard the prisoners there.

I must request you, sir, to cause this letter to be laid before the commander-in-chief that I may have his instructions as soon as convenient.

I am, sir, respectfully, your obedient servant,

WM. KING.

Hon. JOHN BROOKS, *Adjutant General, Boston.*

P. S.—At the moment of closing this letter I have received one from General Payson informing me that the *martial* of this district had directed the deputy marshal to send on the prisoners to Portland, and that they will leave this day. The general observed that he *shall* discharge the soldiers ordered out unless otherwise directed. As the prisoners are ordered from the garrison, I shall say to him that I think favorably of his determination.

True copy. Attest:

A. BRADFORD, *Secretary of Committee.*

NORTH YARMOUTH, *February 10, 1817.*

Sir: Your two letters, dated the 4th and 5th instants, I did not receive till Saturday last. You desire me to furnish you with copies of my several orders which were given during the late war, the authority for which was derived from general orders of the 3d of July, 1812. Under these orders I never called out any troops; I did not command the 12th division till June, 1814. Generals Merrill or Irish, in the year 1813, ordered a detachment into service under the order of July 3, 1812, and stationed them at Portland. On two applications from the committee of safety of Portland, dated June 20 and 27, 1814, and on two letters from the adjutant general dated June 24, 1814, I issued orders dated June 28, for a detachment of two companies, one of infantry, and one of artillery, a copy of which is herewith transmitted, marked A.

On a representation from the officers of the artillery, dated July 2, that the detachment would take two-thirds their number, and pledging themselves to be in constant readiness, with their several commands, to march to any point, the order of the 28th June, as it related to the artillery, was countermanded. The company of infantry detached under those orders was commanded by Captain Ebenezer Andrews and served sixty days. On two applications from the committee of safety, selectmen, and magistrates of Portland, dated September 5, 1814, division orders, marked B, were issued. I repaired to Portland on the 8th to receive and make arrangements for and take command of this detachment, when I found Brigadier General Irish, with his whole brigade, except cavalry, in town, ordered there by him, as I understood, at the request of the committee of safety. On the 10th I received my commission as major general. After Brigadier General Irish had marched his brigade into town he proceeded to detach one regiment, agreeably to my orders of the 6th. About the time this detachment was completed, the alarm increasing, and at the verbal or written request of the committee of safety, and on a representation from the officers of the 2d brigade that the detached regiment thus formed, the officers and men being strangers to each other, were much less efficient in resisting an attack, than hourly expected, than under their local officers, I ordered on the 10th General Irish to continue in town with his brigade, the detachment made from his brigade to be broken up, and officers and privates to be restored to their former companies. This 2d brigade, commanded by Brigadier General Irish, was ordered to be discharged on the 20th, except the 3d or Portland regiment, which was kept in service a short time after the remaining part of the brigade was dismissed. Two detachments from the cavalry of this brigade were made and served as videttes: the first was commanded by Lieutenant Leighton, and the second by Lieutenant Dyer. The regiment detached from the first brigade, under my order of the 6th, was commanded by Lieutenant Colonel Foxcroft. A small part of this regiment was detached from companies on the bay shore belonging to North Yarmouth and Freeport, and were anxious to be ready to defend their own homes, were discharged, and their places supplied by detachments from the interior. In consequence of this alteration, some of the rolls in Lieutenant Colonel Foxcroft's regiment contain more than their complement of names. This regiment was discharged on the 24th of September. On the authority of the adjutant general's letter of the 9th, I wrote to Brigadier General Turner, commanding the 1st brigade 13th division, in Oxford county, on the 11th, to march his brigade to Portland without delay. About the same time an application was made by the committee of safety to Brigadier General McMillan, commanding the 2d brigade 13th division, for his troops also. In consequence of these applications, Brigadier General Turner, with his whole brigade, and Brigadier General McMillan, with part of his brigade, came into town on the 14th, 15th, and 16th. On the 19th orders, marked C, were issued, and the detachment being made agreeably thereto, the remaining troops of the 13th division were discharged on the 23d or 24th. At that time Brigadier General Chandler had left, or was about leaving Portland, and the troops detached being in a disorganized state, and there having been intimations given that it was the determination of the officers not to report themselves to General Chandler, or any other officer in the United States service, I ordered them to report to me.

These circumstances were communicated to Colonel Sumner, with whom I had an interview at Portland, and concluded by him that the detachment should remain under my command till the pleasure of his excellency the commander should be known. The detachments were under my command during their term of service. Soon after this detachment was organized, I ordered the two companies of artillery in Portland into service, and placed under the command of their officers one hundred privates from the infantry, who were destitute of arms and equipments, to be drilled at the field-pieces. After the detachment of eleven hundred men and the two companies of artillery belonging to Portland were discharged, a lieutenant's command was raised and stationed at Fort Burrows for a short time, and commanded by Lieutenant O. Bray. After these troops were discharged, a sergeant's guard was ordered, and continued in service till the news of peace arrived. During the state of alarm at Portland, I ordered a corporal's guard stationed at North Yarmouth to give signals of alarm, when necessary. Your letters directed to Daniel Tucker, esq., I sent, immediately after receiving them, to Major Smith, my aide-de-camp, at Portland, and requested him to see that their contents were immediately attended to. I should have gone to Portland to-day myself had not arrangements of business, made previously to the receipt of your letter, prevented.

I fear it will not be in my power to render that service in this business to the State that I could wish, but everything in my power shall be done. Your letter of the 1st instant was duly received.

The orderly book of my division, in which were recorded my orders issued at Portland, respecting the troops in actual service, together with the papers of the division, were left, after the troops were discharged, with Colonel Atherton, who was then my aide-de-camp and orderly officer; but in sending them from his house to Major Smith, my present aide-de-camp, they were, by some unfortunate circumstance, left at another place, and have not as yet been found. Colonel Atherton has removed to the eastward, and the person by whom the records and papers were sent is not now in this part of the country. Measures are taking to find them, and if not found, I am in hopes to procure all the documents which may be wanted from other sources. I wrote immediately to Colonel Sumner, and although I did not transmit to him the particular orders he requested, I did the copies of some papers that may be of service. The paper mentioned above, marked A, I cannot now transmit, but shall in a day or two. I shall endeavor to obtain all the documents wanted from me and transmit them as soon as possible.

I am, very respectfully, sir, your most obedient servant,

ALFORD RICHARDSON, *Major General 12th Division.*

Copy. Attest: JOSEPH H. PEIRCE, Esq.

PORTLAND, *February 13, 1817.*

SIR: I have received your letter of the 5th instant, together with the copy of an official letter to General Richardson, requesting copies of votes passed and letters written by the committee of safety and defence of the town of Portland, in time of the late war with Great Britain. I regret I have it not in my power fully to comply with your request, as Able W. Atherton, esq., who acted as clerk of the committee, has removed from here to Castine, and carried with him the book containing the copies and records of the letters and votes of the committee. I have written to him and sent a copy of your letter, and requested him to make such copies as you pointed out, and forward them as you desired to the adjutant general of the militia of the States. The troops stationed here in 1813 were, I believe, ordered out, in the first instance, by the commander-in-chief. But the *army of defence* that encamped here in the summer and fall of 1814 was solicited by the unanimous calls of the magistrates residing at Portland, acting together with the selectmen and committee of safety and defence duly authorized by the town. The necessity of calling those troops from the country was occasioned by the enemy possessing himself of Castine or Penobscot bay, and the frequent appearance off our harbor of ships-of-war of 74 guns, and vessels of lesser force, such as frigates and sloops-of-war, as also by information, almost daily received, that the British fleet with troops on board having left Penobscot bay steering westward, and, in the opinion of the writers, bound for Portland. Not having the records in my possession I have overhauled my files and selected a few papers to show the *necessity* of the militia being called in, that, I hope, will be of some use to the commissioners. And I have no doubt Mr. Atherton will promptly comply with what I have desired him to do. The state of my health is my apology for this delay of an answer, not having been in my office these six months past, but confined at home with a palsy that has deprived me of the use of my limbs on the left side, but I am getting better slowly.

I remain, sir, respectfully, your obedient servant,

DANIEL TUCKER, *Chairman of the Selectmen of the town of Portland.*

Copy. Attest: JOSEPH H. PEIRCE.

TREASURY DEPARTMENT, *Third Auditor's Office, August 26, 1825.*

SIR: It has been found, on further examination of the accounts of the State of Massachusetts for military services and expenditures during the late war, that a detachment, consisting of two companies, and numbering one hundred and fifty men, (officers included,) which was in service, at Portland, for the term of two months, in the months of September, October, and November, 1813, was omitted in my report of the 31st of May last, on the 12th and 13th divisions, to the former of which said detachment belonged.

This detachment was commanded by Captains A. W. Atherton and James Farmer, and appears, by the rolls, to have been stationed at Jordan's Point or Fort Burrows, in pursuance to orders issued by Brigadier General James Irish. The orders, however, have not been produced, nor can it be discovered, with any certainty, from the correspondence which has been exhibited in support of the State's claim what peculiar circumstances rendered the services of this detachment necessary.

The payments to Captain Atherton, who was appointed paymaster to this detachment, embracing monthly pay, officer's subsistence, medicines, and hospital stores, clothing of non-commissioned officers and privates, fuel, and articles for barracks, allowances to soldiers for fatigue duty, &c., amount to \$4,603 17, and the deductions therefrom to \$1,772 26.

It is proper to remark that there is no evidence of payment by Captain Atherton of any part of the money placed in his hands to the individuals to whom it was due. The examination which has been made has been confined to the monthly pay of the officers and men, and the subsistence of the former. There is no data on file by which the other items, on account of which funds were placed in Captain Atherton's hands, could at this time be correctly examined.

Herewith you will receive three letters, namely, one from General King to Adjutant General Brooks, dated 30th August, 1813; one from General Richardson to Joseph H. Peirce, dated 10th February, 1817; one from Daniel Tucker to Joseph H. Peirce, dated 13th February, 1817. The postscript to Gen. King's letter shows that British prisoners had been ordered from posts in his division to Portland shortly before the detachment under the command of Captains Atherton and Farmer entered the service; and the letters of General Richardson and Mr. Tucker, besides referring to said detachments, will tend to elucidate the services of the 12th and the 13th divisions heretofore reported upon.

I have the honor to be, sir, with great respect, your most obedient servant,

PETER HAGNER, *Auditor.*

Hon. JAMES BARBOUR, *Secretary of War.*

TREASURY DEPARTMENT, *Third Auditor's Office, August 29, 1825.*

SIR: In addition to the services heretofore reported upon, it appears that the State of Massachusetts has charged to the United States the services of a guard, consisting of one sergeant, two corporals, and twelve privates, which was kept up by weekly relief guards from the 22d of May to the 13th October, 1813, in pursuance of the accompanying general orders, issued by the executive of Massachusetts on the 21st of May, 1813. It appears by the rolls that the services of this guard were in accordance with the order under which it was organized, rendered at the gun-house of "the park of artillery on the common" of Boston.

The payments to this guard on account of monthly pay, subsistence, and clothing, amount to \$1,241 88, and the deductions therefrom to \$214 29.

I have the honor to be, sir, with great respect, your most obedient servant,

PETER HAGNER, *Auditor.*

Hon. JAMER BARBOUR, *Secretary of War.*

COMMONWEALTH OF MASSACHUSETTS.

GENERAL ORDERS.

HEADQUARTERS, *Boston, May 21, 1813.*

A guard to consist of one sergeant, two corporals, and twelve privates is to be furnished for the park of artillery on the common, from the battalion of artillery belonging to the third brigade and first division of the militia, to parade at the gun-house on the common at 7 o'clock on Saturday evening next, with their side-arms and in their uniform complete; the guard to be furnished by companies in succession, beginning with the senior company and relieved weekly. The sergeant of the guard will receive orders respecting the position and the duties of his command from the quartermaster general, and will make a return of the names of his men, as soon as he has mounted guard, to the adjutant general.

By command of his excellency the commander-in-chief.

J. BROOKS, *Adjutant General.*

ADJUTANT GENERAL'S OFFICE, *Boston, August 2, 1823.*

A true copy from the records of this office.

W. H. SUMNER, *Adjutant General.*

TREASURY DEPARTMENT, *Third Auditor's Office, September 17, 1825.*

SIR: I received on the 18th ultimo a communication from George Sullivan, esq., (agent of the Massachusetts claim,) accompanied by a list of references to certain vouchers of the accounts of the State, by which it was alleged it would appear that expenditures had been made by the State on account of fortifications and other defences of the harbors and shores of that State, during the late war, and requesting that the amount paid thereon might be reported to you.

The vouchers thus designated by Mr. Sullivan have accordingly been referred to, and it appears therefrom that the sum of \$56,121 21 cents was actually paid by the State for the objects stated, principally on works at and in the vicinity of Boston, and on objects connected with the defence of that city. Of the foregoing sum of \$56,121 21 cents, the sum of \$35,644 14 cents was for the purchase of hulks, which, it appears, were intended to be sunk in the ship channels in the event of the enemy's approach to that city rendering such a step necessary. It is proper to add, that those hulks were sold after the war terminated, and the proceeds (say \$27,592 83) have been credited in the accounts exhibited against the United States by the State of Massachusetts.

I have the honor to be, sir, with great respect, your most obedient servant,

PETER HAGNER, *Auditor.*

Hon. JAMES BARBOUR, *Secretary of War.*

19TH CONGRESS.]

No. 292.

[1ST SESSION.]

ON AN INCREASE OF THE CORPS OF ENGINEERS AND A REORGANIZATION OF THE TOPOGRAPHICAL ENGINEERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 16, 1826.

Mr. HAMILTON, from the Committee on Military Affairs, to whom were referred such parts of the message of the President as relate to the army, reported:

That they have had under consideration the communication from the Engineer department appended to the report of the Secretary of the War Department, in which a necessity for an increase of the corps of engineers, together with a reorganization of the corps of topographical engineers, is strongly exhibited.

Your committee, believing that the exigencies of the public service very imperatively demand an

increase of the one corps and an increase and reorganization of the other, early directed their own attention and invited that of the Department of War to this subject.

The result of their deliberations, with those of the department, they have now the honor of communicating in the annexed documents, together with the bill they herewith report.

It will be seen that in this bill your committee have not provided for an organization in the corps of engineers quite so extensive as the one recommended by the department; they, however, believe that the provisions they have instituted will meet all the immediate wants of the service.

They deem it unnecessary to indulge at present in any argument to show the necessity of the passage of the accompanying bill, as the whole view of this subject is so fully and ably presented in the annexed letter of the Secretary of War, to which they earnestly and confidently refer.

WAR DEPARTMENT, *January 10, 1826.*

SIR: In compliance with the request of the Committee on Military Affairs, as communicated to me in your letter of the 5th instant, I have the honor to state the views of this department in relation to such changes in the existing organization of the corps of engineers as are deemed expedient.

The corps of engineers was created by the act of the 16th of March, 1802, entitled "An act fixing the military peace establishment," by which act the President of the United States was authorized and empowered, whenever he should deem it expedient, to organize and establish a corps of engineers, to consist of one engineer, with the pay, rank, and emoluments of a major; two assistant engineers, with the pay, rank, and emoluments of captains; two other assistant engineers, with the pay, rank, and emoluments of first lieutenants; two other assistant engineers, with the pay, rank, and emoluments of second lieutenants; and ten cadets; and the President was in like manner authorized by the same act, whenever he should deem it proper, to make such promotions in the said corps, with a view to particular merit without regard to rank, so as not to exceed one colonel, one lieutenant colonel, two majors, four captains, four first and four second lieutenants, and so that the whole number of the corps should at no time exceed twenty officers and cadets. The corps was organized and established on the passing of the act of the 16th of March, 1802, with its minimum number, and was by degrees increased to its maximum, as authorized and as the public service required, and continued so until 1812, when it was deemed expedient to make a further increase by an addition of two captains, two first and two second lieutenants, as authorized by the act of the 29th of April, 1812, "for making further provision for the corps of engineers," which, together with the number of officers formerly authorized, constitute the present number and organization of the corps of engineers.

The topographical engineers were first introduced into our military establishment by the act of the 3d of March, 1813, entitled "An act for the better organization of the general staff of the army of the United States," which authorized the appointment of eight topographical engineers, with the brevet rank and pay and emoluments of majors of cavalry, and eight assistant topographical engineers, with the brevet rank and the pay and emoluments of captains of infantry; and by the act of the 24th of April, 1816, the number was reduced to six majors and four captains.

From a review of the condition of the country and of the duties which were imposed on the corps of engineers on its first establishment, it is evident that if the numbers which then constituted the corps were not more than sufficient to discharge the duties then assigned to it, it must be inadequate to the performance of its present enlarged duties. The officers of the corps of engineers, from 1802 to the commencement of the late war, were exclusively confined to the projection and erection of the fortifications along the seaboard and the superintendence of the Military Academy at West Point. During the period in question but few works were erected, and those of but limited extent. Since the termination of the late war a great change has taken place in the policy of the country as it regards its fortifications. The depredations committed by the enemy during the last war along our coast by his occupying the mouths of our harbors, bays, and rivers, produced an universal sentiment, at the termination of the contest, of the necessity of enlarging and strengthening the defences of our maritime frontier. Partaking of this feeling, common to the country at large, Congress appropriated in the first session after the war \$830,000 for fortifications, on the recommendation of this department, and that a like sum should be annually appropriated until the system should be completed. During the same session Congress also authorized the employment of an assistant engineer of distinguished reputation, in order to aid in projecting the new works which experience had proved to be necessary. In order that the views of Congress might be carried fully into effect a board of engineers was constituted to examine the whole line of the seaboard, with a view of fixing upon the sites and of forming plans and estimates for a general system of defence. To render these operations complete the topographical engineers were placed under the orders of the board, with directions that all the important and vulnerable points be carefully surveyed previous to the projection of any works for their defence. It is manifest that under these orders the duties of the two corps of engineers have been greatly increased, so much so that experience has proved that their present strength is inadequate to carry fully into effect the object of those orders. To supply the deficiency the department has been compelled to detail a number of officers from other corps, and to assign them to the duties which peculiarly belong to the engineers. Should the officers of engineers be employed in surveying the routes for roads and canals, and in improving the navigation of rivers and harbors, and in forming plans and estimates for their execution, and be charged with the superintendence of them, the present number in service will be wholly inadequate to perform the service, in addition to the discharge of their regular duties. I am therefore fully of opinion the corps of engineers should be enlarged by degrees by doubling its present numbers, agreeably to the enclosed scheme offered by the Engineer department, which is marked A, and to which I beg leave to refer as exhibiting the gradual increase and proposed employment of the officers in each year for seven years to come, when the corps will have attained the establishment proposed, should it be adopted; and that the topographical engineers be organized into a corps to consist of one colonel, one lieutenant colonel, two majors, six captains, twelve first and twelve second lieutenants.

The corps of topographical engineers, by the proposed arrangement, will be both reorganized and increased. Experience proves its present organization, comprehending but two grades, consisting of six majors and four captains, to be exceedingly inconvenient; for, while it gives an undue advantage in the first instance to a cadet who may be promoted into this corps, it is calculated ultimately to repress all

hopes of advancement. He finds himself, when first promoted, a captain, and can never aspire beyond the rank of major. It is believed that this arrangement is highly pernicious to the corps, and ought to be corrected. In fact no good reason can be assigned why its organization should essentially differ from the other branches of the military service, and I have every confidence to hope, if Congress think proper to adopt the organization proposed for the corps of topographical engineers, that it will greatly improve this valuable branch of service.

In proposing to place at the head of the Engineer department a chief engineer, with the pay, rank, and emoluments of a brigadier general, I have been governed by the importance of the office, and by the principle which prevails in the organization of the other corps of the army. In our service two regiments constitute a brigade, and is commanded by a brigadier general. The proposed organization of the corps of engineers and topographical engineers, with the addition of the Military Academy which is attached to the former, would be more than an equivalent to two regiments, and upon principle ought to be commanded by an officer of the grade proposed. In fact, it can scarcely be supposed that the arm which, above all others, requires the highest military attainments, should be so organized as to render the condition of an officer belonging to it less advantageous than in other branches of the service, which would be the case unless the chief engineer should have a rank as high as that of brigadier general at least. Should Congress deem it expedient to adopt the provision recommended for the enlargement of these corps, I should suggest the propriety of its being done gradually, at least as it regards the corps of engineers. None but cadets of the highest talents and acquisitions should be appointed, and, judging from past experience, it is believed that an addition of not more than three could be made annually over and above what would be necessary to fill the vacancies which occur, that being about the average which the graduating classes at the Military Academy furnish, possessed of the suitable talent and acquisition for the engineer service. Supposing the corps of engineers should be increased, as recommended, it would require at least seven years to complete the establishment. From the pressing demands for the services of the topographical engineers, the whole or a great part of the officers proposed to form the corps might be immediately appointed, should it be deemed expedient, from the officers of artillery and infantry, who have been graduated at West Point, and who have been engaged in topographical duties and found to possess the requisite qualifications.

I conceive it my duty to seize this occasion for suggesting the propriety of placing the two corps of engineers, with regard to their pay and emoluments, on the same footing with the other branches of the staff. They are now paid, with the exception of the majors of the topographical engineers, as officers of infantry, while all other officers of the staff, including those detailed for ordnance duty, receive that of cavalry. The reasons for giving a higher pay to staff officers than to those of the line apply with full force to the officers of the corps of engineers and topographical engineers, namely, that of being placed on detached duty, which exposes them to greater expenses than those of the line, who actually live in garrison and mess together. Great inconvenience has been felt by the officers of the corps from the smallness of their pay; from this cause the officers of the corps of engineers, in particular, stationed on the Gulf of Mexico, find their pay inadequate to their support, with the most rigid economy.

At present there is a paymaster provided for, to be taken from the subalterns of the corps of engineers, whose duty it is to pay that corps. It would be an improvement to repeal so much of the act of the 29th of April, 1812, as provides for the appointment of a paymaster to the corps of engineers, and in lieu of it to provide for an additional paymaster of the army, so as to relieve the corps from furnishing a paymaster, and to prevent any distinction in the officers of the pay department.

In order more clearly to set forth all the changes and improvements contemplated by this letter, I beg leave to refer you to the accompanying project of a bill for increasing the corps of engineers, and for organizing the topographical engineers into a corps.

I have the honor to be, very respectfully, sir, your most obedient servant,

JAMES BARBOUR.

Hon. JAMES HAMILTON, Jr., *Chairman of the Military Committee, House of Representatives.*

A.

ENGINEER DEPARTMENT, *Washington, January 10, 1826.*

SIR: In compliance with your instructions, I have the honor to submit to you herewith a table showing the disposition of the officers of the corps of engineers as now employed, and also the number of officers requisite to answer the demands of the public service for the present year; and, in like manner, showing how the officers might be employed for seven years to come, if the corps of engineers were to be gradually increased to double its present number by an annual addition of three of the graduated cadets of the Military Academy, that being the supposed number which could be furnished from that institution over and above what would be required to fill the vacancies which would probably take place in the corps of engineers, and at the same time supply the number of graduates to fill the vacancies in the regiments of infantry and artillery.

The corps of topographical engineers—to consist of one colonel, one lieutenant colonel, two majors, six captains, twelve first and twelve second lieutenants—might be immediately supplied with the requisite number of lieutenants from the officers of artillery and infantry who have been employed on topographical duty and found to possess the requisite talent and information, and from the other graduates who are known to possess suitable talents and qualifications. If Congress should judge fit to give to the topographical engineers the proposed organization, that corps might be filled to advantage, on the passage of the act, and be profitably employed in the surveys of the coast and harbors and of the sites for fortifications, and also in surveys of such roads and canals and other internal improvements and explorations as government might think proper to direct. The whole number proposed is not more than sufficient to perform the duties marked out for them.

I have the honor to be, very respectfully, sir, your most obedient servant,

ALEX. MACOMB, *Major General, Chief Engineer.*

Hon. JAMES BARBOUR, *Secretary of War.*

A.—Table showing the distribution as now existing, and as contemplated for the year 1826, of the corps of engineers, consisting of one colonel, one lieutenant colonel, two majors, six captains, six first lieutenants, and six second lieutenants—in all twenty-two officers, besides four brevet officers, which, included, makes the whole number in service twenty-six; also showing what the distribution would be in each year during the progress of enlarging the corps, by adding to it annually from the graduates of the Military Academy until the whole number should amount to forty-five, the number to which the corps would be enlarged should the addition recommended of one brigadier general, one colonel, one lieutenant colonel, two majors, six captains, six first lieutenants, and six second lieutenants be provided.

REMARKS.—It will be perceived by this table that, although the number of officers would be progressively increased in each year until, in the year 1831, it would amount to the number to which it is recommended that the corps should be enlarged, there is no year within that period in which the strength of the corps would be adequate to afford the number of officers deemed requisite for the service even of the fortifications; and that, at the expiration of the period stated, a number of the fortifications now projected will not have been commenced. With the number of officers that would be at disposal in the several years during the progress of the gradual extension of the corps, agreeably to the project proposed for its increase, it would, however, be practicable to give proper attention to the fortifications, and also furnish the officers requisite for the direction of the several objects connected with internal improvements, which are stated in the table, by employing persons to superintend the details of the operations. Should the employment of such persons be found to be less advantageous to the public interest than to have the duties proposed to be confided to them performed by engineers, a further enlargement of the corps might be determined on, after the completion of the project now proposed for its increase; but it would not be advisable to provide for a greater increase at this time, as the Military Academy, upon its present establishment, could not, without prejudice to other branches of the army, furnish the number of graduates requisite to fulfil such an object.

The field officers to be employed in the office of the chief engineer, in the board of engineers, in the superintendence of districts and fortifications of the largest class, and in inspections; the captains in the superintendence of constructions, and the lieutenants as assistants; the topographical engineers to be employed in making general and particular surveys, and in preparing charts and maps of the coast and interior for fortifications and internal improvements. The organization proposed for the topographical engineers would probably take effect immediately, by the transfer of officers of artillery and infantry who have been on topographical service, and have acquired the requisite qualifications. It is deemed not necessary to show the particular objects upon which the topographical engineers would be immediately or prospectively employed, as the whole corps, increased to the extent recommended, would be constantly and profitably employed in surveys, &c., relating to the general objects above stated.

19TH CONGRESS.]

No. 293.

[1ST SESSION.]

APPLICATION OF TENNESSEE FOR THE ESTABLISHMENT OF A NATIONAL ARMORY AT  
THE "NARROWS OF HARPETH," IN THAT STATE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 16, 1826.

Whereas the general government have wisely determined to establish a national armory on the western waters, and, for that purpose, have caused sundry *sites* to be examined and reported; and whereas the great water power and other natural advantages attending the "Narrows of Harpeth" river, in Davidson county, have not escaped the observation of their commissicners, but is respectfully embraced in their report: Therefore—

*Resolved by the general assembly of the State of Tennessee,* That our senators in Congress be instructed, and our representatives requested, to use their most prompt endeavors with the proper authorities to have the aforesaid armory located at the "Narrows of Harpeth," and that the governor be requested to forward to each of them a copy of the foregoing resolution.

WILLIAM BRADY, *Speaker of the House of Representatives.*  
R. C. FOSTER, *Speaker of the Senate.*

NOVEMBER 19, 1825.

19TH CONGRESS.]

No. 294.

[1ST SESSION.]

CORRESPONDENCE WITH THE OFFICERS OF THE LOUISVILLE AND PORTLAND CANAL  
COMPANY RELATIVE TO A SITE FOR A NATIONAL ARMORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1826.

DEPARTMENT OF WAR, *January 16, 1826.*

SIR: In conformity with a resolution of the House of Representatives of the 12th ultimo, directing the Secretary of War "to ascertain from the president, directors, and company of the Louisville and Portland Canal Company in Kentucky, upon what terms they will furnish the United States with a site and sufficient water power for an armory, and that he lay such information as he may obtain before this House when obtained," I have the honor to transmit herewith a report of the colonel of ordnance, with its accompanying documents, which furnish the information required.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The Hon. SPEAKER of the House of Representatives.

ORDNANCE DEPARTMENT, *January 16, 1826.*

SIR: In compliance with your instructions to obtain the information required by a resolution of the House of Representatives of the 12th ultimo, a correspondence has been opened between this department and the president of the Louisville and Portland Canal Company, copies of which, containing the information required, I have now the honor to submit.

I have the honor to be, sir, your obedient servant,

G. BOMFORD, *Brevet Colonel on Ordnance Service.*Hon. J. BARBOUR, *Secretary of War.*ORDNANCE DEPARTMENT, *Washington, December 4, 1825.*

GENTLEMEN: I am instructed by the Secretary of War to address you for the purpose of ascertaining upon what terms you will furnish the United States with a site and sufficient water power for an armory. I have therefore to request that you will state the terms upon which the required site and power will be furnished.

It is proper to state that a site for an armory should contain not less than two hundred acres; and that the water power should be equal to that which, in the usual estimation of millwrights, would be sufficient for working twelve pair of five-foot burr millstones from ten to twelve hours per day, without interruption or liability to failure.

Respectfully, &amp;c.,

GEO. BOMFORD, *Brevet Colonel on Ordnance Duty.*The PRESIDENT of the Portland and Louisville Canal Company, *Louisville, Ky.*

OFFICE OF THE LOUISVILLE AND PORTLAND CANAL COMPANY, *Louisville, Ky., December 31, 1825.*

SIR: In reply to your letter of the 14th instant, addressed to this board, requesting information "upon what terms this company will furnish the United States with a site and sufficient water power for an armory," we have to state that this company will be able to furnish the quantity of water wanted for the above purpose, and that the price they propose to ask for the same will be three thousand six hundred dollars per annum, requiring that the water be used in the most economical manner, say not exceeding 5,500 cubic feet per minute, with a head of four feet at low stages of water, and increasing according to the rise of the river. This quantity of water, from the best information obtained from millwrights and engineers, will be more than sufficient for working twelve run of five-foot burr millstones.

On the subject of a site, this company possess no lands except such as are necessary for its own purposes; it is supposed, however, that the quantity of land required can be obtained on reasonable terms; the principal part of that which would be most suitable belongs to Mr. Rowan, at present a senator in Congress, to whom reference may be made.

If we may venture an opinion, we should say that the most eligible site for an armory is adjoining Shippingport, above Tarascon's mills, where fifty to eighty acres of land may be procured between the canal route and the river, and on the south side of the canal a sufficient additional quantity may be obtained; the expense of making a race of twenty feet in the width to this site would be, according to the estimate of our engineer, about twenty-two thousand dollars.

Another site may be obtained at Portland, below Shippingport, to which the expense of making a race would be considerably greater; but the land may probably be obtained in one body.

A contract has been made for the construction of the Louisville and Portland canal, by which it is engaged to be completed on or before the first day of November, 1827, and this board entertain no doubt of the punctual fulfilment of this contract; and if it were determined to establish the armory here, a race for its purposes might be finished by that period.

There will be no liability to failure from want of water at either of the above sites; the only liability to interruption will be from floods or freshets, which, probably, would not impede the operation of the works more than twenty days in a year on an average; during the past year there would have been no interruption whatever.

We take the liberty of enclosing you a copy of our charter, to which is annexed a copy of a resolution of the legislature of this State, ceding to the United States exclusive jurisdiction in and over the territory necessary for a national armory, should one be located near this place.

Very respectfully, &c.,

The Louisville and Portland Canal Company, by

EDWARD SHIPPEN, *President.*

Colonel G. BOMFORD, *Ordnance Department, Washington City.*

AN ACT to incorporate the Louisville and Portland Canal Company.

SECTION 1. *Be it enacted by the general assembly of the Commonwealth of Kentucky,* That Nicholas Berthoud, Robert Ormsby, James Hughes, John D. Colmesnil, Robert Breckenridge, Isaac Thom, Simeon S. Goodwin, Charles M. Thruston, Worden Pope, W. S. Vernon, John J. Jacob, Samuel Churchill, James Brown, James H. Overstreet, Daniel Fetter, James Guthrie, with their associates, be, and they are hereby, created a corporation and body politic by the name, style, and title of the Louisville and Portland Canal Company, for the purpose of opening and constructing a canal navigation, with suitable locks, docks, and basins, around the falls of the river Ohio, within the State of Kentucky; and they, with their associates and successors, shall so continue and have perpetual succession, and by that name are hereby made as capable in law as natural persons to contract and be contracted with, to sue and be sued, plead and be impleaded, answer and be answered, in all courts of law or equity in this Commonwealth and elsewhere; to make, have, and use a common seal, and the same to break, alter, or amend at pleasure. They shall also have the power to purchase and hold as much real estate as will be necessary for the site of said canal, roads, buildings, docks, basins, and the proper application of the water power or use of water that may arise from the proper construction of said canal, with power to make as many dry and wet docks as they may deem advisable. And also to borrow money to any amount not exceeding the capital stock hereinafter mentioned, but not to have or exercise the privilege of loaning money or buying or selling bills of exchange or other choses in action, or issuing notes on banking principles; also the power to ordain and establish such by-laws, ordinances, and regulations as shall be necessary for the well-being and government of the concerns of said corporation, not contrary to the constitution and laws of this Commonwealth or of the United States.

SEC. 2. That the capital stock of said company shall consist of six hundred thousand dollars, divided into shares of one hundred dollars each, to be subscribed for in the manner hereinafter mentioned.

SEC. 3. That within thirty days from the passage of this act the persons hereinbefore named, or a majority of them, shall cause public advertisement to be made of the time and places of opening books for the subscription of the stock of said company, which books of subscription shall be kept open under the direction of the aforesaid persons, or a majority of them, not less than ten days nor more than ninety days. If, however, at the closing of the subscription it shall be found that a greater number of shares shall have been taken than the number of six thousand, then, in that case, the persons aforesaid, or a majority of them, shall proceed to reduce the subscription in an equitable proportion among the subscribers, taking off from the largest subscribers and not reducing any one below ten shares.

SEC. 4. That whenever one thousand shares of the capital stock of said company shall have been subscribed, the persons aforesaid, or a majority of them, shall advertise a meeting of the shareholders of said company in Louisville, giving at least fifteen days' notice of the time and place of such meeting, and shall thereupon proceed to the election of a president and four directors, who shall be shareholders in said company, and also fix what compensation they shall be entitled to, if any is allowed, and also to ordain and adopt such other permanent by-laws for the organization of the said corporation as they may deem needful, in which meeting, as at all future meetings or elections, each shareholder shall be entitled to one vote for every share he may hold to the number of twenty, and one vote for every ten shares over twenty;

but after the first general meeting and election no person who is not a citizen of the United States shall vote on any shares in said company, either in person or by proxy. At all subsequent elections no shares shall be voted on that have not stood in the name of the person claiming to vote at least three months previous to the day of election. Shares may be voted on by proxy, duly recorded, and conforming to the foregoing qualifications.

Sec. 5. That the president and directors first chosen shall hold their offices until the first Monday of January, one thousand eight hundred and twenty-six, or until others shall be chosen in their places. On the first Monday of January in each year the stockholders of said company shall meet at their office, in some place to be designated by the president and directors, in Louisville, and there proceed to choose a president and four directors, who shall be shareholders in said company and resident citizens of the United States, and who shall hold their offices for one year, and until others shall be elected in their places. Public notice of such meetings and elections to be given by the clerk or secretary of the company in some public newspaper printed in Louisville, Frankfort, and Cincinnati, at least fifteen days previous to any such meeting or election. At the annual meetings a statement of the affairs of the company shall be made out and presented to the meeting by the president and directors, and such dividend of the profits declared as they may deem advisable.

Sec. 6. That the concerns of said corporation shall be under the control, superintendence, and management of the said board of president and directors, a quorum of which to do business shall consist of the president and two directors, or, in the temporary absence of the president, of three directors, who may appoint one of their number as president *pro tem*. The president and directors may, after they shall have been duly elected as aforesaid, make such assessments on the shares subscribed and payable at such periods as they may think proper, with such conditions of forfeiture for non-compliance, not exceeding the amount of stock delinquent, as they may deem advisable. They may open or renew the subscription for the shares not already subscribed, or dispose of them in any manner that they may think for the interest of the company; provided, however, that they shall not sell any stock or share in said company at less than the par value thereof; and also that proper notice of the time and place of said subscription or sale is given in one or more public newspapers printed in Louisville, Frankfort, and Cincinnati.

Sec. 7. That it shall be the duty of the said president and directors to appoint a clerk or secretary, a treasurer, and such other officers or agents as they may think needful for prosecuting said undertaking, and to allow them such pay or compensation as they may agree on; to make contracts, and do all things necessary for carrying the same into immediate effect, and to require and take such bonds, or other security, in their corporate name, from any person or persons they may so appoint or contract with. In case of the death, resignation, or vacancy, from any other cause, in the said board of president and directors, the remaining numbers may proceed to appoint a stockholder or stockholders to supply the place or places of a president, director or directors, so vacated, for the unexpired time for which he or they were elected.

Sec. 8. That the president and directors of said company, by themselves, or their agents or workmen, shall have full power to enter into and upon any lands in the vicinity of the proposed canal, and to survey and lay out such route or tract as shall be deemed by them most practicable for effecting a safe and easy navigation, and also for suitable locks, wet and dry docks, suitable for such objects as are within the contemplation of this act and the organization of this company, doing as little injury to the adjoining grounds and enclosures as is possible in the prosecution of the proposed undertaking; and it shall and may be lawful for the owners of the lands and tenements to contract and agree with the said president and directors for the conveyance of so much of said lands as will be necessary and requisite for the purposes aforesaid, if the said president and directors can agree with said owners; but in case of disagreement said company may proceed to lay out and open their works on such grounds as they may deem best adapted to the purposes of navigation, water works, wet and dry docks, and basins connected with the same; and upon application of either party to the circuit court of Jefferson county, the said court shall appoint twelve persons, who shall be freeholders, and disinterested, to view and assess the damages and advantages arising to the said owners by the location of the said works, and make report thereof to said court, which report, when duly received and admitted to record, shall be final; and on the payment of the money, if any is awarded, shall vest in the said company the fee-simple to the land. The president and directors shall likewise have power to sell, or lease for a term of years, the privilege of erecting docks or other location on the said canal or its appendages.

Sec. 9. That it shall and may be lawful for the said president and directors, by themselves, their agents, or workmen, to enter, with such force as they may employ for that purpose, upon the lands contiguous or near to the proposed canal, and from thence to take and carry away any earth, stones, timber, gravel, &c., being most convenient for making or repairing the said canal and appendages, making proper compensation therefor to the owner of said land, if they can agree therein; but in case of disagreement, then it shall be settled by valuation in the manner before recited; and when the said canal shall be completed suitable for the passage of boats, drawing four feet of water in low stages of water, the said president and directors, by themselves, their agents, or servants, shall have power and authority to demand and receive from the owner or owners, master or agents, of all vessels, crafts, barges, or other crafts entering the said canal the following rates of toll, to be paid before the said vessel, boat, barge, or craft shall be suffered to pass through the same, to wit: for steamboats, sea vessels, barges, or keel boats, twenty cents per ton, United States measurement; for each flat boat, four dollars; for each raft of timber, plank, or other lumber, four dollars for every sixty feet in length, not exceeding twenty feet in width; the said tolls to be paid in gold or silver coin current in the United States; and in no event shall any law be passed requiring or compelling said company to receive any other currency in discharge of toll. The said president and directors shall establish and fix such sums as they may deem advisable for the use of the docks, basins, and other appendages to the said canal, which rates, with the foregoing rates of toll, shall be posted up in some conspicuous place on the said canal, and no other or greater rates shall be demanded than those so posted up.

Sec. 10. That if any person or persons shall wilfully and knowingly do any act or thing whatever, whereby the said navigation, or any lock, gate, dam, engine, machine, or other thing thereto belonging, shall be injured, or damaged, or impeded, or shall commit any wilful trespass, or take, carry away, or conceal any material, instrument, tool, or other thing belonging to or used in or about the said works, or shall open, or cause the locks to be opened, or attempt so to do, or to pass or repass without the knowledge of the agent or manager to said canal, he, she, or they, so offending, shall forfeit and pay to the canal company, their tenant or agent, three times the amount of the cost or damage sustained by means

of or through such wilful act, together with costs of suit, to be recovered before any court of competent jurisdiction; and, in case of clandestinely taking and conveying away, be liable for a prosecution for theft, as in other cases.

SEC. 11. That the said president and directors shall keep a true account of the cost and expenditure of the said canal and appendages, and on the first Monday of January in each year have the same made up and the balance of profits struck and divided among the stockholders, and report the same to the general assembly of this Commonwealth; and if it shall appear by the said return so made, under the oath of the president and directors, that the profits so divided do not amount to twelve and a half per cent. on the capital expended, the said corporation shall be authorized to add to the tolls for the succeeding years until the net profits, after deducting for all expenses, repairs, and necessary improvements, shall amount to twelve and a half per cent. per year. But should it appear by the said returns that the net profits as aforesaid exceed eighteen per cent. per year, after the expenses, repairs, and necessary improvements are made, the legislature reserve to themselves the right so to reduce the amount of tolls so that the profits to be divided shall not exceed eighteen per cent. per annum.

SEC. 12. That the trustees of the town of Louisville shall have a right to subscribe for and take any amount of stock in this company or corporation not exceeding one thousand shares, and that whatever sum which may be so subscribed for and taken by the trustees aforesaid, not exceeding one hundred thousand dollars, shall not be reduced by anything in the third section of this act contained; and that said trustees and their successors shall be entitled to the same votes as other subscribers or stockholders, and not otherwise, which stock may be subscribed for by the president or chairman of the board of trustees for the time being, and the votes to which they may be entitled may be either given by the president or chairman of said board for the time being, or such other person as they may appoint: *Provided*, That such subscription by such trustees be made within thirty days from the time of opening the books for subscription of stock. And to enable said trustees to raise and borrow the necessary funds to meet and pay up their subscription of stock, they, said trustees, and their successors, may pledge the amount of their stock so subscribed and taken, as well as their interests of profits arising from the proposed canal, and dry and wet docks and other appendages, as well as any other funds or property they may possess as trustees aforesaid.

SEC. 13. That the stock in said canal company shall and may be transferable in whatever manner the president and directors of said canal may by their by-laws ordain and appoint.

SEC. 14. That unless the said company shall within eighteen months from the passage of this act *bona fide* commence the cutting of said canal, or shall fail within three years from the passage of this act to have the main object of this charter, to wit, the canal itself, completed, the corporate powers hereby granted shall cease and determine: *Provided*, That if the said stock shall not be subscribed and notice given by the company to the governor of the Commonwealth on or before the first day of November next, then this charter shall cease and be void, and all rights and privileges become null and void to all intents and purposes, as if this act had not passed.

Approved January 12, 1825.

#### A RESOLUTION for ceding to Congress certain land in this State for the site of an armory.

Whereas the present general assembly of Kentucky anticipate with a lively hope that the general government will establish an armory on the western waters whenever a suitable site can be procured; and whereas it is now hoped that the company incorporated at this session for constructing a canal around the falls of the Ohio river, under the name and style of the Louisville and Portland Canal Company, will achieve in the shortest practicable period that great object: Be it therefore—

*Resolved*, That should the Congress of the United States establish an armory near Louisville, in connexion with the said Louisville and Portland canal, by arrangement with the company for the requisite water power, this State will by law concede to the United States exclusive jurisdiction in and over the territory necessary for that object.

Approved January 13, 1825.

#### BY-LAWS.

At a meeting of the stockholders of the Louisville and Portland Canal Company holden at the Louisville insurance office on Saturday, March 26, 1825, (due notice thereof having been given, and agreeably to the fourth section of the act incorporating said company,) the following by-laws were unanimously adopted:

ARTICLE 1. The president and directors of the Louisville and Portland Canal Company shall not make any call or assessment on the shareholders of said company (above the sum required to be paid on each share at the time of subscription) until the full number of six thousand shares shall have been taken or subscribed.

ARR. 2. When any call or assessment shall be made by the board of president and directors of this company on the shares of the capital stock thereof, not less than sixty days' notice shall be given of the time of payment of the same, by publication in one or more public newspapers at Louisville and Cincinnati, and such other place as the president and directors may deem expedient.

ARR. 3. Whenever the first instalment on each share of the capital stock of the company shall be called for or assessed by the president and directors, and when the same shall be paid by any shareholder or shareholders, a certificate or certificates shall be issued to such shareholder or shareholders, embracing any number of shares he, she, or they may direct, not exceeding the number by him, her, or them subscribed for or owned, and on which such instalments shall be paid; which certificate or certificates shall be under the seal of the company, signed by the president and treasurer and countersigned by the secretary, in the form following, viz:

Certificate No. — of — shares Nos. — in the capital stock of the Louisville and Portland Canal Company.

LOUISVILLE, Kentucky, — —.

This is to certify that — entitled to — shares in the capital stock of the Louisville and Portland Canal Company, — having paid the first instalments of — dollars on each of said shares. This certificate is transferable by indorsement, and the holder hereof is subject to such further instalment or instalments as may be called for by the president and directors of said company, not exceeding, however, the nominal amount of each share, say one hundred dollars.

[L. s.]

—, Treasurer.

(Countersigned,)

—, President.

—, Secretary.

ART. 4. Whenever and so often as any instalment after the first shall be assessed and paid on the shares of the capital stock of the company, a receipt for such instalments shall be made out, signed by the treasurer, and given to the person paying the same, conforming to the certificates issued, as follows, viz:

LOUISVILLE AND PORTLAND CANAL COMPANY.

Receipt for the — instalment on certificate No. —, for — shares issued in the name of — —.

Received of — —, the — instalment of — dollars on each share, being — dollars on the — shares contained in said certificate.

—, Treasurer.

LOUISVILLE, Kentucky, — —.

ART. 5. The president and directors, whenever they may deem it expedient, may, by public notice in one or more newspapers, call in the original certificates and receipts for instalments paid on the shares of the capital stock of the company, and issue permanent certificates in lieu thereof, under the seal of the company, in the form following, viz:

No. — certificate of stock in the Louisville and Portland Canal Company.

LOUISVILLE, Kentucky, — —.

Be it known, that — — is entitled to — shares in the capital stock of the Louisville and Portland Canal Company, numbered — to — inclusive.

This certificate is transferable by indorsement.

[L. s.]

—, Secretary.

—, President.

ART. 6. The treasurer, to be hereafter appointed by the board of president and directors, shall, before he enters on the duties of his office, give bond, with such security or securities, for the faithful discharge of his duty, as the board shall require, in a sum not less than one hundred thousand dollars, and the said treasurer shall make deposit of all funds belonging to the company in the office of discount and deposit of the Bank of the United States at Louisville, during the continuance of said office at said place, and at such other bank or place thereafter as may be ordered by the president and directors, said deposits to be made in the name of the Louisville and Portland Canal Company, and to be drawn for by the treasurer; and no money shall be paid by the treasurer on account of the company except on the order of the president, countersigned by the secretary, which order shall in no instance be drawn except in pursuance of a previous vote of the president and directors. The said treasurer shall exhibit his accounts and vouchers to the president and directors whenever required so to do by them.

ART. 7. The president and directors shall each receive the sum of three dollars per day for each and every day they shall be employed in attendance upon the affairs of the company during the cutting or construction of the canal and completion of its appendages, no compensation, however, to be allowed therefor until after the full number of six thousand shares (the capital stock of said company) shall be subscribed and taken. The amount of compensation; if any, which may be allowed to the president and directors for services, after the canal and its appendages shall be completed, shall be fixed and determined at the first subsequent annual meeting of the shareholders.

ART. 8. Dividends out of the net profits of the stock of the company shall be declared and paid by the president and directors semi-annually, viz: on the first Mondays of January and July.

ART. 9. The office of the Louisville and Portland Canal Company shall be kept in the town of Louisville, and the president and directors are authorized to rent, lease, or otherwise procure such house or building as they may deem necessary for the transaction of the business of said company.

ART. 10. Holders of stock, collectively, to the amount of one thousand shares, in the company, may, at any time, and for any purpose that they may think advisable, require of the president and directors to convene a general meeting of the stockholders at Louisville, notice thereof to be given in one or more public newspapers at Louisville and Cincinnati at least fifteen days before the time for the holding of the said meeting.

ART. 11. All by-laws adopted at the present meeting of the stockholders shall be subject to amendment or repeal (a majority of the whole amount of stock concurring therein) at any future meeting of the stockholders.

ART. 12. The president and directors of the Louisville and Portland Canal Company shall cause to be kept a fair record of all their proceedings, and submit them to the inspection of the stockholders at any general meeting if required.

Nominal amount of each share, \$100. Amount paid on each share.

## ELECTION.

The committee appointed to superintend the election of a president and four directors for the Louisville and Portland Canal Company, on the 26th March, 1825, reported the following gentlemen as duly elected, viz: \*James Hughes, president; John Shackford, Nicholas Berthoud, John P. Foote, Isaac Thom, directors.

## APPOINTMENTS BY THE BOARD.

At a meeting of the president and directors of the Louisville and Portland Canal Company, at the Louisville insurance office, March 28, 1825, Simeon S. Goodwin was appointed secretary and John J. Jacob treasurer of said company.

19TH CONGRESS.]

No. 295.

[1st Session.]

## STATEMENT OF DEATHS AND DESERTIONS IN THE ARMY FOR THE YEARS 1823-'24-'25.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1826.

DEPARTMENT OF WAR, *January 17, 1826.*

SIR: Pursuant to a resolution of the House of Representatives of the 27th ultimo, directing the Secretary of War to report "what number of soldiers deserted annually during the last three years, ending on the 30th of September, 1825; how many of them were of the artillery and how many of the infantry service; also from what posts and garrisons and at what period of enlistment the desertions took place; where born, their ages and avocations at the time of enlistment; what number of soldiers have died, and where; whether desertions frequently follow the commission of crime or infliction of punishment; what would be the probable effect of withholding from recruiting officers the premium usually allowed, as well as any other information he may possess relating to desertions," I have the honor to transmit herewith a report of the general-in-chief, which in part furnishes the information required. The remaining part of the information will be furnished as soon as practicable.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the *House of Representatives.*HEADQUARTERS, *January 16, 1826.*

SIR: I have the honor to enclose herewith a statement showing the number of deaths and desertions from different posts of the army, with a letter from the Adjutant General accompanying, being a compliance in part with the resolution of Congress on this subject of the 27th of December ultimo.

I have nothing to add to my former remarks in relation to desertion and the army, further than a recommendation for the increase of the pay of corporals as well as that of sergeants, should Congress be disposed to extend the principle to that grade.

I have the honor to be, sir, most respectfully, your obedient servant,

JAC. BROWN.

Hon. JAMES BARBOUR, *Secretary of War.*ADJUTANT GENERAL'S OFFICE, *Washington, January 11, 1826.*

SIR: To furnish a descriptive list of all the deserters from the army for the last three years, agreeably to the resolution of Congress, will require much more than the available force of this office, and not less than thirty or forty days of assiduous labor, even from this date. Aware of this fact, I have thought it might be most acceptable to the House if a part of the information sought should be furnished in anticipation of the whole. I therefore present so much as has been completed, and have the pleasure to state that the more minute analysis enjoined by the resolution is progressing as rapidly as our means and the nature of the research will permit.

I am, sir, most respectfully, your obedient servant,

R. JONES, *Adjutant General.*Major General BROWN, *General-in-Chief.*

\* Since printing the above, James Hughes, esq., resigned, and Edward Shippen, esq., has been elected president in his place.

Statement showing the number of deaths and desertions in the army, by regiments and posts, for the three years terminating, respectively, September 30, 1823, September 30, 1824, and September 30, 1825.

Fort Shelby	do	Detroit	Captain J. Garland.
Fort Niagara	New York	Youngstown	Brevet Major A. R. Thompson.
Madison Barracks	do	Sackett's Harbor	Brevet Brigadier General H. Brady.
Arsenal near Richmond	Virginia	Chesterfield Court-House	Lieutenant R. B. Lee.
Arsenal, Augusta	Georgia	Augusta	Brevet Major M. M. Payne.
Arsenal, Pittsburg	Pennsylvania	Pittsburg	Brevet Major S. Churchill.
Arsenal, Watertown	Massachusetts	Watertown	Brevet Major H. K. Craig.
Arsenal, Watervleit	New York	Watervleit	Brevet Major G. Talcott.
Arsenal, Rome	do	Rome	Lieutenant I. Simonson.
Arsenal, New York	do	New York	Lieutenant James Monroe.
Arsenal, Frankford	Pennsylvania	Frankford	Lieutenant T. I. Baird.
Arsenal, Baltimore	Maryland	Baltimore	Captain N. Baden.
Arsenal, Washington	District of Columbia	Washington	Brevet Major W. Wade.

The western department comprises all west of a line drawn from the southernmost point of East Florida to the north-west extremity of Lake Superior, taking in the whole of Tennessee and Kentucky; and the eastern department all east of such line.

The headquarters of the general-in-chief is in the District of Columbia.

The headquarters of the commanding general of the western department is at Louisville, Kentucky; and the headquarters of the commanding general of the eastern department is at Governor's Island, New York.

Cadets, acting as supernumerary officers in the army by brevet commissions, will be promoted successively to vacancies which may occur in the lowest grade of the arm to which they may be attached conformably to the rank held by each on the merit roll when recommended for promotion.

Those officers whose stations are changed by transfers and promotions will report for duty accordingly.

By order :

R. JONES, *Adjutant General.*

19TH CONGRESS.]

No. 297.

[1ST SESSION.]

## ON THE DEFENCE OF THE NORTHWESTERN FRONTIER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 20, 1826.

Mr. VANCE, from the Committee on Military Affairs, to whom was referred a resolution making inquiry what further measures were necessary to be adopted for the security and defence of the northwestern frontier, reported :

The information called for by the resolution involves an inquiry of a two-fold character: first, a defence by permanent military works, and, secondly, by the opening and construction of roads, so as to give facilities to the intercourse between this important and exposed frontier and the more thickly settled parts of the country, as well as to connect some of the most important points on the Michigan peninsula.

On the first branch of the inquiry your committee have come to no definite conclusion. Indeed, from the report of the chief of the Engineer department, it would be premature even to express an opinion, as that report states that no survey has been made of the northwestern frontier with a view to that object.

On the second branch of the inquiry your committee, after a careful examination of the report of the War Department, as well as the map of the Michigan peninsula, are fully persuaded that, to give that quarter of the country the security that its importance to this Union requires, the aid of the government is loudly called for in the laying out, opening, and constructing roads in this section of our territory. This they consider necessary, not merely as a defensive measure, but as a measure of sound policy, calculated to build up, by proper encouragement, the settlement of that frontier with the sturdy yeomanry of the country.

With this view of the subject, your committee recommend that provision be made for surveying a road from Detroit to Fort Gratiot, at the outlet of Lake Huron; a road from Detroit to Saginaw bay; and that a reasonable appropriation be made to commence the opening and construction of the road from Detroit to Chicago, as well as a sufficient sum to complete the connexion of the Detroit and River Raisin with the Maumee and Sandusky roads; which roads, your committee are pleased to find, are progressing in a manner that does credit to those to whom the important trust of their construction has been confided.

Your committee will not go into detail on this subject, but will call the attention of the House to the very able and full report of the War Department to them communicated, relative to the necessary defence of the northwestern frontier, which they ask to be made a part of this their report; and they herewith report a bill.

DEPARTMENT OF WAR, *January 12, 1826.*

SIR: In addition to my letter of the 10th instant, in reply to yours of the 9th, requesting information "whether any additional measures are necessary to be adopted for the defence of the northwestern frontier," I transmit herewith a report of Major General Brown in relation to the subject, with an accompanying paper from Governor Cass on the same subject, for the consideration of the committee.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. JAMES HAMILTON, JR., *Chairman Military Committee, House of Representatives.*HEADQUARTERS OF THE ARMY, *Washington, January 11, 1826.*

SIR: Agreeably to your instructions, attached to a communication from the chairman of the military committee, concerning such measures, if any, as may be necessary for the defence of the northwestern frontier, I have the honor, in reply, to submit the following observations:

I have heretofore had occasion to state my opinion that the northwestern defences were rendered nearly complete by the occupancy of the five posts of St. Mary's, Green Bay, St. Peter's, Council Bluffs, and Prairie du Chien. The four first named form an exterior cordon, to which any interior establishments are merely auxiliary as points of communication or depots of military supplies. Little apprehension can reasonably be felt from savage hostility within this line; and as the march of population advances upon it, it may become expedient to push forward even these posts to positions still more remote.

From a prospect of this contingency, the propriety of erecting permanent works, even on the most eligible sites, may be questioned, since no limit has hitherto been defined to the progressive expansion of population in that direction. But an opinion may now be safely ventured, that beyond the Sault of St. Mary's the tide of emigration cannot flow in force, and for many years to come the posts of Green Bay and St. Peter's will still continue beyond our most advanced settlements. On this position I would found my recommendation that a strong and permanent work be erected at the Sault of St. Mary's, and others of a respectable but less durable kind be constructed at Green Bay and St. Peter's.

These are all points of cardinal importance, and, considering the localities with reference to their military and topographical character, none, perhaps, could be more advantageously occupied. Legislative aid would therefore be required for the establishment of a proper work at St. Mary's; but such as would be necessary for Green Bay and St. Peter's might be constructed by the military, with no other expense than that requisite for the purchase of a portion of the necessary materials. Nor would it be required that the work at St. Mary's should be of any great extent, though, in reference to any force that could be brought against it, it should be impregnable. The most numerous body of troops might occupy Green Bay, where the comparative mildness of the climate and fertility of the soil would contribute to their comfortable subsistence. From this body detachments would be drawn at periodical times to garrison St. Mary's, where the climate and soil are more unfriendly.

It is always a consideration of the highest moment to keep the troops as much embodied and as constantly occupied as possible for the purposes of instruction and discipline; and it is equally important, in order to produce a proper restraint upon the savages, to show a respectable force where we show any at all. To insure this end, so far as our means are adequate, I know of no policy so effectual as to send forth from these strong posts, at occasional intervals, well organized parties of troops to penetrate the retirements of the savages, and awe them by a salutary exhibition of our power. Boats, and other means of transportation, might be kept always in reserve for these excursions, whether they be made as military demonstrations only, or for purposes of scientific exploration.

On an inspection of the map, it will be seen that St. Mary's is the extreme point (of the same commanding importance) on the frontier of the northern lakes. It is on a level with the waters of Superior, and accessible from those of Huron, controlling the communication between them. Its attitude, in reference to the Indian tribes, is therefore most imposing, and its strength should defy attack. Against *British* power on this frontier, I should not, at this day, deem it essential to fortify. The commercial marine of the lakes will belong to the people inhabiting the most populous and cultivated shores, and the naval dominion of those waters must remain with their principal navigators. Competition for naval superiority on the lakes will therefore, perhaps, never again arise. With this superiority on our side, there seems to be but a short line of the lake frontier exposed to the danger of sudden aggression from foreign hostility. I refer to the strait connecting Lake Huron with Lake Erie. For the defence of this we are daily becoming more and more competent by the rapid settlement of its borders; but here much may be done by government to accelerate this settlement, and augment the physical resources of the country, chiefly by the establishment of roads. For these, legislative aid will also be required; but as the territories in this region are generally the property of the United States, any expense laid out for roads would be more than gained by the increased value which they would confer on the lands, the additional inducements offered for the settlement of them, and the security and defence guaranteed by safe communication to the resources of the interior. The enormous sums expended on this frontier during the late war, occasioned by the want of proper roads, will convince us of their necessity and of their value. By a judicious expenditure for the prompt establishment of these great objects, the defence of this highly important frontier may be insured.

The region of country extending upon the Upper Mississippi and the great western lakes is covered with large bodies of dense forests, which will long remain the resort of numerous hordes of savages, and render the permanent maintenance of our strongholds on that frontier essential to its security. But the same policy will not apply to the country on the west of the Mississippi, nor is the establishment of permanent works in that quarter so strongly called for. The country between the Missouri and the Rocky mountains is of such a nature that large bodies of savages cannot find a secure retreat within its limits. Without the refuge and protection of forests they would not venture, in the prosecution of hostilities against us, to commit themselves to the uninterrupted expanses of plain and prairie which compose this region. But, presuming on the event, it would not require a large command of well trained mounted infantry, with a few pieces of light or flying artillery, to disperse any force of savages which might be collected to oppose them, and, if it should be necessary, sweep them to the Rocky mountains.

I have said nothing of the island of Mackinaw. For all the purposes of war, the lake in which it is situated is, and must be, ours; and its maintenance in peace, as a military post, is chiefly essential as a measure of police for the harbor and its neighboring precincts.

His excellency Governor Cass, having placed before me the enclosed memoir on the defence of the northwestern frontier, I do myself the honor of recommending it to your favorable notice, and through you to the military committee, as coming from one whose views and opinions on the important subject to which it relates are entitled to the most respectful consideration.

I have the honor to be, sir, most respectfully, your obedient servant,

JAC. BROWN.

Hon. JAS. BARBOUR, *Secretary of War.*

DEPARTMENT OF WAR, *January 10, 1826.*

SIR: I have the honor to transmit herewith a report from the chief engineer of this date, affording, as far as practicable, the information I was requested in your letter of yesterday's date to furnish for the use of the committee over which you preside, in relation to a resolution of the House of Representatives

directing the committee "to inquire whether any additional measures are necessary to be adopted for the defence of the northwestern frontier."

I have the honor to be, sir, with great respect, your obedient servant.

JAMES BARBOUR.

Hon. J. HAMILTON, Jr., *Chairman Military Committee House of Representatives.*

ENGINEER DEPARTMENT, *January 10, 1826.*

SIR: In obedience to your order to report to you for the use of the Committee on Military Affairs of the House of Representatives the information which, in a letter from the honorable chairman of that committee, of yesterday's date, you were requested to furnish, in relation to a resolution of the House directing the committee "to inquire whether any additional measures are necessary to be adopted for the defence of the northwestern frontier," I have the honor to report that the northwestern frontier has not yet been examined for the purpose of ascertaining the expediency of projecting fortifications for its defence, and therefore it is not now in the power of this department to afford satisfactory information on that point. It is probable, however, that fortifications will be deemed necessary as a part of the defence of that frontier on account of the facility with which it may be attacked, and its limited, intrinsic means of defence; the population being thin and dispersed, and its situation being remote and difficult of access from the thickly settled parts of the country, which would be relied on for assistance in cases of emergency; the improvements of the existing communications, and the opening of new communications with the parts of the country from which such assistance could be furnished, would probably be the best measures for defence that could be adopted at this time, as, by the facilities they would afford to commerce and emigration, they would tend more than any other measures to accumulate in the country the means of self-defence, and they would be an important and, indeed, indispensable auxiliary to any plan of defence that may be adopted.

Respectfully submitted.

ALEX. MACOMB,

*Major General, Chief of Engineers.*

Hon. J. BARBOUR, *Secretary of War.*

19TH CONGRESS.]

No. 298.

[1ST SESSION.]

ON THE EXPEDIENCY OF CONSTRUCTING FORTIFICATIONS AT THE ENTRANCE OF PENSACOLA BAY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 23, 1826.

Mr. HAMILTON, from the Committee on Military Affairs, to whom was referred the resolution of this House "that they inquire into the expediency of constructing fortifications at the entrance of Pensacola bay, for the protection of the navy yard and naval depot established at that place," reported:

That they have given to this subject the attention which, from its importance, it obviously merits; and although they have arrived at the conclusion that, from the establishment of the naval depot and station at Pensacola for our squadron in the Gulf of Mexico and in the West India seas, this must become one of the most interesting points in our line of maritime defence, yet as some new projection of the works consequent on the establishment of the navy yard at this place is deemed expedient, (in reference to an entire and connected plan of defence,) which may render additional surveys necessary, they have forborne to recommend the passage of a law on this subject, which, by compelling the executive to proceed at once with the contemplated works, may be premature in itself and lead to injurious results.

Participating, however, in the conviction that the early attention of the government ought to be drawn to this important station, they recommend the adoption of the following resolution:

*Resolved,* That the Secretary of War be directed to have completed, as early as may be compatible with the public interests, the plans, surveys, and estimates for the defence of the navy yard and bay at Pensacola, that the necessary information may be obtained to authorize an appropriation for this purpose.

No. 299.

[1ST SESSION.]

FORTIFICATIONS FOR THE DEFENCE OF CHARLESTON, SOUTH CAROLINA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 24, 1826.

DEPARTMENT OF WAR, *January 23, 1826.*

SIR: I have the honor to transmit herewith a report from the chief engineer of this date; and I beg leave to refer to it for the information called for by a resolution of the House of Representatives, dated the 20th instant, respecting the fortifications contemplated for the defence of Charleston, in South Carolina.

I have the honor to be, sir, with perfect respect, your most obedient servant,

JAMES BARBOUR,

Hon. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

ENGINEER DEPARTMENT, *January 23, 1826.*

SIR: In pursuance of your instructions to furnish the information respecting the fortifications contemplated for the defence of Charleston, in South Carolina, which has been called for by a resolution of the House of Representatives of the United States, dated the 20th instant, I have the honor to report that the surveys and soundings, intended to afford the data upon which those fortifications may be projected, will be completed in the course of the ensuing spring; that those fortifications being considered as belonging to the first class, the projects for them will be prepared as soon as practicable after the requisite preliminary information intended to be provided by the surveys and soundings, above stated, shall have been obtained; and that it is contemplated to commence their construction in course of next year should the projects be ready by that time.

Respectfully submitted.

ALEX. MACOMB, *Major General, Chief of Engineers.*HON. J. BARBOUR, *Secretary of War.*

19TH CONGRESS.]

No. 300.

[1ST SESSION.]

STATEMENT OF THE NUMBER, NAMES, STATES, TIME OF APPOINTMENT, &c., OF THE  
CADETS AT WEST POINT MILITARY ACADEMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 24, 1826.

DEPARTMENT OF WAR, *January 23, 1826.*

SIR: I have the honor to transmit herewith a report of the chief engineer, dated the 21st instant, and accompanied by four documents marked A, B, C, and D; and I beg leave respectfully to refer to it for the information, in relation to the Military Academy, which I have been directed, by a resolution passed on the 16th instant, to furnish to the House of Representatives.

I have the honor to be, sir, with great respect, your most obedient servant,

JAMES BARBOUR.

HON. JOHN W. TAYLOR, *Speaker of the House of Representatives.*ENGINEER DEPARTMENT, *January 21, 1826.*

SIR: In obedience to your instructions to furnish the information required by the following resolution of the House of Representatives of the United States, dated the 16th instant, viz: "*Resolved*, That the Secretary of War be directed to furnish a statement showing the number of cadets at the Military Academy at West Point, their names, and the counties and States in which they respectively reside, and the dates of their several commissions; and if any appointments have been made of cadets, in anticipation of vacancies which may arise, then to report the names of the cadets so appointed, and the counties and States in which they respectively reside, the dates of the several appointments, and the time when the same were severally delivered; also, under what construction of the laws the number has been increased to 258, and what vacancies have happened for the two last years, and from what States, and whether those vacancies have been filled," I have the honor to report that the number of cadets at the Military Academy is 237, as will appear by the accompanying statement marked A; that forty-four appointments have been made in anticipation of vacancies which may arise, of which thirty-three were made previously to the 4th of March last, and eleven subsequently to that date, and that they were delivered at the dates at which they were respectively made, as will appear by the accompanying statement marked B; that the statement herewith, marked C, will show what vacancies have happened in the several States for the last two years; all of which have been filled, with the exception of one in Rhode Island and one in Illinois in 1824, and one in Rhode Island and one in Arkansas in 1825; that the construction of the laws, under which the number has been increased to 258, is that the act of April 29, 1812, authorizing 250, does not comprehend the ten authorized by the act of March 16, 1802, as will more fully appear by the opinion of the Attorney General of the United States, herewith, marked D. It may, however, be proper to remark that it has always been designed that the entire number of cadets, on the formation of the new class in June, should be 250; that, to effect this object, experience has shown that a very considerable excess beyond the actual vacancies is necessary to be selected to meet the various contingencies of failure of reporting from sickness or other causes, failure to pass the initiatory examination, and intermediate resignations between the time of appointment and the formation of the class; that, in fixing on this excess, its extent is governed by experience; but it is manifest, as the circumstances upon which it is based are of a contingent character, that, on the final formation of the class, in a series of years, the number may vary considerably. In order, however, to guard against an excess of the number authorized by law, according to the opinion of the Attorney General, the appointment of the excess is so regulated as to aim at giving 250 instead of 260, allowing ten, the difference between the two numbers, to prevent the possibility of exceeding the number authorized by law.

As connected with this point it may be proper to observe, by way of explanation of statement A, that, as will be seen by reference to that statement, although many of the States have the exact number to which they are entitled, there are three instances of excess, viz: in Vermont, Michigan, and the District of Columbia; one in each of the two first, and three in the last, and also several that have not their full complement. This naturally results from the various contingencies above referred to, viz: failure to report, failure to pass the initiatory examination, and intermediate resignations, which, as they happen, in a greater or less degree, to the several States, may leave less or more than the exact quota of each, so that it is impossible to keep the quota of each State at all times full. This inequality, however, is always provided for in making the next subsequent appointments.

Respectfully submitted.

ALEX. MACOMB, *Major General, Inspector of the Military Academy.*HON. JAMES BARBOUR, *Secretary of War.*

## D.

The opinion of the Attorney General of the United States on the construction of the laws relative to the number of cadets which may belong to the Military Academy at West Point, which opinion is extracted from an opinion on another subject in which it has been incidentally introduced.

"The 2d section provides that the Military Academy shall consist of the corps of engineers (including, of course, the ten cadets who had been originally attached to it and who formed a part of it) and certain new professors, in addition to the teachers of the French language and drawing already provided. [I will merely remark in passing, that these new professors thus attached to the corps of engineers come within the description of the 96th article of the permanent act of 1806, establishing the rules and articles of war as persons receiving pay in the service of that corps.] The 3d section of the act of 1812 provides that the cadets heretofore appointed in the service of the United States, whether of artillery, cavalry, riflemen, or infantry; [omitting in the enumeration those who had been heretofore appointed in the service of the corps of engineers;] or that may in future be appointed as hereinafter provided, shall at no time exceed two hundred and fifty; that they may be attached at the discretion of the President to the Military Academy, and be subject to the established regulations thereof; that they shall be arranged into companies," &c. The section, after going on to describe the discipline of the cadets, proceeds to direct the manner of appointment and qualifications of the cadets thereafter to be appointed.

If it were material to the decision of the question you have submitted to me, I should say that I differed with Colonel Hindman and the court-martial in the opinion that by this 3d section the cadets who had been previously constituted a part of the corps of engineers were abolished or amalgamated with the two hundred and fifty authorized by that section to be attached to the academy; for by the 2d section it is expressly declared that the Military Academy shall consist of the corps of engineers, that is, the existing corps expressly composed in part under the act of 1802, of the ten cadets who, so far from being abolished, are hereby confirmed; and when you come to examine the component parts of the two hundred and fifty new cadets who were authorized by the 3d section, you will find no part of the description which applies to the ten cadets who had been previously attached to the corps of engineers, for these ten had not been "heretofore appointed in the service of the United States, either of artillery, cavalry, riflemen, or infantry, the corps of engineers having been by the previous laws erected into a corps distinct from them all, and known by a different name; nor were those ten cadets already appointed included in the only remaining part of the description of those "who may in future be appointed in the manner hereinafter provided." Whatever might have been the intention of Congress, it is very clear to my judgment that they have, by this 3d section, authorized the President to add to the establishment two hundred and fifty cadets, exclusive of the ten who had been previously appointed under the act of 1802.

19TH CONGRESS.]

No. 301.

[1ST SESSION.]

## RELATIVE TO THE PURCHASE OF THROG'S POINT, ON LONG ISLAND, FOR A FORTIFICATION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 26, 1826.

DEPARTMENT OF WAR, *January 24, 1826.*

SIR: In obedience to the resolution of the House of Representatives of the 23d of January, 1826, directing "that the Secretary of War inform the House whether any arrangement has been made for the purchase of Throg's Point, on Long Island Sound, and if any has been made what sum will be necessary to carry the same into effect," I have the honor to submit the accompanying report of the chief engineer, who was intrusted with the negotiation for the purchase of Throg's Point, under the direction of my predecessor, for the information required by the above-mentioned resolution.

As the present moment is probably the most favorable for obtaining the lands on Throg's Point, I would respectfully recommend that an appropriation be made for fulfilling the agreement entered into for the purchase of the point, and also for the purchase of the right of way from the point to the public road, as stated in the accompanying documents furnished by the chief engineer.

I have the honor to be, sir, very respectfully, your obedient servant,

JAMES BARBOUR.

HON. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

ENGINEER DEPARTMENT, *Washington, January 24, 1826.*

SIR: In obedience to your directions, to state whether any arrangement has been made for the purchase of Throg's Point, on Long Island Sound, and if any has been made what sum will be required to carry the same into effect, as required by the resolution of the House of Representatives of yesterday, I have the honor to inform you that a conditional agreement was entered into between this department and Mr. C. H. Hammond, on the 18th of February last, by direction of the Secretary of War, for the purchase of Throg's Point, containing about fifty-two acres, for the sum of fifteen thousand dollars. Throg's Point is the site of a fort projected by the board of engineers for the defence of the city of New York. Three acres of the fifty-two have been selected for a light-house, and on finding a difficulty in procuring the site for the light-house the collector of New York made an application to the legislature of the State, on behalf of the United States, for the cession of the jurisdiction of the three acres, and for the appointment of appraisers to ascertain the value of the land and the damage which would be sustained in consequence of a light-house being placed thereon. The cession was made and the appraisers appointed, who, under oath, awarded the sum of ten thousand five hundred dollars; which, however, the government did not think proper to accept. By the agreement entered into with Mr. Hammond, the whole of the point, including the site for the light-house, was to be conveyed to the United States for the sum of fifteen thousand dollars, on the condition of Congress making the appropriation, viz: fourteen thousand dollars to be paid by the War Department, and one thousand dollars to be paid by the Treasury Department. A difficulty arose about a right of way leading to the public road, but Mr. Hammond, the present proprietor, renewed the agreement, with the addition of the right of way, under certain conditions, which were accepted. Copies of the agreement, and of the acceptance, are submitted, together with Colonel Totten's opinion of the property; also the correspondence on the subject, which has been submitted to the Committee of Finance of the Senate at the last session of Congress; but as there was not time to act upon the subject, the chairman returned the papers to the War Department. The papers referred to, and accompanying this report, are numbered from 1 to 8. In addition to these documents, a letter has been received from Mr. C. H. Hammond, dated the 5th of last month, stating his willingness to abide by the agreement referred to until the end of the present session of Congress, with the exception of that part which relates to right of way—upon which subject he recurs to the original proposition, viz: to take two thousand dollars for the right of way, as prescribed in the agreement, or to leave the amount to be paid to the award of arbitrators, to be appointed by both parties. I would recommend the acceptance of the right of way, at two thousand dollars, as offered, rather than submit it to arbitration or to leave it to future adjustment. A copy of Mr. Hammond's letter of the 5th of December is herewith transmitted, marked A.

All which is respectfully submitted.

ALEX. MACOMB, *Major General, Chief Engineer.*

JAMES BARBOUR, *Secretary of War.*

No. 1.

NEW YORK, *December 9, 1823.*

SIR: Your letter of the 2d instant, on the subject of the value of Throg's Point, is at hand. I am not in possession of any maps from which I can ascertain the quantity of land which ought to belong to the government, in the event of their erecting the work projected for Throg's Point, but my impression is, that a tract of fifty acres would have its western boundary far enough inland for all purposes. You, however, on consulting the maps in the topographical bureau, will be able to determine this matter with certainty.

As to the price demanded by Mr. Hammond, I have to observe that though it is greatly beyond the real value of the land, there is no reason to doubt, from all experience in such transactions, and especially from the appraisement made, under oath, of three acres of this point for a light-house, that Mr. Hammond is right in saying that fifteen thousand dollars "is a price much below what it will even be had for by

appraisement, or in any other way, after it has passed into other hands." Owners and appraisers always seem to act as well on the principle that it is fair to take advantage of the necessities of the general government, or on the more just ground that the damage is rather in bringing a body of soldiers, often undisciplined, into the neighborhood of the farmer, than in reducing his farm. If, in the case of a light-house being required on the ground, which could only open the way to trifling deprivations in comparison, such heavy damages were assessed by a jury, we may infer that damages at least not less heavy would be given when the ground was wanted for a military establishment. It is probable that, in treating with Mr. Hammond as to the exact limits, you may be able to obtain some reduction in the price, but I am of opinion that this tract can never be bought by the government at so reasonable a rate as under the circumstances which now induce Mr. Hammond to offer it. He cannot, indeed, obtain so much from an individual for farming purposes as he demands, but, on the other hand, he cannot sell the rest of his land advantageously if he sell this to the government. If the *whole* is bought by an individual, it will be with the determination of getting as much as possible for what the government may require. If the commencement of a work there were known to be at hand, I have no doubt Mr. Hammond's price would readily be given by moneyed men here on speculation.

I have the honor to be, very respectfully, &c.,

JOSEPH G. TOTTEN, *Major Engineers, Brevet Lieut. Col.*

Brevet Major General ALEX. MACOMB, *Colonel Commanding U. S. Engineers.*

No. 2.

ENGINEER DEPARTMENT, *Washington, December 18, 1823.*

SIR: The Secretary of War has examined your report of the 9th instant, with regard to the piece of Mr. Hammond's property at Throg's Point whereon it is contemplated to erect a fort and light-house, estimated to be worth \$15,000, and I am instructed by the Secretary of War to direct you to enter into a conditional purchase of the said property for the sum of fifteen thousand dollars, to be paid for by an appropriation from Congress this session, viz: fourteen thousand dollars by the War Department and one thousand by the Treasury Department, the purchase to be on the contingency of the appropriation. You will employ a suitable person to examine the titles and papers, and to draw the instrument conveying the land to the United States in due form. You will attend to this subject as early as possible.

I have the honor to be, &c.,

ALEX. MACOMB, *Major General, Chief of Engineers.*

Lieutenant Colonel J. G. TOTTEN, *Corps of Engineers, New York.*

No. 3.

ENGINEER DEPARTMENT, *Washington, February 21, 1825.*

SIR: A letter was filed in this office by Mr. David B. Ogden, of New York, dated the 18th of November, 1823, from A. Hammond, esq., of New York, stating that the government of the United States wanted a part of his land (Throg's Point) to erect a light-house thereon, and that on his refusing to sell it an application was made by the collector of New York, on behalf of the United States, to the legislature of the State for the cession of the jurisdiction of three acres of the point, and for the appointment of appraisers to ascertain on oath the value of the land, and the damage which he would sustain in consequence of a light-house being placed thereon; that the cession was made and appraisers appointed, who awarded \$10,500, and that the government of the United States had not thought proper to accept a conveyance of the land upon the terms of the appraisement. The three acres of land in question are part of the position which the government will require for the site of a fort projected by the board of engineers for the defence of the city of New York, and as Mr. Hammond was desirous of selling his property at the point, Mr. D. B. Ogden was authorized by him to offer the whole point, consisting of fifty-two acres and upwards, for the sum of \$15,000. Colonel Totten, of the engineers, was directed to ascertain the value of the land offered by Mr. Hammond, and to report his opinion to this department, in order that the same might be laid before you, and, if approved, the necessary appropriation asked for the purchase of the site. The report of Colonel Totten was examined by you, and I was directed to instruct Colonel Totten to make a conditional purchase of the said property for the sum of \$15,000, to be paid for out of an appropriation to be made by Congress, viz: \$14,000 to be paid by the War Department and \$1,000 by the Treasury Department, the purchase to be made upon the contingency of an appropriation, as will appear from my letter to him, dated December 18, 1823, a copy of which is submitted herewith; also a copy of Colonel Totten's report, dated the 9th of December, 1823, before alluded to. A difficulty, however, arose about a right of way leading to the public road, but Mr. Charles H. Hammond, the present proprietor, has since renewed the agreement, with the addition of a right of way, under certain conditions, which have been accepted. Copies of the agreement and acceptance thereof are submitted, together with Colonel Totten's opinion of the value of the property. I am acquainted with the position, and am clearly of opinion that the terms are reasonable, and more so than could be obtained in any way hereafter; and considering the difficulty, expense, and delay of acquiring land under appraisements, I recommend that an appropriation of \$14,000 be asked, in order that the site may be procured before the commencement of the contemplated fortifications, one thousand dollars being now in the treasury applicable to this purpose.

Respectfully submitted.

ALEX. MACOMB, *Major General, Chief of Engineers.*

## No. 4.

The owners of Throg's Point, in the county of Westchester, in the State of New York, will accept the offer made by the Secretary of War for the purchase of the said point, for the use of the government of the United States, at the sum of fifteen thousand dollars, provided the money be paid and the purchase completed on or before the first day of April next. Should the money not be paid by that time, this agreement is not to be considered as binding on the owners of said point.

The owners will also agree to sell to the United States ground for a road to the said point for the further sum of two thousand dollars; the said road to be laid over that part of the property of the present owners of the said point which is under the bank on the west side of the farm lately belonging to Abijah Hammond, esq., beginning at the most westerly dock on said farm, and running thence above high-water mark, along the margin of the sound, to the point, the land to be conveyed for said road whenever the government may please to pay the said sum of two thousand dollars; it being always understood that the owners of said land lately belonging to Abijah Hammond, esq., shall have the privilege of using said road. Dated this 18th February, 1825.

C. H. HAMMOND.

If the government is not satisfied with the *amount* named in the above agreement for the purchase, &c., of the land for a road to Throg's Point, the owners of the point are willing to leave that question subject to arbitration whenever the United States may require the road.

C. H. HAMMOND.

## No. 5.

WASHINGTON, February 18, 1825.

SIR: I agree to the alteration made in my proposition, viz: to limit the award of arbitrators as to the right of way. I wish it to be understood, however, that if Congress should not make the necessary appropriation this session, I do not consider any part of the arrangement as binding on my part.

Very respectfully, your obedient servant,

C. H. HAMMOND.

Major General MACOMB.

## No. 6.

WASHINGTON, February 18, 1825.

SIR: In relation to the subject just referred to me, namely, the contemplated purchase of Throg's Neck, I have only to remark that I have hitherto considered that the sum of \$15,000 demanded by Mr. Hammond for the tract of about fifty-two acres is not unreasonable; and I am still of the same opinion. As to the further sum of \$2,000 for a roadway along the water's edge, from the said tract to the public road at the ferry, I am not competent to express any opinion; for in such cases the proper amount depends rather on the inconveniences and damages arising to one part than the value of the accommodation to the other. It is to be remembered that the present proprietors are not willing to sell the tract of fifty-two acres for the price stated, unless they are allowed to make a bargain at the same time for the right of way; or, in other words, they will not sell at all if by doing so they are to leave any point to be mooted as to a *legal* right of way.

The proposition is now simply this: to sell the tract and also a roadway for \$17,000, two thousand dollars of this sum to be paid whenever the United States think proper to improve the privilege as to the right of way.

Since the above was written, Mr. Hammond has suggested this alternative, viz: to sell for \$15,000, leaving the price to be paid for the roadway to be determined by arbitration whenever the United States may require the road.

I have the honor to be, very respectfully, &c.,

JOS. G. TOTEN, *Major Engineers, Brevet Lieutenant Colonel.*

Bvt. Maj. Gen. ALEX. MACOMB, *Colonel Commanding United States Engineers.*

## No. 7.

ENGINEER DEPARTMENT, Washington, February 18, 1825.

SIR: I have submitted to the Secretary of War your proposition to sell Throg's Point, in the county of Westchester, in the State of New York, to the United States, for the sum of fifteen thousand dollars, as stated in your agreement of this date, with the right of way as proposed therein; and I am instructed to say that the Secretary of War accepts the offer, provided that the award of the arbitrators as to the right of way, should the government require it, should not exceed two thousand dollars. It is understood that this arrangement cannot be binding without the assent of Congress, or the money paid until an appropriation be made.

ALEX. MACOMB, *Major General, Chief of Engineers.*

C. H. HAMMOND, Esq., *Washington City.*

No. 8.

WAR DEPARTMENT, *February 21, 1825.*

SIR: I have the honor to lay before you the accompanying report of the chief engineer, stating the advantages of procuring at this time the site selected by the board of engineers for a fort, to be built on Throg's Point, on the East river, in the State of New York, for the defence of the city of New York, and recommending the purchase of the same, as will more fully appear by reference to his report, and the papers connected with it. The proprietors of the site are willing to sell to the government the quantity of land requisite for a site of a fort and light-house on terms which are thought reasonable. I submit to the consideration of the committee the propriety of their recommending at this time the appropriation of a sum necessary to enable the government to avail itself of the offer of the proprietors, viz: fourteen thousand dollars for this department, the sum of one thousand dollars, applicable to this purpose, being now at the disposal of the Treasury Department.

I have the honor to be, &c.,

J. C. CALHOUN.

Hon. SAMUEL SMITH, *Chairman of the Committee of Finance of the Senate of the United States.*

A.

NEW YORK, *December 5, 1825.*

SIR: As the agreement made on the 18th February last between the Department of War and myself, on the part of the owners of Throg's Point, for the sale thereof, was not to be binding upon us after the 1st of April ensuing, we beg to inform the department that we are willing to abide by that agreement until the end of the present session of Congress, with the exception, however, of that part of it which relates to compensation for the right of way. Upon this subject we have decided to recur to our original proposition, viz: we will either take two thousand dollars for the right of way, as prescribed in the agreement, or we will leave the amount to be paid to the award of arbitrators to be appointed by both parties.

We would remind the department that two acres (or three) of this point are already in possession of the United States, for which we have never yet received \$10,000 awarded by the appraisers appointed by an act of the legislature of the State of New York, at the application of the government of the United States. You are aware that the proposal to sell the whole point (say fifty-two acres more or less) for \$15,000 would include the \$10,000 for the two or three acres already ceded.

Very respectfully, I am your obedient servant,

C. H. HAMMOND.

Major General MACOMB, *Chief Engineer.*

[1ST SESSION.]

IN RELATION TO AN INCREASE OF THE NUMBER OF CADETS AUTHORIZED AT THE  
MILITARY ACADEMY AT WEST POINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 26, 1826.

DEPARTMENT OF WAR, *January 24, 1826.*

SIR: I have the honor to transmit herewith a report of the chief engineer, of this date, and beg leave to refer to it for the information called for by a resolution of the House of Representatives, dated yesterday, in relation to the Military Academy.

I have the honor to be, sir, very respectfully, your most obedient servant,

JAMES BARBOUR.

Hon. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

ENGINEER DEPARTMENT, *January 24, 1826.*

SIR: In obedience to your orders to furnish the information called for by a resolution of the House of Representatives of yesterday's date, requiring "that the Secretary of War be instructed to report if the corps of cadets at the Military Academy at West Point can be increased without incurring the expense of employing an additional number of professors; and if so, to what number the same may be increased," I have the honor to report that the corps of cadets may be increased to the extent of twenty, in addition to the number now authorized, with a very trifling increase of expense for compensation to the additional professors that it might be necessary to employ, as they might be detailed for that duty from the graduates of the academy; but it would be necessary to incur the expense of providing quarters for them, and also for the cadets that might be added to the corps. If the increase should exceed twenty, it would be necessary to incur the expense of employing an assistant teacher of French, in addition to the number recommended in your communication of the 10th instant to the chairman of the Committee on Military Affairs of the House of Representatives.

Respectfully submitted,

ALEXANDER MACOMB,

*Major General, Chief Engineer, Inspector of the Military Academy*

Hon. J. BARBOUR, *Secretary of War.*

19TH CONGRESS.]

No. 303.

[1ST SESSION.]

## REPORT RELATIVE TO DESERTIONS IN THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 26, 1826.

DEPARTMENT OF WAR, *January 25, 1826.*

Sir: Supplementary to the report of this department of the 17th instant, on the resolution of the House of the 27th ultimo, respecting desertions from the army of the United States, I have the honor to transmit a report from the Adjutant General in relation to the subject of the resolution, which has been made to me by him subsequently to the transmission of my report above referred to.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the *House of Representatives.*

ADJUTANT GENERAL'S OFFICE, *Washington, January 11, 1826.*

The table herewith annexed exhibits all the deaths and desertions which have occurred in the army for the three years ending on the 30th of September, 1825. According to the tenor of the resolution of the 27th of December, each post and station, as well as each regiment of infantry and artillery, is designated. That the report may be yet more full and comprehensive, similar casualties incident to the *recruits* at the several recruiting stations previous to their joining any company or regiment are also exhibited.

The *records* of the office furnish no data on which any specific cause of desertion can be predicated. They demonstrate one important fact, however, which experience and observation have long since established: that within the first *twelve months* after enlistment desertions are more numerous from any given military force than during the remaining four years of the term of enlistment. The season of probation in the army, as in most other vocations, is the one which presents the greatest trial for the soldier. That spirit of resistless inquietude which not unfrequently induces him to enlist, but too often stimulates him to desert, in its influence is more powerful than any moral restraint derived from the force of his oath to serve "honestly and faithfully" the full period of his engagement. The class from whence a majority of private soldiers are drawn scarcely regards the circumstance of desertion as an act of turpitude. Whenever, therefore, the enlisted man *deserts*, he most commonly reverts to his original society, or to associates of kindred morality, who, so far from condemning him as a faithless, perjured citizen, choose rather to unite in rejoicing in his successful escape. This erroneous appreciation of crime, superadded to the restless spirit incident to that ordeal, common almost to every recruit, probably constitutes the primary cause of desertion.

There is no good reason, then, to imagine that it can cease to operate until the system which governs the rank and file of the army be so altered by legislative authority as may reasonably be calculated to induce enlistments from a less exceptionable class, whilst at the same time a cheering hope in the prospective may serve to reconcile the recruit to his new calling until he shall have passed the season of probation; after which it scarcely need be apprehended that he will not faithfully comply with his engagement.

During the last quarter in 1824 the whole number of desertions from the 4th artillery regiment amounted to fifty-nine, of which number *forty-seven* deserted during the *first year* of the period of enlistment; during the second year *seven* deserted; the third year, *four*; the fourth year, *one*; and the fifth year, not one.

For the same quarter the whole number of desertions from the 7th infantry regiment amounted to sixty-two, of which number *forty-three* deserted the *first year* of the term of enlistment; *thirteen* the second; *three* the third; not one the fourth year; and *three* within the fifth.

For three years ending December 31, 1825, the number of desertions from "C" company, 3d artillery, (Fort Severn, Annapolis,) amounted to seventeen, of which number *nine* deserted within the *six months* immediately after their enlistment; *one* within less than one year; the residue within two years.

From the same company, at the same station, the number of soldiers who would have been entitled to "honorable discharges" from the army in 1824 amounted to six. Instead of actually leaving the service, each and all of them *re-enlisted* from one to three months previous to the expiration of the period for which they had severally engaged to serve. This evidence of predilection for and contentment in the service, *after the first season of dissatisfaction had passed away*, is in a great degree common to the rest of the army. These facts, then, are strikingly illustrative of the opinion which has been expressed as to what may "probably constitute the primary cause of desertion;" and it is believed, when the more minute analysis enjoined by the resolution of the House of Representatives shall have been completed,\* that it will strengthen and confirm all which is here.

Respectfully submitted.

R. JONES, *Adjutant General.*

\* This will be furnished as soon as the very limited force of this office and the nature of the research will permit.

[19TH CONGRESS.]

No. 304.

[1ST SESSION.]

PROPOSITION BY PENNSYLVANIA TO CEDE TO THE UNITED STATES LANDS FOR A  
SITE FOR A NATIONAL ARMORY.

COMMUNICATED TO THE SENATE FEBRUARY 6, 1826.

RESOLUTION relative to ceding to the United States certain lands, &c., necessary for the establishment of a national armory on the western waters of Pennsylvania.

Whereas by an act of Congress passed the 3d of March, 1823, for the establishment of a national armory on the western waters, commissioners were appointed to examine and report to Congress the most suitable site on said waters for said armory; and whereas it appears from the report, since made to Congress, that situations in every respect suitable for said national armory have been found on the western waters of Pennsylvania—one at the Ohio Pile falls, in Fayette county, one near the city of Pittsburg, in Alleghany county, and one near the falls of Beaver creek, in Beaver county—and as either of these places will have advantages which no other site, it is believed, can afford, and therefore highly beneficial to the State, as well as to the United States: Therefore—

*Be it resolved by the senate and house of representatives of the Commonwealth of Pennsylvania in general assembly met,* That should the United States of America select either of the above-mentioned situations, or any other within this Commonwealth, for the erection of a national armory, the lands, places, streams, and highways belonging to the State, or such lands as the United States may purchase from any individual or individuals, which may be required for the use of such national armory, and the buildings necessary to be connected with it, be, and the same are hereby, ceded to and vested in the said United States so long as they shall deem it expedient to occupy the said ceded lands, places, streams, and highways for the use of the national armory, and no longer: *Provided,* That nothing herein contained shall extend, or be construed to extend, so as to impede or prevent the execution of any process, civil or criminal, under the authorities of this State.

*Resolved,* That the governor of this Commonwealth be requested to transmit a copy of these resolutions to the President of the United States, and a copy to each of the senators and representatives from Pennsylvania in the Congress of the United States.

JOSEPH RITNER, *Speaker of the House of Representatives.*  
ALEXANDER MAHON, *Speaker of the Senate.*

Approved the twenty-fifth day of January, one thousand eight hundred and twenty-six.

J. ANDW. SHULZE.

[19TH CONGRESS.]

No. 305.

[1ST SESSION.]

IN FAVOR OF A MILITARY ROAD FROM CANTONMENT GIBSON TO NATCHITOCHEs, IN  
LOUISIANA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1826.

Mr. HAMILTON, from the Committee on Military Affairs, to whom was referred a resolution of this House instructing them to inquire into the expediency of surveying and making a road from Cantonment Gibson, in the Territory of Arkansas, to Natchitoches, in the State of Louisiana, reported:

That they have had the same under consideration, and are induced to believe that there are very strong and sufficient reasons to justify the policy, if not necessity, of the contemplated road, by which additional security will be given to that frontier and an enhanced value to the public lands.

For the statements exhibiting these reasons, they beg leave to refer to a report, (hereto annexed,) transmitted to them by the Department of War, from the Quartermaster General, in conformity with which they report a bill.

QUARTERMASTER GENERAL'S OFFICE, *Washington, January 20, 1826.*

SIR: In obedience to your order requiring a report in relation to the necessity of a road from Natchitoches to Fort Towson, and thence to Fort Gibson, I have the honor to remark, that whether these posts be considered as a part of the line of defence of the western frontier, or merely intended for the protection of the remote settlements of Louisiana and Arkansas, policy would seem to require that all reasonable means be adopted to increase their efficiency. They are surrounded by numerous tribes of Indians, and, isolated as they now are, each, in the event of attack, must rely on its own resources. There are no routes by which troops could march from one to the other, nor any communications (except by water) through which supplies or reinforcements could reach them from the interior. It is desirable, both in regard to convenience and economy, that troops and public stores be transported by water whenever practicable; but Red river, particularly, is not navigable more than five months in twelve. The distance by water from Natchitoches to Cantonment Towson is upwards of six hundred miles, and at least fifty days are required to make the voyage. If the supplies for that post should fall into the hands of an enemy, or be lost by any other casualty, late in the season, there would be no means of replacing them; and, how injurious soever it might be to the public interests, the troops would be compelled to abandon the post and fall

back to the settlements. It is, then, only by roads affording communication between those posts and with the interior that they can be made, with any degree of certainty, to answer the end for which they were established. Congress at its last session authorized a road from Little Rock to Fort Gibson. A road to Fort Towson is even more necessary, because it is not only on an Indian frontier, but on that of a foreign nation, of which Red river, the only water communication, forms the boundary.

The distance by land from Natchitoches to Fort Towson is about three hundred miles, and if a road were opened, it might be travelled in eight or ten days; that from the nearest settlements from which supplies might be drawn, should necessarily require it, in four or five. As it regards every military consideration, it is only necessary, in constructing a road to Fort Towson, and thence to Fort Gibson, that the timber be removed, the watercourses bridged, and that causeways be made through swampy and marshy ground.

I have no data on which an accurate estimate of the expenses could be made; but judging from the cost of similar roads heretofore constructed, I should consider an appropriation of fifteen thousand dollars amply sufficient.

Annexed is a map of the country through which the road, if authorized, must pass.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

Hon. JAMES BARBOUR, *Secretary of War, Washington City.*

19TH CONGRESS.]

No. 306.

[1ST SESSION.]

APPLICATION OF ALABAMA THAT THE MILITARY WORKS AT DAUPHIN ISLAND MAY BE PROSECUTED, AND THAT AN ARSENAL BE ERECTED IN THAT STATE.

COMMUNICATED TO THE SENATE FEBRUARY 8, 1826.

A JOINT RESOLUTION memorializing Congress in relation to certain public works therein named.

Whereas it is highly important to the interests of this State that the assailable points on our seaboard should be placed in a proper state of defence to resist the aggressions of an invading foe, and believing that this object can be best effected in time of peace; and whereas considerable expense has been already incurred by the government of the United States in the commencement of a public work on Dauphin island, at the mouth of Mobile bay, the completion of which, whilst it would add much to the protection of the bay and city of Mobile, would be also an important link in the chain of defence for the seaboard at large—

*Be it resolved by the senate and house of representatives of the State of Alabama in general assembly convened,* That our senators in Congress be instructed, and our representatives requested, to use their best efforts to obtain an appropriation for prosecuting the work at Dauphin island.

And whereas, also, much inconvenience and delay would, in the event of hostilities, attend the present mode by which this State is furnished with munitions of war, in consequence of the circuitous route by which they are transported, and believing there are many points on the Tennessee river, within the limits of this State, eminently calculated for the establishment of a public arsenal and armory, and from which our wants in time of war would be more readily supplied than by the present mode—

*Be it further resolved,* That our senators and representatives aforesaid be requested to use their exertions to obtain an appropriation for the erection and establishment of an arsenal and armory on some point of the Tennessee river within the limits of this State.

*Be it resolved,* That his excellency the governor be requested to cause to be sent to each of our senators and representatives in Congress one copy of the above resolutions.

WM. KELLY, *Speaker of the House of Representatives.*  
NICH. DAVIS, *President of the Senate.*

Approved January 7, 1826.

JOHN MURPHY.

SECRETARY'S OFFICE, Cahaba, January 16, 1826.

I certify the foregoing to be a correct copy of the original roll deposited in my office.

[L. s.]

JAMES J. THORNTON, *Secretary of State.*

19TH CONGRESS.]

No. 307.

[1ST SESSION.]

ON THE APPLICATION OF CERTAIN CAPTAINS OF THE ARMY FOR AN INCREASE OF COMPENSATION.

COMMUNICATED TO THE SENATE FEBRUARY 9, 1826.

Mr. HARRISON, from the Committee on Military Affairs, to whom were referred the memorials of certain captains in the army of the United States, praying for an increase of their compensation, reported:

That upon an attentive examination of the subject referred to them, they are decidedly of opinion that the petitioners are entitled to relief. The reasons in support of this opinion cannot be more clearly stated than in the following extract from one of the memorials:

*"To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:*

"Your memorialists believe themselves warranted in saying that few grades in the army are more important to its discipline and welfare than theirs. The captains have the immediate command of the soldiers and have a direct influence over all their movements and conduct. The execution of all orders relating to the soldiers depends much upon the ability and promptitude of the captains.

"Excepting disbursing officers, there are no officers in the army, it is believed, who are burdened with such pecuniary responsibilities as the captains, for they are held accountable for all the arms, clothing, and other public property appertaining to a company. In every other instance such accountability is counterbalanced by some extra pay.

"It is an established principle in common transactions, and is doubtless so in legislation, that recompense shall be commensurate with service. Your memorialists believe that the full benefit of this principle has not been extended to them. While their duties, and particularly their responsibilities, have been gradually increased by various military regulations and legislative acts, and while these regulations and acts have conferred additional emoluments and privileges upon other grades, particularly upon the subaltern grades, the grade of your memorialists has not only derived no advantages from them, but has been deprived of many which it before enjoyed. During the late war and previously, almost every staff appointment was open to captains as well as to officers of other grades; but at this time they are excluded from every staff appointment taken from the line, (according to law,) excepting one. Your memorialists believe that such a practice prevails in no other service, and that it operates unfairly and sometimes injuriously in ours.

"Your memorialists are aware that the rules of other services are no guide for us; still they deem it not impertinent to the present case to quote the relative value of a captain's and a lieutenant's commission in Britain and in France, whence we have derived our best military regulations and most of our instruction in tactics. A captain's commission in a British regiment of cavalry is rated at £2,950, while a first lieutenant's in the same regiment is rated at £1,500. About the same disparity exists in this respect throughout the British service. In the French service a captain's monthly pay is more than seventy-five per centum greater than that of a first lieutenant's.

"Some of your memorialists have been in the army for nearly twenty years, and all of them served through the late war. Promotion is so slow during a time of peace that few of them, even if they spend their lives in the service, can anticipate reaching a higher grade. The allowances they receive are believed to be precisely the same which have been accorded to their grade from the revolution down to the present time; while every article of supply which they are obliged to purchase, whether of food, raiment, or military equipment has been almost constantly augmenting in value.

"B. K. PIERCE, *Captain 4th Artillery.*

"M. P. LOMAX, *Brevet Major 3d Artillery.*

"M. MASON, *Captain 1st Artillery.*

"R. A. ZANTZINGER, *Captain 2d Artillery.*

"JOHN MOUNTFORT, *Captain 2d Artillery.*

[19TH CONGRESS.]

No. 308.

[1ST SESSION.]

ON THE CLAIM OF CAPTAIN JAMES BIGGER'S COMPANY OF RANGERS FOR COMPENSATION FOR THEIR SERVICES.

COMMUNICATED TO THE SENATE FEBRUARY 9, 1826.

Mr. HARRISON, from the Committee on Military Affairs, to whom were referred the petition and accompanying documents of a company of rangers, commanded by Captain James Bigger in the years 1813 and 1814, reported:

That it appears from the documents accompanying said petition that the services of the petitioners were accepted by the President in the month of April, 1813, as mounted rangers for one year; that on the 29th of May next ensuing they were mustered into the service of the United States; that until the 20th March, 1814, they were engaged in an active, perilous, and fatiguing service on the frontiers of Indiana, Illinois, and Missouri, having in that time performed a campaign to the Mississinaway towns on White river, accompanied General Howard up the Mississippi, and, returning through Illinois, aided in the building of Fort Clark; that during this tour, for want of forage, many of them lost their horses, and were subjected to the expense of purchasing others; that on their return from the expedition they were placed in the stations around the frontiers of Indiana, which they had previously occupied for the protection of the inhabitants, where they remained until some time in the beginning of March, 1814, when they were ordered to Vincennes by Colonel Russell, in pursuance of an order from the general commanding the district, to be dismounted and discharged. It appears that the order for dismounting was to take effect from the 28th day of February, but that the letter calling Bigger's company to Vincennes was not written until some days after; that another order from Colonel Russell directed them to be mustered on the 13th of March, but that this order was not carried into effect until the 20th of that month. In the body of the muster-roll they are designated as "mounted rangers" to the 28th of February, and as "dismounted rangers" to the 13th of March. They were then ordered to return to their homes, where they remained until the month of April, when they were again called into the service by Colonel Russell, acting under an order from Brigadier General Howard. It appears that under this order the company was mustered and entered into actual service on the 16th of May, and that they have been paid to the latter end of that

month, which completed the period of one year, for which they were engaged. The petitioners ask to be paid twenty-five cents per day from the 28th of February to the 13th of March, 1814, being the difference between the compensation of a mounted and a dismounted ranger, and the full pay from the last-mentioned day until the 16th of May following, when they again entered into actual service, alleging that they did not consider themselves as legally discharged. To sustain this ground, the affidavits of the captain and other respectable individuals of the company are produced, showing that they still considered themselves as in the service after their return home from Vincennes. The original letter from Colonel Russell to Captain Bigger of the 28th of April, calling the company again into service, is also produced. The caption of the muster-roll made in pursuance of this order runs thus: "From the 13th of March, when last mustered, until the 1st of June, 1814, and dismissed from the 13th of March until the 15th of May by order of Colonel Russell." After an examination of the facts as above stated, the committee were unanimously of opinion that injustice had been done to the petitioners in not allowing their full pay from the 28th of February to the 13th of March, as they were for that period actually at their stations upon the frontiers as mounted rangers. They think it also equally clear that they should receive their full pay to the 20th of March, the day upon which they were mustered, and for four days thereafter, the time which it would require them to reach the rendezvous where they were first mustered. This allowance is believed to be both just and in accordance with the practice of the service.

There is somewhat more difficulty in determining upon the pay claimed from the 24th March to the 16th of May. In the letter of Colonel Russell to Captain Bigger, ordering the company to Vincennes to be mustered, he says that they are to be dismounted from the 28th of February and "discharged." By an indorsement upon the back of the muster-roll they are said to be "discharged." But they are not mustered as discharged and no order to that effect appears to have been issued. The indorsement may have been put upon the roll without authority. The law under which the rangers were brought into service was passed the 2d of January, 1812. It directs that they shall be engaged for "one year, unless sooner discharged." If Bigger's company were discharged at the time when it was mustered and sent home from Vincennes, they have no further claim upon the public from the 24th March to the 15th May; the evidence in favor of this opinion is to be found, as above stated, in the letter of Colonel Russell of the 14th March, 1814, and in the indorsement of the muster-roll made on the 20th of that month. But it appears from the letter of the colonel of the 28th of April, ordering the company again into service, that he considered it as still subject to his orders, which could not have been the case if they had been discharged. In a letter of the same officer of the 27th January, 1823, he terms the temporary absence of the company from duty a "furlough, holding themselves in readiness to be called on again," and giving his decided opinion that they should be paid. Upon the whole, the committee are of opinion that the law under which the petitioners were brought into the service of the United States did not authorize any temporary dismissal which would suspend their pay as dismounted rangers; they have therefore reported a bill for their relief.

Forasmuch as the company of rangers which I, the undersigned, had the honor to command in the years 1813 and 1814, and whose services were accepted by the President of the United States in April, 1813, and, agreeably, mustered into service on the 29th of May and the 1st of June of the same year; and whereas their petition has been granted by the House of Representatives, and postponed in the Senate, merely for the purpose of obtaining my certificate thereon, in order to satisfy the honorable the Senate, and all others whom it may concern, I do hereby certify that the said company was mustered into the service of the United States on the 29th of May and 1st of June, 1813, at Charlestown, Indiana, and sent to their several stations on the frontier by the order of Governor Posey, and ordered to report to Colonel Russell, which was done. They continued on their respective stations until he, the said colonel, called the whole company to go with him to the Mississinaway, which the greater part did; when we returned the colonel ordered them again to their several stations, where they remained until the latter end of August, when the colonel ordered the company on to the Illinois, which was done, and they performed a severe campaign, and lost a number of their horses; when they returned they resumed their stations, and continued until the month of March, when I received a letter from Colonel Russell, dated the 4th of March, ordering the company on to Vincennes, which I was ordered to make out my rolls up to the 13th of March, where I did, although we were not mustered until the 20th of the same month, and we only received pay up to the 13th of March; and if the pay-rolls show anything else they are not agreeable to the muster-rolls; and, moreover, the company was paid only seventy-five cents per day for the thirteen days of March, although they actually had their horses in the service the whole time. And I do further certify that it was my opinion that we were not legally discharged, as we received no other discharge but the letter ordering us on to Vincennes, and seeing an order from General Harrison in the public papers, ordering all officers in the service to report themselves to the commanding officer of the district to which they belonged, which I did; and shortly after, about the last of April, I received an order from Colonel Russell, ordering me and my company into service, such as their time had not expired, which order was obeyed, with a few exceptions, as soon as the nature of the case would admit, and served out the balance of the time and more, as we were not mustered out of service until the 2d day of June, 1814, at Jeffersonville, by Captain Taylor, by the order of Colonel Russell.

As witness my hand this 11th day of December, 1818.

JAMES BIGGER.

STATE OF INDIANA, *Monroe County*, December 11, 1818, ss:

This day James Bigger personally came before me, Lewis Noel, one of the associates judges for said county, and made oath that the above was a correct statement to the best of his knowledge.

Given under my hand this day and date above written.

LEWIS NOEL, A. J. M. C.

STATE OF INDIANA, *Monroe County*, ss:

I, William Lowe, clerk of the circuit court of said county, do certify that Lewis Noel, before whom the above statement appears to have been sworn to, was, at the time of taking said deposition, and still is an acting associate judge of the circuit court of said county, duly qualified and commissioned according to law; and that due faith and credit ought to be given to all his official transactions as such.

WILLIAM LOWE, C. C. M. C.

In order to satisfy the honorable the Senate and House of Representatives of the United States in Congress assembled, or any of their honorable committees to whom the memorial of Captain Bigger's company of rangers may be referred, we, your memorialists, have thought it necessary to accompany the said memorial with the following attestation, to wit :

In the month of March, 1814, the company of mounted rangers commanded by Captain Bigger, of the Territory of Indiana, was on their respective stations on the frontiers, with their horses and their necessary equipage, when they were advertised, by an order from Colonel Russell, to repair immediately to Vincennes, which order was obeyed as soon as the company could be collected. On the twentieth of the said month the company was mustered and paid up to the 13th, with the deduction of twenty-five cents for the thirteen days of March; they were ordered to their respective homes on the 20th. In the month of April they were again ordered into service by Colonel Russell, to resume their duty on the frontiers; which order was also obeyed, and they remained at their stations until they were ordered to go to Jeffersonville, there to be mustered out of service by Major Taylor, to which the company attended on the 1st of June, but was not mustered out until the next day, being the 2d of June, 1814.

JOHN CARR.  
JNO. GIBSON.

STATE OF INDIANA, *Clark county, to wit :*

This day the undersigned of the within, John Carr, acting first lieutenant under the within named Captain Bigger, and John Gibson, a private under the same, and made oath that the within statement was true, before me, the undersigned, one of the justices of the peace in and for the county aforesaid. Witness my hand and seal this tenth day of January, 1818.

L. FORD, *J. P.*

STATE OF INDIANA, ss :

I, Isaac Shelby, clerk of the circuit court of Clark county, in the State aforesaid, do certify that Lemuel Ford, esquire, before whom the within probate of John Carr and John Gibson appears to have been made, and whose certificate thereof appears above written, is, and was at the time of receiving the same, an acting justice of the peace in and for said county of Clark, duly elected, commissioned, and qualified, and that full faith and credit are due to all his official acts, as well in courts of justice as thereout.

In testimony whereof, I have hereto subscribed my name and affixed the seal of our said court this tenth day of January, 1818.

I. SHELBY, *Clerk.*

VINCENNES, *March 4, 1814.*

SIR: Agreeable to orders I have recently received from General Harrison, all the rangers in Indiana are dismounted on the last day of February, 1814, and your whole company, together with Captain Bigger's, is disbanded, to take effect from this date.

It will be necessary for your whole company to proceed as soon as possible to be mustered out of service, and to receive such pay as the paymaster may have on hand for them.

I am, very respectfully, your obedient servant,

J. A. RUSSELL, *Colonel 7th, and District Commandant.*

Lieutenant RESTINE, *United States Rangers.*

N. B.—I have written to you so that you may forward on these letters to Dunn and Bigger as soon as possible by one of your men, so that arrangements can be made by yourself and the captain to have them on to this place as early as possible. You will also give the necessary instructions to have Captain Bigger's letter forwarded to him without delay.

I am, yours, &c.,

J. A. R.

VINCENNES, *March 14, 1814.*

SIR: Agreeable to orders I have recently received from General Harrison, the rangers in Indiana are all dismounted on the last day of February, 1814, and your company, together with Captain Dunn's, is to be discharged, to take effect from this date. It will be necessary for both companies to proceed to this place as soon as possible to be mustered out of service, and to receive such pay as the paymaster may have on hand for them.

I am, very respectfully, &c.,

J. A. RUSSELL, *Colonel 7th, and District Commandant.*

Captain JAMES BIGGER, *United States Rangers.*

VINCENNES, *April 28, 1814.*

SIR: In obedience to orders I have recently received, you will without delay proceed to order any of your men into service whose times have not expired, and the balance of the company you will proceed to recruit, until you complete your company, agreeable to the law of Congress for that purpose. Your company will all be mounted, equipped with a suitable horse, gun, and tomahawk. It is expected that none will be selected but such as are capable of performing this duty; and as soon as you have completed your company you will notify me, and I will have an officer of the army ready to have them inspected and mustered into service, and immediately placed on duty.

In haste, I have the honor to be your obedient servant,

J. A. RUSSELL, *Colonel 7th, and District Commandant.*

Captain JAMES BIGGER, *United States Rangers.*

VINCENNES, *May 20, 1814.*

SIR: Your letter of the 15th has been received, and I hasten to answer it. Major Taylor will proceed to Jeffersonville, and will be able to meet you by the 1st of June, and muster those men out of service whose times have expired, and at the same time muster as many into service as will complete your company, agreeable to the present establishment. Those of your company whose times have not as yet expired can be discharged, and at the same time re-enlisted.

I have nothing here new or interesting—no Indian signs on our frontier since those at Fort Harrison.

I am, very respectfully, your obedient servant,

J. A. RUSSELL, *Colonel 7th, and District Commandant.*

Captain JAMES BIGGER, *United States Rangers.*

MOUNT BRILLIANT, *February 3, 1816.*

DEAR SIR: Your letter of the 17th December has been received, but my indisposition has hitherto prevented me from answering it. In obedience to an order received from General Harrison, I was directed to disband a part of the rangers then in service, and afterwards directed by General Howard, to the best of my recollection, to call said company into actual service again; but, sir, the dates as respects their going out of service and being called into it again have quite slipped my memory, not having those orders by me at the present, all being left at Vincennes. I should suppose the shortest course, at the present, would be to call on Captain Bigger for his order from me, which would probably be satisfactory to the committee.

I have the honor to be your obedient servant,

J. A. RUSSELL.

Hon. JONATHAN JENNINGS, *Washington City.*

MOUNT BRILLIANT, KY., *January 27, 1823.*

SIR: Your letter of the 7th has been received a few days ago, and now I hasten to answer it. I have looked for the order from General Harrison for ordering Captain Bigger's company on furlough, but am not able to find it; however, it is notorious in Indiana that there was such an order. The men returned to their homes and remained some time, holding themselves in readiness to be called on again. They were called on by a second order, and obeyed the call, and went into service and served out their time. The propriety of the order is not for me to say, but I am clear of the opinion that the said company is entitled to their pay if they have not received it. On this subject you can receive information from Captain Whitlock's muster-roll, as I have no documents by me that will give me any information on those subjects, and would advise you to write the captain immediately, and he will be able to inform you the time the company were at home on furlough, and also say whether or not the men have been paid for that term.

In haste, I have the honor to be your obedient servant,

J. A. RUSSELL.

Hon. JONATHAN JENNINGS, *Washington City.*

19TH CONGRESS.]

No. 309.

[1ST SESSION.]

RELATIVE TO AN APPLICATION FOR THE ESTABLISHMENT OF A NATIONAL FOUNDRY  
AT THE OHIOPILE FALLS OF THE YOUGHIOGENY RIVER, IN PENNSYLVANIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 13, 1826.

DEPARTMENT OF WAR, *February 11, 1826.*

SIR: Pursuant to a resolution of the House of Representatives of the 9th instant, directing the Secretary of War "to communicate to this House any information in his department in addition to that contained in the report of the engineers relative to the establishment of a national armory on the western waters, at the Ohio pile falls of the Youghiogony river," I have the honor to transmit herewith a report of the Colonel of Ordnance, with accompanying documents, which affords the information required.

I have the honor to be, yours, &c.,

JAMES BARBOUR.

The SPEAKER of the House of Representatives.

ORDNANCE DEPARTMENT, *Washington, February 10, 1826.*

SIR: In compliance with the resolution of the House of Representatives of the 9th instant, which you have referred to this department, I have the honor to transmit herewith the proceedings of a meeting of the citizens of Connellsville, held on the 31st ultimo, together with a memorial prepared by a committee appointed at that meeting, which contains all the information upon the subject referred to which is in the possession of this department.

I have the honor to be, respectfully, sir, your obedient servant,

GEO. BOMFORD, *Brevet Colonel on Ordnance Service.*

Hon. J. BARBOUR, *Secretary of War.*

At a large and respectable meeting of the citizens of Connellsville and vicinity, held at Mr. Joseph Barnett's inn, on Tuesday evening, January 31, 1826, relative to the establishment of an armory on the western waters, Mr. A. Johnston was called to the chair, and A. Dempsey and S. Trevor appointed secretaries.

On motion, the following preamble and resolution were *unanimously* adopted:

Whereas, by an act of the Congress of the United States, passed on the 3d of March, 1823, entitled "An act to establish a national armory on the western waters," under which act Colonels McRee and Lee and Major Talcott were appointed commissioners to execute the provisions of said act, who made a report thereon to Congress at the session of 1824-'25; and whereas in said report it is set forth that, "in reference to the security of the works that might be erected on it, the perfect command of its water power, and the cheapness with which it may be employed," the site at the Ohio pile falls, on the Youghiogeny river, surpasses any that were examined, "to which advantages are opposed its geographical position and want of convenient communication;" and whereas it is highly probable that these objections will, at some day not far future, be obviated by the construction of a canal to unite the Potomac and Ohio rivers, "passing down the valley of the Youghiogeny:" Therefore—

*Resolved*, That Wm. Davidson, D. Cummings, A. Baldwin, D. Rogers, and H. Gebhart be a committee to draw up and present a memorial to the Secretary of War relative to this site, and to confer with the member of Congress from this district.

*Resolved*, That a copy of the proceedings be forwarded immediately to the Hon. A. Stewart, our member of Congress.

ALEXANDER JOHNSTON, *Chairman*.

SAMUEL TREVOR,  
ANDREW DEMPSEY,  
*Secretaries*.

*To the Hon. James Barbour, Secretary of War:*

SIR: The undersigned, a committee appointed by the citizens of Connellsville, in the State of Pennsylvania, to address you on the subject of a national armory on the western waters, beg leave to state, respecting the site at Ohio pile falls, as follows, viz:

And first, the comparative statements made in the report of the commissioners, and now before Congress, have some material matters undetermined which particularly relate to the expense of subsistence, fuel, and transportation, on which subjects we take much pleasure in being able, from our relative situation and personal knowledge in these matters, to say, as respects the first, that beef and pork of the best quality are grown and fed in large quantities in the immediate vicinity of the Ohio pile falls, in Fayette and Somerset counties, and are sold for \$2 50 per cwt., and driven thence to the markets of Pittsburg, Philadelphia, or Baltimore; and flour and breadstuffs are grown in abundance in the adjacent neighborhoods, and may be had delivered on the spot at this time at not more than \$2 75 per barrel, and probably at a less sum. And with regard to poultry of all kinds, butter, potatoes, and every vegetable diet, it is admitted that no place within this State, or any other adjacent thereto, affords so plentiful a supply or so cheap.

On the second point, to wit, *fuel*, we can state that we have for some time past made diligent inquiry, which, together with our personal knowledge of the surrounding country in its soil, timber, pit coal, and other resources, enables us confidently to assert that timber of the best of every kind is even superabundant and inexhaustible. Wood is sold by the inhabitants to the iron masters on the ground at thirty cents per cord, and charcoal may be bought, delivered at the site of the armory, at even less than \$2 per hundred bushels. Pit coal of the best quality is found in the neighborhood. The inhabitants have lately opened at various places from five to one mile from the falls, and have discovered strata of coal from two and a half to five feet deep, and one bank is known to be within a mile of the site, which in its strata exceeds four and a half feet in thickness. And it may not be improper to remark that the neighboring blacksmiths can effectually use the coal of this part of the country for every necessary purpose without the usual process of charring or coking; and although we do not at this time know the fact, yet we are credibly informed that there is the best of coal on the tracts of land that it would be necessary to purchase, and we do know that, from its vicinity, it could not cost more than from two to three cents per bushel.

The third object of our duty is some inquiry into the price of transportation, and this will depend in some measure on the construction of the Chesapeake and Ohio canal. But, independent of that event, we are enabled to say that a principal material for the manufacture of arms, to wit, *refined iron*, is made in great abundance in the neighboring county, and the cost of transporting by land from the best iron manufactories on the Juniata may be truly estimated (from the shorter distance of transport) at from three to five dollars per ton less than to Pittsburg. There are many more important matters that might be adverted to in favor of the establishment at this site, one or two of which we think it advisable to mention, and to which our attention has been drawn by that part of the report, found in page 50, which mentions the possible necessity of extending the work to the number of 24,000 stand of arms, or more, per annum, which, from the growing state of our common country, may be fairly relied on. And although this position is mentioned as going to the utter rejection of the water power on Beaver, yet it will be most readily admitted, from the extent of the fall at Ohio pile and the abundance of water, that no such event could be apprehended here. Also building stone are in great abundance, and of a superior quality. Grindstone quarries of the mill grit, such as are commonly used in the first process of grinding iron, are also abundant; and every other kind of stone for polishing purposes may be had on or near the spot.

The health of this country is even proverbial. Intermittents and other epidemic complaints are unknown here; and although this part of the country has been but "sparsely" inhabited, yet much increase of inhabitants has lately taken place, and every future prospect of its continuance to a dense population.

All which is most respectfully submitted by the committee.

DAVID CUMMINGS.  
ABRAHAM BALDWIN.  
H. GEBHART.  
DANIEL ROGERS.

19TH CONGRESS.]

No. 310.

[1ST SESSION.]

## VACCINATION IN THE ARMY OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 14, 1826.

DEPARTMENT OF WAR, *February 11, 1826.*

SIR: In compliance with a resolution of the House of Representatives of the 10th instant, directing the Secretary of War to inform the House "whether any, and, if any, what, regulations have been adopted by that department for the encouragement of vaccination in the army of the United States," I have the honor to transmit a report of the Surgeon General, which furnishes the information required.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the House of Representatives.

SURGEON GENERAL'S OFFICE, *February 11, 1826.*

SIR: In compliance with your order to report "what regulations have been adopted for the encouragement of vaccination in the army of the United States," I have the honor to state that, by the 1268th paragraph of the Army Regulations, "whenever a recruit arrives at a post, garrison, station, or depot, to which a surgeon is attached, or joins the regiment or corps to which he belongs, the surgeon is required forthwith to ascertain whether he has had the variolous or vaccine infection, and if he has not, to see that he be vaccinated as soon as practicable; and for this purpose he shall constantly keep good matter on hand, making application to the Surgeon General for a fresh supply as often as may be necessary." Conformably to this regulation, the troops have been vaccinated by the surgeons, and vaccine matter has been furnished on their requisitions since the establishment of the regulation in 1818, from which period to the present but two deaths from smallpox have been reported, although the disease has appeared in the vicinity of several of the military posts. One of these occurred at the Sault de Ste. Marie, where, however, the surgeon has complied with the above regulation, and the other at Fort Mifflin, which was made a depot for the recruits from Philadelphia.

Very respectfully, your obedient servant,

JOS. LOVELL, *Surgeon General.*

HON. JAMES BARBOUR, *Secretary of War.*

[1ST SESSION.]

## ANNUAL RETURNS OF THE MILITIA OF THE UNITED STATES FOR 1825.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 15, 1826.

DEPARTMENT OF WAR, *February 14, 1826.*

SIR: Pursuant to the provisions of the act of March 2, 1803, entitled "An act in addition to an act entitled 'An act more effectually to provide for the national defence by establishing an uniform militia throughout the United States,'" I transmit herewith an abstract of the general annual returns of the militia of the United States, and of their arms, accoutrements, and ammunition, by States and Territories, prepared from the latest returns received at this office.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the House of Representatives.

ADJUTANT GENERAL'S OFFICE, *Washington, February 10, 1826.*

SIR: I have the pleasure to present the general return of the militia of the United States, and of arms, ammunition, and accoutrements, enjoined by the act of March 2, 1803. These returns are as complete as the data furnished by the States and Territories will permit. It will be seen, on examination, that several years have elapsed since any return has been rendered by several of the States; and those from Maine and Missouri, and a moiety of the District of Columbia, for the last year, although now on file, were not received in time to be incorporated with the "abstract" now submitted.

I would respectfully suggest the expediency of again establishing an uniform system in the return designed to exhibit the strength of the militia, which, if recommended to the governors of States and Territories, would probably be adopted by the adjutant general of each. Several of these returns are now alike, but a majority are not. A similitude in all would be beneficial to the general interest of the service, and greatly facilitate the construction of the general returns required by Congress, and which are consolidated in this office.

I am, sir, with great respect, your obedient servant,

R. JONES, *Adjutant General.*

The SECRETARY OF WAR.

Abstract of the general annual returns of the militia of the United States, by States and Territories, according to the act of March 2, 1803, taken from the latest returns received at this office.

19TH CONGRESS.]

No. 312.

[1ST SESSION.]

## RELATIVE TO THE UNHEALTHINESS OF THE ARSENAL AT AUGUSTA, IN GEORGIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 17, 1826.

*To the Senate and House of Representatives of the United States:*

I transmit herewith to both houses of Congress a letter from the Secretary of War, with a report from the Ordnance department, relating to the site of the arsenal of the United States at Augusta, in Georgia, and with regard to which the interposition of the legislative authority is submitted to your consideration as desirable.

JOHN QUINCY ADAMS.

WASHINGTON, *February 17, 1826.*DEPARTMENT OF WAR, *February 10, 1826.*

SIR: The unhealthiness of the site of the United States arsenal at Augusta, and the sacrifice of human life which has already occurred there, and which it is but too probable will continue, should it be occupied and guarded, imposes on me the duty of submitting the subject to your consideration. To aid you in your inquiries as to the proper course to be pursued, I caused the head of the Ordnance department to prepare a report on this subject, which is herewith enclosed. A depot of military stores convenient to the present establishment is desirable. A change of position to a healthy situation is demanded by a just regard to the health of the troops. From the report it appears that the country furnishes eligible sites for such an establishment in the neighborhood. The means of effecting this change are not within the control of this department. They can be obtained only by the sanction of Congress, to whom I submit the propriety of the subject being communicated.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The PRESIDENT of the *United States.*ORDNANCE DEPARTMENT, *Washington, February 14, 1826.*

SIR: In compliance with your suggestion, I have the honor to submit the following statement respecting the establishment of the arsenal near Augusta, Georgia, and of the unhealthiness of that position.

The site was selected and purchased in 1816. The buildings were commenced in May, 1818. The workmen continued healthy throughout that year.

In 1819 the place proved to be very unhealthy. The sickness commenced early in July, and continued until late in November, and nineteen of the workmen fell victims to it.

This great mortality attracted the attention of Congress, and occasioned doubts as to the propriety of appropriating funds for completing the works. The following extracts show the views entertained of this subject at that period:

*From General S. Smith to the Secretary of War, January 21, 1820.*

"The Committee of Ways and Means have been informed by two members from Georgia that the arsenal at Augusta has been placed on a site uncommonly sickly, so much so as to be destructive to the health of those who may be employed to guard it; of course, that the money expended on that arsenal has been injudiciously applied. Presuming the fact, the committee wish to know whether any further sum of money ought to be applied to that object, especially a sum so large as \$45,000."

To the above the following answer was given on the 25th of January by Colonel Wadsworth, who, at that time, was in charge of this department:

"In answer to General Smith's communication of the 21st current, I beg leave to state that the position chosen for the arsenal near Augusta is at present unhealthy, beyond a doubt. A tract of flat ground in the vicinity, covered with stagnant water the greater part of the year, is imagined to be the cause of the insalubrity of the spot. If the information I have received may be relied on, the meadow or swamp alluded to may be drained with great facility at an inconsiderable expense. At any rate so much progress has been made in the work that a change of position now is not to be thought of."

The result of this inquiry was that the House of Representatives refused, at first, to make any further appropriation for the arsenal at Augusta. The item which had been inserted in the bill for that purpose was stricken out. It was, however, differently determined ultimately; \$2,000 was appropriated for draining the low ground, and \$25,000 for completing the works. It is presumed that this appropriation was made under the expectation that draining the ground would correct the insalubrity of the place.

A more particular account of the place and the causes of the mortality which prevailed in 1819, and of the means proposed to remedy it, is contained in a letter from a medical gentleman of Augusta to one of the members from Georgia, dated March 25, 1820, which is herewith submitted.

The drains contemplated were made in the summer of 1820. The post continued healthy that year, and at the ensuing session of Congress a further appropriation was made for completing the works, which were finished in 1821.

The experiment of draining the low ground has not succeeded. The position still continues unhealthy. Almost every year since the troops have been removed from the arsenal to the "Sand Hills, about one mile and a half distant, for about four months in each season. Great inconvenience results from this annual removal, and does not entirely effect the object in view, as it is considered necessary to keep a guard posted at the arsenal to protect the military stores deposited there. As the guards are necessarily changed frequently, all the troops are successively exposed to the deleterious effects of the atmosphere of

the place. On this account some of the officers who have commanded there have been of opinion that it would be as well for the troops to remain during the sickly season as to remove.

An attempt was made to continue the troops at the arsenal during the last season; with what success the following extracts from letters of the officer commanding the post will show:

"UNITED STATES ARSENAL, *Augusta, October 1, 1825.*

"I regret to state that circumstances have compelled me to remove the garrison from the arsenal. About the 17th of September a fever of the most alarming character made its appearance at this post. Assistant surgeon, Dr. T. P. Hall, was attacked on the 17th and died on the morning of the 21st of yellow fever. A private of the company, who was attacked on the 21st, died on the morning of the 24th, and not enough well men of the garrison to bear the corpse to the grave. Under such circumstances a removal became absolutely necessary. I therefore directed the quartermaster to rent a house on the Sand Hills for the reception of the sick, retaining at the post only three well men of the command.

"General Gaines, who is here, urged in the strongest terms an immediate removal. So unfavorably is the general impressed with the locality of the post, that he says it would be better to abandon it altogether than to keep them here during the summer and fall months.

"Respectfully, &c.,

"M. M. PAYNE, *Major United States Army.*"

On the 8th of October the same officer writes: "I feel it my duty to report that I have not at this time a single man capable of performing a day's duty. Since my communication of the 1st seven new cases of fever have occurred, and I regret to mention Lieutenant Holland among them. He was attacked on the 3d instant, and is thought at this time to be in a most critical situation. The women and children have not escaped the prevailing fever, which, I am authorized to state by the attending surgeon, is one of a highly malignant intermittent type. I yesterday removed every man, woman, and child from the arsenal but two, one ordnance and one private of the company. This measure was strongly urged by the doctor and General Gaines. The general has ordered a detachment of infantry from Flint river, to be stationed near this post.

"I have locked up the gates, and, as I have before stated, under no circumstances shall I quit the arsenal.

"I have been advised by General Gaines to hire men from among the citizens to remain at the arsenal until the arrival of the detachment of infantry. This, however, appears to be impracticable. No man feels disposed, for any price, to incur the risk of remaining at this post. I, however, apprehend not the smallest danger myself, either from being alone or from the climate.

"Respectfully, &c.,

"M. M. PAYNE, *Major United States Army.*"

Experience thus proves, beyond doubt, the extreme unhealthiness of the site chosen for the arsenal, and that little or no benefit has resulted from the experiment of draining the low grounds. Whether further drainings would have a beneficial effect is not known; but, judging from what has already been done, but little hope of success can be entertained from future experiments of the same kind.

The question as to the course most proper to be pursued respecting this arsenal is not easily determined. To continue it in its present position must endanger the lives of all who are employed about it; to abandon it must occasion a great sacrifice of public property. The establishment, as it now exists, it is presumed, would not bring one-fifth its original cost.

In the event of abandoning the position, the most advantageous disposition of the present works, it is conceived, would be to take them down and use the materials in rebuilding another establishment upon some healthy site in the vicinity. There are several suitable positions, distant between one and two miles from the present site, but it is not known whether they could be obtained upon reasonable terms. Efforts were made to procure a site upon what are called the "Sand Hills" before the present works were commenced, but without success. It is supposed, however, that a site can now be obtained, as the proprietors would probably sell rather than see the arsenal removed from that section of country.

It is estimated that the present buildings could be taken down, the materials be removed to the Sand Hills, and the works rebuilt there for about \$62,000. This estimate is not to be considered as exact, but it is as correct as can be made from the data now at hand. I think, however, it may be estimated with safety that the entire expense of removing the works to a healthy position on the Sand Hills, including the purchase of a new site, will not exceed \$70,000.

I have the honor to be, respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance service.*

HON. JAMES BARBOUR, *Department of War.*

[1ST SESSION.]

### FORTIFICATIONS OF PENSACOLA BAY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 20, 1826.

DEPARTMENT OF WAR, *February 16, 1826.*

SIR: I have the honor to transmit herewith a report of the chief engineer of this date, and beg leave respectfully to refer to it for the information required by a resolution of the House of Representatives, dated the 8th instant, relative to the expediency of commencing this year the fortifications contemplated for the defence of the entrance to Pensacola bay.

I have the honor to be, sir, with perfect respect, your most obedient servant,

JAMES BARBOUR.

HON. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

ENGINEER DEPARTMENT, *February 16, 1826.*

Sir: In obedience to your order, to furnish the information called for by the following resolution of the House of Representatives of the United States, dated the 8th instant, viz: "*Resolved, That the Secretary of War be directed to inform this House whether the surveys of Pensacola bay are not so far completed as to authorize the commencement of fortifications at the entrance thereof in the ensuing year without injury to the plan of defence to be projected for the defence of the navy yard, and how long it will take to complete the latter; the relative importance and necessity at this time of their defences, compared with other works of the same kind, and whether the public service would not be greatly benefitted and the contemplated works facilitated by an appropriation at this session of Congress for the purchase of materials, the construction of wharves and houses preparatory to the fortifications to be erected,*" I have the honor to report that the surveys of Pensacola bay are not so far completed as to authorize the commencement of fortifications at the entrance thereof in the ensuing year without injury to the plan of defence to be projected for the defence of the navy yard; that the projects for the fortifications for the defence of the navy yard not having been made, there are no data upon which it could be stated at this time how long it will take to complete them; that the relative importance and necessity for the fortifications contemplated for Pensacola bay, compared with other works of the same kind, would justify their being commenced as early as practicable; and that, although at this time there is no absolute necessity for an appropriation, the public service would undoubtedly be benefitted and the contemplated works would be facilitated by an appropriation at this session of Congress for the purchase of materials and the construction of wharves and houses, and for making such other preparatory arrangements as might be undertaken as soon as the site of the fortification can be exactly located.

Respectfully submitted.

ALEXANDER MACOMB, *Major General, Chief Engineer.*

HON. SECRETARY OF WAR

[1ST SESSION.]

ESTIMATE FOR THE CONSTRUCTION OF BARRACKS IN NEW ORLEANS.

COMMUNICATED TO THE SENATE FEBRUARY 20, 1826.

DEPARTMENT OF WAR, *February 20, 1826.*

Sir: Conformably to your request, I transmit herewith an estimate of the Quartermaster General of "the probable expense of erecting barracks and quarters near New Orleans," amounting to \$9,350. This estimate is founded on the basis of accommodation for two companies only, which is conformably to your suggestion, but which is deemed too small. If it be decided to erect the barracks it is desirable to have them large enough to quarter four companies at least, and the amount of the estimate enclosed will, in that event, furnish data on which to appropriate a sum large enough to erect them of that dimension, which I should recommend in preference to confining them to the dimensions necessary for the accommodation of two companies only.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. WILLIAM H. HARRISON, *Chairman Military Committee of Senate.*

*Estimate of the probable expense of erecting barracks and quarters for two companies of infantry on the margin of the Mississippi river, near New Orleans.*

For soldiers' barracks, one building of wood material, 80 feet in length by 20 in breadth, with an eight-foot piazza on each side, one story, of lofty pitch with roof windows, the attic affording accommodation for soldiers with families, or answering for company storerooms, estimated cost.....	\$3,500 00
For officers' quarters, one two-story building, with four rooms on a floor of 12 by 15 feet, making a building 60 feet in length by 12 in breadth, with an eight-foot piazza on each side projected from the roof, having a flight of stairs in the centre of each front, or at each extremity of the building, to ascend to the upper piazza or second story rooms, estimated cost.....	4,000 00
For hospital, one building 20 feet by 15, with piazzas on each side, one story high, with storerooms in the attic.....	600 00
For kitchens, for officers' messes and soldiers' accommodation.....	750 00
For commissary and quartermaster's storehouse, a building 20 feet square, one story.....	500 00
Total.....	9,350 00

NOTE.—The above estimate is necessarily somewhat vague, the exact quantity of materials and their precise cost not being known. It is a fact, however, known to all, that both materials and labor, especially of mechanics, are high in Louisiana, and it is believed that the works contemplated cannot be accomplished much, if any, short of the above result. Indeed, if the object is to be appropriated for specifically, it would be the safer and better way to grant \$12,000, lest the above amount should prove insufficient and the completion of the barracks be consequently retarded. The same economy might be observed as if a smaller sum were granted, and the surplus, whatever it may be, would remain unapplied.

THOS. JESUP, *Quartermaster General.*

No. 316.

[1ST SESSION.]

SYSTEM OF FORTIFICATIONS RECOMMENDED BY THE BOARD OF ENGINEERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1826.

*To the House of Representatives of the United States:*

A resolution of the House of Representatives, adopted at the first session of the eighteenth Congress, and bearing date May 6, 1824, requested the President of the United States to lay before the House at their then next session a detailed report of the system and plan of fortifications then contemplated and recommended by the board of engineers, with various particulars specified in the resolution; and on the fifth of January last a further resolution was adopted requesting similar information. I transmit herewith a report from the Secretary of War, with a letter from the chief engineer, and documents containing, so far as it has been found practicable to obtain and compile it, the information requested by these resolutions.

JOHN QUINCY ADAMS.

WASHINGTON, *March 1, 1826.*

DEPARTMENT OF WAR, *February 27, 1826.*

SIR: The Secretary of War, to whom was referred the resolutions of the House of Representatives of the 6th of May, 1824, and of the 5th of January, 1826, the former requesting the President of the United States to lay before the House, at the next session of Congress succeeding the date of the resolution, a "report of the system and plan of fortifications at present contemplated by him, and as recommended by the board of engineers, including the plans and surveys of said fortifications, so far as, in his opinion, the same may be communicated without injury to the public service; and also the number and position of the fortifications heretofore at any time erected, or which are now erecting, or to be erected for the defence of the coast, harbors, and frontiers of the United States, distinguishing those on the sea-coast in one class and those on each frontier in like classes, and including all the fortifications which are to be preserved as a part of the plan for the future defence of the country, and showing under proper heads the State in which each is situated, when begun, which of them are finished, and when, with the magnitude of each, (as well those erected before as since the year 1815,) the aggregate amount expended in erecting such as are completed; the amount of repairs since made, particularly upon those that were finished prior to the year 1815; the amount expended on those now erecting, and the estimates to complete the same; the number of guns of every description and calibre for each fortification to complete its armament; the total cost of a complete armament for each; the force required to garrison each in time of war; the same in time of peace; and showing which and how many of those erected prior to 1815 are found useless in the contemplated plan of defence; which and how many of them have been or are to be abandoned; and the cost of each so abandoned or to be abandoned; distinguishing between the original cost and subsequent repairs; and in all cases wherein sums of money have been already expended or authorized to be so expended, the authority therefor, by reference to the amount of date of each appropriation, with a like reference to the law under which any of said works were erected;" the latter requesting the President to communicate to the House "a detailed report of the system and plan of fortifications proposed for the national defence; specifying the location, and cost of each particular work already erected, and the location and estimated cost of such as are contemplated to be erected; and stating whether any, and if any, what works already erected have been deemed useless in the contemplated plan of defence;" has the honor to transmit herewith a report of the chief engineer, which furnishes the information required, so far as this department can furnish it.

In relation to the delay which has occurred in rendering this report, it is proper to remark that it has been owing to a deficiency of information in the office of the chief engineer, which it was necessary to have supplied to enable him to make as full a report as was required by these resolutions.

Respectfully submitted.

JAMES BARBOUR.

The PRESIDENT of the United States.

ENGINEER DEPARTMENT, *February 27, 1826.*

SIR: I have the honor to present herewith such of the information respecting fortifications called for by a resolution of the House of Representatives, dated the 6th of May, 1824, as it has been found practicable to furnish.

It consists of statements of the Second and Third Auditors of the expenditures on account of fortifications within the periods specified in the resolution. A statement prepared by this department, and marked A, in which those expenditures are arranged in the several States and Territories in which they were made, and those States and Territories are classed in frontiers, corresponding with the most familiar geographical divisions of the United States, of eastern, middle, southern, and western States, and in which also the expenditures prior to the year 1815 are distinguished from those subsequent to that year; such an arrangement, classification, and distinction of the periods within which the expenditures were made being required by the resolution; and a statement, marked B, showing the works included in the system for the defence of the maritime frontier, as well as those projected and to be projected by the board of engineers as those projected prior to its organization, together with the works not included in the system, but proposed to be preserved; and, as far as they can be furnished, the following particulars respecting each work, viz: the State in which it is located; the periods at which it was begun and finished; its magnitude; the sums expended upon it to the 30th of September, 1824; the amount requisite to complete it; its entire cost; the authority upon which the expenditures were made; its armament, and the cost of it; the garrison requisite for it, in war and in peace; and if occupied on the 30th of September, 1824, its strength at that date.

The statement A, which, as has been stated, is an analysis of the statements of the Second and Third Auditors, contains all the information relative to the expenditures which could be obtained, but does not, as was called for by the resolution, distinguish the amounts applied to repairs, because they were not distinguished in the books of the Auditors.

It was intended, in fulfilment of that part of the resolution requiring a statement of the works which would not be included in the system, and were deemed useless, to include the works of that description in statement B, but such information as could be obtained respecting that class of works, besides being incomplete, could not be relied on for its accuracy, and those works were therefore omitted.

The resolution having also required the plans and surveys relating to the fortifications to be furnished, if it could be done without injury to the public service, it is proper to state that it was conceived that they could not be furnished without injury to the public service, and as they are accessible for inspection at all times, it was believed their being withheld will not in any degree contravene the accomplishment of the objects contemplated by the resolution.

Respectfully submitted.

ALEX. MACOMB, *Major General, Chief Engineer.*

Hon. JAMES BARBOUR, *Secretary of War.*

TREASURY DEPARTMENT, *Second Auditor's Office, December 16, 1824.*

SIR: I have the honor to transmit you herewith a statement of the expenditure on account of fortifications, from the 1st of July, 1815, to the 31st of December, 1816, ascertained from the accounts settled during that period in this office, and furnished in pursuance of a resolution of the House of Representatives of the United States, under date of the 16th of May, 1824.

I am, very respectfully, your obedient servant,

WILLIAM LEE.

Hon. J. C. CALHOUN, *Secretary of War.*

TREASURY DEPARTMENT, *Second Auditor's Office, December 17, 1824.*TREASURY DEPARTMENT, *Third Auditor's Office, November 2, 1824.*

SIR: In pursuance of your request, accompanied by the copy of a resolution of the House of Representatives of the United States, of the 6th May, 1824, "that I should report to you on such points of the resolution as pertain to information in this office," I have the honor to enclose herewith a statement exhibiting the sums expended from the year 1794 to the close of the late war, and from the 1st of January, 1817, to September 30, 1824, on the different fortifications, so far as it has been practicable to ascertain and designate the same.

The destruction of all the accounts and vouchers of the late accountant, which were on file in the Treasury Department in the year 1814, rendered it impracticable to ascertain the particulars constituting the amount expended prior to the year 1813, as the books of the office, in which the accounts were entered, and from which the present information is collected, exhibit only the aggregate amount expended by disbursing officers without specifying whether they were for repairs or for constructing fortifications; and, subsequently, the designations in that particular do not afford the means of discriminating between original works and repairs, the accounts being settled and entered according to the head of appropriation from which the money was drawn. It may, therefore, it is believed, be stated, that the statement exhibits all the information which could be collected from the books and accounts in this office which pertain to the different points of the resolution.

With great respect, your obedient servant,

PETER HAGNER, *Auditor.*Hon. JOHN C. CALHOUN, *Secretary of War.*

B.

Table exhibiting the system of fortifications contemplated for the defence of the United States, comprising the fortifications projected, and contemplated to be projected, by the board of engineers; and also such of the fortifications projected prior to the organization of the board as will be comprehended in the system, and such, although not comprehended in the system, as it is deemed expedient to preserve, together with the following particulars in relation to each of the works embraced by the several classes above stated, viz: the frontiers and States in which they are respectively located; the periods at which they were commenced and finished; their magnitude; the amount of moneys expended in their construction to September 30, 1824; the sums requisite to complete such as are not finished or not commenced; the amount of entire cost as ascertained for those finished, and as estimated for those not finished; the authority under which the expenditures have been made; the nature, extent, and cost of the armament necessary for each; the garrisons requisite for each during war, during peace, and as established at such of them as were occupied on the 30th of September, 1824.

Classification and designation.	In what State located.	In what year begun.	In what year finished.	Magnitude—length in yards of the enceinte or perimeter of the work.	Expenditures.			Authority under which the expenditures have been made.	Armament.			Garrisons.													
					Already applied.	Requisite to finish.	Entire cost of those finished, and estimated cost of those not finished.		Guns, average cost each \$567.	Carronades, average cost each \$400.	Mortars, average cost each \$412.	Cost.	Requisite during war.	Requisite during peace.	Established on the 30th Sept., 1824.

No. 317.

[1ST SESSION.]

## RIFLES DELIVERED TO CAPTAIN AIKIN'S VOLUNTEERS FOR GOOD CONDUCT AT THE SIEGE OF PLATTSBURG IN 1814.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 7, 1826.

HOUSE OF REPRESENTATIVES, *March 2, 1822.*

Sir: When the British army, under the command of Sir George Prevost, invaded the United States, about the 1st of September, 1814, a number of young gentlemen of Plattsburg and its vicinity volunteered their services for the defence of their country. This corps consisting principally of those who were not yet liable to militia duty, were organized into a company under the command of Captain Martin J. Aikin, who, with the other officers, were brevetted by Major General Mooers and were received into the service of the United States by General Macomb, then commanding the Champlain department.

This corps was eminently distinguished during the siege of Plattsburg, particularly in the battles of Beekmantown and at the crossing of the Saranac. As a reward for their gallant and meritorious conduct, General Macomb gave directions that each of the corps should be presented with a rifle, which direction was sanctioned by the then Secretary of War. I understand the rifles were made and ready for delivery soon after the close of the war, but, for some cause which I have been unable to learn, their distribution has not taken place.

Permit me, sir, to request that you will communicate to me such facts as may be within the knowledge of the department in relation to this business, and also your opinion whether any legislative sanction is necessary to enable the Executive to confer on those young gentlemen an honorable testimony of their patriotic services to which they are so justly entitled.

I am, sir, with respect, yours, &c.,

REUBEN H. WALWORTH.

HON. JOHN C. CALHOUN, *Secretary of War.*DEPARTMENT OF WAR, *March 13, 1822.*

Sir: Your letter of the 2d instant was duly received, and immediately referred to General Macomb, who reports in the most honorable terms the conduct of the young gentlemen in whose favor you apply. The report is enclosed.

On referring to the several laws on the subject of the militia and volunteers, it does not appear that this department is authorized to dispose of the public arms in the manner proposed by General Macomb, and therefore, however willing to confirm the promise of the general to the gallant youths who so nobly distinguished themselves under his command, it cannot be done without legislative provision.

I have the honor to be, sir, your most obedient servant,

J. C. CALHOUN.

HON. REUBEN H. WALWORTH, *of the House of Representatives.*WASHINGTON, *March 13, 1822.*

The undersigned, to whom has been referred the letter of the Hon. Reuben H. Walworth, dated the 2d instant, has the honor to report that during the invasion of the northern frontier of the State of New York, in September, 1814, a number of young men of Plattsburg called on him and requested that they might be employed in defence of their town, which was then threatened with attack. Their gallant and patriot offer was accepted without hesitation, and they were immediately armed and instructed how to act. They accompanied General Mooers to Beekmantown upon the approach of the enemy, and were afterwards very active in assisting in the defence of the passage of the Saranac. Their conduct on this occasion corresponded with the laudable motives which led them to take up arms in defence of their country. The services they rendered were important, and in consideration thereof they were individually promised by the undersigned that endeavors would be made to obtain from government a handsome rifle for each. This promise subsequently received the sanction of the then Secretary of War. After using his utmost endeavors to fulfil his promise as thus sanctioned, and after waiting until this time to see the arms delivered, it was with extreme mortification that the undersigned learnt that, without a law authorizing the grant, his promise could not be accomplished.

It is with great satisfaction the undersigned beholds the representative of that part of the State in which the gallantry of these young gentlemen was displayed making application in their behalf, especially as he so honorably partook of the events of that period and was a witness of their conduct. It is to be hoped he will bring the matter before Congress, and that a resolution will be passed to reward such distinguished examples.

ALEX. MACOMB, *Major General.*HON. J. C. CALHOUN, *Secretary of War.*

*List of names of a volunteer company of riflemen who did duty in the service of the United States, on the invasion of Plattsburg by Sir George Prevost, in September 1814.*

Gustavus A. Bird.	St. J. B. L. Skinner.	James Patten.
Ira A. Wood.	Frederick P. Allen.	Bartemus Brooks.
James Trowbridge.	Hiram Walworth.	Smith Bateman.
Hazen Mooers.	Ethan Everist.	Melancton W. Travis.
Henry K. Averill.	Amos Soper.	Flavel Williams.

I certify that the foregoing is an authentic list of names of a party of volunteer riflemen who did duty in the United States service, and under my command, as stated in the above caption.

M. J. AIKIN, *Captain.*  
AZARIAH C. FLAGG, *Lieutenant.*

I, Benjamin Mooers, major general of militia of the State of New York, do certify that the list of names made by Captain M. J. Aikin and Lieutenant A. C. Flagg may be relied on as correct, being personally acquainted with those officers, and the meritorious services rendered by those officers and their companions in arms, at the time and place mentioned within.

BENJAMIN MOOERS.

I concur in the statement made by General Benjamin Mooers herewith, being also acquainted with most of or all the individuals named, and with the importance of their services on the occasion alluded to; Martin J. Aikin, who acted as captain, and Azariah C. Flagg as lieutenant, under whose command the services were performed, ought of course to be included in the list.

From the 5th to the 12th of September, 1814, and in moments most doubtful as to the event of the invasion, indeed, when a successful resistance to the overwhelming force of the enemy seemed impossible without the intervention of a miracle, and when most of the inhabitants possessed of property thought only of removing it from his grasp, these youthful champions, many of whom were under sixteen years of age, stepped forward self-organized and self-instructed, and reconnoitred and harassed the enemy day and night in their pickets and outposts, marking and giving that information of their advances which was both difficult and important for the commanding general to obtain.

Their unwearied exertions in this important duty, as well as the daring intrepidity with which they met and opposed, with others, the more serious attacks of the enemy, were particularly conspicuous.

JOHN PALMER, *Member of Congress.*

[1ST SESSION.]

ON THE LOCATION OF THE UNITED STATES ARSENAL AT AUGUSTA, GEORGIA.

COMMUNICATED TO THE SENATE MARCH 7, 1826.

Mr. HARRISON, from the Committee on Military Affairs, to whom was referred the message of the President on the subject of the arsenal near Augusta, in Georgia, reported :

That they have examined the documents which accompanied the message, and have obtained further information on the subject from a respectable citizen of Augusta, now in this city; from all of which, they have come to the conclusion that no alternative remains to save from certain death the troops which it is necessary to keep constantly at the arsenal for its protection, but to remove it to a more healthy position. Such an one is to be found in the immediate vicinity, at a distance of not more than from one and a half to two miles. From the information which the committee have received from the gentleman above referred to, that there is a probability of selling the arsenal to greater advantage than would attend the removal of the materials to the new position, they have so framed the bill as to authorize the President to adopt either of those plans. The subjoined report from the officer at the head of the Ordnance department contains a history of all the difficulties which have attended the present location of the arsenal.

N. B.—For the report, see antecedent No. 310, communicated February 17, 1826.

[1ST SESSION.]

IN FAVOR OF ABANDONING THE SITE OF THE ARSENAL AT AUGUSTA, IN GEORGIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 9, 1826.

Mr. TATNALL, from the Committee on Military Affairs, to whom was referred a message from the President of the United States, transmitting a report from the Ordnance department, in relation to the site of the arsenal of the United States at Augusta, in the State of Georgia, reported :

That, from the documents presented to them, and herewith annexed, (to which they beg leave to refer,) and also from information derived from private sources, entitled to confidence, it appears, conclusively, that the site on which is erected the arsenal, near the city of Augusta, in Georgia, has been so fatal to the health, and in many instances to the lives, of the troops which have been there stationed for its protection, that, in the opinion of the committee, policy as well as humanity alike require it should be promptly abandoned, and some other, not liable to the same objection, and at the same time affording the necessary public advantages, should be selected. The committee therefore report the accompanying bill.

19TH CONGRESS.]

No 320.

[1ST SESSION.]

## RELATIVE TO TYGART'S VALLEY RIVER AS A SITE FOR A NATIONAL ARMORY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 17, 1826.

*The following statement in relation to the Tygart's Valley river and the ground adjacent, in reference to the selection of a proper site for the contemplated armory, is respectfully submitted to the committee :*

By a careful examination and a scientific admeasurement of the falls and water power made by Mr. Crozet, civil engineer of Virginia, whose report is hereto annexed, it satisfactorily appears that in all these important particulars the falls of the Tygart's Valley river present strong recommendations. The committee are referred to Mr. Crozet's statement, marked A.

In the year an examination was made of the Tygart's Valley falls and report returned; by which report it appears that Mr. Lee, the commissioner, in his estimate of the relative advantages of the Tygart's Valley site and the site of Beaver, gave a preference to the Beaver site. In doing so, however, it is believed that he did not do justice to the Tygart's Valley. The report is believed to be essentially defective, and should not be received as a guide upon the subject. To show the inaccuracies of Mr. Lee's report, the committee are referred, in the first place, to the affidavit of John Nuzam hereto annexed, marked B, disclosing the true reason for the various errors and misstatement of facts into which Mr. Lee has fallen; showing in truth that Mr. Lee made no such examination as was necessary and proper to enable him to make any correct report.

By the letter of Mr. Crozet of the 7th January, herewith furnished, the errors of the report are fully and minutely detected and exposed by the most conclusive evidence; and, moreover, by the same document the strong recommendations and striking advantages of the Tygart's Valley site are fully and distinctly exhibited.

A.

RICHMOND, January 7, 1826.

DEAR SIR: In answer to the additional inquiries of Major J. Johnson, in regard to the lower falls of Tygart's Valley river, I have taken a more complete view of the subject; the result of my observations I herein transmit to you.

The report of the commissioners states that—

The falls of Tygart's Valley fork are six miles above the junction of the Tygart's Valley river with the Monongahela, and 100 miles from Pittsburg. They are estimated to be 30 feet high, and consist of two perpendicular pitches of near 15 feet each, and about 100 feet apart. From the foot of the lower fall there is a continued rapid for about a mile, in which distance the descent is supposed to exceed 20 feet, making altogether 50 or 60 feet fall. The highest rise of the river, at the head of the falls, is stated to be 16 feet. The rise below is unknown, but, according to the best information that could be procured, it appears that breast and undershot wheels cannot be employed without interruption from high water.

According to my measurement, and as I have stated in my preceding letter, the fall is 50 feet in a distance of about half a mile.

The rapid below the cascades was not measured, but it continues down to Nuzam's mill with some interruption by ponds of still water.

Speaking of the site recommended on Big Beaver, (page 37 of the report,) it is said: that the "distance from the head of the falls to the mouth of Walnut run is about 1½ mile and the descent 22 feet at low water. The highest rise of any freshet at the latter place is 11.75 feet, leaving 10¼ feet difference of level between the surface of low water above the falls and the highest rise of the river at the mouth of Walnut run, and 18.25 by raising a dam 8 feet high, at the head of the falls." If we even suppose the rise of freshets to be 40 feet below the falls of Tygart's Valley, a dam 8¼ feet high, for which there is a most eligible site, would, with the same quantity of water, procure the same advantages as on Beaver; and, if we consider that freshets do certainly not rise so high as 40 feet, it will appear that such wheels as may be used on Beaver will, *a fortiori*, be practicable on Tygart's Valley river.

The report further adds :

It was also ascertained that the power of the stream, when at its lowest stage, was not more than sufficient to operate four pair of four feet mill-stones, with a head and fall of 12 feet; and, consequently, the whole fall of 30 feet employed with reaction wheels would not afford an adequate power for the armory.

When the examination of the commissioners took place, the dam across the left arm of the river was in very bad order, and much more water escaped that way than was proper for the maintenance of the power wanted at the mill; this circumstance may account for the statement of the report, but, as I have stated in my first letter, I have ascertained by measurement, when the river was about at its lowest, that the quantity of water which passed through the left arm alone was 491 feet per second. The water which escapes through the right arm and turns the mill was not measured, in order to make a safe allowance for an unusual drought.

The quantity of water furnished by the Beaver is only estimated at 135 feet per second, and that wanted with a head of 16.6 feet, only 66 feet (cubic) per second.

Hence we may safely conclude that Tygart's Valley river furnishes an abundance of water, since, when measured, it was, including the water by which two pair of stones were then turned, at least ten times as much as the quantity requisite, with a fall of 16.6 feet, which may be, as remarked above, much exceeded on Tygart's Valley river. It may be further observed, that above the cataracts there is hardly any fall for several miles, so that a dam 10 feet high would form an immense reservoir, which, in times of drought, would considerably add to the power. In one word, I have not a doubt that the power is many fold greater than wanted.

The report continues as follows:

The ground is likewise deficient in extent. At no point within a mile and a half below the first fall could the workshops be placed contiguous to each other; in the greater part of this distance the shores of the river consist either of

huge masses of detached rocks or high precipices, and, for 800 or 1,000 yards, tunnelling and high side walls are the only practicable means that can be employed to convey the water to where it may be taken into a canal; and, after all, suitable ground cannot be obtained for an establishment so extensive as an armory at any point within two miles of the falls.

I proceed now to compare the other advantages of *both sites*:

*Beaver.*

The dam will rest on a level rock foundation, about eighteen inches below the surface of low water, and will have the solid rock on both sides of the river for its abutments.

Stone coal (page 41) abounds in the adjacent hills, but the veins which have been hitherto discovered do not exceed two and a half or three feet in thickness. The coal will, therefore, cost more, and is probably inferior to that of Pittsburg.

Provisions and building materials are abundant, and labor cheap.

The quantity of water which the Beaver furnishes probably exceeds 135 feet per second.

An armory at Brighton will require 66 feet, with a head of 16.6 feet on breast and over-shot wheels, exclusive of the forge, which will be operated by a reaction wheel below the others.

Keel boats navigate the Beaver as high up as Pugh's mills, within one and a half mile of the site at Brighton, about ten months in the year, &c.

*Tygart's Valley.*

The dam will possess here the same, if not superior, advantages.

Very fine coal abounds in the adjacent hills, and in some places forms even the bottom of the river; being above the falls, and in their vicinity, it may be brought to the spot with perfect ease, there being a long distance of good water above the falls.

Here the same thing obtains.

That furnished by Tygart's Valley river probably exceeds 500 feet per second, and the fall is greater.

It is certain that more fall may be obtained on Tygart's Valley river.

Boats ascend with ease as high up as Nuzam's mill, within one and a half mile of the falls, when the water is not at its lowest for probably nine months in the year. This does not appear to be the most important point, especially when it is recollected that the most heavy materials are found above the falls, and may be brought down by water, such as coal, wood, &c.

There is much iron ore in the adjacent country, and also limestone.

These are all the remarks which the subject suggests to me at present. I hope they will meet the wishes of Mr. Johnson.

Respectfully, your obedient servant,

CHARLES S. MORGAN, Esq.

C. GROZET, *Civil Engineer.*

B.

*Monongalia county, Virginia, to wit:*

Personally came before me, the subscriber, one of the Commonwealth's justices of the peace in and for said county, John Nuzam, and solemnly affirmed and saith that some time in the fall of 1823 a certain Mr. Lee came to his house, at the lower falls of the Tygart's Valley river, and said that he had come for

the purpose of examining the principal falls on said river, and that he (Nuzam) went with Mr. Lee to the principal falls; that said Lee spoke in high terms of the site, but did not apply instruments to ascertain the fall or quantity of water, stating that he would return with an engineer and make a survey. Given under my hand this 29th day of January, 1825.

JACOB J. WAGNER, *J. P.*

CLARKSBURG, *August 15, 1825.*

GENTLEMEN: At the particular request of Major Johnson and myself, Mr. Crozet, the engineer of the State, will visit the cascades of the Valley river. Will you be pleased to state—and your local situation will enable you to do so—the probable quantity of the different minerals known to abound in your neighborhood, and the facility with which each may be procured, and such other information as you may deem connected with the subject of these inquiries? the object of which is to draw the attention of the general government to the immense advantages that would result from locating the contemplated western armory at the cascades of the Valley river, the combined advantages of which, in my estimation, are unequalled in the western country, taking into consideration the mineral wealth, the facility of navigation, the extent and power to which the water may be applied, and the uniform health you enjoy; in addition to which may be mentioned the ease with which supplies may be brought from Prunty Town and Gooseman's mills, the depots of a rich and fertile country, well settled, and abounding in all the necessaries of life; the river affording, I am informed, at the lowest stage of water, an uninterrupted navigation from these points to the falls.

Your early answer will confer a favor on your most obedient servant,

THOMAS P. MOORE.

JOHN NUZAM, URIAH ASHCRAFT, GARDNER LEONARD, THORNTON MYERS, and JOSEPH POWELL, Esqs.

CASCADES OF THE VALLEY RIVER, *August 25, 1825.*

Sir: In answer to your letter of the 15th instant, in relation to the advantages of this site for the erection of the contemplated western armory, we can state that most of us have resided in this vicinity for near twenty years; are well acquainted with several large mines of iron ore; of the stone coal the quantity is certainly inexhaustible, the surrounding hills appearing to be based on that mineral and crowned to their summits with forests of the finest timber; building stone of the best quality, and inexhaustible in quantity, is immediately on the banks of the river, below the falls; clay for brick of good quality is on every acre of land adjacent to the site; six saw and four grist mills are or can be put in operation immediately in six or eight miles. As it regards the navigation, we can state that for twenty years all the produce of this part of the country, consisting of iron, stone coal, lumber, flour, boats for sale, &c., have, with facility, been sent down the river, with only one exception, and that year was an unusual one. Our experience justifies us in asserting that epidemical diseases of any kind are here unknown, and for general health we yield to no country on earth. From the upper falls to Gooseman's mills, a distance of perhaps eight miles, the navigation may be considered, in the lowest stage of water, as uninterrupted. This opens to this site the fine country around Prunty Town, and would insure, at all times, a plentiful supply of provisions for the largest establishment. Any further information that may be required on the subject will be cheerfully given.

Your very obedient servants,

JOHN NUZAM.  
URIAH ASHCRAFT.  
G. LEONARD.  
THORNTON MYERS.  
JOSEPH POWELL.

THOMAS P. MOORE, Esq., *Member of the Board of Public Works.*

19TH CONGRESS.]

No. 321.

[1ST SESSION.]

ON THE PURCHASE OF ADDITIONAL LAND FOR THE SITE OF FORT WASHINGTON, ON  
THE POTOMAC.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 20, 1826.

Mr. HAMILTON, from the Committee on Military Affairs, to whom was referred a resolution of this House "instructing them to inquire into the expediency of purchasing additional land for the site of Fort Washington, reported:

That they have carefully examined the subject embraced in this resolution, and with this object proposed to the Department of War the following inquiry, to wit: "Whether the views of the department had undergone any change since the previous sessions of Congress, when this matter had been referred to the Committee on Military Affairs, as to the necessity and expediency of purchasing the additional land

so required? It will be seen by the answer and documents that, whilst the Secretary of War still adheres to the opinion of the indispensable necessity of making the purchase, he considers the price asked by Mr. Digges, (the proprietor of the land,) in conformity with the award of the arbitrators, as wholly disproportionate to its value; he, however, recommends, what your committee are disposed to concur in, that the government should give the amount of a judgment obtained by it against Mr. Digges by the securities of the late Robert Brent for the additional land wanted, and in acquittance of all claims which Mr. Digges may have against the United States touching the said purchase, the previous use and occupation of the land, and the alleged destruction of the contiguous fisheries; and for this purpose they report a bill.

Your committee beg leave to refer to volume 1, No. 74, of the reports of committees of the 2d session of the 18th Congress for a detailed account of the claims of Mr. Digges and the present situation of the fortifications at Fort Washington in reference to the want of the additional land, for the purchase of which they have provided.

---

DEPARTMENT OF WAR, *January 17, 1826.*

SIR: In answer to your letter of yesterday's date, in which, after stating that the committee over which you preside "have been instructed to inquire into the expediency of making the often-proposed purchase of land at Fort Washington," you ask, in behalf of the committee, "whether I have received any additional information to that communicated on that subject at the last and at a previous session, or whether the views of this department have undergone any change in relation to the policy or necessity of the purchase in question?" I have the honor to state that no additional information has been received, and that no change has taken place in the views of the department in relation to the necessity for the purchase in question, it being required for the fulfilment of the plan of a fort in other respects completed; but with respect to the policy of making the purchase at the price awarded by the referees who were appointed to value the land, I frankly acknowledge that I consider that price to be very exorbitant, and more than equivalent to the advantages which the possession of the land is contemplated to afford.

From the best information I have been able to obtain, the land proposed to be purchased, including the fishing grounds attached to it, is not worth one-half of the amount of the valuation; and as I understand the owner of the land is indebted to the government to an amount nearly equal to two-thirds of the valuation, and has no other means of paying the debt than such as might accrue from the sale of the land in question, I would respectfully submit to the committee the expediency of recommending a law to authorize the purchase adverted to, provided the owner of the land will agree to accept a discharge from his debt as the price of the purchase.

I have the honor to be, sir, very respectfully, your obedient servant,

JAMES BARBOUR.

Hon. J. HAMILTON, Jr., *Chairman of the Military Committee, House of Representatives.*

---

WAR DEPARTMENT, *February 8, 1826.*

SIR: I have the honor to enclose herewith a copy of a communication from the Fifth Auditor of the Treasury Department to the Engineer department, dated on the 26th ultimo, with the accompanying papers, relating to the debt due from William Dudley Digges, esq., to the United States, and also a copy of a letter from Mr. Digges, of the 7th instant, connected with the same subject.

These papers afford all the information upon the subject of the debt of Mr. Digges to the government and in reference to the additional land wanted for the enlargement of the site of Fort Washington not before communicated.

I beg leave to suggest that, if an appropriation for the acquisition of the land in question should be made, the act be framed with a proviso that unquestionable title to the land be given, and also that the title to the lands heretofore purchased by the United States from the late Thomas A. Digges, upon which Fort Washington stands, be perfected before the act shall go into effect.

I have the honor to be, very respectfully, sir, your most obedient servant,

JAMES BARBOUR.

Hon. JAMES HAMILTON, Jr., *Chairman Military Committee, House of Representatives.*

---

WASHINGTON, *February 7, 1826.*

SIR: In reply to your letter of yesterday, intimating the desire of the Military Committee to bring the business of the proposed acquisition of additional land for the site of Fort Washington to a close, and their wish also to be informed whether there be any liens or encumbrances on the property named in the award of the arbitrators, I have to inform you that whenever a bill shall have passed both houses of Congress appropriating the money for the payment of the above award, my trustees, Daniel Carroll, of Duddington, and Daniel Brent, will join me in giving to the United States a full and perfect title to the said property, and will also confirm the title to the land already in the fort limits, which, by a late decision of the court of appeals, my late uncle, Thomas A. Digges, had no right to convey, in fee simple, without the consent of my trustees, the consent of whom, it is believed by legal authority, is necessary and indispensable to render valid the said title. The lands in the District of Columbia are answerable for the debt due the United States on account of Robert Brent, late Paymaster General, and the judgment acknowledged for that debt has priority to any claim against said lands, except one judgment of \$2,500 due the Bank of Metropolis, with the cashier of which bank I have lately deposited notes of substantial and responsible persons to a much larger amount as a collateral security for said judgment, and which notes the said bank appears to be well satisfied with.

As to the proposition of my taking anything less than the award and its full amount for the property, I should have thought that my former correspondence with the department as well as the Military Com-

mittee ought to have sufficed. I went into the arbitration on open and honorable terms, and whatever might have been the award I should have felt myself bound to abide by it. I think the government cannot and ought not to do less. My property has been occupied for many years by the United States even before the award, and since then a complete ownership has been exercised. I think that the United States ought to be the last to set the example of taking possession and occupying private property without compensation.

With great respect, I am, dear sir, your obedient servant,

WM. DUDLEY DIGGES.

Major General ALEXANDER MACOMB, *Chief Engineer.*

TREASURY DEPARTMENT, *Fifth Auditor's Office, January 26, 1826.*

Sir: Not being in possession of all the information required by your letter of the 21st for the use of the Military Committee, I forwarded a copy of it to Joseph Pearson, esq., one of the trustees of the estate of the late Robert Brent, with a request that he would furnish it.

His answer has just been received, of which I have the honor to enclose a copy.

I have the honor to be, very respectfully, sir, your most obedient servant,

S. PLEASANTON, *Agent of the Treasury.*

General ALEXANDER MACOMB.

WASHINGTON, *January 25, 1826.*

Sir: In compliance with the request contained in your letter of the 21st instant, which was not received until yesterday, I have the honor to enclose a certified copy of the amount of the judgment in favor of the United States vs. William Dudley Digges.

The debt was originally due from Mr. Digges to the late Robert Brent, Paymaster General, and was by him assigned, in trust, to his sureties in official bond for their indemnity. Suits were instituted against these gentlemen by the United States on the official bond of Mr. Brent. But it being believed by the attorney of the United States that a recovery would not be had, or at least was very questionable, an arrangement was made by the parties, with the consent and approbation of the Agent of the Treasury, by which this debt due from Mr. Digges, together with other trust funds in the hands of said sureties, should be transferred to the United States, and the suits on the official bond dismissed. Those funds amount to something more than the penalty of the bond, and it is believed will be available.

I am, sir, very respectfully, your obedient servant,

JOSEPH PEARSON.

STEPHEN PLEASANTON, Esq., *Fifth Auditor, &c.*

*Circuit court of the District of Columbia, for county of Washington, April term, 1823.*

Daniel Carroll, of Duddington, Nicholas Young, and }  
 Wm. Brent, use of Joseph Pearson and Robert }  
 Y. Brent, executors of Robert Brent, use of the }  
 United States, }  
*against*  
 William Dudley Digges. }

Judgment for \$20,000 damages and costs. Damages to be released on payment of \$13,369 87, with interest from June 9, 1819, until paid; costs, \$9 57.

Stay execution until October 1, 1824.

Test:

WILLIAM BRENT, *Clerk.*

The above judgment has been kept alive by the United States attorney.

No. 322.

[1ST SESSION.]

RELATIVE TO THE QUANTITY OF LAND IN THE SITE OF FORT McHENRY, NEAR BALTIMORE.

COMMUNICATED TO THE SENATE MARCH 20, 1826.

DEPARTMENT OF WAR, *March 17, 1826.*

Sir: I have the honor to transmit herewith a report of the Chief Engineer of this date, and beg leave respectfully to refer to it for the information I was directed to furnish to the Senate by its resolution dated the 7th instant, respecting the expediency of purchasing land next adjoining the site of Fort McHenry.

I have the honor to be, sir, with great respect, your most obedient servant,

JAMES BARBOUR.

The VICE-PRESIDENT of the United States and PRESIDENT of the Senate.

ENGINEER DEPARTMENT, *March 17, 1826.*

SIR: In pursuance of your instructions to report to you "the quantity of land which belongs to the site on which Fort McHenry has been erected, whether any private buildings are placed near that fort, and at what distance from it, and whether it is indispensably necessary to the public service that land next adjoining the fort should be purchased, and about what quantity," I have the honor to report that the quantity of land which belongs to the site of Fort McHenry is twenty acres, three roods, and eighty-one perches; that there are private buildings within a few feet of the western boundary of the site; and that it is not deemed necessary to the public service to incur any additional expense for the purchase of land next adjoining the fort, for the reason that the fort, although it is contemplated to preserve it in its present condition, is intended to be retained only as an accessory to the system for the defence of the maritime frontier.

Respectfully submitted.

ALEX. MACOMB, *Major General, Chief Engineer.*Hon. J. BARBOUR, *Secretary of War.*

[1ST SESSION.]

## ON THE RETROCESSION TO SOUTH CAROLINA OF THE SITE OF THE ARSENAL AT MOUNT DEARBORN, IN THAT STATE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 21, 1826.

Mr. HAMILTON, from the Committee on Military Affairs, who were instructed "to inquire into the expediency of authorizing by law the retrocession to the State of South Carolina of the lands formerly occupied and used by the United States as a site for an arsenal at Mount Dearborn, in that State," reported:

That they have directed the inquiry necessarily involved in this resolution to the Department of War, and have obtained the subjoined communications. Concurring with the department in the opinion of expediency of retroceding to the State of South Carolina the soil as well as jurisdiction of the site, together with the old and now useless buildings to the United States at, Mount Dearborn, they beg leave, with this view, to report a bill.

WAR DEPARTMENT, *March 8, 1826.*

SIR: In reply to your letter of the 21st ultimo, respecting the retrocession of the land of the United States at Mount Dearborn to the State of South Carolina, with the jurisdiction thereof, I transmit herewith reports of the Chief Engineer and Colonel of Ordnance, which furnish the information required by the committee as well as the views of this department in relation to it.

I have the honor to be, your most obedient servant,

JAMES BARBOUR.

Hon. JAMES HAMILTON, Jr., *Chairman Military Committee, House of Representatives.*ENGINEER DEPARTMENT, *Washington, March 7, 1826.*

SIR: The letter which you placed in my hands yesterday of the chairman of the Committee on Military Affairs, the object of which is to inquire into the expediency of authorizing by law the retrocession to the State of South Carolina of the lands at Mount Dearborn formerly occupied and used by the United States as a site for an arsenal, and also the surrender of the jurisdiction over the same.

The original intention of the establishment at Mount Dearborn has been long abandoned; and as the place has not been occupied for a considerable length of time, nor is it likely to be again useful to the United States, I should therefore recommend the retrocession of the jurisdiction as well as the property to the State of South Carolina, as I believe the position will never be again required for military or other purposes, while their retention by the United States may interfere with the contemplated improvements in the navigation of the Catawba, and in the canal about to be constructed through the lands belonging to the government at that place.

I have the honor to be, sir, very respectfully, your most obedient servant,

A. MACOMB, *Major General, Chief Engineer.*Colonel GEORGE BOMFORD, *Ordnance Department.*ORDNANCE DEPARTMENT, *March 8, 1826.*

SIR: In answer to the letter of the chairman of the Committee on Military Affairs relative to the United States public works at Mount Dearborn, referred to this department, I have the honor to state that the works referred to were established as long ago as 1802 or 1803, many years before the existence of this department; it consequently does not possess very precise information respecting them. Under

standing that the Engineer department had some knowledge of the works, the letter from the committee was submitted to General Macomb, whose reply is herewith submitted.

The works at Mount Dearborn appear to have been originally designed for an armory or an arsenal. They are not, however, conceived to be suitable to either purpose at present, and have never been so occupied by this department. I therefore concur entirely in the opinion of the Chief Engineer that it is not likely they will ever be useful to the United States for any military purpose.

An entire relinquishment of the whole establishment on the part of the United States would not, it is believed, be productive of any injury to the public service, because no use whatever has been made of it by the United States for many years past, and it is not probable that it will or can be converted to any beneficial military purpose hereafter.

The question whether a retrocession of the lands to the State of South Carolina should be accompanied with a free grant of the public buildings thereon is one which this department conceives to be beyond its province to express an opinion upon.

I have the honor to be, sir, very respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance Service.*

HON. JAMES BARBOUR.

No. 324.

[1ST SESSION.]

ON THE ERECTION OF AN ARSENAL AT ST. LOUIS, MISSOURI.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 21, 1826.

Mr. HAMILTON, from the Committee on Military Affairs, who were instructed to inquire into the expediency of authorizing the erection of an arsenal at St. Louis, Missouri, reported:

ORDNANCE DEPARTMENT, *Washington, January 25, 1826.*

SIR: In answer to the letter of the honorable chairman of the Committee on Military Affairs, relative to the "expediency of establishing an arsenal at or near St. Louis," which you have referred to this department, I have the honor to state that an arsenal at St. Louis, or in the vicinity, is considered to be very necessary at this time.

All the military posts on the Missouri and the Upper Mississippi rivers must be supplied from a depot in that section of country. Many of those posts are so remote that the supplies annually sent to them are forwarded from St. Louis early in the spring, commonly in the month of March. For this reason it is necessary that the supplies should be placed in depot at St. Louis the previous autumn.

It was found necessary immediately after the close of the late war, in 1815, to establish a military depot in that section of country for the supply of the new posts then about to be established in that quarter. An old cantonment, consisting entirely of log buildings, at Bellefontaine, on the Missouri, five miles from its junction with the Mississippi, was made use of for the purpose. This position was soon found to be very unsuitable and inconvenient. The town of St. Louis, which is twenty-three miles distant, had of necessity to be resorted to whenever boats were required to transport supplies to any of the upper posts; and the approach to Bellefontaine by water is very difficult, if not dangerous.

It was proposed as early as 1816 to erect a permanent establishment nearer to St. Louis, but as the stores were already deposited at Bellefontaine, and as that place could be made to answer for a time, nothing further appears to have been done than to explore the country with a view to select a suitable site.

The inconvenience of Bellefontaine has proved so manifest, that storehouses have been rented in the town of St. Louis for several years past for the storage of all such military supplies as were destined for an early shipment to the upper posts.

The reason, however, why a new establishment is expressly called for by the exigencies of the service at the present time is, that the log buildings at Bellefontaine have become so much decayed that a part of them have recently fallen down, and the remainder are so rotten that they can be kept up but a little longer. There is a considerable quantity of arms and other military stores now at Bellefontaine, which are so insecurely sheltered in these log buildings that it is feared they will suffer material injury if not soon better provided for.

A position in the immediate vicinity of St. Louis is preferred, because it is the only principal place of business between the Ohio and Missouri rivers. It is the place of deposit and of departure for all supplies destined for the remote regions on the Upper Mississippi and Missouri rivers, whether military stores or articles of merchandise and trade. It is the place, therefore, which possesses the most abundant means of transporting supplies, and would be resorted to for that purpose even if the arsenal should be established at a distance from it.

An extensive establishment is not considered necessary at St. Louis. One suitable for the exigencies of the service in that section of country, it is conceived, would consist of the following, viz: one building for an arsenal, to be about thirty by eighty feet, to contain small arms, accoutrements, and artillery equipments; a magazine for gunpowder and ammunition; a dwelling-house for an officer and a military store-keeper; two small workshops for repairing arms, fixing ammunition, &c.; a small building for a few artificers and laborers; a shed for artillery carriages, and a storehouse about twenty-six by sixty feet, with a wharf adjoining. The latter will be required more particularly for the subsistence and quartermaster's departments, and will be used for the reception and storage of packages in bulk received from the interior, and designed for transmission in the same State to the frontier posts. An establishment upon this scale, it is believed, would be found sufficient for the present exigencies of the service. It

would, however, be advisable to secure a site of sufficient extent, and to arrange the buildings in such manner as to admit of any future extension of the works which the exigencies of the service may hereafter render necessary.

The data for an accurate estimate of the cost of such an establishment are not at hand. But it is supposed that the entire cost of it, including the purchase of a suitable site, would not exceed \$35,000. About \$15,000 would probably be required for the expenditures of the first year.

I have the honor to be, respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance Service.*

HON. JAMES BARBOUR, *Secretary of War.*

CONGRESS HALL, *March 8, 1826.*

DEAR SIR: I am now prepared to answer your inquiry—at what price lands in the neighborhood of St. Louis, Missouri, suitable on which to erect an arsenal, could be purchased?

I enclose you the letters of General William Clark and Major A. L. Langham, both gentlemen of character, resident at St. Louis. I have also conversed with General Bissel, who agrees with them in opinion. I also concur that the purchase can be made for not exceeding fifty dollars per acre.

Your obedient servant,

JOHN SCOTT.

HON. JAMES HAMILTON, *Chairman of the Committee on Military Affairs.*

WASHINGTON CITY, *March 7, 1826.*

DEAR SIR: In reply to your inquiry, at what price lands in the neighborhood of St. Louis, suitable on which to erect an arsenal, can be purchased, I can say that I believe the most suitable place on the river for such an establishment, about two and a half miles above the city, could be had for fifty dollars per acre.

I have the honor to be, respectfully, your obedient servant,

WM. CLARK.

HON. JOHN SCOTT.

WASHINGTON CITY, *March 6, 1826.*

SIR: In answer to your inquiry concerning the price of land in the vicinity of St. Louis, I have the honor of stating that twenty or twenty-five dollars would be considered a good price for unimproved land situated more than one mile from the city.

Respectfully, your obedient servant,

A. L. LANGHAM.

HON. JOHN SCOTT.

Mr. BENTON laid the following letter on the table :

WASHINGTON CITY, *March 20, 1826.*

SIR: In answer to your letter of this day's date, inquiring "if I did not, under the orders of the Department of War, make a reservation of certain public grounds in the town of St. Louis for military purposes, and to give you my opinion about reserving them for such purposes," I have to say that about the year 1821 I received instructions from the Secretary of War to examine the public grounds in the town of St. Louis, and to reserve such lots as I might deem necessary for military purposes, in order that the school committee of that town might take possession of the residue of the grounds for school purposes, agreeably to the act of 1812. Under these instructions, I reserved a lot, called the Bastion lot, and a strip of ground running from thence to the river, together with a strip of land extending down the river bank. Subsequently to that time I informed the Secretary of War and the school committee that I did not consider that the Bastion lot would be wanted for military purposes, as it had become too much enclosed by the erection of buildings near it. I am now of opinion that no part of the public grounds in the town of St. Louis will be wanted for military purposes, and recommend that the part not already given to the school committee be given to the corporate authorities of the city.

With very great respect, sir, I have the honor to be your most obedient servant,

H. ATKINSON, *Brigadier General United States Army.*

HON. THOS. H. BENTON, *United States Senate.*

ST. LOUIS, *December 8, 1824.*

SIR: I am informed that Major Biddle has addressed a letter to you on the subject of erecting a depot for military property in this section of country, and it has been suggested that as I had been in the Ordnance department, engaged in such duty for several years, a communication from me would not be deemed intrusive by you. Under this impression I take the liberty of making the following observations:

When in Washington city in August last I was required to visit Bellefontaine and report the condi-

tion of the ordnance property there. I took an opportunity to do so, and found it suffering damage from the insufficiency of the buildings to protect it from the weather. You are no doubt aware they are old log huts, the site of which is disadvantageous, being so far removed from the usual resort of river craft, and the danger to be encountered on the river between St. Louis and Bellefontaine is very great, so much so that the quartermaster has to hire a storehouse in the former place.

It is well known that where vessels resort for freight transportation is cheaper, even if no additional risk is to be encountered by going to a place not frequented in ordinary.

The military property at Bellefontaine is of considerable value. It must perish in a given time if kept in the buildings it is in at present.

If it is removed to the nearest depot for ordnance stores it will cost as much as it is worth.

It is required in this section of the country, and consequently it or similar property must be retransported when wanted at any of the upper posts or by passing detachments of troops.

At present arms, &c., partially damaged have to remain useless to the government, daily becoming more damaged, or to be transported at great cost to a place where they can be repaired.

The State of Missouri will derive benefit from the location of an ordnance depot in its territory, inasmuch as it will at all times have within its bosom means of arming and equipping its militia and volunteers.

The vicinity of the location will derive benefit from the disbursements incidental thereto, and also from the introduction of artisans, such as armorers, smiths, wheelwrights, carpenters, &c., indispensable at an ordnance depot.

I have made some inquiries touching the cost of building here, and am induced to believe that from \$35,000 to \$45,000 would be amply sufficient to erect a depot for the supply of this section of country for many years to come.

As the present session of Congress will be short, it might be advisable to make a partial appropriation for the purchase of a site and materials, say \$20,000.

I trust this communication, made in haste, in the midst of other avocations, will be viewed favorably and received as it is intended, an effort to benefit the section of country so highly favored by nature as the State of Missouri.

I have the honor to be, sir, your obedient servant,

M. THOMAS, *Lieutenant United States Army.*

Hon. T. H. BENTON, *United States Senate.*

19TH CONGRESS.]

No. 325. .

[1ST SESSION.]

RELATIVE TO THE PURCHASE OF ADDITIONAL LAND FOR THE SITE OF THE ARSENAL  
AT WATERVLIET, NEW YORK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 24, 1826.

Mr. HAMILTON, from the Committee on Military Affairs, to whom the subject was referred, reported:

The Committee on Military Affairs, to whom was referred the resolution of this House "instructing them to inquire into the expediency of authorizing the purchase of additional land for the arsenal at Watervliet," beg leave to report the documents which they have received from the War Department on this subject, together with a bill to carry the proposed object into effect.

DEPARTMENT OF WAR, *March 23, 1826.*

SIR: In reply to your inquiries contained in your letter of the 21st instant, respecting the additional land recommended to be purchased for the arsenal at Watervliet, I transmit herewith a report of the Colonel of Ordnance, with accompanying documents, which gives all the information in this department in relation to your inquiry.

I have the honor to be your obedient servant,

JAMES BARBOUR.

Hon. J. HAMILTON, Jr., *Chairman of Military Committee, House of Representatives.*

ORDNANCE DEPARTMENT, *Washington, March 22, 1826.*

SIR: In answer to the inquiry of the honorable chairman of the Committee on Military Affairs, I have the honor to state that additional ground for the arsenal at Watervliet is considered essentially necessary for the proper management of that establishment.

The New York canal passes through the present site, and has changed the character and greatly extended the importance of this position. At the last session of Congress appropriations for additional buildings were made, but the erection of one of them (the magazine) has been suspended, with a view to obtain additional ground upon which to build it. The limits of the present site are too much contracted to admit of placing all the new buildings upon it with safety. If the magazine be placed anywhere on the present site it would be very dangerous, for, in the event of an explosion, the whole of the United States establishment there, as well as the adjoining villages, must suffer total destruction. There are already two small magazines within the present limits, which will be appropriated to other purposes as soon as a new magazine is erected. The necessity for an immediate purchase of this ground will be more

apparent when it is considered that the longer it is deferred the more pressing may be the want of it; while the flourishing villages which are growing up on each side of the arsenal, and are approaching the present limits of the site, may render a future purchase very difficult, if not impracticable.

I transmit herewith extracts from letters upon this subject which have passed between this department and the officer who commands at Watervliet, which show more fully the importance and necessity of the purchase contemplated.

I transmit also a sketch of the present site, exhibiting the position of the several buildings heretofore erected upon it, and also the boundaries of the additional ground now proposed to be purchased.

I have the honor to be, sir, very respectfully, your obedient servant,

GEO. BOMFORD, *Brevet Colonel, on Ordnance Service.*

HON. JAMES BARBOUR.

---

*Extract from a letter of the officer commanding the arsenal at Watervliet, transmitting estimates for additional buildings at that post.*

ARSENAL, WATERVLIET, *November 4, 1824.*

SIR: The location of these buildings is a matter of some importance, particularly of the magazine. If no additional ground can be procured, the hill north of the old magazine is the only spot left for a new one, and the arsenal should be placed on the west side of the canal, not more than eighty feet from the water, and opposite the space between the two gun-houses.

I should, however, prefer to purchase additional land adjoining our south line.

A piece extending west seventeen and a half chains embraces at its western extremity a high knoll of more than one acre, the surface of which is above the level of the old magazine wall and higher than the top of the arsenal. The price of this land is exorbitant, being five hundred dollars per acre.

As we must at some future day have our limits much extended, it may be true economy at this time to purchase fifty or one hundred acres of land near this place and make all our improvements upon it, or extend our limits southerly as far as may be deemed proper, taking such a quantity of land as will preclude the necessity for any future purchase.

Colonel G. BOMFORD.

---

*Extract of a letter from the Ordnance department to the commanding officer of the arsenal at Watervliet.*

ORDNANCE DEPARTMENT, *Washington, March 25, 1825.*

SIR: In the appropriations for this year \$26,000 was allotted to the building of an arsenal and magazine at Watervliet, viz: \$18,500 for the arsenal and \$7,500 for the magazine. The item for the purchase of land was not embraced in the estimate from this department. Although it is desirable that the magazine should be placed at a greater distance from the other buildings than the present limit of the public ground will admit, yet the price asked for the land is considered so exorbitant as to preclude the idea of purchasing it. It was for this reason that no appropriation was asked for the purchase of land.

The proprietor of the ground will perceive, in the determination to place the buildings within the present limits, a disposition not to accede to the extravagant demands which are made for the adjacent lands. He may be thereby induced to offer his land at a reasonable rate. You will please to ascertain whether he will do so, and if he will, I will submit the subject to the Secretary of War with a view to effect some arrangement by which the land can be procured.

If no additional ground can be procured, the position which you mention for the magazine appears to be best suited to the purpose; the position for the arsenal also appears to be well chosen.

Major G. TALCOTT.

---

*From Major G. Talcott to the Ordnance department.*

ARSENAL, WATERVLIET, *April 12, 1825.*

SIR: In reply to your communication of the 25th ultimo, I have to state that I have procured from the owner of the land adjoining us on the south and west an offer in writing of any quantity that the government may require, (not exceeding forty acres,) at \$300 per acre.

This is the lowest price which he can be induced to take, and he has reduced it thus low to influence us in the location of the magazine, for if it should be placed on the northern side of our grounds it would materially affect the value of his lots in that quarter.

The village above us is becoming large, the main street exhibits scarcely a vacant lot on the west side, and there are men of good judgment who believe that the place will at no distant period be much increased in extent. A basin is to be constructed along the margin of the river from which the canal boats can pass their cargoes into sloops, saving much expense; and as freight from Troy to New York is as cheap as from Albany, it is evident that goods can be forwarded and produce returned through this channel at a lower rate than by way of Albany; and when the sloops give place to steam tow-boats this village will be connected with Troy by a bridge and increase in consequence.

A large timber shed or two smaller ones are necessary, as stated under date of 28th ultimo; and by clearing the north gun-house of timber, the artillery carriages (which now occupy all the shed room on both sides of the two gun-houses) can be deposited under proper cover, leaving the sheds to be occupied by the cannon and shot that are now exposed to the weather.

The buildings to be erected consist, then, of an arsenal, a magazine, and one or two timber sheds.

To procure a small quantity of land, sufficient only for the site of the magazine, will not suffice, even if the arsenal should be placed on the site heretofore named, for the timber sheds will occupy so much space as to hazard the safety of the establishment in cases of fire, more particularly if they should occur in very cold weather, when frost would prevent the use of engines.

Under all these circumstances, it appears most proper to purchase such an extent of ground as will suffice for all future improvements, and whether it should be had of Mr. Gibbons at \$300 or of Mr. Schuyler at \$225 per acre is the point to be decided.

The land of Mr. Schuyler lies about 1,200 yards south of us, and affords good plats for all the buildings; but the public road and canal pass through it, and it would be difficult to locate the whole of them on the west side of the canal at a suitable distance from it with the necessary space between them.

To place a part on each side would be highly objectionable.

The land of Mr. Gibbons adjoins us and affords a good site for a magazine; but it is not otherwise well situated for additional buildings unless we purchase upwards of twenty acres on the west side of the canal. Whether it would be advisable to leave the strip of ground between the canal and the river for the extension of the village in front of us is questionable. There is little doubt that the purchase of thirty or forty acres of this land would ultimately prove the most economical plan, and I believe that it cannot be had on better terms at any future period.

Colonel G. BOMFORD.

---

*From the Ordnance department to Major G. Talcott.*

ORDNANCE DEPARTMENT, Washington, August 15, 1825.

SIR: The position of the new arsenal in front of the old magazine, as heretofore mentioned, is believed, under all the circumstances of the case, to be the best that can be chosen for it. The position of the new magazine must depend upon the circumstance of getting an appropriation for additional ground. I would prefer purchasing thirty acres adjoining the present ground, and will recommend an appropriation of \$9,000 for that purpose. You will please make a provisional agreement with the proprietor of the ground for its purchase—the agreement to be binding if an appropriation is made at the next session of Congress, if otherwise to be void.

Major G. TALCOTT.

---

*Extract of a letter from Major G. Talcott to the Ordnance department.*

WATERVLIET ARSENAL, December 21, 1825.

"I have the written agreement of the owner of the land required for extending the limits of this post, by which he is obligated to sell the United States any quantity that may be desired, not exceeding forty acres, at \$300 per acre; and subsequent to the receipt of your letter dated 15th August last, he consented to our clearing the brush from the site intended for a new magazine, under the stipulation that if Congress did not appropriate funds for the purchase of land we should not be held liable for damages."

19TH CONGRESS.]

NOTE.—In the report of January 11 the number of deserters from the army for the three years ending on September 30, 1825, exclusive of the recruits, amounted to 1,837. The number now reported for the same period is less by 173; the difference is thus accounted for: 1st. The minute information enjoined by the resolution required that each company return (inspection) should be carefully examined; of these 108 are deficient. The deficiency of data, therefore, of this minute description as to time is precisely equal to a period of two years for one entire regiment. 2d. Regimental returns being composed of company monthly returns, and of the latest date on file at regimental headquarters, it not unfrequently happens that the "last company return" in the adjutant's office, at the end of the month, may have been reported in the previous regimental return. Hence the casualties incident to a company for a given month were liable to be more than once reported, which has proved to be the fact in a variety of instances when the company is stationed at a post very remote from regimental headquarters. These regimental returns, then, furnished the number of deaths and desertions for the report of January 11; but for the one now submitted, all the names borne on each separate company inspection return have been necessarily examined.\* The two results are thus seen not to be the same, because of the excess in the one case, as herein accounted for, and in the other of the deficiency of the data. The facts stated in this report, nevertheless, warrant the belief that if about 120 be added to the 1,664 deserters herein exhibited, it will vary but little, if any, from the truth.

\* In order to obtain and collate the facts exhibited in this tabular report, the names of the rank and file of the army were examined not less than 100,000 times. This circumstance may account for its protracted completion.

19TH CONGRESS.]

No. 327.

[1ST SESSION.]

## ON THE SUBJECT OF AN AUGMENTATION OF THE CORPS OF ENGINEERS OF THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 12, 1826.

WAR DEPARTMENT, *April 8, 1826.*

SIR: In conformity with the resolution of the House of Representatives of the 25th of March, 1826, directing the Secretary of War to inform the House whether any, and if any, what additions are deemed necessary to be made to the present number of the officers of the corps of military engineers for purposes strictly and exclusively military; also whether any, and if any, what additions are deemed necessary to be made to the present topographical engineers for military purposes merely; and what additions, if any, may be deemed necessary for purposes of a civil character, should a system of internal improvement by roads and canals be determined upon and prosecuted by the government, specifying the rank of the several additional officers, in both the military and topographical corps, deemed necessary for the purposes above mentioned; and that he also be required to state to the House what plan of organization of a corps of civil engineers may be deemed most proper to be adopted, should a system of internal improvement by roads and canals be determined upon by the government, specifying the number of engineers required, with their respective salaries, I have honor to make the following statement:

The department has for some time labored under considerable disadvantages from the want of a sufficient number of officers to discharge the duties assigned to the Engineer department, and in consequence thereof, a recommendation was made to Congress by the late President at the last session, and by the present President at the opening of the present session, that the officers of both corps of engineers should be increased in such a manner as to answer the pressing demands for their services.

On the 10th of January last I had the honor of addressing the chairman of the Military Committee of the House of Representatives on the subject of the proposed increase of the corps of military engineers, and the organization of the topographical into a corps similar to that of the military engineers, a copy of which letter, together with a table accompanying the same, is herewith transmitted, and to which I beg leave respectfully to refer the House as containing at length the views of the department on the subject.

The present establishment of the corps of engineers is, one colonel, one lieutenant colonel, two majors, six captains, six first and six second lieutenants; making in all twenty-two officers. It was proposed to add to the corps one brigadier general, as chief engineer, with the pay, rank, privileges, and emoluments of that grade, and gradually to increase the corps of engineers to double its present numbers, by adding three lieutenants annually from the most prominent of the graduates of the Military Academy, over and above the number requisite to fill the vacancies which might occur in its present establishment. To obtain the number required, it would take upwards of seven years, when the strength of the corps would be, one brigadier general, two colonels, two lieutenant colonels, four majors, twelve captains, twelve first and twelve second lieutenants; making an aggregate of forty-five officers. In the letter above alluded to, addressed to the chairman of the Military Committee, the necessity of the increase is detailed at length, and the table accompanying that letter furnished by the Engineer department exhibits the manner in which it is proposed to employ the officers now belonging to the corps of military engineers, and those to be added by the proposed increase; also showing the number that is actually wanted for the current demands of the service over and above what will belong to the corps each succeeding year for six years to come. In support of this recommendation for an increase of the corps of military engineers, I respectfully beg leave to lay before the House a copy of a revised Report of the Board of Engineers, which has recently been made, with a view of exhibiting in a more complete manner the system of fortifications projected for the defence of the maritime frontiers of the United States, including the Floridas, which have been acquired since the formation of the original report of February, 1821. The increase proposed may therefore be considered as necessary for purposes strictly and exclusively military.

The present number of the topographical engineers is six majors and four captains. They are all officers of the staff and not organized into a corps. It is proposed to give them a regimental form, with an organization similar to that of the present corps of engineers. The organization recommended is one colonel, one lieutenant colonel, two majors, six captains, twelve first and twelve second lieutenants; making in all thirty-four officers, which would be an increase of twenty-four subalterns.

The services of the whole of the thirty-four officers of topographical engineers might be profitably applied to objects relating exclusively to military affairs, such as the surveys of the coasts, inlets, and harbors, with a view to their defence, and to the erection of fortifications; besides these, the surveys of the frontiers of Mexico and the Canadas, and the lakes, the Indian country, and the coast of Oregon on the Pacific, all may be considered as coming within what may be termed military surveys; still, as they are not of so pressing urgency, they may be so deferred as to allow a considerable portion of the officers of the proposed corps of topographical engineers to be disposable for objects of internal improvement.

In the present state of our affairs relating to internal improvements by roads and canals, it is not deemed advisable to organize a corps of civil engineers; and, indeed, it is at least questionable whether the public service would be promoted by such a corps. The name of the corps is unimportant, as the topographical engineers would be required to perform the same service as the corps of civil engineers; but as the organization of the topographical engineers is military, it produces a responsibility resulting from the tenure of the office superior to that of civil engineers, and hence presents a guarantee of a greater fidelity in the discharge of their duties. If other views should prevail and it should be deemed indispensable hereafter to establish a distinct corps of civil engineers, the manner in which the service is now progressing will afford time and furnish materials for forming such a corps, to be selected from either corps of engineers, as the individual members thereof may exhibit the talents peculiar to the employment. It is from the Military Academy alone that we must look for those who may possess the requisite acquisitions and talent for the purposes of either the military, topographical, or civil engineers; and by deferring the subject for a few years, we may hope to be able to supply the nation with a competent corps of civil engineers to carry into effect any system of internal improvement which government should judge proper to adopt. The department, under the authority of the several laws relating to internal improvement, has employed

some civil engineers; but it is proposed not to extend any further its views in that respect, but to rely on the corps of engineers and topographical engineers, with such assistants as can be obtained from the line of the army among the graduates of the Military Academy as may be found competent to aid in the surveys directed by the government. The number of officers now employed who do not properly belong to either corps of engineers is thirty-two and three civil engineers, exclusive of General Bernard, who is placed at the head of the board. The detailing of so many officers from their duties in the line of the army has been complained of by the commandants of corps, but without their aid it would have been impossible to have executed the numerous surveys which have been directed; and the army can only be relieved from the inconvenience of furnishing so many officers by the adoption of the organization proposed for the corps of topographical engineers, which I most earnestly recommend. At this moment all the military engineers are occupied in the immediate line of their profession as such; most of the topographical engineers and all the civil engineers are employed in the objects contemplated by the several acts of Congress relating to internal improvements.

I have the honor to be, with great respect, sir, your most obedient servant,

JAMES BARBOUR.

The Hon. SPEAKER of the House of Representatives of the Congress of the United States.

WAR DEPARTMENT, *January 10, 1826.*

SIR: In compliance with the request of the Committee on Military Affairs, as communicated to me in your letter of the 5th instant, I have the honor to state the views of this department in relation to such changes in the existing organization of the corps of engineers as are deemed expedient.

The corps of engineers was created by the act of the 16th of March, 1802, entitled "An act fixing the military peace establishment," by which act the President of the United States was authorized and empowered, whenever he should deem it expedient, to organize and establish a corps of engineers, to consist of one engineer, with the pay, rank, and emoluments of a major; two assistant engineers, with the pay, rank, and emoluments of captains; two other assistant engineers, with the pay, rank, and emoluments of first lieutenants; two other engineers, with the pay, rank, and emoluments of second lieutenants; and ten cadets; and the President was in like manner authorized by the same act, whenever he should deem it proper, to make such promotions in said corps, with a view to particular merit, without regard to rank, so as not to exceed one colonel, one lieutenant colonel, two majors, four captains, four first and four second lieutenants, and so that the number of the whole corps should at no time exceed twenty officers and cadets.

The corps was organized and established on the passing of the act of the 16th of March, 1802, with its minimum numbers, and was by degrees increased to its maximum as authorized, and as the public service required, and continued so until 1812, when it was deemed expedient to make a further increase by an addition of two captains, two first and two second lieutenants, as authorized by the act of the 29th of April, 1812, "for making further provisions for the corps of engineers;" which, together with the number of officers formerly authorized, constitute the present number and organization of the corps of engineers.

The topographical engineers were first introduced into our military establishment by the act of the 3d of March, 1813, entitled "An act for the better organization of the general staff of the army of the United States," which authorized the appointment of eight topographical engineers, with the brevet rank, and pay, and emoluments of majors of cavalry, and eight assistant topographical engineers, with the brevet rank, and pay, and emoluments of captains of infantry; and by the act of the 24th of April, 1816, the number was reduced to six majors and four captains.

From a review of the condition of the country and of the duties which were imposed on the corps of engineers on its first establishment, it is evident that if the numbers which then constituted the corps were not more than sufficient to discharge the duties assigned to it, it must be inadequate to the performance of its present enlarged duties.

The officers of the corps of engineers, from 1802 to the commencement of the late war, were exclusively confined to the projection and erection of the fortifications along the seaboard and the superintendency of the Military Academy at West Point. During the period in question but few works were erected, and those of but limited extent. Since the termination of the late war a great change has taken place in the policy of the country as it regards its fortifications. The depredations committed by the enemy during the last war along our coast, by his occupying the mouths of our harbors, bays, and rivers, produced a universal sentiment at the termination of the contest of the necessity of enlarging and strengthening the defences of our maritime frontier. Partaking of this feeling, common to the country at large, Congress appropriated, in the first session after the war, \$830,000 for fortifications, on the recommendation of this department, and that a like sum should be annually appropriated until the system should be completed. During the same session Congress also authorized the employment of an assistant engineer of distinguished reputation, in order to aid in projecting the new works which experience had proved to be necessary. In order that the views of Congress might be carried fully into effect, a board of engineers was constituted to examine the whole line of the seaboard, with a view of fixing upon the sites and of forming plans and estimates for a general system of defence. To render their operations complete, the topographical engineers were placed under the orders of the board, with directions that all the important and vulnerable points be carefully surveyed previously to the projection of any works for their defence. It is manifest that, under these orders, the duties of the two corps of engineers have been greatly increased, so much so that experience has proved that their present strength is inadequate to carry fully into effect the object of those orders. To supply the deficiency the department has been compelled to detail a number of officers from other corps, and to assign them to the duties which peculiarly belong to the engineers.

Should the officers of engineers be employed in surveying the routes for roads and canals, and in improving the navigation of rivers and harbors, and in forming plans and estimates for their execution, and be charged with the superintendence of them, the present number in service will be wholly inadequate to perform the service, in addition to the discharge of their regular duties. I am therefore fully of the opinion the corps of engineers should be enlarged by degrees, by doubling its present number, agreeably

to the enclosed scheme offered by the Engineer department, which is marked A, and to which I beg leave to refer as exhibiting the gradual increase and proposed employment of the officers in each year for seven years to come, when the corps will have attained the establishment proposed; and that the topographical engineers be organized into a corps, to consist of one colonel, one lieutenant colonel, two majors, six captains, twelve first, and twelve second lieutenants.

The corps of topographical engineers, by the proposed arrangement, will be both reorganized and increased. Experience proves its present organization, composed of but two grades, consisting of six majors and four captains, to be exceedingly inconvenient; for while it gives an undue advantage in the first instance to a cadet who may be promoted into this corps, it is calculated ultimately to repress all hopes of advancement. He finds himself, when first promoted, a captain, and can never aspire beyond the rank of major. It is believed that this arrangement is highly pernicious to the corps, and ought to be corrected. - In fact, no good reason can be assigned why its organization should essentially differ from the other branches of the military service; and I have every confidence to hope, if Congress think proper to adopt the organization proposed for the corps of topographical engineers, that it will greatly improve this valuable branch of service.

In proposing to place at the head of the Engineer department a chief engineer, with the pay, rank, and emoluments of a brigadier general, I have been governed by the importance of the office, and by the principle which prevailed in the organization of the other corps of the army. In our service two regiments constitute a brigade, and is commanded by a brigadier general. The proposed organization of the corps of engineers and topographical engineers, with the addition of the Military Academy, which is attached to the former, would be more than an equivalent to two regiments, and upon principle ought to be commanded by an officer of the grade proposed. In fact, it can scarcely be supposed that the corps which above all others requires the highest military attainments should be so organized as to render the condition of an officer belonging to it less advantageous than in other branches of the service, which would be the case unless the chief engineer should have a rank as high as that of brigadier general at least. Should Congress deem it expedient to adopt the provision recommended for the enlargement of those corps, I should suggest the propriety of its being done gradually, at least as regards the corps of engineers. None but cadets of the highest talents and acquisitions should be appointed, and, judging from past experience, it is believed that an addition of not more than three could be made annually over and above what would be necessary to fill the vacancies which occur—that being about the average which the graduating classes at the Military Academy furnish, possessed of the suitable talent and acquisition for the engineer service. Supposing the corps of engineers should be increased as recommended, it would require at least seven years to complete the establishment. From the pressing demands for the services of the topographical engineers, the whole or a great part of the officers proposed to form the corps might be immediately appointed, should it be deemed expedient, from the officers of the artillery and infantry who have been graduated at West Point, and who have been engaged in topographical duties and found to possess the requisite qualifications.

I conceive it my duty to seize this occasion for suggesting the propriety of placing the two corps of engineers, with regard to their pay and emoluments, on the same footing with the other branches of the staff. They are now paid, with the exception of the majors of the topographical engineers, as officers of infantry, while all other officers of the staff, including those detailed for ordnance duty, receive that of cavalry. The reasons for giving a higher pay to staff officers than to those of the line apply with full force to the officers of the corps of engineers and topographical engineers, namely, that of being placed on detached duty, which exposes them to greater expenses than those of the line, who usually live in garrisons and camp together. Great inconvenience has been felt by the officers of the corps from the smallness of their pay. From this cause the officers of the corps of engineers in particular stationed on the Gulf of Mexico find their pay inadequate to their support, with the most rigid economy.

At present there is a paymaster provided for, to be taken from the subalterns of the corps of engineers, whose duty it is to pay that corps. It would be an improvement to repeal so much of the act of the 29th of April, 1812, as provides for the appointment of a paymaster to the corps of engineers, and in lieu of it to provide for an additional paymaster of the army, so as to relieve the corps from furnishing a paymaster, and to prevent any distinction in the officers of the pay department.

In order more clearly to set forth all the changes and improvements contemplated by this letter, I beg leave to refer you to the accompanying project of a bill for increasing the corps of engineers, and for organizing the topographical engineers into a corps.

I have the honor, &c.,

JAMES BARBOUR.

Hon. JAMES HAMILTON, *Chairman of the Military Committee, &c.*

*Project of a bill providing for the general increase of the corps of engineers, for organizing a corps of topographical engineers, and for other purposes.*

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States in Congress assembled,* That the President of the United States be, and he is hereby, authorized, whenever he shall deem it expedient, to increase the number of officers of the corps of engineers, and to organize the topographical engineers and assistant topographical engineers, in the manner hereinafter described, that is to say: that there be added to the corps of engineers one chief engineer, with the pay, rank, privileges, and emoluments of a brigadier general, one colonel, one lieutenant colonel, two majors, six captains, six first and six second lieutenants. That the chief engineer, in addition to his other duties, shall be inspector general of fortifications, and of the Military Academy, and shall have the privilege of selecting, with the approbation of the Secretary of War, an officer from the corps of engineers, who shall assist him in his office and in inspections of the fortifications and the Military Academy, and which officer shall be entitled to and receive when so employed the pay and emoluments of a lieutenant colonel of engineers: *Provided,* The officer so selected should at the time receive pay and emoluments less than those appertaining to that rank, and provided he shall receive no other pay as an officer of the corps of engineers than that of lieutenant colonel. That the topographical engineers and assistant topographical engineers may, as soon as the President of the

United States shall deem it expedient, be formed into a corps, to be styled the corps of topographical engineers, to consist of one colonel, one lieutenant colonel, two majors, six captains, twelve first and twelve second lieutenants: *Provided*, That no appointments shall hereafter be made in either corps of engineers except from the graduates of the Military Academy, and that not more than three lieutenants shall be added to the corps of engineers annually, over and above the number necessary to fill the vacancies which may occur in the said corps, until the whole corps shall take the form and organization above prescribed; and that promotion in the corps of topographical engineers be made with a view to particular merit, without regard to rank, as is now established in the corps of engineers.

SEC. 2. *And be it further enacted*, That the pay and emoluments of the officers of each of the said corps shall be equal to those allowed to the officers of light dragoons, under the act of the 12th of April, 1808, except so far as it relates to the rations allowed to subalterns by said act, in lieu of which the lieutenants of both corps of engineers shall be entitled to receive the same subsistence as is now allowed to subalterns of the other corps of the army; and that in cases in which forage is not drawn in kind, the officers of the said corps shall be entitled to receive in lieu thereof eight dollars per month for each horse which said officers may by their rank be entitled respectively to keep.

SEC. 3. *And be it further enacted*, That so much of the act passed the twenty-ninth day of April eighteen hundred and twelve, entitled "an act making further provision for the corps of engineers," as provides that one paymaster shall be taken from the subalterns of the corps of engineers be, and the same is hereby, repealed, and that the paymaster so authorized and provided be attached to the pay department, and be in every respect placed on the footing of other paymasters of the army.

SEC. 4. *And be it further enacted*, That the officers authorized to be appointed by this act be subject to the rules and articles of war, as they are now or may hereafter be established.

SEC. 5. *And be it further enacted*, That all letters and packets to and from the chief engineer, which may relate to his official duties, shall be free from postage.

---

ENGINEER DEPARTMENT, *Washington, January 10, 1826.*

SIR: In compliance with your instructions I have the honor to submit to you, herewith, a table showing the disposition of the officers of the corps of engineers now employed, and also the number of officers requisite to answer the demands of the public service for the present year; and in like manner showing how those officers might be employed for seven years to come, if the corps of engineers were to be gradually increased to double its present number, by an annual addition of three of them of the graduated cadets of the Military Academy, that being the supposed number which would be furnished from that institution over and above what would be required to fill the vacancies which would probably take place in the corps of engineers and the corps of topographical engineers, and at the same time supply the number of graduates requisite to fill the vacancies in the regiments of infantry and artillery.

The corps of topographical engineers, to consist of one colonel, one lieutenant colonel, two majors, six captains, twelve first and twelve second lieutenants, might be immediately supplied with the requisite number of lieutenants from the officers of artillery and infantry who have been employed on topographical duty, and found to possess the requisite talent and information, and from the other graduates, now serving in the army, who are known to possess suitable talent and qualifications to give to the topographical engineers the proposed organization. The corps might be filled to advantage on the passage of the act, and be properly employed in the surveys of the coast and harbors and of the sites for fortifications, and also surveys of such roads and canals and other internal improvements and explorations as government should think proper to direct. The whole number proposed is not more than sufficient to perform the duties which are now marked out for them.

I have, &c.,

ALEX. MACOMB, *Major General, Chief Engineer.*

HON. JAMES BARBOUR, *Secretary of War.*

A.—Table showing the distribution as now existing, and as contemplated for the year 1826, of the corps of engineers, consisting of one colonel, one lieutenant colonel, two majors, six captains, six first lieutenants, and six second lieutenants—in all twenty-two officers, besides four brevet officers, which, included, makes the whole number in service twenty-six; also showing what the distribution would be in each year during the progress of enlarging the corps, by adding to it annually from the graduates of the Military Academy until the whole number should amount to forty-five, the number to which the corps would be enlarged should the addition recommended of one brigadier general, one colonel, one lieutenant colonel, two majors, six captains, six first lieutenants, and six second lieutenants be provided.

REMARKS.—It will be perceived by this table that, although the number of officers would be progressively increased in each year until, in the year 1831, it would amount to the number to which it is recommended that the corps should be enlarged, there is no year within that period in which the strength of the corps would be adequate to afford the number of officers deemed requisite for the service even of the fortifications; and that, at the expiration of the period stated, a number of the fortifications now projected will not have been commenced. With the number of officers that would be at disposal in the several years during the progress of the gradual extension of the corps, agreeably to the project proposed for its increase, it would, however, be practicable to give proper attention to the fortifications, and also furnish the officers requisite for the direction of the several objects connected with internal improvements, which are stated in the table, by employing persons to superintend the details of the operations. Should the employment of such persons be found to be less advantageous to the public interest than to have the duties proposed to be confided to them performed by engineers, a further enlargement of the corps might be determined on, after the completion of the project now proposed for its increase; but it would not be advisable to provide for a greater increase at this time, as the Military Academy, upon its present establishment, could not, without prejudice to other branches of the army, furnish the number of graduates requisite to fulfil such an object.

The organization proposed for the topographical engineers would probably take effect immediately, by the transfer of officers of artillery and infantry who have been on topographical duty, and have acquired the requisite qualifications. It is not deemed necessary to show the particular objects upon which the topographical engineers would be immediately or prospectively employed, as the whole corps, increased to the extent recommended, would be constantly and profitably employed in surveys, &c., relating to the general objects above stated.

The field officers to be employed in the office of the chief engineer, on the board of engineers, in the superintendance of districts and fortifications of the largest class, and in inspections; the captains in the superintendance of construction, and the lieutenants as assistants; the topographical engineers to be employed in making general and particular surveys, and in preparing charts and maps of the coast and interior for fortifications and internal improvements.

## REVISED REPORT OF THE BOARD OF ENGINEERS ON THE DEFENCE OF THE SEABOARD.

WASHINGTON, *March 24, 1826.*

SIR: In the report now respectfully submitted, in compliance with the order of the Engineer department of the 25th ult., the board of engineers have attempted to enforce all those leading principles which relate to the defence of the maritime frontier of the United States. In doing this, in describing briefly the several sections of the coast, and in applying those principles to the local peculiarities thus developed, the board have been unavoidably led to a repetition of much that is contained in their previous reports. The tenor of the order under which this report has been drawn will, however, cover this objection if it be one, while the report will have the decided advantage of presenting the prominent features of the whole subject from a single point of view, and serving at the same time as an index to the minute details comprehended in previous communications.

The following is a copy of the order above referred to:

“ENGINEER DEPARTMENT, *Washington, February 25, 1826.*”

“GENTLEMEN: As much information with regard to the maritime frontier has been obtained since the report of the board of February 7, 1821, was made, it is the desire of the Secretary of War that a revision of that report, and a new examination of the subject of the defence of the seaboard, including the Floridas, which have since been added to the Union, should be undertaken, with a view to the classification of the several works, including those which have been constructed and those which will probably be necessary to be constructed; and also stating what works may be included in the general system which were constructed before the formation of the board.

“It is desirable that the report be as full and explicit as possible, setting forth the size, number of guns, garrisons for peace and war, cost, objects to be defended, and the advantages to be derived from their position in a military and commercial point of view. The militia that may be assembled within a reasonable time for assisting in the defence of the several positions, and including in general everything that is worthy of consideration in the general estimate of the defence of the seaboard and country adjacent or dependent thereon.

“I have the honor to be, gentlemen, &c.,

“ALEX. MACOMB, *Major General, Chief Engineer.*”

“Gen. BERNARD and Col. TOTTEN, *Board of Engineers.*”

The United States, separated from the rest of the world by an ocean on one hand and a vast wilderness on the other, pursuing towards all nations a policy strikingly characterized by its pacific tendency, its impartiality and justice; contracting no political alliances, confining her intercourse with the rest of the world rigidly to the letter of such temporary arrangements as are dictated by reciprocal commercial interests, might at first view be regarded as too remote physically, and as politically too insulated, to be endangered by the convulsions which from time to time disturb the nations of the earth.

Neither our geographical position, however, nor our forbearance, nor the equity of our policy, can always avail us under the relation in which it is our destiny to stand to the rest of the world.

The experience of the last quarter of a century has shown that even the intercourse of traffic, much as it conduces to our prosperity, and which we might expect would cease altogether as soon as it ceased to be mutually advantageous, can be indulged only at the risk of obliging the nation occasionally to assume a belligerent attitude and of surrendering to the spirit of contention, which seems to govern nations as it does the natural man, a portion of its fruits. The certainty of the return of periods of embarrassment and strife similar in their origin to that which not long since visited the nation, affords a sufficient reason of itself for securing ourselves in the best manner against the more serious evils of those unavoidable collisions.

But the relation in which this nation stands as a great and flourishing republic to the monarchies of the transatlantic world is, in fact, the hostile array of liberty against despotism. A separating ocean, while it has hitherto prevented a warfare in which we must necessarily have been one of the parties, has not prevented the conflict of sentiment nor retarded the march of liberal principles. The governments of Europe contend with each other no longer. The personal ambition of kings; the desire of territorial aggrandizement, of augmenting national wealth; the gratification of national vanity; in short, every motive which would once suffice to deluge the earth with blood is now effectually restrained under the conviction of impending danger, common and imminent. The obvious interest the coalesced governments have in destroying or poisoning the source whence all those principles adverse to their supremacy have flowed, and in demonstrating by our disasters or our ruin the inefficiency of a popular government, affords good ground for an argument in favor of our assuming a defensive attitude, not only precautionary with reference to our security, but as the most certain prevention to hostile intention.

The progress of illumination abroad, depending, as it must, on the actual state of preparation of the public mind and on the character of the people—in both of which the several nations of Europe differ more even than in their language—must be irregular and unequal. Hence the contest for freedom will be raging with violence in one quarter before the people of another shall have fully comprehended the subject of contention, much less have understood its necessity. These partial contests, attended by vacillating success, protracted because they are partial, producing a complication of interests and alliances, diversifying and adding new excitements to our commercial engagements, enlisting on one side all our sympathies, causing us to be regarded by the other with a suspicion even provoking to hostility, can only produce a state of things more embarrassing than any this nation has yet witnessed.

And while a participation, more or less intimate, in the activity of that protracted struggle cannot be avoided, it becomes us to be prepared, as far as possible, both to avert the calamities and improve the blessings which may result.

The subject of our relations with other countries in reference to the causes of war which may grow out of them, is full of interest to the people of this country, and deserves a more profound and detailed examination. With the preceding brief remarks, however naturally suggesting themselves on approaching the subject of the defence of the country, and bearing in mind that war cannot at all times be avoided, however pacific and forbearing our policy, and that nothing will conduce more to uninterrupted peace

than that state of preparation which exposes no weak point to the hostility, and offers no gratification to the cupidity of the other nations of the earth, we proceed to consider the means and the mode of the defensive system which it is for the interest of the United States to adopt.

The means of defence for the seaboard of the United States, constituting a system, may be classed as follows: first, a navy; second, fortification; third, interior communications by land and water; and fourth, a regular army and well organized militia.

*The navy* must be provided with suitable establishments for construction and repair, stations, harbors of rendezvous, and ports of refuge, all secured by fortifications, defended by regular troops and militia, and supplied with men and materials by the lines of intercommunication. Being the only species of offensive force compatible with our political institutions, it will then be prepared to act the great part which its early achievements have promised, and to which its high destiny will lead.

*Fortifications* must close all important harbors against an enemy, and secure them to our military and commercial marine. 2d. Must deprive an enemy of all strong positions where, protected by naval superiority, he might fix permanent quarters in our territory, maintain himself during the war, and keep the whole frontier in perpetual alarm. 3d. Must cover the great cities from attack. 4th. Must prevent, as far as practicable, the great avenues of interior navigation from being blockaded at their entrance into the ocean. 5th. Must cover the coastwise and interior navigation by closing the harbors and the several inlets from the sea which intersect the lines of communication, and thereby further aid the navy in protecting the navigation of the country. And 6th. Must protect the great naval establishments.

*Interior communications* will conduct with certainty the necessary supplies of all sorts to the stations, harbors of refuge and rendezvous, and the establishments for construction and repair, for the use both of the fortifications and the navy, will greatly facilitate and expedite the concentration of military force and the transfer of troops from one point to another, insure to these also unfailing supplies of every description, and will preserve unimpaired the interchange of domestic commerce even during periods of the most active external warfare.

*The army and militia*, together with the marine, constitute the vital principle of the system.

From this sketch it is apparent that our system of defence is composed of elements whose numerous reciprocal relations with each other and with the whole constitute its excellence; one element is scarcely more dependent on another than the whole system is on any one. Withdraw the navy and the defence becomes merely passive; withdraw interior communications from the system and the navy must cease, in a measure, to be active, for want of supplies; and the fortifications can offer but a feeble resistance for want of timely reinforcements; withdraw fortifications, and there remains only a scattered and naked navy.

That element in the system of defence to which it is the more immediate duty of the board to direct their attention in this report is the fortification of the coast. It may not, therefore, be unprofitable, while on this part of the subject, to go something more into detail as to the relation of this with the other members of the system; the rather, as the reasons for some conclusions hereafter to be announced by the board will be more apparent.

It is necessary to observe in the first place that the relation of fortifications to the navy in a defensive system is that of a sheltering, succoring, power, while the relation of the latter to the former is that of an active and powerful auxiliary, and that the latter ceases to be efficient as a member of the system the moment it becomes passive, and should in no case (we allude to the navy proper) be relied on as a substitute for fortifications. This position may be easily established.

If our navy be inferior to that of the enemy, it can afford, of course, unaided by fortifications, but a feeble resistance—single ships being assailed by whole fleets. If it be equal or superior, having numerous points along an extended frontier to protect, and being unable to concentrate, because ignorant of the selected point of attack, every point must be simultaneously guarded; our separate squadrons may, therefore, be captured in detail by the concentrated fleet of the attacking power. If we attempt to concentrate under an idea that a favorite object of the enemy is foreseen, he will not fail to push his forces upon the places thus left without protection. This mode of defence is liable to the further objections of being exposed to fatal disasters, although not engaged with an enemy; and of leaving the issue of conflicts often to be determined by accident, in spite of all the efforts of courage and skill. If it were attempted to improve upon this mode, by adding temporary batteries and field-works, it would be found that, besides being weak and inadequate from their nature, the most suitable positions for these works must often be neglected under a necessary condition of the plan that the ships themselves be defended; otherwise, they must either take no part in the contest, or be destroyed by the superior adversary.

We pass over the great comparative expense of such a mode of defence, rendered clearly apparent by a little reflection, with these brief remarks, viz: that the defensive expenditures by this system will, in the first instance, greatly exceed the offensive; and that these defences, being perishable in their nature, will require frequent renewal and repairs.

The proper fortification of the coast preventing the possibility of a blockade so strict as not to offer frequent opportunities for our vessels to leave the harbors, the navy, no longer needed for passive defence, will move out upon its proper theatre of action, though inferior to the enemy, with confidence; knowing that, whether victorious, whether suffering under the violence of tempests, or whether endangered by the vicinity or the pursuit of a superior force, they can strike the extended coast of their country (avoiding the harbors and the important outlets of the country where alone a blockading force may be supposed to lie) at numerous points where succour and protection await them. Hovering around the flanks and rear of blockading fleets, and recapturing their prizes; falling upon portions of these fleets separated for minor objects or by stress of weather; watching the movements of convoys to capture straggling vessels; breaking up or restraining the enemy's commerce in distant seas; meeting by concert at distant points, and falling in mass upon his smaller squadrons, or upon his colonial possessions, and even levying contributions in the unprotected ports; blockading for a time the narrow seas, and harassing the coasting commerce of the enemy's home—these are objects which our own history shows may be accomplished, although contending against a nation whose marine has never been paralleled as to force and efficiency, with a navy apparently, as to numbers, insignificant. Our own history shows, besides, that the reason why our infant navy did not accomplish still more was that the enemy, being able to occupy unfortified harbors, was enabled to enforce a blockade so strict as to confine a portion within our waters. That this portion—indeed that all—was not captured is to be attributed solely to a respect—so misplaced that it could only have been the fruit of ignorance—for the then existing fortifications; a result, notwithstanding, amply compensating the nation for the cost of these works.

It would be difficult, nay, impossible, to estimate the full value of the results following the career of our navy, when it shall have attained its state of manhood, under the favorable conditions heretofore indicated. The blockade of many and distant parts of our coast will then be impossible, or rather can then only be effected at enormous cost, and the risk of the several squadrons being successively captured or dispersed; the commerce of our adversary must be nearly withdrawn from the ocean, or it must be convoyed—not by a few vessels—but by powerful fleets. In fine, the war, instead of resulting in the conflagration or pillage of our cities and towns; in the destruction of our scattered and embayed navy, and the extensive establishments pertaining to it; in the interruption of all commercial intercourse between the several sections of the frontier; in the frequent harassing and expensive assemblage of the militia forces, thereby greatly lessening the products of industry, and infusing amongst this most valuable portion of our population the fatal diseases and the demoralizing habits of a camp life; in the copious flow of blood which a war raging at the doors of freemen must cause; and in a natural despondency, unavoidably consequent, and leading, perhaps, as a lesser evil, to the relinquishment of national rights;—instead of these, and the innumerable other evils attendant upon a conflict within our borders, we shall find the war, and all its terrors, shut out from our territories by our fortresses, and transferred by our navy to the bosom of the ocean, or even to the country of the enemy, should he, relying on a different system, have neglected to fortify the avenues by which he is assailable. Our wars thus becoming maritime will be less costly in men and money, and more in unison with our institutions—leaving untouched our domestic relations, our industry, and our internal financial resources.

It is truly an axiom in military science, and one fully illustrated by military history, that the worst mode of waging war, although strictly defensive, is to allow its field of action to be within the borders, and that the best is that which most frequently assumes an offensive attitude. In our case, war can only be excluded from our territory by fortifications; and we can only assume the offensive through our navy. The construction of the former secures the means of creating, equipping, and repairing the latter, and leaves it unincumbered with duties which it imperfectly performs, to the full exercise of its important and appropriate functions.

Since the great improvement in the implements and the tactics of armies, war has cost less in men and more in money than it did in earlier times. But though it is less profuse of blood now a days, losses of this sort are more severely felt, because of the great multiplication of the branches of productive industry, which, affording employment for a greater proportion of the population, leaves a lesser disposable for war; and on the other hand, if it is more expensive in money, the existing system of finance, founded on the resources afforded by the creation of new wants and the development of new species of industry, produce more ample means than were possessed by the people of the earlier ages. That nation, therefore, which consumes the smallest portion of its disposable population, and which is the least liable to have the regular operations of its laboring classes disturbed by its quarrels, will enjoy a decided superiority over every other, and as the art of war is now carried among all civilized nations to the same degree of perfection, that nation must triumph which can longest keep the field, possessed of these means of warfare. And as the destruction of men will thereby be always less, and the resources derived from industry always greater, the advantage must always rest, everything else being equal, with the country which, from its geographical situation and its natural and artificial strength, is most secure from invasion.

Should France ever regain for boundaries the Alps, the Pyrenees, the sea, the marshes of Holland, and the Rhine, for which she has so continually labored, accessions of great value to her in her relations with Italy, with Spain, and with the powers of Germany, (countries then entirely open to offensive operations on her part,) still her situation would be greatly inferior, under this point of view, to the insular situation of Great Britain.

Since the union, which put an end to all invasion except by sea, England has effectually guarded herself by perseverance in the augmentation of her navy and in the maintenance and increase of her coast defences, and it is to this system, more perhaps than to her institutions, that England owes her present elevated rank. Securely relying for protection on the defence the government had wisely provided, her population, although surrounded by enemies, calmly directed its genius, its enterprise, and its industry to the accumulation of individual wealth, giving, in return for this protection, ample means for its continuance, and enabling the government, by disbursements beyond all parallel, in actual expenses and in subsidies, to ward off from their territory, and to terminate favorably in the capital of their enemy, a war which had threatened the existence of the nation.

Another advantage resulting from such a geographical position as warrants confiding the defence to coast fortification and a navy is, that the destruction of men in naval contests being much less than in those between armies, a greater number is left to carry on the ordinary and profitable pursuits of civil life. Actions on the ocean are short and decisive, and a few months are often sufficient to decide the superiority for the rest of the war. Besides that, it is rather the injury sustained by the vessels than the loss of life which closes the conflict; privations among sailors are not often severe and diseases are rare. In armies, on the contrary, the loss of men is immense; skirmishes happen daily; battles are frequent; soldiers are exposed to wants of every kind; to the inclemencies of weather, the variety of climate, and to the ravages of epidemics, more fatal than the swords of the enemy.

The terminations of the many struggles which, for a century and a half, have taken place between France and England, furnish so many striking proofs of the truth of the principle just advanced. In their long and bloody contests, the ratio of expense of men by France and England was 4 to 1, and when, in consequence of these losses, the French armies were driven back into their own territory, the discouraged people, seeing their sources of finance exhausted, and their own employments suspended, paralyzed, by their loud demands for peace at this critical juncture, the last efforts of the government, which more than once was obliged to subscribe to the hardest conditions

It is this property of inaccessibility by land at which the United States should aim, and which it may attain by well contrived permanent works and by the gradual increase of the navy.

Conceiving that we have enlarged sufficiently on this part of our subject, we shall now advert briefly to the correlative influence of fortifications and interior communications.

The most important of these communications, in reference to a system of defences are, first, such as serve to sustain, in all its activity, that portion of our domestic commerce, which, without their aid, would be interrupted by a state of war; and second, such as serve, besides their great original purposes, to conduct from the interior to the scene of war necessary supplies and timely relief. The first, which are among the most important national concerns of this nature, lie parallel to and not distant from the sea—

coast; the second, which, whenever they cross the great natural partition wall between the east and the west, are equally important, lie more remote from the coast, and sometimes nearly or quite parallel to it, but generally fall nearly at right angles to the line of the seaboard into the great estuaries, where, in some cases, their products are arrested, or whence, in others, they flow on unmingled with those of the first. To fulfil the object of the first-mentioned lines of communication it is obviously necessary to prevent an enemy from reaching them through any of the numerous inlets from the sea which they traverse, including, of course, the great inlets wherein these unite with the more interior communications. The security of these lines therefore involves the security of the other, and is in a great measure necessary to it. From what has been before stated, we infer that for the security here required we must, as in the case of cities, harbors, naval establishments, &c., look to fortifications. But it fortunately happens, as will appear in the sequel, that wherever both objects exist the works necessary for the one may easily be made to accomplish both. We will only add, in reference to the necessity of a system of defence for the protection of these lines of communication, that from the facility with which they may be broken up, and the serious evils consequent thereon, they offer great inducements to enterprises, with that object, on the part of the enemy. An aqueduct, an embankment, a tide-lock, or a dam blown up is the work of an hour, and yet would interrupt navigation for months.

The reciprocal value of interior communication to fortifications has been already distinctly stated, and is too apparent to need elucidation.

The necessity of a regular army, even in time of peace, is a principle well established by our legislation. The importance of a well organized militia is incident to the nature of our institutions, well understood by the people, and duly appreciated by the government. The board have therefore nothing to remark on these subjects, considered as general principles. They may, however, find it their duty, in a succeeding part of this report, to venture a suggestion or two, touching the expediency of a peculiar local organization of the latter.

Before quitting the subject which has hitherto occupied their attention, the board find it convenient to be more explicit as to the sense in which they have used the terms "navy" and "fortifications." By the first they allude to that portion only of our military marine which is capable of moving in safety upon the ocean, and transferring itself speedily to distant points. Floating batteries, gun-boats, and steam batteries, they consider as pertaining to fortifications, being always useful, and sometimes indispensable as well as powerful auxiliaries. Under the term "fortifications," used as expressive of security afforded thereby to the seaboard, have been included permanent and temporary fortifications—the auxiliaries just mentioned, and both fixed and floating obstructions to the channels.

The board now proceed to a concise description of the maritime frontier, considered as a whole; after which they will examine the several sections separately, applying as they go to the defensible positions the works projected for general and local security. In this part of their report it will be necessary to refer frequently to preceding reports for details.

\* The seacoast of the United States is comprised within the 24th and 46th degrees of north latitude, and spreads over 27 degrees of longitude. The general direction of that part which lies on the Atlantic north of the peninsula of Florida is N.N.E. and S.S.W.; this peninsula stretches out from the continent in a direction a little east of south; while that part of the coast which lies on the Gulf of Mexico corresponds nearly with the 30th parallel of north latitude. Without estimating any of the indentations not properly belonging to it, and carrying our measure from point to point, wherever these breaks are at all abrupt, the line of coast may be stated to be 3,300 miles in length.

Nearly parallel with the Atlantic coast extends a chain of mountains, separating the sources of rivers, flowing on the one hand directly into the ocean, from those which run into the Gulf of St. Lawrence or Gulf of Mexico. In the most lofty portions of this chain numerous gaps afford facilities for crossing it by roads or railed ways. Occasional expansions, at high elevations or depressions of the summit, present sufficient surface to collect the water necessary for crossing by canals; and in other places the rivers themselves have severed the chain, leaving no impediments to communications of either kind. On both sides of these mountains the country presents numerous natural means of intercommunication, and facilities and inducements for the creation of artificial ones, in endless combinations.

From this description it appears that, notwithstanding the great extent of our seaboard, the safety of each section of it is a matter not devoid of interest to every portion of the people, however remote geographically, at least so long as the nation shall continue her commercial relations with the rest of the world; and, indeed, until she shall find it her interest to interdict the circulation of domestic commerce through the avenues which nature or art may have created—a commerce of inestimable value at all times, and becoming more necessary as well as more valuable on every interruption of foreign traffic.

As being in close connexion with the coast, it will be convenient to describe, briefly, in this place, that line of interior communication on which, in time of war, reliance must be placed, as the substitute for the exterior coasting navigation.

Beginning in the great bay to the north of Cape Cod, it passes over land either into Narragansett Roads, or Buzzard's bay; thence, through Long Island Sound, to the harbor of New York; thence, up the Raritan, overland to the Delaware; down this river some distance; overland to the Chesapeake; down the Chesapeake, up Hampton Roads and Elizabeth river, through the Dismal Swamp, to Albemarle sound; thence, through the low lands; swamps or sounds of the Carolinas and Georgia, to the head of the peninsula of Florida; overland to the Gulf of Mexico; and thence, through interior sounds and bays, to New Orleans. Some of the few and brief natural impediments to this extensive line have already been removed; some are rapidly disappearing before the energy of local or State enterprise; and to the residue the public attention is directed with an earnestness which leaves no reason to fear that they will not, ere long, be overcome.

† Proceeding now to a more minute examination of the coast, we find it naturally divided into four distinct parts, namely: the *northeastern*, extending from Nova Scotia to Cape Cod; the *middle*, from Cape Cod to Cape Hatteras; the *southern*, from Cape Hatteras to Cape Sable; and the *Gulf of Mexico frontier*, from Cape Sable to the mouth of the Sabine river.

° See report of 1819.

† See reports of 1820 and 1821.

We will now take them in the order in which they stand above.

THE NORTHEASTERN SECTION OF THE COAST.

The northeastern section is characterized by its serrated coast and its numerous harbors, and, though differing in these respects entirely from the other sections, is no less distinguished in its climate by the prevalence at certain seasons of dense and lasting fogs. The extent of this section, measuring where the breaks in the coast are abrupt, from point to point is about 500 miles, while a straight line from Cape Cod to Quoddy Head is hardly half that distance. The eastern half of this coast is singularly indented by deep bays, the shores being universally rocky, and having numerous islands, surrounded by deep water, which not only add to the number of harbors, but afford an interior navigation perfectly understood by the hardy sailors of the country, and measurably secured by its intricacies and the other dangers of this foggy and boisterous region from interruption by an enemy. The western half, though it has two very prominent capes and a few deep bays, is much less broken in its outline than the eastern. It is covered by a few islands in comparison, but contains, nevertheless, several excellent harbors.

\* Considering the sparseness of the population in the eastern part of the State of Maine; the little comparative value of any existing establishment there; the proximity of a province of another power, within which is situated an important post of naval rendezvous, the board think it would be inexpedient to undertake, under present circumstances at least, the defence by permanent works of any position to the east of Mount Desert island, especially as the capture of any work there whereof the strength would be proportionate to the importance of the place covered might, owing to its destitution of succor, be easily achieved by an enemy, who would not fail to profit of its situation to harass both our commercial and naval operations.

MOUNT DESERT ISLAND, † situated between Frenchman's and Penobscot bays, and centrally as respects the Kennebeck and St. Croix rivers, having a capacious and safe roadstead, affording anchorage for first-rate vessels, easily accessible from the sea, and being easily defended by batteries, offers a station superior to all others on this portion of the coast for a navy of an enemy. From this point his cruisers can act with great effect against the navigation of the eastern coast, especially that of Maine, and his enterprises of every kind can be conducted, with little loss of time, against any point he may select. These considerations, added to the advantages which would result from possessing ourselves of a naval station which would enable us to assume the offensive, should our political relations again make it necessary, in the immediate vicinity of a formidable provincial establishment of another power, together with the necessity of providing places of succor on a part of the coast where vessels are so frequently perplexed in their navigation by the prevailing fogs, lead the board to the conclusion that the fortification of this roadstead in a strong manner is indispensable. From the incomplete state of the surveys, however, they are not at present able to state the particular modes nor the expense of the defences.

PENOBSCOT BAY ‡—The next important part of this coast, proceeding westward, is Penobscot bay. Upon this bay and upon the river of the same name flowing into it are situated several flourishing towns and villages. Of the many bays which intersect this coast the Penobscot is the one which presents the greatest number of safe and extensive anchorages; their number, indeed, is such as to render it inexpedient to attempt, under present circumstances, the defence of any of them. Unless all were fortified, which would involve an expense out of all proportion to the objects secured thereby, an enemy would find all the shelter he could desire in either of the neglected harbors, while the local interests, which would be covered by the defence of either, are not regarded as being yet of sufficient amount to excite the cupidity of an enemy, especially considering the protection afforded by an establishment at Mount Desert island against all minor enterprises.

It is necessary, however, to protect the valuable commerce of the bay and river, and to afford a secure retreat for such vessels as, endangered by an enemy, may be enabled to place themselves under the protection of the works to the right or left of the bay. The lowest point at which this object can be accomplished without great expense is at the narrows of the river, opposite Bucksport, and the board have accordingly presented a project for a fort at that position, accompanied by a memoir and estimate. The expense is estimated at \$101,000.

THE SHEEP'S CUT, §—About thirty-five miles west of the Penobscot is the Sheep's Cut, a deep and capacious indentation of coast, on which, fourteen miles from the ocean, and near the head of deep water, stands the town of Wiscasset. This town is of considerable importance to the commerce of Maine, and should be fortified, the rather as the works (placed in their proper situation, from four to seven miles below the town) will cover a very excellent harbor of refuge for ships-of-war as well as merchantmen. The forts heretofore erected, namely, Fort Edgecomb and a battery opposite, are too weak, and are placed too near the town to fulfil their object. The surveys here not being completed, no projects have yet been made by the board.

THE KENNEBECK RIVER, ¶—This river, which is one of the largest in the eastern States, enters the sea nearly midway between Cape Cod and the mouth of the St. Croix. It rises near the sources of the Chaudier, a tributary of the St. Lawrence, and may one day serve as a line of operations against Quebec. The situation and extent of this river, the value of its products, and the active commerce of the flourishing town of Bath, lying about twelve miles from the sea, as well as the excellence of the harbor within its mouth, will not permit us to neglect its defence. The surveys, however, as in the case of the Sheep's Cut and Mount Desert island, being in an unfinished state, no projects have as yet been made. The present fort, which is on the west bank near the mouth, is very small, and is commanded by a ridge within pistol shot.

PORTLAND, ¶¶—A little to the northwest of Cape Elizabeth, and at the mouth of Fore river, is the town of Portland. The protection of the town, of the merchantmen, and of the ships of war which may be stationed there to guard the coast, or which may enter for safety—all of them important objects—may be secured, as an inspection of the map of the town and harbor will show, by occupying Fort Preble point, House island, Hog Island ledge, and Fish point. At the same time, if the two channels to the west and east of Hog Island ledge can be obstructed at small expense, which is hardly a matter of doubt, although some final surveys are wanting to decide this point, there will be no necessity for a battery on the ledge; and Fish point need only be occupied by such works as may be thrown up in time of war.

\* Report of 1821.

† Report of 1821.

‡ See report of 1821, and the memoir on the defences of the narrows of the Penobscot, 1825. § See report of 1821.

¶ See report of 1821.

¶¶ See reports of 1820 and 1821, and memoir on the defence of Portland, 1825.

The projects of the board contemplate the preservation of Fort Preble and Fort Scammel, and the erection of new works, having proper relations of defence with these.

The expense of the new works is stated in their estimate at \$135,000, not including the defence of the Hog Island channel, the mode of which is yet undetermined.

**PORTSMOUTH HARBOR.\***—The only good roadstead, or good harbor, between Cape Elizabeth and Cape Ann is Portsmouth harbor, within the mouth of Piscataqua river. Line-of-battle ships can ascend this river as high as Fox point, seven miles above the town of Portsmouth. Between this point and Shooting point is a branch of the river communicating with Great bay. This branch, which is one-third of a mile wide, presents, for two miles in length, an excellent cover for all sorts of vessels. This situation is sufficiently commodious for a secondary depot, designed to repair such vessels-of-war as may be constrained to seek an asylum in this river. It is too near the sea, however, for a great naval depot, and, in other respects, does not possess the advantage of Boston, as was shown in the report of 1820. Nevertheless, as Portsmouth is an excellent station, and as it is indispensable that some at least of these stations be provided with the necessary establishments for reparation, the depot in this river should be maintained.

It is to be regretted that the bay to the south of Fox point was not chosen as the site for the navy yard, instead of Fernal's island. Being where it is, it will be necessary in time of war to make such dispositions as will protect the yard from an attack from the north shore of the river. All attacks by water may be effectually prevented by defensive works at the mouth of the river.

The position of Fort Constitution must certainly, and that of Fort McCleary may possibly, be occupied by those defences; though the works themselves, especially the former, must give place to such as will be better adapted to fulfil the object. The other positions for forts are Gerrish's point, Fishing island, and Clarke's island. Some, if not all, of which must be occupied. The final surveys of this harbor, though completed, not having been before the board the projects and estimates have not been made.

**NEWBURYPORT HARBOR.†**—This is the next port south of Portsmouth. The Merrimack river, the mouth of which forms the harbor, is obstructed at its junction with the sea by a bar, on which there is at low tide but six or seven feet water. This obstruction to the use of this harbor by vessels of much draught, and the circumstance of a portion of the trade of the Merrimack being diverted to Boston by the Middlesex canal, induce the board to consider it inexpedient to fortify the harbor by permanent works.

**GLoucester Harbor.**—The board are unprepared to state to what extent and at what cost this harbor should be fortified. Its position, near the extremity of Cape Ann, and in close relation to the navigation of Massachusetts bay, indicates clearly that it is of an importance beyond what would be assigned to the value of its existing establishments. Until the necessary surveys are made the board cannot state in what degree the present fort may be made useful in the future defence of this harbor.

**BEVERLY HARBOR.‡**—Beverly is in some sort a dependency of Salem, as the channel, which is serpentine and narrow, passes within two hundred yards of Salem neck. It may be defended by temporary batteries erected thereon, and rendered utterly impassable by floating obstructions.

**SALEM.‡**—The port of Salem is distant from Marblehead harbor only two miles, being separated therefrom by a peninsula. The occupation of the extremity of Winter island (where are the ruins of Fort Pickering) on one side, and of Naugus head on the other, will effectually cover this harbor. The cost of the works projected with that view by the board is estimated at \$151,000.

**MARBLEHEAD HARBOR.§**—Besides covering in some measure the establishment at Boston, the harbors of Marblehead and Salem possess an important commerce of their own, and also afford a shelter for vessels prevented by certain winds from pursuing their course eastward, or from entering the first named port. The mode of defending Marblehead harbor proposed by the board consists in occupying on the north side the hillock which commands the present Fort Sewall (which will be superseded by the new work) and on the south the position of Jack's point. The two works will cost \$212,000.

**BOSTON HARBOR.||**—We come now to the most important harbor on the eastern section of the coast, and, considering its relation to general commerce and to the interests of the navy, to one of the most important in the Union. After a careful examination of all the necessary conditions of such a problem, the naval commissioners and board of engineers, in their joint report of 1820, gave this harbor the preference of all other positions to the east, and inclusive of New York bay and the Hudson, as the seat of the great northern naval depot; for the reasons at large of this selection, reference is made to the report of 1820. But even should the recommendation therein contained remain unsanctioned, Boston is still a city of great wealth, possesses an extensive and active commerce, and contains already within its harbor an establishment on which great reliance is placed to give growth and energy to our navy. Excepting Boston, indeed, and its establishments, the eastern coast presents no objects to an enemy of such importance as to induce him to direct against them any operations which would very materially influence the results of a war. The principal towns and the mouths of the great communications with the interior being fortified, the country woody and hilly, abounding in defiles, cut up by enclosures, and defended by a brave, vigorous, and enterprising people, presents so many obstacles, that no attempts, not merely predatory, can be anticipated. On the contrary, the people, undisturbed by apprehensions for their homes, having numerous and excellent sailors, a great number of safe anchorages along their coast, and a great depot of wealth at Boston to animate and sustain every species of enterprise on the ocean, may well be expected to take an active offensive part in any future war.

The present forts in Boston harbor defend merely the interior basin from attacks by water. But as it often happens that vessels enter Nantasket Roads with a wind too scant to pass the Narrows, or are detained in President Roads by light winds or an adverse tide, (as the former, especially, is a very convenient anchorage from whence to proceed to sea, and, above all, as Nantasket Roads affords the best possible station for a blockading squadron,) it is deemed indispensable to place permanent defences at the mouth of the harbor. The project of defence proposed by the board contemplates leaving the existing works as a second barrier; placing a permanent fort on George's island; another at Nantasket Head, having two advanced works on the head, and one on Hog island; reducing the altitude of Gallop island, to destroy its command over George's island, and filling up the Broad Sound channel so as to leave no passage for ships-of-war. These works will cost \$1,279,429 51. Besides the works of a permanent character, it will be necessary on the beginning of a war to erect temporary works upon Point Aldaton, Ped-

dock's island, Lovell's island, Apple island, Noddle island, the heights near the north end of Chelsea bridge, and the neck near the termination of Middlesex canal. For the particular objects of the several works enumerated above, the board refer to the memoir on the defence of Boston harbor of 1823.

PLYMOUTH AND PROVINCETOWN HARBORS.\*—These are the only harbors on the eastern coast south of Boston. They have a commerce of some consequence of their own; but they are particularly interesting in reference to the port of Boston, and to the transition from the middle to the eastern section of the coast, in which respects they would become still more important should the proposed canal from Buzzard's to Barnstable bay ever be executed. While these harbors are undefended, an enemy's squadron blockading Massachusetts bay has ports of refuge under his lee of which he would not fail to avail himself to maintain his blockade throughout the most stormy seasons, knowing that the winds which would compel him to seek shelter would be adverse to outward bound, and fatal, should they venture near the coast, to inward bound vessels.

In possession of these harbors, the enemy would have, in fine, constantly under his eye the harbor of Boston, the passage outside of Cape Cod, and that through the canal.

To these considerations, going to establish the necessity of securing them by proper defences, we must not omit to add that, without the shelter now afforded by these ports, an enemy would be unable to enforce a rigorous investment. In the first place, he would be often deterred from taking a station near the land, lest he might be caught embayed by the violent easterly winds prevailing at certain seasons; in the next place, he would always seek a good offing on every indication of these winds, thereby leaving a clear coast to be improved by our vessels at the first instant of a change of weather; and lastly, our vessels, being cut off from Boston by the position of the enemy, or constrained by adverse winds to deviate from their course, would find to the south a shelter equivalent to that provided at the north by the defence of Marblehead, Salem, Gloucester, and Portsmouth.

The board have not been able to make projects for the defence of these harbors, the surveys not being completed.

Should the proposed canal above mentioned be executed, it will be necessary to place a small work near each of its outlets to prevent the destruction of the means by which the transit of vessels in and out of the canal must be accomplished.

#### MIDDLE SECTION OF THE COAST.†

The coast between Cape Cod and Cape Hatteras differs from the northeastern section in possessing fewer harbors, in having but little rocky and a great proportion of sandy shore, in which it resembles the southern section in its milder climate and in its clearer atmosphere, and it differs from all the other portions in the depth and magnitude of its interior seas and sounds, and in the distance to which deep tide navigation extends up its numerous large rivers.

The circuit of the coast, not including the shores of the great bays, measures 650 miles, while a straight line from one of the above-named capes to the other measures about 520 miles.

MARTHA'S VINEYARD SOUND.—A little to the south of Barnstable (a part of the projection which we designate as Cape Cod) lie the islands of Nantucket and Martha's Vineyard, which, with several smaller islands on the south, and the projection of Cape Malabar on the east, enclose Martha's Vineyard sound. The channels through this sound being sufficient for merchant vessels, and one even allowing the passage of small frigates, are not only the constant track of coasting vessels, but owing to the relative situation of Narraganset Roads, and the existence of two tolerable safe harbors to the east of Gay Head, namely, Tarpaulin Cove and Holmes's Hole, this sound is generally aimed at by all eastern vessels bound home in the tempestuous seasons. There are certain difficulties, however, attending the navigation of this sound, resulting from want of a harbor near the eastern extremity, which have given rise to a project, now in a course of investigation, for forming an artificial harbor at the northeast point of Nantucket island.

In the present state of things, therefore, although the board are fully impressed with the necessity of providing security for the very valuable portion of commerce frequenting this sound, it is deemed premature to enter into particulars as to the most suitable mode of defence. We only add, in reference to the value of this commerce, that from fifty to eighty vessels, engaged chiefly in the whale fishery, are owned at Nantucket alone, and that forty or fifty vessels not belonging to the sound, and many of them containing the richest cargoes, are often seen in the harbors waiting a favorable change of weather to complete their voyage.

BUZZARD'S BAY.‡—Interposed between the island of Martha's Vineyard and the Main are the Elizabeth islands bounding Buzzard's bay on the south. This bay, although of importance as leading to the proposed canal to Barnstable bay, as covering the flourishing town of New Bedford, and as being one of the natural harbors to be used by an enemy in enforcing the blockade of Narraganset Roads, cannot be defended by fortifications owing to its breadth. Should the canal be constructed, it must be defended by one or more works near its mouth.

NEW BEDFORD HARBOR.—No survey having been made of this harbor, the board are unable to state how far the present fort answers the necessary conditions; or, if any, what new works are required to afford due protection to the valuable commerce of this town.

NARRAGANSET BAY.—Referring to previous reports‡ for more minute information, the board will advert briefly to some of the military and naval properties of this important roadstead. 1. It is the only port on the coast accessible with a northwest wind, which is the direction of the most violent winter storms; and as the same winds serve for entering both Boston and New York harbors, viz. N.N.W. to S.S.W., round by the east, while this harbor can be entered with all winds from NW. to E., round by the west, it follows that, this harbor being secured, vessels may be certain of making a harbor on this part of the coast with all winds excepting those between NW. and N.N.W. 2. From this position the navigation of Long Island sound, and especially the communication between that sound and Buzzard's bay, or Martha's Vineyard sound, may be well protected. 3. The blockade of the excellent harbor and naval station of New London will be rendered difficult. 4. From this station the navy will command from N. to S., as from Hampton Roads it will from S. to N., the great inward curve of the coast between Cape Cod and Cape Hatteras; the influence of which command over the blockading operations of an enemy will be apparent when it is

\* See report of 1821.

† See report of 1820.

‡ See reports of 1820 and 1821, and memoir on the defence of Conanicut island, 1822.

considered that the only harbors of refuge he will have will be Delaware, Gardner's, and Buzzard's bays. 5. This harbor is the connecting link of the coast to the south with that to the north of Cape Cod.

If Narraganset bay were left in its existing state as to defence, an enemy would seize it without difficulty, and, by the aid of naval superiority, form an establishment in Rhode Island for the war. Occupying this island, and the position of Tiverton heights opposite its northern extremity, which is of narrow front, easy to secure and impossible to turn, he might defy all the forces of the eastern States, drive the United States to vast expense of blood and treasure; and while this position of his troops would keep in alarm and motion all the population of the east, feigned expeditions against New York, through Long Island sound, or against more southern cities, would equally alarm the country in that direction. If, in short, he merely contented himself with menacing the coast, it is difficult to estimate the embarrassment and expense into which he would drive the government.

Of the existing forts, viz: Fort Adams, Dumpling Tower, fort on Rhode Island, Fort Wolcott, and Fort Green, the two latter are the only ones retained in the projected system of defence. Fort Adams, besides being entirely unsuited to the important position it occupies, is in ruins, and the Dumpling Tower and fort on Rose island, also very inconsiderable works, were never more than partially completed.

The project of defence proposed by the board contemplates for the middle channel a strong fort, without works, on Brenton's Point; another on the Dumplings; a smaller fort on Rose island, and the preservation of Fort Wolcott and Fort Green. The eastern passage is already shut by the permanent bridge at Howland's ferry. As to the western passage, three modes present themselves: 1st, reducing the depth of water by an artificial ledge, so as to prevent the passage of ships-of-war; 2d, relying on fortifications alone to close the passage; or 3d, resorting in part to one and in part to other means just mentioned. Being the least expensive and most certain, the board have founded the estimate on the first. The total expense of Narraganset defences will be \$1,817,578 26.

STONINGTON HARBOR, CONNECTICUT, AND SAG HARBOR, NEW YORK.—These harbors have not been surveyed, and the board are therefore unable to give any information as to the kind of defences they require, or their probable cost.

GARDNER'S BAY.—The most valuable harbor to an enemy investing this part of the coast is probably not defensible by fortifications. It has not, however, been surveyed; and at some future day it may be a very interesting question whether by steam batteries under the protection of and aided by fortifications its defence may not be accomplished.

NEW LONDON HARBOR.\*—New London harbor is very important to the commerce of Long Island sound; and as a port of easy access, having a great depth of water, never freezing, and being easily defended, it is an excellent station for the navy. It is also valuable as a shelter for vessels bound out or home, and desirous of avoiding a blockading squadron off Sandy Hook.

In the plan of defence, the present Forts Trumbull and Griswold give place to more efficient works, whereof the expense is estimated at \$209,675 63.

NEW HAVEN HARBOR.†—It is proposed to defend this harbor by improving and enlarging Fort Hale, and substituting a new work for the slight redoubt, erected during the late war, called Fort Wooster. The expense of both will be \$59,609 18.

NEW YORK HARBOR.‡—The object of the projected works for the vicinity of New York are to cover the city against an attack by land or sea; to protect its numerous shipping; to prevent as much as possible the blockade of this great port, which will soon have, added to the immense wealth of its own rivers, the productions of the boundless regions on the northern and western lakes; and to cover the interior communication projected to unite the Raritan with the Delaware.

In the present condition of that harbor as regards defence, an enemy would meet but little opposition, whether his attempt were made by land or water. Coming by the sound, he might land within ten miles of the city upon the main or upon Long Island, or both; and coming into the lower harbor, he might either force the passage of the channel, anchoring in the Hudson or East river; or he might land in Gravesend bay, eight miles from the city, and march directly to Brooklyn, where he would find the navy yard, and whence he might levy a contribution, or destroy the city. The only mode of resistance would be the harassing, expensive, and uncertain one of arraying a large body of militia upon the Haerlem and Brooklyn heights; and this could be resorted to only in the event, not to be anticipated, of having received timely intelligence of his design. If we fortify Throgs's Neck and Wilkin's Point, on the East river, and if we complete the works at the Narrows, making them all too strong to be carried by a *coup-de-main*, we shall secure the means of transferring the neighboring militia upon the flanks and rear of an enemy should he march upon Brooklyn; while we shall secure the same advantage should he pursue the route by Haerlem, besides increasing the length of his march through an intersected country to twenty miles.

This arrangement of defensive works, necessary as it is, still leaves the lower harbor open to an enemy's vessels, where, safe at all seasons, he can enforce a strict blockade, cut off the line of interior communication by the Raritan, and where he has a landing place in somewhat dangerous proximity to the city. In view of these considerations, the board projected the additional works on the East Bank and Middle Ground, which will completely protect the harbor; compel an enemy on this side to land upon a dangerous coast, near thirty miles from his object, and to enforce his blockade by riding on the open sea with a dangerous coast on either hand.

Of the permanent works heretofore erected, Castle Clinton has been already ceded to the city. The others should be maintained as constituting a last barrier; as affording convenient places of deposit for stores and munitions of all kinds, and of rendezvous for recruits, and good positions for military hospitals. The total cost of all the works projected by the board is estimated at \$5,201,834 28.

DELAWARE BAY AND CITY OF PHILADELPHIA.§—The coast from the mouth of the Hudson to the Chesapeake, as well as that on the south side of Long Island is low, sandy, covered by numerous sandy islands, lying near and parallel to the coast, and having, besides the Delaware, many inlets and interior basins; but none, with this exception, affording water enough for sea-going vessels. The Delaware bay itself, being wide and full of shoals, having an intricate channel, and being much obstructed by ice at certain seasons, affords no very good harbor within a reasonable distance of the sea. It is, however, of great consequence that the deficiency in this respect should be remedied by artificial means, not only on account of the value of the commerce of the upper part of the bay, which is hazarded by the peculiar dangers of the

\* See report of 1821.

† See report of 1820.

‡ See reports of 1820-21.

§ See report of 1817, on the defence of the Delaware; report of 1820, and a report on a project for a breakwater of 1821.

lower, but also on account of the dangers to which the exterior commerce is exposed for want of a harbor for so great an extent of coast, and of the means which will thereby be attained of depriving an enemy of one of the shelters of the coast not otherwise defensible, and of rendering the blockade of this and the neighboring parts of the coast more difficult.

Should the proposed breakwater near Cape Henlopen be constructed, it will be necessary to provide works for its defence. The board is not, however, prepared to present a plan or an estimate of such as would be required.

The lowest point at which Philadelphia is defensible is at Pea Patch island, about 45 miles below that city. Fort Delaware, on that island, now almost completed, together with a permanent work on the Delaware shore, opposite a temporary work on the Jersey shore, to be thrown up at the commencement of a war, and floating obstructions in the channel, will effectually cover Philadelphia, the other important places on the river, and the outlet of the canal connecting the Delaware and Chesapeake. The expense of the permanent works will be \$817,025 45.

**CHESAPEAKE BAY.**\*—The naval commissioners and board of engineers, intrusted with the selection of sites for great northern and southern naval depots, recommended in their joint reports of 1819 and 1820 Burwell's bay, on James river, for the one, and Charlestown, near Boston, for the other; they also recommended Boston harbor and Narraganset bay at the north, and Hampton Roads at the south, as chief naval rendezvous. In these reports the commission entered at large into the consideration of all the matters relating to these important subjects. The board, now referring to those reports for details which would too much encumber this more condensed communication, will first briefly advert to the objects to be secured by defensive works in the Chesapeake, and next state, in their order, the positions to be occupied, and the mode of defence proposed, so far at least as these have been determined.

The immediate object of the defence of Hampton Roads, near the mouth of the Chesapeake, is to shut this roadstead against an enemy, and secure it to ourselves; to cover the interior navigation between the Chesapeake and the southern States; to secure, as a naval place of arms, a point serving as the connecting link between the middle and southern coast, whence the navy may protect the exterior trade as well as the trade of the bay; to defend the public establishments at Norfolk, and such as may be made at James river, and to prevent an enemy from making a permanent lodgment at Norfolk. Another very important object, but more remote, as requiring all great temptations to be placed out of reach of an enemy, is to cover the coast and the minor settlements of the bay from predatory attacks; for no trifling expeditions would ever venture up the Chesapeake while a portion of our naval force occupied the road at Hampton.

The object of other fortifications in these waters is, therefore, to cover the valuable harbors, cities, and trade, of the upper part of the Chesapeake.

**HAMPTON ROADS, JAMES RIVER, AND NORFOLK.**†—In the present state of things, an enemy may land in Lynnhaven bay, and in one or two days' march reach the narrow position which lies to the east of Suffolk. Bounded on one side by the Dismal Swamp, and on the other by Bennet's creek, near the mouth of the Nansemond, this position cannot be turned, and may be easily fortified. Here he might defy all the forces of Virginia and North Carolina. Secure of a retreat, so long as his fleet occupied Hampton Roads, he could only be driven out by efforts on the part of the United States, involving great sacrifices both of men and money. But when these roads are fortified, he will be able to anchor only in Lynnhaven bay; his march thence upon Suffolk will be taken in flank and rear by our forces crossing Hampton Roads, and he will therefore find it impossible to take permanent quarters in the country.

The works projected for the defence of Hampton Roads, James river, and Norfolk, are—1st, a fort and advanced lanette at Old Point Comfort; 2d, a casemated battery on the Rip Rap shoals; and 3d, a line of floating obstructions extending across the channel between these works. In the event of a great naval depot being fixed on James river, it might ultimately be advisable to provide additional strength, by adding works at the positions of Newport News, Naseway shoal, and Crany Island flats. Exclusive of these, the cost of the projected works is estimated at \$2,164,147 59.

The existing forts, viz: Fort Nelson and Fort Norfolk, serve for the defence of Norfolk and the navy yard. They are small and inefficient works, but may be made useful as accessories to general defensive operations.

**HARBOR OF ST. MARY'S.**‡—The central situation of this fine basin as regards the Chesapeake; its relation to the Potomac; its depth of water, and the facility wherewith it may be defended, indicate its fitness as a harbor of refuge for the commerce of the bay, and as an occasional, if not constant station, during war, of a portion of our naval forces. A survey of the harbor and the surrounding country has been made. The maps are, however, not yet complete, and the board are unprepared to state the cost of the defences.

**PATUXENT RIVER.**§—The more effectually to protect the city of Washington from a sudden attack by troops landed at the head of navigation of the Patuxent, and to provide an additional shelter for vessels, a fort has been projected to occupy Point Patience, and another Thomas's Point, about six miles from the Chesapeake. Their expense will be \$337,000.

**ANNAPOLIS HARBOR.**||—From not having as yet been able to consider the particular subject of the defences of this harbor, or to obtain preliminary surveys, the board are unable to state whether new works will be required.

**HARBOR OF BALTIMORE.**||—The proximity of Baltimore to the bay places that city in a dangerous situation. In the present state of things an enemy can, in a few hours' march, without being exposed to a separation from his fleet, after an easy landing, make himself master of that great commercial depot.

Baltimore requires for its security two forts in the Patapsco, one at Hawkins's Point, and the other at the extreme end of the flat on Sollers's Point. Besides the advantages which will result of obliging the enemy to land at a greater distance, thereby delaying his march, gaining time for the arrival of militia, and preventing his turning the defensive position our forces might occupy, it will be impossible for him to endanger the city or its shipping by a direct attack by water. The present Fort McHenry, Redoubt Wood, and Covington battery should be retained as a second barrier.

**MOUTH OF ELK RIVER.**—The construction of the Delaware and Chesapeake canal will make it necessary to place a small work somewhere near the mouth of the Elk, to prevent an enemy by a sudden enterprise destroying the works which connect that canal with the river. Some surveys must be made before the most suitable location, or the form or cost of this work can be determined.

**CITY OF WASHINGTON, ALEXANDRIA, AND GEORGETOWN.\***—Fort Washington, a work recently completed, covers these cities from any attack by water, and will oblige an enemy to land at some fifteen or eighteen miles from Alexandria, should that city be his object. It will also serve the very valuable purpose of covering the troops crossing from Virginia with a view to fall upon the flanks of an enemy moving against the metropolis. All these objects would have been better fulfilled had the work been placed at Lower Cedar Point; as it is, however, the works in the Patuxent being constructed, and the militia of the surrounding country being in a due state of preparation, an enterprise against these cities would be one of great hazard. The cost of Fort Washington was \$446, 467 37; a small work should nevertheless be placed on Lower Cedar Point.

From the mouth of the Chesapeake to Cape Hatteras there occurs no inlet navigable by sea-going vessels, and we therefore proceed at once to the

#### SOUTHERN SECTION OF THE ATLANTIC COAST.†

This coast is invariably low, and for the greater part sandy, much resembling that from Cape Hatteras to Montaug Point. A ridge of sand, occasionally interrupted by the alluvion of the rivers, extends throughout its whole length; this ridge lies in certain portions on the main land, while in others it is divided therefrom by basins or sounds of varying width and depth, and is cut into islands by numerous channels of greater or less depth, connecting these interior waters with the sea. Wherever this ridge is broken, its place is supplied by low and marshy grounds bordering the principal and the many lesser outlets of the rivers.

The nature of the country through which the rivers of this coast flow after leaving the mountains is such that the banks being easily abraded by the current the waters are always turbid and are continually transporting new supplies for the formation of alluvion and the maintenance of extensive submarine banks, shoals, and bars; that these last do not rapidly increase, is owing to the force of the current, the action of the sea, and the mobility of the particles of matter. It is to this cause, viz: the wearing away of the shores of the rivers, that is to be attributed the want of harbors on this coast unobstructed by bars, and which, as a coast, particularly distinguishes this and the Gulf of Mexico frontier (where similar operations have been going on) from the more northern and eastern portions.

The board have not examined the coast of East Florida; their description, therefore, of the southern coast will extend no further than Amelia island, or mouth of St. Mary's, while that of the Gulf of Mexico frontier will begin at Pensacola.

**OCRACOCK INLET, ALBEMARLE AND PAMLICO SOUNDS.‡**—In their report of 1821 the board adverted to a project then if not now in agitation, to open a navigable direct communication from Albemarle sound to the sea, and they also indicated, as probably a less expensive and a less dangerous mode of transporting the produce of the Roanoke, Tar, and Neuse rivers to the ocean, a canal from river to river, and terminating in the harbor of Beaufort, N. C. If the first of these projects be executed, defensive works would be necessary at the new inlet; if not, no others will be needed than such as are indispensable in any event to cover the important harbor of refuge at Beaufort. The shallowness of the water on the bars at Ocracock effectually excludes all vessels of war from the harbors within. But as this, in the present state of things, is the outlet of an extensive commerce, and as through this opening attempts might be made in small vessels or in boats to interrupt the interior line of communication whereon so much would depend in time of war, it would be proper in the beginning of a war to throw up a temporary work as a defence against all minor enterprises.

**BEAUFORT HARBOR, N. C.‡**—Beaufort harbor and the mouths of Cape Fear river are the only issues navigable by vessels of more than a light draught of water by which the interior of North Carolina communicates with the ocean. They are important points in the line of interior navigation to be sooner or later opened from the Chesapeake southwardly, and they are, besides, the only harbors of refuge on an extent of coast of more than four hundred miles.

The fort projected for the defence of Beaufort harbor will take the place of the ruins of Fort Hampton. Its estimated expense is \$175,000.

**MOUTHS OF CAPE FEAR RIVER, N. C.§**—It is proposed to defend the main channel of Cape Fear river by a fort on Oak island, and another on Bald Head, and the smaller channel by a redoubt on Federal Point. The battery, magazine, block-house, quarters, &c., &c., at Smithville may remain as accessories. The cost of the new works will be \$251,000.

As the board have not hitherto given in any report of that part of the southern coast which lies between Cape Fear river and Amelia island, it is a matter of regret that they cannot at once give the full and accurate account of the interesting points of the coast, and their relation to each other and to the country behind them, which is necessary to a perfect understanding of the suitability of any proposed system of defence. This cannot be done, however, until many surveys (a part only of which are in progress) have been made. The board will, nevertheless, be able (from their personal examinations of the coast) to point out distinctly most, if not all, of the points requiring defence, especially as they have a principle to guide them which may be regarded as imperative, namely, that on a coast possessing few harbors like this, it is at the same time the more necessary to preserve them all for our own use, and the more easy to deprive an enemy of that shelter which is nearly indispensable to a continuous and close blockade.

**GEORGETOWN HARBOR.**—The first inlet of any consequence, south of Cape Fear river, is at the united

\* See report of 1819;

† See report of 1821.

‡ See report of 1821, and memoir on the defence of Beaufort, 1824.

§ See report of 1821, and memoir on the defence of Cape Fear river, of 1824.

mouths of the Waccamaw, Pedee, and Black rivers, forming Georgetown harbor. The two latter rivers first join a few miles above Georgetown, which lies at the mouth of Sampit creek, fifteen miles from the sea, and their united waters mingle with those of the Waccamaw, opposite that town. Below this junction the waters spread out to a considerable width, affording a commodious and capacious bay, having sufficient depth of water within and upon the bar, near the mouth, for merchant vessels and small vessels of war.

It is probable this harbor may be well defended by a work placed near the mouth of Moschito creek, a little within the chaps of the harbor, or perhaps upon Winyaw Point. The present fort, situated near the town at the mouth of Sampit creek, can be of no avail except to defend the approach by water to the town. It has long been neglected, and is in ruins.

**SANTEE RIVERS AND BULL'S BAY.**—About ten miles southwest from Georgetown entrance are the mouths of the Santee, the largest river in South Carolina. Whether the two mouths of this river have sufficient water on their bars to permit the passage of vessels of any draught the board are not informed. Should there, as is believed, be too little water for sea-going vessels, there can be little advantage in fortifying them, especially as the greatest proportion of the valuable products of this river are now, or will soon be, diverted from the channel of the lower part of the river, by canals, to Charleston. As to Bull's bay, the board are in the same uncertainty as regards the depth of water with which it is accessible; and they are as yet doubtful of its defensibility, if accessible.

**CHARLESTON, S. C.**—The city, situated at the junction of Ashley and Cooper rivers, is about five miles in a direct line from the sea. Between it and the ocean is a wide and safe roadstead for vessels of any draught. Upon the bar, however, lying three or four miles outside of the chaps of the harbor, there is only water enough for large sloops-of-war. On the southwest side of the harbor is James's island, through which are several serpentine passages, more or less navigable for boats or barges; some of these communicate directly with the sea, and some with Stono river. Whappoo cut, the most northerly passage from Stono to Charleston harbor, enters the latter directly opposite the city.

Interior natural water communications also exist to the southwest of Stono river, connecting this with North Edisto river—the latter with South Edisto and St. Helena sound; this again with Broad river, and, finally, this last with Savannah river. On the north side of the mouth of the harbor lies Sullivan's island, separated from the main by a channel navigable to small craft. To the northeast of Sullivan's island an interior water communication extends to Bull's bay, and even beyond to the harbor of Georgetown. From this sketch it is apparent that it will not suffice to defend the principal entrance to the harbor, alone. The lateral avenues must also be shut. And it is probable that accurate surveys will show that the best mode of defending these latter is by works at or near the mouths of the inlets, as the enemy will thereby be kept at a greater distance from the city; the lesser harbors formed by these inlets will be secured, and the line of interior communication will be inaccessible from the sea.

No position for the defence of the principal entrance and roadstead can be formed nearer the ocean than the western extremity of Sullivan's island. This is at present occupied by Fort Moultrie—a work of some strength, but by no means adequate to its object—its battery being weak, and the scarp so low as to oppose no serious obstacle to escalade. How far this work by modifications of its plan and relief may be made to contribute to a better defence of the harbor cannot now be determined. The northeast point of James's island, projecting into the harbor about midway between Sullivan's island and the city, is the site of the few remains of old Fort Johnson; this point is too remote from Fort Moultrie and from the channel to be occupied by a new work if a better position can be found. The probability is, that the shoal opposite the last-named fort may be occupied permanently; and if so, the fortification of the harbor may be considered as an easy and simple problem. Castle Pinckney, which stands upon a small island a little below the city, should be maintained as an auxiliary in the defence of the harbor, and as serving as a sort of citadel in case of internal commotion.

**ST. HELENA SOUND.**—The board must wait for surveys before they can point out the defences which this sound should receive. Although there is supposed to be no great depth of water on the bar at the mouth, it is known to be navigable by the smaller class of merchantmen, and to have a navigable communication with the head of Broad river or Port Royal. Intersecting, as it does, the interior navigation between Charleston and Savannah, this sound will require defence, even should it not be of much use as a harbor of refuge for exterior commerce.

**BROAD RIVER OR PORT ROYAL ROADS.**—The value of this capacious roadstead as a harbor of refuge depends on the depth which can be carried over the bar, the distance of this bar outside the line of coast, and the means which may be practicable of lessening the danger of crossing it. This is supposed to be the deepest bar of the southern coast. Should there prove to be water enough for small frigates; and, by the aid of light-houses on the shore, and lights or other distinct guides on the bar, should the passage be capable of being rendered easy and safe, this road, situated, as it is, within 60 miles of Charleston and 20 miles of Savannah harbor, and intersecting, as it does, the interior navigation between these great cities, thereby securing the arrival of supplies of every kind, would possess a very high degree of importance as a naval station as well as a harbor of refuge.

The survey of exterior shoals constituting the bar should be made with the greatest care and all possible minuteness. It is only when this shall have been done that the true relation of this inlet to the rest of the coast can be known; and on this relation the position and magnitude of the required defences will depend.

**SAVANNAH AND MOUTH OF SAVANNAH RIVER.**—Mention has already been made of the natural interior water communication existing along the coast of South Carolina. A similar communication extends south from Savannah river, as far as the St. John's, in East Florida. Owing to these passages, the city of Savannah, like Charleston, is liable to be approached by other avenues than the harbor or river; and its defences must, consequently, have relation to these lesser as well as to the principal channels.

The distance from the mouth of Warsaw sound, or even of Osabaw sound, (both to the southwest of the river,) to the city, is not much greater than from the mouth of the river; and an enterprise may be conducted the whole distance by water, or part of the way by water and part by land, from either or both. As in the case of the like channels in the neighborhood of Charleston, it cannot now be determined where they can be defended most advantageously.

It is to be hoped, however, that the localities may prove such as to permit the defences to be placed near the outlets of these sounds, where they will serve the double purpose of protecting the city and covering harbor, which in time of war cannot but be very useful.

The defence of Savannah river is by no means difficult. A fort on Cockspur island, lying just within

the mouth, and, for additional security, perhaps another on Tybee island, which forms the southern cape at the junction of the river with the ocean, would effectually prevent the passage of vessels up the channel, and cover the anchorage between Tybee and Cockspar. The present Fort Jackson, situated about four miles below the city, should be maintained as a second barrier, both as respects the main channel and the passages which come in from the south, which latter would not be at all controlled by works at Cockspar or Tybee.

The surveys required preliminary to forming a system of defence for Savannah, are so far completed as to enable the board to make the projects and estimates for the defence of the main channel whenever they shall be ordered to direct their attention to them.

A few months, it is presumed, will suffice to complete all the necessary surveys from Georgetown to Osabaw sound inclusive, excepting the bar off Port Royal and Bull's bay and its vicinity. No surveys have been commenced south of Osabaw sound.

South of Osabaw sound, on the coast of Georgia, are: 1st. St. Catherine's sound, at the mouth of the Medway river; 2d. Sapelo sound; 3d. Doby inlet; 4th. Alatomaha sound, at the mouth of the great river of the same name; 5th. St. Simon's sound, at the mouth of Buffalo creek; 6th. St. Andrew's sound, at the united mouths of the Scilla and Santilla rivers; and 7th. Cumberland sound, at the mouth of the St. Mary's river. All these communications with the ocean are highly important in reference to the interior navigation, and several of them as affording access to excellent harbors. The latter especially is known to be navigable by the largest sloops-of-war and merchantmen; and two or three of the others are believed to be little, if at all inferior, either as regards depth of bar or safety of anchorage.

Some of these inlets are probably easily defensible by forts; others may require floating defences, and some possibly the use of both these means.

The principle to which we have before adverted as governing, in a measure, the defensive system of the whole southern coast is enforced in relation to this particular part by two weighty considerations, namely: its remoteness from the nearest naval rendezvous, the Chesapeake, which is on a mean 600 miles distant, and to leeward both as to wind and current, and its being close upon the larboard hand as they enter the Atlantic, of the great concourse of vessels passing at all seasons through the Florida channel. While, therefore, this part of the coast, from the concentration of vessels here, is in great need of protection of some sort, naval aid can be extended to it only with difficulty, and at the risk of being cut off from all retreat by a superior enemy.

Accurate and minute surveys, which will enable our vessels, whether driven by an enemy or by stress of weather, to shun the dangers which beset the navigation of these harbors, and properly arranged defences to cover them when arrived, seem to be indispensable. It is worthy of remark, besides, that on these harbors being fortified the operation of investing the coast and watching the great outlet of commerce through the Florida gulf would be a difficult and hazardous one to an enemy, on whose part no perseverance or skill could avail to maintain an uninterrupted blockade, or to avoid the occasional shipwreck of his cruisers, while on the part of our small vessels of war and privateers it would at all times be easy and safe.

Important as the harbors of Georgia now are, their value would be much enhanced by the execution of the projected canal across the head of the peninsula of Florida.

That part of the southern coast which extends from the St. Mary's to the southern extremity of East Florida is said not to possess a single harbor for common merchantmen.

This brings us to the

#### GULF OF MEXICO FRONTIER.\*

The resemblance of this portion of the coast to that which we have denominated the southern section is striking, and has already been mentioned. We may, in fact, refer to the description we have given of the principal features of the latter as a true delineation of this. In respect to the relation of the coast with the interior there is, however, the greatest difference between these two features of the maritime frontier. For, while in the case we are now to consider about eight-tenths of the whole territory of the United States is, in one sense, tributary to the coast, in the other not more than one-tenth is connected with the seaboard by any natural ties.

This fact, which goes to show the very deep interest which a large proportion of the people and the government have in the security of this frontier, is related to others which hardly have an alternative as to the mode of attaining that security.

From the relative geographical position of the coast and the country interested in its safety, from the unhealthiness of its climate, the nature of the adjacent country, the mixed character and diversity of interests of its inhabitants, it will be long, if ever, before that portion of the population within supporting distance, whose welfare may be endangered by an enemy, will be competent of itself to sustain the assaults of an exterior foe, and at the same time suppress the energies of a more powerful and vindictive enemy within. Upon the Atlantic seaboard the Alleghanies crowd the people upon the coast and surround every alarm post of the frontier with a more and more dense population; and the ocean and the interior parallel navigation enable even the extremities to afford, mutually, support and protection, while the coast of the gulf, although weak in itself and remote from succor from behind, is shut out by its peculiar situation and its distance from every hope of lateral assistance.

Those reasons, therefore, which tend to establish the necessity of an organized, a permanent, and timely system of defence for the whole seaboard of the United States, (some of which were advanced in the commencement of this report,) apply to this portion with peculiar force, especially if we consider its comparative feebleness in connexion with its comparative importance.

The interesting and vital points of the coast, and the mode of guarding them, will be pointed out as we proceed.

It has already been observed that no examination had been made by the board of the shore between the southern extremity of East Florida and Pensacola. There are, however, along this shore, and in the Florida reef, several harbors which deserve to be accurately surveyed. The description of this part of the coast, as well as that on the east side of the peninsula of Florida, and that along Georgia and the Carolinas, accompanied by plans of defence, must be the subject of future reports.

PENSACOLA BAY.—The upper arms of this considerable bay receive the Yellow-water or Pea river, Middle river, and Escambia river; the tributaries of which latter, interlocking with branches of the

Alabama and the Chattahoochie, indicate the causes whereby, at some future day, canals may convey a part of the products of these rivers to Pensacola.

Santa Rosa sound extends eastward from the lower part of this bay into Santa Rosa bay, whence a communication, partly natural, partly artificial, may possibly be continued eastward to the Atlantic. On the west the lagoons of Pensacola, Perdido, and Mobile bays, respectively, interlock in such a manner as to require but a few miles of cutting to complete a navigable channel from the first to the last named bay, and thence, through an existing interior water communication, to the city of New Orleans.

The contiguity of the headwaters of the large rivers emptying into this part of the gulf to the upper part of the Tennessee induces the belief that some facile means of connecting them will ere long be discovered and applied.

Thus situated, as Pensacola bay is, with respect to the country on either hand, and the immense regions behind—its rare properties as a harbor become of inappreciable value. Some of these properties we will enumerate. 1. It is accessible at low water to the largest class of sloops-of-war and small frigates; and as the bar is narrow, may, perhaps, be made to admit still larger vessels. 2. Its bar is near the coast, and the channel over it is straight and easily hit. 3. It is perfectly landlocked, and has a very capacious roadstead. 4. It has excellent positions for repairing, building, and launching vessels, and for docks and dock yards in healthy situations. 5. It has abundance of good water for the supply of vessels; and 6. It is perfectly defensible.

As these and other properties, in conjunction with its situation as respect the coast and the interior, have induced the government to fix upon it as a naval station and a place of rendezvous and repairs, we shall for the future consider it in that character, both in its relations to the commerce of the gulf and its own proper defences.

Although a naval station nearer the extremity of East Florida might possibly enable our vessels of war the better to watch over our commerce in the Florida stream, still no deep harbor exists to the south of Pensacola in which the circumstance of an entire separation from all relief and supplies does not greatly outweigh this advantage, if indeed it be more than imaginary.

It is, however, far from certain that the Florida stream is always to be the channel of communication from the gulf to the Atlantic. The great embarrassments and losses to which we must be exposed while that continues to be the course of our gulf trade, so long at least as we have not the mastery on the ocean, and in fact so long as the Island of Cuba is in the possession of another power—to say nothing of the natural dangers of that navigation—have directed the public attention seriously to the project of opening a shorter and safer passage through the head of the Florida peninsula. No obstacle not insuperable, it is presumed, will prevent the execution of this grand design; and considered in reference to such an outlet Pensacola is most happily situated.

But the object of a naval force in this quarter is not alone to watch the transit of commerce to and from the gulf; it has the coasting trade of the gulf to protect; it has piracies to suppress, which confine themselves to no particular strait; and above all, it has to keep an uninterrupted and watchful guard over the place of deposit, as well as the issues of the disposable productions of a region without parallel as to extent and fertility.

Projecting as the delta of the Mississippi does into the gulf, the position of Pensacola enables it to direct naval operations upon the rear of any force investing or moving along the avenues to the city of New Orleans; and at the same time that it can, almost to the last, with the help of a fortified line of interior navigation, preserve its communication with that city unbroken, it will be at no moment entirely dependent upon that line for the supply of its means of defence or annoyance, unless, indeed, the proposed artificial connexions with the interior, before pointed out, should be found impracticable.

A very exact survey has been made of the bay of Pensacola, which would suffice for forming a scheme of defence, if no other object were in view than the security of the town and harbor. Considered, however, as a naval station and a place of rendezvous and repairs, further surveys, extending a greater distance from the shores, delineating accurately the face of the country, and showing the several avenues by land and water, are found to be necessary.

The western extremity of Santa Rosa island is, nevertheless, so situated in respect to the mouth of the bay as to require, in part, the same works in either case; and the board can therefore, whenever ordered, project a fort for this position; which, in either case, should be the first occupied.

**PERDIDO BAY.\***—This bay is intimately related to Pensacola and Mobile bays, both as regards security and intercommunication, and should be surveyed carefully with a view to these objects.

**MOBILE BAY.†**—As the subject of the fortification of Mobile bay has been treated at some length in the report on the Gulf of Mexico defences, made in 1817, and still more in detail in a special report of 1822, the board, referring to these communications, especially the latter, will confine themselves here to a few general observations.

This bay receives at its head the two rivers Alabama and Tombeckbee, which water almost the whole State of Alabama—a State the fifth in the Union as to extent of territory, inferior to none in the quality of its soil, and hitherto doubling its population every four years since its admission into the confederacy.

The probable union at no distant day of the rivers discharging into Mobile bay with the Tennessee, whereby this bay will become a new outlet for a part, at least, of the productions of the western States, independently of the natural one; the great distance to which these rivers are even now navigable with steamboats; the fertility of soil; rapid growth of population and trade; the close lateral connexion which exists with New Orleans and the Mississippi on the one hand, and Pensacola bay on the other, serve to give great and increasing importance to this communication with the gulf.

Referring for the mode of defence adopted by the board again to the same reports, wherein the subject will be found treated at large, we now only add that the forts on Mobile Point and Dauphin island, and the tower at the Bass au Heron, designed to defend the three passages into the bay, and the important anchorage between Dauphin and Pelican islands, will cost \$1,142,056 83.

**NEW ORLEANS AND THE DELTA OF THE MISSISSIPPI.‡**—It is altogether unnecessary for the board to say anything in this report with a view to illustrate either the amount of benefits to result from applying a well adapted system of defence to this part of the coast of the gulf, or the direful consequences flowing from leaving it in an unprepared and defenceless condition. The value of the stake is now too great, is too rapidly augmenting, and is too justly appreciated for the nation to suffer its safety ever again to hang on the doubtful issue of a battle.

\* See report of 1812.

† See reports of 1817 and 1822.

‡ See report of 1817.

We pass on, therefore, to the task of noticing briefly the avenues requiring defence and the works projected to attain that end, referring to the report of 1817 as embracing all the relations of the subject, both general and local.

The most northern water communication between the Mississippi and the gulf is by the passage called the Rigolets, connecting Lake Borgne and Lake Pontchartrain; the next is by the Pass of Chef Menteur, (divided from the former by Isle aux Pine,) also uniting the same lakes. Through these passages an enemy entering Lake Pontchartrain would, at the same time that he intercepted all water communications with Mobile and Pensacola, be able to reach New Orleans from its southern shore, or he might continue onward through Lake Mauripas, Amite river, and Iberville river, thereby reaching the head of the delta, a position which he could easily maintain; or landing within the mouths of Chef Menteur, he might move against the city along the ridge of the Gentilly road.

The fort for the defence of the first-named pass is completed, and that for Chef Menteur is in a state of forwardness.

To the southwest of the latter pass, and at the head of Lake Borgne, is Bayou Bienvenu, a navigable channel, (the one pursued by the English army in the late war,) not running into the Mississippi, but having shores of such a nature as to enable troops to march from the point of debarkation to the city. A little to the south of this is Bayou Dupré, also affording easy access to the city. The few natural difficulties, and the shortness of these lines of operation, make it necessary to place a fort near the mouth of the first and a tower at the outlet of the other.

The defences of the Mississippi itself are placed at Plaquemine Turn, the lowest position which can be occupied.

Fort Jackson, now building, is on the right shore, a little above old Fort St. Philip. This last work it was intended originally to improve, and an estimate was made with that view; from a recent inspection, however, it appears to be falling too rapidly to ruins to justify such an undertaking. It is nevertheless believed that that estimate will suffice for a new work well adapted to the position.

The only permanent work required to the west of the Mississippi is a fort to occupy Grand Terre island, for the purpose of defending the entrance to Barrataria bay, an excellent harbor for a floating force, guarding the coasting trade on that side, and whence there are several passages leading to the Mississippi, near New Orleans.

The whole cost of the system of defence for New Orleans, and the delta of the Mississippi is estimated at \$1,566,515 42. None of the old forts or batteries are embraced in the system.

Before leaving this part of our subject it is necessary to advert to the important uses which may be made of movable floating defences in aid of fortifications.

The applications of this auxiliary force along the coast of the United States might be numerous, and, as has been before remarked, would in certain cases be requisite to attain full security for all the objects needing protection. In the instance before us, for example, fortifications will enable us to protect the city of New Orleans even from the most serious and determined efforts of an enemy; but owing to the great width of the passages, we cannot by them alone deprive an enemy of good exterior anchorages, especially the very excellent one west of Chandeleur island, nor cover entirely the natural interior water communication between the Rigolets and Mobile. We must, therefore, either quietly resign these powerful means of annoying and distressing us to the occupancy of an adversary, or seek their preservation in a timely preparation of a floating force adapted to this peculiar navigation, and capable, under favor of the shelter afforded by the forts, of being always on the alert, and of assuming alternately an offensive or defensive attitude, according to the designs, the conduct, or situation of the enemy.

As these means of defence are, however, secondary to fortifications in every sense; as the extent to which they may be needed must depend on the relation of our naval force to that of other powers, a relation continually varying; and as the characteristics of this species of force may be expected to be modified, or even radically changed, in this age of rapid advancement in all the arts, it is considered premature to go now into any details in reference to its application here or elsewhere.

From the preceding sketch of the system projected for the defence of the seaboard of the United States (see report of 1821) it will appear that all the fortifications proposed are not of the same pressing necessity, nor of like importance; that some are required immediately, while the commencement of others may be postponed. In proceeding to class them, we must observe that the works of the most urgent necessity are those destined to prevent an enemy from forming a permanent or even momentary establishment in the country, those which will defend our great naval arsenals, and those which will cover our chief commercial cities.

In the second class we will place such as defend those naval stations and cities of a secondary rank which, either from natural or artificial defences, existing works, &c., are not entirely without protection, and can wait at least until the more important points are secured against a first attack.

Finally, in the third class we will arrange the works which will complete the defensive system in all its parts, but whose construction may without great danger be deferred until the frontier shall have received all the successive degrees of strength resulting from the gradual erection of the forts of the first and second classes.

A fourth class is added, containing such works as will be necessary, only conditionally.

Table A, joined to this report, has been drawn up on these principles and shows:

1. That the works to be erected during the first period will cost \$9,686,160 59, will require 2,610 men at most to garrison them in time of peace, and 20,570 in case of siege.

2. That the works of the second class will cost \$2,314,309 47, will require 666 men at most to garrison them in peace, and 6,841 in case of siege.

3. That the expense of the works belonging to the third class will amount to \$4,536,984 62, their garrisons in time of peace to 635 men, and in case of siege to 6,071 men.

4. That the total expense of completely fortifying the maritime frontier will amount to \$16,537,454 68, the troops necessary to guard these fortifications in peace to 3,911 men at most, and 33,482 men in time of war, supposing them all, which cannot happen, besieged at once.

The time required to construct the whole system must depend entirely upon the annual appropriations which the nation may grant to this branch of the public service. All that can be said upon the subject is, that in an undertaking of such vital importance to the safety, prosperity, and greatness of the Union, there should be no relaxation of effort and perseverance. A work of such magnitude must, with every

effort, be the work of years, and however long it may be before any sensible effects are produced the final result is not less certain. And should no danger threaten the republic in our own days the future generations may owe the preservation of their country to the precaution of their forefathers.

France was at least fifty years completing her maritime and interior defences; but France, on more than one occasion since the reign of Louis XIV, has been saved by the fortifications erected by the power of that monarch and the genius of Vauban.

However slow the progress of the system may be from the necessity of a sparing application of the public funds to this purpose, it is essential to disburse something in this way each year, so as to give to the frontier an annual increase of strength. We must therefore insist on the advantage of dividing the course of construction into several periods, according to the greater or lesser urgency, of beginning the works successively, agreeably to the order designated, and of rigidly adhering to it. By this mode satisfactory results will be obtained as early as practicable, while if we were to begin all at once it would be long before we should be capable of defending ourselves anywhere.

We shall now enter upon the subject of the expense of erecting these works and garrisoning them for war and compare it with the expense of defending the coast in its present state. To clear the subject as much as possible we shall only examine it with respect to Boston, Narraganset bay, New York, Philadelphia, Baltimore, Norfolk, and New Orleans. Charleston, South Carolina, and Savannah, Georgia, would also be included if we knew the cost of the defences and the amount of garrison necessary.

Supposing an enemy had concentrated 20,000 men at Halifax or Bermuda, the government must, on hearing of this force, at once prepare to resist it at all the points mentioned above; as it will be impossible to foresee on which the first blow will be struck it will be necessary to have troops encamped at each. And to meet the attack with a force not less, numerically, than that of the assailant, the troops kept constantly under arms in each of these camps must at least equal one-half of the hostile expedition, while as many more are kept in readiness within call. These points are so immediately accessible in some cases and so remote from succor in others, that after the point of attack is announced by the appearance of the enemy before it there will remain no time for reinforcements to come from the interior.

By manœuvring in front of any of these places he would induce us to concentrate our forces there, when, suddenly profiting of a favorable breeze, he would sail to another, which he would reach in a few hours, and would not fail to seize if a force were not stationed there likewise, at least equal to his own. No reinforcements can in this case arrive from the interior in time, for all the troops under march would have taken up a direction upon the point he had just quitted.

Our whole coast, from Maine to Louisiana, would thus be kept in alarm by a single expedition, and such is the extent and exposure of the seaboard that an enemy would ruin us by a war of mere threatenings. If the cities are not garrisoned they will become his prey at once, and if they are the treasury will be gradually emptied, the credit of the government exhausted, the wearied and starving militia will desert to their homes, and nothing can avert the direful consummation of tribute, pillage, and conflagration.

The Table C, joined to this report, shows that to be in readiness on each of these vulnerable points it will be requisite to maintain 77,000 men, encamped and under arms at the seven places mentioned, and 63,000 ready to march and within call.

This number is, in fact, below that which would be required, for these points being exposed, according to our hypothesis, to an attack from 20,000 regular and disciplined troops, 20,000 militia would not be able to repel them unless aided by entrenchments, requiring a time to construct them which would not be allowed us, and involving expenses which we do not comprise in our estimate. Besides, to have 20,000 men, especially new levies, under arms, it will be necessary, considering the epidemics which always assail such troops, to carry the formation of these corps to at least 25,000 men.

The State of Louisiana, being remote from succor, requires a larger force under arms than the other points; we have fixed this force at 17,000, considering that the State might furnish 3,000 within call.

Considering all expenses, 1,000 regular troops, including officers, cost \$300,000 per annum, and \$150 per man for a campaign of six months; 1,000 militia, including officers, cost \$400,000 per annum, \$200 per man for a six months' campaign.

But taking into consideration the diseases which invariably attack men unaccustomed to a military life, and the consequent expense of hospital establishments, the frequent movement of detachments from the camp to their homes and from the interior to the camp, and the cost of camping furniture, utensils, accoutrements, &c., which is the same for a short campaign as for a year, the cost of a militiaman cannot be reckoned at less than \$250 per man for six months.

The 77,000 militiamen necessary to guard the above-mentioned points, in the present situation of the maritime frontier, will therefore cost in a campaign of six months \$19,250,000.

In strict justice there should be added to the expense, which is, we believe, much undervalued, among other things, the loss of time and diminution of valuable products resulting from draining off so considerable a portion of efficient labor from its most profitable occupation. This, besides being a heavy tax on individuals, is a real loss to the nation. It would be utterly vain to attempt an estimate of the loss to the nation from the dreadful mortality which rages in the camps, of men suddenly exposed to the fatigues and privations of military life, or to compare the respective values in society of the citizen and the soldier.

The total expense of constructing the works at Boston, Narraganset bay, New York, Philadelphia, Baltimore, Norfolk, and New Orleans will amount to \$13,764,073 08.—(See table B and previous reports.) Their garrisons may consist of the same number of regular troops in time of war as in time of peace, the remainder being furnished by the militia, held in readiness to throw themselves into the forts on the first appearance of an enemy. By this arrangement 2,980 regulars and 24,000 militia, either in the works or in small corps, on advantageous positions—making 26,980 men—would suffice after the erection of the works, 43,020 being kept in readiness to march when called upon.

We should, therefore, have only 26,980 to pay and support instead of 77,000, and the expense would be \$6,447,000 instead of \$19,250,000. The difference \$12,803,000 being only \$961,073 08 less than the whole cost of the fortifications, it follows that the expense of their erection will be nearly compensated by the saving they will cause in a single campaign of six months.

It is proper to add that though the expense of these works will be great that expense is never to be renewed, while with troops, on the contrary, the expense is annually repeated, if not increased, until the end of the war. Besides, the disbursements for fortifications are made in time of peace slowly, and to an extent exactly correspondent with the financial resources of the country. Armies are, however, most

wanted and must be paid in periods of great emergency, when the ordinary sources of revenue are dried up, and when the treasury can only be supplied by a resort to means the most disagreeable and burdensome to the people.

The defence of our maritime frontier by permanent fortifications, and even the disbursements for their construction, will thus tend to a real and positive economy. The vulnerable points being reduced to a small number, instead of waiting an attack on every point and holding ourselves everywhere in readiness to repel it, we shall force an enemy to direct his assaults against those few, which, being well understood by us, will, of course, have received a timely preparation.

There can be no doubt that such a state of things will make an adversary more reluctant to risk his expeditions, and that we shall not only therefore be better able to resist but also be less frequently menaced with invasion.

Some prominent military writers have opposed the principle of fortifying an extensive land frontier, but none have ever disputed the necessity of fortifying a maritime frontier. The practice of every nation; ancient and modern, has been the same in this respect. On a land frontier a good, experienced, and numerous infantry may, in some cases, dispense with fortifications; but though disciplined troops may cover a frontier without their aid, undisciplined troops cannot. On a maritime frontier, however, no description of troops can supply the place of strong batteries disposed upon the vulnerable points. The uncertainty of the point on which an enemy may direct his attack, the suddenness with which he may reach it, and the powerful masses which he can concentrate at a distance, out of our reach and knowledge, or suddenly, and at the very moment of attack, require that every important point be duly prepared to repel his attempt or retard it until reinforcements can arrive, and adequate means of resistance be organized. By land we are acquainted with the motions of an enemy, with the movements and direction of its columns, we know the roads by which he must pass; but the ocean is a vast plain without obstacle, there his movements are made out of our sight, and we know nothing of his approach until he is already within the range of the eye. In a word, unless the vulnerable points of a seacoast frontier are covered by permanent fortifications, their only chance of safety must depend on the issue of a battle, always uncertain, even when disciplined and well-appointed troops, inured to danger, have made all possible preparation for the combat.

As for the garrisons which these forts will require in time of war, a small portion, equal in number to the peace garrisons, should be of regular troops—the surplus of militia practiced in the manœuvres and drill of great guns—it being necessary that the greatest part of the troops required for the defence and service of these seacoast fortifications should be artillery.

This brings us to a suggestion or two in relation to the organization of the militia forces. Instead of the present small proportion of artillery the States might with advantage increase the amount of that force in the vicinity of each of the exposed parts of the coast, so as to be equivalent to the exigencies and armament of the works, substituting for the usual field exercises as infantry actual drill and practice in the batteries. As soon as a movement on the part of the enemy would threaten the frontier of the State, this force should throw itself into the forts and there remain as long as the precise point of attack should remain uncertain. In most parts of the seaboard it would also be advisable to have a considerable body of militia horse artillery, as being a useful arm in all cases, and as affording a defence always applicable against minor and predatory enterprises. This force might, in part, be drawn from the common proportion of cavalry.

In the report we have taken no account of the interior and land frontiers of the Union; they have not yet been sufficiently reconnoitred to enable us to give an exact idea of the system of defensive works they may require. All we can say, by anticipation, is, that, from their general topographical features, these frontiers can be covered at a very moderate expense so effectually that no enemy will be able to invade them without exposing himself to disasters nearly inevitable, and that no troops of the United States, supposing all her warlike preparations well arranged beforehand, will be able at the opening of the first campaign to carry the theatre of war beyond her own territory.

If to our general system of permanent fortifications and naval establishments we connect a system of interior communications by land and water adapted both to the defence and to the commercial relations of the country, if to these we add a well-constituted regular army, and perfect the organization of our militia, the nation will not only completely secure its territory but preserve its institutions from those violent shocks and revolutions which, in every age and in every country, have been so often incident to a state of war.

Table A following contains the works constituting the proposed defensive system for the maritime frontier, divided into four classes.

Table B contains a list of such existing works as it is contemplated to retain as accessories to the system.

Table C exhibits a comparison of the cost of defending certain important parts of the coast, in their present condition, and with the aid of the projected works.

Table D shows a possible concentration of militia forces in eleven days at Boston, Massachusetts; Newport, Rhode Island; New York, New York; Philadelphia, Pennsylvania; Baltimore, Maryland; Norfolk, Virginia; Charleston, South Carolina; Savannah, Georgia; and New Orleans, Louisiana.

All which is respectfully submitted.

Brevet Major General ALEX. MACOMB, *Colonel commanding U. S. Engineers.*

TABLE A.

*Classification of the proposed fortifications for the defence of the maritime frontier of the United States.*

The **FIRST CLASS**—to be first constructed—comprising such as are most necessary for the protection of great cities, naval establishments, roads of rendezvous, and positions which an enemy might occupy for the war to the great injury of the country.

The **SECOND CLASS**—to be next constructed—comprising such as cover important harbors, roadsteads, and naval stations, not in the first class, and complete or nearly so, the defences of the places found in that class.

The **THIRD CLASS**—to be last constructed—comprising the defences necessary to the security of the smaller cities and towns, less useful and important harbors, sounds, and inlets, and the remaining intersections of the interior parallel water communications.

The **FOURTH CLASS** comprises conditional works, the necessity for which will depend on the creation of artificial harbors, canals, great naval depots, &c.

N. B.—In forming these classes reference has been made, also, to the existing state of defence. In the first and second, the defences stand in the order of respective importance; in the third and fourth, in geographical order.

Designation of works.	Garrisons.		Armament.			Perimeter or circuit.	Cost of construction.
	Peace.	Siege.	Guns.	Howitzers or mortars.	Cartridges.		
<b>FIRST CLASS.</b>							
These works are in progress—						Forts.	
Fort Adams, Narraganset roads, R. I .....	200	2,400	302	20	38	1,739	\$730,166 53
Fort Hamilton, New York harbor, N. Y .....	100	1,140	70	10	68	482	424,995 32
Fort Delaware, Delaware bay, Del., and two batteries to be built by the garrisons .....	100	1,560	234	10	28	633	469,767 74
Fort Monroe, Hampton roads, Va .....	600	2,625	305	60	.....	2,304	1,239,792 19
Fort Calhoun, Hampton roads, Va .....	200	1,130	216	.....	.....	381	904,355 40

19TH CONGRESS.]

No. 328.

[1ST SESSION.]

## RELATIVE TO THE MILITARY RESERVATIONS OF LAND AT DETROIT, IN MICHIGAN.

COMMUNICATED TO THE SENATE APRIL 18, 1826.

DEPARTMENT OF WAR, April 18, 1826.

SIR: I have received your letter of the 22d of February last, covering a memorial of the mayor, aldermen, &c., of the city of Detroit, respecting the public property in that city, and in reply to your request for information concerning the propriety of granting the prayer of the memorialists, I transmit herewith reports of the chief engineer and colonel of ordnance, with the views of which I concur.

The memorial is herewith returned.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. DAVID BARTON, *Chairman of the Committee on Public Lands, Senate.*

ENGINEER DEPARTMENT, Washington, April 17, 1826.

SIR: I have, in obedience to your instructions, carefully examined the memorial of the mayor, recorder, and citizens of Detroit, addressed to Congress under date of the 23d of January last, praying that the military works, arsenal, and powder magazine in that city be removed, and the grounds on which they stand granted to the corporation of said city.

Being well acquainted with the localities and circumstances connected with the public reservations in the city of Detroit, I am of opinion that it would be expedient, in reference to the public interest, that so

much of the land as surrounds the brick store which lies near the river, including the land on which the store stands, should be reserved as a magazine or place of deposit for such articles or military stores as may be wanted for the posts on the upper lakes; also the arsenal and the lands adjoining it ought, for like purposes, to be reserved. The arsenal will contain hereafter no articles of a combustible nature more dangerous to the city than goods of ordinary character. The magazine might be removed to the rear of the city so far as to be beyond the possibility of injuring the city in the event of an explosion. There are certain portions of the quarters which might be reserved for public uses, and the remainder of the reserve, after being divided into lots, might be sold at public auction under the provisions of the act approved March 3, 1819, entitled "An act authorizing the sale of certain military sites," and the proceeds of the sale given, if judged proper, to the city of Detroit.

Should the arrangement of this business and the disposition of the property in question be left to the War Department, a correct plan of the grounds could be made at this office, showing the portions of them proposed to be reserved for public purposes, and exhibiting the residue laid out in lots, giving to the public grounds reserved the proper figure and dimensions, with suitable avenues leading to the same.

As Detroit is a position not likely to be fortified, no military reservations other than those mentioned will be required.

I return herewith the letter of the Hon. Mr. Barton of the Senate, communicating to you the memorial, and a report on the subject of it from the Ordnance office, sent to this department with those papers.

I am, very respectfully, sir, your obedient servant,

ALEX. MACOMB, *Major General, Chief Engineer.*

HON. JAMES BARBOUR, *Secretary of War.*

ORDNANCE DEPARTMENT, *Washington, October 7, 1825.*

SIR: In reference to the letter of the Hon. D. Barton, enclosing a memorial from the mayor and aldermen of Detroit, which has been referred to this department, I have the honor to state that the arsenal and magazine at Detroit are useful and necessary, and could not be abandoned without detriment to the public service.

The arsenal is a substantial building, erected but a few years since, and is placed in a position well adapted to the purposes for which it was designed, viz: a place of deposit for the arms and other military equipments destined for the supply of the frontier north and west of Detroit. This building is situated convenient to the river and the public wharf, and near the lower extremity of the town, and therefore cannot, it is conceived, impede the growth of the city, which lies mostly above it. The magazine is an old building, of no great value, situated more remote from the river. It was built many years since as an appendage to the works of defence at that place. This building answers the present purposes of the department in the reception and storage of the powder and ammunition which is necessary to be kept in that quarter. The position of this building, however, endangers somewhat the safety of the town, as it is situated so near to the inhabited part of it that an explosion would probably occasion disastrous consequences. For this reason it is conceived that it would be proper to remove or abandon the present magazine and to erect another upon a site more remote from the town. The expense of erecting another magazine is the only consideration which can be urged against abandoning the present one.

The objections to the continuance of the magazine in its present position do not apply to the arsenal, as that building is not designed for the storage of powder or ammunition.

Besides the buildings mentioned there is another which is occupied as a dwelling by the keeper of the arsenal, and should be retained as long as the arsenal continues to be appropriated to military purposes. These buildings are all which are of any consequence that are now occupied by this department at Detroit. The ground reserved for military purposes at that place is much more extensive than is required to be appended to these buildings. A large proportion of it might therefore be granted to the city without detriment to the service, if it is not required by other departments.

There is, however, upon the reservation referred to an extensive cantonment and a storehouse for quartermasters' and subsistence stores, but as these pertain to other branches of service their value and usefulness is not known to this department.

I have the honor to be, respectfully, your obedient servant,

GEO. BOMFORD, *Brevet Colonel, on Ordnance service.*

HON. JAMES BARBOUR, *Secretary of War.*

*To the Senate and House of Representatives of the United States of America in Congress assembled:*

The memorial of the mayor, recorder, aldermen, and freemen of the city of Detroit respectfully sheweth: That by an act of Congress approved April 21, 1806, the governor and judges of the Territory of Michigan were authorized to lay out a town, including the old town of Detroit and ten thousand acres adjacent, "excepting such parts as the President of the United States should direct to be reserved for military purposes."

Your memorialists deem it their duty at this juncture to submit to the consideration of Congress several facts which are materially interesting, not only to the infant city of Detroit, but important to the general prosperity of the Territory. The military works, which were principally erected many years since, whilst the country was subjected to the British government, and at a time when the paucity of the inhabitants and their safety against Indian aggressions rendered it necessary to concentrate the whole population within a stockade, connected with and forming part of the aforesaid military works.

By the entire conflagration of the old town of Detroit, at a time when the necessity and circumstances which had dictated its original plan and formation had ceased, the governor and judges were enabled to select a plan more consonant, in many respects, to the modern improvements of the age and the convenience and accommodation of an increasing population. The growth of the city has now almost entirely encompassed the military works and the public reservation for military purposes, hence the utility of those works, either for offensive or defensive purposes, has absolutely ceased. But a large powder magazine, built with stone, and having a very heavy arch of the same material, and which your memorialists are well informed contains a large quantity of powder, together with an arsenal of considerable dimen-

sions, in which there is occasionally stored large quantities of fixed ammunition, as well as arms and accoutrements, are now considered as sources of danger to the safety of the city and the lives of its inhabitants, as the buildings and improvements are continually approximating to the aforesaid magazine and arsenal.

As your memorialists entertain no doubt that Congress must be fully apprised of the importance of erecting a permanent and suitable fortification at this exposed and accessible point of our territorial frontier, it is respectfully recommended that measures may be taken, as early as circumstances will admit, for the removal of the powder magazine and arsenal to such a situation as may be selected as a suitable site for a permanent military work.

Under such circumstances, your memorialists respectfully solicit that the aforesaid military reservation, after it shall cease to be occupied and used by the United States for its present purposes, may be granted in fee, under such restrictions as Congress may in their wisdom deem advisable, to the mayor, recorder, aldermen, and freemen of the city of Detroit, for the use of the said city.

It is not the intention of your memorialists to dwell on the various circumstances which, in their opinion, should have weight with the national government in exciting the paternal munificence of Congress in their behalf. But the peculiar circumstances of this Territory—the disadvantages which its original inhabitants have long labored under, the entire destruction of our principal town by fire, the disastrous surrender of the Territory to the enemy and their savage allies, their depredations upon the lives and the property of this people—are circumstances too well known to require any comment; and, amidst these painful recollections, your memorialists beg leave to advert to the lot and good fortune of many of the inhabitants of this place who contributed by their exertions and means to the relief and emancipation of several of their suffering fellow-citizens, prisoners of war and captives in the hands of a barbarous enemy. And your memorialists further beg leave to state that, since the war, it has been the peculiar fortune of the inhabitants of this place to be subjected to a variety of taxes, which, in their impoverished situation, they frequently found to be burdensome and heavy. At the peace, in 1815, this town, and the settlements within the Territory, exhibited the most striking picture of desolation. And yet much has been accomplished by the inhabitants: the settlement of the Territory has been promoted and encouraged, many sick and disabled discharged soldiers and public servants have been nursed and supported as paupers, and subscriptions for public purposes, in addition to the territorial and county taxes, have exhausted much of our substance and means. It is, however, gratifying to your memorialists to be enabled to state that, by the exertions and voluntary contributions of this community, much has been done in the opening of the present flattering prospects and the settlement of the Territory. But your memorialists further respectfully represent that this infant city has been recently incorporated, and has no means, except such as must be raised by taxation on its inhabitants; that this being a new place, fire engines must be procured, a powder magazine erected, streets paved, sewers made, and sites for new burial grounds purchased and enclosed; and yet the principal part of the territorial and county tax of this county is still levied on and paid by the inhabitants of this city.

Your memorialists therefore indulge a favorable hope that Congress, aware of the importance of fostering the tender and young metropolis of a growing member of the "Star Spangled" confederacy, will be pleased to grant their application, and that an act may be passed, so soon as circumstances will admit, granting to this corporation, for the use and improvement of this city, the ground within its limits which is now used for military purposes, the said grant to take effect whenever the United States shall cease to occupy the said ground for military purposes.

And your memorialists, as in duty bound, &c.

Attest:

JNO. R. WILLIAMS, *Mayor*.

DETROIT, *January 23, 1826.*

V. SPALDING, *Clerk of the City of Detroit.*

19TH CONGRESS.]

No. 329.

[1ST SESSION.]

RELATIVE TO THE DEFENCES ON THE MISSISSIPPI RIVER.

COMMUNICATED TO THE SENATE MAY 8, 1826.

WAR DEPARTMENT, *May 5, 1826.*

SIR: I have the honor to transmit herewith a letter from the chief engineer, accompanied by a copy of "the report of the board of engineers upon the additional means of defence for the Mississippi river," the latter being furnished in compliance with the resolution of the Senate passed on the 28th ultimo.

I am, very respectfully, your most obedient servant,

JAMES BARBOUR.

The PRESIDENT of the Senate of the United States.

ENGINEER DEPARTMENT, *Washington, May 5, 1826.*

SIR: In obedience to your command, I transmit herewith a copy of the report of the board of engineers, with a copy of a communication from Commodore Patterson, connected with it, upon the subject of the utility and efficiency of steam batteries, recommended in aid of permanent fortifications for the defence of the Mississippi river, the report referring to the object of the resolution of the Senate passed on the 28th ultimo.

I have the honor to be, with great respect, your obedient servant,

ALEX. MACOMB, *Major General, Chief Engineer.*

Hon. JAMES BARBOUR, *Secretary of War.*

WASHINGTON, *January 24, 1826.*

SIR: Among the various objects to which you directed my attention when I was about to leave the seat of government to repair to New Orleans was that of steam batteries or vessels considered as auxiliaries to the permanent defences of the maritime frontiers of Louisiana.

As to the efficiency of steam batteries co-operating with an army having to oppose the march of an invader against New Orleans, and along the strip of land which borders both banks of the Mississippi, the letter written on that subject to the Hon. J. S. Johnston, of the Senate, by Captain D. T. Patterson, of the navy, leaves nothing more to say. It shows, from the experience of Captain Patterson, how great would be, in similar cases, the advantages derived from batteries moveable immediately to any point where and when circumstances would require it.

But before an enemy should have progressed as far towards the object of his attempt, he must have passed through a series of operations against which steam batteries may act with great efficiency. In the first place he must effect his landing, and afterwards besiege the forts which are now building to defend the avenues to New Orleans.

With regard to the operation of landing, the shallowness of the sea round the coast of Louisiana would oblige an enemy to remain with his main naval forces far off the coast, and leave unsupported his transports when conveying the land forces to the shore. It would be useless to insist upon the important services which, during such an operation, could be rendered by steam batteries concentrating near the landing point and plying between the enemy's fleet and the shore. And here it must be remarked that the Mississippi on one side and Lake Pontchartrain on the other would afford to the steam batteries not only convenient stations of departure, but also safe places of refuge after having opposed the landing.

In the supposition that the invader should have succeeded in his landing, he should have yet another serious operation to accomplish before he could reach and engage our army—I mean the regular attack of the fort or forts defending the line of operation. On this subject it must be observed that, in our opinion, the most eligible lines for an invader would be either by the Mississippi or by Chef Menteur. In both cases steam batteries would act a conspicuous part as auxiliaries to the forts, and would add greatly to the energy and duration of their resistance. Protected by the artillery of the forts, they could prevent them from being blockaded *in toto*, and would therefore maintain, between the forts and New Orleans, a free communication, by which their garrisons could be regularly relieved and the supplies and ammunition readily provided. As moveable artillery, the steam batteries could also act suddenly, and according to circumstances, against the trenches of the besiegers, and retard the progress of his offensive works.

Such are the advantages which, in my opinion, could be derived from steam batteries in the event of an expedition against New Orleans, and at the successive stages of the operations of an invader; advantages which, if they should not contribute to the failure of the attempt, would at least protract so much of its execution as to afford time for reinforcements to reach New Orleans, and then to engage with superiority of number the invading army.

But, in time of war, even should no expedition be contemplated by an enemy, yet steam batteries might render important services by protecting the passes of the Mississippi against privateers and single vessels, and by keeping safe and free the coasting navigation from New Orleans to Mobile bay and Pensacola. This might supersede the erection of temporary land batteries destined to defend the channels between the several islands which extend parallel to the main from the vicinity of Lake Pontchartrain to Mobile bay, and which would shelter from cruisers our coasting trade. They might also prevent single vessels of common size from assuming an anchorage at certain convenient points, from which they might much annoy our commerce—such as the anchorage at the eastern point of Dauphin island, and that at the Chandeleur islands. From the former an enemy could not only interrupt all intercourse between New Orleans and Mobile bay, but also keep the bay in a state of blockade. From the latter he could at once control the outlets of Lake Pontchartrain and those of the Mississippi.

Though the board, in the planning of the system of defence, had constantly in view that the nation should rely chiefly upon the permanent works and land forces for the defence of our seaboard, and that the main forces of our navy, instead of being moored near our shores, should assume the offensive, and wage war on the high seas; yet, in relation to this section of frontiers, the local circumstances did not admit of a system of permanent defences which would prevent the blockade of the outlets. Therefore, for this section of our maritime frontiers, the navy is called for to fulfil that great requisite which, in the present case, was not attainable by permanent works; but the means required from the navy to accomplish it will be limited, and will not lessen materially those destined to the achievement of objects of greater magnitude.

The foregoing considerations show the importance of steam batteries to complete the permanent system of defence of Louisiana, to increase the chances of failure of an adversary, and perhaps to deter him from any attempt against that interesting section of our maritime frontiers.

As to the question of having either a steam vessel of large size, carrying a numerous artillery, or to have that same artillery distributed upon a certain number of smaller vessels, it seems to me that the latter arrangement would be far preferable. A large steam vessel could navigate the Mississippi only, and could not fulfil the several objects we have just pointed out; her efficiency would be limited, and confined only to the line of operation along the Mississippi. As to the protection of our coasting navigation, her draught of water would make her inefficient against cruisers of common size. But with steam vessels of comparatively smaller rate, whose draught should be fitted to the outlets of Lake Pontchartrain and to those of the Mississippi, all the objects here above mentioned could be fulfilled. These steam vessels of inferior rate could act together or separately according to circumstances; and by means of the canal contemplated from the Mississippi to Lake Pontchartrain, they could concentrate either in the lake or in the stream to effect any object which events would require.

Such are, in my opinion, the degree of importance of steam batteries to complete the permanent system of defence of Louisiana; the several objects to which they could be directed; the expediency of having the artillery distributed upon several vessels, rather than to have it accumulated upon a single large ship; in fine, the necessity of adapting the steam vessels to the parts they have to act, and of fitting their draught to the depth of the channels through which they would have to pass.

I have the honor to be, sir, very respectfully, your obedient servant,

BERNARD, *Brigadier General, member of the Board of Engineers.*

Major General A. MACOMB, *Chief Engineer, Washington.*

NEW ORLEANS, April 15, 1824.

Sir: Having maturely reflected on and weighed the suggestions of Commodore Porter and Colonel Croghan, as intimated to me by you, in connexion with my report relative to the defence of this river by steam batteries or vessels, and as an auxiliary to the permanent defences on shore, I coincide in opinion with Commodore Porter, that instead of one heavy vessel or battery, the same force, divided into several smaller ones, would be infinitely preferable, from every consideration of force, efficiency, and facility of movement; and when, in my report to the Navy Department, I confined myself to a steam battery, such recommendation arose from an impression that though Congress might be disposed to grant one, they might not wish to exceed that number, though of smaller dimensions; that *one*, I therefore advised, should be heavy. But twenty guns distributed, say in four different batteries propelled by steam, would be more efficient and of more actual applicable force than forty confined to one and the same vessel. The risk, too, from hot shot, though apparently increased, would in reality be lessened, inasmuch as in one case the whole force might be destroyed by a single shot, while in the latter a loss of only one-fourth of that force could thus occur.

A division of force into a number of vessels enables that force to act at many different points, (and if necessary can act together,) and can, of course, at so many different points assail the enemy. The means of transporting troops, a highly important consideration, is thus also multiplied and facilitated, and without the necessity of withdrawing the whole of such force from before an enemy, as would be the case where there is only one vessel.

From these considerations I would respectfully recommend that instead of one heavy steam battery or vessel, say to mount twenty 24-pounders, the same number of guns, of the same or even greater calibre, should be distributed into four vessels or batteries of five guns each;\* the construction of these vessels to be such as will admit of their guns acting over the levee when the river is about half stage, as should an enemy again attempt the capture of this city, they will hardly be so unwise, or have the temerity to make such attempt during the season of the year when the river is at its lowest stage, viz: the sickly season; or at its highest stage, spring and summer; but at the season the last was made, the winter—assuredly the most favorable, both on account of climate and for the operations of an army; at that season the Mississippi is usually about half stage. A long 24-pounder will range with full effect from the river to the marsh or woods any and everywhere between Fort St. Philip and Baton Rouge; of course, any force occupying the narrow strip of highland between those limits must be exposed to the fire of a battery or vessel on the river capable of being moved at pleasure, without a possibility of avoiding its effect, unless they retire to the swamp, where they must surrender, or, if practicable, retire to their shipping; and had there been a steam battery or vessel mounting only four heavy cannon on this river during the last war, the enemy could have been driven from the highlands on the margin of the river, obliged to return to their shipping, and retire their mortar vessels from before Fort St. Philip. The nature of this river, and the country on its borders, renders a moveable force, that can be propelled at will against wind and current, peculiarly well adapted, and, indeed, indispensably necessary to its effectual defence.

The ship Louisiana, with sixteen long 12-pounders, eight of which could only be used at one time, produced such effect, caution, or alarm, as to induce the English commander to abandon an attack on our lines, on the 28th of December, 1814, and to retire his whole army to their encampment, when actually prepared for and led on with a view of an attack, thereby contributing in an eminent degree to the safety of the city, our lines being then very incomplete, offering little or no obstacle to so resolute a foe, and might possibly have been carried had the attempt been made, our force being then greatly inferior to the enemy, but from which they were (as they afterwards declared) deterred by the fire of the Louisiana; and it was from witnessing the effect produced by her battery on that day that I was induced to mount heavy cannon along the opposite bank of the river, flanking the encampment of the enemy and of their columns when marching to the attack of the lines; nor would the enemy have attempted the passage of the river had we had a floating force that could have been moved at will; the commanding general would in that case have been enabled to concentrate his whole force at one point, and the consequence might have possibly been the capture of the British army.

To the plan suggested by Colonel Croghan, viz: that instead of the force and propelling power being united in the same vessel, floating batteries can be constructed, and rely for the propelling power upon the steamboats navigating this river, of which there are always a number at this place, by which the batteries may be moved to whatever point or points should be desired, and there anchored, and by this means the expense of the propelling power would be avoided, there are many, and, as I conceive, insurmountable objections—neither entire command over the propelling power, confidence in its sufficiency, certainty, facility, celerity of movement, or security of propelling power, is obtained by this method.

The power of moving should, to render a force of this nature efficient, be as subject to the control of the commander as the direction of his force, which can best and, indeed, only be, when they are both united in the same body; on the certainty and celerity of movement would, in a great measure, depend the great advantage to be derived from this species of force. The steamboats navigating this river being built only for purposes of commerce and passage, their propelling power is greatly exposed, which a single shot might so derange as to render wholly useless. The steam batteries, as constructed under the directions and professional knowledge of the board of navy commissioners, are so constructed that the propelling power is perfectly protected from the effect of shot, and thus combine in one and the same body the very great advantage of force, power of moving at will, and security of power.

Nor would economy be promoted by this plan. The proprietors of steamboats thus employed by the government would, of course, demand a price proportioned to the risk, and in event of loss full indemnity for the boat, which would amount to as much as would be required to build a vessel or battery of proper construction, furnished with the propelling power.

The steamboat having towed the battery to a position and cast off from it, would, in endeavoring to retire beyond an enemy's cannon, be greatly exposed, and in all probability destroyed or rendered unmanageable; but admit she escaped uninjured in retiring from, or, when required, returning to the battery, should a change in position be suddenly and promptly made by the enemy, requiring a corresponding movement in the battery, much time must necessarily elapse before the steamboat could be recalled,

\*The guns, if the position of the steam-engine will admit of it, should be mounted on pivots, that the whole number may be brought to act on either side.

lashed to, and move the battery to the point desired; the time thus lost might enable the enemy to accomplish a most desirable object, when, by the prompt movement of the battery, it might have been defeated.

Again, if to avoid the danger to which the steamboat was exposed in retiring from and returning to the battery in the face of an enemy, and within the range of their guns, she should be retained alongside and on the opposite side from the enemy, the enemy are on the left bank of the river, the battery is anchored riding to the current, thus presenting the starboard side to the enemy; the steamboat is lashed on the larboard side, it is necessary to descend the river, the battery and boat are *winded*; the steamboat thus necessarily becomes exposed to the whole fire of the enemy's battery, unless, indeed, they are dropped down stern foremost. A similar exposure is made in towing the battery to its station, unless both anchor by the stern, and present the larboard side of the battery to the enemy; but should it be necessary to move the battery up the river, an insurmountable difficulty would, I apprehend, be experienced in propelling them stern foremost against the current of this river, and unless they are moved in that way the steamboat must become exposed to the fire of the enemy, for by winding, in order to bring her head to the current, the steamboat, of course, is placed next to and between the battery and the enemy.

DANIEL T. PATTERSON, *Captain United States Navy.*

Hon. JOSIAH S. JOHNSTON, *Senate of the United States, Washington.*

19TH CONGRESS.]

No. 330.

[1ST SESSION.]

PROCEEDINGS OF A COURT-MARTIAL FOR THE TRIAL OF COLONEL TALBOT CHAMBERS.

COMMUNICATED TO THE SENATE MAY 16, 1826.

*To the Senate of the United States:*

In compliance with a resolution of the Senate of the 28th ultimo, I transmit herewith a report from the Secretary of War, with a copy of the proceedings of the recent court-martial for the trial of Colonel Talbot Chambers, and other documents requested by the resolution or relating to the subject of it.

JOHN QUINCY ADAMS.

WASHINGTON, *May 9, 1826.*

DEPARTMENT OF WAR, *May 8, 1826.*

The Secretary of War, to whom was referred the resolution of the Senate of the 28th ultimo, requesting to be furnished with a copy of the proceedings of the court-martial by which Colonel Talbot Chambers was lately tried, together with a list of all the field and general officers in the service of the United States, with a statement of the service they were engaged in, and the places they were stationed at during the time of that trial, has the honor to transmit a report of the Adjutant General of the army furnishing the information required by the resolution.

Respectfully submitted.

JAMES BARBOUR.

The PRESIDENT of the *United States.*

ADJUTANT GENERAL'S OFFICE, *Washington, May 6, 1826.*

SIR: I respectfully transmit herewith "a copy of the proceedings of the court-martial by which Colonel Talbot Chambers was lately tried, together with a list of all" the general and field officers of the army, as enjoined by the resolution of the Senate of April 28, with the view of furnishing all the information on record touching incipient measures relative to the organization of the court, I beg leave to submit an extract of a letter from Major General Scott, of January 16, transmitting the charges in the case, together with the accompanying communications from the officer who preferred them, dated at Camp Morgan, December 7, 1825.

In a great majority of cases it will be found that general courts-martial have been composed of seven or nine members, and more frequently of the first than the last number, and of thirteen in no instance since the reduction of 1821; a court of but five members has been the most usual organization. The court-martial by which the late Colonel William King, of the 4th infantry, was tried in 1819, consisted of seven members, and the presiding officer held the rank of lieutenant colonel of artillery. The army at that time was 10,000 strong, and the relative position of the troops less remote and distant from each other than at present. The exigencies of the service, therefore, and the consequent practice of the army have for many years, it is believed, warranted the exercise of that discretionary authority delegated by the law, and which is predicated on the contingency found in the 64th article of war.

I am, sir, with great respect, your obedient servant,

R. JONES, *Adjutant General.*

The Hon. SECRETARY OF WAR.

*Extract of a letter from Lieutenant P. H. Galt, aide-de-camp and acting assistant adjutant general to Brevet Major General Scott, dated adjutant general's office, eastern department, Governor's island, January 16, 1826, to Colonel Roger Jones, Adjutant General at Washington.*

"I have the honor to enclose a copy of charges recently received at this office against Colonel Chambers, of the 1st infantry, and of the letter accompanying them from Captain Gale, of the same regiment, by whom they are preferred.

"It will be seen that the charges and specifications are of a character to demand the *earliest* investigation by a court-martial; and deeply as their recurrence is to be deplored, Major General Scott considers this a case the circumstances of which leave him no discretion. He would *immediately* order one from this office, but that the court which must be ordered as early as practicable at Green Bay for the trial of Colonel McNeil, &c., together with one shortly expected to be necessary in another quarter of the department, will very nearly absorb all the disposable officers within it. In this state of things I am directed to request that the order for Colonel Chambers's trial may be issued from your office, so as to embrace within its detail such officers of the other department in the vicinity of the colonel's station as may be disposable. A court of five members and two supernumeraries are quite as many, probably, as the good of the service will permit to be assembled, and the names of Majors Donoho and Payne, and Captain McIntosh in this department and the vicinity of the court are submitted as a portion of the detail."

True extract from the original on file.

R. JONES, *Adjutant General.*

CAMP MORGAN, *Creek Nation, December 7, 1825.*

Sir: I feel myself constrained by a sense of duty to make known to you the conduct of Colonel Chambers since he left Baton Rouge up to the present time, and I conceive the most proper mode of doing so is to exhibit charges and specifications against him, which I have accordingly done, and have the honor to submit them for your consideration. Aware of the delicate situation in which a junior officer who prefers charges against his commander is often placed, I have forborne until further forbearance would be a dereliction from duty. To such an extent has he carried his dissipation that it is notorious to the whole camp, and within the last month he had a drunken fit upon the parade ground. It is my candid opinion that not only the honor and interest of the service require his arrest, but even the lives of those under his command are sometimes jeopardized by his extreme folly. In support of this opinion I will state to you the occurrences of last night. Some time after tattoo the camp was alarmed (by his order) by the report of a gun and the long roll upon the drums; the troops soon formed, and faced the buildings occupied as officers' quarters and about thirty yards from it, and in that position they were ordered to fire by companies, by battalion, and by file. Several balls passed through different parts of the buildings; two balls passed through the room occupied by Dr. Cosby, who being in or near his quarters narrowly escaped being shot, one ball passing through the skirts of his coat and another through his bed clothes. I assure you I would not exhibit those charges did I not feel satisfied that I could establish every material fact with which I have charged him, provided the attendance of the witnesses is secured.

Sir, I have the honor to be your obedient servant,

JAMES H. GALE, *Captain 1st Regiment of Infantry.*

Major General E. P. GAINES, *Com'g Eastern Department U. S. Army, New York.*

True copy.

P. H. GALT, *Aide-de-Camp, and Acting Ass't Adj. General.*

The copy which was received from Major General Scott.

R. JONES, *Adjutant General.*

ADJUTANT GENERAL'S OFFICE, *May 6, 1826.*

Proceedings of the court-martial in Colonel T. Chambers's case.

R. JONES, *Adjutant General.*

*Original proceedings of a general court-martial held at Cantonment Morgan, Creek Nation, by virtue of the following order:*

ORDER No. 6.

ADJUTANT GENERAL'S OFFICE, *Washington, January 26, 1826.*

1. A general court-martial will convene at Cantonment Morgan, Georgia, the present headquarters of the 1st infantry, on the 15th March ensuing, or as soon thereafter as practicable, for the trial of Colonel Talbot Chambers, the commander of that regiment.

2. The court will consist of five members, (a greater number cannot be assembled without injury to the service,) and shall be composed as follows:

*President.*—1. Colonel D. L. Clinch, 4th infantry.

*Members.*—2. Brevet Colonel William Lindsay, 3d artillery. 3. Lieutenant Colonel Eustis, 4th artillery.

4. Major S. Donoho, 4th infantry. 5. Brevet Major M. M. Payne, 4th artillery.

*Supernumerary members.*—1. Captain J. S. McIntosh, 4th infantry. 2. Captain P. Wager, 4th infantry.

*Special judge advocate.*—First Lieutenant W. H. Bell, 4th artillery.

By order of Major General Brown.

R. JONES, *Adjutant General.*

CANTONMENT MORGAN, *Creek Nation, March 15, 1826.*

The court met pursuant to the above order. Brevet Colonel William Lindsay not having arrived, the court was composed as follows:

Present: Colonel D. L. Clinch, 4th infantry, president.

Members.—Lieutenant Colonel Eustis, 4th artillery; Major S. Donoho, 4th infantry; Brevet Major M. M. Payne, 4th artillery; Captain J. S. MacIntosh, 4th infantry.

Supernumerary member, Captain P. Wager, 4th infantry.

Special judge advocate, First Lieutenant W. H. Bell, 4th artillery.

The order for convening the court being read, the accused was then asked, through the judge advocate, if he had any exceptions to make against any of the members of the court named in the above order, to which he replied in the negative; whereupon the oaths prescribed by the articles of war were duly administered to the court and judge advocate in presence of the accused.

The court then proceeded to the trial of the accused, Colonel Talbot Chambers, of the 1st regiment United States infantry, who was arraigned on the following charges and specifications preferred against him by Captain James H. Gale, of the 1st regiment United States infantry.

*Charges and specifications preferred against Colonel T. Chambers, of the 1st regiment United States infantry, by Captain James H. Gale, of the same regiment.*

CHARGE 1.—Habitual drunkenness, and drunkenness on duty.

*Specification 1.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, was extremely drunk on the night of the 20th or 21st June, 1825, at Baton Rouge, Louisiana, he being then the commanding officer, and his command under orders for Cantonment Clinch, West Florida, and preparing to embark on board the steamboat "Feliciana."

*Specification 2.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, was drunk on the night of the 21st or 22d June, 1825, on board the steamboat "Feliciana," while descending the Mississippi river from Baton Rouge to New Orleans, he being then in the immediate command of a part of the 1st regiment United States infantry.

*Specification 3.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, was drunk at New Orleans between the 23d and 25th June, 1825, he being then in the immediate command of a part of the 1st regiment United States infantry.

*Specification 4.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, was drunk on board the transport brig "South Carolina," on or about the 25th or 26th June, 1825, he being then in the immediate command of a part of the 1st regiment United States infantry.

*Specification 5.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, being in the immediate command of a part of the 1st regiment United States infantry, on their passage from New Orleans to Cantonment Clinch, West Florida, on board the transport brig "South Carolina," was, on the 27th, 28th, 29th, and 30th June, 1825, in a state of mental derangement, produced by excessive intoxication, and thereby rendered incapable of performing his duty.

*Specification 6.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, was rendered incapable of commanding while at Cantonment Clinch, West Florida, on the 1st, 2d, 3d, and 4th of July, 1825, in consequence of mental derangement produced by excessive intoxication.

*Specification 7.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, was repeatedly drunk when in command of a part of the 1st regiment United States infantry, at Camp Morgan, Creek Nation, between the 27th of August and 23d of September, 1825.

*Specification 8.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, was drunk while in command of a part of the 1st regiment United States infantry, at Camp Morgan, Creek Nation, on or about the 29th November, 1825.

*Specification 9.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, had, at Camp Morgan, Creek Nation, on or about the 17th November, 1825, on the parade ground, a fit, produced by excessive drunkenness, he, Colonel T. Chambers, being then in the immediate command of a part of the 1st regiment United States infantry.

CHARGE 2.—Violating the 49th article of the "Rules and Articles of War," and 602d paragraph of the 52d article of the "General Regulations of the Army."

*Specification 1.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, did repeatedly, between the 27th August and 23d September, 1825, while in command of a part of the 1st regiment United States infantry at Camp Morgan, Creek Nation, cause the camp to be alarmed during the night by the discharging of fire-arms, and sounding the "long roll," or "to arms," upon the drums, in violation of the 602d paragraph of the 52d article of the "General Regulations of the Army," and the 49th article of the "Rules and Articles of War."

*Specification 2.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, did, at Camp Morgan, Creek Nation, on the night of the 6th December, 1825, cause the camp to be alarmed by the discharge of fire-arms and the sounding of the "long roll," or "to arms," on the drums, in violation of the 49th article of the "Rules and Articles of War," and the 602d paragraph of the 52d article of the "General Regulations of the Army."

*Specification 3.*—In this, that he, the said Colonel T. Chambers, of the 1st regiment United States infantry, did, on the night of the 6th December, alluded to in the next preceding specification, and at the post therein named, by the unnecessary discharge of fire-arms, endanger the life or lives of certain member or members of the garrison then under his immediate command.

CHARGE 3.—Conduct unbecoming an officer and a gentleman.

*Specification 1.*—In this, that the said Colonel T. Chambers, of the 1st regiment United States infantry, did, at Camp Morgan, Creek Nation, on the 3d of December, 1825, return to Captain James H. Gale, of the 1st regiment United States infantry, under a blank envelope, an official communication made to him by the said Captain James H. Gale, in the following words, viz:

CAMP MORGAN, *Creek Nation, December 3, 1825.*

SIR: I received a few minutes since, by your orderly, a communication directed "To the commanding officer, company E, 1st regiment United States infantry," which was broken open. You will please, if in your power, to inform me the person that broke the seal, or by what authority it was opened.

Sir, I have the honor to be your most obedient servant,

JAMES H. GALE, *Captain 1st U. S. Inf., Com'dg Company E.*

Colonel T. CHAMBERS, *1st Regiment U. S. Infantry.*

The said Colonel T. Chambers making no reply to the above, although he had had in his possession one or two days the letter which forms the subject of this communication, and although said last-mentioned communication was directed to Captain James H. Gale, from the quartermaster at Philadelphia, in relation to clothing forwarded for his company, (E,) 1st regiment United States infantry.

JAMES H. GALE, *Captain 1st United States Infantry.*

To which the accused pleaded "not guilty," but objected to the first charge as being of a character too general. Whereupon the court was ordered to be cleared, and after due deliberation, overruled the objections urged by the prisoner.

Jas. H. Gale, a captain in the 1st regiment United States infantry, a witness for the prosecution, being duly sworn according to law, deposes and says: "On the night of the 20th or 21st June, 1825, the accused was in the immediate command of a part of the 1st regiment United States infantry at Baton Rouge, Louisiana. I saw the accused as many as three times during the night referred to. He was very drunk every time that I saw him; so much so that he could scarcely walk. The first time that I saw him he was coming through the arcade of the garrison and fell against the wall of the arcade. The second time I saw him he was coming out of town, about two hundred yards from where I first saw him. The third time, I saw the accused going into his quarters.

*Question by the judge advocate.* At the time and place referred to in the first specification, first charge, was or not any other person present when you saw the accused?

*Answer.* Yes; Lieutenant W. R. Jouett was present the first time I saw the accused, but I was alone the second and third times.

*Question by judge advocate.* Was or not the troops of the 1st regiment United States infantry, then at Baton Rouge, preparing to embark? If the affirmative, state on board what vessel.

*Answer.* The troops were preparing to embark, the greater part of the night, on board the steamboat "Feliciana."

*Question by judge advocate.* At what time did the troops commanded by the accused embark for New Orleans from Baton Rouge?

*Answer.* About ten o'clock next morning. I sailed about three on the evening of the same day.

*Question by the court.* Did you or not speak to the accused at either of the three times you state to have seen him on the evening of the 20th or 21st June?

*Answer.* As far as I remember, I did not speak to the accused at either of the times alluded to. I was on board the steamboat Feliciana while descending the Mississippi (the accused being in the immediate command) on the 21st or 22d June, 1825. The accused was then intoxicated. Some time during the evening he came into the cabin of the boat and complained of hurting his hand in a fight with one of the soldiers, when it proved to be one of the sailors. I also judged that he was intoxicated from the circumstance of his inviting me to drink with him, and the manner in which he did it. I saw the accused once aboard the transport brig "South Carolina," on the 23d or 25th June, lying at New Orleans. The accused was then lying in a berth in the cabin; he appeared while lying in the berth to be intoxicated, though complaining to be unwell, and was unable to stir about.

*Question by judge advocate.* At what time did the troops commanded by the accused arrive from New Orleans at Cantonment Clinch, and in what time did the vessel in which you embarked from New Orleans arrive at the same post?

*Answer.* Both vessels came into the harbor of Pensacola on the morning of the 28th or 29th of June. The troops of the schooner "Mary Washington," under my command, landed on the same day; part of them, if not all. The next day those from the brig landed, and, in consequence of the accused being absent, or not able to muster them, I mustered them at eight or nine o'clock on the night of the 30th of June at Cantonment Clinch.

*Question by judge advocate.* Did you or not, while at Cantonment Clinch, West Florida, on the 1st, 2d, 3d, and 4th of July, 1825, or on either of these days, see the accused in a state of mental derangement? If the affirmative, state all the circumstances relative thereto.

*Answer.* Yes; I saw the accused twice or three times during those days; once he was trying to get out of his quarters with all his clothes off excepting his linen; and the next time I saw him I went for the purpose of getting his signature to an official paper. I then saw him so much deranged that he was incapable of signing the paper. I returned in about two days after, hearing that he had got better, and obtained his signature required on or about the 5th of July. I believe this derangement was produced by intoxication. I saw the accused twice intoxicated, I believe, between dates referred to in the seventh specification, and on or about the 1st September, at midnight; I was awoke at that time of night by the accused from the noise which he made, and found a large fire built before his shed. When I arose he was cursing some one unknown. I immediately pulled up the tent-pins in the rear of my tent, when I saw the accused walking backwards and forwards in front of his shed for ten or fifteen minutes. Seeing no one else, or hearing no one in conversation with him, I returned to my tent. At this time the accused appeared to be very much intoxicated.

*Question by the court.* At what distance was your tent from the shed of the accused?

*Answer.* I was at the distance of about thirty yards.

*Question by the court.* You state that you saw the accused twice intoxicated; when and where did you see him the other time in this state?

*Answer.* During one of the night alarms, about the middle of September, and in front of the temporary buildings which were erected for the troops.

*Question by the court.* How near were you to the accused, and what are your reasons for believing he was intoxicated?

*Answer.* I was sometimes within a few feet of him; he staggered during the time, which induced me to believe he was intoxicated.

*Question by the court.* Had you any conversation with the accused at the time referred to, or did he at that time give any orders to his command?

*Answer.* I did not speak to the accused. He gave several orders to the command then under arms, and observed they fired like a damned parcel of militia, or words to that effect.

*Question by the court.* Was there anything unusual or improper in his mode of giving the words of command?

*Answer.* No, there was nothing unusual. I cannot say that there was anything improper. On or about the 17th November, in the morning, I was sitting in my room, and heard some person make an unusual noise, having the sound of a shriek. I stepped out of the door, and saw the accused in the hands of two or three persons. Lieutenant McKenzie was one. They were carrying him into the doctor's room. Between the 27th of August and 23d of September, 1825, Cantonment Morgan was alarmed, at night, between the hours of nine and twelve, from eight to twelve times, by the beating of drums and the discharge of fire-arms. The troops were paraded at those signals in front of their quarters, and were there ordered by the accused to fire by companies, by wings, and by battalions.

On the night of the 6th December, 1825, Camp Morgan was alarmed by the discharge of fire-arms and the beating of the long roll, or to arms. The troops immediately paraded in front of their present quarters. They were in that position ordered to fire by files, by wings, by companies, and by battalions. Several of the balls passed into the officers' quarters; one of them passed through the blanket of Dr. Cosby's bed; one of them passed through the skirt of his coat, and made two holes in it, and the buckshot that passed through his coat made nine holes in it, his coat being on him at the time. Several of the balls passed through, and went into the quarters occupied by the officers.

I commanded company E, 1st regiment United States infantry, and wrote a letter, of which that referred to in the first specification, third charge, is a copy, and received no reply except that the letter I wrote to the accused, just referred to, was returned to me under a blank envelope, directed to Captain James H. Gale, commanding E company, 1st regiment United States infantry, and marked "on service."

*Question by the judge advocate.* Did you or not on the 3d December, 1825, receive from the accused an official communication, from the quartermaster in Philadelphia, referred to in first specification, third charge, with the seal broken?

*Answer.* I received such a letter from the orderly of the accused, who stated that the accused had directed him to hand me that letter.

*Question by the judge advocate.* Was or not the said letter in possession of the accused any time previous to its being handed you by the orderly, as stated? If in the affirmative, state what time.

*Answer.* I am unable to say what time it was in possession of the accused.

*Question by the accused.* Were you not a member of a general court-martial which convened about eighteen months ago at Baton Rouge, for the trial of Lieutenant Pierce, then of the army, of which Colonel Chambers officiated as prosecutor?

*Answer.* I was a member of a general court-martial which tried Lieutenant Pierce, about eighteen months or two years ago, at Baton Rouge, and the accused was prosecutor.

*Question by the accused.* Were you not a witness on that occasion also?

*Answer.* Yes.

*Question by the accused.* Did you not on that occasion declare that you were the open and avowed enemy of Colonel Chambers, and that you would not believe him even under oath?

*Answer.* I do not recollect that I did on that occasion avow that I was the enemy of the accused. I did swear that I would not believe him under oath, and would not now.

*Question by the accused.* Have you not been his (Colonel Chambers's) enemy ever since that period?

*Answer.* I have not been more his enemy than every honorable man should be who is as well acquainted with him as I am.

*Question by the accused.* Do you not expect that in the event of my acquittal by this court I will cause your arrest and trial?

*Answer.* I am not able to judge whether it is the intention of the accused or not.

*Question by the accused.* Was the night alluded to in your testimony, when you state that I was drunk at Baton Rouge, very dark?

*Answer.* It was so light that I could know the accused at a distance of a hundred yards.

*Question by the accused.* Do you know if Colonel Chambers complained of indisposition previous to leaving Baton Rouge, or not?

*Answer.* No.

*Question by the accused.* Who superintended the preparations that were made for the movement of the troops previous to their embarking from Baton Rouge?

*Answer.* The officers commanding companies superintended their respective preparations, I believe. It was the case with myself.

*Question by the accused.* State who marched the command at Baton Rouge on board of the steamboat, and gave the necessary orders for their being properly disposed of?

*Answer.* I saw the accused march the troops out of the garrison, but being sick, I was not with them, and did not go aboard until afterwards.

*Question by the accused.* Do you or do you not know that the sailor whom you state I fought with on board the boat had in the first place seized me by the collar?

*Answer.* I do not know.

*Question by the accused.* State to the court the manner in which I invited you to drink with me on entering the cabin; and was I not in a passion at the moment?

*Answer.* Several officers were sitting in the stern of the steamboat singing songs. After singing several, he observed to the officers; come my lads, or boys, let us all take a drink, or words to that effect. All the officers then went into the cabin, except myself. The accused returned in about half a minute and said, come all of you. I do not believe the accused was in a passion at the time referred to.

*Question by the accused.* Who gave the necessary orders for the disembarkation of the command on their arrival at New Orleans, and caused the necessary arrangements to be made for their passage to Pensacola?

*Answer.* The accused gave the order for disembarking the troops from aboard the Felician, and for their march to their quarters without their knapsacks. They then piled arms, and then went aboard the Felician and got their knapsacks, the boat having removed about half a mile.

*Question by the accused.* Do you not believe that the command was improved by the practice of exercising them in the night, which accustomed them to form at all hours without confusion?

*Answer.* Yes.

*Question by the accused.* When the battalion was exercised during the night in front of the quarters, was not the order given to bite off the ball part of the cartridge, and to elevate their pieces above the roofs of the quarters, in order to avoid accidents?

*Answer.* Yes; I heard the order, "bite off the balls," given several times previous to the building of the present quarters. I heard the order given to elevate their pieces on one night during these exercises, after the quarters were built, and once on the night of the 6th December, 1825, I heard the order last alluded to.

*Question by the accused.* At the time you state that I staggered when the command was under arms, during the night, in front of the temporary buildings, was the night dark, and was the ground full of stumps and other obstructions?

*Answer.* The night was not very dark. I was able to distinguish a man ten or fifteen paces. There were many stumps in front of the buildings.

*Question by the accused.* Did you ever call on Colonel Chambers on a point of duty which, from drunkenness, he was unable to perform? If so, please state particulars.

*Answer.* No; I never did.

Lieutenant J. J. Abercrombie, adjutant of the 1st regiment United States infantry, a witness for the prosecution, being duly sworn according to law, deposes and says:

I do not think the accused was drunk on or about the 25th or 26th June, 1825. The accused was, during some part of the voyage, in a state of mental derangement. I do not, however, presume to assign the cause. He was, in consequence of his illness during the voyage, rendered incapable of performing his duty. He was, about the time referred to in the 6th specification, 1st charge, mentally deranged; but I am unable to assign any cause for it. I do not recollect to have seen the accused drunk during the interval referred to in the 7th specification, 1st charge.

Since I have been stationed at this cantonment the "long roll," or "alarm drum," has been frequently beat, and fire-arms discharged at night, by order of the commanding officer; but I do not know exactly the time at which it was done. It was about the time referred to in the 2d specification, 2d charge.

On or about the time referred to in the 2d specification, 2d charge, there was an order from the commanding officer for the beating of the "long roll" and the discharge of fire-arms at Cantonment Morgan, and the command paraded and fired in the night.

On or about the night of the 6th December, 1825, when the troops fired, the life of Dr. Cosby was endangered by the discharge.

Whereupon the court adjourned to meet to-morrow at 9 o'clock.

---

CANTONMENT MORGAN, *March 16, 1826.*

The court met pursuant to adjournment.

Present: Colonel D. L. Clinch, 4th infantry, president.

*Members.*—Lieutenant Colonel A. Eustis, 4th artillery; Brevet Major M. M. Payne, 4th artillery; Major S. Donoho, 4th infantry; and Captain J. S. McIntosh, 4th infantry.

Supernumerary member, Captain P. Wager, 4th infantry.

Special judge advocate, First Lieutenant W. H. Bell, 4th artillery.

Lieutenant J. J. Abercrombie, a witness for the prosecution, being again called before the court, was *Questioned by prosecutor.* Have you not frequently seen Colonel T. Chambers drunk while in command at Camp Morgan; and if so, are you sure that it was not within the time embraced in the 7th specification, 1st charge.

*Answer.* I have not frequently seen him drunk at Camp Morgan, as far as I can judge.

*Question by prosecutor.* Please state to the court whether you have seen him drunk once or twice while in command of Camp Morgan, between the 27th August and 6th December, 1825.

*Answer.* I have perhaps seen him under the influence of spirituous liquor at some period during that time, but cannot say as to the particular day.

*Question by prosecutor.* Was the accused, Colonel T. Chambers, in the immediate command of Camp Morgan during the time you say you have seen him under the influence of spirituous liquor?

*Answer.* Yes.

*Question by the accused.* Were you on duty, acting as adjutant with the command at Baton Rouge, when preparations were making for the embarkation of the command to Pensacola?

*Answer.* Yes.

*Question by the accused.* Did you observe that Colonel Chambers was at any period during that time so drunk as to be incapable of performing his duty?

*Answer.* No.

*Question by the accused.* Was Colonel Chambers so drunk on board the transport steamboat as to be incapable of giving the necessary orders for a proper distribution of the troops whilst on board?

*Answer.* Not to my knowledge.

*Question by the accused.* Was Colonel Chambers so drunk whilst the command halted at New Orleans as to be incapable of making the necessary arrangements for their embarkation to Pensacola?

*Answer.* Not to my knowledge. I saw him frequently every day we were there, but did not see him any one time under the influence of liquor during our stay there.

*Question by the accused.* Did not Colonel Chambers complain of being very much indisposed at that period, and was he not very much exposed to the excessive heat of the sun in the performance of his duty?

*Answer.* Yes; he was.

*Question by the accused.* From the intercourse which must eventually occur between the adjutant and the colonel, if Colonel Chambers had on that occasion been drunk and incapable of performing his duty, do you not believe that it would have been perceptible to you?

*Answer.* If I were present and while he was on that duty I should have observed it. Frequently during our stay at New Orleans I did not see the accused for two or three hours at a time on some days, and for one or two nights I did not see the accused. Either himself or myself, or both, were in town.

*Question by the accused.* Have you not been constantly associated with Colonel Chambers, not only as the adjutant of the command, but as a member of the same mess with him, since the command left Baton Rouge?

*Answer.* Yes, with the exception of a short time while the accused was sick at Cantonment Clinch.

*Question by the accused.* Have you ever seen him, Colonel Chambers, so drunk as to render him incapable of performing his duty, or to behave in an unsoldierlike or ungentlemanlike manner, since you joined the staff of the 1st regiment?

*Answer.* Once I thought the accused incapable of performing his duty since we have been at Camp Morgan in consequence of having drunk too much.

*Question by the accused.* Did you require of him to perform any duty at that period in your capacity as adjutant?

*Answer.* No; it was at night, after tattoo.

*Question by the accused.* Have you not known for a considerable length of time that Captain Gale, from his general conversation, has been the enemy of Colonel Chambers?

*Answer.* I have been under that impression for some considerable time.

Lieutenant J. McKenzie, of the 1st regiment United States infantry, a witness for the prosecution, being duly sworn according to law, deposes and says: I never observed that the accused was mentally deranged until the last day of the voyage. I cannot state the cause of the derangement of the accused.

*Question by the judge advocate.* Did you or not, at any time during the voyage from New Orleans to Pensacola, see the accused intoxicated? If so, state the time and other circumstances.

*Answer.* I do not recollect to have seen the accused intoxicated during the voyage. About the time specified in the 6th specification, 1st charge, the accused was rendered incapable of commanding by reason of mental derangement. I am unable to state the cause of the derangement. I have seen the accused intoxicated while at Camp Morgan, but cannot state at what time he was so.

*Question by the judge advocate.* Have you or not seen the accused intoxicated on or about the time alluded to in the 7th specification, 1st charge, more than once? If so, state whether he was incapable of performing his duty or not thereby.

*Answer.* I have seen the accused intoxicated at Camp Morgan several times, but am unable to state the times. Sometimes he was, while in this state, able to perform his duty, at other times not able. The alarm drum has frequently beat and the guns fired, and the troops paraded at night, I think, at the time and place referred to in the 1st specification, 2d charge.

*Question by the prosecutor.* When you saw the accused, Colonel T. Chambers, in a state of mental derangement, please state to the court your impression at the time as to the cause of it.

*Answer.* My impression at the time was, that it was occasioned by too free use of ardent spirits.

*Question by the accused.* Have you not officiated as quartermaster to the command from the period they left Baton Rouge until the present date?

*Answer.* I have.

*Question by the accused.* Who gave the necessary orders for the embarkation of the troops at that place?

*Answer.* The accused.

*Question by the accused.* Did not Colonel Chambers complain of being very much indisposed at that period?

*Answer.* I think I have heard the accused frequently, about that time, complain of indisposition.

*Question by the accused.* State by whose order the necessary arrangements for the transportation of the command from New Orleans to Pensacola were made, and was not Colonel Chambers very much exposed to the excessive heat of the sun in the performance of his duty?

*Answer.* The order was given by the accused. I am unable to say whether he was much exposed to the sun or not, as I saw him very little while at New Orleans.

*Question by the accused.* Was there not a very malignant fever then prevalent at New Orleans which it was said was contagious?

*Answer.* I do not recollect to have heard of any cases of fever there.

*Question by the accused.* You state that I was several times in a state of intoxication whilst at Cantonment Morgan. What proofs of intoxication did I manifest? Did I stagger, fall, and be carried to my quarters, or was I incapable of conversing in a rational manner?

*Answer.* I recollect on one occasion I called on the accused in the evening on official business; he arose to offer me a chair and I discovered that he staggered. His face appeared much flushed, and his conversation also indicated "intoxication." I do not remember ever to have seen him fall and be conveyed to his quarters in that state.

*Question by the court.* Did you see Colonel Chambers during the night previous to the embarkation from Baton Rouge?

*Answer.* I do not recollect to have seen him then. About the time specified in the 9th specification, 1st charge, the accused was taken with a convulsive fit under the gallery in front of the quarters. He fell into my arms; I called for assistance and had him conveyed into the doctor's quarters. As to the cause of the illness of the accused on this occasion I am unable to state it.

*Question by the prosecutor.* Please state to the court what were your impressions as to the cause that produced the fit you say the accused had.

*Answer.* I have formed no opinion as to the cause.

*Question by the prosecutor.* Was not the accused in the immediate command of Camp Morgan at the time he had the fit referred to in your testimony?

*Answer.* He was.

William R. Jouett, a lieutenant 1st regiment United States infantry, and a witness for the prosecution, being duly sworn according to law, deposes and says: I recollect of seeing Colonel Chambers, between 12 or 1 o'clock at night, on or about the 20th or 21st of June, at the garrison at Baton Rouge. I considered that night the accused to be very drunk. The troops were at the time alluded to preparing to embark for New Orleans. The accused was then the immediate commanding officer.

*Question by the prosecutor.* Please state to the court the precise place you saw him drunk, and whether there was any person with you at the time.

*Answer.* I was standing fifteen or twenty steps from the sallee-port, on the side of Baton Rouge. Captain Gale was with me at the time. The accused came through the sallee-port and passed close to us.

The accused, when the troops arrived at Pensacola, was unable to perform his duty, but from what cause I am unable to say. I do not recollect of seeing the accused drunk about the time referred to in the 7th specification, 1st charge.

*Question by the accused.* Did you speak to Colonel Chambers at the time you state he was so very drunk?

*Answer.* I did not.

*Question by the accused.* Do you not know that Colonel Chambers was in an ill state of health some time previous to the movement of the troops?

*Answer.* I believe that the accused had been complaining of having the "fever and ague" some time before that.

*Question by the accused.* Were you on duty on board the steamboat on the day of embarkation; and if so, state who gave the necessary orders for the disposal of the troops?

*Answer.* I was on board the boat, and was on duty at the time referred to. The accused gave the necessary orders.

*Question by the accused.* State who gave the necessary orders for the disembarkation of the command at New Orleans.

*Answer.* The accused.

*Question by the accused.* Did you ever call on Colonel Chambers on a point of duty and find him incapable, from drunkenness, to perform his duty?

*Answer.* I never did.

*Question by the court.* What were your reasons for believing the accused was drunk on or about the night of the 20th or 21st of June at Baton Rouge?

*Answer.* I judged so from the manner of his walking.

Whereupon the court adjourned to meet to-morrow at 9 o'clock.

CANTONMENT MORGAN, *March 17, 1826.*

The court met pursuant to adjournment.

Present: Colonel D. L. Clinch, 4th infantry, president.

*Members.*—Lieutenant Colonel A. Eustis, 4th artillery; Brevet Major M. M. Payne, 4th artillery; Major S. Donoho, 4th infantry; Captain J. S. McIntosh, 4th infantry.

Supernumerary member, Captain P. Wager, 4th infantry.

Special judge advocate, First Lieutenant W. H. Bell, 4th artillery.

Dr. J. J. Cosby, late acting assistant surgeon in the army, a witness for the prosecution, being duly sworn according to law, deposes and says: The accused was deranged during the passage and on the days mentioned in the 5th specification, 1st charge.

*Question by the judge advocate.* Do you or not believe, from the best of your knowledge, as a medical man, that the derangement referred to in the 5th specification, 1st charge, was produced by the excessive use of ardent spirits, or by the use of ardent spirits in any degree?

*Answer.* I am bound to say that I do believe it was produced by the excessive use of ardent spirits. The accused was deranged during the time and at the place referred to in the 6th specification, 1st charge.

*Question by the judge advocate.* Do you or not, as a medical man, consider the derangement referred to in the 6th specification, 1st charge, to have been produced by the excessive use of ardent spirits, or by its use in any degree?

*Answer.* Yes. I did not see the accused drunk on or about the 29th of November, 1825, while in command.

*Question by the judge advocate.* Did you or not see the accused drunk on or about the 29th of November, 1825, while not in immediate command?

*Answer.* I believe I did.

*Question by the judge advocate.* Was or not the intoxication referred to in the last question of such a character as to render the accused incapable of exercising his command?

*Answer.* I do not believe it was.

*Question by the judge advocate.* Will you state to the court what you understand by the words "immediate command," in the second question from this, above?

*Answer.* What I mean by "immediate command" is, while an officer is in uniform, or on duty. Colonel Chambers called on me on or about the 17th of November, in the morning, before I was up, and observed that he felt very unwell, and asked if I had any "essence of tansey," or "mint." I replied yes, but that I had no spirits. He answered, "No matter, I will take the phial containing tansey." He then stepped out of the front door, and a few minutes after I heard Mr. McKenzie call loudly for me. I sprung up and opened the door. The accused was then brought into my room in a convulsion.

*Question by the judge advocate.* From the best of your knowledge, as a medical man, state to the court your opinion whether the illness just referred to above was produced by the excessive use of spirituous liquors or not.

*Answer.* I believe it was.

*Question by the prosecutor.* Did you not say to the accused, on or about the time he had the fit, that if he did not quit drinking spirituous liquors he would kill or injure himself?

*Answer.* I did.

[The accused objected to the above question proposed by the prosecutor, as being an improper one. Whereupon the court was ordered to be cleared. The court, after due deliberation, overruled the objection.]

*Question by the court.* Were you the medical attendant of Colonel Chambers and of the troops under his command during the latter part of June, beginning of July, and about the 17th of November last?

*Answer.* Yes.

*Question by the prosecutor.* Where were you during the alarm on the night of the 6th of December last? Was or not your life endangered by the discharge of fire-arms by the troops at Camp Morgan, commanded by the accused? Please state the circumstances to the court.

*Answer.* I was in my room at the time. I believe my life was endangered by the discharge. When the roll was beat Captain Gale and Captain Loomis were in the room. I was lying on my bed, I arose,

and stepped to the door. Dr. Hawkins and Dr. McCombe, in passing, stopped at my door, and asked me to walk round with them to the rear of the troops. I replied, "No, there is no danger." Soon after, leaning against my door, whilst the troops were firing, I felt the force of shot passing through my coat. I presumed there was no danger, in consequence of having heard Colonel Chambers repeatedly order the men to elevate their pieces. There was a ball passed through my blanket.

*Question by the judge advocate.* Did or not the sick at the hospital, who were able, turn out with their muskets during any of these alarms; if the affirmative, do you think they were injured thereby?

*Answer.* They did turn out, as is said, but not to my knowledge. I do not think they were injured by it.

*Question by the accused.* When you joined, on the 18th or 19th of June, the command at Baton Rouge, in the character of acting surgeon, did not Colonel Chambers report to you as being very much indisposed, and did you not prescribe for him?

*Answer.* I did.

*Question by the accused.* Did not Colonel Chambers, although in ill health at that period, perform more than an ordinary proportion of duty in making the necessary preparations for the embarkation of troops?

*Answer.* I believe he did.

*Question by the accused.* State who gave the necessary orders for a proper disposition of the sick, then under your charge, after they had embarked?

*Answer.* The accused.

*Question by the accused.* Who gave the necessary orders for the accommodation of the sick during their passage and after their arrival at New Orleans?

*Answer.* The accused.

*Question by the accused.* Was not Colonel Chambers very much exposed to the excessive heat of the sun, in the performance of his duty, while at New Orleans, and did he not at that period complain to you of being very much indisposed?

*Answer.* He was very much exposed to the heat of the sun; he repeatedly complained of indisposition.

*Question by the accused.* Was not the city of New Orleans at that time visited by a malignant fever, which was deemed of a serious nature?

*Answer.* The billious fever was at that time prevailing at New Orleans, and was considered of a serious nature.

*Question by the accused.* Did not Colonel Chambers perform duty, although sick, on board the transport destined for Pensacola until you advised him to resign the command to Captain Cobbs? Please state the particulars, if in your recollection.

*Answer.* He did, until I advised him to resign it to Captain Cobbs, in consequence of his indisposition.

*Question by the accused.* On the 29th of November, in which I am charged with being drunk, did I not report to you as being very much indisposed, and did you not prescribe for me?

*Answer.* On the time the accused returned from his tour in the Nation, which was on or about the time alluded to, he did report and I prescribed for him.

*Question by the accused.* Did you not spend the evening with me preceding the morning in which it is stated I had a convulsion fit; and if so, was I drunk?

*Answer.* I did; the accused was not so drunk as to prevent the performance of duty.

*Question by the accused.* Was not the camp, at that period, very much disturbed with Indian whoops, and did I not express to you my apprehensions of what might be the intentions of the Indians?

*Answer.* It was; and the accused did express to me his apprehensions of the Indians.

*Question by the accused.* Did not Colonel Chambers go the visiting rounds repeatedly about that time, at a late hour of the night, and give strict orders to the sentinels?

*Answer.* I believe he did.

*Question by the accused.* Did not Colonel Chambers inform you in conversation, on the evening alluded to, that he had not slept for the two nights preceding, in consequence of the disturbance about the camp?

*Answer.* He complained of loss of sleep; as to the cause I am unable to say.

*Question by the accused.* Have you not known, from the general conversation of Captain Gale, that he has for a considerable length of time been the enemy of Colonel Chambers?

*Answer.* I believe he has.

*Question by the accused.* Have you not frequently taken Colonel Chambers to task for his negligence in not applying to you for medical advice, by which he might have avoided a severe spell of illness? Please state particulars.

*Answer.* I have frequently. I have often told him that unless he was more careful of his health he would suffer severely.

*Question by the accused.* Is not Colonel Chambers very subject to a particular complaint?

*Answer.* Yes, he is.

Joshua Hill, a sergeant in the first regiment United States infantry, being duly sworn according to law, deposes, and was

*Questioned by the judge advocate.* On or about the first alarm, were you or not hospital steward at Cantonment Morgan?

*Answer.* Yes.

*Question by prosecutor.* Did not the sick of the hospital at this post, or some of them, turn out under arms at the first alarm, and were they not very much alarmed at the time and exposed to the night air?

*Answer.* Some few of them did; they were alarmed; they were but a short time out.

*Question by the judge advocate.* Were you on board the steamboat "Feliciana" on or about the 21st or 22d of June, 1825?

*Answer.* Yes.

*Question by the judge advocate.* Did you or not, at any time during the interval, see the accused intoxicated?

*Answer.* I did not, to my knowledge.

The evidence on the part of the prosecution being closed, five additional specifications, under the first charge, were then preferred by the prosecutor against the accused, he (the accused) expressing his willingness to plead to the same. Whereupon the court was ordered to be cleared, and the question put to the court, "Shall the accused plead to the five additional specifications above referred to?" The question, after due deliberation, was decided in the affirmative.

Additional specifications to the first charge preferred against Colonel Talbot Chambers, of the first United States infantry, by Captain James H. Gale, of the same regiment :

*1st additional specification.* In this, that said Colonel Talbot Chambers, of the first infantry, was drunk at Cantonment Morgan on or about the night of the 15th December, 1825, and in that situation visited the guard several times, he being at that time the commanding officer of the United States troops stationed in the Creek Nation.

*2d additional specification.* In this, that the said Colonel Talbot Chambers, of the first infantry, was drunk at Cantonment Morgan on or about the night of the 25th December, 1825, and in that situation visited the guard, he being at that time commanding officer of the United States troops stationed in the Creek Nation.

*3d additional specification.* In this, that the said Colonel Talbot Chambers, of the first infantry, was drunk at Cantonment Morgan on or about the night of the 31st December, 1825, and in that situation visited the guard, he being at the time commanding officer of the United States troops stationed in the Creek Nation.

*4th additional specification.* In this, that the said Colonel Talbot Chambers, of the first infantry, was drunk at Cantonment Morgan on or about the night of the 1st January, 1826, and in that situation visited the sutler's quarters, he being then the commanding officer of the United States troops stationed in the Creek Nation.

*5th additional specification.* In this, that the said Colonel Talbot Chambers, of the first infantry, was drunk at Cantonment Morgan on or about the night of the 4th of January, 1826, and in that situation visited the guard, he being then the commanding officer of the United States troops stationed in the Creek Nation.

To which the accused plead "not guilty."

Captain James H. Gale, a witness for the prosecution, being again duly sworn with a view to the new matter laid before the court, deposes and says : On or about the 4th of January, at night, I think that very night, I was sitting in my room, and hearing the drummers carrying their drums into the next room and remaining quiet I suspected there would be the long roll or an alarm. A few minutes I went out at the front door and saw the accused walking in front of his quarters. In two or three minutes I returned to my room, and after remaining four or five minutes, or possibly fifteen, I heard the sentinel hail, "who comes there?" The answer he received, I believe, was "friend." I immediately opened the door, with my sword on, and discovered that it was the accused. I walked out on the parade within eight or ten paces of the accused, and saw him speaking to No. 1 sentinel, in a low tone of voice, and ordering him to fire. The soldier attempted to fire once, twice, or three times, but snapped each time. He cursed the sentinel for a damned militia son of a bitch. The accused then stepped six, eight, or ten paces in the direction of a sentinel standing in the rear of his quarters and the guard-house (No. 2, I believe;) that sentinel fired. The accused at this time appeared to be much intoxicated or drunk. The troops paraded in front of their quarters. In the course of eight or ten minutes they were ordered to face to the right, by the accused, and file to the left and again to the right. After marching about from fifty to an hundred paces they were ordered to halt and face to the front. The command was given to fire by company, and, I believe, once or twice by battalion, previous to which there was a roll on the drum. There was no "tap" ordered by the accused for the officers to take their post as I heard. The accused at this time passed between my position (in firing by company) and the company. I then discovered he was much intoxicated. He ordered the battalion to face to the right again. I immediately took my position on the left of the front rank man. The accused ordered the battalion to file to the left. The troops filed in that direction until they had passed some distance down the hill. They were then ordered to file to the left twice. They were then ordered to file to the right, and in that way they marched into the garrison and were dismissed.

Whereupon the court adjourned to meet to-morrow morning at 9 o'clock.

#### CANTONMENT MORGAN, *March 18, 1826.*

The court met pursuant to adjournment.

Present: Colonel D. L. Clinch, 4th infantry, president.

*Members.*—Lieutenant Colonel A. Eustis, 4th artillery; Brevet Major M. M. Payne, 4th artillery; Major S. Donoho, 4th infantry; Captain J. S. McIntosh, 4th infantry.

Supernumerary member, Captain P. Wager, 4th infantry.

Special judge advocate, 1st Lieutenant W. H. Bell, 4th artillery.

Captain James H. Gale, a witness for the prosecution, being again called before the court, was questioned by the accused.

*Question by the accused.* On the night you state, when the long-roll beat, did Colonel Chambers make more mistakes in giving the word of command than on ordinary occasions?

*Answer.* I don't know that he did.

*Question by the accused.* Was not the night dark, and was not the ground on which the battalion formed full of obstructions?

*Answer.* The night was not unusually dark. The troops formed in the road. There might have been a few small stumps in it.

Corporal W. B. Gustin, of the 1st regiment United States infantry, a witness for the prosecution being duly sworn according to law, deposes, and was

*Questioned by judge advocate.* Were you or not on guard on or about the night of the 15th December, 1825, at Camp Morgan?

*Answer.* Yes.

*Question by the judge advocate.* Did or not the accused visit the guard on or about that night? If so, how many times?

*Answer.* Yes, once or twice; perhaps three times.

*Question by the judge advocate.* Did you or not on all or either of these times see the accused in a state of intoxication?

*Answer.* I cannot say that he was intoxicated.

*Question by the judge advocate.* Did you or not have any conversation with the accused; if so, state what it was?

*Answer.* Yes; he directed me to see that the Indians should not make any noise around his quarters, and told me they were whooping in the rear and about his quarters.

*Question by the prosecutor.* Was there any noise at the time, or did you ever hear an Indian whoop, about or in rear of his quarters?

*Answer.* Not immediately about his quarters, but I have heard some Indians hallooing on a hill at about a quarter of a mile distant.

*Question by the judge advocate.* Were you on guard on or about the night of the 25th of December last or not?

*Answer.* I was on guard on the night of the 24th of December last.

*Question by the judge advocate.* Did or did not the accused visit the guard on that night; if so, how many times?

*Answer.* He did not more than once.

*Question by the judge advocate.* At the time he visited the guard, on the night referred to above, was he or not in a state of intoxication?

*Answer.* I cannot positively say whether he was or was not.

*Question by the judge advocate.* Please state to the court what appearance the accused exhibited at the time referred to?

*Answer.* His appearance was not altogether as usual. It did not appear to me that his articulation and carriage were as they commonly are.

*Question by prosecutor.* Did or did not the accused stagger at the time referred to?

*Answer.* I believe he did.

*Question by prosecutor.* Did or not the accused appear to be deranged on or about the night of the 15th December last?

*Answer.* In no other respect than in that of his speaking of Indians being about his quarters when they were not.

*Question by the accused.* What company do you belong to?

*Answer.* Company E, commanded by Captain James H. Gale

*Question by the accused.* Was not the night, alluded to in the first additional specification, dark, and the ground very rough and uneven, and full of obstructions?

*Answer.* The night was not very dark; there were some obstructions in the way, such as stumps, sticks, and holes.

*Question by the accused.* Was not the camp about that time much disturbed with Indian whoops, and while on duty did you not frequently see Colonel Chambers during the night walking in front of his quarters?

*Answer.* Yes, very frequently. I saw the accused frequently walking in front of his quarters.

*Question by the court.* Was it your belief on the night alluded to, 15th December, that Colonel Chambers was under the influence of spirituous liquors, or not?

*Answer.* It was not.

Richard Beath, a sergeant in Captain Gale's company E, 1st regiment United States infantry, and a witness for the prosecution, being duly sworn according to law, deposes, and was

*Questioned by judge advocate.* Were you or not on guard at Cantonment Morgan on or about the night of the 15th December last? If the affirmative, state to the court whether the accused visited the guard, and how many times that night.

*Answer.* Yes; he visited the guard five or six times that night.

*Question by judge advocate.* Did you or not on all or any of these times see the accused in a state of intoxication?

*Answer.* He appeared to me to be intoxicated on that night.

*Question by judge advocate.* Were you or not on guard on or about the night of Christmas day last? If the affirmative, state to the court whether the accused visited the guard then.

*Answer.* I was on guard on the night of the 24th December last. The accused visited the guard once during that night.

*Question by judge advocate.* Did or not the accused appear to you to be in a state of intoxication when he visited the guard on the night just referred to?

*Answer.* Yes, he did.

*Question by prosecutor.* Was or not the accused commanding Camp Morgan on the nights of the 15th and 24th December last?

*Answer.* Yes, he was.

*Question by the accused.* Who was the officer of the day or night of the 15th December; and were you commander of the guard?

*Answer.* I was commander of the guard that night, but I do not remember who was officer of the day.

*Question by the accused.* Was not the camp much disturbed by Indian whoops at that period, and was not Colonel Chambers frequently walking in front of his quarters during that night?

*Answer.* Yes; and the accused was walking in front of his quarters that night.

*Question by the accused.* Did not Colonel Chambers on visiting you give you the caution to beware of these Indian whoops, as they were not to be trusted to?

*Answer.* Yes; but I did not hear any whoops.

*Question by the accused.* State who went the visiting rounds with me that night, the 15th December, as corporal of the guard?

*Answer.* The accused did not go the visiting rounds that night.

*Question by the accused.* Was not Colonel Chambers in the habit of proving the sentinels by sometimes visiting them in disguise, and at other times attempting to bribe them with a view of passing the chain during the night?

*Answer.* Yes.

Denton Dunn, sutler at Camp Morgan, and a witness for the prosecution, being duly sworn according to law, deposes and says:

"Colonel Chambers did visit the sutler's quarters at night on or about the 1st January, 1826, at Camp Morgan. He was then in the situation described in the 4th additional specification just read."

*Question by the prosecutor.* Did not the accused, Colonel T. Chambers, at the time he visited your quarters, borrow one or two dollars for the purpose, as he said, to bribe the sentinels on post?

*Answer.* Yes.

*Question by the accused.* What particular indications of drunkenness did Colonel Chambers manifest on that occasion?

*Answer.* He showed it in his speaking, and by his gestures, and further, by an unsteady walk, which I observed in his going out of the room.

The evidence on the part of the prosecution being closed, W. V. Cobbs, a captain in 1st regiment United States infantry, a witness on the part of the defence, being duly sworn according to law, deposes and says:

"I saw the accused on or about the 25th or 26th June, 1825, on board of the 'Transport.' He appeared to be very unwell, and I mentioned to him that he had better keep out of the weather and not expose himself; that I would attend to the embarking of the troops. I did not consider the accused drunk at the time.

While on board the Transport, which conveyed the troops to Pensacola, I saw the accused every day, but did not see him drunk or drink any spirituous liquors during the passage. I saw the accused once or twice a day while at Cantonment Clinch, between the 2d and 4th July, 1825. I did not see him intoxicated at either time.

*Question by the accused.* At the time you speak of the conduct of Colonel Chambers while on board of the Transport brig, if he had been drunk, would it not, in your opinion, have been perceptible to you?

*Answer.* I should have perceived it.

*Question by the accused.* Did I not attend to the comfort and convenience of the command so long as my health would permit?

*Answer.* Yes. I saw the accused on the night of the 24th of December last a little after sundown, when it was not quite dark; he was not drunk at that time. I saw the accused on the night of the 25th of December last, between nine and ten o'clock; he was not drunk at that time. I saw the accused on or about the 31st of December last, between retreat and tattoo; he was not drunk at the time I saw him. I was in the sutler's quarters on or about the night of the 1st of January, 1826; the accused came in, and I did not think him drunk from his conversation or walk. He appeared then to walk straight, and speak as usual.

*Question by the accused.* Has there been any material point of duty neglected relative to the command in consequence of Colonel Chambers's supposed drunkenness?

*Answer.* I have not noticed any neglect of duty on the part of the accused.

*Question by the accused.* Have you not accompanied Colonel Chambers in going the visiting rounds? If so, were his orders to the guard improper, or indicative of mental derangement, produced by excessive drinking?

*Answer.* I have been the rounds with the accused, and as far as my judgment would go, his orders have been correct.

*Question by prosecutor.* Did not the accused, during the passage from New Orleans to Pensacola, evince no marks of insanity? If so, please state to the court your belief as to its origin.

*Answer.* He did, and I was and still am under the belief that it was from a fever. He had a fever every day.

*Question by prosecutor.* Was the weather or not very cloudy and even raining during the time you were in New Orleans previous to the troops embarking for Pensacola?

*Answer.* The weather was not generally raining while we were at New Orleans. It rained the evening we embarked.

*Question by prosecutor.* Did the accused evince any marks of insanity while at Cantonment Clinch? and if so, please state to the court your belief as to its origin, and whether he was capable of commanding.

*Answer.* The accused was deranged then, but I believe it arose from sickness.

*Question by prosecutor.* During the time the accused was in command at Camp Morgan (since your arrival) was he not sometimes in the habit of confining himself to his quarters, with the doors and windows closed during the day, and would they not be thrown open at night?

*Answer.* He complained of being sick sometimes during the day, when he confined himself to his quarters, with his door shut. I visited him during the day in that situation. I do not know that his windows were opened during the night.

*Question by prosecutor.* Did or not you remain in the room of Colonel T. Chambers on or about the 31st of December, 1825, until a late hour at night, and was he not very drunk at the time?

*Answer.* I do not recollect what time I remained there. I never saw Colonel Chambers drunk in my life.

J. J. Abercrombie, adjutant to the 1st regiment of United States infantry, a witness for the defence, being duly sworn according to law, deposes, and was

*Questioned by the accused.* On occasion when the long roll was beat have you not been always in the habit of consulting with Colonel Chambers on the subject previously?

*Answer.* Yes.

*Question by the accused.* If he had been at any period incapable of commanding, would you not have felt it incumbent on you as adjutant to have dissuaded him from such a purpose?

*Answer.* I should have had no hesitation in doing so.

*Question by the accused.* Has not Colonel Chambers been in the habit of calling at your quarters frequently after going the visiting rounds at Cantonment Morgan; if so, was he disqualified by mental derangement from giving the necessary orders to the guard?

*Answer.* He has done so; but oftener previous to visiting the guard and chain of sentinels. I did not think at any one time that he was disqualified by mental derangement.

H. S. Hawkins, an assistant surgeon in the army, and a witness on the part of the defence, being duly sworn according to law, was

*Questioned by the accused.* What time did you arrive at this post; and was not Colonel Chambers on the sick report at that period?

*Answer.* On the morning of the 30th of November I went to see him, and he told me he was unwell. As I was informed, the accused was on the sick report.

The evidence on the part of the defence being closed, the court adjourned to meet again on Monday, the 20th instant, at 9 o'clock.

CANTONMENT MORGAN, *March 20, 1826.*

The court met pursuant to adjournment.

Present: Colonel D. L. Clinch, 4th infantry, president.

*Members.*—Lieutenant Colonel A. Eustis, 4th artillery; Brevet Major M. M. Payne, 4th artillery; Major S. Donoho, 4th infantry; Captain J. S. McIntosh, 4th infantry.

Supernumerary member, Captain P. Wager, 4th infantry.

Special judge advocate, 1st Lieutenant W. H. Bell, 4th artillery.

The evidence on the part of the prosecution being closed on the preceding sitting of the court, and the prosecutor having expressed a wish to take some additional evidence, the court was ordered to be cleared. Whereupon the question was put to the court by the judge advocate, "Shall the prosecutor be allowed to take additional evidence?" The question, after due deliberation, was decided in the affirmative. Whereupon Captain W. V. Cobbs, 1st regiment United States infantry, a witness for the defence, being again called before the court, was

*Questioned by prosecutor.* You state in your testimony that you have never seen Colonel Chambers drunk in your life. Do you mean by that to convey the idea that you never saw the colonel intoxicated?

*Answer.* I have seen the accused when I thought he felt what he had drank, but have never seen him drunk, or even intoxicated, according to my opinion.

*Question by the accused.* Have you not generally been in the habit of visiting Colonel Chambers at his quarters during hours of relaxation from duty?

*Answer.* Yes.

Doctor J. J. Cosby, late acting assistant surgeon in the army, a witness for the prosecution, being again called before the court, deposeth, and was

*Questioned by the accused.* Do you believe, as a medical man, that the same effects would have been produced by the same stimulants, viz: "*spirituous liquors,*" had Colonel Chambers remained at Baton Rouge? Be pleased to state particulars.

*Answer.* I do not believe they would. My reply to the first question was predicated on a belief that I was to answer as to the original cause of the disease. As to the immediate cause, I believe it might have been exposure to heat and excessive fatigue. Since my acquaintance with Colonel Chambers, he has been subject to an affection of the bowels, (which I alluded to in answer to a former question,) for which I have frequently prescribed. I have often told him that his costiveness produced a fulness of the vessels of the head. I believe that the costiveness was the cause of disease frequently.

*Question by the court.* Was not the mental derangement of the accused preceded by fever?

*Answer.* It was.

*Question by prosecutor.* During the excessive fatigue you say the accused was subject to, was he or not the greatest part of the time on board the transport ship "Feliciana" and the brig "South Carolina?"

*Answer.* Yes, he was, I believe.

A letter, marked C, from the prosecutor to the court, accompanying one additional specification under the third charge, and two documents, marked A and B, designed to support said specification, were all read by the judge advocate and laid before the court.

Additional specification to the third charge, preferred against Colonel Talbot Chambers, 1st regiment United States infantry, by Captain J. H. Gale, of the same regiment. In this, that the said Colonel Talbot Chambers, of the United States infantry, did, in an official communication, addressed to the Adjutant General, and bearing date Creek Nation, Cantonment Morgan, December 8, 1825, falsely state: "That, being compelled to march from *Baton Rouge* with this *command* destitute of the means of transportation, we were compelled to leave in the rear a material proportion of the regimental books, &c., consequently it is impossible for the adjutant to make out a report such as you would require. To which the accused pleaded "*not guilty*."

The accused admitted the documents, marked A and B, to be original letters; the former from himself, the latter from the Adjutant General.

I. Mackenzie, a lieutenant in the 1st regiment United States infantry, being again duly sworn according to law, with a view to the new matter laid before the court, deposeth, and was

*Questioned by prosecutor.* When the troops left Baton Rouge, on or about the 21st June last, were they or not destitute of transportation?

*Answer.* They were furnished from Baton Rouge to New Orleans with transportation sufficient for the command; then from New Orleans to Pensacola the command was furnished with sufficient transportation. From Pensacola to the Connacuch, about eighty miles, we had not sufficient transportation. From the Connacuch to Camp Morgan we had sufficient transportation to bring on all the baggage, except some commissary stores and one large hospital tent, which were left behind. All the baggage did not arrive before we left "*Rogers's Ferry,*" on the Connacuch.

*Question by judge advocate.* Was there or not sufficient transportation to have brought all the regimental books from Baton Rouge to this post, Cantonment Morgan?

*Answer.* There was not sufficient transportation from Pensacola to bring the books with the command to Rogers's Ferry.

*Question by prosecutor.* Was or not a large chest containing regimental books, &c., taken out of the wagon when the troops first arrived at this post under the command of Captain Gale?

*Answer.* I do not recollect to have seen the box taken out of the wagon. I saw the box here soon afterwards. I do not know whether it contained all of them. I recollect to have seen regimental books in the box.

*Question by judge advocate.* State to the court about what size the chest or box was to which you refer?

*Answer.* It was sufficiently large to contain all the regimental books.

*Question by the accused.* In what capacity did you act on the march from Pensacola to this post?

*Answer.* As acting assistant commissary of subsistence and acting assistant quartermaster.

*Question by the accused.* Have you not long known from the general conversation of Captain Gale that he has been the avowed enemy of Colonel Chambers?

*Answer.* I have.

W. R. Jouett, a lieutenant 1st regiment United States infantry, a witness for the prosecution, being duly sworn according to law, with a view to the new matter laid before the court, deposeth and says: I consider there was plenty of transportation from Baton Rouge to New Orleans, and also from New

Orleans to Pensacola; there was a boat furnished at Pensacola by Captain Burch; there was a very large box put on board that boat containing regimental books, but I don't know that all the regimental books were in it. I presume the chest was large enough to contain all the books. It arrived on the Connacuch, at Rogers's Ferry, and was transported from that place to this post with the command.

*Question by the accused.* Was not a number of books appertaining to the regiment left at Baton Rouge when the command moved from that place?

*Answer.* I do not know.

Denton Dunn, a sutler at Camp Morgan, a witness for the prosecution, being again duly sworn according to law, with a view to the new matter laid before the court, deposes, and was

*Questioned by the judge advocate.* Was or not the steamboat "Feliciana" chartered for the express purpose of transporting the troops from Baton Rouge to New Orleans on or about the 20th June last?

*Answer.* The troops came down in the "Feliciana;" I do not know that she was chartered; I presume she was.

*Question by the judge advocate.* Did you or not bring all your stores aboard the same vessel?

*Answer.* I did.

*Question by the accused.* Was not Colonel Chambers left very ill at Pensacola when the command marched from that station?

*Answer.* Yes; I did not conceive he was able to march.

The evidence on the part of the prosecution being closed, J. J. Abercrombie, adjutant of the 1st regiment United States infantry, a witness for the defence, being again duly sworn according to law, with a view to the new matter laid before the court, was

*Questioned by the accused.* State the conversation which occurred between you and myself on the subject of a report required by the Adjutant General.

*Answer.* Since our arrival here Colonel Chambers received a letter "on service" from the Adjutant General, requiring a transcript of deceased soldiers of the 1st regiment of infantry, from, I think, the year 1822; Colonel Chambers handed me the letter; I told him there was no such book in the office as a register of deceased soldiers; from that circumstance he made a report to the Adjutant General to that effect; I do not recollect of having read the letter to the Adjutant General from Colonel Chambers. As it regards transportation, I believe the regulations allow a bureau or box of certain dimensions for the regimental books; I cannot say the box containing the books brought on from Baton Rouge was either smaller or larger, but I know there were books in the office at Baton Rouge, more than enough to fill two such boxes, consequently many of them were left behind.

*Question by the accused.* Have you not recommended to Colonel Chambers to write to Baton Rouge for some regimental books which you stood in need of as adjutant of the regiment?

*Answer.* I have.

*Question by the accused.* Was not the command very much in want of transportation when they marched from Pensacola?

*Answer.* Yes.

*Question by the judge advocate.* Was or not the box brought on to this post of sufficient size to contain all the regimental books in the current service of the regiment?

*Answer.* Yes.

The evidence on the part of the defence being closed, the accused presented to the judge advocate two documents, marked D and E, which were read and laid before the court. The documents just referred to were admitted by the judge advocate to be original letters; the former from William Martin, adjutant of the 4th regiment of infantry, the latter from Major General Gaines.

Whereupon the court adjourned to meet to-morrow at 8 o'clock.

CANTONMENT MORGAN, *March 21, 1826.*

The court met pursuant to adjournment.

Present: Colonel D. L. Clinch, 4th infantry, president.

*Members.*—Lieutenant Colonel A. Eustis, 4th artillery; Brevet Major M. M. Payne, 4th artillery; Major S. Donoho, 4th artillery; Captain J. S. McIntosh, 4th infantry.

Supernumerary member, Captain P. Wager, 4th infantry.

Special judge advocate, 1st Lieutenant W. H. Bell, 4th infantry.

The accused being asked if he was ready to proceed, made the following defence:

*Mr. President and Gentlemen of the Court:*

In trespassing on your patience for a short period of time, it is my intention to comment specifically on the charges which have been preferred against me by the prosecutor, Captain Gale; and it is my opinion that, to a court composed of soldiers of intellect and tried experience, it would not only be useless, but even might be construed into a species of presumption, and I can, with truth, add that I do not believe that any remarks which may emanate from me will induce a change of opinion on the part of any of the members composing the court. But as I conceive that *they* are still unacquainted with the cause which has produced my present arraignment, and to evince to you and to the world that these charges are not adduced with a view of benefiting the service, but, on the contrary, to gratify a vindictive species of feeling, I, in consequence thereof, offer for your consideration a plain, simple narrative, which I have to request may be spread upon the record of your proceedings. It is connected with the testimony, and to which I intend to confine myself.

You have it upon record, sir, that the prosecutor, Captain Gale, was a member of a court-martial, in which Lieutenant Pierce (then of the army) was arraigned for disrespectful conduct to me. I presume that he will not deny that the measure was preconcerted between Mr. Pierce, himself, and that of a *faithful friend*, some time previous to the organization of the court, that they were to declare that they would not believe me, even under the solemnity of an oath. Sir, how could it possibly be otherwise, when it was generally understood? and that I, who had no manner of intercourse either with the present prosecutor or his *faithful friend*, was aware of it at least a fortnight previous to the trial? He then,

sir, offers himself as a member of that court, conformably to detail, and, without having a just sense of delicacy of feeling to object against himself, he takes the usual oath, with an uplifted hand, in the presence of his God, to do justice between the United States, which I, at that period, represented, and the prisoner to be tried, without partiality, favor, or affection; and then, when afterwards called upon to testify on the circumstances which produced the assemblage of the court, (although an eye-witness to the whole transaction,) he declared himself to be the enemy of Colonel Chambers, and that he would not believe him under oath. The court was composed of six members; the accused was tried under a charge which left the court no discretion, and it was proven, on the testimony, that he acknowledged that he had committed a breach of arrest. Sir, take now into consideration the sentence and *award* adduced. I leave the comment to the consideration of the court.

From the testimony which the prosecutor, Captain Gale, has given on the present trial, his declarations, his manner of delivery, and the extraordinary exertions which have been made by himself and his *faithful friend*, on even searching the battalion for testimony, to such a degree, that even some individuals of the soldiery have voluntarily apprised me of the circumstance; and the specifications which have been adduced, by which the court will perceive that every step which I have taken since the period of that trial has been accurately measured; every expression has been weighed, and, in fact, I wonder that the sutler has not been required to state what quantity of liquor I required from him each day. At length, sir, what does he state? That he saw me at Baton Rouge pass him at a late hour of the night; that Lieutenant Jouett was with him, at the distance of thirty paces, and that I appeared to stagger as I walked, but that he did not speak to me. Lieutenant Jouett states that he was in company with the prosecutor at that period, and confirms his testimony, as it respected my manner of walking, but admits that I had been afflicted for some time previously with the *ague*, and that the command was busily employed, even during the night, in making the necessary preparations for the movement then in projection. Sir, was it not probable that, owing to fatigue, indisposition, and exhaustion, that I might have wavered in my walk during the night, and on a species of ground which is far from being of that description which would enable a man at all times to walk correctly over during the day. Both these witnesses admit, on their testimony, that they have never called on me, on a point of duty, at any *one period*, in which I was incapable of performing duty from the effect of spirituous liquors. I now simply ask the question, will the court condemn a man for making a false step in the dark? or will they decide on a species of *guess* testimony? View the allegations which have been adduced, since the period of Mr. Pierce's trial, and you will still find that the prosecutor is still obliged, in his testimony, to confess that there was no material point of duty which was neglected in consequence of my being in anywise intemperate. View his general conduct from that period to the present; remark his manner in giving his testimony, which amounted almost to that of *foaming at the mouth* with vindictive malice, and then decide whether his general conduct heretofore and since that period has not only been actuated by a species of vindictive prejudice, but that he has committed, in attempting to revenge himself on me, a species of vice *still more heinous*, viz: that of *moral perjury*, and which will induce the court to entertain the opinion that his testimony does not merit any reliance, or that any confidence can be placed in what he has deposed to.

The testimony of Lieutenants Abercrombie and Mackenzie are somewhat pointed; but, sir, did either of those gentlemen call on me for the performance of any description of duty which I was unable to perform?

I speak now on the subject of Dr. Cosby's testimony. He states "that I was very unwell previous to the departure of the command from Baton Rouge; that I performed more than an ordinary degree of duty," and ascribes the cause to my disease during the passage to Pensacola from the former place. The doctor's testimony is, doubtless, as it respects opinion; but still, is not every medical man liable to be mistaken on questions of opinion, when even relating to that of their profession? Surely, sir, you are not about to condemn me on a question of opinion, where even doubts, on the part of Dr. Cosby, are expressed in testimony.

On the subject of the night alarms with which I am charged, I plead the orders which I have received on that subject and the testimony of Captain Cobbs and Lieutenant Abercrombie, which will evince that my orders were correct and proper, and that in enforcing those orders that I acted as every soldier should do, "to obey the last order, without thinking of its propriety." Indian whoops were frequently and nightly made around the cantonment, which induced me to keep on the alert, because I did not, at that period, know the disposition of the Indians of this country; and whether or not, I feel certain that this court will bear me out in the remark "that it is disgraceful to be taken by surprise, even if the victory is obtained afterwards," consequently I felt it incumbent on me to exercise my command, even during the night, in order that they might be prepared for any event. I make no manner of apology for this description of duty, because I *claim the right* to exercise my command as I think proper.

I have now reached to the testimony adduced by Mr. Dunn, (the sutler of the command,) and that of Captain Cobbs. Both of these gentlemen are witnesses to the same circumstance relative to myself. Sir, how stands their testimony? The one, in adducing what he knows, appears before the court in an agitated manner: his gestures indicate a species of feeling very different from the plain, easy, tranquil manner or deportment exhibited by Captain Cobbs. The former states that I was drunk without *hesitation*; and the other, who has been my most intimate companion, very calmly tells you that I was not. On which will you place your reliance? The latter gentleman has been, sir, the most intimate companion which I have had in my own quarters, and states that he has never seen me incapable of performing duty from the circumstance of excessive drinking.

I confess, sir, that I returned the letter under a blank cover, under the impression that, as Captain Gale had not *sense enough* to designate the difference between a request and an order, that it was my duty, as his superior and commanding officer, to give him a lesson which might be of use to him in his future government while in the character of a subordinate officer.

On the subject of the last specification, in which I am charged with making a false report to the Adjutant General, you have the testimony of the adjutant of the regiment; therefore, judge for yourselves. Would it not have been an easier matter for me to have added my signature to his report than to have written an explanatory letter? And, as I gained nothing in either way, consequently I had no intention to make an improper report.

I have nothing further to add, sir, except my acknowledgments for your politeness. With several of you I have served for years, and it is well understood that the ties which connect fellow soldiers are even predominant to the ties of consanguinity. To you all, individually, I feel assured of experiencing that

species of feeling; but concentrated as you are in an official capacity, I know that it is your duty to expunge every description of feeling save that of imperious duty, no matter how *stern* it may be. To you, individually, no matter what may be your decision on my case, I feel confident that I shall ever feel the same degree of partiality which I have ever experienced. But, acting officially, as you now are concentrated, I do not require either your *pity*, *clemency*, or commiseration. A man that can make his wants as few as I can is always independent of the bounty of his country.

T. CHAMBERS, *Colonel 1st regiment United States Infantry.*

The court, after having carefully and maturely weighed and considered all the matter adduced, find the accused, Colonel Talbot Chambers, of the first regiment United States infantry,

Guilty of the 1st specification of the 1st charge.

Guilty of the 2d specification of the 1st charge.

Not guilty of the 3d specification of the 1st charge.

Not guilty of the 4th specification of the 1st charge.

Guilty of the 5th specification of the 1st charge.

Guilty of the 6th specification of the 1st charge.

Guilty of the 7th specification of the 1st charge.

Not guilty of the 8th specification of the 1st charge.

Guilty of the 9th specification of the 1st charge.

Not guilty of the 1st additional specification of the 1st charge.

Guilty of the 2d additional specification of the 1st charge.

Not guilty of the 3d additional specification of the 1st charge.

Not guilty of the 4th additional specification of the 1st charge.

Guilty of the 5th additional specification of the 1st charge; and

Guilty of the 1st charge, except the word "habitual."

Not guilty of the 1st specification of the 2d charge.

Not guilty of the 2d specification of the 2d charge.

Not guilty of the 3d specification of the 2d charge.

The court find the facts as alleged in the 1st, 2d, and 3d specifications of the 2d charge; but not in violation of any law or regulation.

Not guilty of the 2d charge.

The court find the facts as alleged in the 1st specification of the 3d charge, but attach no blame thereto.

The court find the facts as alleged in the additional specification to the 3d charge, but acquit the accused of any intention of asserting a falsehood.

Not guilty of the 3d charge.

The court does therefore sentence and adjudge the said Colonel Talbot Chambers, of the 1st regiment United States infantry, to be *cashiered*.

Whereupon the court adjourned *sine die*.

D. L. CLINCH, *Colonel 4th Infantry, President General Court-Martial.*  
WILLIAM H. BELL, *Special Judge Advocate.*

The sentence of the court is approved.

J. Q. ADAMS.

APRIL 26, 1826.

True copy from the original on file.

R. JONES, *Adjutant General.*

A.

CREEK NATION, *Cantonment Morgan, December 8, 1825.*

SIR: I have the honor to acknowledge the receipt of the order of the 18th of October, 1825, on the subject of a report respecting convicts, and in reply I am compelled to state that, being compelled to march from Baton Rouge with this *command*, destitute of the means of transportation, we were compelled to leave in the *rear* a material proportion of the regimental books, &c., consequently it is impossible for the *adjutant* to make out a report such as you would require.

I have the honor to be, &c.,

T. CHAMBERS,  
*Colonel Commanding United States troops, Creek Nation.*

The ADJUTANT GENERAL.

B.

ADJUTANT GENERAL'S OFFICE, *Washington, February 28, 1826.*

SIR: According to the request contained in your communication of the 13th instant, I herewith transmit the original letter of Colonel Chambers, relating to the insufficiency of transportation from Baton Rouge.

I am, sir, respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Captain J. H. GALE, *1st Infantry, Cantonment Morgan, Thomastown, Upson C. H., Geo.*

## C.

CANTONMENT MORGAN, *Creek Nation*, March 19, 1826.*To the president and gentlemen of the court:*

When, on the 17th instant, I presented to this court the additional specifications to the first charge preferred against Colonel Chambers, I then stated that they had not been presented at an earlier period in consequence of having made an application to the Adjutant General for documents to establish a specification of a very serious nature, which I had reason to believe I would receive before the evidence for the prosecution on the original charges had been closed. In that event I intended to have presented them with the additional specifications now offered. But in consequence of the failure of the mail of the 16th instant I was disappointed. The documents referred to, marked A and B, were, however, received on the night of the 18th instant, and are now submitted for your consideration, with the specification they are designed to support.

I have the honor to be, gentlemen, with much respect, your obedient servant,  
JAMES H. GALE, *Captain 1st Regiment U. S. Infantry.*

## D.

CANTONMENT CLINCH, *October 5, 1825.*

The enclosed letters were opened here for the purpose of examining the invoices, in order to ascertain what casks contained the summer clothing, that they might be left, it being impracticable to send all the clothing at this time.

WILLIAM MARTIN, *Adjutant 4th Infantry.*  
COMMANDING OFFICER 1ST INFANTRY, *Marshall's Ferry, Creek Agency.*

## E.

HEADQUARTERS EASTERN DEPARTMENT, *Indian Springs, August 15, 1825.*

SIR: Herewith you will receive, for your information and government, a copy of a letter of instruction from the Department of War, dated July 21, 1825, with a copy of the inclosure therein referred to.

Should Governor Troup persevere in his expressed purpose of sending persons to survey the lands embraced within the treaty, you will employ the military force placed under your command to prevent the surveyors and all others from entering on the Indian territory for such purpose; or if they should succeed in entering the Indian country referred to in the treaty, you will cause them to be arrested and turn them over to the judicial authority, to be dealt with as the law directs; and you will keep me advised of the measures which you shall find it necessary to adopt in the execution of this order.

Very respectfully, I have the honor to be,

EDMUND P. GAINES, *Major General Commanding.*

Colonel T. CHAMBERS, *1st Regiment of Infantry, commanding U. S. troops in Creek Nation.*

## ORDERS—No. 35.

ADJUTANT GENERAL'S OFFICE, *Washington, April 28, 1826.*

I. At the general court-martial which convened at Cantonment Morgan, Georgia, on the 15th of March, pursuant to orders from general headquarters, dated the 26th of January, 1826, was arraigned and tried Colonel Talbot Chambers, of the 1st regiment of infantry:

CHARGE I.—“*Habitual drunkenness and drunkenness on duty.*”

*Specification 1st.*—In this: “That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, was extremely drunk on the night of the 20th or 21st of June, 1825, at Baton Rouge, Louisiana, he being then the commanding officer and his command under orders for Cantonment Clinch, West Florida, and preparing to embark on board the steamboat ‘*Feliciana.*’”

*Specification 2d.*—In this: “That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, was drunk on the night of the 21st or 22d of June, 1825, on board the steamboat ‘*Feliciana,*’ while descending the Mississippi river from Baton Rouge to New Orleans, he being then in the immediate command of a part of the 1st regiment United States infantry.”

*Specification 3d.*—In this: “That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, was drunk at New Orleans between the 23d and 25th of June, 1825, he being then in the immediate command of a part of the 1st regiment United States infantry.”

*Specification 4th.*—In this: “That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, was drunk on board the transport brig ‘*South Carolina*’ on or about the 25th or 26th of June, 1825, he being then in the immediate command of a part of the 1st regiment United States infantry.”

*Specification 5th.*—In this: “That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, being in the immediate command of a part of the 1st regiment United States infantry, on their

passage from New Orleans to Cantonment Clinch, West Florida, on board the transport brig 'South Carolina,' was, on the 27th, 28th, 29th, and 30th of June, 1825, in a state of mental derangement produced by excessive intoxication, and thereby rendered incapable of performing his duty."

*Specification 6th.*—In this: "That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, was rendered incapable of commanding while at Cantonment Clinch, West Florida, on the 1st, 2d, 3d, and 4th of July, 1825, in consequence of mental derangement produced by excessive intoxication."

*Specification 7th.*—In this: "That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, was repeatedly drunk when in command of a part of the 1st regiment United States infantry at Camp Morgan, (Creek Nation,) between the 27th of August and the 23d of September, 1825."

*Specification 8th.*—In this: "That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, was drunk while in command of a part of the 1st regiment United States infantry at Camp Morgan, (Creek Nation,) on or about the 29th of November, 1825."

*Specification 9th.*—In this: "That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, had, at Camp Morgan, (Creek Nation,) on or about the 17th of November, 1825, on the parade ground, a fit produced by excessive drunkenness, he, Colonel Talbot Chambers, being then in the immediate command of a part of the 1st regiment United States infantry."

CHARGE II.—"*Violating the 49th article of the Rules and Articles of War, and 602d paragraph of the 52d article of the General Regulations of the Army.*"

*Specification 1st.*—In this: "That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, did repeatedly, between the 27th of August and the 23d of September, 1825, while in command of a part of the 1st regiment United States infantry at Camp Morgan, (Creek Nation,) cause the camp to be alarmed during the night by the discharging of fire-arms and the sounding of the 'long roll' or 'to arms' upon the drums, in violation of the 602 paragraph of the 52d article of the General Regulations of the Army and of the 49th article of the Rules and Articles of War."

*Specification 2d.*—In this: "That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, did, at Camp Morgan, (Creek Nation,) on the night of the 6th of December, 1825, cause the camp to be alarmed by the discharge of fire-arms and the sounding of the 'long roll' or 'to arms' on the drums, in violation of the 49th article of the Rules and Articles of War and the 602d paragraph of the 52d article of the General Regulations of the Army."

*Specification 3d.*—In this: "That he, the said Colonel Talbot Chambers, of the 1st regiment United States infantry, did, on the night of the 6th of December, alluded to in the next preceding specification, and at the post therein named, by the unnecessary discharge of fire-arms, endanger the life or lives of a certain member or members of the garrison then under his immediate command."

CHARGE III.—"*Conduct unbecoming an officer and a gentleman.*"

*Specification.*—In this: "That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, did, at Camp Morgan, (Creek Nation,) on the 3d of December, 1825, return to Captain James H. Gale, of the 1st regiment United States infantry, under a blank envelop, an official communication made to him by the said Captain James H. Gale in the following words, viz:

"CAMP MORGAN, CREEK NATION, December 3, 1825.

"SIR: I received a few minutes since, by your orderly, a communication directed to the commanding officer company E, 1st regiment United States infantry, which was broken open. You will please, if in your power, to inform me the person that broke the seal, or by what authority it was opened.

"I have the honor to be your most obedient servant,

"JAMES H. GALE, *Captain 1st Regiment U. S. Infantry, Commanding Company E.*

"Colonel T. CHAMBERS, *1st Regiment U. S. Infantry, present commanding.*"

"The said Colonel Talbot Chambers making no reply to the above, although he had had in his possession one or two days the letter which forms the subject of this communication, and although said last-mentioned communication was directed to Captain James H. Gale, from the quartermaster at Philadelphia, in relation to clothing forwarded for his company, E, 1st regiment United States infantry."

*Additional specifications to charge 1.*

*Specification 1st.*—In this: "That the said Colonel Talbot Chambers, of the 1st infantry, was drunk at Cantonment Morgan on or about the night of the 15th of December, 1825, and in that situation visited the guard several times, he being at that time the commanding officer of the United States troops stationed in the Creek Nation."

*Specification 2d.*—In this: "That the said Colonel Talbot Chambers, of the 1st infantry, was drunk at Cantonment Morgan on or about the night of the 25th of December, 1825, and in that situation visited the guard, he being at that time commanding officer of the United States troops stationed in the Creek Nation."

*Specification 3d.*—In this: "That the said Colonel Talbot Chambers, of the 1st infantry, was drunk at Cantonment Morgan on or about the night of the 31st of December, 1825, and in that situation visited the guard, he being at that time the commanding officer of the United States troops stationed in the Creek Nation."

*Specification 4th.*—In this: "That the said Colonel Talbot Chambers, of the 1st infantry, was drunk at Cantonment Morgan on or about the night of the 1st of January, 1826, and in that situation visited the sutler's quarters, he being then the commanding officer of the United States troops stationed in the Creek Nation."

*Specification 5th.*—In this: "That the said Colonel Talbot Chambers, of the 1st infantry, was drunk at Cantonment Morgan on or about the night of the 4th of January, 1826, and in that situation visited the guard, he being then commanding officer of the United States troops stationed in the Creek Nation."

*Additional specification to charge 3.*

*Specification.*—In this: “That the said Colonel Talbot Chambers, of the 1st regiment United States infantry, did, in an official communication addressed to the adjutant general, and bearing date ‘Creek Nation, Cantonment Morgan, December 8, 1825,’ falsely state that, ‘Being compelled to march from *Baton Rouge* with this *command* destitute of the means of transportation, we were compelled to leave in the rear a material proportion of the regimental books, &c.; consequently it is impossible for the adjutant to make out a report such as you would *require*.’”

The court, after having carefully and maturely weighed and considered all the matter adduced, find the accused, Colonel Talbot Chambers, of the 1st regiment United States infantry,  
 Guilty of the 1st specification of the 1st charge.  
 Guilty of the 2d specification of the 1st charge.  
 Not guilty of the 3d specification of the 1st charge.  
 Not guilty of the 4th specification of the 1st charge.  
 Guilty of the 5th specification of the 1st charge.  
 Guilty of the 6th specification of the 1st charge.  
 Guilty of the 7th specification of the 1st charge.  
 Not guilty of the 8th specification of the 1st charge.  
 Guilty of the 9th specification of the 1st charge.  
 Not guilty of the 1st additional specification of the 1st charge.  
 Guilty of the 2d additional specification of the 1st charge.  
 Not guilty of the 3d additional specification of the 1st charge.  
 Not guilty of the 4th additional specification of the 1st charge.  
 Guilty of the 5th additional specification of the 1st charge; and  
 Guilty of charge I, except the word “habitual.”  
 Not guilty of the 1st specification of the 2d charge.  
 Not guilty of the 2d specification of the 2d charge.  
 Not guilty of the 3d specification of the 2d charge.  
 The court find the facts as alleged in the 1st, 2d, and 3d specifications of the 2d charge, but not in violation of any law or regulation.  
 Not guilty of charge II.  
 The court find the facts as alleged in the 1st specification of the 3d charge, but attach no blame thereto.  
 The court find the facts as alleged in the additional specification to the 3d charge, but acquit the accused of any intention of asserting a falsehood.  
 Not guilty of charge III.

*Sentence.*

“The court does therefore sentence and adjudge the said Colonel Talbot Chambers, of the 1st regiment United States infantry, to be cashiered.”

The President of the United States *approves* the sentence of the court.

The general court-martial whereof Colonel Clinch, of the 4th regiment of infantry, is president, is hereby dissolved.

By order:

R. JONES, *Adjutant General.*

True copy.

R. JONES, *Adjutant General.*

ADJUTANT GENERAL'S OFFICE, *May 6, 1826.*

The sentence of the court is approved.

J. Q. ADAMS.

No. 331.

[1ST SESSION.]

## IN FAVOR OF GRANTING LAND TO OFFICERS WHO SERVED IN THE WAR OF 1812-'15.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 17, 1826.

Mr. Cook, from the Select Committee, to whom was referred the petition of sundry officers of the army of the late war, praying a grant of land, in consideration of their sacrifices and services, reported :

That it is deemed by the committee but fair and reasonable that the merits of their claim should be duly investigated and considered by the House. Their severe and arduous services, in the momentous struggle in which they were engaged, entitles their application to the most liberal consideration that justice and sound policy will allow. With a view, therefore, to bring the subject fairly before the House, and that it may act on the question, unincumbered by details, the committee propose to the House the following resolution :

*Resolved*, That it is expedient to make provision by law for granting to each of the officers of the army, who served during the late war, a quantity of land according to their rank, as a remuneration for their sacrifices, sufferings, and faithful service.

19TH CONGRESS.]

No. 332.

[1ST SESSION.]

## IN RELATION TO THE COURT-MARTIAL ON COLONEL CHAMBERS OF THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 20, 1826.

Mr. HAMILTON, from the Committee on Military Affairs, to whom was referred the proceedings of the general court-martial, convened at Camp Morgan, Georgia, on March 15, 1826, for the trial of Colonel Chambers, reported :

In the remarks which your committee are about to make they expressly repudiate all idea of countenancing or entertaining an appeal from the decision of military courts to this House, a practice which would be subversive of discipline and highly injurious to the service.

Your committee, therefore, think that it is their province alone, on the reference of the proceedings of the court, to ascertain and express an opinion, whether, in its organization, those rights which belong to an American citizen, under the laws of his country, were secured to Colonel Chambers.

By the 64th article of the Rules and Articles of War it is provided, that "general courts-martial may consist of any number of commissioned officers, from five to thirteen, inclusively, but they shall not consist of less than thirteen, where that number can be convened without *manifest injury* to the service."

In the 75th article it is moreover provided, "that no officer shall be tried but by a general court-martial, nor by *officers of inferior rank*, if it can be avoided."

The facts in the case are that Colonel Chambers was tried by *five* officers, and all of them of *inferior* rank to himself.

The question then arises, whether a larger court could have been convened, "without *manifest injury* to the service," and whether the trial of Colonel Chambers, by officers of inferior rank, "*could have been avoided*."

Your committee think, from a view of the distribution of the army, the one result might have been accomplished, and the other contingency avoided, if not immediately at the period Colonel Chambers was placed in arrest, at least after the intervention of some delay, which would have been less to be regretted than an apparent violation of the Rules and Articles of War. If it was impossible to have convened a full court of officers of superior rank in the department to which Colonel Chambers was attached, as many at least of his grade as could have been assembled should have been assigned for this trial; and if a compliance with the rule in this particular was impracticable, Colonel Chambers might have been ordered, with the prosecutor and witnesses into another department, where, with less inconvenience, he might have been brought before a court differently constituted.

Your committee are aware that, by the *practice* of the army, the employment of small courts of inferior rank, for the trial of officers charged with offences, has been sustained by numerous examples for long series of years. Wherever, however, this "*can be avoided*," the practice itself is illegal. Your committee need not insist on the principle, that all penal enactments are to be construed in a manner most favorable to the prisoner; "*can be avoided*" are terms of the largest and most emphatic import, and seem to imply an imperative precept only to be overruled by a physical or moral necessity.

Colonel Chambers, it is true, on his arraignment, did not object to the court. The committee, however, do not conceive this to affect the question, as it depends on a principle not susceptible of waiver on the part of the accused.

In expressing these opinions your committee are aware, if it were proper in this case now to do anything, that the remedy does not belong to this House. The Constitution of the United States has given the command of the army to the President, who has full power to cause any defect in the application of law, or misapprehension of fact, in relation to trials by courts-martial, to be reversed or remedied in the exercise of the ulterior discretion vested in him; but, if your committee were to venture to express a hope, it would be that, with the irregularity in the incipient organization of the court, enough would be found in the past services and gallant distinction of Colonel Chambers during the late war to recommend him to the clemency of the Executive.

To conclude, if it be inconvenient to the service, that general courts-martial should be required by law to consist of so large a number as thirteen officers, and of a superior rank to the accused, the Rules and Articles of War should be at once amended, to prevent those infractions of their spirit as well as letter, which, under the existing *practice*, are so likely to occur.

In addition to the information already in the possession of the House, the committee beg leave to subjoin the following letter from the Secretary of War.

WAR DEPARTMENT, *May* 19, 1826.

SIR: The Adjutant General attends the committee in conformity to the request of the committee. I have no information to communicate beyond that in the possession of that officer. The proceedings of courts-martial are presented to the department after a final decision. It takes no agency in the initiatory steps. The existence of this court was known for the first time at the department, when the record of its proceedings was presented.

I have the honor to be, &c.,

JAMES BARBOUR.

HON. JAMES HAMILTON, *Chairman of Committee on Military Affairs.*

19TH CONGRESS.]

No. 333.

[1ST SESSION.]

PROCEEDINGS ON THE NOMINATION OF DANIEL BISSELL TO BE COLONEL OF THE SECOND REGIMENT OF ARTILLERY.

COMMUNICATED TO THE SENATE MAY 22, 1826.

IN EXECUTIVE SESSION—SENATE OF THE UNITED STATES.

MONDAY, *May* 22, 1826.

Mr. HARRISON, from the Committee on Military Affairs, to whom was recommitted the nomination of Daniel Bissell, together with the message of the President of the United States, of the 12th ultimo, relating thereto, reported:

That the President of the United States having declined to accede to the proposition of the Senate contained in their resolution of February 2, it remains only for the Senate to act upon the nomination of the said Bissell as made in the message of January 16. As the President has not communicated to the Senate the reasons which have prevented his concurring in their opinion, and as the committee, after the most careful investigation, can see no good reason for an abandonment of the principles for which they have so long contended, in relation to the appointment of a colonel for the second regiment of artillery, they recommend to the Senate not to advise and consent to the appointment of Daniel Bissell to fill that office in the manner in which the nomination has been made.

The report was read.

On motion by Mr. Chambers,

*Ordered*, That the nomination of Daniel Bissell lie on the table.

On motion by Mr. Harrison,

*Ordered*, That the injunction of secrecy be removed from the proceedings in relation to the nomination of Daniel Bissell.

The following are the proceedings previous to the foregoing:

MONDAY, *January* 16, 1826.

The following message was received from the President of the United States by Mr. John Adams, jr.:

*To the Senate of the United States:*

I nominate Daniel Bissell, of Missouri, to be colonel of the 2d regiment of artillery.

JOHN QUINCY ADAMS.

The message was read.

*Ordered*, That the nomination of Daniel Bissell be referred to the Committee on Military Affairs to consider and report thereon.

TUESDAY, *January* 24, 1826.

Mr. HARRISON, from the Committee on Military Affairs, to whom was referred on the 16th instant the nomination of Daniel Bissell, submitted the following report:

That they have had the same under consideration, and find that the said Daniel Bissell, after filling all the inferior grades, was a brigadier general in the line of the army of the United States at the conclusion of the late war, taking rank as such from the 9th day of March, 1814. That in reducing the army from the war to a peace establishment in 1815, General Bissell, in common with many other superior officers, was retained in service with a lineal rank inferior to that which he had held in the war, and with a brevet

rank corresponding to the higher rank which he had so held; and that by virtue of this arrangement, which was made by the President and received the sanction of the Senate, General Bissell became a colonel in the line, taking rank as such from the 15th day of August, 1812, (the rank of his former colonelcy,) with the brevet rank of brigadier general, taking effect from the 9th day of March, 1814, the date of his former lineal rank in that grade.

In the further reduction of the army which took place in the year 1821, in the execution of the 12th section of the act of March 2 of that year, by which the President was authorized "to cause to be arranged the officers, &c. of the several corps [then] in service, in such manner as to form and complete out of the same the force authorized by [that] act to be retained, and cause the supernumerary officers, &c., to be discharged," Brevet General Bissell was considered as a supernumerary colonel and ordered to be discharged. This arrangement, as it affected General Bissell and some other officers, was decided by the Senate to be illegal and void; and the officer appointed in place of General Bissell was rejected.

The committee deem it improper to argue the question of the correctness of that decision. They will only say that they believe it to have been correct; that it was made upon great deliberation and afterwards reconsidered and confirmed; and that they consider it as the final decision of the highest tribunal which has cognizance of the question. The consequence of this decision was that General Bissell still remained in the army; and as a colonel therein might be lawfully nominated to the colonelcy of the 2d regiment of artillery, (vacant since the arrangement of 1821,) as is done in the President's message of the 16th instant, and without being so considered he could not be nominated to that place without violating the rule of regimental promotion, which is so well known and so perfectly established in the army of the United States.

The legality of the nomination being clear the committee deem it superfluous to examine the question of merits—it being known to the Senate and to the nation that General Bissell has been for more than thirty years, and in all the various grades from the private to the general, one of the most distinguished and meritorious soldiers and officers which his country has produced.

In recommending his confirmation, therefore, to the place indicated in the message, the committee act in conformity to the principles herein above set forth; and in fixing his rank to correspond with that which he held at the time of the reduction of the army in 1821, they act in further conformity to the same principles and in obedience to the precedents in the cases of Colonel Fenwick, Colonel House, and Lieutenant Colonel Eustis, as decided by the Senate on the 8th day of May, 1822. They therefore submit the following resolution:

*Resolved*, That the Senate do advise and consent to the nomination of Daniel Bissell to be colonel of the 2d regiment of artillery, to take rank as such from the 15th day of August, in the year 1812.

The report and resolution were read

*Ordered*, That they be printed in confidence for the use of the Senate, and that the nomination lie on the table.

THURSDAY, February 2, 1826.

Mr. Benton submitted the following motion:

*Resolved*, That in the opinion of the Senate Daniel Bissell is entitled to the place of colonel in the army of the United States, taking rank as such from August 15, 1812, with the brevet rank of brigadier general from March 9, 1814, and that the President of the United States may arrange him accordingly.

The Senate proceeded to consider the motion, and

On the question to *agree thereto*,

It was determined in the affirmative: yeas 37, nays 2.

The yeas and nays being desired by one-fifth of the senators present,

Those who voted in the affirmative are—Messrs. Barton, Bell, Benton, Berrien, Bouligny, Branch, Chandler, Chase, Cobb, Dickerson, Eaton, Edwards, Findlay, Harrison, Hayne, Hendricks, Holmes, Johnson, of Kentucky, Johnston, of Louisiana, Kane, King, Knight, Lloyd, Macon, Marks, Noble, Randolph, Robbins, Rowan, Seymour, Thomas, Van Buren, Van Dyke, White, Willey, Williams, and Woodbury.

Those who voted in the negative are—Messrs. Mills and Smith.

*Ordered*, That the Secretary lay before the President of the United States the proceedings of the Senate in relation to the nomination of Daniel Bissell.

WEDNESDAY, April 12, 1826.

The following message was received from the President of the United States by Mr. John Adams, jr.:

*To the Senate of the United States:*

WASHINGTON, April 11, 1826.

On the 16th of January last I sent to the Senate a nomination of Daniel Bissell to be colonel of the 2d regiment of artillery; and on the 3d of February I received from the Secretary of the Senate an attested copy of their proceedings in relation to that nomination, laid before me by their order, and closing with a resolution in these words:

"*Resolved*, That in the opinion of the Senate Daniel Bissell is entitled to the place of colonel in the army of the United States, taking rank as such from August 15, 1812, with the brevet of brigadier general from March 9, 1814; and that the President of the United States may arrange him accordingly."

In the discharge of my own duties I am under the necessity of stating respectfully to the Senate—

First. That I cannot concur in these opinions.

Secondly. That the resolution of the Senate having on its face no reference either to the nomination or to the office for which it was made, leaves me doubtful whether it was intended by the Senate as their decision upon the nomination or not. If intended as their decision, it imports that the Senate do not advise and consent to the appointment of Daniel Bissell as colonel in the 2d regiment of artillery. If intended as a mere expression of their opinions, superseding in their judgment the necessity of their immediate decision upon the nomination, it leaves the Senate still in possession of the nomination, and free to act upon it when informed of my inability to carry those opinions into effect.

In this uncertainty I have thought it most respectful to the Senate to refer the subject again to them for their consideration. The delay in the transmission of this communication is attributable to the earnest desire which I have entertained of acceding to the opinions and complying with the wishes of the Senate;

and to the long and repeated reconsideration of my own impressions, with a view to make them, if possible, conform to theirs. A still higher duty now constrains me to invite their definitive decision upon the nomination.

JOHN QUINCY ADAMS.

MONDAY, *April* 17, 1826.

On motion by Mr. Harrison, that it be

*Resolved*, That in the opinion of the Senate Daniel Bissell is entitled to rank as colonel in the army from August 15, 1812, with a brevet of brigadier general from March 9, 1814."

It was determined in the negative.

The Senate resumed the consideration of the nomination of Daniel Bissell contained in the message of January 16.

On motion by Mr. Harrison,

*Ordered*, That it lie on the table.

Mr. Eaton submitted the following motion:

*Resolved*, That the nomination of Daniel Bissell to be colonel of the 2d regiment of artillery is unnecessary, for the reasons—

1st. That he is already in the army, and should be arranged agreeably to the provisions of the act of 1821 for reducing the army.

2d. That an appointment to take effect now would be an act of injustice to Colonel Bissell, by placing him in a rank different from what he is entitled to claim by existing laws.

*Resolved*, That the President of the United States having declined acting in conformity with the advice of the Senate heretofore given, the Senate do not consider that they should take any further course in relation to the nomination of Daniel Bissell.

The Senate proceeded to consider the motion, and

On motion by Mr. Mills,

*Ordered*, That it lie on the table.

19TH CONGRESS.]

No. 334.

[2D SESSION.]

ANNUAL REPORT OF THE SECRETARY OF WAR, SHOWING THE OPERATIONS OF THE MILITARY ESTABLISHMENT OF THE UNITED STATES IN 1826; AND REPORT OF THE BOARD OF OFFICERS ON THE ORGANIZATION OF THE MILITIA.

COMMUNICATED TO CONGRESS WITH THE ANNUAL MESSAGE OF THE PRESIDENT DECEMBER 4, 1826.

DEPARTMENT OF WAR, *November* 28, 1826.

SIR: I submit a report on the administration of this department for the current year. The documents marked from A to M communicate information so fully and in detail, upon the measures which have been pursued in the various branches of the public service, that I shall content myself with a very cursory view of the most important objects.

The document marked A is a report of Major General Brown on the state of the army. The dispersed situation of the infantry of the army in various garrisons, and frequently so reduced as rarely to exceed a captain's command at any one place, was attended with great inconvenience and injury to the service; and their utility had in many instances been superseded by our rapidly extending settlements. It was desirable to alter this state of things—to effect it, a concentration of the army, as far as practicable, was ordered on the right bank of the Mississippi, a few miles below St. Louis, at the Cantonment Jefferson. The advantages of this position are obvious. The troops can be easily transported to the eastern or western frontier wherever the public exigencies may require their presence. In a salubrious and fertile region their health will be preserved, and their supplies may be cheaply obtained and delivered with facility; but the leading consideration remains to be noticed—the effect of the movement on the discipline and good character of the army. It is admitted by the most intelligent, that both these desirable qualities are more generally found in large masses of troops than in small detached commands. Profiting by the experience of officers of a superior grade and greater professional skill—emulation excited by the presence and rivalry of so many aspirants for reputation, and subjected to the wholesome control of the opinion of an increased number of brother officers to whose eye the conduct of each is exposed, their discipline and morality must be greatly improved.

Reports from the Quartermaster General, Commissary General of Subsistence, Paymaster General, Surgeon General, Commissary General of Purchases, and Ordnance department, marked B, C, D, E, F, and G, disclose all the information needful to be communicated on the administration of these branches of the public service. I add with pleasure my testimony to the fidelity of all the officers, superior and inferior, connected with these branches, among whom not a single delinquency has occurred.

From the report of the visitors at West Point, that establishment continues to equal the public expectation, by annually presenting to its country a large number of youths prepared to defend it in war, or to adorn it in peace. Legislative aid is still necessary to the improvement of this establishment. Its wants are presented, and an estimate for the necessary appropriation furnished by the chief engineer is submitted in the annual estimates of this department.

The document H is the report of the Engineer department. The duties performed by both corps will at once ascertain that great efforts have been made to perform as far as practicable the services expected

of them. From the present number more could not be accomplished; and yet, from the various calls made upon the department for reconnoissances, it has been utterly impracticable to comply with the wishes of many of our citizens; and such must continue to be the case without an increase of the corps. I beg leave to refer you to this report and to that of the Quartermaster General, as showing the measures which have been pursued in execution of the special acts of Congress at their last and former session, in relation to roads, harbors, and canals.

In executing the resolution of Congress assigning to this department the duty of having prepared a system of cavalry tactics, and a system of instruction for artillery, for the use of cavalry and artillery of the militia, I thought I could not fulfil the wishes of Congress more effectually than by convening a board composed of officers of the militia and of the army, whose various experience united would enable it to digest the best and most practical systems. The occasion was too favorable to be lost, and was therefore eagerly seized of profiting by this collection of talent and experience, to review our present defective militia system, and if possible, by an entirely new organization, to place it on a footing which would realize the expectations and wishes of every patriot in relation to this great arm of national defence. If there be any one maxim in our political creed which challenges universal approbation, it is that a well organized militia is the natural depository of our protection against foreign invasion or intestine violence. This maxim has been consecrated by the bill of rights of all the States; and yet the opinion is universal, that the present organization is both defective and onerous.

Important changes in the present system are indispensable to make the militia any way equal to the standard assigned it by the wishes of the patriot. To the end that every source from which information might be collected should be approached, I addressed a circular letter to the governor of every State and Territory, and to many citizens distinguished alike by their intelligence and experience, asking for information upon this interesting subject. By so doing I hoped to become possessed of the information which might lead to a result that would reconcile as far as practicable the various circumstances, moral and physical, belonging to so extensive a field, and thereby conciliate the public sentiment to such changes as the wisdom of Congress might think proper to adopt. Communications in reply to this letter have been received, some of which shed much light on this difficult, delicate, and highly national object. These communications were laid before the board, who, uniting their own experience and intelligence with the information thus imparted, it was hoped might find itself in a condition to point out the defects of the existing system and the probable remedies. They were directed to report to me the result of their reflections, which they accordingly did, and their report, marked I, with the answers to my letters is herewith submitted. The systems of tactics for cavalry, and of instruction for artillery, have been digested, and are in the hands of a copyist and will be communicated in a few days.

I intentionally forbear making any remarks on the various alterations recommended by the board of officers. The wisdom of those to whom they are submitted, should Congress determine to legislate upon the subject, will correct any errors into which they may have been betrayed, and supply any defect which may have escaped their observation. I cannot, however, abstain from calling your attention to the highly interesting fact that we have, according to the last census, two millions of male citizens between the ages of eighteen and forty-five. The difference indicated between that number and those embraced in the returns of the militia from the States results from the exemptions from militia service, which in some of the States are equal to one-half of the whole number which from their ages should be enrolled. From our happy position in regard to Europe, and from the no less fortunate relations maintained with our neighbors, and their actual condition, it would appear that keeping up a system of the militia so extensive as the present and burdensome, without any advantage to a large class of our citizens, was altogether unnecessary. A different organization, therefore, by which at least a million and a half of our most useful citizens would be relieved from the unprofitable pageantry of military parade for five or six days in the year, constituting so injurious a draft on their industry, must be one which cannot fail to be well received by the American people, and when, too, it is believed that, notwithstanding this relief, a superior efficiency will be imparted to this natural arm of the national defence.

The document K is the report of the officer particularly charged with Indian affairs, by which it will be seen that several treaties have been negotiated with various tribes, and which are herewith submitted. By two of them large tracts of land within the limits of Indiana have been relieved from the incumbrance of the Indian title. Although the proper measures were promptly adopted to effect a similar result in other quarters, we have not yet been advised of the result.

During the recess information was continually communicated to the department that a bloody and, most probably, an exterminating war was about to break out between the Osages and Delawares, and their various allies, which, it was urged, nothing could avert but the employment of a respectable portion of the army of the United States. The power of the Executive, without legislative provision to that effect, was deemed too questionable to justify the measure. All that could be done was immediately performed to prevent the threatened mischief. A part of our military force was ordered to make a demonstration in the direction of the probable scene of hostility, whose object not being known might have the effect of over-awing the Indians; and the chiefs of the various tribes were assembled to impress on their minds the calamities which would ensue from a perseverance in their hostile purposes. Contrary to expectation, we succeeded in pacifying them for the present. The duration of this state of things is, however, most uncertain, and the subject is brought particularly to view for the consideration of Congress. The mischief likely to result from placing in the same neighborhood, without a controlling power on the part of the Executive of the United States, different and hostile tribes, has already been submitted in a report from this department to Congress at its last session. The events just referred to have tended to confirm the views formerly taken; and I feel myself impelled by an irresistible sense of duty to state that unless a preventive is speedily furnished by law, I fear that, at no distant period, these unfortunate and unhappy people will be exterminated by intestine wars, and thereby that a subject fruitful of unavailing regret will become a portion of the inheritance of the American people.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The PRESIDENT of the United States.

*List of documents accompanying the letter of the Secretary of War to the President of the United States, dated November 28, 1826.*

Report of Major General J. Brown, with statements A to E, marked A.  
 Report of the Quartermaster General, marked B.  
 Report of the Commissary General of Subsistence, marked C.  
 Report of the Paymaster General, marked D.  
 Report of the Surgeon General, marked E.  
 Report of the Commissary General of Purchases, with nine statements, 1 to 9, marked F.  
 Report of the Ordnance department, with statements A to H, marked G.  
 Report of the Engineer department, with documents 1 to 4, marked H.  
 Report of the board of officers relative to the organization of the militia, marked I.  
 Report of the Indian office, marked K.  
 Report of the Pension office, marked L.  
 Report of the Bounty Land office, marked M.

A.

HEADQUARTERS OF THE ARMY, *Washington, November 30, 1826.*

SIR: In compliance with your instructions of the 3d ultimo, I have the honor to lay before you the following returns and statements, viz:

A—A statement of the organization of the army conformable to the acts of Congress.  
 B—A return of the actual strength of the army from the last regimental and other returns.  
 C—A return showing the distribution of the troops in the eastern department.  
 D—A return showing the distribution of the troops in the western department.  
 E—A statement showing the number of men enlisted, the amount of money advanced for the purposes of recruiting, and the amount for which recruiting accounts have been rendered for settlement, from the 1st October, 1825, to the 30th September, 1826.  
 F—An estimate of the amount which will be required for the current expenses of the recruiting service for the year 1827.

By statement E it will be seen that the sum of \$10,850 63 remains unexpended in the hands of recruiting officers. This amount is in a regular course of application to the recruiting service, and will doubtless, in due season, be properly accounted for.

In the early part of the year Brevet Major General Scott commenced a tour of inspection and review of the military posts in the eastern department, which tour was extended southwardly as far as St. Augustine, but, on account of serious indisposition, he was prevented from prosecuting his tour to the north and east.

Brevet Major General Gaines has commenced a tour of inspection of all the posts in the western department.

Colonel Wool has inspected during the last year the posts of Fortress Monroe, Charleston, Pensacola, New Orleans, St. Phillip's, Petite Coquille, Cantonment Jesup, Cantonment Towson, Cantonment Gibson, Fort Mackinac, Green Bay, Sackett's Harbor, West Point, Eastport, Portland, Portsmouth, Boston, Newport, New London, New York, Detroit, Niagara, Plattsburgh, Castine, Salem, and Marblehead. The six posts last named are unoccupied by troops, but contain ordnance and ordnance stores requiring inspection. To these are to be added the arsenal of Baton Rouge, Augusta, Richmond, Watervliet, Rome, and Watertown, and the United States armory at Springfield.

Colonel Croghan has completed an inspection of the remote posts of the northwestern frontier, including the cantonments at St. Peter's and Council Bluffs, but his reports have not yet been received.

The companies of the artillery regiments have been generally inspected by the field officers thereof, but their detailed reports are not yet received at general headquarters.

By the information gathered from inspection reports, as well as from personal observation, it is found that the general condition of the army continues to be as favorable as circumstances will allow. In discipline and instruction a decided improvement is perceptible, and in the departments of administration there is no want of due regularity and promptitude.

The necessary evils resulting from a wide dispersion of our forces, and the number of small commands which are consequent to the system, have been in some degree corrected in the artillery regiments by the operation of the school of practice. Although destitute of the aid which has been sought at the hand of legislation, and still struggling with exceedingly limited resources, this establishment has already afforded the most decided evidences of its usefulness and an earnest of the salutary effects on the efficiency and welfare of the artillery which must result from its preservation and prosperity.

It is a truth which cannot be disguised, that the virtues of an army employed during a long period of peace and inaction in little else than the ordinary course of garrison service are in danger of deterioration. In order to preserve the energies and the active vigor of our ranks, and to guard against the approaches of sloth and imbecility, it seemed necessary to adopt some measure which might operate at least partially, if not effectually, in favor of these desirable objects. The influence of concentration, as a system, independently of the various branches of the theoretical and practical instruction which might be embraced in it, would of itself prove sufficiently beneficial to justify the adoption of it as a measure of sound policy. The present location of the school of practice is perhaps as favorable in every sense as could be chosen for the artillery under existing circumstances, and the plan of periodical details with which it is connected comprises many of the advantages which result from occasional changes in the stations of the troops.

The benefits which are believed naturally to spring from the system in question are important and manifold. Among them may be noted, in general terms, habits of uniformity and accuracy in the practical routine of service, fresh incitement to the cultivation of military knowledge, emulation and *esprit de corps* among the troops, and mutual conformity and general elevation of individual character among the

officers. But, by the enervating influences of a passive garrison life, influences which, without the adoption of this or a similar system, it is impossible to resist, these high qualities, so invaluable to an army, must in a measure be forfeited.

With this view of the subject, it has been thought desirable to extend the principle as far as possible for the benefit of the infantry also. Duties of an active nature are perhaps more frequently enjoined on this arm of service than on the artillery, but it stands in no less need of the advantages to be derived from a school of practice. The numerical strength of our infantry regiments is indeed small, considering the wide extent of frontier which they are commissioned to defend, and detachments could not, perhaps, be permanently drawn from them without prejudice to the ulterior object of their maintenance; but while this objection would be effectually obviated by the increased efficiency which such an institution is calculated to produce, the salutary operation of it in other respects, it is hoped, will, in time, be generally felt and fairly appreciated.

The number of desertions from the army during the last year has been somewhat less than in the several years preceding, but it is still such as to call for the vigorous interposition of legislative enactment to arrest the progress of the evil. The measures relating to this subject—recommended to you in my communication of the 17th November, 1825, and presented by you for the consideration of Congress at their last session—will, it is hoped, be finally acted on by that body during the ensuing session. The design of offering additional pay to the approved soldier as a condition of his re-enlistment, that of withholding a portion of the same as a restraint and security for faithful service, and the plan for the improvement of the non-commissioned grades of the army by a judicious increase of their emoluments, are measures which I still consider as promising the happiest effects, as well promotive of the general welfare of the army as restrictive of the evil which so greatly impairs its organization and efficiency.

While we rest in the pleasing assurance that our small military establishment suffices in most of its branches for the immediate purposes of peace, we can never be unmindful of its high importance as the repository of the military science of the country, and as the nucleus of future organization, when the exigencies of the nation shall demand its enlargement.

That it may always be found equally worthy and well prepared for that degree of expansion which is commensurate with this object, no effort should be unappreciated or suffered to be unavailing which tends to its moral elevation, and to the maintenance of those military virtues on which its future efficiency must mainly depend.

I have the honor to be, sir, with the highest respect, your obedient servant,

JAC. BROWN.

Hon. JAMES BARBOUR, *Secretary of War.*

E.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, November 21, 1826.*

SIR: In obedience to your order, dated the 3d ultimo, I have the honor to report the operations of this department during the first, second, and third quarters of the year 1826.

On the 1st day of January there remained in the hands of the officers and agents of the department, applicable to the service, the sum of .....	\$25,198 75
In the first quarter the remittances amounted to.....	\$55,902 00
In the second quarter to .....	125,182 00
In the third quarter to.....	99,546 10
	<hr/>
Amount remitted in the three quarters .....	280,630 10
For damaged public property sold, and for rents of old barracks, &c.....	1,332 44
	<hr/>
Making the whole amount to be accounted for.....	307,161 29
The disbursements in the first quarter amounted to.....	67,643 17
In the second quarter to .....	117,917 18
	<hr/>
	185,560 35
In the third quarter, so far as accounts have been rendered, to.....	91,636 23
	<hr/>
Amount of accounts rendered .....	277,196 58
	<hr/>
Leaving to be accounted for.....	29,964 71
	<hr/> <hr/>

This sum is made up of small balances in the hands of the several officers of the department throughout the Union, applicable to the service of the 4th quarter, all of which, it is believed, will be accounted for at the end of the year.

\* One company of the fourth infantry has been recently detached from this command, with orders to establish a temporary post near the mouth of Suwannee river, Florida.

HEADQUARTERS, Washington.

ADJUTANT GENERAL'S OFFICE, Washington.

JAC. BROWN.

R. JONES, Adjutant General.

The accounts of all the officers acting in the department during the first and second quarters, except those of the superintendent of the road from Memphis to Little Rock, have been received, examined, and sent to the treasury. The accounts of forty-three officers for the third quarter have been received, a part of which have been examined and sent to the treasury, and the remainder are in a course of examination here. The accounts from six posts remain to be received. They are expected during the next month.

A reference to the remittances and disbursements during the three quarters will show that the money accountability is good; that for property of the quartermaster's department is equally so, and when the revised regulations in regard to clothing and equipage, prepared in compliance with the provisions of a law of the last session of Congress, shall be distributed to and well understood by the army, the accountability for that branch of the service will be equal to that of any other. I hope to have those regulations in full operation during the first quarter of the ensuing year.

The road to communicate between Pensacola and St. Augustine, in Florida, authorized by an act of Congress of the 28th February, 1824, has been completed. It is about four hundred miles in length, and has been made sixteen feet wide throughout. The act referred to authorized a road twenty-five feet wide, but the sum appropriated being less than two-fifths of the estimate, it became a question whether only a part of the road should be completed, or the amount appropriated be applied to the opening of a communication between the points indicated, of less width, but sufficient for military purposes. The latter was thought most advisable by your predecessor, and I was accordingly instructed to cause the road to be opened sixteen feet wide. Should it be thought necessary to increase the width, the work might be done by the troops at a comparatively trifling expense; but I should consider the utility of the measure somewhat problematical. The road is at present sufficiently wide and well constructed for all military purposes, and certainly so as it regards the use to be made of it by the inhabitants of Florida.

The road from Tampa Bay, in Florida, to Coleraine, in Georgia, has been completed by the troops, from the former place to Wantons, about one hundred and twenty miles; a detachment under the direction of Captain Clark, of the quartermaster's department, is employed on the section of that road extending from Wantons to Black creek, a branch of St. John's river, about forty-eight miles, which it is believed they will complete in the course of the next month. The remaining section from Black creek to Coleraine, a distance of fifty-six miles, was put under contract in July last. The contractors have stipulated to complete it by the 31st December, and I have every assurance they will fulfil their contracts.

Sixty-four miles of the road from Memphis, in Tennessee, to Little Rock, in Arkansas, was put under contract in March and April last. The contractors, it is believed, will have completed their work by the 1st day of March, 1827. Should it be the intention of the government to continue the road to Little Rock, a further appropriation will be requisite.

In consequence of the troops at Cantonment Gibson being employed in constructing quarters and defences, the road authorized from that post to Little Rock had not been commenced at the last date.

Considerable progress has been made in the erecting of barracks and quarters at the position selected for an infantry school of practice in the neighborhood of St. Louis, Missouri.

The condition of the buildings at Fort St. Philip is such as not only to forbid everything like comfort, but to endanger the lives of the troops. Measures have been adopted to erect new barracks, quarters, and hospitals at that post, and materials have in part been collected for that purpose.

Barracks and quarters at Savannah are in a state of preparation for two companies, and measures have been taken to prepare barracks for a company of men at or near the mouth of the river Suwannee, in Florida. For all these works appropriations will be necessary,

A road from Pensacola to Berkely, in Alabama, one thence to Mobile Point, and one from the latter post to Pensacola, are extremely desirable in a military point of view, and are rendered more important now that Pensacola has been selected as the naval depot for the Gulf of Mexico.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Brig. Gen. and Quartermaster General of the Army.*

Hon. JAMES BARBOUR, *Secretary of War, Washington City.*

### C.

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, November 23, 1826.*

Sir: The statement which I now have the honor to submit exhibits the moneys remitted and charged to contractors, assistant and acting assistant commissaries, during the first, second, and third quarters of the year, together with the balances on hand the 31st of December, 1825, amounting in the aggregate to \$298,850 73, and the disbursements made by them for the same period, amounting to \$256,114 24, leaving a balance to be accounted for in the fourth quarter of the year of \$42,736 49.

Of this sum of \$42,736 49, due on the 30th of September ultimo, \$2,500 were remitted to commanders of distant posts, where there were no regularly appointed commissaries, for the purpose of supplying agents of their own selection with funds for purchases in the fourth quarter of the year. \$300 remitted to Fort St. Philip reached their destination after the disbursing officer for whom they were designed had left the post, and therefore remain unavailable.

\$367 90 were charged to a commanding officer of a post for an order of issues of extra fresh beef to the troops, rather as a caution than with a view to exaction, and may eventually be allowed.

\$7,902 71 have been charged to officers in service for provisions unaccounted for by them at the expiration of their duties, some time since, who have neglected to forward returns and abstracts of issues to the troops on their stations; and although there does not exist the smallest doubt of the regular issue of the whole of the provisions under their charge, yet it was thought necessary to convert them into money, to charge the officers with the amount, and to place them under stoppage, as a measure of coercion to the final rendition of said abstracts and returns, which, when received, will enable the Auditor to expunge the whole of this charge.

\$3,132 20 are the residue of a balance due by an officer dismissed the service for neglect of duty, whose securities have already furnished evidence of issues to a considerable amount, and who are strenu-

ously exerting themselves to reduce this balance by the same means, and in case of failure to that effect are able and willing to pay the amount.

\$1,909 10 is a balance due on the 31st of December ultimo by an officer now in service and under stoppage, which will be paid in the approaching year.

\$695 63 is a balance due by Lieutenant Outlaw at his decease, whose securities are wealthy, and who no doubt will settle the amount the moment that the claim is presented to them; making an aggregate of \$16,807 54 totally inapplicable to the charges of the present year, and leaving on the 30th of September actually in the hands of the disbursing officers of the department at all the posts, including Mackinac, Fort Armstrong, and St. Peter's, too remote to receive the accounts for the 3d quarter, the sum of \$25,928 95, part of which has already been expended on account of that quarter, and the residue will remain entirely applicable to the expenditures of the 4th quarter of the year, during which period the greater portion, if not the whole amount, will be disbursed.

Very respectfully, your most obedient servant,

GEORGE GIBSON, *Commissary General of Subsistence.*

HON. JAMES BARBOUR, *Secretary of War.*

D.

PAYMASTER GENERAL'S OFFICE, *City of Washington, November 27, 1826.*

SIR: The report I have the honor herewith to submit exhibits the amount of funds advanced to the several paymasters of the army within the 1st, 2d, and 3d quarters of the present year, the sums not called for by their disbursements for that time, and now forming part of their funds for the fourth quarter, and the balance to be accounted for.

Of the seven hundred and forty-nine thousand and seventy dollars drawn from the treasury, but twenty-two thousand six hundred and thirty-three dollars and fifty-one cents remain to be accounted for. This balance consists of twenty-one thousand one hundred and four dollars and nineteen cents received by Paymaster Philips on the 19th of August, which could not be disbursed and the accounts rendered in time for this report, owing to the difficulty of reaching the remote posts of his district until late in the fourth quarter. The remaining one thousand five hundred and twenty-nine dollars and thirty-two cents is a balance against late Paymaster Hayden, who died on the 10th of June last, 120 miles from the upper post on the Red river, returning to Natchitoches. At the time of his death the balance against him was fifteen thousand two hundred and twenty-eight dollars and ninety-one cents. By the vigilance of Major Cummings and Captain Hyde, in securing the money and vouchers of Paymaster Hayden, it is reduced to the sum stated; and this, it is believed, will be accounted for by additional vouchers, or a deposit in the Bank of Alexandria, A. T.

Thus it appears every cent advanced within the time embraced in this report has been accounted for that could be required or expected, and I have every reason to believe the remainder will be in due time and with equal fidelity.

The accounts show the troops generally to be paid to the 1st of September; they are probably by this time all paid to that period, and many two months later.

I avail myself of this report respectfully to state, as my opinion, that the pay department might be improved by giving rank to its officers, and placing it in that respect on a footing with other branches of the staff.

Rank would render the department more important and offer an additional inducement to suitable persons to seek appointments in it, particularly to officers of experience in the line of the army. It would qualify paymasters to serve as members of military courts, thereby rendering them more useful; and as they are subject to martial law, it is but justice that they, in common with other officers, should have a voice in administering it.

As it will be no additional expense to the government to bestow rank on paymasters corresponding with their present compensation, and as the rank will never be exercised out of their proper department, except as members of military courts, I can perceive no objection to the measure, and most earnestly solicit that the subject be submitted to Congress.

The act of April 24, 1816, allows each paymaster "a capable non-commissioned officer as clerk;" but it has been found impossible, except in a few cases, to obtain non-commissioned officers who are *capable*; and it is most respectfully recommended to solicit of Congress to alter the law, so as to permit the employment of citizens as clerks, at the same compensation, when *capable* non-commissioned officers cannot be obtained.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

HON. J. BARBOUR, *Secretary of War.*

Statement exhibiting the moneys remitted to contractors from January 1 to September 30, 1826; the sums charged to them on account of failures; the amount retained to cover purchases that may arise from failures, and the amount accounted for by them; the balances in the hands of the assistant and acting assistant commissaries of subsistence on the 31st of December, 1825; the moneys remitted to them in the 1st, 2d, and 3d quarters of 1826; the sums charged to them on account of sales to officers on the frontier posts; sales of empty boxes, barrels, &c.; and the amounts accounted for by them for the same period, together with the balances in their possession at the expiration of the 3d quarter of the year.

Names.	Balances in possession of assistant and acting assistant commissaries December 31, 1825.	Remitted, 1826. PAYMASTER GENERAL'S OFFICE, *November 27, 1826.*

E.

SURGEON GENERAL'S OFFICE, *October 18, 1826.*

SIR: In compliance with your order of the 3d instant, I have the honor to report an estimate of the expenses of the medical department and of the Surgeon General's office for the year 1827. As most of the accounts against the department are paid by warrants from the Treasury Department, only \$2,500 have been transmitted to the surgeon at New York; all of which has been accounted for, except \$98 69, which was the unexpended balance at the expiration of the third quarter of the year. It is estimated that about \$5,000 will be required to meet the expenses of the department up to the end of the present year.

Very respectfully, your obedient servant,

JOS. LOVELL, *Surgeon General.*

HON. JAMES BARBOUR, *Secretary of War.*

F.

COMMISSARY GENERAL'S OFFICE, *Philadelphia, November 8, 1826.*

SIR: I have prepared, and now have the honor to enclose, nine statements, as follows, viz:

1. Of moneys drawn from the appropriation for the purchasing department during the first three quarters of 1826.

2. Of moneys drawn from the appropriation for the purchase of woollens in advance for 1827 during the same period.

3. Of moneys received and disbursed during the same period on account of the purchasing department.
4. Of moneys received and disbursed during the same period on account of the appropriation for purchasing woollens in advance for 1827.
5. Of moneys disbursed during the same period on account of arsenals.
6. Of moneys received and disbursed during the same period on account of contingencies.
7. Of the cost of clothing during the years 1825, 1826, 1827, (comparative.)
8. Of the cost of each article of clothing for the army of the United States during the year 1827.
9. Comparative statement of the cost of the annual suit and of clothing for five years, at the prices of 1825, 1826, and 1827.

All of which I hope will meet your approbation.

It will be observed that my expenditures during the first three quarters of 1826 have exceeded the amount of receipts \$5,798 33, which may be accounted for as follows: I received from the sureties of Edgar Patterson, on account of the debt due from him, (per Thomas Swan, esq., district attorney,) on the 16th of February, 1826, \$850; and on the 13th of July, \$620; and on the 31st of May I received from John Reed, on account of a debt due from Thomas Parker, \$362 77; which sums have not been introduced in the statements, yet have been disbursed in this office: \$2,624 50 remained in my hands on the 1st of January, 1826, on account of arsenals, which have been nearly disbursed, and \$1,341 06 which had been advanced during the fourth quarter of 1825 has been accounted for in 1826, and covers the excess exhibited in the statements herewith forwarded.

My accounts for the *third* quarter of 1826 have been settled and the disbursements admitted to my credit by the Second Auditor, as appears by his report, received yesterday.

I have the honor to be, sir, with great respect, your most obedient servant,

C. IRVINE, *Commissary General of Purchases.*

HON. JAMES BARBOUR, *Secretary of War.*

COMMISSARY GENERAL'S OFFICE, Philadelphia, November 8, 1826.

C. IRVINE, Commissary General of Purchases.

HON. JAMES BARBOUR, Secretary of War.

## G.

ORDNANCE DEPARTMENT, *November 28, 1826.*

Sir: In compliance with your instructions, I have the honor to communicate herewith sundry papers, marked from A to H, inclusive, which contain the statements and information required.

Statement A exhibits an account of the moneys remitted through this department in the year 1825, showing the amount, under each head of appropriation, received by each disbursing officer, the amount of accounts rendered by them, and the balance remaining in the hands of each at the close of the year. By this statement it appears that the total amount of remittances during the year 1825 was..... \$634,079 38  
The amount of accounts rendered and settled during the same period was..... 629,720 43

The balance remaining in the hands of disbursing officers at the close of the year... 4,358 95

The whole of which was accounted for in the first quarter of the present year, except a small balance due from the estate of a deceased officer, and this case has been placed in the hands of the Agent of the Treasury.

Statement B exhibits an account of the moneys transmitted to the several disbursing officers of this department during the first three quarters of the present year, the amount of accounts rendered by them during the same period, and the balance remaining in the hands of each at the close of the third quarter. By this statement it appears that the total amount transmitted was..... \$391,657 16  
The amount of accounts rendered..... 351,919 18

The amount remaining unexpended in the hands of disbursing officers at the close of the third quarter and applicable to the service of the fourth quarter was..... 39,737 98

The accounts of all the disbursing officers of this department have been rendered up to the 30th of September last, with one exception. The accounts from the armory at Harper's Ferry have not yet been received for the third quarter.

Statement C exhibits an account of the work done and of the supplies procured at the several arsenals and armories during the year ending September 30, 1826. By this statement it will be seen that 25,690 muskets have been made at the national armories during the year. This number falls short of the number made during the previous year. The diminution was occasioned principally by bilious fevers, which prevailed to a great extent among the workmen at Harper's Ferry for two or three months of the latter part of the summer and autumn. In addition to the particulars exhibited in this statement, other business, such as repairs of buildings, arrangement and repairs of military stores, &c., which cannot be particularized in tabular form, have received due attention.

Statement D shows the number and description of small arms, artillery, and equipments procured, and the expenditures made under the act for arming and equipping the militia, during the first three quarters of the present year. The arms procured are 6,480 muskets and 3,280 rifles; the artillery, thirty-two six-pounder and three twelve-pounder field carriages and equipments. Two million and five thousand flints have also been procured. The amount expended for small arms and artillery for arming the militia was \$141,026 66.

Statements E and F show the number of arms which have been apportioned to each of the several States and Territories for the years 1824 and 1825. The whole number apportioned for these two years is 30,000. But a small proportion of them have yet been distributed. They are, however, all in readiness to be delivered whenever required by the proper authorities of the respective States to which they have been apportioned.

There are now in the public arsenals about thirty-six thousand muskets, which are due to the several States under former apportionments; these, with the number which may be apportioned for the present year, making in all upward of fifty thousand, it is contemplated to distribute early next season.

Statement G shows the number and description of the ordnance arms and military stores issued from the arsenals to the army and military posts during the first three quarters of the present year.

Statement H exhibits an account of the operations of the United States lead mines in Missouri and in the vicinity of Fever river. By this statement it appears that the lead made at those mines during the year ending on the 30th September last amounted to 2,333,804 pounds, and that the rent accruing during the same period was 233,380 pounds, 208,440 pounds of which has been collected and deposited in the public stores. The total number of leases which have been granted for working the lead mines is sixty-one, being an addition of thirty-four during the past year. These results, although they fall short of the estimates presented in the last annual report, show that the business is rapidly extending. The number of leases which had been granted prior to the year 1825 was seventeen; the lead made at the same was 138,644 pounds. During the year 1825 the number of leases was extended to twenty-seven, and the lead produced in that year was 887,298 pounds. The number of leases now granted, as above stated, is sixty-one, and the lead produced in this year is extended to 2,333,804 pounds. The value of this product for the last year to the section of country which produces it may be estimated at about \$120,000.

Under the act passed at the last session concerning the United States arsenal at Augusta, a suitable site has been selected and purchased, and the necessary arrangements preparatory to erecting the buildings have been made. The site for an arsenal at St. Louis has not yet been procured. Several sites have been examined and reported on. But as some difference of opinion prevailed among those who examined the sites, as to their respective eligibleness, it was considered most advisable to have a further examination made. This has occasioned some delay in determining the choice of a site. Such arrangements for procuring building materials have been effected as will admit of the works being commenced very early in the ensuing spring. The act "granting certain grounds to the city of Detroit," has been carried into effect. The proper authorities of the city have been placed in possession of all the grounds not reserved by the act for the use of the United States, except a small lot occupied by a magazine, which is temporarily retained until another magazine shall be erected.

A part of the appropriation for building an arsenal at Vergennes, in Vermont, has been applied to

that object. The season was so far advanced before the works could be advantageously commenced that they could not be completed during the present year.

The rifles which, by the resolution of May 20, 1826, were directed to be delivered to Captain Aikins's volunteers, have been prepared and forwarded to the arsenal (nearest to the residence of the several persons named in the resolution) for distribution.

I have the honor to be, respectfully, your obedient servant,

GEO. BOMFORD, *Brevet Colonel on Ordnance Service.*

HON. JAMES BARBOUR, *Secretary of War.*

## H.

REPORT OF THE CHIEF ENGINEER FOR THE YEAR 1826, RELATING TO FORTIFICATIONS, INTERNAL IMPROVEMENTS, AND THE MILITARY ACADEMY, ACCOMPANIED BY THE FOLLOWING DOCUMENTS:

1. A table, marked O, showing the moneys applicable and their application to those objects.
2. A table, marked P, showing the fortifications projected, but not commenced.
3. A report respecting the Dismal Swamp canal.
4. The report of the board of visitors who attended the annual examination at the Military Academy in June, 1826.

ENGINEER DEPARTMENT, *November 18, 1826.*

SIR: I have the honor to submit herewith the report required by your order of the 4th ultimo. It will exhibit the progress of fortifications, internal improvements, and the Military Academy during the year ending on the 30th of September last, and their condition at that date.

The accompanying table, marked O, will show what moneys were applicable to those objects during the period above stated, and how they were applied. It will also show that all the moneys advanced to distributing agents have been satisfactorily accounted for.

The table also accompanying, and marked P, will exhibit the fortifications for which plans have been made by the board of engineers, and which have not been commenced. They are arranged in three classes, referring to the order in which they should be commenced, and the estimate of the cost is stated opposite to each.

The board of engineers for fortifications, besides having prepared a report on the defence of the sea-coast by fortifications, which was laid before Congress at the last session, have been and are now engaged in preparing projects of works for Charleston, Savannah, and Pensacola.

An appropriation was made this year for commencing and completing the battery at Bayou Bienvenue. Arrangements were made for commencing the work, but the result of experiments to ascertain the fitness of the soil at the site selected to support the foundations having been unfavorable, a report was made to that effect, accompanied with a suggestion of the propriety of selecting another site. In a sub-

sequent report recently received it is stated that, on further examination and comparison of the site with others that might be selected, it has been ascertained to be as eligible in regard to soil as any one that could be substituted for it, and that it will be practicable to render the foundations secure by alterations which will adapt them to the soil, and which will be submitted for decision as soon as the drawings for exhibiting them shall be prepared.

*Fort Adams, at Brenton's Point.*—More than three-fourths of the sum appropriated has been advantageously applied to this work during this year. Stone fit to be used in the construction of the work is now procured on the land purchased as an addition to the site. It is estimated the amount that may be saved by the reduction of the price of that material, in consequence of its being procured in the manner stated, will be equal, or nearly so, to the cost of the land.

*Fort Hamilton, at New Utrecht Point.*—It was stated in the report of last year that the measures adopted to get possession of the land upon which a part of the work would be located had been unsuccessful, and that, in consequence, only one-half of the work had been laid out and commenced. The land in question was procured this year, but not until the season was too far advanced to lay out and commence the construction of the remainder of the work. The operations have been successfully and advantageously prosecuted, however, upon the part of the work which was laid out and commenced last year, the sum expended being greater than the amount of the appropriation of this year, and equal, nearly, to three-fourths of the amount available.

*Fort Delaware.*—This work will be finished in the course of the year. The injuries produced by the sinking of the foundations will then have been thoroughly repaired. The subsidence of the foundations during this year has been less than heretofore, and its tendency to increase old and produce new injuries has been of comparatively limited extent. It is proposed to load the foundations as soon as practicable with the armament intended for the fort, and by that means, should they be still liable to further subsidence, to accelerate it, that its maximum may be ascertained. It is believed, if the work does not now possess it, that it will be practicable to give to it ultimately the strength and stability requisite to the fulfilment of the objects for which it is designed.

*Fort Monroe.*—The large sums expended upon this work during the current year have been judiciously and advantageously applied.

*Fort Calhoun.*—The laying of the foundations of this work was commenced this year. On account of the depth to which it was necessary to carry them, the work could be conducted only while the tide was at its lowest stage, and has progressed but slowly in consequence of the frequent interruptions incident to this mode of carrying it on. When the foundations shall have been laid, the work may be expected to progress rapidly.

*Fort Macon, at Bogue Point, North Carolina.*—The encroachments of the sea upon the site originally selected for this work made it necessary to select another site, and the time consumed in the surveys and other preliminary arrangements requisite to the fulfilment of that object delayed the commencement of the work until July last. Its progress since has been greatly retarded by the difficulty of procuring suitable materials and workmen. It is proper to remark that, although an appropriation was made last year to commence this work, no officer could be spared to undertake it until the month of November. The land requisite for the site of the work has been valued by assessors appointed by the State of North Carolina, and the engineer has been authorized to conclude the purchase agreeably thereto.

*Fort at Oak island, at the mouth of Cape Fear river.*—An appropriation was made last year for the commencement of this work also, but no officer could be assigned to its superintendence until late in the season. The site has been purchased, materials have been collected, and wharves and other conveniences to facilitate their reception, removal, and preservation, have been prepared. Buildings for storehouses, for workshops, and for lodging workmen, have also been erected. Competent workmen could not be obtained in the neighborhood, and arrangements have been made for procuring them from the north. On their arrival the main work will be commenced.

*Fort at Mobile Point.*—The construction of this work has progressed very favorably this year. On the 30th September last the sum expended had exceeded the amount of the appropriation of this year, and it is believed the balance of the appropriation of last year will have been expended ere this.

*Fort at Chef Menteur.*—More than three-fourths of the appropriation of this year has been applied in a satisfactory manner to this work. It may be completed next year with the sum estimated for that purpose.

*Fort Jackson, at Plaquemine Bend.*—The weather and other circumstances have been as favorable this year as they were disastrous last year for carrying on the works of this fort. The limited extent of the work done last year has been fully compensated for by the quantity executed this year. The sum of \$83,000 was reported last year as remaining unexpended; it has been expended, together with \$23,000 of the \$90,000 appropriated this year. The remaining \$66,000 will have been expended by the first of March next.

*The sea wall for the preservation of George's island, in the harbor of Boston.*—This operation is connected with the subject of fortifications, George's island having been purchased as the site of a fortification. The work has latterly progressed very rapidly, but its progress during the early part of the season, which was the most favorable for carrying on the work, was retarded greatly by the delinquency and ultimate failure of the contractor who had undertaken to execute it. It is expected the work will be in a condition at the expiration of this month to afford the desired protection to the island during the approaching inclement season, and that it will be finished early next year. Materials of the most durable quality and workmanship of the best kind have been applied to so much of the work as has been executed.

*The repair of Fort Constitution, at Portsmouth, New Hampshire.*—This operation was authorized by a distinct appropriation, and will be completed in the course of this year.

*The site for a fort at Throg's Point, in Long Island sound,* has been purchased, in fulfilment of an appropriation for that purpose. The appropriation also contemplated the purchase of the privilege of a right of way through the grounds adjoining the site. This has been done, because such a one as was desired could not be obtained.

It is proper to state that expense would be saved and facility afforded to the prosecution of the fortifications, if appropriations for them, entire or partial, could be obtained at the commencement of the session of Congress.

The board of engineers for internal improvements have been occupied chiefly during this year in preparing their reports on the national road from the seat of government to New Orleans and the Chesapeake and Ohio canal, both of which have been completed. Connected with the object last stated, they have

examined the Wills' creek and Castleman river route which had not before been examined by the board. They have also fulfilled the duties assigned them by the act of the 18th of May last, for the subscription of stock in the Dismal Swamp Canal Company, and a copy of their report is transmitted herewith. Besides the foregoing, the board have prepared instructions relating to surveys; have inspected the Delaware and Chesapeake canal; and are now engaged in an examination for the purpose of locating a mail-route between Baltimore and Philadelphia.

The board have been so entirely occupied with the objects just stated that they have not been able to prepare the project for a canal to connect Lake Pontchartrain with the Mississippi river, which was stated in the report of last year as one of the objects to which their early attention would be given. It will be completed, if practicable, before the board proceed to the examinations relative to the Florida canal, the canals to connect the Coosa with the Tennessee, and to overcome the obstructions in the latter at the Muscle Shoals, and other objects to which their attention will be directed in that section of the country. But if it cannot be completed before those examinations shall be commenced, it will be attended to as soon as the board shall be disengaged from them.

Under the act of the 30th of April, 1824, the topographical and civil engineers have been employed during this year upon the following surveys:

One brigade, under the direction of a topographical engineer, has—

1. Surveyed the Kennebec river from Bath to Augusta, on both shores and around all islands, by a connected series of triangles, and with chain and compass. The soundings throughout were also taken. The distance on the route of the river 40 miles; the length of chain work 120 miles.

2. Surveyed the Kennebec from Augusta to Scowhegan, levelled the same, and collected the requisite data for locks, dams, and partial canals. The distance on the route of the river 35 miles.

3. Examined the Androscoggin river the distance of 90 miles, and levelled all the falls.

4. Surveyed three different routes for the Brunswick canal and feeder; length 20 miles.

5. Surveyed the Gardiner canal route; length about 20 miles.

6. Surveyed the Amonusick canal route and feeders; length about 40 miles.

7. Surveyed the Sunapee canal route and feeders; length 60 miles.

8. Surveyed the Oliverian canal route to the Winnipiseogee; about 50 miles.

9. Surveyed the Dover canal route, which, with the feeder and variety of the line, included about 40 miles.

10. Surveyed the Pasumpsic route and feeders; about 60 miles.

11. The Rutland route, feeders, and varieties in the line; 35 miles.

A topographical brigade is now engaged in making examinations relative to a route for a road between this city and Buffalo. They will be completed in the course of three or four weeks, and the result will be ready to be acted upon, if desired, in the course of the winter.

A brigade, under the direction of a civil engineer, has completed a survey of a canal route to connect the basin of Baltimore with the line of the Chesapeake and Ohio canal, and is now engaged in an examination to ascertain the practicability of connecting therewith a line from Annapolis.

A civil engineer made an examination last winter to determine whether the Juniata river could be connected with the Wills' creek and Castleman river route of the Chesapeake and Ohio canal, and his report thereof was transmitted to the House of Representatives in April last.

A topographical brigade made last winter the surveys and levelings requisite to ascertain the practicability, and, if practicable, the means, of carrying a feeder from the Deep creek to the Wills' creek summit level.

The same brigade examined and reported upon the several routes for a road to extend the Cumberland road to Washington city.

The same brigade has been employed in surveys relative to the connexion of the Kenhawa with the James and Roanoke rivers, and of the two last mentioned by canals or railways. The surveys relating to the route between the Kenhawa and James rivers have been nearly finished, and a preliminary examination of the Kenhawa and Roanoke route has been made.

The topographical brigade employed last year in surveys connected with a canal route between Pittsburg and the mouth of Elk creek, on Lake Erie, by the valleys of Big Beaver and Shenango rivers, and passing near to Conneaut lake, has, after surveying a number of experimental lines, completed a location for the canal along the route indicated, and also of a feeder from French creek to Conneaut lake. The surveys on this route have been far more minute than it has been customary heretofore for those for similar objects to be made. The location made is represented to be very satisfactory, although parts of it have been effected with extreme difficulty, on account of the broken nature and irregularity of the ground through which it was necessary to carry it.

The same brigade was required to survey a route for a canal from Pittsburg, along the valleys of Alleghany river and French creek, to Conneaut lake. It was also required to make the examinations necessary for determining upon a route for a road from the Black Swamp road to Gadiz, in Ohio, and its extension thence by a route to Wheeling, and another to Washington, in Pennsylvania, and also for determining upon a route for a road from the Black Swamp road, through Wooster, Canton, New Lisbon, and Beavertown, to Pittsburg; the examinations required to be made, as has been stated, being in accordance with the views of the Committee on Roads and Canals of the House of Representatives, as set forth in their report of the 15th of May last, which was made in pursuance of resolutions of the House of the 16th of January and the 26th of April last.

The examinations relative to the routes for the roads above stated have been commenced, but whether anything has been done in relation to the canal route from Pittsburg, along Alleghany river and French creek to Conneaut lake, is not known. In a report received some since it was stated that a general examination of 20 or 30 miles of the route would probably be made during the month of October; reports subsequently received, however, do not state that this examination had been commenced, and it is therefore presumed it has not been commenced.

A brigade, under the direction of a civil engineer, was assigned to the execution of surveys in Indiana, with a view to the fulfilment of the following objects:

1. The connexion, by canals, of the waters of Lake Michigan with those of the Wabash by the St. Joseph of the lake, Kankakee and Tippecanoe rivers, and by the St. Joseph and Little rivers.

2. Uniting, by canals, the Wabash with White river by Mississinewa river and by the Ponceaui-cheaux river.

3. Uniting, by canals, the St. Mary's, St. Joseph, and Wabash rivers with the Ohio river, through the valley of White Water river.

4. Overcoming the obstruction presented by the Falls of Ohio by a canal on the Indiana side of the river.

Of the surveys relating to the above specified objects those connected with the third stated have been commenced, and it is expected will be completed this season, although their progress has been much retarded by the sickness with which nearly the whole brigade was afflicted during a great part of the summer, and which proved fatal to the civil engineer. Since his death the operations have been conducted by the principal assistant, who is believed to be in every respect qualified for that duty.

On the completion of the third the attention of the brigade will be directed to the fourth object stated, and, if practicable, to commence it this season.

The western route of the national road between the seat of government and New Orleans was examined last winter by a topographical brigade.

Orders have recently been given for surveys to be made at the mouths of Black river and Conneaut creek, on Lake Erie, and, should the weather permit, they will be made this season.

All of the surveys which have been prosecuted this year under the act of the 30th of April, 1824, are comprised in the foregoing statement.

The survey of a part of the Island of Nantucket, which was commenced at a late period last year, was completed in a satisfactory manner in the early part of this season.

Under the act of the 24th of May, 1824, to improve the navigation of the Ohio and Mississippi rivers, an experiment for the removal of a sand bar near Henderson was commenced in 1824, and was completed last year. The removal of the bar has been effected, but it has not been deemed expedient to make the second experiment authorized by the act until a sufficient time shall have elapsed to test the permanency of the results produced by the first experiment.

Under the same act a contract was made in 1824 for the removal of all snags, sawyers, planters, and other obstructions of that kind which impede the navigation of the Ohio and Mississippi rivers. In the annual report of last year it was stated that the officer appointed to superintend the execution of the contract had reported its faithful execution in relation to that part of the Ohio river between Pittsburg and Louisville. About the close of the year, however, representations were made to the War Department from highly respectable persons that the work which had been done was not calculated to fulfil the object for which it was designed. An officer of engineers was immediately despatched to examine the river. His report fully sustained the representations which had been made as above stated, and the officer to whom the superintendence of the contract had been confided was put in arrest. Another officer was appointed to succeed him, and was directed to exact a rigid compliance with the terms of the contract. The operations of the contract were at this time suspended, the water being too high to admit of their being carried on. Before they were resumed a citizen of Kentucky was recommended by a number of the delegates from the western States as being highly qualified to superintend the execution of the contract, and, as the services of the officer then acting as superintendent were much wanted for other duties, he was appointed, and furnished with full instructions calculated to remove any existing difficulty and prevent its recurrence. Under his superintendence the operations of the contract have been extended to the mouth of the Ohio river. They were there suspended, in consequence of the height to which the waters had risen, and the superintendent and contractor set out to return to their respective homes in Kentucky. Intelligence has recently been received that the former, who had been extremely ill during the summer, experienced a relapse while on his journey towards his home, which occasioned his death. His principal assistant has been temporarily invested with the superintendency of the contract until a permanent arrangement on the subject shall be made.

Under the act of the 26th of May, 1824, for deepening the channel leading into the harbor of Presque Isle, and for the repair of Plymouth beach, those operations have been successfully prosecuted, and are now nearly completed.

The work done at Presque Isle during this year has increased the depth of the bar it is intended to remove to five feet, and it is now confidently expected the depth will be increased to nine or ten feet when the south pier shall be finished and the south dike joined to it. These objects will be effected early in the ensuing year. During this year a good deal of work has been done to the south dike, and more is required to be done; and as it had been understood the funds requisite to defray the expense thereof would be furnished by the State of Pennsylvania, and consequently no provision for the same had been made in the estimate upon which the appropriation to complete the work had been founded, it has become necessary to ask for an appropriation of \$2,000 for that purpose. The work done has been executed in a manner highly creditable to the superintending officer.

The repair of Plymouth beach has progressed in a satisfactory manner during the present year. The results produced fully sustain the favorable anticipations of last year. Not a doubt now exists in regard to the adequacy of the work, when completed, to fulfil its destination. The work will be finished next year. The works have been conducted efficiently and with great economy.

The act of the 26th of May, 1824, to authorize the surveying and making of a road from a point in the northwestern boundary of the State of Ohio, near the foot of the rapids of the Miami of Lake Erie, to Detroit, in the Territory of Michigan, having been partially executed, was at the close of the last year committed to the Engineer department for fulfilment. A report exhibiting the condition of the road at that time was made to the House of Representatives on the — of January last. The report was accompanied by a statement of the contracts which had been entered into for the construction of the road to such extent as the sum applicable to that object would allow of. The period for the completion of those contracts expired in June last. At that time very few, if any, of the contracts had been fully executed, although all of them were nearly so. Further time was allowed for completing them, but whether or not they have been completed is not known, no report on the subject having been recently received. If they have not been, they doubtless will be completed in a short time.

The act of the 3d of March, 1825, for the continuation of the Cumberland road contemplates the construction of a road from Canton to Zanesville, and the examination and survey of a route for the extension of the same from Zanesville to the permanent seat of government of the State of Missouri, passing through the capitals of the States of Ohio, Indiana, and Illinois.

With a view to the construction of the road from Canton to Zanesville, contracts were entered into last year for the execution of the grading, the masonry of the bridges, culverts, &c., and two layers, each of the thickness of three inches, of the pavement of stone, reduced to the small size, upon the McAdam

plan, for the distance of 28 miles and 88 poles, extending from Canton to Fairview; and, in the course of this year, a good deal of the grading and masonry was completed. The same contracts have been prosecuted during the present year, and will probably be completed before it expires. They embrace three divisions—the whole distance from Canton to Zanesville having been laid off into seven divisions, and each division into sections of lengths adapted to the probable cost of constructing the road upon them with a view to having the cost of each nearly the same, and sufficiently limited to admit of their being respectively embraced by a single contract for each of the several kinds of work to be done upon them. The fourth and fifth divisions, extending from Fairview to Cambridge, and the second, third, fourth, and fifth sections of the sixth division have been put under contract this year for the grading and masonry required for them. The distance put under contract this year, as above stated, exceeds 23½ miles.

Between Canton and Fairview the new road, in some places, occupies the site of the old road, and in other places the effect of its construction has been to produce injuries to the old road which must render it unfit to be travelled upon during the ensuing winter. It will, therefore, be unavoidable to allow the new road to be travelled upon the ensuing winter at the places alluded to; and as it may be doubted if, upon a soil recently formed, a pavement of the thickness of six inches, recently laid, will have acquired the requisite solidity to sustain at that season, without experiencing injury, the travelling of heavy carriages upon it, an additional layer, of the thickness of three inches, has been authorized to be put upon the pavement, and contracts have been made for the accomplishment of this object without delay. The distance to receive the additional layer of stone, as above stated, will be about eight miles.

The fulfilment of existing contracts will absorb the amount available from existing appropriations, with the exception of about \$7,000, which have been reserved to cover extraordinary contingencies which may occur. Of the contracts entered into this year, those for masonry will probably be fulfilled in the course of next year; those for grading stipulate that the road shall be in a condition that will admit of its being travelled upon by the 12th of July next, and that it shall be left free to be travelled upon until the 1st of May following, when it is to be regraded and put in proper condition for the reception of the pavement. The report of a recent inspection of the road from Canton to Washington represents the location to be judicious, and the work, as far as it has progressed, to have been well executed and in due proportion to its cost.

The examination and survey of a route for the continuation of the road beyond Zanesville were extended last year from Zanesville to Columbus. During the early part of this season the commissioner was occupied in the re-examination and survey of the route from Fairview to Zanesville, and the final location of the same. The location made has been very eligible. The distance is 44 miles and 272 poles, which is nearly three-fourths of a mile shorter than the location originally made, and the distance of extreme grade is only 9 miles and 192 poles, while in the original location it was 16 miles and 82 poles.

The examination has been extended this year from Columbus to Indianapolis; it embraced the direct route and a route through Springfield, Richmond, and Centreville. It was also contemplated to examine a route through Dayton, Eaton, and Springfield. The survey of, and location upon, the direct route from Columbus to the State line, dividing Ohio and Indiana, will be made this year. The distance from Columbus to Indianapolis is estimated at 167 miles.

The condition of the old Cumberland road having attracted the attention of Congress at the last session, orders were given to an officer of this department, who had occasion to pass over it lately, while proceeding to the execution of other duties, to make such an inspection of it as would be practicable in travelling along over it in the stage. He has reported it to be in very bad condition, and particularly that part of it between Cumberland and Uniontown. The superstratum or top dressing of small stone, which was originally of the thickness of six inches, has almost entirely disappeared, which is accounted for by the supposition that it had been washed off the road during heavy rains, after having been gradually pulverized, or displaced by the heavy wagons which passed over it. It is also supposed the hard foundation of large stones upon which it rested, by divesting it of elasticity, or the capacity of yielding to, and thereby neutralizing the effect of the heavy wagons passing over it, was the chief cause of its destruction. The large stones composing the substratum or foundation are generally disunited, in many places displaced, and frequently lying loose on the top of the road. The consequence is that the surface of the road is extremely rough, and the travelling upon it inconvenient for slow draught, and dangerous for swift draught carriages. The opportunities afforded of observing the condition of the masonry of the bridges, culverts, &c., were not such as to admit of an accurate opinion being formed in relation to it. The graduation, as far as it could be judged of, was considered objectionable in several places where the extreme grade appeared to be greater than five degrees. The route of the road is very direct, and it is therefore inferred the location is very advantageous, but whether it is the most eligible that might have been made could be determined only by comparing it with such others as may be practicable. The only part of it which attracted notice as being otherwise than eligible was in the immediate vicinity of Wheeling, where, at a steep grade, it is carried over a hill. It was understood that it might have been carried round the hill at a level, or nearly so; and that, although the distance upon the location around the hill would have been greater, the time required to travel it would have been less; and, moreover, that the expense of construction would not have been so great.

The commissioners appointed under the act of the 3d of March, 1825, to authorize the surveying and opening of a road from Detroit to Chicago, in the State of Illinois, have effected those objects, and furnished their report relative thereto.

The commissioners appointed under the act of the same date as that above stated, to authorize the surveying and making a road from Little Rock to Cantonment Gibson, in the Territory of Arkansas, have completed the duties assigned them, and reported the result.

The commissioners appointed under the act also of the same date as the two above-mentioned, to authorize the President of the United States to cause a road to be marked out from the western frontier of Missouri to the confines of New Mexico, are understood to have accomplished the object for which they were appointed, but no report has yet been received from them.

Under the act of the 3d of March last, for the survey of a route for uniting, by a canal, the Atlantic ocean with the Gulf of Mexico, across the peninsula of Florida, a topographical brigade, divided into two parties, has been employed this year. Instructions for carrying into effect the objects of this act were furnished in March last, but the brigade did not reach St. Augustine until about the middle of June, in consequence of unavoidable delays which were experienced in the procurement of suitable instruments, and in the completion of other requisite arrangements. The division of the brigade into two parties was

made on its arrival at St. Augustine, and one of the parties was despatched to the Gulf of Mexico. The two parties have been employed in making such surveys along the coasts of the Atlantic and the Gulf of Mexico as were required for ascertaining the points on each coast which would answer as outlets for the canal. No report of recent date has been received from either party; but it is believed, from the progress made in those surveys at the date of the last report received, that they have been completed, and that the parties, in pursuance of the plan of operations laid down in the instructions, are now prosecuting the surveys across the peninsula.

The act of the 20th of May last, for improving certain harbors and the navigation of certain rivers and creeks, and for authorizing surveys to be made of certain bays, sounds, and rivers therein mentioned, was, in the month of June last, committed to the Engineer department to be carried into effect. The act comprehends twenty-three distinct objects. At the time it was committed to the Engineer department all the engineers under its direction were employed in duties connected with other objects, the fulfilment of which could not be relinquished or postponed without detriment to the public interests. Notwithstanding this difficulty, it was determined to employ the United States engineers as far as practicable in the accomplishment of the several objects specified in the act, and to resort to such other means as could be procured for the fulfilment of such of them as could not be attended to by the engineers. Arrangements were made accordingly, without delay, and the following is a statement of their results:

Steel's ledge, near the harbor of Belfast, in Maine, having been examined, it was ascertained the pier required to be built upon it could not be completed this year before the approach of the inclement season, during which it would be difficult, if not impracticable, to carry on the work. It was therefore determined to postpone its commencement until next year, and during the ensuing winter to collect the necessary materials, which it is understood may be procured on better terms during the winter than at any other season. The progress of the work will be facilitated by the efficient aid of the collector of Belfast, which has been politely offered.

An experienced engineer was directed to ascertain what measures were necessary to be adopted for the preservation of the point of land forming Provincetown harbor, to employ a person competent to superintend their fulfilment, and to furnish him with instructions for that purpose. Having failed to procure a superintendent, and conceiving the most important part of the work to be done was to arrest the drifting of the sand by the transplantation of beach grass at the points where its further progress might be attended with injury, which could be effected in the spring of the year only, he suggested the propriety of postponing further measures until next year, and in the meantime, if necessary, to procure from the State of Massachusetts suitable legislative provisions to prevent depredations by cattle or otherwise upon the grounds to be protected.

A topographical brigade has been assigned to the execution of the surveys required to be made at Pisquataqua river, of the harbor of Edgartown, of the bar at the mouth of Merrimack river, of the harbor of Hyannis, and of Saugatuck river and harbor. At the date of the report last received two of these surveys had been completed, a third nearly so, and preparations for commencing a fourth in readiness; the remaining one, that at Saugatuck, would, it was expected, be commenced and completed in the course of this month.

At the particular desire of the citizens of Buffalo, a civil engineer, who had been employed on the Erie canal, was appointed to superintend the building of the new pier and repairing the old one at the mouth of Buffalo creek. He submitted plans for the accomplishment of those objects, which were approved, and, being authorized thereto, he entered into a contract for carrying them into effect, which is now in the process of execution, and will be completed next year.

Negotiations are now pending for procuring by contract a dredging machine, to be applied to clearing out and deepening the harbor of Sackett's Harbor.

The survey of Oswego bay and harbor has been completed.

The engineer of Fort Delaware, in pursuance of instructions, has furnished a plan for the piers required to be built in the river Delaware, at New Castle. The sum estimated to be necessary for its fulfilment is greater than the sum appropriated for that purpose. The place is designed as well to afford shelter to vessels from floating ice and storms as to produce a greater depth around the old piers, by diverting from its regular course the current of the river and causing it to act against the alluvial deposit, by the accumulation of which around the old piers the depth at them has been progressively diminished. A partial completion of the plan would fulfil the first object, should its extent be adequate to the accommodation of the number of vessels which may require the shelter it would be designed to afford, but its entire completion is supposed to be necessary to effect the second object stated. It is possible, however, that both objects may be fulfilled by a partial completion of the plan to the extent the appropriation would authorize. The mode proposed for the construction of the piers has therefore been adapted to this possible event. The whole length of each pier, 150 feet, instead of being constructed continuously, is intended to be composed of a series of blocks, each 25 feet in length, to be laid in succession and connected after being laid. Thus the plan is susceptible of curtailment or enlargement without impairing its efficiency.

It is suggested that the repair of the old piers be postponed until it shall be ascertained whether the new piers will produce the effect anticipated, of deepening the water around them.

The survey required to be made of the public piers at Chester, on the Delaware, has been completed.

The engineer at Presque Isle, under general instructions from the Engineer department, furnished plans and estimates for the works authorized for the removal of obstructions at the mouth of Grand river, Ashtabula creek, Cunningham creek, and Huron river on Lake Erie, and has also furnished particular instructions for carrying them on under the immediate superintendence of citizens of respectability and suitable qualifications, who have been engaged for that purpose. Contracts have been made for procuring the requisite supplies of materials, and the construction of the several works is going on and will be completed in the course of next year.

An officer detached from the topographical brigade employed on the canal route between the Ohio and Lake Erie has, under instructions from the chief of that brigade, completed the survey of La Plaisance bay, and is now engaged in the survey of Sandusky bay.

The surveys required to be made in North Carolina of the swash in Pamlico sound, near Ocracoke inlet, of Cape Fear river below the town of Wilmington, and of Roanoke inlet and sound, will be commenced by a topographical brigade already warned for that purpose as soon as it shall be disengaged from other duties upon which it is now occupied. It had been expected the brigade alluded to would have been ready to have commenced those surveys early in last month, and it is understood that expectation would

have been realized but for the sickness of some of the officers attached to it, which retarded the progress of the work upon which it has been engaged. The departure of the brigade for North Carolina will take place certainly within a fortnight.

The senior engineer on the Gulf of Mexico, and the engineer at Mobile point, were instructed to ascertain the nature and extent of the obstructions at the harbor of Mobile, and the means best calculated for removing them, and for deepening the harbor; and to report the result and furnish a plan and estimate for effecting those objects. The former had been prevented by sickness from engaging in that duty, but at the date of the last report from him his health was nearly re-established, and he was preparing to join the latter, who, having already commenced, will have completed the requisite preliminary surveys by the time the other will probably have joined him; and their joint report may therefore be shortly expected.

The Military Academy has progressed in a very satisfactory manner during this year. The board of visitors who attended the annual examination in June last have made a report, in which the most favorable representations are contained respecting the condition of the academy at that time and its progress during the year preceding. Their report, among other suggestions for the improvement of the institution, renews the recommendation which had been made on previous occasions relative to the introduction of the cavalry exercise as an additional branch of instruction. The report is transmitted herewith. There were forty-two cadets graduated in June last, and two hundred and forty-six were at the academy on the first of this month.

The remarks which concluded the annual report of last year relative to the inadequacy of the present numbers of the corps of engineers and the topographical engineers, to attend to the duties required to be performed under the direction of the Engineer department, have been very fully illustrated during this year, as will be perceived by the foregoing report. It is therefore greatly to be desired that the bill introduced in Congress at the last session for increasing those numbers may be passed at the ensuing session.

All which is respectfully submitted.

ALEX. MACOMB, *Major General, Chief of Engineers.*

HON. J. BARBOUR, *Secretary of War.*

GEO. BOMFORD, *Brevet Colonel, on Ordnance service.*ORDNANCE DEPARTMENT, *November 28, 1826.**Colonel Gratiot's report on the Dismal Swamp canal.*WASHINGTON, *August 2, 1826.*

SIR: In obedience to the instructions of the department assigning to me, as a member of the board of engineers, the duty of carrying into effect the third section of the act of Congress of the 18th of May last, in relation to the Dismal Swamp canal, I have the honor to report:

That it is my opinion that "the plan on which the canal is to be executed will answer as far as circumstances shall permit as a part of the chain of canals contemplated along the Atlantic coast, and that the sum authorized to be subscribed for will be sufficient to finish it according to said plan," with the additions recommended and hereinafter particularly described.

There were no regular plans relating to the canal in the possession of the canal company. The plans above alluded to are those which were necessarily prepared to illustrate the opinion required to be furnished in fulfilment of the third section of the law above stated. They are, however, adapted to the existing circumstances of the canal, and therefore may be considered as the regular plans of the canal.

The system of coastwise canal navigation is supposed to be understood as requiring a depth of eight feet. The board of engineers, in relation to the Chesapeake and Delaware and Delaware and Raritan canals, reported, as their opinion, that that depth was necessary. Their report was before Congress at the time the law under which this opinion is given was passed. It might be presumed, therefore, that the allusion in the law to the chain of canal navigation had reference to that depth. It is also to be presumed that it was the intention of Congress that the Dismal Swamp canal should be of that depth, if circumstances would permit. But it is also to be considered that the exhibit of the canal company, in which is stated what were the existing circumstances of the canal, and the papers published, (document No. 15 of the last session of Congress,) in which an opinion is expressed favorable to the adaptation of those circumstances to the continuation of the coastwise canal navigation, were also before Congress at the time it was passed. It is therefore to be inferred that the great importance, in a national point of view, of having a continuous coastwise navigation of a depth sufficient to accommodate the greatest draft of coasting vessels induced Congress to desire that all proper measures should be taken to determine with certainty whether

or not it would be practicable to secure this important facility to commerce to the extent desirable. But the paramount consideration was to secure the continuation of the navigation, not uniformly at the greatest depth, but at any depth which would fulfil the object contemplated. Hence it is presumed that the board of engineers, which had expressed opinions in relation to the other canals mentioned, were required to express their opinion in this case.

It is manifest from the state of the facts before Congress that the continuation of the canal with the greater depth stated was hardly expected. It is therefore unnecessary to enter into any details to sustain the opinion which has been hereinbefore given in relation to the adaptation of the plan to the existing circumstances, which are known to be the obstructions of the navigation of the sounds and inlets of North Carolina. The nature of these obstructions have been fully exhibited in the reports on the subject which have been presented to Congress and published. The only question to be considered was whether they were susceptible of improvement, and if so, in what degree. This circumstance has not been overlooked. From the best information which could be obtained it appears entirely doubtful if those waters are susceptible of any improvement whatever. As far as facts are known, the conclusion would be warranted that they are not susceptible of improvement.

In recommending the plan submitted herewith, it is proper to state that it has been adapted to existing circumstances. The permanent locks already finished, and which form a large item in the cost of the canal, were necessarily made the standard to which other circumstances were adapted. In this adaptation it would have been desirable that the width of the canal at the water-line could uniformly have been about forty-eight feet, that width being necessary to afford vessels of the greatest breadth that could be carried through the locks room to pass each other freely. But it was found that the canal company had made arrangements for facilitating the passage of vessels by the establishment of recesses at convenient distances. This mode, though inferior to the other, has been accepted, because it is believed it will afford facilities adequate to the existing occasions, and at the same time will conform with the views of the company.

It is unnecessary to enter into minute detail of the several objects to which the appropriation is intended to be applied or of the manner of making the application. The estimate herewith will furnish very sufficiently the information in relation to the former, and the plans will exhibit distinctly the mode of effecting the latter. It may be proper, however, to remark that the estimate conforms with the estimate appended to the exhibit of the canal company, which was addressed to and laid before Congress, with the exception only of the amounts referring to the several objects being less than those stated in that estimate, and of the excavations of the canal and the establishment of an additional lock being provided for by the amounts arising from the reduction of the several amounts as alluded to. It may, however, be proper, as these objects are new, to describe them, and to state the circumstances which have led to their adoption. With respect to the deepening of the canal, it is sufficient to refer to the plan to explain the necessity for and the manner of effecting it. The additional lock is required to raise the water in Deep creek, so as to insure a continuous navigation during all stages of the tide, which does not exist at this time and could not be secured without it.

The drawings submitted herewith consist of two sheets, one of them exhibiting the topography of the country, the outlines of the canal, and longitudinal sections thereof as now existing and as contemplated to be finished, and the other transverse sections, exhibiting every part of the canal where there is a difference in the dimensions, together with the appearance at this time and what it will be when completed; also a table consolidating the particulars of the several sections presented.

The papers accompanying are a general estimate, and a particular estimate of the details of the additional lock.

Respectfully submitted,

C. GRATIOT,

*Lieutenant Colonel of Engineers and member of the Board of Engineers.*

Major General ALEXANDER MACOMB, *Chief Engineer.*

	150,000 00

DEPARTMENT OF WAR, August 8, 1826.

SIR: Lieutenant Colonel Gratiot, of the corps of engineers, as a member of the board of engineers, has examined the Dismal Swamp canal, and reported in writing, through the Engineer department, as required by the 3d section of the act of Congress, passed the 18th day of May last, entitled "An act for the subscription of stock in the Dismal Swamp Canal Company," "that the place on which the canal is to be executed will answer, as far as circumstances shall permit, as a part of the chain of canals contemplated along the Atlantic coast, and that the sum authorized to be subscribed for will be sufficient to finish it according to said plan."

A copy of the report, dated the 2d instant, and a copy of the original estimate which accompanied it, are transmitted herewith, in compliance with the intention of the act aforesaid, not expressed, but distinctly to be implied.

The drawings accompanying the report are deposited in the Engineer department. If you desire it, they will be sent to you for inspection.

I have the honor, &c.,

JAMES BARBOUR.

Hon. R. RUSH, *Secretary of the Treasury.*

GEORGE TICKNOR, *Secretary.*

A.

WEST POINT, *New York*, June 24, 1826.

SIR: I have the honor to enclose herewith a report of the board of visitors requested to attend the examination of the cadets at West Point Military Academy, in the present month.

With much respect, I have the honor to be, your obedient servant,

SAMUEL HOUSTON, *President of the Board.*

HON. JAMES BARBOUR, *Secretary of War.*

WAR DEPARTMENT, *November 13, 1826.*

SIR: I was duly honored with your letter of the 24th of June last, enclosing the report of the board of visitors on the last general examination of the Military Academy, and I have taken time to read it in all its parts.

The time and pains bestowed by the board in listening to the recitations of all the classes of cadets, while under examination, in the various branches of scholastic instruction; in witnessing their military exercises; and in inspecting and examining into the organization, administration, and police of the Military Academy, in all its departments, afforded the completest opportunity of forming its report; and it is very satisfactory to learn, from so intelligent and competent a source, the high condition in which that institution appeared at the examination. The department is under great obligations to you and to the gentlemen associated with you in the laborious duty you have gratuitously undertaken at its request; and I would respectfully ask leave to communicate to you, and through you to the other members of the board, the satisfaction which your report has given.

I am, very respectfully, sir, your obedient servant,

JAMES BARBOUR.

General S. HOUSTON.

B.

*Journal of the board of visitors of the United States Military Academy at West Point, June, 1826.*

UNITED STATES MILITARY ACADEMY, *West Point, June 5, 1826.*

The board of visitors appointed by the War Department to attend the examination of the cadets in the Military Academy at West Point, to begin this day, assembled at 10 a. m. Present: General Samuel Houston, of Tennessee; Amos Lane, esq., of Indiana; Hon. Joseph M. White, of Florida; Professor James F. Dana, of New Hampshire; Commodore Bainbridge, of the navy; Commodore Chauncey, of the navy; Commodore Jones, of the navy; James Dean, esq., of Vermont; and George Ticknor, esq., of Massachusetts.

The board having been called to order by Commodore Bainbridge, the oldest member present, and no president to it having been appointed by the Secretary of War, General Houston, of Tennessee, was unanimously chosen president, and George Ticknor, esq., of Massachusetts, was unanimously chosen secretary.

Immediately after its organization, the board proceeded to the examination of the cadets, beginning with the third section of the first class, consisting of thirteen cadets, who were examined by Lieutenant Bache in different branches of civil engineering, viz: canals, bridges, architecture, carpentry, and stone cutting, until 1 p. m., when the board adjourned. At half-past 3 the board assembled again, and the examination of the same section was further continued in different subjects of civil engineering, viz: the construction of seaports, locks, bridges, and tunnels, until half-past 5, when the examination of the second section of the same class was begun by Lieutenant Mahan, in civil engineering, viz: roads, bridges, dams, masonry, and mortars. This section consisted of fourteen cadets, and its examination was continued until 7 o'clock, when the board adjourned.

JUNE 6.—*Forenoon.* The board met at 8 o'clock. His excellency Governor Morrow, of Ohio; Hon. Mr. Pearce, of Rhode Island; Thomas Kennedy, esq., of Maryland; Dr. James Blythe, of Kentucky, and Colonel C. C. Biddle, of Pennsylvania, appeared and took their seats as members. The examination of the second section of the first class, by Lieutenant Mahan, was continued in civil engineering, viz: canals, roads, and bridges, until half-past 10 o'clock, when the first section of the same class, consisting of thirteen cadets, was examined by Professor Douglass, in military engineering, until 1 o'clock, when the board adjourned.

*Afternoon.* The board met at half-past 3, and the examination of the same section was continued, as before, on military engineering until 6 o'clock, when the board went to the library and examined the drawings of all the cadets of the second and third classes, until 7 o'clock, when the board adjourned.

JUNE 7.—*Forenoon.* The board met at 8 o'clock. Commodores Bainbridge, Chauncey, and Jones, having left West Point, the second section of the first class, consisting of twenty-one cadets, was examined in political economy and the Constitution of the United States until 11 o'clock, by Lieutenant Bowman, and from 11 o'clock till 1 o'clock on rhetoric and grammar.

*Afternoon.* The board met at 3 o'clock, and the first section of the first class was examined in the same studies throughout, by Rev. C. P. McIlvaine, twenty cadets being present, until 7 p. m., when the board adjourned. J. K. Kane, esq., of Pennsylvania, appeared this afternoon and took his seat as a member.

JUNE 8.—*Forenoon.* Board met at 8 o'clock. The third section of the first class, fourteen cadets present, was examined by Lieutenant Bache in military engineering until half-past twelve, when the board adjourned.

*Afternoon.* Met at 3 p. m. Professor Dana was absent, having left West Point. Lieutenant Mahan examined the second section of the first class, fourteen cadets present, in military engineering until seven o'clock, when the board adjourned.

JUNE 9.—*Forenoon.* Met at 8 o'clock. Professor Douglass examined the first section of the first class in civil engineering, thirteen cadets present, until past 1 o'clock.

*Afternoon.* Board met at 3 o'clock. The Hon. Mr. White, of Florida, was absent, having left West Point. Professor Douglass examined the same section in military engineering until past seven o'clock, when the board adjourned.

*Evening, half-past 8 o'clock.* The board met by special notification from the chair, to consider what business would come before it other than the mere examination of the cadets; when, on motion of Rev. Dr. Blythe, it was

*Voted,* That \_\_\_\_\_ be a committee to consider what business may properly come before this board at its present session, and to report thereon.

The blank was filled by nomination from the chair with the names of Messrs. Ticknor, Kane, and Lane; after which the board adjourned.

JUNE 10.—*Forenoon.* Met at 8 o'clock. Professor Dana present, having returned to West Point. The first section of the second class, fourteen cadets present, was examined by Professor Mansfield in natural philosophy until 1 o'clock, when the board adjourned; and having *met again at three*, the same examination of the same section was continued until half-past six. Mr. Kane took leave of the board for a short absence.

JUNE 12.—*Forenoon.* The board met at 8 o'clock. Colonel White again took his seat. The examination of the second section of the second class in natural philosophy, fourteen cadets present, was begun by Captain Smith and continued until 1 o'clock.

*Afternoon.* At 3 o'clock the board met and resumed the examination of the same section, which was completed at half-past six.

*Evening.* The board met at half-past 8, in pursuance of special notice from the chair. Present, all the members on the Point, including Mr. Kane, who returned this evening.

The records being read, a letter was communicated to the board by the president, covering sundry resolutions of the academic staff, directing all information concerning the state and wants of the academy to be communicated officially by the superintendent to the board.

Mr. Ticknor, from the committee appointed June 9 to consider what business may properly come before this board, reported the three following resolutions:

1. That \_\_\_\_\_ be a committee on the practical military instruction and on the discipline and police of this academy, with directions to report on the condition of each, and on such changes as they may think desirable.

2. That \_\_\_\_\_ be a committee on the state of general instruction in this academy, its means and results, with directions to report on the whole subject, and suggest such changes as they may think desirable.

3. That \_\_\_\_\_ be a committee on the general civil economy of this academy, with directions to report on its condition, and on such changes as they may think desirable.

Each of the above resolutions having been separately discussed and unanimously adopted, it was ordered, on motion of Mr. Pearce, that the committee on the first consist of three, that on the second of five, and that on the third of three persons, and that the nominations be made from the chair.

The president gave notice that he would announce the several committees to-morrow.

The Hon. Mr. White having moved the following resolution:

*Resolved,* That the president of this board be requested to deliver an address to the cadets of this institution, or to appoint some one of the visitors to perform that duty;

Mr. Kennedy moved to strike out all the words after the words "this institution," which motion being lost, the original resolution was unanimously adopted.

Whereupon the board adjourned.

JUNE 13.—*Forenoon.* The board met at 8 a. m. Colonel Biddle was absent having left West Point. Governor Holmes appeared and took his seat as a member. The examination was of the second class, third section, sixteen cadets present, by Lieutenant Parrott, in natural philosophy, and was continued until 1 o'clock; after which the board remained in session, and the president made the following nominations of committees under the three resolutions passed last evening, viz:

1. *Committee on practical military instruction and on discipline and police.*—Colonel Lane, Governor Holmes, and the Hon. D. J. Pearce.

2. *Committee on general instruction.*—Mr. Ticknor, (secretary of the board,) Mr. Kane, Mr. Deane, Professor Dana, and Colonel Biddle.

3. *Committee on the general civil economy.*—Colonel White, Governor Morrow, and Mr. Kennedy.

The nominations being made, the board adjourned.

*Afternoon.* The board met at 3 p. m. The examination of the third section of the second class was continued, as in the morning, until 4 p. m., when the first section of the third class, 12 cadets present, was examined by Professor Davies in shades, shadows, and perspective, and in spherical projections, until 7 o'clock, when the board adjourned.

JUNE 14.—*Forenoon.* The board met at 8 o'clock. Mr. Markley, of Pennsylvania, appeared and took

his seat as a member, and Commodore Chauncey returned. The first section of the third class was still under examination, by Professor Davies, in shades, shadows, and perspective, in spherical projections, differential and integral calculus, and analytical geometry, until 1 o'clock, when the board adjourned.

*Afternoon.* Met at 3 o'clock. Second section of the same class, 19 cadets present, was examined in the same subjects by Lieutenant Greene until 7 o'clock, when the board adjourned.

JUNE 15.—*Forenoon.* Met at 8 a. m. Mr. Pearce, of Rhode Island, was absent, having left West Point, and Colonel Totten appeared and took his seat. The examination of the second section of the third class was continued as before by Professor Davies until 10 o'clock, when the third section of the same class, 16 cadets present, was examined in the same subjects by Professor Davies and Lieutenant Greene until 1 o'clock, when the board adjourned.

*Afternoon.* The board visited the laboratory, and saw the members of the first class engaged in preparing cartridges of all kinds, shells, carcasses, fuses, &c.; after which the same class gave specimens of skill in target firing's and throwings shells and signal rockets.

JUNE 16.—*Forenoon.* Met at 8 a. m. The examination of the third section of the second class was continued by Professor Davies and Cadet Cramm until 1 o'clock, when it was completed, and the board adjourned.

*Afternoon.* Met at 3 o'clock. General Houston and Mr. White were absent, having left West Point for a short time. The first and second sections of the second class were examined in chemistry, 22 cadets present, until 7 o'clock, when the board adjourned.

Colonel Totten was placed on the committee for military instruction.

JUNE 17.—*Forenoon.* The board met at 8 a. m., and Mr. Pearce, of Rhode Island, returned and took his seat. The third and fourth sections of the second class, 20 cadets present, were examined by Professor Torrey in chemistry until 11 o'clock, when the first and second sections of the first class were examined by him in mineralogy until 1 o'clock, 21 cadets being present.

*Afternoon.* Met at 3 o'clock. The same sections were under examination until half-past 4 o'clock; after which the third and fourth sections were examined by Professor Torrey on the same subjects till 7 o'clock, when the board adjourned.

JUNE 19.—*Forenoon.* The board met at 8 a. m. General Houston returned, and Mr. Markley was absent. The first and second sections of the first class, 18 cadets present, were examined by Major Worth in tactics until 11 o'clock; after which the third and fourth sections, 21 cadets present, were examined until 1 o'clock, and the board adjourned.

*Afternoon.* The board met at 3 o'clock. Mr. Kennedy was absent, having left West Point. The same sections were under examination until half-past 4 o'clock, when the first and second sections of the third class, 31 cadets present, were examined in French by Mr. Bérard until 6 o'clock; after which the board heard the report, in part, of the committee on instruction, and adjourned the further consideration of it till to-morrow evening.

JUNE 20.—*Forenoon.* Met at 8 a. m. Dr. Blythe and the Hon. Mr. Pearce were absent, having left West Point. The examination of the first and second sections of the third class was continued until half-past 9 o'clock, when the third and fourth sections, 20 cadets present, were examined by Mr. Bérard in French till 12 o'clock; after which the first section of class four was examined in mathematics until 1 o'clock, 24 cadets present.

*Afternoon.* The examination of the same section was continued by Lieutenant Ross and Professor Davies until 7 o'clock.

*Evening.* The board met for business, the report, by Mr. Ticknor, of the committee on instruction being still under consideration. Colonel White returned and took his seat at the board.

On motion of Colonel White, it was

1. *Voted*, That the report made by this board to the Department of War be a joint report.
2. That this report be prepared by a committee of five, to be nominated by the president.
3. That the report of the committee on instruction be accepted, and referred to the same committee of five when appointed.

On motion of Mr. Kane, it was

*Voted*, That the same committee consider the expediency of recommending to the Secretary of War the advantage of giving the board of visitors hereafter more definite instructions. Adjourned.

JUNE 21.—*Forenoon.* Met at 8 o'clock. The president announced the committee on forming the joint report to consist of Mr. Ticknor, Colonel White, Mr. Kane, Professor Dana, and Colonel Totten. The examination of the first section of the fourth class was continued by Lieutenant Ross until 11 o'clock; after which the second section, 22 present, was examined by Cadet Bartlett in mathematics until 1 o'clock.

*Afternoon.* The examination of the same section by Cadet Bartlett was continued from 3 till 7 o'clock.

*Evening.* The board met for business. Colonel Totten, from the committee on military instruction, reported in part, and his report was accepted; after which the board adjourned.

JUNE 22.—*Forenoon.* The board met at 8 o'clock. Mr. Markley and Mr. Kennedy returned and took their seats at the board. The third section of the fourth class, 19 present, was examined in mathematics by Cadet Bryant and Lieutenant Ross until 1 o'clock.

*Noon.* The board met for business. Colonel White, from the committee on the civil economy of this institution, made a report, which was accepted. Colonel Totten, from the committee on military instruction and discipline, completed his report, which was accepted. Mr. Lane, from the same committee, made a report on the police of the institution, which was accepted.

A communication was received from the academic staff, desiring that a laboratory be recommended; which was accordingly voted.

The above reports and communications were then referred to the committee of five for forming the report of the board; and then the board adjourned.

*Afternoon.* The board met at 3 o'clock. Commodore Chauncey was absent, having left the Point. The fourth section of the fourth class, 20 present, was examined in mathematics by Cadet Twiss and Lieutenant Ross until 7 o'clock, when the board adjourned.

JUNE 23.—*Forenoon.* The board met at 8 o'clock. The examination of the same section was continued till half-past 9 o'clock; after which the first and second sections of the fourth class, 38 present, were examined in French by Mr. Bérard, until 1 o'clock, when the board adjourned.

*Afternoon.* The board met at 3 o'clock. The third and fourth sections of the fourth class, 31 present, were examined by Mr. Ducommun in French until 7 o'clock, when the board adjourned.

JUNE 24.—*Forenoon.* The board met at 8 o'clock. The fifth section of the fourth class, 18 present, was examined in French by Cadet Ridgely until 11 o'clock, when the examination was closed in all the classes and branches, having continued exactly three weeks.

At 11 o'clock the board met for business. Mr. Ticknor, from the committee to form a report to the War Department on the whole examination, read a report, which was unanimously accepted, and signed by all the members still at West Point, and, at the written request of Mr. Pearce, of Rhode Island, and with consent of the board, by Professor Dana, for Mr. Pearce.

At 12 o'clock the board attended an address delivered to the cadets by J. K. Kane, esq., at the request of the president.

At half-past twelve o'clock the board met by notification from the president; when, on motion of Mr. Ticknor, it was

*Voted unanimously,* That the thanks of the board be given to J. K. Kane, esq., for the beautiful and appropriate address by him just delivered to the cadets at the request of the president of the board, and that a copy be asked for publication.

On motion of Professor Dana,

*Voted,* That Mr. Ticknor be requested to communicate to Mr. Kane the thanks and wishes of the board.

After which, all the duties of the board being completed, it was dissolved.

A true record:

SAMUEL HOUSTON, *President of the Board.*

GEORGE TICKNOR, *Secretary.*

WEST POINT, June 24, 1826.

### C.

*Report of the committee on the general condition of the Military Academy, offering suggestions, &c., for its improvement.*

#### UNITED STATES MILITARY ACADEMY, WEST POINT.

The committee appointed by the board of visitors June 12, 1826, to consider the state of general instruction in this academy, its means and results, and suggest such changes as they may think desirable, beg leave to report:

That, in making the investigations required of them, it has been their purpose to ascertain what was the *object* proposed by the government in establishing the Military Academy here; what *means* have been provided to accomplish this object; how these means are *applied*; what *results* are obtained from them; and what *changes* are desirable. Under these several heads, therefore, they will now proceed to lay before the board whatever information they have collected, and whatever opinions they have formed.

I. The *OBJECT* of the government in establishing this academy was obviously to secure to the country the benefits of a *special school* where instruction should be given in every arm used in actual service. The academy here is therefore essentially a military academy, its organization is military, and its rules and arrangements are a part of the military institutes of the country. The instruction given under its provisions is in the art of war in its widest and most liberal interpretation, embracing the whole of civil engineering necessary to secure an easy communication by land and water between the different parts of a country, and a safe arrangement and construction of its ports. Whatever tends directly to secure this instruction in its best form is therefore essential to such an institution, and whatever else is taught here must be considered subordinate and subservient.

II. The *MEANS* of general instruction provided by the government to obtain these objects, are—

1. The *teachers.* Provision is made by law for a professor of natural and experimental philosophy, with an assistant; a professor of mathematics, with an assistant; a professor of engineering, with an assistant; a chaplain, who is professor of ethics; a teacher and assistant teacher of French; a teacher of drawing; and a sword master. But this provision has been found entirely insufficient for the purposes to be effected, and in consequence there are detailed from the regular army to act as teachers, one major, as instructor of tactics; a surgeon, to be professor of chemistry and mineralogy; nine lieutenants and six cadets, as extra assistants in the different departments before mentioned; and one lieutenant, as instructor of artillery; in all, twenty-eight instructors and teachers, all of whom are constantly employed in giving instructions, even during the period when the examinations are going on. 2. The remaining means provided by the government for general instruction are a library, a philosophical apparatus, and a chemical apparatus, each obviously incomplete and insufficient.

III. The *APPLICATION* OF THESE MEANS, under the rules of the Department of War, is left of course to the body of the teachers, and chiefly to the academic board, consisting of a superintendent and the head of each department of instruction; and here your committee would observe that they have found the practical management of the academy deserving of all praise.

The candidates for the warrant of a cadet who arrive here by permission from the Secretary of War in the month of June, annually, to the number of about one hundred, are examined and nearly all are accepted. During the first six months, however, they are merely on probation. Their studies at this time are in mathematics and French. In the mathematics they are at first arranged alphabetically, and in French according to their knowledge of that language and other languages, after which they are broken into sections of about twenty each and their instruction is forthwith begun. In the course of three weeks the more prominent in each branch are taken out to the number of about twenty and formed into a first section according to merit, and the same process is pursued as the talents and dispositions of the candidates are developed, until in seven or eight weeks the entire class has been broken into five or six sections according to merit, the arrangement of each section within itself being, however, still alphabetical. In the course of this period of probation the relative rank of the candidates is continually and materially changing, and they are transferred freely from section to section as their talents and characters

are determined. At the end of it a very strict examination takes place, at which about one-fourth of the class is found to have failed, and is consequently dismissed. The successful candidates are reported favorably to the Department of War, receive warrants as cadets, and are arranged by the result of their examination strictly according to merit, the alphabetical arrangement in the sections being now finally given up. From this time the strict order of merit is the only one known in the entire course; changes are constantly making in the relative rank of individuals; and twice in every year, in January and in June, a general and thorough examination of three weeks in length, at the rate of nine hours a day, is held, when the rank of every individual is settled anew and a roll of merit prepared, which after the annual examination in June is consolidated into a roll of aggregate merit and published. Those, however, who at the annual examination are found not to have satisfied the requisitions of the course, are dismissed if their failure be from idleness or incapacity, but permitted to repeat the course of the preceding year if their failure arise from unavoidable interruption in their studies, from want of years, from sickness, or from any similar cause; it being, however, understood that this indulgence can be granted only once.

A similar course is pursued during each of the four years, the order of merit being the basis of all instruction given; and the general result is that about one-half of all who enter the institution fail to obtain its final honors; that of all who do receive them about one-seventh have remained in it five years; and that the first section of a class, even after the class has been thus relieved of the incapable and the idle, still learns about one quarter more in the same branches than the last section. On this state of the case the committee wish to make a few remarks.

In the first place the *period of probation* seems to be a provision very important to the success of the institution. For it cannot be supposed that all who come here are fitted, either by their capacities, their dispositions, or their characters, to meet the reasonable demands of a special school where they are to be educated for a special public object; and the requisitions for a mere admission are so humble, and in branches of knowledge so common, that the first examination cannot possibly become a test of their final fitness for an education and purposes so peculiar. This second examination, therefore, your committee regard as the most important *single* provision in the arrangements and rules of the institution; and they have learned with great regret that a decision made under it by the academic board has in a recent instance been set aside by the Department of War, and every one of the fifteen candidates pronounced unfit to proceed continued at the institution. This, as your committee are informed, is the first instance on record of such an interposition on the part of the government, and they earnestly hope it may never be repeated, as it can have no other effect than to expend the public means on those who cannot be educated by them, to lower the standard of merit, bring the decisions of the academic board into disrepute with the cadets and the public, and gradually reduce the whole tone of the institution.

2. In the next place your committee would speak of the *merit roll*. Nothing, they conceive, can be more simple and efficient than the whole of its provisions, and nothing more fair; and through the manner in which they are carried into effect each cadet obtains rank in each branch of study he pursues exactly according to his proficiency, and this proficiency is determined by the weekly class reports of his instructors, by the examination of the academic board in January, and by the public examination in June. Each cadet has therefore a constant excitement to exertion, and is constantly in danger of falling back or losing what he had gained by the success of others. Moreover, this stimulus has a separate influence and operation in each branch of his studies. He is not discouraged by having his merits in all of them thrown into a general average. He is placed according to his progress in *each* branch, and therefore has an appropriate encouragement or censure for his rank in each. Nor is this a merely nominal provision. Of the forty-two members in the class about to be graduated not one stands at precisely the same height in the three departments of their studies during the year; one differs no less than twenty-six places; fourteen differ ten places and upwards; and, in general, the difference is four or five places. In the other classes the difference is still greater, because the characters and talents of their members are less settled. Of course, in all there is the most fair competition and the most honorable excitement, and the result obtained, after the long and patient examination in June and January, is satisfactory in nearly every instance to the cadets, and probably just in all.

3. In the last place, your committee would speak of the provision by which about one-seventh of those who are graduated in each class are permitted to remain five years at the academy. This, they conceive, is the only leniency in the administration of the existing rules that can be safely shown. Those who are unable to proceed in the course are cut off at the end of the probation; those who abuse the advantages offered them are sent away as offences are committed; and those who grow gradually more idle instead of more active fall at last to the bottom of their classes, and then resign or are removed. Still, there may be a few who from their youth, from sickness, or from unavoidable interruptions in their course are unable to make good at once the standing required of them. To these one more year is wisely given, and in most cases so improved as to place them in at least a respectable rank among their competitors.

Your committee have great pleasure in adding to this general statement their full conviction that these provisions and rules, which constitute what is most peculiar and valuable in the system of instruction in this academy, are carried into practical operation, and executed by its teachers with remarkable zeal, exactness, and efficiency, and that to this system and its efficient execution are to be attributed a thoroughness in the knowledge obtained by the cadets which the committee have not elsewhere witnessed, and an equality in the amount of their requisitions which it would not be possible in any other way to obtain.

IV. On the next head, that of the results gained to the public by the amount of instruction given here to the cadets educated by the country, the committee feel themselves bound, in justice to the teachers and to the proficiency shown in the examination room, to speak at large.

In the course of instruction the original object of the institution is kept distinctly in view, and as far fulfilled as the means afforded will permit. The principal and most important series of subjects pursued is mathematics, natural and experimental philosophy, and engineering, both civil and military. In mathematics there is taught: 1, algebra; 2, common and descriptive geometry; 3, plane and spherical analytical trigonometry; 4, shades, shadows, and linear perspective; 5, analytical geometry, embracing the construction of algebraical equations, the equations of points and lines in the planes of the two co-ordinate axes, the equation of the plane, the transformation of co-ordinates, polar co-ordinates, and polar equations, the equation of the surface of a cone and of the intersection of this surface by planes, the discussion of the properties of conic sections and their polar equations, and the discussion of equations of the second degree; 6, differential and integral calculus, embracing the *differentiation* of algebraical and

transcendental quantities, Taylor's and Maclaurin's theorems, the development of a function of two variables, the application of the calculus to the theory of curves in drawing tangents and normals and in determining asymptotes, its application to the maxima and minima of variable functions, and its further application in determining osculatrices, radii of curvature, and the discussion of evolutes and transcendental curves, the *integration* of monomials and binomials, rational and irrational fractions and binomials by series, the application of differential and integral calculus to the rectification of curves, quadratures, and cubatures, namely, to the rectification of the conic sections, the cycloid and spiral lines and the determining of their areas, to the determining the surfaces and solidities of the conoids, and the surface and solidity of the solid generated by the revolution of the cycloid about its base; 7, the orthographic and stereographic projections of the sphere; 8, surveying, including the use of the theodolite, compass, and plane table, and the measurement of heights and distances.

The number of teachers in this branch is now nine, and the amount of time given to it is six hours daily during the first two years. It forms the solid basis on which the reputation and usefulness of the academy rest, and on which, after the very thorough examination which has just been held, your committee have no doubt they may rest safely. The diagrams that were exhibited by each cadet were drawn with great accuracy and skill, and the demonstrations by each at the blackboard were, with very few exceptions, quickly, easily, and accurately performed. The committee remarked, however, with regret, that the third section of the third class was obviously less perfect than the others, and, on inquiry, found the cause to be that, during the past year, this section has been under the care of three different teachers, two of whom had been suddenly removed by the department for other duties, and thus changes thrice suddenly made in the modes of instruction. But in all other respects they feel confident very little remains to be desired in this branch of instruction.

The next branch of teaching is in natural philosophy: 1, problems on the motion of bodies from Newton's *Principia* and mechanics; 2, dynamics; 3, hydrostatics; 4, hydrodynamics; 5, pneumatics; 6, magnetism and electricity; 7, optics; and 8, astronomy.

This branch of instruction naturally follows mathematics. It begins where they are left, at the opening of the third year, and is continued through the whole of that year at the rate of five hours in every day, under the direction of three teachers. The committee fear that this is not enough, and that time must be taken, not indeed from mathematics and engineering, between which it stands, but from some of the subsidiary branches to increase it.

The examination, however, especially in the second and third sections, and the manuscripts exhibited by all the sections, left no doubt in the minds of the committee that the cadets had here, too, rightly improved all the means afforded them, and fulfilled all the requisitions that can reasonably be made upon them.

The last principal branch of teaching is engineering, comprehending architecture, civil engineering, and military engineering. Under the head of architecture is included the choice and preparation of materials, the elementary parts of buildings, the composition and distribution of buildings, and the art of construction. Under the head of civil engineering are comprehended roads, bridges, tunnelling, inland navigation, railroads, and artificial harbors and seaports. Under the head of military engineering are included field engineering, the science of war, and permanent fortifications.

To this branch five hours a day are given during the last year, and three teachers are assigned to it, who instruct in colloquial lectures on French text books. The course during the last year was not so complete as the gentlemen connected with it earnestly desire it should be made, but all the time that could be given them was earnestly and diligently filled up. In the examination a large number of drawings was exhibited by each cadet, which left nothing to be desired, and in the demonstrations and explanations given by them at the blackboard their draughts were made with singular skill and accuracy. The committee feel sure of the support of the board when they say that the examination of the cadets in this branch was entirely satisfactory.

These three branches, then—mathematics, natural philosophy, and engineering—occupying in succession about two-thirds of each day during the four years given to study here, constitute the mean course on whose success the success of the academy is finally to depend. To teach this course, however, with all the thoroughness which shall make it practically useful afterwards, a subsidiary course is constantly going on, whose purpose is to furnish the needful means for full success to the principal one.

The first branch in this subsidiary course is French, to which three hours every day are given during the first year, and three hours every other day during the second year. It is considered strictly as a means, not as an end; and its purpose here is to enable the cadets to use easily and freely books in that language which are their text books in learning engineering and mathematics, and to place within their reach in their future life a body of works on which their professional success must greatly depend, and which can be found in no other language. With this object, therefore, the instruction in French is not carried beyond reading it with facility, and this your committee think sufficient. It is not very probable that an American engineer or military officer will be required to speak and write any foreign language; and to take from his other studies here that large portion of time which would be necessary for such success would be to injure seriously the main course of his studies without an adequate object.

The next branch in the subsidiary course is drawing, which is taught in order to render both engineers and officers in the army what unquestionably they ought to be—practical draughtsmen. To this are given two hours every other day the second year, and two hours daily in the third year, and the number of teachers employed is two. Drawings have been exhibited from each member of these two classes which have much surprised the committee, not merely from their excellence, but from the number and from the equality in skill produced by an excellent mode of instruction.

The third subsidiary branch is chemical philosophy, chemistry applied to the arts, mineralogy, and geology, taught in order to give the cadets a knowledge of the materials they must hereafter use, whether in civil or military engineering. Two hours daily are given to this branch in the third and last years, every other day a lecture being given, and every other day a recitation. Two teachers only are found in this department, one having been ordered away on other service during the year, and the instruction thus obviously injured. But, excepting the injury resulting from this circumstance, which was apparent in the examination of one or two sections, the committee think there is great reason to congratulate the country on the success of this department, as far as means have yet been afforded to it.

These three subsidiary branches, however, naturally close up the account of what is essential to obtain the special object proposed by the government in establishing the Military Academy. But, besides what can thus be acquired, it has been thought desirable that the officers who are here to be formed

should have some of the knowledge needful in the character of an accomplished citizen. A department has, therefore, gradually grown up, into which several branches have been successively crowded, little connected with each other, or with the rest of the studies pursued here, and which can find no suitable place in the academic course but at the expense of something more immediate to the wants and objects of the institution. In this way there have been introduced, from time to time, English grammar, geography, history, rhetoric, natural and political law, constitutional law, and political economy. Some of these have been taught every year; but in no one year have all of them been taught, because it was impossible to find place and room for them all. During the last year English grammar, rhetoric, the constitutional law of the United States, and political economy have been taught, each very imperfectly and superficially from want of time and means—only two hours daily in the fourth year, and two teachers, being assigned to this entire class of subjects. Your committee are, therefore, clearly of opinion that this department of studies should be broken up; not because the studies themselves are unimportant, but because they are such as should be acquired either before the cadets come to this academy or after they leave it, and because the very superficial knowledge in them that can here be acquired is of little value in itself, is a contradiction to the exact thoroughness that prevails in every other department, and is obtained only by an injurious intrusion upon branches essential to the main success of the institution and the public objects for which it was founded.

In conclusion, your committee would remark that the entire examination, (as far as it is yet completed,) both in the principal and the subsidiary studies, has been conducted with the greatest patience, thoroughness, and impartial kindness on the part of the examiners; and that the cadets themselves, conscious of their own possession of the subjects they have learned, and aware that their rank on the merit roll will be settled by their appearance at this time, have constantly exhibited the singular spectacle of a large body of young men desirous to be long and strictly examined in the whole extent of their acquirements. It is a spectacle which, indeed, has been most gratifying, as your committee believe, to every one who has witnessed it.

V. But though large means have already been provided by the government, and have been efficiently, faithfully, and wisely used by the teachers to whom they have been intrusted, yet it is not to be denied or concealed that other means are wanting to give this institution the character it ought to possess, and which the increasing wants of the country loudly claim from it.

And in the first place, it is obvious that a suitable *chapel*, with fire-proof rooms for the library and the different collections of instruments used here, should be forthwith built. Such a building was recommended by the board of visitors both in 1824 and 1825, and the want of it must be plain to all who have been here.

As to the chapel, it is only necessary to say that the room now used for it was never intended for such a purpose, and is entirely unfit for it; that it is wanted for other objects; that it never accommodates, at once, more than half the persons who ought to be provided with seats, and that at some seasons of the year it will not contain even all the cadets. As to the library and the philosophical apparatus, it is only necessary to say that where they are now kept they cannot be properly arranged, cannot be fully preserved from injury, and are never safe. Your committee, therefore, are persuaded that this obvious want need only to be fully stated and known to insure a provision that shall satisfy it.

In the next place, your committee believe that a building is wanted for *gymnastical exercises*, which will serve at the same time for a riding-school, a fencing-school, and military drill. A thorough and careful physical education is of importance to a military officer more than to any other person. But it is not yet offered at this academy. The drill during the summer months is sufficient to give the cadets healthful exercise, and no more; but during the winter this resource fails, and their spirits and activity fail with it. It is proposed, therefore, that a plain building, merely sufficient to afford shelter, be erected, and that a systematic exercise of the whole person be there diligently practiced during the winter, under a gymnastical teacher, who shall be provided to superintend it.

In the third place, your committee recommend a considerable increase in the *library*. It is already respectable in works on fortification, artillery, military history, topography, tactics, mathematics, and natural philosophy. But the library is the principle of life to every institution for instruction, whose tone can never rise higher than the means for teaching its instructors will carry it, and whose success will fail if those new works which are continually increasing the boundaries of knowledge are not regularly added to keep the spirit of the institution up to the spirit of the times.

The library here is deficient in architecture, civil engineering, natural history, and civil history—in short, in all the branches not first enumerated. Your committee recommend, therefore, that an appropriation of \$2,000 for this year and \$1,000 for future years be proposed to the department as the minimum that will furnish the means needed by such an institution.

In the fourth place, the *chemical apparatus* is not sufficiently perfect to enable the teachers in chemistry to give the needful instruction in their branch; and, from the very nature of such an apparatus, it is liable to continual injury and decay. The committee propose, therefore, that it be repaired by some competent artist; that the sum of \$800 be asked for its increase this year, and \$150 per annum afterwards; that two catalogues be prepared of it—one to be given to the professor, and one to the superintendent; that it be kept in appropriate cabinets with glazed doors, and that it be inspected annually by the board of visitors, and the professor held responsible for injuries arising from carelessness. Your committee know no other way in which a good chemical apparatus can be constantly insured at such an institution.

In the fifth place, a mineralogical cabinet is greatly wanted. None can be said to exist here now, for the collection from which instruction is given is almost entirely the private property of the teacher, and is not equal to his wants. A good collection, however, is indispensable. Your committee, therefore, recommend that the sum of \$1,000 be asked to purchase one, and that lists of it be prepared, and the same accountability established as in the case of the chemical apparatus.

In the sixth place, the philosophical apparatus is not in good condition, partly from its location and partly from other causes. Your committee recommend that it be thoroughly repaired, and that lists of it be furnished the professor of natural and experimental philosophy and the superintendent, and the same accountability established in relation to it as is proposed in the case of the chemical apparatus.

In the seventh place, for the mathematical department, the committee propose that \$400 be asked to purchase instruments for surveying, and that lists be made of all property intrusted to this department, and the same system of accountability established as in the case of the chemical apparatus.

In the eighth place, your committee find neither casts nor engravings for the use of the drawing;

school, and hardly know how to account for a deficiency so obvious and so easily supplied. They presume there is no drawing-school in the world where some provision of casts and engravings is not made, and few where living models are not used. They propose, therefore, as a minimum, to ask for an appropriation of \$500 to purchase casts from the antique and engravings, which, when received, shall be delivered to the teacher of drawing, to be kept by him in the same way and under the same responsibility in which it is proposed to keep the chemical apparatus.

In the ninth place, your committee find no solid models from which to teach civil and military engineering, and they therefore earnestly recommend that a complete modeller be employed, with as little delay as possible, to furnish them. In Europe no school pretends to teach these sciences without a cabinet of models in relief, comprehending the problems in stone-cutting and carpentry, the orders and combinations in architecture, the constructions employed in canals, railways, &c., as well as the details of fortification and of attack and defence, all of which may be much more easily illustrated and much more quickly and practically taught from such models than they can possibly be in any other way. Your committee, therefore, recommend that the sum of \$1,200 be asked, partly to furnish tools and materials, and partly to purchase European models, which may serve as a guide with which to begin a suitable collection in the right way.

In the tenth place, your committee regret to find that no permanent provision is yet made by law for the department of chemistry and mineralogy. It is plain that this department is essential to the prosperity of the institution, and they recommend, therefore, that a permanent provision be asked for it without delay, more especially as they have understood that the present valuable incumbent cannot be retained at the head of the department on the precarious footing where it now stands.

In the eleventh place, the committee find that one cadet is employed in teaching French. This duty they think can be suitably performed only by a native of France, and they therefore join with the board of visitors of 1825 in recommending that an additional French teacher be appointed.

In the twelfth place, the committee also join with the board of 1825 in recommending that cadets be no longer employed as teachers in any branch. They were originally employed from the necessity of the case, because a sufficient number of graduates could not be found to fulfil suitably the duties of all the teachers wanted. But this reason no longer exists. There are now many who have received promotion as graduates from this institution who might be well employed as its teachers and can in no way, perhaps, be more useful to their country. Long experience shows that cadets can never have the respect and confidence which naturally belongs to older officers, nor the amount of instruction necessary to an adequate discharge of their duties. The same experience, too, shows that the cadets who are employed to teach, and who are, of course, the most prominent in their classes, suffer themselves from want of opportunities to learn, because they are so much occupied in giving instruction. The committee therefore recommend that hereafter lieutenants be employed instead of cadets.

In the thirteenth place, to supply the place of the cadets now employed in teaching, and to complete the needful means of instruction, your committee propose that two lieutenants be added to the department of engineering, one to the department of natural and experimental philosophy, seven to the department of mathematics, one to the department of drawing, and three to the departments of chemistry and mineralogy. And they would further propose that the Secretary of War be respectfully requested to detail each lieutenant who is to instruct in this academy for at least one complete academic year, and not to remove him for other service during that year; because it is impossible that an instructor should feel all the interest he ought to feel in the progress of a section which is not to be examined on his responsibility and as it comes from his hands, and no less impossible that the section itself should be as well taught by two or three different teachers as it would be by one consistent and uniform mode of instruction.

In the fourteenth place, the committee recommend that one assistant librarian be employed at the rate of \$25 per month, because adequate provision is not now made for the care and preservation of the books.

In the fifteenth place, the committee further recommend that, from and after the year 1828, *no cadet be admitted to enter the academy who is less than fifteen or more than eighteen years old*, since those who are younger very rarely have sufficient maturity of mind to pursue the studies required of them, while the minds of those who are older have generally taken a direction different from the one given here which can seldom be effectually altered.

In the sixteenth place, your committee find the requisitions for *entrance* very low, and, considering the vast number of applications now made for warrants, have no doubt they can be gradually raised with benefit to the country. They propose therefore that, from and after the year 1828, no cadet be admitted to enter who does not understand English grammar and geography.

In the seventeenth place, the graduates from this academy, who receive commissions in the engineer corps, have not, for want of time, received the full instruction in civil and military engineering which it is important they should receive. Your committee therefore propose that all who receive commissions in this corps be required, as a matter of course, to remain one year after their promotion at the academy, and that during that time they be employed in its instruction.

In the eighteenth place, your committee join earnestly the strong recommendation of the board of visitors of 1825, that the *superintendent* of this academy be made directly responsible to the Secretary of War, and hold all intercourse with the Secretary of War directly, and that, if necessary, he be made a part of the general staff of the army. The committee think such a provision exceedingly important to the welfare, success, and good order of the academy, and distinctly called for by the system of responsibility and accountability established in the other departments of the army and the government.

In conclusion, your committee would express their full conviction that the country has great reason for congratulation in the condition and management of its Military Academy. It has now been established twenty-four years. During the first fifteen years of its existence no regular system was pursued by its instructors, and no consistent support was afforded it by the government. It was, therefore, always in a fluctuating condition, and rarely enjoyed so much of the confidence of the nation that more warrants were asked for than could be readily granted. But during the last nine years all this has been changed. In 1817 a new system of instruction and discipline was introduced, and has by the teachers and academic staff been uniformly and consistently sustained, the favor of the nation has followed their efforts, and now every year the privileges of the institution are sought for at the War Department by above a thousand who cannot obtain them.

It is enough to say, in praise of the present superintendent and his coadjutors, that this change in the academy is their work; and your committee believe that nothing further need be asked for the entire

success of the institution than that the government should afford them a full and consistent support in their measures, whether of instruction or discipline.

*Report of the Committee on Military Instruction, Police, &c.*

Mr. PRESIDENT: Your committee to whom was referred the subjects of practical military instruction, discipline, and police of the academy, with directions to report on the conditions of each and such changes as should appear desirable, have had the same under consideration, and beg leave to report, in part—

The attention of your committee has been particularly directed to the discipline and police of the academy, in the examination of which they have been highly gratified to find that the superintendent and the academic staff are happily exempted from the exercise of discretionary power—a power, though vested in the hands of men possessing the highest attainments, the most undoubted integrity, directed by the purest motives, is often exercised to the destruction of the object intended to be promoted. The discipline of the academy depends upon a few plain written rules, simple as they are just; rules which place the superintendent and academic staff in the delicate and responsible situation of a parent, with power to ask no more of the cadet than a father ought to require, or an obedient son to perform; that upon a prompt and rigid exercise and enforcement of these rules depend the success of the institution. Your committee would further suggest that they have in vain searched for a single instance of a want of promptness on the part of the superintendent and academic staff to enforce those rules, or for the slightest absence of their application. Hence they would recommend that it is highly important to the institution that the decision of the superintendent and academic staff, as it regards the qualification of the cadet or his unfitness to remain in the institution, be acquiesced in at Washington.

Your committee would further state that the report of the academic staff on the subject of discipline, marked B, and made a part of this report, meets with their entire approbation, except in the instance that their decision shall in no case be reversed at Washington.

Your committee have examined the barracks and rooms of the cadets, and find that every attention is paid to cleanliness and the health of the cadets that could be desired.

Your committee have paid that attention to the mess hall and the bill of fare that the importance of the subject demanded. The result has been of the most satisfactory kind, and highly honorable to the department. The bill of fare is laid before your committee, marked C, is made a part of this report, and has in all things been, and is, complied with.

The cost of cadets' equipments is to be found in the document marked A, and made a part of this report.

Your committee would recommend to the consideration of the general committee the communication marked —, submitted by the superintendent, in relation to the medical department, and the necessity of a hospital; and for a full exposition of this subject refer them to the communication of Dr. Everett, which is an able and lucid view of the subject, in the opinion of your committee.

In fact, your committee take a pleasure in stating that, so far as it regards the local authority at this place, each and every department is in the best possible situation, and that all praise is due from your committee, the board, and the country, to Colonel Thayer, (so eminently qualified to preside over the institution,) Major Worth, and to each and every member of the academic staff, for that prompt, diligent, and able performance of their respective duties so conspicuous in each department, and that nothing is wanting on their part to insure entire success in the prosperity and usefulness of the institution.

*Report of Committee on Tactics, and other instruction purely military.*

The Committee on the Course of Tactics, and other instructions purely and exclusively military, respectfully report:

These courses of instruction are committed at present, so far as the infantry is concerned, to Major Worth, who is styled the instructor in tactics, Captain Hitchcock, and Lieutenants Grier and Bliss; Lieutenant Kinsley having the particular independent direction in artillery drill and practice, and in the labors of the military laboratory.

The application of instruction in these courses is as follows:

1st. *Infantry drill and general tactics.*—On joining this institution the cadet is immediately placed under a course of elementary drill, instructed by a cadet of approved soldiership, habits, and knowledge

of the subject; the whole under the direction of a commissioned officer who is one of the assistants in the department. In this manner the recruit is passed through all the gradations of the school of the soldier to that of the company. A suitable number of recruits are then formed into a company and carefully instructed by one of the assistants; thence the whole are transferred to the battalion, when, by distributing them among the old cadets, they soon acquire the habits of their new position. In the battalion they are taught practically in the field the mechanism of the movements both of the line and light infantry, and their application to the evolutions of the line. By an arrangement of the corps of cadets into four small battalions, the instructor is enabled to exemplify the movements of any number of battalions operating in a single body. Cadets of the first class are required to perform the duties pertaining to every station—the platoon, company, field, and staff, up to the command and explanation of the movements of a battalion, including the service of guards and police; those of the second class are required to perform the duties of sergeants, and those of the third class the duties of corporals. In the lecture room instruction is confined to the *first class*, which is required to recite and thoroughly explain the manœuvres, as adopted in the service of the United States, from the company to columns and masses of the greatest extent. They are lectured, and required to recite, upon the application of these manœuvres to the various circumstances and movements of an enemy *manœuvring* and in position; assuming a variety of cases, and combining under each the relation of the different arms of service to the passing defiles in advance and retreat, the dispositions against cavalry advance and rear guards, and the general service of this force; manœuvring upon an order of battle and the general service of light troops.

In the months of April, May, June, September, and October, the whole corps of cadets is drilled daily in infantry manœuvres for one hour, and during the period of encampment—which commences at the close of the annual examination in June and is continued to the end of August—the cadets, removed from barracks into tents, and performing all the duties of soldiers and officers in encampment, are instructed in the same drill for about two hours each day. The new cadets, however, are kept at drill during encampment about four hours daily, until they are sufficiently perfect in the school of the soldier, squad, and company. No fixed time is devoted to the study and recitation of tactics, excepting about thirty recitations given to a review of the studies, preparatory to the final examination of the first class. The studies during the period of encampment are left to the discretion of the instructor of tactics.

2d. *Artillery drill and practice and laboratory duty.*—This instruction is limited to the first, second, and third classes. The second and third have been taught the exercise and movement of the field-piece; the first class this also, and, in addition, all the movements of a division of field artillery; each cadet filling the different offices from commandant of piece to commandant of battery, and in this last station performing several manœuvres. The target firing, the first class has been instructed in the manner of loading, aiming, and firing 6-pound and 12-pound field-pieces, light 5½-inch howitzers, light 5½-inch mortars, and heavy 10-inch mortars. In military pyrotechny, the first class has been practiced in preparing all kinds of ammunition for various kinds of ordnance, and in making rockets, fuzes, port-fires, fire-balls, incendiary balls, &c.

The cadets, to whom this instruction is dispensed, devote one hour every morning, in the months of April, May, July, and August, to artillery drill; two hours every second day for four months, in term time, to laboratory duty and target practice, and four hours every day during encampment.

The result of the courses of instruction just mentioned your committee have witnessed with high gratification. In the field the upright and graceful carriage, steadiness in position, exactness in handling his arms, of the individual; the precision in the marching and manœuvres of the mass. In the lecture-room the thorough knowledge displayed of the rationale, the application, and the details of the manœuvres of large and mixed, as well as small and simple, military bodies; the address and dexterity applied in producing the varied preparations of the military laboratory; the skill and effect with which the uses and properties of these were illustrated in practice with several kinds of ordnance; all these must have impressed upon the whole board, as well as upon your committee, the conviction that, under existing circumstances, this portion of the academic course is hardly susceptible of improvement; and that none should be attempted but by the introduction, from time to time, of such slight modifications of details, or such slight additions, as a vigilant supervision and long experience may find expedient or applicable.

Your committee will, however, suggest, as a measure equally recommended by sound policy and justice, that the officers of the army detailed to conduct the courses of instruction, of which we have been speaking, being at the same time charged with the invidious and severe duty of enforcing the discipline and police of the institution, should receive each the addition of \$10 per month to his pay; that there should always be at least four officers assisting the instructor of tactics instead of three, as at present; and that it be urged upon the War Department as highly essential, especially in reference to salutary discipline, that as much permanency as possible be given to these appointments.

Your committee consider it relative to this subject to present the necessity of introducing the exercises of the riding-school. Deeming it altogether unnecessary to show the importance to military men of skilful horsemanship, we will offer on the subject but one or two brief remarks. The youth of this institution, leaving their homes at that precise period of life when this sort of instruction should begin, are, in the present state of things, thereby withdrawn from the means of acquiring this knowledge, to all others of much less value, but to all others of easy attainment. Neither the building required for the practice of the menage, nor the horses, will be chargeable exclusively against this branch of instruction; the one being indispensable for drill and gymnastic exercises in bad weather, and the other, as your committee are persuaded, being absolutely essential to the course of instruction in artillery manœuvres.

AMOS LANE, *Chairman of the Committee.*

*Report of the committee on the civil economy of the Military Academy.*

The committee appointed to examine and report upon the civil economy of the Military Academy at West Point beg leave to submit the following:

That they have diligently examined the subjects confided to their attention, and recommend that the select committee, appointed to condense the reports of the special committees, be instructed to recommend to the Secretary of War all the suggestions for improvement contained in the reports of the two preceding boards of visitors, which have not been acted upon or abandoned.

The committee have received a communication from the superintendent of the academy, inviting their attention to subjects which they have duly considered, and, without repeating them in this report, they refer to them as a part thereof; and recommend that they be incorporated in the joint communication to the Secretary of War, with a proper representation of the importance of the improvements, and the necessity for immediate appropriations specified for these objects.

They concur with the former board of visitors in recommending an increase of the salary of the superintendent.

The committee find that there is no material alteration in the civil economy of the academy since the last annual examination, and so far as they have examined its management, from an inspection of the books and accounts, they are satisfied that it is conducted with great care, and is worthy of their entire approbation. They find that the system prescribed by the regulations is not yet carried into perfect operation, for the reasons suggested in the last annual report of the board of visitors.

All which is respectfully submitted.

JOSEPH M. WHITE, *Chairman of the Committee.*

*Report of the Board of Visitors on the United States Military Academy at West Point, June, 1826.*

UNITED STATES MILITARY ACADEMY, *West Point, June 24, 1826.*

SIR: The undersigned, agreeably to your invitation, have attended the examination of cadets in this academy, now just concluded, and during the three weeks of its continuance have made diligent inquiry concerning the discipline of the institution itself, concerning the modes of instruction practiced in it, and concerning its general management and condition; in doing which, every facility has been afforded them by the superintendent and academic staff, and the whole establishment thrown open to their inspection, down to its minutest details.

In making the investigations required of them as a board of visitors, it has been the purpose of the undersigned to ascertain what was the *object* proposed by the government in establishing the Military Academy here; what *means* have been provided to accomplish this object; how these means are *applied* by the officers to whom they are intrusted; what *results* are obtained from them, and what *changes* are desirable. Under the same heads, therefore, the undersigned will now proceed to lay before the Department of War whatever information they have collected and whatever opinions they have formed.

I. The *OBJECT* of the government in establishing this academy was obviously to secure to the country the benefits of a *special school*, where instruction should be given in every arm used in actual service. The academy here is, therefore, essentially a military academy; its organization and discipline are military; and its rules and arrangements form a part of the military institutes of the country. The instruction given under its provisions is in the art of war, in its widest and most liberal interpretation, embracing the whole of civil engineering necessary to secure an easy communication by land and water between the different parts of a country, and a safe arrangement and construction of its ports. Whatever tends directly to secure this instruction in its best form, is, therefore, essential to such an institution, and whatever else is taught here must be considered subordinate and subservient.

II. The *MEANS* provided by the government to obtain these objects are, so far as instruction is concerned, of two kinds: First, teachers. Provision is made by law for the support of a professor of natural and experimental philosophy, with an assistant; a professor of engineering, with an assistant; a chaplain, who shall instruct in ethics; a professor of mathematics, with an assistant; a teacher and assistant teacher of French; a teacher of drawing, and a sword master. But this provision having been found entirely insufficient for the purposes to be effected, there have been, and are now, detailed from the regular army, to act as teachers, one major, as instructor of tactics; one surgeon, to be professor of chemistry and mineralogy; nine lieutenants and six cadets as extra assistants in the different departments before mentioned; and one lieutenant as instructor of artillery—in all, twenty-eight instructors and teachers, each of whom is constantly and laboriously employed in giving instruction, even during the period when the examinations are going on. Second. The remaining means provided by the government for general instruction are a library, a philosophical apparatus, a chemical apparatus, and military laboratory, each obviously incomplete and insufficient.

III. The *application* of these means, under the rules and regulations provided by the Department of War, is left to the body of instructors, and chiefly to the academic board, consisting of the superintendent and the heads of the departments of instruction, in whose practical management of the institution the undersigned have been able to find only occasion for uniform approbation.

The candidates for the rank and warrant of cadets, who arrive here by permission from the Secretary of War in the month of June, annually, to the number of about one hundred, are examined, and nearly all are accepted, the requisitions for admission being very low. During the six months after their entrance they are merely on probation. Their studies in this period are mathematics and French. In the mathematics they are at first arranged alphabetically, and in French according to their knowledge of that

language and other languages; after which they are broken into sections of about twenty each, and their instruction is forthwith begun. In the course of three weeks the more prominent in each branch, to the number of about twenty, are selected and formed into a first section, according to merit, and the same process is pursued, as the talents and characters of the candidates are developed, until, in seven or eight weeks, the entire class has been broken into five or six sections, according to merit, the arrangement of each section within itself continuing still alphabetical. During this period of probation the relative rank of the candidates is continually and materially changing, and they are transferred freely from one section to another, as their dispositions and capacities are determined. At the end of it, in the month of January, a strict examination is held, at which about one-fourth of the class is generally found to have failed, and reported to the Department of War as unfit to proceed. The successful candidates receive warrants as cadets, and are arranged, by the result of this examination, strictly according to merit. From this time the order of merit is the only one known in the entire course. Changes, however, are constantly making in the relative rank of the individuals; and twice in every year, in January and in June, a general and thorough examination takes place, three weeks in length and at the rate of nine hours a day, when the rank of every individual is settled anew, and a roll of merit prepared, which, after the annual examination in June, is consolidated into a roll of aggregate merit, and published. Those, however, who, at the annual examination, are found not to have satisfied the requisitions of the course, are dismissed, if their failure be from idleness or incapacity, but permitted to repeat the course of the preceding year, if their failure arise from unavoidable interruption in their studies or from want of years, it being, however, understood that this indulgence can be granted only once.

A similar course is pursued during each of the four years, the order of merit being the basis of all the instruction given; and, at the end of that time, when the class is graduated, it is generally found that about one-half of those who enter the institution fail to obtain its final honors; that, of those who receive promotion, about one-seventh have remained at the academy five years instead of four; and that the first section of a class, even after the class has been relieved of all the incapable and idle, still learns one-fourth more than the last section.

On this system of the academy and its application the undersigned would offer a few remarks:

In the first place, *the period of probation* seems to be a provision very important to the success of the institution. For it cannot be supposed that all who come here are fitted, either by their capacities or their characters, to meet the reasonable demands of a special school, where they are to be educated for a special public object, and the requisitions for a mere admission are so humble, and in branches of knowledge so very common, that the first examination cannot possibly become a test of their final fitness for an education so peculiar. This second examination, therefore, which occurs after an experience of six months, the undersigned regard as the most important *single* provision among the rules of the institution, and they feel assured that the War Department will unite with them in the conviction, founded on experience and the results of former practice, that to set aside the decisions of the academic board under this rule, except in very extraordinary cases, would have no other effect than to expend the public means on those who cannot be educated by them; to lower the standard of merit; to bring the decisions of the academic board into disrespect with the cadets and the public, and gradually reduce the whole tone of the institution.

In the next place, the undersigned would speak of the *merit roll*. Nothing, they conceive, can be more simple and efficient than the whole of its provisions, and nothing more fair and thorough than the mode in which they are carried into effect. Each cadet obtains rank in each branch of study he pursues exactly according to his proficiency, and this proficiency is determined by the weekly class reports of his instructors; by the examination of the academic board in January, and by the public examination in June. Each cadet, therefore, has a constant incitement to exertion, and is constantly in danger of losing, by the success of others, what he has himself gained. Moreover, this strong stimulus has a separate influence and operation in each branch of his studies. He is not, therefore, discouraged in any one, by having his merit in it lost in a general average of his merit in all. He is marked in each branch according to his progress in it, and, therefore, has an appropriate encouragement or censure for his rank in each. Nor is this a merely nominal provision. Of the forty-two members in the class about to be graduated, not one, in January, stood at precisely the same height in their three departments of study; one differed no less than twenty-six places; fourteen differed ten places and upwards; and, in general, the difference was four or five places. In the other classes the difference was still greater, because the characters and talents of their members were necessarily less settled; of course there is in all the most fair and honorable incitement and competition, and the results obtained, after the long and patient examination in June and January, are satisfactory in nearly every instance to the cadets themselves, and probably just in all.

In the last place, the undersigned would speak of the provision by which about one-seventh of those who are graduated in each class are permitted to *remain five years* at the academy. This, they conceive, is the only leniency in the existing rules of instruction by which they can be safely qualified. Those cadets who are unable to proceed in the course are cut off at the end of the probation; those who abuse the advantages offered them are sent away as offences are committed; and those who grow gradually more idle instead of more active fall, at last, to the bottom of their class, and then resign or are removed. Still there may well be a few who, from youth, from sickness, or from unavoidable interruptions in their course, are unable, at once, to make good the claims and standing required from them. To these one more year is both wisely and kindly given, and, in most cases, so improved as to place them in, at least, a respectable standing among their competitors.

The undersigned have much pleasure in adding to the preceding details their general conviction that these provisions and rules, which constitute what is most peculiar and valuable in the system of instruction here, are practically applied by the present academic staff with remarkable talent, exactness, and efficacy; and that to this system, and its zealous execution, are to be attributed a thoroughness in the knowledge obtained by the cadets, which the undersigned have not elsewhere witnessed, and an equality in the amount of their respective acquisitions which could not probably in any other way be obtained.

The system of *DISCIPLINE* which is brought in aid of this system of instruction seems to the undersigned no less skilfully adapted to its object, and no less efficient, than the instruction itself. It consists in a great measure of preventions and warnings. For this purpose a careful police is constantly maintained. During the hours when the cadets are not required to be in their quarters a guard is mounted in each story of the barracks, and during the hours of study each room is visited at least four times every day, to ascertain the good order of its furniture and the presence and diligence of its occupants. In this way even very inconsiderable deviation from the established rules and order of the academy are

at once detected and passed to the proper officer by whom they are entered in a day-book kept for the purpose. Every Friday evening the contents of this book, for the preceding week, are read on parade for the information of those who have been noted in it, and the next day those who have excuses to offer send them, in writing, to the superintendent, who accepts or rejects them. The delinquencies not excused are recorded in a register; the results of which, with the names of the delinquents, are publicly posted here and sent to Washington, where they are publicly posted in the War Department. And finally, from these monthly rolls a general roll of merit, according to conduct, is annually consolidated, which will hereafter be published.

A system of preventions and warnings so well adjusted makes much punishment of a more positive character unnecessary. When, however, punishments become indispensable, they are inflicted either by the superintendent, whose power does not go beyond confinement to quarters, or by a regular court-martial, whose decisions, when approved at Washington, may extend to dismission from the institution. These punishments, in order to become as rare as possible, should be inflicted as promptly and certainly as possible; and the undersigned are assured the War Department will unite with them in the conviction, founded on experience and the results of former practice, that the decisions of the superintendent be fully sustained by the government at Washington, and that sentences of courts-martial on cadets, when approved by the President, be remitted by pardon only on the most urgent reasons.

IV. Under the next head—that of the *results* gained to the public by the amount of instruction here given to the cadets educated by the country—the undersigned feel they have ample grounds for judgment, not only in the general examination which, during the last three weeks, has been constantly passing before them, but also in the private recitations which they have frequently visited.

In the course of instruction, the original object of the institution is kept constantly in view, and as far fulfilled as the means afforded will permit. The principal and most important series of subjects pursued is mathematics, natural and experimental philosophy, engineering, both civil and military, and tactics.

In MATHEMATICS, there is taught algebra; common and descriptive geometry; plane and spherical analytical trigonometry; shades, shadows, and linear perspective; analytical geometry; the differential and integral calculus; the orthographic and stereographic projection of the spheres, and surveying.

The number of instructors in this branch is now nine; and the amount of time given to it, in and out of the recitation rooms, is six hours daily during the first two years. The undersigned have great pleasure in adding that much of the instruction in this branch is given by colloquial lectures, either with or without text books—a mode which they believe to be better than any other fitted to produce a lively and deep impression on the mind of the pupil in pursuit of such subjects. The thoroughness of the knowledge obtained here was very apparent, both in the examination and in the recitation rooms. The diagrams exhibited by each cadet were drawn with great accuracy and skill; and the demonstrations by each at the blackboard, with very few exceptions, and those almost entirely at the bottom of the lowest class, were quickly, easily, and accurately performed. The undersigned feel confident that very little remains to be desired in this department of instruction.

The next branch taught is NATURAL PHILOSOPHY, comprising problems on the motion of bodies, from Newton's Principia, mechanics, dynamics, hydrostatics, hydrodynamics, pneumatics, magnetism and electricity, optics and astronomy.

This branch of instruction naturally follows mathematics. It begins with the beginning of the third year, and extends through the whole of that year at the rate of five hours in every day, under the management of three teachers. The undersigned apprehend that this is not enough, and that time must be taken for this branch, not indeed from mathematics and engineering, between which it is appropriately placed, but from some of the subsidiary branches, to increase the amount of knowledge acquired in natural and particularly experimental philosophy. From the examination, however, and from the demonstrations given, and the manuscripts exhibited by each member of the second class, the undersigned feel persuaded that the cadets here, too, have rightly improved all the means and opportunities afforded them, and therefore fulfilled all the requisitions that can reasonably be made upon them.

The next principal branch of teaching is ENGINEERING, comprehending architecture, civil engineering, and military engineering. Under the head of *architecture* is included the choice and preparation of materials, the elementary parts of buildings, the composition and distribution of buildings, and the art of construction. Under the head of *civil engineering* are comprehended roads, bridges, tunnelling, inland navigation, railroads, and artificial harbors and seaports. Under the head of *military engineering* are included field engineering, the science of war, and permanent fortifications.

To this branch five hours a day are given during the last year, and three teachers are assigned to it, who instruct in colloquial lectures, or text books, in the French language. The course during the last year was not so complete as the gentlemen connected with it earnestly desired to make it; but all the time that could be given them was diligently and zealously filled up. At the examination a large number of drawings was exhibited by each cadet, which left nothing to be desired; and in the demonstrations and explanations given by each, at the blackboard, the draughts were made with singular skill and accuracy. The undersigned feel sure that the future services of the cadets this year to be graduated will justify them in saying that the examination in engineering was perfectly satisfactory.

The last principal branch of instruction is IN INFANTRY DRILL AND GENERAL TACTICS and in ARTILLERY DRILL and PYROTECHNY. In the *infantry* drill the cadets are taught, practically, all the duties of a soldier in every station; in the platoon, company, field, and staff, up to the command and explanation of the movements of a battalion, including the service of guards and police; so that all the duties, from those of a common soldier to those of a commander-in-chief, are successively explained and practiced; besides which, the theory of all manœuvres, from those of a company to those of the largest masses, is taught in lectures and recitations. To this instruction four teachers are assigned, and the time given to it is, in all four of the classes, one hour daily, and to the first class one additional hour every other day during two months, and two months' uninterrupted duty in camp to all the cadets in the academy every year. The results of this course of instruction the undersigned have witnessed with great pleasure, in the upright and graceful carriage of the cadets in the field, the steadiness of their individual positions, their exactness in handling their arms, and their precision in the manœuvres and marching of the mass; while, in the examination room, their knowledge of the rationale of tactics, as a science, was no less ready and exact. In the *artillery* drill, too, which takes place chiefly during the encampment of the cadets in July and August, and which, with *pyrotechny*, is taught by one and the same teacher about two hours daily for six months to the first class, the undersigned have witnessed the same thoroughness and skill, whether in the exercise

of the piece, in target firing, in throwing shells, or in the preparation of all kinds of ammunition, signal rockets, fuses, port-fire, fire-balls, and incendiary balls.

These four branches, then, mathematics, natural philosophy, engineering, and military tactics, occupying above three-quarters of each day, as they occur during the four years given to study here, constitute the main course, on whose success the success of this institution is always to depend, and to which, as the undersigned are persuaded, it may in the hands of its present teachers be safely left. To teach this course, however, with all the thoroughness which is necessary to make it practically useful in the services of the country afterwards, a *subsidiary course* is constantly going on, whose purpose it is to furnish the needful means for full success in the principal one.

The first branch in this subsidiary course is *French*; to which three hours every day are given during the first year, and three hours every other day during the second year, under three teachers. It is considered here strictly as a means, and not as an end; and its purpose is simply to enable the cadets to use easily books in the French language, which are their text-books for both mathematics and engineering, and to place within their reach, in future life, a body of works on which their professional success must greatly depend, and which can be found in no other language. With this object, therefore, the instruction of the cadets in French is not carried beyond reading it with perfect facility, pronouncing it well, and translating from English; of all which the two lower classes gave abundant proof. And this, the undersigned believe, is sufficient. It is not very probable that an American engineer, or military officer, will be required to speak any foreign language; and to take from his other studies here that large portion of time which alone could enable him to make such an attainment, would be to injure the main course of his studies without an adequate object.

The next branch in the subsidiary course is *DRAWING*, which is taught in order to render both engineers and officers in the army, what unquestionably they all ought to be, accomplished practical draughtsmen. To this object are given two hours every other day in the second year, and two hours daily in the third year; and the number of teachers is two. Drawings have been exhibited from each member of these two classes, which have much surprised the undersigned, not merely from their excellence, but from their numbers, and from the equality in skill produced by an excellent mode of instruction.

The third subsidiary branch is *CHEMICAL PHILOSOPHY, CHEMISTRY APPLIED TO THE ARTS, MINERALOGY, and GEOLOGY*, taught in order to give the cadets a knowledge of the materials they must employ, whether in civil or military engineering, and the places where they are to be found. Two hours daily are assigned to this branch in the third and last years, every other day a lecture being given, and every other day a recitation. Two teachers only are now found in this department, the third having been called away for other service during the year, and the instruction thus somewhat injured. But, excepting the injury resulting from this circumstance, which was apparent in the examination of one or two sections, the undersigned think there is much reason to be gratified with the success of this department so far as means have yet been afforded to it.

These three subsidiary branches, French, drawing, and chemistry and mineralogy, seem naturally to close up the account of what is essential to attain the special object proposed by the government in establishing this Military Academy. But besides all this, it has been at different times thought desirable that the officers, who are here to be formed, should acquire knowledge needful rather in the character of an accomplished citizen. A department has therefore gradually grown up into which several branches have been successively crowded, little connected with each other or with the rest of the studies pursued here, and for which it seems difficult to find a suitable place in the academic course but at the expense of something more immediate to the wants and objects of the institution. In this way there have been introduced, from time to time, English grammar, geography, history, rhetoric, national law, constitutional law, and political economy. Some of these have been taught every year, but in no one year have all of them been taught, because it was impossible to find place for them all. During the last year *English grammar, rhetoric, the constitutional law of the United States, and political economy*, have been taught, each imperfectly and superficially from want of time and means; only two hours daily in the fourth year, and two teachers being assigned to this entire class of subjects. The undersigned are therefore clearly of opinion that this department of studies be broken up, not because the studies themselves are unimportant, but because they are such as should be acquired either before the cadets come to this academy or after they leave it; and because the superficial knowledge of them that can be here acquired is a contradiction to the exact thoroughness that prevails in every other department of instruction, and is obtained only by an injurious intrusion upon branches essential to the main success of the institution and the public objects for which it was founded.

In concluding their remarks on this part of their inquiries the undersigned would add that the entire examination has been conducted with the greatest patience, thoroughness, and impartial kindness on the part of the academic staff; that the visitors themselves have frequently joined in it; that several of the cadets, not satisfied with the result of their first investigation, have asked a further hearing, which has been uniformly granted them; and that throughout, in all the classes, the cadets, conscious of their own familiarity with the subjects they have studied, and aware that their rank would certainly be determined by their appearance at this time, have constantly exhibited the singular spectacle of a large body of young men eagerly soliciting a longer and more strict examination into the whole extent of their acquirements, a spectacle which indeed has been most gratifying to all who have witnessed it.

V. But though large means have already been provided by the government, and have been efficiently, faithfully, and wisely applied by the teachers to whom they have been intrusted, yet it is not to be denied or concealed that *OTHER MEANS, and occasional CHANGES*, are wanting to give the institution the character it ought to possess and the character which the increasing wants of the country plainly claim for it.

And, first, it is obvious that a suitable *chapel*, with fire-proof rooms for the library and the different collection of instruments used here, is greatly wanted. Such a building was recommended by the board of visitors of 1824 and of 1825, and the want of it must be plain to all who have been here. As to the chapel, it is only necessary to say that the room now used for it was never intended for such a purpose, and is entirely unfit for it; that it is wanted for other objects; that it never accommodates more than one-half the persons who ought to be provided for, and that in some seasons of the year it will not contain even all the cadets. As to the library, the philosophical apparatus, &c., it is only necessary to say that where they are now kept they cannot be properly arranged, cannot be preserved from injury, and are never safe. The undersigned therefore are persuaded this striking want needs only to be properly made known in order to insure a provision that will satisfy it.

2d. The undersigned have considered the state of the *hospital*. It is the same building which, by the

board of visitors of 1825, was properly considered as *no* hospital; for it will afford accommodation to hardly half a dozen patients, and is so decayed and ruinous that it will not protect them from the weather. The sick are therefor every rarely sent thither, but kept in quarters, often to their own injury, and always to the interruption of their comrades in the same room. In case of an epidemic this state of things would be extremely alarming, and the undersigned therefore recommend earnestly the erection of a suitable hospital.

3d. The undersigned join with the board of visitors of 1824 and 1825 in recommending a permanent provision for the *department of chemistry and mineralogy*. This department is essential to the prosperity and success of the academy, and yet the present valuable incumbent who is at the head of it is here on the precarious footing of an army surgeon, living in a house which will not protect his family from the inclemency of the seasons, without a laboratory in which his department can be illustrated, and without a mineralogical collection. The undersigned therefore recommend that provision be made for a permanent professorship of chemistry and mineralogy, and that quarters be built for the accommodation of the incumbent's family; that a laboratory with a lecture room attached to it be erected; that \$800 be asked for the chemical apparatus this year, and \$150 annually afterwards; and that \$1,000 be asked to begin a cabinet of minerals. They further recommend that the property thus provided for in chemical apparatus and minerals be given in charge to the professor, who shall furnish catalogues of it to the superintendent; that it be inspected annually by the board of visitors, and that the professor be held responsible for any injury or loss arising from his carelessness. And the undersigned urge this recommendation the more anxiously, as they have reason to fear the department will lose its present important head if it be not put on the footing the exigencies of the academy demand.

4th. The undersigned recommend a considerable increase of the *library*, and the appointment of an assistant librarian, because adequate provision is not now made for the care and preservation of the books. The library is already respectable in works on fortification, artillery, military history, topography, tactics, mathematics, and natural philosophy. But a library is the principle of life to every institution for instruction, whose tone can never rise higher than the means for teaching its instructors will carry it, and whose decay is certain if those new works which are continually enlarging the boundaries of knowledge are not regularly added to keep the spirit of the institution up to the spirit of the times. The library here is very deficient in all branches except those already enumerated, and is deemed to need additions, particularly in architecture, civil engineering, natural history, and civil history. The undersigned further recommend that an examination of the library, according to certified catalogues, be made annually by the board of visitors, and the librarian held responsible for all losses, deficiencies, or injuries arising from neglect on his part. And the undersigned would suggest the sum of two thousand dollars for the present year, and one thousand dollars annually afterwards as the minimum that will furnish the means needed for such an establishment.

5th. The undersigned recommend that four hundred dollars be applied to the purchase of *instruments for surveying*, to be delivered, when purchased, to the professor of mathematics, and by him held, with all other public property in his department, in the same way and on the same terms suggested in the case of the chemical apparatus.

6th. The undersigned find neither *casts* nor *engravings* for the use of the drawing school, and hardly know how to account for a deficiency so obvious and so easily supplied. They presume there is no other drawing school in the world where some provision of casts and engravings is not made, and few where living models are not used. They suggest, therefore, the great advantage of an appropriation of five hundred dollars to purchase casts from the antique, and engravings, to be kept by the principal teacher of drawing, in the same way and on the same terms suggested in the case of the chemical apparatus.

7th. The undersigned find here no solid *models* from which to teach civil and military engineering; and they recommend, therefore, that a modeller be employed, with as little delay as possible, to furnish them. In Europe no school pretends to teach these sciences without models in relief to illustrate the problems in stone-cutting and carpentry; the orders and combinations in architecture; the constructions employed in canals, roads, railways, &c., as well as the details of fortifications, and of attack and defence; all of which may be much more easily explained and much more quickly and practically taught from such models than they can be in any other way. The undersigned, therefore, suggest that the sum of twelve hundred dollars be appropriated partly to purchase tools and materials and partly to provide European models as guides with which properly to begin a suitable collection.

8th. The undersigned are persuaded that a *riding school* and *gymnastic exercises* are much wanted here; and they recommend that a building be erected fitted for these purposes, for a *fencing school*, and for *military drills*. A riding school, it is believed, is always attached to such an institution in other countries, for the obvious reason that skilful horsemanship is indispensable in the education of a military officer. Here such a school is peculiarly needed; for the youth of this institution, leaving their homes at the precise period of life when such instruction naturally begins, are, in the present state of things, necessarily withdrawn from the opportunities for acquiring this knowledge and skill, which to all others is of much less value, but to all others of very easy attainment. Gymnastic exercises, too, or a thorough physical education, seem to the undersigned to be of great importance to an institution like this, destined to furnish officers and engineers for the civil as well as military service, to whom a hardy constitution and the easy and dextrous use of all their physical powers is indispensable for professional success. The drill during the summer months is sufficient to give the cadets healthful exercise and no more; but during the winter this resource fails, and their spirits and activity fail with it. Horsemanship and gymnastic exercises are the appropriate remedies for this state of langour, while at the same time the introduction of the light artillery drill, which has heretofore been prevented from want of horses, would now be effected, of course, and the cadets receive an accomplishment indispensable in the service to which they are destined.

9th. The undersigned join with the board of visitors of 1825 in recommending *that cadets be no longer employed as teachers*. They were originally thus employed from the necessity of the case, because a sufficient number of graduates could not be found to fulfil, suitably, the duties of all the teachers wanted. But this reason no longer exists. There are now many who have received promotions from this academy who might well be employed as its teachers, and can in no way, perhaps, be more useful to their country. Long experience has shown that cadets cannot command the respect and confidence which naturally attach to older officers, and do not possess the amount of knowledge necessary to a full discharge of their duties. The same experience, too, shows that the cadets who are employed to teach, and who are, of course, the most prominent in their respective classes, themselves suffer from want of opportunities to

learn, because they are so much occupied in giving instruction. To supply, therefore, the places of the cadets now employed in teaching, and to complete the needful means of instruction, the undersigned would suggest that another French teacher be appointed, who shall be a native of France; that two lieutenants be added to the department of engineering; one to the department of natural philosophy; seven to the department of mathematics; one to the department of drawing, and three to the department of chemistry and mineralogy. And they would further suggest that each lieutenant who is to instruct in this academy be, if practicable, detailed for at least one complete academic year, and not removed for other service during that year; because it is extremely improbable that an instructor should feel all the interest he ought to feel in the progress of a section which is to be examined neither on his responsibility nor as it comes from his hands, and quite impossible that the section itself should be as well taught by a succession of different instructors as it would be by one uniform mode of teaching.

10th. The undersigned recommend that from and after the year 1828 *no cadet be received* at this academy who is *less than fifteen or more than eighteen* years old, since those who are younger than fifteen rarely have maturity of mind sufficient to pursue the studies required of them, while the minds of those who are above eighteen when they enter have generally taken a direction different from the one required here, and which it is not easy to alter.

11th. The undersigned find the *requisitions for entrance very low*, and, considering the vast number of applications now made for warrants, have no doubt they can be gradually raised with benefit to the country; they therefore suggest that from and after the year 1828 *no cadet be admitted to enter* who does not understand English grammar and geography.

12th. The undersigned are persuaded, from observation and inquiry, that *more instruction* might be given *in engineering*, and that the only serious obstacle to it is the want of time. They propose, therefore, that the graduates from this academy who may receive commissions in the corps of engineers be required to remain here one year after their promotion, and that during that period they be employed in giving instruction, as well as in the prosecution of the studies appropriate to their department.

13th. The undersigned recommend the appointment of an additional *clerk*, with a salary of three hundred dollars per annum, to be employed in the offices of the adjutant and superintendent; because in the office of the adjutant an oppressive amount of writing is already done, and because the superintendent, for want of a clerk, has never been able to preserve copies of his official communications to the government.

14th. The undersigned suggest, as a measure equally recommended by sound policy and justice, that the officers charged with the ungracious duty of enforcing the discipline and police of the institution—a duty, too, not less severe and laborious than ungracious—should receive each the addition of ten dollars per month to his pay, and that, to insure a uniform and salutary discipline, as much permanency as possible be given to these appointments.

15th. The undersigned recommend that provision be made for the erection of a gun-house, because the artillery here is constantly suffering from exposure to the weather at all seasons.

16th. The undersigned concur entirely in the strong recommendation of the board of visitors of 1824 and 1825, that the *rank and pay of the present superintendent* be increased; and they repeat this recommendation, not on account of the claims of this distinguished officer from his long and extraordinary services in his present situation—because it is well known he rather declines than solicits such a recommendation—but on account of the public service, which, they are persuaded, cannot be suitably sustained by his present income, which is altogether below his station and the demands made upon him in consequence of his station, and no suitable compensation for the talents and labor he gives in return with such devotedness and success to the country.

17th. The undersigned join earnestly in the strong recommendation of the board of visitors of 1825, that the superintendent of this academy be made directly responsible to the Secretary of War, and hold all his official intercourse with the Department of War directly, and that, if necessary, he be made a part of the general staff of the army. They think such a provision exceedingly important to the welfare, success, and good order of the institution, and distinctly called for by the system of direct responsibility and accountableness established in the other departments of the public administration.

The undersigned have not spoken at large of the barracks, the mess-house, the commissariat, the adjutant's arrangements, or the treasury; but none of these have been overlooked, and it is only because the same order and exactness has been found in them that has heretofore been reported of them that they are not more particularly mentioned. Indeed, this order and exactness has been found throughout all the details and arrangements of the institution, and the undersigned have great pleasure in adding that in every part of it, among the academic staff and among the cadets, they have found the spirit of science prevailing over a merely military spirit, and over everything that could interfere with the progress of knowledge and the objects of the government in establishing this special school.

In conclusion the undersigned would express their strong conviction that the country has great reason for congratulation in the condition and management of its Military Academy. It has now been established twenty-four years. During the first fifteen years of its existence no regular system was pursued by its instructors and no consistent support was afforded it by the government. It was therefore always in a fluctuating condition, and rarely enjoyed so much of the confidence of the nation that more warrants were asked for at the War Department than could be readily granted. But during the last nine years all this has been changed. In 1817 the system of instruction and discipline now in practice was introduced by the present accomplished superintendent, and has, by the teachers and academic staff, been uniformly and consistently sustained; the favor of the nation has followed and encouraged their efforts, and now every year the privileges of this institution are sought for at the War Department by above a thousand to whom it is not possible to grant them. It is praise enough of the present superintendent and those who have so faithfully labored with him to say that this change is their work, and the undersigned are persuaded that nothing further need be asked for the final and entire success of the institution than

that the government should afford its academic staff a full and consistent support in their measures, whether of instruction or of discipline.

The undersigned have the honor to offer you the expression of their high consideration and respect.

DOCUMENTS FROM THE WAR DEPARTMENT, ACCOMPANYING THE PRESIDENT'S MESSAGE TO CONGRESS, COMPRISING A REPORT OF THE BOARD OF OFFICERS RELATIVE TO THE ORGANIZATION OF THE MILITIA.

I.

*Report of the board of officers relative to the militia.*

WASHINGTON, November 28, 1826.

The board of officers now convened at this place have had under consideration your instructions, of the 5th ultimo, requiring a report on the organization of the militia, "stating the defects, if any, of the existing organization, and recommending such remedies as in its judgment will render our militia as skilful and effective as it is brave and patriotic."

To enable the board to execute this important commission, with a reasonable hope of beneficial results, it has carefully read and considered the numerous communications from governors of States, militia officers, and other distinguished citizens, in reply to your circular letter of July 11, 1826, also the several plans of organization and instruction for the militia which have been submitted to Congress at different periods by committees of that body and by the War Department.

Premising that, after a full consideration of the whole subject, the opinions of the members of the board have been brought into great harmony with each other, the following report is now most respectfully submitted:

1. "*Defects of the existing organization.*"

The term *organization* will not here be taken in its restricted or technical sense, but as enlarged by the general tenor and purpose of the circular letter before mentioned.

The primary defect of the militia system at this time, it is believed, will be found in the excess in numbers which the law proposes to hold to service, an objection that did not apply to the period of 1792, the date of the still existing law on this subject. In 1792 it might well have been supposed necessary to enroll and organize into corps of militia all the able-bodied white male citizens of the United States, (certain classes and persons excepted,) between the ages of 18 and 45 years; but, in the thirty-four years which have since elapsed, our general population, and consequently the male citizens between those ages, have been trebled, whilst, it is believed, the dangers of foreign aggression are now much diminished. The other occasions under the Constitution, viz: resistance to the laws and insurrections, to meet which the militia were also intended, are supposed not more likely to occur in future than might have been apprehended in 1792; and yet at that period a third of the present militia force (and about three-fourths of the male citizens then capable of bearing arms) was supposed amply sufficient for all the purposes within the contemplation of the Constitution.

It would seem, therefore, from the foregoing views that the United States now hold to a nominal service a growing militia force already considerably larger than any probable, it may almost be said possible, emergency would require.

But its nominal character is not the only objection to this extensive scheme of enrolment and organization. It is true that the militia costs the *treasury* in time of peace nothing beyond the inadequate sum annually appropriated for the supply of arms and equipments; yet the musters and trainings, the arms, ammunition, and equipments which many of the militia actually purchase and all are required to provide for themselves, if not supplied by the United States or the respective States, operate as heavy burdens on the most productive class of the community, without the acquisition, except in the cities and a few other highly-peopled districts, of any adequate degree of military instruction or efficiency. By far the greater number of letters submitted to the board, and the exceptions come principally from the cities and the more populous parts of the country, represent the ordinary militia musters, &c., as useless or worse than useless, as so many occasions for hurtful practices, instead of martial exercises and the images of war.

The same difficulty (of excess in numbers) renders every scheme of improvement in the general mass, without the aid of a high war excitement, hopeless; for it is obvious that so great a body of enrolled men, or officers without the men, would not bear in time of peace, and without remuneration, an encampment of many successive days for instruction; and, on the other hand, it is supposed that the gov-

ernment would be unwilling to incur the necessary expenditure. Neither is it deemed advisable, under the present organization, to recommend a selection of particular companies, battalions, regiments, brigades, or divisions, or a particular number of officers, out of the general mass, for better instructions, either at their own expense or that of the government. Such selections could not fail to be generally regarded as invidious and unjust. And yet without an encampment of many successive days for the militia of the thinly-peopled districts, it is supposed impossible to impart to the officers, and through them to the ranks, any adequate degree of military efficiency.

But one other objection, of the same character, to the existing organization will be stated by the board.

An amendment to the Constitution of the United States consecrates the great principles "that a well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed;" and in the same spirit Congress has at different times provided "that every citizen so enrolled (for service in the militia) shall, within six months thereafter, provide himself with a good musket or firelock," or "with a good rifle," &c.—(Act May 8, 1792, sec. 1.) 2. That certain deposits of arms should be made "at suitable places for the purpose of being sold to the governments of the respective States or the militia thereof."—(Act July 6, 1798, sec. 1.) And 3. "That the annual sum of \$200,000 be appropriated for the purpose of providing arms and military equipments for the whole body of the militia of the United States."—(Act April 23, 1808, sec. 1.)

Yet, notwithstanding the declaration of the Constitution and the provisions of Congress, conceived in the same spirit, and, notwithstanding the meritorious provisions made by several of the State governments, to effect the same great object, comparatively but a small portion of the militia of the Union is yet armed; and according to the present rate of appropriation by Congress for that purpose, it would require, even supposing the population to be stationary, about seventy-five years more to accomplish a measure so congenial to the whole theory of our institutions. This consideration also seems to require a new scheme of enrolment and organization, by which the whole body of the militia held to service might be effectively armed and instructed.

In respect to instruction, another material defect may be noticed. Systems of a convenient size and form, for the instruction of cavalry, artillery, and infantry, each bearing the express sanction of the government, are much wanted by the militia. Such systems are now in preparation by this board, under the orders of the department; but, should they be ultimately adopted, a great want of uniformity would still exist in the exercises of the same arm; the infantry, for example, if provision be not made by the government for the employment, at least in the first instant, of experienced instructors at the requisition of the States. This point, which is deemed of great importance by the board, will again be noticed under the head of Camps of Instruction.

Under the act of Congress, May 8, 1792, "for establishing a uniform militia throughout the United States," section 2, it appears by the correspondence before the board, that exemptions from militia service, granted by many States, are so numerous as to operate very injuriously on the whole establishment. In some instances, the number of exemptions is reported to be equal to the number of enrolled men. Not again to recur to this supposed defect in the act of 1792, the board will here observe, that it would greatly promote uniformity in the distribution of the benefits and burdens of a well-regulated militia among the respective States if no exemptions were allowed beyond the cases which might be enumerated in some new provision made by Congress on this head; and, with a view to such enumeration, the board would most respectfully suggest that persons belonging to religious communities or societies, known to entertain conscientious objections to the bearing of arms, might be included, or, at least, exempted from service in time of peace.

## 2. "Remedies."

The recommendations of the board, under this head, will be found in the subjoined *plan for the enrolment and organization of the militia of the United States* and the subordinate plan for *camps of instruction*. These, for the most part, sufficiently give the views and opinions of the board on the whole subject submitted by the department. A few illustrations and miscellaneous remarks may, however, be proper in this place.

The full age of twenty-one years has been assumed by the board as the best period for the commencement of service in the ranks of the militia; because it was thought unnecessary, in time of peace, for the government to interfere with the ordinary control of parents, guardians, and masters, over minors.

It will be perceived that the scheme of enrolment proposed rendered any other limitation as to age than that just stated unnecessary; it being probable that the minimum quota would be obtained in any State, without going higher than the ages of 30 or 29, and in some of the States not higher than 26 or 25, even with the present population. Between the minimum and maximum numbers of the scheme the difference is nearly fifty per centum on the former. This difference it was thought advisable by the board to leave to each State to add, by further enrolments in the ascending scale of age or not, according to its wishes, or according to physical and moral circumstances in its own condition; although, in the opinion of the board, a well-regulated, armed, and instructed militia, of 400,000 men, for the whole Union, would be sufficient for all the purposes stated in the Constitution.

The residue of the male citizens, capable of bearing arms, (and 7 in every 9, between the ages of 16 and 60, may be so considered,) the board would think it unnecessary to arrange even into nominal brigades, regiments, &c. In any great national emergency it would be easy for Congress to double or quadruple the number of brigades, &c., in the respective States on the principles of the scheme, and thus to avail itself of the whole, or any intermediate part of the military population of the Union, according to the emergency. If the plan of instruction submitted herein be adopted, there would, after a few years, be no want of capable officers for the largest force mentioned.

The board, in the plan of organization, proposes an adjutant general, without rank, for the whole militia of the United States. The importance of such an officer attached to the War Department, it is believed, could not be too highly estimated. Among his various duties might be the following: to correspond with the adjutant generals of the respective States on the subject of the militia in general; to furnish blank forms of the different returns required from the States, with the necessary explanations; to make abstracts of all returns received, for the information of the President and of Congress; to ascertain by correspondence the boundaries of divisions, brigades, and regiments in the respective States, with a view to the force that might be brought to the defence of exposed points in a given time, &c., &c.

The act of Congress, May 8, 1792, has provided for an adjutant general in each State, but has not prescribed the rank of this officer. Hence, in many of the States the rank given is that of brigadier general; in others, that of colonel, and in many States no rank whatever. A uniformity on this point appearing to the board desirable, the plan of organization submitted proposes to give to the adjutant general of each State the rank of brigadier general.

Under the existing organization every regiment consists of two battalions, but no staff is provided for the battalions. The proposed plan would render each battalion as complete within itself as the united regiment. This was thought desirable by the board, as in the thinly peopled districts battalions would, it is supposed, under the State laws very generally parade and perform their exercises separately, and might also, in many cases, be called into temporary service in the same manner; and to accommodate the organization to the general state of our population it is proposed that four companies shall constitute a battalion. The precincts of the battalions would thus be less remote from their respective centres than if the number of companies were five, as at present.

Should the systems of instruction in preparation for the different arms of militia, cavalry, artillery, and infantry, (and under the latter denomination are included light infantry and riflemen,) be adopted by the proper authority, the board beg leave to recommend that the whole be distributed to the militia officers at the expense of the United States, as follows: one copy of each system to every general officer and general staff officer, and a copy of each system, according to the arm of the respective officers, to all other militia officers, chaplains, surgeons, and assistant surgeons, excepted.

The camps of instruction, it will be observed, are recommended by the board for officers exclusively. Considerations of public economy chiefly induced this limitation. The benefits of the system of instruction, by means of camps, would not, however, be confined in their effects to the officers. The tactical experience acquired by them in the school of the camps would be naturally imparted to the ranks at such trainings or musters as the States may respectively prescribe, and in case of active service the officers would be enabled, in a reasonable time, to render their corps equal to all the emergencies of a campaign. The maxim that *good officers make good soldiers* has the support of universal experience, and on this the board has founded the recommendation above.

In respect to the camps of instruction, it may be observed that another great advantage would result from the proposed manner of furnishing instructors, as the latter might be required, in the details of a bill, to certify to the time of actual attendance at the several camps of each officer, to whom it is proposed to give a per diem allowance and mileage. The certificates of the instructors so employed, countersigned by the commanders of the camps, respectively, would furnish sufficient vouchers on which the payments by the United States might be made.

The 12th and 13th questions of the circular letter have elicited a very general and decided expression of opinion in the replies against tours of militia service of three months only. The majority of these letters recommend extending the period to a year, and in this the board concurs.

Finally, the board will remark that many details have been intentionally omitted in the subjoined plans, because it was supposed, in a report of this character, outlines and such details only were required as might serve to develop the *principles* of an entire scheme. The details omitted readily suggest themselves, and might easily be brought into a bill.

*Plan for the enrolment and organization of the militia of the United States.*

1. It is recommended that there be appointed one *adjutant general for the militia of the United States*, to be attached to the War Department, but without rank.
2. That there be appointed in each State an adjutant general of the militia of the State, and one quartermaster general of the militia of the State, or in time of peace, one officer, to be both adjutant and quartermaster general, such officer or officers to have, each, the rank of brigadier general.
3. It is recommended to exempt all persons under the age of twenty-one years, in the several States, from service in the militia of the United States.
4. It is recommended that there be enrolled and organized in each State, from the whole mass of able bodied white male citizens resident therein, who are or shall be above the age of twenty-one years, and always taking the youngest above that age, at the rate of one brigade of militia, organized as herein proposed, for every member of the House of Representatives of the United States to which the State may be entitled.
5. It is proposed that every two brigades of militia so enrolled in the same State shall constitute one division; and if there be an odd brigade in the State, above a division, that such brigade be attached to some convenient division, at the discretion of the State; that every brigade shall consist of three regiments; every regiment of two battalions; every battalion of four troops or companies; and every troop or company of five sergeants, five corporals, two musicians, and sixty-four privates. Each State to have the right to designate regiments, battalions, troops, and companies, as cavalry, artillery, light infantry, infantry and riflemen, at its discretion, or to accept as part of its quota as above, without regard to the limitation as to the age of twenty-one years, uniformed volunteer corps of either arm, if armed and equipped according to designation, and organized as herein proposed.
6. It is proposed that each State also have the right to extend the number of privates, per troop and company, within the State, from the minimum, sixty-four, to any number not exceeding one hundred.
7. Privates in troops of cavalry, to be also designated *troopers*; and privates in companies of artillery, *matrosses*; and light infantry and riflemen to be included in the general denomination of *infantry*.
8. Divisions, brigades, regiments, and battalions may consist of different arms, as cavalry, artillery, and infantry, as above; and when several troops of cavalry, whether single or organized into regiments or battalions, are united for parade, instruction, or service, they will be subject to an organization, in part, peculiar to this arm; thus two troops will constitute a squadron, two squadrons a battalion, and, as in the other arms, two battalions a regiment; but on the accidental or temporary union of two or more squadrons, without field officers of this arm, the commander of the division or brigade to which the squadrons belong may detach one or two field officers to command the squadrons so united. A similar rule would be applied to a temporary or accidental union of two or more companies of artillery in the same battery or line of batteries, and to two or more companies of light infantry or riflemen.

9. It is proposed that the said militia be officered by the respective States, as follows: *To each division*, one major general, with two aides-de-camp, (to be appointed by the major general,) each with the rank of major; one division adjutant general, with the rank of lieutenant colonel; one division quartermaster, with the rank of major; and one chaplain, the three latter to be permanently attached to the division. *To each brigade*, one brigadier general, with one aide-de-camp, (to be appointed by the brigadier general,) with the rank of captain; one brigade major, with the rank of major; and one brigade quartermaster, with the rank of captain, the two latter to be attached permanently to the brigade. *To each regiment*, one colonel, one regimental adjutant, and one regimental quartermaster, both to be selected by the colonel from the lieutenants of the regiment; one surgeon and one assistant surgeon, both to be appointed by the colonel, and by him attached to the respective battalions of his regiment; and one regimental sergeant major and one regimental quartermaster sergeant, both to be appointed by the colonel from the enrolled men of his regiment. *To each battalion*, one lieutenant colonel or one major, but there shall be only one lieutenant colonel in the same regiment, whose battalion, when united with that of the major, will be entitled to the right, and when, also, both battalions will take the denomination of wings. *To every battalion*, one battalion adjutant and one battalion quartermaster, both to be selected by the commander of the battalion from its lieutenants; one battalion sergeant major, one battalion quartermaster sergeant, and one principal musician, the three latter to be appointed by the commander of the battalion from the enrolled men of the battalion; provided, nevertheless, that as often as the two battalions of a regiment unite, and as long as they shall remain united for parade, instruction, or service, the battalion adjutants, quartermasters, sergeant majors, and quartermaster sergeants shall return to and do duty in the line of their respective battalions. *To each troop and company*, one captain, one first lieutenant, and one second lieutenant, to which add one second lieutenant to each troop of cavalry and one first lieutenant and one second lieutenant to each company of artillery.

10. In battalions of infantry, when serving separately or not united into regiments, the State color will belong to the lieutenant colonel's battalion, and the regimental color to the major's battalion, each color to be borne by a sergeant color bearer, posted in the front rank, between two corporals, on the left of the right centre company, and the color bearer with the two corporals on his right and left will be covered by three other corporals in the rear rank; but when the two battalions of a regiment unite into one, the two colors shall be borne and posted as is prescribed for the colors of the infantry of the United States army.

The following table exhibits the number of troops or companies, battalions, regiments, brigades, divisions, enrolled men, and officers which the foregoing proposition would give to each State and to the *District of Columbia*, to which it is also proposed to extend this plan of enrolment and organization. But as the population of the *District of Columbia* is less than that of the smallest State, it is further proposed that the brigade to be organized therein may consist of but *two* regiments.

It is proposed to leave the militia of the Territories of the United States, in all respects, precisely on the present footing.

In the table the term *minimum total* is used to express the whole number of *enrolled men* (exclusive of officers) at the rate of sixty-four privates per troop and company; *maximum total*, the whole number of enrolled men, at the rate of one hundred privates per troop and company; *minimum aggregate*, the minimum total, added to the whole number of officers; and *maximum aggregate*, the maximum total, added to the whole number of officers—the number of officers, non-commissioned officers, and musicians—also, the number of divisions, brigades, regiments, battalions, and troops and companies, remaining the same, both for the minimum and maximum number of privates.

States.	Troops and companies.	Battalions.	Regiments.	Brigades.	Divisions.	Minimum total.	Maximum total.	Officers.	Minimum aggregate.	Maximum aggregate.
