Ohio.....	336	84	42	14	7	25,536	37,632	1,316	26,852	38,948
Indiana.....	72	18	9	3	1	5,472	8,064	279	5,751	8,343
Missouri.....	24	6	3	1	.....	1,824	2,688	91	1,915	2,779
Illinois.....	24	6	3	1	.....	1,824	2,688	91	1,915	2,779
District of Columbia..	16	4	2	1	.....	1,216	1,792	61	1,277	1,853
	5,128	1,282	641	214	99	389,728	574,336	20,038	410,374	595,270

The numbers in the eighth column do not include the additional lieutenant proposed for each troop of cavalry, or the two additional lieutenants proposed for each company of artillery; because the proportions of those arms respectively, to the infantry, the board proposed to leave to the discretion of the

several States. But it is presumed the proportion of cavalry to infantry, or of artillery to infantry, would, in no State, exceed one to eleven. At this rate, the additional lieutenants would be six to a brigade, or 1,284 for the 214 brigades.

*Camps of Instruction.*

11. For the instruction of officers, it is recommended that each State appoint as many camps of instruction as there may be divisions of militia organized in the State, or if there be no divisions in the State, then a camp for its brigade.

12. At such periods as the respective States may appoint, it is recommended that all the officers of each division, or in a State that has no division, all the officers of the brigade, surgeons and assistant surgeons in both cases excepted, be assembled at the camp appointed as above, and there be held assembled and encamped ten successive days in each year, under the immediate command of the senior officer actually present of the division or brigade. The military instruction, both theoretical and practical, to be conducted at each camp by a competent instructor, under the superintendence and direction of the commanding officer of the camp; the practical part at a rate of not less than six hours a day, for the ten days' encampment, and in order the better to introduce uniformity of practice under the systems of instruction which may have been established by Congress for the different arms, as cavalry, artillery, and infantry, it shall be the duty of the Secretary of War, on applications made by the executives of the several States, to provide competent instructors, and, as far as practicable, by selections from the officers of the army or graduates of the United States Military Academy: provided that the number of instructors so detailed or employed by the Secretary of War shall not exceed one for each camp of instruction, as above.

13. The chaplain of each division, who shall be required to attend the annual encampment of the officers of his division, to be held only to the performance of his clerical duties, and a similar exemption extended to the surgeon or assistant surgeon, one for each camp, to be detailed by the commander of the camp from the surgeons and assistant surgeons of the division or brigade.

14. It is recommended that there be allowed and paid by the United States to each officer who shall be encamped, as above, — per day, for each day that he may be encamped, not exceeding ten in the same year, and to each officer at the rate of — cents per mile, for every mile he may necessarily travel once from his home to his camp, and once back in the same year.

15. To the instructors detailed or employed as above it is recommended that there be allowed and paid, by the United States, as follows: if they be officers of the army, to each a per diem of — for each day actually employed at a camp of instruction, and the transportation of an officer of the army; and if the instructors be other than officers of the army, twice that per diem to each, and the mileage of — cents, as above.

16. It is recommended that — dollars per day be allowed and paid by the United States for the hire of musicians at each camp for the ten days' encampment.

According to the foregoing propositions or recommendations there would be 104 camps of instruction in each year—99 for divisions, and five for independent brigades, including that of the District of Columbia. The accompanying estimates exhibit the probable amount of expense of the whole scheme of instruction herein proposed, according to the different data assumed.—(See estimates, Nos. 1, 2, 3.)

The number of officers who would probably be encamped in the same year, if the scheme be adopted by the proper authorities, may be stated in this place:

The whole number of officers according to the foregoing table.....	20,038
Additional officers proposed for the cavalry and artillery, not included in the table, say.....	1,284
	21,322
Deduct all the surgeons and assistant surgeons, except 104, for the 104 camps .....	1,178
	20,144
From this number there may be deducted, say one officer in every six, as the number that would probably be unavoidably absent from the camps.....	3,386
Number of officers who would probably be encamped in the same year.....	16,758
	16,758

All which is most respectfully submitted,

WINFIELD SCOTT, *Major General, and President of the Board.*  
 T. CADWALADER, *Major General 1st Division Pennsylvania Militia.*  
 WM. H. SUMNER, *Adjutant General of Massachusetts.*  
 BEVERLY DANIEL, *Adjutant General of North Carolina.*  
 ABR'N EUSTIS, *Lieutenant Colonel 4th Artillery.*  
 Z. TAYLOR, *Lieutenant Colonel United States Army.*  
 E. CUTLER, *Lieutenant Colonel 3d Infantry.*  
 CHAS. J. NOURSE, *United States Army.*

Hon. JAMES BARBOUR, *Secretary of War.*

## I.

*Estimates of the probable expense of the annual camps of instruction proposed and recommended by the board of officers of which Major General Scott is president, convened at Washington, under the orders of the Secretary of War. Note.—Only one of the items of expenditure (the first) is varied in the tables.*

## No. 1.

Probable number of officers that would be encamped for instruction the same year, 16,758.	
If each officer be allowed \$1 50 per day for the ten days' encampment, to cover his necessary expenses, this item would be for the 16,758 officers.....	\$251,360
Mileage for the same number of officers, say at five cents per mile, estimated at \$2 50 for each officer, each year.....	41,894
Say 50 instructors selected from the army at a per diem each of \$4, for ten days each.....	2,000
Say 54 other instructors at a per diem of \$8 each, for ten days each.....	4,320
NOTE.—The transportation and mileage of the instructors not calculated.	
For the hire of music at each camp ten days, for the 104 camps, say, \$5 a day each.....	5,200
	<hr/>
	304,774
If the United States furnish horsemen's tents, say at the rate of one for every four officers, the number of tents would be about 4,190, and the first cost (at \$25 50 each) \$106,795. The tents, placed under the care of the respective division and brigade quartermasters, and by them annually reported and accounted for through the executives of the respective States, would probably last, at least, eight years. On these suppositions add to the above items one-eighth of the first cost of the tents, or.....	13,349
	<hr/>
Whole cost of the 104 annual camps, as above.....	318,123

NOTE.—It is not supposed that other articles of camp equipage would be required than tents, either from the United States or the respective States.

## No. 2.

16,758 officers, at \$1 25, for ten days each.....	\$209,495
Mileage of the same officers, as in estimate No. 1.....	41,894
104 instructors, say the same as in estimate No. 1.....	6,320
The hire of music, say the same as in estimate No. 1.....	5,200
	<hr/>
To which, if tents be allowed, add, as in estimate No. 1.....	13,349
	<hr/>
Total.....	276,258

## No. 3.

16,758 officers, each at \$1 per day, for ten days.....	167,580
Mileage of the same officers, the same as before.....	41,894
104 instructors, the same as before.....	6,320
Music, the same as before.....	5,200
	<hr/>
To which, if tents be allowed, add as before.....	220,994
	<hr/>
Total.....	13,349
	<hr/>
Total.....	234,343

*Circular letter of the Secretary of War, of 11th July, 1826, on the subject of the militia, with communications from governors of States and other individuals in reply thereto.*

WAR DEPARTMENT, July 11, 1826.

SIR: Among the political maxims which the experience of the people of the United States has adopted as unquestionable, there is no one more universally subscribed to than that a well-organized and a well-disciplined militia is the natural defence of a free people. Uniting most sincerely, in common with my fellow-citizens, in this opinion, I am anxious to see a system adopted by the national legislature which will realize the hopes of us all in reference to this great arm of national defence.

By a resolution of Congress at their last session, I am enjoined to cause to be prepared a complete system of cavalry tactics, and also a system of exercise and instruction of field artillery, including manœuvres for light or horse artillery, for the use of the militia of the United States, to be reported for consideration or adoption by Congress at its next session.

The wisdom of this measure is made manifest by the objects, which are two-fold: first, the establishment of the best system, and secondly, that it shall be uniform. The importance of the last is scarcely inferior to the first, for who can well appreciate the inconveniences resulting from different systems in the same army, the militia differing among themselves, as also with the regular army with which they may

be called to act! And yet it is, I believe, too true that but little uniformity prevails. If practicable, this defect must be removed.

I am duly sensible how difficult it is to establish a uniform system. The difference of condition, physical and moral, in the different States, and the preferences which each has for that which from time they have been accustomed to, present serious obstacles to a homogeneous system throughout all the States, yet I would fain hope not insurmountable.

All our national institutions and much of our legislation are founded in that mutual spirit of deference and forbearance which has so signally distinguished the people of these States, and therefore one may indulge the hope that in an object of such vital importance as a well-regulated militia, minor objections will be sacrificed to the attainment of so great a good.

To enable me to execute the duty assigned me by Congress it is most desirable that I should acquire all the information within my reach, and while so doing the opportunity seems a seasonable one to ascertain the different systems, both of organization and instruction, which prevail in each State, and also the defects and remedies which observation and judgment may have suggested, that by a comparison a system may be extracted which will most probably unite the greatest number in its favor; which system, when matured, will be submitted to the wisdom of Congress, who have had for several sessions this interesting subject under consideration, and who are alone competent to apply some of the remedies required—a portion of the control over this subject being retained to the States. It is with this view that I address you, as also the governor of each of the States and Territories, and such distinguished citizens known to me, from whose experience I expect to derive much valuable information.

To this end I beg to submit the following questions :

- 1st. What is the number of your militia?
- 2d. Are they organized in strict conformity to the law of Congress; if they differ, in what?
- 3d. Are the regular or volunteer militia most efficient?
- 4th. Is there a preference given for entering volunteer corps?
- 5th. Does the establishment of the volunteer militia operate injuriously on the regular militia?
- 6th. What proportion do the volunteers bear to the regular militia?
- 7th. Would it promote the efficiency of volunteer corps if they had the power by law of making by-laws for their own government?
- 8th. Would a classification of the militia be an improvement—one to be called the *active*, the other the *sedentary*?
- 9th. In making the classification, should age or the single or married state form the distinction?
- 10th. If age, what the proper periods?
- 11th. Would it be an improvement to issue commissions only to inferior grades in time of peace; if so, what should be the highest?
- 12th. Is not the period of service for three months only on one tour attended with great sacrifices of life and treasure and productive of inefficiency?
- 13th. If so, to what period might it be properly extended?
- 14th. What are the regulations of your State as to training the militia?
- 15th. From your experience, are frequent musters advantageous to the great body of the militia?
- 16th. Would it be an improvement to confine the instruction to the officers exclusively?
- 17th. Is the system of *infantry* tactics directed by law universally pursued?
- 18th. What system of exercise and instruction of artillery have you practiced or followed? What are its defects and remedies?
- 19th. What system of cavalry tactics have you adopted? What are its defects and remedies?

As from some of the States and Territories returns of the militia have not been made, the first of these queries became necessary in a general letter.

Although the training of the militia is confided to the States, it is important that their regulations in this particular should be known at this department, and it will be attended with good effects, that the system of each should be known by all the States.

If anything suggests itself worthy of communication, though not called for by any particular question, it will be highly acceptable.

As in your State, I doubt not, you have many citizens unknown to me, whose information and experience would be very valuable, I have presumed so far on your goodness as to ask you to direct and forward the enclosed letters to persons of that description.

I have to beg your earliest attention to this subject, as a board will be immediately convened to perform the specific duties assigned me. To this board I shall unite one or more militia officers.

I have further to request that the correspondence which may be addressed to me on these subjects may be indorsed "Militia Service."

With the greatest consideration and respect, I have the honor to be your most obedient servant,  
JAMES BARBOUR.

ROSE MOUNT, October 20, 1826.

SIR: I received your circular of the 11th July last, containing a number of queries respecting the system adopted in the State of Maryland for the "organization and instruction" of the militia, which was referred to the adjutant general of the State, and I now have the honor to enclose his reply.

I have delayed forwarding it till this late period for the purpose of superadding some observations of my own, but I find so much difficulty in treating the subject that I have declined it, well knowing that under your superintendence it will be in able and experienced hands.

With great regard, your respectful and obedient servant,

JOS. KENT.

HON. JAMES BARBOUR, *Secretary of War.*

ADJUTANT GENERAL'S OFFICE, *Annapolis, August 1, 1826.*

Nothing suggests itself to me at all likely to meet the views of the Secretary of War. Much time and much more information and experience than I have had will be required to mature such a system as seems to be necessary. I will endeavor to give the best answers to the several interrogatories which the short time I have had since receiving the circular will permit.

1st. It will be seen by the return of 1825 that the number of our militia is 40,091. But I feel a conviction arising from my own knowledge, and from information derived from the officers, that if a complete return was obtained the number would not be less than fifty thousand.

2d. There can be no decisive answer. Our act of assembly directs the organization in conformity to the law of Congress; but at present our militia is very imperfectly organized.

3d. I think the volunteer militia most efficient.

4th. The law of 1811 gives a preference to those entering volunteer corps.

5th. I have no knowledge that the establishment of volunteer militia operates injuriously on the regular militia.

6th. The returns being so imperfect, the proportion of volunteers to the regular militia is not known to this department.

7th. The volunteer corps have the power by law to make their own by-laws, but it does not generally promote their efficiency.

8th. I do not see the advantages to be derived from classification.

11th. I do not think it would be an improvement to issue commissions only to inferior grades in time of peace.

12th. I think the period of three months' service only is too short to be efficient; but—

13th. I am not prepared to say what is the most proper period.

14th. The act of 1824 directs the United States discipline to be used.

15th. My experience of musters is considerable, having attended them as commander of the 22d regiment for many years, and I am decidedly of opinion that they are disadvantageous to the militia. They tend to corrupt the morals of the people, and no information can be derived at them; and—

16th. I am equally positive in the belief that it would be an improvement to instruct the officers exclusively, for to the want of qualification in the officers generally may be attributed in a great measure the very defective state of the militia. I owe it to the officers, however, to say that I do not consider it a fault of theirs, for they show a zeal in the service; but the difficulty of procuring books of instruction is great, and that of instructors is greater.

17th. The infantry tactics are pursued as far as practicable.

18th. It is not known to this department what system of artillery exercise is pursued; no particular instruction has been directed by law, and the several artillery corps being attached to brigades, and of course very remote from each other, it is not probable that any uniform system has been adopted.

19th. By the act of assembly of 1811, (c. 213, s. 6,) a meeting of the officers of the cavalry was directed for the purpose of fixing upon the most proper system of tactics. They adopted the abstract of Colonel Herries's instructions for volunteer corps of cavalry, adapted to the use of volunteers and the militia of the United States. No complaints of its defects have been heard by me.

With high respect, I have the honor to be your obedient servant,

RICHARD HARWOOD, of Thomas, *A. G. M. M.*

The GOVERNOR of *Maryland*

RICHMOND, *October 23, 1826.*

SIR: In compliance with your wishes as made known through your communication some time since made to me, I now forward, under separate cover from this, three letters from Generals Cocke, Harvey, and Adjutant General Peyton, in reply to your inquiries in relation to a new organization, &c., &c., of the militia of the United States. A request was also made to Major General Ro. B. Taylor and Brigadier Broadnax, to furnish me with their views and opinions on this interesting subject. From these gentlemen I have no further heard than from General Taylor, that he would set about and finish the task as soon as possible, and presume that he is now engaged on that service. When I shall hear from either of them, their communications shall be forwarded.

I have no views of my own to present. With General Cocke I concur in the main, but differ with him in the supposed necessity of awarding any pay to the officers who might be assembled for training. They would be entirely satisfied if permitted to draw rations. Nor would I dispense with the company musters. They should be preserved as the field on which the company officers should display their acquirements. Besides it would be apt to produce a military spirit even with the privates, for I have ever remarked that the soldier partook of the pride of the officer, and that he became also *proud* of the officer who was qualified to command. These, however, are crude suggestions, and I leave the whole subject without further comment to those much better qualified to decide than myself.

With assurances of great respect, I have the honor to be your most obedient servant,

JOHN TYLER.

HON. JAMES BARBOUR.

ADJUTANT GENERAL'S OFFICE, *Richmond, August 5, 1826.*

SIR: I have had the honor to receive your communication of the 24th ultimo, covering one from the Department of War, and now proceed, agreeably to your request, to make such reply to the inquiries therein contained as the records of this office afford or as occurs to my mind; premising that I have never been in actual service with militia, but always with regular troops of the United States; conse-

quently not qualified to give a satisfactory opinion upon some of the points submitted, if indeed I am upon any. I offer them as mere suggestions to your better judgment, to be taken for what they are worth.

1st. What is the number of your militia?

By the returns of 1825, the latest on file, the strength of the infantry, light infantry, grenadiers, and riflemen was 86,348, of cavalry 7,524, and of artillery 5,756, corresponding with my return to the Adjutant General's office at Washington in December last.

2d. Are they organized in strict conformity to the law of Congress? If they differ, in what?

The organization of the militia of this State is not in *strict* conformity to the laws of Congress, but is slightly variant. The number of regiments in a brigade, the battalions in a regiment, the companies in a battalion, and the privates in a company, as well as the number and description of volunteer corps attached to each battalion and regiment, are not in all cases (although in a large majority they are) consistent with the laws and *recommendations* of Congress; in other respects the variation is slight.

3d. Are the regular or volunteer militia most efficient?

Volunteer corps are generally composed of the most ardent and patriotic young men, and consequently to a certain extent considered most efficient; their numbers, however; should not, in my opinion, exceed the present limit prescribed by Congress, as the main body of any army must without doubt be infantry of the line, which should not be more weakened in numbers or material by enlarging the number of volunteers, especially as they are already sufficiently numerous for the performance of all the duties usually required of such corps.

4th. Is there a preference given for entering volunteer corps?

I am led to conclude there is in some sections of the State, since it is found necessary to restrain that propensity, while in others it prevails to a very small comparative extent, and where it is requisite to encourage the raising of volunteer companies to comply, as far as may be, with the prescribed organization.

5th. Does the establishment of the volunteer militia operate injuriously on the regular militia?

Limited as it is in this State, I do not perceive that it does, but it certainly would be very prejudicial in some sections unrestrained.

6th. What proportion do the volunteers bear to the regular militia?

As 23,712 is to 75,916—99,628 being the aggregate of every corps; and the ratio from year to year does not materially vary.

7th. Would it promote the efficiency of volunteer corps if they had the power by law of making by-laws for their own government?

I do not perceive that it would, although it would no doubt be desirable to them; uniformity is necessary to efficiency in all corps in service, and that can only be attained by compelling them to conform to such wise and wholesome regulations as may be desired by the proper authority, and to which I have no reason to doubt they would readily submit; otherwise they would lose that claim to superior patriotism which has ever been accorded to them.

8th. Would a classification of the militia be an improvement—one to be called the *active*, and the other the *sedentary*?

9th. In making the classification, should age or the single or married state form the distinction?

10th. If age, what the proper period?

I incline to the opinion that a classification of the militia would be advantageous, and that age should form the distinction: the first class to be between the ages of eighteen and thirty, the second between thirty and thirty-eight, and the third between thirty-eight and forty-five years, so as to throw the weight of service on the youngest men, who have more health, vigor, and enthusiasm, and fewer engagements at home to suffer by their absence, added to which, soldiers are far more efficient at this period of life than at any future time; and although they may have less at stake than those more advanced, yet it is not less their duty to defend the country which gave them birth, and the government and laws which have protected them and their ancestors in person and property.

11th. Would it be an improvement to issue commissions only to inferior grades in time of peace; if so, what should be the highest?

There would certainly be a great advantage at the commencement of a war in having the selection from all ranks of society of officers well qualified for command, which they would not accept in time of peace, as is manifest from the extreme inferiority of many holding commissions at all times, and of the great difficulty in many sections of the State of officering the militia at all, especially in the more inferior grades. Yet some organization of the militia in time of peace is essential, especially in the southern States, where they are subject to calls not known to States to the north, and where despatch and certainty are important. These cannot be secured without organization to a certain extent, say into battalions at least, probably to regiments, with proper officers in command, through whom orders can be distributed, and corps brought to act with celerity; it is also necessary to have such an organization as will insure correct returns of the strength and equipment of the several corps at least once a year. To secure these objects, I doubt whether it would be sound policy to dispense with any grade under that of the commandant of a regiment, however desirable in other respects it might be; beyond that little inconvenience would be experienced in vacating commissions.

12th. Is not the period of service for three months only on one tour attended with great sacrifices of life and treasure, and productive of inefficiency?

13th. If so, to what period might it be properly extended?

A three months' tour of service I consider as little less than useless; it is not possible to prepare troops for efficient service in less than that time, even of such as are not constantly looking forward anxiously to the period of discharge, which necessarily distracts the attention and lessens the effect of instruction and discipline. No term of service should be less than six months, and the only doubt I entertain is whether it should not be extended even further to render the militia a safe source of defence.

14th. What are the regulations of your State as to training the militia?

Officers of every rank and corps from that of colonel are trained once in twelve months, three days, immediately preceding the regimental musters, by the respective inspectors of brigade. For the instruction of the privates there are two musters, by companies, per annum, one battalion and one regimental muster.

15th. From your experience, are frequent musters advantageous to the great body of the militia?

The frequency of musters is less important than the period of time employed in training when called

together; hence, troops would acquire more knowledge in a continued drill for three successive days than in three days similarly employed at intervals; hence, I see little advantage in frequent musters as at present conducted in this State.

16th. Would it be an improvement to confine the instruction to the officers exclusively?

As stated in answer to the preceding question, I see little efficiency in the present mode of training the privates; and to call them together for longer periods would be attended with great inconvenience to a large majority of them, as well as heavy expense, more than equivalent to the advantages likely to result from it; with the officers less embarrassment is to be apprehended on these grounds, and well-trained officers will soon make well-trained soldiers. I am, therefore, of opinion it would be better to confine instruction to the officers exclusively.

17th. Is the system of *infantry* tactics directed by law universally pursued?

I cannot say that it is in universal, yet it is in general use; the work has not been distributed to the officers, and many of them cannot meet with it, while others are unable, and probably some unwilling, to provide it at their own expense. It is to be regretted that a different policy is not pursued in this respect.

18th. What system of exercise and instruction of artillery have you practiced or followed? What are its defects and remedies?

19th. What system of cavalry tactics have you adopted? What are its defects and remedies?

No system of tactics for artillery or cavalry has been prescribed in this State, or generally adopted; in the absence of it, every company has been left to pursue such system as they thought best, so far as I am advised.

I have now given you, hastily, my present views of the several points submitted by the Secretary of War, without having time for such reflection on the subject as its importance merits; not doubting but that every idea I have thrown out has been already better conceived by yourself, and will be presented to him in a shape far more extended and useful, availing yourself, as you will, of the experience and talent of some of the first officers of our State, if not of the United States, who have also the advantage of much actual service in the field with this description of force.

I have the honor to be, most respectfully, sir, your obedient servant,

BERNARD PEYTON, *Adjutant General.*

His Excellency JOHN TYLER, *Governor of Virginia.*

BREMO, *August, 1826.*

SIR: Yours of the 24th ultimo, at the request of his excellency Governor Tyler, calling my attention to an enclosed communication from the Department of War, came duly to hand.

However small the means in my power of contributing anything worthy of notice upon the difficult subject of a new organization of the militia, its importance has been too long and too deeply impressed upon my mind to withhold my mite, did it only serve to show my approbation that the government are about to take up a subject the neglect of which has been a source of solicitude to all reflecting men, but especially to those who had the opportunities of seeing the defects of our present militia system during the late war.

The questions of the honorable Secretary embrace much ground beyond the field of my military experience; while some of them can be answered only by the chief magistrate, whose official station gives access to the archives of State. I shall therefore confine myself to such of the questions as I can answer categorically, and then proceed to subjoin such observations as may serve to show the grounds upon which I have formed my opinions.

*Question 3.* Are the regular or volunteer militia most efficient?

*Answer.* For an effort to repel a sudden invasion volunteers would be found to be most efficient, because they would be more prompt in coming into the field; but for protracted service the regular drafted militia are best.

*Question 4.* Is there a preference given for entering volunteer corps?

*Answer.* There is a preference, arising from the rank of volunteer corps being supposed to be filled with a better class, and having the privilege of electing their officers.

*Question 5.* Does the establishment of the volunteer militia operate injuriously on the regular militia?

*Answer.* It does; by drawing off the better class, it leaves the remainder comparatively debased. And the privileges claimed by volunteers, and the indulgencies too often granted to them, operate to increase the dissatisfaction of the regular militia when made to submit to the necessary restraints of discipline.

*Question 7.* Would it promote the efficiency of volunteer corps if they had the power by law of making by-laws for their own government?

*Answer.* I can see no advantage from such an arrangement that is not attainable under the system of voluntary association which already prevails. The privilege of making by-laws must necessarily be restricted within the limits of the military code, which ought to provide for all essentials, and equally for all descriptions of troops; such a power, then, given by law, it would seem, could serve no purpose sufficient to compensate for the inevitable effect it would produce, of drawing a stronger line of distinction between the volunteers and regular militia, which, to my apprehension, is sufficiently strong already to operate injuriously.

*Question 8.* Would a classification of militia be an improvement—one to be called the *active*, the other the *sedentary*?

*Answer.* A proper classification has long, in my mind, been indispensably requisite to any successful scheme to organize and discipline the militia; but I should avoid any distinction, even nominal, that implied a difference in the service to be rendered by the different classes.

*Questions 9 and 10.* In making the classification, should age or the married state form the distinction? If age, what the proper periods?

*Answer.* The classification should be regulated both by age and marriage.

The whole free male population of the State, between the ages of sixteen and forty-six, should be divided into two classes: the first class to be composed of all between the ages of sixteen and thirty

years, and the second class of the remainder; each of these classes to be subdivided into the single and married—the single to be designated the first division, and the married to be designated the second division of their classes respectively.

*Question 11.* Would it be an improvement to issue commissions only to inferior grades in time of peace; if so, what would be the highest?

*Answer.* It would be attended with many advantages to issue no commission of higher grade than captain in time of peace.

*Question 12.* Is not the period of service for three months only on one tour attended with great sacrifice of life and treasure, and productive of inefficiency?

*Answer.* All experience in the militia service during the late war establishes the affirmative in answer to the foregoing questions.

*Question 13.* If so, to what period might it properly extend?

*Answer.* To a period not less than one year.

*Question 16.* Would it be an improvement to confine the instructions to the officers exclusively?

*Answer.* I have been unable to conceive any other plan which appears to be equally feasible to render the militia promptly and efficiently available for national defence than that which looks solely to the instruction of the officers, combined with the results deducible from the foregoing classification.

As the instruction of the officers has always been the first requisite and indispensable condition of my scheme to render the militia the efficient defenders, as they surely are the national protectors, of our country and our liberties, I will commence my observations with this part of the subject, although the last in the order of the questions from the honorable Secretary.

It may be assumed as a military axiom that "there can be no efficient army without skilful officers." The experience of the late war has removed all doubt (if there was ever any) that the militia, as soldiers, were, beyond all comparison, superior to their commanders as officers. The former did, indeed, vindicate the truth of the assertion that the yeomanry of a free people are the worthiest defenders of their country. But while their willing obedience to authority, their patriotic zeal, and their dexterity in the essential use of fire-arms proved them worthy of all confidence, it served to place in stronger light the deplorable deficiencies of their officers. And I venture the assertion, without the fear of a dissentient among the commandants of militia corps during the late war, that the great obstacle to success in the organization and discipline of their respective commands arose from the want of properly instructed and properly qualified subaltern officers.

The system which looks solely to the instruction of the officers is probably the only one which could be carried into practical effect, upon a general scale, under the existing circumstances of our country. It begins where the first and higher requisites must be supplied, and seems to have in its favor the double advantage of simplicity and economy. It stands clear of the objections which must ever be felt to every plan affecting the common business and daily occupations of large portions of the community, which in our country in time of peace, it is believed, would never be submitted to; nor could there be any object gained to compensate for breaking up to such an extent the order and business of civil life as would be required to train the whole body of the militia into disciplined soldiers. The few and simple duties which a soldier has to learn may be taught in a few days in the field by skilful officers—especially with our people, who are conversant with the use of the gun from boyhood. But the case is widely different with officers. The higher attainments necessary for them require more time for instruction. Fortunately, the comparative few necessary to form this class may be occasionally detached from the ranks of society without materially deranging its order.

To hold out such inducements to the intelligent and respectable as to make them seek commissions, while at the same time no objectionable burdens are imposed on the one hand or advantages too enviable are granted on the other, constitute the most formidable difficulties to be overcome. It is deemed essential, however, as the first step, to raise the value and respectability of a militia commission in the public opinion. This can never take place until those who hold commissions are really and truly qualified for the high and important functions which appertain to their respective grades; and to accomplish this end two measures seem necessary: first, more competent instructors must be employed in the place of our present brigade inspectors; and secondly, more time must be taken than is at present required by law for training the officers. It may be safely assumed that higher qualifications in our military instructors cannot be procured without some enhancement of pay; and if the demands upon the time of the officers were to be considered, they would also require compensation. I have thus been brought to the conclusion that there can be no substantial improvement in the organization of the militia without some additional drafts upon the treasury. The participation of the State in this increased expense would consist of the addition to the salaries necessary to command the time and talents of scientific military instructors in place of the twenty-two brigade inspectors now acting under the old inefficient system, and the pay and rations for a few days in the year of the platoon officers while actually engaged in the service of receiving instruction.

It is evident, from the little demand for and low state of military science at present in our country, that it would be difficult, if not impossible, to procure the necessary number of qualified instructors to carry this system at once into full operation; but this evil could soon be removed by that co-operation of the general government with the States which has been so wisely provided by the Constitution in relation to the militia.

By the Constitution Congress is charged "to provide for organizing, arming, and disciplining the militia;" thus placing within its province the establishment of the necessary additional military academies for the purpose of educating the required number of instructors for the whole body of the militia.

Four national institutions—one within each of the grand divisions of the Union—would in two years supply the demand, that period being deemed amply sufficient for such a course of instruction as to answer the objects in view. Thus, military beneficiaries being taken from every brigade in the United States, and instructed under the superintendence of the War Department, would carry into every district of the Union a uniform system of discipline and organization, the desideratum, doubtless, contemplated by the framers of the Constitution in assigning control over the subject to Congress. The surplus of educated officers which would soon occur would be ready to supply vacancies in the offices of brigade inspectors, or, by a regulated routine, might be made to act as a salutary stimulant to the incumbents, or, in any event, would answer the exigencies of the State in future times of war.

Thus would be furnished and kept up, at a moderate expense in comparison with the great public objects attained, a perennial source of military academicians to keep up schools of military science within the precincts of every brigade. This measure, by raising the standard of military qualifications to

the point of commanding public respect, would at the same time convert the now despised militia commissions into diplomas of honor, for which there need be no fear of a want of competition among the intelligent and respectable class of citizens—the only class from which officers ought to be taken.

It would not be the least of the advantages of this scheme that it would dispense with the present infrequent and worse than useless musters. They are, in truth, instead of schools of practice, schools of insubordination and vice, where the first and simplest duties of a soldier are rarely, if ever, taught. Nor is it conceived that it would be necessary to call the militia together more than once in every year to register and to class them.

By this system, which overlooks the minor and more easily attained accomplishments of the many whose province is to obey, and is directed to the more difficult and important qualifications of the few who are to command, many of the difficulties are gotten over hitherto considered formidable in the way of organizing an efficient and safe military power for national defence. It prepares the first requisites and the most essential elements of an efficient army, without deranging the order and industry of civil life; and, by the diffusion of these elements into every district of the Union, it guards against all tendency to the growth and establishment of a military caste—that feature of a standing army so justly alarming to every free people.

In forming this corps of officers there are many reasons in favor of issuing no higher commission than that of captain. It would be recommended by economy, as it would probably be found indispensable to give pay and rations during the period of training. But, as the course of instruction would embrace the whole routine of the duty of field officers, the community would obtain at the price of the pay and rations of platoon officers all the qualifications necessary for the commandants of battalions and regiments whenever a state of war might require them in the field.

The economy of this arrangement, however important, bears no comparison with the advantages resulting in another way. By leaving the higher appointments vacant until the exigencies of war demanded the best talents and choice spirits of the land of every profession and occupation, every class in society would find the course of honorable ambition in the service of the country open before them; and experience has shown that, although a well-regulated system of military schools may be confidently relied upon to make subalterns, the Author of Nature makes generals, and that times and events draw them forth from every walk in life.

As it will hardly be doubted that such a system as is here proposed would bestow a much higher degree of military knowledge on the platoon officers than is now possessed by even the higher grades of field officers, it is inferred there could be no possible injury to the public interest by devolving all the functions of local police, as well as the peculiar duties now assigned to the commandants of battalions and regiments, to the first and second captain, by seniority, within each regimental district. The few duties now performed by the brigadiers might be transferred to, and could be easily performed by, the adjutant general. The present complex system of company, battalion, and regimental musters would give place to an annual general muster, the sole object of which would be to form in the first place, and afterwards to correct the classification, in order to make out the returns to the adjutant general's office.

The first division of the first class should be designated as the first to be called out at all times when the exigencies of the country required it. This class, wholly composed of the young and unencumbered with the relations of married life, possessing the ardor and docility of youth, with the essential knowledge of fire-arms, (to aim with precision and fire with effect, so universally understood by our people,) would have little more to learn than the mere graces of the manual and the march; and these, with skilful and well-trained platoon officers, would require but a few weeks. It may be here remarked, that this classification would also give, in the highest degree, all the advantages of that homogeneity in the character of troops so favorable to the birth and growth of the *esprit du corps*—the salutary stimulant and vital principle of gallantry and enterprise in armies.

But none of these anticipations can be realized without extending the tour of service. In the short tour of three months fully one-half of the time will be consumed, even with the best officers and utmost assiduity in preparing raw militia for any degree of efficient duty; so that under the most favorable circumstances the three months' tour will be rendering, in effect, but six weeks' service. To depend upon an army which, in its organization, contains the principle of its own annihilation quarterly, and whose efficiency at best cannot be counted upon for more than half the term of its nominal existence, to oppose a force constituted as is customary in modern war, is too manifestly idle to require argument; and if the evil consisted merely of the inefficiency of this part of our system, this branch of the subject might be dismissed; but it is also the most wasteful of life, as well as destructive of treasure—the sinews of war.

One of the most important duties to be learned by a soldier is to take care of his health and provide for his comfort. Universal experience has shown that a three or six months' tour is too short to enforce this essential branch of discipline. This was proven beyond controversy by the relative degrees of mortality in the militia and the regular army everywhere during the late war.

A tour of twelve months, especially with such materials as would constitute the first division of the first class by the proposed classification, would obviate the above objection.

In youth habits are more flexible, as well as the disposition more docile, and the term of a year would be long enough to impress the necessity of thorough conformity to all the rules of discipline, as well those relating to personal habits as military duties in the field. With such a corps of officers as this system would provide, co-operating with the proposed classification, the interval between the beginning of the year and the usual season of field operations would be sufficient to prepare an army, if not of quite equal skill, of superior morals to veteran mercenaries.

Volunteer corps should be encouraged where the denseness of the population would admit of mustering often enough to train and discipline them thoroughly. And for other reasons might be chiefly confined to the towns, where I should think it advisable for the whole body of the militia to be put upon the establishment of regular trained bands.

Many of the objections to volunteer corps in the country do not apply with equal force to the towns; but details would here be out of place, and I will close this mere sketch of the outlines of a system which, it will be perceived, applies only to the body of regular militia of the line in the interior of the country, scattered thinly over its extensive surface.

I have the honor to be, &c.,

JOHN H. COCKE.

Colonel BERNARD PEYTON, *Adjutant General of Virginia.*

RICHMOND, August 19, 1826.

SIR: Absence from town and subsequent severe indisposition have hitherto prevented me from attending to his excellency's request relative to the circular enclosed by you from the honorable the Secretary of War, relating to the militia. I most sincerely regret that my little experience in military matters will prevent me from suggesting anything from which any benefit can flow; but, uniting most heartily with the Secretary in the maxim that a well-disciplined militia is the true defence of a free people, I feel myself compelled, not only from a desire to attend, in all respects, to his excellency's wishes, but from a sense of duty, to answer as well as I can the questions propounded, and to make such suggestions as have presented themselves to my consideration. In answer to the first question, viz: 1. What is the number of your militia?—I imagine that the object of the question is to ascertain the aggregate number of the militia of each State, and that, I presume, the annual return of the adjutant general will show. 2. Are they organized in strict conformity to the act of Congress? Answer. They are. 3. Are the regular or volunteer militia most efficient? Answer. Never having served in camp during the war, I cannot speak from experience, but I think I should be disposed to give the preference to the regular militia, unless my whole command should consist of volunteers, and they should be uniformed; in that case I should prefer the volunteer militia, for I have ever observed that those companies which are uniformed seem to partake more of the feelings and character of soldiers than those which are not. 4. Is there any preference given for entering volunteer corps? Answer. There is not. 5. Does the establishment of the volunteer militia operate injuriously upon the regular militia? Answer. The volunteer militia having no greater privileges than the regular militia, of course no injury can result. 6. What proportion do the volunteers bear to the regular militia? Answer. The annual return of the adjutant general doubtless shows. 7. Would it promote the efficiency of the volunteer militia if they had the power by law of making by-laws for their own government? Answer. I think not. 8. Would the classification of the militia be an improvement—the one to be called active, the other sedentary? Answer. I do not exactly understand the idea intended to be conveyed, but I should prefer the present plan of making all the militia subject to the same description of duty. 9. In making the classification, should age, or the married state, or single state, form the distinction? Answer. The answer to the last question will suffice for this. If the classification should, however, take place, age, undoubtedly, should be the principle upon which it should be made. 10. If age, what the proper periods? Answer. From eighteen to fifty. 11. Would it be an improvement to issue commissions only to inferior grades in time of peace; if so, what should be the highest? Answer. I think things are better as they are. 12. Is not the period of service of three months only on one tour productive of great sacrifices of life and treasure, and productive of inefficiency? Answer. It must be so, for the plainest of all reasons, viz: Because new drafts, ignorant of the hardships they have to encounter in camp, do not make preparation for their comfort, and the very change of habit and climate often produces disease; disease produces despondency; despondency, listlessness and a longing after home, which, if it is not, as it often cannot, be gratified, so affects the mind and constitution as very frequently to result in death; and thus the time which should be employed in training and discipline is consumed in pining over their real or imaginary griefs. Not so with a man who has been accustomed to a soldier's life. He knows the difficulties he has to encounter, and provides against them; he is not so liable to disease, and if he is he can better bear up against it. The loss of life in an army necessarily carries with it the loss of treasure, for the ranks must be filled, new drafts must take place, and, consequently, new expenses must arise in transporting these drafts to the place of rendezvous. Inefficient, because disease prevents the drafts from acquiring a knowledge of the duties of a soldier, and produces an inevitable relaxation of the discipline and wholesome restraint of an army. 13. If so, to what period might it properly be extended? Answer. If the object be to perform camp duty, I should say six months from the time they reach camp, and the exigency should be very strong, indeed, which, in my opinion, would justify their being kept longer from their homes; for while the object be to make efficient militia, it surely cannot be the design to make them regular soldiers. 14. What are the regulations of your State as to training? Answer. I presume they have been made known by the adjutant general, and I therefore suppose a particular answer to be unnecessary. 15. From your experience, are frequent musters advantageous to the great body of the militia? Answer. According to the present system, they are, in my opinion, decidedly injurious. 16. Would it be an improvement to confine the instruction to the officers exclusively? Answer. I think so, decidedly, if the instruction be given to the officers of each brigade assembled. 17. Is the system of infantry tactics directed by law universally pursued? Answer. For many years past there has been no regular system in Virginia, and so many changes have taken place in the system of the army of the United States that I do not believe that the militia know what the system is which has been, if any has been, directed by law. 18. What system of exercise or instruction of artillery have you practiced or followed, what are its defects and remedies? Answer. I have never acted as an officer of artillery, and am personally unacquainted with the mode of drill or instruction, and I imagine that each officer commanding a company has his own system; certainly there is no uniformity in it. 19. What system of cavalry tactics have you adopted, what are its defects and remedies? Answer. The same as the last, viz: none having ever been established by law, each captain selects for himself.

Thus, sir, I have endeavored to answer, as succinctly as possible, the questions propounded by the honorable Secretary of War. I would suggest that the difficulty of training the officers by brigade, which seems to be approved on all hands, and the objection to which has hitherto arisen from the expense attending it, may be removed in a manner which I think would be by no means burdensome to the people, and in fact would subject them to no additional expense, while it will relieve them from the time they lose by their attendance upon muster, the necessary expenditure of considerable sums of money, and the dissipation which too generally attends such places. Suppose that all the musters except one regimental muster per year be dispensed with, and that that should be held more particularly that each man should know the company to which he belongs and the captain who commands him than for exercise: would not each man who is subject to militia duty save the time which is now consumed in inefficient musters, and the money which he is oftentimes inevitably compelled to expend at the place of muster? That it is indispensably necessary to have the officers well trained to make good troops is admitted by all, and how can they be so well trained as by brigade in camp, where they learn not only the mere evolutions of of a regiment, but the whole duty of the army? It will be objected by some that many officers who would be disposed to hold commissions, if they could remain at home and be exposed to no extraordinary inconvenience, would throw them up if they were called upon to leave home for a fortnight; I think very differently; I think that if the officers could fairly understand that there would be a certainty of acquiring

any substantial useful information, that it would be the motive to accept and to hold their commissions. It would seem to me that, by bringing the officers of the different regiments together in camp, a spirit of laudable emulation would be excited among them, and that the happiest effects would flow from it. If, however, there should be some among them who would object to the performance of the duty on account of the inconvenience, let them resign; we are better without them.

But how is all this information to be communicated? By the appointment of an adjutant and inspector general with three or four assistants, who shall ultimately visit the respective brigades in the State, and conduct the drilling of the officers, under the superintendence of their respective brigadier generals. How is all this expense to be defrayed without saddling the State with an enormous debt? for it is presumed that the adjutant and inspector general and his assistants are to receive adequate salaries, and that the expenses of the officers in camp are to be paid by the public. In the first place, it will be recollected that the State has to pay out of the treasury annually about twenty-five thousand dollars on account of the militia, which seems to be considered a useless expenditure. This sum is expended for the pay of an adjutant general, brigade inspectors, adjutants, sergeant majors, &c., &c. I would withdraw the pay from the brigade inspectors, adjutants, &c., &c., and place them upon a footing with all other officers; and I would recommend the enactment of a law making it the duty of the county and corporation courts to lay such additional levy either upon the taxable property of the county and corporation generally, or upon the property of those only who were subject to the militia duty, or a capitation tax, as would pay the expenses of the officers of their respective counties and corporations, and the surplus, if any, should be applied to the pay of the adjutant and inspector general and his assistants, the purchase of the necessary camp equipage, for music, &c., &c.

Will this be objected to by the people of the counties when they take into consideration the relief they obtain from the exemption from muster, and the savings necessarily expended as before mentioned? I think not; for I have no doubt that there will be more money saved to the individuals of the county than they have now to pay for fines, &c., independent of the time saved. Will it not be an improvement to reduce the number of our cavalry and confine their organization principally to the country between the mountains and the seaboard? What is the consequence of the present system? Why, that as by law each regiment may have a troop attached to it, there are frequently two troops in a county, neither of which may perhaps ever be called into service, because that species may not be required; and thus they are, in effect, exempted from the performance of any duty, while their brethren of the militia are called on regularly to perform theirs. May not the same thing be said of the artillery? Would it not also be advisable to confine the organization of the rifle corps principally to the country beyond the Blue Ridge, where nature seems to have turned out almost every man a skilful marksman? I think it would be vastly desirable to hold out all reasonable inducements to the volunteer companies in and about our towns in the lower country to keep their ranks filled, on account of our domestic population, such, for instance, as exemption from serving on juries to all those who would join and continue in them; and I would suggest the propriety of allowing as many volunteer companies to be raised as practicable, with the positive understanding that, if they were not completely equipped according to law by a given period, they should invariably be dissolved. The rifle companies should be organized into regiments; and I should think that the uniform of the cavalry, artillery, infantry, and light infantry, should be fixed by law, or by the executive, and that volunteer companies of each species of force should wear the uniform fixed on for each, and none other whatever. The very idea affixed to a volunteer company is, that it shall be uniformed; and if so, why not as well wear the uniform prescribed by the proper authorities as that of their own selection? Volunteers are but militia, and why should they be exempted from that necessary subordination which is extended to the main body of the militia? And in determining upon a uniform for the respective corps of the militia, I would recommend that it be distinct from that of the army of the United States, if for no other reason than that of permanency, for it will be found that the uniform of the army of the United States is perpetually undergoing changes, the expense of which it cannot be expected that the militia will be willing to incur. Nothing can be more desirable than the establishment of a corps of light artillery; for the promptness and celerity of its movements, uniting the double character of cavalry and artillery, unquestionably render it the cheapest and most efficient species of force that has ever yet been organized, and thousands of dollars and of lives would have been saved to Virginia during the last war if we had had that species of force properly organized. Do not justice and policy require that the militia should be clothed when ordered into camp? Do we not all know that, with all our attachment to the form of our government, we all dislike very much to be draughted as militia to serve in camp, and that, in fact, a great many of those are very poor, and that they consider it a great hardship that they should receive no clothing, who are subject to the same hardships and privations as the regular troops, and oftentimes much greater, who receive a regular supply? I think it the true policy of the government to remove as many of such complaints as practicable, and in doing so, it might furnish a kind of clothing that might constitute a species of uniform, which would have a very happy effect.

In conclusion, I would recommend that all the surgeons and their assistants to every corps should be appointed and commissioned by the executive. The surgeons in all armies have been always looked upon as one of its most efficient aids, and under our present system that whole branch of the service is entirely under the control of the colonels of the regiments. I think this is not right. And thus, sir, have I finished this long and imperfect communication, almost the whole of which has been written upon a sick bed.

I am, sir, very respectfully, your obedient servant,

J. B. HARVIE, *Brigadier General 2d Brigade.*

ADJUTANT GENERAL'S OFFICE, *Raleigh, North Carolina, August 9, 1826.*

SIR: Your circular letter of the 10th of June, addressed to his excellency the governor of this State, was referred to me, with a request to furnish to your department a reply to the several inquiries contained therein. In compliance with his request, and with a desire of affording every facility in my power in aid of the views of the government in relation to this subject, I take much pleasure in subjoining the following answers to the questions propounded.

*Question 1.* What is the number of your militia?

*Answer.* Sixty-one thousand seven hundred and ninety-eight.

2. Are they organized in strict conformity with the act of Congress? If they differ, in what?

*Answer.* They are, with one exception. A greater proportion of cavalry is authorized by an act of the legislature of the State than prescribed by the act of Congress.

3. Are the regular or volunteer militia most efficient?

*Answer.* The volunteer militia are composed of better men, commanded by officers better qualified to command, and on all occasions, when calls upon the militia for active service have been made, were found to be the most prompt in turning out and the most efficient in the field.

4. Is there a preference given for entering volunteer corps?

*Answer.* None under the laws of this State.

5. Does the establishment of the volunteer militia operate injuriously on the regular militia?

*Answer.* Volunteer companies in this State, without the towns, are, upon the whole, injurious to the regular militia. They are generally of short duration, raised in a moment of excitement by the zeal and exertions of a single individual, on whom the command of the company usually devolves. Equipments corresponding with the high feeling of the moment are adopted; they flourish till the excitement is over, which generally subsides with the abatement of the ardor of the commander or with a change in the command; vacancies which then occur in the ranks are not easily filled; the heavy expense of equipments, and a scattered population out of which the company was formed and have to be supported, are difficulties found operating with effect; and in a short time the company becomes deranged, and the elements which composed it being dissipated, it is often years before they are again collected into the body of the regular militia.

The volunteer companies of the towns have not to contend with the same embarrassments. The population out of which they are raised are not only concentrated, but afford a more choice selection of men, who are better able to bear the expense, and to whom the duties, being performed at their doors, are attended with less sacrifice of time and of convenience. To the towns to which they belong they are in danger a defence, in peace an ornament, and hence are identified by the inhabitants with themselves, both by pride and by interest. Being thus at once the honor and the safety of their fellow-citizens, they have sources of life and animation which companies formed out of a scattered population can never enjoy.

From this view of the comparative importance of the volunteer militia when thus differently circumstanced, I conclude it would be advisable that the limits within which they are now authorized should be so narrowed as to confine them altogether to the towns, or to sections of the country where the population is very dense.

There is another point of view in which the bearing of the volunteer upon the regular militia may be worthy of being noticed. The facilities afforded the former in the choice of the men of which their companies are composed and in acquiring splendor of equipage give them a superiority of character (which becomes more apparent upon the same parade) to which no spirit of emulation in the latter, circumstanced as they are, can aspire with the least prospect of attaining. Thus discouraged in their hopes on one hand and depressed with a sense of inferiority on the other, their officers, if possessing the pride common to the most deserving, are either influenced to withdraw, or those of similar feelings prevented from entering a competition attended with so much discouragement and promising so little gratification; others of inferior capacity and less enthusiasm succeed to the command. In this way, I apprehend, no small injury is sustained by the regular militia. I would therefore suggest the propriety of organizing the volunteer militia into a separate corps, forming no connexion with the regular militia, which would probably have the effect of preventing the injury which it is believed is experienced from its service.

The remarks under this head are not intended to embrace rifle companies. They exist under very different circumstances in this State, and are confined mostly to the western frontier counties, where rifles are the principal fire-arms used by the inhabitants, and not unfrequently the case distinct companies of the regular militia are converted into companies of this description.

6. What proportion do the volunteers bear to the regular militia?

*Answer.* Light infantry and grenadiers one-twentieth, riflemen one-thirtieth.

7. Would it promote the efficiency of volunteer corps if they had the power by law of making their own by-laws for their own government?

*Answer.* I can see no objection to their being so authorized.

8. Would a classification of the militia be an improvement, one to be called the active and the other the sedentary?

*Answer.* A classification of the militia in this way, it is believed, would be an improvement, provided the active class is not made so large as to be unwieldy and inconvenient to be subjected to such a course of discipline as may be necessary to render it effective.

9. In making the classification, should age or the single or married state form the distinction?

*Answer.* Age.

10. If age, what the proper periods?

*Answer.* Between nineteen and twenty one. Young men of this age, it will be admitted, are more susceptible of being disciplined, more capable of performing and enduring active service than men of more advanced years; and to whom service, either in war or in peace, is attended with the least sacrifice of interest or of feeling, having passed through their course of education, and before they have entered upon avocations or formed connexions to tie or endear them to their homes.

This description of the militia will be found to compose about one-eighth of the whole number enrolled, affording a company's command within each regimental district of the regular militia, and would constitute for defence, in every State, as large a force as any emergency of the country will probably ever require. I would propose that they be organized into companies and regiments, with such a staff as may be necessary, and, that their discipline may be adequate to the important station they will occupy in the defence of the country, be required to perform a term of duty in camp of about four weeks in two successive seasons before they are returned again upon the rolls of the regular militia.\* By such a process

\* A return of the first enrolment to be made, say January 1, four months previous to the time of encamping, by the captains of the regular militia to the officer charged with organizing the class, will consist of all within their respective districts between nineteen and twenty-one. By the same time in every year thereafter parents and guardians be required to return those who have arrived at the age of nineteen during the year to the captain of the district in which they reside, and he (the captain) to return the same to the captain of the classed militia of whose district his composes a part. The term of this enrolment not to expire till they shall have passed through two encampments in successive seasons. Though some will be discharged a short time before and some a short time after they arrive to twenty-one, yet a greater inconvenience would otherwise be experienced by many going off the roll before they had served more than one term, which would be the case with all who arrived to nineteen after the annual return was made and before the time of encamping in the same year.

of disciplining the whole of the regular militia, after the expiration of the first ten years, will have passed through eight weeks of training in camp, have become experimentally acquainted with the duties of a soldier, formed at a period of life when impressions of discipline are most lasting. This system of training is active and well calculated to bring into view, by its general operation, young men of military genius, who otherwise might have remained undiscovered in the large mass of an inactive militia, and to whom a command, after the expiration of their term of classification, will be both gratifying to them and an acquisition to the corps. That the benefits anticipated by this classification of the militia may be fully realized, it *must* receive support from the pecuniary means of the government. The officers should receive such pay as would compensate them for their time while employed in camp,\* and the privates their rations, or pay in lieu thereof. When thus aided, but little difficulty will be experienced in getting officers qualified to command, and in reconciling the privates (or those who have to feel the inconvenience of their service) to such a course of discipline, which otherwise would present embarrassments in the operation of this system too formidable to be sustained.

It is conceived hardly practicable to hold the militia in any permanent organization of importance to the country without the aid of funds judiciously directed. The fallacy of relying on the States for the voluntary application of their pecuniary means to this object has been too clearly shown from the experience of the past to be looked to in future as a source of dependence. The States entertaining and acting upon different views in relation to this subject, growing no doubt out of a difference in situation and circumstances, will in effect be productive of results equally different. While some may be liberal, others will be sparing, and probably a greater number will afford no support at all. Consequently the degrees of discipline of their respective militia will be found as various as their means of support.

As the militia compose a part of the force to be employed in the general defence of the country, it would seem expedient that the general government, who direct their operations in war, should in peace dispense the means necessary for their preparation, affording to all equal advantages; that when called into the same service, the militia of one State might not be degraded by the superiority of another, nor the disciplined embarrassed in their operations by the want of it in others.

11. Would it be an improvement to issue commissions only to inferior grades in times of peace; if so, what should be the highest?

*Answer.* Patriotism or the hope of distinction by military achievements are not, it is believed, the principal motives which influence men to accept of commissions in the militia in time of peace. Titles, with the seeming importance they give to an officer, particularly when on the field with his command, have also their weight; and the estimation in which they are held depend both upon their relative grade with others and the facility of acquiring them. I should therefore conclude that were there no commissions issued to the general officers the relative rank of the inferior grades would become more elevated, consequently better filled, and productive of more beneficial effects to the militia; for it is in the lower grades where the greatest inconvenience is experienced from a want of capacity in the officers.

12. Is not the period of service for three months only, on one tour, attended with great sacrifice of life and treasure, and productive of inefficiency?

*Answer.* Universal experience has proven such are the usual consequences.

13. If so, to what period might it properly be extended?

*Answer.* Eight months would be a reasonable time.

14. What are the regulations of your State as to training the militia?

*Answer.* Companies are mustered from four to six times a year, regiments once, and the officers trained by the adjutants one day in the year, brigades reviewed by regiments once in three, and divisions once in four years.

15. From your experience, are frequent musters advantageous to the great body of the militia?

*Answer.* The discipline of the great body of the militia can sustain no injury by any change in this respect, as they acquire none under the present mode of training.

16. Would it be an improvement to confine the instruction to the officers exclusively?

*Answer.* When officers are subjected to the duty of privates without the honor of commanding as officers, except in active service, there would probably be much difficulty in getting more to accept of commissions in times of peace, under such circumstances.

17. Is the system of infantry tactics directed by law universally pursued?

*Answer.* Owing to the high price of the work, it is used only to a limited extent in this State.

18. What system of exercise and instruction of artillery have you practiced or followed? What are its defects and remedies?

*Answer.* For want of field-pieces the most of the companies in this State, according to the provisions of an act of the legislature, are trained as infantry. There are only two companies trained as artillery. They being recently organized, I have not had an opportunity of ascertaining what system they observe in training, and the State has prescribed none.

The legislature of the State have prescribed no system of cavalry exercise.

I have the honor to be your obedient servant,

BEVERLY DANIEL, *Adjutant General of North Carolina.*

---

EXECUTIVE DEPARTMENT, *Columbia, S. C., November 22, 1826.*

SIR: The circulars issued from the War Department, and received by me, have been distributed, as requested, to the most distinguished military men in this State, with a request that they would answer the different questions propounded by you and give all other information that might be deemed valuable. In compliance with that request, I have received from Major General John B. O'Neill the communication herewith enclosed. Others to whom your circulars were sent have not been heard from, but it is supposed that they have made returns to you at Washington.

I have the honor to be, respectfully, sir, your obedient servant,

RICHARD J. MANNING.

HON. JAMES BARBOUR, *Secretary of War.*

\* This system contemplates the encampments to be by regiments.

SPRINGFIELD, November 3, 1836.

SIR: In compliance with your request, I have considered the questions proposed by the Secretary of War, and give you the result of my reflections.

The number of the effective militia of the State of South Carolina will appear from the return which will, I presume, be made out and forwarded this fall. Conjecturing from the returns of the 5th division, I should suppose the effective strength must exceed forty thousand.

The organization of the militia is in conformity with the act of Congress, and so far as I know, I believe there is a strict compliance, or an attempt to comply, with all the requisites of the act. The requisition, as to arms and accoutrements, it is difficult to completely meet. The act requires every citizen, when enrolled, to furnish himself with a musket and bayonet, cartridge box and knapsack. Muskets and bayonets cannot be procured, and if they could, the citizens would very unwillingly submit to the expense. In consequence of this, shot-guns and rifles, the ordinary arms with which farmers provide themselves, are substituted. Shot-pouches, shot-bags, and horns, generally supersede cartridge boxes. Within a few years an attempt has been made to introduce cartridge boxes. The result of the experiment has been, that we have them of all sizes and fashions, and generally so badly constructed as to be of no value for any service. Knapsacks are easily procured, but there is a great aversion to wearing them at musters, and it is wholly impossible to procure uniformity in this article. Anything which will do to be called a knapsack is produced and exhibited to the inspecting officer. A uniformity in arms, which is so essential to correct discipline, can never be obtained until the government places arms in the hands of the citizen soldiery.

The volunteer militia are much more efficient than the regular. The volunteers are generally composed of select men; their association is voluntary, and the *esprit de corps* is calculated to make them emulous of distinction. They are hence better trained, and have more reliance on each other. The circumstance of being in uniform has also a great effect; it is regarded as a distinction, and it is rare, when individuals or corps are distinguished for or by anything, that they do not endeavor to equal the expectations which they suppose that distinction is calculated to raise. They regard their musters with pride, and think them useful and necessary. The regular militia are too much in the habit of regarding their company musters as an irksome duty which confers no distinction and is of no value. So that they have the name of mustering, and are exempt from the fine imposed by law, it is all that is desired. By attention on the part of the regimental officers, a different feeling may be excited; and when once induced to believe that their musters are of value, and that they are improving and meriting praise, no troops can be more zealous in the discharge of their duty than the regular militia. Frequent instances have been presented to me where whole regiments have been brought to a high sense of duty, and were in a state of most excellent training.

There is no preference given for entering volunteer corps. The establishment of volunteer corps does not operate injuriously to the regular militia; on the contrary, I have thought it of great benefit. A few volunteer corps in each regiment generally exhibit a good example of attention to and improvement in duty, and the effect of the example is to induce imitation. Regiments without any volunteer militia always perform worse on review than those in which volunteer companies are organized. The regular militia cannot be reduced below thirty, rank and file in each company. No disadvantage at present occurs to me from permitting the establishment of volunteer militia. If it was practicable to induce the whole body of the militia to uniform, then volunteer corps would be unnecessary and might be injurious.

I think the volunteers are about one-tenth of the regular militia.

It would certainly promote the efficiency of volunteer corps to give them the power of making by-laws for their own government. This power should not enable them to introduce any change in the duty required by law, or in the fines to be imposed for delinquencies. The government of a volunteer corps requires many regulations which no general law could make. Of its peculiar situation each corps would be the best judge, and would be capable to legislate for itself.

A classification of the militia would be, I am inclined to think, an improvement. From 18 to 35 might be the active, and from 35 to 45 the sedentary. It is between the first two periods that most improvement is to be expected. The ambition and activity of youth are better calculated for excellence in drill than the prudence and steadiness of age. By the time a man arrives at 35 he will be either well trained, or he never can be trained at all. Between the ages of 18 and 35 would generally compose a militia army; beyond that age, if required to go into service, the opportunity of substitution would leave the greater portion at home. Persons within the ages first mentioned are those, too, who could best spare the time to attend drills. If a classification of the militia should ever be attempted, it would be desirable to do away company beats, and that training should be altogether in regiment. Each company in the active class should then consist of 100 rank and file, and they should be permitted to elect their company officers, and promotion to the grade of colonel should be by seniority.

The issuing of commissions to inferior grades alone I should not suppose could be any improvement. The superior grades are of as much importance, in giving to the militia efficiency, as the inferior grades. The presence of a field officer at a company, of a general officer at a battalion or regimental muster, excites emulation, and their praise or censure does more good than all the fines or other punishment which can be inflicted. It is expected of superior officers that they should be able to correct errors and give instruction; and hence, if they do their duty, they must be of some value.

The period of service, for three months, is certainly too short, and I think it might very properly be extended to twelve. It cannot be expected that in three months men, who are taken from all the different walks of life, can be trained so as to approximate in any degree to regular troops. In that time they can scarcely become accustomed to the duties of the camp, and are but a step removed from the irregular state in which they go into service. They cannot therefore be as useful in service, and it follows, conclusively, where men are not trained, that it is a sacrifice of lives to bring them into action. The money paid for such a tour is too often money thrown away. I incline to think that twelve months would be a better period, because three months at some seasons of the year would be equally as injurious to a farmer as twelve; and if for the latter period the militia were called into service, all that portion who could not leave home with convenience would procure substitutes who, with the training of twelve months, would become excellent soldiers. Again: officers by serving such a tour would acquire a knowledge of their duty, which would be not only of great value in action, but also on their return home, and which will be never acquired in three months.

The militia in this State are required to muster in company at least once in every two months, and in

regiment or battalion twice every year; each regimental muster is to be preceded by one day's drill of the commissioned and non-commissioned officers.

In this State we have not heretofore experienced as great advantages from frequent musters as we may perhaps hereafter. I am induced, from experience, to think that our company musters are of no value. Training in battalion or regiment would be better. Instruction to the officers alone could not dispense with musters. An officer needs practice as well as theory. Non-commissioned officers are, to the full extent, as necessary in training as commissioned officers. That the guides should be well instructed is, indeed, of more importance in the performance of evolutions than the subaltern company officers. I have sometimes supposed that if the militia were compelled to encamp and muster in battalion or in regiment twice in every year, for four days at each time, that it would be a great improvement. In all events, if the commissioned and non-commissioned officers of each regiment were compelled to encamp once in each year for a period not exceeding six days, it would furnish an opportunity of receiving and communicating instruction much better than any which we at present possess.

The State furnishes to each officer a copy of "The Rules and Regulations for the Field Exercise and Manœuvres of Infantry." It is universally pursued. It is hoped the State will, at the ensuing session of the legislature in December, furnish copies of the revised edition, lately published, under the title of "Infantry Tactics." Until the State does so, it cannot be introduced among the militia of this State unless Congress should by law authorize it.

There never has been in this State any uniform system of exercise and instruction for artillery. The officers of artillery have been left to the exercise of their own judgments in the selection of a system of exercise and instruction. Hoyt's system of cavalry tactics is the one generally adopted.

As the preparation of a system of exercise and instruction for artillery and cavalry is already before a board of officers, it is unnecessary that I should attempt to point out any defects or suggest any remedies.

Yours, respectfully,

JNO. B. O'NEALL.

His Excellency RICHARD J. MANNING.

---

STATE OF CONNECTICUT.

LITCHFIELD, *November 30, 1826.*

SIR: I have already had the honor to acknowledge having received your letter of the 11th of July, 1826, requesting information respecting the organization of the militia of the State of Connecticut, and its present condition.

On the 14th of August I sent copies of your communication to the major generals, brigadier generals, and the adjutant general, and to a few other gentlemen not at present holding official stations, from whom I hoped to derive useful aids on the interesting subjects of your reference.

The unusual state of the weather in this part of the country has imposed extraordinary burdens on all men of business, which, as I presume, have delayed some of the replies which I expected; but I have thought it best to transmit such as have been hitherto received.

The militia of this State is at present arranged as follows:

The general staff consists of a captain general; a lieutenant general, with two aides-de-camp, each; an adjutant general, with the rank of brigadier general; a quartermaster general, with the rank of lieutenant colonel; a commissary general, with the rank of lieutenant colonel; a paymaster general, with the rank of major; eight judge advocates, being one for each county—the whole comprising a general staff of eighteen. Connected in some measure with this staff, as being under the special command of the captain general, there are two companies of foot guards and two companies of horse guards which perform special services at Hartford and at New Haven, at which places the legislature of the State hold their stated sessions.

The militia systems adopted by Congress on the 8th of May, 1792, and 12th of May, 1820, were soon adopted, and the rules of discipline in this State have been conformed thereto as far as practicable.

The latest perfected general return which I have received is dated in November, 1825, a copy of which has, as I presume, been transmitted to the Department of War. No essential alteration can have since occurred. By this return it appears that the militia are divided into three divisions, commanded by major generals, with a staff, consisting of aides-de-camp, division inspectors, and division quartermasters. The infantry are distributed into six brigades, commanded by brigadier generals, with a staff, consisting of aides-de-camp, brigade majors and inspectors, and quartermasters. The brigades are divided into twenty-four regiments, consisting of two battalions each, commanded by colonels, lieutenant colonels, and majors, assisted by a regimental staff of adjutants, quartermasters, paymasters, chaplains, surgeons, surgeons' mates, also sergeant majors and quartermaster sergeants. The regiments are composed of companies, commanded by captains, lieutenants, and ensigns, who receive commissions from the State. The non-commissioned officers of companies are sergeants and corporals, to which may be added drummers, fifers, and buglers. The number, by the last return, of privates was 15,707, and, with commissioned and non-commissioned officers, form an aggregate of 20,580 men enrolled as the infantry of the State.

The cavalry are distributed into five regiments and twenty-two companies, and are commanded by colonels and majors, captains, lieutenants, and cornets, who are commissioned officers. These companies, with their non-commissioned officers, form a body of 810 privates and an aggregate of 1,124 men. The cavalry are annexed to the brigades of infantry.

The horse and light artillery constitute a separate corps, and together form a brigade, commanded by a brigadier general, with a staff similar to the brigades of infantry. The horse artillery are now formed into eleven companies which will perform duty as cavalry until the state of the arsenal will admit of their being supplied with ordnance. The light artillery are formed into twenty-eight companies, each body is formed into three distinct regiments, commanded by colonels, lieutenant colonels, majors, with captains, lieutenants, and ensigns, and with staff and non-commissioned officers corresponding with the regiments of infantry.

The three regiments of horse artillery form an aggregate of 731 men, and the three regiments of light artillery of 1,692 men, and both form a brigadier general's command of 2,423 persons.

The aggregates of the militia of Connecticut appear, from the return, to be arranged as follows:

The general staff.....	20
The infantry, including the grenadier, light infantry, and rifle companies of enlisted men.....	20, 580
The cavalry.....	1, 124
The horse and light artillery.....	2, 423
Total number of enrolled militia, in November, 1825 .....	<u>24, 147</u>

The enrolled militia of the companies of infantry are the basis of all these formations; every free able-bodied white male citizen, who is a resident within the State, (with the exceptions made by acts of Congress or of this State,) is liable to be enrolled in some one of these companies, from eighteen until he arrives at forty-five years of age. These companies are so located as to embrace the territory of the State.

The companies are numbered according to the dates of their respective formations, which determine their relative rank. On days of regimental or battalion exercise, the rules pointed out in the second article of the twenty-second chapter of the Rules of Discipline established by Congress in their resolutions of March 29, A. D. 1779, for posting officers to guards, are applied to posting the officers of the battalion companies, and are still retained in the statute of this State. But by an act of assembly passed in 1824, it is directed that, on days of regimental or battalion inspection or review, the companies shall take rank and be posted, according to Scott's system of military tactics as abridged by Lieutenant Colonel Pierce Darrow.

The companies of what may be called the standing militia are very tenacious of their claims to rank as they were established. They generally prefer to do duty under the command of the officers whom they have elected, and with whose usages and temper they are best acquainted.

The companies of grenadiers, light infantry, riflemen, cavalry, horse artillery, and light artillery are composed of enlisted men.

The captain general is not authorized to vary the limits of an established regiment, but he may, as the interests of the militia require, alter the limits of companies, form new companies, and reduce or disband companies on application for that purpose, although thereby the numbers of companies in different regiments may be increased or diminished. The manner of exercising this authority is to direct investigations through the agency of the adjutant general, after consulting the field officers, and the rule of decision is not to form new companies so as thereby to reduce companies before established below the complement of sixty-four privates for a company.

Appointments to office in the militia are made in the following manner:

After due notice from the commanding officer, sergeants, corporals, and other officers below the grade of ensigns and cornets, are chosen by the companies, and receive warrants from their respective colonels, who have power to degrade them to the ranks, upon complaint being made and proof of misconduct. Captains, lieutenants, ensigns, and cornets, are also chosen, or rather nominated, by the companies. The returns of company elections are made to the general assembly, indorsed on the orders issued for the choice of officers, which choice, if approved by the general assembly, establishes the company election, with the rank of the officer in the line of the militia. The effect of our system, therefore, is, that the rank of company officers is determined by priority of the general order directing the company to be led to a choice, the dates of which are expressed in their commissions, while the rank of the companies which they command depends on the priority of their organization, which is expressed by numbers, and is permanent.

Field officers, or those above the rank of company officers, are appointed by the general assembly without any previous nomination, but they are almost invariably advanced by regular promotions from company officers, according to the dates expressed in their commissions, and never otherwise, except for special causes. The effect is, that a high ambition is excited and preserved to rise by merit through the different grades of military rank.

All commissions are issued by the governor or captain general for the time being, and those issued to company officers express the day from which they respectively take rank. No commissions are issued to staff officers, excepting to brigade inspectors, who receive commissions, and are considered as captains in the line of promotion.

The adjutant general is appointed by the captain general. The quartermaster general, commissary general, and paymaster general, are appointed by the senate, on the nomination of the governor. They give bonds to the treasurer, with sureties, for the faithful discharge of their trusts.

Provision has been made by law for organizing and conducting courts-martial. A judge advocate is appointed in each county. A written report, containing all the proceedings, is transmitted to the captain general, who has the power of mitigating or remitting the punishments awarded. The records of all proceedings of courts-martial, with the final decisions thereon, are deposited in the office of the Secretary of State.

Litigations respecting questions merely military are heard and finally terminated by courts-martial; claims to complete exemption from militia service are heard and decided by a judge of the county court.

To this summary view of the organization of the militia of Connecticut I have the honor to add copies of the following letters, which I have received since your communication of July, 1826.

No. 1 and No. 2 are copies of letters received from Major General Ebenezer Huntington. This gentleman was a respectable officer of this State who served in the continental army during the whole period of the revolutionary war, and he served as adjutant general of this State from the period when the militia were first organized under the act of Congress passed in May, 1792, until June, 1823, when he resigned that office.

No. 3 is a copy of a letter from Major General Amariah Kibbe, jr., commanding the 2d division of Connecticut militia.

No. 4 is a copy of a letter from Major General Morris Woodruff, commanding the 3d division of Connecticut militia.

No. 5 is a copy of a letter from Brigadier General Andrew Welles, of the 5th brigade, annexed to the 2d division of Connecticut militia.

The experience and military rank of these gentlemen entitle their opinions to great respect in all arrangements affecting the militia, and which must necessarily be interesting to all the active and efficient population of this country.

If still more minute information is desired, it will be found in the statutes of this State, which are by

law directed to be transmitted by the secretary to the heads of the respective departments of the government of the United States.

An examination of our statutes will show that our militia laws are regulated by a precise system of legislation, adapted to the experience and habits of the people from an early period. The militia of this State are now as tranquil as at any period I have known. Their conduct and their rights are regulated by practical rules, which have been carefully settled, and, as far as my knowledge extends, generally satisfactory. So far as my agency has extended, it has been my endeavor to render these rules strictly impartial and uniform. The mode of posting companies on days of regimental and battalion inspection and review which was established in 1824 has not yet been universally or perhaps generally introduced, and it has occasioned some discontents. The want of ordnance to complete the equipments of the horse artillery is felt as a deficiency. Application has been made to the Ordnance department of the United States for *cannon*, which were proposed to be received in lieu of *muskets* in the distributions authorized for the use of the militia, but the answer was that the request could not *then* be granted.

The period during which men are required to be enrolled in the militia might, in my opinion, be reduced without diminishing the efficiency of the militia. Little or nothing is gained in military knowledge by men above thirty-five years of age who train in companies the officers of which are their sons or greatly their juniors in life. Any mode of *classification* would introduce distinctions opposed by public sentiment, and which of consequence would reduce the energy of the militia, and render our system more complex. This complexity would multiply the details of administration, and might lead to dangerous collisions of public opinion.

In devising a system for "*organizing, arming, and disciplining the militia*," it is necessary, in my opinion, to establish definite ideas of what is intended or desired from a *militia system*, and to consider how far changes can be introduced without impairing the energy which now exists on the one hand, or converting the *militia* into a *regular army* on the other, requiring a great expenditure for its support.

My remarks will be confined to the *militia of Connecticut*, where the men are required by law and are, in fact, assembled annually several times for *company exercise*, and once in each year in *battalions or regiments*, when they belong to regiments of infantry or cavalry. They are at present armed, equipped, and generally clothed in decent uniforms, all of which are provided at their own expense. Their arms are sufficient for common exercises and for ordinary service. Arms equal to any in the United States are deposited in the arsenal, ready to be issued on extraordinary occasions. Places for *parade* are established where companies assemble. The men all know *each other* and know their *officers*. *Standards and military music* are provided; *military spirit* and ambition are excited by encouraging a *company spirit*. This spirit is extended to *battalions and regiments*, and in a very considerable degree to *brigades*. The men universally understand the use of their *arms* and common *evolutions* and *tactics* in such a degree as to enable them to form and preserve a regular line. A knowledge of military science and tactics is gradually extending and improving. Inequalities and deficiencies unquestionably exist in different companies and regiments, but these are, I believe, diminishing. When different corps assemble, excellencies and deficiencies are noticed, and praise or blame are awarded by military commendation, and by impartial decisions of public sentiment. I have endeavored not to exaggerate the acquirements of our militia, but it is my firm opinion that, though *particular corps* in other States may be superior to ours, yet that, *taken as a whole*, the militia of no State in the Union excel those of Connecticut in order, equipment, or efficiency, and that any essential changes, especially such as would require *new arrangements* and *organizations* of the body would endanger the present system.

I will readily admit that our militia, taken by entire companies or corps, or even by detachments from them, would not constitute an *army which could remain long in the field* in opposition to *veterans* without an entire recomposition and new arrangement. A veteran soldier must be formed to different habits and character from a member of the militia. In particular, he must be able to live in tents or barracks, to prepare and preserve his food, his clothing, and his arms, and submit in all respects to a strict and exact regimen, without inquiring or seeking to know, or perhaps understand, the reasons of those movements by which his conduct is regulated. The opinion which I wish to communicate is that, although the militia of this State constitute the best materials for *forming an army*, they are not at present an *army*, capable of long-continued service in the field, and that no extra labors or expense ought to be imposed on them without an ample compensation for their privations and the interruption of their industry.

I have the honor to be, with great respect, sir, your obedient servant,

OLIVER WOLCOTT.

Hon. JAMES BARBOUR, *Secretary of War*.

No. 1.

NORWICH, September 2, 1826.

SIR: I have the honor to transmit herewith to your excellency my replies to the questions proposed by the Hon. Secretary of War, in a circular to the governors of the respective States and Territories, under date of the 11th July, accompanied by your excellency's favor of the 14th August, which came duly to hand.

On the question respecting volunteer corps, the classification of the militia, and the length of time for continuing detached troops in the field, I found it desirable to state the reasons which led me to my conclusions, in doing which I *may* have extended my remarks further than was expected, from the manner adopted by the Secretary in making the inquiry. Your excellency will perceive, in my reply to the first question of the Secretary, that I have referred to the last perfected returns in the office of the Adjutant General, and to the second and fourteenth I have been obliged to refer to the present existing militia laws, not possessing the information asked for.

On the subject of cavalry, I have more than once suggested to your excellency my opinion that too large a proportion of cavalry is permitted in the organization of the militia of this State, and manifestly injurious to the great body of the militia. Most freely I acknowledge that the men composing the cavalry are some of the best of our citizens for any and every kind of military duty, but, doing duty on horseback, are completely useless in a military point of view. The uneven surface of our State, divided into hills,

mountains, and dales, our enclosures being generally small, and surrounded with high stone fence, present obstacles to any considerable body of cavalry, but to our cavalry difficulties *insuperable*, from being permitted to use so poor a quality of horses.

To oppose an invasion by water they are of no use, being armed with swords and pistols; but if furnished with muskets, and doing duty as infantry, or if furnished with field-pieces, and doing duty as horse artillery, would be useful, particularly so as horse artillery; but I think the two regiments of horse artillery a full proportion of that description of troops for the few regiments of infantry in this State. I think that one company of cavalry of sixty privates attached to each brigade would be useful as videttes, patrols, or expresses, but a greater number useless. The *one* company from a brigade might be filled with good men, and *well mounted on horses owned by themselves*, which is not the case with our present cavalry. However useful cavalry may be in open champaign country, they are useless in garrison or in a siege, and their expense more than double the expense of infantry. If at any future period any increase of that description of troops should be deemed necessary, they might be augmented very speedily, and to almost any extent.

I think that four companies should as at present compose a battalion of artillery, but should give a decided preference to their being attached by battalion to each brigade, than formed into regiments and brigaded by themselves. The artillery companies are spread over the State, of course their dispersed situation prevents any contemplated advantage in *their muster by regiments* without great inconvenience and expense to both officers and men, which deters many from enlisting through fear of the expense attending the assembling large bodies for parade, and I apprehend their usefulness and efficiency would be increased by attaching them to brigades by battalion commanded by a major, the best possible organization for militia artillery. If in the field they can be assembled into larger bodies if wanted, or co-operate with horse artillery when necessary.

I believe your excellency is well acquainted with the fact, that, from the constant emigration of our military population to the western States, from the migration from one part of the State to another, by deaths, by resignations, by being superseded, by judgments of court-martials, and other causes, that, annually, the legislature has to issue about three hundred new commissions, which is an evil, and if possible ought to be prevented. If your excellency can suggest any mode to remedy the evil, it certainly would be very desirable.

If the regulations in Scott's System of Tactics had permitted the same permanent rank to companies according to their date of being *created or raised* as they have permitted to regiments, it would be attended with good effects, and prevented much heartburning in the militia. However proper and useful among enlisted men in the army, it is very inconvenient to located and enlisted militia companies, and is the source of unpleasant dispute at every muster of a regiment. I will close my long remarks, barely observing that a large proportion of our military population are poor, and every requirement which creates expense to them is displeasing, and serves to render militia duty irksome; it is therefore desirable to relieve them from *any* and every unnecessary expense in accomplishing the great object (their country's best good) without lessening their efficiency.

I am, with great respect and esteem, your excellency's obedient servant,

EBEN. HUNTINGTON.

His Excellency GOVERNOR WOLCOTT.

---

No. 2.

STR: The first question stated by the honorable the secretary, viz: "What is the number of the militia?" I reply, *I do not know*; but the last perfected returns of the militia will furnish an answer.

2d inquiry. "Are they organized in strict conformity to the law of Congress? If they differ, in what?" I answer I do not possess the laws of this State, passed by the legislature to carry into effect the laws of Congress respecting the militia, and am unable to answer the first or last part of the question.

Question 3. "Are the regular or volunteer militia most efficient?"

Answer. Using the word "volunteers" only as applicable to the light infantry and rifle corps, (excluding artillery and cavalry,) they are decidedly the most efficient, having seen both descriptions in service during the last war.

Question 4. "Is there a preference given for entering volunteer corps?"

Answer. No preference is given excepting the privilege of enlisting from the *located militia companies*, not thereby reducing any located company below their legal complement of sixty-four rank and file, which has hitherto been found an inducement sufficient to enable the captains, both of the rifle and flank companies, to enlist their full proportion in numbers, and, in point of soldierly qualifications, a decided superiority.

Question 5. "Does the establishment of the volunteer militia operate injuriously on the regular militia?"

Answer. The men enlisted from the militia, generally, are more ambitious and enterprising than those left in the located companies, and consequently their efficiency is in some degree impaired.

Question 6. "What proportion do the volunteers bear to the regular militia?"

Answer. During the last ten or twenty years of my service as adjutant general of this State, the proportion was generally about one-fifth; and at this time, I should suppose, rather exceeded it, excluding those composing the artillery and cavalry.

Question 7. "Would it promote the efficiency of the volunteer corps, if they had the power by law of making *by-laws* for their own government?"

Answer. I think not; some few companies have been formerly clothed with that power, and in its use have reduced their numbers and left an unfavorable impression on the minds of the militia, from whom enlistments could not be made to join them, and have eventually been dissolved and amalgamated with the militia. I believe, if the officers of the volunteers are judicious in making their enlistments from the *ambitious young aspirants*, it will invariably secure them a full proportion in numbers, and a preference in efficiency over the located militia companies.

Questions 8, 9, and 10. On the subject of classification, I have found it convenient to consider these questions under one head, and thus viewing them conjointly.

*Answer.* Public feeling and sentiment is generally against it, and by some its constitutionality questioned; how far that should influence the general government in its deliberation and decision is exclusively for them to determine. I proceed to view the subject as connected with the efficiency and best interest of the militia generally. A designation or division of the militia into two classes, making the married population form one and the unmarried form the other, would probably form them nearly equal in numbers, but *possibly* the married part of the military population might be the most numerous borne on the rolls.

If formed into two classes—one called the *active*, the other the *sedentary*—each description would require organization, or both remain under their present officers, or the *active* be organized at the time when their services would be called for.

The located militia companies generally, except in a few of our larger towns, (having a dense population,) embrace a district of country of four or five square miles, (in some instances even to six,) yet by enlistments from them for light infantry, rifle corps, cavalry, and artillery, are rarely able to have on parade for company or regimental duty more than forty privates. But few of the companies are able to furnish suitable materials for officers and non-commissioned officers for one company, (forming my judgment from their performance of parade duty,) and if divided into two classes would ruin both. If classification should be by age, the period from eighteen to twenty-four or twenty-five years of age inclusive, I think, would probably nearly equalize both parts of the company in numbers, and would be preferable to dividing the married from the unmarried, but cannot believe much saving of *expense* would be made to the United States from or by classing the militia.

Question 11. "Would it be an improvement to issue commissions only to inferior grades in time of peace; if so, what should be the highest?"

*Answer.* I believe the militia should be formed into companies, regiments, brigades, and divisions, and all officers commissioned, from the ensign to the major general.

Question 12. "Is not the period of service for three months only on one tour attended with great sacrifice of life and treasure, and productive of inefficiency?"

*Answer.* I have no doubt but a saving of expense might be made by detaching for a longer period, but I doubt whether any saving of time could take place by a longer period, though the efficiency of the detached body could not but be increased from length of service. But in opposition to the expediency of detaching for a longer period, the great injury to the individuals detached, the injury to the respective States by calling their farmers from the field, their laborers from their employment, their mechanics and their manufacturers from their regular pursuits, and others from their social duties, would create a loss to the respective States of double the amount saved to the United States.

A tour of three months, if due diligence is used, would enable the United States, probably, to relieve the detachment by enlisted men; if not, they might be relieved by a second detachment for three months, at the expiration of whose term enlisted men might be procured. I am of the opinion that the period of three months for one time for detached troops ought not to be extended. For the purpose of executing the laws of the Union, suppressing insurrection, and repelling invasion, I should suppose a tour of three months abundantly long for any detachment from the militia, and nothing but imperious necessity would justify their continuance even to that period, considering the sacrifice made by those detached.

Question 13. Answered in replying to the 12th.

Question 14. What are the regulations in your State as to training the militia?

*Answer.* The present existing regulations are not within my knowledge. I presume, therefore, to refer to the law for the information.

Question 15. From your experience, are frequent musters advantageous to the great body of the militia?

*Answer.* Presuming the musters intended by the honorable Secretary to mean *regimental musters*, or *musters by battalion*, not company musters, I think they are but of very little use, as generally conducted; but if mustered and inspected by regiment once in two years, and by battalion every intervening year, by a brigade inspector *well qualified* to perform the duties of his office, rigidly to inspect the men, their uniform directed by law, their equipments, their movements and manœuvres, I think it would have much effect to produce efficiency if called to the field; but as conducted at present, are of no benefit to the soldiers, or anybody else, merely affording a *red-letter day*, or day of dissipation to the vicinity of the parade ground. The same remarks will apply to the musters of companies in some small but in a less degree.

Question 16. Would it be an improvement to confine the instruction to the officers exclusively?

*Answer.* I think it expedient that instruction should be given to the men as well as to the officers.

Question 17. Is the system of infantry tactics directed by law universally pursued?

*Answer.* From some movements I have seen performed by the militia when under arms, I apprehend the tactics are neither universally practiced nor universally known; but, in general, practiced where known.

Question 18. What system of exercise and instruction of artillery have you practiced or followed? What are its defects and remedies?

*Answer.* I am totally unable to give the information asked for.

Question 19. What system of cavalry tactics have you adopted? What are its defects and remedies?

*Answer.* I believe the prevailing system in the sword exercise and evolutions of the cavalry are from a system introduced from Massachusetts, I believe, called *Hughes's system*; but I am not versed in the system, or acquainted with its defects or merits.

Respectfully, your humble servant,

EBEN'R HUNTINGTON.

His Excellency Governor WOLCOTT.

Since the enclosed was finished, I am informed by a field officer of the artillery corps that the system of exercise and instruction practiced by this State's corps has been compiled by Pierce Darrow, and established by a law of this State, for their use.

EBEN'R HUNTINGTON.

## No. 3.

SOMERS, October 31, 1826.

SIR: In reply to your communication of the 14th of August ultimo, I would submit the following considerations as answers to the interrogatories therein contained:

*Question 1.* What is the number of your militia?

*Answer.* The annual returns will decide the question.

*Question 2.* Are they organized in strict conformity to the law of Congress? If they differ, in what?

*Answer.* I believe the militia of this State are organized in exact conformity to the law of Congress.

*Question 3.* Are the regular or volunteer militia most efficient?

*Answer.* In their physical force there can be no difference; the only difference between different corps must arise from military instruction, discipline, and experience. In independent companies there may be more intelligence, more pride, and more ambition, as they are a select corps; but it is very doubtful whether they possess more bravery, or are better qualified to endure the fatigues of a campaign.

*Question 4.* Is there a preference given for entering volunteer corps?

*Answer.* The volunteer corps are generally associations of young men possessing wealth, intelligence, and martial spirit, and actuated by an ambition to excel in discipline, arms, and equipments; but they enjoy no preference.

*Question 5.* Does the establishment of the volunteer militia operate injuriously on the regular militia?

*Answer.* As far as it deprives the regular militia of young men of pride, ambition, wealth, and intelligence, so far it will operate to their injury; but a select corps, so far as they serve as a model for imitation and perfection in military discipline, may prove beneficial to the interests of the militia generally.

*Question 6.* What proportion do the volunteers bear to the regular militia?

*Answer.* The annual returns will decide the question.

*Question 7.* Would it promote the efficiency of volunteer corps if they had the power by law of making by-laws for their own government?

*Answer.* Any special privilege given by law to one corps of militia above another would create distrust, jealousy, and contention between the different corps, and destroy that harmony which ought to exist under a militia system where every soldier is entitled to an equality of privilege and right.

*Question 8.* Would a classification of the militia be an improvement—one to be called the active, the other the sedentary?

*Answer.* A classification of the militia, if judiciously made, might be beneficial; but the benefit to be derived would depend upon ulterior operations. If a portion of our militia were selected, and subjected to rigorous discipline, camp duty, the structure of fortifications, and the arts of war generally, it would add to the strength of our country and present a more formidable barrier against foreign encroachments.

*Question 9.* In making the classification, should age or the single or married state form the distinction?

*Answer.* The proper criterion would be age.

*Question 10.* If age, what the period?

*Answer.* From 18 to 35, from 36 to 45.

*Question 11.* Would it be an improvement to issue commissions only to inferior grades in time of peace; if so, what should be the highest?

*Answer.* Every commission should be issued in time of peace which is necessary in time of war. Under the present system, the present grades cannot be dispensed with, and a line of promotion is indispensably necessary to excite ambition and preserve a martial spirit. The moment the idea of promotion is lost, the fire of the soldier becomes extinct.

*Question 12.* Is not the period of service for three months only on one tour attended with great sacrifices of life and treasure, and productive of inefficiency?

*Answer.* A tour of three months is too short for a new recruit to acquire the science of the art of war; of course, so short a tour cannot render a soldier profitable to the government.

*Question 13.* If so, to what period might it be properly extended?

*Answer.* Six months, at least.

*Question 14.* What are the regulations of your State as to training the militia?

*Answer.* The statute of the State regulates the subject.

*Question 15.* From your experience, are frequent musters advantageous to the great body of the militia?

*Answer.* The militia ought to be mustered so often as to preserve a military spirit, to become habituated to arms, and acquainted with discipline. Unless arms and equipments are often inspected, they will become impaired and useless; unless the troops are often reviewed, they will not be ambitious to excel in arms, or become adepts in military science.

*Question 16.* Would it be an improvement to confine the instruction to the officers exclusively?

*Answer.* The militia generally ought to be instructed in the science of arms and the art of war, and in the relative duties of a soldier. The officers ought to be instructed in the duties of the camp and field; otherwise they can never be properly qualified to take the command of an army. A successful campaign can never be performed without these qualifications. More lives are generally lost from the ignorance of officers on these subjects than by the sword.

*Question 17.* Is the system of infantry tactics directed by law universally pursued?

*Answer.* It is generally in the second division.

*Question 18.* What system of exercise and instruction of artillery have you practiced or followed? What are its defects and remedies?

*Answer.* That question will be best answered by the officers of that corps.

*Question 19.* What system of cavalry tactics have you adopted? What are its remedies and defects?

*Answer.* We have adopted Scott's system, as revised by Darrow.

I remain, sir, with profound respect, your humble servant,

AMARIAH KIBBE, Jr., Major General 2d Division Conn. Militia.

His Excellency OLIVER WOLCOTT.

## No. 4.

LITCHFIELD, October 31, 1826.

SIR: I have the honor to acknowledge the receipt of your excellency's communication, dated August 14, 1826, accompanied with a letter to your excellency from the honorable Secretary of the War Department.

My own ill health, and a severe sickness experienced by several of the members of my family, has prevented an earlier reply, and has also prevented my bestowing that attention to the subjects mentioned in the Secretary's letter which their importance demands.

To the first inquiry, I answer, that I have not, at present, the means of ascertaining the exact number of the militia in this State.

To the second: I believe, by the laws of this State, the militia are organized in strict conformity to the law of Congress.

To the third: In answer to this inquiry, and others which relate to the same subject, I shall go on the ground that what would, in this State, be termed the volunteer militia, would embrace the light infantry, grenadier companies, &c., which are attached to the several regiments of infantry, and are termed flank companies; and that what is to be understood by regular militia, are those belonging to those companies termed battalion companies.

I believe, therefore, that the volunteer militia are the most efficient.

The volunteer companies are, almost without exception, better equipped and better disciplined than are the battalion companies; consequently, more efficient.

To the fourth: There is not any preference given to individuals for entering volunteer corps. The volunteer companies have a preference in point of rank.

To the fifth: I am of the opinion that the establishment of volunteer militia does not, on the whole, operate injuriously on the regular militia. I am aware that it very often takes from the regular militia smart, active, ambitious men, who are well qualified for office, and who would be of service to any company; it also takes from the regular militia, and that frequently, men who, from some cause, have become disaffected, and, consequently, of very little or no service to the regular militia, but rather injurious, as their influence is often exerted to pull down, rather than build up, a company. These men, however, on becoming, from choice, members of a volunteer company, often make the best of soldiers. Again: the example set by the volunteer militia has a very salutary effect upon the regular militia. The superiority of their dress, equipments, and discipline, furnish an example worthy of imitation, and tend to excite in the breast of the regular militia a laudable spirit of ambition and emulation highly salutary. The volunteer militia, so far as my observation extends, furnish pretty conclusive evidence that "the militia may be trained to a degree of energy equal to every military exigency of the United States;" and the principal reason why the volunteer hold a superiority over the regular militia, I have no doubt, is to be attributed to the superior knowledge generally possessed by the officers of the volunteer companies over those belonging to the battalion companies. Were the officers of our militia generally well instructed, there would, I apprehend, be very little difference between volunteer and regular militia in point of efficiency. As the efficiency of a corps of troops depends almost altogether upon their discipline, and as without officers suitably instructed it is idle to think of discipline, would it not be well to have measures adopted by which officers may be instructed?

To the sixth, I answer that I am uninformed in relation to the proportion.

To the seventh: I do not perceive that the efficiency of the volunteer corps would at all be promoted by having the power of making by-laws for their own regulations; at all events, I do not conceive that they would be more benefited than would be the regular militia. I therefore do not see any good reason for making, in this particular, a distinction between them.

To the eighth: If, by classing the militia, it is intended that the active only shall be called upon to perform the ordinary military duty, I think a classification of the militia would *not* be an improvement. In my view it is very important that every person, liable by law to perform military duty, should not only equip himself according to law, but should also devote at least as *much* time to qualify himself in the use of arms as he is now by law required to do. By doing this, he becomes in a good degree acquainted with the duties of a soldier; and the semi-annual inspection of his arms and equipments, to wit: on the first Monday in May by the commanding officer of the company, and in the month of September or October by the brigade inspector, furnish strong inducements to every person liable by law to perform military duty, to arm and equip himself as the law directs.

To the ninth, I answer that if the militia are to be classed, I think age ought to form the distinction. Should the class to be denominated *active* be confined to the unmarried men, the number of our active militia, I think, would be quite too small.

To the tenth: If age is to form the distinction, I think from 18 to 35 should constitute the active, and from 35 to 45 the sedentary class.

To the eleventh: I think that the issuing commissions in time of peace to inferior grades only would have a tendency to dampen the military ardor and ambition of men qualified to hold offices in the militia; consequently, have an injurious effect upon the militia generally.

If it should be deemed important to have the militia reviewed and inspected, it would, in my opinion, be attended with better effect to have them reviewed by an officer of as high grade as that of brigadier general than by one of a lower grade, and that it is highly beneficial to have them inspected by a brigade inspector, I think there can be no doubt.

To the twelfth and thirteenth, I answer, that my own inexperience upon the subjects embraced in these inquiries render it impossible for me to state.

To the fourteenth: By the laws of this State it is made the duty of each commanding officer of a company to order out his company two days in each year, not less than six hours in each day, (one day in the month of May and one day in the month of September or October,) and instruct them in the use of arms and in the discipline of war, and on the first Monday in May, in each year, to cause all the arms, ammunition, and equipments to be inspected. The commanding officers of each regiment of cavalry and infantry are directed to call out their respective regiments for exercise and inspection and review once in each year, at which time the regiments are inspected by the brigade inspector and reviewed by the general of brigade. This is done in the month of September or October.

The regiments of artillery are called out under the direction of the brigadier general of that corps.

To the fifteenth, I answer, that so far as my observation extends, frequent musters, viz: annual reviews and inspection by regiment or brigade are of very great utility. The frequent assembling together all the companies belonging to a regiment; the remarks which, on such occasions, are often made by the brigade inspectors to the several companies; the observations made by the spectators who attend on those occasions, and the comparisons and distinctions made by the reviewing officer, all tend to excite a degree of emulation and laudable ambition among the several companies highly beneficial. Experience has shown, in this State at least, that annual reviews or musters are calculated to improve the arms, equipments, and discipline of the militia.

To the sixteenth: As I have remarked, in my answer to the fifth question, I believe some method ought to be adopted whereby officers might be more thoroughly and suitably instructed, yet I think that the instruction ought not to be confined exclusively to them.

To the seventeenth: I believe (notwithstanding the law of this State directs that the system of infantry tactics directed by the law of Congress shall be pursued by the militia of this State) that there are still some few companies, and perhaps regiments, who have not yet adopted that system. Those instances, however, I believe are rare.

To the eighteenth and nineteenth, I answer, that I do not consider myself capable of conveying any useful information in relation to the subjects proposed by the eighteenth and nineteenth questions.

With the greatest consideration and respect, I have the honor to be your excellency's most obedient servant,

MORRIS WOODRUFF.

His Excellency OLIVER WOLCOTT, *Captain General of the Militia of the State of Connecticut.*

---

No. 5.

HEBRON, October 23, 1826.

SIR: Your favor of the 14th of August ultimo was duly received, and, in compliance with your excellency's request, I shall briefly answer *some* of the questions contained therein; and not having the means of replying to the others, I shall pass over them in silence.

To the 3d, then, I answer, I know no difference.

To the 5th, I answer in the affirmative.

To the 7th, I answer in the negative.

To the 8th, I answer, I think not.

To the 9th, I answer, but if a classification should be made, age certainly ought to form the distinction.

To the 10th, I answer, from sixteen to forty years.

To the 11th, I answer in the negative.

To the 12th, I answer in the affirmative.

To the 13th, I answer, six months.

To the 15th, I answer in the negative.

To the 17th, I answer, generally, in my brigade.

To the 19th, I answer, the system prescribed by law. No particular defects have been discovered in it, but a want of discipline renders the troops inefficient.

I am satisfied that the militia laws of the United States ought to be revised and a different mode pursued in training the militia. I would call out the officers and music six days in succession every year, by regiments, to be under the immediate command of the commandant thereof, and to be inspected on the last of said days by the brigadier general, the corps to mount guard and attend strictly to the whole round of regular service, rations to be furnished for the before mentioned time by the State or United States. I would also call out the whole militia one day in each year, by companies, under the command of their captains, to be by them inspected and drilled not less than six hours on said day.

A full and complete return of all subjects of military duty shall be made out by the commandants of companies, and by them certified upon honor, and transmitted to the adjutants of their respective regiments, whose duty it shall be to furnish the return of regimental officers and transmit the same to the adjutant general of the State in the manner now by law provided.

I am of opinion that the militia ought to be reduced to one class or species, (viz:) infantry, and the companies so located as to make the least possible travel from their respective homes.

The present extensive limits of enlisted companies and some others, (*flood wood companies,*) many of the soldiers elude the vigilance of their officers and deprive the country of their service.

And the present variety of character of the militia, with the invidious distinctions that thoughtless officers make, their meeting is *rendered useless*, and *sometimes dangerous*, by bringing into collision soldiers whose passions are inflamed with ardent spirits, and their hands furnished with deadly weapons.

With sentiments of the highest respect and esteem, I have the honor to subscribe myself your excellency's most obedient servant,

ANDREW WELLES.

His Excellency OLIVER WOLCOTT.

---

EXECUTIVE DEPARTMENT, *Milledgeville, Georgia, August 10, 1826.*

SIR: I have returned a circular with a brief answer to each question, supposing it to be most conformable to your wishes. In addition, I take the liberty to observe that a classification of the militia is very desirable. By a late order of the commander-in-chief of this State, a return has been furnished of the militia as classed between the ages of eighteen and twenty-five, twenty-five and thirty-five, thirty-five and forty-five, which discloses the important fact that, in our climate at least, the young men between eighteen and twenty-five are in the proportion of one-third more numerous than the second class, and in still greater proportion more numerous than the third class. So that, adopting the classification of the Georgia militia

as a standard by which to ascertain the whole number of the militia of the United States embraced in the first class, you would have between 400,000 and 500,000 men between the ages of eighteen and twenty-five, a force greater than any war, either offensive or defensive, would be likely to demand, and which would not only enable you to dispense with the services of those above twenty-five, but in consequence of such dispensation, to arm and equip and discipline the most hardy and warlike of the population in such a manner as to make them in all respects as efficient and formidable as regular troops. A uniform clothing and equipment with martial music, unimportant as they may seem to those unacquainted with the profession of arms, are deemed essential to either a good organization or a good discipline.

The residue of the male population above the age of twenty-five might be simply organized and reserved as a class for extraordinary emergence or if released altogether from military service, may be made to contribute under State regulations extra services, either in the shape of moneyed contributions, labor upon the highways, or exclusive service upon juries, &c., &c.

If the States would form schools for the instruction of officers for the military class, a regular system of promotion could be established with advantage, and a monthly training by companies, and a quarterly training by battalion, would suffice to accomplish them in field exercise. A good system of artillery and cavalry tactics is much wanted.

I have the honor to be, very respectfully,

G. M. TROUP.

HON. JAMES BARBOUR, *Secretary of War.*

WAR DEPARTMENT, July 11, 1826.

SIR: Among the political maxims which the experience of the people of the United States has adopted as unquestionable, there is no one more universally subscribed to than that a well organized and a well disciplined militia is the natural defence of a free people. Uniting most sincerely, in common with my fellow-citizens, in this opinion, I am anxious to see a system adopted by the national legislature which will realize the hopes of us all in reference to this great arm of national defence.

By a resolution of Congress at their last session, I am enjoined to cause to be prepared a complete system of cavalry tactics; and also a system of exercise and instruction of field artillery, including manœuvres for light or horse artillery, for the use of the militia of the United States; to be reported for consideration or adoption by Congress at its next session.

The wisdom of this measure is made manifest by the objects which are two-fold: first, the establishment of the best system; and, secondly, that it shall be uniform. The importance of the last is scarcely inferior to the first; for who can well appreciate the inconveniences resulting from different systems in the same army? the militia differing among themselves as also with the regular army, with which they may be called to act; and yet it is, I believe, too true that but little uniformity prevails; if practicable this defect must be removed.

I am duly sensible how difficult it is to establish a uniform system. The difference of condition, physical and moral, in the different States, and the preferences which each has for that which from time they have been accustomed to, present serious obstacles to a homogeneous system throughout all the States, yet I would fain hope not insurmountable.

All our national institutions and much of our legislation are founded in that mutual spirit of deference and forbearance which have so signally distinguished the people of these States, and therefore one may indulge the hope that in an object of such vital importance as a well regulated militia minor objections will be sacrificed to the attainment of so great a good.

To enable me to execute the duty assigned me by Congress, it is most desirable that I should acquire all the information within my reach, and while so doing, the opportunity seems a seasonable one, to ascertain the different systems, both of organization and instruction, which prevail in each State; and also the defects and remedies which observation and judgment may have suggested, that by a comparison a system may be extracted which will most probably unite the greatest number in its favor; which system when matured will be submitted to the wisdom of Congress, who have had for several sessions this interesting subject under consideration, and who are alone competent to apply some of the remedies required; a portion of the control over this subject being retained by the States. It is with this view that I address you as also the governor of each of the States and Territories and such distinguished citizens known to me, from whose experience I expect to derive much valuable information.

To this end I beg to submit the following questions:

1st. What is the number of your militia?

*Answer.* "Forty thousand."

2d. Are they organized in strict conformity to the law of Congress? If they differ, in what "Yes."

3d. Are the regular or volunteer militia most efficient? "Volunteers."

4th. Is there a preference given for entering volunteer corps? "None."

5th. Does the establishment of the volunteer militia operate injuriously on the regular militia? "No."

6th. What proportion do the volunteers bear to the regular militia? "One to ten."

7th. Would it promote the efficiency of volunteer corps if they had the power by law of making by-laws for their own government? "They have that power."

8th. Would a classification of the militia be an improvement; one to be called the *active* the other the *sedentary*? "Yes."

9th. In making the classification, should age or the single or married state form the distinction? "Age."

10th. If age, what the proper periods? "Eighteen to twenty-five, thirty-five, and forty-five."

11th. Would it be an improvement to issue commissions only to inferior grades in time of peace; if so, what should be the highest? "Not understood."

12th. Is not the period of service for three months only on one tour attended with great sacrifices of life and treasure, and productive of inefficiency? "Yes."

13th. If so, to what period might it be properly extended? "To twelve months."

14th. What are the regulations of your State as to training the militia? "A copy of the militia law is enclosed."

15th. From your experience, are frequent musters advantageous to the great body of the militia? "They have their advantages, and would have more if the militia were classed, and uniformed, and armed."

16th. Would it be an improvement to confine the instruction to the officers exclusively? "Not exclusively, but in connexion with the training of the troops as practiced in this State on separate days."

17th. Is the system of *infantry* tactics directed by law universally pursued? "The system of infantry tactics of the United States is established by order of the commander-in-chief for the government of the troops."

18th. What system of exercise and instruction of artillery have you practiced or followed; what are its defects and remedies?

19th. What system of cavalry tactics have you adopted; what are its defects and remedies? "We have no uniform and established system of artillery or cavalry tactics."

As from some of the States and Territories returns of the militia have not been made, the first of these queries became necessary in a general letter.

Although the training of the militia is confided to the States, it is important that their regulations in this particular should be known at this department, and it will be attended with good effects, that the system of each should be known by all the States.

If anything suggests itself worthy of communication, though not called for by any particular question, it will be highly acceptable.

As in your State, I doubt not, you have many citizens unknown to me, whose information and experience would be very valuable, I have presumed so far on your goodness as to ask you to direct and forward the enclosed letters to persons of that description.

I have to beg your earliest attention to this subject, as a board will be immediately convened to perform the specific duties assigned me. To this board I shall unite one or more militia officers.

I have further to request that the correspondence which may be addressed to me on these subjects may be indorsed "Militia Service."

With the greatest consideration and respect, I have the honor to be your most obedient servant,  
JAMES BARBOUR.

JACKSON, *Mississippi*, September 26, 1826.

SIR: Your circular of the 11th of July, addressed to his excellency David Holmes, as governor of the State of Mississippi, has been received. From bad health his excellency has resigned that office, and it has devolved upon me as lieutenant governor.

I feel with solicitude the importance of the subject, and coincide with you as to the necessity of establishing a uniform system for the organization and discipline of the militia of the United States. I have no hesitation in saying that whatever system may be adopted by Congress will be promptly supported by the legislature of Mississippi, and with pleasure I comply with your request by giving you my views in a concise manner. I shall number my answers to correspond with your inquiries. I have transmitted one of your circulars to Major General Toor, the other to Major General Winston. From the interest the former has ever manifested for the militia, I anticipate he will be able to give you much useful information.

#### ANSWERS.

1. For the want of an inspector general, whose duty it would be to attend particularly to the returns of our militia, they are so irregular and incorrect that it is not in my power to give you such a precise statement of their strength as I desire; but feel warranted in estimating the number of the militia of the State of Mississippi at between ten and eleven thousand.

2. The militia of the State of Mississippi are organized in conformity to the laws of Congress, as required by our constitution.

3. I have no hesitation in saying that the volunteer corps are much the most efficient. In point of discipline many of them are but little inferior to regular troops; in the event of a call for their services they would be more prompt in turning out than the regular militia, and at once ready for the field; whereas it would take some time to collect and organize a detachment of militia, which would be too tardy in the event of an insurrection, to which the western part of our State is liable from her black population.

4. There is no preference given to the volunteers except that of rank, and the privilege of using the arms belonging to the State.

5. The regular militia companies are protected by a law preventing such numbers joining volunteer companies as to break up those of the militia; in fact, too little encouragement is given to volunteer companies in the State of Mississippi, considering their great utility.

6. The proportion the volunteers bear to the regular militia at this time is about as one to twenty, and varies much according to the spirit of the times.

7. Great benefits arise from volunteer corps having the privilege of establishing their by-laws, particularly in point of discipline.

8. I have long been of the opinion that a classification of the militia into the active and sedentary is the only mode that can be adopted to relieve them from a great burden, and at the same time effect the object so much to be desired by a free people.

9. Taking it for granted that in making this classification of the militia the object would be that every citizen should in early life acquire the discipline necessary to fit him for a soldier, and then suffer him to rest until his services are required, I have no hesitation in giving it as my opinion that age and not the married life should make the distinction.

10. As to what would be the proper period will depend much on the length of time the active militia are required to encamp and perform duty in one year; should it be from twenty days to one month I think from eighteen to twenty-three years of age would be long enough. The encampment should not be for a shorter term than two weeks. And in the meantime, that the corps may be kept in a state of organization, quarterly musters should be kept up by the active militia. If volunteer corps are encouraged they should be confined to the sedentary militia.

11. It is much to be regretted that commissions in the militia in time of peace are not generally sought after; and the offices are mostly filled by men not qualified, who in time of war know their value, and hold on. Such was our situation in the last war that the legislature passed an act authorizing the governor to select and commission suitable persons to command detachments called into service. This would seem to sanction the idea that it would be proper to commission inferior grades of officers only in time of peace. But exposed as we are in the southern slaveholding States to insurrection, it is indispensable that our militia should be kept in as complete a state of organization as practicable.

12. I think to limit the term of militia service to three months would, in most cases, defeat the object of the militia entirely, and cause great useless expense to the government.

13. To extend the time to twelve months would be burdensome and unequal except in a very protracted war. I think the term of service should be limited to not less than six nor more than nine months.

14. The regulations of the State of Mississippi for training the militia are quarterly company musters. One battalion and one regimental muster in each year. Annually the officers and non-commissioned officers are required to assemble, and are drilled by the colonel two days.

15. Frequent musters, which last but for a day, are of little advantage beyond keeping the corps organized.

16. Instructions to officers are indispensable; and discipline to the private almost as necessary as courage to inspire him with confidence. Therefore I cannot give it as my opinion that drilling should be confined to the officers exclusively.

17. The system of infantry tactics as directed by law is pursued in this State as far as practicable, but, for the want of books, not universally.

18. Artillery corps. At this time we have none in the State.

19. For our cavalry we have as yet adopted no general system of tactics.

If the foregoing remarks and opinions can be of any service in promoting the grand object contemplated by Congress, I shall feel more than compensated.

With great consideration and respect, I have the honor to be your most obedient servant,

GERARD C. BRANDON.

HON. JAMES BARBOUR, *Secretary of War of the United States.*

NEW ORLEANS, *October 1, 1826.*

SIR: I have had the honor to receive your communication of July 11, in reference to a system of exercise and instruction for the use of the militia of the United States. From my very limited experience in military affairs, my views or opinions on most of the questions submitted cannot be of much utility in the investigation. Fully sensible, however, of the great importance of the subject to national defence, I cheerfully respond, as far as enabled by the information I possess, to the several queries propounded.

1. By the last general return of militia of Louisiana for the year 1825, the whole force amounted to 11,189 men.

2. The present organization of the militia conforms to the laws of Congress, and but little difference obtains in the organization of the staff.

3. As to the question whether regular or volunteer militia are most efficient, it is one on which a diversity of opinion prevails. As a means of defence, volunteer corps claim some advantage, but at the same time they are not devoid of inconvenience. They are generally uniformed and somewhat better disciplined than regular militia, and of course would be more efficient than an equal number of the latter, yet it appears to me that it would be an assumption to lay it down as a principle that they are more efficient than the regular militia. Their association being voluntary cannot be relied on for permanency; their strength and character are liable to frequent changes; they may even dissolve themselves at the time of utmost need. Being generally favored by certain privileges and exemptions, they sometimes arrogate to themselves immunities which tend to the prejudice of the service; and the invidious superiority which they are apt to claim over the regular militia may have the effect to alienate others from the ready performance of ordinary militia duty.

But while I entertain a doubt as to the greater efficiency ascribable to volunteer corps in general, it is probable that a company of volunteer cavalry might form a useful adjunct to each regiment.

4. Certain preferences have been given by the State for entering volunteer corps. Several of them have been supplied with arms and equipments, and have the privilege of taking the right of the regular militia.

5. The establishment of volunteer corps has, it is conceived, an injurious operation on the regular militia, as suggested in answer to the third question.

6. The proportion of the volunteer to the regular militia is about as one to eleven.

7. It is believed that it would promote the efficiency of volunteer corps that they should have power to make for themselves by-laws imposing additional duties to those prescribed by the general law, but that they should never be freed from the latter; else, if left wholly to the government of their own regulations, they might, by neglecting to enforce them, avoid the greater part of their duties.

8, 9, 10. It is thought that a classification of the militia, as suggested, would be an improvement in actual service. In the classification, the single or married state might form a proper distinction, yet it might in some instances operate a hardship, inasmuch as filial or other relations might have an equal claim to be included in the sedentary class. Age would of necessity form the distinction. In fixing on the proper period, regard should probably be had to the greater precocity and more early caducity of the citizens of the southern States.

11. I am inclined to the belief that it would be an improvement to issue commissions only to inferior grades in time of peace. The militia are seldom assembled in larger bodies than regiments, which constitutes the command of a colonel.

12, 13. The period of service for three months must evidently be the most inefficient and attended with great sacrifices of life and treasure. No term of service would seem to possess recommendations superior to those of keeping them for the whole campaign for which they are called out, replacing them during the season of inactivity—the winter of the north and the summer of the south.

14. The laws of the State for training the militia conform, as far as practicable, to the regulations of the War Department.

15. From my experience, frequent musters, as generally practiced, are detrimental rather than advantageous to the militia. In a system conducted on true principles, the advantage to be gained would probably be in the ratio of the frequency of the exercises. Yet in the consideration of the subject the circumstances and situation of different States might form a proper ground of distinction. The system of encamping the militia for a time at stated periods is one which has had many advocates. From the character of the seasons in this State and the habitual occupations of its inhabitants, frequent calls to the field in time of peace would, it is conceived, be attended with sensible inconvenience. The people of Louisiana are as brave and patriotic as any of their fellow-citizens in the other States, and would with equal alacrity betake themselves to arms when required by the occasion. They would then in a short time acquire in the camp more proficiency in the arts and practices of war than they would attain by any frequency of ordinary musters.

16. Instruction should, it appears to me, be confined principally to the officers. The militia, when called into actual service, with good officers instructed in their duty, would soon become efficient. It is important that Congress should pass a law relative to the militia that should be uniform throughout the Union.

17. The system of infantry tactics directed by law is pursued throughout the State.

18. During a period of years different systems of artillery tactics were pursued without success, but within the last four years the Orleans battalion of artillery, by adopting the latest French system, has fully succeeded. I am of opinion that it ought to be brought into general use, being in conformity with that adopted for infantry.

19. No system of cavalry has ever been particularly adopted in this State; and if I could express an opinion, founded on my circumscribed observation on the subject, the late French system of cavalry tactics ought to be also adopted. Those three systems of infantry, cavalry, and artillery tactics appear to be in perfect accordance.

I have the honor to be, very respectfully, your obedient servant,

H. JOHNSON.

HON. JAMES BARBOUR, *Secretary of War.*

STATE OF ILLINOIS, *Executive Department, September 8, 1826.*

SIR: Your letter of July 11 was not received until the 30th of August. In compliance with your request that I would give my earliest attention to the subject, I hasten to reply to your several inquiries, and, to save a repetition of them, shall do so in reference to the number and in the numerical order in which they are stated.

1. The returns are defective, but it is believed that there are enrolled in the militia about 12,000 men rank and file.

2. To show fully how the militia are organized, and in what respects we have departed from the provisions contained in the law of Congress, I send you enclosed a printed copy of an act recently passed "for the organization and government of the militia of the State."

3. I have no particular experience on this subject, but have always heard and believed the volunteer corps to be by far the most efficient.

4. In a time of profound peace, and with no prospect, as it is believed, of war, there is little zeal displayed in forming volunteer corps. But in case of war there would be, doubtless, a preference to volunteer service, as well from the opportunity it affords for the association of active, patriotic, and high-minded men, as for the selection of officers in whom the men would have greater confidence.

5. No. It operates as a salutary incentive.

6. About one-twelfth.

7. I think it would not; but, on the contrary, the power in a part of the militia to make by-laws would create a discordance which would be prejudicial to discipline and injurious to the service by weakening the unity and efficiency of the whole.

8, 9, and 10. It would be, doubtless, highly beneficial to class the militia; and, in my opinion, they should be classed according to age. All under a specified age, say 25, should form the "active," all above it the "sedentary" militia.

11. I am not prepared to give a full answer to this inquiry, but I will say that I should think it highly advantageous to organize the militia in such manner that, during peace, they should be commanded by lieutenants or deputies; and when called into service, they should be commanded by officers of full rank. For instance, a regiment during peace to be commanded by a lieutenant colonel, but when called into service to be commanded by a colonel, who should be selected for his superior qualifications, and without regard to previous rank. There would unquestionably be many advantages resulting from the power of selecting, in time of war and emergency, the best qualified officers, without giving umbrage to any. The militia as it is now organized is a mere school of titles where honors are conferred more from momentary impulse of personal kindness than from a sense of the qualification of the individuals.

12 and 13. Yes. The period of service should be at least six months, if not longer.

14. In answer to this question, I refer to the enclosed law.

15. Frequent musters are injurious to society and are productive of little benefit to the militia. But little military information is gained, bad moral habits are acquired, and much time is lost. One company muster, one regimental muster, in each year, would be sufficient to enrol, organize, and teach the men the necessary knowledge to prepare them for being called into service.

16. The officers should be thoroughly drilled and instructed in the duties of the field and camp. But I do not think it would be an improvement to confine the musters exclusively to the officers, as such public opportunities to display military knowledge forms an inducement to acquire it.

17. It is not; chiefly for the want of proper books of instruction.

18. We have no artillery.

19. We have but one company of cavalry, and they are drilled according to Duane.

I have forwarded two of your printed circulars to Generals Duncan and Street, whose information and experience will enable them to give more correct and valuable information than can be furnished by your friend and fellow-citizen,

EDWARD COLES.

The SECRETARY OF WAR, *Washington.*

INDIANAPOLIS, *Indiana, November 20, 1826.*

SIR: Allow me at this late period to acknowledge the receipt of your communication of the 11th of July last, accompanying a series of inquiries relative to "a complete system of cavalry tactics, and also a system of exercise and instruction for field artillery, including manœuvres for light and horse artillery," which by a resolution of Congress at their last session you were enjoined to cause to be prepared. Absence on public business is the only apology I can offer for not attending promptly to your interesting letter. Nor have I it now in my power to make a satisfactory response to all your interrogatories, but will freely give you such information, in a succinct manner, as the facts known to me will justify.

To your first inquiry I will answer that the number of efficient militia in the State of Indiana at this time may be fairly estimated at forty thousand.

To your second inquiry I have the honor to say to you that our militia laws have provided for the organization of the militia of the State in strict conformity to the law of Congress, making that system of tactics and the rules and regulations of the army of the United States their guide; but the law is too frequently violated by the obtrusion of other systems, in favor of which some officers entertain strong prejudices.

To your third question I have no difficulty to answer in giving it as my opinion that the regular militia are the most efficient. Those that volunteer, in most cases, have but little to stimulate them to great efforts, whilst the regular militia have homes and families and the pride and love of country to excite them to glorious deeds.

To your fourth question I must say, in answer, that no preference is given by law to entering volunteer corps.

In answer to your fifth question, I would give it as my opinion that the establishment of volunteer corps would *not* be injurious to the regular militia.

I will answer your sixth question by remarking that the proportion which the volunteer militia bear to the regular militia is about as one is to ten.

In answer to the seventh question I would remark that I cannot doubt but what a power given to volunteer companies to make their own by-laws would promote their efficiency.

Your suggestion in your eighth question as to a classification of the militia into *active* and *sedentary* strikes me with much force. It would seem to possess advantages over the existing arrangement. Embracing your ninth question, I would conclude that in this classification the single or married life should form no distinction, but that age should.

And to the tenth question I would say that a man should not be forced into service beyond fifty years of age.

In answer to your eleventh question I must admit that I cannot see the reason of a distinction between inferior and superior grades in issuing commissions.

To the twelfth question, in answer, I am happy to have this occasion to express my belief that a term of service for only three months is attended with great sacrifices of life and property, and productive of inefficiency. It would seem to me (including your thirteenth question) that the period should not be less than one year.

In reply to the fourteenth question allow me to state that the officers and privates in each regiment muster together once in each year. Each regiment is divided into two battalions, which muster once in each year. Each company musters twice in each year. At a regimental muster all superior officers may attend and command.

I would say, in reply to your fifteenth question, that I do not believe that frequent musters are beneficial in the general, and (embracing your sixteenth question) I am as well persuaded that more is to be effected in the instruction of the officers, but I would not say *exclusively*. The system of infantry tactics directed by law is not *generally* pursued, but considerably so.

We have no regular system of instruction and exercise for artillery or cavalry.

I will here take the liberty of remarking, without your inquiries, and in obedience to a request in your communication to notice any other matters that might be thought of consequence, that the arming and equipping the militia of the States will be a measure of the first importance in adopting any system for the improvement of the militia. The militia will never be left without excuse in the performance of their duty until they are armed. This should be uniform and general throughout the Union.

You will be pleased to pardon the imperfect manner in which I have noticed your communication, and permit me to acknowledge myself,

Very respectfully, your most obedient servant,

J. B. RAY.

HON. JAMES BARBOUR, *Secretary of War.*

STATE OF KENTUCKY, *Office of State, August 24, 1826.*

SIR: Your circulars relative to militia have been received. I am directed by the governor to say that they have been forwarded to Major General Robert McHatton, Brigadier Generals Robert B. McAfee and John M. McCalla, and to Colonel Peter Dualey.

The whole force of the militia of Kentucky is 69,518 troops, of which 67,739 are infantry, &c., and 1,209 cavalry, and 570 artillery, as appears by the return of the adjutant general, on the 30th December, 1825, a duplicate of which return, it is presumed, was forwarded to the War Department.

A copy of our militia laws is forwarded by mail.

I have the honor to be your obedient servant,

P. S. LOUGHBOROUGH, *Assistant Secretary of State.*

HON. JAMES BARBOUR, *Secretary of War.*

LEXINGTON, September 18, 1826.

SIR: A copy of your circular upon the subject of the militia has been forwarded to me from our executive, the answer to which I presume is to be forwarded to you. I am truly gratified at the idea that Congress will take up this subject in good earnest, as I consider it to be of vital importance. In our State we feel it more sensibly than it may be felt in other States where their State laws are more efficient. Our laws are little better than an order to disband the militia altogether. We have in consequence looked anxiously to Congress for some redeeming act which will place the system on a respectable footing. In consequence of our laws, which exempt a militiaman from parading with a gun if *he does not actually own one*, I have seen regiments parade in which not more than one in forty or fifty have a gun at all. In consequence of our fine for absence only amounting to one dollar, currency, I have seen my regiment, which enrolls upwards of 1,000 men, parade less than 110. The same result has existed generally, sometimes in a greater and sometimes in a smaller degree. All pride is lost, and we can seldom procure a respectable man who will take command of a company of regular militia. In several regiments as fast as the companies would lose their officers they were dissolved and added to the adjoining companies because they could not procure officers for them.

At a brigade drill for the officers and non-commissioned officers of my brigade held last week, I laid your circular before the commissioned officers, consisting of four colonels, two lieutenant colonels, four majors, twenty-two captains, and twenty-five subalterns. The only questions which the meeting attempted to answer were the 8th, 11th, 12th, 15th, and 16th, which you will find in the annexed regular replies to the queries in your circular.

- 1 and 2. I presume the executive will answer these.
3. The volunteer militia are most efficient.
4. Were the laws in general more strict I believe there would be a preference for entering volunteer corps. At present the regular militia are considered as a refuge from duty, and many remain, therefore, attached to it in preference to the volunteer militia.
5. I think not, except so far as the actual diminution of force may be considered an injury.
6. In my brigade, which contains perhaps a larger number of volunteer companies than any in the State, the proportion is about one-third.
7. I would be opposed to giving this power, except with considerable restrictions.
8. The board of officers decided by a large majority that a classification of militia as contemplated in this question would be improper. I differ with them.
9. Should a classification take place, age should be the distinction.
10. The active class should include all between eighteen and thirty-five years of age, the rest to pay a tax as an equivalent for exemption from service.
11. As the militia must at all events be laid off into the same divisions as exist at present, the same grades of officers will be necessary to command them.
12. A term of three months was considered too short by the board and six months recommended in its stead.
13. Answered above.
14. The system of discipline ordered by government for the regular army is directed to be used by the militia in this State.
15. Frequent musters are considered beneficial; they keep alive the spirit of the men, and fix a knowledge of the service more firmly in their minds. Without them what is learned at one parade is lost before the next; attention dies away, every one grows indifferent, arms are permitted to get out of order, and the whole affair is neglected.
16. I think not. Unless you give officers an opportunity of commanding their respective corps you take away the principal inducement to learn, and the consequence will be that you will have neither officers nor men.
17. From the scarcity and high price of books the system of infantry manœuvres ordered by law are not universally pursued. Some officers use one system, others use others.
18. Tousard's Artillerist's Companion is the book which we have followed in our artillery practice.
19. Herrie's Cavalry Tactics have been our guide in the discipline of cavalry. We are not sufficiently skilled in either of those branches to pretend to criticise those authors.

As an individual I will suggest one idea, that there be required by an act of Congress brigade drills upon somewhat similar principles to the plan proposed to Congress a year or two since, in addition to parades of regiments, battalions, and companies. At the drill above-named commissioned officers and sergeants should be required to attend. A supply of camp equipage and rations should be furnished by government, under proper restrictions; and such power should be given to commanding officers as would enable them to preserve order. Division drills also should be authorized once in two years. When a division drill takes place there should be no brigade drill in the same year. We have always found brigade drills where an encampment takes place productive of much good, unless the commanding officer himself was incapable of discharging his duty.

I will only add that I consider the militia the "natural defence of a free people." As such every man here, who has been at all interested on the subject, has lamented the present apathy which exists in the State and federal governments in relation to it. Should your present plan be productive of any practical good it will excite the gratitude and applause of the great majority of this quarter of the Union and will meet their decided support.

Respectfully, your obedient servant,

JOHN M. McCALLA, *Brigadier General 3d Brigade, K. M.*

HON. JAMES BARBOUR, *Secretary of War, Washington City.*

ADJUTANT GENERAL'S OFFICE, *St. Louis, October 1, 1826.*

SIR: In compliance with the request of his excellency Governor Miller, I do myself the honor of replying to your circular of the 11th July last.

The condition of the militia of this State must necessarily make this communication short and unsatisfactory, being unable to furnish much information derived from experience in answer to the various

questions contained in your circular. The population of this State is so scattered and sparse that regular musters of either battalions or regiments are with the greatest difficulty effected, with the exception of one or two counties, and in many instances great inconvenience attends the assembling even of a company.

The number of the militia of this State may be fairly estimated at twelve thousand; they are organized in strict conformity to the laws of Congress, which are incorporated with those of the State.

I am not informed of the existence at present of a volunteer company of any description in the State, consequently no opportunity has been afforded of ascertaining the relative efficiency of volunteers and the regular militia. Our laws in relation to volunteers are sufficiently encouraging and liberal, and the fact that there are none in the State I would presume to attribute to the want of a proper military spirit among the militia, which it is expected will be acquired when this country shall possess a more dense population, an increase of wealth, and it more generally diffused among the people.

It is, however, most respectfully suggested that volunteer mounted riflemen, armed with a short rifle slung over the shoulders, a cutlass and holsters and pistols, would be a most formidable and efficient corps for the protection of our Indian frontiers, which is a gently undulating and prairie country and peculiarly suited for the successful operation of cavalry. Since time immemorial our northwestern and western Indian neighbors in their wars have adopted the mode of fighting on horseback, which no doubt experience proved the most effective for their country. It is believed that with proper encouragement many companies of volunteer mounted riflemen could be raised in the frontier counties of this State.

A proper classification of the militia would doubtless be attended with great advantages, the "active" to consist of those between the ages of eighteen and thirty, without regard to their state.

To withhold during peace commissions above the grade of lieutenant colonels would enable the filling by selection the higher grades during war, and have the happy effect of preventing the too great prevalence of military titles, which certainly tends very much to lessen their respectability.

The period of service for three months only on one tour is unquestionably attended with great sacrifice of life and treasure, and will generally result in disgrace to the officers who may have the misfortune to command. It should be extended at least to twelve months for such militia as may serve out of their State, and six months for such as may serve within.

The militia laws of this State provide for one company, one battalion, and one regimental muster; and one meeting, to continue not less than two nor more than four days, of the officers, non-commissioned officers and musicians, for training and discipline.

As it is by means of the skill and efficiency of the officers and non-commissioned officers that military instruction is imparted to the men, it is recommended that in each State there be appointed one or more instructors to drill the officers and non-commissioned officers, and that the militia be but seldom mustered.

Our statutes have adopted the system of infantry tactics directed by a law of Congress but its knowledge is extremely limited for want of the books containing it.

No corps of cavalry or artillery has been yet formed in this State, nor has there been adopted any system of cavalry tactics or instruction of artillery.

I have the honor to be, with the greatest respect, your most obedient servant,

JOHN O'FALLON, *Adjutant General.*

Hon. JAMES BARBOUR, *Secretary of War.*

WYTHE C. H., *Virginia, August 21, 1826.*

SIR: Your printed circular franked by Mr. Southard has this moment come to hand, and I answer that many of your inquiries will, I presume, be answered by the adjutant general of this State in the most satisfactory manner, but on some of them I will briefly offer you my opinions.

5th. If the militia was duly perfected the volunteer system ought to be abolished.

8th. A classification of the militia—one class to be the active, the other the stationary—would doubtless be a great improvement.

9th. Age, and not the single or married state, must form the distinction. No measure adopted during the war of the revolution in relation to the militia gave such dissatisfaction as a draft confined to single men.

10th. Let the active class consist of men under 35 years of age.

11th. It would be an improvement to issue commissions only to inferior grades in time of peace. The highest grade to be commissioned in peace would depend on the law for training. If only a battalion is assembled at one place, a major might be the highest grade. If a regiment is assembled, you would require a lieutenant colonel.

12th. To call on men to perform a tour of three months' duty is attended with great sacrifice of life and money, and is preposterous. Six weeks will be required to train new levies. The period of service should be not less than one nor more than two years.

15th. Frequent musters of the militia are of no advantage. They produce a serious loss of time.

16th. It would be an improvement to confine the instruction to the officers exclusively.

If the government would draw an efficient force from the militia, it should proceed thus: at the commencement of the war order into service a militia army, say 50,000 or 100,000, or any other desirable number, according to the occasion. Draft at once all the officers required for service during the war, allowing them to resign at pleasure; then keep the ranks full by drafts for two years. Do this, and you will have soldiers, and all distinction between the regulars and militia will disappear; or if not, the militia will have the advantage.

With great respect,

ALEXANDER SMYTH.

HARPETH, *Tennessee, October 22, 1826.*

SIR: In answer to your letter of the 11th of July last, in relation to the organization and discipline of the militia, I will observe that I fully concur with you in the political maxim that a well organized and disciplined militia is the natural defence of a free people, however much our government seems to have heretofore forgotten this maxim in practice.

In relation to many of the questions you have submitted I must ask to be excused from answering; in consequence of a want of the necessary information at this time amidst the cares and afflictions of my family, while I will cheerfully give my opinion on those only that I feel a competency to decide on. Then, in answer to the third question proposed in your letter, I say the volunteers, from my experience, are the most efficient.

I answer the seventh question in the negative. I would not give them the power of making their own by-laws. They should strictly conform to the general regulations of the army while in service.

In answer to the ninth question I say age should be the criterion, if gone into, and divide into four classes, taking an equal period in each class.

I answer the twelfth question in the affirmative. The period of three months is too short for the service; six months is much better and more efficient.

In answer to the fifteenth question I say that frequent musters are of little or no advantage. If you discipline the officers the privates can be prepared in a few days, when every officer understands his duty.

I answer the sixteenth question in the affirmative, most decidedly, so far as the general government may undertake to give the instruction. To effect the discipline of the officers will be all important. This subject occupied a considerable share of my attention some years past, when I was in Congress, particularly the two latter sessions, being the chairman of a committee on the subject of the militia. I devised a system for their discipline, which I submitted to the House of Representatives in a bill some time in January, 1823, as well as I remember. The bill was taken up and partially discussed in the House of Representatives on the 9th and 10th of January, 1823. You will find a part at least of the debate published in the *Intelligencer* of the 18th and 29th of that month, containing my views on the subject, expressed more freely than opportunity will now permit. To this bill and debate I beg leave to refer you for my opinions on this important subject. They remain unchanged; time and further experience have only more fully confirmed them. The bill may be found in the file of bills reported that session and left without being acted on. It is my own plan, except the last section, or one which provides for exemption of privates from mustering by paying annually a certain sum of money; this provision was adopted by the committee against my wishes and opinion, but without any strenuous opposition, as it gained to the support of the bill a member of the committee, who otherwise would have been opposed, and my object then was to carry and put into practice the principle of my bill.

Copies of this bill were distributed amongst the militia officers in most of the States of the Union, many of whom gave their decided approbation to the plan. A board of officers assembled in Philadelphia for its examination, who testified in favor of the measure in the most flattering terms to its author, as did also a great many experienced militia officers in the States of New York, Massachusetts, Ohio, several of the New England States, as well as my own State, where it was, so far as I was informed, generally highly approved of.

The expenditure was the only objection of any weight that was urged against this plan to discipline the militia. It would cost, as was estimated, about half a million annually to encamp and discipline the whole of the militia officers of the United States; and here I must take the liberty to remark to you that, unless some expenditure of the public money is contemplated for this great object, any plan must fail in producing the effect desired.

One of the good effects anticipated by the plan I have proposed is to induce persons to accept militia appointments that are better qualified than can be obtained under the existing regulations, and thereby speedily improve that body of useful citizens in fitness for disseminating the necessary information to the body of the people; as things now are, it is only the highest commissions that will be accepted by persons competent to the duty.

The other questions submitted I expect, with those I have answered in this letter, will be more fully and satisfactorily answered by the present governor of our State, whose opinions, from his experience and usefulness in service during the late war, are entitled to great consideration. You will please to excuse this hasty scrawl, and be assured that there is no object in my judgment of greater magnitude than that in which you are now engaged, and none to which would be more cheerfully contributed every aid in the power of your friend and obedient servant,

NEWTON CANNON.

HON. JAMES BARBOUR, *Secretary of War.*

WARRENTON, VA., August 6, 1826.

SIR: I cannot believe that so humble an individual as myself could have been in your mind at the time of writing your circular of the 11th ultimo; yet, as it appears to be addressed to every one who may have reasons for the opinions he may entertain on the various subjects embraced by it, I will do myself the honor to lay before you the following sheets as the result of my investigation of the propositions submitted by you, begging you to believe that I presume not upon a too transient acquaintance with you, but possessing the feelings by which our fellow-citizens in common are moved to acts which duty or choice may prompt them to perform, I send them to you in the hope that they may be of some service in the decision of the many important points involved in the general object of your "circular."

*1st query.* "What is the number of your militia?"

This inquiry will be answered, I presume, by the governor or adjutant general of the State both as it regards the whole State and the strength of its different sections, whose peculiar situations will form objects to which ought to be adapted a state of militia organization calculated for them.

*2d query.* "Are they organized in strict conformity to the law of Congress? If they differ, in what?"

They are not organized in strict conformity to the act of Congress. The difference between the act of Congress and that of this State is this: the law of Congress enacts that "there shall be formed for each battalion at least one company of grenadiers, light infantry, or riflemen; and that to each division there shall be at least one company of artillery and one troop of horse, so as there shall not be more than one company to a regiment." By the law of this State there shall be one regiment of artillery and one of cavalry to each division; the same act authorizes a company of grenadiers, light infantry, or riflemen to

be raised in each battalion. In all other respects the organization of the militia of the State is substantially that prescribed by Congress; indeed the difference stated above exists only in this: Congress *gives the right* to create one company of artillery or dragoons in each regiment; the legislature of Virginia *makes it a duty*.

*3d query.* "Are the regular or volunteer militia most efficient?"

There is but little if any doubt that the regular militia of the United States are preferable to the volunteers. They are more capable of undergoing long and rapid marches, are more patient under fatigue, have greater physical capacity for it, endure the extremes of heat and cold, wet and dry, with less liability to disease, seldom hope for luxuries, and never regret its absence; are better prepared by their diet at home for the fare of the camp, and hence do not contract so easily complaints incident to the life of a soldier; they are more docile and obedient, the most exalted of the virtues of the soldier; they assert no claim to peculiar or exclusive immunities, have no ideal wants to gratify nor rights to vindicate—the bane and curse of armies, the principal cause of the general imbecility of militia, at all times the palpable vice of volunteer corps.

The great difference between the regular militia and volunteers has its origin in the different habitudes of the men from early infancy. Militia are usually composed, in active service, of the hardy laborers of the country, while volunteer companies are formed by the sons of richer individuals, who have the means which gold and silver always command, and but seldom fail to invite, of elevating their moral and physical condition in civil society, by which their importance is considerably magnified in their own eyes, and notions of superiority are imbibed that unfit them for military subordination. Hot-bed constitutions, vitiated palates, and enervated limbs, proclaim them the subjects of luxurious lives; whether they are qualified for the ranks of an army and whether my reasons in favor of regular militia are unsupported by these facts, I leave the Secretary to decide.

I have however upon this head the convictions of experience to urge in support of what I have said. At an early, nay, a tender age, I was a member of a volunteer company, the first that marched from this county in the late war; you were then governor of Virginia. We were stationed in Hampton at the time that town was entered by the British troops; during the campaign I had repeated opportunities of testing the position I have taken; whether on police guard or drill duty the regular militia I considered best. In battle their superiority still predominated, this the result of the facts I have stated.

The main difficulty in the decision of this question arises not so much from our observation on the actions of human life as from the theory which belongs to it. Some intelligent men with whom I have conversed give preference to volunteers from the circumstance of their condition at home, urging in defence of the superior fitness of these gentlemen for the military service, that such is their sense of honor that they will never fly from the face of an enemy, and if beaten can be again brought to the charge with spirits unbroken. It is true some volunteer corps did, during the late war, acquit themselves most nobly in action; but it is equally true that thousands of the regular militia performed feats not surpassed by the best trained regulars in the army. See them at Queenstown, Plattsburg and New Orleans.

This sense of honor is, nevertheless, of incalculable benefit to an army. The Americans, as a nation, have as much, I believe more of it, than any other people. It belongs to all orders of society in the United States—is imbibed at the breast of the mother; and from the habit of exercising the privileges of freemen at the polls, and of investigating the affairs of governments and the conduct of the public servants, they are at once elevated to the character of agents, upon whom periodically devolves the duty of propelling the government towards the end sought in its institution. This high duty, and the great considerations coupled with its exercise, and perpetually recurring to the mind on every new discharge of it, fasten immovably their affection on the political institutions of their country and excite every just feeling of national and individual pride. Carrying these sentiments and feelings into the camp, can it be supposed they will not be impelled by them to exert every power in defence of a soil which is theirs and of rights which they have long exercised? Cowardice is almost unknown in the walks of private life, among those who constitute the regular militia; and I venture but little when I say there is as much among the volunteers as among them. Whence, then, on the score of chivalric feeling, or sense of honor in domestic life, can be inferred the greater prowess of the volunteers in war? Look to the private character and mode of life of the peasantry who compose the army of England, that of France, and of Russia! Where is there mentioned in all history bands more gallant or better trained? Yet, sir, in this free country we have the elements of a better soldiery. We have all their industry, more intelligence, with greater elasticity and exaltation of character. All we want is discipline, which can be sooner given to the regular militia than to the volunteers, for the reasons I have urged.

There are many instances which are striking illustrations of the soundness of my opinions on this subject, but I should write longer than you would be disposed to read if I extended my observations on this query any further.

*4th query.* "Is there a preference given for entering volunteer corps?"

In general I think there is not, except for the cavalry. My reason for this opinion: It is very rare that a volunteer company is kept up more than a year or so, except in towns, which always furnish young men who are able to incur the expense of uniforming themselves. Troops of cavalry are usually full, but not always filled by the most active militiamen; they seem to prefer the cavalry because they can ride when on duty, and because they obtain high wages for their horses in time of war.

*5th query.* "Does the establishment of volunteer militia operate injuriously on the regular militia?"

Yes; it is like a drop of the virus of the rattlesnake injected into the human system—if it does not always kill, it never affords pleasure, and always gives pain. It is the perennial fountain of complaint, the nucleus of every principle at war with the quiet and discipline of an army.

*6th query.* "What proportion do the volunteers bear to the regular militia?"

Variously, from one-fifth to one-tenth.

*7th query.* "Would it promote the efficiency of volunteer corps if they had the power by law of making by-laws for their own government?"

I cannot see where they can want any other laws than such as Congress and the legislature make for them. If, however, they do want them, they should not make them; the power would be exercised capriciously, often tyrannically, and would be the cause of perpetual strife, jealousies, intrigues, and heart-burnings; it would be a dagger to their peace and that of all around them. A democratic legislature in an army! No, sir; no, sir; it would ruin an army, and blast the cause it was sent to vindicate.

*8th query.* "Would a classification of the militia be an improvement, one to be called the *active* the other the *sedentary*?"

No, sir; unless in the southern States. The militia should be called out *en masse* to resist invasion or put down insurrection, in which event a *sedentary* militia, composed of men from *forty-five* to *fifty* years and youths of *seventeen* and *under eighteen years of age*, would be necessary. Such a corps in such a crisis would be able to preserve peace in its vicinity, and give security to private property and the country the benefit of every militiaman.

A sedentary militia, composed of those of eighteen and under forty-five years of age, who are supposed to be unable to do hard duty, would be an incubus on the treasury and all the energies of the State; it would create visible distinctions among the troops—one would be active, zealous, and not numerous, the other would be heavy, awkward, and gouty; the sedentary ranks would in truth be filled by four-fifths of the whole militia—every fellow that had a sore toe, the choleric or rheumatism; all those who thought “discretion the better part of valor” would find an apology for getting into this corps. By the same number that there may be of sedentary militia by so many will the effective ranks of the army be decreased in a ten years’ war, for every man of them who may be able to hire his substitute will procure one if you do not allow him the honor of being a sedentary soldier. But, sir, the great reason against it is that the time might come when every man of the active and sedentary militia might be called out. Only then fancy the figure some eight or ten thousand of the sedentary gentlemen would cut at the close of even a four hours’ hard march in company with the actives! Sir, the mass of debility and bodily corruption is too great to be concentrated in one point; they would retard all other troops till disgust would drive them home or disease and death rid the country of them.

9th query. “In making the classification, should age, or the married or single state, form the distinction?”

By my answer to the last query you have seen that I am of opinion that no other classification of the able-bodied men of the country would do than that uniting youths of seventeen and under eighteen, and men of forty-five and under fifty years of age, for neighborhood defence, and that mainly for the preservation of order among the serviles in case of a levy *en masse* on all the militia. But if a classification were to take place, I should prefer the distinction to rest on age, although the reasoning in the eighth answer will apply here with great force. Where it rests on age there will be always a corps capable of efficient service; if it be made to rest on the “married state” the sympathies and regrets of fathers and husbands will be so general, so constant, and so keen, that the whole body would be eternally haunted by all the recollections of domestic comforts, peace, and happiness, and by the wants and distresses of their families, that they never could be disciplined, and never could be relied on. By the least effort of an artful foe they might be induced to lay down their arms; the desire to return to their wives and children must overcome every other consideration. Imagine one thousand only, all feeling the same pang—what a concentration of sadness and of grief; and what might we not expect would be its effects!—every man having the same cause to curse the war and the country.

10th query. “If age, what the proper periods?”

I consider this question as answered.

11th query. “Would it be an improvement to issue commissions only to inferior grades in time of peace? If so, what would be the highest?”

I believe the militia are generally as well officered in time of peace as during war. The same power would make the appointments, and I doubt whether a better tribunal can be gotten than the county courts, under certain restrictions, viz: require the court to certify their freedom from intoxication, general good conduct, and intelligence, to the executive. I would also require every officer to hold his commission for five years, unless he remove from the bounds of the regiment. If none but subordinate commissions be issued in time of peace, respectable men will not hold them, because they cannot rise, and there will be no stimulus to acquire a knowledge of their duty. In addition, somebody must command, and it will be better for him who is to march at the head of his regiment to have been a commandant for years before, than to be made one at the moment of starting. Again, the same power will then appoint that does now; and what greater guarantee will we have for a judicious selection than now? The crowd of applicants will produce confusion, and who will there be then better able to command than now? The absence of all displays at the head of the regiment will make every recommendation to depend on supposition or on friendship. Again, the appointing power is exercised in a dozen different modes throughout the States; so here, at once, is an insurmountable obstacle to any uniform rule on this subject. The best remedy for bad appointments in the line is a command to the governors, when they call the militia out in the service of the United States, to select the officers best calculated for effective service. I am therefore of opinion the present mode is decidedly, in theory, and in practice I have no doubt will prove, the best that can be devised.

12th query. “Is not the period of service for three months only, on one tour, attended with great sacrifice of life and treasure, and productive of inefficiency?”

A tour of three months only is attended with great sacrifice of treasure. The time usually taken after arrival at rendezvous in preparation for camp, the time spent in marching and countermarching to receive and deposit their arms, and other causes which will readily occur to your mind, usually consume one-third or more of their tour; of course, this time is paid for, when no equivalent is returned to the State. Besides, from the sparseness of our population, and immense extent of territory which it covers, many days are lost to the men and to the country before they reach headquarters. But the troops must be paid from the moment they are called out; so that if thirty thousand men were required for the defence of the State, we will assume twenty days as the average time for them to reach, we will say, Richmond. At the end of three months they will be discharged, so that there will be four drafts in a year, making the whole time for the hundred and twenty thousand to march to Richmond three months and twenty days, which, at eight dollars per soldier per month, will amount, including the expense of baggage wagons not wanted, and pay of officers, to the sum of seven hundred thousand dollars, at least; from which deduct the expense of the first draft, one-fourth of the whole number, who may perform a tour of twelve months, and there will be left against the tour of three months, and in favor of the tour of twelve months, the sum of not less than half a million. These troops, we will suppose, for mere argument sake, may be put in something like fighting trim in one month, and not sooner, (remember, this is assumption.) In this view of the case you can bring them to action during two of the three months, with a hope of standing the enemy; but recollect they spent one-third in getting ready for drill, which, added to the time (one month) which, according to the assumption, they must be drilled, will leave for active service but one month. Now, suppose the tour to be six months, you will save, in the efficiency of the force, four months, besides the costs of the two. Suppose, again, the time were twelve months, you would lose only two in twelve—the

month of preparation and the month of drill. Under the tour of three months you lose the same time. Is it necessary to say more to prove the sacrifice of treasure? I think not.

I presume there is also a sacrifice of life; for no other solid reason that I can see, however, than that many soldiers die under what is called camp-seasoning. The principal disease among soldiers originates from their food and the habits and duties of camp. When they become accustomed to them, I think the good of the service, humanity, and the best principles of economy, dictate the propriety of retaining them in it, if it can be done, by competent authority. To replace them at the end of the three months by others is but bringing fresh victims to the jaws of sickness, and, at any rate, is keeping forever on hand, in a course of seasoning, hundreds and thousands of men whose service the State requires.

Many additional arguments might be adduced in support of the foregoing reasons. They are, however, considered by me sufficient to authorize the conclusion that your inquiry ought to be answered in the affirmative.

*13th query.* "If so, to what period might it be properly extended?"

The reasoning in the last answer supports the idea that twelve months is the least time to which it could be extended. There are, withal, state reasons against its extension to so great a period. These belong, it is true, to the question of the propriety of war at all, as well as to the present query. The habits contracted in camp are more likely to be confirmed by twelve months' service. Here arises, though, the question, whether society ought not to be removed as far as possible from all intercourse with the camp? Doubtless, I think it ought. The final question is now to be answered: Which will most injure society, the occasional dispersion of the twelve months' men through it, whose ill mode of life is confirmed upon them, and who are limited in numbers, or a constant communication with three months' men, whose morals are tainted, and who are four times as numerous as the others? The question I raise here does not, perhaps, fall within the legitimate range of your inquiry, and I shall not on that account press it further, although the vital interests of society are dependent on its correct solution.

As to the least time to which the militia tour could be extended, in a military point of view, the longer the period the better, both in reference to effective service and economy. I am of opinion that three months is the shortest time in which men can be taught the use of their arms and legs; more especially the foot, in the use of which, Marshal Saxe said, lay the whole science of war. In reference to society, it may not be amiss to state that a laborer might as well be absent for a year as six months, except as to a short period in the spring and at harvest. Their labor is generally supplied by hirelings for the year, there being no excess of laborers through whom they can get work done by the day or job. With many the time of twelve months would be highly objectionable on account of the situation of their families; upon many it might operate very severely; but I am fully convinced they would suffer less in an entire twelve months' service than they would by the loss of the presence of the head of the family twice for the term of six months at each time. Another query suggests itself: in the progress of a war of five years' duration, for example, should we have more good troops by adhering to short tours, say three months, than by tours of one year? I will answer this question by asking another. Which school boy will be best taught, he who goes to school three months only in each year, for four years, or he who attends regularly one whole year without intermission? The boy who only attends one-fourth of each year has the remaining three-fourths to unlearn or forget what he has been taught. During this long interval he loses all tact of memory, while the continuous application of the pupil for the year gives solidity, hourly, to his past acquirements. Which will be most likely to bruise the flesh or break the arm, a blow repeated four times, at intervals of nine months, or an instantaneous succession? There is time for the arm to recover its strength before it is stricken a second, third, and fourth time, in the first instance, but not so in the latter; each stroke makes a new or inflicts a deeper wound. So with the mind. This principle will hold good, whether applied to force, fraud, or persuasion, in physics or in morals. But these are not the only arguments which may be properly used in this place. The three months' men will run four times the hazard of camp disorders, and increase, in a four-fold ratio, the risk of summer and autumnal fevers, &c. In conclusion, on this subject, I will remark that while I am in favor of the extension of the militia tour to one year, I am solemnly convinced that it would be very injudicious, on many accounts, to extend it; much worse, I think, than for it to be shorter.

*14th query.* "What are the regulations of your State as to training the militia?"

The officers of each regiment are trained for three days by the brigade inspector, in the months of May or June annually, at such times as the brigadier generals designate. At the close of each training the muster of the regiment takes place.

The militia muster four times a year; a company muster in April, regimental in May or June, company muster in October, and battalion in November.

*15th query.* "From your experience, are frequent musters advantageous to the great body of the militia?"

I believe they are, when the officers drill or march them by some fixed principle or author. *I give this opinion in reference to military benefits.*

*16th query.* "Would it be an improvement to confine the instruction to the officers exclusively?"

No, sir; the instruction, if confined to the officers exclusively, would be of no service to them or the militia in time of peace. They would have no one to whom to impart it. If it will benefit them, or render them better able to discharge their duties, it will equally benefit those in the ranks. Would it be wise to send a ship-of-war to sea with a crew of mountaineers utterly ignorant of naval tactics, although some half a dozen officers on board might be good seamen? Under the present law of this State an officer may resign at pleasure; and I am confident that in every twelve months one-third is changed, and every two years more than two-thirds; so that if the instructions be confined to the officers exclusively, we have no assurance that a declaration of war, or any public exigency, would find them prepared for command. It certainly would not be good policy to postpone the elementary education of young men intended for mercantile employment until they are actually behind the counter.

This objection may be easily obviated as stated in my answer to the eighth query, by requiring all officers to remain in commission for five years, unless sooner exempted from duty. In the session of 1824-'5, of the general assembly of this State, being convinced of the necessity of checking these frequent changes of the officers of our militia, I introduced a bill on this and some other subjects, prohibiting their resignation under five years, unless by the unanimous consent of the regimental court of inquiry held for their regiments. This provision was stricken out in the house of delegates by a large majority. The bill otherwise providing for the better organization of our militia, by reducing the demand on the

treasury to the amount of fines assessed on delinquents, was afterward rejected in the senate by the casting vote of the speaker.

The musters of the militia do some good in this respect, they arouse to action the military genius of many youths.

17th query. "Is the system of infantry tactics, directed by law, universally pursued?"

No, never; and never will be, till the penalty for failure be increased and severely enforced. We have more than half a dozen authors, copyists, and patent-right manufacturers of drills, &c., &c. The best service you can on this subject render is to get Congress to refuse patent-rights, and prohibit them by heavy fines, &c., &c. Why shall we not preserve the best military principles, and put down the every day stupidities that are published to cheat, and bought for cheapness sake? It is as indispensable to the public good to have correct military ideas current in the country as to have a sound money currency; and I can see no greater impropriety in punishing the man who publishes to the troops under his command unsound spurious ideas, than he who publishes unsound spurious promises. Let the Department of War regulate this matter so as not to shut up genius and knowledge; but where there is a probability of bettering the state of the military science to grant permission to publish.

18th query. "What system of exercise and instruction of artillery have you practiced or followed? What are its defects and remedies?"

We have no system. In my regiment there are two or three companies only who have guns; the regiment extends from the Potomac, under and along the Blue Ridge, and above tide-water to James river; includes seventeen counties and twenty-one regiments of infantry. The executive of this State has refused me arms repeatedly; of course we have no occasion for any system. Those who know anything of the drill and movements of artillery, appear to have caught it in the late war.

Tousard is the only work I have ever seen, although six or eight years ago I heard of a small work on the same subject, which I never could find. Tousard is too large and costly for the militia; it is only fit for men in the regular army—for professional soldiers. Six years ago I compiled a manual for the artillerists of Virginia, which I submitted to the inspection of a relative, Judge Green, a former commandant of my regiment, who loaned it to some one, from whom he has never been able to get it. This manual was principally composed from Tousard, and from my memory of what I learned and practiced in the Military Academy, in which, sir, I had the honor, happiness, and good fortune to be educated after I left the service of this Commonwealth.

Besides the defects of Tousard's Artillerist's Companion, which I have mentioned, it is also defective in arrangement, varies too much from the present mode of drill, and is not sufficiently *minute* in the description of the parts of the gun and carriages, the caissons, &c., and is deficient in the manual, the number of matrosses, gunners, and assistants, requisite to pieces of different calibres, and the different kinds of guns. In a conversation recently held with an officer of the United States army, a late graduate of the Military Academy, he informed me that these defects had been supplied in the treatise of General Lallemand. This work is not to be obtained in any of the book stores from New York to Norfolk, and is too high priced for the militia.

19th query. "What system of cavalry tactics have you adopted? What are its defects and remedies?"

We have no system. The book which has been most consulted was published by a militia officer east of the Hudson. Some militia officer, in Virginia, has also published a primer, which, from the size and price, appears in the last eight years to have superseded the New England work. Neither of them ought to be used. They are a jumble of militia notions, only fit for the gross appetite of ignorant militia coxcombs. Their defects I have stated. The best remedy for them is to suppress them by the means suggested in my answer to your seventeenth query.

The different publications on infantry tactics have so varied in principle, *when there is principle*, that it would be exceedingly difficult for our best read and most experienced officers to reconcile many of them to any standard of discipline ever sought to be established in this or any other country. The crudities to which all such productions are necessarily liable become fixed on the minds of the soldiers as early as the good principles which they perchance may contain, and thus, for every good idea, they have some vicious counterbalancing heterodoxies. Every man who wears an epaulette, or bears a martial title, seems to conceive himself fit to instruct his brother officers in their duty, and seldom fail to attempt to inculcate his badly digested theories upon their minds. There is no bait, however nauseous and fetid, that some fish will not nibble at. It is this nibbling system which has done so much injury to the public service. It is pursued by the lowest grade of sabred jackdaw, and, ascending, goes through all ranks, to the general of division, departmental officers, and commander-in-chief. There is no remedy for this wide-spread mischief but an inflexible resolve to put them down by law, and punish with severity every one who shall drill, train, or muster, upon any idea or principle advanced by them.

The system of discipline compiled for the United States army, (from McDonald's treatise,) by a board of officers of which General Scott was president, in the year 1815, has also been changed, why or how I am not able to say. The militia were but just becoming acquainted with it when its inaptitude was discovered, and its revision ordered; the new work has not yet reached this part of Virginia; by the time it arrives, for the same reason, it may cease to be of authority. It is not long since the legislature of a neighboring State, who had power to amend its constitution, and who had repeatedly changed it, were obliged to appoint a committee to ascertain where and what was the constitution. It is sincerely to be hoped that neither Congress nor the army will find it necessary to appoint a committee to ascertain where and what are the forms and rules of discipline. Would it not be better when a board of officers report a new system of regulations or discipline for the army, which alike govern the militia, immediately to call another board and submit the report to them for revision, and in case they differ, require the points of difference to be stated, and the two boards in joint deliberation to decide between them? It appears to me that this course would insure more correctness in the general results of these conferences, and give greater stability to them. The *systems* adopted by the cavalry have been less liable to variation, on account, it is believed, of the comparative small demand for them. They have differed, however, but not so often in material points as in the infantry tactics. With the lights to be derived from the Napoleon systems of discipline, in relation to all corps, it appears to me that no capital error can get into our own, unless it be by accident, or the perversion of correct principles to some selfish and unhallowed purpose. It is a maxim in politics that it is better for penal laws to be certain and mild than uncertain, though severe in the punishments they denounce;—and do not the same principles enjoin permanent, though faulty systems of discipline, instead of those which are more perfect but always fluctuating?

The best reflection I have been able to bestow on the subject of a new organization of the militia,

has led me to the conclusion that no general system, except one, establishing a proper division of them into divisions, brigades, regiments, battalions, and companies, affixing their names and designating the number and ranks of the officers commanding them, would answer for each State in the Union; for instance, the State of Virginia requires the organization of her militia to be suited to the local situations of the three great divisions of her territory, namely, her seaboard, Blue Ridge, and western regions, (the necessity of which I have tried to instil into the minds of the legislature,) while it must be evident to every capacity that the same would not answer for Kentucky, Ohio, or Tennessee, as long as their present relative condition to the other States remains unchanged. The great extent of the Virginia seaboard, her numerous navigable rivers, creeks, and inlets, present so many assailable points to excite the revenge and cupidity of an enemy, and from the thinness of the white population bordering on them, there are so few militia, and they are so badly organized, that the crew of a single man-of-war might ravage the whole country adjacent with perfect impunity. Immediately on all our watercourses the troops should be mounted, having a body of infantry at a short distance in the interior to support them in case of attack by a larger force. The species of troops to which I allude, as those from whom the State would receive the most efficient service on the Chesapeake and its tributaries, are not mounted riflemen, musketeers, or cavalry, but light or flying artillery, with one company of which and eight guns, six, nine, and twelve pounders, any given line of coast not exceeding sixty miles, aided by thirty cavalry videttes, would be better protected against depredation than by five, perhaps ten, regiments of infantry. I will not weary your patience by running into a long train of argument to prove the liability of a water coast to be ravaged by a marine power, and the peculiar adaptation to its defence of flying artillery which moves with celerity from point to point, compels the enemy, from the length of its range and weight of its metal, to respect its character, avoid its vicinity, and tremble at its approach.

The introduction of flying artillery into the armies of Europe forms one of the most important events in its military annals; so destructive were its effects on the Prussian army, in the war with Russia, that Frederick immediately incorporated it into his own, and gave it, with the exception of the improvements made by Napoleon, its present perfection.

Allow me to suggest the propriety of arranging the officers of every company of infantry of the line to new companies when in service, and also of dividing the whole number in the ranks of the regiment, except the two light infantry companies, into eight parts by ballot, by which the men of each company will be so intermixed as to destroy the familiarity which subsists between them and their officers, and that pernicious misdirected sympathy which so often exists among soldiers who are friends and acquaintances before they enter the service upon every occasion on which it is found necessary to inflict punishment on one of them.

In giving my opinion on the impolicy of any other organization of the militia than that establishing its great divisions, which is the amount of the present law of Congress, I should give some reason for it; this I will do in a few words. The federal government is too far removed from the greater portion of our territory to be able to judge as correctly as the State authorities of the proper mode and means of resisting an enemy whose course and rule of warfare is directed by the features of the country and the character and number of its inhabitants. By prescribing any particular system other than the present, the best plans of a State assailed might be rendered abortive by the inhibitions of an act of Congress that did not provide for the juncture which gave birth to them. You see, sir, that I am not actuated by my fears that on this subject also the government of our ancient mother Virginia is to be provinciated by Congress and the President; whilst, by going further than the present system does, the States may find it necessary to differ from the federal government in time of war, when there should not, above all times, be a conflict even of opinion between them. The present peaceful condition of the world, however, affords time for deliberation on the great interests of nations, and I am rejoiced to see you so zealously engaged on a subject heretofore too much neglected, but which is one of the highest consequence to the liberty and happiness of the people of the United States.

With the sincere wish that the result of your inquiries may prove a lasting benefit to the community and honorable to yourself, I subscribe myself, very respectfully, sir, your obedient servant,

JOHN ROBERT WALLACE, *Col. 2d Regiment of Artillery of Virginia.*

HON. JAMES BARBOUR, *Secretary of War.*

BATH, *Maine, August 17, 1826.*

SIR: It must be very gratifying to every citizen of our country to observe that Congress is directing its attention to the improvement of our military institutions. Upon a well-organized and well-disciplined militia we must chiefly depend for the defence of our rights and the preservation of our liberties, and I think it will scarcely be doubted that "the militia may be trained to a degree of energy equal to every military exigency of the United States." To Congress is delegated the power of organizing and disciplining the militia, and it is very desirable that, in exercising the constitutional power, a system should be adopted which shall be uniform, suited to the genius of our government, and yet efficient enough to bring into full exercise, when required, their great arm of national defence. It will doubtless, at first, be difficult to mature a system which is uniform, and yet which can at once be carried into full operation in all the States, but not so much so as it was to apply the principles of the federal government to the confederacy of States. In the latter case, the differences of condition, both physical and moral, in the different States, and prejudices in favor of long-established usages and customs, though urged by an active and persevering opposition, did not present an insurmountable obstacle, nor prevent the adoption of an entire new system of government. Even as the limits of our jurisdiction become more extended, and embrace a greater scope of local differences and prejudices, the easier it seems to be to apply the principles of our Constitution to the well being of the States, each of which, new as well as old, without surrendering any of the rights incident to the State sovereignties, cheerfully submits to all the regulations of the general government; and in the formation of their own constitution, and in the enactment of many of their laws, are guided by the general principles of the federal Constitution, and accommodate themselves to the laws enacted by Congress under the provisions of that instrument. Somewhat like this, I hope, may be the effect of a system established for the organization, training, and disciplining our militia; and I trust that you will not consider that I am obtruding myself on your notice, when, in reply to the questions con-

tained in your circular of the 11th ultimo, I respectfully submit some observations, which several years' service in the line and staff of the militia of Maine may have suggested.

So long as government maintains an army, perhaps no better basis for a system of organization and discipline for the militia, which is intended to be uniform, can be adopted, than those general principles which are found to be most conducive to the efficiency and discipline of the regular troops. This system is kept in constant exercise, although to a limited extent, in time of peace; and the general policy of the establishment, as well as the drill and discipline of the troops, are constantly presented to the citizen soldiers as examples for imitation.

Notwithstanding the number of the peace establishment may be comparatively small, and, from the requirements of the government, confined to such distant positions in our extensive territory that their exercise and manœuvres may not be presented to the view of all or even large portions of the militia; still, such is the constant intercourse between our citizens that much instruction from this source must, from time to time, be brought home to the military establishment of the several States. These examples presented to the militia will do much towards eradicating those prejudices and preferences, many of which are so deep-rooted in the breasts of the citizens; they will promote a spirit of inquiry relative to the utility of accustomed privileges in the militia, and the necessity of remaining attached to long-established usages, and cannot, I think, fail to do much towards removing these trammels upon the discipline of the citizen soldiery. The manœuvres and drill of the army will serve as markers for the corresponding evolutions and exercises of the militia, and, when once observed, will cause correct imitation. When it is considered that, in actual service, the militia, in order to insure any degree of success, must co-operate with the army, and each become blended with the other, the necessity of a system applicable to the situation of both will appear more apparent. The militia, if trained at all, is trained for actual service; and whenever it shall be called into the field, it must expect to submit to all those rules of subordination and discipline which are so necessary to give unity to action and success to operation. If, therefore, in time of peace it is found difficult to apply to the militia all the regulations adopted for the government of the army, it may still be practicable to make those regulations the basis of a system of organization and discipline, and, so far as they applied at all, to have them closely adhered to. The minutia of some parts of the drill may perhaps be dispensed with on the part of the militia; but when exigencies shall call for the performance of the complete duty of the soldier, the whole system may be brought into operation. Let the divisions and subdivisions of the militia correspond with those of the army. Have the same number of officers for each corps with a corresponding grade. Let the several corps be distinct, and take their relative rank by corps and not by commission, as is the case in the militia of some if not all the States. Adopt for the use of the militia the same system of field exercise, and the same drill that is used in the army, dispensing perhaps with the duties of the camp, and the more fatiguing part of the drill, which might not be so genial to the feelings of citizens in time of peace. Suffer not exemptions from military duty to be so easily obtained as they now are in many of the States, but enforce the regulations by penalties or punishments which shall effect their observance. It may, I think, be stated that in Maine not more than one-half of the free able-bodied white male citizens, between the ages of eighteen and forty-five, are borne on the rolls of the militia. The fines for non-appearance are so low, exemptions are so easily obtained by the various provisions of the law, and so lax is the state of discipline, that at the musters of very many of our regiments one would almost invariably look without the line for the free able-bodied yeomanry of the country, than upon the skeleton of a regiment within. But, sir, instead of debating upon a subject which will occupy the attention of abler pens, I will confine myself to the immediate inquiries before me.

1. I am not possessed of the returns of the militia of Maine for the last year. According to the official returns for the year 1824 the number of the militia of this State was:

Infantry.....	35,212
Cavalry.....	1,168
Artillery.....	1,865

2. The militia of Maine is not organized in strict conformity to the laws of Congress. The brigades do not all consist of four regiments, nor the battalions of five companies, nor the companies of sixty-four privates. There are several officers in the militia, commissioned by the State authority, not recognized by the laws of Congress, viz: A judge advocate for each division, who is nominated by the major general of his division, and, if approved by the governor, commissioned by him with the rank of major; an adjutant and quartermaster to each battalion of cavalry and artillery, appointed by the commanding officers of their respective battalions, and commissioned by the governor with the rank of lieutenant; also a quartermaster sergeant to each regiment and to each battalion of cavalry and artillery, and a sergeant major, drum major, fife major, and master and musicians of regimental bands to each regiment, appointed by the colonels of their respective regiments, who grant them warrants accordingly. There is not for every battalion at least one company of light infantry, grenadiers, or riflemen, nor to all the divisions at least one company of artillery and one troop of horse.

3. The volunteer militia is principally composed of young men between the ages of eighteen and thirty. Their arms and equipments are superior to those of the regular militia. They are generally well uniformed, and their officers make the drill and discipline more a matter of study than the officers of the standing companies; and these troops evince a greater desire to improve and more ambition to excel than is found among the militia at large. The volunteer is therefore, I think, more efficient than the regular militia.

4. There is no preference given for entering the volunteer militia, except that on days of regimental inspection and review these companies are not liable to drafts of quarter and picket guard. They have the power of establishing by-laws, determining what number of trainings they will have in each year, not to exceed six, but these by-laws are obligations only on such as subscribe their names to them.

5. The volunteer militia being composed for the most part of the young men of the train-band, who are naturally more susceptible of improvement, and who are more desirous to excel than those of a more advanced age, and generally bearing on their rolls those of the higher ranks in society who may be liable to the performance of militia duty, these corps are apt to draw from the ranks of the regular militia the men most suitable to become officers, and such as, from their standing in life, their habits, and intelligence, would, by remaining with the regular militia, become such examples as could not fail to have a beneficial tendency upon the improvement of the militia at large. It must therefore, I think, be inferred that the establishment of volunteer militia does operate injuriously upon the standing militia.

6. Not being in possession of the official returns of the militia of this State for the last year, I can-

not answer the questions precisely. From the returns of 1821 it appears that the militia of Maine was then composed of: Companies of infantry, 374; companies of light infantry, 42; companies of riflemen, 5; companies of cavalry, 24; companies of artillery, 27.

The relative increase of companies since that time has been about the same in the different corps, but the volunteer companies are generally smaller in number than the regular companies. It is, therefore, estimated that the volunteers bear to the regular militia a proportion of about one to four.

7. So long as there is no distinction of corps in the militia, so far as respects the infantry, light infantry, grenadiers, and riflemen, and so long as these corps are, as at present, attached to the regiments of infantry, it would be a source of difficulty and confusion to both, when paraded together, if the volunteer corps were subject only to laws of their own making. Even if the corps were distinct, the conferring such privileges upon the volunteer corps might operate to increase their numbers, but would not necessarily promote their efficiency.

8. A classification of the militia would, I think, be an improvement. Every one who has noticed the progress of improvement in militia, as well as in the other situations in life, must have observed that the young more readily acquire knowledge than those more advanced. Their minds are more active, more susceptible of new impressions, and the buoyancy of animal spirits at the time causes them to enter with more avidity upon the studies of the theory, and their physical powers are better suited to the exercise of the duties of the soldier. After a private in the militia arrives at the age of thirty or thirty-five years the cares of the world are fast pressing upon him; the occasion for calling out the militia seems to him to be further distant than the time of his discharge; it is with reluctance he submits to the drill, but passes through the ordinary routine of duty as a matter of necessity rather than pleasure. Whoever manifests any desire to become acquainted with the principle of tactics or learn the theory and art of war, generally does so in early life; and though the citizen soldier may be as valiant and ready to step forth in defence of his country at an advanced age as when young, still experience has taught us that such a one is not the greatest proficient in the art of warfare. There is a period in the tour of militia duty at which improvement seems to stop, though the capability to perform after that time may not be lessened.

9. Age, rather than the single or married state, should form the distinction in making the classification. If the single or married state should be the line of distinction between the classes, there would be too great a disproportion between them. If the active class should be composed of the single only, it would contain but a small proportion of that energetic part of the citizens which is the strength of the militia. If, on the other hand, the married only were embodied in the active class, the privilege enjoyed by the sedentary class would operate injuriously upon the state of society, and afford a class of men well able to bear arms, an unmerited exemption from military duty.

10. If age should be adopted as the distinction between the classes, I think the term of service for the active class should be extended from the age of eighteen to the age of thirty years; the sedentary class to be formed of those between thirty and forty-five years of age. Such a period would come nearest to an equal division of the whole body of the militia; for it will be found that there are borne on the rolls a greater number under the age of thirty-two than above that age. The active class should be required to perform duty to an age until which there is reasonable ground to expect improvement, and the sedentary should not include any within such period. If there should be two classes only, no more proper period of division between them serves to be presented than the one suggested.

11. The militia should be in such a state of organization that it could be called into service at any moment the situation of the country should require its aid. If called upon to repel invasion, such is the local situation of our country that we could scarcely expect the exigency to happen without sufficient notice to give time to make many preparatory arrangements. But if we rely upon the militia to suppress insurrections, or to execute the laws, a momentary delay might defeat the object and prove disastrous to future operations. If, when called into actual service only, the officers of the higher grades were to be commissioned, though the most capable should be selected, they would be unacquainted with the inferior officers, and with the troops of their several commands; they would not know the respective qualifications or peculiar fitness of each for any particular service. Many officers of the lower grades must necessarily be superseded, and would therefore resign, or serve with a temper not suited to the occasion. If commissions are issued only to officers of inferior grades in time of peace, that inducement to excel, which is caused by the hope of promotion, would be almost wholly destroyed. Such a motive in the breast of the soldier is productive of splendid achievements in the army, and is not without its beneficial tendency in the militia.

12. A period of service for three months on one tour cannot but be attended with great sacrifice of life and treasure, and therefore productive of inefficiency. When it is considered that a proportion of the militia is composed of men not inured to labor or hardships, but many of whom are engaged in the most sedentary professions of life, it must at once be admitted that a sudden transition from their peaceful employments to the exposure and fatigue of field and camp duty must be dangerous to their health. A large part of the militia is composed of that class of the citizens who depend chiefly on their daily labor for the support of themselves and families. So long a detention from their usual avocations must be productive of suffering to their dependants, if not to themselves. If the latter evil should be remedied by government's paying the militia for this service, the amount required for the purpose would far exceed the advantage gained by the arrangement. To the people at large it would be a great inconvenience, if not sacrifice, for the citizens composing the militia to be called from their regular employments for so large a proportion of the year.

13. The militia in many of the States is trained from three to five days in each year, including the day of inspection, and the days of regimental and battalion musters. This is not found to be inconvenient; but the drills being had at different times in the year, between which there are long intervals, and in some instances occupying but a small part of the day, are productive of but little improvement. If, at any one of these trainings, anything is learned by the soldier, the impression is lost before he is again called to exercise his duty. Again: the time devoted to the drill and exercise at any of these trainings is so short, but little instruction can be given; but few of the principles can be explained or practiced upon; a large part of the system is therefore left untaught, and the troops are from year to year paraded to practice the same few simple unimportant exercises, without knowing anything about the principles of tactics or their application to other evolutions. If these separate trainings, inspections, and musters should be had on five or six successive days, a tour of duty might then be established, which would scarcely seem to be an innovation upon the present system; it would be but a small sacrifice of time or

treasure; nor would it subject the troops to any inconvenience. Such a length of time devoted to military duty every year would afford an opportunity to introduce the principal part of the system of tactics, to practice much camp and field duty, and to perform a great proportion of the company and battalion evolutions. I should think, therefore, that a tour of duty might properly be extended to the time above suggested.

14. By the laws of the State of Maine every commanding officer of a company shall parade his company on Tuesday following the second Monday of September, annually, at one o'clock in the afternoon, for inspection and drill; and on one other day in the afternoon for company discipline between said day of inspection and the review. The troops of each division are required to parade for review, in brigade regiments or battalions, on some day between the third Monday of September and the twentieth day of October, annually, and no non-commissioned officer or private is required to perform any other military duty, or attend any other training, except the duty of attending at the election of company officers. On the approach of public danger, when in the opinion of the commander-in-chief any of the exigencies are likely to happen, upon which the militia could, by the constitution, be called into actual service, the governor has power to order other and further training and disciplining the militia as he may deem necessary; and companies raised at large by voluntary enlistment may establish by-laws, in which they determine what number of trainings they will have in each year, not to exceed six, which by-laws are binding only for such as subscribe their names to them. For neglect of duty, disobedience of orders, or unmilitary conduct, officers are liable to be tried by court-martial, and, if guilty, to be sentenced to be reprimanded in orders, or removed from office, and adjudged incapable of holding any military office under the authority of the State for a term of years. If a non-commissioned officer or private neglect to attend any company inspection he forfeits four dollars. For neglect to attend any brigade, regimental, battalion review, or company training, he forfeits three dollars. For being deficient in the arms or equipments required by law, he forfeits six dollars. For neglecting to wear a uniform, he forfeits one dollar. There are also penalties and punishments for disorderly conduct on parade. If any private is unable to procure the arms and equipments required by law, the selectmen of the town where he belongs are obliged to furnish them at the expense of such town. When different corps parade, join, or do duty together, the senior officer present, according to rank, commands, without regard to corps. At regimental or battalion parades, the companies form in regiment or battalion, according to the rank of the officers present, actually commanding them; excepting the cavalry, artillery, light infantry, grenadiers, or riflemen, which by usage are detached from the regiments or battalions.

15. In many parts of the country the settlements are so scattered that it is inconvenient for many of the citizens to travel to any central point to a regimental or battalion muster, and more especially to a brigade muster. These musters do not generally occupy more than one day, a great part of which is necessarily lost in travelling to and from the place of parade. But little time is left for the purpose of military duty; the whole of which does not often extend beyond the inspection, a review, and a few evolutions of the line. The occasion not unfrequently calls together more spectators than troops; and the time, in many instances, is unfortunately spent in indulgences that are prejudicial to the morals of the community. I am therefore of opinion that frequent musters, as they are at present regulated, are not advantageous to the great body of the militia.

16. If any system should be adopted different from that applicable to the army, I have no doubt but it would be an improvement to confine the instruction to the officers exclusively. And even if the army system were adopted, and but partially applied, very beneficial results might be expected from such a regulation. Without well-informed and capable officers, but little can be expected from the troops; and it is the opinion of many intelligent officers, both of the army and militia, that a few months' drill in actual service, of recruits who have never before borne arms, will render them more efficient than the same number of years' discipline in the militia. In Maine the officers of the line in the militia are elected. The major general, by the legislature; brigadier generals, by the field officers of their brigades; field officers of regiments and battalions, by the captains and subalterns of their respective commands; and the captains and subalterns, by the members of their respective companies. It therefore not unfrequently happens that company officers, and sometimes those of a higher grade, are chosen, whose ignorance of the duty incapacitates them from affording any instruction to their troops. If the instruction should be confined to officers, much time, labor, and expense might be dispensed with on the part of the troops; and it is submitted whether the officers would not, in that case, become the repositories of much military knowledge, which, when the troops should be called into actual service, would be more advantageously afforded at once than from time to time, as it now is.

17. The system of infantry tactics, directed by law, is not universally pursued in this State. But few of the officers are in possession of that system. In 1814 the executive of Massachusetts, in pursuance of a resolve of the legislature of that State, directed that the exercise and manœuvres of the militia should be conducted agreeably to the principles established in a work entitled "Maltby's Elements of War." A copy of this work was furnished by the State to each officer in the militia; and that system has since been almost universally pursued by the militia of Massachusetts and Maine, both before and since our separation. By the statute of Maine, of 1821, the adjutant general was authorized to procure and distribute five hundred copies of the United States System of Infantry Exercise and Manœuvres; but the State appropriated no money for the purpose, and the work has not been furnished to the militia.

18. The system of exercise and instruction of artillery, generally practiced in this State, is that adopted by the legislature of Massachusetts, upon the report of the adjutant general of that State, made in 1814. It is entitled a "System of Artillery Discipline," and was published in Boston for the use of the militia in 1817. The principal defects in this system are the very few principles and rules stated in it, and their limited application. The principles of formation and deployment do not extend to any larger corps than the company, and the position of artillery, when attached to or connected with other corps, is not defined. This system was adopted solely for the use of the companies of field artillery, and does not include any system of instruction or exercise for light or horse artillery.

19. There is no particular system of cavalry tactics that can be said to be in general use in the militia of this State. Formerly the cavalry was drilled and instructed according to the principles laid down in a work entitled "Hoyt's Cavalry Tactics." The author was an intelligent officer of the militia of Massachusetts, and at the time this work was published the principles and evolutions contained in it were as well adapted to the discipline of cavalry as the state of military science would then admit. The alterations and improvements since introduced into the exercise and manœuvres of infantry and other corps have rendered a corresponding change in cavalry evolutions somewhat necessary. Within a few years,

a book entitled "Cavalry Tactics," by Pierce Darrow, an officer in the Connecticut militia, has been considerably used by the cavalry of Maine. The work was published at Hartford in 1822. It is an improvement upon the system heretofore in use, and is well adapted to the instruction and discipline of the corps of cavalry in the militia.

I have the honor to be, sir, with great respect, your obedient servant,  
JOSEPH SEWALL, *Judge Advocate 4th Division Maine Militia.*

HON. JAMES BARBOUR, *Secretary of War, Washington.*

CHILICOTHE, Ohio, August 29, 1826.

SIR: I observe by a circular from the War Department, of the 11th of July last, that, in obedience to a resolution of Congress at their last session, you are about to prepare a complete system of tactics for cavalry and for light and field artillery, intended to be a guide for the drill of this description of military force throughout the United States. It would have been well if the resolution had included a system of drill and exercise for heavy and light infantry and for foot and mounted riflemen.

I take the liberty of transmitting to you the following answers to the interrogatories contained in the circular, seeing that information is sought for by the Department of War from all quarters, and from sources not known to the department.

To the 1st interrogatory I answer that the official returns of the militia of this State will show an effective force of from 90,000 to 95,000 men; and I undertake to say that, if all men liable to do militia duty were duly enrolled, (which is greatly neglected by captains of companies within my knowledge,) it would show that our militia equals 110,000 or 115,000 effective.

Interrogatory 2d. I transmit to the department an act of the legislature of Ohio of the last session which will be more satisfactory and full.

3d. I should not hesitate to say (from my own experience) that the volunteer militia are most efficient for the first five or six months after being called into active service; but the regular militia, after five or six months active service, (if not disgraced by substitutes,) under good officers (not regular officers) are equally efficient, if not more so. The militia, when called into active service, should never be placed *immediately* under the command of regular officers. They will not serve under them willingly. They should be commanded by those with whom they are in some measure acquainted.

4th. Will be answered by the act of Ohio above referred to.

5th. I answer, quite the contrary; volunteers are always in a better state of discipline than the regular militia in time of peace. They embody themselves for mustering as a species of pastime. They drill often, and, from a spirit of emulation, acquire a very general and correct knowledge of the drill. This spirit of emulation extends to the officers and privates of the regular militia; and you can well anticipate the result. This, also, I have seen and felt.

6th. Will be best answered by the adjutant general of this State, who has the returns before him.

7th. It will; that power, exercised by them under the present and former laws of this State, has been of great advantage.

8th, 9th, and 10th. I should answer, no. Our young men are not *generally* the most active and efficient; neither are our elderly or middle-aged men the most inefficient.

I had some experience at Camp Holly, in a six months' tour of duty, last war, and about nine months at Norfolk, which enables me to say that not only men past the middle age, say 35 and 40, but even married men of that age are the most efficient soldiers; they have less ardor for the moment, but more firmness; they have less intrepidity, but more real valor; less fire, but more heat. I was a single man when in the service, and a very young one, too, but when danger threatened me, I thought more, much more of my sweetheart than any other man thought of his wife and children. I never shall forget those feelings.

11th. It would not. We should have no authority under which to act in concert, through which to communicate, to which to appeal, to which to look, a body without a head; confusion, wrangling, neglect of duty, and every other imperfection would befall us if we had no high general officers in commission.

12th and 13th. Surely it is; regulars should never be enlisted for less than five years; nor should drafted militia serve a shorter period than one year. The term of twelve months would give time to organize the drafts, instruct them in their duty, and fit them for one campaign at least. A shorter time would not do it. They will serve long enough to give time to raise new drafts, which ought to be ready to take the field at least one month before the time that the former drafts expire. This might augment the expense, but would save the blood of the country. Besides, a farmer, if called out on six months tour in January or June, or at any time between these months, loses his crop; that is, he raises none for that year, unless he has negroes or, in our free States, sons to raise it; he had then as well continue twelve months, for the other six is clear loss at any rate.

14th. Is answered by the act above referred to.

15th. I think not. I believe that militia musters of privates in time of *profound* peace are useless. But query: can you get subaltern officers to serve if you take away their command altogether? I fear you could not, unless they were paid for the time they would be required to spend in the drill of officers.

16th. It certainly would if frequent, say five or six times annually, and to remain on drill day and night for three, four, or five days at each time. But ought not the non-commissioned officers to be drilled also? I would suggest that the commissioned officers of each brigade should muster five times annually; five days each muster under the command of the brigadier general, and perform camp duty each night; and that, once a year, the major general should call a muster of the commissioned officers of his division to continue on duty under his command ten days, and perform camp duty; that the colonels of regiments should cause the non-commissioned officers of their respective regiments to be drilled by the adjutant three times a year, and perform camp duty three nights each muster, to remain on parade three days each muster, under his command; and that, once a year, the brigadier general of each brigade assisted by his staff, should cause a muster of all his non-commissioned officers of his brigade to continue on duty five days and nights, &c.; and that each officer so on duty should receive such compensation as would remunerate him for the lost time, &c. This is a mere suggestion.

17th. So far as it is understood, Scott's drill is scarce; those who have it do not esteem it much; the students amongst us who graduated at West Point do not understand it. They have notions of drill

different from any authors or practice which we have seen; and no two of those graduates can agree in their drill. Smyth's drill is preferred to Scott's; and some of our best disciplinarians think that Gardner's abridgement of Scott, or rather his *alteration* of Scott's drill, is best. Scott's drill is a bad translation from the French—more good theory than prudent practice.

18th. We have pursued the practice laid down in whatever books we could by accident procure. Some drill by one author, and some by another, and not a few, having no author to go by, drill from their own inventions.

19th. I answer as last above. The uniform drill for militia should be plain and easy, and not voluminous. The book which contains the drill should have as many plates of the formation of lines and evolutions as it has pages; whatever is written should be explained in plates if practicable. A book for general officers and field officers should contain the camp duty and drill of all kinds and description of troops. The books for other officers need not contain so much; for instance, the book for infantry (light and regular) need not contain the cavalry or artillery drill, &c., &c., as this; drill for regular and light infantry, one book; field and light artillery, one book; cavalry and mounted riflemen, one book.

Riflemen a very small book, capable of being carried by the privates without encumbrance; as in this description of force each man ought to know as much as his officers. They act almost individually. Thus sir, I have taken the liberty to address you freely in answer to the interrogatories contained in your circular. I hope the freedom will not be grating to your feelings as I have done it with the best intention, and from the great respect which I hold personally to yourself as the former governor of my native State, at whose call I once entered the service of my country; and whose call I shall never cease to obey; and under whose guidance and administration the military glory of this country will never receive a blemish.

I am, dear sir, yours, most sincerely,

WILLIAM MURPHY.

PHILADELPHIA, August 14, 1826.

SIR: On the 25th of July I had the honor to receive your circular of the 11th of that month, and beg leave to offer the following answers to the several questions therein contained.

1st. The number of the militia of Pennsylvania by the last report of the adjutant general is 165,618, of which about one-fifth are volunteers:

2d. They are organized in conformity with the act of Congress, with the following exceptions: besides a brigade inspector, a brigade major is attached to each brigade by the act of Congress; the brigade inspector acts also as a brigade major. To each regiment are appointed *two* majors, one only being allowed by the act of Congress. 3d. Two surgeon's mates are allowed to each regiment, the act allowing but one. 4th. A second lieutenant is allotted to each company instead of an *ensign*; and five sergeants and six corporals instead of four of each. The number of non-commissioned officers and privates in each company is "not less than seventy, nor more than one hundred and fifty." Within the bounds of the first brigade of the first division, to each company of a volunteer regiment of artillery and infantry, are allowed four sergeants, four corporals, and sixty-four men—the former having one first lieutenant, two second lieutenants, (one of whom acts as *conductor*,) and one third lieutenant; and each company of infantry having three lieutenants.

3d. The volunteer militia are generally the most efficient; some of the corps are scientifically trained by frequent drillings, and are always fitted for immediate service, and the rest of them may be considered so, under proper instruction, in a few weeks. I have never seen in the common militia of any of the States, in time of peace, any evidences of fit training for efficient service.

4th. Officers of volunteers take rank of militia officers of the same grade when their commissions bear the same date; and after seven years of successive service, the members are exempted from militia duty, except in case of invasion or insurrection. The volunteers retain their arms while they remain in their corps. I know no other instances of preference given in Pennsylvania for entering volunteer corps.

5th. I do not consider the establishment of the volunteer militia as operating injuriously on the regular militia.

6th. The volunteers of Pennsylvania are about 30,000—29,866 by the last return of the adjutant general, but since increased—and the whole militia, the first division, contains near 22,000 men, of which number upwards of 4,000 are uniformed volunteers.

7th. Volunteer corps in Pennsylvania "have power to make all necessary by-laws, rules, and regulations, not inconsistent with the constitution and laws of the State or of the United States, to promote the interest, good order and discipline of, &c., and for fixing on and giving notice of the times and places for parades and trainings." Such powers are necessary to all well-ordered volunteer corps.

8th, 9th, and 10th. I think it would be proper to divide the militia into three classes: the first of single men between the ages of 18 and 30, the second of single men between 30 and 40, and the third class of men between 40 and 50; the first two classes to be called for service, in their order, as the *active* militia, and the third class to be called the *sedentary* militia, and only to be employed within their States and Territories.

11th. This question may, perhaps, be considered as involving points of some delicacy in regard to State rights, which ought not to be abandoned in time of peace at least, lest their bearing on the improvement of the militia be in any degree unfavorable in time of war. However, I have no hesitation in saying that the lower the grade of militia officers called into the service of the United States the better, and especially that where it becomes necessary to employ a *general officer of the militia* one or more army staff officers should be attached to his command, carefully selected for their experience and tact.

12th and 13th. It is very seldom that militia can be rendered effectively useful in a service of three months only, and such tours must always be attended with great sacrifices of treasure, if not of life. The longer the period for which they can be called into the field the better. If, however, they have only entered for a short time, every endeavor ought to be used, in the very outset of their service, to induce them voluntarily to extend it; and such endeavors, judiciously made by popular officers before the novelty of a soldier's life has lost its charm, and before they have felt its hardships, will generally succeed. Offers of clothing and bounty, proportioned to the duration of the new enlistments, ought always in such cases

to accompany appeals to the spirit and patriotism of the citizen soldier. As soon as the object of further enlistment is effected, the officers ought to be more carefully sifted, and those only retained who are really efficient.

14th. The militia law of Pennsylvania requires the regular militia to be paraded and trained on two days in every year—once in companies, and once in battalion or regiment. Volunteer corps are required to train on three days, at least, of every year, and as much oftener as may be determined on by the by-laws of the corps.

15th. I do not consider frequent musters as advantageous to the great body of the militia. No correct instruction is received at such musters, and their effect on the morals of the people is positively injurious.

16th. If the officers were well selected, for their education, intelligence, and spirit, it would be highly useful to put them under a course of proper instruction; and, in that case, the oftener opportunities were offered to them of instructing their men the better. This remark must be taken in qualification of the last answer. No advantage can result from attempts to instruct the common mass of officers, unless composed of fit materials.

17th. The system of infantry tactics directed by law is pursued in our volunteer corps; in the militia no system of any kind is followed to any purpose.

18th. The volunteer artillery of my division pursue Lallemand's work, and a small elementary treatise prepared in 1814 for the artillery regiment of 600 men and 22 brass pieces at Camp Dupont, on the Brandywine. Colonel Prevost, an excellent officer of *volunteers*, also makes use of Lallemand's *Manceuvres* of the Artillery of the Imperial Guards, of which I believe there is but one copy here. I will bring it with me to Washington.

19th. Our State cavalry have generally adopted "Herries's Instructions," &c., "adapted to the use of the volunteer cavalry of the United States." This work was prepared in Philadelphia, and published, I think, in 1812, at the request of the officers of a volunteer regiment of cavalry then organized within this division. I consider it as a good elementary book.

In case of war it will seldom be necessary to resort to the drafted militia, as volunteers will generally be formed ready for any service that may be required, and new corps will be rendered, after a few weeks' training, nearly as good as the old. I consider the attempts usually made to train the common militia, by calling them together on one or two days in the year, as worse than useless. Assemblages merely for roll call, to maintain the organization of the regiments and to collect the returns of strength, would be quite sufficient. If they are to be trained at all, the light infantry and rifle exercise only ought to be practiced. Such troops are never fitted to act in large bodies; but if practiced in movements at extended order, and acting in small parties, and harassing the front flanks and rear of an enemy from covered positions, without attempting regular movements in mass, they become formidable.

The Tennesseans in line and uncovered, as at Bladensburg, feeling their inability to change a position, would have fled on the first demonstration against their flank; and the Bladensburg militia, behind a breastwork at New Orleans, having no occasion to manoeuvre, would have fought themselves into fame. The carriage of the common soldiers is said, and with truth, to be in the touch of the elbow and confidence in their officers; the militia man quickly loses the one support, and is seldom sustained by the other.

I have the honor to be, with the greatest respect, sir, your most obedient servant,

T. CADWALADER, *Major General 1st Division of the Pennsylvania Militia.*

Hon. JAMES BARBOUR, *Secretary of War.*

PHILADELPHIA, August 12, 1826.

DEAR SIR: I have received your note of the 27th ultimo, "requesting my attention to certain queries" contained therein, "with such remarks upon them as I might deem useful."

I am not aware that I can give *you* any information upon the subject, as you have been longer in commission than I have, with every opportunity for making observations, and amply qualified to do so; yet I cheerfully comply with your request, and give my ideas on the queries as put in your note.

*First.* "Are the regular or volunteer militia most efficient?"

*Answer.* The volunteer militia are the most efficient, because, generally, they are better disciplined; the rank and file are more energetic and intelligent, with a high sense of their own and their country's honor; the officers have more experience, and are better fitted to receive instruction.

*Second.* "Does the establishment of the volunteer militia operate injuriously on the regular militia?"

*Answer.* They thrive best together. An efficient militia law will fill the ranks of the volunteer corps, and at the same time render the ranks of the regular militia respectable, by inducing men of reputable standing in society to parade, and men of intelligence and character to take commissions of any grade. The volunteer corps will be a nursery to furnish officers for the militia. If the officers understand their duty, and can explain it in a proper manner, the men soon learn.

*Third.* "Would a classification of the militia be an improvement—one to be called the active, the other the sedentary?"

*Answer.* It would. You may call the classes what you please. I would call one the *elite*, the other the *reserve*.

*Fourth.* "In making the classifications, should age or the single or married state form the distinction?"

*Answer.* Both. The *elite*, or first class, should consist of the unmarried, from 18 to 30 years of age; all others, from 18 to 50, should form the *reserve*, or second class.

*Fifth.* "If age, what are the proper periods?"

See answer to No. 4.

*Sixth.* "Is not the period of service for three months only on one tour attended with great sacrifices of life and treasure, and productive of inefficiency?"

*Answer.* It is. Nineteen-twentieths of the deaths that occur from changes of habits, diet, exposure, &c., &c., take place in the first three months; it is just long enough to make a good man tired of the profession. Immense sums are expended in collecting the detachments; for baggage wagons, rations, uniform; for transportation of arms, &c., &c.; all of which is worse than lost, unless the period of service

is extended, as troops are not fit to look an enemy in the face without two or three months' instruction under competent officers.

*Seventh.* "If so, to what period might it be extended?"

*Answer.* Not less than twelve months; the longer the better. If two classes are formed, let the *élite* remain in the field during the war, or as long as their services may be deemed necessary. The *reserve* ought to be called out only in cases of invasion or insurrection.

*Eighth.* "From your experience, are frequent musters disadvantageous to the great body of the militia?"

*Answer.* They are. But the fines should be sufficiently heavy to induce the great mass of those able to bear arms to parade. A correct system should be adopted for collecting the fines incurred by delinquents for non-attendance on days of training; a judicious appropriation of the funds collected; and a rigid accountability in the several departments.

*Ninth.* "Would it be an improvement to confine the instruction to the officers exclusively?"

*Answer.* It certainly would not; yet officers' drills are very advantageous, and ought not to be omitted.

If the above remarks will give you any information, in addition to what you already possess, or confirm a nearly formed opinion, I will be greatly gratified.

I am, dear general, with great respect, very sincerely, your friend and humble servant,

R. PATTERSON.

Major General CADWALADER.

P. S.—I must plead personal indisposition and illness in my family for the delay of this communication. R. P.

WHITE MARSH, *Montgomery county, July 31, 1826.*

GENERAL: I have received your circular of the 27th instant, and, in compliance with your request, hasten to return you such answers to the several queries therein stated as my limited experience and reading may suggest.

1st. Are the regular or volunteer militia most efficient?

Upon this point there can be but little hesitation. In my opinion, nothing can be more entirely inefficient than the militia under the existing organization. Without arms, without any distinctive characteristic, in nine cases out of ten badly officered, they merely comply with the letter of the law, and repair to their colors, not from the elevated feeling of duty to their country, nor from the noble sentiment of military pride, but to save themselves from a paltry pecuniary consideration, or rather to avail themselves of an indulgence, without restraint, in all the immoralities of legalized misrule. Is it to be expected that such men, called into service, will be enabled to withstand a disciplined foe, and preserve inviolate the sacred soil of their country? It is not possible. But will they compose efficient and active tirailleurs? Equally out of the question; for, of all the troops of an army, its light corps must, necessarily, be its best constituted, and most inured to war. Of the importance of this truth, it will be attended with no small degree of difficulty to convince our countrymen. The idea among them is universal that it is only necessary for a light corps to be taught to run and crawl behind stumps and bushes. Unfortunately, however, for the honor of the country, these are arts in which its militia are but two well versed. Such manœuvres may, indeed, serve every necessary purpose with a defeated foe in full retreat, but upon a day of battle they will be found to be of little avail. To be perfectly cool, not to be seized with sudden or idle fears when beyond the immediate influence of their officer, to preserve unbroken their chain, to be able to retreat deliberately in the face of cavalry, join their reserves, form the square, then repulse the enemy, and, according to circumstances, continue their advance or retreat in the most admirable order—these are some of the important duties of light troops; and are they to be effected by an irregular, untought, and unofficered militia? The question requires no answer. It may, however, be thought that I have exaggerated the evils that at present attach themselves to our militia system. Attend a militia muster, under its most favorable circumstances, in a retired country situation, and these evils are presented to your sight in all their enormity. Riot, drunkenness, and every species of immorality, are the order of the day, which the pageant boobies, called officers, have neither intelligence to anticipate nor intellect sufficient to prevent. The man of spirit, though poor, remains at home and pays his fine, which is squandered, no one knows how, rather than submit for so many hours to so much degradation. All this is not the fault of the individual; for under other circumstances he becomes another being. The men who compose the volunteer battalions are likewise taken from the mass of the people. How are they distinguished? Invariably by their neat, soldier-like, and patriotic deportment. Their good sense selects and elevates to stations of command such of their comrades as are best fitted to establish among them all the requisite qualifications for which a citizen soldier ought to be distinguished—sobriety, military precision, and, in fine, a general deportment that reflects not less honor upon themselves than credit upon the community in which they move. It may be said, however, in opposition to all argument to the contrary, that it was the regular militia who gained the battle of New Orleans; who helped to decide the splendid sortie of Fort Erie; who repulsed the British at Sackett's Harbor, &c. But these men were no longer militia, in the common acceptation of the word; they had undergone "*le baptême de feu*;" they had imbibed the sacred fire of military devotion; their nerves had been made to thrill with the patriotic ardor and animated zeal of the gallant men who led them; and, to sum up all, they had before their eyes the noblest examples of chivalric valor and steady discipline in the corps of regulars and *volunteers* by which they were supported. The worst disciplined regiment in the State, placed in the hands of a Colonel Wood or a General Carrol, would, upon the instant, rise to the level of its destiny, and, impelled by the fire of genius and the spirit of liberty, at once become, like the heroes of Jemmapes and Fleurus, of Montenotte and Millesimo, of Fort Erie and New Orleans, immortal. It is only, therefore, by rendering the militia honorable, as, in fact, they ought to be; by inspiring them with the importance of the great trust confided to their care, of which, at present, they appear to be ignorant; and by rewarding the most worthy among them with posts of command, that they can ever become efficient, or be made to answer the end for which they stand created. Effect this, and the regular militia at once become more efficient than the volunteer, in the proportion of 135,000, the number contained in the State, to 25,000, the number

of volunteers; otherwise, it were better to depend upon a corps of 25,000 well officered, intelligent men, than lean upon a worthless, expensive rabble of 150,000 men.

2d. Does the establishment of the volunteer militia operate injuriously on the regular militia?

I think not. It is true it takes from the ranks of the regular militia the most respectable and spirited portion of its citizens. Still, these may be rather considered as raised to tolerable good schools of military practice, in which they are taught not only a spirit of emulation, and the necessity of a manly obedience, but likewise most of the elementary principles of the company and battalion drill, and are thereby made competent, in case of war or any great national emergency, to fill, respectably, more elevated stations in the line of the militia, or, according to their individual spirit and intelligence, qualify themselves as candidates for commissions in the regular army; and these are important results.

To the 3d, 4th, 5th, and 7th queries, I answer, generally, that a classification of the militia, regulated upon principles of regard to the rights and conveniences of the mass of the citizens, and enforced with impartiality and an eye to the moral habits of the individual as well as to his physical qualifications, would be attended with beneficial consequences.

I think it, however, a matter of the greatest moment, that in all changes to be effected or laws to be framed hereafter on this interesting subject, the principle of appeal to the spirit of national pride and patriotic devotion should be zealously and ardently developed. How was it that Rome marched to universal conquest? By inspiring her citizens with a sentiment of proud superiority over all other people. By keeping alive their tone of moral feeling, by convincing them that no nation could advance far in the road to either happiness or fame whose citizens were not taught to pride themselves not less in the knowledge than in the strict practice of their duties. It is not meant to be insinuated that the policy of Rome, in her plans of conquest, is a policy to be imitated here. Yet is she to be viewed as a bright exemplar in that particular relation to her citizens, for what can be expected of men acting under a consciousness of universal contempt and individual distrust? Remove then the stigma which at present forms part of the system; let not commissions be bestowed by a few idle, worthless, individuals, but make it obligatory, if that appointing power must remain with the people, upon a clear majority of the whole, to decide as to the qualifications of those to whom such important trusts are to be confided, for it must appear most evident that no permanent improvement can be effected in the militia system so long as the majority of its officers continue to be composed of men possessed of neither energy nor intellect sufficient to meet any emergency in which they may be thrown.

By the present limitation as to age the country is deprived of the services of a large portion of its most prudent, its firmest, and most sensible citizens. From the soundest experience, too, it appears certain that between the ages of thirty and fifty man continues in his full vigor, and of course best calculated to endure all the toils of labor or of war. Every individual, therefore, between the ages of eighteen and fifty should be liable to the performance of military duty. Now, this extension of the limitation as to age becomes the more important in the contemplated classification of *active* and *sedentary* corps, a classification that would certainly be considered an improvement.

I do not think that any distinction ought to be made between the single and the married state. If any, let it be viewed in the light of an honorary distinction; as, for instance, let the married man be considered as attached to the active class until the period of his thirty-fifth year, at which time of life let him be promoted and enrolled with the sedentary class. The same privilege should not, however, be extended to the single man until he shall have attained his fortieth year.

The "*active militia*," then, the light infantry of the State, will be composed of all able-bodied free born citizens, between the ages of eighteen and forty, with the above exception in favor of the married men.

The "*sedentary militia*," who may be looked upon as the grenadiers of the republic, will be composed of all able-bodied free born citizens between the ages of forty and fifty, with the addition of the married men who may have passed their thirty-fifth year. But no citizen should be permitted to parade under the sacred eagles of his country whose personal appearance would not bear a rigid inspection and indicate a sound tone of moral habit. If he possess not this moral habit of his own free impulses, the law should enforce it upon him and thereby teach him both the light in which he stands to his country and the honorable trust she reposes in him.

The "*active class*," comprised as above, should always be held in readiness for the service of the State, and such portions of it as may be required not be called out for a less term than twelve months, the State, of course, possessing the right of disbanding, at an earlier day should their services no longer be needed, for it is particularly important that a militia corps should always be embodied in a camp of instruction at least three months before it may be called upon to face an enemy in the field. Had this measure heretofore been pursued, what an amount of honor as well as of treasure might not have been saved to the nation. It is scarcely necessary for me to add how completely inefficient is a corps of raw, undisciplined men, commanded by inexperienced officers, in the face of a warlike and determined foe.

To the "*sedentary class*" might be allotted all points of local defence; nor should it be called out except for the purpose of keeping up its organization or to repel foreign invasion, when it might be made to constitute a firm and effective reserve.

In addition to what has already been stated in reference to the sixth query, I beg leave to mention a moral evil that results from the short period of service of three months, and which, added to the great sacrifices of life, and treasure, and honor that have always been attendant upon it, may be deemed conclusive against it. I allude to the fact of the citizen, under such a call, only having been in service long enough to contract disease and disgust, then he is sent home in a complete state of moral as well as physical prostration, to be cured by his friends, to diffuse his discontent of the service throughout his whole district, utter his complaints against his government, and even cry down the righteous cause in which his country may be engaged. Indeed, to me it was evident that to no other cause could the great dereliction of duty on the part of so large a mass of our citizens, during the late war, be more properly imputed than to this very one, which, as may be readily supposed, was eagerly seized upon and used as a powerful lever by the factious and disaffected to aid them in their unholy purposes. As to the seventh query, I will add to what I have already stated, that I do not conceive that a corps of militia can be made to answer any useful end if called out for a less period than twelve months.

To the eighth I answer, that under the existing state of things, the frequent musters of the militia certainly produce no good effect, and, in a moral as well as military point of view, may be deemed most deleterious in their consequences upon the habits of the citizens at large.

As to the ninth query, it is conceived that no degree of instruction will ever qualify a man of low or vulgar habits of mind for the task of properly commanding a body of freemen.

I have the honor to be, with respect and esteem, general, your obedient servant,

JNO. G. WATMOUGH.

Major General THOMAS CADWALADER.

August 16, 1826.

DEAR GENERAL: I inclose very short answers to the questions proposed by the Secretary of War.

I think so badly of the militia system that, in my opinion, it is impossible ever by its means to accomplish the objects for which it was intended.

The instruction of the soldier is derived from his officer, and we have certainly *none* in the militia under the rank of a major general. The *cadre* is of no use except to enable our government to draft the men, and a conscription (to which we shall be driven whenever our homes are attacked) would be as effectual. But even had we the men, they would be useless for the want of leaders and instructors. For these instructors we must depend on the United States, or we must form them at home. At no very distant period we shall probably have a body of State troops, but in the meanwhile upon the militia no reliance can be placed. Their very numbers prevents the possibility of disciplining them, and that number must be reduced exceedingly before the resources of our State, or even of the United States, would be equal to the requisite expenditure. There are in Pennsylvania about 160,000 men upon our militia returns. Of these (by estimation) about 5,000 are between the ages of twenty-one and twenty-two. Were every inhabitant of the State of this age required to perform one tour of duty, comprising six or eight months, we should have a small army always organized, the officers would have some experience, and the soldiers acquire that most important of all qualities—the habit of obedience. In a few years 20,000 or 30,000 men, all of whom had *served*, would be scattered throughout our State, and might be assembled at short notice. A war would probably be necessary to induce our legislatures to adopt such a plan, and incur the enormous expense incident to its accomplishment. But such a one might, I think, be made effectual, and with it perhaps might exist that most unmilitary feature—the election of the officers; for their electors would reflect well before they placed themselves under the control of one whose powers were great, and upon whom would depend the comfort of their whole time of service. The mode pursued in the appointment of the French non-commissioned officers would, if *sufficiently democratic*, be preferable. They are, I understand, selected by a board composed of the colonel, a company officer, and a representative from the privates.

In these “piping times of peace” my only hope is in our volunteers. They already amount to 20,000 men—more in number than we shall probably want. They require, however, a complete and minute reorganization; the regiments (most of which are mere skeletons) should be consolidated or filled up by bounties or supplies, and directed to adopt the same uniform. More extensive powers should be given to the officers, and the soldier subjected to some description of punishment more severe than the trifling fine at present imposed for the highest military offences. Field service can scarcely be expected from this description of force; but by procuring a convenient place of parade, furnishing music, and taking care of the arms at the public expense, they might be induced to devote considerable time and attention to their improvement.

After all they will always remain very deficient in discipline; but their officers are generally intelligent men, and under the excitement of active service would learn their duty rapidly. Then, and only then, their instructions will really begin; and we must be content to find ourselves at first with a force merely nominal.

Very respectfully, your obedient servant,

H. I. WILLIAMS.

Major General CADWALADER.

*Answers to questions proposed by Major General Cadwalader.*

No. 1. In Pennsylvania there is certainly no comparison between these descriptions of force. Our militia are worse than useless; our volunteers might be made tolerably efficient.

No. 2. The regular militia can never be respectable while a sum so trifling as two dollars is received as a commutation for personal service. Very few decent men ever appear in their ranks, and as the expenses of the volunteers are ten-fold greater than would be necessary to exonerate them from all military duty, those only who are fond of it join our uniform regiments. Were they not volunteers, they would never be militia men.

No. 3. As the duties of these classes are not specified, it is difficult to decide upon the propriety of this arrangement.

No. 4. In every classification age would be, I think, the better distinction. A large number of the most valuable members of the volunteer companies to which I have been attached were married men. This change in their situation seldom prevented their attendance on parade. These men, it is true, were generally in easy circumstances; but the women of the poorer classes contribute so much by their own labor to the support of their families, that unless encumbered with large families, they would suffer little by the temporary absence of their husbands.

No. 5. If the militia are to be divided into two classes (one of which only is to be called into service) the limit should be as near twenty-one as possible, taking care, of course, to include within it a number of men sufficient for any exigency. After thirty, no one in time of peace should be expected to perform any militia duty.

No. 6 and 7. The waste of life and *materiel* is always great among raw recruits, and if the militia are to be brought into the field their tour of duty should be made as long as possible. But I cannot believe that the slightest advantage would result from calling them out unless under a discipline totally at variance with our ideas of personal liberty and equality.

No. 8. All the musters at which I have been present so far from being "advantageous" were always scenes of the lowest and most destructive dissipation, where nothing was to be acquired but the most pernicious habits. From the ignorance of the officers and inattention of the men instruction was entirely out of the question.

No. 9. Anything would be an improvement which diminished the numbers assembled on these occasions. But unless their instructors had greater powers and more information than our militia officers possess I should hope little from this arrangement.

H. I. WILLIAMS.

A "militia system" is desirable in the United States, not for the purpose of encouraging a martial spirit in time of peace but to provide means of necessary defence in the event of war. Arrangements are therefore to be made which will not materially interfere with the pacific policy of the republic, and yet will so adapt its resources to its possible necessities that they may afford the most effectual aid in time of need.

The "efficiency" of a military body is proportioned to the extent with which it combines *discipline* with *numerical force*.

Of the two ingredients discipline is the more important, both because the largest body is weak without it and because there are positive difficulties in the organization and preservation of a very numerous force, some of which must exist notwithstanding the best established discipline, and all are greatly aggravated by its absence. A large number of men may without much effort be occasionally collected for militia muster in the way that such assemblies are usually got together. The idle and dissipated are induced to accept the summons from one motive, and those who are not able or not willing to pay the penalty of absence from another. But assemblies of the idle and dissipated thus convened do no good, and the neglect of work by the industrious poor does much harm. Indeed it would be impossible to muster the whole class of citizens, who are adapted by their age to military duty, sufficiently often to teach them the simplest elements of military knowledge without calling them from their usual occupations more frequently than the object would justify. There is no such extreme necessity for hostile preparation as will compensate the country for a sensible diminution of its productive industry in every department of labor. The emergency of war is always contingent and generally remote. Manufactures, public improvements, and the cultivation of the soil, are objects which claim perpetual encouragement, and must enjoy an uninterrupted supply of artisans and laborers or they will languish and injury to the general prosperity of the country will ensue. The ordinary trainings of the militia (as they are called) are certainly not so conducted as to prepare the individuals who partake of them either for the patient self-denial of camp discipline or the more active employment of the field of battle. Still less probability is there that these individuals, whose only experience and knowledge are derived from the merry meetings of a few muster days, will become instructors of others who must fill the ranks when actual service is required, and will look to the example and precepts of their comparatively better taught comrades for lessons of duty. Strong objections to these large meetings are stated with the force of reason and authority in the 29th number of the *Federalist*.

The difficulties arising both from want of instruction and neglect of other pursuits are greatly diminished by substituting for a general militia well organized associations of volunteers. They contain for the most part a larger proportion of persons whose temporary absence from their civil concerns will cause neither private suffering nor public loss. They are formed with readiness because they spring not from necessity but choice, and the same feeling of alacrity which leads to their formation preserves their existence and animates their zeal. Their appearance attracts distinction, distinction inspires them with pride, and pride induces an exertion to merit, by attention and study, and exercise, the notice which they receive. It is cherished together with a spirit of becoming rivalry, both by officers and men, as the best incentive to activity and rapid improvement. Advantages such as these (which the ordinary militia do not possess) are calculated to insure to a volunteer force one of the great requisites in view. But while the smallness of the body facilitates its advancement in discipline it may expose it to dangers which discipline alone never can resist, arising from the combination of numbers and discipline in an enemy. The difficulty thus exhibited is not in reality so important as at first sight it appears.

1st. The arrangements made during peace are not designed as a system in all respects perfectly adapted to a state of war without modification or change. They are a basis on which a tower of strength and defence must be erected when danger comes. If inferences may be drawn from past experience the extent of the volunteer peace establishment will be such as to create a large body of officers, who will be able to communicate to others the information which they themselves have already obtained. A cardinal virtue of the system consists in its capacity of enlargement as occasion may require for the purpose of embodying with its original elements various additions. The newly formed parts taking their tone and character from those already existing, both will require or display together, qualities which depend less upon previous habit and exercise than upon natural vigor, hardihood, and dexterity.

2d. Although during all ages great armies have occasionally been brought into conflict, yet by far the greater number of battles have been fought with comparatively few troops. Immense masses of armed men have indeed been collected to sustain the recent European wars. In the battle of Borodino no less than an hundred thousand men are said to have been slain. Still the value of small armies has been proved in numberless instances. They have often withstood the encroachments of powerful invaders and produced great changes in the destinies of nations. The battle of Pharsalia was won with twenty-two thousand men.

3d. The great engagements which have taken place within a few years on the continent of Europe have occurred within reach of a crowded population, where nearly the whole military force of several nations could without great difficulty be brought to bear on a single point.

But were it possible in the United States to bring together all their militia from the immense distances which it would have to pass, the very extent of vulnerable position would require that it should be kept divided. Our territorial wars must, from the nature of our position and institutions, be almost entirely defensive. Navigable streams and multiplied canals must be relied on for the transportation of an adequate force wherever danger threatens. It is impossible to keep concentrated in one spot a large body, which, from the peculiar burden it would impose on a part of the country, or the heavy burdens it would impose

on the whole, ought not, and from the scattered nature of the population cannot be formed from the inhabitants of a particular vicinity. The constitutional calls to which the militia are liable are few, and totally inconsistent with the principles of offensive war which characterize the policy and practice of European sovereignties; they are limited to the necessity of executing the laws of the Union, suppressing insurrections, and repelling invasions.

4th. The United States are placed at a distance from almost every other nation; a distance which renders extremely improbable an attack from a very numerous enemy. An European foe must transport an army at an expense and risk which will rarely be hazarded to gratify the resentment which prompts to offensive hostilities. There is little danger that any force which might arrive would not be encountered by one at least of equal number, without calling into the field the whole body of the adjacent population, or at least without placing the whole of it in the ranks of fighting men.

5th. Great probability exists of adequate increase of volunteer troops on the approach of war. Experience has shown their rapid multiplication in case of emergency. Example is always contagious. Many imitate their friends and neighbors without precisely understanding their own motives; and not a few are moved by the spirit-stirring influence of military glory. There were in England and Scotland, in 1812, no less than eighty-eight thousand volunteers, and the whole local militia of Great Britain amounted to but 196,446.

6th. Should a deficiency appear on the day of trial recourse must be had to adventitious aid; or rather, if apprehension be entertained that it will exist, provision must be made in time to prevent the evil. This may be done, 1st. By great inducements offered in time of peace; exemption from serving on juries and from personal taxes may induce the formation of volunteer corps, and public marks of honor and respect, and even rewards for high proficiency and skill in the theory of war, will keep alive the spirit of emulation and lead to successive improvements in military knowledge. 2d. If volunteers do not freely present themselves, provision may be made to divide the corps already formed into various new bodies, and fill up their ranks thus thinned by drafts extending in succession through the whole circle of able-bodied citizens between eighteen and forty years of age. No drafts, however, to be made except in the event of actual or threatened war. These provisions will require the co-operation of the State governments. But no efficient system can be devised that will not look to an union in measures which deeply affect both the general welfare and that of each commonwealth; and both must cheerfully combine in them or the whole scheme must fail.

These views contemplate an entire substitution, in time of peace, of volunteers for what is termed the "regular militia;" and even in time of war a hope that the substitution may be preserved. Musters of this last description of men may perhaps in some places be so conducted as to avoid positive evil; but they must be differently organized from those which are seen in Pennsylvania, where no plan has yet been devised which has resulted in practical benefit. Better than this would be their entire disuse. Volunteers may be frequently called into the field and taught to undergo, not the ennui of military idleness, but the wholesome discipline of military labor.

After all reliance must be mainly rested on a different force. Militia troops have undoubtedly in many instances not only made a gallant and successful resistance, but have displayed daring efforts of the most romantic valor. It is of a Russian militia that Sir Robert Wilson, in his sketch of the campaigns in Poland, relates such heroic incidents. "'Comrades, go not forward into the trenches,' cried out a retiring party to an advancing detachment, 'retreat with us or you will be lost, for the enemy are already in possession.' 'Prince Potemkin must look to that' replied the commander, 'for it was he who gave us the order. Come on, Russians!' said he, and his men marched forward and perished." The defence of New Orleans, which forms so distinguished a feature in the annals of our own militia, was not only brave in conduct but miraculous in success and in the relative results to the opposing combatants. Yet history is full of proofs, from the fall of Carthage down to modern times, that a mere militia cannot withstand a succession of conflicts against regular troops. Courage they may possess, and in a degree equal and perhaps superior to that of professional soldiers, who have less interest in the soil; but the endurance of patient preparation, the fortitude which consists in submitting to daily and hourly hardships, with only the promise of occasional relief by exchanging them for the excitement of danger and active exertion, can be gained only by time and a total relinquishment of the habits and hopes of civil life. Besides, the militia in any form is composed of materials too valuable to be made the victims of wanton exposure or unnecessary toil. The brunt of war must be borne by those whose gallantry may exalt the character of their country, while their loss will not remove its best support in better times, or darken its most brilliant triumphs with lamentation and sorrow.

J. R. INGERSOLL.

AUGUST 4, 1826.

NEW YORK, *September 6, 1826.*

SIR: I have had the honor to receive your circular upon the subject of the militia, and will proceed to make such remarks as the nature of your queries have suggested, omitting the first, second, sixth, and fourteenth, as they have reference to facts best known to the several State authorities.

Although it be known that discrepancies do exist between the United States militia laws and those of the States, and also that the laws of some States are not in accordance with those of others, still I have not the means of comparing. It is, however, evident that the United States laws have been the basis of the State statutes.

So far as I have had occasion to observe the organization of militia in South and North Carolina, New Jersey, and New York, during my service with them in the late war, the evils of malformation, disproportion in the various "arms," and imperfect instruction, were in a degree attributable to apathy and neglect. It has generally been the case that but few members of our legislative body have given the subject of the militia a careful examination; a general desire has been evinced the rather to make the statute conform to the habit of avoiding militia trainings than to give the citizen a just view of his duties, and to enforce their observance by law. The evils mentioned are not only consequent of neglect and imperfect laws, but also of erroneous and degrading estimates of the use and value of a militia; and, from the relative locality of the population, they can only be remedied by a patient examination of the subject and by the application of a proper system of instruction.

The subject of organization has something to do with arms and equipments. That these are not in conformity with the United States laws is well known, the fancy of volunteers being a common guide to their choice, while the use of muskets and fowling-pieces of various lengths and calibres promote the usual disposition in the ordinary militia to pass muster with as little of either uniformity or of service as possible. On the subject of uniformity of arms, it cannot be effected until an efficient mode of supply be adopted. It would require nearly a century to arm the present militia by the existing means, at the expiration of which period the increase of population would fourfold the number of the militia. It has occurred to me that if a bounty were to be paid to each citizen who would arm and equip himself as the laws should direct, passing the inspection of an ordnance officer, uniformity and arming the whole would sooner be effected, through an encouraged manufacture by private means, than by any other legal provisions. I do not mean to disapprove of United States armories; as such, they are important and useful.

In reference to your third query, there cannot be a doubt that, while the gratification of novelty has its influence, the volunteer corps will be better armed, equipped, and more frequently trained than the ordinary militia; and if this initial spirit could be kept in activity under one system of instruction, aided by a desire to improve that will here and there be found in every corps, volunteers would be the best means of assembling and training the citizens of the country. But I have observed volunteers gradually to deteriorate to a grade of worth certainly not superior to ordinary militia, and if a choice between volunteer and no service at all were permitted, our militia would soon cease to exist.

Of the 4th query.—There are youth in all populous communities who are desirous of forming volunteer corps, some induced by an aspiration to become useful, others by privileges and exemptions from fines, &c. The chief evil, where a desire to form such corps exists, is an erroneous estimate of the true object of such associations. There are also many who wish total exemption, arising from indifference and a want of respectability and admitted usefulness in militia trainings, a fundamental error, which has its root in lack of proper instruction in boyhood and in a vicious and traditionary habit of drawing contemptuous comparisons between militia and regular troops.

On the subject of the 5th query.—It has been frequently observed that the union of the volunteer corps with the ordinary militia has had the effect to depress any emulation that the latter might exhibit, by reason of wounded vanity when comparing the trappings of a volunteer with their own shabby and ill-suited supplies. If any advantage is to be derived by comparisons of this kind the corps should not be commingled.

In reply to the 7th query.—If by being permitted to enact their own by-laws is intended only to allow volunteers the regulation of their dress and the times and places of meeting, I do not perceive that any evil would arise from such permission. But no discretion should be permitted in relation to the kind and dimension of arms, nor variety in equipments, formations, camp furniture, or instruction. Should volunteers have power to make any rules in these particulars, it would destroy uniformity, and render nugatory any militia system.

In reference to the 8th, 9th, and 10th queries my opinion has been formed for years, that the freemen of this country should be enrolled in two classes, from the age of twenty-four to fifty-one years; all other ages exempt, except for volunteer service. The first class ("active") to be formed of ages between twenty-four and thirty-six years, and to perform duty at any point whatever. The second class ("sedentary") to be formed of ages between thirty-seven and fifty-one years, and to do duty within the county where they reside. I do not approve of separating the single from the married state; such a division would weaken mutual dependence and diminish respect for matrimony. This classification would encourage the young to seek instruction and to form volunteer service. The ages between twenty-four and thirty-six could leave home for distant service with more efficiency and with the least domestic evil; the cares of the female could be easier discharged within this period, by reason that the children would be young and easier dispensing with the control of the father than when older. The farm and mechanism could be conducted by the elder class, aided by the youthful and older exempts; the younger exempts liable to instruction, but free to form those connexions in life to which their age is prone and upon which the happiness of life and the strength of the State much depends.

In reply to the 11th, 12th, and 13th queries, I do not perceive any good reason why a higher grade than that of colonel should be commissioned in the militia in time of peace. A division is then not of necessity embodied, nor is it requisite for any purpose of instruction that a larger body should be assembled at one point than a brigade or two battalions, which the elder colonel should be qualified to instruct as well as a general officer, and thus do away with the worse than useless degradation of the qualities of a general by conferring the place, as is too often the fact, where talents are not commensurate with the functions of the rank. The time and expense consumed in assembling more than two battalions is not compensated by any result of instruction. Every manœuvre of the line can be exhibited by two battalions; and unless the militia by divisions can be retained in the field for a long period, little or no instruction can be obtained that could not be acquired more readily by a brigade.

In relation to commissions and the selecting of officers, it would seem that the genius of our government requires that the company officers should be elected by the companies. The field and staff officers should be selected and appointed by the highest legislative appointing power.

In reply to the 15th, 16th, and 17th queries, I am of opinion that frequent musters of larger bodies of men than companies are sufficiently beneficial to compensate for loss of time in assembling larger corps. It appears to me that camps of instruction for two or three months cannot be established in the country; and if they could be, I question their utility in time of peace. It seems to me enough for the militia to be assembled by regiments once a year, and when the locality of the population will justify, by brigades, the day following the regimental muster, once a year; by companies four times a year; by company officers at least eight times. The officers, commissioned and non-commissioned, of each regiment should assemble once a year, to be examined by a regimental instructor, who should be commissioned by the State authorities, to hold his commission during good behavior, and whose duty it should be to furnish every officer, commissioned and non-commissioned, with instruction, and to attend each company once a year. Upon the regimental examination, such officers as are proficient should be reported to the legislature and rewarded with some suitable mark of distinction; those who neglect to attend, and those who remain ignorant, should be fined or dismissed. The course of instruction for infantry should embrace a knowledge of the cleaning and repairing of arms, the construction and preservation of ammunition, the school of the soldier, company, and battalion, and the common formation and police functions of a camp and a march. These should all be in conformity with the United States regulations, which, as far as my observations extend, are not yet in general use with the militia, though they are becoming popular; and

it is very desirable that those regulations should be simplified and rendered applicable to the militia, and to elementary instruction in schools.

The artillery, in its organization, should have some fixed proportion in numbers to the infantry. There is a great defect in that particular at the present day. The instruction is very imperfect, and the constructions of that arm are frequently in conformity to the fancy of some local authority. The unfinished work of Lallemand is but little known or used. The old book of Colonel Stevens is usual, and I believe they have in New England a later compilation. A treatise upon this arm should of course emanate from the authority of the United States; but for militia it should include no more than a few clearly detailed elements, including a precise account of the construction and means of preservation, with a simple course of drill for the field and for the camp.

In reference to cavalry exercises and manœuvres it must be admitted, from the long training which is essential to acquire a knowledge of the character and disposition of the animal which the soldier rides, and also the constant instruction necessary for the horses themselves, that unless there be some actual school for this arm, militia cavalry will remain for a long time in a very inefficient state.

I will close these remarks by alluding to some further causes which have retarded improvement in the organization of the militia, and suggest some means of melioration.

The formation and training of our militia was based upon a monarchical system, and it cannot therefore be surprising that such an organization should be adopted by men who were born and educated under a monarchy; nor is it a cause of wonder that the sons should follow the traditionary ideas of their fathers on a subject which had been but imperfectly treated.

The low estimate in which militia duty is held, and the idea that its functions were a disreputable servitude, may be traced to our colonial dependence, and to imitation of English institutions.

The militia of England were not in those days estimated as the defenders of the realm; that honorable distinction was bestowed upon mercenaries. The militia was therefore an inferior grade, and its officers depended then and now upon the crowned chief of a standing army for their commissions, and for any appropriate distinction in society. Although the laws of this country acknowledge no such dependence, still it cannot be expected that impressions of early life, strengthened by imitation, could be suddenly obliterated or changed for the better.

The elementary books which our children read are English, and we have very little instruction given in the country of a peculiarly American character, and consequently education is not suited to the genius of the form of government under which we live. When we consider the simplicity of that social compact which sustains the confederacy; the relation which subsists between its constituent parts; the dependence of one State in the exercise of its will upon the forbearance of another; the welfare of one citizen upon the countenance of his neighbor, it must be admitted that the durability of the confederacy depends in some degree upon the adoption and application of a judicious militia system, through the means of early instruction. There are various modes by which this end could be gradually obtained. That which appears to me to promise success would be for each State to endow an academy for the express purpose of educating and forming teachers in all the requisite branches, the teacher to be located at the head of a school in each county, and gradually one in each town and district. Although it may appear visionary to the multitude, yet by the reflecting it must be believed, that if our elementary books and teachers could instruct children of proper age in the principles of the Constitution and the duty which they owe to the State, as well as that which they owe to their parents and neighbors, the country would, in a reasonable time, see the means of forming, among other institutions, an orderly and intelligent militia, and our legislative bodies becoming better acquainted with that subject, at least, than they are at the present day; for although there be no period of life in which a man may not acquire knowledge, yet instruction given to youth is received with greater facility, and its impressions remain more durable than that which is attempted in riper years; and an habitual sense of duty, inculcated in early life, is more to be relied upon for good effects than precept and example can insure when delayed to manhood.

The habits of camp life and the various and complicate experience which are the result of campaigns cannot be expected to be obtained in any other way than by actual service. But the numerous facts with which military history abound may be made familiar through scholastic instruction. Such information may with propriety be considered superior in usefulness to much that is forced upon the youthful memory. Nor need any fear that a knowledge of such matters may endanger the State. It is an idle notion, derived from design or ignorance, that a knowledge of military subjects may be dangerous to republics. Knowledge can never be prejudicial in a country like this; on the contrary, it would enable its possessor to avert real dangers. It would, therefore, be a blessing to have our schools enabled to turn out their pupils instructed, in addition to other and usual elementary matters, in a knowledge of the duties of a citizen to support and defend the State; and if the accurate and practical knowledge which campaigns and warfare can alone impart is not thus to be obtained, still, the elementary can be acquired, and, what is of great moment, it would be seen that knowledge of the means of defence would not unfit a citizen for any and for every other duty which he might owe to his family or to the community.

With great respect, your humble servant,

J. G. SWIFT.

HON. JAMES BARBOUR, *Secretary of War.*

SIR: The legislature of our country has announced the necessity of establishing a regular course of instruction for the cavalry and light artillery services, and for improving the organization of our militia; and your circular of July last, announcing the formation of a military committee of superior and experienced officers for these purposes, calls for information from every quarter, to digest it into a general system, which may form an epoch in the present rapid improvement of our military information and institutions. I have deemed it, in consequence, my duty, as an American officer, and as already employed by your special order on these very subjects, to submit to your better judgment, and to that of my superiors, the results of whatever experience I may have acquired during a long course of education in the first military school in Europe, and some years of arduous service in the cavalry of the French armies, where I have had occasions to observe and study the regulations of the troops of that arm in almost every other nation in Europe, who all either served under our standards or were opposed to us.

Without entering into any discussion with those whose prejudices oppose the establishment of any

permanent and regular system of defence, and whose ideas are sufficiently refuted by the decided expression of public opinion, numerous and plausible reasons are usually advanced against our maintaining any considerable force in cavalry. And it is undoubtedly true that, from our distant and isolated situation, we have less need of it than any nation which requires a regular army for its defence. But have not these objections carried us too far, in engaging us to suppress the only corps in our military establishment, and leaving our mounted militia without any system of organization and instruction? The instructions of Davies and others, which they follow in some States, are only imperfect abridgments, founded on the very vicious theory of the British cavalry, and their practice is nearly confined to marching out and parading on some public occasions.

1. It is true that the necessity under which any European enemy must lie of sending troops of this description against us by sea, and the shattered state in which they must arrive on our coasts, will probably prevent them from ever assailing us with such a force in any formidable numbers. And as for our neighbors of Mexico and South America, if we have any contests with them we are yet divided by deserts of too vast extent to come to close contest by land. But if we are not exposed to be attacked by any numerous force in cavalry, we forego an immense advantage over every invader in not securing it on our own side. A body of troops harassed by a long sea passage, and assailed on landing by fresh and active squadrons of horsemen, would make but a very weak stand against them. And the chief points on our coast being now secured by permanent fortifications, the main danger to which we are exposed is to sudden and predatory excursions along the vast extent of our shores, to oppose which cavalry, from the rapidity of its movements, is most especially proper.

2. Our country is also generally considered as unfit for its employment; its interior as too much covered by woods, rivers, and natural obstacles, and sufficiently defended by our numerous riflemen and militia, whilst every important point on our coasts will shortly be covered by strong works and batteries. In the first place, this is no objection to the utility of cavalry for arresting those sudden and predatory incursions which desolate in time of war the many parts of our long shore which must remain unguarded. In the second place, such an argument can only be advanced by those little acquainted with the nature of that arm, and its capability of adapting its operations to every kind of ground. I can venture to affirm, from my own experience and observation, that few countries are better fitted than this for a cavalry war, especially in the southern States, and need no further proof of this assertion than the history of the American revolution, and the exploits of Lee, Washington, and Tarleton. And who can answer that these same States, whose population comprises such dangerous elements, may not be subjected to another and more formidable invasion from an enemy little scrupulous about the means of injuring or even embarrassing in any way a rising rival.

Since we have hinted at this subject, delicate, indeed, but which ought never to be lost sight of, we will add that in those regions where a considerable portion of the inhabitants, far from adding anything to their strength, require, in time of peace, and still more in time of war, a constant check, no kind of force will be so effectual for this purpose as cavalry. And we will venture to affirm that by employing constantly small detachments of mounted militia to patrol round the country under the direction of the civil magistrates, an effectual stop might be put to the odious practice of kidnaping, as well as to the escape of fugitive slaves. It may be added that in our Indian wars cavalry would also be the most effectual force against those fierce and wild barbarians.

3. Another objection to the employment of such troops is derived from the vast expense of maintaining them, which, managed with all possible economy, must be twice as considerable at least as that of maintaining an equal force of infantry, and from the long and special course of instruction required to train them. But it is evident that if some cavalry is useful, and even necessary for our defence, these objections become of minor importance, and only make against the employment of that arm in considerable numbers. And we have already stated, and will further prove, that a very small force would suffice for all our purposes. The mass of our mounted troops must necessarily consist of militia and farmers on their own horses. And proper economy and good administration would much reduce the expenses of the remainder.

4. But allowing all this, will our mounted militia, properly organized and trained on a uniform and simple system of instruction, answer all these views? The reply to this question depends on a few plain data. Dispersed over a vast extent of country, they can only be assembled at any one place in small bodies, (not above one or two squadrons,) if called out frequently enough for instruction and training. Nor from the civil avocations of our citizens and farmers can they remain embodied for any length of time. Of course their system of instruction should be as short and plain as possible, and their manual consist merely of the school for the soldier and school for the squadron, simplified, as much as practicable, by recurring to the primary elements of cavalry tactics, which is all that they can practice. Such troops, if well and uniformly armed, organized, and trained to those elementary movements, will, however, be quite sufficient to guard our coasts against small predatory incursions.

But if called upon to act in larger masses against a more serious invasion they will be unable to manœuvre together. For the more extensive and compound movements of tactics, though executed only by the combination of those elementary movements, require a quickness of eye and of decision which can only be acquired by the constant and repeated practice of regular troops. And all the reading and theory of the world will never enable officers who have never seen them to perform them in the field with soldiers who have never executed them. For example, four squadrons, however well exercised in the school of the soldier and squadron, if commanded, when formed in line, to execute, for the first time, a perpendicular or oblique change of direction to the right or left, on a central platoon, could never act simultaneously with that combination of simple and rapid movements by which this manœuvre is performed in an instant by regular troops, changing the whole position of their line, and frequently turning the fate of a battle.

5. We think, therefore, that the addition of a single well organized and instructed regiment of cavalry to our regular army, trained to all the tactics of that arm, would be a most valuable augmentation to our actual means of defence, and probably sufficient of itself to encounter any invading force. But its chief advantage would be that of containing a body of officers perfectly versed in the theory and practice of their service, who can only be found in this manner, and who, were a larger force required, could readily lead, and communicate their knowledge and experience to our numerous mounted militia, already trained in all the elementary instruction required. We would thus possess all the elements of an excellent cavalry, and be enabled in a few weeks to raise any numbers which we might want. Indeed, without the establishment of such a corps we think it almost needless to compile a complete, methodical,

and philosophical system of tactics, which our militia can never practice, nor of course understand. A simple and uniform organization, a riding school manual, and the elementary principles of the school of the soldier and squadron, are all that they want, and all that they can possibly embrace in their instruction.

As to the expense of raising such a corps, it could not be great, and should be gradually distributed through the budgets of several years. For the training of cavalry, men and horses, is so slow that it would be quite absurd to organize a whole regiment at once. It would be sufficient to form at first a single squadron, (from 100 to 150 men,) for the instruction of the officers who would be destined to this service. And when the whole regiment was formed the expense of maintaining it would certainly not be considerable in proportion to its utility, for its force need never pass four squadrons, a number sufficient to practice all the manœuvres of cavalry, besides the primitive squadron of depot, which should always be maintained as a school for receiving young horses, recruits, and young officers and forming them to their service, none being admitted to the war squadrons but such as are perfectly trained. We would suggest the propriety of establishing this depot, which might be considered as a permanent school of cavalry, under the eye of the Executive and at the seat of government, which, from its central situation in the Union, the nature of its soil and ground, peculiarly adapted to cavalry exercises, the healthiness of its climate and facilities of conveyance which it possesses for the transportation of forage, seems to unite every advantage for the location of such an establishment.

If this depot was created and a regiment in due time formed out of it, we think that all the views of the government with respect to our means of defence by cavalry would be fulfilled, and that our force in troops of this nature, in which we are now entirely deficient, would be brought to the same degree of perfection as that to which our engineer, artillery, and infantry departments are rapidly approaching. We would possess a corps of officers perfectly trained in the theory and practice of their service, one good regiment, and unlimited numbers of mounted militia, uniformly armed, organized, and trained to elementary manœuvres, all over the country, sufficient to defend our coasts against predatory incursions and fit, in case of necessity, by joining the regular horse and being placed under the command of experienced officers, to be formed into numerous and effective corps.

The system of instruction for our cavalry service, if it is organized on these bases, must naturally divide itself into two parts. 1. A complete analytical course for the use of our military schools and officers, and to direct the exercises of our regular cavalry, investigating and explaining all the principles on which the service of that arm is founded. 2. A much shorter and plainer one for the militia, based on the other, so that when serving together they may act uniformly, but containing merely what is indispensable for them. In the following memoirs I have laid down all my ideas on these subjects, and request, with the utmost deference, to submit them to the judgment of the committee with one preliminary remark.

The French system of cavalry is undoubtedly the best and most scientific and rational in Europe. The more we investigate it the more we must admire the simplicity of its few fundamental rules and the manner in which they can be adapted to every movement and situation. But that system is imperfectly developed in their manual of cavalry, which merely lays down precepts without entering into their analysis, and is very unequally compiled by different hands. Some parts of it are absolutely defective, others inapplicable or useless in our service, and others may be much shortened or simplified. In fact, their practice did not always correspond to its theory. The memoirs which I submit to the committee are all based on that practice, though simplified in a few points, which I have designated. But in order that the committee may compare them with the manual, which I have literally translated, by order of the Secretary, I subjoin to the different parts of this work the corresponding parts of the French one which I deemed, on the whole, unfit for our purpose.

1. The first course of instruction destined for the schools, officers, and regular troops, comprises: First, the basis of the instruction of cavalry, containing in the first chapter a complete nomenclature of the technical terms of military organization, formation, and manœuvring, wherein I have endeavored to define them accurately, so as to give a general idea of the whole system. In the second, a system of organization and formation in the field proposed for the American cavalry, with a full analysis of the principles on which it is based; this part is entirely wanting in the French manual. In the third, a complete system of instruction, and winter and summer exercises for officers, men, and horses of the regular cavalry. In the fourth, observations on the proper armament and equipment of man and horse, with descriptions and explanatory plates.

To this memoir I have annexed the literal translation of the corresponding part of the French manual, whose deductions will, I think, be found very unequal, its order confused, and its explanations insufficient and imperfect.

2. The second part of this course comprises the proper elementary manual of cavalry, or the six lessons of the school of the soldier on horseback and the school of the squadron. This part is taken with some simplification and abridgment; but no alteration from the French manual, whose principles are excellent. As for the school of the cavalry soldier on foot, I submit to the committee a literal translation of the French manual, with observations, as I deem it extremely defective and ill compiled. In my opinion we want nothing more for the very few occasions where cavalry serves on foot than a short extract of some of the elementary movements from the manœuvres adopted for the United States infantry, light infantry, and riflemen.

3d. The third part contains an analysis and manual of the larger and more compound manœuvres of cavalry, which can only be performed in the field by several trained squadrons. This, like the former manual, is based on the French, but gives the manœuvres in a more analytical order, and explains the principles on which they are founded, which the other does not. In fact, they are all grounded on the movements detailed in the school of the squadron, compounded together so as to apply to every circumstance of ground and situation. It belongs especially to the instruction of the officers.

4th. The second course of instruction destined for the militia comprises: 1st, a short abstract of its proposed organization and formation in the field, exactly similar to those of the regulars, but wherein the results are merely laid down, without entering into the analysis of the principles on which they are founded. A few directions for the instruction of officers, men, and horses, and the school of the soldier and of the squadron, literally extracted from the former course.

These two courses, we believe, when corrected and fixed by the committee, would be sufficient to regulate and organize, uniformly, our cavalry service for the present; but they can only be considered as temporary. Until a school or depot for officers of cavalry be formed, as we have already mentioned, and

a regiment organized to practice them and test their merits, it will be impossible to establish a definitive system, which either must, or certainly ought to be, the sole result of reflection, experience, and experiment.

I have the honor, sir, of remaining your most obedient and most humble servant,

WM. THEOBALD WOLFE TONE.

The Hon. SECRETARY of the War Department.

*Observations on the organization of the militia, and on the queries contained in the circular of the Secretary of the War Department of the 11th July last.*

1. It is generally acknowledged that the defects of the present system of organization of our militia render its service precarious, insufficient for the defence of the country, and very expensive and inconvenient to the mass of our citizens, as well as to the government. This fact is confirmed by the testimony of Washington, and all our experience during the two great wars in which the republic has been engaged. Taking it for granted, the Secretary of the War Department, in his circular of the 11th July last, has inserted a series of most interesting queries, relative to the present form and results of that system and to the mode of improving it, and indicated the investigation of these questions as one of the chief points of the duties of this board.

But this important subject involves so many political and constitutional considerations that a new system can only be the result of long experience and repeated trials, and when completed, it is to the wisdom of the people and of its proper organs, the Senate and Congress of the United States and legislatures of the several States, whose respective rights and independence are so deeply concerned, that it must finally be referred. All that we can do, and that our duty as American citizens and soldiers seems to require of us, is to investigate the most prominent defects of the actual one, and suggest such remedies as, in our private opinions, appear not to interfere with those rights, either of States or citizens.

2. The most prominent defects of our militia are the want of uniformity in their organization and system of instruction. We believe that on these points the necessity of a reform is so generally felt that there would be no objection, first, to a law by which its companies, battalions, and squadrons, in every State should be formed on the same model as those of the United States army, with whom they must so frequently co-operate; second, to the adoption in every State of uniform courses of instruction for the elementary training of infantry, cavalry, and artillery, and their manœuvres and service in the field, (shorter and more simple but based on the same principles as those of that army.) Whilst on this subject we would observe that we possessed already very complete systems for the organization and instruction of the infantry and artillery of the regular army, but that a similar one was wanting till now for cavalry, as it contained no force of this description. One of the duties of this board was to secure such a system, and we would recommend the adoption of a manual, based upon it, for the mounted militia.

The board has completed and is ready to deliver in three manuals for those three services, simplified as much as possible, in order to adapt them to the little time which the militia can give to its military instruction. It does not pretend that they may not hereafter, on trial, be further improved; but believes them to be more complete and better adapted to the modern principles of tactics than any now existing. By their adoption the purport of the following queries in the Secretary of War's circular would be answered. Query 2. *Is the militia organized in conformity to the law of Congress?* Query 17. *Is the system of infantry tactics directed by law universally pursued?* Query 18. *What system of exercise and instruction of artillery, &c.?* Query 19. *What system of cavalry tactics have you adopted? What are their defects and remedies?*

3. There is no doubt that the establishment of such a uniform organization and system of instruction would be a great step towards rendering our militia more efficient. But as long as we entertain a natural and republican jealousy of a large standing army, we must depend chiefly upon it for the defence of our country, the protection of our extensive frontiers, and of those fortifications which have been erected at so much expense. To render it really competent to these purposes and give it the requisite activity and regularity, a great many more alterations would be wanted. These relate chiefly to its composition and the qualifications required from its officers. Convinced that any plan for organizing the militia merely as a fund to recruit the regular army in time of war would be utterly repugnant to the feelings of the people, we feel it our duty to suggest our ideas on those subjects.

As long as every citizen from sixteen to forty-five is indiscriminately enlisted in its ranks, and that no rule is established for testing the qualifications of its officers, its discipline and instruction, on whatever uniform and theoretically good principles they be based, can never be enforced so as to render its services practically useful. From the various and necessary avocations of such a mixed multitude, they can only be called out four times a year, for a few days at each period, but even this tax, when falling on the mass of the population, weighs very heavy on their time, and consequently on their means. Yet, unless the militia officers be particularly well selected and acquainted with their duties, it is impossible to train them thus to the most simple manœuvres, and the whole corps must present in the field an unwieldy and unmanageable crowd. We hesitate not to affirm, that if the practice of the manual exercise and elementary movements of infantry was introduced as a fundamental part of education in our primary schools, this simple innovation, besides affording a pleasant and salutary recreation to our children, would spread more military spirit and habits through our population than all those disorderly trainings.

The only part of our militia whose services can be relied on at present are those volunteer companies who arm, equip, and train themselves, and over whose organization, regulations, and instruction the government has little control and no inspection. We believe that the mass of its artillery and cavalry now consists of such companies, and however meritorious their zeal, it is highly desirable that they should be organized on a more permanent and regular footing, so as to give to the Executive, at all times, some certain information of the means of defence really existing in the country, a greater dependence on their support, and the means of organizing them when required. Nevertheless, as long as our militia remains in its present state, they form all its forces, and we must do the best we can with them. But if the general and State governments can agree on a uniform system for organizing it, under their more immediate control and inspection, we have no doubt that a much more efficient and equally national force might be created, and the formation of volunteer companies should then be only allowed on their agreeing to be incorporated in

its ranks and submitting to its regulations. These opinions of ours answer to queries 3, 4, 5, 6, and 7 of the Secretary's circular, which relates to this kind of troops :

Query 3. *Are the regular or volunteer militia most efficient?*

Query 4. *Is there a preference given for entering volunteer corps?*

Query 5. *Does the establishment of these corps operate injuriously on the regular militia?*

Query 6. *What proportion do they bear to it?*

Query 7. *Would it promote their efficiency if they had the legal power of making by-laws?*

4. We believe that such a system would be neither impracticable nor irreconcilable with our existing social and constitutional institutions, provided the following rocks and shoals were avoided in framing it: 1st. It should give no new nor extraordinary powers to the general government. 2d. It should not interfere with the present rights and privileges of the States and people. 3d. The mode of raising and training the militia, and the service to which it is destined, should interfere as little as possible with the private avocations of the mass of our citizens, and require as little as possible of their time, consistently with giving it any efficiency. 4th. And in framing it, we should remember that its real force, as well as that of any military body, consists not so much in its numbers as in its good organization, activity, and readiness to take the field, and especially in the qualifications of its officers.

But to give that active readiness to our militia, and afford the government the facility of claiming its services, without any great sacrifice of private interests, it is evident that it should be divided into two great classes—the active and sedentary; the former selected in the number required by our wants amongst the young and unmarried, and organized, for ready service in the field, into corps of infantry, cavalry, and artillery, in every State; (this class only should be subject to the calls of government;) the latter comprising the mass of the settled population, elderly men, and fathers of families, who should never be summoned to arms but at the call of their own State authorities, and in the defence of their own homes, neighborhood, families, and property in case of actual invasion.

We are aware that every proposal of this nature (though several of our ablest statesmen have advocated it) has been met by charges of laying the foundations of a system of conscription, and attempting to enlarge the powers of the general government at the expense of those of the States and privileges of the people. But by a due adherence to the rules just laid down, we hope to demonstrate that all the advantages of this new system may be procured without giving any new powers to the government, without infringing on a single right of State or citizen, and so as to render the service of the militia much lighter, as well as more effective, instead of making it weigh heavier upon them. It is true that its establishment will require a perfect understanding, correspondence, and concert between the general and State governments, but we trust that on a subject of such national and vital importance those authorities both elected by the people for the general benefit, would find no difficulty in coming to a compromise.

We are also aware that the nominal force of the militia now at the disposition of the government, which amounts to nearly 1,000,000 of men, would be much reduced; but its real strength would not only be amply sufficient for every purpose, but in fact much increased, as it would now consist only of young and active men, and that from its very reduction in numbers, it would be much easier to organize it, enforce its discipline, and arm, equip, and train it uniformly. We do not imagine, neither, that the consequences of this reform will extend to supersede the use of our standing army, and that the militia will thus be enabled to perform the same functions, or even to encounter alone a disciplined enemy in the open field. But in its present state, we deem it absolutely impossible to form out of it any force efficient for the defence of the country, and when thus organized, we trust that it will prove a most excellent auxiliary to our regulars, both for guarding the fortifications and batteries of our frontiers and assisting them in the field as light troops. The necessity of increasing them to the degree that would be otherwise necessary will also thus be obviated.\* We would observe, likewise, that this organization answers to queries 8, 9, and 10 in the Secretary's circular :

Query 8. *Would a classification of the militia be an improvement—one to be called the active, the other the sedentary?*

Query 9. *In making the classification, should age or the single or married state form the distinction?*

Query 10. *If age, what the proper periods?*

5. In investigating the bases on which an active militia should be formed, the first points which we have to consider are the numbers of infantry, cavalry, and artillery which the wants of the country require; their repartition amongst the several States, and their organization into divisions, brigades, and regiments. These points can only be settled by Congress, the natural umpire between the members of the federation, and should be fixed, from time to time, on the following data: the census, ascertaining their relative means in population, and the general system of defence of the country, of which the documents are deposited in its archives. A great difficulty presents itself at the very outset of this question. The political limits of our States, originally fixed on arbitrary lines of demarcation, drawn by people ignorant of the country in framing the patents of the English settlers, do not correspond with the geographical features of the land, nor with the system of defence based upon them. In some cases different parts of the same State must be attached to different frontiers; in others, several States must be joined into one. We trust, however, that as this power given to the general government should only extend to assign to each State the number and kind of active militia which it must furnish, and the frontiers which they must defend, whilst in all other respects they remain at the disposal of their respective governments, those minor difficulties may be easily compromised in regulating the details of the general system, of which we will only trace an outline for the present.

Our several frontiers require different systems of defence, and of course a different organization of their active militia, adapted to those systems. Between them extends a vast tract of country, impervious to any enemy, whose militia should be organized as a reserve or second line to that of the frontiers, armed and equipped in the lightest manner, and provided with the lightest artillery, to be in readiness to march at the earliest summons on any menaced point.

1st. Our Atlantic frontier comprises four great divisions, and is exposed to the first attack on any serious invasion of the country; luckily, it contains the densest part of our population, and that of all our great cities. Its active militia should be organized on the most effective footing, so as to be always ready to line, at the appearance of an enemy, the numerous forts and batteries which cover the most accessible and important points of our coast, and stand their first assault. It should comprise a great

\* We believe, however, that the staff service, and engineer and topographical corps in our army, imperiously require some augmentation, and that one good and well organized and instructed regiment of cavalry is yet wanting to complete it.

number of artillery companies, trained to the management of heavy artillery and mortars, and a certain proportion of cavalry to check those partial and flying incursions to which the vast extent of our shores must always be exposed. These maritime regions are backed in their whole extent by a mountainous ridge, running from Maine to Georgia, and inhabited by a stout and hardy yeomanry, who, lightly armed and equipped, should, as we have already observed, be always ready to advance in second line.

The first or northeastern division of the Atlantic frontier extends over the greatest part of the New England States, and may be formed into the five following districts, to adapt the organization of its active militia to its divisions into States: 1st, the State of Maine; 2d, the eastern and maritime counties of New Hampshire; 3d, those of Massachusetts; 4th, the State of Rhode Island; 5th, that of Connecticut. Its line of reserve comprises three districts on the valley of the Connecticut: 1st, the western counties of Massachusetts; 2d, those of New Hampshire; 3d, the eastern counties of Vermont. Its chief points of defence are Boston and Narraganset bay, besides the numerous forts which defend the coast; and it has two frontiers to protect, the one north and the other west of Cape Cod.

The second or central maritime division of the Atlantic frontier extends to the mouth of Chesapeake bay, and may be formed into the following districts: 1st, the southern and maritime counties of New York; 2d, the State of New Jersey; 3d, the eastern counties of Pennsylvania to the foot of the Alleghany; 4th, the State of Delaware; 5th, the eastern shore of Maryland, to which should be annexed (at least with respect to the organization of its militia) the counties of Accomac and Northampton, belonging to Virginia. Its line of reserve comprises: 1st, the highlands of New York up to Albany; 2d, those of Pennsylvania on the waters of the Susquehannah and its tributaries. Its chief points of defence are the two great cities of New York and Philadelphia.

The third or Chesapeake division of the Atlantic frontier extends from the mouth of the Susquehannah to the Dismal Swamp, but is accessible all along its coast by Chesapeake bay. It may be formed into the two following great districts: 1st. The western shore of Maryland and District of Columbia; 2d, the maritime counties of Virginia to the Alleghany, and is backed by the mountainous ridges of, first, Maryland, and second, Virginia in the Alleghany ridge, and on the headwaters of the Potomac, Shenandoah, James river, Roanoke, &c., whose militia would form its reserve or second line. Its chief points of defence are Baltimore, Washington, Norfolk, and Old Point Comfort.

The fourth or southeastern division of the Atlantic frontier comprises the maritime regions of, 1st, North Carolina; 2d, South Carolina; 3d, Georgia; 4th, Florida, lying on tide-water, and is backed by the western and mountainous counties of the three former States, whose white and hardy population forms, in fact, its real defence. There are few important points except Charleston, Savannah, and St. Augustine on this coast, but its militia, as well as that of the former division, should comprise an additional proportion of cavalry, to keep in check a portion of our population, which, unfortunately, instead of adding to the resources of our country, is to be dreaded and guarded against constantly as against an internal enemy. Cavalry is peculiarly adapted to a service of this nature.

2d. Our southern frontier is yet weak in population, and a great portion of its inhabitants are also more hostile to the safety of the country than useful for its defence. It must depend chiefly for its protection on the regular forces of the Union; nevertheless, a sufficient number of militia, amongst whom should be included several companies of heavy artillery and cavalry, may be organized amongst the planters of Louisiana, Mississippi, and Alabama, to assist them in guarding a line of forts, already protected by the deadly climate and marshes which surround them, and to keep the black population in check. Its line of reserve, fortunately, consists of the warlike and numerous population of Tennessee and Kentucky, who will always be ready to seize their rifles and descend the Mississippi to protect the great emporium of their trade and produce, and renew the trophies of New Orleans.

3d. Our northern frontier comprises in first line the western counties of Vermont and northern regions of New York, from the neighborhood of Lake Champlain to that of Lake Erie, and in the second line the western district of Pennsylvania and State of Ohio, whose numerous, hardy, and rapidly increasing population will shortly be more than sufficient to repel any attack directed from Canada. Its militia should chiefly be organized into light corps, to co-operate with the regular army, and its grand points of defence are the neighborhood of Plattsburg, of Sackett's Harbor, and the Niagara frontier.

4th. Our western and northwestern frontier comprises the States of Missouri, Indiana, Illinois, and Territories of Arkansas and Michigan. It has no attack to dread from any enemy but the Indians, who, were they not protected as well as kept in check by the regular garrisons of Detroit, Green Bay, Michilimackinac, Council Bluffs, and Arkansas, would probably be soon destroyed by the backwoodsmen and riflemen of those single States.

In concluding this hasty and general survey, we must repeat that, although several States, such as New York, Pennsylvania, Maryland, Vermont, &c., are thus divided into two or three districts, belonging to different military frontiers, yet this circumstance affords no reason for giving to the general government any more powers over their militia or its organization than it now possesses. The governments of these States need only be aware of the particular part or parts which they must take in the general system of defence, of the force required from them, and of its nature; they may then, as we shall presently develop, organize it themselves on a perfect understanding with the general government.

6. The next point to investigate in forming an active militia (its numbers, organization, and theoretical system of instruction being thus fixed in each district) should be the mode of raising it and recruiting its ranks. We think that the general government, confining itself to assign to each State its quota in infantry, artillery, and cavalry, should leave all further details to the discretion of their several governments. The best principle on which these can be based would be to declare every young citizen from 16 or 18 to 24 or 28 years of age, or any period which may appear more suitable, liable to take his chance for serving in these corps during that time, leaving the States at liberty to make the selection, and grant such exceptions or commutations for small fines to all men of certain professions, such as sailors or clergymen, or of certain religious persuasions, or even to all married men with families, as they might deem proper. To the mass of our citizens the only consequence of this innovation would be that, instead of remaining subject to be summoned from their domestic avocations from 16 to 45 years of age, they would only take a chance of paying this tribute during six years of their youth, after which, passing into the ranks of the sedentary militia, they would be freed from any call for distant and active service, and only liable to take arms for the defence of their immediate homes and property.

Whilst on this subject, we are not prepared to deny that, with some modifications, the system of volunteer companies may not be continued with respect to the artillery and cavalry companies of the active militia, as these ought to be composed of the most respectable citizens and farmers, who can afford

to arm, equip, and mount themselves at their own expense, and give more of their time to training than the rest of the people. But they should be bound to conform to the general regulations, and submit to the same control and inspections as the rest of the militia.

7. The next question to be investigated in organizing the active militia, viz: the appointment of its officers, and qualifications required from them, is one of the greatest importance and delicacy. It is a most incontrovertible principle in the organization of any kind of military force that its efficiency depends chiefly on this point, for the best troops, ill commanded, will be inferior to the worst, properly conducted, and the less they are trained the more essential is it for their leaders to be so. Neither can it be denied that in several States there exists many abuses relative to these appointments, of which a striking instance was lately given in one of our chief States and cities. Nevertheless, such is the just and rational apprehension which the people entertain of increasing the patronage of the general government that the privilege of choosing their own officers is one of those of which the States are most naturally jealous, and which we are convinced they will never renounce.

We think, therefore, that the general government should neither appoint a single officer in the militia nor interfere with the existing customs of the several States on that subject, whether these appointments be made by their executives, or by a council of appointment, or by the election of the militia; but by two general rules, which should, in our opinion, be recommended to their adoption, and passed, if possible, into a national law, all the existing abuses might be obviated: the first declaring that no officer should be promoted unless he had passed through every inferior grade; the second appointing a board of examiners in every district, which might be selected amongst its chief officers, to examine the candidates on every vacancy. Their certificate of his sufficiency and qualifications should be made an indispensable condition for his appointment. By the first of these laws, we mean not to confine the line of promotion to that of seniority; on the contrary, as modified by the second, it would prevent an incapable officer from ever rising beyond the lowest ranks, whilst in appointments to the superior ones, it would secure the election of men of some experience. It is scarcely necessary to add, that the officers even of the volunteer companies of artillery and cavalry should be bound by those laws and subject to those examinations as well as all others.

We also think that the post of an officer in the active militia should be one of some permanency, as well as respectability, and that they should not be removed, unless in case of resignation, incapacity, or misconduct. When we consider how much the duties and theoretical knowledge required of them would be simplified by the general adoption of the new systems of instruction, which are accessible, with a little study and attention, to the most moderate capacity, we cannot think that there will be much difficulty in finding in every State a sufficient number to command the militia. To disseminate this knowledge must, however, be a work of some time, but if those regulations are universally enforced, we believe the improvement will be rapid. The States may accelerate it very much by encouraging the creation of military and mathematical academies on the model of Captain Partridge's, by the practice of the manual exercise and elementary manœuvres of infantry in their primary schools, and by giving a certain preference, in their appointments to places of officers in the active militia, to those young cadets who, educated at West Point, have found no room in the narrow ranks of the army.

An important question is suggested in query 11 of the Secretary's circular: "*Whether it would be an improvement to issue commissions to inferior ranks only in the militia in time of peace?*" We are decidedly of a contrary opinion, and think it most essential that the staff of the active militia, in every military district of every State, should be permanently organized. Its duties are of a nature not to be learned in the moment of necessity, and in peace as well as in war it should constantly inspect its members and the state and discipline of its armament, and report on them to its own and to the general government. We are also of opinion that the appointment of staff officers should be left to the discretion of the executive of each State, confining it merely to select them out of those officers of corps who have already undergone the examinations before mentioned, and that a certain salary should be attached to their functions, especially to those of the adjutant generals, to compensate for those duties which must take a great portion of their time.

With respect to the reports just mentioned, which are not intended to give to the general government any right of interfering in these matters, but merely to inform it constantly of the real state of the means of defence existing in the country, a special office might be created in the War Department to receive them, and the collection of those documents, in a few years, would not only make us perfectly acquainted with the real value and strength of those means, but afford ample materials for improving them, and collecting the ideas of our best officers with respect to them. But, for the further simplification of the whole project, we can see no objection to addressing these reports to the Adjutant General of the United States army, as a separate branch of his duties, provided that his office be enlarged and an additional number of aids and clerks attached to it. Such reports would answer the purport of query 1 in the Secretary's circular: "*What is the number of the militia in every State?*" and, indeed, of all the other queries, annually.

8. A few observations relative to the training and service of the active militia, in time of peace and war, will conclude our general review of the reforms which we would deem sufficient to render these corps equal to their duties. We have already observed that the efficiency of the militia must chiefly depend upon that of its officers, and indicated the means by which, in every State, their theoretical instruction at least might be ascertained and tested, and the facility with which it might be promoted by the aid of private military academies. Nor have we the least doubt that the superior respectability which the militia would soon assume, under the new system, would rouse amongst them a spirit of emulation, increasing every year. But we do not think that the practical exercises of the field should be exclusively confined to them and to the non-commissioned officers, as has been proposed before now. It is absolutely necessary to train the men occasionally to move together, and the direction and inspection of those exercises is the only way of perfecting the officers themselves in the practical as well as theoretical duties of their rank.

We do not, however, think that the musters, even of the active militia, and especially of its infantry, which forms the great mass of its numbers, should be much more frequent during the six years of service required of them than those now required of the whole population, from 16 to 45. In the first place, we do not expect it to be placed at once in opposition to regular troops in the open plain, nor intend it to supersede the use of a standing army, and as its chief duty will be to assist the regulars in the capacity of light troops, much may be done by the individual exertions of the men in practicing sharpshooting in their own homes. And if a great mass of them have been previously trained to the elementary exercises,

as already suggested, in the primary schools; if the whole are so organized as to be ready to assemble whenever required, and accustomed to muster in rank and file; and if their officers are well selected and instructed in the new, simple, and uniform theory of tactics, little will be wanted in time of peace, and it will be an easy matter, and take but little time at any period, to teach them the whole manual of infantry when their services are required. The artillery and cavalry require more training, and it is for this reason that we suggested the propriety of forming these corps of volunteers, who could afford more time to these duties. These observations answer to queries 14, 15, and 16 of the Secretary's circular. Query 14. *What are the regulations of your State for training the militia?* Query 15. *Are frequent musters advantageous?* Query 16. *Would it be an improvement to confine the instruction to the officers?*

9. Finally, with respect to the service of the active militia in time of war, we do not propose to give to the general government any new or greater power over it than it now possesses over the whole militia. The active as well as sedentary militia should remain at the sole disposition of their own governments, until called to the field by act of Congress; or, in cases of sudden emergency, or during the recess of that assembly, by presidential proclamation. But with regard to the time that they should be bound to serve, we are convinced from the experience of all our wars, and testimonies of Washington and Jackson, that nothing can be so inconvenient and expensive as confining that duty to a term of three months' service. The active militia, when called to the field in time of war, should be considered as a permanent corps, and although a portion of its men may be dismissed and replaced every winter, when they have performed their six years' duty, none should have a right to leave his ranks during the course of a campaign, even though he had served his full time. This opinion of ours agrees with that expressed in queries 12 and 13 of the Secretary's letter. Query 12. *Is not the period of service for three months only on one tour attended with great sacrifices of life and treasure, and productive of inefficiency?* Query 13. *To what period should it be extended?*

10. In concluding these observations on the most prominent defects of our present militia, and the best mode in which they may be remedied, the improvements which we suggest amount to—1st, adopting for it a uniform system of instruction; 2d, organizing all its corps on the model of the regular army; 3d, dividing them into active and sedentary, the former composed of the unmarried youths, and obliged to serve six or eight years, (remaining alone subject to the calls of government;) 4th, forming its artillery and cavalry of volunteer companies; 5th, dividing and organizing it into divisions, brigades, and regiments, by military districts, according to the system of defence of the country, leaving to the general government the power of fixing the quota of each district, and to the States that of raising and officering them; 6th, subjecting these officers to pass through every grade, and submit to the examination of competent boards, before they can be promoted; 7th, organizing a regular staff in each district, and obliging it to report to the general government, and to that of their own States, the numbers, discipline, and armament of its active militia; 8th, declaring it in permanent service in time of war, and allowing of no term of duty shorter than a campaign.

We pretend not by these alterations to create a new and complete system; we are aware that many points relative to their discipline and service in peace and war will remain to be settled, and can only recommend, as a general rule, that all regulations on these subjects be framed as closely as possible on the model of those of the United States army. But we trust and believe that their result will be to render our militia more competent to every purpose of national defence than it can be in its present state. We would thus enter on a career of improvement, and time and experience would soon bring the whole system to as much perfection as is attainable by any militia force whose civil and domestic avocations must ever prevent it from applying all their time and attention to military objects.

PHILADELPHIA, August 14, 1826.

SIR: I have been duly honored with a copy of your circular of the 27th of last month, making some inquiries relative to the militia and volunteer systems, which I will answer in their order.

1st. Are the regular or volunteer militia most efficient?

By "regular," I presume is meant the common militia, some of whom would have been as well described as "irregular." In point of efficiency they bear no comparison to volunteers. I commanded a militia regiment many years, and I suspect no one ever strove harder to make them respectable, but with little effect. I published a proposition to raise a volunteer regiment, to be clothed in the simplest uniform, viz: a plain blue coat, white pantaloons, and a black cockade. I turned out, one parade, 750, rank and file, and I had the satisfaction to see them respectable and respected. Many of the persons whom I had never been able to do anything with in the militia became excellent soldiers. A common militiaman is deficient in that pride and *esprit de corps* which is absolutely necessary to make a soldier. Dress him in uniform, and enrol him in a volunteer company, and he is an altered man.

2d. Does the establishment of the volunteer militia operate injuriously on the regular militia?

I think it does. The common militia are considered a grade below volunteers. Hence, very few who have any pride, and can afford to purchase a uniform, will fill their ranks.

3d. Would a classification of the militia be an improvement—one to be called *active*, the other *sedentary*?

I do not believe it would.

4th. In making the classification, should age or the single or married state form the distinction?

If such a classification is determined on, *age*, and not the married state, should determine. All other things being equal, I would depend most on a married man: he has more ties to bind him to his country.

5th. If age, what are the proper periods?

Forty-five has generally been considered the period, but I have known men over fifty perform all the duties of a good soldier as faithfully as at any period.

6th. Is not the period of service for three months only on one tour attended with great sacrifices of life and treasure, and productive of inefficiency?

It is the most inefficient and useless plan that can be adopted. It requires three months to teach a man the duties of a soldier, to accustom him to the life, and prepare him to bear the fatigues and privations of a camp. Just as he is becoming a useful member of the corps, and has contracted habits that unfit him for a return to civil life, he is turned away, and his place is filled by a raw recruit. The tour

ought to be one year; then you would have nine months valuable service from him, and the probability would be that he would remain longer, if required.

7th. If so, to what period might it probably be extended?

This has been anticipated in the last answer.

8th. From your experience, are frequent musters advantageous to the great body of the militia?

To the volunteers it is, but to the common militia it is time thrown away. Four, six, or eight days' militia training in a year can never make a soldier, but it may make a drunkard and an idler. It ought to be entirely abolished.

9th. Would it be an improvement to confine the instructions to the officers exclusively?

This depends upon who are to be their instructors. If a plan could be fallen on to give them commands of the United States military posts, or in any other way have them instructed by efficient persons, I should answer "aye," otherwise I would let them remain at home.

In answer to your general inquiry, as to any improvement in this "great arm of national defence," I would take the liberty of suggesting that in teaching the drill the Lancastrian system might, in my opinion, be adopted. I once reduced the exercise to form, and taught it in that way, and was astonished at the rapid improvement that ensued.

I have the honor to be, sir, your obedient servant,

P. A. BROWNE, *Division Inspector 1st Division.*

Major General THOS. CADWALADER.

NOVEMBER 16, 1826.

DEAR SIR: Without preface or ceremony I proceed to answer the questions touching a more efficient organization of the militia of the United States proposed by you to me on the 27th July last:

Question 3. "Are the regular or volunteer militia most efficient?"

Answer. The volunteer militia are by far the most efficient; although some of these corps are extremely deficient in tactics and military knowledge, yet others have attained a proficiency that would not disgrace the regular army.

Question 5. "Does the establishment of the volunteer militia operate injuriously on the regular militia?"

Answer. No, not as organized in this State; for I conceive the officers and men who compose the volunteer corps would not take part in the duties of the ordinary militia.

Question 8. "Would a classification of the militia be an improvement—one to be called the 'active' and the other the 'sedentary?'"

Answer. I consider a classification of the militia into *active* and *sedentary* would be productive of great usefulness.

Questions 9 and 10. "In making the classification, should age or the single or married state form the distinction? If age, what are the proper periods?"

Answer. In making the classification, I would take for the active all single men between the ages of twenty-one and twenty-seven years, and married men between the ages of twenty-one and twenty-five; and if a single man should marry after he is twenty-five, I would only require him to serve until the age of twenty-six.

Question 12. "Is not the period of service for three months only on one tour attended with great sacrifice of life and treasure, and productive of inefficiency?"

Answer. Yes.

Question 13. "If so, to what period might it be properly extended?"

Answer. I am of opinion that the period of service should be for the current year; it would then afford ample time to government to make requisitions on the different States for their quota, and for the States time to organize their drafts in advance for the coming year's service. It is doubtful whether under this regulation they would seldom have to serve more than a three or four months' campaign, and government would have at all times during that period an efficient organized army, ready to take the field at a moment's notice.

Question 13. "From your experience, are frequent musters advantageous to the great body of the militia?"

Answer. No, not as organized and disciplined in this State. I should prefer its being done away with altogether, (conceiving the present mode as worse than useless, save enrolment to ascertain the number only,) and substitute in place thereof the volunteer or active militia system, as here contemplated.

Question 16. "Would it be an improvement to confine the instructions to the officers exclusively?"

Answer. From my experience, I am of the opinion that officers cannot be properly instructed in their duty without they unite theory to practice, and to do this, government must either encourage the volunteer or active militia system, (as here contemplated;) for I conceive it to be impracticable to organize the officers into companies in the present state of our dispersed population, which I humbly conceive would be necessary if government confined the instruction exclusively to officers.

#### REMARKS.

From the little experience I have had, I am satisfied that the only efficient force (besides the regular army) that government could rely on in case of an emergency, or the first campaign of a war, must, from necessity, be the volunteers; and if a system affording them proper encouragement can be devised, it would certainly be the most agreeable, and one more in accordance with our habits and institutions than any other; for anything like compulsion, without a corresponding necessity for its enforcement, will not be borne with cheerfulness, but would generally be resisted by the American people.

How this is to be accomplished, I will leave for yourself and others more competent to determine; but I will again, with due deference, respectfully suggest that the grand point, in my humble opinion, is to get the officers properly instructed in their duty; and if they possess the proper natural qualities for commanding, they will be enabled to impart it with great *rapidity* (if I may be allowed the expression) to the men who usually compose our volunteer corps.

With these answers and remarks, I will leave the subject to abler hands.

With the highest respect and esteem, I am your obedient servant,

JOSEPH S. RILEY,

*Lieut. Colonel 1st Reg. Penn. Volunteer Infantry, No. 2, of the Line.*

Major General CADWALADER.

CONWAY, Massachusetts, October 12, 1826.

DEAR SIR: William H. Sumner, esq., the adjutant general of this Commonwealth, having put into my hands a circular issued from your office on the 11th of July last, with a request that I should reply to the questions therein contained, and communicate any information which might be in my power, and wishing to aid you in the highly important design of forming a uniform system of tactics for the militia of the United States, I am induced to offer the following remarks for your consideration:

The maxim "that a well organized and disciplined militia is the natural defence of a free people," is one to which I most heartily subscribe. That our present system is capable of very great improvements I have no doubt; and of the difficulties attending a reform I am in some measure sensible.

Judging, indeed, from past experience, I almost despair of seeing the militia what it ought to be, and is capable of being made—a competent, safe, and equal defence of the nation.

You will permit me, sir, to answer some of the questions proposed, premising that my answers will relate principally to the 4th division of the Massachusetts militia, which is now under my command.

1st. The object of this question, I presume, is to ascertain the number of militia in the State. The 4th division contains 7,244.

2d. They are nearly so. Almost every town has a company. In some towns there are two, three, or more, according to their population. The number of effective privates in a company varies from thirty to seventy. Five regiments of infantry, consisting of not less than eight nor more than thirteen companies, and a regiment of cavalry and artillery, of four, five, and six companies each, in two brigades, officered and armed agreeably to United States law.

3d. The volunteer militia meet oftener for drill, and consequently are better disciplined and more efficient.

4th. There is, with many; and the law prohibiting the reduction of a standing company below sixty-four privates prevents volunteer corps from being filled, and is a source of much trouble to the brigadier generals.

5th. I think not; but operates rather as an incitement to others to make greater exertions to keep pace with them in improvement.

6th. About one-fifth or one-sixth part.

7th. It might; but I should think otherwise.

8th, 9th, and 10th. I think it unnecessary and useless to attempt to discipline all the population from 18 to 45 years of age.

Let all the white male citizens from 18 to 45 be *enrolled*. Let there be no exemptions, except on account of *absolute imbecility of body or mind*. Let there be an annual inspection and return of all the arms and men, designating the numbers of the *active* and also of the *sedentary*. Let the officers of a regiment or brigade (regard being had to the compact or scattered situation of the troops) meet together four days annually, under the instruction of the adjutant general or brigade major, or some other competent officer. In addition to this, let all the soldiers from 18 to 25, and the officers of a brigade or regiment, meet together three or four days annually, soon after the drill of the officers, and in both cases be furnished with tents, rations, &c., and receive a moderate compensation for their services. Let there be an adjutant general of militia of the United States, to whom the adjutant generals of the several States should make their returns, and whose duty it should be to see that a uniformity of returns and of discipline is introduced, each State furnished with arms, system of discipline, &c.

11th. I think it necessary that the organization of the militia should be kept up in peace as well as in war.

12th and 13th. The militia are not expected to perform the duties of the regular army; but may be called out "to execute the laws of the Union," or, if individual States, "to suppress insurrections, or to repel invasions." This may be often done in three months; but, when necessary, they may serve six or nine months, with less sacrifice, probably, of life and treasure, than to have the same length of service performed by two or three different detachments.

14th. These may be learned from the militia laws of the State, with a copy of which I presume the adjutant general will furnish you.

15th. Musters are to the militia what examinations and exhibitions are to schools and academies. If judiciously conducted, annual or biennial reviews are useful. It gives to officers and soldiers an opportunity to exhibit their skill and acquirements, and, when an enterprising spirit prevails, the different corps will be emulous of deserving the highest praise.

16th. To teach officers to command well should be the object of instructing them. This can be done only by embodying officers and soldiers; and, in my opinion, officers generally need more drilling than soldiers.

17th. The infantry of the fourth division make use of Maltby's "Elements of War," no other system of tactics having been furnished them.

18th. A system for the artillery was published, and furnished to the officers by the State; but, as it is not acceptable to that corps, it is not much used.

19th. Hoyt's Cavalry Discipline is in general use: its defects are few and easily remedied.

I might greatly extend my remarks, but deem it unnecessary to go further into detail. You will readily see what my views of the subject are.

The whole population should be furnished with arms; those only from 18 to 25 drilled, and they in some measure compensated. It is not probably that so large a body of the militia as the United States contain will ever be required to take the field at once. To undertake to discipline thoroughly all the population from 18 to 45 must be an unnecessary waste of time. Discipline all the *young*, and the whole militia will soon be well trained, sufficiently so for every exigency. *A young man's "time is money," and when called to spend it for his country, his country should compensate him.*

If anything I have written shall contribute in the least degree to aid you in the important design committed to you, I shall be highly gratified.

With sentiments of great respect, I have the honor to be, sir, your most obedient servant,  
ASA HOWLAND.

HON. JAMES BARBOUR, *Secretary of the War Department.*

HARPER'S FERRY, October 28, 1826.

SIR: When I first saw your circular of 11th July last, at Old Point Comfort, while attending to the experiments with my arms at Fortress Monroe, under Colonel Eustis, it excited a desire to contribute my mite toward the stock of information relative to our militia, of which that circular contemplated the collection, for I had given some attention to the subject during several years, and it had a connexion, in some degree, with the business to which I have devoted my life; but reflection upon the difficulty of doing justice to the subject, and the probability that the high talents of those who were to engage in the business would be exerted to a degree that would render my feeble efforts of little or no comparative value, induced me to forbear the attempt. An article, however, which has just met my eye in the National Intelligencer, in which it is stated that "it is very desirable that all the information which can be procured from every quarter should be received as early as possible, and we are authorized to state that such information will be most acceptable to the department," induces me to view the attempt as one that may, perhaps, not prove altogether useless on my part, and produces an encouraging conviction that the intention will be followed to a very considerable extent, in palliation of its imperfections.

During the last war I had frequent occasion to remark the ill effect produced on the minds and feelings of our militia by the operation of the *partial enrolment* permitted by the existing United States militia laws, the effect of which is to throw the burden of militia defence, in time of war, as well as at all other times, principally on the poorer classes of the community. By the existing laws of the United States certain classes of persons are designated as being exempted from enrolment and the performance of militia duty, and it is permitted that the legislatures of the respective States may make such additions to the list of exceptions as they may conceive proper. In consequence of this permission the exemptions in some of the States have become very numerous, and consist principally of a very large proportion of the more polished and wealthy part of society; these exemptions not only deteriorate our militia, by withholding from it the most respectable members of the community, but are productive of great injustice by throwing the severest part of the burden of the militia defence on the poorer classes, who are alone compelled to furnish recruits for the service as substitutes for themselves or their sons or apprentices, when drafted in time of war, in consequence of the exemptions of other classes from enrolment. Having associated much with our militia during the late war, I know that the moral effect of this state of things is very injurious to it, and that it tends greatly to diminish that cordiality of feeling, in relation to the common defence, which is so necessary to success; and I am well convinced that the American militia will never be such as it ought to be and may be, unless the unjust and unnecessary distinctions that exist, as to enrolment, are annihilated, and *ALL the free white male citizens of the United States, within the prescribed ages, are enrolled in it, and all are equally subjected to the same liabilities to exposure and expense*, with the exception of persons of infamous character, who ought to be excluded from it, (which latter is not the case at present.) But the unjust and oppressive operation of the existing militia laws in relation to certain classes of the community and its injurious effects on their minds, are not the only evils which flow from the present state of those laws; while the different States remain at liberty to adopt different principles of enrolment, and to exempt, at their discretion, such classes of persons as they may please, it will be impossible for the general government, upon any general principle of apportionment, to draw from the respective States their just quotas of force for the purposes of common defence. A militia draft, apportioned according to the latest returns that I have seen, would require more men from the State of Pennsylvania than from that of New York, superior as the latter is in point of population, or if apportioned according to population, would require from the ranks of the New York militia about twice as many men, in proportion to the number contained in them, as from the ranks of the Pennsylvania militia, and would not, perhaps, operate equally in either case, on any two States in the Union.

The enrolment in our militia of the respectable classes of the community which are now exempted from it, would greatly enhance its respectability, an object which is apprehended to be of primary importance in attempting its improvement, as would also the *denial of enrolment to all persons of notoriously bad character, and the expulsion from its ranks of all who are convicted of crime in a court of justice*. Such, and other arrangements of a like tendency which the case admits of, would in due time render admission into the militia a privilege, and denial of it an evil, and would produce a very desirable change in the public sentiment in relation to that branch of our defence.

It appears to me that many of the imperfections in our militia system have arisen from inattention to the peculiar character of our population; it appears to have been a leading object with our legislators to assimilate our militia to disciplined soldiery, a species of improvement of which they are not susceptible until called into actual service in time of war. The experience of half a century has proved the truth of this remark. The great body of American militia still are, after all their expenditure of time and money from year to year, no better disciplined in all probability than they were twenty years ago. They never can become well disciplined without such a sacrifice of time as would prove extremely injurious to the community. The few days of service which are at present enjoined are felt as a burden, and are submitted to with reluctance, and yet they are so few as to be productive of no permanent improvement. But although American militia cannot be rendered disciplined soldiers in time of peace, yet it appears to me that they are susceptible of vast improvement in other points of very great importance, at least as much so as a knowledge of tactics and discipline; they may by proper arrangements be rendered far more effective as to their fire than the best disciplined regulars; and they may be induced, under proper regulations, to keep themselves provided with the best of fire-arms and ammunition, so as to be always ready to take the field at a moment's warning, and to operate in consequence of their superior skill in gunnery, with most powerful effect. Convincing proofs already exist of what such a militia may effect in the battles of Bunker Hill and New Orleans, although those who were there engaged labored under serious disadvantages, both from the quality and quantity of their arms—defects that would occur in a much smaller degree under such a system as may now be established, with the existing facilities for procuring good arms. *The establishment of prize-firing as a part of the exercise of our militia* would, it is believed, produce a universal excitement throughout its ranks of the most beneficial tendency, and would furnish a most powerful inducement to them to attend to the quality and condition of their arms, and prove more conducive to that object than the most rigid inspection and exaction of fines, and in conjunction with such an inspection would produce such a degree of improvement in their pieces and the efficiency of their fire, as has never yet been realized since the invention of small arms.

It appears to me all important that effectual provision should be made for *enforcing that part of the*

*militia law of the United States which requires that every citizen enrolled shall "provide himself with arms, ammunition, and accoutrements;"* for however desirable it may be that our militia should be armed with guns of one uniform model established for the national service, the impracticability of effecting it by the general government is such as to preclude their being armed at all from that source; the natural increase of the militia alone, doubling its numbers in twenty-five years, would require a supply of arms to keep pace with it much greater than all that our armories can produce, to say nothing of the immense number that would be required to arm them in the first instance and to keep the stock good after they were equipped. It is therefore not a question of whether they shall be armed at the public expense, or at their individual expense, but whether they shall be armed at all. The practicability of effecting it at individual expense admits not of a doubt, as it has been fully tested in several of the States, in some of which the men appear at their military musters completely equipped, even to the minutest article, and once a year, when called out for inspection, ready for immediate service. Such a militia, when composed of a large proportion of good marksmen with accurate guns, both of which circumstances it is believed would be secured by the proper enforcement of the law alluded to, and the establishment of prize firing for one of their exercises, must prove extremely formidable to an invader in the first instance, in consequence of the destructiveness of their fire, notwithstanding the superiority of the latter in point of discipline, and would form a mass of material capable of rapid conversion into well disciplined soldiers of the most formidable kind, whose destructive fire no foreign mercenaries could withstand.

Respectfully, I am, sir, your obedient servant,

JOHN H. HALL.

HON. JAMES BARBOUR.

BALTIMORE, August, 1826.

Sir: Believing it to be the duty of every republican to offer freely to his country his life or whatever he may possess of talent, wealth, or experience, I present to you cheerfully, but diffidently, all that I possess of the last, on the subject of your circular of 11th of July. Possessing but little time of my own and unwilling to trespass upon yours, I shall answer your questions as briefly as possible.

1. "What is the number of your militia?"

The answer to this question can come only from the executive of the State.

2. "Are they organized in strict conformity to the law of Congress? If they differ, in what?"

I am at a loss to know what law of Congress is meant. The organization of the militia of this State is not exactly similar to that of the United States army. The organization of companies and regiments is the same, except with this difference, that for a company of infantry commissions are only granted to a captain, lieutenant, and ensign. The brigades are usually formed of two regiments of regular militia and such volunteer corps as wish it and can most conveniently be united with them. The divisions are composed of two or more brigades and sometimes of other corps, and frequently compose all the different arms, cavalry, artillery, infantry, and riflemen. In the militia it appears difficult to adopt any other plan of forming the brigades and divisions.

3. "Are the volunteer or regular militia most efficient?"

The volunteer corps, composed in a great measure of young men whom their military spirit has brought together, are in this State, I believe, universally considered as most efficient.

4. "Is there a preference given for entering volunteer corps?"

I do not exactly understand this question. Some citizens prefer attaching themselves to such corps to being enrolled in the regular militia, otherwise no volunteer corps could exist; others are unwilling to go to the expense incurred by joining them.

5. "Does the establishment of the volunteer militia operate injuriously on the regular militia?"

It certainly does operate injuriously on the regular militia by drawing from it many of its most spirited members, but I do not think its operation generally injurious. Much good would no doubt result from the diffusion among the whole body of the militia of that spirit which invariably characterizes, and indeed produces, the volunteer corps, but at the same time many advantages must be given up in abolishing them. Much of their spirit too would be lost in the very act of the diffusion. Upon the whole I am of opinion that the establishment of the volunteer militia is a general good, and should by all means be encouraged.

6. "What proportion do the volunteers bear to the regular militia?"

I cannot tell the proportion throughout the State, probably it may be ascertained from the returns made by the executive. In Baltimore I suppose the proportion of volunteers to be nearly one-third of the whole. In time of war the proportion would be no doubt much greater.

7. "Would it promote the efficiency of volunteer corps if they had the power of making by-laws for their own government?"

In this State they have that power and I believe its exercise produces very beneficial results. Those by-laws, of course, must not militate with any general laws or regulations.

8. "Would a classification of the militia be an improvement, one to be called the active the other the sedentary?"

9. "In making the classification should age or the single or married state form the distinction?"

10. "If age, what the proper periods?"

I do not think the classification of the militia would be productive of any advantage, while it would certainly be attended with much trouble. If, in the establishment of a general militia system, it should be thought most advisable that the militia should muster on certain days throughout the year, I should think all persons between the ages of 18 and 45 years, except in cases of ill-health, &c., fully capable of performing the light duty. If a tour of field service should be considered as preferable, the certificate of the surgeon of the regiment in which the person may be enrolled, that that service would be injurious to his health, should exempt him from it. As to enrolling persons without requiring any service it would be useless. As to laying a light duty upon those excused from severer service the State would never find officers to command a corps of invalid or superannuated persons. In time of actual war, indeed, such a body would find among its own members officers of spirit and skill, and might in that case be formed with

advantage. The married state should not constitute exemption from militia duty. The majority of Americans marry at an early age.

11. "Would it be an improvement to issue commissions only to inferior grades in times of peace? If so, what should be the highest?"

I think not. The chain of responsibility, from the lowest officer to the commander-in-chief, should be preserved unbroken, not a link should be removed. No officer will discharge his duty so zealously, nor keep his inferiors to theirs so faithfully without as with the supervision of his immediate superior. To remove the officers above the rank of colonel I think would be attended with serious injury; to remove the officers of that grade, with ruin to the militia. It would destroy all the efficiency that could be imparted to it by any system whatever.

12. "Is not the period of service for three months on one tour attended with great sacrifices of life and treasure, and productive of inefficiency?"

13. "If so, to what period might it be properly extended?"

A tour of regular service I should consider as very advantageous as far as regards the acquisition of military knowledge, but as too expensive and costly in time of peace. Under proper regulations, I think that a few parades, perhaps six throughout the year, would, without being oppressive, place the militia in such a situation that it might in time of need be immediately put on a footing of the utmost possible efficiency.

14. "What are the regulations of your State as to training the militia?"

In the city of Baltimore there are four parades fixed by law, viz: two company parades under the direction of the commanding officers of companies; one regimental and inspection parade, each regiment parading separately under command of its own colonel, and undergoing an inspection by a staff officer of the brigade to which it is attached; and one division parade and review, when the evolutions of the line are gone through with by the whole division, composed of the citizens of Baltimore. The three first occupy the afternoon, the fourth the whole day. The same regulations are, I believe, observed throughout the State, with such differences as the various circumstances of the separate parts of it render necessary.

15. "From your experience, are frequent musters advantageous to the great body of the militia?"

From the laxity of the militia system of this State, there are, with some most honorable exceptions, few officers of talent and spirit attached to the regular militia. The consequence is a great deficiency of practical knowledge. As long as this is the case, musters more frequent than are absolutely necessary to keep the system on foot will continue to be productive of little advantage. If Congress should establish an energetic system, then will the offices be filled by young men of ambition; and the more frequent the musters the more perfect will be the knowledge imparted to the citizens.

16. "Would it be an improvement to confine the instructions to the officers exclusively?"

I should look upon such a measure as the abolishment of the whole system. If the instructions were confined to the officers exclusively no man would accept of a commission.

17. "Is the system of infantry tactics directed by law universally pursued?"

It is not. Such is the inveteracy of prejudice that, though a law of the State directs the officers of the militia to use that system, but few of them have ever attempted it. Some, however, scrupulously observe it, and the practice of it is daily gaining ground.

18. "What system of exercise and instruction of artillery have you practiced or followed? What are its defects and remedies?"

19. "What system of cavalry tactics have you adopted? What are its defects and remedies?"

My practical knowledge upon these subjects is very imperfect; any remarks I might offer would be drawn from mere observation, not from experience; with such I would not trouble you. I would, however, suggest an inquiry into the advantages of using percussion tubes in firing cannon.

In the formation of a general militia system there are two measures which I think eminently calculated to impart to it a tone of efficiency. These are, the inspection, annually, of every regiment in the different States by an United States officer, and the union of the United States troops, where convenient, with the militia in their general parades. The latter measure would kindle a spirit of emulation in the breasts of the militia which would lead to the most beneficial results, and would, moreover, accustom the regular troops and militia to act in unison. The advantages resulting from the adoption of the former measure would be immense. The officers of the militia would prepare beforehand for the anticipated inspection; they would spare no pains to perfect their military knowledge, no exertions to bring their men to the highest possible state of discipline. The regular militia would rise to higher ground, and the best spirit of the country would be found to animate its ranks. The advantages resulting in time of war from the personal acquaintances which would be thus formed between the United States and militia officers from the perfect knowledge of the one of the strength and character of the other, from that harmony and unity of spirit and design thus infused into both, must be obvious to all.

I shall not enter into any detail upon the subject of a general militia law, believing that it is not required. I merely present to you the above propositions without attempting to support them by the arguments which might be advanced for that purpose, convinced that the advantages resulting from their adoption will at once present themselves to your mind.

Very respectfully, your obedient servant,

HENRY MANKIN,

*Brigade Inspector, 14th Brigade Maryland Militia.*

Hon. JAMES BARBOUR, *Secretary of War, Washington.*

SOMERVILLE, *New Jersey, August 9, 1826.*

SIR: His excellency Governor Williamson has had the goodness to inclose me a circular from the Department of War relative to the militia. I do sincerely regret that the avocations in which I am engaged at present prevents the attention that the important subject demands, yet am constrained to make a few desultory observations, believing the return from the adjutant general of the militia of New Jersey will contain much of the information asked for.

The volunteer corps are most efficient; a preference is given for entering volunteer corps, viz: a

person entering a uniform company, equipping himself, and continuing faithfully to perform the duties required of him for ten years, is exonerated from common militia duty ever after, but his name continues on the muster-roll and he may be called into actual service on any emergency; the regular militia are rendered less efficient in consequence of this preference.

I do not believe any advantage would result from a power in the volunteer corps to make their own by-laws. Forming the militia of the United States into two classes, the active and sedentary, or first and second classes, would be an improvement, in my opinion, very desirable. I have labored to effect this within the State of New Jersey. The general principle has always been well received by the legislature of New Jersey, but lost in the detail. Age, I think, should form the distinction, say from 18 to 28, or, if thought best to exclude minors on account of parents, guardians, and masters, from 21 to 30; either would give a class sufficiently numerous for every purpose. The public arms should be in their hands, and more duty required of them. If one-third of the active class could be regularly encamped in succession, once in three years, for say two weeks, by divisions, it would render the first class of our militia, what they ought to be, an efficient body, and insure a camp equipage in good order, perhaps sufficient for any emergency that may occur in our happy country. The sedentary class should be organized without performing any duty and pay a small equivalent, which might be applied to remunerate the active class, or at least reimburse the State for necessary expenditures in rations, &c. Three months' service would be most acceptable; within the State it might answer; when required out of their own State six months should be lawful; in which case their pay should be advanced 50 per cent. The militia of New Jersey are, and have been for more than 30 years, trained three times a year; under this system they are not improving; they were better disciplined 25 years ago than now, and I doubt whether more frequent musters of the regular militia would answer any good purpose; instruction to officers seems necessary, yet the frequent resignations actually defeat much of the benefit anticipated from it. Officers, after voluntary acceptance, should be compelled to hold their commissions for 7 or 10 years, unless some good reason should be offered for indulgence.

Sir, I have the honor to be, your obedient servant,

P. J. STRYKER,

HON. JAMES BARBOUR.

CUMBERLAND COUNTY, *New Jersey, August 14, 1826.*

Sir: The militia of the State of New Jersey is divided into divisions, brigades, regiments, battalions, companies, and independent battalions.

There are three divisions and thirteen brigades; the militia of each county (except Cape May) form a brigade, called after their respective counties; that of Cape May is formed into an independent regiment.

In the Cumberland brigade there are but two regiments and two independent battalions; one of them an "uniform independent battalion," authorized by the brigade board under the law of December, 1823; it consists of about 200 rank and file.

Each regiment is divided into two battalions, and each battalion into four companies of not more than 64 nor less than 40 privates, besides the light infantry, riflemen, and artillery. The formation of the independent battalion has detached the light infantry, riflemen, and artillery, from one of the regiments.

The officers of division, brigade, regiment, battalion, and company, are substantially [organized] as directed by act of Congress.

The company officers are elected by the company; the superior officers by the legislature in joint meeting.

It is the duty of the captain to enrol every free white male *inhabitant*, of the age of 18 and under 45, within the bounds of his company, except those persons exempted by Congress, and also ministers of the gospel, the judges of the supreme court of this State, all students of divinity and students of the two colleges of this State, are exempted by the laws of the State, except in cases of actual *invasion*.

The fine of a non-commissioned officer or private for absence from militia duty is one dollar; for appearing without arms fifty cents.

By a law of the 18th February, 1815, every person who was then actually enrolled in, or should thereafter join any uniform corps, fully equip himself, and continue faithfully to do the duties required of him by law for ten years is exempt from common militia duty; his name, however, remains upon the muster roll, and he is liable to be drafted for actual service. Any person who may hold a "commissioned office" for ten years is entitled to the same privilege. The practical operation of this law is injurious to the uniform corps.

All fines imposed upon the members of any uniform company are appropriated by-law to the use of such company.

The volunteer corps are generally composed of young men, most of them, at the time of joining such corps, under the age of 25 years, and would not probably appear upon parade at all did not such corps exist. And although they do not acquire much correct knowledge of the duties and services required of them in actual service, they learn more than the common militia. They are well armed and equipped, composed of the best citizens, usually commanded by persons of character and information, and, when called into actual service, become good and efficient soldiers in a short time; much sooner than the ordinary militia. Besides, their voluntary services, in cases of emergency and defensive operations may be relied upon until an army can be raised by a draft. The formation of volunteer corps should be encouraged.

The whole militia of this brigade is about 2,000; the volunteer corps about 500. I am not acquainted with the relative proportion in the State.

If by making by-laws be meant the power of selecting the uniform, regulating the admission and discharge of members, time of parade in addition to those required by law, and the like, the volunteer corps usually exercise these powers. An express award of the right to make by-laws could not be productive, I apprehend, of any injury.

The present classification of the militia appears to me to be well enough; the more *simple* for *practical* purposes the better. Age affords the best criterion. At eighteen the young man has acquired sufficient physical powers to enable him to endure the fatigues of war; the age might be extended beyond forty-five;

but as that is the age heretofore prescribed, it would not be prudent to depart from it. A change ought not to be made which has a tendency to increase a *burden* without urgent necessity. By the last census we have of free white males, of the age of eighteen and under forty-five, 1,370,028; from that number an army of 200,000 could be drafted, which would not be heavily felt.

The militia assembles three times a year "for the purpose of training, disciplining, and improving in martial exercise," in company, battalion, and regiment. These trainings produce but little, if any, practical benefit.

The principal advantage resulting from the organization of the militia seems to be to furnish the means, in case of necessity, to raise an army by *compulsory measures*. It will not be safe to depend altogether upon the voluntary offer of the services of the people; nor should it be so. There should be some way at command to compel *every person* to bear his proportional part of the burden in time of war. By the organization of the militia, as directed by Congress, you have the number of militia obliged to bear arms; you have *officers* and men that you can command, but they are not soldiers, nor will the *militia trainings make them such*. One militia parade in the course of the year would be sufficient for all useful purposes, and that should be in regiments, at which the brigade inspector should attend to inspect the arms and collect the *returns* from the captains to ascertain the *number* of militia. Although young men at eighteen should be enrolled, I would not require their actual appearance upon parade until full age, except in cases of war. The calling of young men three times a year from the employment of their parents or masters to a militia parade not only deprives the latter of their services, but introduces the young man, at a dangerous period of his life, into scenes of vice that he would otherwise escape. If he did not, it would be the fault of the parent or master, and not of the law. There is the less reason for requiring their attendance, as the benefit to be derived from it is at least problematical.

One objection to this occurs to me. If there be but one training a year it may operate to the prejudice of the volunteer corps; for many would probably rather pay *one fine* than go to the expense of uniforming. To overcome this, increase the fine.

The law of the State requires the commanding officer of each regiment, independent battalion, and squadron, to call a meeting of the commissioned officers under his command, once in each year, (at which meeting the orderly sergeant of each company is also to attend,) "for the purpose of military improvement." The misfortune, however, is that most of the colonels and majors know as little, some less, than the captain they command; many of them in this brigade are capable of instructing their superior officers. Then, through the incompetency of the commanding officer, the object of the law, which is a good one, is entirely defeated. If competent officers were appointed, something useful might be accomplished. This will not be done so long as they are appointed by the legislature.

There is no uniform system of infantry, artillery, or cavalry tactics pursued, so far as I know; Steuben, Scott, Smyth, Duane, and others, are followed at times, and not any of them long. Each captain selects that which suits him best.

In December, 1824, the legislature of this State authorized the commander-in-chief to purchase Dyckman's American Militia Officer's Manual. He procured a number of copies, and they have been distributed throughout the State, but, I suspect, not universally followed.

There are persons amongst us, besides those called Quakers, who are inimical to all militia laws, profess to consider them altogether unnecessary, and say that when war arises an army may be raised of volunteers. They oppose the election of company officers, and in some instances have prevailed upon the companies not to elect officers; the consequence has been, no company parades have been held or fines collected.

It is at all times difficult to find persons who will accept the appointment of a company officer. Those who do accept, and receive a commission, frequently resign in the course of a year; a new election must then be held, which is met by the obstacles above enumerated. They are required by law to uniform in three months after the receipt of their commissions; if not, they incur a fine. This is expensive; few are willing to incur it. Many resign rather than uniform. The law requires their acceptance of their appointment to be made in writing. When this has been done, the officer should not be at liberty to resign at pleasure. Some term of office should be designated. An allowance per day, to be paid out of the fines of the companies, would, in some measure, remunerate for the expense of uniforming.

Notwithstanding the law of the United States and the law of this State—both require the militia man should arm himself—few are armed. The militia of this brigade amount to about 2,000. There are not more than 375 stand of arms fit for actual service; 225 of these belong to the State; 290 were received from the quartermaster general during the last year, supposed to be the share of the public arms of the State to which this brigade was entitled.

My knowledge of military matters is quite limited. You will, no doubt, receive from the adjutant general of this State a full and satisfactory answer to your circular.

Very respectfully, your obedient humble servant,

DANIEL ELMER.

HON. JAMES BARBOUR.

WHITESBOROUGH, Oneida County, August 16, 1826.

Sir: I have the honor to acknowledge, through the adjutant general of this State, the reception of your letter of the 11th of July last, containing certain queries in relation to the militia, preparatory to the formation of a new system of tactics for the several corps therein mentioned.

In pursuance of the request contained in the close of your letter, I would remark generally, that the time when the liability of performing military duty is to commence should be sixteen instead of eighteen years, and should end at forty.

It was common in the army of the late Emperor of France for persons to hold subaltern offices at the age of fifteen or sixteen years, and there are instances of the same amongst the British troops. After forty, a soldier in the ranks of the militia is generally worse than useless. In my opinion the light dragoons should all be turned into horse artillery, with provision to act as dragoons when required. The state of our country will not, generally, admit of the efficient use of this corps in strong bodies; their principal use is as videttes.

I add further, with the exception of Porter's volunteers, the dragoons, neither in the militia nor in the standing army, did anything last war, (to my knowledge.)

*Answer to some of the queries.*

No. 3. I cannot answer this from experience. I can only say that in this portion of the State that corps are formed of the most sprightly and active young men, and generally of the better order, possessing the great essential of a soldier, superior pride.

No. 4. Not understood. Probably some misprint.

No. 5. Generally not. In no case where the volunteers are commanded by the proper officers, as in such case there is harmony between the different corps.

No. 6. The proportion of the volunteers is fast increasing, especially in artillery and riflemen. It is difficult to say what is the proportion. It does not exceed the quota allowed by the law of the United States, probably one in thirteen.

No. 7. I think not.

Nos. 8, 9, and 10. My own opinion is in favor of classification; the active militia to consist of unmarried men, between sixteen and thirty, but the law subjects all volunteers to be called out when required, without the right of substitute, unless by consent of the colonel of the regiment, sanctioned by the brigadier general.

No. 11. In my opinion the militia should be fully organized, with a right in the commander-in-chief to substitute or turn out an officer in case of incapacity in time of war.

Nos. 12 and 13. The period of service is too short, and is particularly destructive of health. Under officers, as usual, utterly unacquainted with camp duty, nine months is the shortest period.

N. B. The President, in case of a threatened war should have the power to call out and encamp the drafted men previous to sending them to the frontiers. It would be a vast saving of men, particularly if liable to the inspection of the Adjutant General of the United States, or other experienced officer. This power he has, I suppose, impliedly.

No. 14. The adjutant general will give an answer.

Nos. 15 and 16. Two company trainings and a regimental review are, in my opinion, essential to northern militia, who approximate nearer the standing army than the southern and western troops. Some of them are not exceeded by the best of the United States troops. The officers should be disciplined separate at least three days in a year.

No. 17. I am not an infantry officer.

No. 18. The system of exercise pursued in the brigade of artillery lately commanded by me was that of Major General Stephens, late of the revolutionary army, with the exception of forming a company, which is done single instead of double file, according to Major Smyth, of Massachusetts. As to the practice of the division generally, my recent appointment does not qualify me to give any information.

For No. 19, see 17.

In conclusion permit me to add, that if the different volunteer corps throughout the United States could be uniformed alike, it would be desirable, and would be a vast saving of expense. Not a single brigade are now alike.

The uniform of a soldier should be plain and substantial, and as incapable of destruction as it can possibly be. Chapeaux should be banished the service, except in the highest grades of office, and plain leather helmets substituted.

The above remarks are drawn up in much haste and under ill health. If they afford any useful hints I shall be happy.

I have the honor to be your obedient servant,

THEODORE SILL, *Maj. Gen. 3d D. N. S. Artillery.*

HON. JAMES BARBOUR, Esq., *Secretary of War.*

FRANKFORT, Kentucky, October 7, 1826.

SIR: I have had the pleasure of seeing, though not the honor of receiving your circular of the 11th of July last, relating to the militia and their organization. It was gratifying to me, as a citizen of the United States, to learn that a disposition has been at length manifested by Congress to take the subject, which I conceive to be one of vital importance, into serious consideration. It was gratifying to me, also, to perceive that a Secretary is now presiding over the War Department who is willing to bestow upon the subject that particular and scrutinizing attention which it most eminently demands.

I am fully aware that it is at once both obtrusive and indelicate to annoy a public functionary with a communication under a fictitious signature, when that communication is neither called for nor expected. But I rely for an apology upon the desire you have intimated to be fully informed in relation to the queries embraced in your circular and to the militia generally, and though untitled and unpretending, I flatter myself that my views, if they are considered to be worthy of any attention, will not be disregarded because they are unaccompanied by the name of an individual who might command respect from known experience in the military art, or from dignity of station. It has been said, and sagaciously said, that "from the collision of error truth is elicited;" and perhaps my hints, pretensionless as they are, may have the good fortune to lead to the discovery of truths if they do not themselves develop them.

To give as much perspicuity as possible to the subject, I shall quote the questions propounded in the circular, and answer them in order.

Questions 1 and 2. "What is the number of your militia?" "Are they organized in strict conformity to the law of Congress? If they differ, in what?"

The proper replies to these questions will, I apprehend, be found in official reports. The returns of the adjutant general of this State, I presume, will answer the first, and our militia laws will answer the second.

3. "Are the regular or volunteer militia most efficient?"

We have no troops in this State to which the term "volunteer" may be properly applied. There are uniform or independent corps of infantry, riflemen, artillery, and cavalry; but they are not more devoted to voluntary service than the "regular" militia. They are doubtless more efficient. They are generally

furnished with arms, and their discipline is in many cases much superior to that of the ordinary militia. But I am not inclined to think that they add much to the military strength of the country. They have not that permanency that would render them of any very decided utility. In many cases they preserve their organization but a few years and are merged again into the general mass. In event of a war they stand precisely in the same attitude with the other troops, and are not under any kind of obligation to make a voluntary tender of their services.

4. "Is there a preference given for entering volunteer corps?"

There is not any preference given to these *uniform* corps. Indeed, so far from being entitled to any preference except on parade, they have to perform a much more arduous task than the other militia. They furnish themselves with uniforms; they keep their arms and accoutrements in order at their own expense; they are drilled much more frequently and are most generally called on by the civil authority when it stands in need of military aid. But this call is only made when it is necessary to furnish guards for prisoners, ordinary guards on some occasions being deemed insufficient; and to attend the execution of criminals to preserve order. Their drills, though more frequent than among the regular militia, are entirely a subject for the exercise of their own discretion. It is usual for them to organize themselves according to articles of association, and to adopt by-laws for their government, which they obey from a sense of honor, and not from any authority to coerce obedience. They are also under the government of the general militia law.

5. "Does the establishment of the volunteer militia operate injuriously on the regular militia?"

If it operates injuriously it must be for the following reason. The uniform companies on parade exhibit a most discouraging contrast to what are in this country facetiously, and not inappropriately, denominated the "*cornstalk boys*;" and if the latter had any soldierly pride they would perhaps be mortified at witnessing it. But it cannot be denied that our militia, as soldiers (in time of peace) are most happily and most gloriously destitute of every trace of that sentiment which occasioned the fall of Lucifer and his expulsion from Heaven.

But where lies the fault? In the men or in the system? New Orleans and the river Raisin will proclaim it not to be in the former; and all observation, all common sense, and all experience, will pronounce it without hesitation to be in the latter. What military knowledge, or what military emulation can we expect to find among men who are called from home three or four times each year to perform some absurd and zigzag movements, ridiculously misnomered military evolutions? The time consumed, too, at each training not being more than two or three hours, (often not that long,) and under the direction of officers who know nothing of their duty. If a military spirit could exist under such a system, I should look upon it as nothing less than a phenomenon (*rara avis in terris*.) When I remark that the "officers know nothing of their duty," I must be understood as speaking under restriction. There are many of them well qualified to command, and who do everything that can be expected of them as long as the present system continues.

These remarks do not apply to the uniform companies. They frequently present a fine military appearance as it regards dress and accoutrements, and also on account of the precision and promptitude with which they perform their evolutions.

6. "What proportion do the volunteers bear to the regular militia?"

The adjutant general's report will, I presume, furnish satisfactory information on this head. The uniform corps form, I presume, about one-tenth of the whole. The infantry in uniform are called the *light infantry*.

7. "Would it promote the efficiency of volunteer corps if they had the power by law of making by-laws for their own government?"

I am not inclined to think that it would. It is a power they already exercise, and those laws are as inviolably maintained by the honor of the individuals composing those corps as they could be by any legislative enactment. My objection would be, that it would be impolitic to introduce any distinctions among the different corps, unless there existed a plain and obvious necessity for doing it. I think there exists none in this case; and the consequence of granting such privileges to a particular description of troops might be attended with bad consequences. Instead of producing a spirit of emulation, it would, in all probability, produce one of jealousy and discontent.

8. "Would a classification of the militia be an improvement—one to be called the *active*, the other the *sedentary*?"

I infer from the distinction of *active* and *sedentary* that the first class would stand as enrolled for the first tour of *active* service in the event of a war, and that the *sedentary* class would not be required to enter into *active* service until all of the *active* class had performed certain tours. If I understand the distinction properly, this might be an *improvement*, if proper means were taken to qualify the first class for an effective performance of its duties previously to its being called on to render any services.

9. "In making the classification, should age or the single or married state form the distinction?"

My opinion is that age, and age only, should form any distinction. It would be difficult, I apprehend, to make the man upon whom nature or necessity had imposed a state of celibacy comprehend what particular merit there could be in entering into the matrimonial state, and what great services a married man had rendered the community, that he should be exempted from the burden of military services. It would be well enough, perhaps, to make *rich* bachelors over the age of — years perform the first tour of service always. They have no excuse for not marrying; and as from avaricious or eccentric motives they will not contribute *legitimately* to the population of the country, I do not conceive that there would be much hardship in compelling them to fight the battles of those who do. But the poor man, who would only be adding to the countless catalogue of human miseries a few more items of wretchedness by marrying, might well be excused from the burden.

10. "If age, what the proper periods?"

If there are but two classes, I think the *active* should be composed of all over twenty-one and under thirty-five. These, in my opinion, should perform a tour of service before the others should be called on. I doubt, though, very much, the policy of such an arrangement. However, I am clearly of opinion that no man ought to be dragged from his home and his vocations, as a soldier, until he has attained the age of twenty-one years, unless the safety of the country most imperiously requires his services. Young men from the age of eighteen to twenty-one are usually engaged in learning a trade, studying a profession, or in qualifying themselves in some manner to earn a subsistence, and to become useful or ornamental members of society. A tour of military service makes a fearful inroad upon the prospects of young men so situated, and although a cause may be momentarily benefitted by enlisting into its service

a host of ardent and patriotic youths, yet there is too much reason to apprehend that, eventually, society is not much benefitted by the requisition of their services.

Should a classification be determined on, I should think it good policy to form a third class, which might be denominated the *stationary class*, composed of young men over the age of 17 and under 21, and of old men who are over 45 and under 55. They should remain permanently and perpetually as a *corps de reserve*, and never be called into actual service unless on local occasions or in cases of the actual invasion of the States of which they are inhabitants, and even then not unless all the other classes are in service. They should be organized separately from the other troops, under some appropriate designation, and should not be considered as forming any part of the ordinary military establishment. The officers should be taken entirely from among the seniors, and they might be organized into companies, battalions, regiments, brigades, and divisions, without in any manner interfering with the general organization of the militia. A corps thus formed would always present a formidable aspect to a foreign invader, and would be abundantly able to repress any domestic insurrections. There can be no objection on account of the age of the senior portion of this corps; for it is a physical fact, unquestioned and unquestionable, that there are very few men who have enjoyed good health and lived temperately that are superannuated at the age of 55; and it is well known that many men, long after that period of their lives, have retained all the vigor and vivacity of youth. Among military men may be named, in Europe, Frederick the Great, Souvarof, Schomberg, Blucher, and many others. In America, Washington, Jackson, Monroe, Armstrong, and others. The saying of Napoleon, that a man was not fit to make war more than a few (I think seven) years of his life, I look upon as nothing more than a paradox of that most paradoxical man.

To this may be added the remark of a man (Montaigne) who knew much of the world and of the world's concerns, that a man between the ages of fifty and sixty was, of all others, the best qualified to serve his country. At that age he would bring into the service of a cause a multitude of moral qualities that younger men could not lay claim to. His actions would be the result of principle and of experience, not of passion or of speculation.

11. "Would it be an improvement to issue commissions only to inferior grades in time of peace; if so, what should be the highest?"

In my opinion, it would not be an improvement, though I do not suppose that a change in relation to this branch of the subject would be productive of any very marked results in any way. If any attempt is made to discipline troops in time of peace, I think it would be politic to assign to them the usual number of officers. My opinion is, clearly, that any attempts to discipline the militia under the present system are wholly nugatory and unavailing; that they are worse, indeed, than attempting nothing; and that, unless the system is entirely and radically changed, it would be sound and saving policy to abandon it altogether, and to limit military instruction to the officers alone, and to do that under rules and regulations of a much more energetic and improving character than are now in force. I speak upon this subject from considerable experience and from much observation, and I say most unhesitatingly that, unless the system is much amended and improved, it would be a saving of time, of money, and of morals to abolish it entirely. The law requires the citizen to perform military service from the age of 18 to 45. What service does he perform? He attends *muster* four times in each year. What does he learn? Nothing. Who are his instructors? Men, very commonly, who know nothing more than himself. He drags heavily through some absurd and preposterous movements, of which he understands nothing when he commences them, and nothing when he gets through them. We have about seventy thousand militia in this State, and an exemption from militia service would save to the government, or rather to the people, on a moderate estimate, from sixty to seventy thousand dollars; for a day is lost to every man each time he attends muster, although a very small fraction of it is devoted to military instruction. I have seen militia troops, many of which had been disciplined, *secundum artem*, for twenty or thirty years, and after entering into service they have been obliged, in all cases, not only to imbibe new ideas of tactics, but to eradicate from their minds their old crude and unintelligible notions; and I appeal to the officers composing the board convened by you under the law of Congress if they have not, in the course of their service, ascertained, from the most perplexing experience, that an old militiaman, who perhaps has *mustered* regularly five or six times a year thirty years of his life, is not the most ignorant, the most conceited and intractable of all the elements of war that have ever fallen in their way. The militia are always behind the regular troops in military science. Why? For want of regular instruction. They see nothing, they hear nothing, and they know nothing. I have no doubt that there are vast numbers of militia in the United States who, at this moment, have heard of no tactician except Steuben, and who think his work the very quintessence of the military art. It cannot have escaped the observation of all military men who have served with militia that the youngest men among them become soonest acquainted with their duties. They have nothing to *unlearn*, and their course is one of continual improvement. They have formed no attachment to systems, and they have therefore much more docility than those who have.

I think it more than probable that I shall differ on this subject with the military gentlemen who are your correspondents in this State. I presume that those of the first character as officers have received your circulars and no others. These being conscious that, within their own commands, they have succeeded in awakening and cherishing a very respectable military spirit, may possibly judge of the whole militia by the specimen their own troops could furnish. This, though a very natural, would not, I think, be a very satisfactory mode of deciding on the system. It will not do to judge of the military character of 70,000 men from the respectable appearance of a few regiments.

I am decidedly of opinion, therefore, that the privates among the militia should either be exempted entirely from militia service, or that they should be required to submit to a course of practical and rigid instruction. They should be encamped by divisions, not less than three weeks in each year. Officers who certainly understood what they taught should superintend their evolutions, and instruct them in all the minutia of field and camp duty. It would be immaterial whether they had arms or not. The manual exercise is the least part of tactics and soonest learnt. Let them learn to march, and they have learned everything. It was well said by Marshal Saxe, that the whole secret of the military art lay in the legs. Troops who understand the field evolutions soon learn everything else.

But if such a system as this would be onerous, confine the instruction to the officers. But nothing can be done in the matter until, by some means or other, they can be prevailed on to remain longer in the service than they do in this State. I am informed that from 1,500 to 2,000 commissions are issued yearly by the executive of this State for the purpose of keeping up the organization of about 70,000 troops. They resign in great numbers, but many vacancies are likewise occasioned by emigration. It would be

difficult to apply any corrective to the last cause of vacancies, but I think something might be done towards checking the frequency of resignation. Let the commission be made an honorable one, and it will not be often resigned. But this cannot be done under the present system. The officer is conscious that he can do his country no service by retaining his commission, and to get rid of a grievance he gives it up as soon as he can, for he can only resign in the month of January, according to our laws. This measure of compulsion was adopted by our legislature, when they should have thought of furnishing a stimulus for remaining in office, and not an obstacle to going out of it.

If the course of instruction is confined to the officers, it will answer all valuable ends. Good officers soon make good soldiers. It was by this means that Napoleon could, in so short a time, convert a crowd of raw and reluctant conscripts into an army of well-disciplined and enthusiastic soldiers. His officers were always excellent, and without good officers it is in vain to calculate upon having good troops. They should be required to attend a camp or a school of instruction not less than one month in every twelve.

Able officers of the regular army should be detailed for that particular service, and anything and everything should be done to give energy and efficiency to the system.

12. "Is not the period of service for three months only, on one tour, attended with great sacrifices of life and treasure, and productive of inefficiency?"

Unquestionably it is attended with the most deplorable sacrifices of life, treasure, comfort, and everything else dear to a soldier and to the country. This is certainly the worst part of a very bad system, and calls loudly for amendment. Whilst the system of short tours (three months or six) is persisted in, I consider it certain that the militia can never be a formidable body of troops. It is a waste of life to a most alarming and culpable extent. The soldier is ordered out perhaps for 90 days, within that time he has to encounter more, from the novelty of a military life, than he would encounter from it in the course of a year afterwards. Camp diet, camp exercises, everything is new to him. He is peculiarly liable, too, within that period, to the incursion of camp diseases. But, at the end of that term, if he has been attentive, and his instructors have been skilful, he becomes in some degree a soldier. His system, also, begins to accustom itself to a new mode of life; but, just as he begins to be valuable to his country, he is discharged, and his place is supplied by another raw recruit, who has to go through the same ordeal, and who, in the same manner, at the end of three months, makes way for his successor.

So much for the risk of life. It is evidently a hazardous game, and the odds are against the player; but as it concerns the treasure the loss is clear and unequivocal. The equipments for an army, and all that relates to the *attail*, must be nearly as costly for an army which serves only three months as for one that serves twelve. When disbanded, at the end of three months, the loss in equipments and stores is incalculably great. Much is lost and much destroyed. The officers of the administrative staff are careless, partly from ignorance and partly from want of ambition. They hope for nothing, they fear nothing. A sense of responsibility and the apprehension of it are alike unknown to them. Their term of service is circumscribed to a few days, they can acquire no distinction, and when you close the way to honor upon an officer you withdraw all his incentives to the performance of his duty.

Besides these obvious disadvantages attending short tours, it cannot be expected that troops of this description can do much, and indeed much is not expected of them, generally; but there have been splendid exceptions to the rule. The execution of enterprises is delayed or frustrated. A general, knowing that his troops must be discharged before he can accomplish anything of importance, hesitates about undertaking anything, and the most favorable opportunities for action are lost.

13. "If so, to what period might it be properly extended?"

It should be extended to 12 months at least, and as much further as would meet the approbation of the people. Three years would be a good term, and would insure skill and effectiveness in the troops. It might be urged, in this case, that the burden of the war would fall exclusively on the class that first went into the service. In reply, I would remark that, in making the requisition, the chances would be equal for all; and, further, that such inducements should be held out as would cause the ranks to be filled without reluctance and without delay. Large bounties and good pay might be offered, besides a moderate provision for the families of those who should perish in their country's cause. This mode of raising an army might seem, upon a superficial view, to be impolitic on account of its expensiveness; but I cannot doubt, for a moment, that it would ultimately be a saving of treasure and of life.

14. "What are the regulations of your State as to training the militia?"

There are four annual trainings, (or musters as we call them here,) two for companies, one for battalions, and one for regiments. The law requires, I believe, that the troops shall be mustered or exercised three hours at least each time. In some cases it is complied with, but very often it is not. There is, besides, a drill muster for officers.

15. "From your experience, are frequent musters advantageous to the great body of the militia?"

I am decidedly of opinion that they are not. I have answered this question, through inadvertence, in replying to the 11th. I can refer to the opinion of the legislature of this State in support of my own, as it regards this subject. Until within a few years past, it was required that six musters should take place (four for company exercises.) The number has been reduced, not, I presume, because the legislature thought the militia was improving too rapidly in the military art, but for the more obvious reason that they were not improving at all.

16. "Would it be an improvement to confine the instruction to the officers exclusively?"

Unless a radical reform could be effected in the present system, I am of opinion that it would be decidedly an improvement. It would be at least saving much time, and consequently much money. It would be doing away, too, frequent numerous and useless assemblages of the people, and would not therefore have an unhappy effect upon the morals of the community.

17. "Is the system of *infantry* tactics, directed by law, universally pursued?"

Not universally, I apprehend. Those officers who understand the system pursue it; but it must be confessed that there are too many among them who are not adepts in any system of tactics. They do not often remain long enough in service to learn much, and their opportunities are not of a very improving description whilst they do remain in it. But there are, unquestionably, many who are excellent and accomplished officers, who understand their duties, and who perform them, as well as the defects of the system to which they belong will permit.

18. "What system of exercise and instruction of artillery have you practiced or followed; what are its defects and remedies?"

The system for the "exercise and instruction of artillery" is in this State upon the worst possible footing, and wretched as the discipline of other corps is, this is still in a more abandoned and disorganized condition. The adjutant general reports, I believe, some five or six hundred artillerists. Out of

that number I have no knowledge of more than one or two companies that in any manner merit the designation of artillery. There are not more than seven or eight (there should be one hundred at least) pieces of artillery, I believe, in the State; and where they are used, the instruction amounts to little more than firing with blank cartridges on anniversary and festival days. I am not aware that any system is generally pursued. I have seen a few copies of a meagre elementary work relating to artillery exercise, and I am not certain that they were all in the hands of artillery officers. Valuable works upon the subject are, I apprehend, still scarcer; but why should the officers procure them when they cannot have any kind of use for them?

The "defects" of this branch of the system are, that the artillery corps have neither guns nor ammunition; that the officers have had no means of acquiring information, and are therefore not very competent to instruct the privates; and that the time prescribed by law for exercising is too limited for a course of instruction to be attended with any advantages. The "remedies" are in the hands of the government.

19th. "What system of cavalry tactics have you adopted? What are its defects and remedies?"

I do not know that any particular system has been adopted. There are not less than twenty troops of cavalry in the State. Some of them make a very excellent appearance, and are well disciplined; but in general their equipments are not very good, nor their discipline very exact. The "defects" are, that arms are wanting and means of equipment. These corps are expensive, and cannot be kept up in that condition of good order and effectiveness which would be desirable without much additional encouragement from the government. I do not consider the cavalry, though, of the same importance to national strength or national defence as the infantry and artillery. If I am not mistaken, the experience of the United States thus far warrants the opinion that the expense of cavalry corps is much greater than any services which it can be expected they can render would be. It is doubtless good policy, though, to keep up their organization and to make it as perfect as practicable. Cavalry is all-important to an army where cavalry is opposed to it; and though the United States will not probably ever have to encounter an enemy that will be very strong in that description of troops, yet I consider it sound national policy to be provided with every means of defence which the art of war can furnish.

Submitting, with much respect and diffidence, the foregoing replies to the various queries propounded in your circular, I will take the further liberty, in reply to the remark that if "anything suggests itself worthy of communication, though not called for by any particular question, it will be highly acceptable," of making some additional observations.

1st. *Of military instruction.*

If a system of instruction is adopted to comprehend the whole militia, my opinion is that regular encampments should be made twice in each year. They should encamp by divisions—one half of the officers and men at one period, and the other half at another. Not less than three weeks should be devoted to military exercises at each encampment. Officers from the regular army should be detached for the purpose of superintending these exercises, and for this purpose the number of regular officers should be largely increased. The most rigid and punctilious discipline should be maintained. Arms might be furnished, if necessary, in sufficient quantities to teach the troops the manual exercise; but to teach them the use of the legs would be the great desideratum. But suppose the instruction to be confined entirely to the officers, which I am inclined to think the most eligible, and at the same time the most practicable plan, I would propose that the State—say the State of Kentucky—should be divided into a certain number of military districts, (not more than six;) that the officers in each district should form a camp for instruction once every year, and for a month each time; that regular officers should be assigned to their instruction; and that the most important branches of the science should be indefatigably inculcated, infantry and artillery tactics particularly. Light pieces of ordnance should be furnished, with a sufficient quantity of powder and ball for practice. Field fortification—at least the elements of it—should be taught. The cavalry discipline might also be easily incorporated into the course of instruction. There is a difficulty in the way. It is this: would it do to call men from their business and their homes for the term of one month in every year without any compensation? I think not; but they might be easily compensated, and without throwing the slightest additional burden on the people. Do away the present militia system, and, in lieu of the fines and penalties now inflicted by the law, let a tax be collected to a small amount from every man subject to militia duty, say of one dollar yearly. This would no doubt be cheerfully paid, though a smaller sum would do. Let this tax form a military fund for the compensation of the officers who have taken upon themselves all the burdens of the militia service. The compensation should be moderate, say fifteen dollars per month to every officer, without any distinction of rank. There is no reason why there should be any distinction in this case; they are not yet in service, they are only at school.

In this manner I have not any doubt that an army of excellent officers might be formed, not perhaps very theoretical or scientific, but well acquainted with the practical and important part of their duties; and, with tolerable materials, such officers would soon form an army of active and efficient soldiers. But this is only an outline. If anything was attempted on a similar plan, though I dare not flatter myself that anything will be, there would be but little difficulty in arranging the details where the governing principles were decided on.

2d. *Of public arms.*

From what I have witnessed in this State, I feel it my duty to say that I am apprehensive the national government is not making the best possible use of the public arms. Those distributed among the different States are not applied, I fear, to any purposes eventually and permanently beneficial. I speak only from what I have observed in the State of Kentucky. Here the governor is authorized to issue them at his discretion to companies who wish to have them. They are therefore scattered over the State in every direction, many of them are destroyed, many become injured and useless without having been of the slightest service. The men into whose hands they are put are under no obligation to use them in the event of a war, and it might very readily happen that, on a pressing occasion, it would be utterly impracticable to have them collected at any point. It is true that the governor takes a bond conditioned for their safe-keeping and return, and it is equally true that, although it is notorious that many stands have been injured and destroyed, the penalty of no bond has yet been exacted. A governor can do nothing in this case. Although he may be well satisfied that it is imprudent to distribute the arms, yet, when he is authorized to give them out by the legislature and pressing applied to for them by his fellow-citizens, it is very difficult, if not impossible, for him to resist the application. It would be asserted at once that he was unfriendly to his country, and unwilling to foster the military spirit of his countrymen. There is but one remedy. The general government should not place more than one-fourth

of the quota of each State under the unconditional control of the State authorities. This is a subject in all respects worthy of attention. All men acknowledge the importance to an army of a supply of arms; and when we recollect how near New Orleans was being lost for the want of a few muskets, the truth of this fact impresses itself on our minds without recurrence to the formality of argument or of illustration. Weapons should always be kept *in depot* at some convenient place, and ready for any emergency. But, should our present system be pursued, in future wars we shall be wholly unable to act either offensively or defensively for want of arms; for I venture to assert that, within fifteen years' time after the distribution of those arms, three-fourths of the drawers, when called on for them, will be able to render nothing but "a beggarly account of empty boxes." Some corrective ought to be applied; and if Congress would say that not more than a fourth of the quota of each State should be delivered to the State authorities without an order from the Secretary of War, it would be sufficient. If an extraordinary number of arms should happen to be wanting on any particular occasion, such an order could be easily obtained.

These remarks I intend to be applicable only to this State, as I am entirely unacquainted with the course pursued by other States in regard to this matter.

3d. *Of uniformity in military discipline.*

This is a subject, I think, of no little importance, and is one which should be duly considered whenever any attempt is made to place the military force of this country on a respectable footing. Uniformity in discipline becomes signally important when we reflect that in this country troops will probably always act in small and detached bodies. Where they are manœuvred in heavy masses of twenty or thirty thousand men, it loses in a great degree its importance; but this will scarcely be the case as long as the United States maintain their federative integrity. An enemy assailing us will be apt to direct his efforts against different sections of the country, and though we may have numerous armies, they will not be very large. There were four or five systems of tactics in use at the same time among our troops last war, and the consequence must have been inevitably the creation of much perplexity, if two corps using different systems had been under the necessity of manœuvering together. Great attention ought to be paid in the formation of a system. Great pains should be used to give it general dissemination, and no changes should be afterwards made, unless to correct some obvious defect or to introduce some obvious improvement.

4th. *Of forming armies.*

In organizing a large military force in a country like ours I think some attention might be properly paid to the sectional character of the people. The habits and propensities of the citizens should be at all times taken into consideration. Cavalry and riflemen might, with great advantages, be taken from the States west of the Alleghany mountains. No country can furnish better horsemen or more expert marksmen. Riding here is the employment or amusement of a great portion of the community, young or old; and a young dragoon taken from among us would not need the instruction of a riding-master to direct him how to manage his horse. The race of *hunters* is nearly extinct in the west, but as they pass from among us they bequeath to their descendants a large portion of their enterprise in action and of their dexterity with their weapons. Such men surely must possess advantages as cavalry or riflemen that no other people in the world possess.

5th. *Of the military character of the people of the United States.*

There are reasons why the Americans should be the best troops in the world, if properly disciplined. They have more property and more rights to fight for than any other people. Their intellectual endowments are greater, and their moral courage should be exactly in the same ratio. An ingenious French writer, in a work called "*Caractere des Armées Européennes*," ascribes to the British soldier superior intrepidity and to the French soldier superior intelligence. Without arrogance we may safely assert that the American soldier is not surpassed in intrepidity by the Briton, and we may say, too, without arrogance, that he surpasses the Frenchman in intelligence. If, then, intelligence and courage will make good soldiers, who should make better than the Americans? In my own State I am egotist enough to suppose that the best possible materials may be found, both for officers and soldiers. I say this with the more boldness because we have had already among our militia a Shelby, an Adair, a Madison, a Daviess, and a host besides of brave, intelligent, and patriotic men. Among the regular troops we have had, and yet have, a Jesup and a Croghan. I am liberal enough, too, to believe, and I feel a national pride in believing, that the other States are not behind us in intelligence, in courage, or in patriotism. What, then, is wanting? Military instruction.

I shall conclude the subject with a quotation from the celebrated Guibert. He is high authority, I believe, among military men, and the passage I quote I think strikingly applicable, at least parts of it, to our military and militia system. "Ce ne sont pas," (says he,) "les arts et les sciences qui ont fait déchoir l'art militaire chez les peuples de l'antiquité. Ce ne sont pas les arts et les sciences qui l'empêchent aujourd'hui de faire de progrès: Les lumières générales devroient, au contraire, perfectionner cet art avec tous les autres. Elles devroient rendre la tactique plus simple et plus savante, les troupes plus instruites; les généraux meilleurs. Elles devroient mettre la méthode à la place de la routine, les combinaisons à la place du hazard. Si tandisque toutes les autres sciences se perfectionnent, celle de la guerre reste dans l'enfance, c'est la faute des gouvernemens, qui n'y attachent pas assez d'importance; qui n'en font pas un objet d'éducation publique; et qui ne dirigent pas vers cette profession les hommes de génie."

The truth of *part* of this quotation, at least, is too obvious, too mortifyingly obvious, when applied to this country, to leave room for a single remark.

AMICUS PATRIÆ.

HON. SECRETARY OF WAR.

---

*Memoir on the organization of the army of the United States with a view to its giving effect to the militia when called into actual service.*

The first military establishment supported by the United States after the revolutionary war was a small corps raised for the purpose of keeping peace on the Indian frontiers and for occupying some of our principal forts erected on the seaboard. Since the adoption of the Constitution which now forms the

supreme law of the land, the United States have constantly maintained a military establishment. This establishment was augmented or diminished according to circumstances, but never had received any organization with a view to permanency until the close of the war in 1815. It will hardly be necessary to recite all the modifications, as to organization and numerical strength, which the various acts of Congress gave to the military establishment, or to show the causes which led to the many changes which it underwent in the course of thirty-six years; the object of this memoir being to propose some improvements in our present military establishment, by giving it a permanent organization and adapting it to a state of peace as well as a state of war. The main spring of an army is its general staff, the organization of which must, in a great measure, depend upon the country in which it is to act. The staff of the United States should be so organized in peace as to be capable of being extended in time of war to all the circumstances which may grow out of the exigencies of a state of war, while the principles of its organization should be unchanged thereby. It would therefore be proper that the staff be composed of every department essential to the operations of an army; and, although in time of peace acting on a miniature scale, still it should be susceptible of being enlarged, and extending its rules and regulations to any number of forces, however large or small, united or detached. Hence, in time of peace, all the regulations for the government of the staff, and of every arm of the service, should be settled and acted upon, in order that the practice might the more readily obtain in time of war, and be introduced among the new troops and the militia without difficulty or embarrassment. This, then, is the time for establishing a uniform system for the infantry, cavalry, and artillery, which, when once established, should not be subject to any alterations except upon the most grave considerations, and after having the most convincing proof of their necessity.

The system of tactics ought to be uniform throughout, and that for the several arms ought, as far as possible, to conform to each other. It ought to be simple and easy of comprehension, avoiding all unnecessary manœuvres and complicated movements, which are never used in real service, and which only tend to embarrass new troops, and to render the system difficult for the militia, without producing any beneficial results, unless, indeed, it were to render the military profession so complicated that it could be acquired only by a long or regular course of instruction, and thus obliging the government to resort to regular troops for any efficient service. The system which we now have is undoubtedly framed on true principles, but is unnecessarily complicated, and might be much simplified. In the revolutionary war, and a long time after, the work which contained the regulations of the infantry, and indeed for the whole army, was printed in a very small book, easy of comprehension, and produced sufficient order and regularity for all the purposes of parade and war, and could be readily learnt in the course of a few days; it wanted only the *eschellon* formations to render it complete. A work something of the same character is now much wanted for our militia, and should be formed on the system adopted for the regular army, leaving *the greater works* to be studied by those who might desire to pursue the higher branches of tactics. In the organization of the military establishment, the militia must be regarded; and this organization should have in view the perfecting of the militia system and the rendering effective that great portion of our military force. The military establishment of the United States should therefore be so organized that while it is capable of extending itself, it may be able to afford the best means of giving efficiency to the great natural arm of the republic, *the militia*. And it is accordingly proposed, in the sequel, to offer some reflections on the classification and organization of the militia, with a view to the defence of the country against attacks from abroad, and the maintenance of order and the support of the laws within the republic.

The present military establishment of the United States is perhaps reduced to its minimum. It consists of a general staff, pretty well organized; four regiments of artillery and seven regiments of infantry, and a corps of engineers. The artillery occupy the forts on the seaboard from Maine to Louisiana, and have charge of the arsenals or ordnance depots; and the infantry, for the most part, are stationed on the Indian frontiers. There is, besides these, the Military Academy at West Point, composed of instructors and 250 cadets, and a school of artillery practice at Fortress Monroe, on Old Point Comfort, in Virginia; the latter being merely for instruction, without augmenting the numerical force of the army.

The organization of the army is as follows:

*General staff.*

Major general .....	1
Brigadier generals .....	2
Adjutant general .....	1
Inspector generals .....	2
Quartermaster general .....	1
Quartermasters .....	4
Commissary general of subsistence .....	1
Paymaster general .....	1
Paymasters .....	14
Commissary general of purchases .....	1
Military storekeepers .....	2
Surgeon general .....	1
Surgeons .....	8
Assistant surgeons .....	45
Topographical engineers and assistants .....	10

NOTE.—There are also assistant quartermasters and fifty assistant commissaries of subsistence who are taken from the line.

## Regiments and corps.

The principal objection to the organization of our military establishment is this: there are four regiments of artillery, each regiment a distinct corps, and commanded by a colonel. Consequently, there is no head or central point to which the artillery can refer, and consequently there is very little chance of its improvement while it remains without a head or chief. The artillery, besides having the charge of the ordnance department, is an arm of such importance that it ought to be cherished with the greatest care, and placed under the control of a general officer, who, besides having the command of all the forts on the seaboard, should, under the direction of the Secretary of War, superintend the armament of the fortresses building and to be built; the furnishing of the arms for the infantry and cavalry of the regular army, and for the militia and volunteers of the several States, according to the acts of Congress and the exigencies growing out of particular circumstances, either of foreign aggression or domestic insurrection. The artillery department is one of the greatest moment to the government, as, without a due administration of what concerns that department, incalculable abuse, extravagance, and finally disaster, must ensue. The expenditure, in time of peace, which it involves, is considerable; but in time of war it is enormous, and requires constant vigilance and attention to a strict accountability to preserve the treasury from bankruptcy. To enumerate all the objects of expenditure under the control of the artillery department would require a catalogue in length equal to a common dictionary; but to present a few of those expensive articles, such as guns, gun-carriages, caissons, wagons and machinery, carts, horses, oxen, mules, muskets, pistols, swords, powder, lead, iron, harness, and equipments of all kinds, for a country like the United States—to say nothing of the factories, founderies, arsenals, magazines, and other edifices for the fabrication and preservation of what belongs to the artillery and ordnance—will be sufficient, it is presumed, to show that this department is one which claims the special attention and supervision of the War Department, to which the nation will look for a faithful administration of what appertains to it. This subject is dwelt upon the more, as it is believed to demand the greatest vigilance and care of the government; as it will be more or less useful as it may be well or ill administered. It is proposed to form it into a separate department, under the immediate control of the War Department. Its organization might, with propriety, consist of a general officer, who should be styled *inspector general of artillery*; one brigade major, and one aide-de-camp, to assist the general in the details of service, to be taken from the officers of artillery, without regard to rank; four colonels directors, commanding regiments; four lieutenant colonels, and four majors, sub-directors; the regiments in other respects to remain as now organized for the peace establishment. It has been a subject of some doubt whether it would not be an improvement to restore the ordnance to its former state, by creating a separate corps for the ordnance, and no longer to take the officers of artillery to do the duty, by detail, as is now done. It is certain that any particular service is better performed by those who are in the constant practice of it, than by those who are occasionally called to execute for a short time that which has not been their previous study. If the present organization of the artillery is to give to all the officers of that arm a knowledge of the fabrication, construction, manipulation, and manufacture of what belongs to the ordnance, it would no doubt improve the officers of artillery; but it is hardly to be expected that they can be proficient in both the manufacture and application of artillery; it is beyond a doubt better that their duties should be separate, in order to produce in each the requisite perfection. It is therefore proposed that the two services be separated, both on the score of economy and the perfection of these two important branches of the service. There ought to be a separate corps established, to be called the *corps of ordnance*, and placed under the direction of the commanding general of the artillery. This corps should be composed of the number of officers necessary for the service, consisting of the requisite number of field officers, captains, and subalterns, corresponding with the extent of the duties and number of posts now occupied by the ordnance department. The artillery and ordnance may be considered as appertaining to the militia, as well as to the regular forces. They ought to control all that belongs to both, under their appropriate heads. The preparations which the artillery department should make ought to embrace what will be necessary for the militia, as well as the regular army; and no park or detachment of artillery should be formed for the militia without the proper proportion of directors, ordnance officers, conductors, &c., detailed from the regular army, so as to

keep at all times the distribution and accountability in the hands of the national officers, more especially as the expense must be at the charge of the general government, and the responsibility rests with it. Enough, it is presumed, has been said to show the great importance of the artillery department, and the necessity of its being placed under the most strict *surveillance* and accountability.

The infantry is very well organized at present, and needs no alteration, except so far as designating a general officer, who should be charged with the exclusive command of that arm, to be styled the *general of infantry*. This division of command, and the separation of these two arms, the artillery and infantry, will naturally create an emulation to excel, which would result in much benefit to the public service, as well as to each one individually.

The *Engineer department*, from the growing importance and increase of duties assigned to it, naturally requires an increase in numbers and a more efficient organization; the organization to be such as to admit a gradual increase from the most distinguished of the cadets of the Military Academy, who are annually graduated, until the corps of engineers should double its present numbers; and the topographical engineers to be formed into a corps to correspond with the present organization of the corps of engineers, as at present the topographical engineers consist of six majors and four captains; the other assistants are taken from the line of the army, and temporarily attached to the engineer service. For the want of officers of the corps of engineers, the Engineer department is obliged to employ, at extravagant rates, individuals to do the duty of engineers; and thus the cost of the public works is greater than otherwise it would be if officers sufficient were at the command of the Engineer department, besides the certainty of having the duty properly performed, and the power of holding to a strict responsibility those who bear the regular commission of the government, and who are subject to military law for any neglect of duty.

The Engineer department, like that of the artillery, is not simply for the service of the regular army, but its officers may be considered as applicable to the militia service, and may be ordered to act with the militia whenever it may be necessary; and such are the duties enjoined on the engineers, that both corps ought to be completed in time of peace to an establishment suited to a state of war. The expense attending this arm, as regards its permanent support, is much less than that of any other, because it is composed solely of officers who are liable to perform any duty the President may direct, either in superintending the construction of fortifications, internal improvements, in the staff, in the command of fortresses, or troops in the field, whether regulars or militia; so that the increase of these officers to a reasonable number cannot but be beneficial to the public interest. The increase of expense for the pay of the additional officers will in reality be a considerable saving, as it will so much diminish the expense of hiring individuals less competent and less interested for the public service, as before stated.

The general staff ought not to be considered merely the staff of the regular army, but as THE NATIONAL MILITARY STAFF, applicable alike to the regular and militia forces when called into the service of the United States; and no body of militia or volunteers should be called into the public service without there being assigned to it a due proportion of regular staff officers of the different branches to see to its wants, its organization, equipment, and efficiency for the public service. It is not meant, by this assignment of a regular staff to the militia, to interfere with the constitutional provision that the militia should be commanded by its own officers. The staff has no direct command over the troops; it should be attached to the general appointed to the chief command to assist him in the details of service, to provide the necessary means of instruction, the munitions, the transport, quarters, hospitals, and hospital stores, pay, clothing, arms, and in fact everything necessary to render them effective even as to organization and instruction. They should be mustered and inspected by the regular staff; and on such musters alone should they be paid. The staff being well acquainted with its duties, would easily disseminate among the militia a due system of order and accountability, and, by employing intelligent militia officers as assistants in the staff, form valuable staff officers from among the very militia itself. The cause of the great expense accompanying the employment of militia, and their inefficiency, is that of their being usually called into service without the accompaniment of a good staff. The general, or other officer commanding them, being without the necessary aids to carry into effect his intentions, and being obliged to do everything himself, many important matters are of course neglected, the militia get dissatisfied and disheartened, become sickly, and finally either die or desert for the want of many essentials to their comfort, discipline, and profitable employment. The general staff ought to be organized into *departments* or *corps*, and designated by some suitable denomination; and there ought to be grades among the officers similar to those of other corps in the service. For example, the quartermaster's department, or corps of quartermasters; subsistence department, or corps of commissaries of subsistence; medical department, or corps of physicians and surgeons, &c., &c. Our present organization is in effect the same; but it does not sufficiently divide the grades among the officers in fair proportions to the regimental establishments of the line. By organizing the staff into corps, these several staff corps might be enlarged or diminished without breaking in upon a regular system; and, at the same time, the officers belonging to these corps would have secured to them all the chances of promotion which officers in the line are in expectation of, and do actually enjoy. The graduated cadets of the Military Academy might, with great propriety and advantage to themselves and the public, be employed in the several branches of the staff previously to their joining their regiments; and, if on trial, some of them should manifest peculiar qualifications for staff employments, they might be continued therein, instead of hiring clerks to perform duties which they might very well perform; and by thus educating, as it were, additional staff officers who might, as occasion should require, act as staff officers, thereby multiply the means of giving effect to the militia, and indeed to the regular forces, according to the plan indicated, as it regards the staff.

As the military establishment is very limited, and as the Military Academy supplies it with excellent officers, it has suggested itself that, to render the rank and file more efficient, and to enable the government to extend the establishment to a greater number in time of war, a valuable improvement might be made by filling the rank and file by a new method, and instructing them with a view to forming a corps of non-commissioned officers, who might be distributed into the new corps or militia on the breaking out of a war; and thus, with the officers and soldiers of the present establishment, the government would be enabled effectually to provide officers and non-commissioned officers for an army of one hundred thousand men—as great a number as this country would probably require, under any circumstances, for a long time to come. The plan proposed is as follows: To enlist, with the consent of themselves and parents or guardians, a number of boys annually, to replace the present soldiers of the army; these boys to be enlisted for fifteen years, and not to be under fourteen, nor more than sixteen years of age; to be assembled at two or more places, where schools should be established for their instruction with a view of making them non-commissioned officers. They should be taught to read and write the English language,

arithmetic, and practical geometry, and to perform all the duties of private soldiers and non-commissioned officers; besides, they should be instructed in the mechanic arts, with a view to making them good artificers in iron, brass, wood, leather, &c., &c., and in the construction of carriages, machines, masonry, carpentry, and every other branch applicable to the military art, and which would be useful to them in civil life after their discharge from the public service. Their pay for the first three years to be the half of the pay of a private soldier, with the full allowances of clothing, rations, &c., except the *liquor*, which should be abolished; then, for the next three years, the full pay of the soldier; after which, they should have the brevet rank and the pay and emoluments of a corporal for five years, and, after that period, the brevet rank and pay and emoluments of a sergeant; so that, in time, the present army would become a corps of non-commissioned officers. On the same principle, a corps of excellent musicians may be created, if deemed necessary. The operation should be gradual, so as to create one or more companies at a time, which would replace by degrees the rank and file of the present army, by relieving whole companies and garrisons at a time. These young soldiers, notwithstanding their having the grade of non-commissioned officers, should be liable to do all the duties of private soldiers as well as those of non-commissioned officers; and such of them as should be selected and appointed to do the duty of non-commissioned officers should receive, while performing such duty, double pay. By this arrangement, it would be in the power of government to augment the army to one hundred thousand men; and, in less than two months thereafter, they would be more efficient than our army was during the late war after serving two years; because there would be competent officers and non-commissioned officers to instruct the new recruits, to attend to their wants and comforts, and render them efficient, who would account to government for the arms, clothing, munitions, &c., &c., furnished for the public service.

Besides affording the means of augmenting the regular army, incalculable benefits would result to the militia by the employment of suitable non-commissioned officers to instruct and drill the companies called into the public service. One commissioned officer as instructor to each militia battalion, to instruct the officers, and one non-commissioned officer as assistant instructor to each company, to instruct the non-commissioned officers and privates, would soon introduce into the militia after they were called into the service of the United States a sufficient degree of discipline and instruction to render them very efficient troops.

Thus it is that the proposed organization of the regular military peace establishment would render the militia effective when called out in defence of the country. A few days' training under accomplished officers and non-commissioned officers of the regular army would introduce system, order, and efficiency into the militia battalions; and if continued in service for one year and clothed, paid, and equipped by the United States, it would be difficult at the end of six months to distinguish them from the regular troops of the line.

To render the militia effective and the duty enjoined upon them least burdensome and painful to the great mass of the people when required to come forward in defence of the country, a specific organization and classification should be determined on by the national legislature at the present time while we are enjoying profound peace.

The present organization of the militia appears to be well suited to a state of peace; it is not, therefore, proposed to offer any alterations as it regards their peace establishment, but it is with a view of obtaining their services in time of war that the proposed system is presented for consideration. The calling out of entire divisions, brigades, and regiments at a time has been proved in the late war to be not only expensive, but attended for the most part with very little results, if any; and indeed it is well known to have been exceedingly distressing to the community, especially to those families the heads or parents of which were drafted to perform military duty at a distance from home, leaving their families without their natural protectors and consequent support—their occupations and farms neglected during their absence; so that, instead of aiding in the means of defence, a positive loss must have been experienced by the ruin at home and the consequences attendant on that condition among a valuable class of citizens. In order to remedy this evil and to make the call less heavy and painful on the community, it is proposed to divide the militia into *two classes*, one to be denominated *THE ACTIVE* and the other *SEDENTARY*; the active to be subject to the drafts to serve abroad, and the sedentary to remain for the home defence and not liable to be called out unless the enemy threaten their immediate vicinity, when they might form the garrisons of particular forts near at hand, or do duty in their towns or villages, or be embodied only so long as the enemy should remain in their immediate neighborhood, when every man ought to be ready to defend his fireside. The *active* militia should consist of all the unmarried men from sixteen to twenty-eight or thirty years of age, and the *sedentary* of all above that age, and all the married men and heads of families. The drafts for service by the United States to be made on the *active* by battalions, that is, the call should embrace a certain number of battalions, each battalion to consist of a certain number of officers and men who should assemble and march to the place of rendezvous, where each battalion as it arrived would be organized, mustered, inspected, and numbered by an inspector from the regular staff; and on that inspection and muster the pay-rolls and requisitions for the necessary supplies alone would be made and issued. The battalion then would take a regular form and receive the proper instruction from the instructors and assistant instructors, and for the term of one year would be to all intents and purposes a regular battalion. Every man thus drafted who should serve faithfully for one year, unless sooner discharged, should receive *an honorable discharge* which should forever thereafter exempt him from military duty, except in the sedentary militia, where every man, old and young, should be liable to do duty on emergencies. The battalions thus organized and embodied should be kept up during the whole war if the public service should require it, and be filled by new drafts three months before the expiration of the term of service of the old drafts, when, if the battalion should be full, one-half of the old soldiers might be discharged and the remainder at the end of the year, so as to keep at all times in service with the battalion a number of old soldiers to give instruction and efficiency to the new drafts. The officers, like the soldiers, should be liable to be discharged at the end of their term of duty, that is, at the end of the year; but should any desire to remain longer in service, if approved by the general of the district, they might be continued during the whole time for which the battalion might be kept up, and promoted by the governors of their respective States on the recommendation of the commanding general and on the reports of the inspectors—all vacancies to be filled on requisitions made by the general government on the States respectively. The officers, non-commissioned officers, musicians, and soldiers of the militia to receive the same pay and emoluments as the officers, non-commissioned officers, musicians, and soldiers of the regular army, be subject during that term of service to the same rules, regulations, and discipline, and to be entitled to

the same provisions for wounds and disabilities, and the same benefits and allowances in every respect as those belonging to the regular army.

The augmentation which the present army is capable of is as follows:

CORPS OF ENGINEERS.

To be gradually increased to—1 brigadier general, chief engineer, inspector general of fortifications; 2 colonels, directors; 4 lieutenant colonels, 4 majors, sub-directors; 20 captains; 20 first lieutenants. Corps of sappers and miners, 400.

CORPS OF TOPOGRAPHICAL ENGINEERS.

1 colonel; 1 lieutenant colonel; 2 majors; 6 captains; 12 first lieutenants.

ARTILLERY.

1 brigadier general, inspector general of artillery.

*Corps of ordnance.*—1 colonel of ordnance; 1 lieutenant colonel of ordnance; 2 majors; 10 captains; 10 first lieutenants; 10 second lieutenants.

Four regiments of artillery:

*Field and staff.*—Each regiment 1 colonel; 2 lieutenant colonels; 2 majors; 1 adjutant.

*Non-commissioned staff, with the pay and emoluments of cadets.*—4 sub-adjutants; 4 sub-quartermasters; 2 chief musicians.

Twenty companies, four of which companies to be light artillery, each company to consist of—

1 captain; 2 first lieutenants; 2 second lieutenants; 1 sergeant major; 1 quartermaster sergeant; 4 sergeants; 8 corporals; 8 artificers; 2 musicians; 120 privates. Total, 149.

Then we would have four regiments of twenty companies each, of which there would be—

16 light companies, 144 each.....	2, 304
14 battalion companies.....	9, 216

Total artillery.....	11, 520
Infantry of the line, 40 regiments, 1,000 strong.....	40, 000
Cavalry, 6 regiments, 500 strong.....	3, 000

	54, 520
The regiments of infantry to furnish the grenadiers, light infantry, and riflemen from their respective flank companies, 40 battalions of embodied militia, 1,000 strong.....	40, 000

	94, 520
--	---------

Attached to the trains of the engineers, artillery, ordnance, quartermaster's department, commissariat, hospital, &c., to be organized only under particular circumstances.....	5, 480
---	--------

	100, 000
--	----------

Now let us proceed to show how this is to be done.

Of the artillery, the present establishment contains 4 colonels, 4 lieutenant colonels, 4 majors—12; 40 captains, 76 first lieutenants, 76 second lieutenants, 76 brevets—268.

Proposed war establishment will require 4 colonels, 8 lieutenant colonels, 8 majors—20; 80 captains, 160 first lieutenants, 160 second lieutenants—400.

To be supplied, 8 field officers and 132 company officers. The artillery could be officered out of the present corps of artillery and the cadets of the Military Academy and the most prominent of the school of non-commissioned officers. The men to be obtained by enlistment.

INFANTRY.

To make the 40 regiments of infantry out of the present establishment of 7 regiments, and also the 6 regiments of cavalry:

Present establishment contains 7 colonels, 7 lieutenant colonels, 7 majors—21; 70 captains, 70 first lieutenants, 70 second lieutenants, 70 brevets—280.

Proposed establishment, 46 colonels, 46 lieutenant colonels, 46 majors—138; 460 captains, 460 first lieutenants, 460 second lieutenants—1,380.

To each regiment one effective colonel from the field officers and captains of the army, 46; the lieutenant colonels and majors from those not in service, officers who have served, or influential and respectable citizens, 92—138.

The captains to be appointed from the remaining captains and lieutenants and cadets of the Military Academy; but we have left now, deducting the 46 colonels from 301 officers, 255; to make up the number are required (which must be taken from the cadets at West Point) 205, making 460 captains. The lieutenants, to be taken from the prominent non-commissioned officers and from respectable young citizens, 920. Total, 1,380.

RECAPITULATION.

The number of officers to be supplied from the officers, cadets, and non-commissioned officers, for artillery, 420; for infantry, 506—926.

Number of officers now in the artillery.....	268
Number of officers of infantry.....	301
Number of cadets, say.....	200

	769
--	-----

	Brought forward.....	769
Number of non-commissioned officers supposed to be fit for officers out of the 6,000, say 318, which is three to a company.....		318
		<hr/> 1, 087
Number to be supplied.....		926
		<hr/> 161

The non-commissioned officers not promoted to be distributed among the companies of artillery, infantry, and cavalry, so as to give to each company at least six, and to the militia one per company, as an assistant instructor. These last are to be selected for superior acquirements in the drill and for exemplary conduct, and ought to receive the rank, pay, and emoluments of cadets.

But as it would not be wise to appoint any but efficient officers to command companies, it would be prudent to appoint in the first instance but eight captains to a regiment, and after the first year select, on the recommendation of the field officers of the regiment, from among the lieutenants two captains to each regiment, to complete the establishment.

The distribution of the non-commissioned officers would be as follows:

For the infantry and cavalry.....	3, 000
For the artillery, ordnance, and engineers.....	2, 282
For the militia.....	400
For promotion of lieutenancies and staff.....	318
	<hr/> 6, 000

In time of war it will be necessary to organize a train for the artillery; a train for the engineers; a corps of artificers to be attached to the quartermaster general's department; a corps of pontoniers to be attached to the engineers, besides the corps of sappers and miners. The sappers and miners ought to be organized at present, as it is a service that requires a great deal of instruction. They might be usefully employed at the Military Academy and in the fortifications. The corps of sappers and miners might be so organized as to have in its composition a valuable set of artificers, who would be very serviceable in the construction of forts and other military and civil edifices, under the direction of the engineers.

The other designated trains can so easily be put in operation under officers of the artillery and quartermaster's department, that it is not necessary to organize, in time of peace, anything of the kind; besides the talents of the officers for such service, there is such a wonderful facility in our country in obtaining excellent drivers, wagons, and anything which relates to transport by land, that it is better to be left to the discretion of the staff of the artillery and to the quartermaster general than to attempt any system at this time; for we must have part water and part land carriage, and it requires only the presence of those excellent officers of the quartermaster's department to put in motion all the transport that may be required. The artillery having its particular equipments, must have a train of its own to suit the particular objects of that arm, because the whole is to operate in the field, in sieges, and in the defence of places, according to the particular circumstances under which it may find itself, either at home or abroad. The United States are particularly blessed with a description of artificers that can turn their talents to any account, either with the axe or the spade, the plough, or the mechanic arts. Among all the implements of war, the axe, in this country, may be accounted one of the most important; for with it we can erect or destroy wooden bridges or fell trees, and with the same instrument obstruct roads and approaches, and make them when they are wanted. We can construct batteries, build forts, barracks, and cantonments, supply ourselves with fuel, and, indeed, do many things that are not known except in this country, where the axe is all-important. It is, therefore, unnecessary to organize, in time of peace in this country, many of those establishments essential to military operations in other countries. We can command them at pleasure, both in the personnel and the materiel, and at a rate and in a perfection that no government establishment can improve; but we must have laws to govern such establishments, when they are in the public employ, to prevent imposition, and to insure a compliance with the mandates of authority, especially in time of war. All minor details are avoided in this memoir, which will so readily suggest themselves in time of war. The education of our officers, and their constant improvement in the various branches of the science of war, will point out to the practical officer the mode, as well as the time, to employ those things which are only wanted on the immediate spur of the occasion, thereby avoiding all the expenses attendant on a permanent establishment of those costly equipages.

For a force of 94,520 we should require the following number and description of general officers at the commencement:

Four major generals.

Eight brigadiers, besides those now in service; the number of the general officers eventually to be increased to twenty brigadiers and eight major generals to command the troops in the field, independent of the general officers who may be employed in the staff, as chiefs of the staff, engineers, artillery, inspectors general, and heads of the several branches of administration, as quartermaster general, &c. The staff must be complete in time of war, or the troops will never become efficient, but will be an irregular and expensive corps, on which no reliance could be placed. It is the staff alone that can give efficiency to the service by a proper attention to the necessary supplies, organization, discipline, and accountability of all the departments of the service, regular as well as irregular. The general officers and staff officers should be selected with great care, for on them depends the successful employment of the troops and the general defence of the country. They should all be men of character, talents, and experience, in whom the nation and the army could confide; and not those who, from popular favor, may for the moment have been brought into view, and who in the first reverse will lose the confidence of the army and the people.

It may be supposed from the foregoing organization and remarks that the sedentary militia are to be excluded from a participation in the defence of the country in time of war. That is not the intention of this plan; it is to relieve them from taking the field for any length of time. They may be employed, as it has been before observed, under their present organization in defence of the cities, ports, or harbors. The uniform or volunteer corps to preserve all their privileges, their dress, &c.; but instead of carrying them off to the lines, or employing or quartering them in barracks at a distance from home, they will be

left at liberty to pursue their avocations as usual; but immediately on a threatened invasion of their immediate vicinity they will be embodied and occupy the forts or intrenchments intended for the defence of their city, town, village, or immediate vicinity, and do duty in a regular manner as long as the enemy may invest the place or linger in their neighborhood. To march off into distant parts they will not be required, such service being reserved for the regular troops, and the embodied drafted battalions of the active militia, as before suggested.

ALEX. MACOMB, *Major General, Chief Engineer.*

The Hon. SECRETARY OF WAR.

*Table showing the number of men and officers which each State and Territory would furnish, according to the plan for drafting the militia to serve one year, agreeably to the census of 1820.*

State and Territory.	Number of men from 16 to 28 years of age, in each State and Territory.	Quota to be furnished by each State and Territory, to make up the 40,000.	Number of battalions.	Number of companies.	Designation and number of officers.

*Review of the "Memoir on the organization of the army of the United States with a view to its giving effect to the militia when called into actual service."*

It is gratifying to see that the circular letter of the Hon. James Barbour, Secretary of War, of July 11, 1826, on the subject of the militia, addressed to the governors of the several States and Territories, the general and other officers of the militia, and to the officers of the army and others interested, begins to attract the attention of those who are capable of aiding in the great undertaking which that circular offers for consideration. The subject is one of vital importance to the nation at large; and notwithstanding it claimed the early attention of the general government as far back as its first going into operation under the new Constitution, there has as yet been no system established by which the militia could be rendered effective.

Under the administration of General Washington the attempt was first made to exercise the general power, granted by the Constitution to the national legislature, "to provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States."

Finding that there was an almost universal opposition on the part of the people to maintaining, in time of peace, a regular army, growing out of the ancient hue and cry against such establishments in England, when it was believed that the military were embodied to oppose the people in their just claims to certain privileges, and when, perhaps, such really was the case, General Washington took repeated occasions to impress on Congress the necessity of organizing the militia as early as possible, and stated, in his speech at the opening of the second session, that "among the interesting objects that would engage the attention of Congress, that of providing for the common defence would merit its particular regard. To be prepared for war is one of the most effectual means of preserving peace. A free people ought not only to be armed, but disciplined; to which end an uniform and well-digested plan is requisite, and their safety and interest require that they should promote such manufactures as tend to render them independent on others for essential, particularly for military supplies."

During the next session of Congress an act was passed for establishing an uniform militia.

Although General Washington was very anxious to establish, as early as possible, a system for the militia, knowing the repugnance of the people at large to a regular army, as before observed, and that, therefore, no other means of defence could be obtained with the consent of the people under the impressions which then existed, it was by no means his opinion that that species of force was either the most economical or least dangerous to the liberties of the citizen; for in this country the soldier, enlisted with his own free will and consent, could be regarded in no other light than a volunteer in the cause of his country; still, he believed it was better to have some description of force, in reality or in name, rather than that the new government should appear in the eyes of the world without any means of defence at its command. Besides, General Washington was desirous that the information, discipline, and experience, which were still existing among the remaining revolutionary officers and soldiers, should not be suffered to die away, but be introduced, under the sanction of a law, among the people who should be enrolled in the militia, fearing that, should the opportunity pass away unimproved, such an advantage would not again occur, unless, unfortunately, the United States should be again involved in a long and arduous war.

Washington had no reliance on the militia, nor had any other commander in the revolutionary or the last war. It is true, however, that many who had the command of the militia, from motives of policy, and for the purpose of impressing on the enemy a belief that the militia were exceedingly powerful, and that much reliance was placed on their exertions, did publish, in general orders, flattering accounts of their prowess, both to deceive the enemy and to encourage the militia to come forth in defence of their country.

While this species of deception may be warranted as a *ruse de guerre*, and have its effect in war, it has, nevertheless, produced great mischief, by giving a reputation to the militia for efficiency which they never merited, and thus that description of force has been too much relied on as sufficient for all the purposes of defence—a reliance of a most dangerous tendency. The organization and system under which they could be employed were exceedingly defective. They were, when called into the public service, a moth on the treasury. They cost twice as much as regular soldiers, and rendered hardly any service whatever. They were without discipline, discontented, badly officered, and miserably provided with everything which was essential to their utility. These are facts which cannot be disputed, and ought not to be concealed. No unworthy imputation is here meant to be cast on the individual character of those who compose the militia; it is to expose the imperfection of the system under which their services were required.

The plan for organizing and employing the militia proposed in the *memoir* seems to have been written by one who is well acquainted with the subject; and the suggestions which it contains with regard to the improvement of the regular forces and of the mode of rendering efficient the militia when called into the service of the United States, or in other words, when employed in war, appear to be very judicious, and, as far as we are capable of judging, the best yet offered for the public consideration, both on the score of economy and efficiency.

The organization of the general staff into separate departments or corps seems to be very proper and highly advantageous; and that these staff corps should be the *main spring* of the regular and irregular forces, appears, under the views presented, as well calculated to produce that harmony and unity of action which constitute the basis of discipline and the strength of armies.

An army is efficient in proportion as its staff is well organized, and the members composing it honest, industrious, and intelligent. It will be of little avail if the individual regiments, battalions, or corps which compose an army are in a high state of discipline and well organized, if the general staff which directs the whole is incompetent to fulfil its important functions. Such an army, however patriotic and gallant, would soon have to submit to one of equal, nay, of less number of troops of inferior quality, under the guidance of a staff well organized, and composed of officers of experience and well versed in their various and complicated duties; for while the troops of the former description would be daily diminishing in strength and discipline under an ill-regulated and ignorant staff, the latter would be improving in force and discipline by the good management and care of its excellent staff. It is not the individual exertions of corps, however spirited, that decide a campaign—it is the talent with which they are directed as a whole, and the means employed to maintain discipline, to provide for their comfort and subsistence, and the numerous supplies requisite for carrying on the war. Hence the suggestion of having officers of the regular army to compose the heads of the staff for the militia, and for instructing them in their duties, appears not only reasonable but very feasible, and, as the writer of the *memoir* says, *important*, inasmuch as the general government is bound to supply the militia when in the public service.

Whether the system of recruiting the regular army by engaging young lads and instructing them will answer, the experiment alone can decide; it appears, however, not to be impracticable, and it is well worth the trial. Should it succeed, it will render our military establishment very valuable, efficient, and economical; and its application to the militia, as the means of giving that portion of the military force organization and efficiency, may be esteemed an important consideration.

As it regards the militia, the distinction made between the *war and peace establishments* appears both reasonable and judicious. The militia have two duties to perform: one is to suppress rebellion, the other to repel invasion. The present organization is sufficient for the maintenance of order and suppression of rebellion, and is therefore well calculated for a state of peace. But to make the militia a means of defence against foreign invasion, there must be an organization adapted to meet a state of war. The classification of the militia into *active* and *sedentary*, as proposed in the *memoir*, certainly possesses many important advantages. It leaves the elderly and married men at home to defend their firesides, while it does not draw them from their ordinary employments and the immediate care of their families, at the same time possessing all the advantages as to organization which the militia at present possess; and the young men who are unmarried can be employed anywhere, free from the cares of home and all those miseries which they would suffer were they married and separated from their wives and children. This organization has not, however, the merit of originality. It was practiced by the Canadian government in the late war with great success. No troops could have presented a better appearance than the battalions of Canadian militia in Lower Canada, composed of young men, incorporated during the war. The men were, however, drafted to serve for one year only, and were quartered, dressed, and equipped like the troops of the line of the British army, so that the experiment may be said to have been made with success. There have been various propositions for improving the state of discipline among the militia, or, rather, for instructing the militia. General Knox, Secretary of War, in his report to Congress during the administration of Washington, proposed, if our memory serves us, that the militia should be encamped three months in the year, and perform, during that term, all the duties of a soldier, and experience all the varieties incident to a military life. In theory this plan appears exceedingly well, but to put it in practice

would require large sums of money; the three months would be passed like a frolic, accompanied with vicious indulgence, instead of resulting in any practical good; but, on the contrary, it would give to those called out habits totally different from their avocations, which would unfit them for the ordinary pursuits of life. It has also been proposed to call out the officers and non-commissioned officers a certain number of days in each year. This plan appears better than the first; but like it, if the officers and non-commissioned officers are to be paid, the expense would be burdensome, and the results but little better than the former. On the whole, we are inclined to believe that the plan proposed in the memoir is the best and most practicable—namely, that of leaving the militia for the peace establishment as they are now organized; and for the war establishment, to divide them into *active* and *sedentary*. The first to be embodied like regular troops, and act abroad when required; and the latter to serve at home only on emergencies.

The proper period for receiving instruction is youth; and as every pains is taken to educate our youth in the rudiments of their language, in arithmetic, and in dancing, and gymnastic exercises, it appears to us that the military exercises should also form a part of early education, and thus avoid the trouble and loss of time which is occasioned by the present mode of attempting to drill the militia after they have arrived at manhood. We would then suggest a plan for instructing the militia by teaching our young lads at schools and in colleges the military exercises, and make it a national and general object. Suppose, for instance, that the teachers of schools should be licensed in each State by the proper authorities; that such of the teachers as would instruct their pupils in the military art as far as the *School of the Company*, should be compensated at a certain rate per boy, say one dollar per annum, to be paid by the general government on the certificate of the inspector of the district or brigade within which the school might be situated, who should make a report to the adjutant general of the State of the number of boys at the schools within his district or brigade, to be laid before the governor of the State for the information of the legislature, and also a similar return to the War Department for the use of Congress; and that each college in the Union should be endowed by Congress with a professor of the military art in the higher branches. The plan is not so difficult as one would at first suppose; for it would be only necessary, in each school, to instruct three or four of the most intelligent and best behaved boys, in the first instance, who might be made the captains and lieutenants of the company, who would, after being well grounded in their duty, as set forth in the military regulations, instruct the other boys of the school. The officers and non-commissioned officers should be selected for their exemplary conduct, and it should be considered a great distinction to enjoy the offices. They should be furnished with wooden arms; they should be carefully taught how to stand firm, march, and wheel, and go through the manual exercises.

Every morning they should assemble on the parade ground before the school; the roll should be called in conformity with the regulations, after which they should march into school and deposit their arms. Each Wednesday and Saturday afternoon should be exclusively devoted to the drill, when the school should appear in some neat, simple uniform. On particular days there should be, under the direction of the brigade major, a general muster of all the schools in his district, when they should be incorporated and formed into battalions, and manœuvred as such under his particular care. This would afford an opportunity of comparing the state of discipline in the several schools or companies. The general and field officers of the militia should attend and review the battalions, and publish in orders, through the brigade major, their opinion of the appearance, skill, and advancement in their military exercises, of each school. Take, for example, the District of Columbia: suppose that every school therein formed a company, each company in a neat uniform, say a blue nankeen jacket and white pantaloons, black hat and white feather, and each with a flag to designate the company, should march up from their respective school-houses and assemble on the President's square, and there, under the direction of the inspector of the militia, to be formed into battalions and brigades; the young gentlemen of the colleges, who had advanced to the evolutions of the battalion and line, to take command of the battalions and brigades and to perform the duty of adjutants, field and general officers. We might then see, in the course of a year, about 1,600 or 2,000 boys forming a most beautiful line, and exercising with a precision which the militia of the district could not obtain under their present regulation or mode of instruction. In the large cities, like New York, Philadelphia, Boston, and Baltimore, a small army might be paraded. The sight would be beautiful and highly interesting. The youth, when once instructed, would never forget the drill and evolutions. In confirmation of this assertion, it is well known that those who learn to dance when they are young never forget the most complicated figures or difficult steps, while it is almost impossible to teach grown persons to dance or even to learn the figures of different dances. Dances are only steps, evolutions, and manœuvres, and they are generally more difficult than the steps, marches, wheelings, and evolutions which form the basis of the military movements. This plan cannot be carried into effect without the aid of the general government; and all the aid required from it is to pay one dollar per head, which, while it will lay the groundwork of making a good militia, it will, in fact, be aiding in the general system of education throughout the Union, as the money spent would enable the masters to maintain themselves, and consequently to attend to their duties as teachers, for in many of the country places they get so little compensation in cash that they are barely able to live. The objections which will be urged against this plan will be, that it will have a tendency to make the nation military, and thus give a propensity to war which may lead us into difficulties and perhaps furnish some designing character the means of usurping the reins of government, and thus destroy our republican institutions; but we cannot conceive that fear to be well grounded. Have we not always been endeavoring to make our militia effective, to arm and discipline them? Are not the people enlightened and well acquainted with the nature of our institutions, and will they voluntarily sell themselves to a tyrant or an usurper? No; the thing is preposterous. Only educate the youth with care, and they will, when they grow up, know how to value the rights and privileges of an American citizen; and while they have arms in their hands, and know how to use them, will be more likely to maintain those rights and privileges than barter them for the smiles of an usurper, however dignified in assumed titles, or powerful by the support of traitors and unprincipled adherents.

WASHINGTON CITY, November 9, 1826.

Sir: His excellency Governor Lincoln, of Massachusetts, put into my hands four copies of your printed circular on the subject of militia organization and improvement, and directed me so to distribute them as best to answer the object in view.

I have now the honor to enclose to you such answers as I have received from those to whom they were addressed, as well as one or two volunteer communications from intelligent gentlemen, who entertained particular views of the subject, to which the publication of your circular had called their attention. In addition to these, I have been requested to forward the votes and petitions of several officers of the militia on former occasions, expressive of their opinions on the best mode of removing some of the defects in the present system. I have also added a copy of a letter from Brigadier General Dearborn, which, though written with relation to another paper, contains his sentiments on some important points in your circular.

The letter enclosed, from Mr. N. Howland, of Rhode Island, pointing out the evils which exist in that State, was written at my request. This I also submit to your consideration, as I am not aware that the board of officers, to whom you have submitted all the papers you have received, have had any communication from that State before them.

Having, through your partiality, the honor of a seat at the board of officers who have your directions, among other things, to revise the system of organization and instruction of the militia, I did not think it necessary for me to enter so much at large into the discussion of the subject in my own reply to your circular as I should have done had not the opportunity been afforded me of orally communicating my opinions. Another reason for this omission arose from my having before expressed my views on the civil uses of the institution in a letter to the late President Adams, which was published, and since presented to you a paper of some length touching many of the subjects to which your circular relates. A copy of this paper I have now the honor to enclose, begging that it may be received, together with the letters appended to it, from officers of great distinction, both in the army and militia, in several States, as a part of my communication in reply to your circular. I feel a greater confidence in making the request that this paper may be submitted to the board, from the favorable opinions expressed of its principal recommendation by those experienced statesmen, the late Governors Eustis and Brooks, to the former of whom, and some others of my correspondents to whom I had submitted a more condensed view of the subject, I am indebted for some of the suggestions the paper contains, and the sentiments of the latter of whom appear in his letter. This and the other letters annexed have thrown so much more light upon the subject of militia improvement than I could have done, that it would have been doing injustice to it if I had omitted communicating them, though, from other and personal considerations, I should have made extracts from them if I could have done so without mutilating the sense, or leaving it in obscurity. The general accordance in the opinions of all my correspondents on the expediency of providing for the appointment of an officer at the seat of the national government, whose whole duty shall be confined to the militia, encourages a stronger hope of the adoption of that measure than the reasonings or reflections which any individual alone could afford. The reasons in favor of such a measure will be much increased, if, as it is fondly expected, a new and improved system of militia organization and instruction should be adopted; for in such case no measure could have a more important influence than this in establishing it on principles of uniformity in all the States of this great confederacy.

In relation to the particular points of your circular, finding some of the militia officers to whom it was sent have referred to me for facts, which my department would furnish, I have made a few additional observations in answer to your questions under the several heads presented. The answers refer to the numbers.

*Answer to 1st question.* The militia of Massachusetts consists of 55,060.

2d. The States have no power to alter the organization; upon this point the authority of Congress is paramount. It is believed, however, that many of the States have legislated on this subject. In Massachusetts such an attempt was formerly made; but after a court-martial decided that an arrested officer, commissioned according to the State but contrary to the provisions of the United States laws, was not amenable to its authority, the State law was repealed. No difference now exists, except in two minute particulars: First, provision is made for the appointment of aides-de-camp to the commander-in-chief, and quartermaster sergeants to regiments. Rank is also given to the commissioned officers aforesaid, and to some others where none was provided by the national law. Second, any person who is guilty of an infamous crime is required to be disenrolled from the militia.

3d. The volunteer companies are the most efficient.

4th. None. On the contrary, those who enlist into them are holden to do duty therein (if they so long reside in the brigade) for seven years, unless they are sooner discharged for reasons which are satisfactory to the brigadier general. Neither can these corps disband themselves; they can only be dissolved by the authority of the governor and council. Nor can their officers, or those of any other corps in Massachusetts, resign at their own pleasure; but are holden under the penalty of \$200 and a liability to be cashiered by a court-martial, to the performance of all the duties required of them by law and general orders, until their resignations are accepted by the commander-in-chief.

5th. Quite otherwise. They are reciprocally advantageous. The poorest regiments, generally, are those which have no volunteer corps attached to them. It is, however, true, that unless the "regular" militia were required to be enrolled and trained, the "volunteer" or enlisted militia would not, to any considerable extent, exist; as it is in the preference which is given by those who compose these corps to perform their military obligation in company with their own friends and companions, instead of being compelled to associate with all classes of the community who are liable to enrolment, which forms the principal inducement for that increase of expenditure, both of time and money, which is required of those who belong to them. Neither the pride of military appearance nor the desire of military attainments, nor even the spirit of patriotism in time of peace, which pervades the members of volunteer companies, it is believed, would, of themselves, be sufficient motives for the formation of such corps, though they are powerful incentives to those whose pride of character leads them to avoid the associations they would otherwise be compelled to make. It hence follows, that if the fines for non-attendance at the meetings of the enrolled militia are inconsiderable, the equivalent will be paid, and consequently the principal inducement for the formation of volunteer corps will cease.

6th. A little less than one-third, or about one-fourth part of the whole body of the militia.

7th. It is doubted whether Congress has any jurisdiction over the subject, though it is conceded

that the power to make by-laws, under the State authority, not inconsistent with the laws of the United States or the States, would be undoubtedly useful; as thereby the pride of the enlisted companies would enable them to increase their drill meetings, and impose fines for non-attendance at these as well as those which are fixed by law, and otherwise regulate the police of their respective companies under such penalties as, by experience in different sections of the Commonwealth, from the ability of their members, should be found would answer the end intended without making the duty required so burdensome and oppressive as to prevent recruiting. These companies now, however, generally have codes of by-laws, though in most of the States, as in Massachusetts, for the want of legislative sanction, their legal tribunals have no jurisdiction whereby to enforce the collection of their fines and penalties for neglect or disobedience.

8th, 9th, and 10th. It is supposed that this question arises from an opinion that militia duty is required of too large a proportion of the community. In this view of the subject the respondent concurs, but he is of opinion that great objections, both in a civil and military point of view, exist to a classification either by difference of condition from age or marriage, and that the object aimed at can be attained in a mode which is not only unobjectionable in this respect, but will likewise obviate other evils which the existing laws present. He considers the militia not only as the safest and best, but as a necessary preservative of the civil power in peace, and the great reserve of the army in war. It need not be feared that those who annually tax themselves for the maintenance of their civil institutions, will see their own laws executed, even if a resort to arms becomes necessary. But to accomplish the civil purposes of the institution only, the citizens must be organized in sufficient numbers to make their strength feared by the malcontents, and so instructed and trained as to make it efficient on any sudden emergency, if the threatened resistance to the laws should in fact be made. He fears that the employment of the United States forces, in times of high party excitement, particularly for the execution of the State laws, would be looked upon as so great an interference with the State authority and power as even to increase the resistance it was called to suppress. Yet if the militia be too much reduced, even though many might think that thereby a precedent would be set whereby the liberties of the country would be ultimately subverted, a necessity for the employment of the regular army would be necessary for the due execution of the State as well as United States laws.

This view of the subject is not taken from any ground which, in the existing state of things, the army or the country would furnish, but from historical truths, founded upon principles of action which are as applicable to the condition of our country as to others. The respondent is therefore in favor of arming, training, and instructing the whole number of persons who shall be enrolled, and of diminishing the extent to which enrolments are now required to be made. Eighteen and thirty are the most comprehensive numbers which he would adopt as the limits of enrolment. Even less than these would form a corps quite sufficient to answer all the constitutional ends of the militia institution.

When the militia law of 1792 was passed, which required all the able-bodied free white male citizens between the ages of eighteen and forty-five to be enrolled, our independence as a nation had but lately been acknowledged and our Constitution of government just established; the British held military posts within our limits on the western frontiers; the Spaniards possessed Louisiana and the Floridas on the southern, and commanded the keys of the Mississippi; the Indians were powerful and hostile on our north-western borders; the stability of our forms of government and civil institutions were threatened by rebellious subjects at home, and our strength and resources as a nation were unknown to the European powers; we were without a navy and fortifications, and the army even was insufficient for the protection of the Indian frontiers. Under these circumstances, the provisions for the enrolment of almost the whole of the able-bodied population of the country was justifiable, and necessary for our security. But so entirely different is now our condition that one-half the present numbers, if properly drilled, is fully sufficient to meet any emergencies which may be expected to arise. If it should, however, at any time be found otherwise, Congress can as easily provide for additional enrolments for the militia as it can for the raising additional regiments for the army. But this supposition is founded upon the idea that if all the citizens are released from duty fifteen years earlier than at present, more duty of them may be required while they are the subjects of military authority. Thus, although the numbers be diminished, the efficiency of the whole body would be increased. Further, considering the volunteer corps as so much better answering the purposes of the militia, if all from eighteen to thirty were to be enrolled, so much more than half the present number of the militia would be included as to justify the release of such as should perform duty in the enlisted or volunteer corps for a less number of years than in the enrolled or regular militia, upon condition that they kept themselves uniformed, armed, and properly equipped in every respect, during their period of service, and passed such inspection of their equipments and examination of their discipline as should be required. Let all persons within the prescribed limits whose personal services for the support of government are not incompatible with militia duty be enrolled; let such few exemptions as are indispensably necessary be made by the national government, and that part of the law of Congress which confers the power on the States to make additional exemptions be repealed, and thus make the duty equally obligatory on all the members of the community, instead of its oppressively falling on those who have no power to obtain exemption by influence nor the means of paying a pecuniary equivalent; let arms and books of tactics be provided and distributed at the national expense; instructors provided for such officers as choose, or the States shall require to attend the meetings for instructions; and let rations also be supplied by the several States to the troops while engaged in military duty, and it is believed that the great objections which exist against the militia establishment will be obviated, and all its essential benefits preserved. The objections to the militia system, it is generally conceded, do not arise from hostility to the institution itself, for this is justly considered as the bulwark of republican liberty, but to the inequality of its burdens under the existing laws, and to the little use of their requisitions to the attainment of the end intended to be accomplished. Thus it is believed that not only one-half of the time and expense of those who are now enrolled might be saved in peace, but that the same or greater advantages would result from the application of this force into defence in war; for if the enrolled militia were in truth made efficient by the proposed means, it is believed that the troops, instead of being called out to be drilled, in anticipation of the enemy's arrival, might generally remain at their homes until he was near at hand, and then come prepared to meet him in conjunction with the regular forces, and be dismissed again to pursue their usual avocations as soon as the emergency ceased which called them forth. I have known so many instances during the last war where this system was effectually pursued in the States of Massachusetts and Maine, (which was then under the jurisdiction of Massachusetts,) where the sea-coast frontier was defended at less than a quarter of the expense which would have been required if the officers and men had not been

practiced in their duties, and it had consequently been necessary to keep them in service for instruction the whole of the season, that I cannot readily relinquish that part of the system which experience has proved is attended with so many advantages.

It is, however, necessary, in order to obviate an objection which may arise to the diminution of the militia roll in those States where their internal tranquillity is endangered by their domestic population, to give to the several States the power of making additional enrolments within their own jurisdiction. The States may be safely intrusted with this power, for its exercise will not only give additional security to their domestic peace, but will add to the national strength; whereas if a larger number is required everywhere to be enrolled than the national emergencies demand, and the States are intrusted with the opposite power of making exemptions, the force of this national arm may be diminished to an extent altogether incompatible with the national security.

11th. The organization of the militia should be complete in peace as well as in war. The distinction named of withholding the higher grades of commissions in time of peace would have a very unsalutary effect on the whole institution.

12th and 13th. The power of making detachments from the militia for a longer period than three months ought to exist. And as the militia burdens ought to be equalized as much as is consistent with economy and the public necessities, I should think detachments for one campaign would be sufficient; and in our climate these do not usually continue beyond six months.

14th. The militia are enrolled and accurately inspected through the whole State at 1 o'clock p. m., on the first Tuesday of May, by the captains of the several companies, and returns are made, noting every deficiency in the several articles of equipment, to the colonels of regiments. These are condensed into regimental returns, and transmitted to the brigadier generals, who make returns of their entire brigades to the adjutant general.

After the company inspections are made, the troops are trained on the same day. They are also trained one other day, which is usually a short time previous to the regimental brigade or division muster, which takes place in the autumn, when the officers and men are again inspected by the brigade inspectors, and reviewed either by the commander-in-chief or some general officer. These inspection returns are likewise annually transmitted to the adjutant general, and form the basis of his annual return to the President of the United States.

15th. I think frequent trainings and musters, that is to say of four or six times a year, *under skilful officers*, would be advantageous to the great body of the militia; and, in my opinion, great benefit has been derived from those we have already had, under all the disadvantages which have attended them; though it ought not be concealed that the beneficial influence of these is annually diminishing.

16th. I would instruct the officers, but not them exclusively. By so doing you turn officers into privates. Officers must be practiced in their duties of command as well as the men in theirs of obedience; and by establishing a proper system for the instruction of the officers, you will qualify them usefully to exercise the authority with which they are invested, which is not always the case.

17th. The system of infantry tactics prescribed for the army is not generally adopted by the militia, and solely for the want of books of instruction, which it has for a long time been supposed would be furnished by the national government. No measure, much more than the distribution of books of instruction to the militia officers of all the States, would tend to the establishment of an uniform militia throughout the Union. It would drive out of circulation thousands of volumes of spurious editions of the national work, in which such alterations are made as are totally destructive of that uniformity of practice which it was the object of the national legislature to establish when they required its adoption by the militia.

18th and 19th. There are none prescribed. Each captain adopts the best book of instruction he can find. Proper systems of instruction are absolutely necessary for both the artillery and the cavalry; the latter of which, if they were required to be armed and exercised with carbines, in addition to the sword and pistol, it is believed, would be much increased in usefulness, both on the sea-coast and inland frontiers. The experience of the last war taught us that the cavalry, as it was then armed and instructed, was almost an useless corps. In Massachusetts but three companies were called out during the whole war, while every other volunteer corps in the State was in service at some period or other of it.

I have the honor to be your obedient servant,

WM. H. SUMNER.

HON. JAMES BARBOUR, *Secretary of War.*

Paper referred to in the above letter, a copy of which was some time since presented to the Secretary of War, for the consideration of the President.

SALEM, September 10, 1826.

SIR: I have received your letter of the 2d instant, enclosing a circular from the Secretary of War, whose object is to obtain information leading to the melioration of the militia system of the United States, in order to render their service more efficient than it can be in its present condition.

The opinion that a well-organized and a well-disciplined militia is the natural defence of a free people, "is entitled to the character given to it by the Secretary—that of a 'maxim,' but surely the "experience" of the people of the United States will not authorize the conclusion, because a "well-disciplined militia," comprehending the entire mass of able-bodied men, never had, and, I do not hesitate to say, never will have, an existence in our country. Whoever reads General Washington's official letters to Congress in the first years of the revolutionary war, will see that a reliance on the militia and the short enlistment of regulars brought our affairs to the brink of ruin. But it will be said that the militia was not then "well disciplined." True; and I repeat that it never *will be*, and while the system shall embrace the whole body, I add, that it never *can be* well disciplined.

In 1777, Great Britain being threatened with an invasion from France, while its regular forces were, and must necessarily have continued to be, employed abroad, the Parliament enacted that corps of militia should be embodied; the men to be drawn by lot, and trained to the use of arms and manœuvres for home defence. But these corps united amounted only to about thirty-one thousand men for England and Wales. To give them the requisite discipline they were to be enrolled for three years, and trained, I think, about four weeks in each year, and sergeants taken from the regular troops were employed to drill them; and even then it was found expedient (as I remember to have seen it stated) to march them *from home*, out of their own counties, to render their training effectual. By these means they became, in reality, *regular soldiers*. They were uniformly armed, paid, and clothed at the public charge.

The only well-disciplined militia, comprehending the whole male population of ages adapted to military service, since the early periods of the Roman republic, was in Switzerland. Upwards of a hundred years ago it was efficient. Surrounded by powerful neighbors, and particularly in danger from Austria, a universal militia, in an entire population not exceeding perhaps one million and a half, was indispensable. They were clad in a simple uniform of gray cloth, and trained every Sunday after attending their religious services in their churches. The details of this arrangement may be seen in Stanyan's account of Switzerland, which I read upwards of forty years ago. He was the British minister in that country in the early part of the last century. I think I saw the title of the book (a duodecimo volume) in the library which Mr. Jefferson sold to the United States. I remember being struck with one prudent regulation in their system: not to appoint their *general officers* until an invasion or impending war rendered their complete organization indispensable. This reservation would, I have thought, be especially proper in the United States militia, from the manner in which officers are appointed and rise in rank.

The United States have nothing to fear from any neighboring power; and already our great population renders a universal training of the citizens capable of military services absolutely unnecessary. It would now be an evil, and an evil rapidly increasing.

The constitutional calls for militia are to execute the laws of the Union, suppress insurrection, and repel invasions. For the first two objects no special military training will be requisite. Those who shall resist the execution of the laws, or form insurrections, will be undisciplined citizens. *An organized militia, acting under the authorities of the general and State governments*, will be amply sufficient to overcome such resistance and to suppress any tumultuous assemblies of lawless men, though appearing in arms.

In our large cities and towns there are already select corps of militia, well trained and fit for service. In the largest cities these corps are regiments and battalions, and in others companies. In every State in the Union such corps should be formed, proportioned to their population. And the entire amount of these corps should be equal to three or four times the numbers composing the standing army. The skill acquired by these select corps now costs them considerable expense in time and money. At present they consist of volunteers, but they are volunteers, partly because young men seem to have a natural fondness of military exercises, but chiefly, I am inclined to think, because they prefer incurring those expenses of time and money to training in the common militia. If, therefore, the worse than useless project of training the whole body of the militia be abandoned, some encouragement will be requisite to induce even young men to engage for only two years in such select corps. Their arms should be furnished from the public arsenals, and a fixed sum allowed for procuring neat uniforms to sit easy upon them, and not daubed with gold or silver lace, or plumed with feathers two feet high. In the last week of their two years' service they should be inspected by proper officers, competent to judge of their proficiency; and all who shall be found duly acquainted with the prescribed discipline should be allowed to retain their arms and accoutrements, and be discharged. In this way the effective militia would eventually be uniformly armed. And as the arms are to become their own property, they will take good care of them.

At the outset these select corps may find instructors among such of their fellow-citizens as have served in select corps of militia, or in the regular troops, as officers, sergeants, and corporals, and in some instances, intelligent and discreet privates. Drummers and privates may be drawn from the same sources. When a competent number of such instructors are not to be found, the deficiency may, in the first instance, be supplied from the regular troops, and partially perhaps from the Military Academy at West Point. These first disciplined companies and corps will probably furnish instructors for the second set, and so on in an unlimited succession; all deficiencies, however, to be supplied from the standing army and West Point Academy.

The instructors drawn from the standing army will, of course, continue to receive their usual pay and emoluments, with such additions as circumstances may require, for their travel and expenses, beyond what their ordinary duties in the regular service would expose them to. So, likewise, those drawn from the academy, and from the select companies and corps employed in training the next or any succeeding set, must have adequate compensations.

A portion of the training should consist in firing at marks. In the older settlements of our country where game has generally disappeared, there will, consequently, be many requiring instruction in loading, taking aim, and firing.

It has been the practice of some of the select, well-trained companies in Massachusetts, to make an annual excursion with tents and other equipage requisite to form a regular encampment; the like encampments may take place at mild and healthy seasons of the year, (varied in the times to suit our varied climates,) with the select companies and corps whose training is the object of this communication, in situations easy of access to provisions, water, fuel, and straw. All the necessary expenses of this field-service must be defrayed out of the public treasury, upon proper returns and documents.

In England, I have already stated, the selected militia are trained for three years, about four weeks in each year. I cannot but think that in the United States two years of like training, with capable and diligent instructors, would suffice to give the requisite discipline for efficient service. In the last week of the training in the second year all the select companies and corps living within a circuit of — miles should assemble at a convenient place, and there be commanded and exercised by a field officer or officers (in proportion to the number of men thus assembled) selected from the officers of the companies and corps, and whose abilities and practical knowledge shall best entitle them to distinction in the ranks to which they shall be appointed.

I have already remarked that the United States have no continental neighbors from whom the smallest danger—I might almost say the possibility—of invasion is to be apprehended. Invaders, if there should be any, must approach us by water. Of these we cannot fail to have timely information, in consequence of previous diplomatic altercations. If these are likely to terminate in hostilities, a competent number of the militia may be embodied and disciplined, having their stations and encampments in places most exposed to invasion, or to which they could march in time to repel them. To train these bodies of militia, instructors would be furnished from those who had themselves obtained an adequate knowledge of discipline, either in the army or the Military Academy, or in the select companies and corps before mentioned, with the addition, if found necessary, of officers and sergeants detached from the regular troops. The general officers to be selected from the ablest officers serving, or who had served, in the select companies and corps before mentioned. An able and experienced general officer of the regular army, of equal or superior rank, may, when deemed necessary, be designated to command the whole; a portion of the regular troops in every such case to be united with the embodied corps of militia.

Such embodied corps of militia, with such instructors as have been described, would become better acquainted with every branch of military discipline in two weeks, or even in eight or ten days, than by

training, as the whole militia is now trained, annually, from eighteen to forty-five years of age. And, certainly, no invasion is to be apprehended as so sudden as not to admit of two or four weeks' training.

Of the utter inefficiency of two, three, or four days' training in a year, every observer, possessing any military knowledge, is competent to pronounce. For myself, and I speak also from my experience in the militia in early life, I can pronounce with confidence. I then took much pains, with such means as were within my reach, to acquire the requisite knowledge for training the militia, and imparted the same to the officers of the companies in Salem. We then attempted to instruct the militia who were assembled four days in the year, but our labor turned to very little account. I have ever since considered the whole, as I do the present militia musters, as a waste of time for those who actually assemble, while thousands who will in no event become soldiers are heavily taxed by fines for non-appearance, and vexed in their collection.

Should the principles above sketched be adopted as the basis of a plan for disciplining the militia, many details will be necessary in forming it :

1. To determine the ages within which the men constituting the select corps shall be comprised. These may be not under twenty-one, nor, at present, over thirty years. In future periods twenty-five years of age may be the limits. To take apprentices would interfere with the rights of parents and masters, and with the completion of their instruction in their respective trades and employments. Twenty-one years would also give them more mental steadiness, and a firmness of constitution which is not fully matured at an earlier age.

2. That the burden and benefit may be equal, the quotas of the select corps should be apportioned by Congress to the several States, according to their population, by the same rule as that of representation in the House of Representatives of the United States. And such State being divided by its government into convenient districts, the quota of each district may be furnished by volunteers or by lot. Substitutes may be admitted, but these should always be *new men*, that is, of persons who have not before served in the select corps; otherwise, the total number of disciplined men in the country will be diminished.

3. The competent number of teachers being provided, the men may be assembled by companies to receive instruction. Although it would occasion a little more expense, yet I think it would be expedient to assemble twice in the year; two weeks in the spring, and two weeks in the autumn, instead of four weeks in immediate succession.

4. Provisions to be supplied in rations of meat and bread, as to the regular troops, but with adequate quantities of vegetables and other cheap articles to which the militia are accustomed when at home, to insure the preservation of their health. It is for this object, principally, that I would keep them assembled but two weeks at a time.

5. Tents and the requisite camp equipage, fuel and straw, to be provided, to enable them to live in the field and cook for themselves. But there would be economy in employing a cook to prepare in an adjacent house the provisions for a whole company.

All the minor details may be left to be directed by the Executive of the United States.

It will be understood that the proposition for the formation of select corps of militia, to three or four times the amount of the regular troops, is intended to constitute, in every State, a disciplined force, around which any portion of the common militia might be assembled and promptly disciplined, to repel any threatened invasions there or in any neighboring State. While the whole strength of the select corps, increased by the numbers previously disciplined therein, would discourage any attempts (should such be apprehended) of the standing army to conspire against the government or the liberties of their country.

But if no plan for select corps of militia should be adopted, then I would only organize the whole militia into companies, battalions, and regiments, and designate the regiments to form the respective brigades and divisions, and require them to meet, by *companies only*, one-half day in each year, for the inspection of their arms and accoutrements and to fire at mark. The brigadier and major generals to be appointed, *pro re nata*, by the executive of the States respectively. So great, already, is the population of the United States, all persons above the age of thirty-five years may be excused from serving in the militia.

I will here observe that, in my conversation a few years ago, with Governor Brooks he expressed his approbation of the suggested plan of forming some corps of select militia upon the principles now stated. I will further observe, that he entirely agreed with me in the opinion that eight or ten days' training of any portion of the militia called out and embodied to repel invasions, would give them, with the means here proposed, more knowledge of the discipline requisite in actual service, than by being drawn out, even four days in a year, from the ages of eighteen to forty-five years, as required by the laws of Massachusetts. I have not known any man more competent to judge correctly on this subject than Governor Brooks. In regular service he had the military experience of an able officer during the revolutionary war, and afterwards that of a general officer in the Massachusetts militia.

Some objection, perhaps, may be raised against the plan here proposed on account of the *expense*. But this will be small compared with the expense of time and money necessarily incurred by requiring the whole militia—nearly a million of men—to turn out four days in a year, during a period of about twenty years; the latter without any useful result; the former of real importance, by furnishing the country with an efficient militia.

The select corps will comprise horse and artillery as well as infantry; in what proportion I have not considered. But the horse, I presume, will be the smallest; and riflemen will compose a part of the infantry.

As to the length of time to be required for a tour of militia duty, in actual service, it would undoubtedly be desirable to extend it beyond three months; a considerable portion of which will be lost in marching to the place of rendezvous or scene of action, and home again. Could that term be doubled, it would be well; and efforts may be made to obtain it.

In the French revolutionary war married men, if I mistake not, were at one time exempt from the conscription; so young men married as fast as they could. In the United States no such stimulus to marry is necessary among those classes of citizens from which the militia will principally be enrolled. It appears to me, therefore, that no distinction between the married and unmarried will be admissible in either the common or select militia.

You now have, sir, what has occurred to me on the subject of the letter from the Secretary of War. The intimations in this letter, I hope, may aid in the formation of a useful militia system; or, at any rate, in getting rid of that which vexes and harasses without doing any essential good.

With great regard and esteem, I am, sir, your obedient servant,

T. PICKERING.

WILLIAM H. SUMNER, Esq.

SALEM, September 19, 1826.

Sir: In the beginning of the month I received from William H. Sumner, esq., adjutant general of Massachusetts, a letter enclosing your printed *circular* concerning the militia, and requesting a communication of my views on the subject, which he would transmit to you. A week since I sent him a long answer. While I am satisfied of the correctness of the principles it exhibits, on which a militia system of the United States should be formed, I can easily suppose objections may be offered, and I believe that the most eligible plan must be the result of a discussion among gentlemen of intelligence and military experience. And all I can expect from my communication is, that the ideas I offer for consideration may prove of some utility in forming a militia system adapted to the present and, for some length of time, to the future condition of our country.

I have said "that we have nothing to fear from any neighboring power." The British, if we again plunge into a war with that power, will not think of invading the United States from Canada or New Brunswick. Certainly not for the purpose of holding possession, which they know would be impracticable; and as certainly not for the purpose of devastation, knowing our ability to retaliate in a fourfold measure. It was on these considerations that, at the close of the late war, I would have reduced our peace establishment to five thousand men, a number then sufficient to garrison all our fortified seaports and all our posts on the Indian frontier, besides leaving a disposable force of a thousand men at the most healthy situation on the Mississippi, to be sent down to New Orleans on the shortest notice, to secure that great emporium of the western States. We did not need a single soldier on our whole northern frontier eastward of Detroit. I would, therefore, have dismantled Niagara and Sackett's Harbor, and every fortification on Lake Champlain. And as to the public vessels on this lake and Ontario, such as might be converted into vessels for trade, I would have sold for that use, and have set fire to all the rest, unless they would bring something, if sold, for the materials composing them. They were built with green timber, and would, undoubtedly, be in a short time entirely rotten. Entertaining these views of the subject, (which I remember communicating to Mr. Calhoun,) I have considered the means taken to preserve the public vessels, for the building of barracks, the repairing of fortifications, and the maintenance of a large body of troops for years, and since, of garrisons on that frontier, a mere waste of the public money. The numerous tribes of Indians in the neighborhood of Detroit would, obviously, render it expedient to station in that region, including Michilimackinac, a military force proportioned to the danger to be apprehended from them.

The British have been fortifying some important points in Canada. This was proper for them, because of the practicability of pouring in an overwhelming force from the United States, on a sudden declaration of war, before they could obtain defenders from Europe.

The commencement of the war of 1812 has given them warning.

The gorgeous trappings of some of the select corps of militia have seemed to me very improper. They occasion a great, and, at the same time, a useless expense. If ever called into actual service, it will doubtless be in conjunction with the regular troops. And will it not be expedient that their appearance should be the same? But certainly if there should be select corps of militia formed on the plan I have suggested, and at the public expense, their uniforms should be as simple as those of the regular troops. Officers of the army and select corps of militia who have adopted the Bonapartian hat and the tall French plumes would perhaps smile at, perhaps spurn, a merely useful covering for the head. A hat was originally designed to shelter the head, the eyes, and the neck. The best form of it which I ever saw for military men was that adopted by Colonel Spotswood, who commanded a Virginia regiment of continental troops in the campaign of 1777. It was low crowned, and the brim was about two and a half or three inches wide, and looped up *only* on the left side of the head, that it might not interfere with the shouldered musket; and to that side the cockade was fixed. It is of some consequence to have the eye secured from the dazzling rays of a burning sun. Should not the dress of officers be simple as that of the soldiers they command, while the materials are of finer fabric? The extreme vanity of the English naval hero, Lord Nelson, determined him, at the battle of Trafalgar, contrary to the advice of his friends on board, to display on his breast his splendid star of nobility, and it cost him his life.

Called on for my views of an advisable militia system, you will not, I trust, deem obtrusive these additional intimations.

I have the honor to be, &c.,

TIMOTHY PICKERING.

Hon. JAMES BARBOUR, *Secretary of War.*

OCTOBER 8, 1826.

DEAR SIR: You desired me to commit to writing the sentiments I expressed in a late conversation with you respecting the improvement of the militia of the United States.

One method has for many years appeared in my mind to be highly useful and not impracticable, in my view, although rejected as such by many old military friends, such as Generals Knox and Cobb, with others of the present day, who consider a soldier's life to be a distinct profession, and that a person qualified as such is either incapable or will not be inclined to pursue any other occupation. Perseverance in the chimeras of our own brain may be, perhaps, my only apology for persisting in this early opinion.

My idea is, that the present army of the United States may be rendered a military school for all the purposes of introducing military discipline among the citizens of the United States, so far as respects, at least, the duty of a common soldier. Instead of having men of the description and character we see enter as soldiers in the public service, I think that the hardy youth of our country, possessing good habits, might easily be induced to engage in that service, if the condition of a common soldier can be made consistent with reputation and morals, and some more money be added to their pay, equal to the common earnings of ordinary labor, with provision that the whole amount shall only be paid to them at the expiration of their service, with certificate of good behavior, saving, say one dollar per month, for tobacco money, &c.

I conceive that two years well employed would be ample time to instruct a private soldier in his proper duties, and, indeed, make him a competent sergeant in any military company. I am also of the opinion that the sum of \$10 per month would induce young men of common life and labor in almost all

the States to enter the public service, it being enjoined that no person should enter who did not bring evidence of good moral character and temperate habits; and that if the contrary be discovered during service, immediate expulsion should take place.

It being understood also that these soldiers, at all leisure time, should be improved in the knowledge of writing and ciphering, and that their whole time should be diligently employed, so as not to be able to contract bad habits or indulge in the vice of intemperate drinking. Any parent or friend, knowing the army to be so renovated, would not hesitate to recommend his son or connexion to enter that service. It is well known that the army is now merely a refuge for disorderly persons; but under those regulations the condition of a soldier would possess honor and profit. Each State might furnish its quota of men, and, if requested, their place to be supplied by others from a different State. One-half of the army to be changed after a proper period, so as to retain a portion of those best instructed to assist the new members. That it shall not be permitted to serve more than two years, and that no person under the age of twenty, or above five and twenty, shall be admitted to enter. Young men at the age of twenty usually have a knowledge of the mechanic arts in which they are engaged, and the sum of \$200, received at one time, would enable them to commence life, either as farmers or mechanics, with some advantage. The habits of labor and industry acquired in this new camp life will rather qualify them for future service in private life than injure their prospects. The knowledge which a soldier has once had, like that of skating and swimming, can never be wholly forgotten, and will soon be restored on approach to actual service. The discipline of the mind and manners fixed on these new soldiers will ever make them useful in private life, and will secure stability of character. I do not know that it will be necessary to oblige these soldiers to return to the several States from whence they came, because if they did return against their inclination, they would soon desert it. As a temptation, however, it might be provided that the final payment should be made in the State from whence they enlisted. The expense would undoubtedly be considerable, but, compared to the utility, may better be sustained than many others recognized by the public. These soldiers, when settled in their respective States, would naturally be elected officers in the militia, and would greatly improve it. I do not know that it will be requisite that, at the time of enlistment, they engage to serve in any future war, because they would not be useful if they did not voluntarily enlist in case of actual war. I suppose that the Constitution of the United States, as it allows the several States to choose militia officers in their own way, will not permit any efficient regulation to be made by Congress over the militia; but I think it extremely important that all which can be done by Congress to meet future actual war ought now to be done, when the country is free from those dreadful parties to which we are liable, and particularly on the approach of war, when we ought to be most united. Any act of Congress done at this period cannot be reproached as unconstitutional when put into operation.

I think it is apparent that no country has sufficient funds to justify the cupidity of men, or induce a voluntary engagement in any steady course of war for any reasonable period of time. Ten or twenty thousand men, on the first declaration of war, or the preparation for it, might, by reasonable bounty or pay, be induced to enlist for five years. Perhaps, in all the United States, fifty thousand might be thus had; but when that class of people have disappeared, the residue of the population will demand high pay and bounties, as they can hold the government to any price they may dictate. It is therefore indispensable that every government should have the power of forcing military service by drafting or otherwise, allowing reasonable pay, &c.; and in this country particularly, where the poorer class of people make the laws and the causes of war by keeping the government in their own hands, they surely ought not to be exempt from drafts any more than the rich man, who is probably not so able to perform military service. Let the subsistence be made by the rich, as reason and necessity suggest; but let the defence of the country be a personal duty, equal in its operation, as is the equality of votes; otherwise, you perceive that the richer class of the community are not only bound to subsist the troops, but to pay them any price they may be pleased to ask for their services. This government is emphatically a popular government, and all its civil and internal relations are administered by the people; so ought, in a higher degree, their relations with foreign countries, among which, and the first, is self-defence. The *Province* and subsequent *State* of Massachusetts, even before its constitution of 1780, exercised, from the principles of common law and the attributes of sovereignty, the power of drafting militia into the service, usually for six or twelve months; but it might be, and with more propriety, for several years, as it may take a long time even to *qualify* for service, after which the real service only can be done—such as really merits the expense incurred. The Constitution of the United States is not before me, so as critically to know its bearings on this subject, and I therefore do not know whether the United States can call on the militia by any immediate act of their own, but are bound, as I presume is the case, to call on the States or governors thereof for their quota. Any body of men thus furnished, and called soldiers, can be of no possible use without discipline; on the contrary, must be a vast expense and encumbrance. It is equally certain that they cannot be disciplined without officers; and although the States have a right to choose officers, does not this imply that those chosen as officers must be competent to do their duty? If not so, they are no more officers than the other members of the company. To choose one utterly incompetent might well be considered an act "*in fraudem legis*," and therefore void, in the same manner as if no officer had been chosen.

Cannot some means be contrived whereby the militia might be detached, say a small number, in conjunction with a greater number of the United States forces, so as to give the officer of the United States full command of such detachment; and as such, might he not call a court-martial; and, even if obliged to make the whole court consist of militia officers, that he might have the choice or the right of choosing the militia officers who may compose the court? In such manner an incompetent officer might be removed; and if a second one was chosen in his place, and declared in the same manner incompetent, might it not fairly be considered as an evasion and contempt of the law or Constitution, (which is in itself only a law?) In such an event, would it be a usurpation for Congress to consider that the law was thus evaded, and thereupon either give to the governor of the State the right of choosing officers, or to exercise the right of appointing officers? This must be an incident, and necessarily implied in the power given to Congress of calling for militia service, as in the nature of things it can be of no service without such power; and although the same is not expressed, a stronger implication from necessity arises than is often assigned for the assumption of implied power.

Can the United States, in their own right, call on the militia officers and companies, and make drafts therefrom in the first instance, or must they first apply to the governors of the States therefor; if so, which most necessary? and if the governors neglect or the troops disobey, cannot in such case the United States exercise imperatively the power of drafting, and will not such power be implied from necessity, as without it the United States can have no control over the militia for public defence? My idea is that we should

not wait for the time of necessity and of discord, but that the United States should now, in calm peace, make an act declaratory of their rights, and adopt the means to enforce them in case the States or the people shall neglect to give to the United States the force and power of self-defence by means of the militia which is contemplated by the Constitution.

Might it not be as well, as militia now train twice a year, to enact that one-half should exercise four days in the year, and be assembled in regiment, and that to distinguish officers of militia, some medal may be given by the President; that out of each company four of the best sharpshooters (all, however, to be of a certain degree of goodness) be selected, and that all being assembled, shall try their skill at repeated or frequent occasions, and that a rifle with a medal be given to the best in each regiment. Our *populated country* is losing its forests, and Americans, like Europeans, must learn the art of sharpshooting. Your ideas that cadets should instruct the militia and its officers seem very proper, and in every district calculated for several regiments, exercising, however, at different times, some cheap quarters might be made for berths and exercise in bad weather. This subject, however, is so much better known and understood by yourself that I forbear to make any further remarks, except this one: that it be considered whether the militia may not be excused from learning all the evolutions practiced by troops of the United States, and limited to five or ten of the essential movements; and whether, if any soldier ordered on duty for four days shall appear to be thoroughly acquainted with that duty, he might not be excused after one day, and those ignorant only be retained the whole four days. This indulgence might encourage previous instruction and qualification on the part of the soldier.

Excuse the length of this communication, from your friend and servant,

RUFUS G. AMORY.

BRINLEY PLACE, June 28, 1823.

DEAR GENERAL: I have read your very able and interesting letter to the venerable Adams, on the militia, with profound attention and great satisfaction. All the important principles are so obvious and of such general approbation among the oldest and best informed statesmen of our country, that it is only necessary to have them presented to the public to make them equally appreciated by all classes of society. I perfectly agree with you in the correctness of the facts you have adduced and the results drawn from them, so far as respects the system generally. To make it efficient only two things are wanting: first, there must be no exemptions for any cause other than moral imbecility, as lunacy and idiotism—for all physical defects should only excuse the person from personal service by paying a fixed equivalent; second, those who did not come under either of the above causes should personally do duty, and, as a compulsory measure, such heavy fines should be imposed for neglect, the few would be *able* and the *richest unwilling* to pay them, and thus the ranks would be filled with citizens from all classes in society. This would give an impetus to the militia greater than any other measure that has been devised; besides, it is but just and right that all should be obliged to be prepared to defend the republic, which is founded for the benefit of all. By the present low fines the rich are enabled to evade appearing on parade, and those who are not so affluent feel debased and mortified in consequence of this apparent favor to the few. Besides, the militia is thus, by the long list of exemptions, deprived of the best educated and best qualified for officers.

The science of war is one of no ordinary character, and such is its present advanced state that armies are efficient in proportion to the intelligence of the officers. Mere *physical* strength and *bravery* are not sufficient to meet *science* and *moral firmness*. We have seen the armies of Alexander, Cæsar, and Bonaparte perform deeds that have filled the universe with wonder and admiration. What was the cause of their repeated and triumphant victories? Military science, well-educated officers, and well-disciplined troops. Our militia can be made equal to the corps of Parmenio and Clytus, under the Macedonian conqueror, the "*favorite legion*" of Rome's most illustrious chieftain, or the "*invincibles*" of Napoleon; but to effect this it must be most honorable to hold commissions; all the men of genius and learning must become component parts of each division; it must be an object worthy of emulation to reach even a subordinate station; and it should be, for what is more glorious than to command or fight with freemen, "*pro aris et focis!*" Our government is founded on the everlasting foundations of civil liberty; it is the *people who unite* for the protection of life, property, and freedom, and all, therefore, are bound to be ever prepared to meet the shock of battle.

Until efficient measures are adopted to bring into the field every citizen between the ages of eighteen and forty-five, it is impossible to render the militia a powerful and honorable arm for offensive or defensive war. Here I would arraign public opinion; on this point I place all the hopes of the patriot, and if such a system is not adopted I have no faith in the militia in times of danger and of conflict. One-half of the citizens are not found on the muster-field, and that, too, the most important to bring out; for, besides the other advantages which have been named, there is the powerful effect of example set by those who have *much at risk* and who are most deeply interested in the honor, glory, and prosperity of their country.

Very respectfully, your most obedient servant,

H. A. S. DEARBORN.

General WM. H. SUMNER, *Adjutant and Quartermaster General.*

BRISTOL, R. I., September 19, 1826.

SIR: I have delayed communicating the information requested in the hope that I might be able to impart such information as might be of use to you in the duties of the commission you have accepted; but, from the circumstances of my present avocations, being unable to do it, I will impart such information as I may possess. The rapidity with which exemptions are made from military duty by the mere acceptance and holding of a commission for a year or so, is an evil of the first magnitude attendant on the present militia system of this State. The motives which prompt to the acceptance of a commission with most are for the sole purpose of exemption from duty after a year or two of service. Some accept from motives of ostentation and a desire of military rank and title; but titles are so numerous and of so little

value that this number is at present small. A few may accept a commission from patriotic motives, but such are rare, as few have hope of improving a militia that is the object of derision and contempt with the very individuals who compose it. That the object in accepting a commission is exemption from duty, and that this object is effected, is evident from the rapidity with which exemptions are made. In the last twelve years eight or ten (I cannot at present ascertain the exact number) different individuals have held the office of colonel of the regiment composed of the militia of this county. This regiment consists of six companies, containing in all about 300 men, and is thus officered: one colonel, one lieutenant colonel, one major, six captains, seven lieutenants, and six ensigns, twenty-two in the whole, and I think it will not be far from the truth to say that all of these offices have been vacated with nearly the same rapidity that the office of colonel has.

I can at this present moment recollect seven individuals who have in the last ten years held the office of general of this brigade; and as a proof of the indifference of the people towards the militia, I will state that in the year 1825 three individuals were appointed to the office of general of brigade before one could be found to accept it, and even the third would not have accepted it could the legislature have convened early enough to appoint another in order to attend the fall trainings. The governor appoints four aids, major general two, and four brigadier generals one each, in all ten; these are mostly young men and are changed each year, and are thus exempted from further duty. In proof of this I will merely state that in 1823 General Collins was appointed to the command of this brigade; he appointed a Mr. Northern as his aid; in 1824 there was no general; thus Mr. Northern was exempted; in 1825 General Diman took the command of the brigade, and appointed a Mr. West as his aid; in 1826 General Muenscher succeeded General Diman, and appointed Mr. Richman as his aid; General Muenscher will resign at the expiration of the year, and his successor appoint some other aid; and thus three individuals, the oldest not more than twenty-six years of age, are exempted from further duty merely by holding a commission a single year. To effect the object of exemption the officers seize every pretext to resign. Some resign on being promoted to a higher office. Some two or three years since the lieutenant of a company attached to this regiment was promoted to the command of the company; he refused to accept it, on the ground of his being promoted without his knowledge or consent, saying that he was willing to serve out his time as lieutenant, (this, however, he knew he could not, as the vacancy occasioned by his promotion was already filled;) that they had given his office to another without breaking him, and therefore they could not reduce him to the ranks. This refusal was not from any preference of the lieutenantcy to the captaincy, but as a mere excuse from further duty.

Exemption is the ruling motive, and to effect this is the study of all. Many officers serve but a year or two, not more than half serve five, and the instances of any individual holding a commission more than five years are rare. General Muenscher of this brigade is one of those few who have served beyond five years. He accepted a captain's commission in 1818, and has held a commission ever since. What makes these exemptions more to be deprecated is that in most cases they are young men.

The indifference that generally prevails in this State towards the militia proceeds from the appointment of all commissioned officers, from major general down to lieutenants, being in the legislative body, and the appointment of all warrant officers, down even to corporals, being the gift of the generals, colonels, and captains, and from the exclusive privileges granted to certain chartered companies. The depriving the militia of the choice of their own officers removes all incentive to military excellence, and begets a general indifference to the whole system. Each individual subject to military duty knows that merit has nought to do with any appointment to a military office, as the appointment to a military office depends on the nomination, by some member of the legislature, of some one whom relationship or interest may prompt to it.

The legislature are necessarily ignorant of the merits of the individual to be appointed and of the feelings and wishes of the men to be commanded, and it is an even chance that the appointment will be an unpopular one.

Had I time I could relate some ludicrous events that have occurred in consequence of our unpopular appointments. In time of war, when the militia are wanted, this must be a serious injury in a country like ours, where so much freedom is exercised, as the militia will be of no service if they have not officers of their own choice—officers in whom they can confide.

The exclusive privileges granted certain companies (independent companies as they are called, in contradistinction to those attached to the line, which are called militia) are memorable instances of the folly and want of foresight in former legislatures. The acts of incorporation have placed these companies beyond the control of the legislature, and the act of Congress of 1792 secured to them these privileges. The artillery company of this town, by the act of their incorporation, are placed beyond all control, excepting that of their own officers and the governor and lieutenant governor; and the former cannot remove them from the town without their consent, nor the latter from the State unless they lead them in person. The artillery company in Newport, if my recollection serves me aright, are beyond the control of the governor, and cannot be removed from the town without their consent. There are nine of these companies in the State. An independent company in Warren has not done any duty, I believe, for some years; they merely meet once a year and elect their officers, in order that they need not forfeit their charter.

The exclusive privileges granted these companies, are of no benefit in making them better soldiers, as they are excelled by chartered companies, which possess but the choice of their own members and officers. The artillery company in this town but rarely turns out even thirty privates, and yet their officers are: one captain, with the brevet rank of lieutenant colonel, two lieutenants, with the brevet rank of major, and one ensign, with the rank of captain. This little company of thirty or forty men gives the titles of colonels, majors, &c. In the last ten years fourteen individuals have held commissions in this company; thus ten have been exempted, one each year, and these mostly young men.

In this town of 3,000 inhabitants forty are exempted as engine men. My observations have (from my absence for most part of the last eight years from the State) been confined to this section of the State, but I believe what I have said of one part may be applied to the whole. I would except some few uniformed companies in Providence, Bristol, &c., which are surpassed by none in the country. From my infancy upward, like the rest of my brethren of this State, I have looked on the militia system as a system of defects, and never thought it one to which remedies might be applied. My reflections on the subject have been but few, as my attention was but recently drawn towards the subject by a perusal of your excellent letter to John Adams. It would, therefore, be presumption in me to attempt to point out any remedies to be applied for its correction. From my own experience, I can say that a general circulation of your letter would tend much to remove the indifference or prejudice that may now prevail towards the

militia, and awaken men to a knowledge of the vast importance of a well organized and disciplined militia to a country like ours. If your letter were printed in a cheaper form, so as to be within the means of every one, and individuals in the different States would give it circulation, I think much would be done by the good sense of the people themselves for the improvement of the system. As an act of Congress secures exclusive privileges to certain companies, an act of Congress must be applied to deprive them of the same. I fear I have been tediously prolix, and will therefore conclude by assuring you that any information as to this State that I may be able to give will at all times be given with pleasure.

With assurances of respect, I remain yours, &c.,

N. HOWLAND.

General W. H. SUMNER.

MARBLEHEAD, October 10, 1826.

SIR: Through your politeness I received a copy of the circular from the honorable Secretary of War, relating to the militia; and I think I can perceive, from the very questions he has proposed, the importance, in a national point of view, of the establishment of a department at the seat of the federal government that should be confined exclusively to the great interest of the militia. If there had been such a department, more than half of the questions proposed by the honorable Secretary might have been spared, as the officer at the head of such department could at any time answer them by turning to the files in his office. And I never expect to see the *best* nor a uniform system adopted until the government are satisfied that an adjutant general's department at Washington, under the general government, is indispensable. And I can conceive of no objection to such an establishment except that of expense; but surely, in a rich and widely-extending country, this is unworthy of being named; especially as it is the policy of our government to trust mainly to the militia to enforce the laws, suppress rebellions, and repel invasions. But for my views on this subject I refer you to the communication I had the honor to address you some months since.

Perceiving by the papers that you are appointed to be of the board about to be convened at Washington, I take the liberty of suggesting through you to the honorable Secretary of the War Department the few remarks that have occurred to me on reading his circular.

As you are of the board, I shall purposely omit any notice of the 1st, 2d, 6th, 14th, 17th, 18th, and 19th questions, as they involve but little except matters of fact, which you have the means of answering at once.

In answer to the third question, there can be no doubt that the volunteers are more efficient than the regular militia; and for the obvious reason that the efficiency of every kind of troops depends in a great measure on their discipline. And in this particular the volunteers are vastly superior to other militia. But it will not follow from this that the latter may be dispensed with. It is *because* we have a regular militia the volunteer corps are so efficient. Indeed they are reciprocally advantageous to each other. Were there no regular militia, it is questionable whether you would have any considerable number of volunteers, and without these the regular militia would be sadly deficient.

The fact that we have so considerable a number of volunteer companies is an answer in the affirmative to the fourth question. One reason why young men prefer entering volunteer corps doubtless is, that considerations of ambition and self-respect enter into the question; for it is considered more reputable to perform military duty in these than in other corps. But then this would fail of its present effect if it were not made imperative by law to do duty in one or the other of these corps.

It is unquestionably true, as suggested by the fifth question, that in one point of light the establishment of the volunteer operates injuriously on the regular militia, because it brings into its ranks many of the most active and ambitious of our young men; but then, for the reasons given under the *third* question, it is not injurious on the whole.

*Seventh question.* Volunteer companies now have the power of making by-laws that are not inconsistent with the laws regulating the militia; and most of these companies adopt certain rules by which they regulate their internal police; and it is advantageous that they should have the right so to do. But I cannot think that it would be well to make any laws or regulations that should have effect on the volunteer and not on the regular militia. In Massachusetts most of our volunteer corps are annexed to and constitute a part of larger corps, which embrace both volunteer and regular militia. They act together when on duty, and it would be impracticable and inexpedient to govern them other than by general laws that are alike applicable to both. Give to volunteer corps the power of determining their own government, and they would run into every extravagance that whim or caprice might suggest, and would produce a state of disorder that would derange the whole militia system. I would except in these remarks any special provision that might be made as an encouragement for uniforming and the like.

In answer to the *eighth* question, whether a classification of the militia would be an improvement, I think I may venture to say that no classification should be made *involving more active service in one individual than another who is liable to military duty.* In Massachusetts it is left at the election of those between the ages of thirty-five and forty either to perform active duty or pay a certain sum annually, and this to be appropriated to uniforming the militia. But the equity of this provision is somewhat questionable. Active duty is required of all of a certain age from the necessity of the case, and when it becomes inexpedient to require this duty nothing more should be required; for if a tax is wanted for uniforming the militia, or for other purposes, it should be levied on the property and not on the age of the citizen.

Military duty is a tax on individuals, and public policy requires that this should be exacted no longer than is necessary for the public security, nor of a greater number of individuals than is necessary to this end. Such is the population of this country, and such is the general knowledge of military service, that it cannot be necessary, and therefore not expedient, to hold any class of society to any kind of military duty or organization, when, from age or any other circumstance, it is inexpedient to hold them to active service.

The great objects of the general and State governments contemplated by the militia will be effectually realized by holding every white male citizen (special cases excepted) to the obligations of active duty, to commence at the age when muscular strength will admit, and to continue until about the age of thirty-five. This will embrace in numbers a sufficiency for all the purposes required. (I mean by active duty mustering several times in a year, pursuant to general laws; for aside from the obligations to *parade, drill,*

&c., &c., I am unable to conceive of an establishment, that is worthy of the name of militia. But on this particular I beg leave to refer you to a former communication.) It has been found in New England, and the same is probably true of the States, that by compelling all to perform military duty at a certain period of life on great emergencies, the whole male population who are able of body are brought to act with the regular militia as volunteers, without confusion or derangement, and at a short notice, and this, too, without any new or additional organization.

I think, therefore, there can be no substantial reason for a classification, nor for making any distinction among those whom it is proper to enroll. There is not such a disparity of age between those from eighteen to thirty-five as to forbid their associating and acting together, nor are the oldest of these unfitted by age for any and every duty of the camp. And besides these considerations, a mere enrolment, or organization on paper, is totally useless. It cannot in any supposable case be of the least utility. But whatever classification may be thought proper, that founded on the single or married state is the most exceptionable, and the reasons for it are so slight and few that I do not fear that it will ever be adopted.

To the *eleventh* question I answer in the negative. The militia can be considered as efficient only when it is organized as a whole. That surely cannot be considered an improvement which should derange its symmetry and render it less perfect than it now is. And if in time of peace it be necessary to issue commissions only to inferior grades, it must be because no other grade of officers would be wanted in time of war. By issuing commissions only to inferior grades of officers, the most powerful motive would be wanting with these very officers for qualifying them for their places. No inconsiderable number of officers accept subordinate posts, and incur a great expense of time and money, with the expectation of rising to higher and more honorable places in the service. Could it be expected that a captain, for instance, would make those exertions that are necessary to qualify him for his office, and without which his company might as well be disbanded, if this is to be the extent of his honorable ambition? Nor is it easy to conceive of a solitary reason why the appointment of colonels, brigadier generals, and major generals, should have an unfavorable bearing on the militia; but many reasons may be given to the contrary. It is believed that without these officers it would be difficult, if not utterly impracticable, maintaining an organization of the militia that would be better than none.

If by the *twelfth* question detachments for actual service in time of war is contemplated, I am inclined to the opinion, from observation during the late war, that three months is too short a term for any valuable purpose. There can be no objection to six months, or even a longer term.

I will remark on the *fifteenth* and *sixteenth* questions in connexion. Without officers it is impossible to have a militia, or any organization of it; and without public parades, musters, &c., it is impossible to obtain officers, for very few men can be found who will consent to receive a commission unless they can have the privilege of commanding those over whom they are placed. Several musters, therefore, during the year are indispensable. But they should not be more frequent than are necessary to this end. The instruction of officers is radically important. On them depends almost entirely both the regular organization and the efficiency of the militia. Any and every kind of troops will appear respectable where their officers have been well instructed. But officers can never be well instructed in practical duties without the opportunity of commanding. And besides, without this there would be no motive sufficiently strong to induce those attentions and that ambition without which they can never be well qualified for the places they may be appointed to fill.

I have the honor to be, sir, very respectfully, your obedient servant,

JAMES APPLETON.

General W. H. SUMNER.

The forces of the United States consist of three distinct bodies—the army, the navy, and the militia. These should be so organized and arranged as to co-operate harmoniously and effectually, in all times of emergency, for the promotion of the public security. To this end, the relation in which each stands to the others should be distinctly marked, and the rank of the several corps, and authority of the officers in the various combinations which may exist, accurately defined. This would be productive of that good feeling and concert among them which is essential to give the greatest effect to the strength exerted. It would also tend to the introduction of that just subordination among the officers, to the want of which some of the principal disasters to the American arms during the last war may be fairly attributed. The recollection of these points out the necessity of providing against their recurrence, and, united with other considerations, leads to an inquiry into the mode by which the national strength can in future be exerted so as to produce a moral certainty of its accomplishing the designs of the government.

It is not in my view in the pursuit of this inquiry, nor do I conceive it to be necessary to the attainment of its end, to suggest any alterations in the system of government already adopted for the regulation of the army and navy. Since their establishment, the melioration of both these arms of defence has been constant, and they may now be considered to be in as good a condition as the resources of the country, and the sentiments of the people respecting them, will permit. Yet their connexion with the militia, which the just jealousy of a republican government will teach it to rely upon as the principal means of defence, authorizes the remark that it is but a few years since public opinion upon the utility of maintaining either an army or a navy in a time of peace was greatly divided. There is now a perfect union of sentiment in their favor. If, from a demonstration of their utility in war, the necessity of improving their condition in a time of peace was made apparent, ought we not to inquire whether our experience does not point out the necessity of making such improvements in the condition of the militia as will enable the public to calculate with more certainty upon the result of its efforts? While it is admitted that some of the brightest gems have been set in the crown of our national glory by the militia, and that when its forces were well directed, both in the war of the revolution and the national war, its achievements were the wonder of nations, yet it must be confessed, and the attempt to conceal it would be the reverse of patriotism, that often, too often, have its defeats subjected the country to much loss, and the people to severe calamities. If this is attributable to the want of intelligence and military skill among the officers, of discipline among the privates, or has arisen from the inadequacy of the provisions which are made for their regulation, government, and instruction, a remedy should be sought for and applied.

The militia of the United States, as a body, is probably superior to that of other powers. But that it is not what the theory of the institution intended, nor what the important reliance placed upon it requires

it should be, nor what the general intelligence of the people of which it is composed ought to make it, is equally true. The militia of some countries is composed of ignorant peasants, who, from their circumscribed limits of association, seldom understand the application of any utensil but to the objects of their daily industry; or of uneducated artisans, who are learnt one trade, or a branch of it only, and who, consequently, are ignorant of the design of all instruments but those which belong to their own art. Having no knowledge of the use of fire-arms, they probably would have more apprehension from them in their own hands than in their enemies'. They have no idea of the order of military organization, nor of the safety derived from that confidence in others which all feel who know the mutual dependence of an army. Such are never brought into service as a militia, in the American sense of the term, to act of themselves, and by themselves; to rally, fight, disperse, and form again, to harass and annoy the invading foe. They have not the capacity and pre-requisite information to enable them to do it. Thousands of such would make no militia; they would be a mere throng, acting without concert or combination, and doing more injury to them they were called to protect than to those they are assembled to oppose. These make good recruits for an army, or, what is the same thing in discipline, for the incorporated militia, as they are brought up in those habits of subserviency which make them ready proficient in acquiring the whole duty of a soldier, as comprised in the single word obedience. It is true, they may besides learn to suffer, but their officers will teach them how to act. Individual intelligence and sagacity is of comparatively but little importance to a soldier in the regular forces. In an army, the extent of the departments of science and skill are proportionate to its strength and objects. Every department has its own organization, and is responsible for its own acts. The whole body is dependent on each, and the failure of one produces the overthrow of the rest. The army has its engineers and pontoniers, its pioneers and artificers, its armorers and gunners—all assigned to their distinct duties; everything in it is conducted according to methodical arrangement. The soldier exercises no volition, and skill is not required of him. Not so the militiaman. In America, he belongs to a class of society which, if it ever engages in war, does it for the defence of its possessions; and not to that which resorts to its occupations for its daily sustenance. Recruits for the regular service are seldom procured among the best citizens of the community. The militia is what is left after society is purified by army enlistments. In the militiaman knowledge is presupposed. In him quickness of apprehension, sagacity in discovery, enterprise in undertaking, cunning in means, and perseverance in execution, are common qualities. The degree of information acquired at schools, and the habits of instruction and practice in the mechanical arts, have extended the inquiries of our youth to many objects which in Europe would be confined to one. Here the apprentice is not taught to do only one thing; his instruction is not confined to one trade, the use of one instrument, the making of a part of a machine, or the combining of those which are made by others. Hitherto, the cheapness of land, and the lightness of the taxes, as a principal cause, has prevented that advancement in the arts which confines the attention of men to a single object; consequently not only one, but the whole of the parts of a common weapon, utensil, or machine, are made and put together by one person; and he also manufactures others equally well; and after they are completed, is perhaps as skilful in their use as the mechanic or handicraftsman for whom they were designed. The fertility of the soil has, at the same time, made such a confluence of unprovided population in the new settlements that wants are accumulated beyond means. Hence, hardships are sustained, risks are encountered, and fatigues endured, which give strength, activity, and fortitude; invention is stimulated, and means are adopted which nothing but the wit of necessity could devise. The militiaman thus learns to do everything for himself; and in doing it, so far from discovering any mortification at the necessity which requires it, draws pride and satisfaction in feeling that degree of independence which arises from the discovery of the ability he possesses so far to provide everything for himself as not to depend for anything on others. The sagacity which our yeomanry, who compose the great body of the militia, are thus obliged continually to exercise in the discovery of expedients, and the necessity the mechanics are under of making and combining all the parts of a machine, and putting it in motion, naturally puts the mind of the agent upon the inquiry how the same result can be accomplished by fewer processes. In this, such ability has been discovered as has attained for the Americans great celebrity for their inventive powers. It is by the stretch of this faculty, united with the habit of self-dependence, that the militiaman is enabled to provide substitutes for everything which is wanting and necessary. He thus has the means of moving and acting when others would suffer or be at rest. Understanding the application of the common mechanic arts to the useful purposes of life, he is able to make roads and bridges without pioneers or engineers. He will make boats and rafts without pontoniers. He will repair his own fire-arms without the aid of an armorer, and a gun-carriage without a wheelwright. He understands all the means of transportation and supply. In the forest, where he cannot show his skill in foraging, he will hunt for his food, or obtain it by fishing in the streams. He understands the management of a boat, either by rowing or sailing, and for the want of one, can swim. He can ride and manage a horse, and repair his harness and equipage. He uses the axe, the saw, and the hammer with as much ease as the mattock and spade; and the lever and the screw are in daily use. The weapons of war he is as familiar with as the utensils of husbandry. Muskets and rifles are in every house, and he is practiced in their use, either as a hunter in the forest, in his sports, or militia exercises. The general diffusion of education has given him even higher advantages. He can read, write, and compute, and in everything he undertakes, feels that pride of exertion which nothing but the fullest confidence in the importance of his own services could give.

To the general and local knowledge, mental sagacity, and physical strength which the people possess, the moral character must be added as more important than either. The effect of liberal systems of instruction, and that freedom of action which freedom of thought produces, has inspired the American people with a moral feeling and conduct which, added to their other distinguishing qualities, enables them to furnish a better material for an efficient militia than is elsewhere possessed. Their habits of self-restraint teach them not to want what they have it not in their own power to procure. But though a patient, they are a spirited and enterprising people, and will incur any risk for a desirable object. They are a free people, who justly think their own condition better than that of any other; a proud people, "alive to honor, and sensitive to disgrace;" a considerate people, who act more from judgment than from impulse; an educated people, who understand how much they have at stake; an intelligent people, who know how to prize it; a skilful people, who can devise the means of their own security; and a brave and patriotic people, who will hazard and suffer everything in support of it. Such a people, content with the victory, without aiming at the glory of it, if their energies are well directed, will constitute a most harassing power to an enemy on his approach, and a destructive and appalling one to him on his retreat;

they are never at rest themselves, nor will they often permit their enemy to enjoy the quiet of a camp. It is true many of these qualities are often displayed by the soldiers and inhabitants of other countries, though the combination of them, by the force of education and habit here known, is believed to be rare. In the American militia patriotic and personal motives are united; it therefore possesses not only the entire confidence of the government in its moral character, but the objects of its employment are interesting to the persons engaged. Our republican institutions are mainly dependent upon it for their preservation and permanency. The sentiments, feelings, and prejudices of the nation are strong in its favor, and in many places all the stimulants of ambition and the incitements of pride are afforded to its officers and soldiers; and all the objects which are dear to freemen insure their reward. Nevertheless, it is a lamentable truth that none but abortive attempts have been made for its better adaptation to the purposes either of its original design, or its application to those multiplied uses which have arisen from the vast extension of the national domain, constant addition to the number of States in the Union, and the increasing elevation of this empire in the scale of nations. The value of the institution is admitted, and its defects acknowledged; but as no remedy is provided, its efforts in too great a degree continue to be left to chance. The best of our citizens are subjected to the exposure of their lives; widows and children mourn the needless loss of their husbands and parents; misery and distress are brought upon families by the destruction of the lives of those who are engaged; all feel the consequences of its disasters; and yet, from the comparative inferiority of the militia, how few consider the country disgraced by its overthrow in the conflicts in which it has been engaged!

How long shall this state of things be permitted to continue? Our government and laws, generally speaking, keep pace with the advance of knowledge and the progress of society; but the militia, this vast engine of power, has remained unimproved ever since the first law was passed, shortly after the adoption of the Constitution, providing for its simple organization.

Reflection teaches that, while the national government has so long been inactive upon this subject, the causes of superiority of the militia in some States over others are principally to be traced to the encouragement which their several legislatures, by a wise use of their reserved constitutional powers and those which are granted to them by Congress, have afforded it. The capacity for improvement which is thus exhibited, the limited authority of the State governments, and the long-continued neglect by several of them of the means they possess for advancing the attainments of the militia, show the necessity of the exercise of all the powers with which the national government is invested to produce that equality in its condition among the several States which its national importance demands.

The subject, as a national one, is no doubt attended with great constitutional and practical embarrassments. These do not, however, lessen its national importance, but, on the contrary, show the necessity of great deliberation in its investigation. In the progress of our inquiries, if we find that the local habits and interests of the different sections of the country are a principal source of difficulty; if we find, among the slaveholding States, the preservation of the public security depends upon the embodying of almost the whole efficient white population, while in others the absence of this cause would render such a measure burdensome; if we find that in such of the old States as have a dense population the frequent assembling of the train-bands for drill and instruction might be easily accomplished, and in the new, where the inhabitants are sparse, these frequent trainings would be oppressive, we may possibly discover some mode of remedying these difficulties, or learn to content ourselves with the reflection that on the Atlantic frontier, where the country is cleared and the troops will be called to act in large bodies, a higher degree of attainment in military science and a better knowledge of tactics will be necessary for protection against invasion than in the less cultivated parts, where the defiles are numerous and the country itself furnishes means for the successful operation of those who have a knowledge of its passes, and have gained, by their daily use of the rifle, the best qualification of a militia force. Our investigations may lead us to the discovery of a mode of keeping up the organization, the officering, the arming, and returns of the militia, giving to all, according to the kind of service which will probably be required of them, such opportunities of association and exercise as are indispensable to excite the ambition of the officers and to stimulate the pride of the soldiers, without making the duty burdensome. Even on this point we may come to the conclusion that although at the formation of the Constitution, when containing about three millions of white inhabitants, it was necessary, for the protection of the country, to provide for the enrolment of all able-bodied white male persons between eighteen and forty-five years of age, embracing almost the whole of its efficient white population, the vast increase of our numerical strength, the general distribution of arms, and the accession of other means of defence, through the establishment of an army and navy and of a regular system of fortifications, will now permit us to reduce the extent of the militia burdens by including the train-bands within less comprehensive numbers. At least, having ascertained the true causes of the embarrassments, and the obstacles to improvement which local habits and necessities now present, it is apprehended the difficulty of forming general laws suited to the situation and condition of the people in the different sections of the Union, or to the wants of the country itself, will be diminished. The grand object is to bring the militia into that condition which is best suited to the preservation of individual and State rights at all times, and to the increase of the national security, when it shall be called into the national service. Yet who, after the many projects which have been brought forward without success, can tell how this is to be accomplished? Experience alone must direct us. That of thirty years has already shown the great embarrassments with which the subject is attended. No time should therefore be lost in commencing its investigation, for it cannot be disguised that, with the increase of the causes demanding improvement in the condition of the militia, the difficulties of accomplishing it accumulate.

How, then, shall this investigation be commenced? or rather, what is the most expedient mode for the government to adopt to obtain the facts needed to enable it to act with that degree of intelligence on this which it discovers on other subjects of national concern? It is answered that reflection on the limited constitutional power over the militia possessed by the States, and the consequent extent of the authority of Congress respecting it, leave no doubt that the reform must be commenced by the national government. Let that government, then, inquire whether it possesses the beneficial sources of information on this that it does on other concerns of national regard, and whether the several States, even, are not furnished with superior advantages to it on this. In doing so, if it shall discover that it is rather to the State than to the United States laws that the diversity in the character of the militia of the several parts of the country is to be attributed, and that to the proper organization of an adjutant general's department in some of them the superiority of their militia is in a great degree to be attributed, it will naturally

extend the inquiry, and ask whether the adoption of the same means would not be attended with advantages to itself equal to those which the States alone now possess?

In the States referred to the adjutant general is the head of the commander-in-chief's staff; through him all his orders are communicated, by him all his detailed information is collected; to him appeals are constantly made by the officers for a construction of the laws and orders, for information respecting the exercise of their powers, and for opinions upon questions of rank, authority, and duty. By these officers all blank forms are prepared and instructions for making them given. By them registers of the officers in commission and rosters of those on duty are kept. The orders for holding general courts-martial, courts of inquiry, and boards of officers are prepared by them, and their proceedings examined and submitted to the commander-in-chief for his approval. All commissions are made out, resignations received, and, when accepted, regular discharges of officers from their authority are issued by them. They have regular files of all returns, petitions, memorials, remonstrances, and papers received at their offices, and record all their orders, letters, and opinions. They collect the information necessary to enable the government to act understandingly on subjects connected with the organization of the militia and its arrangement into corps. They report the officers for neglect of duty when their returns are not punctually and accurately made; condense and make abstracts of these, and annually submit them to the commander-in-chief, by whom they are usually communicated to the legislature. Several of the States have derived the benefit of this arrangement for many years, while in others the perceptible improvement in the condition of their militia, from its more recent adoption, confirms its utility. In fact, omitting numerous other details, so important are the duties of these officers, where their departments are properly regulated, it appears impossible that a proper organization, even of the militia, could be maintained without them, much less that its concerns should be managed with order, harmony, and correctness.

Experience having thus produced the conviction that a department, under the direction of a responsible officer, is essential for the regulation of the militia, the inquiry becomes pertinent, why should not the national government adopt the means which, under its authority, the several States enjoy for the management of this important interest, and provide for the appointment of an officer whose whole duty it shall be to attend to militia concerns, and thus open to itself a channel of information similar to that which it possesses in every other branch of its authority?

Though the utility of the proposed measure is almost sufficiently apparent without further illustration, yet its advantages will be more conspicuous when the power and duties of the officer shall be pointed out. But before this is attempted, lest any one should suppose that there might be a constitutional impediment to the arrangement arising from the power of the States to provide for the appointment of all militia officers, it becomes necessary to make the previous remark, that the officer for whose appointment legal provision is proposed would be an officer of the United States and not a militia officer. If it were not so, the constitutional obstacle would be paramount. The United States adjutant general of the militia would be provided for the bureau, and, as he would of course have no command, there would be no more constitutional impediment to the congressional provision that all the returns of the militia of the several States should be made to the President through the adjutant general of the militia, and that he should prescribe the forms of those returns, than there is that they should be made through the Secretary of War, and that he should perform that duty, as is the case by the existing provision. Now, for the want of an officer who by law is obliged distinctly to attend to militia concerns, all the duty of the Secretary relating to them is performed *ex gratia* by the Adjutant General of the army. Thus the returning officers of the militia of the several States make their returns to and receive their forms from an officer of the general staff of the army inferior to them in rank, and to the constitutional authority and control of whose principal they are not subject.

The jealousy of concentrated power which existed at the adoption of the Constitution caused the States, when they granted to the federal government the unlimited power to maintain armies, build navies, and raise revenues, to reserve to themselves the militia force, except when its use defensively might be required for the preservation of the national domain and peace against foreign foes and rebellious subjects. This power must then be considered as the grand physical characteristic of State sovereignty. Without it the pillars of the Union would be too slender to support the national fabric. Those, therefore, who have a just estimate of the importance of the State sovereignties for upholding the national structure will be careful to avoid the amalgamation of the national and State forces, even so far as their holding correspondence with and making their returns through the same member of the general staff has a tendency to produce it.

Viewed in this light alone the suggestion must strike every one as an improvement in the present practice. For as the army and militia are different bodies, the one exclusively a national, and the other, (except in actual service, under the command of the President,) definitely a State force, their distinctive character should forever be preserved. Besides, as the habits and character of the army and militia are different the instructions must be different, and the forms of returns different, according to the organization and habits of duty in each; the expediency, even if no other consideration presented, is illustrated of having a separate officer assigned to each branch of service.

Notwithstanding the extent of this great State reservation, so long as the body politic preserves its moral strength the most important and, indeed, almost the only cases in which the militia will be called into service will be under the federal power. Considering it, then, as a muscle in the national arm, the militia should be so arranged as always to co-operate with the army. The United States adjutant general of the militia should consequently be attached to the War Department, so that the orders of the President to these national forces should pass to their destination through the same primary organ. The rank of the adjutants general of the several States should be fixed by Congress, as is that of other officers, and the United States Adjutant General should have precedence of them; so that when called to act on boards of officers or otherwise, conjointly with officers of the army or militia, he should rank the latter. He should reside at the seat of government of the United States, and the returns of the whole body of the militia in peace, and that part of it which is not detached for the national service in war, or other periods of constitutional emergency, would be made through the adjutant general of the militia; while those of the troops placed in the service of the United States would be made by the officers commanding them, under the authority of the President, through the office of the Adjutant General of the army, as at present.

As no confusion would result from this organization, then, let us look more minutely into the authority of the additional officer, that we may judge of its benefit.

Among other duties, the United States adjutant general of the militia shall be obliged to furnish

blank forms of all the different returns that may be required, and to explain the principles on which they shall be made; to prepare and distribute to the several States books of instruction suited to the militia organization, for the drill and exercise of all the various corps of which the militia consists, according to the system of discipline prescribed for the army, and adopt all necessary and proper means for bringing the system into general use; to receive all the returns of the militia of the several States and Territories, and to make abstracts of the same once in every year, exhibiting the number of divisions, brigades, regiments, battalions, and companies, of what corps they consist, the strength of each, the number of officers and men, and the condition of their arms, accoutrements, and ammunition. He shall also make inquiries respecting the local boundaries and extent of the different divisions of the militia, the state of their organization and drill, and the force which can be brought to the defence of their important neighboring positions in any given time, obtain the information needed to enable the President to call for the militia of the several States or any particular division of it, under the act of Congress in 1795, to the greatest public advantage, and by his returns the number of men which are taken into the national employ, the divisions from which they are detached and the effective strength which remains in reserve, either for future drafts or to guard against unexpected attacks, shall always appear. He will likewise prepare forms for the return of all the arms and equipments furnished to the several States and Territories, under the act of the 23d of April, 1808, "for arming and equipping the whole body of the militia of the United States," exhibiting the manner in which they are kept, or how they are distributed; of books of instruction, and of all other property, which shall be furnished to the militia at the expense of the government. He shall collect as much information as can be obtained relating to magazines and arsenals, belonging to the States or individuals, the quantity of powder and military stores deposited in them, the manufactories of gunpowder, muskets, rifles, swords, and other implements of war, the number of men employed, and the quantity which can be produced in any given time at each establishment; the situation of cannon foundries and furnaces for casting shot; the facilities of transportation, and the cost of it by land and water. He shall communicate to the adjutants general of the several States such information as shall be furnished to him from the Ordnance department relative to the best mode of keeping and preserving muskets and other fire arms, of cleaning and preserving leather harness, cartouch boxes, bayonet and sword scabbards, belts, straps, and all other military equipments; and also relating to the making of gun-carriages, ammunition-wagons, tumbrils and caissons, so as to produce an uniformity in their construction throughout the United States. And to cause punctuality and accuracy in the returns of the militia of the several States and Territories, provision shall be made (if the law does not now admit of that interpretation) that the arms and equipments procured under the act of Congress "for arming and equipping the whole body of the militia of the United States," shall be distributed among the several States and Territories according to the returns made of their militia for the year preceding each annual distribution. In fact, he shall collect all the information relating to the strength and condition of the militia, the materials of defence which the country can furnish, the cost of purchase and transportation; shall keep regular files of the papers received, and a record of his correspondence, and besides his annual returns, when called upon he shall communicate such information to the President as his bureau will furnish, and be liable to all such duties relating to the objects of his appointment as the President shall assign to him.

If military men should think that a part of these duties could more properly be attached to other bureaus, it will not be controverted; it is presumed that all the facts and information herein pointed out are necessary to be had, and should be collected for the government by some means or other. In the absence of all provision for this purpose, at present, these duties have therefore herein been assigned to the new officer as the first step in the work of reformation, leaving to time and experience that more orderly arrangement or sub-division of the whole duties of the War Department which shall appear to be most expedient.

It is also necessary to remark that the idea is not designed to be conveyed that all the duties of the office are comprehended in the foregoing enumeration. Enough only was intended to be shown to remove any doubt that the new office would be one of great utility, and that it would require the undivided and assiduous attention of at least one person for its methodical arrangement and laborious duty.

This plan, it will be perceived, has nothing new in it, but is suggested in furtherance of the system which in the late organization of the army has wisely been introduced, providing for the residence at Washington of intelligent officers at the head of each department or branch of its concerns, to collect such facts and details as the state of the country may at any time require for the government's use. The President has now no officer to call upon for answers to his inquiries respecting the militia except the Secretary of War, who, under the existing organization, possesses no official information other than such as is afforded by the present incomplete abstracts of the annual returns of the States and Territories, some of which have not made any for several years. He has no officer subject to his command whom he can assign to any of those various duties, which the importance of the institution requires should be performed by a person properly qualified by intelligence and experience. The paucity of the President's information alone, and the impossibility of his obtaining it under the present system, even if no prospective advantage was likely to be derived from it, affords an important motive for the adoption of the measure proposed. Though the positive advantages are thus shown to be of no small consideration, the prospective are much greater; for in the light in which the subject is viewed, after long contemplation, this appears to be the best, if not the only mode, by which those improvements can eventually be made in the militia of the United States, which its capacity admits and its present condition requires. That there will be some delay attending it is admitted; but this will be no greater than the difficulties of the case itself create. If all the country was like New England, with the experience that is there attained, certain specific amendments to the laws might be advantageously proposed. But that is not the case. In this immense territory the habits and customs of the people differ from each other. Education, and the means of obtaining it, are widely different; the wants and necessities, the resources and objects of the several States and Territories, essentially vary from each other. What, therefore, would be useful to one might be injurious to another. An uniform national militia in a confederacy of sovereign States is a desideratum, the practicability of establishing which is doubted by many, though none doubt its utility if it can be accomplished. Shall so great an object be abandoned, then, without even an examination of the difficulties which attend it? If we would inquire into these we shall find that some of them are habitual, and the strength of these is daily increasing, but that the most important are constitutional. These latter are not, however, supposed to be greater than those which have attended the true construction of the national and State powers in other branches of authority, and which the experience of every year is illustrating and defining. While the obstacles of habit are to be removed by new and improved

practices, those emanating from constitutional provisions, it is thought, by examination, will be found to be less consequential than has been imagined. Like those arising under the judiciary power, they require only to be investigated and settled to strengthen the connexion, and insure the continuance of that harmonious co-operation between the State and federal governments which every new decision is in practice producing. In reasoning upon constitutional barriers, with the view to an uniform system of operation in any one branch of authority, the magnitude of the impediment is often such as to make the sanguine wish for its removal by a greater concentration of power under one authority. But a recurrence to the system of checks and balances which forms the peculiar character of our frame of government, when its general influence is considered, will teach us that it is those very distinguishing features which preserve its identity, and which alone will secure its duration. Let us not be uneasy under them, therefore, nor look upon the federal government as a foreign government made for us, and not by us; as independent of public opinion, and not, as it is in truth, founded upon it, and receiving its daily support from that general concurrence in all its acts which shows that the exercise of all its powers is reduced to the standard of human reason. We need not fear that the same public sentiment which supports the one in all its authority will restrain the other from usurpation, and that the united approbation of the public, which strengthens the measures of the one, will incite the other to the exercise of its co-ordinate powers. Let the national government be content, then, with the authority which is given, and use it under the restraints imposed. Take the grant by its terms, and concede the reservation according to its intent, and thus unfasten that public jealousy which, more than any constitutional provision, has impeded our political progress. When the United States government executes its own powers wisely, that public sentiment which approves it will produce such correlative provisions under the State authorities as are necessary. Both governments are governments of the people, and of the same people. Let public opinion, the great corrective of public abuse, and at the same time the highest incentive to patriotic exertion, be appealed to, and it need not be feared that any constitutional object will be effected under our present forms of government, however complex they seem to many, if it be approved; and if it be otherwise, whether the authority over the subject be single or co-ordinate, it matters not, for vain would be the attempt to exercise it.

The embarrassment, then, which exists to making a perfectly national militia arises under the power reserved to the States by the Constitution to provide for officering and training the militia, while that for organizing, arming, and equipping it, and establishing the system of its discipline, is granted to the national government. This simple enumeration shows these to be dependent powers, and it sufficiently exposes the necessity of the joint co-operation of both governments for the advancement of the system in practice to the point intended at the time of its adoption; for it is at once apparent that the power of Congress to organize, arm, and equip the militia, and establish its system of discipline, is of no use unless the officers to command it are provided by the States, and the troops are disciplined according to the system prescribed. The States who made the grants to the federal government of their militia powers did it with an implied obligation of co-operation on their part with the co-ordinate powers they reserved. The object in view warrants the belief that but for such an understanding the grant would not even have been accepted. But in different States different modes for appointing officers should be provided, and that a difference of sentiment should exist among them respecting the extent of their obligation to train the militia after it is organized and officered; and this of itself is sufficient to create serious impediments to making an entirely uniform national militia by congressional provision solely. But though the national government cannot do everything to the accomplishment of this great object, it can do much. It can, at least, exercise the powers it has, and cease to claim those it has not.

It can conform the organization and numbers and rank of the officers of the militia to the most improved modes, and thus make the rules, provided for the exercise and manœuvres of the army, applicable in practice, as they are by statute, to the militia. Definitely establishing the form of the militia organization, it will no longer permit this, the most important of all its powers relating to this subject, to be rendered inoperative at the "convenience" of the States. Better is it, at once, for the United States to relinquish the power, than after having establishing its form not to require its execution. We should then expect to find an uniformity of organization in each State at least, whereas we now see companies containing from twenty to two hundred and fifty privates; regiments, from five to sixteen companies, composed sometimes entirely of infantry, sometimes of a part, and sometimes nearly of all the different corps of cavalry, artillery, infantry, light infantry, grenadiers, and riflemen, of which the militia consist, and containing from three hundred to fifteen hundred men. If the several States had the responsibility of this power, the unmilitary arrangement of eight regiments to a brigade, and of seven brigades, instead of two, to a division, would not be seen in any. All this deformity arises from the operation of the existing laws, defeating the design of those who granted the power to the national government for the sake of insuring a perfect uniformity of organization.

It can provide arms and equipments for both officers and soldiers, and authorize the delivery of colors and musical instruments from the national armories. Thus it would relieve those whose expenses and burdens are heavy and unequal, instead of attempting to impose on them an obligation which it has not the constitutional power to enforce. It is true that Congress has power to provide arms and equipments for the militia, but its authority to require the colors to be furnished at the expense of the field officers, and the musical instruments by the company officers, will be considered as vain as it would be for it to exact from those holding civil offices under State authority pecuniary or other grants, proportioned to their elevation, and its means of enforcing the penalties of disobedience would be no greater upon the military than the civil officers. The same observation may be applied to uniforming the militia, which is not only not one of the ceded powers, but is one which can both more economically and properly be exercised by the States, who may thus establish, for each, such characteristic marks or badges as will, when the troops of several States are together, distinguish the line of each from the other, and from the line of the army. These are attempts at legitimate legislation, which diminish the dignity of the enacting authority, and lessen the respect of those from whom submission is expected.

It can establish a system of discipline for the artillery and cavalry, as well as for the infantry.

It can provide and distribute books of instruction to the officers, and thus secure an uniformity in the words of command, of exercise, and manœuvres, throughout the Union; and, as the power of Congress to compel the attendance of militia officers at drills for instruction is not generally admitted, if it will furnish instructors to such of the States as choose to avail themselves of the advantage furnished, it need not be questioned that the opportunity will be embraced to the extent of the provision.

It can provide for the appointment of aides-de-camp to the commander-in-chief of the several States, and other necessary officers, and fix the rank of some whose appointment is now provided for.

It can more accurately define the mode of arming the several corps, and make some improvement in the selection of arms to be used.

It can revise the provision for inspecting the troops which is insufficient, and for returning them, which is not only fixed at an inconvenient period for the use of the government, but is incomplete also in its details.

It can provide rules for the police of the militia, and add many necessary practical regulations.

It can relieve the elder class of those who are now enrolled from duty in time of peace; for it certainly cannot be necessary to require so great a proportion of the whole to be enrolled as was expedient when the population, upon the same territory, was about one-third the present number, and our other means of defence incomparably less. But if there are any particular parts of the country the character of whose population requires the keeping up a large military force in peace as well as war, the power can safely be left with the States to make additional enrolments, it being fairly to be presumed that no State will impose a burden on its citizens which its own peculiar exigencies do not require.

Above all, it can take back to its own exercise the power of exemption, which, under the State authorities has been used more destructively to the spirit of the militia, than even to its numerical force.

It can also do much, in other ways, to encourage the ambition of the officers and the pride of the soldiers, so indispensable to the preservation of the system in any degree of respectability, and no measure would be more likely to have this tendency, and produce the conviction that the general government intended to extend its protection to the militia, than the appointment of a staff officer to represent their interest, and become the official organ of their communications at the seat of the national government.

One of the most immediate and best effects of these measures will be to inform the public mind, which, not being obliged to reflect on principles that it is not called on to apply, is now too much influenced by the interested sentiments of those who proclaim a privilege a burden, and make individual hardships national calamities. The patronage of the government will undeceive the ignorant, disarm the cunning, and cause the thinking part of the community to reflect on the advantages, in a republican government, of placing arms in the hands of the whole people, and of training them to their use. Thus public opinion, the power with which the laws in all governments must ultimately accord, and whose effects, on those which are free, are almost immediate, will be enlightened. Let a change in the militia system be decreed by public sentiment, (and that it surely will be, when a clear perception of the best modes of effecting it is entertained,) and it matters not whether the powers to accomplish it belong in whole or in part to the State or the United States; whether they be co-ordinate, dependent, or contingent, their exercise will be commanded. Such patronage will make the militia service respectable and its offices desirable. Consequently men of higher attainments will be found in authority, an interest felt in the institution, and an influence created in the community, which will add much to the dignity and utility of the institution in peace, and to its strength in war. But the States alone can do nothing. The United States must begin the grand work of militia reform. The States have a right to demand it at their hands. The militia is their force, the service of which they have authorized the United States to use on certain occasions, and as these are the most important of any in which it will be called to act, they have yielded to that government the important powers to organize and arm it, and to establish its discipline. Certainly this would never have been done but under the full belief that those powers would be exercised; but, having ceded them, the States may with propriety claim their execution, in fulfilment of the implied obligation, which was the consideration of the grant, that thereby the force employed should be fitted for the service for which it is destined.

It is not herein intended to impute to the national councils a want of disposition to comply with their obligations. The cause of the evil does not arise from this source, but rather from the want of a satisfactory conviction in their mind that the remedies which have been proposed would answer their design; nor by the remark that, by the adoption of measures for the improvement of the militia such as have been suggested, or others which shall effect the same objects, the poorer class of citizens will be relieved, do we wish to be understood as claiming for the poor *exclusive benefits*; our only wish is to relieve them from *exclusive hardships*. It is not to be denied that the efficient militia is, in a great degree, composed of such as have not influence enough to obtain any of the numerous exempting offices, or pecuniary means to pay the forfeitures of non-compliance with legal requisitions. The claim we make, therefore, is one of justice to them not only, but it can be allowed without injustice to others; and, until it can be shown why those who fill the ranks of the militia, those, in fact, who do the work, why they should be obliged to provide arms for the defense of the whole without aid from any; why they should spend their time, without remuneration or other marks of consideration from those who share the advantage; furnish their own ammunition and rations, and pay the expenses of assembling, without assistance from their exempted and wealthier neighbors, whose property is a principal object of defense; the claim will continue to be urged on the strong ground of justice and equality.

It is believed that there is no department of the government deserves more attention than the militia; none in which the defects of the system are more apparent; none which is more susceptible of improvement; none about which public sentiment is more divided; none which is attended with extraneous difficulties; but all of which may be traced to the want of those facts and that information which, in all affairs, is indispensable to enlightened reform. It is not expected that all these difficulties can be removed at once. But, let the inquiry be commenced and the subject examined; let the habits and interests of the different sections of the Union be consulted; let the powers granted and those reserved by the States be considered; let amendments be the result of knowledge; let facts be collected, information communicated, and public sentiment enlightened, and reformation will surely follow.

This will not be an untried experiment. Its utility has been tested, and its result is exhibited in those States where the concerns of the militia are systematically conducted according to the provisions of their legislatures requiring it. How much more necessary it is that the President should have the advantage which would result from the establishment of a similar department at the seat of the government of the Union, the comparative extent of his authority sufficiently demonstrates.

But, though the laws for the regulation and government of the militia are defective, unequal, and oppressive, the principles upon which the system is founded are correct. They have been tested by experience, and carried into operation in the incomplete mode which is at present adopted, have already produced, as we often hear it remarked, a militia which Europe does not exhibit. But does it satisfy us, that those who have as much to fear as we have to hope from such an institution have not brought it to

the same degree of perfection as ourselves? Will the independent people of America, who place their chief military and their whole civil dependence on this force, be satisfied with having a militia which is only, comparatively, better than that of governments which resort to it always with fear, and never place arms in the hands of the people but when the invader is at hand? The possession of muskets by all the able-bodied men of a country gives to them that perfect sense of their own freedom which causes each, in his own castle, to stand like a sentinel watching his liberty. "If France had such a militia," said a late distinguished visitor, when he received the salute of six thousand of them, "she would have a free government." The militia is the preserving power of republicanism. What would dissolve arbitrary governments confirms and strengthens the free. It can hardly be believed that a community which, against all existing precedents, had the intelligence to found a system of self-government upon the basis of original equality of privilege and power, and the virtue to maintain it, to the delight of the philanthropist and the fear of the selfish and powerful, will ever forget that a self-depending must always be a self-defending power. Those who have set the world an example of unequalled wisdom in their civil institutions, derive too much pride and gratification from them to neglect the means of their preservation.

In addressing myself to our military head, my observations have been confined to the use of the militia as a defensive power. But in this light alone it might be viewed of equal importance to governments of all forms. I cannot, therefore, permit his republican virtue to impute to me the belief that its uses to ours are thus confined.

Under our Constitution the militia must ever be estimated as the bulwark of civil and individual liberty. Directed by public sentiment, it will guard us from the oppression of power; regulated by wisdom, and patronized by the government, it will secure us from anarchy; officered, trained, and supported by the States, it is the guarantee of their sovereignty and union; and properly armed and disciplined, in conjunction with the army and navy, and aided by a regular chain of permanent fortifications, it forms an impenetrable barrier to the invader. It is therefore as essential to the preservation of civil as it is to territorial rights. "As auxiliary to a regular force," says Mr. Madison, "and a substitute for a large one in time of peace, a disciplined militia forms an essential part of a republican system, it being certain that liberty cannot be safe with powerful standing armies, nor in danger without them, and that without an effective militia the danger of such armies cannot be precluded."

But its advantages are not confined to its military and civil uses exclusively. Its moral influence on society and individual character is also deserving of our regard. A disciplined militia, composed of all classes of citizens, of parents and sons, of masters and apprentices, of guardians and wards, commences its influence on those who, in their progress to maturity, become liable to enrolment at a period of life when parental authority begins to lose its control. It regulates the eccentricities of youth, inculcates subordination to authority, teaches obedience to the laws, and respect for those who are entrusted with their administration. Its associations promote civility, good manners, and friendly intercourse in society. Its exhibitions are public, encouraging cleanliness of person, and eliciting that pride of character which leads to the fear of reproach, and enlivens the desire of distinction. Its employments are active, requiring judgment and decision. Its exercises are manly, giving grace to the person, vigor to the muscle, and energy to the mind. Its duties are scientific, inciting to study, and inducing inquiry. Its objects are patriotic, animating the best feelings of the heart. Its offices, open to all, are the incentives of honorable ambition, affording to those in humble stations, whose merits might otherwise remain unnoticed, opportunities for disclosing those virtues and talents which recommend them for civil preferment as well as military promotion; and thus it is, this truly republican institution, in connexion with our systems of public education and establishments of religious instruction, contributes to produce that just subordination in society which influences all its conduct and constitutes an orderly community.

Let not, then, this valuable institution fall into disrepute for the want of the patronage of those who know its merits. In the militia all have an interest—those who have property to defend, homes to protect, and liberty to secure, as well as those whose lives are risked. It is composed and officered by men drawn from the various classes of society. No means should therefore be omitted for its improvement and instruction, and for lightening and equalizing its burdens. Militia laws should be made for the government of practical men, and the provisions of them should be as permanent and certain as the nature of the institution admits. The system of discipline should also be plain and fixed, so that the practice under it should be uniform. It should prescribe the discipline of the soldiers, and the duty of the officers; contain simple rules for the formation of companies and battalions, and instruction for a few of the most important manœuvres, such as all may comprehend and execute without much study or labor. These they must be taught to perform before they are brought into the field for actual service. It is not the intent of the Constitution that the militia should be converted into regulars in time of war, and be kept in service till they have learned their duty. This would be the most expensive system of defence that could be devised. Our forts are to be garrisoned by the army. The militia are intended as a reserve, to be called out on sudden emergencies, and discharged again as soon as the occasion which requires them ceases. Hence the necessity of their instruction at home, so that when they are called for they may come unhesitatingly into the field, and act with that confidence in one another, and in the skill of their officers, which none but those who are well drilled can ever discover.

One of the greatest difficulties under which the militia suffers is a deficiency of intelligence among its officers. This arises not from an indisposition to learn, but from the want of the means of instruction and opportunities for practice. The people of this country are too highminded to be dragged about the streets under the authority of those who are ignorant of their duty; yet, as the States have adopted different modes for appointing officers, and but little encouragement is given for men of education and ambition to accept commissions, this is often the case. Suitable methods, then, should be devised for their instruction, so far as the authority of Congress extends, and the States be encouraged to exercise their reserved powers. For this purpose drill-books should be distributed, and meetings for mutual instruction established, and the *esprit du corps* excited. The annual drills of officers, which have lately been provided by law in some of the States, are attended with such benefit to the service as makes an extension of the principle, under more favorable circumstances, desirable.

It is admitted that although many advantages might be thus gained, no very great approach can be made in the creation of an uniform militia throughout the United States, until the existing inequality of militia burdens, which has before been hinted at, is removed. These fall with unequal weight upon those who are least able to bear them. The unexempted class of citizens, between the age of eighteen and forty-five, principally consists of those who have the smallest pecuniary means. But they have life and liberty to preserve, which is as valuable to them, surely, as to their exempted and opulent neighbors.

They, therefore, most willingly and cheerfully contribute their time in support of an institution which gives them a perfect consciousness of their freedom. Compensation for this would be degrading. But is not this sacrifice of time to patriotism their full share? They contribute their due proportion of taxes for the support of government as well as others. If this equal obligation gives them equal rights, may they not properly demand the reason why such as have wealth as well as life and liberty at stake, should not furnish at least the instruments of its preservation to those who are thus willing and able to use them. But under the existing laws those who perform militia duty are obliged to arm and equip themselves, and also to provide a certain quantity of ammunition at their own expense. In this the poor man sustains an oppressive burden. Not only so, but he is subject to pecuniary penalties for a non-compliance with the exactions of legal provisions, which by accident or occupation he may be obliged to forfeit. He must also support himself while attending the company and battalion trainings, and defray the incidental and necessary expenses of travel and attendance at the public reviews. The distance to the place of parade is often so great that two or more days is taken up in the duty, making this item an addition of no very inconsiderable amount to the unequal exactions of the laws before noticed. The inequality thus produced is one of the greatest obstacles to the improvement of the militia. It is believed to be so great in those States where the laws are executed in the spirit of the institution, as to deter others from the attempt to accomplish its design. It should hence be inferred that much success in the establishment of an uniform national militia cannot be expected until this obstacle is removed.

There is only one class of persons whose condition furnishes any semblance of an argument in favor of the existing law requiring every soldier to arm himself at his own expense. This consists of those who, by reason of age or service are now exempted, but who, when they were enrolled, were subject to that obligation. They claim that as they have performed their tour of duty unassisted, their successors should do the same, or at least, that having provided their own arms when they were the subject of enrolment, they should not now be called on to contribute to their purchase for others.

This argument had some weight in it in 1792 when the militia law was passed. The country but a few years before that time had gained its independence principally by the personal exertions and contributions of those in whose favor the distinction is made, and surely it was not without reason when other resources were wanting, that those who came into the full enjoyment of liberty without the labor of its acquisition should be required to arm and equip themselves for its preservation as their fathers had done for its attainment. But since that period the condition of the country has changed. Its population has increased threefold, and its resources an hundred. Penury and suffering have been succeeded by affluence and independence, the public means are equal to its wants, and no good reason can now be perceived why the consequent amelioration which has taken place in the condition of all other classes of society should not also be extended to that which is subject to militia duty.

It will be observed, that in the remarks upon the inequality of militia duty no allusion is made to the national law which purports by the title of the act "to make provision for arming and equipping the whole body of the militia of the United States." This was purposely omitted, because the amount appropriated is so inconsiderable for the object it would have no weight in the argument. The title of the act is deceptive, as at the present rate of supply it will take seventy-five years to furnish the existing militia, making no allowance for the increase of population within that period. Until Congress shall provide for carrying into effect the design of that statute so as to make its provisions a substitute for the law of 1792, which requires the militia to arm themselves, our admiration of the principles of the act will only increase our regret at the want of means for its due execution. This we have now good reason to hope is its immediate design. The law of Congress at the last session, extending the provisions of the act for arming the whole body of the militia to the District of Columbia, according to its title, and for loaning arms from the national armory according to its provisions, is either an act of partial legislation or contains a pledge to this effect. There is a manifest propriety in according to the militia of that district the benefit of an appropriation which the original act confined to the several States and Territories. But if this were the sole object of the act, we should naturally have expected some provision in it for an annual return of the militia, as the arms are to be distributed in proportion to the numbers enrolled. But the after provision which authorizes a loan of arms to the militia of that district, makes annual returns for the purpose of future supply unnecessary. No reason is perceived why the militia of that district should obtain exclusive exemption from the requisition of the act of Congress of 1792, which requires the soldiers to provide their own arms, and yet there is no uneasiness discovered at what, undoubtedly, would have been considered as an act of unequal favor, unless its provisions had been of so decisive a character as to justify the opinion that it was intended as a precedent upon which an entire system of relief to the whole militia should be founded. A commencement of this just, and I might say, charitable work, may then be considered as made; and the rapid improvement which it has wrought in the militia of the district, it is believed, will tend to confirm the utility of extending the privilege to the whole body.

Another source of inequality arising from the numerous and unnecessary exemptions from militia duty of those who otherwise would be liable to enrolment which the laws recognize, will be the subject of just complaint so long as it continues. These are oppressive and discouraging to those who remain subject to duty not only; but under the unlimited authority given to the legislatures to grant exemptions at discretion, the power is exercised to an extent not contemplated when it was given, and principles are established and practices admitted in the different States which makes the law unequal in the operation of its own provisions. This is a growing evil, not more destructive of the militia numbers, however, than it is of the pride of those who are thus made to feel the inequality of their own condition and influence.

The service required of citizens towards the support of government is of two kinds—pecuniary and personal. All contribute to the former according to their ability; certain classes only render the latter. These are composed of such as hold offices in the civil departments of government, instructors of morality and religion, teachers of youth, jurymen, and others, who cannot perform their duties by substitutes. Although some ardent friends of the militia are opposed to the exemption of any person whatever who, by age, is liable to enrolment without the payment of an equivalent, the propriety of exempting from training such classes is not herein disputed. And if it were, and constitutional restrictions against exercising or granting such a power were made in all as was lately done in one of the States, still the legislature could do the same in all that it did in the one alluded to—put the fines of non-attendance so low as to do more injury than would have resulted from a grant of proper exemption. These abuses are easily corrected. The exempting is incident to the enrolling which is vested in Congress. Let Congress exercise it, then, and exempt such officers of the federal and State governments and other persons whose personal duties are equally important, but incompatible with militia service. The obligation and the

exemption will then be the same in all the States, and a great advance made in restoring that equality which the various exercise of this power by the several States, under the authority delegated to them by Congress, has destroyed. Viewed in some lights, indeed, certain exemptions seem to be necessary for the harmonious administration of our system of civil government. The executive, legislative, and judiciary functions must be performed, public education upheld, religion maintained, and the trial by jury preserved. Upon these and the militia the purity and security of our government, in a great degree, depends. They are all essential to the order of its practical operation. There would, therefore, seem to be manifest injustice in requiring those to pay an equivalent for not rendering that personal service in one branch which their duty required of them at the same time in another. This reason, however, should not release them from the obligation of providing themselves with arms, as is required of those who have less ability to procure them. For until suitable measures are adopted for a more liberal distribution of arms at the general expense, consideration for the public safety will enforce the argument for equalizing the militia burdens in favor of this requisition.

These remarks are not intended as propositions for amendments in these particulars, but are merely thrown out for consideration. Though under the experience of some parts of the country there could be no doubt of their general acceptance, yet their bearing on others should be well weighed before their adoption. They are sufficient, perhaps, to show the necessity of a thorough examination of the whole subject by one whose situation would afford him the means of ample information. In such case many suggestions of improvement, better suited, perhaps, to the condition of the whole country, would be proposed, which would facilitate the means of rendering the system more perfect than could be expected to be the result of individual exertion.

Upon two points, however, it is believed there is no division of sentiment. These are the making suitable provisions for arming the militia, and for the distribution of books of instruction at the national expense. The adoption of these would, perhaps, induce the States to supply rations, and afford other encouragement to the troops while engaged in public duty, at the charge of the whole community from which they may be drawn. The obligations upon the soldier in these respects are now oppressive, and the public means for their relief abundant.

It is fortunate for the country that, however great the diversity of sentiment is respecting the details of the militia system, there is no division upon the propriety of upholding it in dignity and usefulness, so long as it is maintained at all. The mode in which the government shall do this is not so important as it is to have the fact established that a system of militia patronage is introduced by the government which has for its object equality, relief, and instruction. This would be in the highest degree salutary to the establishment. The militia, considering themselves as under the protection of a just government disposed to cherish their interest, would engage in their duties with that pride which the inequality of their present condition depresses. They would then be all equally well armed, and their exercise would be uniform throughout the United States. Military service would no longer be considered as a drudgery. All would engage in it heartily. The disposition to obtain exemption would in a great degree cease. The militia would become the national guard, in which every citizen would be proud to be enrolled. Its offices would be sought for by those who now decline them. A commission would become the passport of merit, and an honorable discharge the evidence of faithful service.

But looking beyond the beneficial consequences which a few amendments to the law, inconsiderable in the amount of their expense to the public, would effect in the militia itself, and reflecting on the difficulty there always will be in a free country, where compulsory processes are not available, of quickly filling up the ranks of the army, when a sudden increase of it becomes necessary, the conviction is irresistibly forced on the mind, that one of its most important resulting advantages would be, that the country would be furnished with a large class of intelligent and practical officers, from which judicious selections for appointments to army commissions might be made, of such as, from their known attainments and popularity in their several districts of command, would soon be able to recruit its ranks.

The improvement of the militia will not only increase the national strength and facilitate its means, but the measure will be one of national economy, considered both with regard to its effect on the public coffers and the resulting advantages of productive labor; for, if the officers are uninformed and the soldiers imperfectly armed and untrained, when invasion impends, a larger number of troops than otherwise would be necessary must not only be assembled, but they must be called out in anticipation of the period of service, to be drilled and receive those common elements of instruction which, if previously attained, would have made it unnecessary to have taken them from the profitable employments of domestic industry until the danger was immediate. If it would not be considered invidious, strong illustrations of the importance, in point of expenditure, of this truth, might be drawn from the amount of the disbursements for the militia employed during the late war in different parts of the Union. But facts cannot now be necessary to show the economy of substituting discipline for numbers, in every light in which the proposition can be viewed; nor arguments adduced to prove how much more zealous and valuable his services are who is employed for the defence of his own neighborhood, where all his early associations, domestic attachments, and local knowledge are brought in aid of his patriotic ardor, than when marched away for the protection of strangers to distant places. It may almost be laid down as an axiom, that in proportion to the length of time the militia continues in service, and the distance of its employment from home, will its moral force be diminished, though its military attainments might be increased. The militia should always be employed where its moral power is greatest; and as this is advanced, the expenses of defence, by this arm, will be proportionably diminished. National economy, a most powerful operator in political concerns, is thus brought in aid of other considerations, making it desirable that such improvements should be made in the instruction of the officers of the militia, and in its organization, arms, and discipline as to give it that confidence in itself which will prevent its taking needless alarm, make its employment for long periods less frequent, and its march to distant places unnecessary. The militia trainings are sufficient for this. The dignity and order of military exercises, under the direction of the experienced officers of the revolution, made them public favorites, and so they continue to this day in some of the States. The militia trainings are the people's holidays, and, in the country, form their chief amusements. Relieve the militia from the expenses incident to duty, and make the appearance and conduct of the troops such as to gratify their pride, and they will ask no pay for their time and services. This will naturally result from a due public estimate of the value of the institution. The effect of it will show itself in the wise exercise of the constitutional powers of Congress; in restoring the equality of military obligation which all citizens owe to their country, by exempting none from militia duty but those who have personal service to render in other conflicting capacities; by establishing an uniformity of militia organization, and affording instruc-

tion to the officers, and arms and relief from burdensome exactions to the soldiers. This must be done to bring back the militia to the object of its establishment, and some measures of fostering care, at least, soon adopted, to prevent the laws from being treated with contempt by those who are subject to their authority. The respectable yeomanry and patriotic citizens of this happy country will do anything for the preservation of their institutions which is equal and honorable. But to be mulcted for not appearing at the public trainings under ignorant officers, a laughing-stock to the exempts, is what wise councils will not long expect submission to from a free and high-minded people.

Judging from present effects, there are some who, doubting whether the trainings, even under favorable circumstances, would render the militia good soldiers, prefer that it should be classed, and a portion of it called out every year, for a definite period, for camp duty and military exercise. Their views are solely military, and, as such, are entirely accorded with, and the principle fully admitted, that a few days continued instruction in camp will do more towards turning citizens into soldiers than many separate days of instruction. When this conversion shall become necessary, these means will undoubtedly be adopted as the readiest to effect the object. But if a proper organization is maintained, and the leading features of the institution are preserved, the citizens may uninterruptedly continue their vocations until the immediate presence of danger calls them into actual service. Those who aim at making the militia equal to the regular corps look for more than it was designed to accomplish. To effect this they must alter the character of the force; for so opposite are the pursuits of military and civil occupation, that when the former becomes the chief object every step the soldier gains the citizen loses. Such is the effect of incorporating the militia of Europe with the regular forces. But it is not our wish to turn citizens into soldiers in time of peace. The object of our military establishments, on the contrary, is to preserve to us the enjoyment of our civil blessings. We should, therefore, exceedingly fear the effect of such a change on our moral habits and domestic enjoyment; and those republican statesmen who think that its effect would be alike injurious to the stability of our free constitutions, will avoid every measure which shall cause the business of the soldier to become the sole object of the citizen. The term citizen soldier accurately conveys the character of an American militiaman; and the constitutional object and design of his enrolment and instruction cannot be better expressed or defined than by the use of those words as convertible terms. The citizen soldier of peace is to become the soldier citizen of war; but neither in peace nor war is the character of either the citizen or soldier to be merged in the other. Thus will the principles of military subordination contribute to the good order of civil society, and the pride of honorable distinction furnish new incentives to virtuous efforts. But this cannot be the effect where militia exercises have become so inferior as to make a compliance with legal acquirements appear to be useless and derogatory. So far as this is to be attributed to the want of the parental care of the government, injury must be anticipated to the whole of its institutions. It is, however, hoped that the decision of the country upon the utility of the continuance of the militia establishment, which its present condition in the United States evinces will, ere long, be required, will not be delayed till this effect is produced. The importance of that decision, whenever it shall be made, to our free constitutions, is left to be discussed by those who will indulge me with the remark, that if the militia deserves no better encouragement than it receives, its abolition by a public act would be a measure of wisdom, before an institution calculated to produce the best moral and political impressions shall have so far deteriorated as to give it a demoralizing influence. There is nothing to be apprehended from the public decision upon this question; the difficulty is to get the subject taken into consideration. The result of this will be, none will doubt but those who would turn the militia into regular soldiers, that the militia shall be upheld as indispensable to the preservation of civil and political liberty; and this very decision will contain such a pledge of patronage as will check the progress of dilapidation, and give time for a careful survey of its condition and wants to be made, preparatory to such amendments to the laws as the useful continuance of its establishment makes imperious.

Without again recurring to those many and other considerations and advantages which have before been submitted to the public eye, and which will naturally present themselves to every considerate inquirer as resulting from the operation of a plan for improving that arm of defence which, after its adoption, it is hoped may with truth be called "the cheap defence of nations," I cannot omit to remark upon its general accordance with those improved practices in the administration of national affairs which have lately been introduced for establishing a perfect degree of responsibility in all its organs; thus, by increasing official accountability, diminishing the public jealousy, and adding greatly to the general confidence.

The object proposed is great, the expense of the experiment trifling. Even if it were considerable we should not fear that Congress would furnish the means, when it discovers the utility of their application. So long as no account is rendered of the arms which have been distributed at the public cost, no system of returns or accountability is provided, and no information given of the advantage which has resulted from former grants, it cannot be wondered at that an enlargement of militia appropriations is not made. But when a plan shall be devised for the suitable instruction of the officers and for teaching the privates, so far as they are instructed at all, upon the same uniform plan; when a perfect degree of accountability of all public property shall be established; when the files of the returns have only to be examined and the leaves of a record-book turned over by the members of Congress to enable them to ascertain all needed information respecting the condition of the militia in every State and Territory in the Union; when the public shall be informed that a system is proposed for the effectual preservation of their individual and political liberty at all times, and by which, when the invader approaches, a million of bayonets will be presented at a single word; he must, indeed, be a sceptic who would doubt that sufficient appropriations would not freely be made to carry it into effect, and give to the militia that stability, dignity, and efficiency which the theory of the system intends.

In truth, omitting further illustration to avoid prolixity, it seems to me that an intelligent officer, whose duty was confined to the object, by corresponding with the officers of the militia in all parts of the Union, conversing with the members of Congress, and other well-informed individuals from the several States and Territories, and adopting those facilities for obtaining such a knowledge of local habits and necessities as his situation at the seat of government afforded, would, in a reasonable time, be able to propose, with general concurrence, some simple provisions by the introduction of which the militia system would soon be established on the lasting basis of utility and honor.

[2D SESSION.]

## ON CLAIM FOR THE RETURN OF THE AMOUNT OF A FINE AS A MILITIAMAN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 20, 1826.

Mr. WHITTLESEY, from the Committee of Claims, to whom was referred the petition of William Cloyd, reported :

That, during the late war, the petitioner was a citizen of Tennessee, and liable to perform military duty; that a draft was made in the company of which he was a member, which would, if none of those drafted had been excused, have exposed him to be first drafted in the next requisition; that a part of those drafted from the company of which the said William Cloyd was a member were excused from the performance of a tour of duty, when they arrived at the place of rendezvous, on account of imbecility; that John Cloyd, a brother of the said William Cloyd, on his return from the performance of a tour of duty, met the detachment of militia at Highwassee, commanded by Captain Hartsell, and was informed by the said Hartsell that William Cloyd (in consequence of certain drafted militiamen being excused as aforesaid) was then liable to be called into the service, and proposed to the said John Cloyd to join his company as a substitute for the said William, and gave him an assurance that he, the said Hartsell, would deliver him a certificate which should exempt the said William from being drafted on the next call on the militia; that the said John, from various considerations, (and among them may be mentioned that he was a single man, when his brother had a family,) was induced voluntarily to substitute his services for those of the said William, performed a tour of duty in his, the said William's, room and stead, and received a certificate thereof. Soon after John Cloyd returned William Cloyd was drafted, but was excused by a court-martial on the presentation of the certificate aforesaid; and immediately thereafter was again drafted, those standing in the subsequent classes not then having been required to perform a tour of duty. He again presented his certificate aforesaid, and claimed, by virtue thereof, to be discharged; but the court-martial, then convened to try delinquents, deemed the same insufficient, and assessed a fine against him to the amount of ninety-six dollars, which he afterwards paid to the deputy marshal. The facts stated above are proven by John Cloyd, the Hon. John Blair, and the payment of the money by the receipt of the deputy marshal.

The petitioner prays to have this money refunded to him. The committee would proceed with great caution in reviewing the decisions of any court, whether civil or military; but, if great injustice has been inflicted, they do not doubt either the power in Congress to grant relief or the propriety of so doing.

Each person enrolled in the militia is liable to be called into the service in time of war in the order in which he is enrolled and classified, and when he has performed a tour of duty either by himself or substitute, or paid the penalty of the law, he is exonerated from any further liability until each member of the company has been drafted.

The proof is clear that the petitioner by his substitute performed a tour of duty; that all the members of the company had not been drafted when this fine was imposed, nor were they during the war; and that the fine was paid there is no room for doubt. With this proof the committee think the petitioner was not obliged to have performed the tour of duty, for the non-performance of which the fine was assessed; and, it having been improperly assessed and paid, that he is entitled to relief. They are not without precedent, and refer to the case of John M. Causland, 2d session, 15th Congress, Report 120, and to Statute, vol. 4, p. 440.

Persons have been frequently relieved against judgments recovered in the United States courts, and the committee refer to the case of the representatives of Elijah Wadsworth, 2d session, 18th Congress, vol. 1, Report 17; Statute, vol. 8, chapter 23. Also to the case of Henry Lightner, 1st session, 18th Congress, vol. 1, Report 73; Statute, vol. 8, chapter 76. A bill accompanies this report.

## RELATIVE TO FORTIFICATIONS FOR THE DEFENCE OF CHARLESTON, SOUTH CAROLINA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 22, 1826.

DEPARTMENT OF WAR, *December 19, 1826.*

SIR: I have the honor to transmit herewith a report from the chief engineer, of this date, and beg leave respectfully to refer to it as affording, as far as practicable, the information called for by a resolution which was passed in the House of Representatives yesterday, directing the Secretary of War "to report to the House whether the projects of the works intended for the defence of the harbor of Charleston, in South Carolina, will be finished, and when the works will be commenced."

I have the honor to be, sir, very respectfully, your obedient servant,

JAMES BARBOUR.

HON. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

ENGINEER DEPARTMENT, *December 19, 1826.*

SIR: In pursuance of your instructions to report to you the information called for by a resolution which was passed in the House of Representatives yesterday, directing the Secretary of War "to report to the House whether the projects of the works intended for the defence of the harbor of Charleston, in South Carolina, will be finished, and when the works will be commenced," I have the honor to report that the projects alluded to will be finished as soon as practicable, and that it is contemplated to commence the works as soon, after the completion of the projects, as an appropriation for that purpose can be obtained and an officer of engineers to superintend the same may be disposable for that service.

During last winter a member of the board of engineers was instructed to prepare the projects above stated, and it was then expected they would have been finished by this time. It is believed that expectation would have been realized had the member of the board alluded to been furnished, as soon as it had been supposed he would be furnished, with the drawings exhibiting the results of the surveys which would afford the data principally to be relied on in aid of the formation of the projects; but the completion of those drawings has been unexpectedly protracted until this time, in consequence, as it is understood, of the frequent indisposition of the persons who have been engaged in preparing them. It is believed they have been finished and are now on the way to this place. As soon as they shall be received they will be put into the hands of the member of the board to whom, as has been stated, the formation of the projects has been committed; and it is possible the projects may be completed in the course of the month of March next.

Respectfully submitted.

ALEX. MACOMB, *Major General, Chief Engineer.*HON. JAMES BARBOUR, *Secretary of War.*

## ADDITIONAL LAND FOR THE ARSENAL AT WATERVLIET, N. Y.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1827.

Mr. WARD, from the Committee on Military Affairs, to whom was referred the resolution of this House instructing them "to inquire into the expediency of authorizing the purchase of addition land for the arsenal at Watervliet, in the State of New York, reported:

That, on a full consideration of the documents submitted to the committee at the last session of Congress, as contained in the printed report of this House, No 148, and of a letter received from the Ordnance department, dated the 29th December, 1826, they deem the purchase not only advisable but important to the public interest, and therefore report a bill for the purpose of carrying into effect the proposed object.

ORDNANCE DEPARTMENT, *December 29, 1826.*

SIR: In answer to your inquiry, I have to inform you that all the information deemed material to the subject of purchasing additional ground at Watervliet is contained in the report of the Committee on Military Affairs, (No. 148,) made at the last session. No official reports on this subject have since been made.

The necessity for an immediate purchase of this additional land is now more urgent than at the date of my last report. The proprietor of the land is now dead, and I have been informed, by the officer commanding the arsenal, that the executors of his estate want money and are desirous of selling a part of the land, all of which consists of village lots. They have, however, agreed not to make any sale until after the close of the present session of Congress, and will reserve the ground until that time for the United States. And if the United States do not then purchase they will proceed to sell to individuals, and the sale of one lot to an individual may put it out of the power of the government to obtain the ground upon any terms. It is, therefore, considered of the utmost importance to the service that the purchase of the ground should be authorized at the present session. The land can now be had on reasonable terms; if the purchase of it be deferred we may not be able to obtain it all. The possession of the ground is considered of essential importance to the public interests, for without it the large magazines must be placed in the immediate vicinity of other extensive works, which would be hazardous to a large amount of public property, and endanger the lives of many individuals.

I have the honor to be, very respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance service.*HON. AARON WARD, *of the Military Committee, House of Representatives.*

[2D SESSION.]

## RELATIVE TO PLANS AND ESTIMATES FOR THE FORTIFICATIONS AT PENSACOLA, IN FLORIDA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1827.

DEPARTMENT OF WAR, *December 26, 1826.*

SIR: I have the honor to transmit herewith a report from the chief engineer, of this date, and beg leave to refer to it as the answer to a resolution of the House of Representatives, dated the 18th instant, calling for information respecting plans and estimates of fortifications contemplated for Pensacola.

I have the honor to be, sir, very respectfully, your obedient servant,

JAMES BARBOUR.

Hon. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

ENGINEER DEPARTMENT, *December 26, 1826.*

SIR: In pursuance of your instructions to report to you the information called for by the resolution of the House of Representatives of the 18th instant, directing the Secretary of War to communicate to the House what progress has been made in the projection of the plans and estimates of fortifications for the defence of Pensacola bay and the navy yard and depot established there, when they are expected to be completed, and what has prevented their completion at the time suggested by the report from the department during the last session, I have the honor to make the following report:

At the last session two reports on the subject of fortifications for Pensacola were communicated to the House of Representatives, one of them dated December 22, 1825, and the other February 10, 1826.

I do not perceive in either of those reports any intimation that plans and estimates of fortifications for the defence of the navy yard and depot at Pensacola would be projected at any early date; nor any suggestion of the time at which the plans and estimates of any of the fortifications, having reference to the objects stated in the resolution, would be completed.

The resolution of the House, dated the 8th of February last, which the report of the 10th of February last was intended to answer, appeared to indicate a disposition on the part of the House to have the plans and estimates for one of the fortifications intended for the defence of the entrance into Pensacola bay completed as soon as practicable; and in accordance therewith, instructions were immediately given to the board of engineers to project the plans and estimates for the work proposed to be erected on the western extremity of Santa Rosa island.

The board of engineers have made considerable progress in the fulfilment of this duty, and it is expected will complete it in the course of next month.

The fortifications requisite for the defence of Pensacola bay will comprise that above stated, and one at the Barancas, to co-operate therewith in the defence of the entrance into the bay, and those that may be required for the defence of the navy yard and depot.

The progress which has been made in the projection of the plans and estimates of the fortifications proposed to be erected on Santa Rosa island has been stated. Before plans and estimates for the other fortifications mentioned can be projected it will be necessary to examine and make minute surveys of the position selected for the navy yard, and of its connexion with the position at the Barancas. The examination and surveys of the connexion between the positions alluded to will be necessary to determine whether, and to what extent, it might be practicable, in the location of the works with which it is proposed to occupy those positions, and in the projection of plans for them, to adapt them to the purposes of reciprocating defences with each other, and of co-operating in the fulfilment of the objects of their destination respectively.

The board of engineers will be at Pensacola in the course of the ensuing spring; and should the views of the government, in pursuance of which the fortifications for the defence of the entrance into the bay and of the navy yard were determined upon, have undergone no change in the meantime, the board will be required to make the examinations alluded to, and to furnish instructions for making the surveys which the results of those examinations may indicate to be necessary, and which will be executed without delay.

The above remark, from which may be inferred the fact of its being supposed that the views of the government in relation to the proposed defences for Pensacola may possibly be changed, was suggested by information recently received respecting the result of a survey lately made of the bay of St. Joseph. It is understood the channel leading into that bay has been ascertained to have a depth of thirty feet; and Gould's chart exhibits the bay as being very capacious, and as having the depth of five and six fathoms throughout its whole extent. The best channel of entrance into Pensacola bay has a depth of twenty-one and a half feet.

Respectfully submitted.

ALEX. MACOMB, *Major General, Chief Engineer.*

Hon. J. BARBOUR, *Secretary of War.*

No. 339.

[2D SESSION.]

## ON THE ORGANIZATION OF THE TOPOGRAPHICAL ENGINEERS OF THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 5, 1827.

JANUARY 2, 1827.

SIR: The object of affixing to the memorandum, left at your quarters a day or two since, of the present topographical engineers, was that an opinion of their experience in their duties might be formed. I take the liberty to add the following corrections:

Major Kearney was a captain of topographical engineers for about four years previous to his present appointment. Major Perrault was also about four years on these duties, before the appointment he now holds. Captain McNeil obtained his present appointment January 27, 1823, previous to which he had been on the duty with me about seven years.

Most respectfully, sir, your obedient servant,

J. J. ABERT.

General VANCE.

*A communication from the topographical engineers to the Committee on Military Affairs.*

The first establishment of the topographical engineers was by a law passed March 3, 1813, providing for eight majors and eight captains. Their duties under the regulations of that period were "to make such surveys and exhibit such delineations as the commanding generals shall direct; to make plans of all military positions which the army may occupy and of their respective vicinities, indicating the various roads, rivers, creeks, ravines, hills, woods, and villages to be found therein. To accompany all reconnoitering parties sent out to obtain intelligence of the movements of the enemy or of his positions; to make sketches of their routes, accompanied by written notices of everything worthy of observation therein. To keep a journal of every day's movement when the army is in march, noticing the variety of ground, of buildings, of culture, and distances, and state of roads between given points throughout the march of the day; and lastly, to exhibit the positions of contending armies on the fields of battle, and the dispositions made either for attack or defence."

On the termination of the war in 1815, the army being reduced, the expression of the law "and that the corps of engineers as at present established be retained," was not considered as embracing the topographical engineers, who being looked upon by the executive as part of the general staff and not of the "corps," were disbanded. Although when the bill was in transitu the topographical engineers considered it as sufficient to cover them, and did not therefore make any efforts to have it differently expressed. They were, in consequence, for a short period out of service. But in the next year they were again authorized and five majors appointed; and in 1817 and 1818 the whole number allowed were appointed, constituting in all six majors and four captains. The duties prescribed for these officers by the regulations relating entirely to a state of war, and adapted only to their condition as part of the general staff and attached to the actual command of the different generals, ceasing or being suspended in times of peace, with a view of collecting the officers together and of having their services more immediately under the control of the Secretary, and their surveys, reports, and returns accessible to him without delay, an order was issued placing them at the disposal of the chief engineer, then General Swift.

About the same period a topographical office was established at Washington, for the purpose of collecting and safe-keeping the results from the operations of its officers, under the superintendence of Lieutenant Colonel Roberdeau. This office still continues and under the same officer. The recognition or establishment of it by the proposed bill is only to give to it a more permanent character. It is only to authorize what was found necessary, and to place under the protection of the law an office, the necessity and utility of which experience had at first suggested and has during a course of several years fully proved. It is no unimportant argument in favor of the bill proposed, that it contains no innovations upon our own established customs, and of the declared wishes of the executive and former military committees.

The numbers now proposed are two less than those in the bill of last year. That bill asked for one colonel, one lieutenant colonel, two majors, six captains, twelve first lieutenants, and twelve second lieutenants. This for one colonel, one lieutenant colonel, two majors, eight captains, ten first lieutenants, ten second lieutenants. It is true the present proposition requests also ten brevet second lieutenants, that of the last year did not. But it is supposed this difference is rather the effect of the consideration of a law\* authorizing brevet second lieutenants to be attached as supernumeraries to the army at the rate of one for every company than of design. Under this law brevet second lieutenants have been attached to the present corps of engineers, and under the same they might also be attached to the proposed corps, and most probably would be. By introducing them, however, in the bill, it is relieved from all ambiguity on an interesting point, as it secures to it officers educated for its duties, and who, as brevet second lieutenants and aiding its operations, are acquiring valuable experience.

The pay is precisely the same as that introduced in the bill of the last session.

The desire of a separate bill for the topographical engineers is not that we have any feeling adverse to the increase of the engineers of fortifications. We know it to be a corps of scientific men, and believe it to deserve the patronage of government. But we are of the opinion that there does not exist a strong disposition for the increase of both corps, and that by the uniting of them in one bill would certainly occasion a failure in the increase of either. We are also led to believe that there does exist a strong disposition to increase the topographical engineers, from a conviction that such an increase is highly necessary, and we see no reason why, under such circumstances, we should not be presented by ourselves. It could not certainly be considered as in any way disapproving of the engineers of fortifications, or in the least as undervaluing their merits. The only inference which could be drawn from such an act is, that the committee does not at present think an increase of both corps advisable.

\* See Cross's edition of Military Laws, p. 163, sec. 4.

Having already shown that a topographical office now exists at Washington, and under one of our own officers, and that it has been in existence for years, we will further add, in relation to the value of such an office and the duties of the corps, the following extracts from a letter written by General Bernard:

"In comparing your corps with those of the same denominations in all the European armies, it seems to me that the duties assigned to it are of two kinds, those in time of peace, and those in time of war.

"In time of peace, topographical engineers are employed in surveying the frontiers, in forming descriptive and military memoirs on their topography; they also, by astronomical observations and detail surveys, make those extensive maps which require a knowledge of the highest branches of mathematics. They lend their assistance to the levelling and surveying preparatory to projecting fortifications, roads, and canals. They act when necessary in the capacity of hydrographers, in surveys of the coast, seaports, &c. In a few words, the duties assigned to topographical engineers are to furnish such information as will enable the general, the military or civil engineer, and the navy to carry into effect their several plans.

"In time of war the topographical engineers form an essential branch of the general staff. It is by means of their reconnoiterings, maps, and descriptive memoirs, that the importance and military properties of positions are known, and that the strategic circumstances of a country are ascertained. Modern armies cannot move without a perfect knowledge of the geography and topography of the field of operation, and it belongs to the topographical engineer to furnish all information calculated to assist the general in the research of local circumstances, in order that he may be able to plan his operations accordingly.

"Your corps enjoys the advantage of being greatly useful in time of peace as well as in time of war. But the first of its labors would be lost were there not a central office wherein all the works of the corps, and those of other officers of the army could be preserved, and classed and properly combined, I mean a topographical bureau and depot.

"Such a depot must secure not only all maps, charts, plans, surveys, and military memoirs, but also all the various documents necessary to the history of the several wars made in the country and the neighboring States. It was in the archives of the French depot that Voltaire found all the information he wanted to write his age of Louis the 11th, and it is in the same depot that Dumas finds all his materials for his celebrated military and political history of the campaigns made by the European powers from 1792 to 1815.

"In the topographical bureau all memoirs written on similar subjects ought to be abridged, and a critical analysis of them made. Maps and charts to be drawn up in order to connect separate surveys. Statistical tables, showing the resources of all kinds that the country can afford, make also an interesting part of its business. Itinerary tables respecting the concentration of militia on points of rendezvous. Military and critical history of operations made during the last war ought to be written and kept in manuscript to help the government in planing military combinations that other wars might call for.

"The depot at Washington is already very rich in materials of all sorts, and your own exertions connected with the activity and talents of the military and topographical engineers, as also of other officers of the army, will every day add new documents to its collection, and contribute to increase its useful importance."

The present topographical office, as before remarked, is established at Washington by the authority of the Executive, which possesses the right of stationing any officer of the army where his service may be the most wanted, and to assign to him his duties there. If this is considered all sufficient, and any opposition is apprehended from that section of the bill providing for an office, on the ground that it might be considered as creating some new department, the section might be left out.

The great object is an adequate organization of the corps. The office may be continued as it is and by the same authority. Under this impression the enclosed draft of a bill is substituted for the one before sent, and the remarks in favor of the office may be considered as only explanatory of the advantages to be derived from the labors of the corps.

*List of topographical officers.*

John Anderson, major, April 12, 1813; lieutenant colonel, April 12, 1823.  
 Isaac Roberdeau, major, April 29, 1813; lieutenant colonel, April 29, 1823.  
 John J. Abert, major, November 22, 1814; lieutenant colonel, November 22, 1824.  
 James Kearney, major, April 29, 1816.  
 J. H. Long, major, April 29, 1816.  
 P. H. Perrault, major, February 17, 1817.  
 W. T. Poussin, captain, February 17, 1817.  
 J. Le Conte, captain, April 18, 1818.  
 H. Bache, captain, July 24, 1818.  
 G. W. McNiell, captain.

And about 30 first and second lieutenants from the artillery and infantry, attached to the same as assistants, many of whom have been several years on these duties.

*A communication from the topographical engineers to the Secretary of War.*

Understanding that any views from the topographical engineers relative to the contemplated organization of a corps of topographical engineers would not be unacceptable, we have the honor to submit the following remarks, and the enclosed projet for a law in relation thereto:

One of the principal differences between the proposed plan and the one offered by the committee during the last session is that we are anxious to come before Congress in a bill distinct from any views of increase of the engineers of fortifications. In the proposition of the last session the two corps were blended in one bill, and many of the friends of either were unwilling to support it because they were not disposed to increase both.

We are not desirous of sheltering ourselves under any reputation which may belong to the engineers of fortifications, nor of impeding their prospects by any want of reputation in ourselves. We are willing to rest our claims for an increase upon the necessity for that increase and whatever merit may be considered as attached to us from our long and, as we trust, useful services. We have held our present commissions for many years. We have spared no exertions to prove the value of such a corps. We are

insufficient in numbers to accomplish the designs of government, and we present a plan for that enlargement which shall make us adequate to those designs.

The great and important objects of military defence and internal improvement, and which may be also considered as but necessary consequences of our increasing condition of prosperity, seem to demand such an enlargement, and to defend us from imputations of personal interest which might otherwise be laid to our charge. When, also, it is considered that by the enclosed proposition we lose two field officers, we conceive ourselves as furnishing unequivocal evidence of our disinterestedness, and that our desires in relation to our own corps do not extend beyond those which, in our opinion, are connected with its public usefulness, within which limit we consider our wishes not only justifiable but praiseworthy. We do not seek to raise ourselves beyond what we think necessary to increase the value of our labors, nor do we wish to be thought emulous of personal distinction, further than is compatible with our public vocation or may extend our usefulness, enabling us to render to the government an adequate return, and which may be considered as necessary to the fulfilment of its own views.

The necessity of an organization into a distinct corps sufficiently large to incorporate in it our assistants now on topographical duty might be demonstrated from the general principle that every profession should have for its members those whose education and practice have informed them in its duties. This principle prevails throughout all the orders of civil society, as well as in the various distinctions of military service. And during our experience we have found the want of it in our particular arm lead to the greatest inconveniences. An assistant placed with us on these duties considers himself as but temporarily arranged. He feels no personal fame or fame of his corps dependent upon his efforts. He sees no certainty of remaining upon them any given time, and therefore no probability of continuing sufficiently long to acquire expertness and familiarity in all its various points of practice, or advantage from his labors in learning the theory, while he is also conscious of losing by his absence the practical knowledge of his proper calling, and of becoming a stranger to his own officers and corps. After a limited period he returns to his corps with these disadvantages, finds officers younger than himself more familiar than himself in his proper duties—of course more reliable to and more esteemed by his superiors; has again to learn that which he has forgotten, and also in time loses that which he had learned with us, and can never be better than when he left, while our course of practice is continually improving; so that if he were called on these duties again he is again humiliated in his expectations, and competent only to aid in the most subordinate parts. This system, therefore, so far from increasing the value of an officer, lessens the same, and confines to a very limited sphere the degree of utility which he can ever attain.

The knowledge of this reacts insensibly upon ourselves. We can reap no lasting advantage from our efforts to instruct, see them continually lost to our corps and wasted, and are brought at last to consider our duties as a mere school of practice in the most simple part of our profession, and are placed, in consequence, under the necessity of extending our demands of aid from the army beyond what would otherwise be requisite, as we have to make up in numbers what is wanting in familiarity and expertness in practice. From this cause also our surveys are the more expensive, as each officer has to be supplied with men and set to work.

Another and more unfortunate result is that our duties are involved in all the errors, delays, and inadequacy of execution so inevitably ensuing from inexperienced assistants. We feel this most sensibly, not only as affecting our own characters but our very duties, and which cannot fail to lead to consequences the most disastrous to our reputations, while they are also most undeserved. The army, from which our assistants are taken, and to which no more subalterns are allowed by the laws than are requisite, likewise suffers seriously. It is a system, therefore, which injures all parties, and which the organization of a distinct and adequate corps only can remedy.

The first section of the proposed plan creates the corps and defines its duties. This definition is considered necessary to distinguish it from the present corps of engineers. It states only, in the most general terms, the duties which we now perform and to which we may be called in times of war, when many surveys would have to be suspended. This is taken from the book of regulations issued during the period of the last war, and on the first organization of topographical engineers. But to prevent the appearance of a wish to avoid any duty, a clause is introduced vesting in the President the power to assign to us any other duties than those specified, similar in effect to the provision by law in relation to the present corps of engineers, which prohibits the ordering of them out of the line of their duty, except by the President.

The second section provides for one colonel, two majors, eight captains, ten first lieutenants, ten second lieutenants, and brevet second lieutenants from the academy which may in time equal ten. By this the corps, when at its maximum, would consist of thirty-eight subalterns and four field officers, keeping the great mass of increase in the lower and less costly grades, where they are the most wanted. The topographical engineers now consist of six majors and four captains, to whom are attached about thirty lieutenants from the army as assistants, and also two brigades of civil or citizen engineers, making in all a much greater number than the contemplated corps, but which are yet found inadequate to the wants of the country. This inadequacy, it is believed, will be more than made up from the advantage of incorporating in the new corps all the practiced talent of the lieutenant assistants as captains, and forming new surveying parties under these and the older first lieutenants. Eight is the greatest number of parties which have been in the field at the same time under the present system, including the two citizen brigades. The new plan would enable the War Department at once to employ fifteen parties, under three field officers, eight captains, and four first lieutenants. By the second year more first lieutenants would become competent to command, and by the third the whole; so that in three years twenty-one separate surveying parties, under the proposed plan, could be in active operation and arranged on all the various and interesting objects of surveys of the coast boundary lines, points of national defence, and purposes of internal improvement.

The additional expense consequent upon the new organization would not be great, as it would require no new appointments. We have now six field officers and four captains, and as the supernumeraries from the Military Academy are sufficient to supply the places of those transferred from the army into the corps, and as these supernumeraries are all joined to the army by the law as brevet second lieutenants, the increased expense of the new corps would only be the difference between the pay of four captains and four second lieutenants, and between ten first and ten second lieutenants. Against this increase of expense there would be in time a set-off of the balance from the two majors less, after deducting what would be necessary to make up the pay of one colonel and one lieutenant colonel, and a set-off immediately of the expense of the two brigades of citizens. So that the actual increase of expenditure

a year would be very trifling. The Military Academy supplies annually officers enough for the lower grades of this corps and of the army generally, who are, as already remarked, provided for by law, whether this new organization should take place or not.

The provision in favor of those who might be retained at a less rank than they now hold is in our opinion as necessary as just. It would fall to the lot of at least two majors, and to preserve to them until they should be promoted the pay of their present brevets is due to their long and faithful services and to their individual support. We could not present a plan excluding this feature, nor do we think the preservation of it will appear to any one otherwise than correct.

The necessity of a depot or office at Washington to preserve the valuable results from the labors of this corps cannot be doubted, and is but a consequence of its organization. Nor that it should be superintended, as well as the duties which this corps may have to perform, by one of its own officers, under the immediate direction of the Secretary of War. Other nations, who have frequently tried the blending of this with other corps, have at last, from the importance, extent, and distinct character of its duties, resolved it into a separate and distinct command. And if it be necessary that the engineers of fortifications, the artillery, infantry, and cavalry should all have officers to superintend the details of each brought up in their particular arm, it is equally necessary in this.

Already have the topographical engineers been years in service, pursuing the practice of their profession; already have they passed through that first stage in which the engineers of fortifications were held before that corps was fully organized. Like it acquiring experience, and awaiting that development and enlargement of the views of the nation as its wealth and numbers, extent and wants increased to a degree requiring the proposed augmentation. They are now, therefore, in a condition to meet this new state of things and to execute all the duties in which it may involve them; none, however, different from those which they have for years been called to perform, except the single one of superintending their own details, to which they are ready and anxious to prove themselves competent.

Section 4 assimilates the pay to that of the dragoons, according to the law of 1808. As the officers cannot do their duty without horses their pay is made similar to mounted troops. The pay now allowed to topographical engineers is at that rate, the change would only be in favor of subordinate grades.

Section 5 places them under the rules and articles of war and of established customs in relation to promotions and appointments, after the corps shall have been once organized.

The topographical engineers have been in the habit of considering you as the patron of their establishment, and that to your efforts when in the Senate of the United States they are principally indebted for their present existence. They flatter themselves that no act of theirs has lessened your good feelings towards them since under your more immediate control, or contradicted your anticipations of their usefulness. They feel, therefore, as if they still had a claim on your support, and that whatever tended to enlarge their means and to extend the public benefits to be derived from their exertions, would be in harmony with the enlightened policy which gave to them their present form, and could not fail in meeting with your approbation.

Supported by this expectation and conscious that they have gone no further than the details of those principles in relation to their corps already entertained and expressed by yourself, the topographical engineers respectfully submit the same to your consideration.

No. 340.

[2D SESSION.

#### APPLICATION OF GEORGIA FOR THE REMUNERATION OF CITIZENS OF THAT STATE FOR MILITARY SERVICES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 8, 1827.

IN THE HOUSE OF REPRESENTATIVES, *Wednesday, December 13, 1826.*

The Committee on the State of the Republic, to whom was referred the petition of Colonel William Melton, for himself and others, who performed certain militia services in the years 1792, 1793, and 1794, on the frontiers of Georgia, and praying compensation for the same, reported:

The claim belongs to that class of cases emphatically called the Georgia militia claims, and which have so often been presented to the general government for satisfaction. Your committee believe it to be a just claim, but as firmly believe the obligation for its discharge rests with the general government.

The refusal to satisfy these claims cannot but be a matter of regret if not surprise to Georgia. If there is any one consideration more than another that entitles the federal government to our respect and admiration, it is the uniform good faith with which it has always complied with its pledges; indeed, it is proverbial for this estimable trait, and the unbounded credit which it sustains in all its monied transactions affords ample proof of the fact. But your committee are constrained to believe that in the instance of these claims there is a departure from this elevated and wonted character, doubtless resulting not from design, but from an improper understanding of their true merits. Georgia was one of the first States that readily and heartily entered into the Union under the present Federal Constitution, adopted, as will be recollected, in the year 1787. In that Constitution the States yielded the right to the general government to regulate and conduct the whole military force of the Union, and especially to "call forth the *militia* to execute the laws of the Union, to suppress insurrections, and *repel invasions.*" This was not all: the Constitution tied up the hands of the States from the hostile use of arms, or the engaging "in

war, unless *actually invaded*, or in such imminent danger as will not admit of delay," by which every one must at once perceive there was an undoubted pledge to protect the States. The general government was to *repel invasions*; but when her immediate aid could not be had, and the necessity of defence became so urgent as to admit of no delay, then the States were authorized to fight for themselves; but it must be obvious the general government could not be released from the obligation to pay the expenses, as well when the States, from inevitable necessity, were compelled to protect themselves, as when the invasions were repelled by the general government itself. Protection was due from her by contract; the allowing the States to do it in particular instances was only a modification of the *manner* of affording that protection, leaving her still bound to discharge the cost. The situation of the States, especially the frontier ones, rendered them peculiarly liable to invasions; and from the then recent troubles, as well as the character of the enemy from which invasion might be expected, there can be but little doubt that the very case upon which these claims are founded was fully in the eye of the convention when the Constitution was framed.

From the moment of the adoption of this Constitution, while many of the States, from their internal situation, were rapidly improving in population and wealth, the State of Georgia, as every one knows, was subjected to a constant harassing invasion from this exterminating enemy. The growth of the State was retarded, the progress of improvement was arrested, the arts of industry were suspended, and the whole frontier, four hundred miles in extent, presented a scene of the most heart-chilling massacres and desolating ravages. These bloody and waste-laying depredations could no longer be repelled by the voluntary exertions of the frontier settlers, who alone for years, without the aid of either State or general government, withstood these destructive incursions, and had, nevertheless, greatly extended the settlements of the country. At length a crisis arrived when the frontier had to be abandoned, or defended by a different force from that which had constituted its former support, and in 1792, but five years after the federal government had guaranteed protection against invading enemies, the State of Georgia was constrained to call out her militia, not only under the express authority of that instrument, as contained within the exception above expressed, but by the explicit and now well established direction of General Washington, then President of the United States. Every one knows that this militia was composed of poor men; they were in constant and highly useful service; they were so long in service as to lose the means of support by their honest labor, and their families were deprived of the supplies which usually result from farming pursuits. These are the facts that constitute the claim of the Georgia militia.

There is something peculiarly hard in taking from a State the right to use its military force, except in certain cases, compel the State to contribute to the maintenance of that force under the direction of the government, and in a few years, after having pledged the national faith to give protection, to see that State suffer the most unspeakable injuries from murderous invasions, and refuse her satisfaction for repelling them with her own force, and that force used, too, by every right that could sanctify its exercise. It is this view of the case which authorized your committee to intimate the appearance of a want of good faith on the part of the general government, not, however, designing to charge the same as by any means wilful or intentional. Your committee therefore recommend the following resolution:

*Resolved*, That Congress be respectfully requested to take the Georgia militia claims once more under their serious consideration, and to afford the relief which seems, as Georgia would with great deference allege, to be so justly due to those individuals who defended the frontier of this State against the invasions of the Indians, at a time when the emergency would not admit of delay, and when the general government was not prepared to afford the support and protection contemplated by the Constitution, but was afterwards approved and confirmed by them, and that his excellency the governor be requested to take measures to have this application submitted to Congress.

IRBY HUDSON, *Speaker*.

Attest: WILLIAM C. DAWSON, *Clerk*.

IN THE SENATE, *Saturday, December 16, 1826.*

Read and concurred in.

THOMAS STOCKS, *President*.

Attest: WILLIAM Y. HANSELL, *Secretary*.

Approved December 20, 1826.

G. M. TROUP, *Governor*.

19TH CONGRESS.]

No. 341.

[2D SESSION.]

AMOUNT PAID TO OFFICERS OF THE ARMY ON ACCOUNT OF BREVET RANK FROM 1821  
TO 1825.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 8, 1827.

DEPARTMENT OF WAR, *January 2, 1827.*

SIR: In reply to a letter of the chairman of the Military Committee of the House of Representatives, of the 8th of May last, transmitting a resolution of the House of the 6th of March last, directing the Committee on Military Affairs to inquire and report the amount received by each officer of the army, since the year 1821, who has been brevetted and paid according to his brevet rank, the time for which such pay was allowed, &c., I transmit herewith reports of the Second and Third Auditors, with documents appended to each, lettered A, B, C, respectively, and a report of the Adjutant General of the army, lettered D, which furnish the committee with the information required by the aforesaid resolution.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. JOSEPH VANCE, *Chairman of the Military Committee, House of Reps.*

TREASURY DEPARTMENT, *Second Auditor's Office, December 26, 1826.*

SIR: I had the honor of receiving from you, on the 8th of May last, the copy of a resolution of the House of Representatives of the United States of the 6th of March preceding, which is in the following words: "*Resolved*, That the Committee on Military Affairs inquire and report the amount received by each officer of the army, since the year 1821, who has been brevetted and paid according to his brevet rank; the time for which such pay was allowed; what station or separate post he commanded for which such payment was made; the name and lineal rank of the officer; what amount has been paid to any officer for extra services; to whom paid and for what; where and how employed. Also, to inquire and report the number and grade of officers whose services can be dispensed with without injury to the public service; and also inquire and report the amount actually received for the last three years by the general, field, and staff officers of the army, keeping each year separate, with the name and rank of each officer, and the rule adopted by the department for which brevet pay or extra pay has been allowed," accompanied by your directions that I would report such information in relation to it as this office can furnish.

Agreeably to your instructions, I now beg leave to hand you herewith three statements, which contain all the information the files and records of this office afford on the subjects embraced in the resolution.

The statement marked A exhibits the amount received by each officer of the army for the years 1822, 1823, 1824, and 1825, who has been brevetted and paid according to his brevet rank, and the time for which such pay was allowed, consisting of pay, subsistence, forage, and allowance for servants.

The statement marked B exhibits the amount that has been paid to any officer for extra services, to whom paid, and for what, where, and how employed.

The statement marked C shows the amount actually received for the years 1823, 1824, and 1825, by the general, field, and staff officers of the army, consisting of pay, subsistence, forage, and allowance for servants.

In extending to brevetted officers the compensation of their brevet rank, the accounting officers of the treasury were governed by the act of Congress of the 16th of April, 1818, the first section of which states "that the officers of the army who have brevet commissions shall be entitled to and receive the pay and emoluments of their brevet rank when on duty and having a command according to their brevet rank." Their *station*, therefore, did not enter into the consideration of the accounting officers in making the allowance, but merely the extent of their command; nor can an answer to that part of the resolution be furnished by this office.

The compensation allowed officers for disbursements on account of arsenals, and the payments for extra services to such officers of the army as were stationed at the seat of government, were predicated on the regulations of the War Department of the 27th of February and the 10th of August, 1818. In all other cases the accounts received the special sanction of the Secretary of War.

I have the honor to be, very respectfully, sir, your most obedient servant,

WM. LEE.

Hon. JAMES BARBOUR, *Secretary of War.*

\* Those officers to whose names this mark is prefixed were allowed their brevet pay and emoluments by the special decision of the President of the United States.

## B.

Statement of the amount of extra compensation paid to the officers of the army between the 1st of January, 1822, and 31st of December, 1825; prepared in pursuance of a resolution of Congress at their last session.

To whom paid.	Rank.	For what services allowed, where, and how employed.	Amount.
Winfield Scott.....	Brevet major general...	For the estimated difference between his pay and emoluments as major general and as brigadier general, from July 1, 1824, to March 31, 1825, while engaged in revising and publishing the book of Infantry Tactics and the Regulations of the Army, at \$6 per day.	\$1,644 00
John Anderson.....	Topographical engineer.	For a per diem of \$1 50, on duty in the vicinity of the lead mines in the State of Illinois and Territory of Michigan, from December 24, 1822, to September 30, 1823.	420 00
T. P. Andrews.....	Paymaster.....	For a per diem as above, from October 1 to April 28, 1825.	864 00
		For services as a special agent for 170 days, in 1825, to Georgia and to the Creek nation of Indians, at \$5 per day.	850 00
I. Roberdeau.....	Topographical engineer.	For extra services in the Engineer department, from January 1, 1822, to December 31, 1825, at \$1 25 per day.	1,826 25
Trueman Cross.....	Assistant quartermaster.	For extra services in the office of the Quartermaster General, from January 1, 1822, to Dec. 31, 1825, at \$1 25 per day.....	\$1,826 25
		For extra services while engaged in compiling for publication the laws of the United States relating to the army and the militia, being the difference between the compensation of a captain of infantry and that of a major of cavalry, from January 1 to Nov. 30, 1825.....	934 90
William Wade.....	Brevet major.....	For extra services rendered in the Ordnance office, from January 1, 1822, to December 31, 1825, at \$1 25 per diem.	2,761 15
			1,826 25
James H. Hook.....	do.....	For extra services rendered in the office of the Commissary General of Subsistence, from January 1, 1822, to December 31, 1825, at \$1 25 per diem.	1,826 25
Charles J. Nourse.....	do.....	For services rendered in the office of the Adjutant General, from March 25 to July 23, 1825, at \$1 25 per diem.	150 00
John L. Smith.....	Captain.....	For extra services rendered in the office of the Chief of Engineers, from January 1, 1822, to December 31, 1825, at \$1 25 per diem.	1,826 25
Thomas Hunt.....	do.....	For extra services in the office of the Commissary General of Subsistence, from September 27, 1824, to December 31, 1825, at \$1 25 per day.	575 00
M. M. Payne.....	do.....	For two and a half per cent. commission on disbursements in the first quarter of 1824, erecting buildings at the arsenal near Augusta, Georgia.	31 20
John L. Gardner.....	do.....	For extra service rendered in the office of the Quartermaster General, from January 1, 1822, to December 31, 1825, at \$1 25 per diem.	1,826 25
Samuel Cooper.....	Lieutenant.....	For extra services in the office of the Adjutant General, from January 1, 1822, to July 13, 1825, at \$1 25 per diem.	1,612 50
Thomas Johnson.....	do.....	For extra services rendered in the office of the Quartermaster General, from January 1, 1822, to January 20, 1825, at \$1 25 per diem.	1,395 00
John Farley.....	do.....	For extra services from July 8, 1824, to December 31, 1825, in the office of the Chief of Engineers, at \$1 25 per diem.	677 50
E. Kirby.....	do.....	For extra services from May 28 to August 4, 1824.....	86 00
C. Burdine.....	do.....	For extra services, locating quarter sections of land and exploring the lead mine country, in 1822.	180 00
J. Symington.....	do.....	For extra services at the arsenal at Baton Rouge, from January 1 to Sept. 30, 1822, at \$1 per diem.....	\$273 00
		Commission of two and a half per cent on disbursements made between October 1, 1822, and April 30, 1823.....	43 87
M. Thomas.....	do.....		316 87
		For superintending the repairs of arsenals, from March 19 to December 31, 1823, 288 days, at \$1 per day.	288 00
T. W. Tone.....	do.....	For extra services rendered in the office of the Chief of Engineers, from April 1 to December 31, 1825, at \$1 25 per diem.	343 75
J. D. Lagnel.....	do.....	For extra services rendered in the office of the Chief of Engineers, from September 16 to December 31, 1825, at \$1 25 per diem.	193 75
D. H. Vinton.....	do.....	For extra services rendered in the Ordnance office, from October 27 to December 31, 1825, at \$1 25 per diem.	82 50
W. B. Davidson.....	do.....	For extra services rendered in the office of the Adjutant General, from July 22 to December 31, 1825, at \$1 25 per diem.	203 00
C. Burdine.....	do.....	For extra services rendered between September 17, 1822, and August 18, 1823, exploring the lead mines of the Upper Mississippi.	427 00
E. R. Alberti.....	do.....	For extra services, shipping ordnance and quartermaster's stores at Amelia island, from September 23 to November 19, 1822, 58 days, at \$1 25 per diem.	72 00

## B.—Statement of the amount of extra compensation paid to officers of the army, &amp;c.—Continued.

To whom paid.	Rank.	For what services allowed, where, and how employed.	Amount.
J. A. Brereton.....	Assistant surgeon.....	For extra services rendered in the office of the Surgeon General and for attending Indians at the seat of government, from January 1, 1822, to December 31, 1824, at \$240 per annum..... \$720 00 For services as above, from January 1, 1825, to November 30, 1825, at \$1 25 per diem... 420 00 For services as above, from December 1 to 31, 1825, at \$1 per diem..... 31 00	\$1,171 00
W. E. Williams.....	Lieutenant.....	For extra services rendered in the office of the Adjutant General, from February 1 to 5, 1822, and from May 5, 1822, to April 15, 1823, at \$15 per month.. \$187 50 For extra services at Greenleaf's Point, from June 15 to September 30, 1823, at \$1 per diem..... 107 00 For commission of two and a half per cent. on disbursements at Greenleaf's Point in the first of 1823, and first, second, and third quarters of 1824..... 106 82	401 32
C. Wharton.....	do.....	For extra services rendered in the office of the Quartermaster General, from August 5, 1824, to December 31, 1825.	642 50
H. Smith.....	do.....	For services as recorder to a board of general and field officers for the revision of infantry tactics, &c., and in the superintendence of the publication thereof, from July 1 to February 28, 1823..... \$126 00 For services as recorder to a board of general and field officers, as above, from April 1 to May 11, 1825..... 62 36	188 36
P. H. Galt.....	do.....	For services as recorder, &c., as above, from July 1, 1824, to January 31, 1825, and from February 1 to May 12, 1825.	392 70
T. G. Mower.....	Surgeon.....	For commission of two and a half per cent. on disbursements made by him at New York in the 3d quarter of 1825.	13 27
J. A. Adams.....	Lieutenant.....	For commission on disbursements made by him between July, 1823, and June, 1825.	93 77
G. Talcott.....	Captain.....	For commission of two and a half per cent. on disbursements at Watervliet arsenal in 1825.	238 16
T. F. Hunt.....	do.....	For commission of two and a half per cent. on medical disbursements at New Orleans in the years 1822 and 1824.	100 35
J. Symington.....	Lieutenant.....	For services rendered, copying artillery drawings for the Ordnance department, from May 11 to July 18, 1825, at \$1 25 per day.	86 25
James Grier.....	do.....	For services, copying artillery drawings as above, for the same period.	86 25

TREASURY DEPARTMENT, *Third Auditor's Office, December 18, 1826.*

Sir: In pursuance to your directions of the 8th of May last, accompanied by a copy of the resolution of the House of Representatives, of the 6th March preceding, that I would report such information in relation to the subject of it as this office can furnish, I have the honor to transmit to you herewith the following statements, to wit:

A. Exhibiting the amount received by each officer who has been brevetted, and was settled with agreeably to his brevet rank, showing also his lineal and brevet rank, the separate station or post he commanded, and the time for which brevet allowances were made him.

B. Exhibits the names and amount received by officers of the army for extra services, for what, where, and how employed.

C. Exhibits the names and amount actually received by the general, field, and staff officers of the army in each of the years 1823, 1824, and 1825.

From the lateness of the period at which the report is made, it may be proper to state in explanation that, immediately after the receipt of your directions, an examination was begun, when it was soon found to be impracticable to furnish the statement during the then session of Congress, for the reasons which I had the honor to state in my letter to you of the 10th May, and to which I beg leave to refer you. Since then the examination has continued, embracing, as therein suggested, the greater part of the settlements made in the office for the period embraced in the resolution, this being indispensably necessary from the circumstance that no special accounts are kept for either of the items called for, they being charged to the appropriation to which the service appertained, in common with all other expenditures belonging to the same.

I have the honor to be, very respectfully, your obedient servant,

PETER HAGNER, *Auditor.*

HON. JAMES BARBOUR, *Secretary of War.*

## A.

*Statement exhibiting the names and amount received by brevetted officers of the army of the United States, in the years 1822 to 1825, inclusive, on account of fuel, quarters, transportation of baggage and forage, in addition to the allowances according to their lineal rank, ascertained from accounts settled in the office of the Third Auditor; prepared in pursuance of a resolution of the House of Representatives, of March 6, 1826.*

NOTE—The monthly returns of regiments heretofore very imperfectly state the "command" of their officers.

R. JONES, *Adjutant General.*

ADJUTANT GENERAL'S OFFICE, December 5, 1826.

19TH CONGRESS.]

No. 342.

[2D SESSION.

STATEMENT OF THE NAMES AND RANK OF THE OFFICERS OF THE REVOLUTIONARY WAR, &c.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 10, 1827.

DEPARTMENT OF WAR, January 10, 1827.

SIR: In compliance with the resolution of the House of Representatives of the 8th instant, directing the Secretary of War "to report to this House the name and rank of each officer of the continental army who served to the end of the revolutionary war, and who were by the resolution of Congress entitled to half pay during life; and also, as nearly as practicable, the names of the surviving officers and their places of residence," I transmit herewith a list of the names and rank of the officers of the revolutionary war, as complete as the records of the department will furnish, with the exception of foreign officers. There is no evidence in the department to show which of them "were by the resolution of Congress entitled to half pay during life," nor is it known which of them are still living, with their places of residence, except those who are on the pension list.

Very respectfully, &c.,

JAMES BARBOUR, *Secretary of War.*

The SPEAKER of the House of Representatives.

*Schedule of the names and rank of most of the officers of the war of independence chiefly returned as belonging to the lines or corps of the thirteen original United States soon after said army was disbanded in 1783; arranged alphabetically, and numbered distinctly according to States.*

19TH CONGRESS.]

No. 343.

[2D SESSION.]

ON CONSTRUCTION OF ACT TO REDUCE AND FIX THE MILITARY PEACE ESTABLISHMENT,  
AND ADVERSE TO THE APPOINTMENT OF PAYMASTER GENERAL TOWSON AS A  
COLONEL OF ARTILLERY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 11, 1827.

Mr. DRAYTON, from the Committee on Military Affairs, to whom was referred that part of the President's message which relates to "a difference of opinion between the late President of the United States and the Senate with regard to the construction of the act of Congress of March 2, 1821, to reduce and fix the military peace establishment of the United States," reported:

That the act referred to enacted that from and after June 1, 1821, the military peace establishment of the United States should consist of four regiments of artillery, twenty-seven regiments of infantry, with such officers of engineers, of ordnance, and of the staff as should therein be provided for; that the corps of engineers, (bombardiers excepted,) and the topographical engineers and their assistants, should be retained in service as then organized; that the ordnance department should be merged in the artillery; and that the President of the United States should cause to be arranged the officers, non-commissioned officers, artificers, engineers, and privates of the several corps then in the service of the United States in such manner as to form and complete out of the same the force authorized by the act, and should cause the supernumerary officers, non-commissioned officers, musicians, and privates to be discharged. On the 2d of March, 1821, there were twelve colonels in service, viz: one of riflemen, one of ordnance, one of engineers, one of light artillery, and eight of infantry. By this act the army was to be new modelled; its number was to be reduced from 10,000 to 6,000 men; the artillery, before divided into battalions, with the regiment of light artillery, and the ordnance department, were to be formed into four regiments of artillery; the regiment of riflemen was to be discharged; and the eight regiments of infantry were to be reduced to

seven. From this statement of the situation of the army on the 2d of March, 1821, and after the law of that date should be acted upon, it is obvious, in order to effect its provisions, that many officers must be discharged. Congress, taking into consideration the serious injury which would result in many cases from officers being compelled to abandon the profession to which they had dedicated themselves, to diminish this evil as far as was practicable, specially provided that the President of the United States should arrange the officers of the several corps then in service in such manner as to form and complete out of the same the force authorized by the act of March 2, 1821.

Upon recurring to the Journal of the Senate during the 1st session of the 17th Congress, your committee perceive that the then President and the Senate differed in the construction of the act of March 2, 1821. The President contended that he had the power under that act to appoint Colonel Towson, paymaster general, to the colonelcy of the second regiment of artillery, and did so appoint him, upon the ground that the pay department constituted one of the corps of the army, and therefore that the paymaster general might be assigned to the command of the second regiment of artillery. The Senate refused to confirm this appointment, because they did not conceive that the paymasters formed a part of the corps of the army, from which alone an officer could be taken. Your committee, called upon to express their opinion as to this difference between the President and the Senate, submit that, in their judgment, the President was under an error. The paymasters are nowhere termed a corps of officers, either in our laws or regulations, or in the laws or regulations of Great Britain. They are considered in both countries as a part of the civil staff, as are the purchasing and medical departments. To the paymaster general in our service a specific salary is given, and to the paymasters the pay and emoluments of majors are allowed; but upon none of them is any rank or command conferred. It will not be questioned that all officers of corps in the service of the United States are subject, without any express provisions, to the rules and articles of war; and yet the 6th section of the act of April 25, 1816, specially enacts that all "paymasters, commissaries, and storekeepers shall be subject to the rules and articles of war in the same manner as commissioned officers: *Provided, also,* That all officers of the pay and commissary departments be submitted to the Senate for their confirmation in the same manner as officers of the army." If a paymaster, a non-combatant, having no rank, is to be regarded as an officer of a corps who may be appointed to a regiment, upon a parity of reasoning might a surgeon, a chaplain, or a storekeeper be so regarded. They are as much a part of the corps of the army as a paymaster: like him they have no rank; like him they have neither command nor assimilated rank.

In the 6th paragraph of the 3d article of the Army Regulations it is provided that "no officer of the staff not having lineal rank, or rank assimilated thereto, shall command any officer whatever having such rank; but, on the other hand, the former shall be subordinate to the latter, under the following restrictions: 1st, the commissary general of purchases, the surgeon general, the paymaster general, and the apothecary general to general officers only." Thus paymasters cannot command even the lowest subaltern in the army.

It has always been admitted to be a correct rule in the construction of laws that the meaning of a word in one statute is to be deemed the same as is annexed to it in other statutes upon the same subject-matter. By adverting to acts of Congress relating to the formation or organization of the army it will be perceived that the expression "corps" is synonymous with a military body or bodies, and that it is never applied to the civil staff. The 61st of the Rules and Articles of War declares "that officers having brevets or commissions of a prior date to those of the regiment in which they serve may take place in courts-martial and on detachments, when composed of different corps, according to the ranks given them in their brevets or dates of their former commissions, but in the regiment, troop, or company to which such officers belong they shall do duty and take rank, both in courts-martial and in detachments which shall be composed only of their own corps, according to the commissions by which they are mustered in the said corps."

According to the 62d of the Rules and Articles, "if, upon marches, guards, or in quarters, different corps of the army shall happen to join or do duty together, the officer highest in rank shall command the whole," &c.

By the 63d of the Rules and Articles, "officers of engineers are liable to be transferred by the President from one corps to another, regard being paid to rank."

By the 66th of the Rules and Articles, "every officer commanding a regiment or corps may appoint, for his own regiment or corps, courts-martial," &c. In all these laws, and in a number of others which could be cited, the word "corps" means a military body, or military bodies.

In the act for the better organization of the general staff of the army, passed March 3, 1813, the different branches of the staff are repeatedly described and alluded to, but always as departments, the term "corps" being never applied to them. In the act for organizing the general staff, and making further provision for the army of the United States, passed April 24, 1816, the paymasters, as well as the surgeons and the commissariat, are referred to as staff or departments, never as "corps."

In the General Regulations for the Army of the United States, the term "corps" is always connected with a military body.—(See article 1, entitled "Rank of corps. The rank of corps shall be as follows: 1. The light or horse artillery. 2. The light dragoons," &c.) Nowhere in the same work is the staff designated as a "corps."—(See section 6, where the civil staff is noticed: "Article 70. Purchasing department. 71. Pay department. 72. Subsistence department. 73. Medical department," &c.)

In the British Army Regulations, (see pages 8 and 9, for the year 1822,) the paymasters, the physicians and surgeons, the chaplains, the storekeepers, &c., are classed together under the head of "civil departments." In the British service, as in ours, paymasters may or may not be taken from the line. In the same regulations, in page 15, as well as in other passages, the term "corps" is made use of to designate a military body, or military bodies.

It is thus evident, if we resort to the meaning of the word "corps" when relating to an army, that in our own laws and regulations, as well as in the British regulations, it is synonymous with a military body; and it also appears from the same authorities that the civil staff is described as a department and not as a corps. If, therefore, the rule of construction which has been laid down be correct, it follows that in the act of March 2, 1821, where the words "corps in service" are used, their meaning is military bodies as contradistinguished from civil departments, one of which the paymasters constitute. This being the meaning of these words, it results that under that act the President could only arrange officers to the army from the military corps or bodies then in existence, and not from a civil department; consequently, the appointment of Colonel Towson, the paymaster general, was not authorized by the law. It would, indeed, seem, from the language of the late President, when he proposed Colonel Towson to the Senate,

that his opinion was not at variance with that which has been expressed by your committee. For he describes that officer as follows: "Nathan Towson, late captain light artillery," to be colonel 2d regiment of artillery. Now, Colonel Towson, when this nomination was offered, was paymaster general, having long ceased to be a captain of light artillery.

As the construction of the act of March 2, 1821, has been referred to your committee, they will proceed to state the manner, according to their opinions, in which the law should have been carried into execution, so far as relates to the vacancy in the 2d regiment of artillery—the only vacancy to be filled up to complete the military peace establishment contemplated by the act of March 2, 1821. Whether your committee advert to the letter or to the spirit of the law, they think that when the army was organized under it, the colonel of the 2d regiment of artillery could only have been taken from the officers of the corps then in service. Your committee do not conceive that it was incumbent upon the President to arrange officers to grades equal to those which they before held; because the law did not require that this should be done. The only limitation imposed upon the President was, that he should take the officers of the new army from the officers of the existing army. It might have been expedient in the transfers to preserve the rank of officers; but such an arrangement was not prescribed. If precedent be resorted to, it will be seen that neither the late President nor the Senate deemed an arrangement of that nature imperative. By the act of March 2, 1821, twelve colonels constituted the whole number of officers of that grade provided for, being the same number of colonels as were then in the service; but Brigadier Generals Macomb and Atkinson were appointed by the President to regiments with the lineal rank of colonels, and their appointments were confirmed by the Senate. These appointments rendered it impossible that all the colonels could be transferred to the command of regiments. Lieutenant Colonels Fenwick and House were appointed colonels of artillery by the President, with the confirmation of the Senate; their promotion, therefore, displaced two other colonels. Other instances of promotions and reductions might be cited; but these are sufficient, so far as precedents are sufficient, to demonstrate that neither the President nor the Senate considered that the rank of the officers in the new army was to be governed by their former rank. In executing the law of 1815 for fixing the military peace establishment of the United States, precedents were afforded in accordance with those which have been specified as having occurred under the act of March 2, 1821; and the act of 1815 is expressed in the same language, and had in view precisely the same objects as the act of March 2, 1821.

The President, after organizing the army according to the provisions of the act of March 2, 1821, was to discharge "the supernumerary officers, &c., from the service of the United States." If a place in the army of 1821 could be found for an officer then in the service, he could not be regarded as a supernumerary. If, upon a presumption that the paymaster general was eligible to the command of the 2d regiment of artillery, the President appointed him to that rank, it would follow, if the paymaster was not eligible, that the vacancy in the army, which was to be supplied by him, still remains. If that vacancy remains, the President is bound to fill it up, and, in doing so, he must take for that purpose an officer of the corps in service in 1821, although such officer may have been formally discharged; because if there was a vacancy, he was not a supernumerary, and therefore could not rightfully be discharged. Who that officer ought to be your committee do not feel themselves at liberty to suggest, as the House of Representatives are not constitutional advisers of the Executive; but your committee, considering that as done now which ought to have been done in 1821, submit that when this officer shall be appointed, his rank, pay, and emoluments ought to be the same as he would have enjoyed had he been arranged when the army was reduced in 1821.

As some objections might be raised against the appointment of an officer to fill up a vacancy in a regiment after June 1, 1821, from and after which period the act of March 2, 1821, enacted that the military peace establishment of the United States should be composed of four regiments of artillery and seven regiments of infantry, &c., your committee would remark that the language of the law expresses nothing more than what should constitute the military peace establishment from and after June 1, 1821; but does not interdict the completion of the establishment after that day, should it not have been previously effected.

In order therefore to obviate the difficulty in the execution of the act of Congress of March 2, 1821, your committee report a bill.

19TH CONGRESS.]

No. 344.

[2D SESSION.]

## ARMY REGISTER FOR THE YEAR 1827.

COMMUNICATED TO THE SENATE JANUARY 11, 1827.

DEPARTMENT OF WAR, *January 10, 1827.*

SIR: I have the honor to transmit herewith, conformably to a resolution of the Senate of the 15th December, 1815, a copy of the Army Register for each member.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The PRESIDENT of the Senate.

VOL. III.—71 a

## Army Register for 1827.

MILITARY ACADEMY, WEST POINT, NEW YORK.

INSPECTOR.

Brevet Major General Alexander Macomb, chief engineer, *ex officio* inspector of the Military Academy.

SUPERINTENDENT AND COMMANDANT.

Brevet Lieutenant Colonel S. Thayer, corps of engineers.

INSTRUCTOR OF TACTICS.

Brevet Major W. I. Worth, first artillery.

ASSISTANT INSTRUCTORS.

Captain Ethan A. Hitchcock, first infantry.  
 Second Lieutenant James Greer, fifth infantry.  
 Second Lieutenant William A. Thornton, fourth artillery.  
 Brevet Second Lieutenant John M. Berrien, second infantry.

INSTRUCTOR OF ARTILLERY.

First Lieutenant Z. I. D. Kinsley, third artillery.

ACADEMIC STAFF.

PROFESSOR OF NATURAL PHILOSOPHY.

Jared Mansfield.

ASSISTANT PROFESSORS.

First Lieutenant Samuel S. Smith, third artillery.  
 Brevet Second Lieutenant Thomas S. Twiss, corps of engineers.

PROFESSOR OF ENGINEERING.

Captain David B. Douglass.

ASSISTANT PROFESSORS.

Second Lieutenant George S. Green, third artillery.  
 Brevet Second Lieutenant William H. C. Bartlett, corps of engineers.

PROFESSOR OF MATHEMATICS.

Charles Davies.

ASSISTANT PROFESSORS.

Second Lieutenant Edward C. Ross, fourth artillery.  
 Second Lieutenant Robert P. Parrot, third artillery.  
 Second Lieutenant Thomas J. Cram, fourth artillery.  
 Cadet Charles Mason, third class.  
 Cadet William H. Harford, third class.  
 Cadet Robert E. Lee, third class.  
 Cadet C. P. Buckingham, third class.

CHAPLAIN AND PROFESSOR OF ETHICS.

Rev. C. P. M'Ilvain.

ASSISTANT PROFESSOR.

Second Lieutenant Bennett H. Henderson, first artillery.

PROFESSOR OF CHEMISTRY AND MINERALOGY.

Dr. John Torrey.

ASSISTANT PROFESSORS.

Second Lieutenant William F. Hopkins, fourth artillery.  
 Second Lieutenant William Bryant, third artillery.

TEACHERS OF THE FRENCH LANGUAGE.

Claudius Berard.  
 Joseph Du Commun.

ASSISTANT TEACHERS.

Brevet Second Lieutenant Charles G. Ridgeley, first infantry.  
 Cadet James Barnes, third class.

TEACHER OF DRAWING.

Thomas Gimbrede.

ASSISTANT TEACHER.

Brevet Second Lieutenant Theophilus B. Brown, fourth artillery.

SWORD MASTER.

Louis S. Simon.

MILITARY STAFF.

QUARTERMASTER.

Captain Æneas Mackay, third artillery.

SURGEON.

Dr. W. V. Wheaton.

PAYMASTER AND TREASURER.

First Lieutenant Thomas J. Leslie, corps of engineers.

ADJUTANT.

Second Lieutenant H. H. Gird, fourth artillery.

The western department comprises all west of a line drawn from the southernmost point of East Florida to the north-west extremity of Lake Superior, taking in the whole of Tennessee and Kentucky; and the eastern department all east of such line.

The headquarters of the general-in-chief is in the District of Columbia.

The headquarters of the commanding general of the western department is at Cincinnati, Ohio; and the headquarters of the commanding general of the eastern department is at Governor's island, New York.

Cadets, acting as supernumerary officers in the army by brevet commissions, will be promoted successively to vacancies which may occur in the lowest grade of the arm to which they may be attached conformably to the rank held by each on the merit roll when recommended for promotion.

Those officers whose stations are changed by transfers and promotions will report for duty accordingly.

By order:

R. JONES, *Adjutant General.*

[2D SESSION.]

## RELATIVE TO THE ESTABLISHMENT OF AN ARSENAL IN MAINE.

COMMUNICATED TO THE SENATE JANUARY 11, 1827.

DEPARTMENT OF WAR, *January 11, 1827.*

SIR: In compliance with your request, in your letter of the 29th ult., for an estimate of "the expense which would attend the erection of an arsenal in Maine," and my opinion "as to Augusta in that State being a proper site for it," I have the honor to enclose a report from the colonel of ordnance on both of the points contained in your letter.

I have the honor to be your obedient servant,

JAMES BARBOUR.

Hon. W. W. HARRISON, *Chairman Committee on Military Affairs, Senate.*

ORDNANCE DEPARTMENT, *January 11, 1827.*

SIR: In reference to the resolution of the Senate, instructing the Committee on Military Affairs to inquire into the expediency of establishing an arsenal in the State of Maine, which, with the letter of the honorable chairman of that committee, you have referred to this department, I have the honor to state that the establishment of an arsenal in the State of Maine is not considered essentially necessary at the present time.

An extensive arsenal has been several years established at Watertown on the tide waters of Boston harbor, within a few miles of the city of Boston.

This arsenal has been considered sufficient for supplying all the military stores required for the use of the United States troops, and for the fortifications on the coast north of Cape Cod. The number of forts in that section of the country north of Boston harbor, now occupied by the United States troops, is only three, and these are garrisoned by one company each. For the supply of this limited force an arsenal in addition to that at Watertown is not considered at all necessary.

In time of war the number of United States troops in that quarter would doubtless be greatly increased; and in case of an attack being made or threatened on that part of the coast large numbers of the militia would no doubt be assembled. In cases of this kind the troops would probably be assembled in haste, and upon such short notice as would not allow sufficient time for obtaining supplies from the arsenal at Watertown. To provide for such emergencies a small depot of artillery, small arms, and ammunition, placed in some secure and convenient position, it is conceived, would be necessary. A small establishment only would, however, be required for this purpose, as it would be used merely as a *depot* for military stores, and not as an arsenal of construction where artillery and other important military supplies would be fabricated. For this latter purpose the arsenal at Watertown is conceived to be abundantly sufficient for all that section of country.

The buildings necessary for a small depot, upon a scale sufficient to meet the wants of that section of the country, would consist of an arsenal for small arms and accoutrements; a magazine for powder and ammunition; a gun-house for artillery; and a dwelling for the keeper. And it is estimated that these can be erected for about fifteen thousand dollars.

As it respects the inquiry, whether Augusta, in the State of Maine, is a suitable position for an arsenal? I have to state that the information in possession of this department respecting the topography of Maine is too limited to warrant its giving any opinion upon that point.

I would, however, beg leave to suggest that in the event of its being decided to establish an arsenal in Maine, an experienced officer should first examine the country with a view to the selection of the most suitable position for the purpose. And that upon his report, and upon such information as may be otherwise obtained, the position should be determined by the Secretary of War.

I have the honor to be, sir, very respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance service*

Hon. JAMES BARBOUR, *Secretary of War.*

19TH CONGRESS.]

No. 346.

[2D SESSION.]

## ON THE SUBJECT OF AN INCREASE OF THE NUMBER OF OFFICERS OF THE ORDNANCE CORPS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 13, 1827.

WAR DEPARTMENT, *January 13, 1827.*

SIR: I transmit herewith a report of the colonel of ordnance in relation to a proposed increase of officers who shall be permanently placed on ordnance duty. The views appear in general sound, and concurring with the colonel in them I recommend them to the favorable consideration of the committee, with a request that if the committee concur to have the subject brought before the House.

The organization of the ordnance which I should consider the most efficient and economical would be to constitute a distinct corps to be assigned to ordnance service. If, however, the committee should esteem this to be more expensive in regard to the pay of such a corps, I would then suggest that the department be made to consist of one colonel, two majors, and ten captains, leaving to be supplied by details from the artillery as many lieutenants as the service may require. But in relation to economy, I regard the superior efficiency to be expected from a distinct corps in the preservation of materials, and greater responsibility which could be enforced by it, would more than compensate the mere increase of pay over the present system, or that of the one which provides for an increase of a few in the principal grades, as above suggested.

But as a comparative view of immediate expense may present objections to creating a distinct corps, I would in that case recommend for adoption that plan which I have suggested as being more efficient than the present, that of placing a colonel, two majors, and ten captains permanently on ordnance duty, supplying by details from the artillery as many lieutenants as the service may require.

I have the honor to be, respectfully, your obedient servant,

JAMES BARBOUR.

HON. J. VANCE, *Chairman Military Committee of the House of Representatives.*

ORDNANCE DEPARTMENT, *January 8, 1827.*

SIR: In conducting the business of this department many inconveniencies and difficulties are experienced, which, it is believed, are occasioned by the defects of its present organization. The principles which now govern the appointment and employment of officers in the ordnance service are regarded as defective, for the reason that the frequent changes which are made remove from the service of the department those who, by practice, have become familiar with its duties, and substitutes others who are inexperienced in them. Under this system a large proportion of the officers who may at any time be employed in the department must necessarily consist of those who are unaccustomed to its duties. The advantages resulting from the employment of experienced officers are therefore lost, in a great measure, to this branch of service.

A proper organization of the Ordnance department is considered so essential to an advantageous discharge of the important duties assigned to it, that I beg leave to submit for your consideration the propriety of proposing an amendment to the existing laws in relation to this subject. But, before proceeding to present the views of the department, as to the modifications which are considered necessary, a brief notice of the several acts which have already been passed may not be out of place.

The Ordnance department was first established by an act passed a short time before the declaration of war, in 1812. It was then made to consist of one colonel, one major, four captains, and eight lieutenants, and as many carriage-makers, blacksmiths, artificers, and laborers as the public service might require. At the next session of Congress, in March, 1813, eight lieutenants were added; and at a succeeding session, held in August, 1813, five captains were added, making the department then consist of two field officers, nine captains, and sixteen lieutenants—making in all twenty-seven officers. It remained thus organized during the year 1814. The utility of such a department had become so manifest during that most active and interesting period of our military operations, and an efficient organization of it was considered so essential to the interests of the public service, that Congress, at the session of 1814-15, gave it an entirely new organization. By the act which passed on February 8, 1815, a short time before the close of the war, the objects of the department were much enlarged, and the duties of its officers were very particularly defined. It was formed on the regimental models of a regular gradation in rank, and was composed as follows, viz: one colonel, one lieutenant colonel, two majors, ten captains, and ten each of first, second, and third lieutenants—making in all forty-four officers. A short time after the passage of this act, the war closed; and the same Congress passed the act of March 3, fixing the military peace establishment, leaving the Ordnance department to remain as established by the act of February 8. And it remained thus organized until 1821, when, by the act of March 3, of that year, to reduce and fix the military peace establishment, it was merged in the artillery. By this act, four officers only were specially designated for the performance of ordnance duties; but provision was made for selecting from the artillery such officers as the ordnance service might require.

The principles engrafted into this new system are so entirely opposite to those which prevailed during the late war, and which had grown up and were established under the experience acquired during that period, that a recurrence to the circumstances under which they were adopted may not be considered unnecessary. This entire change of the system which had hitherto prevailed was proposed, it is believed, not with an expectation of rendering the ordnance service more efficient, for no defects in the previous system were alleged, but with a view to the benefits which might result to other branches of service.

In the plan for the reduction of the army, submitted to the House of Representatives December 12, 1820, by the honorable Secretary of War, under a resolution of that House, it was proposed to unite the ordnance and the artillery, but to provide, for the service of the former exclusively, one colonel, one lieutenant colonel, two majors, and seven captains; and to add, by detail from the companies of artillery, as many lieutenants as the service might require. The plan was referred to the proper committee of the House of Representatives, which reported a bill in which no provision was made for the ordnance service. This bill, while under discussion in the House, was amended by a vote of sixty-four to thirty-seven; and the amendment provided for a separate establishment of the Ordnance department, to consist of three field officers, six captains, and eighteen lieutenants—making in all twenty-seven officers. With this provision, the bill passed the House, and was sent to the Senate for concurrence. The committee of the Senate, to which the bill was referred, reported a substitute for the whole bill, which provided only four officers for the ordnance service. During the pendency of this bill in the Senate, a motion was made to amend it, so as to make it retain the Ordnance department, as established by the act of February, 1815. The vote upon this motion was, ayes 18, noes 19; so the amendment was lost by one vote, and the bill passed with a provision for four ordnance officers only, as proposed by the committee of the Senate. This feature of the bill, as it finally passed, providing only four officers, and those of low rank, was essentially different from that which had been proposed in the plan submitted by the Secretary of War, as the latter provided for eleven officers, and four of them of high rank. This number would have been sufficient to

have allowed one officer to direct each of the principal arsenals. It thus appears that the present system was adopted by a bare majority of one vote in the Senate, and against the deliberate conviction of the House of Representatives, as expressed by a vote of nearly two to one.

As an apology for dwelling so long upon the details here presented, I must observe that they are given in order to show that the former system, matured during the late war, and long successfully practiced, was departed from with great reluctance; and that the present one was considered, at the period of its adoption, a measure of very doubtful expediency. Experience has confirmed these doubts, for the system has not answered the expectations which were entertained of it.

The reason assigned in favor of the measure at the time it was adopted was, that by uniting the ordnance and the artillery service, the officers of the latter would be enabled to acquire a practical knowledge of ordnance duties; and in order to effect this object, it was provided by the Army Regulations, published soon after the passage of the act of March 3, 1821, that a portion of the artillery officers should be annually detailed for the ordnance service, and a corresponding number resume their places in the line. The practice since 1821 has been in conformity to this rule; and the whole number of officers detailed at different times during these five years has been one hundred and eleven, of which number *six* only have been continued throughout that period. The average number on ordnance duty at any one time has been about thirty. The frequency of these changes is very detrimental to the service; for it happens in most cases that an officer has barely time to become acquainted with the forms and the ordinary routine of the business to which he is called before he is removed to give place to another equally inexperienced; and besides, a consideration of the fact that the term of service may be short, tends rather to depress than to incite an active exertion to acquire a knowledge of those branches of the service which is considered most difficult of attainment. I am happy to have it in my power to confirm these views by quoting the opinion of that experienced and intelligent officer, Colonel Wool, inspector general, whose attention to the arsenals in his late annual inspections has been so unremitted and arduous, and productive of great benefit to the service. In his recent annual report to you of the 4th ultimo, he observes that "a department so important, and so intimately connected with the successful operations of an army, claims from the government more than ordinary attention. Its organization should correspond with its great responsibility. The principal officers should be permanent, and not subject to changes. They should be men of experience and tried integrity, while those of a subordinate grade should, at least, be active and industrious. These qualifications are too necessary not to be sought for in the selection of officers to take charge of arsenals, particularly where they have not only the care and preservation of much property, but the superintendence of the construction and fabrication of a very considerable portion of the articles required in service, and not unfrequently the disbursements of large sums of money." From these views the inexpediency of the present system is very apparent.

A brief notice, however, of the duties which have by law been confided to the Ordnance department will, perhaps, better serve to show the necessity for a separate organization and a permanent provision for it. By a reference to the act of February 8, 1815, which defines the duties of the department, it will be seen that it is made its duty to provide, to inspect, to preserve, to distribute, and to account for every description of ordnance, carriages, and equipments for artillery, arms, and ammunition required for the permanent military defences of the country, or for the armies in the field. Its duties are extended also to the militia by the act for arming and equipping the whole body of the militia. The appropriations for effecting these objects have at times exceeded one million of dollars per annum, and during the last thirteen years have amounted to more than eleven millions, making the average amount exceed eight hundred and seventy thousand dollars per annum.

The supplies procured by these appropriations consist mostly of imperishable articles, which cannot be hastily provided, and which remain on hand to be preserved for future service. In this respect the ordnance differs materially from all other departments of the military service. The expenditures of the several departments for clothing, subsistence, pay, quartermaster's and medical supplies, are for objects which are transient, which seldom extend much beyond the time present, and which are soon consumed or expended and disappear. Their respective responsibilities do not, therefore, extend much beyond the present application of the means confided to them. The Ordnance department alone retains in its charge the accumulating product of its expenditures, which it is required to preserve and to account for. The value of the military property now in charge of the Ordnance department, embracing that part only which is deposited at or connected with the armories and arsenals, and exclusive of all the ordnance and military stores at the several fortifications, and of the arms which have been provided for or distributed to the militia, is, at the lowest estimate, upwards of nine millions of dollars. The value of the small arms alone exceeds five millions. This great amount of property is in the immediate charge of the ordnance officers, who are held accountable therefor. The ordnance differs, also, from other departments in this, that its duties are less varied in a change from peace to war or from war to peace. Its operations are continued nearly alike in both states, the principal difference consisting in the greater or less amount of ammunition to be prepared, which is effected by simply augmenting or diminishing the number of workmen employed. It differs, also, in another important feature, that of its duties extending to the whole body of the militia of the country as well as to the regular army. It may therefore be said, without claiming more for it than the laws have prescribed, that the duties of the Ordnance department embrace the fabrication and the preservation of all the military weapons of the country, whether for the use of the regular army or of the militia, and that all the most essential military property of the nation that which constitutes its *armament* in peace and in war, is confided to its charge.

The experience and practical knowledge necessary to an advantageous discharge of duties of so varied a character, and of such great responsibility—duties which cannot be well performed without an acquaintance with most of the arts connected with mechanical philosophy, and with many branches of science—can surely be best acquired under a separate organization, where the officers who may be assigned to those duties can be kept in the constant practice of them; for it is certain that any particular service can be better performed by those who have been long practiced in it than by those who, without previous study or experience, are only temporarily engaged in it.

The duties of the Ordnance department are so different from the duties of the line of the army that the qualifications requisite for an able performance of them must necessarily be different also. The distinction, it is believed, is as wide in this case as it is in regard to that of the corps of engineers; and the utility of a separate organization is conceived to be as obvious in the one case as in the other. In any view which may be taken of the subject, it is believed that whatever reasons have been or may be assigned for preferring a separate organization for any other branch of the military service, the same will apply with equal, if not greater, force in favor of a separate establishment of the Ordnance depart-

ment. It cannot therefore be conceived why the ordnance service alone should remain amalgamated with the line of the army.

It has been before observed that the reason assigned for uniting the ordnance and artillery was, that the officers of the latter, by performing a tour of ordnance service, might acquire a practical knowledge of ordnance duties. This expectation has not been realized to any beneficial extent. Experience has shown that a temporary service at arsenals is insufficient for the attainment of such knowledge. It is believed, moreover, that this temporary service at arsenals has proved prejudicial to the service of the line of the army, by reason of so many officers being detached from their respective companies; and it is certain that these measures have been prejudicial to the ordnance service, by reason of its duties being confided to officers inexperienced in them.

In relation to the effect which the present system of detaching officers from their companies has upon the discipline and efficiency of the line of the army, this department has no particular knowledge. For any information which may be considered necessary in this respect, I would respectfully suggest that reference be made to the general-in-chief, to whom, it is conceived, this subject more appropriately refers itself.

With respect to imparting a practical knowledge of ordnance duties to officers of the artillery generally, it is believed that the artillery school of practice at Fortress Monroe (which has been established since the passage of the act uniting the ordnance and artillery) presents much greater facilities for the purpose than temporary service at the arsenals can do. In connexion with the school of practice there has been established at the same place a branch of the Ordnance department, having an artillery laboratory and work-shops for constructing gun-carriages and artillery equipments generally. At this place all the operations of an arsenal are carried on, and, as it regards the variety of operations, they are perhaps greater than occurs at arsenals in time of peace. All the ammunition and artillery equipments made use of at the school are prepared there. By the regulations of the school it is made the duty of all the officers to give personal attention to these operations, which are performed mostly by the soldiers of the line. By this means not only the officers, but the men also, are instructed at the same time; and this is accomplished without separating the officers from their companies, which is not the case when the officers are sent to arsenals. At this school the officers not only witness and participate in all the operations of constructing artillery and its various equipments, and the preparation of all kinds of ammunition and military pyrotechny, but they also witness at the same time, in the habitual practice of their companies, the practical uses to which all the various articles made are applied. These means of imparting a knowledge of ordnance duties, so far as it can be of practical utility to an artillerist, are certainly superior to any which exist at the arsenals; therefore the reason assigned for uniting the ordnance and artillery, that of giving additional means of instruction to the latter, is at this time of no weight, since much better means for accomplishing the same end has been provided in the establishment of the school of practice.

Should the considerations which have been herein presented appear to merit the importance which is ascribed to them by this department, I would respectfully propose that the ordnance be re-established upon the same principles as are contained in the act of February 8, 1815, but with a less number of officers.

The act of February, 1815, has not been repealed; it was modified only by the fourth section of the act of March 3, 1821. A repeal of this section, and a clause amending the first section of the former act, by reducing the number of officers, is the only act of legislation which is considered necessary to effect the change desired.

As to the number of officers necessary to be provided, I would observe that the number now on ordnance service is thirty; and it is believed that this number cannot be materially lessened without detriment to the service. There are sixteen arsenals, four of which require three officers each, seven of them two each, and the remaining five one each. Besides these arsenals, the office at the seat of government requires two at least, the principal and assistant, and frequently a third, as a draughtsman, is necessary. The total number, according to this enumeration, would be thirty-four; but at the arsenals, where only one officer is necessary, it would be better to substitute military storekeepers for commissioned officers. Four of the smaller arsenals are now thus arranged. It is therefore proposed, as a substitute for the provision made by the first section of the act of February, 1815, which provides for forty-four officers, that the department be made to consist of one colonel, two majors, eight captains, eight first and eight second lieutenants, making in all twenty-seven officers. A less number than this, it is conceived, would be inadequate to perform all the duties assigned to the department. The number of carriage-makers, armorers, blacksmiths, artificers and laborers is left unlimited by the act of February, 1815. I would therefore suggest an amendment which should limit the number of these to two hundred and fifty.

If it shall, however, be considered expedient to continue, in part, the present system of details, I would then suggest that the department be made to consist of one colonel, two majors, and ten captains, leaving to be supplied by details from the artillery as many lieutenants as the public service might require.

In favor of this plan, it may be said that it can be effected by a smaller addition to the number of officers at present in service, as it would require only nine new appointments to be made; and, also, that the thirteen ordnance officers, not being subject to change, and the details being confined to the junior officers alone, neither the ordnance nor the artillery service would suffer much inconvenience by this arrangement, while the latter might be benefited by it. It is admitted that this plan would be greatly preferable to the present system, as it would give some degree of permanency to the senior officers of the department, to those upon whom its duties and responsibilities would mainly rest. But it is nevertheless believed, for the general reasons before stated, that the Ordnance department, being dependent on or united with other branches of the military establishment, is incompatible with an advantageous performance of its duties, and that an entire separation of it from other departments, so as to be placed under the immediate control of the Secretary of War, is indispensable to the most efficient and proper exercise of its important functions.

I have the honor to be, sir, very respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance service.*

HON. JAMES BARBOUR, *Secretary of War.*

ORDNANCE DEPARTMENT, *January 23, 1827.*

Sir: I beg leave to submit herewith a few remarks on the details of the proposed reorganization of the Ordnance department, referring to the report of the 8th instant for the general views of the department upon the subject.

It appears that the second plan proposed in that report is preferred, viz: That of appointing permanently one colonel, two majors, and ten captains, and to supply by detail from the artillery as many lieutenants as the service may require. Taking this proposition as a basis, I have embodied the views of the department in the form of a *bill*, which I beg leave to submit to the consideration of the committee.

With respect to the provisions of this bill I would remark, first, that of the thirteen officers proposed *four* are already authorized, viz: the supernumerary captains of the four artillery regiments; there would then remain but *nine* new appointments to be made, viz: one colonel, two majors, and six captains. The additional expense of these officers, supposing them to constitute an *addition* to the present military establishment and to hold no rank in the line of the army, would be, as is shown in the annexed estimate, about eleven thousand six hundred dollars per annum. But it does not necessarily follow that in appointing them any addition should be made to the present number of officers in service, for if they be taken from the line of the army and retain their rank therein, as is the case with the officers of the Quartermaster's department, the number of officers in service would not be increased at all and the expenses would be very little augmented.

There is now on ordnance service, taken from the line of the army by details, exclusive of the four supernumerary captains, one colonel, one major, and three captains. To complete the number proposed by the bill only one major and three captains are required; the additional expense of these, even supposing the major to be taken from among the captains and the three captains from the lieutenants, would be only about fifteen hundred dollars per annum.

It is believed that this plan of appointing officers from the line, without vacating their rank therein or adding to the number of officers in service, would be quite as well for the ordnance service as that of making the appointments entirely separate from the line of the army, as it would give the same degree of permanency to those appointed for ordnance service, which is the point of most material importance. With respect to the expenses of the two plans it is certain that this is greatly preferable to the other as it will cost less by ten thousand dollars per annum. The only objection which it is conceived can be made to it is that it may be inconvenient to the service of the line of the army; but it is presumed that a saving of \$10,000 per annum will more than counterbalance this supposed inconvenience.

In the first section of the bill herewith submitted the words written in *brackets* provide for the appointments being made from the line, and is the form proposed if the less expensive plan is preferred. The omission of these words would give the bill that form which would provide for the other plan creating an additional number of officers.

With respect to the number of enlisted men I would remark that by the act of February, 1815, (which it is now proposed to amend,) the number is left unlimited. By the act of March 2, 1821, (now in force,) the number is limited to fifty-six, a number entirely inadequate to the wants of the service. This number distributed among all the arsenals in the United States gives but three or four to each; the department is therefore obliged to hire workmen to do the work which could be more advantageously performed by enlisted artificers. Two hundred and fifty men it is conceived will be sufficient for all the arsenals; that number is therefore proposed.

The transmission of letters free from postage was authorized by an act relating to the staff of the army, passed March 3, 1813; at that time the colonel of ordnance was called "*Commissary General of Ordnance*," and was so designated in the law exempting his official letters from postage. This law has not been repealed, but in subsequent acts the title of commissary general has been dropped and the title of *colonel of ordnance* substituted. In consequence of this change of name all letters and packets are now charged with postage. The quarterly returns of military stores, and the money accounts and vouchers, with the correspondence of the office is very voluminous, and the charges for postage would amount to four thousand dollars per annum; to avoid this heavy expense the letters and packages have latterly been transmitted through the office of the Secretary of War. This arrangement gives much additional labor to the Secretary, and frequently occasions much inconvenience by the misdirections or misplacing of letters and other official papers.

A clause making the Ordnance department subject to the Rules and Articles of War is considered necessary, in order to remove all doubts of its being subject to them. The settled opinion upon this subject appears to be, that no person or class of persons are subject to the Rules and Articles of War unless they have been made so by express enactment.

In the bills recently reported to the House, concerning the topographical engineers and the Military Academy, it is provided that officers entitled to forage shall receive the prescribed allowance therefor whether they actually keep horses or not. It is desirable that this principle should extend to the Ordnance also, if adopted in the cases mentioned.

I have the honor to be, sir, very respectfully, your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance service.*

HON. JOSEPH VANCE, *Chairman Committee on Military Affairs, House of Representatives.*

*Estimate of the additional expense which would be occasioned by making the Ordnance department consist of one colonel, two majors, and ten captains, if made to constitute an addition to the present military establishment, viz:*

One colonel per annum.....	\$2, 321 36
Two majors, each \$1,719 36 per annum.....	3, 438 72
Six captains in addition to the four supernumeraries now authorized, each \$980 68.....	5, 884 08
Total amount per annum.....	<u>11, 644 16</u>

*Estimate of the same upon the supposition that the officers be taken from the regiments of artillery and retain their rank therein.*

Total amount of compensation to be paid as above.....		\$11, 644 16
From which deduct the amount now received, as officers of artillery, by the same number of officers as is above proposed, viz: one colonel, now on ordnance duty, by detail.....	\$2, 321 36	
One major, now on ordnance duty, by detail.....	1, 719 36	
Three captains, now on ordnance duty, by detail.....	2, 942 04	
For the additional major add, say the pay of a captain of artillery.....	860 68	
For the three additional captains add, say the pay of three lieutenants, each \$740 68.....	2, 222 04	
		<u>10, 065 48</u>

Which is the total amount now received by the number of officers which would compose the department, and which constitute the difference of expense between the two modes suggested.

Difference between the present annual expense and that which would be incurred by the proposed plan of appointing officers from the line.....		<u>1, 578 68</u>
---	--	------------------

The expense of the annual charges made under the present system in the item of transportation alone amounts to about \$500 per annum; this amount was the actual expenditure on account of the changes made during the past year, and the changes were not greater that year than is usual. If this amount be deducted from the last estimate above given it will leave only \$1,078 dollars as the amount of the additional expense which will be occasioned by the passage of the bill.

ORDNANCE DEPARTMENT, *January 23, 1827.*

19TH CONGRESS.]

No. 347.

[2D SESSION.]

ON THE PROPOSITION OF THE STATE OF NEW YORK TO SELL TO THE UNITED STATES  
THE FORTIFICATIONS ON STATEN ISLAND BELONGING TO THAT STATE.

COMMUNICATED TO THE SENATE JANUARY 15, 1827.

*To the Senate and House of Representatives of the United States:*

I communicate to Congress a letter from the Secretary of War, together with a report of the chief engineer, and certain acts of the legislature of the State of New York, proposing to the government of the United States the purchase of the fortifications erected at the expense of the State on Staten island, with the ordnance and other apparatus belonging to or connected with the same. These papers were prepared at the close of the last session of Congress at too late a period to be then acted upon.

JOHN QUINCY ADAMS.

WASHINGTON, *January 15, 1827.*

WAR DEPARTMENT, *May 17, 1826.*

SIR: At the request of Colonel William King, the agent of the State of New York, appointed by the governor of that State to negotiate with the United States for the sale and transfer to them of the fortifications erected by the State on Staten island during the last war, for the defence of the harbor of New York, I have the honor to lay before you an estimate of the actual cost of those fortifications and of the lands belonging to them, and also a return of the quantity of ordnance and ordnance stores, and a sketch of those fortifications, with a report upon the subject from the chief engineer.

Colonel King is desirous that these documents should be communicated to Congress at the present session, in order that the subject may claim the early attention of Congress at their next meeting, as the State of New York wishes to transfer the property alluded to as early as possible, and the principle to be settled on which the government will receive it. With some modifications and improvements, these works enter into the system of defence adopted by the board of engineers for the harbor of New York, and it is therefore desirable that the United States should possess them as early as practicable.

I have the honor to be, with great respect, sir, your obedient servant,

JAMES BARBOUR.

JOHN QUINCY ADAMS, *President of the United States.*

NEW YORK, *May 3, 1826.*

SIR: In compliance with instructions received from your excellency, I proceeded to Staten island to make a survey of the property owned there by this State. A map of this survey, exhibiting the boundaries of the land and a horizontal projection of the forts and other buildings upon it, is herewith submitted.

These fortifications were examined some years since by a board of United States engineers, and their report is in the War Department at Washington, to which recourse may be had for more detailed information respecting them.

I have also the honor to submit to your excellency a copy of an estimate of the value of the stone work of the fortifications, made some time since by Arthur Smith, builder, and John Morse, mason, of this city, both men of high reputation for integrity and mechanical skill. The original estimate is believed to be in the United States War Department. To this estimate is attached the price of the land, which, from its situation, is considered highly valuable, and an exhibit of the sums respectively paid for labor, carpenters' work, timber, iron work, superintendence, miscellaneous expenses, wharf, block-house, and the value of the well in Fort Tompkins. This well, which is 142 feet deep, affords a never-failing supply of pure and wholesome water, four feet deep. These sums have been ascertained from the account books kept by General Morton, formerly clerk of the commissioners of the fortifications.

The commissary general's inventories of ordnance belonging to this State on Staten and Governor's islands are also herewith submitted.

I am not aware, sir, that any further material information can be furnished on this subject.

Very respectfully, your excellency's humble servant,

SALEM DUTCHER, JR.

His Excellency DE WITT CLINTON.

*Cubic measurement of the fortifications on Staten island, by Arthur Smith and John Morse, esqrs.*

FORT TOMPKINS.

*An inventory of the ordnance and munitions of war, the property of the State of New York, at the fortifications on Staten island, taken in the month of December, 1825.*

25 iron 32-pounder ordnance, mounted.  
 2 iron 24-pounder ordnance, mounted.  
 42 iron 24-pounder ordnance, dismounted.  
 1 iron 32-pounder ordnance, dismounted.  
 42 garrison carriages, out of order.  
 42 pent-houses.  
 54 rammers and spongers.  
 40 ladles and 60 worms.  
 100 battery handspikes.  
 50 iron crowbars.  
 9 loggerheads.  
 50 beds and quoins.  
 1 sling or dibble carriage.  
 1 small truck; 10 truck wheels.  
 A quantity of wads.  
 3, 833 round shot, for 24-pounders.  
 1, 655 round shot, for 32-pounders.  
 6 powder horns.  
 6 gunners' belts.  
 6 gimblets; 6 priming wires.  
 6 port-fire stocks.  
 6 lint stocks.

I certify the above to be a true inventory of the property belonging to the State of New York at the fortifications on Staten island, taken December 20, 1825:

ALEXANDER M. MUIR, *Commissary General.*

*A memorandum of ordnance, &c., belonging to the State of New York deposited in Fort Columbus, Governor's island.*

13 iron 32-pounder ordnance, with carriages, &c., complete.

Dated New York, December 20, 1825.

ALEXANDER M. MUIR, *Com. Gen., State of New York.*

ENGINEER DEPARTMENT, *Washington, May 17, 1826.*

SIR: In obedience to your instructions I have examined the estimate of the cost of the fortifications on Staten island, and of the lands connected with them, furnished by the agent of the State of New York, in compliance with the request contained in your letter of November 13, 1825, addressed to John D. Hammond, esq., at that time the agent, which fortifications the State of New York had offered to transfer to the United States, under acts of the legislature passed in February and March, 1818, copies of which are enclosed, and I find only a general estimate of their actual cost, which, exclusive of ordnance, amounts to \$358,861 55½.

If it is the intention of the government to pay for these works at their real cost, the accompanying statement from the books of the commissioners of fortifications must be received as the evidence of their cost, but if the works and lands attached to them are to be paid for at their present value, it would be proper that the department should ascertain their real value by actual admeasurement of the walls, and an estimate founded on the present prices of materials and workmanship, and of the lands, which would require considerable time and could not be effected before the adjournment of the present Congress.

The works, with some modifications, come within the plans projected by the board of engineers for the permanent defence of the harbor of New York, and they ought, in my opinion, with the lands, to be acquired by the United States.

I have the honor to be, very respectfully, sir, your obedient servant,

ALEXANDER MACOMB, *Major General, Chief Engineer.*

HON. JAMES BARBOUR, *Secretary of War.*

AN ACT respecting the settlement of the demands of this State against the United States and for other purposes, passed February 10, 1818.

1 *Be it enacted by the people of the State of New York, represented in senate and assembly,* That the person administering the government of this State is hereby authorized to appoint an agent, with full power to adjust and settle the demands of this State against the United States.

2 *And be it further enacted,* That it shall and may be lawful for the person administering the government of this State to institute a negotiation with the government of the United States for the sale of the fortifications and buildings belonging to this State at the Narrows on Staten island, and the lands connected therewith, and to report the same to the legislature for their consideration.

3 *And be it further enacted,* That the said agent shall obey such instructions as he shall receive from time to time from the persons administering the government of this State, in relation to the powers

given him by this act, and shall also perform such further services as shall be enjoined on him by the person administering the government as aforesaid, for the attainment of the objects contemplated by the next preceding section.

AN ACT to amend an act entitled "An act respecting the settlement of the demands of this State against the United States and for other purposes," passed March 19, 1818.

*Be it enacted by the people of the State of New York represented in senate and assembly,* That the person administering the government of this State is hereby further authorized to institute a negotiation with the government of the United States for the sale of the ordnance and other apparatus belonging to or connected with the fortifications belonging to this State at the Narrows, on Staten island, and to report the same to the legislature at their next session for their consideration.

STATE OF NEW YORK, *Secretary's Office:*

I certify the preceding to be a true copy of an original act of the legislature of this State on file in this office.

ARCH'D CAMPBELL, *Dep. Secretary.*

ALBANY, *March 19, 1818.*

ENGINEER DEPARTMENT, *Washington City.*

SIR: By direction of the Secretary of War, I have the honor to transmit herewith an extract from the report of the board of engineers made to this department in April, 1820, which contains the information which you requested relative to the fortifications on Staten island belonging to the State of New York.

I have the honor to be, very respectfully, your obedient servant,  
A. MACOMB, *Major General, Chief Engineer.*

HON. WM. H. HARRISON, *Chairman of Committee on Military Affairs.*

*Extract from the report of the board of commissioners on the defence of the sea-coast, dated April 7, 1820.*

"Fort Tompkins is placed on the commanding point of the height to the west of the Narrows to protect the batteries of Richmond and Hudson, which defend the passage. This fort lies one hundred and forty feet above the level of the sea, but is commanded at five hundred yards distance southwest by a hillock, which was occupied in the last war for a field redoubt. The ground around Tompkins fort is very broken and rugged, its slopes and declivities very rapid, and offer a great many points of shelter in approaching it. The fort is a regular pentagon, flanked with towers. The whole is casemated, and one of the towers contains a bomb-proof powder magazine. Its circuit measure on the interior crest of the breastwork is four hundred and fifty-six yards. The breastwork is built in stone, is five feet thick, and rises four feet above the rampart. The thickness of the rampart is twenty-one feet, and the height of the scarp nineteen. It has no ditch at present. The original design was to raise a counterscarp by embankments, and to have a covered way with a glacis, to form which the asperities and broken declivities around should have been smoothed and filled up. The *terrepleins* are not filled up, and are in the meantime covered by sheds, which do not prevent the water from filtrating through the arches and seriously damaging them. The site of this fort is convenient for its purpose, *i. e.*, of serving as a *safety redoubt*, and protecting the batteries which defend on this side the passage of the Narrows. But it is to be regretted that the fort itself possesses none of the properties of modern fortification, and satisfies scarcely any of the conditions which it requires. 1. Flanking by round towers is rejected since ages. 2. The wall scarp is not covered on the side where the approaches in a land attack will be made, and even if the projected glacis were finished, a great part of it would yet be seen, sufficient when battered down to form with its ruins a practicable slope to the beach. 3. Stone breastworks are rejected since several ages for the fronts of fortifications which may be attacked by land, as they are so easily destroyed by artillery that the expectation of obtaining a great fire from the platform of the rampart by their means becomes illusory. 4. The casemates are not sufficiently aired; indeed, under the curtains they are not aired at all, and under the four towers they are so distributed as not to leave room for more than sixteen pieces. The arches of the casemates under the curtain rest also on the scarp wall—against the generally received principle of preferring relieving arches; the casemates in their actual state can receive no artillery, and are deprived of openings either towards the exterior or interior; they are thus of no use whatever, except inasmuch as they afford a dark, damp, and unwholesome communication from tower to tower. It is not easy to remedy or palliate such faults; however, as the position is occupied, we shall endeavor to make the best use we can of what has been done. An advanced work should be united on the hill which is now occupied by the field redoubt, so as to retard the approaches upon Tompkins fort, and thus indirectly prolong its resistance. For to prolong it directly by altering the plan of the fort itself would require works too expensive.

"Fort Richmond is a semicircular battery whose radius to the scarp measures forty-six yards. Its gorge is closed by barracks and stores for provisions. It contains a powder magazine and two furnaces for heating balls. This battery has only one story covered by sheds; the scarp wall, which is eight feet thick at top, is pierced with twenty-seven embrasures, at intervals of fourteen feet from middle to middle. Nine of these see the vessels as they are passing up; nine batter them as they pass the Narrows, and the nine others after they have passed. These embrasures are about fifteen feet above the level of low water. It were to be wished that the front of this fort were directed so as to bear more fire upon the ships as they sail up the Narrows. It directs more fire than is necessary against those which have already passed, whilst it would be much more important to batter them during the decisive moments just before and just during the passage. To remedy this defect in the trace of Fort Richmond and augment its fire we propose to add two tiers of guns round the half of its circuit which looks to the entry of the Narrows."

[2D SESSION.]

## RELATIVE TO AN EXCHANGE OF LANDS RESERVED FOR MILITARY PURPOSES IN DETROIT.

COMMUNICATED TO THE SENATE JANUARY 20, 1827.

DEPARTMENT OF WAR, *January 20, 1827.*

SIR: In reply to your letter of the 22d ultimo, transmitting the petition of the mayor, &c., of Detroit, relating to the sale of the United States arsenal in that city, and requesting my opinion upon the expediency of granting their request, I transmit herewith a report of the Ordnance department thereon, with whose views I concur. The petition is herewith returned.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. WM. H. HARRISON, *Chairman of Military Committee, Senate.*

ORDNANCE DEPARTMENT, *Washington, January 18, 1827.*

SIR: I have the honor herewith to return the petition of the corporation of the city of Detroit, concerning certain public property within that corporation, which has been referred to this department, together with a letter upon the subject from the Hon. W. H. Harrison, of the Senate, of the 22d ult.

In relation to the expediency of making an exchange of the remaining public grounds and buildings in the city of Detroit for others in the neighborhood, it is understood that one or more sites near that city can be obtained, which, if improved, would be equally as convenient as the other.

With respect to the condition upon which it would be proper to surrender the possession of the property to the city of Detroit, it is recommended, in lieu of those mentioned in the petition, that the corporation shall furnish in exchange another site and buildings; the site to be situated and the buildings to be erected under the superintendence of the War Department, the United States to continue to occupy their present establishment until the other shall be completed and delivered ready for the reception and protection of the public stores now, and which the public interest requires should remain, at Detroit. This is the basis upon which the act of May 20 last was fixed, by which a portion of this same property was then granted to the city of Detroit.

I have the honor to be, sir, your most obedient,

G. BOMFORD, *Brevet Colonel, on Ordnance Service.*

HON. JAMES BARBOUR, *Secretary of War.*

*To the Senate and House of Representatives of the United States of America in Congress assembled:*

The petition of the mayor, recorder, and aldermen of the city of Detroit in common council convened, respectfully represents: That after the liberal donation made at the last session of Congress to the city of Detroit, they do not again appear before you to ask another benefaction; but the public property yet held by the general government within the limits of this city is a serious inconvenience to us, and without any corresponding advantage to the United States.

There is a small stone arsenal with no adjoining buildings except a frame dwelling-house and about one and a half acre of land. This property is now almost surrounded by private buildings, and will soon be in the heart of the city. More or less fixed ammunition is always deposited there, and it is therefore more or less dangerous to the vicinity. Besides, in the event of any future difficulties in this quarter, it would be the first object of an enemy's attack, and being wholly defenceless, it would attract their attention towards the town and probably lead to its destruction. Certainly such an establishment, either with relation to its immediate or future consequences, ought not to be located in the midst of a place which, like this, is rapidly increasing, and is destined at no distant day to be the mart and depot of an extensive region.

Immediately in front of the arsenal is a brick storehouse, belonging also to the United States, and a considerable space of ground along the river attached to it. A just regard to our convenience also requires that this property should be sold.

The margin of the river is shallow, and the United States yet hold one hundred and fifty feet along it. Above, docks have been thrown out to the channel, and the current is thus intercepted. The consequence is that there is here a large body of dead water where filth is continually accumulating and depositing, and the health of the city is thus visibly affected. There is no doubt but that much of the autumnal fever which prevailed this year was owing to this cause. And it is obvious that it must continue till decisive means are taken to fill up this shallow part of the river to the current.

This, the United States have not sufficient interest to do. It would require a considerable expenditure, and it can only be accomplished by dividing the ground into small lots and selling them, thus leaving to individual enterprise what it will then be interested to execute.

The temporary deposit of articles in the public store destined for the upper lakes is certainly no object compared with the consideration we have stated. And even should it be considered necessary to make deposits within the city, the storage could be a matter of no consequence, as the property would be merely *in transitu*.

But the whole location considered in reference to a military establishment is injudicious. We humbly trust that the day is not remote when the policy of erecting permanent military defences upon this frontier will be appreciated and adopted. There is little doubt but the proper site for such an establishment is at the Spring Wells, three miles below the city. Every military man who has viewed that position has accorded with that opinion. *There* should be the principal depot of the country.

The erection of a magazine, arsenal, and storehouse would be sufficient for the present purposes of the government, and they are all the public buildings now held here. They might be erected upon a much more extensive scale than at present, and for a portion only of the amount for which the property might be sold.

They would then be secure and in the position which must be ultimately taken before this frontier can be considered safe from the ordinary calamities of war.

We therefore humbly request that we may be authorized to divide this property into lots, and to direct its disposition. We are desirous of having the control of it in order to insure a uniformity of plan with the other property, and that we may provide for the all-important object of health. We are willing to dispose of the property and to guarantee the application of the proceeds to the purchase of land and the erection of the necessary buildings at the Spring Wells, or to pay the amount to the receiver of public moneys at Detroit.

But to defray the expenses of this arrangement and to aid us in filling up the shallow portion of the river in front of this property, where streets and other vacant spaces may prevent a sale to individuals, an object of the last importance to the city, we request that twenty-five per cent. of the purchase money may be paid over to the city treasury. And your petitioners, as in duty bound, &c.

J. KEARSLEY, *Mayor*.  
 JOS. W. TORREY, *Recorder*.  
 PETER I. DESNOYERS,  
 THOMAS PALMER,  
 M. CHAPIN,  
 D. G. JONES,  
 ANTOINE DEQUINDRE,  
*Aldermen.*

[19TH CONGRESS.]

No. 349.

[2D SESSION.]

IN FAVOR OF ALLOWING BOUNTY LAND AND PAY DUE TO A SOLDIER ERRONEOUSLY  
 RETURNED AS A DESERTER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 23, 1827.

Mr. MARKELL, from the Committee on Private Land Claims, to whom was referred the petition of Chad Miller, a soldier of the late war, for bounty land and for back pay, reported:

That the petitioner states in his memorial that he enlisted in the service of the United States during the late war on or about the 13th day of July, 1814, and then received \$50, part of his bounty; that after marching three days with his company he deserted, and at the expiration of one week delivered himself up, at Fort Trumbull, to Captain Riley Sweet, in consequence of and under a proclamation of the President of the United States offering a pardon to all those who returned to the service; that he then continued in service until April 10, 1815, at which time, it being understood that peace had been made, and there being then no funds at said post to pay off those soldiers whose term of enlistment had expired, he went home a few weeks, and then returned for the purpose of receiving his back pay; that on his return he learned that funds having in the meantime arrived, the other soldiers who had enlisted during the war had received their pay and discharge, and that he had been returned to the War Department by Captain Riley Sweet as a deserter, and therefore could not receive his back pay, and for the same cause could not, on application to the War Department, draw his bounty land.

It appears by the certificate of Captain Riley Sweet that said Miller did deliver himself up to him, the said Captain Sweet, at Fort Trumbull, on the 10th day of August, 1814, "in consequence of the President's proclamation respecting deserters," and that he continued faithfully on duty until April 10, 1815.

It also appears by the certificate of Captain Sweet, dated September, 1825, that those soldiers who had enlisted during the war were allowed, after the declaration of peace, to go out to work, "as it was a general impression of the officers that they had no longer a right to command their services, as their terms of enlistment were supposed to have expired, and that they were detained only for the purpose of receiving their pay." On an application by said Miller for his bounty land and back pay at the Treasury Department, he was refused the same, as appears by a statement made in the Third Auditor's office, October 13, 1819, on the ground that he appeared from the rolls of Captain Sweet's company, on file in that office, to have deserted on the 10th day of April, 1815. On examination, it is found that the President issued a proclamation, dated June 17, 1814, which was published in the National Intelligencer of the 21st of June, whereby he offered a full pardon to all deserters who should return to any post of the United States within three months. Under these circumstances, your committee are of opinion that the desertion of said Miller, in 1824, was purged by his delivering himself up at Fort Trumbull, in August, 1814, under the aforesaid proclamation of the President; and that his absenting himself from his post in April, 1815, did not amount to desertion, the treaty of peace having been ratified on the 17th day of February preceding; and that Captain Sweet committed an error in returning him for that act as a deserter, his term of enlistment having expired; and are therefore of opinion that he is entitled to his bounty land and back pay, and for that purpose report a bill.

19TH CONGRESS.]

No. 350.

[2D SESSION.]

IN RELATION TO THE ERECTION OF BARRACKS, QUARTERS, STOREHOUSES, &c., AT  
VARIOUS MILITARY POSTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 25, 1827.

DEPARTMENT OF WAR, *January 17, 1827.*

SIR: In reply to your letter of the 13th instant, enclosing a resolution of the House of Representatives of the 11th instant, referring so much of the report of the Secretary of the Treasury as relates to estimates of appropriation for certain barracks, quarters, storehouses, &c., to the Military Committee, and requesting information thereon, I transmit herewith a report of the Quartermaster General, which furnishes the information required.

The original resolution is herewith returned.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. JOSEPH VANCE, *Chairman of Military Committee, House of Representatives.*

QUARTERMASTER GENERAL'S OFFICE, *Washington City, January 17, 1827.*

SIR: In reply to the inquiries of the chairman of the Committee of Military Affairs, referred to this office on the 13th instant, I have the honor to report that, by an order from the Adjutant General's office, dated the 4th of March last, Generals Gaines and Atkinson were directed to select a suitable position near the mouth of the Missouri river for an infantry school of instruction; and Colonel Leavenworth, with the 3d regiment, and Major Kearney, with a battalion of the 1st regiment, were directed to proceed to the position selected.

General Atkinson, to whom the subject had been referred by an order dated July 28, 1826, (a copy of which, marked A, is submitted,) decided that barracks for the troops should be erected of brick and stone. The amount expended for labor, materials, &c., had, on the 30th of September, exceeded eleven thousand dollars. The accounts for the 4th quarter of the year have not yet been received; but the expenditures for that quarter, it is believed, will have exceeded ten thousand dollars.

No plan has been furnished to this department of the work; but at the time the estimates were made, I believed, judging from the progress which had been made and the expense incurred, that at least twenty thousand dollars would be required. From recent information I am satisfied not only that the amount estimated will be necessary, but that an additional sum of from five to ten thousand dollars will be required.

The barracks, quarters, and hospital at Fort St. Philip, near the mouth of the Mississippi river, had become so entirely uninhabitable that it became necessary to replace them by new buildings. It is estimated that the erecting of those buildings will cost upwards of eighteen thousand dollars. At least six thousand dollars, it is believed, has been already applied; and the sum estimated will be required to complete the work. Fort St. Philip is one of the most important posts in the Union, and unless the proposed buildings be erected the troops must abandon it.

The commanding general, as well as the inspector, General Wool, and the commanding officer at Mackinac, consider new barracks necessary at that post; those at present occupied are certainly very much dilapidated. The sum estimated, though small, it is believed, will, with the materials which the troops can procure, be sufficient for the work.

New barracks will be required at Green Bay at no distant period; but from information received since the estimate was made, I am decidedly of opinion that the appropriation for that object might be deferred to another year without inconvenience to the service.

The commanding officer at Fort Wolcott, Rhode Island, reports that the worms have entirely destroyed the timber in the wharf at that post; in consequence of which it has sunk so low as to be rendered useless. He thinks eight hundred or a thousand dollars will be necessary to repair it; but I believe five hundred will be sufficient.

The troops stationed at Eastport occupy the quarters, &c., vacated by the British at the close of the late war. The magazine, blacksmith's shop, &c., are private property. Those buildings, with the lot on which they stand, are necessary to the public; and a house erected on the public lot by the settler is necessary for quarters. The sum estimated is the least for which the property can be obtained.

At St. Augustine, the land between the barracks and the harbor is private property. It is necessary to the garrison for the purpose of landing fuel and other public property for the use of the troops. The wharf attached to it is the property of the United States. The owner is about to dispose of the land, and has offered it to the public for the sum estimated. Were it sold to an individual, and buildings erected, the sea breeze, to which may be ascribed the fine health enjoyed by the troops, would be entirely excluded; besides, the wharf would be lost, and a greater sum than is required to purchase the lot would be necessary to erect another wharf.

The situation of the city of Savannah, in relation to a certain class of its population, rendered it necessary to place two companies in its vicinity, in consequence of which barracks were to be erected. They were commenced early last summer, and are now in progress. By information received this morning, it is ascertained that the sum estimated will not be sufficient to complete them. A detailed estimate of the amounts required for the various objects connected with the work is submitted, marked B.

The destination of the troops intended to occupy a position at the mouth of the Suwannee river, in Florida, having been changed, an appropriation will not be necessary for barracks at that place.

Should a new position be occupied by the four companies of the sixth regiment of infantry stationed on the Missouri river, the sum of ten thousand dollars will be required to erect barracks for them.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

HON. J. BARBOUR, *Secretary of War.*

## A.

ADJUTANT GENERAL'S OFFICE, *Washington, July 28, 1826.*

SIR: The position, ten miles below St. Louis, chosen by Major General Gaines and yourself, as indicated in your joint report of the 4th of July, and which you deem to be "the best for the infantry school of instruction," will be immediately located. The general-in-chief places you in charge of the whole scheme of construction; he accordingly directs that you will commence operations without delay.

There are but two points of specific instruction which he thinks necessary to name: that substantial and comfortable barracks for two complete infantry regiments be speedily erected.

That the soldiers of the 1st and 3d infantry, as far as they may be competent, shall execute all the carpenters', blacksmith, and mason work, and all the necessary labor.

The material which cannot be procured or created by the army, on your requisition will be furnished by the quartermaster's department.

I am, sir, very respectfully, &c.,

R. JONES, *Adjutant General.*

Brigadier General ATKINSON, *United States Army, St. Louis, Missouri.*

## B.

*Estimate of funds and labor necessary to complete the barracks and other buildings at Cantonment Oglethorpe, Georgia, based on the employment of soldiers to perform the labor—master carpenters and master masons only to be hired.*

## AMOUNT OF MATERIALS.

For officers' barracks .....	\$2,857 26
For soldiers' barracks .....	1,061 90
For hospital .....	1,657 22
For quartermaster's and commissary's store .....	518 67
For guard-house .....	435 45
For bake-house .....	170 00
For officers' kitchens .....	332 18
For soldiers' kitchens .....	395 87
For blacksmith's shop .....	109 81
For barn and stable .....	320 17
For flag-staff .....	26 93
For wells and pumps .....	190 20

19TH CONGRESS.]

No. 351.

[2D SESSION.]

RELATIVE TO THE ERECTION OF A TOWN AT BAYOU DUPRÉ, IN LOUISIANA.

COMMUNICATED TO THE SENATE FEBRUARY 1, 1827.

DEPARTMENT OF WAR, *February 1, 1827.*

SIR: In answer to your note of yesterday's date, enclosing a resolution of the Senate, dated the 5th ultimo, relative to the expediency of providing for the erection of a town at Bayou Dupré during the present year, I beg leave to refer you to a report on the subject from the chief engineer, herewith transmitted, in which I entirely concur.

I have the honor to be, sir, very respectfully, your obedient servant,

JAMES BARBOUR.

General HARRISON, *Chairman, &c., Senate.*

ENGINEER DEPARTMENT, *February 1, 1827.*

SIR: In obedience to your orders to report to you the information relative to the expediency of erecting a tower at Bayou Dupré during the present year, which you have been requested to furnish for the use of the Committee on Military Affairs of the Senate, in a note from the honorable chairman of that committee, of yesterday's date, in which was enclosed a resolution of the Senate on the subject, dated the 5th ultimo, I have the honor to report that the several fortifications intended to defend the approach to New Orleans on the east side of the Mississippi have been commenced, with the exception of the tower projected for Bayou Dupré, and that its completion would fulfil the destination of those fortifications, and save the expense of maintaining an additional military force, which would otherwise be indispensable.

It would be expedient to construct the work this year, because it can be done at a cost of nearly one-eighth less than would be incurred if it should be postponed until next year, or afterwards. This saving could be effected by carrying on the work contemporaneously with the works at Chef Menteur and Bayou Bienvenue, and applying to that object the facilities provided for the construction of those works when they would not be required for them. Those works will be finished this year, and those facilities, therefore, would not be available at any time after this year.

Respectfully submitted,

A. MACOMB, *Major General, Chief Engineer.*

HON. J. BARBOUR, *Secretary of War.*

19TH CONGRESS.]

No. 352.

[2D SESSION.]

ON THE EXECUTION OF THE ACT TO REDUCE AND FIX THE MILITARY PEACE ESTABLISHMENT AND THE APPOINTMENT OF A COLONEL FOR THE SECOND REGIMENT OF ARTILLERY.

COMMUNICATED TO THE SENATE FEBRUARY 6, 1827.

Mr. BENTON, from the Committee on Military Affairs, to whom was referred so much of the President's message as related to the non-execution, in part, of the act of March 2, 1821, entitled "*An act to reduce and fix the military peace establishment of the United States,*" reported:

That having examined the case referred to them with all the care which is due to a question of great intrinsic importance, heightened in its claims upon their attention by the special recommendation of the President, they have come to the conclusion that the obstacle to the execution of the act of March 2, 1821, as it relates to the colonelcy of the 2d regiment of artillery, may be obviated by an explanatory act, and for that purpose they have reported a bill. The propriety of this course the committee believe will be made apparent by a plain and brief history of the case, which is as follows:

On the 2d of March, 1821, an act was passed "*to reduce and fix the military peace establishment of the United States,*" the 12th section of which enacted—

"*That the President of the United States cause to be arranged the officers, non-commissioned officers, artificers, musicians, and privates of the several corps now in the service of the United States in such manner as to form and complete out of the same the force authorized by this act, and cause the supernumerary officers, non-commissioned officers, artificers, musicians, and privates to be discharged from the service of the United States.*"

Before the passage of this act there were *eleven* regiments in service, to wit: one of riflemen, one of ordnance, one of light artillery, and eight of infantry, and by this act the same *number*, though of different arms, were still to be kept up, to wit, four of artillery, and seven of infantry; and the *corps* of engineers was to be retained as then organized. The number of regiments being the same both before and after the act of 1821, it would seem to be an obvious conclusion that there would be no supernumeraries of the rank of field officer; but the President considered four colonels as such, to wit, Bissell, Wadsworth, King, and Smith, and ordered them to be discharged, and the four places thus vacated were filled by officers who were not colonels at the passage of that act, to wit: by the *raze* of Brigadier General Atkinson, who was reduced to the rank of colonel; by the promotion of *Lieutenant Colonels* Fenwick and Bomford to the rank of colonels; and by the appointment of Paymaster General Towson to the same grade. This execution of the act, so far as it affected Colonel Bissell and some other officers, was decided by the Senate, on the 16th day of May, 1822, to be illegal and void, and the officer nominated to the place considered as belonging to Colonel Bissell was rejected. Upon being informed of this rejection, the President, in the full belief of the correctness of what he had done, and under the impression that the Senate, on being fully informed of his reasons, would approve his decision, afterwards renominated the officer who had been rejected, and supported the construction which he had given to the act of 1821 in an elaborate written message. This called upon the Senate to reconsider their vote of rejection, and after taking several weeks for that purpose they reaffirmed the decision which they had first made. The effect of these different constructions given to the act of 1821 was to leave Colonel Bissell in a new and anomalous position. By the decision of the President he was out of the army—by the decision of the Senate he was in it; and the latter corresponding with his own opinion, he accordingly reported for duty to the War Department, and continued to do so at intervals during the remainder of Mr. Monroe's presidency, but without being ordered into service, or having his case in any way brought before the Senate in its executive, or before Congress in its legislative capacity. At the change of administration, in March, 1825, Colonel Bissell again reported for duty, but the President not feeling himself justified in *ordering*

him into service by his own mere authority, and at the same time believing it right to restore him to his place in the army, nominated him to the Senate for the colonelcy of the second regiment of artillery on the 16th day of January, 1826. This nomination being referred to the Military Committee to consider and report upon, they reported accordingly, reaffirming the decisions of the Senate in 1822, and the principle of this report being formed into a *resolution*, it was *resolved* by the Senate, after great deliberation, and by a vote upon yeas and nays of 37 to 2—

“THAT, *in the opinion of the Senate*, DANIEL BISSELL is entitled to the place of COLONEL in the army of the United States, taking rank as such from the 15th of August, 1812, with the BREVET rank of BRIGADIER GENERAL from the 9th of March, 1814, and that the President of the United States may ARRANGE him accordingly.”

This resolution was adopted on the 2d of February, 1826, and being communicated to the President, he informed the Senate, by message on the 12th of April following, of his inability to concur in their opinion, and again referred the nomination of Colonel Bissell to their decision. The subject was thereupon again referred to the Military Committee, who reported that after the most careful investigation they could see no good reason for an abandonment of the principles in relation to the rights of that officer for which the Senate had so long contended, and the nomination being ordered to lie upon the table, left the whole question as it had remained since the first decision of the Senate in 1822. The nomination remaining thus not acted upon, the President, at the commencement of the present session, in his annual message, communicated the fact and the difficulty to the two houses of Congress, and submitted it to their sound discretion to make such legislative provision for the case as it might require.

It is under this recommendation that your committee have had the subject referred to them, and by which they find themselves, for the first time, called upon to act in a *legislative* capacity upon it. In this new character they deem it to be inadvisable to argue the question of the correctness of the several decisions made by the Senate. They feel themselves called upon to look at the facts of the case as they are, and to provide a remedy, if possible, for a disagreement between the President and the Senate, which there is little probability of terminating by argument. The facts are that the law of 1821 for the reduction of the army remains without execution in a material point; that a regiment remains, and has remained for upwards of five years, without a colonel; that an officer who has risen through every grade from the private soldier to the general—who purchased his first commission on the field of battle in the disastrous defeat of St. Clair, and illustrated his last one by a handsome victory over a British detachment in Canada—that this meritorious and distinguished officer is designated for the place both by the President and the Senate, and kept out of it by a disagreement between them, and that there is no room to expect that either will ever concur in the construction of the act of 1821 which the other has given to it. Such are the facts; and upon a candid view of their own duty, your committee are of opinion that it is not the part required of them that they should act the advocate and argue in favor of the Senate's and against the President's decision; nor can they suppose that it would properly fall within the legislative powers of Congress to reverse the decision of one or the other. But they believe it to be their duty to take up the question as practical men, and to find a remedy, if possible, for the cure of an admitted evil. Acting upon this sense of duty, your committee have come to the conclusion that an act explanatory of the act of 1821 may be framed, which will do full justice to Colonel Bissell, and conflict with no decision heretofore made by the President or Senate. They have reported a bill accordingly; and if it should have the good fortune to receive the favorable consideration of Congress, there will be an end to all questions about the discharge of the colonels considered as supernumerary in 1821, as two of them are dead, one provided for (with his own consent) in a civil office, and Colonel Bissell alone remaining to be disposed of.

19TH CONGRESS.]

No. 353.

[2D SESSION.

## ANNUAL RETURNS OF THE MILITIA OF THE UNITED STATES FOR 1826.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 6, 1827.

DEPARTMENT OF WAR, February 5, 1827.

SIR: Pursuant to the provisions of the act of Congress of March 2, 1803, entitled “An act in addition to an act entitled an act more effectually to provide for the national defence by establishing an uniform militia throughout the United States,” I transmit herewith an abstract of the general annual returns of the militia of the United States, and of their arms, accoutrements, and ammunition, by States and Territories, prepared from the latest returns received at this office.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the House of Representatives.

Abstract of the general annual returns of the militia of the United States, by States and Territories, according to the act of March 2, 1803, taken from the latest returns received at this office.

[2D SESSION.]

## RELATIVE TO THE FORTIFICATION OF PENSACOLA HARBOR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 9, 1827.

WAR DEPARTMENT, *February 8, 1827.*

SIR: I was directed by a resolution of the House of Representatives of the 18th of December last "to communicate to the House what progress had been made in the projection of the plans and estimates of fortifications for the defence of Pensacola bay, and navy yard and depot established there; when they are expected to be, and what has prevented their completion at the time suggested by the report from this department during the last session;" to which resolution I had the honor to reply on the 26th of the same month, since which time the board of engineers has reported a plan and estimate for a work to be erected on the point of Santa Rosa island, at the entrance into Pensacola bay, which work is intended to command that entrance, and to aid in defence of the naval establishment at Tartar Point. In further compliance with the resolution above mentioned, I transmit herewith a report of the Chief Engineer, of the 7th instant, on the subject of the proposed fortification on Santa Rosa Point, and have the honor to be, very respectfully, sir, your most obedient servant,

JAMES BARBOUR.

Hon. JOHN W. TAYLOR, *Speaker of the House of Representatives.*ENGINEER DEPARTMENT, *Washington, February 7, 1827.*

SIR: I have the honor to report to you that the plans, estimates, and memoir on the defence of Pensacola harbor have been received at this department from the board of engineers—that is, as far as they relate to a fort to be erected on Santa Rosa island, at the entrance into the harbor. The work is one of great importance, and of considerable magnitude, being calculated for 200 guns, 20 mortars, and 28 carronades; and the garrison, in time of peace, estimated at 50 men, and in time of war, at 600, and to sustain a siege, 1,200; the cost of the construction, including materials, \$650,000.

Although it is highly desirable that the works for the defence of Pensacola should be commenced as early as possible, in order to afford protection to the naval establishment at that place, and to secure to our ships-of-war, as well as to our numerous merchant vessels trading in the Gulf of Mexico, the advantages which that harbor would afford in the event of a change of our relations with any foreign power, the department is not at this time prepared to commence the works, for the want of officers of engineers disposable for that service; still, should it, under all circumstances, be deemed advisable to commence them next year, a sum of \$50,000 might be advantageously employed in making preparatory arrangements for commencing them at that time, by the establishment of wharves and procuring materials, with a view to prosecuting the operations with vigor after these preparatory arrangements should be effected, should Congress see fit to furnish the necessary appropriation for that purpose.

Respectfully submitted.

ALEX. MACOMB, *Major General, Chief Engineer.*Hon. JAMES BARBOUR, *Secretary of War.*

## EXPENDITURES AT THE NATIONAL ARMORIES AND ARMS MADE THEREIN IN 1826.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 13, 1827.

DEPARTMENT OF WAR, *February 12, 1827.*

SIR: In pursuance of an act concerning arsenals and armories passed April 2, 1794, I have the honor to transmit herewith a statement of the expenditures at the national armories, and of the arms, &c., made therein, during the year 1826.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the House of Representatives.

Statement of the expenditures at the national armories, and of the arms, &c., made therein, during the year 1826.

	Expenditures.				Arms, &c., made.						
	For land, buildings, canals, repairs, and other permanent improvements.	For the manufacture of arms.	For miscellaneous expenses not embraced in the foregoing.	Total amount expended.	Muskets.	Screw-drivers.	Wipers.	Ball screws.	Spring vices.	Extra bayonets.	Arm chests.

G. BOMFORD, Brevet Colonel, on Ordnance Service.

ORDNANCE DEPARTMENT, Washington, February 9, 1827.

19TH CONGRESS.]

No. 356.

[2D SESSION.]

## ON THE SUBJECT OF THE ORGANIZATION AND DISCIPLINE OF THE MILITIA OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 27, 1827.

Mr. METCALFE, from the Committee on the Militia, to whom was referred so much of the President's message as relates to the organization and discipline of the militia of the United States, reported:

That, from the time of the adoption of the federal Constitution down to the present day, there appears to have been but one opinion among our most distinguished patriots and statesmen as to the indispensable necessity of organizing and disciplining the militia, so as to render that safe and powerful arm of the national defence and protection as efficient as practicable. From time to time has the subject been recommended to Congress as one of the most deep and vital interest to the republic, not only by Washington, when President, but also by his successors in office, without a single exception. Committee after committee has been appointed, reports have been made, and bills have been reported, but still it must be admitted that much remains to be done in order to secure the grand object of the institution, which is nothing less than the perpetuation of human liberty, with an equal distribution of all its attendant enjoyments.

At the last session of Congress a joint resolution of both houses was adopted requiring the Secretary of War to "cause to be prepared a complete system of cavalry tactics, and also a system of exercise and instruction for field artillery, including manœuvres for light or horse artillery, for the use of the militia of the United States." Under this injunction the honorable Secretary addressed a circular letter to the governors of the several States for the purpose of eliciting such information as might be useful to him in the discharge of his duty.

The documents referred to the committee contain the circular letter alluded to, the answers of the various respondents, and a report of the board of officers who were convened in this city to prepare the plans for perfecting the system.

The steps which have been taken by the honorable Secretary reflect the highest credit on his judgment and sagacity. He has adopted the best if not the only practicable plan for collecting and embodying a mass of information for the use of Congress, and of information which is so very essential to those who aim at enlightened reform.

The honorable Secretary's correspondents are also entitled to the warmest thanks of their country for the promptitude with which they responded to the Secretary. The patriotic ardor which this correspondence displays in so good a cause is only equalled by the talent and energy which distinguish the writers. Upon the whole, a flood of light has been shed on the subject, which, in the main, has been turned to the best account by the board of officers. The report of this board is now before the committee, and in the hands of many of the most intelligent militia officers throughout the Union. The information which has thus been collected, embodied, and again so widely and advantageously disseminated, can hardly fail in producing the most favorable and beneficial results. The committee are at a loss to conceive of any other plan that could have been devised so likely to attain the grand object in view. It collects, embodies, and furnishes materials for consideration and reflection, and then forcibly addresses itself to the candor, intelligence, and patriotism of the nation; inviting the criticisms, strictures, or commendations of all and every one who may take an interest in the matter; enabling each, in his turn, to draw his own conclusions, and again to present his views to the Secretary, to be by him laid before the President, who will communicate the same to a future Congress. It is thus that this plan presented itself, not only to the consideration and reflection of the representatives of the people, but to the American people themselves, and seems to seek their approbation and sanction before it goes into operation.

Fully aware of the magnitude and importance of the question, as well as of the very delicate and hazardous ground upon which the committee had to tread, they approached this subject with great diffidence, but not without the liveliest hope that, in the end, something would be done to render the system more efficient than at present, and to exalt the character of an institution upon which the best feelings and affections of every friend of republican liberty should rest as upon the last plank in the ark of his political safety; for, notwithstanding that the subject is attended with many very complex and perplexing embarrassments, they are not believed to be insuperable. Congress has the constitutional power to "provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions." Also, "to provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States; reserving to the States, respectively, the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress."

By a careful and attentive perusal of the foregoing provisions of the Constitution, the obvious truth forces itself on the mind that "the jealousy of concentrated power which existed at the adoption of the Constitution caused the States, when they granted to the federal government the unlimited power to maintain armies, build navies, and raise revenues, to reserve to themselves the militia force except when its use defensively might be required for the preservation of the national domain and peace against foreign foes and rebellious citizens. This power, then, must be considered as the grand physical characteristic of State sovereignty," and "without it the pillars of the Union would be too slender to support the national fabric." Upon a slight and superficial view, the powers of Congress appear to be quite too restricted for the purposes here contemplated. But when it is considered that the federal and State governments are in a degree co-ordinate and dependent on each other, and that each is bound expressly by the Constitution to co-operate with the other in perfecting the system, all the apparent embarrassments at once disappear. Instead of concentrating the whole of the powers necessary for the accomplishment of this important object in the federal government, those powers are divided; a portion thereof to be exercised by the federal, and the residue by the State governments. This power so divided is to be found in an instrument which each of the parties have solemnly sworn to support; consequently each party is bound to *exercise* the powers thereunto properly pertaining.

Then "let the national government be content with the authority which is given, and use it under the restrictions imposed. Take the grant by its terms, and concede the reservation according to its intent, and thus unfasten that public jealousy which, more than any constitutional provision, has impeded our political progress. When the United States government executes its own powers wisely, that public sentiment which approves it will produce such correlative provisions under the State authorities as are necessary. Both of the governments are governments of the people, and of the same people. Let public opinion, the great corrective of public abuse, and at the same time the highest incentive to patriotic exertion, be appealed to, and it need not be feared that any constitutional encroachment will be effected under our present forms of government, however complex they may seem, if approved; and if disapproved, whether the authority over the subject be single or co-ordinate, it matters not; for vain would be the attempt to exercise it."

The committee will next proceed to give their views of the plan for the enrolment and organization of the militia of the United States, as proposed by the board of officers. It is recommended that there be appointed an Adjutant General of the United States, but without rank. This Adjutant General to be attached to the War Department, and responsible to the Secretary of War or the President for the faithful discharge of the various duties assigned him. The committee believe that such an officer is indispensable to the enlightened reformation and efficiency of the system which is contemplated. The most industrious, talented, and energetic Secretary of War, no matter who he may be, will find it utterly impossible to discharge the various and complicated duties to be assigned to this officer, without neglecting, or omitting to discharge all, or nearly all, of the other important duties for which he is held responsible. The duties devolving on such an officer are, of themselves, abundantly sufficient to employ the time and talents of any individual. In the language of the board, he "shall have to furnish blank forms of all the different returns that may be required, and to explain the principles on which they shall be made; to prepare and distribute to the several States books of instruction suited to the militia organization of the drill and exercise of the various corps of which the militia consists, according to the system of discipline prescribed for the army; and adopt all necessary and proper means for bringing it into general use; to receive all returns of the militia of the several States and Territories, and to make abstracts of the same once in every year, exhibiting the number of divisions, brigades, regiments, battalions, and companies; of what corps they consist, the strength of each, the number of officers and men, and the condition of their arms, accoutrements, and ammunition. He shall also make inquiries respecting the local boundaries and extent of the different divisions, the state of their organization and drill, and the support which can be brought to the defence of their important neighboring positions in a given time; to obtain the information needed to enable the President to call for the militia of the several States, or any particular division thereof, under the act of Congress of 1795, to the greatest public advantage, and, by his returns, the number of men which are taken into the national employ, the division from which they are detached, and the effective strength which remains in service, either for future drafts or to guard against unexpected attacks. He will likewise prepare forms for the returns of all the arms and equipments furnished to the several States and Territories by the act of the 23d of April, 1808, exhibiting the manner in which they are kept, or how they are distributed; of books of instruction, and of all other property which shall be furnished to the militia at the expense of the government," &c., &c.

"In fact he shall collect all the information relating to the strength and drill of the militia; the materials of defence which the country can furnish; the cost of purchase and transportation; shall keep regular files of the papers received, and a record of his correspondence; and besides his annual returns, when called upon, he shall communicate such information to the President as his bureau will furnish, and be liable to all such duties relating to the objects of his appointment as the President shall assign to him."

The board, in their third proposition, recommend the exemption of all persons under the age of twenty-one years in the several States from service in the militia of the United States; and the committee most cordially unite in this recommendation. It is true, as urged by one of the honorable Secretary's correspondents of Frankfort, Kentucky, over the signature of *Amicus Patriæ*, that "young men from the age of eighteen to twenty-one are usually engaged in learning a trade, studying a profession, or in qualifying themselves in some manner to earn a subsistence, and to become useful or ornamental members of society. A tour of military service makes a fearful inroad upon the prospects of young men so situated, and although a cause may be momentarily benefited by enlisting into its service a host of ardent and patriotic youths, yet there is too much reason to apprehend that eventually society will not be much benefited by their services."

Besides this drawback, as it may be appropriately termed, at so unseasonable a moment upon the parental authority, the example of industry and civil society, there are other reasons why exemption should be extended to *all classes*, or rather why *none should be enrolled* under the age of twenty-one years. In most of the States exemptions have been granted to students in colleges, &c., and the same thing has been recently done by Congress in the District over which that body has the exclusive right to legislate. Is it reasonable or just to grant exemptions to *students in colleges*, and not to those who, on account of their poverty or the poverty of their parents, are excluded from the advantages of a collegiate education? Why not also exempt the scholar in a common country or any other school? And why not exempt the youth who is too poor to receive even the benefits of a common school? If it is intended to elevate the character of the militia, it is not to be done by a system so invidious and partial, so unjust and oppressive. Instead of elevating shall we degrade the character of the militia, and then complain of that degradation and want of respectability and efficiency? But, above all, we urge the *excess of numbers*, at this time held to perform militia service, as an argument which we consider unanswerable in favor of exempting this *minority class*, who have not arrived at that age which entitles them to the exercise of the rights of suffrage, or to assume the ordinary business of life as free and independent republican citizens.

In the fourth proposition of the board it is recommended "that there be enrolled and organized in each State from the whole mass of the able-bodied white male citizens resident therein who are or shall be above the age of twenty-one years, and always taking the youngest above that age, at the rate of one brigade of militia, organized as herein proposed, for every member of the House of Representatives of the United States to which the State may be entitled." From this recommendation of the board the committee feel themselves constrained to dissent. In the *enrolment of the militia*, for the performance of *personal services*, they cannot recognize the *principle* of conformity to the *ratio of representation*; they cannot agree to disturb the long and well-settled principle of taking the *ages of the citizens in every State* or portion of the Union as the standard both for *enrolling and discharging*. The effect of the plan of the board

on this point, would be to subject the militia of the different States to an unequal term of service. It will be difficult to reconcile the resident of one State to that law which holds him to the performance of militia duty for *several years after his neighbor, of the same age, residing in another State*, shall have been exempted; he might not be disposed to remain in that State where this inequality of duty was imposed upon him, and thus the States containing the *three-fifths* might in times of war be drained of a population so essential to their peace and security. Let the services required of the militia of the several States be equal, and that service will be rendered with pleasure and alacrity. Besides, the plan of the board, in this point, is not practicable. So rapid is the increase of population in some of the States and particular sections of the country, so incessantly shifting and changing the ingress and egress into and out of the different boundaries of the different divisions, brigades, regiments, and companies, that it would be utterly impossible to fix on any given point of time on the ascending scale of age for exemption, retaining at the same time any specific aggregate number of enrolled militia that might be required. The committee entertain the profoundest respect for the board, and the highest confidence in the skill and patriotism of the members composing it. They have gone deeply into the subject, done much more than has heretofore been done to promote the great object in view, and set up beacons to light us on our way in future. Upon a candid review, however, of this part of their scheme, we are not without a hope that they will concur with the committee in rejecting it.

We now come to another distinguishing feature in the plan of the board. The *excess of numbers* which the law now holds to service they consider a *primary defect* in the existing system; and instead of enrolling all those who are between the ages of eighteen and forty-five years, they propose to enrol and organize, by an estimate between their minimum and maximum aggregates, about five hundred thousand militia in the United States, including officers. According to the system of the board of organizing one brigade of militia for each representative in Congress to which the States respectively may be entitled, the number of half a million, commencing the enrolment at the age of twenty-one, would be found on the rolls, without extending the age of exemption beyond thirty years, even in the States where the *three-fifths* are taken into the estimate; of course, the average estimate of the ages of exemption in the United States would be, according to that plan, less than thirty years. Discarding, however, the idea which has been suggested by the board, of making the ratio of representation the basis of enrolment, the committee agree most decidedly in the opinion that a great excess of numbers are at this time held to the performance of militia service for a *peace establishment*. But the committee are in favor of extending the age of exemption beyond that which has been suggested by the board—say from thirty-two to thirty-five years. In favor of this reduction, it may be urged that the number at present far exceeds that which is necessary to execute the laws of the Union, or to suppress insurrections; that the time which is lost in training operates as a tax on all of those who are subjected to the service, and, consequently, that the number ought not to be greater than, in the course of probable events, the exigencies of the country may seem likely to require; that there is more difficulty in perfecting a system of instruction and discipline for an unwieldy mass than if reduced to a narrower limit; that the *expense* of instruction will be in proportion to the number upon which it is to operate; that the number so reduced and instructed will be more useful and efficient than two or three-fold as many who are not instructed; that a judicious and well-regulated system of instruction will tend to elevate the character of the institution as well as of the "citizen soldiers" of our country; in war it will lessen the drafts on the treasury of the nation; it will afford additional security to our homes and our property against the predatory incursions of the enemy; his terrors will be increased; and much of the best blood of our countrymen will be saved.

Upon the whole, it is obvious that the necessity of enrolling and holding to service all of those who are over eighteen and under forty-five years no longer exists. When that system was adopted we were, comparatively, a young and feeble people. We were without a navy, and without fortifications. The British had not then delivered up all the forts and posts which, during the preceding war, they held within our own borders, and many powerful tribes of warlike Indians hovered around our frontier settlements; hence the necessity of the system which was at that time adopted. But there is no longer any object to be gained by "a plan which affects the common business and daily occupations of so large a portion of the community; nothing gained to compensate for breaking up, to such an extent, the order and business of civil life." In proportion, however, to the reduction of numbers must be the extension of the boundaries of companies, battalions, regiments, &c., and by too great an enlargement of those boundaries, in some of the sparse and thinly settled districts of the country, the distance of travelling to and from the various musters and trainings might be so great as to become oppressive. This consideration has had its influence upon the committee in declining to reduce the numbers by fixing the age of exemption as low as recommended by the board. Besides, we cannot expect to have good officers, under any system of instruction, without soldiers. A theoretical instruction, merely, without practice, is held to be insufficient. By fixing the standard of enrolment from twenty-one to thirty-five years, the number, it is believed, will exceed that which is likely to be needed for any probable purpose in times of peace. But we must have officers to command and soldiers to be commanded, or our system of instruction will be of little use; and, under the system which we propose, the term of service for the militia would be *thirteen years less* than at present; let us try this experiment first. It is not, however, to be understood that we are in favor of thus limiting the number of enrolled militia *in times of war* or for the *purposes of a draft*. The plan of enrolment should possess the capacity of enlargement, so that, when the exigency shall demand it, the number shall be increased by extending the age of exemption to such point as may be thought advisable, say to forty-five; otherwise, the great inequality of *personal service*, during a war, might become oppressive to a particular class. In a time of war the militia burdens are of two kinds: *pecuniary* and *personal*. The unexempted class contribute their due portion of taxes for the support of the government and of the army, as well as others. If, then, the age of exemption is reduced to thirty-five, the exempted class, who are generally the most wealthy and opulent, would be released from an equitable portion of *personal service*, not in consequence of a failure of the *physical powers*, but merely by arbitrary regulation of law. This inequality of burdens would be more sensibly felt, and more oppressive upon the unexempted class, in proportion to the diminution of their numbers; too great a reduction at such a time must therefore be guarded against. The companies, &c., possessing the capacity of enlargement, as before stated, those above the age of thirty-five and under forty-five might, with convenience, be merged into the different companies in the bounds of which they respectively resided; or they might form a *corps de reserve*, to be denominated the sedentary or senior class, and held liable to furnish its quota as a separate and distinct corps for all the purposes of war; or upon such emergencies only as

might require the defence of their own homes and particular States. The suggestions on this head are thrown out for the consideration of the people and of a future Congress.

The subject of *arming* the militia is thought to be worthy of consideration. Congress has power to *provide for arming, &c.*, the militia. And Congress has *provided by law* that the enrolled militia *shall arm and equip themselves*. Though to the committee this power appears to have been exercised under a singular construction of the Constitution, they are not disposed to enter the lists of controversy against such high and long-standing authority, for it is of little consequence whether the construction be correct or incorrect; the experience of many years proves the law to be useless and unavailing. As well might Congress require the militia to furnish their own subsistence when called out, and subject them to pecuniary penalties for failing to do so, as for failing to appear at parade *armed and equipped*. There is nothing unjust or unreasonable in requiring *volunteer corps* to arm and equip themselves in a particular manner, because they know beforehand the *conditions* upon which alone they are permitted to join; and of course they consult their own *ability* to procure the requisite arms and equipments before they enrol themselves. Upon the whole, the committee are of opinion that the arming and equipping of the militia, to the extent that may appear to be expedient, is one of the duties devolving on Congress by express constitutional provision; that a resort can only be had to the national treasury for that purpose; and, if the annual appropriation is not sufficient, that it ought to be increased until it shall be commensurate to the object. It is computed by the board of officers that, if the present number of enrolled militia were to *remain stationary*, the existing annual appropriation would not supply them with arms in less than *seventy-five years*. Though it can scarcely be necessary to arm the *whole* body of the militia, the appropriation to that object ought to be increased, with an eye to the distribution among the several States of as many as, under the happening of any contingency, might be needed in the hands of the militia thereof.

The committee will next consider the existing laws on the subject of granting exemptions. The act of Congress of 1792, after enumerating certain officers and others who are entitled to exemption, adds: "And all persons who now are, or hereafter may be, exempted by the laws of the respective States shall be, and are hereby, exempted from militia duty." In some of the States they have granted exemptions, under the authority of the act of Congress alluded to, to at least one-half of the enrolled militia. The only remedy for this obvious and glaring evil is to confine the authority of the States, in that particular, within narrower limits; otherwise there will be a great inequality among the States in furnishing their respective quotas at the call of the general government. Indeed, a State may go on to grant exemptions until there shall be no one left to call.

Exemptions ought to be circumscribed to the narrowest possible limit, without injuriously affecting the order, harmony, and business of the federal or State governments. The incumbents of lucrative offices, whose duties can be discharged by *deputies*, or whose salaries so fully enable them to furnish *substitutes*, ought not to be released from an equitable requisition of *personal services*; having, generally, the most at-stake, as patriots they ought not to ask it. There are instances in which the indispensable business and good order of society would be thrown into confusion and disorder by requiring the personal services of certain officers in the ranks of the militia; instances in which the duties of the officer could not be discharged by another; instances in which the relation between certain officers of the different governments and the governments themselves, and society generally, are such that the officers cannot, without materially affecting the whole existing system of things, be taken from their posts, either in peace or war. It is the interest of society, therefore, that such as these should be exempted; and to this class of officers it will be expedient and proper to add certain instructors of religion and morality, such as ordained ministers of the gospel, &c.; and thus should the exemptions be limited.

The second article of the amendments to the Constitution is as follows: "A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed." And again, the fourth article provides that "no soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law." The opinion which prevailed at that day of the indispensable necessity of a well-armed and disciplined militia, for the security of their own and the liberties of their country, is here made manifest; and the guards thus thrown around the free citizen householders of our country evince the jealousy of our wise men of the revolution of standing armies, and the materials of which they are composed. Let us not fail to improve upon the lessons of such experienced wisdom and well-tryed patriotism.

General Knox, in his report when he was Secretary of War, in 1790, having for its object an improvement of the militia system of the United States, and which, doubtless, underwent the most critical inspection of the great Father of his Country, says: "May the United States avoid the errors and crimes of other governments, and possess the wisdom to embrace the present invaluable opportunity of establishing such institutions as shall invigorate, exalt, and perpetuate the great principles of freedom—an opportunity pregnant with the fate of millions, but rapidly borne on the wings of time, and may never again return." Again, that illustrious patriot of the revolution remarks, in the same report, that "Whoever seriously and candidly estimates the power of discipline and the tendency of military habits will be constrained to confess that, whatever may be the efficacy of a standing army in war, it cannot in peace be considered as friendly to human nature." "The recent instance in France," said he, "cannot, with propriety, be brought to overturn the general principle, built upon the uniform experience of mankind." Had this great man lived a few years longer he might have cited the only instance which he was then disposed to except from the general experience of mankind, and have placed it in bold relief in confirmation of that experience. He tells us to cherish this vital principle, or that the "government will be invaded or overturned and trampled upon by the bold and ambitious." We have the warning voices of nearly all the great and illustrious men of former days, as well as that of our present Chief Magistrate, admonishing us to uphold the militia system in all its usefulness and dignity. The man who but two years ago attracted so much of the attention of this nation, and whose fame is like an evergreen, deeply rooted in the affections and gratitude of the American people, has, in a few words, added his admonitory voice to that of his brothers in arms who achieved our independence. Lafayette, during his recent visit to this country, was met and greeted by an escort of militia on his approach to the town of Boston. The order, regularity, and precision of their movements attracted his notice, and the companion of Washington was heard enthusiastically to exclaim, "Oh! if France had had such a militia the scenes of Waterloo would never have occurred." It is a singular coincidence that in 1790 General Knox, while he was endeavoring to perfect a militia system for the United States, should have cited *France* as a *solitary instance* to be excepted from the general experience of mankind, that "standing armies are unfriendly to human nature," and that one of his brave and most distinguished companions of the revolution should arrive here in 1824 from that very France, pro-

claiming to us that the reason why France could no longer be cited as an instance of exception to that general experience of which the former had spoken was, that she had no well-regulated system of militia.

In the language of a member of the board, "there is no department of the government that deserves more attention than the militia; none in which the defects of the system are more apparent; none which is more susceptible of improvement; none about which public sentiment is more divided; none which is attended with more extraneous difficulties; but all of which may be traced to a want of those facts and that information which, in all affairs, is indispensable to enlightened reform." Again: under our Constitution the militia must ever be estimated as the bulwark of our civil and individual liberty. Directed by public sentiment, it will guard us from the oppression of power; regulated by wisdom and patronized by the government, it will secure us from anarchy; officered, trained, and supported by the States, it is the guaranty of their sovereignty and Union; and properly armed and disciplined, in conjunction with the army and navy, it forms an impenetrable barrier to the invader. It inculcates subordination to authority, teaches obedience to the laws, and respect for those who are intrusted with their administration; its associations promote civility, good manners, and friendly intercourse in society; its exhibitions are public, encouraging cleanliness of person, and eliciting that pride of character which leads to the fear of reproach, and enlivens the desire of distinction; its exercises are manly, giving grace to the person; its employments are active, requiring judgment and decision; its duties are scientific, inciting to study and inducing inquiry; its objects are patriotic, animating the best feelings of the human heart; its offices, open to all, are the incentives of honorable ambition, affording to those in humble stations, who might otherwise remain unnoticed, opportunities for disclosing those virtues and talents which recommend them for civil preferment as well as military promotion. And thus it is that this truly republican institution, in connexion with our system of public education and establishments of religious instruction, contributes to produce that just subordination in society which influences all its conduct and constitutes an orderly community. But is it to be expected that the militia of the United State are to be organized and disciplined as herein proposed, and the system upheld in all its usefulness and dignity, without a resort to the *national treasury*? Certainly not.

Instructors of scientific military skill are recommended by the board, to be appointed at the request of the States, for the purpose of instructing the officers of the militia in the science of their professions. It may not be very material whether the federal government shall furnish the instructors, at the request of the respective States, or the *means of reward* to the instructors appointed by the States. In either case let each applicant for that appointment undergo the most rigid examination by a tribunal eminently qualified for the purpose—an examination that will defy imposition; and let none be appointed except they have first obtained the most unequivocal testimonials of character and qualifications for the office. Indeed, it is questionable whether that extensive knowledge of the military service which is drawn from the national Military Academy, and from the academy of the persevering Captain Partridge, whose able and patriotic exertions in so good a cause give him a fair claim to a medal from his country, will not, in the *absence of a system* such as that which is so fondly anticipated, be nearly, if not entirely, *lost to society*. The youths of the nation are admitted into those academies, and others that seem to be springing into existence, from every State and section of the Union. Many of them return fully *instructed* to their respective States and neighborhoods. If they conduct themselves worthily among their fellow-citizens, they will not fail to be noticed, and their claims to promotion in the militia, or to the responsible office of instructors, duly regarded. The recommendations for those offices will proceed from their compeers at home, who are immediately interested in the matter; and consequently there will be no conflicting collisions or jealousy on that score between the federal and State governments. It is well said by Captain Partridge, that the expense of disseminating instruction to the militia "bears no greater ratio to the advantages to be gained by it than a grain of sand to the globe we inhabit." That *expense*, in the opinion of the committee, would be compensated many fold even on the *score of expenditure*. In times of war thousands of lives will be saved by the dexterity of active and skilful officers, which would be lost under the guidance of unskilful and ignorant commanders. In the most exposed positions of the Union millions in value of the property of our citizens will be preserved or rescued from the grasp of a desolating and marauding enemy. The necessity of a large and overgrown regular army, with feelings, propensities, and interests, or supposed interests, not harmonizing with the feelings, propensities, and interests of civil society, either in peace or war, will be done away; bounties will be reduced, and a long list of pensioners, so embarrassing to the government and oppressive to the industrious and productive classes of the community, will no longer be felt or feared.

*Fortifications* are absolutely indispensable, as auxiliaries, in the system of national defence; but they may be limited in numbers in a ratio proportioned to the discipline and efficiency of the militia. The fortifications are costly establishments, and beyond a limited point, of very doubtful and uncertain utility. One generation is extravagantly taxed to raise a revenue for building them; and succeeding generations are not less extravagantly taxed to garrison and man them with troops, as well as to repair and uphold them against the decay and dilapidations of weather and of time. An efficient republican militia, with arms in their hands, throughout the confederacy, and we have no danger to apprehend from a regular army at the period of its disbandment. The scenes at Newburg will not hereafter occur; the liberty of our citizens will be in their own hands; the citizen will not be lost in the soldier; nor will the soldier be lost in the citizen. We shall have citizen soldiers very unlike the materials which generally constitute regular armies. Instruct the militia, and, when the invader shall be driven from our shores, they will know how to return to their peaceful, productive, and honorable avocations. Not so with the officers and soldiers of overgrown regular armies. All history and experience most clearly prove, and the fact is established beyond the power of contradiction, that regular armies, when sufficiently powerful, are seldom wanting in disposition to overturn and usurp the liberties of their country. Battles are gallantly fought and won; the country nobly defended against foreign insult and aggression; the enemy subdued; and, lastly, the veteran regular army, when its services are no longer needed, *dictates the terms* of its own dissolution; or, declining to be dissolved, tramples upon the rights of civil society and rules with despotic power. Such are the consequences to be apprehended if we omit to cherish and sustain the militia system, and continue to rely with implicit confidence upon regular forces for defence and protection. The regular and militia forces may operate as auxiliaries in perfect safety to the country, the latter having the advantage at all times of a well-organized and disciplined *reserve corps* too powerful to be intimidated or even menaced by the former.

Entertaining the views which they have endeavored to state with as much brevity as possible, the committee cannot for a moment believe that an appropriation of a few hundred thousand dollars annually,

for the general dissemination of *instruction*, will be allowed to constitute any barrier to the perfecting of the system and giving it all the efficiency of which it is susceptible. The appropriations so disbursed, like exhilarating showers, falling with equal kindness and generosity on every State and portion of the Union, will be productive of an endless succession of crops, the rich fruits of which to succeeding generations will far exceed in value the powers of estimation.

Removed, as we are, far from every other powerful nation, we may rely with the most implicit confidence that, under the benign dispensations of a protecting Providence; an inconsiderable regular army; a few durable fortifications; a considerable navy; a well-organized and disciplined militia; good roads and other channels of inter-communication to facilitate their marches, the transportation of their baggage and munitions of war, this republic, with all its attendant blessings—the “security of life, liberty, and property,” the liberty of the press, and liberty of conscience—will stand erect among the nations for ages unlimited, still dispensing to posterity a long and countless list of human enjoyments.

19TH CONGRESS.]

No. 357.

[2D SESSION.]

## RELATIVE TO THE ARTILLERY SCHOOL OF PRACTICE AT FORTRESS MONROE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 28, 1827.

*To the House of Representatives of the United States:*

I transmit to the House of Representatives a report from the Secretary of War, with sundry documents containing the statements requested by a resolution of the House of the 9th of January last, relating to the artillery school of practice at Fortress Monroe.

JOHN QUINCY ADAMS.

WASHINGTON, *February 28, 1827.*DEPARTMENT OF WAR, *February 27, 1827.*

SIR: The Secretary of War, to whom was referred the resolution of the House of Representatives of the 9th of January last, requesting the President of the United States to communicate to that House “A statement from the Quartermaster’s and Ordnance departments, showing the full amount of all expenditures in any manner connected with the artillery school of practice, from the time of its establishment, and by whom established; that he also state whether the object of such expenditure be temporary or permanent; what sum is annually paid at Fortress Monroe for water, for the use of the troops there stationed; what sum for the engineers and workmen; what sum has been expended in the erection of barracks and officers’ quarters; will not some of those erected necessarily have to be removed as the work on the fortification progresses; what was the cost of preparing a parade ground, exclusive of the work performed by the troops; has not a farm been rented near said fortress; if so, at what price, and by whose order; has not the public hospital been converted into officers’ quarters; if so, by whose orders, and what the expense; out of what appropriations have all the expenditures connected with the artillery school of practice been paid,” has the honor of transmitting herewith reports from the major general commanding the army, the Quartermaster General, and the Engineer and Ordnance departments, which furnish the information required by the said resolution.

Respectfully submitted.

JAMES BARBOUR.

The PRESIDENT of the *United States.*HEADQUARTERS, *Washington, January 12, 1827.*

SIR: Agreeably to your directions of this morning, I have the honor to submit a few remarks respecting the origin and importance of the artillery school of practice at Fortress Monroe.

There has been, at no period since the organization of the peace establishment in 1815, when I have doubted of the expediency and necessity of some system of concentration for the preservation of the vigor and efficiency of the army. After the second reduction in 1821 our diminished forces, particularly of the artillery arm, were so subdivided and dispersed along our frontiers in small-garrisons as to render it almost indispensable, in the view of military men, to adopt some measure for the army calculated to counteract the growing evils which inaction and a want of competition threatened to entail on it.

Our commissioned ranks were periodically recruited with young graduates from the Military Academy of high moral worth and scientific attainment, and sanguine hopes were rationally entertained that on this fundamental source of excellence a military establishment was to be formed for the nation to which it might look with confidence and pride for those attributes on which, in a future exigency, its glory, and perhaps its safety, might depend. It seemed to be, however, almost in vain that military education should be fostered, if it were to terminate with the course of studies at West Point; and a school of practice was anxiously looked to as a supplemental institution in which the theoretic instruction of the academic graduate might be applied with good effect to the practical duties and relations of military service.

With regard to the location, or to the name of this establishment, there may have existed much difference of opinion; but among military men of distinction I have heard no voice at variance with the general conviction of the great benefits which were to be derived from concentration.

In the early part of the year 1824 eleven companies, detached from the different regiments of artillery, were assembled at Fortress Monroe and formed into a corps for battalion instruction. It was after the most deliberate and anxious consideration that the position of this fortress was fixed on by the late administration; and, in a view of all the circumstances connected with the subject, I found it my duty to concur in the selection.

Enough has perhaps already been said in recommendation of the principles on which schools of practice are founded, and to no army can they be more beneficially applicable than to ours; in none are they more emphatically called for.

The experience of two years only (during which the establishment of Fortress Monroe has been in operation) has produced results on those portions of the artillery which have participated in its benefits, so obvious and salutary as to remove, it was humbly hoped, all doubts of its excellence and utility from every mind to which the subject had been presented.

I have the honor to be, sir, with the highest respect, your obedient servant,

JAC. BROWN.

HON. JAMES BARBOUR, *Secretary of War.*

#### ORDERS.

[No. 18.]

ADJUTANT GENERAL'S OFFICE, *Washington, April 5, 1824.*

The Secretary of War directs that ten companies of artillery be stationed at Fortress Monroe, to be organized as a regiment, and will be called the "artillery corps for instruction."

This corps will be composed of companies detached from the several regiments of artillery, as follows, to wit: from the first regiment, two companies; from the second regiment, three companies; from the third regiment, two companies; and from the fourth regiment, three companies.

It shall be commanded and officered as follows, until otherwise ordered:

#### COLONEL.

*Fourth regiment artillery.*—J. R. Fenwick.

#### LIEUTENANT COLONEL.

*Fourth regiment artillery.*—A. Eustis.

#### MAJOR.

*Second regiment, brevet major.*—A. C. W. Fanning, captain.

#### CAPTAINS.

*First regiment artillery.*—S. Churchill, brevet major, M. Mason.

*Second regiment artillery.*—J. F. Heileman, brevet major, R. A. Zantzing, J. Mountfort.

*Third regiment artillery.*—John A. Burd, brevet major, S. Spotts.

*Fourth regiment artillery.*—B. K. Pierce, brevet major, J. Erving, W. L. McClintock.

#### FIRST LIEUTENANTS.

*First regiment artillery.*—R. M. Kirby, brevet captain, J. Symington, G. Webb, J. Howard.

*Second regiment artillery.*—G. S. Drane, Charles Mellon, A. Lowd, James Spencer, J. A. Webber, F. L. Griffith.

*Third regiment artillery.*—L. G. De Russey, G. S. Wilkins, James D. Graham, Samuel Ringgold.

*Fourth regiment artillery.*—James W. Ripley, J. M. Washington, Charles Ward, H. A. Thompson, W. Turnbull, G. C. Hutter.

#### SECOND LIEUTENANTS.

*First regiment artillery.*—D. Tyler, G. D. Ramsay, W. T. W. Tone, Charles Dimmock.

*Second regiment artillery.*—T. P. Ridgeley, H. C. De Hart, J. A. Chambers, T. Burk, J. Grier, J. R. Ingalls.

*Third regiment artillery.*—A. Brokenborough, F. N. Barbarin, W. H. Kerr, C. G. Smith.

*Fourth regiment artillery.*—S. B. Dusenbury, C. Burdine, J. B. Scott, H. Bliss, W. Gwynne, S. M. Southerland.

To which will be added the cadets who may hereafter be promoted into the artillery.

In addition to these, the company of Captain Lomax, of the 3d artillery, now at Fortress Monroe, is attached to the artillery corps for instruction, and will for the present be employed as a guard to the convicts.

First Lieutenants Vinton and Newton, and Second Lieutenants Wade and Young, of the 3d artillery, are arranged to the company above mentioned.

Captain R. L. Baker, 1st artillery, is detailed as director of artillery; and Lieutenant W. E. Williams, 2d artillery, as assistant director of artillery; Lieutenant E. C. Ross, as instructor of mathematics; and Lieutenant G. S. Green, as assistant instructor of mathematics.

The field officers, with the director of artillery, and the instructor of mathematics, shall form a board, of which a majority of the members shall constitute a quorum for business, over which the colonel or senior officer present shall preside.

The board will be assembled as soon as practicable, for the purpose of forming a system of general

regulations, comprising the course of instruction, &c., and will submit the same for the approval of the War Department.

This command will be exclusively under the orders of the War Department, to be communicated through general headquarters, through which also it will make its reports, &c.

The only exception to this regulation will be in regard to the returns which are at present required to be forwarded to the colonels or commanding officers of the regiments to which the companies detached respectively belong.

Communicated by order of Major General Brown.

CHS. J. NOURSE, *Acting Adjutant General.*

QUARTERMASTER GENERAL'S OFFICE, *Washington, November 5, 1823.*

SIR: The importance to the army of a school of practice is too obvious to require demonstration. Without such an establishment uniformity of discipline cannot be expected, nor can the government be sufficiently acquainted with the character, capacity, and attainments of its officers to be able to employ them with advantage in the event of war. In developing character and talent, a school properly organized would have the same advantages in peace which active service would have in war. It should be organized on a liberal scale, and, so soon as the circumstances of the service shall permit, should embrace the theory and the practical application of every branch of military science. In the present state of our army it would be difficult to form a school on a scale so extensive; but as it regards a knowledge of the separate arms much might even now be done.

The *regiments* of infantry, if the *officers* were properly instructed in the elements of military science, would, for that arm, present the best possible school; but, unfortunately, very few of them have received even the rudiments of a military education; of consequence, no advance is made by that arm beyond the mere parade and drill of a garrison.

In our service, where militia constitutes the principal force in all operations in the field, and where, from the limited number and the dispersed state of the regular troops, it is often impossible to attach officers of every arm to each separate division, no man is fit to command a regiment, or even a company of infantry, unless he have some knowledge of fortification, and be well versed in every branch of artillery duty. There are now no means of obtaining that knowledge, nor can the means be furnished in any other way than by establishing an artillery school of practice, into which shall be admitted all the officers of the army, without distinction of corps.

Taking it for granted that the school would be necessarily limited, for the first year or two, at least, to the objects which I have enumerated, I propose that it consist of eight companies of artillery, with the field and staff officers of a regiment, to be detailed, or, in the first instance, selected from the four regiments of artillery of the entire class of graduates of West Point, and of one-fifth of the officers of infantry, including field and staff officers.

A general officer should be selected as governor and director of the institution, with a suitable staff, who, in addition to his duties at the school, might command a department.

The colonel of artillery to be sub-director, and to have the command of the artillery, the cadets, and the infantry officers.

There should also be a competent number of professors of the sciences connected with artillery—the number to be determined by circumstances. On their arrival at the institution the officers should undergo a strict examination, and take precedence there in everything relating to the objects of the school, not according to their military rank, but according to their military and scientific attainments. Those who, from the want of the requisite knowledge, shall be found unqualified to enter upon immediate duty, should be formed into a class, without regard to rank, and placed under the direction of the professors until they be properly qualified. This course would not be attended with the inconveniences which, at first sight, might be anticipated, for the several officers might, for all the purposes of police, retain their military commands, and, in case of instruction only, give place to juniors better qualified. Those who are worth retaining would not complain; they would, on the contrary, seize with avidity the occasion to qualify themselves for more elevated command, and would prefer giving place to their juniors at the school that they might be enabled to preserve their stations in the field; for no soldier is so dull as not to know that one active campaign would reduce to their proper level, in public estimation if not in rank, all persons employed.

The only difficulty which at present occurs to me in organizing the school would seem to be in the selection of a colonel of artillery qualified to command and instruct the regiment and to perform the duties of sub-director. With the qualifications of the colonels of the first and third regiments I am entirely unacquainted, and, consequently, cannot hazard an opinion as to the propriety of selecting either of them. The colonel of the 4th regiment has the intelligence necessary for the instruction of a corps of artillery, but his health is so bad as to put it out of his power to undergo the fatigue and submit to the constant application which the station would require. There is a colonel in the army, however, who is, in every respect, qualified; and as the colonelcy of the 2d regiment of artillery is vacant, I should consider it an advantage to the service to transfer him. I allude to Colonel Archer. The objection that he is an officer of the staff, should it be made, is not tenable; for Colonel Armistead, Colonel Bomford, Major Woolley, Captain Wade, and others, now attached to the infantry and artillery, were also officers of the staff. If any doubt previously existed, the transfer of those officers has settled the principle. They were officers of the army, as Colonel Archer is; and if the President had a right to transfer *them*, which he unquestionably had, he has the same right to transfer *him*. The question of seniority could not be affected by such a transfer; but even if it were, the public interest should be paramount, and those best qualified should, if possible, be selected for military as well as civil stations. If we trace seniority to its source, we find it based upon the principle that he who is best qualified shall be preferred; and when the senior is promoted to a vacancy, it is not because he is older in rank, but because having been longer on the army list the theory is that he is able and more intelligent than his companions; but such is not always the fact, and where it is not, one of the extraordinary cases provided for by the regulations occurs. That I have laid down the principle correctly, is evident from the fact that promotion, even when seniority is admitted, does not extend to the army, but is confined to the arm to which the officer belongs.

I have the honor to be, &c.,

TH. S. JESUP, *Quartermaster General.*

HON. J. C. CALHOUN, *Secretary of War.*

DEPARTMENT OF WAR, *January 20, 1824.*

SIR: I have received your note of the 18th instant with its enclosures, and perceive that you very fully embrace the views of the department in constituting the artillery corps of instruction at Fortress Monroe.

It will take time to effect the great object in view—that of forming a perfect regiment of artillery. The instruction ought to commence with the more simple and end with the higher acquisitions. It strikes me that the natural order would be field exercise, including that of heavy and light artillery, with such knowledge of cavalry or infantry drill as may be necessary for either branch of artillery service, to be followed by whatever is necessary in conducting attacks and defence of fortified places, with such knowledge of ordnance duty in its various branches as an artillery officer ought to possess.

I doubt the propriety of sending an officer to Europe, as I apprehend that but little knowledge could be obtained through him of similar institutions in that quarter, which may not be had from books or from officers now in our service.

You are at liberty to obtain the 3d volume of L'Allemand's work, and will furnish the department with a statement of the expenses of publishing it.

The laboratory and workshop will be established at the point, and orders have already been given, on the plans and estimates of Captain Baker, for the erection of a suitable building.

You will ascertain at what rate a suitable place on the main may be purchased or leased, say for five years, for the manœuvres of artillery and the construction of field works. You will also furnish the department with an estimate for the construction of a flying bridge, in order to pass over the artillery to the main.

Brevet rank will take place in the corps, and, according to the opinion of the Attorney General, ten years of continued service in the same grade is required to confer a brevet for length of service.

You have permission to proceed to West Point, according to your request, whenever you may deem proper.

I have the honor, &c.,

J. C. CALHOUN.

Colonel J. R. FENWICK, *Washington City.*

QUARTERMASTER GENERAL'S OFFICE, *Washington, January 13, 1827.*

SIR: Under your order of the 11th instant, received yesterday, communicating a resolution of the House of Representatives of the 9th, requesting a statement "showing the full amount of all expenditures in any manner connected with the artillery school of practice from the time of its establishment, and by whom established;" also, "whether the object of such expenditure be temporary or permanent; what sum is annually paid at Fortress Monroe for water for the use of the troops there stationed; what sum for the engineers and workmen; what sum has been expended in the erection of barracks and officers' quarters; will not some of those erected necessarily have to be removed as the work on the fortification progresses; what was the cost of preparing a parade ground, exclusive of the work performed by the troops; has not a farm been rented near said fortress; if so, at what price, and by whose order; has not the public hospital been converted into officers' quarters; if so, by whose orders, and what the expense; out of what appropriations have the expenditures connected with the artillery school of practice been paid;" I have the honor to state that the troops were concentrated for instruction by the authority of the late administration; and that the full amount of the expenditures made by this department on account of the school, from its organization in 1823, to the 30th September last, so far as I have the means of ascertaining, is forty-eight thousand two hundred and nine dollars and sixty-three cents, exclusive of the ordinary expenditures which must necessarily have been made had the troops remained at their original stations.

Paper marked A exhibits the several items of expenditure with the amount of each; an inspection of which will show that most of the objects are in their nature temporary.

The sum annually expended for water cannot be ascertained with precision, but it is believed not to exceed a thousand dollars. A copy of the existing contract for that object is submitted, marked B. The contracts previously made were regularly reported to Congress. The Engineer department has been engaged in digging or boring for water at Fortress Monroe; but thus far, I understand, their efforts have been without success.

The fourth and fifth items, in paper marked A, show the amount expended in erecting and repairing barracks and officers' quarters, and preparing a parade; but as all accounts after examination here are sent to the treasury, I have not the means of ascertaining the exact expense of the parade. I believe, however, it did not exceed fifteen hundred dollars. Several of the buildings repaired were temporary quarters erected by the Engineer department for workmen, and which, it is probable, must be removed as the work on the fort progresses.

A farm has been rented in the vicinity of Fortress Monroe, at three hundred and fifty dollars per annum, by Lieutenant Colonel Eustis; I know not by whose order, but it was considered necessary to enable the commandant to exercise the artillery in field manœuvres, and the Secretary of War directed that the rent should be paid by the Quartermaster's department. The contract or lease was reported to Congress in January, 1826, a copy of which, marked C, is now submitted.

A building erected for an hospital was converted into quarters for officers, by order of the Secretary of War, but the work having been done under the orders of the Engineer department, I am not able to state the amount of expense incurred by the change.

All the expenditures by the Quartermaster's department on account of the school of practice at Fortress Monroe have been made from the appropriation for the Quartermaster's department.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP *Quartermaster General.*

HON. JAMES BARBOUR, *Secretary of War, Washington City.*

## A.

*Statement of expenditures in the Quartermaster's department incidental to the establishment of the Artillery School of Practice at Fortress Monroe.*

For transportation of ordnance .....	\$343 88
For transportation of troops, quartermaster's stores, &c., to and from that post .....	15, 481 71
For rents of quarters, storehouses, &c.....	1, 311 18
For repairs, building barracks, &c., and preparing a parade.....	29, 058 92
For pay to men on extra duty.....	626 94
For forage to public horses and oxen.....	1, 387 00
	48, 209 63

NOTE.—In the second item is included the cost of the supply of water, which refers almost exclusively to its transportation. In the third item is included the rent of the farm taken on lease by Colonel Eustis, commanding, at the yearly rent of \$350. In the fourth and fifth items is included the expense of preparing the parade.

QUARTERMASTER GENERAL'S OFFICE, *January 13, 1827.*

## B.

This agreement, entered into this 31st day of May, 1826, between Captain Henry Whiting, assistant quartermaster at Fortress Monroe, on the part of the United States, and Robert Lively, of Hampton, on the other part, witnesseth: That for and in consideration of the sum hereinafter mentioned, the said Lively agrees as follows, viz: that he will furnish daily, for the use of the United States troops at Fortress Monroe, (six days' notice being given,) such a number of barrels of good fresh water as may be required after the above notice, not to be less than twenty nor more than seventy-five barrels; that the said Lively shall provide the water, fill the barrels, transport them to the wharf at Old Point Comfort, and deposit them in the house which will be prepared for them: *Provided*, That the said Whiting shall furnish a sufficient number of empty barrels, so that the transports shall not be unnecessarily delayed in their trips: in consideration of which the said Whiting agrees, on the part of the United States, to pay said Lively, as a full compensation for the same, five cents per barrel for every barrel so delivered and deposited. The accounts to be settled quarterly.

HENRY WHITING, *Assistant Quartermaster.*  
ROBERT LIVELY.

Witness: JAMES BAKER.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, January 13, 1827.*

## C.

*Lease of Buckroe Farm.*

This indenture, made and entered into this ——— day of September, in the year of our Lord 1825, between Nathaniel B. Carey, and Gill A. Carey, of Lynchburg, in the State of Virginia, on the first part, and Abraham Eustis, lieutenant colonel in the United States army, commanding at Fortress Monroe, and acting for and in behalf of the United States of America, on the second part, witnesseth: That the said parties of the first part, for and in consideration of the sum of three hundred and fifty dollars, to be paid yearly, in quarter annual payments, to them or either of them, have granted, leased, and to farm let, to the said party of the second part, all that certain tract of land belonging to the said Miles Carey, situated on Mill creek, in the county of Elizabeth City, and known by the name of Buckroe Farm, supposed to contain eight hundred acres, more or less, with all the privileges and appurtenances thereunto belonging; to have and to hold the same for and during the term of three years, fully to be completed from the 1st day of January, 1826.

And the said party of the second part, for and in consideration of the premises, doth covenant and agree to pay to the said parties of the first part the sum of three hundred and fifty dollars yearly for three years, in quarter-yearly payments; that is to say, eighty-seven dollars and fifty cents on the 1st days of April, July, October, and January, in the years 1826, 1827, and 1828.

And it is furthermore particularly stipulated between the contracting parties that not more than one-third part of the arable land shall be tilled or cultivated during any one year; that at the expiration of this lease the fences shall be put into as good condition as when possession is delivered to the lessees; that the lessees may use all necessary wood for fuel and timber for fences, for stables, and for any other buildings they may think proper to erect: *Provided*, That no materials, either of stone, brick, or wood, appertaining to the said Buckroe Farm, are to be removed therefrom.

And it is, moreover, expressly agreed, that in case the said farm should be sold and conveyed, in fee simple, during the continuance of this lease, that the possession of the land and its appurtenances shall be surrendered to the said Miles Carey on the 1st day of January next succeeding the said sale and conveyance.

In testimony whereof, the parties aforesaid have hereunto set their hands and seals the day and date above written.

NATHANIEL R. CAREY. [L. S.]  
 GILL A. CAREY. [L. S.]  
 ABRAHAM EUSTIS, [L. S.]  
*Lieutenant Colonel.*

Signed, sealed, and delivered in presence of—

HY. A. THOMPSON.  
 JAS. H. COOK.

Test:

JOSEPH LEGAR,  
 ROBERT SEYMOUR,

As it regards G. A. Carey and Nathaniel R. Carey.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, January 13, 1827.*

ENGINEER DEPARTMENT, *February 26, 1827.*

SIR: The only part of the resolution of the House of Representatives, dated the 9th ultimo, relative to the school of practice at Old Point Comfort, upon which it devolves upon this department to report, is the inquiry whether some of the buildings erected for barracks and officers' quarters will not necessarily have to be removed as the work on the fortification progresses, and the inquiry relative to the hospital having been converted into officers' quarters.

In relation to the object of the inquiry first above stated, I have the honor to state that none of the buildings, of the description alluded to, will necessarily have to be removed as the work on the fortification progresses; and in relation to the inquiry respecting the hospital, that it has been converted into officers' quarters; that it was done by order of the Secretary of War; that the expense of effecting it cannot be accurately stated from such information as is now in this department; and that the expense was defrayed from the appropriation for Fort Monroe.

Respectfully submitted.

ALEX. MACOMB, *Major General, Chief Engineer.*

HON. JAMES BARBOUR, *Secretary of War.*

ORDNANCE DEPARTMENT, *January 16, 1827.*

SIR: In answer to so much of the resolution of the House of Representatives of the 9th instant, relating to the expenses of the artillery school of practice at Fortress Monroe, as pertains to this department, I have the honor to report: That the amount expended by this department at Fortress Monroe from May, 1824, to September 30, 1826, is as follows, viz:

For timber procured and labor performed in the construction of casemate gun-carriages, being a part of the permanent defences of the fortress.....	\$2, 100 00
This amount was paid out of the appropriation for the "armament of the new fortifications."	
Expended for materials and labor, in erecting a wheelwright's and blacksmith's shop, and for a gun-house for field artillery.....	1, 645 37
This item was paid out of the appropriations for "arsenals," and the objects of the expenditure were specified in the detailed estimate for arsenals for the year 1826.	
The objects of the expenditure in both the foregoing cases were permanent and necessary for constructing the fixed gun-carriages belonging to the works.	
Expended for materials and labor in constructing field artillery carriages and equipments....	4, 733 20
This item of expenditure is also for a permanent object, although not particularly connected with the defences of the fortress, as the artillery constructed is designed for the artillery service generally as well as for use at that place.	
Expended in paying for the care and preservation of the public property at the several dismantled forts in the harbor of Norfolk.....	600 00
Total amount expended.....	<u>9, 078 57</u>

This last item is no otherwise connected with Fortress Monroe than that the expenditure was made by an officer who was on duty at that place. This item may be considered temporary, as it will be continued no longer than may be necessary to preserve the public property at the dismantled forts.

The last two items were paid out of the appropriations for the current expenses of the ordnance service.

Nearly all the foregoing expenditures were for materials, as the labor was performed mostly by the troops. And as all the expenditures connected with the fortress were not temporary, but for permanent objects, they are not considered as chargeable to the school of practice. The expenditures properly chargeable to the school of practice consist in the ammunition consumed, a statement of which is herewith transmitted. This ammunition has not been purchased for the occasion, as all the principal materials for it were on hand, which have been prepared by the labor of the troops.

I have the honor to be, sir, very respectfully, your obedient servant,

GEO. BOMFORD, *Brevet Colonel, on Ordnance Service.*

HON. JAMES BARBOUR, *Secretary of War.*

*Statement of the ammunition expended by the Artillery School of Practice at Fortress Monroe, from its first establishment, in May, 1824, to September 30, 1826.*

2, 663 cannon cartridges, filled, (flannel.)	23 grape-shot, fixed.
1, 029 cannon cartridges, filled, (paper.)	272 6-pounder strapped shot.
137, 975 musket cartridges, (blank.)	116 12-pounder strapped shot.
79, 086 musket cartridges, (ball.)	18 18-pounder strapped shot.
405 portfires.	157 6-pounder case shot, fixed.
41 pounds slow-match.	16 12-pounder case shot.
14, 100 flints.	100 12-pounder shells.
2, 694 tubes.	215 24-pounder shells.
430 rockets.	863 fuzes, (filled.)
545 6-pounder round shot.	349 pounds rifle balls.
262 12-pounder round shot.	

GEO. BOMFORD, *Brevet Colonel, on Ordnance Service.*

ORDNANCE DEPARTMENT, *January 16, 1827.*

ADJUTANT GENERAL'S OFFICE, *Washington, September 19, 1825.*

SIR: I transmit herewith the contract\* between the United States and the agent of Miles Carey, for the rent of the "Buckroe Farm."

I am instructed to inform you that the President, in the absence of the Secretary of War, has approved the terms of the said contract, and that it is considered most proper to deposit the same with the commanding officer at Fortress Monroe

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

Lieutenant Colonel A. EUSTIS, *Commanding Fortress Monroe, Virginia.*

19TH CONGRESS.]

No. 358.

[2D SESSION.]

NAMES AND GRADE OF OFFICERS WHO HAVE RECEIVED DOUBLE RATIONS AND PAY AND EMOLUMENTS ACCORDING TO THEIR BREVET RANK IN 1826.

COMMUNICATED TO THE SENATE FEBRUARY 28, 1827.

DEPARTMENT OF WAR, *February 28, 1827.*

SIR: In compliance with a resolution of the Senate of the 20th instant, directing the Secretary of War "to communicate to the Senate the names and grade of the officers of the army who have received double rations or pay and emoluments according to their *brevet rank* during the last year, the amount so received, and when and in what service such officers have been employed," I have the honor to transmit the accompanying reports of the Second and Third Auditors of the Treasury, which furnish the information required.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The PRESIDENT of the Senate of the United States.

A.

*Copy of a letter addressed to William Simmons, esq., accountant of the War Department, dated*

WAR DEPARTMENT, *July 5, 1803.*

SIR: It will be expedient to have a uniform regulation for the extra allowance to the officers of the corps of engineers while travelling on duty, and while superintending the execution or repair of fortifications, viz: each officer, while travelling, to be allowed for the expense of stage hire, and \$1 25 per day in addition; and each officer, while superintending the execution or repair of fortifications, to be allowed double rations; but in no case should double rations be allowed to more than one engineer at the same time at any one place.

I am, &c., &c.,

H. DEARBORN.

## B.

WAR DEPARTMENT, *August 25, 1812*

The President is pleased to direct that generals commanding separate armies be allowed double rations.  
W. EUSTIS.

The PAYMASTER of the Army.

## C.

## GENERAL ORDER.

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *March 6, 1816.*

Generals commanding divisions; officers commanding military departments; and all officers, while in the actual commands of permanent posts and garrisons, separate from the stations of commandants of departments, which subject them to the additional expense of independent commands, are allowed double rations.

The pay account in which such charge is made must be supported by the officer's certificate, stating the post or garrison, and that he was actually commanding during the time charged.

No more than one officer can be entitled to double rations at the same station.

By order of the Secretary of War.

D. PARKER, *Adjutant and Inspector General.*

A commutation of double rations is allowed to the Adjutant and Inspector General in lieu of quarters and fuel.

W. H. CRAWFORD.

TREASURY DEPARTMENT, *Third Auditor's Office, February 24, 1827.*

SIR: I have the honor to hand you herewith a statement of the names and grade of officers of the army who have received allowances, according to their brevet rank, in the year 1826, so far as has been ascertained from accounts in this office; prepared in pursuance of the resolution of the Senate of February 20, referred by you to me on the 22d instant.

Very respectfully, your obedient servant,

PETER HAGNER, *Auditor.*

HON. JAMES BARBOUR, *Secretary of War.*

THE TRADE TO SANTA FÉ, IN NEW MEXICO.

COMMUNICATED TO THE SENATE MARCH 2, 1827.

Mr. BENTON, from the Committee on Military Affairs, to whom was referred a resolution of the Senate, on the subject of a military post on the trading route to Mexico, where it crosses the Arkansas river, reported:

That they referred the same to the Secretary of War, and received from him a communication in writing, which is herewith submitted to the Senate.

DEPARTMENT OF WAR, *January 11, 1827.*

SIR: Your letter of the 29th ultimo, enclosing a resolution of the Senate instructing the military committee "to inquire into the expediency of providing for the establishment of a military post on the trading route between Missouri and Mexico, for the protection of that trade," was duly received, and referred to General Brown for a report, which is herewith enclosed, and in whose views I concur.

The resolution of the Senate is returned.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. WM. H. HARRISON, *Chairman Military Committee, Senate.*

HEADQUARTERS, *Washington, January 10, 1827.*

SIR: Agreeably to your directions accompanying a copy of the resolution of the Senate instructing the Committee on Military Affairs "to inquire into the expediency of providing for the establishment of a military post on the trading route between Missouri and Mexico, for the protection of that trade," I have the honor to report:

That from the *nature* of the service required, to wit, the protection of trade—or, in other words, the effectual security of trading parties—military aid of a different character from that of a fixed garrison of infantry in the occupancy of any particular position seems to be essential. A post could not be established on the present trading route from Missouri to Mexico, which is supposed to be nearly five hundred miles more remote than our extreme cantonment on the Arkansas river, without incurring all the difficulties of access and communication of supplies and of reinforcements which are inseparable from establishments so far removed from our internal resources. Should the object in view, however, by its importance, seem to justify such a measure, I should recommend that two companies of infantry, supported by two other companies of mounted troops, be despatched to some eligible position on or near the Arkansas river, erect a cantonment for rendezvous, and engage from this centre in the itinerary service requisite for the accomplishment of the desired object.

*Without* the full force which I have suggested, especially of the cavalry arm, I should judge it inexpedient to make the movement. *With* this force it is presumed that the trade might be secured and the garrison placed beyond the probable reach of disaster.

I have the honor to be, sir, with the highest respect, your obedient servant,

JAC. BROWN.

HON. JAMES BARBOUR, *Secretary of War.*

20TH CONGRESS.]

No. 360.

[1ST SESSION.]

SHOWING THE CONDITION OF THE MILITARY ESTABLISHMENT AND FORTIFICATIONS  
DURING THE YEAR 1827.

COMMUNICATED TO CONGRESS WITH THE ANNUAL MESSAGE OF THE PRESIDENT, DECEMBER 4, 1827.

DEPARTMENT OF WAR, *November 26, 1827.*

SIR: I submit a report of the administration of this department from the date of my last report.

I beg leave to refer you to the accompanying reports, made up in pursuance of my orders, marked from A to P. They disclose, in detail, the measures which have been carried into effect in the various branches of the public service, subject to the superintendence of this department.

The document A is a report of Major General Brown on the state of the army. I renew with pleasure an expression of my entire satisfaction at the condition of the army, both as to its moral and military character. As far as I am officially advised, its officers are now essentially exempt from the degrading

vice of intemperance. The few examples which have been made (though necessary, yet reluctantly) to cleanse the army from this blot, united with a declared, unalterable determination never to pardon when a sentence of guilt for this offence, on satisfactory evidence, was pronounced by a court-martial, it is hoped will restrain the very few, if any, who are disposed to forget in this indulgence what is due to their characters as officers of the American army. To its good discipline generally the most ample testimony is borne, and particularly by Major General Brown, who, during the present year, made a tour of inspection through three of the great sections of the Union. The two schools of practice, Fortress Monroe and Jefferson Barracks, will be great auxiliaries in promoting its perfection. For the benefit of the former, I again renew a recommendation for the purchase of horses, contained in former reports, and for the reasons therein presented. The fiscal administration of the army continues to be entitled to the highest commendation, both as to its economy and punctuality. In the spirit of the former, a retrenchment has been made in the article of officers' transportation, by which no inconsiderable expense will in future be avoided; and it will be seen with satisfaction that in the articles of clothing and subsistence of the army there will be a considerable saving in the ensuing year, compared with the present; and notwithstanding the increased pay and allowance, so justly given at the last session to company officers, and for which no appropriation was made, and also the additional costs incurred in suppressing the threatened hostilities of the Indians, the total amount asked to meet the various demands on this department for the year 1828 is less by near a million of dollars than for the year 1827; principally, however, resulting from surpluses in former appropriations. And in relation to its punctuality, no ascertained delinquency whatever has occurred in any one of its various departments.

I beg leave, also, to recommend to the favorable consideration of Congress the alteration proposed by the commissary general of subsistence in the organization of that department, presuming that the mode of supplying the army by contract, whose advantages have been so satisfactorily manifested, will be continued by a new act of legislation, the former law being about to expire. In confirmation of this suggestion as to the advantages of supplying the army by this system, I beg leave to state that the price of rations, although of a much superior quality to those formerly issued, has been reduced to 11 $\frac{1}{2}$  cents at our most expensive posts, while at those least so we procure them at 6 $\frac{1}{2}$  cents.

I recommend to the consideration of Congress the erection of the buildings in or near the city of New York, and in the city of New Orleans, as proposed by the quartermaster general.

I presume to suggest, for the consideration of Congress, the propriety of founding an army asylum. Such establishments, it is believed, enter into the policy of every other nation, and even here have obtained already in the naval branch of the service. Uniformity of system alone in the two arms of the national defence, therefore, would seem to require it. The condition of some of the defenders of their country during the revolutionary war excited so far the sympathy of Congress as to experience its bounty. It is highly probable in our future history that many, both privates and officers, may be in circumstances no less distressing. Indeed, cases are now of frequent occurrence where the department is applied to for relief. An honorable asylum from such a condition seems to be dictated alike by policy and gratitude. A small monthly deduction from the pay of the officers and privates will constitute the fund for its support. It would manifest the beneficence of the nation if means were furnished at once from the public treasury for the erection of the necessary buildings.

The Military Academy at West Point, from the report of the late visitors, is progressing with its accustomed success, and loses nothing in a comparison, according to the testimony of those whose opportunities enable them to decide, with any establishment of the kind in the world.

In making selections from the thousands of candidates, I have redeemed my pledge made in a former report, of appointing one cadet, at least, from each congressional district.

In selecting visitors of inspection, I have deemed it but an act of justice to invite them from every quarter of the Union; and when it suited the convenience of the immediate representatives of the people to attend, (as it is a service without reward,) I have given them the preference, that they might, from their own observation, be the better able to decide on its value, and suggest and promote whatever was calculated to increase its usefulness.

The two corps of engineers have been actively engaged during the year—some in field duties, others in superintending fortifications; the former have returned to this place for the purpose of reporting upon their labors. I have had occasion in former reports to suggest the utter inadequacy of the existing organization of these useful officers to the demand on their services.

The various objects upon which Congress directed a reconnoissance to be made were promptly attended to.

In selecting among the objects presented for reconnoissance by the State authorities and respectable associations of private citizens, I have endeavored to be governed by their relative importance and a due regard to the fair claims of all parts of the Union. The result of the surveys has, in some instances, reduced the scale of the proposed objects so as to deprive them of the character of national importance; but even in these cases the labors of the corps have not been lost. By their superior science and experience they have given valuable information to those concerned, which, from their limited resources, they would have been unable otherwise to have procured.

Having finished the survey of the proposed national road from this place to New Orleans and made their report, which I had the honor of submitting to the 19th Congress, no further step can be taken by the department till the pleasure of Congress is signified by legislative enactment. Among the many important objects to which the attention of the department has been directed during the past session may be particularly enumerated the great western national road; the proposed Ohio and Chesapeake canal; the railroad from Baltimore to the waters of the Ohio; a communication between the waters of James river and the western waters; the improvement of the navigation in the Tennessee river, and the canal through Florida. Although the railroad is proposed to be effected by individual enterprise alone, it is certainly of great national importance, and justified the department in applying its means to ascertain its practicability. Reports on all these subjects are in a course of preparation, except on the railroad, and it is hoped that most of them will be prepared in time to be laid before Congress at its present session. For more particular information on these subjects I refer to document B.

I refer to documents B and C,\* containing the reports of the engineer and quartermaster's departments, in which may be seen the measures which have been pursued in execution of sundry special acts of Congress directing the construction of roads and the improvement of harbors, &c.

\* Document C, being report relating to the Cumberland road, is with miscellaneous class, No. 10.

In the report of the Engineer department will be seen the progress we have made in our several fortifications.

Document H is the report of the officer having direction of the Ordnance department. The alterations suggested by that officer in the organization of that department have been heretofore presented, and received the favorable consideration of Congress at their last session. I beg leave again to add my recommendation to the proposed changes.

The report of the same officer on the lead mines gives a very satisfactory view of the importance of this property to the United States. The expected annual supply is equal to 10,000,000 pounds, a tythe of which, as rent received by the government, will be more than sufficient for the purposes of the army and navy.

Document I, is the report of the clerk of pensions,\* by which it appears the number of revolutionary pensioners have been diminished by death since the last report four hundred and forty-three, and of invalid pensioners forty-eight.

In compliance with the act of Congress entitled "An act to authorize the President of the United States to run and mark a line dividing the Territory of Florida from the State of Georgia," a commissioner was appointed on the part of the United States to co-operate with one appointed by the State authorities of Georgia, for the purpose of carrying the act into effect. I regret to report that the object has not been effected. The correspondence on the subject will present the causes of the failure, and are contained in document K.†

The document L‡ is the report of the clerk charged with Indian affairs, accompanied with a treaty made with the Chippewa, Menomonee, and Winnebago tribes of Indians.

Under the injunction of the treaty made with the Sioux and Chippewa, Sac and Fox, Menomonee, Iowa, Sioux, Winnebago, and a portion of the Ottawa, Chippewa, and Pottawatomie tribes of Indians, made at Prairie du Chien on the 19th August, 1825, two citizens were directed to repair to Green Bay, with a view to its fulfilment. Just, however, preceding their arrival, a portion of the Winnebagoes, a powerful and perverse tribe, had committed serious acts of hostility by the murder of some of our citizens; and unfavorable appearances among other tribes indicated the design, as it was apprehended, of a powerful combination, threatening to disturb the peace of our borders.

Governor Cass, as soon as he was advised of these circumstances, with great promptitude and equal prudence, appealed directly to General Atkinson, in command at Jefferson Barracks, for aid, who, with a commendable zeal, moved with about six hundred men under his command to the anticipated theatre of hostilities, where he was met by other detachments from the army, and by volunteer companies composed of patriotic citizens.

Governor Edwards, for the protection of the people of Illinois, also ordered out a small portion of her militia. The celerity of these movements, with the imposing force gathered together, gave at once protection to our citizens. As soon as the department was advised of these movements, General Gaines was directed to proceed to the scene of operations, and to adopt the necessary measures to inflict punishment on the offenders. The Indians sued for clemency, and obtained it on the condition of giving up the murderers, eight in number, who are now in custody to await the sentence of the law. The document M§ presents the details of the subject.

The excess of the Indians may be ascribed to their thirst for blood. Their pretext is understood to rest on a supposed intrusion of the miners on their lands. To obviate any ground of complaint, and to meet the wishes of our western citizens, it is proposed to procure, by purchase, an enlargement of our boundaries in that quarter, so as to embrace the whole of the highly valuable lead mines said to abound in that region, and for which an appropriation will be hereafter asked.

I submit herewith reports marked 1, 2, and 3, from Colonel McKenney, he having been charged with the business to which they refer; from which the disposition of the Chickasaws and Choctaws, in regard to emigration to lands west of the Mississippi, may be inferred; also showing that an agreement has been concluded with the Creeks, subject to an approval in the usual form by the Executive, and the sanction of a Creek council to be called for that purpose, which secures to the United States the strip of land in Georgia not embraced in the cession of the treaty of Washington of January 24, 1826.

If the policy, as indicated in the ascertained dispositions of the Chickasaws especially, be approved by Congress, the appropriation of means corresponding thereto will be required to carry the measure into effect. There is little doubt of the identity of feeling on this subject in at least three of the southern tribes, and a large portion of the fourth, and that this feeling may be availed of, it is respectfully suggested that means be provided, to be applied in the discretion of the Executive, to profit by its existence.

The information recently acquired of the disposition of the Indians within our limits to remove has tended to strengthen the views which I have heretofore submitted on this subject, and I embrace the occasion most respectfully, but earnestly, to solicit again the attention of Congress to the necessity of adopting some general system which might better the condition of the Indians, and relieve the States and Territories of the encumbrance of their residence, a never-failing source of inquietude, and it is to be apprehended of disturbance.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The PRESIDENT of the *United States*.

A.

HEADQUARTERS OF THE ARMY, *Washington, November 1, 1827.*

SIR: In compliance with your instructions of the 10th September, I have the honor to submit the following returns and statements, viz:

A.—A statement of the organization of the army, conformable to acts of Congress.

B.—A return of the actual strength of the army from the last regimental and other returns.

\* Document I will be found with class of claims, No. 9.

† Document K will be found with miscellaneous class, No. 10.

‡ Document L will be found with class on Indian affairs, No. 2.

§ Document M and other documents relative to Indians will be found with class on Indian affairs, No. 2.

C.—A return showing the distribution of the troops in the eastern department.

D.—A return showing the distribution of the troops in the western department.

E.—A statement showing the number of men enlisted, the amount of money advanced for the purposes of recruiting, and the amount for which recruiting accounts have been rendered for settlement, from January 1 to September 30, 1827.

F.—An estimate of the amount which will be required for the current expenses of the recruiting service for the year 1828.

By statement E, it will appear that the sum of \$3,787 57 remains unexpended in the hands of recruiting officers. This amount is in a course of regular application to the recruiting service, and will doubtless in due season be regularly accounted for.

Brevet Major General Gaines has accomplished a tour of inspection within the last year comprehending the remote posts occupied by the 4th regiment of infantry at Tampa Bay, Pensacola, and the interior of Florida; also the posts of Petite Coquille, St. Philip, New Orleans, Cantonment Jesup, Baton Rouge, Fort Snelling, Fort Crawford, Fort Armstrong, and the Jefferson Barracks.

Brevet Major General Scott has inspected the posts of Fortress Monroe, Bellona arsenal, Fort Severn, Fort Columbus, Fort Trumbull, Fort Wolcott, Fort Independence, Fort Constitution, Fort Preble, Fort Brady, Fort Mackinac, and Fort Howard; also West Point and the arsenals at Watertown and Watervliet.

Brevet Brigadier General Wool has inspected all the military posts on the Atlantic, from Old Point Comfort to Eastport, including the arsenals at Richmond, Baltimore, Philadelphia, Watertown, Rome, and Detroit; also the armory at Harper's Ferry, and the posts of Plattsburg, Sackett's Harbor, and Niagara.

During the summer and autumn of 1826 Colonel Croghan made an inspection of the following posts, the report of which having been received since my last annual communication on this subject, they are here recapitulated, viz:

Fort Atkinson, at the Council Bluffs, Fort Brady, Fort Mackinac, Fort Howard, Fort Snelling, Fort Armstrong, Fort Crawford, and the troops then stationed at St. Louis. During the current year Colonel Croghan has also inspected the posts of New Orleans, Baton Rouge, Cantonment Jesup, Cantonment Towson, Cantonment Gibson, Fort Snelling, Fort Armstrong, and the Jefferson Barracks.

The field officers of the artillery regiments are now generally engaged in the inspection of their companies; no reports have yet been received from them.

Added to these sources of information, the results of my own inspection of a large portion of the army during the past year have confirmed me in the position that in all the departments of instruction, police, discipline, and administration, the present condition of our military establishment is as favorable as could be expected under the circumstances incident to its organization.

With regard to the armament of our sea-coast frontier, it may be proper here to observe that in all our forts and sea batteries there is a lamentable deficiency of artillery material. Almost all the Atlantic posts require new supplies of ordnance, new platforms, and new gun-carriages to place them even in a respectable state of military equipment, and it is respectfully submitted whether it may not be expedient to call the serious attention of Congress to this subject, and to ask an appropriation for the purpose of furnishing those forts with at least the means to repel an insult, and to meet such possible exigencies as may be rationally apprehended.

The important advantages which have been contemplated from the system of concentration in the *personnel* of the army continue to be manifested in the happy effects already resulting from the schools of practice. It has never been a subject of doubt among unprejudiced military men that by such a system, principally, the military efficiency of our peace establishment under its present circumstances and organization is to be preserved, and our confidence in the attainment of this great object is more and more confirmed by the experience which even our present limited means have thus far afforded us. The late movement against the Winnebago Indians by a detachment of troops from Jefferson Barracks, under the command of Brigadier General Atkinson, has furnished a practical illustration of some of the arguments which I have heretofore advanced in reference to this subject and that of our northwestern defences. By a prompt and imposing display of military force in the very heart of their country, those savages have been awed into perfect subjection, and the apprehensions of many of our citizens arising from their threatened hostility have been entirely removed. This end has been happily accomplished without violence or bloodshed, and the moral effect of the transaction on the minds of the Indians promises to be as lasting as it has thus far proved decisive.

The number of desertions from the army during the past year is nearly the same as in the year preceding. Desertion has been of much more frequent occurrence in the regiments occupying southern stations than in those situated in more healthy latitudes. This difference, however, will, it is hoped, entirely disappear when the mind of the soldier becomes satisfied with the assurance that his term of service at a sickly station is not without a period, and that the paternal care of his government will never suffer that period to be far remote.

The measures which I have heretofore so earnestly recommended for improving the condition of the non-commissioned grades of the army, and of offering additional inducements for the re-enlistment of approved soldiers, received from the last Congress the most favorable attention, but for want of time the bill framed with a view to these objects was not finally acted on. I therefore request that this subject may be again brought forward at the ensuing session. Few departments of the army can be more essentially improved by a judicious interference of the legislative power than that of the rank and file. The provisions embraced in the proposed bill were all *incentive* in their nature, and no similar expedients have yet been devised which promise more plausibly to raise the character of our soldiery, or to arrest the evil of desertion.

I have the honor to be, sir, with the highest respect, your obedient servant,

JAC. BROWN.

Hon. JAMES BARBOUR, *Secretary of War.*

Remarks.—Several assistant commissaries, (being on duty at the same post, with their companies,) and officers on courts-martial, or other temporary extra service, are not included in any of the divisions of this analysis, which is the cause of the difference between the numbers here reported and the aggregate under the head of "detached service" on the face of the return.

R. JONES, *Adjutant General.*

Third regiment of artillery .....	32			
First regiment of infantry.....	15	Fifth regiment of infantry.....	2	
Second regiment of infantry .....	20	Sixth regiment of infantry .....	10	
Third regiment of infantry .....	2	Seventh regiment of infantry .....	8	
Fourth regiment of infantry .....	10			67

Whole number of recruits enlisted..... 953

Amount of money advanced from January 1 to September 30, 1827, on account of the recruiting service .....	\$21, 516 49
Amount of the same accounted for, or for which accounts and vouchers have been rendered for the same period.....	17, 728 92
Balance in the hands of recruiting officers .....	<u>3, 787 57</u>

The expenses of recruiting for the present year have averaged about \$900 per month.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

The SECRETARY OF WAR.

## F.

ADJUTANT GENERAL'S OFFICE, *Washington, November 5, 1827.*

SIR: Pursuant to your instructions, I am directed by the general-in-chief to submit the following estimate for the expenses of the recruiting service of the army for the year 1828:

Bounties for 2,591 recruits, at \$12 per man .....	\$31, 092
Premiums for enlisting the above, at \$2 per man .....	5, 182
	36, 274
Contingent expenses of the recruiting service, including quarters, fuel, bunks, straw, stationery, citizen surgeons for examining and attending recruits, magistrates for administering oaths, and all expenditures on their account until put in march for their regiments, at \$7 per man.....	<u>18, 137</u>

The number of recruits estimated for 1828 is calculated as follows:

The vacancies existing in the rank and file of the army on the 30th of September last, as exhibited by the latest monthly returns received, amount to.....	656
To which add the number of discharges that will take place by the expiration of enlistments from the 1st of October, 1827, to the 31st of December, 1828 .....	1, 467
And the number of casualties by death, desertion, and discharges for inability, &c., for the same period .....	1, 000
	<u>3, 123</u>
From which must be deducted recruits remaining at general rendezvous and depots. 182	
And the estimated number that will be enlisted up to December 31, 1827 .....	350
	<u>532</u>

Total number of recruits required for 1828 .....

2, 591

It is calculated that on the 31st of December next there will remain in the treasury a balance of the appropriation for 1827 for bounties and premiums of.....	\$13, 600
And of the appropriation for contingencies .....	3, 300
An appropriation will therefore be necessary for the year 1828 for bounties and premiums of.	22, 674
And for contingencies or expenses of recruiting.....	14, 837
Amount required.....	37, 511

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

The SECRETARY OF WAR.

B.

ENGINEER DEPARTMENT, *Washington City, November 20, 1827.*

SIR: I have the honor to submit herewith the report required by your order of the 24th ultimo, exhibiting the condition of the fortifications, the works of internal improvement, and the Military Academy on the 30th of September last, with their progress during the year ending on that day.

The annexed table, marked A, will exhibit the sums available for these objects during the period referred to, and the manner in which they have been applied; from which it will also appear that all the funds advanced to disbursing agents on account of the several works under their direction have been satisfactorily accounted for.

The table marked B will exhibit those fortifications of which plans have been made by the board of engineers, but which have not yet been commenced, arranged in classes according to the order in which they should be commenced, with an estimate of the cost of each annexed.

Since my last annual report the board of engineers for fortifications have prepared plans and estimates of a work intended for the defence of Pensacola, and have also been, and now are, engaged with those for Charleston and Savannah, both of which, it is believed, will be completed in the course of the winter. The several fortifications on the Gulf of Mexico, and on the Mississippi river, and at the outlets of Lake Pontchartrain, now in progress, have been inspected by the board during the past year.

*Battery at Bayou Bienvenue.*—This work was commenced in December last under an appropriation made at the preceding session of Congress; and notwithstanding the greatest difficulties were experienced in procuring the requisite degree of firmness for the foundations, the work has progressed with great success, and will probably be finished by the first of January next, at an expense somewhat less than the amount of the original estimate.

*Fort Adams, in Newport harbor.*—The amount appropriated for this work will have been advantageously expended before another appropriation can be made. The result of an inspection of this work by the chief engineer in the month of September was highly satisfactory. The materials of which the work is building are of the best quality, and the workmanship executed in the most durable manner.

*Fort Hamilton, at New Utrecht Point.*—In consequence of the land forming a part of the site of this work having been at length obtained, the work has progressed during the past year with the greatest activity and advantage, the amount expended thereon being considerably more than the last appropriation. A large balance from the preceding appropriation had remained on hand, the operations being restricted by the difficulty of obtaining the requisite land. An inspection of this work was also made by the chief engineer in the month of September, which proved equally gratifying with that of Fort Adams.

*Fort Delaware* has been completed within the last year.

*Fortress Monroe, at Old Point Comfort, Virginia.*—More than three-fourths of the appropriation for this work has been advantageously applied to its construction, and the operations have been carried on under as favorable circumstances as could be desired, with the exception of the delay and inconvenience resulting from the failure of a contractor to deliver the requisite number of bricks for the service of the work. This failure has occasioned a considerable loss of time, but the amount of work done during the past year is nevertheless very considerable. All other contracts have been faithfully executed, and the materials furnished for the service of the work have been of the best quality.

*Fort Calhoun, at the Rip Rap shoal, Virginia.*—The deposit of stone for the formation of the mole on which this work is to be built has been continued during the year, and considerable progress has also been made in laying the foundations of the work. The materials supplied at this work are of an excellent quality, and all the contracts connected with it have been faithfully fulfilled as far as the services of the work required.

*Fort Macon, at Bogue Point, North Carolina.*—The masonry of this work was commenced in the month of June, but owing to the difficulty in procuring mechanics, and the absolute necessity of sending to the northern cities for them, the operations were much retarded at their commencement, but they are now in a state of forwardness. A like difficulty has been experienced in procuring the requisite number of laborers, much to the disadvantage of the work; it suffered principally however from the effects of the violent storm which visited the whole southern coast in the month of August, and which resulted at this place in a very considerable destruction of public property and serious injury to the work. As the violence of the storm and the height to which the water rose were far greater than had before been known at this place, no foresight could have guarded against the injuries which were sustained.

*Fort at Oak island.*—The appropriation for this work, with the exception of a trifling balance, was expended prior to the 30th of September, and was faithfully applied. The excavations of the ditches have been partially accomplished, and considerable progress has been made in the masonry of the citadel and a part of the work itself. No serious obstacle to the progress of the work is anticipated.

*Fort at Chef Menteur.*—An appropriation of \$30,000 was asked for at the last session of Congress to complete this work. Under this appropriation the work has progressed during the past year in the most satisfactory manner, and it is believed the fort will be ready for the reception of its garrison by the first of January next.

This work has been inspected by the board of engineers during the past year, and found to be progressing under the most favorable circumstances, the materials and workmanship being of the most substantial and durable character.

*Fort Jackson, at Plaquemine Bend.*—The operations during the past year have been of the most satisfactory character. The excavations of the principal ditches have been completed, and the masonry has progressed with rapidity and success. The superintending engineer has informed the department that the entire balance of the last appropriation will have been expended on the first of January next, and that it is extremely desirable and important that the appropriation for this work should be made at an early period of the ensuing session of Congress, as the extreme unhealthiness of the climate, during the summer season, precludes the possibility of carrying on the works during four months of the year. From an inspection of this work, by the board of engineers, it appears that the work is executed in a manner highly creditable to the superintending officer.

*Fort at Mobile Point.*—The annual report of the superintending engineer at this work, exhibiting its condition on the 30th September, has not yet been received, in consequence, it is presumed, of some accident, as the previous reports of that officer have always been received with the greatest regularity. From his last monthly report, however, it appears that the operations were in successful progress; and, from an inspection made by the board of engineers, it also appears that the work done is highly creditable to the superintending officer.

It is deemed proper to repeat the remark which was made in my last annual report, that, in most instances, expense would be saved and great facilities afforded to the progress of the different works, (particularly those in the southern States,) if appropriations, either partial or total, could be made at an early period of the session of Congress. For those works on the southern coast the winter and spring are the only seasons at which the operations can be advantageously carried on; and to the northern works this arrangement would also offer advantages, as it would enable the directing officers to conclude their contracts, and make all the necessary preparations for commencing their labors as early in the spring as the weather would permit.

*Sea wall for the protection of George's island, Boston harbor.*—This work has been very nearly completed, and has been executed in the most substantial manner. The sum of \$2,000, now asked for, will complete the work.

*Repair of Fort Constitution, at Portsmouth, N. H.*—This work has been accomplished within the past year, as was anticipated in my last annual report.

The board of internal improvement have been occupied during the past year on the following objects:

A report on a mail-route to connect the cities of Baltimore and Philadelphia, with an estimate and map annexed to the same.

A report, plan, and estimate of a canal to connect Lake Pontchartrain with the Mississippi at New Orleans.

An examination of the peninsula of Florida, with a view to ascertain the practicability of a canal to connect the waters of the Atlantic and the Gulf of Mexico across the said peninsula.

An examination of the country between the bays of Mobile and Pensacola, for the purpose of ascertaining the practicability of connecting them by a canal.

A reconnoissance of the country from New Orleans to Knoxville, by way of Baton Rouge, with a view to ascertain the relative advantages of a route for a national road from Washington city to New Orleans, through West Tennessee.

An examination of the contemplated communication between St. Mary's harbor, (Georgia,) and St. John's river, in Florida.

On the first two subjects reports have already been received from the board; on the others they are now engaged.

The topographical and civil engineers have been employed under the direction of this department during the year on the following surveys:

One brigade, under the direction of a topographical engineer, has completed the surveys of the proposed routes for a canal to connect the Atlantic and Gulf of Mexico across the peninsula of Florida, and is now engaged in making a report thereon, as directed by the act of Congress of the 3d March, 1826.

A brigade, under the direction of a topographical engineer, has—

1st. Executed a survey to ascertain the practicability and utility of removing the obstructions to the navigation of the Piscataqua river, Maine, under the act of May 20, 1826.

2d. Surveyed the bar at the mouth of the Merrimac river, in the State of Massachusetts, to ascertain the practicability of deepening the channel over the same, under the same act.

3d. Surveyed Saugatuck river and harbor, Connecticut, for the purpose of ascertaining the expediency and expense of removing obstructions to the navigation thereof, under the same act.

4th. Surveyed the harbor of Mill river, Connecticut, with a view to ascertain the expediency and expense of removing obstructions to the navigation of that harbor.

5th. Surveyed the harbor of Black Rock, in the town of Fairfield, Connecticut, with a view to ascertain the expediency and expense of erecting a beacon on a ledge of rocks about one mile from the town.

6th. Surveyed the harbor of Little Compton, Rhode Island, (under the act of March 2, 1827,) with a view to ascertain the expediency and expense of constructing piers to improve said harbor.

7th. Surveyed the shore and point at the north end of Goat island, in the harbor of Newport, Rhode Island, to ascertain the practicability, expediency, and expense of building a wall to the extremity of said shoal, to improve the navigation.

8th. Surveyed the river and harbor of Warren, in the State of Rhode Island, to ascertain the expediency and expense of erecting a pier in Warren river, near the entrance into Warren harbor.

9th. Surveyed the harbor of Stonington, Connecticut, to ascertain the expediency and expense of erecting a pier in the same, under a provision of the act of March 2, 1827.

After completing the above-mentioned surveys, the same brigade was also employed in the examination and survey of the different routes for a canal from Taunton to Weymouth, in the State of Massachusetts, but it was found impossible to complete the operations connected therewith during the present season.

A third brigade, under the direction of a topographical engineer, has been employed in the continuation of the surveys and examinations necessary to determine the practicability of a canal to connect the waters of Lake Erie with those of the Ohio, at Pittsburg, under the act of April 30, 1824, and has—

1st. Surveyed a route from the head of the main feeder of the Conneaut reservoir, along the valley of French creek, to Mile's branch, up Le Bœuff creek, and across the Tamarack swamp and Beaver Dam summits, to the port of Erie.

2d. Surveyed a feeder from the junction of Mile's branch and French creek to both of these summits.

3d. Surveyed an experimental line for the embranchment of the Conneaut and Elk creek route, from the valley of the latter creek to the town of Erie.

4th. Surveyed the route from Pittsburg to Conneaut lake by the valleys of the Alleghany and French creek.

5th. Surveyed and determined the position of a canal from the Akron summit of the Ohio State canal to the eastern side of the ridge of land which divides the waters of the Mahoning from those of the Cuyahoga, with the lines of feeders for conducting the necessary supplies of water to the same.

6th. Completed the examination of the ground east of the Shenango river, and examined the valley of the Mahoning to Ravenna.

Under the same act a fourth brigade was employed, under the orders of a topographical engineer, and completed the surveys of canal routes from Lake Mumphramagog to Lake Champlain, by way of La Moille and Black Water rivers, and from Lake Champlain to the Connecticut river, by the valley of Onion river.

A topographical engineer, with one assistant, has also examined, during the last year, a route for a national road from Washington city to Buffalo, and also a route for a national road from Zanesville (Ohio) to Florence, in the State of Alabama.

One brigade, under the direction of an assistant topographical engineer, has continued the surveys of a route for a canal to connect the waters of the James and Great Kenhawa rivers, and has made sufficient progress therein to enable the officer under whose direction the examination has been conducted to furnish to the board of internal improvement the information necessary to the determination of the practicability of the communication.

In the month of April last an application was made by the Baltimore and Ohio Railroad Company for assistance in the prosecution of the requisite examinations and surveys preparatory to the location of the road; and, as the work was considered by the Executive of great national importance, orders were given by the War Department to detach for that service as many military and civil engineers as could be withdrawn from objects of less pressing necessity. In consequence, a detachment, consisting of two military and one civil brigades, was directed to co-operate with the company, and has since been engaged in making the preliminary examinations.

A brigade, under the direction of an assistant topographical engineer, has completed the survey of the swash in Pamlico sound, for the purpose of ascertaining whether the channel through the same can be deepened, as well as that of Cape Fear river, below the town of Wilmington, for a similar purpose; both of which objects were provided for by the act of March 20, 1826. This brigade will shortly be employed in the execution of the survey of Roanoke inlet and sound, which was also provided for by the same act.

The same brigade executed, in part, a survey of the proposed canal route between the Neuse and the North rivers, in the State of North Carolina.

The examination and survey of the Muscle Shoals, in the Tennessee river, has also been completed by a topographical party, as well as that of the contemplated communication between the Hiwassee and Coosa rivers, in the State of Alabama. The same party was prevented by sickness from executing the survey of the Colbert Shoals, in the Tennessee river, provided for by the act of March 2, 1827, but a civil surveyor has been employed to complete the same, and has probably effected that object by this time.

A brigade, under the direction of a civil engineer, has been employed in the examination and survey of a route for a canal from the city of Baltimore to the contemplated Chesapeake and Ohio canal, and in the reconnoissance of the route for a canal to connect the above route with the city of Annapolis. These objects have been accomplished, and an estimate and plans of the first-mentioned route have been submitted to the department.

A brigade, under the direction of a civil engineer, has been employed in the examination and survey of a route for a canal to connect the Maumee of Lake Erie with the Wabash river; but their operations during the past year, like those of the preceding year, have been much retarded by the extreme unhealthiness of the climate. It is hoped, however, that the surveys will be completed before the close of the season.

Under the act of March 3, 1825, to authorize the President to cause a road to be marked out from the western frontier of Missouri to the confines of New Mexico, the commissioners who were appointed have performed the duties assigned them, and made their report.

A civil surveyor has also been employed for the purpose of surveying the different routes for a continuation of the national road from Cumberland to this city, and is now engaged in the fulfilment of that object.

The preliminary and experimental surveys for the continuation of the national road west of Zanesville, and the location of the road, have been completed to the boundary line between the States of Indiana and Illinois by the commissioner appointed for that purpose; but a particular and minute report thereof has not yet been received, but is expected shortly.

This continuation of the national road from the Ohio river to Zanesville has been prosecuted during the year under the most favorable circumstances, and the results already afforded by such portions of the road as have been finished a sufficient length of time to permit the work to acquire the requisite solidity, have been such as to remove the prejudices which have so long existed against the mode of construction of the McAdam principle. Of the whole distance between the Ohio and Zanesville, twenty-eight and a half miles have received three coverings of stone, making a total thickness of nine inches; and as all the masonry necessary in this distance for bridges, culverts, and drains, has been completed, this portion of the road may be considered as entirely finished, with the exception of those small items of work which are necessary on all newly constructed roads.

On a second portion of the road, embracing a distance of twenty-three and a half miles, the travel was admitted on the first day of July last, and will be continued until the ensuing spring, before the application of the cover of stone, in order to afford ample time for the settling of the numerous and deep fillings which it was found necessary to make. The interim will be employed in the collection of materials for the cover of the same.

On the 21st day of July last the remaining distance of twenty-one miles was put under contract at more favorable rates than had been previously obtained, and the whole of this line, with the exception of about seven miles, is in an active state of progress.

As the report of the superintendent of this road contains much valuable and interesting information

on the subject of its construction, and the repair of the Cumberland road, I beg leave to annex it to this report. It is marked C.\*

The act of March 2, 1827, appropriating \$30,000 for the repair of the national road from Cumberland to Wheeling, has been partially carried into effect. An agent for the superintendence of the same was appointed, who reported to this department, in the month of September last, that contracts to the amount of \$17,000 would be completed by the 1st of October. In consequence of the subsequent decease of this agent a successor has been appointed, but no report as to the condition of the work has yet been received from him.

In order to reconcile the great differences between the estimates of the cost of the contemplated Chesapeake and Ohio canal, as furnished by the board of internal improvement and the central committee of the canal convention, two experienced and practical civil engineers have been employed to re-examine the line and prepare new estimates. These gentlemen are now engaged in that duty, and it is hoped that a report of their labors will be received during the ensuing session of Congress.

Under the act of March 2, 1827, providing for laying out and constructing a road from Detroit to Chicago, and also for making a road from the Miami of Lake Erie to Detroit, agents have been appointed for the superintendence of the same, but no reports descriptive of their condition have yet been received from those agents.

The same act also authorized the laying out a road from Detroit to Saginaw river and bay, and also a road from Detroit to Fort Gratiot. In pursuance of which, commissioners were appointed for the fulfilment of each of these objects, the first of which has been accomplished and reported on; of the second, no intelligence has yet been received.

Under the act of May 26, 1824, for deepening the channel leading into Presque Isle harbor, and for the preservation of Plymouth Beach, those works have progressed during the past year in the most satisfactory manner.

The work done at Presque Isle has continued to produce the desired effect of deepening the water on the bar, and no doubts are now entertained of the entire success of the work, when the south dike shall have been completed. In the report of the last year the completion of this dike was confidently anticipated with the sum then asked for, and this expectation would have been fully realized, but for the great increase in the depth of the water, produced by the progress of the work, which rendered it necessary to sink a part of the dike in a depth of thirty feet. This dike has been finished, however, for a length of two hundred and seventy yards, leaving but eighty yards to render it complete.

The means adopted for the preservation of Plymouth Beach have afforded the most satisfactory results. The work was found fully adequate to withstand the violence of the sea during the exposure of last winter, and is daily gaining strength by additional accumulations of sand. Parts of the work which, in 1825, were five feet under water at high tide, are now perfectly secure from the effects of the sea at all times.

Under the act of May 24, 1824, to improve the navigation of the Ohio and Mississippi rivers, the removal of snags, sawyers, and other impediments to the navigation has been successfully prosecuted. In my report of last year it was stated that intelligence had been received of the death of the agent who had been appointed to superintend the execution of the work, and that a temporary agent had been selected. Since that time, a gentleman of Kentucky, who was highly recommended for his knowledge of the difficulties in the navigation of those rivers, as well as for his zeal and activity, has been chosen to superintend the removal of the obstructions, and has successfully progressed in improving the navigation of the Mississippi below the mouth of the Ohio as far as circumstances would permit, but, owing to the unusually high state of the water, it was found impossible to proceed as rapidly as had been anticipated. By the last report, however, it appears that he had removed the principal obstructions to the navigation on a distance of one hundred and eighty miles below the mouth of the Ohio.

Under the act of March 3, 1827, for improving the navigation of the Ohio river, an agent was appointed to superintend the execution of the work, who made the necessary arrangements for its vigorous prosecution, but was prevented by the high state of the water from accomplishing as much as could have been desired. It is hoped, however, that the next season will offer more favorable opportunities of removing the obstructions, and, as the person to whom the direction of the work has been committed was highly recommended for his ability and zeal, there is every assurance of the work being faithfully executed.

The act of March 2, 1827, providing for the improvement of certain harbors, contemplated the erection of a pier at the mouth of Dunkirk harbor, in the State of New York, and, agreeably to a provision of the act, a contract was entered into in June last for the construction of the pier, which has progressed with entire success, and will be completed in the course of the year in a substantial and durable manner.

The same act also provided for the improvement of Cleveland harbor, in the State of Ohio. Contracts have been made for the delivery of the necessary materials, and a commencement of the work has been made by the construction of a dam across the mouth of the river to divert its course, and the excavation of the sand bar at its entrance. This has already had the effect of opening a channel four and a half to five feet in depth.

The same act also authorized the appropriation of \$10,650 for the improvement of Hyannis harbor, in the State of Massachusetts; but as the arrangement for the superintendence of the work could not be effected until late in the season it was deemed advisable to defer its commencement until spring. It will then be commenced under every advantage.

Under the same act a contract was entered into for the construction of two piers at the mouth of Oswego harbor, in the State of New York. One of these has been commenced and prosecuted with entire success, and they will both be probably completed in the course of next year.

The appropriation of \$8,000 for the improvement of the harbor at the mouth of Pascagoula river, and for removing obstructions to the navigation of said river, which was also provided for by the same act, remains unexpended, in consequence of its having been represented to the department by the officer who was directed to make the requisite examinations of the harbor as extremely doubtful whether the contemplated expenditures were calculated to produce the desired effect. The report of the officer is now under consideration.

Arrangements were also made for carrying into effect that part of the act which provides for the removing the obstructions to the navigation of Saugatuck river and protecting Saugatuck harbor. An agent has been appointed, and the work is now in progress.

\* This report relating to internal improvements will be found in Miscellaneous, Class No. 10.

That part of the act providing for the completion of a pier at the mouth of La Plaisance bay, in the Territory of Michigan, has been attended to by the execution of a contract for the fulfilment of the same, and the work is to be completed next summer.

The appropriation of \$4,000 by the same act for the removal of the obstructions to the Kennebec river, at Lovejoy's Narrows, has not been expended, as it was found impossible to make a contract for the execution of the work in a suitable manner except for a sum considerably greater than the amount of the appropriation. An additional sum is now asked for, which, with that already granted, will be sufficient for the execution of the work in the most complete manner.

The same act also provided for the erection of piers, placing beacons or buoys, and removing obstructions at or near the entrance into the harbor of Saco, in the State of Maine, in pursuance of which an agent has been appointed to superintend the works, and they are now in a state of forwardness.

*Piers at the mouth of Buffalo creek.*—This work is now in successful progress, and will, when completed, produce the desired effect. The work already executed affords considerable shelter to vessels, and, when completed, will, without doubt, offer a secure and permanent harbor to all such vessels as navigate the lake. No report has yet been received from the agent, but the result of an actual inspection of the work has satisfied the department of its great utility.

*Ashtabula creek, Ohio.*—The piers at the mouth of this creek have been carried out during the past season to an average length of two hundred and fourteen yards, and into ten feet water. The effect which has already been produced is to have procured a depth of four feet on the bar, which was formerly quite dry. It is intended to carry the piers one hundred and six yards further into the lake, which it is believed will insure the necessary depth of water in the channel.

*Cunningham's creek, Ohio.*—Contracts which were entered into for the materials and framing of the work during the last fall and winter have been faithfully executed, and the work has been carried on as far as the means available would justify. An additional sum has become indispensable, in consequence of the necessity of loading the piers with stone, which was not calculated upon in the original estimate. It was also found necessary to repair a part of the old work which had been injured by the effects of storms before the new work could be extended.

*Grand river, Ohio.*—The work at this place has progressed during the last year in a very satisfactory manner. The whole of the east and a wing of the west pier are nearly completed, and the effect thus far has been to remove the dry sand bar at the mouth of the river, and to increase the depth of the channel sufficiently to admit all vessels which navigate the lake, except on a small bar beyond the end of the east pier. The completion of the west pier will remove this obstacle, and for it an additional sum has been found necessary.

*Huron river, Ohio.*—This work has been attended with success similar to that at the other harbors on the lake. The effect of the work already executed has been to preserve the channel open during the whole summer, which was formerly entirely closed, and it is now sufficiently deep to admit vessels drawing six feet water.

*Improvements of Sackett's Harbor, New York.*—Contracts have been made for the mud machine and scows requisite for dredging the harbor, and they are now probably executed. The direction of the work has been committed to the trustees of the village, whose interest in the success of the contemplated improvements is a guarantee of the faithful application of the appropriation.

*Pier at Steel's ledge, in the harbor of Belfast, Maine.*—The act of May 20, 1826, provided for the erection of this pier; and the work has been nearly completed during the past summer. It now only remains to make a slight addition to the pier, for the purpose of shielding it more effectually from the weather; but this cannot be done until the ensuing spring, and for this purpose the balance of the appropriation on hand will be amply sufficient.

*Building new piers and repairing old ones at New Castle, Delaware.*—A plan for the fulfilment of these objects has been adopted by the department, and the execution of it intrusted to an officer of the corps of engineers; but as the necessary arrangements could not be made until very recently, it is not expected that much progress will be made until the ensuing spring.

*Removing obstructions and deepening the harbor of Mobile.*—The execution of this work has been committed to the mayor and aldermen of Mobile, but no report of their operations has yet been received.

The act of May 20, 1826, which directed a survey of the public piers at Chester, in the river Delaware, with a view to ascertain the expense of repairing them, has been complied with. A survey was made, and a plan and estimate of the sum necessary for their repairs have been submitted to the department.

That part of the act of March 2, 1827, providing for the examination of the public piers at Port Penn, Marcus Hook, and Fort Mifflin, in the river Delaware, has also been carried into effect, and estimates of the expense of improving the same have been made and forwarded to the department.

Besides the foregoing operations, an inspection has been made, at the request of the Secretary of the Treasury, of the Chesapeake and Delaware canal, by a military and a civil engineer; and a report as to the administration and actual condition of the work has, by your orders, been made.

The Military Academy has continued to progress under the most favorable circumstances during the past year. From the report of the board of visitors, which is transmitted herewith, and marked D, it will appear that the institution is in as favorable a condition as the present legal provisions will allow, and that but few alterations in those provisions are necessary to render its organization as perfect as could be wished. The changes suggested are similar to those which have been urged by previous boards.

An inspection of the academy was also made by the chief engineer in the month of September, which resulted in his entire satisfaction as to the manner in which the institution is conducted. There were thirty-eight cadets graduated in the month of June last, and two hundred and forty-one at the academy on the first of the present month.

In closing this report, I again deem it my duty to represent the urgent necessity of providing by law for an addition to the present number of the officers in the corps of engineers, for purposes exclusively military, independent of the other duties to which they may be assigned. And I would also respectfully urge the consideration of the proposed plan for the organization of the topographical engineers which has been heretofore submitted to you. The foregoing report will exhibit the extent of duties assigned to those corps, and will clearly point out the necessity of the proposed augmentations.

All which is respectfully submitted.

I have the honor to be, very respectfully, your obedient servant,

A. MACOMB, Major General, Chief Engineer.

HON. JAMES BARBOUR, Secretary of War.

A.

*Exhibiting the fiscal concerns of the Engineer department for the year ending September 30, 1827, in which the funds which had accrued within that period, and the manner of their accruing, are stated, and accounted for by showing their application; and showing, also, the amounts expended upon the several works under construction; and the amounts requisite to complete them.*

Redoubt No. 1, (on Hog island,) in advance of ditto .....	29,000 00	Fort Pickering, Salem.....	116,000 00		
Dikes across Broad Sound passage .....	140,000 00	Fort at Naugus Head, Salem .....	35,000 00		
Cutting of the summit of Gallop island .....	2,429 51	Fort Sewall, Marblehead.....	116,000 00		
Works for the defence of Connicut island, Narraganset bay, Rhode Island .....	220,053 43	Fort for Jack's Point, Marblehead .....	96,000 00		
		Fort on Bald Head, North Carolina.....	120,000 00		
		Fort on Federal Point, North Carolina.....	12,000 00		
Total.....	4,531,873 10	Total.....	5,357,177 63	First class, seventeen works .....	\$4,531,873 10
				Second class, twenty works .....	5,357,177 63
				Third class, seven works ..	1,854,575 58
				Total.....	11,743,626 31

NOTE.—The classification in this table, distinguishing three periods, exhibits the works, enumerated in the order of their efficiency to meet the earliest possible emergency.

## D.

*Report of the board of visitors on the United States Military Academy at West Point, June, 1827.*

UNITED STATES MILITARY ACADEMY, *West Point, June 21, 1827*

SIR: The members of the board of visitors, vested with powers under your authority to inquire into the state of general instruction at the Military Academy of West Point, &c., &c., have the honor to submit to you the following report, the result of their attentions and inquiries.

On the first Monday of June the examination of the cadets in the various branches of general knowledge taught at the Military Academy commenced. To this examination the serious attention of the board has been devoted.

From the nature of the institution, from the views of the government in giving being to the establishment, from the objects to which, at a future period, the cadets must give their solitudes and attentions, it is evident that the possession of sound mathematical knowledge is to be the primary acquisition of every graduate of this institution. Without it, the benefits desired to be conferred on the republic cannot be effected. To the board of visitors it affords pleasure to state that to the essential departments of knowledge much care and industry are devoted by the able professors and instructors of the academy, and that the progress of the cadets is not unworthy of the care and toil bestowed; the advances made are certain evidences of the ceaseless attentions given.

While it may be said that mathematical science must be the leading feature of instruction at the Military Academy, it is perhaps not irrelevant to observe that, aware of the objects intended to be effected by the cadets, and limited as the course of instruction is to the brief period of four years, certain branches of the general science are of more immediate utility than others. Hence the zeal and exertions of the professors are applied with peculiar force to produce excellence in some departments.

The mathematical course of the first year consists of the elements of algebra, geometry, descriptive geometry, analytical trigonometry, plane and spherical. During the second year the course embraces surveying, descriptive geometry, perspective, shades and shadows, analytical geometry, differential and integral calculus.

Among the preceding branches of mathematical instruction none ascend to the same eminence of practical utility as DESCRIPTIVE GEOMETRY; since by descriptive geometry every object requiring the studied attention of the civil and military engineer is aided. Sensible of its importance, more especially when received as a subject intimately blended with national considerations, it is pleasing to the board to allude to the attention and zeal with which it is cultivated at the academy. The graduates of the academy will, it is believed, be frequently employed in arduous undertakings where projects must be conceived and developed, and then executed. When the project has received the requisite measure of mental consideration it is of the utmost importance to direct its details and preside over its execution. On such occasions, and in our country their occurrence must be frequent, it is of eminent advantage to be able to represent accurately objects of three dimensions on a plane, and to derive from the exact description of bodies whatever necessarily relates to their form and relative positions.

It is the opinion of the board that the knowledge of descriptive geometry possessed by the cadets is adequate and extensive, well suited to produce results of importance and essential service to the commonwealth. A brief enumeration of the subject-matter of the course will convey ideas of its extent and utility—of the right line and plane—lines and their tangents—curved surfaces—tangent planes—intersections of curved surfaces and planes—tangent lines to the curves of intersection—development of surfaces and planes—intersections of curved surfaces—spherical projections—warped surfaces.

The answering to the many and difficult questions proposed during the course of examination, the propriety and definiteness of the language employed, the precision and elegance of execution displayed in constructing the diagrams, unaided by ruler or compasses, the correctness of eye and hand in setting off relative positions and proportions, the unflinching correctness of the results—prove the possession of positive talent, zeal, and industry in its development. At the black-board the exhibitions were direct evidence of serious private study, and the accuracy and beauty of the diagrams of the course presented by each cadet show that delight must have communicated its buoyancy to the mind while occupied in the construction.

The general principles necessary to the solution of the different propositions embraced by descriptive geometry being known, it was a marked satisfaction to the board to find that the application of those principles was ceaselessly insisted on. This application in the third class embraces perspective and the determination of shades and shadows. Besides the simple representation of an object, it is obviously of advantage to determine its shade and shadow.

A single proposition will prove the powers of mental application possessed by the cadets prior to the termination of the second years' course of instruction. Required to find the shade and shadow on the surface of a screw, and its shadow on a given plane. While employed in the solution of this problem the following principles of descriptive geometry were applied:

To pass a plane to the surface of the helicoide, the point of contact being on a given helix, and the plane to be parallel to a given right line. To determine the intersection of a cylinder, whose base and direction of its right-lined elements are known, with a given plane. To pass a plane through any element of the helicoide, and find the points in which it cuts the outward helix of the screw. To find the intersection of a plane passing through a given line, with the surface of the screw. In addition to these difficult constructions, it is necessary to find the points in which lines penetrate planes, to determine the intersections of planes, and the points in which right lines intersect curves on each other.

To enter into lengthened detail relatively to the progress of the cadets in every branch of mathematical and physical science taught at the Military Academy is by the board deemed unnecessary. Excellence, to speak generally, was apparent, and from the answers elicited during the examinations it was evident that the more essential and practically useful have shared in unremitting attention. In *analytical geometry* the questions and propositions proposed and answered related to right lines and planes, to the discussion of curves and surfaces of the second order, to the discussion of equations of curves; first in reference to curves limited in every direction; to curves limited in one direction and indefinite in the other; to curves indefinite in every direction; and to surfaces of the second order referred to their axis, &c.

Questions relating to the following subjects were proposed in the *differential calculus*, and their solu-

tions given with correctness and promptitude. Differentiation of functions containing two or more variables; differentiation of any equations containing two variables; theory of curves; osculating curves; discussion of maxima and minima; theory of curved surfaces; curves of double curvature, &c. In the *integral calculus*, integration of logarithmic exponential and circular functions; quadrature of curves; quadrature of curved surfaces; measure of the volumes bounded by them; cubature of bodies bounded by curved surfaces, and quadrature of their areas, &c.

From the extent of mathematical knowledge acquired at the close of the second year, an extensive course of natural philosophy was the rational expectation of the board of visitors. Their expectations were not disappointed. They witnessed with high gratification the display of analytical application to some of the finest problems of the *Newtonian philosophy*, more especially those prolific in consequences, and entering into physical astronomy. In statics, dynamics, hydrostatics, optics, electricity, &c., propositions of serious difficulty were proposed and demonstrated. Questions relating to every variety of matter embraced by this most important department were proposed and answered. Problems of practical utility were also given to ascertain the certain possession of the matter contained in the course, and proved the readiness of the cadets in the application of the principles and the analytical formula. No reference to the class-books was permitted.

The knowledge acquired during the preceding years is now, if the phrase be proper, brought into action by immediate application to the purposes of civil and military engineering. These branches of general science, with military tactics, are intended as the completion of the course of instruction at the Military Academy.

When the many objects to which the civil and military engineer has to devote his attention are made the subject of reflection, it will without difficulty be admitted that the preceding course of instruction is, to speak within limit, not too mathematically scientific. Fixed principle should, as far as can be admitted, be the landmark to the engineer. It is the only basis on which the realization of expectation can be founded. Where there is but little principle in theory, the hope of certainty in the practical operations cannot be rationally indulged. We need not refer to the history of mechanical constructions to exhibit the many and seriously destructive consequences entailed by ignorance of mathematical science, and how frequently nations have been burdened with useless and injurious works.

Engineering in its two departments, particularly in its civil features, is of importance to every country, and to none more than to our own. The importance of scientific education to the engineer is evident, for to material substances his thoughts and meditations must be directed. Hence it is of importance to become familiar with the laws prescribed by nature for their action. He must grapple with his agents, and foresee their effects, calculate their energies, and become as it were the dictator of their actions. Nature must be forced into a bond of alliance with his views. He must interrogate her on her modes of action, study the laws by which she governs, enter into the recesses of her hidden processes, arrest her in the act of operation, and enter on his own labors with possession of her secrets.

The course of civil and military engineering at the Military Academy embraces the consideration of the materials employed in constructions, the peculiar purposes they serve in the construction of roads and bridges, works on rivers, canals, and harbors. Questions demanded of the class, and propositions required to be demonstrated, referred to the properties and constituent parts of the materials used, and their relative fitnesses, under different circumstances, to the construction of roads, their classes, their profiles in plain and mountainous districts of country, how to blend economy with stability, &c.

Whatever relates to the construction of canals, arches, bridges, centering and roofing, appears to have received merited attention. In reference to rivers and canals the questions answered related to the best forms of their beds, how to find the dimensions of their channels, their discharge and regimen, the effects of weirs, bars, sluices, and reefs to weirs constructed across rivers to force the water from them into the conducting feeders, or immediately into the canal itself, and waste weirs to take off the surplus water. Questions were also proposed having reference to the resistance of the materials employed to the equilibrium of arches and the effects of friction.

*Carpentry*, having intimate relations with the construction of bridges, necessarily demands a serious proportion of attention. Here the effects of forces of different kinds on the materials employed were discussed; the laws of extension and compression, and their connexion with flexure. The knowledge displayed by the cadets of the principles and laws of mechanics is good promise that at a future day, when experience shall have been acquired, many judicious inferences will be made and maxims established in this important branch of mechanical science. That it is a science, and hence, worthy of the serious attention it receives at the Military Academy, is obvious; for it requires a knowledge of the strength of materials and of the absolute strain that is to be laid on them. The modifications of this strain, arising out of the place and direction in which it is exerted, and the changes that can be made by a proper disposition of the parts of the structure, must also be known. Further, when every piece is arranged so as to derive the utmost advantage from its relative strength, it is absolutely of the first necessity to know how to form the joints and other connexions in such a manner as to preserve the advantages derived from the arrangement. The action of a straining beam, external action of a frame, the framing of purlieus, building up of girders, methods of scarfing, and placing of iron straps, were discussed. In military engineering the following subjects were proposed: details of redoubts and field works, solutions relative to angular and oblique batteries, subterranean war solutions on irregular ground, and application of fortification to irregularities of site.

Progress in the important science of military tactics is an object of serious attention at the Military Academy; and it is the unanimous opinion of the board that the severe duties attached to this essential department of the general course of instruction are ably and scientifically discharged. The manœuvres and different evolutions performed in the field, and the illustrations executed on the black-board in the examination hall, were evidences of high advancement obtained by the cadets. The following is part of the subject-matter illustrated during examination: organization of infantry of the line and of light infantry, of light and heavy cavalry, manœuvres of regiments, organization and manœuvres of advanced and rear guards, principles of strategy, organization of camps, passage of defiles in advance and retreat, orders of battle. For additional details on this important department of the general course the board refers to the annexed report of the committee on military instruction, marked A.

On drawing, as an essential branch of the necessary instruction, the board would beg leave to speak with some degree of emphasis. On recurring to the several acts of Congress relative to the establishment at West Point, it will be perceived that its first foundation was laid by the act of March 16, 1802, fixing the military peace establishment of the United States. By the provisions of that act it will be seen that

little more was originally contemplated than merely to plant the germ of a great military institution in our country by giving to a small but select corps of engineers a kind of "local habitation and a name."

Accordingly, by the provisions of the 27th section of that act, a small corps of engineers was to have their station at West Point, who, together with ten cadets only, whose number is now augmented to several hundreds, was to constitute a Military Academy.

It is manifest, however, that even at this first inception of the institution, humble and unassuming as seem to have been the views of its wise progenitors, it did not escape their vigilance that one of its first and most essential accompaniments was that same department of instruction which is more immediately referred to in the present article. Accordingly, by the provisions contained in the 2d section of an act, which passed the year succeeding, to wit, February 28, 1803, the President of the United States was authorized to appoint one teacher of the French language, and "one *teacher of drawing*," to be attached to the *corps of engineers*, whose compensation should not exceed, &c., &c.

In conformity with the tenor of this enactment, it appears that a *teacher of drawing* was, indeed, soon afterwards appointed, and has ever since been continued in his station; but it is a circumstance which has appeared to the board as being somewhat unaccountable, that from that period to the present scarcely a single *cast or engraving*, or any other of the ordinary and necessary facilities, have been afforded at the public expense in aid of this valuable branch of instruction.

The board forbears to comment upon the singularity of this omission, presuming that the annexation of a good drawing school, with all its customary apparatus and implements, is a matter too obviously requisite as an appendage to the engineering department to require illustration.

The board begs leave, therefore, to reiterate, which it does very cordially, the strong recommendation of the last year's board of visitors, that a competent appropriation be made without delay for supplying the manifest deficiencies in the department above alluded to.

In concluding the remarks upon this head, the board consider it but a tribute which is justly due to the able and indefatigable teacher now employed in this branch, as well as the genius of many of his pupils, to observe that many specimens, and among them several delineations of the human figure in various attitudes, were exhibited in the course of the examination, denoting a degree of proficiency in the art which, considering the very limited means of instruction heretofore furnished, were truly surprising, and afforded the best evidence of the great degree of perfection in this useful branch of instruction which might be obtained at the academy by the application of more ample means.

As no particular changes since last year have been effected in the departments of French, chemistry, mineralogy, moral philosophy, &c., we refer to the report of the last board of visitors for their relative details. Far as expectation should be indulged, when the important, difficult, and serious matter of the grand subjects of instruction at the Military Academy are considered, the knowledge acquired has given satisfaction. To speak generally, the answering was correct, and the questions, at intervals proposed, were not of easy solution.

To the civil economy of the academy the attentions and inquiries of the board have been directed, and it is satisfactory to state that the result is the strong conviction that to the regulations fixed for the direction of this department the proper attentions have been bestowed. The articles supplied to the cadets are deemed to have been furnished on fair and just terms. It is believed the institution is secure against fraud and embezzlement, and the welfare and rational happiness of the cadets consulted. Far as inquiry has extended, no cause for suspicion has been detected to lead to any other inference than that the designs of the government, in the administration of the civil economy and police of the academy, are faithfully fulfilled.

A certain strength of physical constitution being necessary for the more secure and efficient execution of many of the duties embraced by military tactics, and maturity of intellect being requisite to the easy intelligence of mathematical science, it is proposed by the board that the minimum period of admission into the Military Academy should, for the future, be fixed at the age of sixteen years. It is also supposed that prior to this age some extent of knowledge tending to aid in the acquirement of the sciences taught at the academy may be obtained. The maximum period of admission is recommended by the board to be limited to the age of twenty years. The suggestions contained in the report of the board of visitors for 1826, section 5, articles 1, 2, 3, and 6, are earnestly recommended by the present board for legislative attention. In the views there expressed they concur.

In terminating our labors and closing our report containing the result of the attentions and inquiries of the board, the present flourishing state and condition of the institution demand the expression of unfeigned satisfaction. To the benefits to be conferred on our country we look forward with the spirit that exults, and admit to our minds the fondest and best founded anticipations of future advantages. The instructions received at the Military Academy must essentially contribute to the progress of our commerce, arts, manufactures, and navigation. Their extent and perfection, the high reputation of the superintendent of the institution, and the talents of its professors, have already conferred more than the elements of a name. The Military Academy of West Point is now invested with a reputation worthy of the times and of the republic, and it possesses those attributes that are pledges of stability, unless thwarted by contingencies at present hidden even from human conjecture.

May the children of its fostering care never descend from the high spirit that achieved the freedom of our country, and never depart from the principles that summoned to conquest.

We have the honor to offer you the expression of high consideration and respect.

## G.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, October 31, 1827.*

SIR: In obedience to your order, dated the 10th of September, I have the honor to report the operations of this department during the 1st, 2d, and 3d quarters of the present year.

The remittances in the 1st quarter amounted to.....	\$128,600 00
In the 2d, to.....	150,228 00
And in the 3d, to.....	89,135 00
Total amount remitted.....	\$367,963 00
Received for damaged public property sold, and for rent of old barracks.....	2,329 22
Making the whole to be accounted for.....	370,292 22
The disbursements in the first quarter amounted to.....	\$117,146 73
In the 2d, to.....	117,806 48
In the 3d, so far as accounts have been received, to.....	96,928 74
Amount of accounts rendered.....	331,881 95
Leaving to be accounted for.....	38,410 27

This amount, it is believed, will be diminished considerably by the accounts for the 3d quarter of the year, which have not yet been received, but which are expected in the course of the two next months.

The accounts for the 2d quarter, of all the officers acting under the orders of this department, have been received. Those of thirty-nine officers have been received for the 3d quarter, and there remains to be received the accounts of only ten posts.

A reference to the remittances and disbursements will show a larger balance unaccounted for this year than last; but the reason will be found in the fact that this statement is three weeks earlier in the year than the last. The amount that would be received within that time would more than equal the difference.

The accountability for clothing is much improved. The present system, while it secures the soldier in his rights, completely guards the interest of the public. A few cases have occurred in which it has been necessary to coerce settlements by withholding the pay of the officers; but those instances have by no means been so numerous as was expected, and the application of the principles of the law has in every case proved effectual.

Since the date of the last report, the unfinished portion of the road from Coleraine, in Georgia, to Tampa Bay, in Florida, extending from Coleraine to Wantons, a distance of 110 miles, has been completed.

The necessary preparations due from this department were made early in April for the repair of the road from Coleraine to St. Augustine, and thence to New Smyrna, in Florida; but at the date of the last report the troops assigned to this labor had not arrived to commence operations. Two companies, however, had moved from Pensacola for that purpose.

Under the appropriation for a bridge across the St. Sebastian's river, near St. Augustine, proposals for the work were publicly invited during the summer; but the lowest bid exceeded the appropriation, and the right of way being refused by those holding the adjoining lands, the work was necessarily suspended. But it is believed a contract might now be formed for the sum appropriated were provisions made for securing the right of way.

That portion of the road from Memphis, Tennessee, to Little Rock, Arkansas, which it was stated in the last annual report had been put under contract, has been cleared of timber, and it is believed would have been completed but for the inundation of the country during the last winter and spring. The superintendent of the road was authorized to extend the time for completing the work to the 31st of December next, if necessary. Contracts have been made for another section, comprehending 49 miles, to be completed by the middle of February. The residue of this road might have been put under contract during the present season, and finished by the same time, but for the injudicious location of it by the commissioners who surveyed the route.

On the Bayou de Vien it had been surveyed through an almost impassable swamp or morass for several miles, and was unnecessarily made to cross other streams presenting considerable obstacles. On a more careful examination of the country by the officer in charge of the work, it was found that those obstacles could be avoided by a variation from the commissioners' line, increasing the distance about 15 miles, but greatly decreasing the expense. It was thought advisable to authorize the necessary variation, and instructions have been given accordingly. The remainder of this road will be put under contract immediately, and will be completed, it is believed, early in the ensuing spring.

On the road authorized from Cantonment Gibson to Little Rock, Arkansas Territory, comprehending a distance of more than 200 miles, 72 miles have been constructed during the present season by the troops, 15 by the citizens of Crawford county, and 107 miles put under contract; leaving, on the 26th of August, the date of the last advices, only 10 miles to be made by the troops to complete the portion assigned to them. That has doubtless been accomplished before this time, and there is every assurance that the portion put under contract will be completed by the termination of the present year. This road crosses several considerable streams, some of which should be bridged; but the existing appropriation is insufficient for that purpose.

Congress, at its last session, authorized a road from Fort Smith to Fort Towson, Arkansas, and thence to the northern boundary line of Louisiana. With a view to render it useful for military purposes, it was deemed advisable to continue it to Nachitoches, and a survey has been made by an officer of the department from the latter place to Fort Towson, a distance of 262 miles, and the troops are now engaged on the work. Instructions were given at an early date for the survey of the residue of this road; but owing to the engagements of the officer to whom that duty was assigned on the road from Cantonment Gibson to Little Rock, the survey had not been effected at the date of the last report. It was to have been commenced on the 1st of the present month, and is probably completed by this time. The troops are in readi-

ness to commence their labor so soon as the road shall have been marked, and it is believed they will be actively engaged upon it early in the ensuing month.

As the southern section of this road crosses many streams and low grounds, requiring bridges and causeways, the existing appropriation will not be adequate to its completion. The whole distance will be about 420 miles.

The lands adjoining Fort Sullivan, at Eastport, Maine, and Fort Marion, Florida, for which appropriations were made at the last session of Congress, have been secured to the United States.

The works at Mackinac, for which Congress, at its last session, appropriated \$6,000, are in a state of rapid progress, and will be finished in the course of the ensuing year. No further appropriation will be required to complete them.

So long as Mackinac shall be occupied as a part of the frontier defence, Bois Blank island, in its vicinity, should be reserved for military purposes. I therefore recommend that all the lands on that island not already patented be attached to the post, and placed under the direction of the commanding officer or the quartermaster there.

Fort Crawford, on the Mississippi, has been reoccupied by four companies of the 5th regiment of infantry, and arrangements have been made for their accommodation during the winter. That post commands the principal avenue between Lake Michigan and the Mississippi. To erect permanent quarters with suitable defences an appropriation is necessary.

The force of the infantry school of practice at St. Louis having been increased to twenty-two companies, and the graduates from the Military Academy appointed to the infantry being required to perform a tour of duty there previous to joining their regiments, it became necessary to extend the works considerably. This, together with the absence of the troops for several weeks on an expedition against the Indians, by which an increased expense for hired laborers and mechanics was incurred, has rendered the appropriation entirely inadequate to the completion of the work.

The progress of the work at Savannah has been retarded by the sickness of the troops. This circumstance, with a change made by the commanding officer in the plan of the work, as well as the style of finishing it, renders a further appropriation necessary. In the estimate presented this year I have relied but little on the labor of the troops, for experience has demonstrated that black laborers only can be employed to advantage in that climate.

The officer in charge of the work at Fort St. Philip, Louisiana, for which an appropriation was made by Congress at its last session, reports that the officers and soldiers' quarters are nearly completed. In his expenditures he has necessarily exceeded the appropriation. In addition to that excess, a further sum will be required to complete the work.

A new position has been occupied on the river Missouri, near the mouth of the Platte, and arrangements have been made to erect the necessary buildings and defences. It is proposed to complete the establishment from the general appropriation for the department.

A post has been established near the Indian agency in the interior of Florida. Quarters for the officers and soldiers are in progress and will soon be completed. From the difficulty of communication, that post is now supported at a very heavy expense; by removing the obstructions to the navigation of the river Oklawaha, which could readily be done by the troops, it might be supported at as little cost, in proportion to its numbers, as any other post in Florida. New Orleans being the principal depot for all the posts on the Gulf of Mexico, as well as those on Red river and Arkansas, it is important that the United States should have extensive and commodious storehouses there. Until the 1st of January of the present year the necessary accommodations were afforded to the service by an extensive range of fire-proof storehouses which were there, and had been from the transfer of Louisiana in 1804, in the possession of the officers of the Quartermaster's department; but on that day the register of the land office at New Orleans, without any legal authority, disposed of those stores with the lots attached to them at public sale. To repair in part the injury done to the service, I respectfully ask that one of the lots of ground belonging to the United States in New Orleans be assigned to this department, and that the amount for which the property alluded to sold be appropriated to erect storehouses for the quartermaster's, commissary's, and ordnance departments.

I believe much advantage would result to the service by erecting permanent fire-proof storehouses and offices at the city of New York. The United States have two positions there, which are entirely useless for any purpose connected with the defence of the city—those are Fort Ganzevoort and the North Battery. I propose that the former be sold, and the latter converted into a depot for the public property. The proceeds of the sale of Fort Ganzevoort would be sufficient to erect all the buildings required at the Battery.

The movements and labors of the army during the present year have so exceeded those of past years that a considerable arrearage will remain to be provided for; and as the operations of the ensuing year may equal those of the present, a prudent regard to the public interest would seem to require a larger appropriation than heretofore. I have, therefore, considered it an imperious duty to present an increased estimate; at the same time pledging myself to retrench, as far as the circumstances of the service shall justify, all expenditures within my control.

I have the honor to be, sir, your most obedient servant,

THOMAS S. JESUP, *Brigadier General and Quartermaster General.*

HON. JAMES BARBOUR, *Secretary of War.*

#### D.

PAYMASTER GENERAL'S OFFICE, *November 29, 1827.*

SIR: I have the honor to submit a report of the transactions of the pay department for the fourth quarter of the year 1826, and for the first, second, and third quarters of 1827.

From the report it will be seen that the advances to paymasters within the period stated amounted to one million eighty-two thousand one hundred dollars, of which the sum of forty-six thousand one hundred and fourteen dollars and forty-four cents only remains to be accounted for. This balance consists of advances to pay the troops of two districts up to the 1st of November, and it was not expected the

vouchers for the disbursement would be received in time to be noticed in this report; but I have every reason to believe the whole will be accounted for before the close of the year, without loss to the government.

Payments for the month of September are not made until after the October muster, (except to officers;) of course the accounts cannot be rendered until late in the fourth quarter.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

HON. JAMES BARBOUR, *Secretary of War.*

E.

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, November 26, 1827.*

SIR: I have the honor to submit to your view a statement of the moneys remitted and charged to contractors and the disbursing officers of the commissariat for the first, second, and third quarters of the year, amounting to..... \$280,144 89  
 And the sums accounted for by them, for the same time, to..... 257,176 85

Leaving a balance to be accounted for by them, in the fourth quarter of the year, of..... 22,698 04

Of this sum of \$22,698 04, due on the 30th September, \$2,014 98 constitute balances due from officers now in service, and under stoppage, which will be paid in the ensuing year; \$500 have been remitted late in the third to meet expenditures of the fourth quarter; and \$461 94, due by Lieutenant David Brooks, at his decease, which will be recovered from his securities; making together \$2,976 92 totally inapplicable to the period embraced by the statement, and leaving a balance of \$19,721 12 actually in the hands of the disbursing officers of the department at all the posts, applicable to the expenditures of the fourth quarter of the year, and which no doubt will at its expiration be strictly accounted for.

In order to give you some idea of the promptness with which the officers of the commissariat render their accounts, it affords me great satisfaction to state that every account due on the 30th of September, save one, has been received, and those are of an officer whose duties, in consequence of the recent disturbances by the Winnebago Indians, were too arduous and multifarious to give that attention to his accounts which has previously characterized their rendition, and which, under ordinary circumstances, he undoubtedly would have given.

Very respectfully, your most obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

HON. JAMES BARBOUR, *Secretary of War.*

*Statement of the amount of money drawn from the appropriations for the pay department, and remitted to the disbursing officers on account of payments for the 4th quarter of the year 1826, and the first three quarters of the year 1827; the amount unexpended and forming part of their estimates for the 4th quarter of 1827; the balance to be accounted for, the periods to which the troops have been paid, and the accounts rendered*

Names of paymas- ters.	Amt. of funds remit- ted in 4th quarter of 1826, and first three of 1827.	Amt. unexpended, and forming part of estim'es for 4th quarter of 1827.	Balance remaining to be accounted for.	Periods to which the troops have been paid and accounts ren- dered.	Remarks.

GEO. GIBSON, *Commissary General of Subsistence.*

OFFICE OF COMMISSARY GENERAL OF SUBSISTENCE, *Washington, November 9, 1827.*

SIR: Permit me respectfully to call your attention to the following act, approved August 23, 1823.—  
(*Wide Cross's Laws, p. 244.*)

"SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the 7th, 8th, 9th, and 10th sections of the act entitled 'An act regulating the staff of the army' are hereby continued in force for the term of five years, and until the end of the next session of Congress thereafter."

Presuming that the utility of the present mode of subsisting the army to be sufficiently tested by eight years of successful experiment, I beg leave to suggest the expediency of asking Congress to make the department permanent.

I am also induced to request your recommendation for a law authorizing the appointment of two majors to the commissariat department, whose services are required to enable me more efficiently to conduct its operations: one to be stationed in Washington as my assistant in the performance of my duties as chief of the department; the other to be employed in superintending the fulfilment of the important western and northwestern contracts, in the occasional inspection of subsistence storehouses, and to make purchases at the west, on the failure of contractors.

Since the organization of this department I have been indebted to a detail from the army for an assistant in my office, and have been frequently obliged to apply for special agents to proceed to the west, there to superintend the fulfilment of doubtful contracts, to make purchases on failures, and shipments to distant and important posts.

By having two efficient assistants under my exclusive control, belonging to the department, and interested in its success, I feel confident that it would be materially benefited.

The only additional expense attendant on the appointment of two majors to the subsistence department would be the difference between the pay of that grade of the army from which they might be selected and their pay as majors of the staff; which, on the supposition that they would be taken from the rank of captains, would be very inconsiderable.

This is the only application I have made since the first organization of the department, and being strongly impressed with the advantages attendant on the measure here proposed, I feel anxious for its accomplishment.

I have the honor to be, with great respect, your obedient servant,  
GEO. GIBSON, *Commissary General of Subsistence.*

F.

COMMISSARY GENERAL'S OFFICE, *Philadelphia, October 26, 1827.*

SIR: I have prepared and have the honor to enclose eight statements, as follows, viz:

No. 1. Of moneys drawn from the appropriation for the "purchasing department" during the first three quarters of 1827.

No. 2. Of moneys drawn from the appropriation for the purchase of woollens, in advance for 1828, during the same period.

No. 3. Of moneys received and disbursed during the same period on account of the purchasing department.

No. 4. Of moneys received and disbursed during the same period on account of the appropriation for purchasing woollens in advance for 1828.

No. 5. Of moneys received and disbursed during the same period on account of contingent expenses.

No. 6. Comparative statement of the cost of clothing for the United States army during the years 1826, 1827, and 1828.

No. 7. Statement of the cost of clothing for the United States army for the year 1828.

No. 8. Comparative statement of articles of clothing allowed to each infantry soldier during the period of enlistment.

These statements, prepared in obedience to your instructions, dated September 27, 1827, I hope will be received in time, and meet your approbation.

I have the honor to be, sir, with great respect, your most obedient servant,  
G. IRVINE, *Commissary General of Purchases.*

HON. JAMES BARBOUR, *Secretary of War.*

HON. JAMES BARBOUR, *Secretary of War*.

## G.

SURGEON GENERAL'S OFFICE, *October 12, 1827.*

Sir: In compliance with your order of September 10, I have the honor to submit an estimate of the expenses of the medical department and of the Surgeon General's office for the year 1828. About \$2,000 will be required for hospital furniture, cooking utensils, &c., which I have to request may be included in the estimate for the purchasing department, agreeably to the regulations. The amount remitted to the acting apothecary, Doctor Mower, has been but \$2,600, most of the accounts against the department being paid directly from the treasury. The amount accounted for by him during the three first quarters of the year was \$2,219 54. The total amount expended during the three first quarters of the year was \$18,952 52. It is estimated that \$4,000 will be required to meet the expenses of the department up to the end of the present year.

Very respectfully, your obedient servant,

JOS. LOVELL, *Surgeon General.*

Hon. J. BARBOUR, *Secretary of War.*

## H.

ORDNANCE DEPARTMENT, *Washington, November 27, 1827.*

Sir: In compliance with your instructions, I have the honor to submit herewith a general report of the operations of this department during the past year.

Statement marked A exhibits an account of the moneys drawn from the treasury and remitted through this department during the year 1826, and shows the amount received, under each head of appropriation, by each disbursing officer; the amount of the accounts rendered by each; and the balance remaining in the hands of each, respectively, at the close of the year.

By this statement it is shown that the total amount remitted during the year 1826 was.....	\$705,425 15
That the amount of the accounts rendered and settled during the same period was.....	693,126 11

Leaving an unexpended balance in the hands of the several disbursing officers at the close of the year of.....	12,299 04
The whole of which was accounted for in the first quarter of the present year.	

Statement B exhibits an account of the moneys transmitted to the several disbursing officers of this department and to contractors during the three first quarters of the present year; by which it will be seen that the total amount transmitted was.....	\$592,480 11
The amount of accounts rendered was.....	581,893 46

Leaving in the hands of disbursing officers, on the 30th September last, an unexpended balance of.....	10,586 65
Which sum forms a part of that which will be expended and accounted for during the fourth quarter of the present year.	

By these statements it is shown that all accounts for the ordnance service have been promptly rendered, and that all the money drawn from the treasury has been accounted for up to the 30th September—no case of defalcation having occurred.

Statement C exhibits an account of some of the principal articles made at the several arsenals and armories during the year ending September 30, 1827. By this statement it will appear that 25,700 new muskets, with their various appendages, have been made at the national armories, and that about 32,700 muskets and other small arms have been repaired at the arsenals; and also that 42 new gun-carriages have been made.

Statement D exhibits an account of the arms, artillery, and equipments procured, and of the expenditures made, under the act for arming and equipping the militia, during the year ending September 30, 1827; and shows the number of arms apportioned to the militia of each of the States and Territories during the year 1826. The arms procured are 9,960 muskets, 3,520 rifles, 26 artillery-carriages, and sundry equipments. The amount expended on this account during the same period was \$196,797 07. The executive authorities of the several States have been informed of the number of arms apportioned, and of the balances due to each, up to the 31st of December last. They were, at the same time, informed that the arms were ready for distribution, and held subject to their respective requisitions. A considerable portion has been called for and delivered, and the remainder, in cases when called for, are in the course of delivery.

Statement E exhibits the general results of the operations of the public lead mines during the year ending on the 30th September, 1827; to which is appended a brief recapitulation of the operations at the mines during the time their superintendence has been confided to this department. By this statement it will appear that the lead made at those mines during the year ending on the 30th September last amounted to 6,092,560 pounds; and that the rent accruing during the same period was 609,256 pounds, of which more than half a million of pounds have been received and deposited in the public stores. The recapitulation will serve to show the progress of the mining business. The product of the last year at the Fever river mines was five times greater than that of the year preceding, while in Missouri the product has decreased one-third. The increase in the aggregate is, however, about threefold. The whole amount of lead made at the public mines in the five years past is about ten millions of pounds, nearly two-thirds of which was produced within the last year.

From this rapid extension of the business, it is not unreasonable to suppose that the annual product of the mines will soon reach ten millions of pounds, yielding to the public service one million pounds per annum. This supply of lead will be much greater than is required for the military service, and, it is presumed, will be quite sufficient to meet the demands of the naval service also.

Under the act of March 3, 1827, authorizing the establishment of an arsenal in the town of Augusta,

Maine, a site has been selected and purchased; a permanent wharf has been constructed, and a road leading from it to the site of the buildings has, also, been made. The ground has been enclosed, and a considerable supply of building materials have been procured preparatory to an early commencement of the buildings next season.

I beg leave on this occasion to submit for consideration the expediency of establishing an arsenal somewhere contiguous to the northern coast of the Gulf of Mexico. The existing arsenals in the southern portion of the Union were established prior to the acquisition of Florida, and their location was adapted to the then existing boundaries of the United States. The annexation of Florida has greatly changed those boundaries, and given a new and very different character to our southern frontier. The most southern arsenals are, one for the sea-coast on the Atlantic, at Augusta, in Georgia, and one for the southwestern frontier at Baton Rouge, in Louisiana. These were the most advanced positions which could be safely taken at the time they were selected. But they are neither of them conveniently situated for supplying the frontiers of the newly acquired Territory. The line of sea-coast between the rivers upon which these arsenals are situated (the Savannah and the Mississippi) is very extensive; and that part of it lying between the State of Louisiana and the southern extremity of Florida cannot be conveniently supplied from any of the arsenals now established. This part of our frontier is much exposed; a considerable portion of the army is now posted on it, and it is presumed that it will always require the presence of troops. It is for the supply of this extensive and exposed frontier that an additional arsenal is considered necessary. The location of the great southern naval depot in that quarter forms an additional reason for the establishment in that vicinity of a military depot also.

Whether the southern part of the States of Mississippi or Alabama, or the western part of the Territory of Florida, will afford the most eligible position for the site of an arsenal for the general purpose stated, this department is not prepared at this time to offer any decided opinion.

The expediency of a reorganization of the Ordnance department has heretofore been a subject of consideration, and I avail myself of this occasion to renew it.

This subject was under consideration in Congress at the last session, and a bill was reported and passed in the House of Representatives. The same bill was approved and reported by the committee charged with its consideration in the Senate, but the pressure of business at the close of the session prevented its being acted upon in that House. This favorable reception of the measure, and the sanction thus far given it, increases the conviction of its necessity, and justifies its being again presented. The further experience since had under the present system has but the more fully shown its disadvantages, and the more clearly confirmed the expediency of the change proposed.

As this subject has already been considered much in detail in former reports, I will now only briefly advert to some of the prominent considerations which have induced its submission.

The ordnance service as now provided for by the act of March 3, 1821, is performed by officers temporarily detached from the regiments of artillery. The average number engaged in this service at one time has been about thirty. The whole number which have been engaged in it for the six years past has been one hundred and twenty-four, and of these but *five* only have been continued through that period.

The duties of the Ordnance department as prescribed by law are to provide, to inspect, to preserve, to distribute, and to account for every description of ordnance, artillery carriages, small arms, and ammunition, required for the permanent defences of the country, or for its armies in the field. Its duties embrace also the arming and equipping of the whole body of the militia of the Union.

The appropriations made for effecting these objects have sometimes exceeded one million of dollars per annum; and during the last fourteen years they have amounted to more than twelve millions, making the average about \$860,000 per annum. These large sums are expended not for articles for immediate use or consumption, but mostly for permanent objects—for articles of a durable character, which remain as a part of the great common stock and means of defence of the country. The value of this description of military property now in the immediate charge of the Ordnance department is at least ten millions of dollars. The value of the small arms alone exceeds six millions; and this estimate includes only that part of such property that is deposited at or connected with the armories and arsenals which are under the immediate and exclusive direction of ordnance officers.

These duties are of a class which are wholly distinct from those of any other branch of the military service. They are of a different character also in several important features, among which the following may be named: The annual expenditures of the several departments for subsisting, clothing, paying, quartering, and transporting the army, and for providing its medical and miscellaneous supplies, are mostly for objects which are transient, and which seldom extend much beyond the time present, and for articles which are soon consumed or expended, and disappear. The responsibilities of these several departments do not, therefore, extend much beyond the present application of the means confided to them for the current service. It is the Ordnance department alone which retains in its charge the accumulating product of its expenditures, for the preservation of which its officers are held responsible.

The ordnance service differs from other branches also in this: that its duties are less varied in a change from peace to war or from war to peace, and that it embraces the arming and equipping of the whole body of the militia as well as of the regular army. In short, it may be said of the ordnance service that it embraces the fabrication and the preservation of nearly all the military weapons of the country, whether for the militia or the regular army, and that all the most essential military *materiel* of the nation—that which constitutes its armament in peace and in war—is confided to its charge.

The business of disbursing nearly a million of dollars annually and the preservation of ten millions value of military stores, considered merely as a matter of ordinary business transactions, must, to be well performed, be conducted by persons experienced in such business. But the duty of devising and determining the plans and models of all the various arms, artillery, and other military articles which are provided by the Ordnance department, is a business of a much more important character and requires much higher and more varied attainments in those who perform it. The qualifications requisite for a judicious performance of this branch of service, involving as it does a familiar acquaintance with many of the mechanic arts, together with a knowledge of the exact sciences, are to be attained only by long experience and zealous application joined with an aptitude to such pursuits. Suitable qualifications are therefore not to be expected in those who are but temporarily engaged in such duties, for to them can be presented no adequate motives for the zeal and perseverance which is indispensable to the acquisition of such attainments, even if it were possible to acquire them in the short space of time to which their service in the ordnance is usually limited.

The ordnance service differs not less from the service of the line of the army than from that of the

several administrative departments of the staff before mentioned. Yet by the present law it is required to be performed solely by officers temporarily detached from the line. This branch of service, which differs so essentially from all other branches, and is of a character so peculiar to itself, that a separate and more permanent provision for it is believed to be indispensable to its proper performance and to be required by the best interests of the public service.

The utility of a separate organization for the engineer, quartermaster, commissary, and other departments has been fully demonstrated by experience and will not be questioned; and the expediency of extending the same principle to the ordnance service must be equally obvious. Any reasons which may be assigned for preferring a separate organization for any other branch of service must apply with equal force to the ordnance also. No sufficient reason can be perceived why the ordnance service alone should remain in a state of dependence upon temporary details from the line of the army, and be subject to all the fluctuations incident to and indispensable from such an unstable system.

The Ordnance department was first established in May, 1812, and was modified by several successive acts during the war until near its close, when (in February, 1815) an act was passed embodying all such provisions as the experience of the war had shown to be necessary. This act gave to the department its most improved form and continued in force until March, 1821, when, without its being repealed, the department was essentially changed, and in effect nearly abolished, by its being merged into the artillery regiments, although its duties remained unaltered.

The act of February, 1815, made the department consist of four field officers, ten captains, and thirty lieutenants, in all forty-four. This number may have been necessary at that period, but is greater than is now required. An amendment of this act, which would reduce the number of lieutenants from thirty to sixteen, and limit the number of enlisted men to two hundred and fifty, would effect the change desired. This would make the department consist of thirty officers, the smallest number, it is conceived, which would be capable of performing its duties. Or, in lieu of this amendment, the lieutenants may be omitted altogether and their places be supplied by temporary details from the line, as is now authorized. By this plan there would remain permanently attached to the ordnance service the four field officers and ten captains, upon whom in either case the most important and responsible duties of the department would mainly rest. And as there are now four supernumerary officers in the artillery regiments, the adoption of this plan would add but ten to the number of officers now in service, and would consequently be less expensive than the plan first suggested. But for the general reasons before stated, it is believed that the best interests of the public service demand an entire separation of the ordnance service from other branches of the army.

I have the honor to be, sir, your most obedient servant,

GEO. BOMFORD, *Brevet Colonel, on Ordnance service.*

HON. JAMES BARBOUR, *Secretary of War.*

20TH CONGRESS.]

No 361.

[1ST SESSION.]

IN RELATION TO THE REMOVAL OF THE TROOPS TO AND FROM THE SEVERAL POSTS,  
AND THE EXPENSE THEREOF.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 7, 1828.

DEPARTMENT OF WAR, *January 4, 1828.*

SIR: In obedience to a resolution of the House of Representatives of the 20th ultimo, I have the honor of submitting herewith the enclosed reports, which contain the information called for in the resolution, viz: from the major general commanding the army, from the Quartermaster General, and from the Surgeon General.

I have the honor to be your obedient servant,

JAMES BARBOUR.

Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

HEADQUARTERS OF THE ARMY, *Washington, December 22, 1827.*

SIR: In compliance with your directions, I have now the honor to report, in answer to a resolution of the House of Representatives requiring to be informed "when the present regulation respecting the removal of troops from one post or fortification to another commenced, the advantages expected to be derived therefrom, and the actual expense attending the same each and every year since its adoption:"

The only "regulation" known to the army "respecting the removal of troops from one post to another," since the declaration of our independence as a nation, is to be found in that discretionary power inherent in the President as commander-in-chief, or in a general commanding an army, to make such disposition of the troops as may be demanded by the high interests of the public service, and by that measure of justice and impartiality which may be due to the troops themselves.

Invested with this important trust, possessing alone the requisite lights and information for its efficient discharge, and bearing the full responsibility incident to its exercise, the executive departments of government have always been wont to employ the means and powers belonging to their official functions as in their discretion would most conduce to the public weal. Amongst these powers, that of causing occasional movements of troops has ever been considered as one of ordinary character and necessary consequence, and since the formation of our government it has uniformly been exercised, it is presumed, strictly according to the wants and exigencies of the public service.

Within the current year a change has taken place in the stations of the artillery regiments, conformable to a policy which, in time of peace, seems absolutely necessary, both for the maintenance of military discipline and efficiency and for the equitable dispensation of justice to the troops.

Without citing the invariable practice of the European powers possessing West India colonies, of relieving their garrisons stationed in those sickly regions at short and regular periods, it will be only necessary to state the fact that one of our regiments lately relieved from the Gulf frontier has constantly furnished garrisons for the dreary and sickly posts in that quarter since the organization of the army in 1821. The number of deaths amongst the officers of that regiment within this period of six years has amounted to *sixteen*, being four times greater than the average number in all the other regiments of artillery.

Ever ready to obey the calls of the country and to devote its last energies in her defence, the army still looks to its government for justice and impartiality in its dispensations. Neither severity of discipline nor rigor of service will ever be complained of while its distributions are made with fairness and equity.

The occasional movement of troops is, on other grounds, highly instrumental to the preservation of discipline and efficiency. It often happens, indeed, that *individual* interests are more or less prejudiced by these changes of station, but such interests must ever be viewed as secondary to those important attributes

of military character which are originally purchased by the nation at a high price, and can be preserved only by an active and habitual *exercise* of them in those employments to which they are fitted and predestined.

Troops have been also moved to and from the artillery and infantry schools of practice for the purposes of military instruction or frontier defence. During the last autumn a detachment from Jefferson Barracks was marched against the Winnebago Indians, and after having repressed their hostility, captured the offenders, and restored tranquillity to the settlements, the command returned to Jefferson Barracks.

If it be an object to secure the martial energy and vigor of a peace establishment from that natural decay which is superinduced by habitual inactivity and ease, too much care cannot be taken in its administration to guard against the encroachments of sloth, to multiply objects of ambition, and to encourage all measures which tend to stimulate the energies and elevate the character. Long quiescence at particular stations is incompatible with these objects; and while the guardians of the army continue to cherish that pride in its reputation and that hope in its future usefulness and glory with which they are now animated, they will hold it to be one of their highest duties to employ all the means with which they may be legitimately invested to improve its morals, invigorate its energies, and render it worthy of that confidence and esteem with which the nation are willing to regard it.

I have the honor to be, sir, most respectfully, your obedient servant,

JAC. BROWN.

Hon. JAMES BARBOUR, *Secretary of War.*

---

\* QUARTERMASTER GENERAL'S OFFICE, *December 21, 1827.*

SIR: In compliance with your order of this date, requiring a report of the expenses incurred by the movements of the artillery regiments, under the order of the 11th of October last, I have the honor to state that, so far as reports have been received from the officers charged with the execution of the details, the expense incurred is ascertained to be \$13,532 84; to which should be added \$1,500 for the estimated expense of transporting two companies from Louisiana to the city of New York, which will complete the contemplated movements, and about \$600 for travelling allowance to officers; making in all the sum of \$15,632 84.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

Hon. JAMES BARBOUR, *Secretary of War.*

---

SURGEON GENERAL'S OFFICE, *January 4, 1827.*

SIR: In compliance with your instructions, I have the honor to report that the only expense that is known to have occurred in the medical department, in consequence of the late exchange of the regiments of artillery, is a bill of \$48 76, paid for attendance on the sick left at Fort Preble during the absence of the surgeon.

Very respectfully, your obedient servant,

JOSEPH LOVELL, *Surgeon General.*

Hon. JAMES BARBOUR, *Secretary of War.*

20TH CONGRESS.]

No. 362.

[1ST SESSION

IN RELATION TO THE ARSENAL AT MOUNT DEARBORN, SOUTH CAROLINA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 21, 1828.

DEPARTMENT OF WAR, *January 18, 1828.*

SIR: In obedience to a resolution of the House of Representatives of the 8th instant, I have the honor herewith of submitting copies of the correspondence between this department and the superintendent of public works of South Carolina, in relation to the situation of the arsenal and other public buildings belonging to the government of the United States at Mount Dearborn, South Carolina, together with copies of the plat of the land on which those buildings have been erected.

A report having been made by this department, March 8, 1826, to the chairman of the Military Committee in relation to this subject, and which will be found in the printed documents of that year, I would respectfully beg leave to refer thereto.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the House of Representatives.

COLUMBIA, *January 27, 1820.*

SIR: The board of public works of this State has instructed me to solicit permission from the general government to open a canal through the lands belonging to them at Rocky Mount, on the Catawba river, or a cession of so much of the land as will be occupied by the canal and locks to be constructed there. The latter would be preferred unless the government, in the event of selling their lands at Rocky Mount, will make a reservation in our favor, and a condition which will secure to us the right of cutting the canal and keeping open the navigation round the falls.

The board having resolved to put a competent force upon that work on the 1st of March next, your early attention to this subject is respectfully solicited.

I have the honor, &c.,

J. R. POINSETT.

HON. SECRETARY OF WAR, &c.

DEPARTMENT OF WAR, *February 6, 1820.*

SIR: I have received your letter of the 27th of January, and I very cheerfully grant permission to open a canal through the land belonging to the United States at Rocky Mount.

The government would willingly sell the whole of the land belonging to it there, but it is thought improper to sell a part without disposing of the whole. Should it be the wish of the commissioner to purchase on behalf of the State, the terms can be fixed by disinterested persons.

I have the honor, &c.,

J. C. CALHOUN.

J. R. POINSETT, Esq., *Columbia, S. C.*

ROCKY MOUNT, *April 8, 1820.*

SIR: At the request of the board of public works, I have the honor to enclose you a sketch of the land belonging to the United States at this place. The probable route of the canal will be along the valley, on one or other side of the branch that falls into Rocky creek, marked from A to D.

The title of this land was in dispute between the United States and the Catawba Company when the State of South Carolina purchased their charter. It is very desirable that the board should have a formal surrender of the land to be occupied by the canal, and we will be obliged to you to obtain this from the President. The board is particularly anxious about it, as the contract for the upper section has already been made, and we ought not to undertake so expensive a work until the title of the United States shall be extinguished.

We also request permission of government to construct a mill at the dam, marked E, to be used during the period the works are carrying on.

I have the honor, &c.,

J. R. POINSETT.

The SECRETARY OF WAR.

CHARLESTON, *May 15, 1820.*

SIR: The board of public works accede to the proposal contained in your letter of the 22d of April, to refer the validity of the title of the land in question to persons mutually selected by the United States and the State of South Carolina, and will agree to purchase the land required for the canal at the price determined upon by the referees, provided the title should be found by them to be vested in the United States; for that purpose the board have selected David R. Evans, esq. It will be necessary that these persons should be authorized to nominate a third, in the event of any disagreement between them.

I have the honor, &c.,

J. R. POINSETT.

The SECRETARY OF WAR, &c.

JUNE 14, 1820.

DEAR SIR: I received your favor of the 29th ultimo, which reached Columbia in my absence. I would attend to the business of adjusting the title between the United States and the board of public works with pleasure, but being the acting commissioner of that board, the appointment given me by the United States is incompatible with the duties I owe the State. I must therefore decline acting. I have retained the papers you sent, and will deliver them to such person as you may direct. I have understood that Philip Edward Pearson, esq., of Winnsborough, who was employed by Captain Bird to defend the title of the United States in a suit by the Catawba Company, has the original grant, and probably the intermediate chain of title. The grant, I suppose, will be the only document wanted, as I understand the only question is one of location.

I am, &c.,

A. BLANDING.

The SECRETARY OF WAR, &c.

ORDNANCE OFFICE, *June 20, 1820.*

SIR: Understanding you have been nominated one of the referees to examine a contested claim between the United States and South Carolina, relative to the property at Rocky Mount, the Secretary of War has directed me to state to you that Mr. Pearson, of Winnsborough, was employed on behalf of the United States, some years ago, to defend their title to the land in question against a suit brought by the Columbia Company, which finally terminated in a nonsuit of the plaintiffs.

Mr. Pearson is no doubt well acquainted with the United States title, and can refer you to the papers connected with it, which I think have been lodged with the clerk of the county of Chesterfield.

If convenient, the Secretary of War requests you to have an interview with Mr. Pearson.

I have the honor, &c.,

D. WADSWORTH, *Colonel of Ordnance.*

ABM. BLANDING Esq., *Columbia, S. C.*

DEPARTMENT OF WAR, *June 28, 1820.*

SIR: The board of public works of the State of South Carolina having made application to this department to purchase for the State as much of the ground owned by the United States at Rocky Mount as may be required for the route of the canal, and as the validity of the title of the United States to the land in question has been doubted by the board, it has been agreed upon by the President and the board of works to refer the validity of the title of said land to persons mutually selected by them. I have therefore to request you to act on the part of the United States as a referee in the case. The board of public works have named on their part David R. Evans, esq., and in the event of a disagreement between you and Mr. Evans, you will agree upon a third person as umpire between you.

The papers furnishing evidence of the title which the United States have to the land in question are in the hands of Abraham Blanding, esq., who has been requested to turn them over to you. Should the title to the land be found to be in the United States, the referees are requested to fix the value of so much of it as the board of public works may require for the canal.

I have the honor, &c.,

PHILIP E. PEARSON, Esq.

J. C. CALHOUN.

WINNSBOROUGH, *July 30, 1820.*

SIR: I received yours a few days since, bearing date May 28. I consent to act as referee for the United States, and so soon as Colonel Blanding returns to Columbia, will meet the referee of the board of public works on the question of validity of the United States title to the Mount Dearborn tract.

I will also assist in fixing a value on so much of the lands required for the contemplated canal by the board of public works, should the title to the lands be found in the United States.

I have, &c.,

PHILIP EDWARD PEARSON.

HON. SECRETARY OF WAR.

COLUMBIA, *December 26, 1823.*

The legislature of this State at their session just closed have ordered me to begin the canal which is to surmount the Great Falls of the Catawba. The line of it will pass through lands of the United States at Mount Dearborn, and on the plan devised the water will rise about one foot on the floor of the arsenal, which is situated in the valley east of the establishment. The building will not be materially injured, as the floor may be raised eighteen inches above the water without rendering the lower story too low for use. Under these circumstances it is proper that I should again ask permission of the government to pass the canal through their property. This permission was granted some years ago, but it was not then supposed that the water would be raised to the floor of the arsenal.

The humidity of the atmosphere, the unhealthiness of the situation, and the exposed site of this establishment, (commanded, as it is, from three elevated hills within half a mile of it,) have no doubt been the causes of its being abandoned by the government; and these causes will probably prevent it ever being resumed. The buildings are now in a state of great dilapidation. They have been plundered of everything that could be taken away; and, neglected as they are, will in a few years be wholly worthless. While our works are going on near them, and our contractors occupy them, they will be a little more secure, but this will not continue long. Under such circumstances may it not be advisable to sell the place, or grant it to South Carolina? The lands are poor and of but little value. The arsenal might be converted into a warehouse on the canal, and be of some use. The other buildings are only valuable for their materials.

The dispute as to the line of the tract has never been considered by the referees appointed in 1820. After examining the facts, I was satisfied that the location claimed by the United States was the correct one, and I never called the referees together. Besides, with permission to run our canal through it, it was a matter of no importance whether the disputed part belonged to the State or not.

I am, very respectfully, your obedient servant,

A. BLANDING, *Superintendent of Public Works.*

The SECRETARY OF WAR.

WAR DEPARTMENT, *January 15, 1824.*

SIR: I have the honor to acknowledge the receipt of your communication of the 26th ultimo, informing me that the legislature of South Carolina had ordered you to begin the canal, which is to surmount the Great Falls of the Catawba, the direction of which will pass through the United States property at Mount Dearborn, and that on the plan devised the water will rise about one foot on the floor of the arsenal, and wishing to know whether it would be necessary, under this circumstance, to obtain anew the permission of government to pass the canal through the property of the United States.

The permission to pass the canal through the public lands heretofore given is continued; but as it regards the granting of the property at Mount Dearborn to the State of South Carolina, as you suggest, that can only be done by an act of Congress. The department, however, under existing laws, has the power to sell, and will have no objections to dispose of the whole of the public lands and buildings at their value, to be ascertained by disinterested persons.

I am, sir, &c.,

J. C. CALHOUN.

A. BLANDING, Esq., *Superintendent of the Public Works of South Carolina, Columbia.*

20TH CONGRESS.]

No. 363.

[1ST SESSION.]

## STATEMENT OF THE OFFICERS OF THE ARMY WHO HAVE DIED ON THE GULF FRONTIER FROM 1821 TO 1827.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 21, 1828.

DEPARTMENT OF WAR, *January 19, 1828.*

Sir: In obedience to a resolution of the House of Representatives of the 14th instant, instructing the Secretary of War to inform that House "what number of the sixteen officers represented in his report to this House (as found in document No. 46) to have belonged to one regiment lately relieved from the gulf frontier, and to have died at the dreary and sickly posts in that quarter, since the organization of the army in 1821, (within six years,) have died in each year; also the specific expense incurred in the movement of each of the artillery regiments; also the distance from each post removed from and how removed, whether by land or water, under the order, as represented, of the 11th of October last," I have the honor of submitting the reports of the major general commanding the army and of the Quartermaster General, which contain the information called for by the above-mentioned resolution.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the House of Representatives.

HEADQUARTERS OF THE ARMY, *Washington, January 18, 1828.*

Sir: Agreeably to your directions to state what number of the sixteen officers represented in my report to you of the 22d December last to have belonged to one regiment lately relieved from the gulf frontier, and to have died at the posts in that quarter since the organization of the army in 1821, (within six years,) have died in each year, I have the honor to transmit herewith a list of the officers of the fourth regiment of artillery who have died since the 1st of June, 1821.

From this list it will appear that of the sixteen officers enumerated four died in 1821, one in 1822, three in 1823, one in 1824, and seven in 1825. It should be observed that one of the above-mentioned officers was killed in a duel, and that one other died before joining his regiment.

I deem it proper to add, as embraced in the spirit of your inquiries, that of seventeen surgeons and assistant surgeons who have died in the army since 1821, four have died at posts occupied by companies of the fourth regiment of artillery.

I have the honor to be, sir, most respectfully, your obedient servant,

JAC. BROWN.

Hon. JAMES BARBOUR, *Secretary of War.**List of officers of the fourth regiment of artillery who have died from June 1, 1821, with their stations.*

ADJUTANT GENERAL'S OFFICE, *Washington, January 17, 1828.*R. JONES, *Adjutant General.*

The SECRETARY OF WAR.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, January 18, 1828.*

Sir: In obedience to your order, I have the honor to present a detailed statement of the movement made by the artillery regiments under the order of the 11th of October last, with the expense incurred by each, so far as reports have been received. A portion of the expense remains to be ascertained; but

it is believed that when every account shall have been received, the entire cost of the movement will have been found not to vary three hundred dollars from the amount assumed in my report of the 21st ultimo.

I am, sir, most respectfully, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

HON. JAMES BARBOUR, *Secretary of War, Washington City.*

*Statement showing the specific expense incurred in the movements of each of the regiments of artillery, under the order of October 11, 1827; also the distance from the posts previously occupied to those to which the regiments were severally ordered, and how the movements were made, whether by land or water.*

Regiments.	Distance moved, computing by the mail route.	How made.	Detailed expense of each movement.	Total expense of each regiment.

Cadets acting as supernumeraries of the army, in virtue of their *brevets*, will be promoted to vacancies of the lowest grade in any regiment of the particular arm to which they may have been first assigned, conformably to the rank established at the Military Academy.

[The senior brevet may waive his right to fill the first vacancy in favor of any one of the first four next below him on the list, beginning with the eldest; but should the number limited decline promotion in such regiment, then the senior brevet shall succeed to the vacancy.]

MILITARY ACADEMY, WEST POINT, NEW YORK.

The western department comprises all west of a line drawn from the southernmost point of East Florida to the north-west extremity of Lake Superior, taking in the whole of Tennessee and Kentucky; and the eastern department all east of such line.

The headquarters of the general-in-chief is in the District of Columbia.

The headquarters of the commanding general of the western department is at Cincinnati, Ohio; and the headquarters of the commanding general of the eastern department is in the city of New York.

Those officers whose stations are changed by transfers and promotions will report for duty accordingly.

20TH CONGRESS.]

No. 365.

[1ST SESSION.]

## EXPENDITURES AT THE ARMORY AT HARPER'S FERRY FROM 1820 TO 1827, INCLUDING PURCHASES OF COAL AND GUN-STOCKS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 22, 1828.

DEPARTMENT OF WAR, *January 22, 1828.*

SIR: In obedience to a resolution of the House of Representatives of the 14th instant, directing the Secretary of War "to furnish this House, as early as convenient, with a statement of the accounts of the superintendent of the United States armory at Harper's Ferry, from the 1st day of January, 1820, to the 1st December, 1827, particularly designating the amount of stone coal purchased, of whom purchased, and the price per bushel; the number of gun-stocks purchased, of whom purchased, and the price per stock, within the above-mentioned dates, for the use of the said armory," I have the honor of submitting a report from the Second Auditor of the Treasury, which contains the information called for in the resolution above-mentioned.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the *House of Representatives.*TREASURY DEPARTMENT, *Second Auditor's Office, January 21, 1828.*

SIR: In compliance with a resolution of the House of Representatives of the 14th instant I have the honor to transmit herewith a statement of the expenditures at the United States armory at Harper's Ferry, Virginia, between January 1, 1820, and September 30, 1827, particularly designating the amount of stone coal purchased, of whom purchased, and the price per bushel; also, the amount of gun-stocks purchased within that period, of whom purchased, and the price per stock.

Although the resolution calls for the statement to be made up to the 1st December last, it has been found impracticable to render it beyond the 30th of September, in consequence of the accounts of the armory not having been received for the fourth quarter of the last year.

I am, with great respect, sir, your most obedient servant,

WILLIAM LEE.

Hon. JAMES BARBOUR, *Secretary of War.*

*Statement of the expenditures made at the United States armory at Harper's Ferry, between January 1, 1820, and September 30, 1827, prepared in pursuance of a resolution of the House of Representatives of the 14th instant; particularly designating "the amount of stone coal purchased, and the price per bushel; the number of gun-stocks purchased, of whom purchased, and the price per stock;" also the number of rifle-stocks purchased during the same period.*

WILLIAM LEE.

TREASURY DEPARTMENT, Second Auditor's Office, January 21, 1828.

## ON THE ESTABLISHMENT OF AN ARSENAL AT PENSACOLA, FLORIDA.

COMMUNICATED TO THE SENATE JANUARY 23, 1828.

Mr. HARRISON, from the Committee on Military Affairs, to whom was referred "A bill authorizing the establishment of an arsenal at or near Pensacola, in Florida," reported:

The subject of the bill submitted to the consideration of the committee was introduced in the annual report of the Secretary of War which accompanied the President's message at the commencement of the session, and of which the following is an extract:

"I beg leave, on this occasion, to submit for consideration the expediency of establishing an arsenal somewhere contiguous to the northern coast of the Gulf of Mexico. The existing arsenals in the southern portion of the Union were established prior to the acquisition of Florida, and their location was adapted to the then existing boundaries of the United States. The annexation of Florida has greatly changed

those boundaries, and given a new and very different character to our southern frontier. The most southern arsenals are—one for the sea-coast on the Atlantic, at Augusta, in Georgia, and one for the southwestern frontier, at Baton Rouge, in Louisiana. These were the most advanced positions that could be safely taken at the time they were selected. But they are neither of them conveniently situated for supplying the frontiers of our newly-acquired territory. The line of sea-coast between the rivers upon which these arsenals are situated (the Savannah and the Mississippi) is very extensive, and that part of it lying between the State of Louisiana and the southern extremity of Florida cannot be conveniently supplied from any of the arsenals now established. This part of our frontier is much exposed; a considerable portion of the army is now posted on it, and it is presumed that it will always require the presence of troops. It is for the supply of this extensive and exposed frontier that an additional arsenal is considered necessary. The location of the great southern naval depot in that quarter forms an additional reason for the establishment in that vicinity of a military depot also.

“Whether the southern part of the States of Mississippi or Alabama, or the western part of the Territory of Florida, will afford the most eligible position for the site of an arsenal for the general purpose stated, this department is not prepared at this time to offer any decided opinion.”

It appears from this report that there is no arsenal nearer to this important point than at Augusta, in Georgia, distant about 500 miles, and Baton Rouge, on the Mississippi, about 250; leaving the whole southern frontier between those two points, including a sea-coast of 1,300 miles, without an arsenal for the safe-keeping of arms and munitions of war. In the report of the board of United States engineers, in which the defences of the sea-coast are projected, one great division has been denominated the “Gulf of Mexico frontier.” After a detail of the nature of the coast, the increasing population, and vulnerable points, the following description is given of Pensacola bay:

*Pensacola bay.*—The upper arms of this considerable bay receive the Yellow-water, or Pea river, Middle river, and Escambia river; the tributaries of which latter, interlocking with branches of the Alabama and the Chattahoochie, indicate the courses whereby, at some future day, canals may convey a part of the products of these rivers to Pensacola.

Santa Rosa sound extends eastward from the lower part of this bay into Santa Rosa bay, whence a communication, partly natural, partly artificial, may possibly be continued eastward to the Atlantic. On the west the lagoons of Pensacola, Perdido, and Mobile bays, respectively, interlock in such a manner as to require but a few miles of cutting to complete a navigable channel from the first to the last named bay, and thence through an existing interior water communication to the city of New Orleans.

The contiguity of the headwaters of the large rivers emptying into this part of the Gulf to the upper part of the Tennessee induces the belief that some facile means of connecting them will ere long be discovered and supplied.

Thus situated as Pensacola bay is with respect to the country on either hand, and the immense regions behind, its rare properties as a harbor become of inappreciable value. Some of these properties we will enumerate: 1st, it is accessible at low water to the largest class of sloops-of-war and small frigates, and, as the bar is narrow, may perhaps be made to admit still larger vessels; 2d, its bar is near the coast, and the channel over it is straight and easily hit; 3d, it is perfectly landlocked, and has a very capacious roadstead; 4th, it has excellent positions for repairing, building, and launching vessels, and for docks and dock yards, in healthy situations; 5th, it has abundance of good water for the supply of vessels; and 6th, it is perfectly defensible.

As these and other properties, in conjunction with its situation as respects the coast and the interior, have induced the government to fix upon it as a naval station, and a place of rendezvous and repairs, we shall for the future consider it in that character, both in its relations to the commerce of the Gulf and its own proper defences.

Although a naval station nearer the extremity of East Florida might possibly enable our vessels of war the better to watch over our commerce in the Florida stream, still no deep harbor exists to the south of Pensacola in which the circumstance of an entire separation from all relief and supplies does not greatly outweigh this advantage, if indeed it be more than imaginary.

It is, however, far from certain that the Florida stream is always to be the channel from the Gulf to the Atlantic. The great embarrassments and losses to which we must be exposed while that continues to be the course of our Gulf trade, so long at least as we have not the mastery on the ocean, and in fact so long as the Island of Cuba is in the possession of another power, to say nothing of the natural dangers of that navigation, have directed the public attention seriously to the project of opening a shorter and safer passage through the head of the Florida peninsula. No obstacle not insuperable, it is presumed, will prevent the execution of this grand design, and, considered in reference to such an outlet, Pensacola is most happily situated.

But the object of a naval force in this quarter is not alone to watch the transit of commerce to and from the Gulf; it has the coasting trade of the Gulf to protect; it has piracies to suppress, which confine themselves to no particular strait; and, above all, it has to keep an uninterrupted and watchful guard over the place of deposit, as well as the issues of the disposable productions of a region without parallel as to extent and fertility.

Projecting, as the delta of the Mississippi does, into the Gulf, the position of the Pensacola enables it to direct naval operations upon the rear of any force investing or moving along the avenues to the city of New Orleans, and at the same time that it can, almost to the last, with the help of a fortified line of interior navigation, preserve its communication with that city unbroken, it will be at no moment entirely dependent upon that line for the supply of its means of defence or annoyance, unless, indeed, the proposed artificial connexions with the interior before pointed out should be found impracticable.

A very exact survey has been made of the bay of Pensacola which would suffice for forming a scheme of defence if no other object were in view than the security of the town and harbor. Considered, however, as a naval station, and a place of rendezvous and repairs, further surveys, extending a greater distance from the shores, delineating accurately the face of the country, and showing the several avenues by land and water, are found to be necessary.

The western extremity of Santa Rosa island is, nevertheless, so situated, in respect to the mouth of the bay, as to require, in part, the same works in either case; and the board can, therefore, whenever ordered, project a fort for this position, which, in either case, should be the first occupied.

It is evident from the above report, made by the board of engineers after a thorough examination, that improvements are contemplated in that quarter which will furnish the means of transporting our arms and munitions of war to any point, by an interior water communication, where they may be needed

for the defence of that frontier. The committee are of opinion that the arsenal should be located near to the coast, and at the most important point to which the militia may be called for the defence of the country, and from which the arms and munitions may be easily transported by land or water. The committee do not doubt, from the projection of the defences, and the establishment of our navy yard and naval depot at that point, that it will be rendered impregnable against an enemy from without, and, from the situation of the country, there is every prospect that a point can be selected where the arsenal will be safe in that vicinity. They are also of opinion that the rendezvous at that point of our public vessels, in time of war, intended for the protection of the coasts of Louisiana, Alabama, Mississippi, and Florida, gives to it additional claims for a military depot, as those vessels might be rendered auxiliary to the rapid conveyance of munitions to any point of defence on these coasts that emergency might require, and to the western States such an establishment seems highly interesting, as nearly all their commerce finds an outlet through the Gulf of Mexico.

The committee refer to the following extract from a memorial of the legislative council of Florida as a part of this report, and think the luminous arguments employed by them in favor of a naval depot have equal application to it as a military station, and as a depot for arms and munitions of war:

In conclusion, your memorialists would beg leave to represent to your excellency the superior advantages of the harbor of Pensacola over any other on the Gulf of Mexico south of New Orleans, and suggest the policy of selecting it as a naval depot by the government of the United States. Although engineers have been appointed to make a survey of the harbor who are amply competent to form a correct estimate of its importance, yet it is to be hoped that the suggestions of your memorialists may not be considered obtrusive, but received with complacency as the offspring of a lively interest in the welfare of this Territory and of the United States. From a survey that has been made of the harbor of Pensacola under the orders of the general government, it is understood by your memorialists that, at the lowest water, vessels drawing not more than twenty-one and a half feet water may cross the bar and enter the harbor with perfect safety. The medium depth of water between the highest and lowest tide may be confidently estimated at two additional feet, making, in the aggregate, twenty-three and a half feet. It is believed, from the best advice which has been obtained upon the subject, that this depth of water on the bar is sufficient for the entrance of vessels of any description save those of the largest class; the locality of the bay is likewise such as to secure every facility to the entrance and departure of vessels. The opposite extremes of its oblong form extend in a northeasterly and southwesterly direction, which happily corresponds with the general range of winds, so as to subject vessels to very little delay in their arrival or departure. After vessels have entered the bay they have every assurance of the most perfect security, even in the most violent gales; it is completely landlocked by the main land and the island of St. Rosa; it is uncommonly capacious, and its bottom, affording a stiff, tenacious clay, constituting a safe and excellent anchorage. From St. Carlos de Barrancas to the opposite point on St. Rosa's island is computed to be about three-fourths of a mile; with suitable fortifications at those two opposite positions, it is confidently believed by military gentlemen of science who have visited them and expressed an opinion that no vessel could pass into the bay without receiving a fatal injury; the guns of both fortifications could be brought to bear upon it with so much certainty and effect as to insure its destruction. Every examination which has been made of these commanding stations has resulted in the decided opinion that it can be much more easily defended than any other on the Gulf, if not on the whole of the Atlantic coast.

A faithful topography of Pensacola and the adjacent country will demonstrate that it may be very efficiently protected from the inroads of the enemy by land. In the rear of the town, at the distance of about half a mile, the highlands are presented, upon which military works may be constructed to advantage, so as completely to command the whole space intervening between them and the bay; a single fortification, strongly and judiciously built, would successfully bear upon the entrance into the town in every direction. There is probably no other station on the southern coast which could be defended by land with so small a number of troops, or at less expense.

Independently of the facility with which Pensacola may be defended if reliance is exclusively reposed on regular troops, there are other prominent considerations which powerfully recommend it to the attention of the general government. This results from its immediate connexion with New Orleans and its contiguity with most of the States on the Mississippi river. In cases of emergency and invasion, should it become necessary to call the aid of the militia for the protection of this place, they can be readily obtained from Louisiana, Mississippi, Kentucky, Tennessee, and Alabama; owing to an advantage from a water communication, they may be conveyed to Pensacola in a short time, and comparatively with small expense to the general government. Your memorialists are induced to believe that half of the expenditures of the late war were included in the item of transportation. Much would be saved on this score were Pensacola selected as a naval station, not only in the transportation of soldiery, but also in provisions and the munitions of war. This desirable object would be more completely accomplished should ever a communication be opened between the bay of Pensacola and the Mississippi and Mobile rivers. Another prominent advantage in favor of Pensacola, which gives it elevated claims on the patronage of the government, is that it is distinguished for the salubrity of its atmosphere and mildness of climate; it is a situation where her troops may always calculate on enjoying good health, and where it is represented that breadstuffs and other provisions continue almost as long in a perfect state of preservation as in most of the northern ports of the United States.

In addition to this, your memorialists will take the present occasion to remark that a military force stationed at Pensacola would in time of war give efficient aid in the defence of New Orleans, as well as additional security to Louisiana, Mississippi, and Alabama, by presenting a formidable barrier by which inroads through West Florida would be checked and prevented. This assistance could not with any certainty be obtained from Tampa Bay; and no other position, it is believed, can be selected south of Pensacola which promises the other important advantages we have described. In consequence of its remaining at a great distance from a dense population, and the difficulties of transportation, it cannot be so conveniently connected with the adjoining States, and must rely for defence almost entirely upon regular troops, a much larger number of which will be necessarily required.

The occupation of Pensacola, with the necessary fortifications, is calculated to afford a more complete command over the commerce of the Gulf of Mexico than any other position which could be selected on the southern coast. With this peculiar advantage, the United States would exclude the shipping of an enemy probably from the only port in Florida in which they could anchor with safety, owing to the violence of the West India gales. Your memorialists are of the opinion that there is no other harbor, save that of Havana,

in which they could ride with security during a storm. But the benefits arising from the selection of Pensacola as a naval station are not entirely of a negative character; we should not only be enabled to exclude the hostile armaments of foreign nations, but our own vessels could be protected from capture and disaster. The harbor of Pensacola will always be a place of secure retreat; a station from which expeditions may be fitted out without interruption, and from which the West India commerce of an enemy might receive the most successful annoyance. Were New Orleans assailed, Pensacola would be competent to afford co-operation for its defence, both by land and water, which could not fail to excite in the enemy the most fearful apprehensions; by our vigorous and well-directed efforts her commerce would be cut off, her detachments captured, and, in the end, her surrender and retreat accomplished. The security of this place, then, is believed by your memorialists to be inseparably connected with the prosperity and defence of New Orleans and the contiguous States.

EDMUND LAW, *President of the Legislative Council.*

Test: ROBERT MITCHELL, *Clerk of the Legislative Council.*

The committee are not disposed to confine the selection of the War Department to any particular point, notwithstanding the many considerations which recommend Pensacola, and therefore propose that the words in the 5th and 6th lines "*at or near Pensacola, in Florida,*" be stricken out, and that the words following be inserted, "*somewhere contiguous to the northern coast of the Gulf of Mexico,*" in lieu thereof. This will afford to the department an opportunity to select such a site as it may deem proper, after a minute examination.

The following letter from Colonel Bomford contains an estimate of the expense, and the committee recommend that the blank in the bill be filled with that sum:

ORDNANCE DEPARTMENT, *Washington, January 7, 1828.*

SIR: In reference to the letter of the Hon. J. S. Johnston, of the Senate, of the 27th ultimo, and to the bill therein enclosed, relating to the erection of an arsenal in Florida, which have been referred to this department, I have the honor to report that the establishment of an arsenal contiguous to the Mexican Gulf frontier is considered necessary to the interests of the public service. A depot of military supplies in that quarter is requisite for supplying the troops in time of peace, and would be of the highest importance to the defence of that frontier in time of war.

This subject was presented for consideration in the annual report from this department, dated on the 27th of November last, and is printed among the documents which accompanied the President's message, at page 93, in document No. 2, to which I beg leave to refer, as it contains the reasons upon which the recommendation of the measure was founded.

An arsenal suited for that section of the country, it is conceived, should consist of the following, viz: A site on navigable waters to contain from 80 to 100 acres of land; an arsenal for storing arms and artillery equipments, 30 by 100 feet, two stories high; a storehouse for packages in bulk, 30 by 80 feet, two stories high; a magazine for gunpowder and ammunition; officers' quarters, 25 by 38 feet; barracks for workmen, 25 by 50 feet; a gun-house for preserving artillery carriages, 26 by 100; and three small workshops for repairing small arms, constructing artillery carriages, and preparing ammunition. A wharf and enclosures would also be required.

The department does not at this time possess the information necessary for forming an accurate estimate of the cost of such an establishment, but it is presumed that it could be erected for about fifty thousand dollars, and I would recommend filling the blank in the bill with that sum.

With respect to the form of the bill, which was received with Mr. Johnston's letter, I beg leave to observe that it appears to require that a site shall be *purchased*; this may be considered as precluding the right of selecting a site from any of the public lands. It is not known that a suitable site could be found on any of the public lands, but if such should be the case, it might be advantageous to have the privilege of occupying it. I would, therefore, suggest the expediency of substituting the word *procure* for the word "*purchased*" in the bill.

I have the honor to be, respectfully, &c.,

GEO. BOMFORD, *Brevet Colonel, on Ordnance Service.*

HON. JAMES BARBOUR, *Secretary of War.*

DEPARTMENT OF WAR, *January 8, 1828.*

SIR: In reply to your communication of the 27th ultimo, on the subject of erecting an arsenal in the Territory of Florida, I beg leave to refer to the enclosed report upon that subject of the officer in charge of the Ordnance department.

I have the honor, &c.,

JAMES BARBOUR.

HON. JOSIAH S. JOHNSTON, *Senate.*

20TH CONGRESS.]

No. 367.

[1ST SESSION.]

## ON ERECTING BARRACKS AND STOREHOUSES FOR THE TROOPS NEAR NEW ORLEANS.

COMMUNICATED TO THE SENATE JANUARY 28, 1828.

Mr. HARRISON, from the Committee on Military Affairs, to whom was referred a resolution of the Senate of the 20th of December last, instructing them to inquire into the expediency of erecting barracks and storehouses for the troops near New Orleans, reported:

That they have examined the matter to them referred, and have determined that it is expedient to erect barracks and storehouses for the troops near New Orleans, for the reasons set forth in the letter of the Secretary of War and report of the Quartermaster General, hereto annexed, and report a bill for those purposes.

DEPARTMENT OF WAR, *January 24, 1828.*

SIR: I have the honor, in replying to your communication of the 14th instant, to submit a report of the Quartermaster General, with whom I fully concur as to the advantages which would be experienced from the erection by the government of barracks and storehouses at New Orleans.

The Quartermaster General's estimate of expense, which would be incurred in purchasing a site and in the erection of the buildings, will be found accompanying his report.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. WILLIAM H. HARRISON, *Chairman Military Committee, Senate.*

QUARTERMASTER GENERAL'S OFFICE, *January 22, 1828.*

SIR: In compliance with your orders, I have the honor to submit an estimate for barracks, quarters, and other buildings for a garrison of four companies of men, with their officers, in the vicinity of New Orleans; and I earnestly recommend, should it be determined by the government to continue the troops at that city, that the work be immediately commenced. In addition to this estimate, about fifteen thousand dollars will be required to erect storehouses in the city of New Orleans, to replace those sold by the register of the land office during the last year.

In consequence of the sale of the barracks and storehouses at New Orleans, we are now compelled to pay rents in that city equal to the interest on one hundred and seventy thousand dollars. It is therefore obvious that the public would be benefited in a pecuniary point of view by constructing the work proposed, independently of the advantage to the discipline, police, and health of the troops.

In the estimate submitted I have not calculated on the labor of the troops, for experience has sufficiently demonstrated that nothing is gained by using them in a climate so far south.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

HON. JAMES BARBOUR, *Secretary of War, Washington City.*

*Estimate of the expense which would be incurred in the purchase of a site in the vicinity of New Orleans, and the erection of barracks, quarters, storehouses, &c., thereon for a garrison of four companies of United States troops.*

1. Soldiers' barracks:			
Materials of all kinds.....	\$14,039	55	
Workmanship and labor.....	18,719	41	
			\$32,758 96
2. Officers' quarters:			
Materials of all kinds.....	13,389	50	
Workmanship and labor.....	17,852	66	
			31,242 16
3. Storehouses for quartermaster's and commissary's department, and shop for sutler:			
Materials of all kinds.....	1,485	90	
Workmanship and labor.....	1,981	21	
			3,467 11
4. Hospital:			
Materials of all kinds.....	1,650	00	
Workmanship and labor.....	2,350	00	
			4,000 00
5. Guard-house, office, stables, and privies:			
Materials of all kinds.....	1,550	00	
Workmanship and labor.....	1,950	00	
			3,500 00
Carried forward.....			74,968 23

	Brought forward .....	\$74,968 23
6. Materials, workmanship, and labor for erecting a brick wall enclosure around the establishment .....		3,000 00
	For the necessary buildings .....	77,968 23
7. For the purchase of a lot of five acres front on the river, running back the usual number of acres, according to the local custom .....		10,000 00
Total .....		87,968 23

TH. S. JESUP, *Quartermaster General.*

QUARTERMASTER GENERAL'S OFFICE, *January 22, 1828.*

20TH CONGRESS.]

No. 368.

[1ST SESSION.]

ON THE ERECTION OF FORTIFICATIONS AT PENSACOLA, FLORIDA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 1, 1828.

Mr. HAMILTON, from the Committee on Military Affairs, to whom was referred the estimates from the Committee of Ways and Means, in relation to the fortifications proposed to be commenced at Pensacola, reported:

That they have taken the estimates, with the plans of the contemplated fortifications, into consideration, and recommend, in conformity with the views of the Department of War, the adoption of the following resolution:

*Resolved,* That the sum of fifty thousand dollars should be appropriated, in the appropriation bill for fortifications, for the purpose of commencing the fortification in the vicinity of Pensacola.

20TH CONGRESS.]

No. 369.

[1ST SESSION.]

INCREASE OF PAY TO NON-COMMISSIONED OFFICERS AND PRIVATES OF THE ARMY,  
PROPOSED AS A MEANS OF PREVENTING DESERTION.

COMMUNICATED TO THE SENATE FEBRUARY 6, 1828.

ADJUTANT GENERAL'S OFFICE, *Washington, January 5, 1828.*

Proposed increase of pay to the non-commissioned officers and privates of the army:

11 sergeant majors, at \$6 additional per month, equal per year .....	\$792
11 quartermaster sergeants, at \$6 additional per month, equal per year .....	792
106 orderly sergeants, at \$7 additional per month, equal per year .....	8,904
248 sergeants, at \$4 additional per month, equal per year .....	11,904
424 corporals, at \$1 additional per month, equal per year .....	5,088
14 principal musicians, at \$7 additional per month, equal per year .....	1,176
212 musicians, at \$1 additional per month, equal per year .....	2,544
Total .....	31,200
4,452 privates, at \$1 additional per month, equal per year .....	53,424
Aggregate .....	84,624

NOTE.—It is therefore seen by the above that the proposed increase of non-commissioned officers' pay would not exceed one-half of the sum annually lost by desertion; and that, inclusive of the contingently increased privates' pay, the sum is very little more.

R. J.

*Estimated loss incurred by the desertion of private soldiers, at different periods of their enlistment, after joining their regiments; and of recruits from rendezvous, and on the march to join their regiments.*

1.—Those who desert in about six months after enlistment, having joined their regiments:	
Bounty and premium, per man .....	\$14 00
Contingencies, per man .....	7 00
Average transportation, per man .....	11 00
Clothing, one year's supply, per man .....	40 00
Six months' pay, per man .....	30 00
Fuel, after joining, per man .....	2 00
Subsistence, six months, per man .....	18 00
	122 00
2.—Those who desert in the <i>second year</i> of their enlistment:	
Bounty and premium, per man .....	14 00
Contingencies, per man .....	7 00
Average transportation, per man .....	11 00
	32 00
The recruit having rendered about six or seven months' useful service, 9-10ths of this } sum only is lost, per man .....	9 10)288 00
	29 00
One-half year's supply of clothing in advance .....	22 00
	51 00
3.—Those who desert in the <i>third year</i> of their enlistment. Calculated according to the principle adopted for the second year, <i>i. e.</i> , making allowance for the time usefully served—about eighteen or twenty months:	
Two-thirds of the bounty premium, contingencies, and transportation lost, equal .....	\$21 00
One-half year's supply of clothing .....	22 00
	43 00
4.—The same rule of calculation is pursued for the fourth and fifth years; which makes the loss sustained, per man, for each year, respectively:	
Fourth year .....	\$38 00
Fifth year .....	33 00
	71 00
5.— <i>Recruits</i> who desert from rendezvous:	
First bounty and the premium .....	\$8 00
Contingencies, as before .....	7 00
Average transportation to general rendezvous .....	3 00
Half year's supply of clothing .....	22 00
Subsistence for two months .....	6 00
	46 00
6.—Recruits who desert while on their way to join regiments:	
The same as those from rendezvous, adding eight dollars more for transportation; making the loss, per man .....	\$54 00

RECAPITULATION.

Loss, per man, first year of desertion .....	\$122 00
Loss, per man, second year of desertion .....	51 00
Loss, per man, third year of desertion .....	43 00
Loss, per man, fourth year of desertion .....	38 00
Loss, per man, fifth year of desertion .....	33 00
<i>Recruits</i> from rendezvous, per man .....	46 00
<i>Recruits</i> on the way to join, per man .....	54 00
	587 00

*Report on the subject of military desertions.*

ADJUTANT GENERAL'S OFFICE, December 31, 1827.

The inquiry concerning the numbers and cause of desertions from the army, pursuant to a resolution of the House of Representatives dated December 27, 1825, has not yet resulted in the adoption or recommendation of any measure having for its object the mitigation of this tremendous evil, and which is still so afflictive to the best interests of the service.

The report from this office of January 11, 1826, and then submitted to Congress by the Secretary of War in obedience to the resolution just referred to, together with the more minute analysis subsequently presented in the tabular exhibit of casualties incident to the army for the three years, respectively, terminating on September 30, 1823, 1824, and 1825, furnishes nearly all the important and official information which may be deemed to be indispensably necessary to any inquirer whose object may be either to explain the cause of, or to seek a remedy for, the prevailing crime of *desertion*.

The magnitude of this great and growing evil will be more readily comprehended by presenting it under the various heads exhibited in the following table:

YEARS.	Number of recruits who desert from the rendezvous or before joining companies.	NUMBER AND PERIOD OF DESERTIONS AFTER JOINING COMPANIES.						Total number of desertions exclusive of the convicts.	Number of men enlisted.	ESTIMATED LOSS IN MONEY BY DESERTION.		
		First year of enlistment.	Second year of enlistment.	Third year of enlistment.	Fourth year of enlistment.	Fifth year of enlistment.	Total.			By recruits from rendezvous.	By soldiers from companies.	Total loss in money.
1823.....	159	366	75	36	18	14	509	668	2,661	\$7,506	\$51,171	\$58,677
1824.....	208	432	86	43	22	20	603	811	2,387	9,960	60,435	70,395
1825.....	249	402	76	41	20	15	554	803	1,721	11,550	55,938	67,488
1826.....	179	330	66	32	16	13	457	636	1,260	8,354	46,039	54,393
	795	1,530	303	152	76	62	2,123	2,918	8,029	37,370	213,583	250,953

*Recapitulation or minute analysis of the expense incurred by desertion, according to the period or year of enlistment in which the deserters abscond.*

Years.	ESTIMATED LOSS ACCORDING TO THE PARTICULAR PERIOD OF DESERTION.					Total, including recruits.	Loss in desertion by recruits from rendezvous.	Loss in desertion by recruits on the march to regiments.
	First year.	Second year.	Third year.	Fourth year.	Fifth year.			
1823.....	\$44,652	\$3,825	\$1,548	\$684	\$462	\$58,677	\$6,210	\$1,296
1824.....	52,704	4,386	1,849	836	660	70,395	7,314	2,646
1825.....	49,044	3,876	1,763	760	495	67,488	10,902	648
1826.....	40,260	3,366	1,376	608	429	54,393	7,544	810
Aggregate.....	186,660	15,453	6,536	2,888	2,046	250,953	31,970	5,400

NOTE.—The cost of each private who deserts, after joining a regiment, is as follows:

If in the first year after enlistment.....	\$122 per man.
If in the second year after enlistment.....	51 per man.
If in the third year after enlistment.....	43 per man.
If in the fourth year after enlistment.....	38 per man.
If in the fifth year after enlistment.....	33 per man.
A recruit from rendezvous.....	46 per man.
A recruit while on the march.....	54 per man.

ADJUTANT GENERAL'S OFFICE, Washington, January 3, 1828.

If this development excites astonishment, it may also serve to stimulate the proper authorities to devise and adopt such measures as might have a tendency to diminish, if not entirely correct, a practice so degrading and calamitous to the military establishment. It is seen that 795 recruits have deserted from the rendezvous during the last four years; and that of the 2,123 who deserted after joining regiments, 1,530 deserted within the first year of their term of enlistment.\* If these two numbers be united, they will make 2,325 of the whole number (2,918) who have deserted either almost immediately after enlistment, or almost immediately after joining companies. To determine what scheme of redemption shall be adopted is the important question which is required to be decided; it is, however, unhesitatingly affirmed that the power rests alone in legislation, being far beyond the control of executive or army regulation. Whatever may be the plan finally adopted, the leading principle, in my humble opinion, should combine a two-fold operation, that of allurement and repulsion.

1. The pay of all non-commissioned officers should be increased.

2. Not less than one dollar should be added to the monthly pay of the private soldier: *Provided*, that the same be retained until the expiration of his service, (or a given portion of it,) when, upon evidence of honorable and faithful service, this accumulating fund, like a retained bounty, should be paid to him.†

\* Although the number of desertions in this column is put down under the head of "first year of enlistment," it is believed that nine-tenths desert before the lapse of the first six months, and a very great proportion within two or three months, or almost immediately after the first muster for pay and receipt of the retained bounty. Generally, therefore, they have neither rendered service nor learned the duties of a soldier.

† If the soldier re-enlists he should then be entitled to receive monthly the six dollars pay. The knowledge of this contingent and prospective provision would add another inducement to re-enter the army, and another motive to faithful service during a first enlistment.

3. The bounty system, as now established by law, should be *abolished*, thereby dispensing with any *bounty in hand*, or *any bounty paid* previous to two years' faithful service.\*

4. The term of enlistment should be reduced to the period of four years.

What are the practical advantages supposed to be derivable from a system combining the foregoing propositions?

It may be answered:

1. The enlistment of soldiers from a class of citizens far more respectable than have been heretofore willing to serve in the army.

2. The absence of motive or inducement, and the consequent exclusion from recruiting rendezvous of all that class who "enlist to-day and desert to-morrow;" and of that other class of kindred morality, a majority of which continue just long enough to join a regiment, receive the retained bounty and the three or four months' pay which may be due, besides the additional supply of the most costly part of a year's uniform clothing, and then desert.—(See columns Nos. 1 and 2 of the table.) The inducement of this improved class of citizens to join the military service of the republic would be yet stronger when it should be known that their associates and comrades, most probably, would no longer be drawn from that exceptionable portion of society which now, in too many instances, appear to furnish its pernicious quota of recruits, scarcely for any other purpose than to obtain present and temporary relief.

I offer no proof that the plan of which a brief outline is here respectfully suggested would, if carried into practical operation, be adequate to the filling up of the ranks of the army; neither is the recruiting system now and for several years practiced adequate to the current demands of service. But this much may be affirmed in its favor: that if only one-half of the number should be enlisted which under existing laws and regulations are annually enlisted, the annual accession to the army may be presumed to be at least equal to the present ratio of actual reinforcement, and that, too, without the concomitant expense placed to the account of desertion. It is moreover confidently believed that the gain and loss in reference to expense, number, and officering, would be altogether in favor of economy, the army, and public morals; allowing at the same time for desertions, which should be expected to take place perhaps under any system however liberal and ameliorated.

I refer to the tabular part of this communication and the report first alluded to of January 11, 1826, for important facts and results, which facts and results afford the best practical commentary on the subject under consideration. It is there demonstrated that the process of enlistment and the reinforcement of the army are very different results. It is also proved that in 1823 the number of desertions was equal to about one-fourth of the number of men enlisted; that in 1824 the proportion was increased to nearly one-third; in 1825 to nearly one-half; and that in 1826 the loss by desertion is *more than one-half of the whole number of enlistments* †

The evil is therefore progressive, and no one can tell how it may increase, or where it will terminate. Nothing can arrest its baneful march but the power of legislation; and the system most likely to succeed the best is believed to be the already proposed increase of pay, to be so regulated and dispensed as may induce a greater proportion of respectable persons to join the service, and at the same time banish from the rendezvous that class of fraudulent schemers whose devices prove alike injurious to the revenue of the country, the strength, the efficiency, and the moral of the army.

Respectfully submitted,

R. JONES,

*Adjutant General, United States Army.*

Major General Brown, *Commanding United States Army, Washington.*

20TH CONGRESS.]

No. 370.

[1ST SESSION.]

ANNUAL RETURNS OF THE MILITIA OF THE SEVERAL STATES AND TERRITORIES  
FOR 1827.

COMMUNICATED TO THE SENATE FEBRUARY 8, 1828.

DEPARTMENT OF WAR, *February 7, 1828.*

SIR: Pursuant to the provisions of the act of Congress of March 2, 1803, entitled "An act in addition to an act entitled 'An act more effectually to provide for the national defence, by establishing an uniform militia throughout the United States,'" I transmit herewith an abstract of the general annual returns of the militia of the United States, and of their arms, accoutrements, and ammunition, by States and Territories, prepared from the latest returns received at this office.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The PRESIDENT of the Senate.

\* The results given in columns Nos. 1 and 2 of the table incontestably prove that it is the bounty-in-hand system to which a vast majority of the desertions under these respective subdivisions is fairly to be ascribed. Without the lure presented in the charm of a *bounty paid down* such vagrants would seldom if ever be tempted to enlist. If, however, the French proverb, "*Point de argent, point de Suisse*," should by any be retorted as applicable to our own service, I would answer "what avaleth it to recruit soldiers who *enlist to desert*, and who *do desert*?" I would further answer by asking if it were not worthy of some effort and experiment to apply and distribute that annual amount of lost treasure, the most ungracious pecuniary loss the country can sustain, that by desertion, in some different way, some way whereby we might reasonably hope a mitigation of if not a radical cure of the evil which is so oppressive to the service.—(See column No. 12 of the table.)

[It is well known that arms and accoutrements sustain most injury when first used by recruits, and especially by such as are enumerated in the second column of the table. It is stated by experienced officers "that muskets generally in the hands of recruits in the course of a few months are so much injured as to be unfit for active service." The damage has been estimated at one-half of the first cost; this item and some others are omitted in the present calculation.]

† The diminution of recruits and the increased ratio of desertion in 1825 and 1826 (particularly of *recruits* from the rendezvous during the last year) is attributed to the new regulations, which prohibits the enlistment of *foreigners*, among whom desertions are not so prevalent as with native citizens. The reason is obvious; the facilities of escape, the security and protection afforded to our own people by their friends and a former home are calculations for safety denied to the emigrant, who generally is a stranger in the land.

Abstract of the general annual returns of the militia of the United States, by States and Territories, according to the act of March 2, 1803, taken from the latest returns received at this office.

20TH CONGRESS.]

No 371.

[1ST SESSION.]

ON THE PROCEEDINGS OF A COURT-MARTIAL ORDERED FOR THE TRIAL OF CERTAIN  
TENNESSEE MILITIAMEN IN 1814.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 11, 1828.

Mr. HAMILTON, from the Committee on Military Affairs, to whom were referred the documents communicated by the Secretary of War, in obedience to the call of the House of January 16, relative to the proceedings of a court-martial, which commenced its sittings, at or near Mobile, December 5, 1814, for the trial of certain Tennessee militiamen, together with the correspondence between the governor of that State and the Secretary of War respecting the length of service of militia drafts of that State during the late war, reported :

That, by the reference of these papers to your committee, they have been unable to place any other construction on your order than that it was the intention of the House that they should examine the same and determine whether all the documents had been communicated, or were on file in the department, necessary to a true understanding of the case to which the call for these documents is applicable ; and, if any were wanting, to ascertain in what manner the deficient papers could be supplied ; and, in reporting upon the nature of the transactions which these papers disclose, to determine whether the legislative interference of Congress be necessary, as to any amendment either of the Rules and Articles of War or the laws governing the militia of the United States.

In the discharge of this duty your committee will proceed succinctly to state to the House the character of the documents transmitted by the Department of War ; the periods and events to which they are applicable ; the law and public exigency under which the governor of Tennessee, during the last war, ordered out the militia drafts of that State for the common defence of our country ; and, lastly, the crimes and offences committed by a portion of the militia drafts so ordered out, which produced a necessity for the examples which were made, and which are disclosed in the proceedings of the court-martial, convened at or near Mobile, December 5, 1814.

The first criticism to which the correspondence, transmitted in obedience to the order of the House by the Department of War, is liable, is the numerical classification made by that department of the letters composing this correspondence.

The Secretary of War has transmitted twelve letters which passed between the then Secretary, General Armstrong, and Governor Blount. Instead of commencing the series with the letter first in date, by which the inducement would be shown for the reply, this order is inverted, and the series commences with a letter from the Secretary of War of January 3, 1814, marked No. 1 ; and his letters are continued to No. 5. It so happens that the first letter in date is as low down as No. 6—Governor Blount's of December 10, 1813 ; and the second letter in date is No. 7—Governor Blount's of December 24, 1813 ; to both of which the letter of January 3, 1814, of the Secretary of War, is an answer.

Your committee believe that this arrangement of the correspondence is calculated to lead to serious misapprehension ; that a reader, not very attentive to a comparison of dates, would suppose that the letter of January 3, 1814, referred to such militia drafts as were to be made in that year, when it is exclusively applicable to the drafts which had been made in 1813 for the prosecution of the Creek war, and which were admitted to have been executed but for three months. The injustice which, by a confusion of dates, would be done, even by possibility, to the parties concerned in the transactions of the militia drafts of Tennessee, which were made for six months in 1814, by applying the letter of the Secretary of War of January 3, 1814, to subsequent drafts for six months, instead of those which were made in 1813 for three months, has induced your committee so to arrange the correspondence that the leading letter in the series should come out first, and the subsequent letters follow in the natural order of their respective dates. This obviously just classification being observed, it will be perceived that the letter of January 3, 1814, has no bearing upon the drafts of militia which were afterwards made for six months, in the progress of that year, by the governor of Tennessee, of which the regiment under the command of Colonel Pipkin composed a part.

A perusal of the correspondence just recited, of the muster-rolls of the different companies of Colonel Pipkin's regiment, and the proceedings of the court-martial which was convened "at Mobile, December 5, 1814, for the trial of certain Tennessee militiamen," present upon their face the following inquiries :

1. Whether the governor of Tennessee had the power to order out detachments of the militia of that State for a six months' tour of service ?

2. Whether Colonel Pipkin's regiment was so ordered out, and in conformity with such authority ?

3. Whether the soldiers of this regiment, who were arraigned for certain crimes and offences before "a court-martial which convened at Mobile, December 5, 1814," were legally tried ? and whether the commanding general, approving the proceedings of this court, properly exercised the power and discretion vested in him by law ?

In relation to the first branch of the inquiry it will be proper to premise that, on the 10th of April, 1812, in anticipation of the war about to take place, Congress passed an act, which will be found in the fourth volume of the Laws of the United States, page 406, which authorizes the President "to require the different executives of the States to organize their respective proportions of 100,000 militia, and to call into service the whole, or a part, of these quotas ; which detachments were not compelled to serve longer than six months after they arrived at the place of rendezvous." This act was an enlargement of the act of 1795, which restricted the service of the militia, when called out by the authority of the United States, to three months.

The act of April 10, 1812, expired by its own limitation on April 10, 1814. On January 11, 1814, whilst, however, this law was in full force, the then Secretary of War, General Armstrong, wrote the letter, numbered 2 in the documents, to Governor Blount, which authorizes him "to supply, by militia drafts or by volunteers, any deficiency which may arise in the militia division under the command of Major General Jackson, and *without referring on this head to this department* ; and further informs Governor

Blount that "it may be well that your excellency consult General Pinckney on such occasions, as he can best judge of the whole number necessary to the attainment of the public objects."

This letter, in the opinion of your committee, vested plenary power in Governor Blount until it was revoked, either by express orders or by peace, to call out such militia drafts as in his discretion he might think necessary "for the attainment of the public objects" under the existing laws.

On the 18th of April, 1814, (4th volume Laws of the United States, page 703, section 8,) Congress enacted "that the militia, when called into the service of the United States by virtue of the before recited act may, if in the opinion of the President of the United States the public interest require it, be compelled to serve for a term not exceeding six months, after their arrival at the place of rendezvous, in any one year. This law was to continue in force during the war.

After the passage of this act it does not appear that the President revoked the power which he had given Governor Blount by virtue of the letters of the Secretary of War of the 11th and 31st of January, 1814; but he seems to have been willing, from his silence, coupled with the notorious fact of Governor Blount's continuing to order out militia drafts under the discretionary authority of those letters, to consider that such drafts as Governor Blount should order out were, in his opinion, required "by the *public interest*."

And your committee think that this proposition may be put more affirmatively, to wit: that it was the "opinion of the President that the public interest did require" that Governor Blount should, under the advisement or by the requisitions of General Pinckney, have the power to order out militia drafts either for three or six months, as the exigencies of the service should render necessary, "*without referring, on this head,*" to the President for special directions.

This deduction they consider irresistible and conclusive, and that there was nothing in the act of April 18, 1814, which prevented the President from expressing his opinion, through general instructions, to the executive of a State, whose orders for militia drafts, under such discretion should, *de facto* and *de jure*, be the opinion of the President "that such drafts were required by the *public interest*."

This inference, your committee moreover believe, if they thought it necessary to go into such an investigation, might be sustained by the contemporary constructions which were given to this clause in the act of April, 1814, in the actual discretion which was vested in the executives of several of the States.

2d. Your committee are now brought to inquire whether Colonel Pipkin's regiment was ordered out for six months and in conformity with the above cited authority? It appears by the muster-rolls that this regiment was regularly inspected and mustered into service for six months, to wit: on the 20th of June, 1814; and that consequently their term of service expired on the morning of the 20th of December, 1814. In the absence of all other proof, these records are to be considered as the highest evidence, not only of fact, but of the legal presumption that the muster and inspection were made with the requisite authority.

But it is a circumstance of public and indisputable notoriety, and one which belongs to the history of the country, that Colonel Pipkin's detachment was mustered into service *expressly for six months*, by virtue of an order of Governor Blount's, dated the 20th of May, 1814; a certified copy of which your committee have taken steps to procure, that it may be placed on the files of this House, with the documents from the War Department.

This order recited that the draft was made in compliance "with the requisition of Major General Pinckney, and in furtherance of the views of government, by a latitude given to him (Governor Blount) by the War Department in regard to calls for men to act against the Creeks." This draft was ordered to rendezvous on the 20th of June, 1814, at Fayetteville, Tennessee, and formed the identical detachment of one thousand men, who were afterwards placed under the command of Colonel Pipkin, and stationed in the summer and autumn of that year at the posts in the Creek country. And by reference to Governor Blount's letter of the 19th of October, 1814, (No. 11,) it will be seen that he specially reported this regiment of one thousand men to the Secretary of War as in service *for six months*; from which fact the inference is inseparable that the President considered it as legally in service, or it was the bounden duty of the Secretary to have ordered their immediate discharge, which it nowhere appears that he ever did. If, therefore, any confirmation was wanted for the original authority by which the draft was made for six months, your committee consider that Governor Blount's report of 19th October, and the implied sanction of the President, incontestibly furnish it.

3d. Whether the soldiers of Colonel Pipkin's regiment who were arraigned for certain crimes and offences before a court-martial which convened at Mobile on the 5th of December, 1814, were legally tried, and whether the commanding general, approving the proceedings of this court, properly exercised the power and discretion vested in him by law?

By reference to the proceedings of the court-martial in question, it will be seen that two commissioned officers and about 200 of the non-commissioned officers and privates of Colonel Pipkin's regiment were tried for the most serious offences which can be committed in the military service of the country.

That these offences, first, consisted in "exciting and causing mutiny;" secondly, in the commission of an actual mutiny, accompanied by circumstances of aggravated robbery and spoliation of the public stores; and thirdly, in the crime of desertion.

The two first of these offences, to wit: "exciting and causing a mutiny," and actually committing mutiny, "by forcing the guard and seizing the commissaries' storehouse and stores at Fort Jackson, were committed, the first before the 19th of September, 1814, and second on the 19th of September, 1814, and before even *three months' service of this detachment had expired*. That some of the mutineers were deluded into a belief that they were about to be wrongfully detained in service beyond the term for which they were legally drafted, your committee think not improbable; and those who were thus likely to be deluded the court recommended to the clemency of the commanding general, who, it appears, pardoned them; and that all the rest of the mutineers and deserters were condemned to trivial punishments, neither affecting life nor limb, excepting six of the ringleaders, to wit: David Morrow, a sergeant in Captain Strother's company; Jacob Webb, John Harris, Henry Lewis, David Hunt, and Edward Linsey, privates in Colonel Pipkin's regiment, who were found guilty either of causing or exciting a mutiny, before the 19th of September, 1814, or committing a mutiny, or deserting whilst on post, before the expiration of the 19th of September, 1814, and suffered death in consequence.

By an examination of the trials of these six ringleaders, it will be seen that they were *prominently* guilty either "of exciting and causing a mutiny," or of being the leaders of a mutiny; the first before and the last on the 19th of September, 1814; and that John Harris to whose name such remarkable notoriety has been attached, was engaged some time prior "in causing and exciting a mutiny," by carrying

even a muster-roll of mutiny and desertion throughout the camp to procure the names of those who were willing and would pledge themselves to commit these crimes.

To these facts your committee will now apply the law. The act of 1795 provides "that the militia in the service of the United States shall be governed by the Rules and Articles of War." By the 7th article of the Rules and Articles of War "any officer or soldier who shall begin, excite, or join in any mutiny or sedition in any troop or company in the service of the United States, or in any party, post, detachment, or guard, shall suffer death or such other punishments as by a court-martial shall be inflicted." By the 8th article a similar penalty is awarded where any officer or soldier "does not use his utmost endeavors to suppress a mutiny, or coming to the knowledge of an intended mutiny does not without delay give information thereof to his commanding officer." And by the 20th article the crime of desertion is punishable "by death, or such other punishments as by sentence of a court-martial shall be inflicted."

These facts and these principles furnish a complete vindication of the court, whose painful duty it was to condemn six of their fellow-citizens to a severe and ignominious punishment.

But if all the reasoning of your committee was absurd and valueless, as to the fact that these men were rightfully in service for six months, and it were even admitted that they were drafted but for three months, the proceedings of the court would stand without spot, blame, or legal impeachment. As the crimes for which these unfortunate human beings suffered death were committed before three months of their term of service had expired; and by the 12th section of the act of April 18, 1814, which was then in full force, and which provides "that any commissioned officer, non-commissioned officer, musician, or private of the militia of the United States who shall have committed an offence while in actual service of the United States, may be tried and punished for the same, although his term of service may have expired, in like manner as if he had been actually in the service of the United States;" it is therefore obvious that these men could be legally detained for trial and punishment, even if they could have been considered as in service but for three months.

That they had a fair and impartial trial your committee see no reason to doubt, and the mere fact of their jurors being their own officers, fellow-citizens, and, probably, neighbors, secured the presence of that sympathy which leads to the most merciful interpretation (where it is just to apply it) of the conduct and motives of others.

That General Jackson, commanding in chief in the military division in which these events transpired, properly exercised the power and discretion vested in him by law by approving the proceedings of this court, your committee likewise perceive no reason to doubt. It is true that they were approved on the 22d of January, fourteen days after the victory of the 8th, by which the enemy had been repulsed from the Mississippi. But the general was at this time ignorant of the pacification at Ghent; and moreover must have been apprised that a part of the enemy had gone round, and had concentrated his forces in the neighborhood of Mobile, in that very vicinity where these outrageous acts of insubordination, mutiny, and desertion had taken place. That such a concentration of the enemy's forces was effected is a fact beyond all dispute, as on February 11 Fort Boyer was attacked and captured.

The commanding general must also have known that it was on volunteer or militia drafts the defence of the southern coast would rest; whilst the flagrant mutinies and desertions in the campaign of 1813 of the militia drafts of that year must have admonished him of the necessity of striking a severe yet salutary example in the minds of those who were liable to be misled.

Although the clemency of the general was not invoked by the court, it is true he might have pardoned these victims of their own crimes; but there are occasions when mercy is but another name for weakness, when even a severe and unalterable firmness in the discharge of our duty is the most perfect justice we can render to our country.

The examples of this stern and enlightened justice are scattered throughout the pages of history, not for the abhorrence but the respect of mankind; they are found not only in the most instructive morals which the lessons of antiquity afford, but they illustrate the incomparable services of him who was and ever will be venerated as "the Father of our country."

In conclusion your committee will barely remark that as the acts of 1812 and 1814 expired, the one by its own limitation and the other by the termination of the war, they see nothing in the transaction which it has been their duty to examine, from its origin to its close, which calls for the legislative interference of this House in the shape of any amendment to the Rules and Articles of War, or to the existing laws governing the militia whilst in the service of the United States.

[The following are the documents transmitted to the House of Representatives by the Secretary of War, in answer to the resolution of the House of January 16, 1828, on the subject of the court-martial held at Mobile; which were, on February 1, 1828, referred to the Committee on Military Affairs and ordered to be printed; and, on February 11, ordered, when printed, to be appended to the report of the said committee thereon:]

DEPARTMENT OF WAR, *January 25, 1828.*

Sir: In obedience to the resolution of the House of Representatives of the 16th instant, directing the Secretary of War to furnish that House "with a copy of the proceedings of a court-martial which commenced its sittings at or near Mobile on the 5th day of December, 1814, for the trial of certain Tennessee militiamen, together with a copy of all the orders for the organization of said court, as well as those subsequently issued in relation to its decisions, and also to furnish copies of all papers, letters, and documents relating to said court-martial; copies of all orders, general or special, made or issued by the President of the United States or by the Secretary of War concerning or relating to the length of service of the detachment of the Tennessee militia detailed under the order of the governor of said State, issued on the 20th day of May, 1814, and afterwards placed under the immediate command of Lieutenant Colonel Philip Pipkin; also copies of such order, and of the muster and pay-rolls of said militiamen, which may be on file in the Department of War; and to furnish copies of any orders of the President or Secretary of War, by which, in the exercise of the discretion vested in the President by the 8th section of the act of April 18, 1814, the term of service of the Tennessee militia may have been extended beyond three months; also copies of two letters from the Secretary of War to Governor Blount, dated January 11 and 31, 1814; and also to furnish copies of any correspondence in the War Department between the President or Secretary of War and the governor of Tennessee, during the late war, on the subject of the time which the drafted militia of said State should be required to serve in the armies of the United States"—I communicate the enclosed documents.

From the reports of the Adjutant General and the chief clerk of this department, no other document within the scope of the resolution, except those transmitted, can be found in this department.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives.*

---

*Certificate of the Chief Clerk of the Department of War.*

DEPARTMENT OF WAR, *January 24, 1828.*

I certify that I have, by direction of the Secretary of War, carefully examined the records of this department, and that the accompanying papers, numbered from 1 to 12, are true copies of all the correspondence in the War Department between the President or Secretary of War and the governor of Tennessee, during the late war, on the subject of the time for which the drafted militia of said State should serve in the armies of the United States; and I further certify that it does not appear from the records of this department that any application was made by the governor of Tennessee to the War Department on the subject of the length of service of the detachment of the Tennessee militia detailed under the orders of the governor of that State issued on the 20th day of May, 1814, and afterwards placed under the command of Lieutenant Colonel Philip Pipkin, or that any orders, general or special, were made or issued by the President of the United States or by the Secretary of War concerning or relating to the length of service of that detachment.

CHAS. J. NOURSE, *Chief Clerk.*

---

No. 6.

*Willie Blount to the Secretary of War.*

NASHVILLE, *December 10, 1813.*

SIR: The force from this State called into service to act against the hostile Creeks is composed in part of United States volunteers enrolled under the acts of Congress, of the militia detached under a requisition from the War Department, and in part of volunteers who, being best armed, turned out, upon the pressing emergency, to repel an approaching invasion of this State and the Mississippi Territory. The first named think that their term of service expires (as I have before advised you) on this day. The second, I understand, are of opinion that their term of service will expire at the end of three months from their entrance into service; that time being considered, by the militia law of this State passed prior to the act of Congress under which the detachment was made, as a tour of duty. The third description, I have reason to believe, consider that they ought [not] to be expected to serve longer than a three months' tour from their entrance into the service, if that long. When these troops were called into service the term they were expected to serve was not mentioned in the instructions I received from the War Department, or in the act of the general assembly of this State under which a part of the force was called out. Neither was it mentioned in my order calling them out; I not having been advised of the most acceptable term to the government, and knowing no other limitation to their service than such as was provided for by acts of Congress, unless sooner discharged by order of the President.

I believe the principal reason why those troops, in part, feel a desire to be discharged on the 10th instant is, that the volunteers think that they should not be compelled to serve longer than one year from the time they were called into service, as they have held themselves ready to act at the call of government since December 10, 1812. This has occasioned much uneasiness and embarrassment at camp. The balance probably are influenced by their recollection of a tour of duty under the provisions of the militia law of this State, and by their want of clothing, &c., for a longer term of service; and another argument may be, that the circumstances under which they were called (to repel an approaching invasion in part) did not admit of delay in their making the necessary preparation for a tour of six months, as the act of Congress respecting detached militia requires, unless sooner discharged by order of the President; in other words, they had not time to prepare. Their promptitude promoted the service: their prompt attention to the call of government, and the important services they have rendered in the field during the short term they have been in service, teaches the belief that they cannot be actuated, in their willingness to return, for any other reasons than the above-mentioned. These facts and opinions are stated for the information of government, with whom alone it rests to determine how long they shall serve, to order their discharge, and likewise to order, in the event of their discharge, how their places are to be supplied. It is presumed that the object of the campaign is not yet effected, and it may not be for some time to come, with best exertions.

Under these circumstances, and from a desire felt here to promote the good of the service, it would be acceptable to the men in service to be informed how long they are expected to serve; and if they are to be discharged, by whose order, and how their places are to be supplied. Information on these points is respectfully solicited, believing that the good of the service and the situation of this frontier require it. I am requested to make these inquiries.

I have the honor, &c.

WILLIE BLOUNT.

HON. SECRETARY OF WAR.

No. 7.

*Governor Blount to the Secretary of War.*

NASHVILLE, December 24, 1813.

SIR: I have the honor to enclose to you the copy of a letter from Major General John Cocke, in service, to me, dated November 27, with its enclosure, just received by mail. It affords an additional proof of the gallant conduct of our troops.

Also the copy of a letter written by me to Colonel William Carroll, of the 7th instant, the better to promote the public service. General Jackson had just informed me that the United States volunteer infantry then with him, believing that their term of service would expire on the 10th instant, expected to be, and insisted on being, discharged on that day; and if discharged then, or if they left camp, it would weaken his force ten or twelve hundred; and that he, the better to promote the service, had thought it advisable and necessary to send in Colonel Carroll for an equal number of men to supply their places. I was not authorized by any instructions received from the War Department, or otherwise, to order the aid required; but knowing the necessity, if these volunteers should be discharged or leave camp at that time, for the general's having their places supplied, I wrote that letter to Colonel Carroll, who has since informed me that he should, in a few days, assemble and march about seven or eight hundred volunteers to the general's relief. I trust, sir, that this course, taken with a view to promote the good of the service, will meet the approbation of government; and that those men will be received into the service, and that compensation will be made them for their services. Many highly respectable men among them have enrolled themselves as privates; all are entitled to credit for their patriotism. The commanding officers of companies probably told their men that they would be paid. Also the copy of a letter from me to Major General Jackson, of the 22d instant, in answer to his, just then received. He informed me that the United States volunteer infantry were on their way from his camp to this place, to be dismissed or discharged by me, if I was authorized to do so, or to await the order of government therefor, as he was not authorized to discharge them. He thought it most advisable, for public good, to take that course, as they insisted that they had served their tour. He acknowledges that their services have been important; that he feels a lively interest in their welfare, and hopes, under all circumstances, that it may comport with the views of government to order their discharge in a manner honorable to the volunteers. My letter to you of the 10th instant, and one of prior date, will make known to you their ground of expectation for their discharge; and although I feel great delicacy in offering an opinion to you, sir, on a subject I am aware I have no right to express an opinion on—not being authorized to interfere with troops in the service of the United States, or with what relates to their term of service or discharge—yet my respect for those volunteers, for their services, and my belief that they honestly consider themselves entitled to an honorable discharge, from their impression that they have served as long as they were bound to serve, and a belief that such a step would promote the good of the service, I am induced respectfully to say, that I hope that government, who alone have the power, will order them to be honorably discharged, and compensated for their services, which have been acknowledged as important, not being myself authorized to discharge them, as you know I cannot do it. The general, from a sense of his duty as an officer, used his exertions to induce the volunteers to remain in service until the will of government should be known as to their term of service.

General Jackson also informs me that as the militia and volunteers who were ordered out under his and General Cocke's command, upon the present campaign, are impressed with a belief that they should not be required or expected to serve longer than three months from their entrance into service, many of whom having served that long have gone home, he fears that his force will be in a few days reduced to a very small number, with whom, however, he proposes to stay at Fort Strother, or Coosa, until reinforced by drafted men from this State—which draft there is no instructions from the proper authority to cause to be made; hence, I wrote him the letter now enclosed of the 22d instant.

I further understand that the term of service of the Georgia troops, and of the volunteers commanded by General Claiborne below, is expected shortly to expire. I presume that the objects of the campaign are not yet accomplished, and that owing to the short time the present force has to serve, these objects cannot be effected by them. I beg leave, very respectfully, to say that the present aspect of affairs in this section of the Union teaches the belief that government should keep up an imposing force in this quarter. Arms, camp equipage, &c., necessary for the supply of the militia who may be called into service from this quarter is much wanted. Such troops as General Flournoy may call for, I fear could not well march without such supplies being afforded by government in any reasonable time so as to act with effect. Those militia who were in service under Generals Jackson and Cocke, on whom the government relied to fill such requisitions as General Flournoy might make, you will discover by the foregoing information, given me by General Jackson, consider that they have, and shortly will have, performed their tour of duty. General Flournoy has not as yet made a requisition.

I have the honor to be, very respectfully, your obedient servant,

WILLIE BLOUNT.

HON. JOHN ARMSTRONG, *Secretary of War.**Governor Blount to General A. Jackson.*

[Enclosed in letter to the Secretary of War, of December 24, 1813.]

NASHVILLE, December 22, 1813.

DEAR SIR: Since writing you fully of this date, I have received by Major David Smith your very interesting letter, replete with patriotic sentiments, dated the 15th instant. You will see by my letter of the 10th to the Secretary of War how I am placed with respect to instructions, which, as it relates to the good of the service and a most righteous cause, in support of which you are most laudably and zealously engaged, I much regret. The unfortunate construction given by the troops so generally

respecting their term of service, at this very interesting crisis in public affairs in this section of the Union, is to be lamented; but since it is the most general, and likely to become almost the universal, construction in camp, and since there is no authority vested here that can be interposed to give a counter current of opinion, with the prospect of effecting any permanent good to the service or to the cause you are engaged in, and as it is likely that my letter of the 10th instant will produce new orders for a term of service yet to commence, which, under all circumstances, would be most judicious in government to give, the better to effect the objects of the campaign, more especially as there is reason to believe that a British fleet has arrived at Pensacola, I cannot doubt but that the government will shortly give new instructions to have a new force organized to effect the objects of the campaign, and to oppose the British; and that the President will be satisfied to consider that the three months' tour performed by your and by General Cocks' detachments, with so much good to the service and with so much credit to yourselves, may terminate the present campaign. I can think of no better plan to pursue so as to keep up the spirits of all; for when once militia, or any other troops, take it into their heads that they have served their tour of duty it is next to impossible to convince them that to serve longer would be either just or laudable; and to attempt to keep up a force by voluntary enrolment, without the authority of government, would, as I fear, be a vain attempt, notwithstanding it would be highly laudable at this time, if it were practicable. Patching up an army that way would effect no permanent good. I am not at liberty, as an executive officer, to advise you, who hold a command in the service of the United States. I am incapable of willingly saying or doing anything to injure the service, or that would injuriously affect the reputation of deserving men, or the standing of an able and patriotic hero and general; but, as a friend to my government, most ardently desirous that every step taken in this quarter may promote the good of the service, and the standing of those who deserve well of their country, I do not see what important good can grow out of your continuing at an advanced post, in an enemy's country, with a handful of brave men. Would it not, under all circumstances, be most likely to be attended with good consequences for you to return to the frontier of Tennessee, and, with your patriotic force, defend our frontier, where provision can be more readily afforded on better terms to government, bringing with you your baggage and supplies; and there, on the frontier, await the order of government, or until I can be authorized to reinforce you or to call out a new force? At this time I really do not feel authorized to order a draft, or I would, with the greatest of all pleasures I could feel, do it. Were I to attempt it in an unauthorized way, it would injure, as I think, the public service, which I would rather die than to do. I could not positively assure the men that they would be paid.

I send you a copy of the President's message, and am gratified to see the handsome terms he uses in speaking of your and of General Coffee's battles. He seems to mean something about Pensacola, and, to effect his object best, a new force should certainly be organized. Many who are now and have been on the campaign would go again on that business, if they are pleased with the President's decision respecting their term of service under the late orders. I shall, from what I have said about the propriety of your return to the Tennessee frontier, feel bound to send a copy of this to the War Department for the information of government, and by way of apology for offering such an opinion to an officer in the service of the United States.

I am, with highest respect and most sincere regard, your friend,

WILLIE BLOUNT.

Major General ANDREW JACKSON, *United States Service, Creek Nation.*

No. 1.

*The Secretary of War to Governor Blount.*

WAR DEPARTMENT, *January 3, 1814.*

SIR: Your excellency's letter of the 10th ultimo has been received. It is thought most advisable, under all circumstances, that the construction given to their engagements by the organized volunteers of 1812 be admitted. In no other case, however, have volunteers of the same description refused to make good three hundred and sixty-five days' actual service.

The militia may be considered as having been called out under the law of 1795, which limits the service to three months. The President is the more disposed to make this decision, as the State law provides that a period of three months shall be deemed a tour of duty, and as the spirit and patriotism of Tennessee leaves no doubt but that a succession of corps competent to the objects of government will be regularly provided.

Your excellency has been informed that Mr. McGhee, the contractor, was supplied with funds to meet the requisitions for provisions, and his receipt for money, which you furnished for his accommodation, is herewith returned. It was distinctly stated by him that your excellency would be paid out of the advance which he received while at this place.

J. ARMSTRONG.

Governor BLOUNT, *of Tennessee.*

No. 8.

*Governor Blount to the Secretary of War.*

NASHVILLE, *January 5, 1814.*

SIR: I have the honor to transmit, for your information and sanction, the copy of my order of the 3d instant for calling out two thousand five hundred men from the second division of Tennessee militia to reinforce Major General A. Jackson, acting under command of Major General Pinckney, against the hostile Creeks. The troops heretofore ordered out from this State on that expedition having performed a three months' tour, and thereby having, in their opinion, done their duty, and (there being here no instructions to the contrary) having mostly returned to their homes, is a reason why my order was given, and from a sense of duty arising from my belief of the actual necessity of keeping up an imposing force in this quarter for the safety of this frontier, and to meet the just expectations of the government in relation to an effective force being in the field to effect the objects of the campaign ordered against the Creeks. The tour of

duty mentioned is most congenial to the feelings and expectations of militia; hence, the better to promote the good of the service, that term was mentioned, together with the hope that in that time the campaign would be over. The idea of a longer term to militia, who, I believe, are all alive to a sense of duty, and anxious for a vigorous and effectual prosecution of the campaign to a final accomplishment of the objects of the government, is disgusting; and if required of them to perform a longer tour, their disappointment might lead to great evils, which it is very desirable to avoid. I entertain a hope that those troops who have been in service, and the few that now remain in service, will be, by the order of the President, honorably discharged, and compensated for their services, which have been very important. The duty they had to perform, in part to open roads and to build garrisons, was very arduous and fatiguing.

General Jackson informed me some time since that he had ordered General Cocke to return to the first division of militia in this State and fill up his quota, and to bring them into the field without delay. I have heard that General Cocke has issued his orders for two thousand five hundred men; and on the 3d instant I wrote him the letter, a copy of which is enclosed, which I hope and trust will meet your approbation, as the best course I could, under all circumstances, take to promote the good of the service.

My want of more distinct and timely instructions from government of their views, &c., in relation to plans of operation in this quarter, leaves me much to conjecture, and is very embarrassing. My certain knowledge, however, that in all I do I am actuated by the single desire to promote the objects of the government and the better to secure this frontier, emboldens me to hope that my conduct may meet with the approbation of the President, and that the objects of government and the security of this frontier may be effected in an acceptable manner and for the general good. The want of active funds to effect the above objects on the best terms is sensibly felt here. There is also a great want of arms in proportion to the militia, who would, if supplied, be very willing to use them in execution of the orders of government. I indulge the hope that these causes of embarrassment will shortly be removed through your able arrangements. I feel confident that the proper zeal is universally felt throughout this State to aid the government in prosecuting their important objects.

I have the honor to be, very respectfully, your obedient servant,

WILLIE BLOUNT

Hon. JOHN ARMSTRONG, *Secretary of War.*

*Governor Blount to General Cocke.*

[Enclosed in letter to Secretary of War, January 5, 1814.]

NASHVILLE, *January 3, 1814.*

SIR: I am informed by Major General Jackson that he has some time since ordered that you should return to the first division and fill up your quota of men. I have also incidentally heard that you had issued the necessary orders therefor some days ago. General Jackson requested me to inform you whether his order relative thereto met my approbation. It does most fully. It is important to the public interests that you should use the greatest exertions in getting men into the field. Had I known prior to the issuance of your orders, I would have issued one on which yours could have been predicated; but not knowing your orders, were I now to issue one it might probably vary somewhat from yours, and thereby might create confusion in the prompt execution, which would be regretted; therefore, I omit to forward an order to you, but, relying confidently on what you may do promoting the service, I approve your proceeding. Of this date I have issued an order for raising in the second division two thousand five hundred men to reinforce General Jackson, a copy of which I shall transmit to the War Department. You will forward a copy of your orders to the same department, and also a copy to me. The tour of the militia called out from the second division will be for three months' actual service, if, in the opinion of the President, the public good should require such term of service.

I am, respectfully, your obedient servant,

WILLIE BLOUNT.

Major General JOHN COCKE, *First Division of Tennessee Militia.*

*Governor Blount to the eldest brigadier general of the second division of Tennessee militia.*

[Enclosed in letter to Secretary of War, January 5, 1814.]

NASHVILLE, *January 3, 1814.*

SIR: You will without delay cause two thousand five hundred of the militia of the second division, officers included, next for duty, to be detached, organized, armed, and equipped, as the act of Congress respecting detached militia, passed the 10th day of April, 1812, requires, for a tour of three months' actual service of the United States against the hostile Creek Indians, to commence from the time of their arrival at the place of rendezvous, if, in the opinion of the President of the United States, the public good should require such length of service.

The detachment will be composed of the organized militia infantry, volunteer riflemen, and volunteer cavalry, who may act as mounted infantry, as recognized by the laws of the State to be organized corps. And they will be, as nearly, as may be found to be practicable, detached, &c., in the following proportions of each, to wit: one-tenth volunteer militia riflemen, one-twentieth volunteer militia cavalry, and the residue militia infantry, which proportion is agreeable to the requisition from the War Department respecting detached militia. They will be put under the proper officers next for duty. They will be required to rendezvous in the vicinity of Fayetteville on the 28th instant, and will be marched therefrom, under the command of a brigadier general next for duty, to reinforce Major General Jackson, now in service, under the command of Major General Thomas Pinckney, who has recently advised me of his expectation of force from this State, and that he had ordered the contractor to furnish three months' supplies of provisions at the proper places of deposit.

You will give the necessary notice to Colonel Robert Hays, mustermaster or inspector, to W. B. Lewis, acting deputy quartermaster, to Messrs. Read and Washington, contractors' agents at this place, and Colonel Le Roy Pope, of Huntsville, contractor's agent there, for the necessary supplies.

Indispensable necessity for immediate forces in the field, and the good and safety of our frontier, require that an imposing force should be kept up in this quarter, and that the most prompt execution of this order should be observed. The patriotic exertions of the militia and of all other citizens are most confidently relied on to aid the public service. Tennesseans have done much by their valor, but much remains to be done to effect the objects of government in this campaign in a desirable manner, and as is contemplated by the general government for the general good, and for the immediate and special benefit of this State. Let it be the pleasure of Tennesseans, as it ever has been, to aid in the accomplishment of the views of the government of our choice, which is found to be actively engaged in serving and protecting us against the rude attacks of savages who have heretofore drenched our frontier with the blood of innocent women and children. Now is the accepted time; act all, act promptly and vigorously. Such conduct will soon put an end to the campaign against the enemies of our peace, and will secure to Tennesseans the important benefits which they have for years sought, with the best efforts of government in their favor, in time of peace; and, above all, they should afford to the world an additional unequivocal evidence of their attachment to our government. This the President most confidently relies on.

I am, respectfully, your obedient servant,

WILLIE BLOUNT.

The BRIGADIER GENERAL *eldest in commission,*  
*Second Division of Tennessee Militia, in the absence of the Major General.*

---

No. 2.

*The Secretary of War to Governor Blount.*

WAR DEPARTMENT, *January 11, 1814.*

SIR: You are authorized to supply, by militia drafts, or by volunteers, any deficiency which may arise in the militia division under the command of Major General Jackson, and without referring, on this head, to this department. It may be well that your excellency should consult General Pinckney on such occasions, as he can best judge of the whole number necessary to the attainment of the public objects.

I have the honor, &c.,

J. ARMSTRONG.

His Excellency the GOVERNOR of *Tennessee.*

---

No. 3.

*The Secretary of War to Governor Blount.*

WAR DEPARTMENT, *January 31, 1814.*

I have had the honor to receive your excellency's letter of the 5th instant.

My letter of the 11th will have anticipated your inquiries relative to further detachments of militia.

The attention of the paymaster of the army will be particularly directed to the payment of the troops who have been in service from Tennessee.

J. ARMSTRONG.

His Excellency the GOVERNOR of *Tennessee.*

---

No. 9.

*Governor Blount to the Secretary of War.*

NASHVILLE, *March 25, 1814.*

SIR: Yours of the 3d of January has been received some time since, and copies of it forwarded to Generals Pinckney, Jackson, and Hall, for their information of your willingness that the troops therein alluded to might be discharged; and I (not being a military man) have asked of Generals Pinckney and Jackson, in respectful terms, whether it is not proper (as I do not know) for one of them to order that those troops be discharged? I have not heard from either in reply as yet. I have seen in a Nashville paper very lately the publication of an extract from a letter written some time ago by Mr. G. W. Campbell to some friend, which states that the Secretary of War had informed him that he, the Secretary of War, had instructed the governor of Tennessee to discharge those troops alluded to in yours of the 3d January. I have only to remark that such order for their discharge has not been received by me, and that I do not view your letter of the 3d January as an instruction to me to discharge them, having thought that you would direct your order for their discharge either to General Pinckney or to General Jackson, and perhaps most properly to the latter, as best knowing the terms of service performed by the different corps which have, under all circumstances, from time to time gone out under his command. It has appeared to me that a State executive has not a right, short of positive instructions from the War Department, to order the discharge of troops acting in the service of the United States. I have noticed in the papers that the governor of Vermont once ordered the discharge of militia in the service of the United States, and that his order was not attended to.

I have the honor to be, very respectfully, your obedient servant,

WILLIE BLOUNT.

Hon. JOHN ARMSTRONG, *Secretary of War*

No. 4.

*The Secretary of War to Governor Blount.*

WAR DEPARTMENT, April 15, 1814.

SIR: Your excellency's letter of March 23 has been received. The President is pleased to authorize your excellency to discharge from the service of the United States the militia alluded to, if they have not already discharged by General Pinckney.

My letter of the 3d of January last was intended to operate as an instruction on this subject; it contained the *decision* of the *President* in the case, and was addressed to your excellency as the functionary having the best means of making it known to the parties concerned.

J. ARMSTRONG.

His Excellency the GOVERNOR of *Tennessee*.

No. 5.

*The Secretary of War to Governor Blount.*

[Circular.]

WAR DEPARTMENT, July 4, 1814.

SIR: The late pacification in Europe offers to the enemy a large disposable force, both naval and military, and with it the means of giving to the war here a character of new and increased activity and extent.

Without knowing with certainty that such will be its application, and still less that any particular point or points will become objects of attack, the President has deemed it advisable, as a measure of precaution, to strengthen ourselves on the line of the Atlantic, and, as the principal means of doing this will be found in the militia, to invite the executives of certain States to organize and hold in readiness for immediate service a corps of ninety-three thousand five hundred men, under the laws of 28th of February, 1795, and 18th of April, 1814.

The enclosed detail will show your excellency what, under this requisition, will be the quota of Tennessee.

As far as volunteer uniform companies can be found, they will be preferred.

The expediency of guarding (as well in the designations of the militia as of their places of rendezvous) the points, the importance or exposure of which will be most likely to attract the views of the enemy, need but be suggested.

A report of the organization of your quota, when completed, and of its place or places of rendezvous, will be acceptable.

I have the honor, &amp;c.,

J. ARMSTRONG.

His Excellency the GOVERNOR of *Tennessee*.

*Memorandum.*—The quota assigned to Tennessee was 2,500 infantry, forming two regiments and one battalion, to be commanded by a brigadier general, with one assistant deputy quartermaster general and one assistant adjutant general as his staff.

No. 10.

*Governor Blount to the Secretary of War.*

NASHVILLE, August 4, 1814.

SIR: Orders are issued by the executive of Tennessee for calling out two thousand five hundred of the militia of the State, agreeably to a requisition from the War Department of the 4th of July last. They are required to rendezvous on the 20th September. After rendezvous and organization, I respectfully ask whether they will be continued at rendezvous or be ordered to march; and if the latter, to what point or points?

I have, &amp;c.,

WILLIE BLOUNT.

The Hon. SECRETARY OF WAR, &amp;c.

No. 11.

*Governor Blount to the Secretary of War.*

[Extract.]

NASHVILLE, October 19, 1814.

SIR: I have also the honor to transmit to you copies of an address of September 12, 1814, from Colonel Butler, General Jackson's adjutant general, to Tennesseans, to volunteer their services under General Coffee, and of General Coffee's letter to me of subsequent date, to wit, October 4, showing the number who have actually marched with him to General Jackson's headquarters; upon your receipt of

which information, probably, you may be of opinion that it may be unnecessary now to order out even the 2,500 militia required by your requisition of the 25th September, which number will, however, be called out by me under that requisition as soon as I hear from Governor Shelby on the subject of yours to him and to me of the 3d instant, unless I shall be otherwise instructed by you. This is mentioned with the view of giving to you all the information possessed here of troops in service from this State, (as you have lately come into the War Department;) and, in addition to the above mentioned, there is in service from this State 1,000 men at the posts in the Creek country. They were called out for six months, and have nearly three months yet to serve; but, independent of them, there are now 2,500 militia of this State in service under a requisition from the War Department of the 4th July, which, with those under General Coffee, above mentioned, make upwards of 5,000 men who have just entered service. This number is a major general's command, and a valuable officer of that rank, not in service, General Carroll, of the 2d division of Tennessee militia, now here, and who would be of great use to General Jackson, whose confidence he possesses, is anxious to enter that service, and would, if it meets your approbation, start at a moment's warning to General Jackson's headquarters to take command under him. Your orders will be attended.

I have, &c.,

WILLIE BLOUNT.

The Hon. SECRETARY OF WAR, &c.

---

No. 12.

*Governor Blount to the Secretary of War.*

[Extract.]

NASHVILLE, November 22, 1814.

SIR: I transmit to you copies of letters from Colonel Meigs to me of the 4th instant, and my answer to him of the 14th, respecting keeping up the garrison at Highwassee by militia, which I trust will meet your approbation, and that you will order that those who have served and those who may hereafter serve at that post shall be paid for their services.

I have, &c.,

WILLIE BLOUNT.

The Hon. SECRETARY OF WAR, &c.

---

*Governor Blount to Colonel Meigs.*

[Extract.]

NASHVILLE, November 14, 1814.

SIR: As the same necessity now exists for keeping the garrison at Highwassee guarded by militia as formerly, I wish a force equal to that heretofore kept there for that object to be kept up, and to be taken from the neighboring militia, to be called into service in future and mustered as heretofore under your requisition, which you are hereby authorized to make, to be made upon General Coulter, or, in his absence, the commanding officer of the 8th brigade, requiring him to advise the acting commanding officer of the 1st division (who at present is General White, the senior brigadier) of all the orders he may issue under your requisitions; stating what regiment or regiments in said brigade he calls on to fill it; and it will be best to call on the regiments of said brigade alternately for the full complement of men to fill each requisition—the term of service to be for six months, unless sooner discharged by order of the President. Such term of service will be in unison with all other calls on the militia for United States service, and of course, when such tour is performed, will entitle those who may have served to a credit for a tour of duty, which would prevent much confusion among the militia on the subject of tours of duty; and you will please give to General Coulter a copy of this letter, and request him to consider it as my order to him, to the full intent stated therein.

I am, &c.,

WILLIE BLOUNT.

Colonel MEIGS, *Highwassee Garrison.*

---

REPORT OF THE ADJUTANT GENERAL.

ADJUTANT GENERAL'S OFFICE, *Washington, January 24, 1828.*

SIR: Agreeably to your instructions I respectfully submit a copy of the proceedings of the general court-martial which convened at Mobile on the 5th of December, 1814, and of which Lieutenant Colonel Perkins, of militia, was president; a copy of the orders for the organization of the court; also a copy of the orders subsequently issued in relation to its decisions.

The files of this office furnish no other general or special order or letter touching this subject, or relating to the length of service of Tennessee militia.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

The SECRETARY OF WAR.

MOBILE, December 5, 1814.

Proceedings of a general court-martial held at Mobile by virtue of the following orders:

## AFTER GENERAL ORDERS.

HEADQUARTERS 7TH MILITARY DISTRICT,  
*Adjutant General's Office, November 21, 1814.*

A general court-martial, to consist of five members and two supernumeraries, will convene at Mobile at such time as Lieutenant Colonel Arbuckle shall direct, for the trial of such militia prisoners as may be brought before it. Colonel P. Perkins is hereby appointed president of the court, and Lieutenant W. L. Robeson, of the 3d regiment of infantry, will act as judge advocate. Colonel Pipkin, of the 1st regiment West Tennessee militia, will detail the members from the State troops at and near Fort Montgomery; order on all the witnesses necessary for the trial of the prisoners of his regiment at this place; also furnish specific charges against them; and, lastly, will notify Lieutenant Colonel Arbuckle of the probable time they will reach this point, to enable him to regulate the hour of sitting.

By command.

ROB. BUTLER, *Adjutant General.*

## ORDERS.

The general court-martial, of which Colonel Perkins has been appointed president, will convene at 11 o'clock on the 5th instant, at such quarters as the assistant deputy quartermaster general may assign for that purpose.

M. ARBUCKLE, *Lieutenant Colonel Commanding.*

The court met pursuant to the preceding order.

Present: Lieutenant Colonel P. Perkins, president.

*Members.*—Major Wm. C. Smart, Captain James Blackmore, Captain Wm. McKay, Lieutenant James Boyd.

*Supernumeraries.*—Lieutenant Daniel Mitchell, Ensign Thos. H. Williams.

The court having been regularly constituted, and no persons appearing before them for trial, adjourned until 10 o'clock to-morrow.

The court met pursuant to adjournment. Present: the president and members, and having been qualified in presence of the accused, who being previously asked if they had any objection to any of the members, and having answered in the negative, proceeded to the trial of *Captain John Strother*, 1st regiment West Tennessee militia, arraigned on the following charges and specifications:

CHARGE 1ST.—*Exciting to mutiny.*

*Specification.*—In this: that on the march between Fort Deposit and Fort Jackson, between the 4th of July and 31st of the same, he stated in presence of some of the troops there was no law to compel them to serve longer than *three months*, and unless he was shown a better law than he had seen he would march his company home at the end of that time.

CHARGE 2D.—*Conniving to mutiny.*

*Specification.*—In this: suffering those under his command to go unreported to the commanding officer, contrary to the Rules and Articles of War in such case made and provided, and in using words tending to lead men to the act of mutiny: that if he was the lieutenants he would march the company under his command home on the 20th September, 1814.

CHARGE 3D.—*Disobedience of orders.*

*Specification.*—In this: not complying with the regimental *order* bearing date the 23d August, 1814, which required the officers of all grades, and privates, to use their best endeavor to suppress any mutiny or intended mutiny, under the pains and penalties of a violation of the law of the United States.

To which charges and specifications he plead not guilty.

*Lieutenant Thomas Horne*, a witness in behalf of the prosecution, being sworn, states that the accused observed to him, but a few days before the mutiny broke out at Fort Jackson, that he would be angry enough to shoot any of his men who would pretend to go home previous to the 20th of December, and had previously directed his men to discard the idea of going home until he went, which would be at the expiration of six months.

*Question by the prosecutor.*—At what time did you first hear Captain Strother dissuade his men from going home?

*Answer.*—I disremember, but I believe it was in September.

*Ensign Thomas Simpson*, a witness in behalf of the prosecution, being sworn, states that he frequently heard that Captain Strother should have said, that if he was a lieutenant or ensign he would march the men home; upon which he applied to him to know whether or not he had used such an expression, when the captain informed him that he had not, and advised him to stay and do his duty until he and the captain would go, which would be at the expiration of six months. And at another time he heard the captain tell some of his men that if they went it would be at the risk of their lives, being shot, and perhaps have cause to regret such an act as long as they lived.

*Question by the court.* Did you ever hear Captain Strother use any threats towards the men who were talking about going home; say that he would put them under guard or report them to the commanding officer?

*Answer.* I do not know that I did further than stated heretofore.

*Question by the prosecutor.* How many days before the men actually went off did you hear this inquiry of Captain Strother?

*Answer.* I do not recollect the precise time, but believe it to have been six or eight days previous.

*John S. Smith*, file-major, a witness in behalf of the prosecution, being sworn, states that he never heard any language used by the captain to his men but to continue in service until the expiration of their six months, and that it was highly improper to be breaking off, and that they would be punished if they went sooner.

*Sergeant John D. Smith*, a witness in behalf of the prosecution, being sworn, states that he formerly belonged to Captain Smith's and was attached to Captain Strother's company at Fort Williams; marched under his command to Fort Jackson and never heard his captain say one word on the subject mentioned in the charges but once. When at Fort Jackson, at the time the meeting assumed a pretty high tone, he observed: "Boys, hush mutinizing; stay until I go home, which will be at the expiration of six months."

*David Morrow*, sergeant of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that on the march between Forts Jackson and Deposit, his captain asked him how long he expected to stay in service, to which he replied six months, as they were mustered in for that time; when his captain observed that unless he was shown a better law than he had yet seen, he should not serve longer than three months; and on the 19th September told him that if he was a lieutenant or ensign he would march his company home at the end of three months, as there was no law to keep them any longer.

*Question by the accused.* Do you know whether or not I called for a guard one evening to prevent the bake-shop being pulled down, and do you know the reason that a guard could not be had?

*Answer.* Yes; you called for a guard for that purpose, and I believe the men were apprehensive of danger.

*Question.* Was it not mentioned as useless to try to get a guard, and did I not say I could get my own guard?

*Answer.* You stated that you could get your own guard, and I think it was myself who observed that it was useless.

*Question.* Was there not a verbal order from the colonel to stop the guard, perhaps some good men might be killed?

*Answer.* I think there was such an order, but I am not certain.

*Question.* At the time you asked me about going home, did I not say you had better stay?

*Answer.* I do not recollect your advising me to stay.

*Question by the prosecutor.* What day of the month of September was the bake-shop broken, and was not Captain Strother officer of the day at the time?

*Answer.* The bake-shop was broken some time in the month of September previous to the 20th, and I think Captain Strother was officer of the day.

*Question.* What number of men went to the bake-shop, and did they not force the camp guard?

*Answer.* Well on to one hundred, and the sentinel informed me that they came with their guns charged and he was compelled to give way and let them pass.

*Jonathan Smith*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he knows nothing of the matter.

*Question by the court.* Did you ever see Captain Strother make any effort to stop the progress of the mutiny?

*Answer.* I do not know that I did.

*Question by the prosecutor.* Did you ever hear Captain Strother say that there was no law to compel them to serve longer than three months?

*Answer.* I never heard him say any such thing.

*Question by the accused.* Did you not hear me try to parade the guard to stop the affair at the bake-house?

*Answer.* I recollect your trying to stop it and calling the roll to see who was absent.

*Rowland Vick*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he knows nothing of the matter.

*Question by the court.* Did you ever hear Captain Strother try to suppress mutiny?

*Answer.* I recollect when the men paraded one day Captain Strother asked them what they were making such a fuss about, and on being informed, he told them it would be time enough to go home when he went.

*Question by the prosecutor.* Was that the only time you ever heard Captain Strother say anything on the subject?

*Answer.* I remember once more that he informed one of his men he would be shot if he attempted to go.

*Question by the prosecutor.* How many days previous to the men's leaving Fort Jackson was this precautionary language made use of by Captain Strother?

*Answer.* I do not recollect.

*Question by the accused.* Did you not hear me say to the men the evening they were paraded that they had better stay until the expiration of six months and go home with me?

*Answer.* I disremember.

*James Carter*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he knows nothing of the matter.

*Question by the court.* Do you know whether Captain Strother ever used any exertion either to encourage or discourage mutiny?

*Answer.* I heard Captain Strother say to the men that they had best quit such foolish notions and remain until he went home.

*Question by the prosecutor.* Did you ever hear Captain Strother threaten to have men put under arrest who were speaking of going home at the expiration of three months?

*Answer.* I never heard anything of the matter.

*John Harris*, a private in Captain Kilpatrick's company, a witness in behalf of the prosecution, being sworn, states that he never heard Captain Strother make use of any such language as charged, for or against.

*Francis Compury*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that in passing by the captain's tent, he heard some of the men ask Captain Strother

what would be the consequence were they to go home; to which he replied that he had been looking, and could find no law compelling them to stay longer than three months, and that he did not know whether they would be hurt or not.

*Question by the accused.* Do you know how many men there were in my tent; did you see any; was it at my tent, or at the store you heard this language; or did you see me?

*Answer.* As I passed the rear of the tent I could neither see nor tell how many were within, but I heard your voice in the tent.

*Question.* Did I not tell you to stay when baking biscuit?

*Answer.* I did not hear you say so.

*Robert Kelgore*, a private in Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he never heard any language used by Captain Strother on the subject of the mutiny but once, when he heard him state to his men the propriety of staying until he went, which would be time enough.

*William Long*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that Captain Strother came to the men on parade the night previous to their departure from Fort Jackson, and told them it would be time enough to go home when he did.

*Question by the prosecutor.* Was that the only time you ever heard Captain Strother say anything on the subject?

*Answer.* I heard him speak on the subject several times.

The court adjourned until to-morrow, 10 o'clock.

The court met pursuant to adjournment, (present, the president and members,) and proceeded to the further examination of the witnesses.

*Sergeant Elijah Cheek*, of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he heard his captain at several times tell the men, when speaking about departing from Fort Jackson, to stay until he went, which would be time enough; and that he heard Captain Strother say there was no law to compel them to serve longer than six months.

*Anderson S. Britt*, of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he heard Captain Strother say to the men one evening, *on parade*, that it was rumored in camp that they intended going home at the end of three months, and he wished them to use no more language of that nature, but remain until he intended going, which would be in sufficient time; and, further, that this conversation took place about two or three weeks before the men left Fort Jackson.

*John Green*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he never heard any other language used by the accused than to advise his men to continue until he went home, which would undoubtedly be at the end of six months; and, further, that this language was used in presence of his company, after having called them to the centre on parade, the evening after the bake shop was pulled down.

*Moses Age*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he knows nothing of the matter, as he was sick nearly all the time he was at Fort Jackson.

*Colonel P. Pipkin*, a witness in behalf of the defendant, being sworn, states that Captain Strother asked him, perhaps twenty or thirty days previous to the men's going off from Fort Jackson, to show him the law which compelled men to stay in service longer than three months; that he replied it was not in his possession; upon which the captain stated that it was his duty to know it; that the accused never reported to him, as commanding officer, anything relative to the mutiny of his company until the night of the 15th September; when the bake shop was demolished he heard the accused, who was then officer of the day, parading the troops, and believe it to have been his company, to check the violence committed on the bake shop; that he ordered the party not to march against the mutineers, as he conceived them too inconsiderable to effect any good; that he recollects no other attempt made by Captain Strother to quiet the refractory disposition of the men but once, when he heard him ask the men if they had no breeding; that they behaved like a parcel of savages; to let him hear no more of it, until the 20th September, when the mutinous party left Fort Jackson.

*Major Jacob Thomson*, a witness in behalf of the defendant, being sworn, states that he was absent from the regiment the whole time of the affair at Fort Jackson.

*Question by the accused.* Did you ever hear my superior officers say whether or not I was obedient to their orders?

*Answer.* Some time after the mutiny at Fort Jackson I heard a conversation between yourself and Colonel Pipkin, when you asked him if you were not as obedient an officer as any under his command; when he answered in the affirmative, with the exception of your conduct during the mutiny at Fort Jackson, and that he supposed you were not as active in discharge of your duty as might have been expected.

*Lieutenant John T. Cooksey*, a witness, being sworn, states that, during his continuance at Fort Jackson, he never saw anything favorable or unfavorable to his conduct as charged, and that he once heard one of Captain Strother's men say that he had no person but himself to blame for his conduct in leaving the service.

*Major John C. Hicks*, a witness in behalf of the defendant, being sworn, states that, between the 1st and 10th of August, while at Fort Jackson, the accused called at the colonel's tent, and said that he would be glad to see any law which would compel men to stay in service longer than three months; when he got the Rules and Articles of War, and read them himself, and after he had borrowed, and returned them about the 16th, one of his sergeants called to borrow it, and read the law of 10th of April, 1812, on the subject of militia term of service; immediately afterwards there was material alteration in the sergeant's behavior; the sergeant engaged in conversation with some of the men on the same subject, and that he was compelled to order the sergeant to desist using any such mutinous language.

*Question by the defendant.* Was I obedient or not to the orders of my commanding officer?

*Answer.* You always executed orders that were given, with the exception of the order of the 23d August, 1814, relative to which, the colonel, as well as myself, considered you indolent; and some time after the mutiny had assumed a decided aspect, I heard you tell some of your men that they had better not go home on the 20th September; to wait until you went.

*Ensign William Pegram*, a witness in behalf of the defendant, being duly sworn, states that he was at Fort Jackson only a short time, during which he was frequently in company with Captain Strother; that he never heard him say any thing, either directly or indirectly, tending to excite mutiny, and produced

a letter dated Fort Jackson, 7th September, of which he was bearer, from Captain Strother to his brother-in-law at Fort Williams; from which the following is an extract:

"I want you to stay at Fort Williams, if not ordered down here; or at least wait for me at Fayetteville until we are discharged, and try and stop that simple notion the men have of breaking off on the 20th of this month to go home. Give the men in my company my compliments; tell them not to move from there until they are ordered by proper authority."

*Ensign George J. Martin*, a witness in behalf of the defendant, being sworn, states that on the march, or while at Fort Williams, Captain Strother asked him if he ever saw any militia law compelling the men to stay in service for a longer period than three months; in answer to which, he observed he had never seen such a law; and that he was at Fort Jackson about 12th September, when he heard much mutinous language among the soldiers, and received an assurance from one of the captain's men that his officers discountenanced every such procedure.

*Philip Bryant*, a private of Captain Strother's company, a witness on the part of the defendant, being sworn, states that his captain always told him that he was bound to stay six months. Believes he used his best endeavor to suppress mutiny, and that he heard such language from his captain at various times; and some time subsequent to the 10th, he persuaded his men to continue in service until Majors Hicks or Ralston could go to Nashville to procure the law relative to their term of service; and that he heard one of the men of Captain Strother's company say that if he could break the officers the men would be cleared.

Here the evidence ended.

*Captain John Strother* states, in his defence, that he is conscious of his innocence, and willingly submits his case to the decision of the court, and to do equal justice to himself and country.

The court, after mature deliberation on the evidence adduced, find the accused guilty as charged, with the exception of failing to report his men to the commanding officer, and sentenced that he be dismissed the service, as unworthy of holding a commission in the army of the United States.

The court adjourned until to-morrow, 9 o'clock.

The court met pursuant to adjournment, (present, the president and members,) and proceeded to the trial of *Third Lieutenant James McCauley*, 1st regiment, West Tennessee militia, arraigned on the following charges and specifications:

CHARGE 1ST.—*Exciting to mutiny.*

*Specification.*—In this: that, between the 10th and 20th September, 1814, speaking words tending to lead men to the act of mutiny, by saying that the opinion of the United States attorney for the State of Virginia was nothing but newspaper law.

CHARGE 2D.—*Conniving at mutiny.*

*Specification.*—In this: that on the 19th September, 1814, he gave directions to some of the mutinous party to put in his knapsack his proportional part of provisions which had been forcibly taken from the issuing house by them; and further said that he would be with them in a few days, as he had some business to settle which would detain him that length of time

CHARGE 3D.—*Disobedience of orders.*

*Specification.*—In this: not using his endeavor to suppress any mutiny or intended mutiny, as required by said order of 23d August, 1814.

To which charges and specifications he plead not guilty.

*Lieutenant Thomas Horne*, a witness in behalf of the prosecution, being sworn, states that he knows nothing of the matter in point.

*Sergeant John D. Smith*, of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he never saw any exertion made by the accused either to excite or discourage mutiny.

*Jonathan Smith*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that the men frequently collected in front of Lieutenant McCauley's tent to make use of the *black drink* before their departure from Fort Jackson, and that he never knew any attempt made by the accused either to excite or suppress mutiny.

*James Carter*, a private of Captain Strother's company, a witness, being sworn, states that he knows nothing of the matter.

*Rowland Vick*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he recollects no attempt made by the accused either to encourage or discourage mutiny, and further saith not.

*James Gumdral*, a corporal of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he heard the accused say that the opinion of the United States attorney of the State of Virginia was nothing but newspaper law; that the accused asked him, between the 13th and 20th of September, if he had given out the foolish notion of going home; that his answer was in the affirmative, as he disliked the idea of being confined under guard, and he wished to do the thing that was right; when the accused asked him if he did not think it was right to go home, that he replied in the negative, as the colonel discountenanced it, and his orders ought to be obeyed; the accused then told him that the colonel wished to devil them all that he could; at which time the conversation ended, and the same evening they met, and the accused asked him if he had determined on or if he had made up his mind to go; said some would, and if any did, he wanted the company particularly to do so; that the lieutenant was frequently present when the men were using the *black drink* and uttering mutinous language, and knows of no attempt made by the accused to stop the progress of mutiny.

*John Smith*, file-major, a witness in behalf of the prosecution, being sworn, states that several of the men in his presence asked the lieutenant his opinion on the subject of going home, and the only answer he ever heard to such inquiries was that it was not right to go home, but knows of no other exertion by him to suppress mutiny.

*David Morrow*, sergeant of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he heard the accused say that the opinion of the United States attorney of the State of Virginia was nothing but newspaper law; heard him ask some of the men who were dividing provisions taken from the issuing house if they had put any in for him; when he was asked by some of the party

if he would go, he answered that he reckoned so, and directed his proportional part to be put in the bag belonging to some of the mess, and accordingly one and a half panful of flour was placed in it.

*John Harris*, a private of Captain Kilpatrick's company, a witness in behalf of the prosecution, being sworn, states that, some time in the month of September, one of the men asked the accused, in his presence, for permission to purchase one gallon of whiskey to treat the men who were going home on the 20th of the month, and that he smiled and said he would always wish to see men treated in a good cause; some time afterward he went to the accused and asked his opinion about going home, when the accused replied that if he was clear of a commission he would act as others were about to do.

*Colonel P. Pipkin*, a witness in behalf of the defendant being sworn, states that the accused, to his knowledge, never made any attempt either to excite or discourage mutiny, but supposes he did not use his endeavor to suppress mutiny, as required by a regimental order dated 23d August, 1814.

*Question by the accused.* Did I not, some time before the mutineers went off, ask you if those men who remained would not be attached to other companies?

*Answer.* I was asked that question a day or two before they went away by some persons, but disremember who they were.

*Captain George Mebane*, a witness, being sworn in behalf of the defendant, states that his indisposition during the mutiny at Fort Jackson prevented his knowing anything relative to the lieutenant's conduct.

*Lieutenant John T. Cooksey*, a witness in behalf of the defendant, being sworn, states: Knows of no attempt made by the accused either to excite or suppress mutiny.

*Lieutenant James Boyd*, a witness in behalf of the defendant, being sworn, states that he is totally unacquainted with the lieutenant's conduct, but heard the commanding officer express his opinion on the subject and said he thought the accused was not as vigilant as could be expected.

*Ensign Thomas Simpson*, a witness in behalf of the defendant, being sworn, states that he knows of no language made use of by the accused as charged, and no attempt either to excite or suppress mutiny; that he heard the lieutenant say that he did not calculate on going home until he obtained an honorable discharge, which would be between the 20th December and 20th January, 1814.

*Ensign Jesse Gilbert*, a witness in behalf of the defendant, being sworn, states that he was frequently in company with the accused during the mutiny, and never heard him make use of any language as charged, and of no attempt of his either to excite or check the proceedings of the mutinous party.

*Question by the accused.* Did you never hear me say that I was determined to continue in service until I got an honorable discharge?

*Answer.* You mentioned to me that it was your intention to stay until the expiration of the time of service, let others do as they would; and that this observation was made by the accused about eight or ten days previous to the men's departure from Fort Jackson.

*James Shelton*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that he heard the accused several times check the men when using mutinous language, and say that they had best stay; that he and the accused messed together ever since mustered into service; knows of no provision having been drawn from the mutinous party, or any for the purpose of going home; that the accused stated to some of the men, who intended mutinizing, the impropriety of leaving the service, and that the colonel had informed him that, provided they would stay, they should be commanded by their own officers.

*John Benham*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that the accused and himself messed together during the mutiny at Fort Jackson; that the accused frequently checked the men when using mutinous language in his presence; knows of no provision having been received in the mess from the mutinous party; heard the accused say at various times that he did not calculate on going home previous to the 15th January.

*John G. Clark*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that he knows nothing of the matter.

*Robert Bumpuss*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that he knows nothing of the matter contained in the charges.

*Benjamin James*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that the accused told him that he expected to continue in service until the expiration of the time; that, in his presence, he ever persuaded the men to stay at Fort Jackson until discharged, and such language was used by the accused at various times during the mutiny.

*Robert Plant*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that the accused advised him not to leave the service, although all the company should; that he ever showed a disposition to suppress mutiny as far as it came within his view, and heard him threaten to put some of the men under guard who were speaking of going home.

The court adjourned until to-morrow, 9 o'clock.

The court met pursuant to adjournment, (present, the president and members,) and proceeded to business.

*Ensign George J. Martin*, a witness in behalf of the defendant, being sworn, states that he knows nothing of the matter, further than he heard one of the men under the command of the accused say that he had to blame himself alone for his misconduct in leaving the service.

*Philip Bryant*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that the accused directed some of the men in his presence to discontinue the use of the *black drink*, to stay in the service until they were certain the time had expired for which they engaged. He heard some of the mutinous party ask the accused if they were to take him outside the chain to the old encampment at the point of the bayonet, if he would not follow on there? To which he replied, they must use no such threats as that. When one of the party said they would try it anyhow, whereto the accused turned off and left them; some time afterwards returned. Some of the party asked him if they should carry any provisions for him; that the accused answered in the negative, and said, return what you have taken by force from the issuing house; and, as far as came under his view, the accused discountenanced all mutinous proceedings; heard one of the witnesses in behalf of the prosecution say that if the captain and lieutenant could be broke, the men would be acquitted; that he has frequently heard the men ask the lieutenant if he intended going home, and that he always told the men to stay six months, and said that he intended staying as long as the colonel did.

*Lieutenant McCauley* states, in his defence, that he is conscious of his innocence, and cheerfully submits the matter to the decision of the court.

The court, after mature deliberation on the evidence adduced, find the accused guilty as charged, and sentence that he be dismissed the service; have his sword broken over his head, with a total disqualification of ever holding a commission in the army of the United States.

The court having been qualified in presence of the prisoners, who having been previously asked if they had any objections to any of the members, and having answered in the negative, proceeded to the trial of *Jacob Webb*, a private of Captain Strother's company.

CHARGE 1ST.—*Desertion.*

*Specification.*—In this: that, on the night of the 19th September, 1814, he deserted his post while on guard, between the hours of six in the evening and six of the morning of the same month, September, 1814.

CHARGE 2D.—*Mutiny.*

*Specification.*—In this: that, on the morning of the 20th September, 1814, he paraded with the mutinous party, and, at the end of reveille beat, marched off with them, yelling and firing scattering guns, and after arriving within the neighborhood of Fort Strother, between the 20th and 30th September, 1814, he headed the mutinous party of Captain Strother's company.

CHARGE 3D.—*Robbery.*

*Specification.*—That, between Fort Strother and Fort Deposit, he stopped a wagon, and took out flour belonging to the contractor's agents, Messrs. Pope, Braham, and Hickman, in the month of September, between the 20th and 30th of the same.

To which charges and specifications the prisoner plead "Not guilty."

*Lieutenant David Mitchell*, a witness in behalf of the prosecution, being sworn, states that he is totally unacquainted with the matter.

*Lieutenant Thomas Horne*, a witness in behalf of the prosecution, being sworn, states that he was officer of the guard on the 19th September; that the prisoner belonged to his guard, refused to do the duty of a sentinel on post, and did not return, after going to his tent, although ordered to do so, and continued there during the night. On the morning of the 20th September the mutinous party left Fort Jackson; after which, the prisoner was missing, and candidly believes he accompanied them.

*Captain Strother*, a witness in behalf of the prosecution, being sworn, states that he believes the prisoner paraded at reveille as charged, and he is certain that he marched off with the mutinous party.

*John Carroll*, a witness in behalf of the prosecution, being sworn, states that the prisoner was not the man who forcibly took the provisions of the contractor's wagons.

The court adjourned for want of evidence until to-morrow, 9 o'clock.

The court met pursuant to adjournment, (present, the president and members,) and proceeded to the further examination of witnesses.

*Green B. Newson*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that the prisoner deserted his post at Fort Jackson, went off with the mutinous party, and, when in the vicinity of Fort Strother, was elected captain of the party; does not know who robbed the wagons of flour; that the prisoner, as captain, ordered them to interfere with nothing at Fort Strother, and accordingly nothing was touched.

*Samuel H. Burton*, a private of Captain Strother's company, a witness in behalf of the defendant, states that he believes *Webb* was not present when the flour was taken from the wagons.

*Samuel Gibbs*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that the prisoner did march off on the morning of the 20th September with the mutinous party, and believes the prisoner was not concerned in taking the flour from the wagons.

*J. Webb*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that the prisoner took command of the mutinous party of Captain Strother's company at the request of a majority of the men, and, he believes, with the intention of comforting the sick, and preventing violence on the forts.

The prisoner, in his defence, states that he served three months faithfully, and conceived, from the best information he could get, that his term of service had expired; that he was told by both non-commissioned officers and privates that it was nothing but right to go home, and as soon as he discovered his error he returned to his duty.

The court, after mature consideration on the evidence adduced, find the prisoner, *Webb*, guilty of the first and second charges and specifications, and sentence him to receive the punishment of death by shooting.

*David Morrow*, a sergeant of Captain Strother's company, West Tennessee.

CHARGE 1ST.—*Mutiny.*

*Specification.*—In this: that, between the 20th and 30th September, 1814, he carried about a paper to get signers to go home on the 20th of the same; also, on the morning of the 19th September, 1814, he forced the guard at the issuing house, and broke the door, and rolled out several barrels of flour; went to the bullock-pen, shot down several beeves, brought them to camp, there issued the beef and flour among the mutinous party, cooked it, and, on the morning of the 20th September, 1814, at the end of reveille beat, marched off at the head of the mutinous party of Captain Strother's party, yelling and firing his gun.

CHARGE 2D.—*Exciting to mutiny.*

*Specification.*—In this: persuading soldiers to go home on the 20th September, 1814, and not reporting those who were speaking words tending to lead men to the act of mutiny, as required by a regimental order of August 23, 1814.

To which charges and specifications the prisoner plead "Not guilty."

*Stephen Ray*, a sergeant of Captain Mebane's company, a witness in behalf of the prosecution, being sworn, states that he was on fatigue on the night of the 19th September. Some of the party expressed

their dissatisfaction at not having an opportunity of cooking provisions to go home, as well as those in camp; when the prisoner said that any person who intended going home the next morning was a fool for being there at work; accordingly, a great many of the party left their duty and repaired to the camp to cook; and that the prisoner did march off on the morning of the 20th with the mutinous party, yelling and firing their guns.

*Philip Bryant*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he saw the prisoner with a subscription paper, and heard it read, going about to procure subscribers to proceed home on the 20th of September, 1814; saw the prisoner at the issuing house; heard him order another man to break down the door; saw him picking out flour, and having it rolled out, on the 19th of September; that beef was brought into camp on the same day, and the prisoner issued both meat and flour to the mutinous party; that the prisoner marched off at the head of the mutinous party of Captain Strother's company, at the end of the reveille beat on the morning of the 20th of September, yelling and firing his gun; that the prisoner persuaded soldiers to go home on the 20th of September, 1814.

*Colonel P. Pipkin*, a witness in behalf of the prosecution, being sworn, states that on the morning of the 19th of September, as well as he recollects, the prisoner was actively employed in getting the provisions rolled on between the issuing house and encampment; on the night of the 17th or 18th of the same month the prisoner came to his tent and asked permission to go into a small house and write a letter to his family, stating that he had declined going home; that he saw the letter, which was expressive of his intention of staying in service until he could get an honorable discharge; on the morning of the 20th thinks that the prisoner paraded on the right of the mutinous party of Captain Strother's company at the beat of reveille, and is not positive whether he marched off in that way or not, but believes he did; and he disremembers the prisoner's reporting any of the party who were acting mutinously.

*George Cohee*, a corporal of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that the prisoner issued the provisions, on the 19th of September, to the mutinous party; and, further, believes the prisoner fired his gun on the morning of the 20th, when marching off from Fort Jackson.

*Green B. Newson*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he believes the prisoner was not of the party who brought in the beef, and was at the head of the mutinous part of Captain Strother's company when they marched off on the morning of the 20th of September, 1814.

*George Gumbreel*, a corporal of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that the prisoner was not of the party who shot the beeves at the bullock-pen.

*Captain Strother*, a witness in behalf of the prosecution, being sworn, states that the prisoner marched off with the mutinous part of his company on the morning of the 20th, and that the prisoner never reported any men to him who were speaking of going home from Fort Jackson.

The prisoner having refused the privilege of producing any evidence in his behalf, exhibited an honorable discharge from the 28th infantry, with the following general order:

"GENERAL ORDERS.

"CAMP STEWART, November 1, 1814.

"To all officers of the United States army:

"Whereas David Morrow, belonging to Captain John Strother's company, attached to the 1st regiment Tennessee militia, who deserted from Fort Jackson on the 20th or 21st of September last, has come forward and surrendered himself to this camp, has acknowledged the error of his conduct, professed his penitence for the same, and begged permission to join his company and serve out his time of service or duty as a faithful soldier, he is hereby pardoned, on reporting himself to his company, of Colonel P. Pipkin's regiment, without delay, subject to the will of the commanding general.

"The officers commanding at stations are directed to furnish him with rations; and the said David Morrow is permitted to join Captain Blackmore, who will suffer him to do so, in order more safely to pursue his proper journey to his proper station.

"By command:

"GEO. DUFFIELD, *Aide-de-Camp to Brigadier General Taylor*."

And states, in his defence, that the reason of his leaving the service was in consequence of the advice which he received from his captain, corroborated by the opinion of General Johnston, Colonel Chatham, Captain Earp, as well as many others, who stated that there was no existing law, within their knowledge, compelling men to stay in service longer than three months; as well as an assurance of Sergeant Cheek, who said that he had once left the service under the same law, and had not received any punishment for doing so; and, furthermore, throws himself on the mercy of the court.

The court, after mature consideration on the evidence adduced, find the prisoner guilty as charged, with the exception of forcing the guard and killing the beeves, and sentence him to receive the punishment of death by shooting.

*John Harris*, a private of Captain Strother's company.

CHARGE 1ST.—*Mutiny.*

*Specification.*—In this: between the 10th and 20th of September, 1814, he went about through the camps to get signers to go home on the 20th of September, 1814, and stated that he would soon have a larger company than Captain Kilpatrick; and on the morning of the 19th of September he received his proportional part of the beef and flour that was forcibly taken, cooked it, and on the morning of the 20th of September, 1814, at the end of the reveille beat, marched off, yelling and firing his gun; and after arriving in the neighborhood of Fort Strother, he stated that he would retake those who had been taken by Captain Blackmore.

CHARGE 2D.—*Conniving at mutiny.*

*Specification.*—In this: not reporting those who were of the mutinous party, as required by the Rules and Articles of War.

To which charges and specifications the prisoner plead not guilty.

*Lieutenant Noah Bennett*, a witness in behalf of the prosecution, being sworn, states that he saw the prisoner on the 19th September, 1814, with a paper containing a good many names, and the prisoner informed him he only set down such men's names as directed him to do so; that those who were present said it was a list of men's names to draw provisions to go home on the 20th; that the prisoner was one of the mutinous party who marched off on the morning of the 20th; that he belonged to the same company, and believes the prisoner never reported any of the mutinous party, as required by the Rules and Articles of War; that the prisoner was under his immediate command on the 19th September, and that he behaved himself, as usual, *well*, until the evening, when he saw him with the paper described heretofore.

*John H. Hogan*, a witness in behalf of the prosecution, being sworn, states that he saw the prisoner with a paper setting down such men's names as intended drawing provision for the purpose of going home, and, on the morning of the 20th September, he saw the prisoner march off with the mutinous party.

*John Husbands*, a private of Captain Kilpatrick's company, a witness in behalf of the defendant, being sworn, states that he saw the prisoner, some time previous to the 20th September, with a paper setting down such men's names as intended going home; that the prisoner did not appear to be using any persuasion, and stated that it was right some should remain at the fort; that he would soon have a larger party than Captain Kilpatrick; and believes that the prisoner did march off with the mutinous party on the morning of the 20th.

*John Johnston*, a private of Captain McKay's company, a witness in behalf of the prosecution, being sworn, states that while at Fort Jackson, in the month of August, he heard the prisoner say that there was no law to compel the men to stay in service longer than three months; that he was a man of spirit, and would not stay longer; that a considerable number of the men would go then, and one who would refuse he could see bayoneted about six inches; that they would go up to the *big or great man*, and shiver their muskets over his head, but not strike so hard as to kill *him*.

The court adjourned until to-morrow, 9 o'clock.

The court met pursuant to adjournment, (present, the president and members,) and proceeded to the further examination of the witnesses.

*Edward Stephens*, a sergeant of Captain Kilpatrick's company, a witness in behalf of the defendant, being sworn, states that he saw the prisoner with a paper setting down such men's names as were going home, and said that he would take down none but such as directed him to do so; and the prisoner marched off with the mutinous party on the 20th September.

*James Alexander*, (sergeant major,) a witness in behalf of the defendant, being sworn, states that on the 19th September he saw the prisoner when the provisions were issued; believes he received his proportional part; and on the morning of the 20th, marched off with the mutinous party; that the prisoner told him he did not suppose the list which he had of men's names was improper, as it was to be handed to the colonel; that the prisoner gave up his gun to Captain Kilpatrick, and thinks he demanded and got a receipt which he had given for his gun, or the captain wrote one for that purpose.

*Ensign Daniel Kelly*, a witness in behalf of the defendant, being sworn, states that the prisoner belonged to the same company, and was frequently near him, during August and the beginning of September; that he generally behaved himself well, and was obedient to orders.

*James Smith*, a private of Lieutenant Mitchell's detachment, a witness in behalf of the defendant, being sworn, states that the prisoner advised him not to go home with the mutinous party, and believes went himself on the 20th September.

*James Nelson*, a private of Captain Mebane's company, a witness in behalf of the defendant, being sworn, states that he heard General Washington, of Tennessee, say to the members of a court-martial that he did not know whether the men were ordered out for a tour of three or six months; that he had written to the governor, but had received no answer to his letter on that subject.

The prisoner states, in his defence, that he was totally unacquainted with the nature of militia service; that he had frequently heard his officers say they knew of no law compelling militia to remain in service longer than three months, and from the opinion of other men of respectability and information, conceived his term of service had expired; returned his gun to his captain under that impression, took up the receipt he had given for it, and departed from Fort Jackson, conscious of having discharged his duty.

The court, after mature consideration on the evidence adduced, find the prisoner guilty as charged, with the exception of yelling and firing his gun, and saying he would retake those who had been taken by Captain Blackmore, and sentence him to receive the punishment of death by shooting.

The court adjourned until to-morrow, 9 o'clock.

The court met pursuant to adjournment, (present, the president and members,) and having qualified before the prisoner, Lewis, who having been previously asked if he had any objection to any of the members of the court, and answering in the negative, proceeded to the trial of *Henry Lewis*, a private of Captain Mebane's company.

#### CHARGE 1ST.—*Exciting to mutiny.*

*Specification.*—In this: that between the 10th and 20th September, 1814, in presence of a large portion of the troops, said there was no law to compel militia to serve longer than three months, at any time, and said that he would go home on the 20th September, 1814, and that he would take provisions where he could find it.

#### CHARGE 2D.—*Mutiny.*

*Specification.*—In this: that on the morning of the 19th September, 1814, he went to the bullock-pen, shot down several beeves, brought them to the camps, made a proclamation for the mutinous to draw rations, to take them home, of the beef and flour that was forcibly taken, cooked it, and on the morning of the 20th of September, 1814, at the end of reveille marched off, at the head of the mutinous party of Captain Mebane's company, yelling, and firing scattering guns.

To which charges and specifications the prisoner plead *not guilty*.

*Major Hicks*, a witness in behalf of the prosecution, being sworn, states that he heard the prisoner say there was no law, or he believed there was no law, to serve longer than three months, and he intended going home at the expiration of that time, and *he or they* would take provisions where it could be found; heard Major Hicks state to him, upon honor, that there was law, he had seen it, compelling militia to stay six months; that he had seen in a Virginia newspaper that the act of April 10, 1812, had been

revived in 1814; upon which the prisoner replied it was nothing but newspaper law, and he would not believe a word of it.

*Major Rolston*, a witness in behalf of the prosecution being sworn states that he saw the mutinous part of Captain Mebane's company march off, and believes the prisoner was among them.

*Colonel P. Pipkin*, a witness in behalf of the prosecution, being sworn, states that on the 12th September, 1814, the prisoner observed in his presence that he did not know of any law compelling men to stay in service longer than three months; he would go home at the end of that time; (he or they) would take provisions which could be found. On the morning of the 15th he saw the prisoner with his gun and a party coming in the direction of the bullock-pen. On the morning of the 20th, while reveille was beating, saw the prisoner march out of Fort Jackson at the head of the mutinous party of Captain Mebane's company, took the right of the line, and at the end of reveille counter-marched from the right and took the road.

*Lieutenant John T. Cooksey*, a witness in behalf of the prosecution, being sworn, states that the prisoner marched off, at the head of the mutinous part of Captain Mebane's company, on the morning of the 20th September.

*Corporal James Gumbree*, of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that he heard the prisoner say he believed there was no law compelling militia to stay in service longer than three months; he would be glad to see such a law, as he had served *one or two tours* of duty, and if it was justice he was willing to serve six months; and that the prisoner did not kill the beeves at the bullock-pen.

*Lieutenant Richard Swanson*, a witness in behalf of the prosecution, being sworn, states that he saw the prisoner with the mutinous party when the provisions were issued, and believes he received his proportional part.

*William D. Routon*, sergeant of Captain Mebane's company, a witness, being sworn in behalf of the prosecution, saith that he believes he heard the prisoner say there was no law, or he never saw any person who had seen a law, compelling militia to serve longer than three months, and unless such a law was shown him, he would go home on the 20th September, 1814.

The prisoner having voluntarily refused to produce any evidence in his behalf, states, in extenuation of his conduct, that he was led astray by the erroneous opinions of men of better information, who positively assured him there was no law compelling militia to serve longer than three months; that he was also persuaded off by Sergeant Hooker; regrets such a disgraceful act, and throws himself on the mercy of the court.

The court, after mature deliberation on the evidence adduced, find the prisoner guilty of the first and second charges, first specification, and so much of the second specification as marching off, at the head of the mutinous part of Captain Mebane's company, on the morning of the 23d September, 1814, and sentence him to receive the punishment of death by shooting.

The court having been sworn in presence of the prisoner, *David Hunt*, arraigned on the following charges and specifications, who being previously asked if he had any objection to any members of the court, and having answered in the negative, proceeded to the trial of *David Hunt*

#### CHARGE.—*Mutiny.*

*Specification.*—In this: that on the morning of the 3d September, 1814, he said he would go home at the end of the three months, or die in the attempt; and that on the 19th of September he broke the guard-house and went off with the mutinous party on the 20th September, 1814; and that he received his proportional part of the provisions that were forcibly taken from the contractor's agent on the 19th September, 1814.

To which charge and specification the prisoner plead not guilty.

*Lieutenant Rodney Earhart*, a witness in behalf of the prosecution, being sworn, states that he heard the prisoner, on or about the 3d of September, say he would go home at the end of three months, or die in the attempt; that he was confined in the guard-house; and, on the 19th of September, at night, as well as he recollects, he made his escape therefrom.

*Question by the prisoner.* Do you not recollect my saying the cause why I was going home at the end of three months was that I had sent a letter to my brother to come and take my place?

*Answer.* I do; but it was after I had threatened to report you for using the expression.

*Lieutenant R. Swanson*, a witness in behalf of the prosecution, being sworn, states that the prisoner was confined in the guard-house on the 19th of September, and on examination of the house next morning it was broken, and the prisoner missing. The prisoner was cooking provisions on the 19th of September, and said he intended going the next day.

*William Owen*, a private of Captain Mebane's company, a witness being sworn, states that he heard the prisoner say, some time in September, that he would go home at the end of three months, or die trying.

*Joseph Laurence*, a corporal of Captain Mebane's company, a witness in behalf of the prosecution, being sworn, states that he was officer of the guard on the 19th of September, 1814; the prisoner made his escape on that night, and was missing from camp after the mutinous party marched off on the morning of the 20th of September, 1814.

*James Dunaway*, a private of Captain Mebane's company, a witness, being sworn, in behalf of the defendant, states that he believes the prisoner received his proportional part of the provisions which had been forcibly taken from the contractors, and that he did march off with the mutinous party on the 20th of September, 1814; further, that the prisoner wrote a letter, at the time he was confined under guard, to his brother to come and take his place.

The prisoner having declined the privilege of producing any other evidence, stated, in extenuation, that he was totally unacquainted with the law of militia service; was induced to believe, through the opinion of other men, that there was no law compelling them to serve longer than three months; that he was threatened into the act by others; erred through ignorance; is sorry for his improper conduct, and solicits the mercy of the court.

The court find the prisoner, *Hunt*, guilty as charged, and sentence him to receive the punishment of death by shooting.

The court having been sworn in presence of the prisoner, arraigned on the following charges and specifications, who having been previously asked if he had any objections to any of the members, and having answered in the negative, proceeded to the trial of *Edward Linsey*, a private of Captain Searcy's company.

CHARGE 1ST.—*Mutiny.*

*Specification.*—In this: that on the morning of the 19th of September, 1814, he went with a number of others to the issuing house, and forced the guard, and broke down the door, or showed others how to do it, and took out several barrels of flour, rolled it to the camps, issued it, received his proportional part, cooked it, and at the end of reveille beat, marched off with the mutinous party, yelling and firing his gun.

CHARGE 2D.—*Exciting to mutiny.*

*Specification.*—In this: that between the 20th of August and 20th of September, 1814, speaking words tending to lead men to the act of mutiny.

To which charges and specifications the prisoner plead *not guilty.*

*Corporal James McDonald*, of Captain Mebane's company, a witness in behalf of the prosecution, being sworn, states that the prisoner passed, or forced the guard, going to the issuing house, with a number of others, on the 19th of September; that he lifted the door down; that flour was rolled out by the same party, and carried to camp, issued, and believes the prisoner received his proportional part; and disremembers seeing him for several days after the 20th of September, 1814.

*Edward Pickett*, a private of Captain Searcy's company, a witness in behalf of the prosecution, being sworn, states that he saw the prisoner at the issuing house on the 19th of September, 1814, take a mattox and show how the door might be taken down; believes he received his proportional part of the provisions taken therefrom; and on the morning of the 20th of September paraded, and at the end of reveille beat marched off with the mutinous party.

*Pharaoh Hudgins*, a private of Captain Strother's company, a witness in behalf of the prosecution, being sworn, states that the prisoner stated, in his presence, that it would not be long before he would be at liberty, when refused the privilege of passing the chain; and saw the prisoner march off with the mutinous party from Fort Jackson on the 20th of September, 1814.

*Lieutenant David Mitchell*, a witness in behalf of the prosecution, being sworn, states that he saw the prisoner at the issuing house, on the 19th of September, 1814, take the door down, after being prized off, and the party, of which the prisoner was one, rolled out eleven barrels of flour. When they had got in front of the line, heard the prisoner direct the party to call and receive their rations, which *he issued*, and marched off with the mutinous party on the morning of September 20, 1814.

*James Gumbal*, a corporal of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that either in August or September he heard the prisoner say he would endeavor to go home at the end of three months.

*Edward Black*, a private of Captain Strother's company, a witness in behalf of the defendant, being sworn, states that the prisoner did not break down the door of the issuing house, at Fort Jackson, on the 19th September.

The prisoner states, in his defence, that he did not force the guard, as charged. He went to the issuing house by permission; acted incorrectly through ignorance; regrets the impropriety of his conduct, and implores the mercy of the court.

The court, after due consideration, find the prisoner guilty as charged, with the exception of "forcing the guard, cooking his provisions, and yelling and firing his gun," and sentence him to receive the punishment of death by shooting.

The court met pursuant to adjournment, (present, the president and members,) and having been qualified in presence of the prisoners, who having been previously asked if they had any objections to any of the members of the court, and answering negatively, proceeded to the trial of the prisoners, arraigned on the following charges and specifications: Leonard Farmer, Peter Duncan, Stephen Johnson, Lewis Thomas, Simon Scott, Pharaoh Hudgins, Samuel H. Burton, and Samuel Austin, of Captain Strother's company; James Thompson, Hugh Carlin, Joseph Wright, Joshua Joiner, John Smothers, and Henry Butler, of Captain Mebane's company; Wade H. Night, Burwell Hobbes, John Oliver, Philip Holland, of Captain Searcy's company; James Arnold and Alexander McMorris, of Captain Kilpatrick's company.

CHARGE 1ST.—*Desertion.*

*Specification.*—In this: that on the morning of the 19th September, 1814, between six o'clock in the evening and six of the morning, they did desert from their posts on guard.

CHARGE 2D.—*Mutiny.*

*Specification.*—In this: that on the morning of the 19th September, 1814, they received their proportional part of the provisions that were forcibly taken, and on the morning of the 20th September, at the end of reveille beat, marched off with the mutinous party.

To which charges and specifications the prisoners unanimously plead guilty; "and state, in extenuation of their conduct, (in substance,) that from the best intelligence they could get from men who they supposed possessed information sufficient to point out the correct course to be pursued, they were induced to believe that their term of service was only for three months; were conscious that they had performed their duty faithfully; and, through ignorance and the machinations of wicked men, committed the disgraceful act of leaving the service of their country; sincerely profess penitence, and implore the mercy of the court.

The court, after due consideration, find the prisoners guilty as charged, and sentence them to make up the time lost whilst absent from service; that one-half of their pay be stopped; that, at the end of their respective service, they shall have half of the hair of their head shaved close off, then drummed out of camp. But from the youth and inexperience of Arnold and Hobdy, the court beg leave to recommend them to the commanding general for a remission of the sentence.

The court adjourned until to-morrow, at 9 o'clock.

The court met pursuant to adjournment. Present: the president and members; and, after being qualified in presence of the prisoners, who being previously asked if they had any objections to any members of the court, and answering negatively, proceeded to the trial of Sergeant James Nelson, Joseph Routon, A. Whitton, and Robert B. Roberts, privates of Captain Mebane's company.

CHARGE.—*Mutiny.*

*Specification.*—In this: that on the morning of the 19th September, 1814, they forcibly took *beef and flour* from the contractor's agent, M. T. Hagland, at Fort Jackson, received their proportionable part, and, on the morning of the 20th, at the end of reveille, marched off with the mutinous party.

To which the prisoners plead not guilty.

Lieutenant John T. Cooksey, a witness in behalf of the prosecution, being sworn, states that the prisoners marched off with the mutinous party on the 20th September, 1814.

Thomas Dunaway, a private of Captain Mebane's company, a witness in behalf of the prosecution, being sworn, states that he was with the prisoner, Routon, when the flour was taken from the contractor's agent; knows he did not take any, and believes none of the others did; that Routon and Whitton belonged to the same mess; believes they received their proportionable part of the provisions thus forcibly taken, and is under the impression the prisoners marched off with the mutinous party, at the end of reveille-beat, on the morning of the 20th September, 1814.

John Hickman, a private of Captain Mebane's company, a witness in behalf of the prosecution, being sworn, states that the prisoners did receive their proportionable part of the provisions taken from the contractor's agent on the 20th September, 1814.

The prisoners, having refused the privilege of producing any testimony in their behalf, made the following defence: That from the best information they could get, with the persuasion of men who ought to have known better, they supposed their term of service had expired, and were consequently induced to leave the service of their country; erred through ignorance; regret their misconduct, and implore the mercy of the court.

The court, after due consideration, find the prisoners guilty, and sentence them to remunerate the government for time lost whilst absent from duty; to a stoppage of one-third of their pay, and, at the expiration of their term of service, to have one-half of the hair of their head shaved close off, and drummed out of camp.

The court, having been qualified in presence of the prisoners, arraigned on the following charges and specifications, who, being previously asked if they had any objection to any of the members of the court, and having answered negatively, proceeded to the trial of Obadiah McBey, a private of Captain Strother's company, Jeremiah Dennis and James Blythe, of Captain Mebane's company.

CHARGE 1ST.—*Desertion.*

*Specification.*—In this: that on night of September 19, 1814, between six o'clock of the evening and six of the morning of the 20th, they did desert from their posts on guard.

CHARGE 2D.—*Mutiny.*

*Specification.*—In this: that on the morning of September 19, 1814, they received their proportionable part of the *beef and flour* that was forcibly taken from the contractor's agent at Fort Jackson, M. T. Hagland, and, on the morning of the 20th, at the end of reveille-beat, marched off with the mutinous party.

To which charges and specifications the prisoners plead guilty; and state, in extenuation, that they had performed their duty as good sentinels, on guard, on September 19, with the exception of being regularly relieved the next morning; from the most correct information they could procure, were impressed with the belief that their term of service had expired, and, under this impression, McBey delivered up his gun and accoutrements, and received a receipt for them; they acted incorrectly, through ignorance, and implore the clemency of the court.

The court, after due consideration, find the prisoners guilty as charged, and sentence them to make up the time lost whilst absent from duty; that one-half of their pay be stopped; that, at the end of their respective service, they shall have one-half of the hair of the head shaved close off, and then drummed out of camp.

The court adjourned until to-morrow, 9 o'clock.

The court met pursuant to adjournment. Present: the president and members; and, having been qualified in presence of the prisoners, who, being previously asked if they had any objections to any of the members of the court, and answering negatively, proceeded to the trial of the following prisoners: Privates John Baufield, Major Headspeth, Coleman Nicholas, fifer, Thomas Dunaway, John Manning, James L. Arnold, John Patterson, Thomas Wood, Edward Easters, Bethleam Easters, Basdal Sommers, Thomas Hall, John Williams, Thomas Branden, John Hampton, Jacob Bennett, William Quinn, John Earley, John L. Herringdon, Stephen Blythe, John Kelly, John Jones, William Jones, Aquilla Knight, Harman Redding, John Wright, Robinson Wright, Thomas Ashley, John Cross, James Andrews, Drury Hall, John Hickman, William Pate, James Grissom, Thomas Lumley, corporal, John Webb, George Cohee, James Gumbreel, Robert Kilbuck, John Morgan, drummer, Armstead H. Morgan, Andrew S. Britt, Elisha McFall, Edmond Black, Daniel Rake, Lewis Fletcher, Edward Johnson, Francis Compury, Green B. Newson, Gideon Harris, Hardy Weems, John Green, John Watkins, James Green, John Olphim, Jonathan Butts, James Rose, John Whetworth, John H. Read, John Benham, Moses Age, Robert Kelgore, Smith Hampton, Thomas D. Long, Thomas Wolsey, Thomas Perry, William Mimms, William Grimes, William Long, William Weakley, William Robinson, Thomas Graves, Needum B. Farior, Samuel Gibbs, Timothy Milliard, Willis Richardson, Wilson Davis, Thomas Davis, Hopson Tally, Morgan Jones, Robert White, Elijah Tucker, Cornelius McKenzie, John Ledbetter, John Wilson, Washington Ledbetter, Stephen Shepherd, Wesley Cowan, Samuel Bowman, James J. Harris, Anderson Griffith, corporal, William Chitold, Nevit Lane, Frederick Rowland, Daniel Richardson, John Linguino, Demsey Sawyer, Isaac Richmond, William D. Jemmison, corporal, Silvanus Walker, John Walker, Asa Walker, William Bryant, Edward Picket, Terrell Guess, James Denson, Benjamin Bush, William Welsh, John Lee, Bennet Seagreaves, John P. Rushing, George Haynes, John. Alsop, Daniel Wyatt, Solomon Wyatt, Thomas Dunn, John Harning, Thomas Pace, David A. Welsh.

CHARGE.—*Mutiny.*

In receiving their proportionable part of flour and meat, taken from the contractor's agent, on September 19, 1814, and marching off with the mutinous party from Fort Jackson, on September 20, 1814.

To which charges and specifications the prisoners plead guilty, with the exception of Frederick Rowland, and state, in their defence, that, from the best intelligence they could procure, with the opinion of men of respectability and information, they were credulous enough to suppose they were bound by no law to continue in service longer than three months; they were actuated by the purest motives in leaving the service of their country, erred through ignorance alone, sincerely lament such improper conduct, and throw themselves on the mercy of the court.

The court, after due consideration, find the prisoner, Frederick Rowland, not guilty, and acquit him; and find the balance, severally, guilty, and sentence them to make good the time lost whilst absent from duty; that one-third of their pay be stopped; that, at the end of their respective service, they shall have one-half of the hair of the head shaved off close, and then drummed out of camp. But from the youth and inexperience of Thomas Wood, John Manning, Edward Black, Hopson Tally, James J. Harris, and William Walsh, beg leave to recommend them to the commanding general for a remission of the sentence.

The court having been qualified in presence of the prisoner arraigned on the annexed charges and specifications, who being previously asked if he had any objections to any of the members of the court, and answering in the negative, proceeded to the trial of Nathan Johnson, (a drummer,) of Captain Newland's company.

CHARGE 1ST.—*Exciting to mutiny.*

*Specification.*—In this: sending a letter between the 1st of August, 1814, and 20th of September, 1814, to the soldiers of Fort Strother, encouraging them to go home on the 20th of September, and stating he intended doing the same.

CHARGE 2D.—*Mutiny.*

*Specification.*—In this: that on the morning of the 20th September, he, together with a number of others, did march off, without permission, from Fort Williams.

To which charges and specifications the prisoner plead not guilty.

*Godfrey Ratts*, a private of Captain Mebane's company, a witness in behalf of the prosecution, being sworn, states that the prisoner was at Fort Williams on the 21st of September, 1814; and believes none who went off previous returned by that time.

*Nathaniel Caldwell*, a sergeant of Captain Newland's company, a witness in behalf of the prosecution, being sworn, states that the prisoner intended going home on the 20th of September, 1814, but believes he did not leave Fort Williams on that day.

*Isum Wood*, a private of Captain Blackmore's company, a witness in behalf of the prosecution, being sworn, states that a letter was received at Fort Strother, signed by Nathan Johnson, as well as he recollects, encouraging the men to go home on the 20th of September, 1814, and believes that the author of the letter stated he intended doing the same.

*Lieutenant Dicken Ward*, a witness in behalf of the prosecution, being sworn, states that he saw a letter at Fort Strother, between the 1st of August and 20th of September, 1814, which had been received from Fort Williams, signed by Nathan Johnson, encouraging the men to be in a state of readiness to go home on the 20th of September, as he and others at Fort Williams intended doing the same; but is not certain that the prisoner was the writer of the letter.

*Ensign James H. Williams*, a witness in behalf of the prosecution, being sworn, states that the prisoner was attached to the same company he was; is uncertain which day of September the prisoner left Fort Williams; and that he knows no other man of that name at that garrison.

The prisoner having refused the privilege of producing any testimony in his defence, submits his case to the decision of the court.

The court, after due consideration, find the prisoner guilty of the first charge and latter clause of the first specification, and sentence him to a stoppage of one-third of his pay, and at the expiration of his term of service to have one-half of the hair of the head shaved close off, and drummed out of camp.

The court adjourned until to-morrow at 9 o'clock.

The court met pursuant to adjournment. Present: the president and members; before the prisoners arranged on the annexed charges and specifications, who being previously asked if they had any objection to any of the members of the court, and having answered negatively, proceeded to the trial of Archibald Hair, Isaac Williams, George Joy, William Pratt, Jesse Pearce, James Wren, Robert Dyer, David Brown, John Strong, John Nunly, Cannon Quarls, Samuel S. Barrett, Blake Maldin, Godfrey Rats, Lewis Harmon, William Pew, Peter Johnston, John Windows, Daniel Hughes, James Fox, James Maxwell, William Scribner, Thomas Turner, John Farris, Joshua Edwards, William Powell, Corporal Elisha Phelps, John Warnock.

CHARGE.—*Mutiny.*

*Specification.*—In this: that between the 19th and 26th of September, 1814, they marched off from Fort Williams with the mutinous party.

To which the prisoners plead guilty; and state, in extenuation of their conduct, that from the best information they could procure they were induced to believe there was no law binding militia to continue in service longer than three months; their tour of duty had legally expired; acted improperly through ignorance; sincerely lament the disgraceful act, and implore the mercy of the court.

The court, after due consideration, find the prisoners guilty, and sentence them to remunerate the United States for the time lost whilst absent from duty; to a stoppage of one-third of their pay; and at the expiration of their respective term of service to have one-half of the hair of the head shaved off close, and to be drummed out of camp.

The court having been qualified in presence of the prisoners arranged on the following charge and

specification, who being previously asked if they had any objection to any of the members of the court, and having answered negatively, proceeded to the trial of Emman Hays, William Durning, Joshua Lovell, Henry Woodward, Samuel Wyatt, Joseph Pistole, Edmond Isom, Isom Wood, Edward Burchett, David Buckhannan, John Davis, Everett Creech, Moses Elliott, William Logan, and Archless Wells.

CHARGE.—*Mutiny.*

*Specification.* In this: that, between the 19th and 25th of September, 1814, they went off from Fort Strother with the mutinous party.

To which the prisoners plead *guilty*; and state, in their defence, that, from the best information they could procure, with the opinion of men of respectability and information, were induced to believe there was no law binding militia to serve longer than three months; that they were actuated by the purest motives in leaving the service of their country; earnestly deplore the disgraceful act, committed through erroneous impressions, and implore the mercy of the court.

The court, after due consideration, find the prisoners guilty as charged, and sentence them to remunerate the United States for the time lost whilst absent from duty; to a stoppage of one-third their pay; and, at the expiration of their respective terms of service, to have one-half of the hair of the head shaved off close, and drummed out of camp. But, from the youth and inexperience of Edward Curchett, and the extreme ignorance of John Davis, beg leave to recommend them to the commanding general for a remission of the sentence.

The court adjourned until to-morrow at 11 o'clock.

The court met pursuant to adjournment. Present: the president and members. No persons appearing before them for trial, adjourned until to-morrow at 9 o'clock

The court met pursuant to adjournment. Present: the president and members; and, having been qualified in presence of the accused, who being previously asked if he had any objection to any of the members of the court, and having answered negatively, proceeded to the trial of Captain A. Roberts, of the Mississippi militia, in the service of the United States, arraigned on the following charges and specifications:

CHARGE 1ST.—*Conduct unbecoming an officer and a gentleman.*

*Specification 1st.* In being repeatedly intoxicated in the presence of both officers and men, at Fort Montgomery, between September 15 and December 15, 1814.

*Specification 2d.* In forcibly taking a boat from a citizen, and retaining it without his consent, and refusing, when requested, to give the vouchers required by law, at Fort Stoddart, some time between September 15 and December 18, 1814.

CHARGE 2D.—*Conduct highly unmilitary and unbecoming an officer.*

*Specification.* In seizing, or detaining at Camp Boat Yard, some time between September 15 and December 15, 1814, a boat, employed by the quartermaster general's department for the transportation of forage for the troops in and near this place; thus jeopardizing the very existence of the army, preventing its necessary and expected supplies.

To which the accused plead *not guilty*.

Colonel P. Perkins, a witness in behalf of the prosecution, being sworn, states that he has seen the accused, more than once, intoxicated, in presence of both officers and men, at Fort Montgomery, between September 15 and December 15, 1814.

*Question, by the accused.* Was it ever reported to you that I was too much intoxicated to discharge my duty?

*Answer.* It was reported to me that you were confined to *your tent* by intoxication, but saw nothing of the kind myself.

Captain William Johnston, a witness in behalf of the prosecution, being sworn, states that he saw the accused once intoxicated, in presence of both officers and men, when officer of the day, between September 15 and December 15, 1814, at Fort Montgomery. Some time between September 15 and December 15, 1814, at Fort Stoddart, he took and detained a boat, from a citizen, and refused to give her a certificate, or such vouchers as is required by law; but afterwards understood the accused had delivered her up to the owner. At Camp Boat Yard the accused had in his possession a boat; that the commander of the boat stated that he was ordered after corn; that the boat was not restored, but an order was given by Captain Roberts for the soldiers to go on board and proceed to Mobile.

Lieutenant J. H. Moore, a witness in behalf of the prosecution, being sworn, states that on December 10 he received an order from General Taylor to procure water transportation for the baggage of Colonel Perkins's regiment. Boats were accordingly provided; after which, a boat belonging to the quartermaster general's department, at Camp Boat Yard, was pressed by order of the accused, although an order had been issued by the general to the contrary; and that it would not be given up, even were he to appear in person. That at Fort Stoddart, on December 12, he understood an order had been given by the accused to his command to collect all the boats to be found. After one was taken possession of, it was claimed by a citizen, and given up.

Sergeant Adam Poole, a witness in behalf of the defendant, being sworn, states that a boat in the possession of Captain Roberts's command, at Fort Stoddart, between September 15 and December 15, 1814, was claimed by a citizen, and the accused said he would give him a receipt for her at Mobile, or somewhere down the river; that an order came from General Taylor, concerning a boat at Camp Boat Yard, belonging to the quartermaster general's department, when some person observed that the order was incorrect, as the boat had been taken before, as he understood, by some other person, and not Captain Roberts.

George Graham, a witness in behalf of the defendant, being sworn, states that he never knew the accused guilty of repeated intoxication; that he once saw him in that state and believes it was the day he left the Boat Yard; that a boat, of which Everie was captain, was taken possession of at the Boat Yard, either by the order of the accused or the regimental quartermaster, and the baggage put on board

of her while the owner or commander was absent at Fort Montgomery; it was detained there until an order was brought from the general, (without any date,) directing the boat to be given up to the owner; when the regimental quartermaster asked the accused what he intended doing when he ordered the men on board to put off and afterwards said he would be a pretty fool to obey an order without any date; and further states that he believes the accused had returned from Fort Montgomery before the baggage was placed on board the boat.

Isaac N. Selser, a witness in behalf of the defendant, being sworn, states that he has seen the accused more than once unusually merry, which he believed to be the effect of intoxication, some time between September 15 and December 15, 1814. At Camp Boat Yard he heard the accused ask the regimental quartermaster to press more boats to transport the troops as well as baggage; to which the quartermaster replied that he had already pressed a sufficient number for the transportation of the baggage, and if any more were taken it would be at his own risk and responsibility.

Question by the accused. Was it not to press boats to transport the troops to old Fort Stoddart when this answer was made me by the regimental quartermaster?

Answer. I do not recollect.

Captain Roberts states, in his defence, that he supposed drinking to be merry was not amiss, but being apprehensive it might be considered so, discontinued the practice; that he took a boat, agreeably to the verbal order of General Taylor, from the Boat Yard to transport the troops to Fort Stoddart, as the cut off was then considered impassable, and returned them again, of which the *quartermaster general's* boat was not one; that Quartermaster Moore was ordered to furnish water transportation for the baggage of Colonel Perkins's regiment; he directed the quartermaster, Moore, to press, legally, the *quartermaster general's* boats, and he informed him he had done so, from which he was induced to believe no further difficulty would arise; as respects the little boat at Fort Stoddart, she would not have been taken had he not been informed that they were drifted boats and belonged to no person in the vicinity of that place, but after it was claimed by a citizen, who said he was the proper owner, it was given up to him.

The court, after due consideration, find the accused guilty of the first and second charges, first specification of the first charge, first of the second charge, but not guilty of the second specification of the first charge, and sentence him to be dismissed the army of the United States.

The court, having been qualified in the presence of the prisoner, who being previously asked if he had any objection to any of the court and having answered negatively, proceeded to the trial of John Rourke, a citizen, and no prosecutor or charges appearing against the prisoner, acquit him.

The court adjourned until to-morrow, nine o'clock.

The court met pursuant to adjournment. Present: the president and members; and no prisoners appearing before them for trial, adjourned *sine die*.

P. PERKINS, *Lieutenant Colonel and President of the Court.*

#### AFTER GENERAL ORDERS.

HEADQUARTERS SEVENTH MILITARY DISTRICT,  
*Adjutant General's Office, Mobile, November 21, [1814.]*

A general court-martial, to consist of five members and two supernumeraries, will convene at Mobile at such time as Lieutenant Colonel Arbuckle shall direct for the trial of such militia prisoners as shall be brought before it. Lieutenant Colonel Perkins is hereby appointed president of the said court, and Lieutenant Robeson, of the third regiment of infantry, will act as the judge advocate; Colonel Pipkin, of the first regiment West Tennessee militia, will detail the members from the State troops at and near Fort Montgomery, order on all the witnesses necessary for the trial of the prisoners of his regiment at this place, also furnish specific charges against them, and, lastly, will notify Lieutenant Colonel Arbuckle of the probable time they will reach this point to enable him to designate the hour of sitting.

By command,

ROBERT BUTLER, *Adjutant General.*

ADJUTANT GENERAL'S OFFICE, *January 21, 1828.*

True copy from the General Order Book of the late seventh military district.

R. JONES, *Adjutant General.*

#### GENERAL ORDER.

HEADQUARTERS SEVENTH MILITARY DISTRICT,  
*Adjutant General's office, New Orleans, January 22, 1815.*

At a general court-martial ordered to convene at Mobile on the 5th December, 1814, of which Colonel Perkins is president, the following prisoners were tried on the following charges and specification, viz:

*Captain John Strother, 1st regiment W. T. militia, charged with exciting to mutiny.*

*Specification.*—In this: that on the march between Fort Deposit and Fort Jackson, between the 4th of July and 31st of the same, he stated in presence of some of the troops there was no law to compel

them to serve longer than *three months*; and unless he was shown a better law than he had seen, he would march his company home at the end of that time.

CHARGE 2D.—*Conniving at mutiny.*

*Specification.*—In this: suffering those under his command to go unreported to the commanding officer, contrary to the rules and articles of war in such case made and provided, and in using words tending to lead men to the act of mutiny; stating that if he was the lieutenant he would march the company under his command home on the 20th September, 1814.

CHARGE 3D.—*Disobedience of orders.*

*Specification.*—In this: not complying with the regimental *order*, bearing date August 23, 1814, which required the officers of all grades, and privates, to use their best endeavor to suppress any mutiny or intended mutiny, under the pains and penalties of a violation of the law of the United States.

To which charges and specifications the prisoner, Captain Strother, pleaded *not guilty*.

The court found the prisoner guilty as charged, with the exception of failing to report his men to the commanding officer, and sentence him to be dismissed the service, as unworthy of holding a commission in the army of the United States.

The court next proceeded to the trial of Third Lieutenant *James McCauley*, 1st regiment W. T. militia, charged with *exciting to mutiny*.

*Specification.*—In this: that between the 10th and 20th of September, 1814, speaking words tending to lead men to the act of mutiny, by saying that the opinion of the United States attorney of the State of Virginia was nothing but newspaper law.

CHARGE 2D.—*Conniving at mutiny.*

*Specification.*—In this: that on the 19th September, 1814, he gave directions to some of the mutinous party to put in his knapsack his proportionable part of provisions, which had been forcibly taken out of the issuing house by them; and further said that he would be with them in a few days, as he had some business to settle which would detain him that length of time.

CHARGE 3D.—*Disobedience of orders.*

*Specification.* In this: not using his endeavor to suppress any mutiny or intended mutiny, as required by said order of the 23d August, 1814.

To which charges and specifications the prisoner, Lieutenant James McCauley, pleaded *not guilty*.

The court, after mature deliberation on the evidence adduced, found the prisoner guilty as charged, and sentence that he be dismissed the service, have his sword broken over his head, with a total disqualification of ever holding a commission in the army of the United States.

The court next proceeded to the trial of *Jacob Webb*, a private of Captain Strother's company, charged with desertion, mutiny, and robbery.

To which charge or charges the prisoner, *Jacob Webb*, pleaded *not guilty*.

The court, after mature consideration on the evidence adduced, find the prisoner guilty of desertion and mutiny, and not of robbery; and sentence him to receive the punishment of death by shooting.

*David Morrow*, a sergeant of Captain Strother's company, charged with *mutiny and exciting to mutiny*.

To which charges the prisoner pleaded *not guilty*.

The court found the prisoner guilty, and sentence him to receive the punishment of death by shooting.

*John Harris*, a private of Captain Strother's company, charged with *mutiny and conniving at mutiny*.

To which charges the prisoner pleaded *not guilty*.

The court, after mature consideration on the evidence adduced, find the prisoner guilty, and sentence him to receive the punishment of death by shooting.

*Henry Lewis*, a private of Captain Mebane's company, charged with *mutiny and exciting to mutiny*.

To which charge or charges the prisoner pleaded *not guilty*.

The court found the prisoner, Henry Lewis, guilty, and sentence him to receive the punishment of death by shooting.

David Hunt, charged with mutiny.

To which charge the prisoner pleaded *not guilty*.

The court found the prisoner guilty as charged, and has sentenced him to receive the punishment of death by shooting.

Edward Linsey, a private of Captain Searcy's company, charged with *mutiny and exciting to mutiny*.

To which charge or charges the prisoner pleaded *not guilty*.

The court found the prisoner guilty, and has sentenced him to receive the punishment of death by shooting.

The court next proceeded to the trials of the following: Leonard Farmer, Peter Duncan, Stephen Johnson, Lewis Thomas, Semore Scott, Pharaoh Hudgins, Samuel H. Burton, and Samuel Austin, of Captain Strother's company; James Thompson, Hugh Carlin, Joseph Write, Joshua Joiner, John Smothers, and Henry Butler, of Captain Mebane's company; Wade H. Night, Berwell Hobdy, John Oliver, and Philip Holland, of Captain Searcy's company; James Arnold and Alexander McMorris, of Captain Kilpatrick's company, charged with desertion and mutiny.

To which charge or charges the prisoners unanimously pleaded guilty.

The court found them guilty, and has sentenced them to make up the time whilst absent from service; that one-half of their pay be stopped; that at the end of their respective service they have one-half of the hair of their heads shaved off close, and then drummed out of camp.

Sergeant James Nelson, Joseph Routon, A. Whitson, and Robert B. Roberts, privates of Captain Mebane's company, charged with mutiny and desertion.

To which charge or charges the prisoners pleaded *not guilty*.

The court found them guilty, and has sentenced them to remunerate the government for the time lost by their absence from duty; a stoppage of one-third of their pay; and at the expiration of their term of service to have one-half of the hair of their head shaved closed off, and then drummed out of camp.

Obadiah McBey, a private of Captain Strother's company, Jeremiah Dennis and James Blythe, of Captain Mebane's company, charged with desertion and mutiny.

To which charge or charges the prisoners pleaded guilty.

The court found the prisoners guilty, and has sentenced them to make up the time lost whilst absent from duty; that the one-half of their pay be stopped; that at the end of their respective service they shall have one-half of the hair of their heads shaved off close, and then drummed out of camp.

The court next proceeded to the trial of the following prisoners, viz: Privates John Bonfield, Major Hedgpeath, Coleman Nicholas, (fifer,) Thomas Dunaway, John Manning, James L. Arnold, John Patterson, Thomas Wood, Edward Easters, Bethlehem Easters, Basder Summers, Thomas Hall, John Williams, Thomas Brandon, John Hampton, Jacob Bennet, William Quinn, John Earby, John L. Herringdon, Stephen Blythe, John Kelly, John Jones, William Jones, Aquila Night, Harmon Reding, John Wright, Robinson Wright, Thomas Ashley, John Cross, James Andrews, Drury Hall, John Hickman, William Pate, James Grissom, Thomas Limbly, (corporals,) John Webb, George Cohe, James Gambreel, Robert Kilbuck, John Morgan, (drummer,) Armstead H. Morgan, Anderson S. Britt, Elisha McFall, Edmund Black, Daniel Ruke, Lewis Fletcher, Edward Johnson, (France's company,) Green B. Newton, Gideon Harris, Hardy Wilms, John Green, John Watkins, James Green, John Olphin, Jonathan Butts, James Rose, John Whetworth, John H. Read, John Benham, Moses Age, Robert Kelgan, Smith Hampton, Thomas D. Long, Thomas Woolsey, Thomas Perry, William Mimms, William Grimes, William Long, William Weakly, William Robinson, Thomas Graves, Andrew B. Farrow, Samuel Gibbs, Timothy Millyard, Willis Richardson, Wilson Davis, Thomas Davis, Hobson Tally, Morgan Jones, Robert White, Elijah Tucker, Cornelius McKensy, John Leabetter, John Wilson, Washington Leabetter, Stephen Shepherd, Wesley Cowan, Samuel Bowman, James G. Harris, Anderson Griffith, (corporal,) William Chisholm, Nevit Lee, Frederick Rowland, Daniel Richardson, John Lemgin, Dempsey Sawyer, Isaac Richmond, William D. Jemmisson, Silvanus Walker, John Walker, Asa Walker, William Bryant, Edward Pickett, Terrell Guess, James Denson, Benjamin Bush, William Walsh, John Lee, Bennet Seagraves, John P. Rushing, George Haines, John Alsop, Daniel Wyatt, Solomon Wyatt, Thomas Dume, John Henning, Thomas Pace, and David A. Welsh, charged with mutiny and desertion.

To which charge or charges the prisoners unanimously pleaded guilty.

The court found them guilty, (except Frederick Rowland, who they found not guilty, and have acquitted him.) The balance they have sentenced to make good the time lost when absent from duty; that the one-third of their pay be stopped; that at the end of their respective service they shall have one-half of the hair of their heads shaved close off, and then drummed out of camp.

Nathan Johnson, (a drummer,) of Captain Newland's company, charged with mutiny and exciting to mutiny.

To which charge or charges the prisoner pleaded not guilty.

The court found the prisoner, Nathan Johnson, guilty, and has sentenced him to a stoppage of one-third of his pay, and at the expiration of his time of service to have one-half of the hair of his head shaved close off and drummed out of camp.

Archibald Hair, Isaac Williams, George Jay, William Pratt, Jesse Pearce, James Wrens, Robert Dyer, David Brown, John Strong, John Nunly, Cannon Quarles, Samuel S. Barrett, Blake Maldin, Godfrey Rats, Lewis Harmon, William Pew, Peter Johnson, John Windon, Daniel Hughes, James Fox, James Maxwell, William Scribner, Thomas Turner, John Farris, Joshua Edwards, William Powell, Elisha Phelps, and John Warnock, charged with mutiny and desertion.

To which charge or charges the prisoners pleaded guilty.

The court found them guilty, and has sentenced them to remunerate the United States for the time lost whilst absent from duty, and, at the expiration of their respective time of service, to have one-half of the hair of their heads shaved off close, and to be drummed out of camp.

The court then proceeded to the trials of the following, viz: Emmon Hays, William Durwing, Joshua Lovell, Henry Woodward, Samuel Wyatt, Joseph Pistole, Edmond Isom, Isom Wood, Edward Buschett, David Buckhannan, John Davis, Everett Creech, Moses Elliott, William Logan, and Archless Wills, charged with *mutiny and desertion*.

The court found them guilty, and has sentenced them to remunerate the United States for the time lost whilst absent from duty; to a stoppage of one-third of their pay; at the expiration of their respective service to have one-half of the hair of their heads shaved off close; and to be drummed out of camp.

The court then proceeded to the trial of *Captain A. Roberts*, of the Mississippi militia, who was arraigned and tried on the following charges and specifications, viz:

CHARGE 1ST.—*Conduct unbecoming an officer and a gentleman.*

*Specification 1.*—In being repeatedly intoxicated, in the presence of both officers and men, at Fort Montgomery, between September 15 and December 15, 1814.

*Specification 2.*—In forcibly taking a boat from a citizen, and detaining it without his consent, and refusing, when requested, to give the vouchers required by law, at Fort Stoddard, some time between September 15 and December 15, 1814.

CHARGE 2D.—*Conduct highly unmilitary and unbecoming an officer.*

*Specification 1.*—In seizing or detaining, at Camp Boat Yard, some time between September 15 and December 15, 1814, a boat employed by the Quartermaster General's department for the transportation of forage for the troops in and near this place; thus jeopardizing the very existence of the army by preventing its necessary and expected supplies.

To which charges and specifications the prisoner, Captain A. Roberts, pleaded not guilty.

The court, after due consideration, found the prisoner *guilty* of the 1st and 2d charges, first specification of the 1st charge, first specification of the 2d charge; but not guilty of the second specification of the 1st charge; and has sentenced him to be dismissed the service of the United States.

*John Rowke*, a citizen, next appeared before the court; but no prosecutor or charges appearing against the prisoner, they acquitted him.

The major general approves the proceedings and sentences of the court, and orders them to be carried into effect. With respect to those sentenced to the punishment of death, their sentence will be carried into execution four days after the promulgation of this order at Mobile. In consequence of the recommendation of the court in favor of the following, viz: James Arnold, Burwell Hobdy, Thomas Wood, John Manning, Edmond Black, Hopson Tally, James Harris, William Welsh, Edward Burchett, and John Davis,

the major general is willing to pardon them, and orders that they and Frederick Rowland, who was acquitted, return to their duty, and citizen John Rourke will be dismissed from confinement.

By command:

ROBERT BUTLER, *Adjutant General.*

ADJUTANT GENERAL'S OFFICE, *January 21, 1828.*

R. JONES, *Adjutant General.*

*Letter from the Third Auditor of the Treasury.*

TREASURY DEPARTMENT, *Third Auditor's Office, January 23, 1828.*

SIR: In obedience to that part of the resolution of the House of Representatives of the 16th instant, which requires the Secretary of War to furnish the House copies of the muster and pay rolls of said militiamen, (the detachment of the Tennessee militia detailed under the order of the governor of said State, issued on the 20th day of May, 1814, and afterwards placed under the immediate command of Lieutenant Colonel Philip Pipkin,) and which you referred to this office, I have the honor to hand you herewith copies of the following muster and pay rolls, the originals of which are on the files of this office, viz:

- One pay and one muster roll of the field and staff;
- One pay and three muster rolls of Captain McKay's company;
- One pay and three muster rolls of Captain Robertson's company;
- One pay and two muster rolls of Captain Blakemore's company;
- One pay and three muster rolls of Captain Newlin's company;
- One pay and three muster rolls of Captain Strother's company;
- One pay and three muster rolls of Captain Smyth's company;
- One pay and three muster rolls of Captain Mebane's company;
- One pay and three muster rolls of Captain Kilpatrick's company; and
- One pay and three muster rolls of Captain Searcy's company.

I have the honor to be, very respectfully, sir, your obedient servant,

PETER HAGNER, *Auditor.*

HON. JAMES BARBOUR, *Secretary of War.*

N. B.—It will be perceived that *three duplicate* muster rolls, viz: *one* of Captain McKay's, *one* of Captain Mebane's, and the other of Captain Kilpatrick's company, are sent in lieu of copies, having been found on the files of the office, and can be dispensed with.

*Pay-roll of the field and staff officers of the first regiment of Tennessee militia, in the service of the United States, commanded by Colonel Philip Pipkin, from June 20, 1814, to January 27, 1815.*

I certify, upon honor, that this muster-roll and annexed recapitulation exhibit a true statement of the company under my command; and that the remarks set opposite the names of the men are accurate and just. DAVID MITCHELL, Lieut. Tennessee Militia.

We certify, upon honor, that this muster-roll exhibits a true statement of Capt. John Robertson's company of infantry, in the 1st regiment of West Tennessee militia, and that the remarks set opposite the names of the men are accurate and just, as mustered by me this 27th day of January, 1815, at Fayetteville. ROBERT HAYS, Asst. Inspector General Tennessee Militia.

I certify, upon honor, that the company under my command is entitled to mileage to and from Fayetteville, the place of rendezvous, to their respective homes, estimating the distance at seventy-five miles. Given under my hand this 27th January, 1815. DAVID MITCHELL, Lieut. Tennessee Militia.

Pay-roll of a company of militia infantry, commanded by Captain James Blackmore, of the first regiment West Tennessee militia, under the command of Colonel Philip Pipkin, in the service of the United States from June 21, 1814, to January 27, 1815.

								6,063 55		

I certify that this pay-roll has been by me examined and compared with the original muster-rolls of said company, now in my possession; and that the sums stated, amounting to six thousand and sixty-three dollars and fifty-five cents, were due from the United States to Captain James Blackmore's company of the 1st regiment of Tennessee militia on January 27, 1815, having signed duplicates.

JOSEPH COLEMAN, *Dist. Paymaster.*

*Muster-roll of a company of militia infantry, under the command of Captain James Blakemore, in the service of the United States, commanded by Colonel Philip Pipkin, first regiment of West Tennessee militia, from the 20th June, 1814, when mustered into service, to the 27th January, 1815.*

I certify, on honor, that this muster-roll and annexed recapitulation exhibit a true statement of the company under my command, and that the remarks set opposite the names of the men are accurate and just.

JAMES BLAKEMORE, *Captain.*

We certify, on honor, that this muster-roll exhibits a true statement of Captain James Blakemore's company of militia infantry, in the first regiment of West Tennessee militia, and the remarks set opposite the names of the men are accurate and just, as mustered by me this 27th day of January, 1815, at Fayetteville.

ROBERT HAYS, *Assistant Inspector General, Tennessee militia.*

I certify, on honor, that the company under my command is entitled to mileage to and from Fayetteville, the place of rendezvous, to their respective homes, estimating this distance at one hundred miles. Given under my hand this 27th January, 1815.

JAMES BLAKEMORE, *Captain.*

*Mustering-roll of a company of militia, under the command of Captain James Blackemore, in the service of the United States, commanded by Colonel Philip Pipkin, from June 20, 1814, when mustered into service, to December 20, 1814.*

I certify on honor that this muster-roll exhibits a true statement of Captain John Strother's company of Tennessee militia, in the 1st regiment; and that the remarks set opposite the names of the men are accurate and just, as mustered by me, this 27th January, 1815.

ROBERT HAYS, *Assistant Inspector General Tennessee Militia.*

I certify upon honor that this muster-roll and annexed recapitulation exhibit a true statement of the company under my command, and that the remarks set opposite the names of the men are accurate and just.

THOMAS HORN, *First Lieutenant Commanding.*

*Pay-roll of a company of militia infantry commanded by Captain David Smith, of the regiment commanded by Colonel Philip Pipkin, in the service of the United States, from June 20, 1814, to January 27, 1815.*

I certify that this pay-roll has been by me examined and compared with the original muster-rolls of said company now in my possession; and that the sums stated, amounting to five thousand six hundred and twelve dollars twenty-one cents, were due from the United States to Captain David Smith's company of the first regiment of Tennessee militia, January 27, 1815, having signed duplicates hereof.

JOSEPH COLEMAN, District Paymaster.

*Mustering-roll of a company of militia infantry, under the command of Captain David Smyth, in the service of the United States, commanded by Philip Pipkin, colonel of first regiment Tennessee militia, from June 20, 1814, when mustered into service, to December 20, 1814.*

I certify upon honor that this muster-roll and annexed recapitulation exhibit a true statement of the company under my command, and that the remarks set opposite the names of the men are accurate and just.

DAVID SMITH, *Captain, Tennessee Militia.*

We certify on honor that this muster-roll exhibits a true statement of Captain David Smith's company of militia infantry, in the first regiment of the West Tennessee militia, and that the remarks set opposite the names of the men are accurate and just, as mustered by me, this 27th day of January, 1815, at Fayetteville.

ROBERT HAYS, *Assistant Inspector General, Tennessee Militia.*

I certify upon honor that the non-commissioned officers, musicians, and privates, in my company, are entitled to travelling allowance of pay and rations from Fayetteville, Lincoln county, where mustered into service, to McMinnville, Warren county, Tennessee, place of residence; distance computed at one hundred miles; given under my hand this 27th day of January, 1815.

DAVID SMITH, *Captain.*

*Muster-roll of a company of militia infantry, under the command of Captain David Smyth, in the service of the United States, commanded by Philip Pipkin, colonel first regiment Tennessee militia, from June 20, 1814, when mustered into service, to December 20, 1814.*

I certify, upon honor, that this muster-roll and annexed recapitulation exhibit a true statement of the company under my command, and that the remarks set opposite the names of the men are accurate and just.

PETER SEARCY, *Captain.*

We certify, upon honor, that this muster-roll exhibits a true statement of Captain Peter Searcy's company of militia infantry, in the first regiment West Tennessee militia, and that the remarks set opposite the names of the men are accurate and just, as mustered by me this 27th day of January, 1815, at Fayetteville.

ROBERT HAYS, *Assistant Inspector General T. M.*

I certify, upon honor, that the company under my command is entitled to mileage to and from Fayetteville, the place of rendezvous, to their respective homes, estimating the distance at one hundred miles. Given under my hand this 27th day of January, 1815.

PETER SEARCY, *Captain.*

20TH CONGRESS.]

No. 372.

[1ST SESSION.]

## CORRESPONDENCE BETWEEN THE SECRETARY OF WAR AND GENERAL ANDREW JACKSON RELATIVE TO THE TENNESSEE MILITIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 18, 1828.

DEPARTMENT OF WAR, *February 14, 1828.*

SIR: In obedience to a resolution of the House of Representatives of the 8th instant I have the honor of submitting herewith copies of all the letters and correspondence between the Secretary of War and General Andrew Jackson, from the commencement of the Creek war until the 1st of March, 1815, in which reference is made to the subject of the draft, service, and discharge, of the several corps of the Tennessee militia.

The correspondence transmitted is embraced in two packages: the first containing the letters from the Secretary of War to General Jackson, and numbered from 1 to 5; the second from General Jackson to the Secretary of War, and numbered from 6 to 13. The duty of *arranging* the papers prepared in obedience to calls from Congress has been long performed by an inferior clerk in the department, and by a reference to former answers to calls of a similar kind it will be found this mode of arrangement has been pursued.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the House of Representatives.

No. 1.

*The Secretary of War to General A. Jackson.*

WAR DEPARTMENT, *February 4, 1814.*

SIR: Since the receipt of your letter of December 30th, the governor of Tennessee has been required to call out militia to reinforce your command and provide for the exigencies of the service in that quarter, in which he is also required to consult the commanding general.

J. ARMSTRONG.

General ANDREW JACKSON, *Fort Strother.*

No. 2.

*The Secretary of War to General Jackson.*

WAR DEPARTMENT, *May 24, 1814.*

SIR: In the event of your acceptance of the appointment announced by my letter of the 22d instant, I have to suggest the wish of the President that you should proceed without delay to Fort Jackson and consummate the arrangements committed to Major General Pinckney in relation to the hostile Creeks. A copy of the instructions given to General Pinckney is enclosed. I enclose also a copy of his general orders of the 28th of April last, showing the distribution made of the troops. If the hostile part of the Creeks is really broken down; if they are prostrated before us, and even begging from us the means of subsistence; and if the friendly part of the nation has in itself any force, and a disposition to employ it, (and of all those facts there is no doubt,) why retain in service any portion of the militia? The 3d and 39th of the line (with the friendly Creeks) will be amply sufficient to cover the negotiation, and that terminated, (as you think it may be,) even these may be carried promptly to New Orleans, where their services may be wanted.

I have the honor, &c.,

JOHN ARMSTRONG.

Major General ANDREW JACKSON.

P. S.—Your letters of the 2d and 25th ultimo have been received.

No. 3.

*The Secretary of War to General Jackson.*

WAR DEPARTMENT, *June 25, 1814.*

SIR: Your letters of the 8th and 13th instant have been received. Colonel Butler is transferred from District No. 8 to District No. 7, and will, of course, take your orders. I enclose you sundry letters forwarded to me by Major General Pinckney. Those from Colonel Milton (on the subject of the report of a new assemblage of the Creeks, the supplies received by them from the Spanish government, and the arrival of a British corps at St. Mark's,) are such as have been expected. No faith was given to the

information received and communicated by Mr. Toulman. The report of a British naval force on our southern coast is of nearly the same character. Having permitted the months of April, May, and June to escape without effort on their part, it is not presumable that they will attempt much during the hot and sickly seasons. These remarks are meant to apply to your argument for keeping up the large militia force now in service in the Creek country, and to furnish occasion to repeat the wishes of the President that this force be diminished, and the whole of it discharged as early as may consist with the interests of the public. There are now three thousand men of this description employed to hold the country against the fugitives who have escaped the destruction you caused among them. It is not probable that the Seminoles, who wisely refused to take part in the war when its issue was doubtful, will now be disposed to renew the combat on their own account and under no new reason for so doing.

I refer to you two letters, the one from Major Arbuckle, the other from Dr. Spencer, and am, &c.,  
JOHN ARMSTRONG.

Major General JACKSON.

---

No. 4.

*The Secretary of War to General A. Jackson.*

WAR DEPARTMENT, *July 12, 1814.*

Sir: You will receive herewith the copy of a circular letter addressed to the governors of certain States requiring a body of militia to be organized and equipped and held in readiness for future service.

In case of actual or of menaced invasion of the district you command, you will call for a part or for the whole of the quotas assigned to the States of Tennessee and Louisiana and Mississippi Territory which shall have been organized and equipped under the aforesaid requisition.

In performing this duty you will be careful to avoid all unnecessary calls, to proportion the call to the exigency, and to have inspected without delay all corps entering on service, to the end that men who from any cause are unfit therefor be promptly discharged, and that a due proportion in all cases be maintained between officers and privates.

I have the honor, &c.,

J. ARMSTRONG.

Major General ANDREW JACKSON.

---

No. 5.

*The Secretary of War to General Jackson.*

WAR DEPARTMENT, *August 20, 1814.*

Sir: Your letter of the 24th of July has been received. Fort Jackson should not be abandoned. General Pinckney reports that he has maintained the garrisons in his district, where he has three companies posted, and he has been instructed to continue them so long as he shall deem the measure advisable.

If the report of your rumor be true a new military force from Tennessee should be called out. Governor Blount has orders to hold in readiness twenty-five hundred detached militia, and will be prepared for such an event.

I have the honor, &c.,

JOHN ARMSTRONG.

General JACKSON.

---

No. 6.

*General Andrew Jackson to the Secretary of War.*

FORT STROTHER, AT THE TEN ISLANDS, on Coosa, *December 16, 1813.*

Sir: The volunteers who enrolled themselves under the acts of Congress of February 6 and July 6, 1812, and who composed a part of my forces in the expedition against the hostile Creeks, believing their term of service to have expired on the 10th instant, have refused to prosecute the campaign any further. Not considering myself empowered to discharge them, I have permitted them to be marched to Nashville, there to await any orders which the governor or you might think proper to give them.

I have learned, since the arrival of Major General Cocke, who formed a junction with me on the 12th instant, that the term of service of the greater part of the forces under his command will expire in a few days, and of the whole in a few weeks. I had supposed that fifteen hundred of his men had been raised under the order of the governor founded upon the requisition of the President. This not being the case, I have thought proper this morning to order Major General Cocke back to his district to raise the fifteen hundred men according to that requisition, and whose term of service when thus raised will, I apprehend, be six months. I permit him to march back and discharge that portion of his troops whose term of service is within a few days of expiring; that part of them whose engagements are not quite so nearly at an end will remain to aid me in retaining possession of the posts which I have established and in keeping open the communication between them.

The want of supplies alone has prevented me from terminating the Creek war before this time. That, with the want of co-operation from the East Tennessee troops at a moment when their co-operation was indispensably necessary, compelled me to retrograde to this place after the battle of Talladega; and it continues to prevent me from recommencing operations. All that my utmost exertions could effect has been accomplished; and yet I have not at this time a sufficiency of breadstuff to justify another movement, even if I had troops to authorize it. All the difficulties and delays of the campaign are to be ascribed primarily to the negligence of the contractors. Had they furnished us with supplies no discontents would have arisen among my men, nor would they once have thought of the expiration of their term of service until they had accomplished the objects of their expedition; or rather those objects had been accomplished before that term, according to their own estimation, had expired. I shall not, however, cease my exertions to provide both men and supplies to enable me to prosecute the campaign to a successful termination. Its importance to our country is too great and the progress of it has been too fortunate to abandon it now.

After the battle of Talladega I was compelled to send my cavalry and mounted gunmen to Madison to recruit their horses. They will return when I shall be justified, by the approach of supplies, to order them on.

I have sent to West Tennessee to have other troops raised by voluntary enlistment to aid in terminating the campaign, and they are expected to arrive by the 25th instant. By that time it is hoped there will be a sufficiency of supplies to justify another movement.

I received on the 11th instant a letter of instructions from Major General Pinckney, who wrote from Milledgeville, and advised him by the return of his express of my situation.

Chenubby and Sashly, (from Sashly's fort, at Talladega,) two friendly and faithful Creeks, arrived here this evening, and advised me that the advance of the Georgia army, aided by the Cowetas, in a late engagement with the enemy, were compelled to retreat; that the hostile Creeks are assembled about sixty miles below me in great force; that they are about to advance and destroy their fort, and afterwards to attack me. Should this information prove correct, I will try my feeble force once more to save those friendly Creeks, and defeat the enemy again on the heights of Talladega. Had I one regiment of regulars added to those few heroes who will die with me or accomplish the objects of the expedition, I am well convinced I could in two months reach the walls of Pensacola. That is the source of the war, and thence it derives its support. Chenubby and Sashly inform me that the Spaniards at Pensacola have furnished one town with large supplies of powder and lead, and that they have invited the other towns to receive their supplies. *Delenda est Carthago*, or we shall never have peace with the Indians.

The 79th regiment would be of great service in defending the garrisons erected, and in keeping open the communications between them, if you should think proper to order them to aid in the prosecution of the campaign.

In haste, I have the honor to be, &c.,

ANDREW JACKSON.

HON. JOHN ARMSTRONG.

No. 7.

*General Jackson to the Secretary of War.*

FORT STROTHER, "*Ten Islands*," December 30, 1813.

SIR: By my letter of the 16th I advised you of the dereliction of the volunteer infantry, and of the necessity I was under of permitting them to be marched to Nashville to receive such orders as you or the governor might think proper to give them. Some few days after they had set out I received a letter from Governor Blount, recommending that I should dismiss or discharge them, but at the same time expressing an unwillingness to attempt the exercise of any such power himself. A copy of this letter I immediately sent after them, accompanied by a few prefatory remarks, stating that I did not consider myself empowered to discharge them, but that they were at liberty to avail themselves of all the benefits and privileges held out in the governor's letter.

I also informed you by the same letter that, having ascertained for the first time after General Coker had formed a junction with me on the 12th instant that the term of service of the greater part of his men would expire in a few days, I permitted him to march back that portion of them and discharge them near their homes, and ordered him to raise and send into the field with all practicable despatch fifteen hundred men, in conformity to the order of the governor, founded upon your requisition. One of his regiments, consisting of about seven hundred men, I have retained, but their engagements will terminate on the 14th of next month, and beyond that period they are resolved not to prosecute the campaign.

The cavalry and mounted gunmen whom, after the battle of Talladega, I had permitted to return into the settlements to recruit their horses and procure additional clothing, having got back as far as Fort Deposit, have refused to advance further, alleging that their engagements have expired, and that, not being bound to any further service, they are determined to render no more. I had directed them to halt at the nearest point at which forage could be procured for their horses until the approach of supplies should justify me in ordering them on; but having remained until the period arrived at which they conceived themselves absolved from their engagements, they broke up in disorder, and all but a few are now returning to their homes, in great confusion and irregularity.

The brigade of militia (never full) consists at present of only about six hundred privates. To fill up the deficiency I had despatched Brigadier General Roberts, who commands it, to his district on the 5th instant, and yesterday he reported that he had brought with him one hundred and ninety-one to the neighborhood of this place, where they were halted. I thereupon ordered him to parade them before the fort at nine o'clock to-day; but it was soon discovered that, influenced by some unknown cause, they had taken the stud, had changed their course, and were actually marching homewards. General Roberts went in pursuit of them last evening, under a belief that he could rally and bring them back, but has returned this evening without having effected the object.

To provide as effectually as I could for the deficiency which I foresaw would soon take place in the troops under my command, I despatched Colonel Carroll to West Tennessee on the 4th instant to raise

a new corps of volunteer infantry, to be engaged for six months, or during the campaign. On the 27th I received a letter from him, dated at Huntsville on the 23d instant, informing me that he had just arrived there, and that the number of men he had been able to raise I might estimate at six hundred, were all mounted, and engaged for only two months. Under those circumstances, I was greatly at a loss whether to accept them; but governed by the emergency, I concluded to do so, at the same time apprising them that I did not consider them as being fully embraced by any act of their own State or of Congress. To this effect, therefore, I immediately wrote to Colonel Carroll, and directed him to keep them in Madison, where their horses can be fed, until he should receive further orders. This is my situation in regard to forces; and I lament it is not more favorable in regard to supplies. To the want of these must it be ascribed that the campaign has not been before this brought to a successful termination. All my efforts have been unceasingly exerted to remedy the evil; and had they been properly seconded I should long ago have succeeded. The facility of transporting bread stuff from East Tennessee, where it abounds, to Fort Deposit, might reasonably have been expected under the arrangement which Governor Blount had made with McGee to insure a plentiful supply of this article at all times. Yet notwithstanding the assurances of the governor and of General Cocke, the contract with McGee, and my repeated requisitions upon him, I have never received a single pound from that quarter, except about 30,000 weight, delivered here on the 14th instant; a great part of which had been previously condemned at Highwassee, was afterwards packed up and brought here, and again attempted to be passed off; but was again inspected and condemned.

I instructed General Cocke when he left here to take the most effectual means in his power to have plentiful supplies furnished without delay at Fort Armstrong and Camp Ross, and transported hither; and if he should find, from the measures taking by McGee, that there was a likelihood of being disappointed by him again, that he should himself immediately cause a sufficient supply to be purchased and forwarded on.

On the 20th instant I despatched the quartermaster from this place, and the assistant adjutant general to Fort Deposit, Ditto's Landing, and Huntsville, to hasten on the supplies that might be there, with instructions to purchase themselves if the proper provision was not making by the contractors. The more certainly to effect the object I despatched, on the 22d instant, James Mitchell, one of the sub-contractors under the contract of Ward & Taylor, to the same places, directing him to proceed immediately to East Tennessee or to any other point where supplies could be more conveniently procured, if he should find them unprovided at those places. From him I received a letter dated at Ditto's Landing on the 24th instant, stating that he had found but a small quantity of meal at Fort Deposit, and none of meat; that at that place (Ditto's) there was not more meal than would be issued that day; and that within an hour he should set out to Huntsville, and the next day to East Tennessee; since then I have not heard from him.

I learn from General Claiborne, by a letter dated the ——— at Weatherford's, on the Alabama, about eighty-five miles above Fort Stoddart, that boats conveying 700 barrels of provision for the use of the army under my command were expected to arrive from the country below in a few days. I had expected that a concert would be established in the operations of our forces, and ultimately a junction formed; but I have lately learned that the arrival of a British force at Pensacola will probably occasion him to retrograde for the defence of Mobile Point. Should this be the case, I know not what calculation to make on supplies up the Alabama.

The militia who are now with me in the field believe they will be entitled to a discharge at the expiration of three months from the time they were mustered into service, which will be on the 4th of January. I, however, consider them to have been bound to six months' service, and shall not discharge them until they have performed it, unless otherwise instructed.

This, then, is my situation, and these are my prospects; and impressed by them, without feeling himself authorized to do anything to change them, Governor Blount has lately recommended a return to the settlements with all the forces under my command, and a temporary abandonment of the campaign. Such a measure, however, even situated as I am, is as opposite to my wishes as it is to my ideas of sound policy. Indeed, I think it could not be adopted without producing the most ruinous consequences. The friendly Indians who have espoused our cause, and whom we are bound to protect, would be exposed to almost certain destruction, and our frontiers be left still more subject than ever to the sanguinary depredations of an exasperated and vindictive enemy. Nor indeed in such an event could another campaign be commenced but at great additional expense and under many disadvantages, if, indeed, the means of recommencing could ever be provided at all. Independent of these considerations of policy, the obligations of duty would not permit me to adopt such a measure without the instructions of Major General Pinckney, who is made to believe I will maintain the positions I have established, unless compelled to abandon them by the last extremity. Upon this belief his arrangements for the prosecution of the campaign will probably be founded, and a disappointment in it might disconcert the whole of them.

Still retaining a hope that supplies will soon be furnished me, and that I shall not in the meantime be left destitute of a force sufficient for the purpose, I have even signified to General Pinckney an intention of again advancing beyond the Coosa, and to the Hickory Ground, in a short time. Such a movement I am exceedingly anxious to make, as well to remove that discontent which will always be produced in the minds of militia by keeping them long stationary, as to meet the enemy, who are again assembling below us, before their numbers and their confidence shall be too greatly increased by the tardiness of our operations. I have been cautious, however, not to give General Pinckney any such assurance of advancing soon as would, by leading him to make calculations upon it, expose him to any risk. Indeed, I have not been able to give him any absolute assurance that I could for any length of time maintain even the positions I have already established. All I could say to him or can to you is that when I abandon them without instructions from some competent authority, it will be because there are no means left me of retaining them. How soon I may be placed in this unhappy situation it were unsafe almost to venture an opinion. If the militia who are now with me, and who at present constituting my principal strength, should, in spite of all my endeavors, abandon me and the campaign on the 4th, I shall be left with only a few individuals, brave, indeed, but certainly incompetent to make any further advances, and perhaps to retain for any length of time the extent of country we have conquered. This is an event, however, which I trust may not happen, and which my best exertions shall be used to prevent; and although I cannot give an absolute assurance, I am not without a strong confidence that I shall be able to retain my present positions until some further and effectual provision can be made to attain *all* the objects of the expedition. That provision, I hope you will pardon me for suggesting, ought not to be

delayed, nor made under a contracted scale. The governor of Tennessee, whose aid I have repeatedly and pressingly solicited, strong as his wishes, does not consider himself authorized to grant it. If it is really the purpose of the government that the hostile Creeks should be effectually subdued, and a strong lesson furnished to all who are or may be seduced by the real instigators of this war, as well as to the instigators themselves, would it not be well to invest the governor of Tennessee with such power as may enable him to draw forth and command the strength of his State? The system of expedients, temporary in their duration, and limited in their operations, will never be found, if I may be bold to say so, to answer the purposes of effectual warfare—such a warfare as, while it does honor to our country, may also do her some solid and lasting good. If sufficient supplies could be regularly furnished, I entertain no doubt, after what has been done, that with three thousand men, or even a smaller number, imperiously bound to service, and feeling the strength of that obligation, all the objects of the government in this quarter of the Union could in a short time be attained. That these objects should be soon and completely attained, I imagine I see and even feel the necessity so clearly, that I cannot doubt it is seen and felt by the government. Neither can I doubt that under such an impression the best means in their power will be thus applied. Under such a persuasion, I shall, with my last exertions that can be used without rashness, endeavor to maintain my present position until otherwise instructed.

It will not be inferred, I presume, because a number of the forces under my command, whose term of service, in my belief, had not expired, and whom, at all events, I was not empowered to discharge, have abandoned the campaign, that no means were used to prevent it; indeed, I have left no means untried. No less than two open and daring mutinies have I been compelled to be put down by force. I say by force although that force was not exerted. On the 18th of November, the militia were thus reduced to order; and on the 9th instant I was driven to the same resort by the volunteer infantry, which then equally succeeded. But it was soon discovered that the spirit which was suppressed for a time was far from being extinguished. In a few days it was ascertained, upon the best authority, that they had immovably resolved not to re-cross the Coosa, and I had no means of compelling them, without hazarding the lives of the few companies of brave men in whom alone I could rely; nor could I have resorted even to this desperate measure with any hope of success. It was, therefore, necessity alone which gained them permission to be marched to Nashville, there to await such orders as might be given them. What orders you will give and what future disposition, if any, you mean to make of them, I am very anxious to know. The governor informs me that he has some time since written to you on this subject, and presume it will not be long before I hear your determination.

DECEMBER 31, 1813.

I have to-day received a letter from Governor Blount,\* (a copy of which I send you,) stating that, although he was not at liberty to grant a discharge to the militia, or to say how long they were bound to service, yet that when they entered the service he considered them bound to only three months, and expressing a wish that at the expiration of that period they might be discharged or dismissed until the President's will be known. The contents of this letter, at his request, I have made known to them this evening, and the result can easily be foreseen. They will not remain beyond the 4th of next month, and although I do not feel myself authorized to grant them a discharge or a dismissal from the service, (being of opinion they are bound to six months' service,) yet under present circumstances I shall not oppose them by force. What your opinion and wishes upon the subject may be I hope I shall be soon advised. Notwithstanding the gloominess of the prospect, I am still resolved to maintain my positions until I receive instructions, and until means are provided, if they are meant to be provided, for the further and more effectual prosecution of the campaign. My force will be small, but I rely with confidence that it will be sufficient for this purpose.

I despatch General Roberts in pursuit of those new troops whom he lately brought on, and who so shamefully deserted, with instructions to exert all the means and power he possesses to have them apprehended and marched to headquarters under a strong guard. It is high time that energetic measures should be adopted if any good is to be hoped for from the militia.

I have been prevented, by the difficulties of cutting a passage over the mountains in the fore part of the campaign, and by the confusion which has existed in my camp since, from sending on inspection returns. Accompanied with this I send you a draft of this country, drawn by my topographical engineer. As explanatory of one of the principal causes which compelled me to retrograde after the battle at Talledega, I send you also a copy of the order from General Cocke to General White, issued November 6, which caused the latter to withhold from me the co-operation which I had been made to expect when I set out thither. I presume it requires no comment.

I have the honor, &c.

ANDREW JACKSON, *Major General.*

Hon. JOHN ARMSTRONG.

No. 8.

*General Jackson to the Secretary of War.*

Fort WILLIAMS, April 25, 1814.

SIR: I advised you in my letter of the 2d instant of the success which attended my late expedition to the Tallapoosa.

Having returned to this place and made the best arrangements in my power, I commenced the line of march for Hoithlewaule, where the enemy were understood to have collected their remaining forces to try the fortune of another battle. General Pinckney having assured me of supplies when I reached the Tallapoosa, and my horses being very much reduced, I set out with only eight days' rations.

I had expected to reach Hoithlewaule on the 11th but I was delayed by very heavy rains, which overwhelmed me on the march, and rendered the country almost impassable. On the 13th, I arrived at Fooshalchee, two miles below Hoithlewaule, and about ten below Tuckabatchee.

As soon as I commenced the line of march, I advised Colonel Milton, who then had the command of

\* This letter is not on the files of the department.

the advance of the eastern division, of the object I had in view, and urged him to place himself in the best situation for rendering me all the assistance in his power. On the way, I advised him of my progress, and of the reliance I placed on the supplies which General Pinckney had promised me, through him. He was then at Fort Decatur, opposite Tuckabatchee, and about eight miles above Hoithlewaule, and had been from the 3d of the month.

On reaching the river I was astonished and mortified to find that all the enemy, except eight or ten, whom I took as prisoners, had effected their escape by crossing it; and so totally unapprised was Colonel Milton of this movement, which might so easily have been prevented, that the next day, while Coolome, Fooshalchee, and Hoithlewaule were in flames, I received his letter advising me that the day following he intended to pass over and give them battle. Yet he had received all my letters!!

The river being very full, I was unable to pursue the enemy immediately, and the want of supplies, which I had expected to procure from Colonel Milton, prevented me from pursuing them as soon afterwards or with such a detachment as I wished. As soon, however, as I was enabled to procure a small supply from Fort Decatur, I ordered a detachment to cross the river and descend it, for the purpose of making discoveries, while I, with the main body of the army, advanced immediately to the confluence. Having reached Tuskegu, in the fork, on the 17th, I had the mortification to find that the enemy had again escaped me by flight, and by crossing the river. It was not long, however, that I had any occasion of uneasiness on this account. Neither the delays which I had lately experienced, nor the flight of the enemy, had increased the difficulties, nor procrastinated the termination of the campaign. It was already over. The enemy now became sensible that no place in their own country, or in any to which they could fly, would afford them security, began to throw down their arms and surrender unconditionally. From every quarter they were hourly arriving at my encampment to supplicate mercy and a suspension of hostilities. Weatherford and the King of the Hickory Ground tribe, together with several other distinguished leaders, were among those who came in, and were thankful to receive any terms of peace that might be offered them.

It being now evident that the enemy had abandoned all idea, and, indeed, had lost all power of continuing the war any longer, and General Pinckney having joined me on the 20th instant, neither my services nor those of the Tennessee troops could any longer be reckoned necessary at that post. Accordingly, I was ordered by General Pinckney, on the 21st, to march them back to Fort Williams; and, after dispersing any bodies of the enemy which might still be assembled within striking distance, and providing for the maintenance of the posts which form the line of communication between Tennessee and the junction of Coosa and Tallapoosa, to discharge the remainder. Within two hours after receiving the order I was on the line of march.

To-morrow I detach 500 men, under the command of Brigadier General Johnston, to scour the Cahawba, with instructions, after dispersing any bodies of the enemy that may still manifest symptoms of hostility, to unite with me at Fort Deposit.

For the defence of the posts, and to keep open the line of communication, I shall leave 400 men at this place, 250 at Fort Strother, 75 at Fort Armstrong, and Captain Hammond's company of rangers at Fort Deposit, under the command of their proper officers. Having made this and other necessary arrangements, I shall without delay march the remainder of my troops to Tennessee and discharge them; after which I must no longer be considered accountable for the manner in which the posts are maintained, or the line of communication kept open. The officer left to command these forces will be instructed to make his reports to the officer commanding at Fort Jackson.

The commissioners appointed to make a treaty with the Creeks will have little to do but assign them their proper limits. Those of the friendly party who have associated with me will be easily satisfied, and the remainder of the hostile party, pleased that their lives were spared them, will thankfully accept, as a bounteous donation, any district which may be allowed them for their future settlement. Will you permit me to suggest that a line running from some point on the Georgia line, westwardly to New Yankee, on the Tallapoosa, and thence to the Coosa, a mile or two above this place, would leave to the north of it a district of country quite sufficient for their purposes, and perhaps the most suitable that could be assigned them. Provisions might be made for the Big Warrior and his immediate adherents on the south of that line, if that should be found necessary for any reasons.

Such an arrangement, I am satisfied, would be the best for the United States, and, I believe, for the Creeks, and such an arrangement it will require but little negotiation to effect.

I have the honor to be, very respectfully, sir, your obedient servant,

ANDREW JACKSON, *Major General.*

No. 9.

*General Jackson to the Secretary of War.*

HUNTSVILLE, *May 8, 1814.*

SIR: The Creek war being terminated, the West Tennessee troops will be discharged, at Fayetteville, at the 10th, those of the eastern division, who are not left to garrison the posts, will be discharged at Kingston as soon as they can be marched there.

The detachment I sent to scour the Cahawba, in conformity with the order of Major General Pinckney, have returned, bringing with them three men prisoners, who were thought to be unwilling to accede to the terms of peace which had been offered them. A considerable number of women and children, whom they also took, were sent on the east of the Coosa, to that district which had been pointed out as the most proper for their present settlement.

The famished condition of the friendly Creeks induced me to order 23,000 rations, to be furnished at Fort Williams and Fort Strother, for their present subsistence.

A portion of the Cherokees, who fought very valiantly with us, having become very much reduced by what they parted with to my army, I have directed the contractor to issue to them, also, 14,520 rations, which may enable them to subsist until the further wishes of the government can be known.

I have the honor to be, with great respect, your obedient servant,

ANDREW JACKSON, *Major General.*

Hon. JOHN ARMSTRONG, *Secretary of War.*

## No. 10.

*General Jackson to the Secretary of War.*

NASHVILLE, June 13, 1814.

SIR: Pursuant to the wish of the President, as expressed in your letter of the 24th ultimo, I shall set out for Fort Jackson on the 25th instant, and there "consummate," as speedily as possible, the arrangements committed to Major General Pinckney in relation to the hostile Creeks. Until that is completed, and the boundary lines run and marked, good policy forbids the discharge of the militia now posted in the Creek nation, or those under marching orders to relieve them. Various reports relative to the disposition of part of the hostile party, who has fled with McQueen to the Seminoles, and the inimical disposition of the latter tribe towards the United States, as well as the rumor that a British force is hovering on our southern coast, all combined, dictate the wisdom of continuing the militia in service until the whole preliminaries are consented to and signed and the boundary lines marked, as aforesaid. This done, the militia can be promptly discharged without any hazard of evil consequences arising from this step. On the contrary, should the militia be discharged—the Indians under McQueen embodied and joined by the Seminoles, the British hovering on our coast, the Choctaw and Chickasaw nations wavering in their friendship to the United States, which, I have reason to believe, is the case—evil consequences might ensue before a competent reinforcement could arrive to crush them. I cannot, therefore, think myself justified in discharging the militia, without your order for that purpose, prior to the full and entire completion of the aforesaid arrangements, to facilitate which, permit me to suggest the propriety of immediately authorizing a suitable person or persons to run and mark the boundary lines so soon as the preparatory arrangements are entered into. This is suggested from a full conviction that no time is like the present, when the *past* is fresh on their minds, to secure ample remuneration for this war.

I will subjoin this remark with regard to the employment of the friendly Creeks, that more difficulty, I fear, will arise with them, in the establishment of their boundary lines, than of the hostile party; therefore no reliance could be placed on such a species of force.

I am, respectfully, sir, your most obedient servant,

ANDREW JACKSON, *Major General United States Army.*

Hon. JOHN ARMSTRONG, *Secretary of War.*

I unfold this letter to communicate that Colonel Blanchard, aid to Governor Holmes, just arrived (eleven o'clock a. m.) direct from Washington, Mississippi Territory, and states to the major general that two gentlemen, direct from Pensacola, had arrived in that country, and stated that the hostile Creeks were, on or about the 12th ultimo, at Pensacola, receiving new rifles and ammunition from the governor, 2,500 in number. The major general presumes this to be McQueen's party and the Seminoles.

Very respectfully,

ROBERT BUTLER, *Adjutant General.*

## No. 11.

*General Jackson to the Secretary of War.*HEADQUARTERS SEVENTH MILITARY DISTRICT, *Fort Jackson, July 24, 1814.*

SIR: I have the honor to acknowledge the receipt of yours of 25th June. My last, under date 14th instant, will advise you of the measures which have been adopted to ascertain the truth touching the reports in circulation relating to apprehensions from Pensacola. A runner I had sent to Deer Island returned on the 20th, bringing with him a new British musket, which had been delivered to an Indian who had visited the British, and obtained it from them. He states that a considerable number of arms, with a large quantity of ammunition, had been distributed to the Indians about three weeks since, and that the British had sailed under a promise to return in six weeks thereafter; that about ten days since they returned with three large vessels and four thousand men; that they have deputed runners to all the Indian towns with invitations to visit them; that the British are to the west of Apalachicola bay, I presume (from the information of the Indian) in the bay of St. Rose, mouth of Choctaw river. You will pardon me for suggesting that the months of September and October are those in which we may anticipate a blow from a foreign enemy, if a stroke be intended in the south. The waters are, during those months, low, the swamps and morasses passable with infantry, and the sickly season in that climate passing away. As soon, however, as the capitulation of submission shall be signed, which will be in a few days, I shall take the earliest measures to comply with the wishes of the President by discharging the militia now in the field. When this shall be done, all the posts from Fort Jackson to Georgia and Tennessee will be abandoned. And here I must require to be advised whether it is the *order* of the President that this post be left defenceless, and a frontier of eight hundred miles opened to the incursions of Francis, McQueen, and other marauders who may be incited to mischief by British influence and Spanish intrigue.

I have the honor, &c.,

ANDREW JACKSON, *Major General Commanding.*

Hon. JOHN ARMSTRONG, *Secretary of War.*

## No. 12.

*General Jackson to the Secretary of War.*HEADQUARTERS SEVENTH MILITARY DISTRICT, *Fort Jackson, July 31, 1814.*

SIR: I have just received intelligence of the abandonment of Fort Mitchell by the militia left for its defence; also that it is now garrisoned by friendly Indians, under the officer left in command of that post, and that the militia will leave Bainbridge, Hull, and Decatur, their term of service having expired. I have but the third infantry here, 451 effectives, non-commissioned officers and musicians included; have ordered from Forts Williams and Strother 300 Tennessee militia. Measures have been taken to effectuate the transportation of the provisions and public stores to this place, but, for want of the requisite means, there will be difficulty in getting them to Fort Decatur. The medium through which we formerly received supplies broken up, the Indians in this quarter must be fed from supplies brought up the Alabama. Fed and clothed they must be, or we will have the whole strength of the Creek nation to fight under the banners of Spain and Britain. By Judge Toulmin, and from other sources, not official, I am advised that Lieutenant Colonel Benton, with the 39th, and Colonel Nixon, commanding the territorial militia, before I arrived at this post planned an expedition against the Creeks on the Escambia; that, on the march, Lieutenant Colonel Benton, being taken sick, returned, and the command devolved on Colonel Nixon. In prosecuting this expedition the colonel pursued the Indians over the Spanish lines. The Indians were at Pensacola when Captain Gordon arrived there.

If the war continues expense must not be taken into consideration. Energetic measures for defence, with ample means, will soon put a period to it in this quarter; without these success cannot be calculated on. As far as I am advised, the 2d, 3d, 39th, and 44th regiments, for the defence of this district, are not more than half full; the garrisons in a very poor state of defence, notwithstanding the sums which have been expended on them; but with the above force, added to the 7th infantry and the artillerists, I trust the district can be defended and the American character maintained.

I shall, as soon as practicable, visit the posts in the lower country, ordering on the 3d infantry, and leaving this post and Decatur possessed by the militia and friendly Indians, until the public stores can be transported to Alabama heights, when I shall, unless otherwise directed, discharge the militia, agreeably to the wishes of the President, as expressed in yours of the 25th June, and leave the friendly Indians in the best possible condition to defend themselves and their nation.

I have the honor, &amp;c.,

ANDREW JACKSON, *Major General Commanding.*HON. JOHN ARMSTRONG, *Secretary of War.*

## No. 13.

*General Jackson to the Secretary of War.*HEADQUARTERS SEVENTH MILITARY DISTRICT, *Fort Jackson, August 10, 1814.*

SIR: Pursuant to instructions and the exercise of my best judgment, I am enabled to transmit the result of the convention alluded to in my last. The articles of capitulation, &c., which I forwarded by Charles Cassady, esq., of Tennessee, (who I beg leave to introduce to your acquaintance,) will, I trust, be considered as containing ample indemnity for the past and security for the future as to the Creek nation.

I have thought proper to transmit papers so important as those accompanying this communication by Mr. Cassady, who, at my request, accompanied me as a private secretary, &c. He has been of essential service, particularly as I was without an aide-de-camp until the arrival of Captain Thomas L. Butler, of the 28th regiment of infantry, who reached me on the 2d instant. I have to desire that Mr. Cassady be remunerated for his attentions to me and services to the United States. Mr. Cassady being present, hearing all the conversations, &c., between the chiefs and myself, can give a better view of the state of things in this quarter than could be communicated on paper. He can also explain the causes of delay and difficulties I had to encounter, arising from the contents of a letter written by General Pinckney to Colonel Hawkins, and, agreeably to the instructions of General Pinckney to the colonel, communicated to the chiefs previously to my arrival here.

This letter holds out promises of indemnity for claims they might have against the United States not within my powers or authority to notice. This communication, with Colonel Hawkins's answer thereto, at the earnest solicitation of the chiefs, I forward with the treaty, for the consideration of the President of the United States.

I enclose the talk of a British officer given to three chiefs, who were present, and related the same to me in my tent. The discovery of their duplicity, and the true talk sent by the British officer to the Creek nation, I also forward. In addition, I also transmit a copy of a letter from William H. Robinson and Charles Murrie, living in Pensacola.

These gentlemen, from every information, may be relied on. There can be no doubt of the British being on our coast, and that they have armed the Indians, and amply supplied them with arms, ammunition, and clothing. The whole Creek nation is in a most wretched state, and I must repeat that they must be fed and clothed, or necessity will compel them to embrace the proffered friendship of the British. You will find, from the information contained in the letters from Pensacola, that the British officers are clothing the Indians in their best scarlet. This policy is intended to draw the friendly Indians to their standard, and if not counteracted by clothing them the winter's cold will compel them to accept the British boon. I refer you to Mr. Cassady for information on this head. The friendly party insist that they have a right to their part of the annuity; that although part of the nation violated former treaties, they did not. As they must be clothed and fed, this claim might be closed forever by a round sum in clothing. The whole number, from the last return, drawing rations from the United States, at different posts, amounts to eight thousand two hundred. To clothe the whole number will cost a considerable sum, but this sum would be

very inferior to the value of the territory ceded to the United States. In addition to which, I may observe that the cession has made them our friends, and will, in future, effectually prevent their becoming our enemies. From an estimate made by the topographical engineer, the ceded territory contains twenty millions of acres of the first-rate land within the nation, besides opening a communication from Georgia to the Mississippi territory, and a rich and extensive settlement from the river Perdido to the extremity of Madison, intercepted by a small strip of land claimed by the Cherokees south of the Tennessee river, which can be obtained from them for a moderate compensation.

This country, populated, becomes an effective defence to the southwestern frontier. The line should be run without delay, and the land offered for sale. I would submit, for the consideration of the President and Congress, whether it might not be good policy to give to each able-bodied man who would settle upon this land half a section, at \$2 per acre, payable in two years, with interest. This measure would insure the security of this frontier, and make citizens of the soldiers who effected its conquest. I shall, on the 11th instant, leave this, with the 3d infantry, for Mobile, and one company of the new recruits of the 44th infantry, ordered from Nashville, which reached this place last evening. I intended to discharge the militia on its arrival, but a sound discretion, exercised on the most mature deliberation, forbids the immediate discharge of the militia of Tennessee; they are especially required to garrison this post and Decatur during the absence of the regular troops.

General Pinckney advises that he has made a requisition upon Georgia, pursuant to which, troops are on their march to occupy the posts from Decatur to Georgia. These troops can be concentrated to repel any British or Indian force that may attempt to commit aggressions against the friendly Indians or the Georgia frontier.

I received your despatch of the 2d ultimo, enclosing the remonstrance of the citizens of Mobile referred. From a view of a chart of the bay, the importance of its possession for the security of our gunboats and other craft, and to keep up a free communication with Orleans, from whence we draw our supplies, I determined at once to give orders that Mobile Point be reoccupied by our troops. The United States in possession of Pensacola and Mobile well defended, our whole coast and country in this quarter would be secure.

I cannot close this communication without observing that I am under great obligations to Colonel Hawkins for his aid during the negotiations with the Indians.

I have the honor, &c.,

ANDREW JACKSON, *Major General, Commanding.*

Hon. J. ARMSTRONG, *Secretary of War, Washington City.*

20TH CONGRESS.]

No. 373.

[1ST SESSION.]

RELATIVE TO A FURTHER APPROPRIATION FOR THE ARSENAL AT AUGUSTA, MAINE.

COMMUNICATED TO THE SENATE FEBRUARY 26, 1828.

Mr. HARRISON, from the Committee on Military Affairs, to whom was referred a resolution relative to the arsenal at Augusta, in the State of Maine, reported:

That in their opinion a further appropriation is necessary for the erection thereof; but as the bill making appropriations for the military service of the year has been referred to the Committee on Finance, the Military Committee, after expressing their approbation for a further appropriation, ask to be discharged from the subject, and that it, together with the estimate from the War Department, be referred to the Committee on Finance.

ORDNANCE DEPARTMENT, *Washington, February 20, 1828*

Sir: In answer to the inquiry of the Committee of the Senate on Military Affairs, relating to the expediency of making further appropriations for the arsenal at Augusta, in Maine, I have the honor to state that the appropriation made for that arsenal at the last session was designed for the erection of a small depot only, and did not contemplate the establishment of an arsenal of the larger size, such as would be requisite for fabricating military supplies. It was supposed that the small depot would be sufficient to meet the demands of the service in that section of the country; and also that the appropriation of fifteen thousand dollars made at the last session would have been sufficient for its erection. The more accurate information upon this subject which has since been obtained leads to a different conclusion.

It was supposed that the supplies required at the depot at Augusta might be drawn with facility from the arsenal at Watertown. The two positions are about two hundred miles distant, and the communication between them by water is easy and convenient. But this means of communication is liable to be cut off in time of war; and it is ascertained from those who were well acquainted with the occurrences in that quarter during the late war, that the water communication between these places at that period was entirely suppressed by the enemy, and that all supplies had of necessity to be transported by land. The expenses and delays incident to this mode of transportation would render the depot at Augusta nearly useless in time of war, unless it possessed the means within itself of fabricating some of the essential military stores.

The State of Maine, being situated at one of the extremities of the United States, and having a very extensive and assailable line of frontier, both maritime and inland, would be particularly liable to become the seat of war in the event of a recurrence of hostilities with a foreign power. The experience of the

last war confirms this view of the subject. A powerful enemy held strong posts in the immediate vicinity of the State during the whole of the war, and for a considerable time held some of our posts within the limits of the State.

A part of the country so much exposed, and liable to become the seat of war, requires that an arsenal upon a scale adequate to furnish the military supplies for its defence should be established. An establishment sufficient for this purpose, it is conceived, should consist of the following buildings, viz: an arsenal, 30 by 100 feet; a storehouse, 30 by 80 feet; a dwelling-house, for officers' quarters, 30 by 36 feet; barracks for artificers, 25 by 50 feet—all of two stories; also, a magazine for gunpowder, a gun-house for artillery carriages, and three small workshops for repairing small-arms, constructing gun-carriages, and preparing ammunition. And it is estimated that a further appropriation of thirty thousand dollars, in addition to the sum of fifteen thousand dollars already appropriated, would be sufficient for their erection. The whole amount here stated would not be required at this time; fifteen thousand would be sufficient for the service of the present year.

I have the honor to be, sir, your most obedient servant,

GEO. BOMFORD, *Brevet Colonel, on Ordnance Service.*

HON. J. BARBOUR, *Secretary of War.*

20TH CONGRESS.]

No. 374.

[1ST SESSION.]

LIST OF CADETS AT WEST POINT IN 1828, AND THE RULE IN MAKING APPOINTMENTS  
AND FILLING VACANCIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 29, 1828.

WAR DEPARTMENT, *February 28, 1828.*

SIR: In obedience to a resolution of the House of Representatives of the 18th instant, directing the Secretary of War to "furnish a list of the cadets now at West Point, their names, the States and counties or congressional districts from whence they were sent, and the dates when they were received and appointed; also, a statement showing the former and present existing rule of the department as practiced relative to the manner of filling up vacancies," I have the honor of submitting the accompanying statements, marked A.

In explanation of this document, it is proper to remark that, from the date of admission of many of the cadets, it might be inferred that they have been appointed by me. The fact, however, is, that my predecessor appointed one hundred and twenty-three for 1825, thirty-four for 1826, and one for 1827, as will appear by the accompanying list, marked B. From courtesy to him, and deference to the persons appointed and their friends, I forbore to interfere, and the appointees were all permitted to enter the academy as though they had been regularly appointed.

When finally it became my duty to act, I determined, with the approbation of the President, to whom the power of appointing belongs, to distribute these appointments equally throughout the United States, in the country as well as the populous cities, the latter, heretofore, having had an undue share.

The representation in both houses of Congress having been already established as the rule of distribution among the States, I determined to appoint a cadet from every congressional district and two from each State, without regard to the local position of the latter in the State. Time, however, was necessary to carry this determination into effect, as those who had been appointed were to retain their situations for four years.

It is believed now that every district in the Union has, or will have in June next, a cadet, if a warrant is applied for.

It so happens that the number of cadets authorized by law corresponds nearly with the total number of the two houses; but as the experience of many years has shown that a considerable number of those appointed, from some cause, either inaptitude or irregular conduct, are dismissed, it has been found necessary, to keep up the establishment to the number prescribed by law, to make some appointments in anticipation to meet those casualties; these are reserved for extraordinary cases, and are made promiscuously throughout the Union.

In making appointments, one of the leading considerations inducing a preference is the claim of the applicants on the ground of public services rendered by their ancestors. I eagerly seize the opportunity of cancelling a debt of gratitude by the appointment of the descendants of those who have been thus distinguished by such services, *civil or military*. And although poverty, the rest being equal, has a decided preference, yet I have not thought it just or politic to confine appointments exclusively to the poor. The mere circumstance of wealth is not an insuperable bar to appointment. The institution is supported mainly by contributions drawn from the wealthy. To exclude a youth, otherwise meritorious, simply because he or his friends are wealthy, is therefore believed to be unjust. It is deemed politic that some of the officers of a standing army in a republican government should find, in their civil interests, a guarantee to their fidelity and devotion to the *civil* authority, and it is apprehended that, were appointments exclusively confined to the poor, an impression might be produced that it was an eleemosynary establishment, whose effect is somewhat abasing. On the contrary, where the rich and poor are mingled together, fed at the same table, dressed in the same manner, and in all things made equal, we have a practical illustration of that equality which is the true basis of our republican institutions, and whose effect cannot but be propitious to their duration. In making selections, I have received and treated with great respect the recommendations of the members of Congress, as well as respectable private citizens, and have endeavored to confer the appointments on those who presented the best promise of justifying this mark of their country's confidence.

Presuming that the rule by which I am governed in selecting persons to superintend the annual examination, from its intimate connexion with the information called for, would not be unacceptable, I ask the favor of the House to communicate that also.

Heretofore the number of visitors had been small, and they principally officers of the army. I was sensible that strong objections existed in remote parts of the Union against the institution, and, indeed, suspicions were indulged and uttered that sectional partialities prevailed with its officers. Believing the success of the institution as essentially identified with the prosperity of the republic, it was most desirable that these objections, if unfounded, might be removed. I knew of no plan which promised more successfully to attain this desirable object than that of uniting distinguished citizens from different sections of the Union who might annually inspect every branch of the administration of this highly interesting establishment. If there were faults of any kind, that they might be pointed out and corrected; if none, that the fact might be proclaimed and satisfaction given to our constituents. As every portion sent its children to this establishment and could not fail to take a deep interest in its successful operation, I deemed it but an act of justice to every part of the Union to pursue this course. The testimony in favor of the institution of such characters as I have referred to, coming from the different quarters of the Union, with no motive to disguise the truth, was of too high a value to be brought in competition with the saving of a few dollars and cents. The selection, therefore, has been guided by these considerations, and the most distant States, as well as the most contiguous, have furnished visitors, and I trust I shall be pardoned for adding that if the number of applications for admittance furnishes anything like a correct standard by which to measure the public approbation, the institution may be said to stand high in favor with the American people.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives.*

## EXPENSES OF VISITORS OF THE MILITARY ACADEMY AT WEST POINT, FROM 1817 TO 1827.

COMMUNICATED TO THE SENATE MARCH 3, 1828.

DEPARTMENT OF WAR, *February 28, 1828.*

SIR: In obedience to a resolution of the Senate of the 19th instant, I have the honor of submitting herewith a statement of the Third Auditor of the Treasury, showing "the different sums paid to defray the expenses of persons appointed as visitors of the Military Academy at West Point, from the year 1817 up to this time."

I have the honor to be your obedient servant,

JAMES BARBOUR.

The PRESIDENT of the Senate of the United States.

TREASURY DEPARTMENT, *Third Auditor's Office, February 22, 1828.*

SIR: I have the honor to transmit herewith a statement showing the different sums paid to defray the expenses of persons appointed as visitors of the Military Academy at West Point, from the year 1817 up to the 30th of September, 1827, and the amount paid in each year, in pursuance of the resolution of the Senate of the 19th of February, 1828, and of your instructions.

I have the honor to be your obedient servant,

PETER HAGNER, *Auditor.*Hon. JAMES BARBOUR, *Secretary of War.*

*Statement showing the different sums paid to defray the expenses of persons appointed as visitors of the Military Academy at West Point, from the year 1817 up to the 30th of September, 1827, and the amount paid in each year, in pursuance of the resolution of the Senate of the 19th of February, 1828.*

For the years 1817 and 1818 no expenses appear to have been paid.

In 1819.....	\$481 37
In 1820.....	175 50
In 1821.....	167 50
In 1822.....	51 00
In 1823.....	265 16
In 1824.....	624 54
In 1825.....	870 48
In 1826.....	2,743 25
In 1827.....	2,255 51

It may be proper to mention that the above statement does not embrace the transportation of baggage of the officers of the army, who from time to time constituted a part of the board of visitors, and have received that allowance.

PETER HAGNER, *Auditor.*TREASURY DEPARTMENT, *Third Auditor's Office, February 22, 1828.*

## EXPENDITURES AT THE ARMORIES, AND ARMS, ETC, DURING THE YEAR 1827, MADE THEREAT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 6, 1828.

DEPARTMENT OF WAR, *March 5, 1828.*

SIR: In pursuance of the act of Congress passed the 2d of April, 1794, concerning arsenals and armories, I have the honor to transmit herewith a statement of the expenditures of the United States armories, and of the arms, &c., made therein during the year 1827.

I have the honor to be your obedient servant,

JAMES BARBOUR.

The SPEAKER of the House of Representatives.

ORDNANCE DEPARTMENT, *March 4, 1828.*

SIR: In pursuance of an act concerning arsenals and armories, passed the 2d of April, 1794, I have the honor to transmit herewith a statement of the expenditure at the national armories, and of the arms, &c., made therein during the year 1827.

Very respectfully, I am, sir, your most obedient servant,

GEO. BOMFORD, *Brevet Colonel, on Ordnance Service*

HON. JAMES BARBOUR.

[1ST SESSION.]

## FORTIFICATIONS AT BARRATARIA, LOUISIANA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 7, 1828.

WASHINGTON, *January 20, 1828.*

SIR: I have the honor to call your attention to the expediency of making an appropriation during the present session for the defence of Barrataria, in the State of Louisiana, and beg leave to offer you the following considerations:

New Orleans, one of the most important and assailable positions in this country, is, after twelve years of peace, entirely open and defenceless on the west side of the river.

A regular work has been planned at Barrataria, a position which guards, at one point, all the passes into the country in that quarter.

The works on the east side are nearly complete, yet the engineers for the superintendence of these works will remain almost unoccupied, which will occasion their detention in that quarter one year longer than necessary.

The materials, which must be procured at a great distance, ought to be provided during the present year, so as to commence early the next season, that the work may not be interrupted by the heat and dryness of the climate.

An appropriation of fifty thousand dollars will be sufficient.

This is in conformity with the views of General Bernard, who may be consulted, and Captain Chase, whose letter is handed, enclosed.

I am particularly urged by the local authorities to press this subject strongly upon the department; and the inhabitants of New Orleans are very anxious for the completion of the defences. The appropriation to that object is very small, and much less than usual. I hope you will perceive the necessity, or at least the public benefit, that will accrue from the recommendation now of the additional fifty thousand dollars.

With, &c.,

J. S. JOHNSTON.

HON. JAMES BARBOUR, *Secretary of War.*

WAR DEPARTMENT, *Washington, January 23, 1828.*

SIR: Your communication of the 20th instant, on the subject of the defence of Barrataria, has been received at this department, and I have now the honor to transmit a report of the chief engineer on this subject, prepared by my directions, from which will appear the reasons that have induced the department to defer asking for an appropriation for the commencement of this work.

In this report I fully concur, and think it would be highly desirable to procure an appropriation for this work at the present session of Congress; but as it was deemed necessary to reduce the estimates for fortifications as low as possible, without injury to the service, appropriations have only been asked for for the works now in progress, and for such new works as were deemed of the most pressing importance.

I have, &c.,

JAMES BARBOUR.

HON. J. S. JOHNSTON.

ENGINEER DEPARTMENT, *Washington, January 23, 1828.*

SIR: In answer to the communication of the honorable J. S. Johnston, relating to the commencement of the fortifications for the defence of Barrataria, which has been referred to this department, I have the honor to report that the contemplated work at Barrataria is considered of the greatest importance to the safety of New Orleans, as it commands the entrance into Barrataria bay, from whence there are several passages leading to the Mississippi; that the works for the defence of New Orleans on the east of the Mississippi, with the exception of the tower of Bayou Dupré and an improvement of Fort St. Philip, are nearly completed; that the officers who are now employed in the construction of the works at present building, and who, by a long residence in that vicinity, have become completely acclimated, could be advantageously employed in the superintendence of the work at Barrataria; and that this work, if constructed immediately, profiting by the advantages of a matured and well-organized system, which has been created by these officers, would, doubtless, be erected at an expense considerably less than that which would be incurred at some future period, when that system shall no longer exist; that the immediate commencement of this work has been strongly urged by General Bernard, a member of the board of engineers, and by Captain Chase, the senior officer of engineers on the Gulf of Mexico; and that an appropriation for this object would have been asked by the department, in presenting the "annual estimate" for fortifications, but for the desire of limiting the amount of that estimate to the sum usually appropriated by Congress for fortifications; that if Congress should see fit to make an appropriation for the commencement of this work at this present session, arrangements could be made for the collection of materials, and the work might be completed, with suitable appropriations, in three years.

I have, &c.,

ALEX. MACOMB, *Major General, Chief Engineer.*

HON. JAMES BARBOUR, *Secretary of War.*

NEW ORLEANS, *November 25, 1827.*

SIR: The extreme unhealthiness of the positions on the seaboard of Louisiana selected for works of defence renders it very desirable that these works should be commenced and completed with as little delay as possible under the superintendence of those officers who have already become acclimated, without obliging others to encounter similar risks of life and health.

The construction of the fort at Barrataria alone remains to perfect the system of defence for Louisiana. This fort may be constructed in three years for the sum originally estimated for it.

The sum of \$75,000 would enable us to commence and prosecute the operations at Barrataria with great advantage during the year 1828. From calculations which I have made, founded on experience, the fort can be built for the sum called for in General Bernard's estimate, embracing all contingent and extraordinary expenses—say as follows:

Appropriation for 1828.....	\$75, 000
Appropriation for 1829.....	94, 500
Appropriation for 1830.....	94, 500
Original estimate .....	264, 000

The completion of the Chef Menteur and Bienvenue defences will leave me at liberty to commence its construction should an appropriation be obtained for it at the ensuing session of Congress.

The superintendence of the works at Barrataria would not prevent me from directing and attending to the construction of the tower at Bayou Dupré, and superintending generally such repairs as may be from time to time required at the new forts of the Rigolets, Chef Meteur, and Bienvenue.

I have the honor to be, &c.,

WM. H. CHASE.

Major General ALEXANDER MACOMB, *Chief Engineer U. S., Washington.*NEW ORLEANS, *November 25, 1827.*

SIR: As the only difficulty in the construction of the fort at Barrataria will be confined to the collection of bricks, it is desirable that an appropriation for the collection of materials may be obtained at the ensuing session of Congress.

From calculations which I have made, derived from experience, resulting from the construction of the works at the Rigolets and Chef Menteur, assurances may be given that the fort of Barrataria can be constructed for the sum estimated by you, embracing all contingent and extraordinary expenses.

The commencement of operations at Barrataria and Bayou Dupré the next season will exhibit the occupation of all the points selected by you in the system of defence for Louisiana, and, if the annual appropriations will admit, the entire system may be completed in three years; for, with our present organized means, the fort at Barrataria may be finished in three years, say under the following annual appropriations, viz:

1828.....	\$75, 000
1829.....	94, 500
1830.....	94, 500
Original estimate .....	264, 000

The position selected for the fort being one of the most healthy in Louisiana, the operations will be carried on there without being subject to the delays which have occurred at the *Rigolets, Chef Menteur, Bienvenue, and Fort Jackson*, on the score of sickness.

The sum of \$75,000 would enable us to commence the operations at Barrataria with great advantage the next season.

Having assisted thus far to carry your system for the defence of New Orleans into execution, I feel a strong desire to witness its completion, and I trust that your recommendation for an appropriation for Barrataria will speedily exhibit to the people of Louisiana and of the western States the perfection of a system so well calculated for their security against invasion, and the merits of which they have long since duly appreciated.

I remain, sir, &c.,

W. H. CHASE.

General BERNARD, *Washington City.*

20TH CONGRESS.]

No. 378.

[1ST SESSION.]

## EXPENSES OF THE VISITORS OF THE MILITARY ACADEMY AT WEST POINT FROM 1819 TO 1827, AND ESTIMATES OF THE EXPENSES OF THAT ACADEMY FOR 1828.

COMMUNICATED TO THE SENATE MARCH 10, 1828.

DEPARTMENT OF WAR, *March 10, 1828.*

SIR: In answer to your communication of the 6th instant, I have to state that the allowance to cover the expenses of the visitors of the Military Academy, other than the transportation of officers of the army, has been paid out of the moneys appropriated for the Military Academy, and *not* out of that for the con-

tingencies of the army. The transportation of officers of the army, when called to West Point as visitors, has been paid out of the general appropriation for the quartermaster's department.

A detailed statement of the expenditures, under the head of contingencies of the army, was submitted by me to the Senate on the 4th of January last, to which I would beg leave to refer. By reference to which, it will be seen that almost the whole amount of the fund called contingent is expended in paying the officers of the army called here on bureau service. By reference to the 10th volume of the State Papers, 2d session, 16th Congress, No. 61, will be found the report of my predecessor upon this subject, presenting the advantages resulting from a detail of officers for the performance of the service assigned them in preference to the employment of citizens as clerks. Acquiescing in the justness of his views, I have made no change whatever in the arrangement. Having had occasion to refer to various expenditures growing out of operations connected with the department, preparatory to a report for the committee on retrenchment, it became necessary to review for a period of years the contingent expenses of the army. A document was prepared embracing these expenditures from the year 1819 to 1827, inclusive. I send you so much thereof as relates to that item of expense called contingencies of the army, by which it will be seen that, with some slight fluctuations, its progress has been marked with a spirit of economy. I beg leave, in referring you to the document exhibiting the contingent expenses of the army, to invite your attention to the circumstance that I have not, independently of pre-existing circumstances and the established routine of business, contributed at all by any act of mine to increase the amount expended under this head.

A statement of the sums paid to defray the expenses of persons appointed as visitors to the Military Academy, from the year 1817 up to this time, was also furnished to the Senate on the 28th ultimo, agreeably to a resolution of that body of the 19th ultimo, and to which I would also beg leave to refer.

A report of the chief engineer is enclosed herewith, giving the names of the visitors for the last four years, together with the amount paid to each for travelling expenses.

In my report to the House of Representatives on the administration of West Point Academy, relative to the rule of appointing cadets and selecting visitors, I remarked that heretofore the number of visitors had been small, and they principally officers of the army, and gave my reasons for the course I had pursued in making selections of visitors. Since making that report, a call having been made for the number of visitors invited to the examination of that institution, I have been compelled to give the subject a closer attention; and I find by a recurrence to the record, to which before I had not had recourse, that up to the year 1822 the board of visitors had been principally composed of officers of the army; in 1823 the number of visitors was increased to fifteen, and in the year 1824 to nineteen. In the letter of invitation the person invited is informed that accommodations during the examination will be provided for him at the public expense. For years past some of the visitors charged for their travelling expenses, while others made no charge of that kind. The latter course within two or three years has been more generally pursued, and hence the amount of expenditure has increased from the annual examination. A reference to the document A, enclosed, will show that the number invited by me has been something less than that warranted by the previous usage of the department; but calling them from more distant quarters of the Union their expenses for travelling have been enhanced. It should be remarked that, as the service is purely voluntary, a larger number, to guard against disappointment, is invited than is expected to attend, or than do in fact attend.

To correct a misapprehension which seems to prevail, it is necessary to state that the sum estimated for was to cover a deficiency in the last appropriation for this object, as well as to provide for the current year.

I have the honor to be your obedient servant,

JAMES BARBOUR.

Hon. SAMUEL SMITH, *Chairman of the Committee on Finance.*

ENGINEER DEPARTMENT, *Washington, March 8, 1828.*

SIR: In compliance with your directions, I have the honor to lay before you a statement of the persons who have been invited to attend the general examinations of the cadets of the Military Academy in each year since 1824 to form the board of visitors, with an exhibit of the amount paid to each individual who attended on account of the expenses incurred by travelling to and from West Point; also the amount of expenditure on account of the board and lodging of the visitors during their stay at West Point. I also beg leave to add a copy of the letter of invitation, which will show the object of inviting persons to attend the examination. By the latter clause of the letter of invitation it will be seen that the superintendent of the Military Academy is directed to make suitable arrangements for the accommodation of the board of visitors. This accommodation is afforded at the mess-house, a building which has limited accommodations for persons visiting the Military Academy and for the messes of the cadets and of some of the officers who have no families, and it is the only place of accommodation on the point. The person having charge of the messing establishment is bound to make suitable accommodations for the board of visitors, and charges for the accommodation a reasonable sum, which is submitted to the board for their examination and approval; and, on being signed by the president of the board, the quartermaster of the post pays the account on the order of the superintendent, who also audits the account. Heretofore there has been no specific appropriation for the expenses of the board of visitors, those expenses having been paid out of the appropriation for the quartermaster's department of the Military Academy.

I have the honor to be, sir, your obedient servant,

ALEXANDER MACOMB,

*Major General, Chief Engineer, Inspector of the Military Academy.*

Hon. JAMES BARBOUR, *Secretary of War.*

WAR DEPARTMENT, *Washington.*

SIR: The regulations of this department for the government of the Military Academy at West Point direct that the students of that institution be examined in all the branches of science and instruction

through which they have passed in the presence of a board of visitors and such other literary gentlemen as shall be invited to attend; in conformity to which I have the honor to invite you to attend the examination of the cadets at West Point, which will commence on the first Monday in June next, as a member of said board, and I shall be highly gratified to receive a report of your observations upon the actual state and progress of the institution and such suggestions for its improvement as you may deem necessary.

Should you accept this invitation, Lieutenant Colonel Thayer, superintendent of the academy, will be instructed to make suitable arrangements for your accommodation.

I have the honor to be, sir, respectfully, your obedient servant.

*The following is an extract from the estimates of the superintendent of the Military Academy for 1828.*

BOARD OF VISITORS.

Deficit for the year 1827.....	\$1,168 11
Travelling expenses for 1828.....	1,210 00
Board and accommodation at mess hall.....	750 00
	3,128 11

NOTE.—It is not possible to make an accurate estimate of the expenses of the board, as it depends on the number of visitors, which varies every year, and on the distances which they have to travel. The sum estimated for, the average of the last three years, is \$1,960.

A.

*Statement exhibiting the names and number of persons who have been invited by the Secretary of War to attend the general examination of the cadets at West Point Military Academy; also the names of those persons who attended in each year, from 1824 to 1827, inclusive, and the amount paid to each for their travelling expenses to and from the academy.*

Statement showing the amount expended each year, and every three years, out of the money appropriated by Congress for the contingent fund of the army, as appears per the appropriation books of this office, from the year 1819 to 1827, viz:

1819	\$82,563
1820	41,003
1821	36,533 41
	<u>160,100 94</u>
1822	\$10,867 99
1823	16,065 73
1824	13,841 41
	<u>40,775 13</u>
1825	\$17,697 56
1826	10,771 68
1827	10,922 34
	<u>39,391 58</u>

JAMES EAKIN, Chief Clerk.

TREASURY DEPARTMENT, Second Auditor's Office, March 10, 1828.

Estimate of the expenses of the Military Academy for 1828.

1. FUEL.

1,500 cords of wood, at \$3 87½ per cord	\$5,812 50
Distributing 1,200 cords of wood, at 15 cents per cord	180 00
Sawing and splitting wood for 17 section rooms, 7 months, 50 cents per month per room	59 50
	<u>\$6,052 00</u>

## 2. TRANSPORTATION.

Deficit of appropriation for cadet transportation home in 1827.....	\$1,311 68	
Of cadets discharged by order of the War Department.....	900 00	
Officers' baggage.....	300 00	
Freight of stores and articles for academy.....	100 00	
Pay of hired teamster, at \$18 per month.....	216 00	
		\$2,827 68

## 3. FORAGE.

184 bushels of corn, for two yoke of oxen, at 75 cents.....	138 00	
6 tons of hay, for two yoke of oxen, at \$18 per ton.....	108 00	
		246 00

## 4. STATIONERY.

1½ ream folio post, (ruled).....	42 00	
3 reams of envelope.....	18 00	
12 reams of foolscap, at \$4.....	48 00	
20 reams of letter paper, at \$5.....	100 00	
18 blank quire books, (ruled,) at 44 cents.....	7 92	
Blank books for adjutant's office.....	14 00	
Binding books, &c.....	6 00	
2,000 quills.....	20 00	
20 papers of ink powder.....	2 50	
2 pounds of sealing wax.....	3 00	
2 pounds of wafers.....	2 00	
12 pieces of tape.....	3 00	
2 quarts of sand.....	50	
		266 92

## 5. PRINTING.

1 ream morning reports of cadets.....	14 00	
2 reams sick reports.....	28 00	
2 reams weekly class reports.....	28 00	
1,500 morning reports of the companies corps cadets.....	12 00	
180 consolidated weekly class reports.....	20 00	
1,000 registers of officers and cadets and merit rolls of conduct, 1828.....	125 00	
		227 00

## 6. POSTAGE.

For the postage upon letters and packages on public service directed to the superintendent, commandant of cadets, quartermaster, adjutant, and other officers and professors of the Military Academy.....		150 00
---	--	--------

22. Buildings . . . . .	11,000 00
23. Miscellaneous items . . . . .	1,396 50
24. Incidental expenses . . . . .	400 00
Total . . . . .	36,447 31

ÆNEAS MACKAY, *Quartermaster, Military Academy.*

Approved:

S. THAYER, *Lieut. Col., Sup't Military Academy.*

## REMARKS.

No. 1. It is believed that the expenditures for fuel at the academy will be considerably diminished for the future by substituting anthracite coal for wood, which is becoming more and more dear every year. Grates have been put up in 20 rooms, and it is contemplated to put them up in all the rooms in the course of next year. At the present price of coal (which is \$10 per ton) there would be little economy in substituting it for wood, but when the Lackawanna coal shall be brought to market through the Hudson and Delaware canal, which is to be completed early next summer, it is believed that its price will immediately fall 100 per cent.

No. 2. Under this head is included a deficit of \$1,311 paid to dismissed and discharged cadets over and above the appropriation for that object, owing to the unusual number of dismissals during the year. There is reason to hope that the sum demanded for that for 1828 will be found amply sufficient.

No. 7 will complete the refooring of the cadets' barracks, which was commenced in 1826.

No. 8. This amount is required partly to repair the timber work, which has decayed, and partly to fill two of the spaces between the piers, and to raise the head of the wharf, which, having settled several feet, is under water every high tide.

No. 9 will complete the graduation of the barrack yards.

No. 11. It is not possible to make an accurate estimate of the expenses of the board, as it depends on the number of visitors, which varies every year, and on the distances which they have to travel; \$1,960, the sum estimated for, is the average of the last three years.

Nos. 12 and 13. The estimate for the quartermaster's clerk is \$200, and that of the adjutant's clerk \$100 greater than for previous years. These additions are deemed indispensably necessary for the hire of competent clerks.

No. 21. Two thousand two hundred dollars were appropriated in 1826, and applied to the purchase of

conduit pipes. The additional sum now asked for will complete all the works for the distribution of water in the most substantial and permanent manner.

No. 22. The building, of which the plans and elevations are hereto annexed, will consist of two pavilions or wings, each 25 by 40 feet, two stories high above the basement, and a centre 72 feet by 40, one story above the basement. The centre building will contain eight rooms for the sick, and the same number of rooms in the basement for a kitchen and stores, and for the accommodation of the steward, matron, and hospital attendants, &c.; one pavilion to be occupied by the surgeon, the other by assistant professors. It may be proper here to remark that the assistant professors are not provided with sufficient or suitable quarters. One room is only a reasonable allowance of quarters to each assistant professor, whereas at present only one room can be allowed to every two assistants. The want of suitable accommodations for the assistant professors will be more sensibly felt whenever the cadet assistant shall be replaced by officers—a change which has been often recommended by the annual visitors, and which, having been approved by the government, must take place at no distant period. The building for which an appropriation is now asked will complete the quarters requisite for the accommodation of the academic staff and cadets.

Respectfully submitted.

S. THAYER, *Lieut. Col., Sup't Military Academy.*

WEST POINT, October 27, 1827.

*Statement of the expenditure of the money appropriated for the contingent expenses of the military establishment for the year 1827, exhibited in pursuance of the fifth section of the act of March 3, 1809, entitled "An act to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments."*

Date of settlement.	To whom paid.	Purposes.	Amount.

\*WILLIAM LEE.

20TH CONGRESS.]

No. 379.

[1ST SESSION.]

## STATEMENTS SHOWING THE EXPENDITURES AT THE MILITARY ACADEMY FROM ITS ORGANIZATION IN 1802 TO 1828.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 13, 1828.

DEPARTMENT OF WAR, *March 13, 1828.*

SIR: In obedience to a resolution of the House of Representatives of the 29th ultimo, I have the honor of submitting herewith the reports of the Second and Third Auditors of the Treasury, which exhibit the amount expended at the Military Academy at West Point for the construction of buildings, and the purchase of books, maps, and apparatus, and the pay and subsistence of teachers, officers, and cadets, from its organization in 1802 to this time.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives.*TREASURY DEPARTMENT, *Second Auditor's Office, March 8, 1828.*

SIR: In compliance with a resolution of the House of Representatives of 29th February last, I have the honor to hand you herewith a statement of "the whole amount of money that has been appropriated for the pay, rations, and forage of instructors, cadets, and all other persons employed at or attached to the Military Academy at West Point" from July 1, 1815, to December 31, 1827, "specifically for each and every purpose, and for each and every year," as far as can be ascertained from the books of this office.

I have the honor to be, with high respect, your obedient servant,

WM. LEE.

HON. JAMES BARBOUR, *Secretary of War.*TREASURY DEPARTMENT, *Third Auditor's Office, March 11, 1828.*

SIR: In pursuance of a resolution of the House of Representatives of the United States of the 29th ultimo, referred by you to this office, "requiring a statement of the whole amount of money that has been appropriated for the construction of buildings and appurtenances, for purchasing books, apparatus, maps, and all other purposes, for the use of the Military Academy at West Point, from its organization in 1802 to this time; also the pay and rations of instructors, cadets, and all other persons employed at or attached to the institution, specifically for each and every year," I have the honor to hand you herewith a statement exhibiting the aggregate amount expended at the Military Academy to the end of the year 1827, arranged under different heads of expenditure, as required by the resolution. It will be perceived that the first line embraces the aggregate expenditures under each head up to the end of the year 1820, as reported from this office in a statement furnished in pursuance of a resolution of the House of Representatives of the 5th December, 1820. For the subsequent period, to wit: for the years 1821 to 1827, inclusive, the sums expended for the different objects are arranged under each head, and for each year.

Appended to this statement will be found a copy of that furnished under the resolution of the 5th December, 1820, and from the remarks annexed thereto it will be seen that it was impracticable to furnish all the particulars required with any certainty of accuracy, nor could it now be done in any reasonable time. The statement has, therefore, been prepared in its present shape in order to its early transmission, and under a belief that it will meet the object of the resolution, so far as the same appertains to this office.

I have the honor to be, very respectfully, your obedient servant,

PETER HAGNER, *Auditor.*HON. JAMES BARBOUR, *Secretary of War.*

*Statement exhibiting the aggregate amount expended on the Military Academy at West Point, in the purchase, erection, and repairs of buildings and barracks, for stationery, books, and mathematical instruments, and printing; for wood and hauling, transportation of stores, officers' baggage, and for expenditures of a contingent nature in the quartermaster's department for said institution, including the amount that has been expended in the pay and subsistence of the teachers, officers, and cadets, as far as the same has been ascertained from the accounts of the disbursing officers, settled and rendered at the office of the Third Auditor; furnished in pursuance of a resolution of the House of Representatives of the United States of the 5th December, 1820.*

Pay, subsistence, &c., to teachers, officers, and cadets .....	\$73,210 38
Wood and hauling.....	26,612 36
Building purchased and erected; materials for ditto, and repairs .....	141,824 82
Stationery, printing, books, and mathematical instruments, &c.....	43,470 37
Transportation of materials, stores, and officers' baggage, &c.....	4,166 11
Furniture, tools, postage, expenses of the board of visitors, and other contingent expenses	5,014 69
Aggregate amount .....	294,298 73

It is proper to remark that prior to the act of the 3d March, 1809, no separate account was kept of the appropriation for the Military Academy; and up to the year 1812, inclusive, all the accounts of expenditures of the War Department, which had been settled and sent to the treasury for revision, were destroyed in the year 1814 with the public buildings. It is consequently impossible to furnish all the particulars required by the above-mentioned resolution. It is also proper to add, that the items of pay and subsistence, &c., are only such as have been collected from the accounts of the paymasters, settled since 1812 and up to July, 1815, and from such only in which it was supposed payments would appear. Other payments have doubtless been made within that period; but they are so distributed through the accounts, (no separate account having been kept or rendered for the corps of engineers,) that it will be impracticable to ascertain them without particular examination of every paymaster's account through the war.

PETER HAGNER, *Auditor.*TREASURY DEPARTMENT, *Third Auditor's Office, January 4, 1821.*

Statement of the amount of money that has been appropriated for the pay, rations, and forage, of instructors, cadets, and all other persons employed at, or attached to the Military Academy at West Point, specifically for each and every purpose, and for each and every year, from July 1, 1815, to December 31, 1827, as far as can be ascertained from the books of this office, in pursuance of a resolution of the House of Representatives dated February 29, 1828.

NOTE.—The corps of bombardiers was established by an act of Congress of March 2, 1821.

A statement exhibiting the amount expended at the Military Academy at West Point for the construction of buildings and appurtenances; the purchase of books, maps, apparatus, and all other purposes for the use of the Military Academy; pay and subsistence of teachers, officers, and cadets, and other persons employed or attached to the institution, as far as the same has been ascertained from the accounts settled in the office of the Third Auditor, furnished in pursuance of a resolution of the House of Representatives of the United States of February 29, 1828.

Period.	Pay and subsistence to teachers, officers, and cadets.	Fuel, hauling and distributing the same.	Buildings purchased and erected, and for materials and repairs.	Stationery, printing, books, mathematical instruments, chemical apparatus and articles, diplomas, &c.	Furniture, tools, postage, transportation, improving parade ground, reservoir and conduit, expenses of the board of visitors, and other contingent expenses.	Expenses appropriate to quartermaster's supplies, transportation of baggage and other quartermaster's supplies for the officers and troops.	Aggregate.
Aggregate amount expended to December 31, 1820, as appears from a statement made by the Third Auditor on January 4, 1821, a copy of which is annexed, furnished under a resolution of the House of Representatives of December 5, 1820.—(See document No. 51, vol. 4, State Papers, 2d session 16th Congress.....	\$73,210 38	\$26,612 36	\$141,824 82	\$43,470 37	\$5,014 69	\$4,166 11	\$294,298 73

TREASURY DEPARTMENT, Third Auditor's Office, March 11, 1828.

PETER HAGNER, Auditor.

20TH CONGRESS.]

No. 380.

[1ST SESSION.]

ON THE PURCHASE OF ADDITIONAL LAND AT FORT WASHINGTON, ON THE POTOMAC.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 18, 1828.

Mr. SMYTH, of Virginia, from the Committee on Military Affairs, who were directed to inquire into the expediency of purchasing certain property adjoining Fort Washington, reported :

That it appears to your committee that in 1808 the quantity of 3 acres and 127 poles of land was purchased from Thomas A. Digges, for the sum of \$6,000, as the site of Fort Washington, and conveyed by him to the United States; that in 1815 an additional quantity of 9 acres 23 poles was purchased and conveyed by Thomas A. Digges, William D. Digges, and Robert Brent, for \$8,461; making in all 12 acres and 150 poles of land, for \$14,461; that in surveying the land conveyed to the United States a piece was left to the proprietor, with singular improvidence, between the fort and the river Potomac; and in erecting the fort, with still greater improvidence, a part of the work has been projected and built on the land of William D. Digges; that a valuable brick building, designed for officers' quarters, has been erected on his land; that the buildings occupied by mechanics, laborers, overseers, and sutlers, are all erected on the land of Mr. Digges; and a part of the fort remains unfinished because it has been located on his land.

It also appears that, with a view to procure the land deemed necessary, the late Secretary of War entered into a negotiation with William A. Digges, and each of them appointed a referee, who were to value the property at its intrinsic value, without regard to the damages which it was alleged the estate of Mr. Digges had sustained by the erection of the fort; that the referees met, and Mr. Digges urged that his estate had been greatly injured by building the fort, especially his fishery; and to this argument the referee selected on his part appeared to allow weight; but it is obvious that for such damages the United States were not liable, having paid upwards of \$14,000 for the land, for the purpose of building a fort thereon; the referees disagreed, one allowing \$15,000, the other \$30,000 as the intrinsic value of the land, about 29 acres—the quality not very good, a considerable portion being much broken, and some not arable; the only valuable building had been erected on a special agreement that it should not be considered as giving additional value to the land; an umpire being called in, the valuation was fixed at \$29,600; the reference was to be binding on the United States only in case Congress, by an appropriation, should sanction it.

Your committee consider the price fixed by the referees as enormous, and such as ought not to be sanctioned; but they consider the property convenient, necessary, and indeed essential, for the purpose of discipline, erecting needful buildings, completing the work, and rendering its batteries effectual; and the fort is highly important, well constructed, of durable materials, and at great expense.

Your committee further report that the proprietor of the land, William Dudley Digges, is indebted to the United States, by judgment, in the sum of \$13,369 87, with interest from the 9th day of June, 1819, till paid, and \$9 57 cost, say on the 9th of June next, \$20,599 15; and although the United States ought not to avail themselves of this circumstance, to compel Mr. Digges to comply with any unreasonable condition, yet they should so far avail themselves of it as to protect themselves from unjust extortion. Your committee propose that this debt be given up to William D. Digges, for the land wanted for the use of the United States, his claims to damages, and for use and occupation, and to the land heretofore conveyed, he disputing the right of Thomas A. Digges to sell. This proposal they deem beyond what justice requires; but as this property is understood to be the only fund to which the United States may look for payment of the said debt, they will lose nothing by giving the debt for the land and the claims which Mr. Digges sets up against them. With these views the committee report a bill.

20TH CONGRESS.]

No. 381.

[1ST SESSION.]

ON THE EXPEDIENCY OF ABOLISHING THE OFFICE OF MAJOR GENERAL OF THE ARMY OF THE UNITED STATES.

COMMUNICATED TO THE SENATE MARCH 19, 1828.

Mr. HARRISON, from the Committee on Military Affairs, to whom was referred the resolution of the Senate directing them to inquire into the expediency of continuing or abolishing the office of major general in the army of the United States, reported:

That although they consider the resolution as intended to refer only to the office lately held by Major General Brown, yet as the abolition of that office will greatly affect the whole military establishment of the United States, they deem it proper to take a summary view of the situation of the army, as far as it regards the general officers, at the time that it became vacant by the death of the late distinguished incumbent.

At that period it consisted of a major general, acting under the authority of an ordinary commission of that grade, having the immediate command of the whole military establishment of the United States, and designated in the common military phraseology as the *general-in-chief* or *commanding general*.

Secondly. Of two brigadiers of the line, having the brevet commissions of major general, and enjoying the pay and emoluments of that grade.

Thirdly. Of one staff officer, (the quartermaster general,) having the rank and pay of brigadier general in the army.

Fourthly. Of a colonel of engineers, having the rank of major general by brevet, and receiving the pay of brigadier general.

Fifthly. Of a second officer of the engineers, with the pay and emoluments of brigadier.

Sixthly. Of two colonels of regiments, having brevets of brigadier, and a right to the receipt of the pay and emoluments of that grade when in the exercise of a sphere of command equal to that rank.

Seventhly. Of one staff officer, (an inspector general,) having the rank of colonel and the brevet of brigadier. The pay and emoluments of this officer are not increased by his brevet rank when in the discharge of the duty of inspector.

Eighthly. Another staff officer, (the commissary general,) having the rank of brigadier by brevet, and receiving the pay and emoluments of colonel.

The first inquiry now to be made is, whether the office of major general on the establishment shall alone be abolished, leaving the organization and arrangement of the army in other respects as it now is. If the object of this reduction is to save expense, the committee hesitate not to say that the expectation will not be realized. Indeed, it is possible that it may be increased. This effect is produced by the number of officers in every corps of the army holding brevet rank of higher grade than they hold in the line, and by that succession in command which is an essential principle of discipline in every army and navy of the civilized world. The principle here spoken of is that which upon the removal of a senior officer, by death or otherwise, gives to the next in rank, not the rank, but the entire authority and command of the officer whom he succeeds. In a case of this kind, when the command devolves upon an officer of junior grade in the line who holds no brevet rank, he receives no accession of pay or emolument for the exercise of the higher duty and increased responsibility. Upon the death, absence, or removal of the colonel of a regiment, the lieutenant colonel or major (in the absence of the lieutenant colonel) succeeds to the command of the regiment, and to all the authority which the colonel possessed, without any increase of pay, if the officer thus succeeding holds no brevet rank; but having that rank, it instantly comes into operation, and brings with it the appropriate pay and emoluments. From this statement it will at once be perceived that if the proposed reduction extends no further than to the office lately held by Major General Brown, *without any other change in the organization and arrangement of the army*, it will effect no diminution of the expense of the army, but may possibly increase it. There could be then no motive, it is conceived from this view of the subject, to make the proposed reduction.

But a change in the present arrangement of the army might be made, either by law or under the authority of the President, so as to produce a saving to the treasury of the whole pay and emoluments of the office which it is proposed to abolish. This could be done by confining the two brevet major generals

to their present commands, marked out by geographical lines, and denominated the eastern and western department, and abolishing the office of major general on the establishment, or general-in-chief, as proposed by the resolution submitted to the committee. But although the *office* may be abolished, its *functions* must remain to be performed in some manner. No army can long exist without having some common head to receive its reports and direct its general administration. The office of captain in the navy may be abolished, but when a ship is at sea the entire command and duties of captain must be performed in some way, under that denomination or some other.

If the office of major general of the line, or commanding general, should be abolished, there being no intermediate authority between the generals commanding the departments and the Chief Executive Magistrate, who is the constitutional commander-in-chief of our armies, the immediate command of the army must devolve upon him, or it will be administered by the Secretary of War in his name. An arrangement of this kind has existed since the late war, at a time that the two departments were commanded by two major generals of the line, independent of each other, and having their common head at the Department of War.

As this arrangement appears to have been the one contemplated by a portion of the Senate the committee submit the following remarks as to the expediency of again adopting it :

And first as to the duties of a commanding general. They are, in reference to the whole army, what that of a colonel is to a regiment or a captain to his company, embracing not only a general but particular superintendence in everything relating to its instruction, subordination, equipments, supplies and health. He is the medium of communication between the government and the army, who look to him for all the information which they may require on these points. To him are made the returns and reports of the generals commanding departments, who correspond with him upon all subjects relating to their commands. He receives and decides upon the confidential reports of the inspectors general, which embrace not only remarks upon the *personnel* and *material* of the army, but upon the conduct and characters, not only of the several corps, but of the individuals who compose them. He has the general superintendence of the administration of justice in the army, and is immediately charged with the duty of assembling courts-martial, composed of officers of the highest grade which cannot be furnished by a single department.

The recruiting service in all its details is under his immediate superintendence; so is the school of practice for the artillery. It is his duty to make himself intimately acquainted with the characteristic features of the country, particularly upon the frontiers; its military positions, the best means of defending them and of operating against an invading enemy. On his judgment the government relies for information as to the proper position of the troops upon the Indian frontier, so that they can be assembled with promptitude and act with efficiency. The performance of these varied and complicated duties not only require much labor, but it must be admitted that they cannot be well performed without a thorough knowledge of the technical military details, and that this can only be acquired by actual service. The army of the United States, as well as every other supported by a civilized nation, is under the government of a written and unwritten law. A recurrence to the authority of the latter is so constantly necessary that no army can exist under discipline for a single day without it. It is recognized and adopted by our written law under the denomination of "custom of war." A knowledge of it can be obtained from no book and can only be acquired by experience in the field. To the person exercising the functions of commanding general this knowledge is essentially necessary, without it he would be continually subjected to the commission of the most fatal errors. In the administration of justice cases constantly occur which would present to a man unacquainted with the "usages of war" scarcely a shade of difference, and yet when subjected to this criterion one would present a crime calling for the severest punishment, and the other for an honorable acquittal.

If the functions of commanding general, then, are to be performed by the head of the department of war, it would seem necessary that he should be possessed not only of a knowledge of the theory of the art of war, which may be acquired by study, but of that practical knowledge, also, which can only be gained by experience in the field. It is conceived that the proper and appropriate duties of that department does not require this knowledge, and that it is not often found united in the same individual with that fund of political information which it is necessary that a cabinet minister should possess. In Great Britain the higher duties of war minister are performed by a Secretary of State. All that relates to the accounts of the army, its organization, and procuring supplies of every description, (the ordnance excepted,) is under the direction of the *Secretary of War*. It is believed that these offices have seldom been filled by military men, but the appropriate duties of commanding general are always confided to an officer selected for the purpose.

The Secretary of War in the United States, in addition to the duties performed by both the war ministers in Great Britain, is charged with the direction of the ordnance, (which in the latter country composes a separate department,) with everything which relates to Indian affairs, and with the system of internal improvement. It is scarcely to be conceived that all these claims upon his time would leave him sufficient leisure to perform the functions of commanding general, should he even be possessed of the necessary information.

In either case the command of the army would virtually be exercised by the staff officers who surround him. A kind of substitution which is in all cases offensive, but to military men particularly odious.

No general ever preserved the confidence and affections of his army who was supposed to be under the guidance of his adjutant or his aide-de-camp. The cause is obvious. When an officer makes an appeal to his superior, if the decision is adverse to his wishes and opinions, he is satisfied and submits, and he does so without suffering his feelings to be wounded. This is the result of the principle to which all yield assent, that superior knowledge is always found united with superior rank and is the base of that prompt and cheerful obedience which is the essence of military discipline. But let a supposition be entertained that the decisions at headquarters are under the control of inferior knowledge, (that is, inferior rank,) and the veneration with which they are received is at once changed into contempt, the whole fabric of discipline is loosened, and disorder and confusion inevitably succeed: such as the committee believe will be the effects of placing a military command in any other hands than those of a military man.

A French officer, who visited England a few years ago, in his "View of the History and Actual State of the Military Force of Great Britain," attributes the high state of the discipline of the British army, at the conclusion of the war with France, to the superintending care of the commander-in-chief at the seat of government.

Speaking of the newly adopted policy of not suffering a change of ministry to produce the removal of this officer, he says: "In rendering the situation of commander-in-chief independent of a change of

ministry, it appears to me that the British government have wisely followed the spirit of the constitution and the dictates of prudence. Owing to this distinction, if, by a sudden transfer of administration, the general plan of military operations is altered, the organization of the army and all the details which influence the efficiency of regiments cannot be overthrown by the caprice and vanity of the new ministers. It is the masterpiece of the institutions of England that stability in the system of public service is combined with the power of changing the directors of the executive authority."—(*Dupin's Military View, vol. 1, p. 44.*)

If a change in the command of an army, by merely substituting one military man for another, is productive of so much injury, how much greater mischief is to be apprehended when the person who succeeds is altogether uninformed, not only in the details, but in the principles of the profession? A Secretary of War, by some casualty or change of administration, is suddenly brought into office. However eminent for his talents, and distinguished as a politician—however capable of performing the appropriate duties of his department, is it to be supposed that he can at once acquire the knowledge necessary to the discharge of the functions of commanding general? At this moment an Indian insurrection or other hostile movement occurs on the frontiers—on whom is he to rely? Where is he to seek the information upon which to predicate his orders for assembling the troops, procuring their supplies, and marching them on the enemy? The old maxim that "the thing which is once well commenced is half accomplished" applies, perhaps, with more force to military affairs than to anything else. The greatest exertions are often insufficient to remedy the evils which follow a wrong step taken in the commencement of a war. Never was this proposition more fatally realized than in the last war in which the United States were engaged. A body of troops pushed into the hostile country, entirely out of support, without an established base, its single line of communication everywhere accessible to the enemy. How much blood and treasure were wasted to rectify this error the archives of the nation will exhibit, as they will the obstinate perseverance with which an object was attempted to be accomplished in opposition to the most formidable obstacles created by the hand of nature, when another presented itself in which none of these impediments were to be found! It is far from being the intention of the committee to cast any reflection upon the distinguished patriots who conducted the first operations of the late war, and still less to justify an ignominious surrender of a gallant army to an inferior enemy, who offered battle as the only means of extricating it from the *cul de sac* in which it had been placed. Their only object is to show that a man may be an eminent statesman without being a general, or able to direct the details of a military enterprise. Recurring to the expenditures of our military establishment, and comparing these with those of other nations, it will be found the most economical on earth. In Great Britain the grade of brigadier has been abolished, and a major general placed at the head of the brigades—lieutenant generals commanding the divisions. The compensation of these officers is infinitely beyond what is allowed to ours, whilst the duties are much less. It is evidently an error to suppose that the division of our force into numerous detachments and garrisons lessens the labor of commanding them. The very reverse is the fact. The duty is not in the ratio of the numerical force of the army, but to the extent of the country over which it is scattered. This is proved by the fact that there were received and filed in the office of quartermaster general during the last year upwards of thirty-five hundred letters.

Upon the whole, the committee can see nothing in the present military establishment of the United States to give alarm to the economist or the patriot. But, on the contrary, with a single exception, it may be viewed with pride and pleasure by every American as an institution calculated to answer all the purposes for which it was intended, and yet presenting no feature hostile to the spirit of our government. Looking only to a state of war, its organization has been formed exclusively with a view to that object. A force comparatively feeble in peace, as it should be, and yet containing the elements of a large army whenever the will of the nation shall give it the expansion of which it is susceptible. Possessing these views, the committee cannot give their sanction to the proposed abolition of the office of major general. The saving of a few thousand dollars presents, in their opinion, no motive to subject to any hazard the discipline and efficiency of the army.

They therefore recommend to the Senate the following resolution:

*Resolved*, That it is inexpedient to abolish the office of major general in the army.

---

ADJUTANT GENERAL'S OFFICE, *Washington, March 1, 1828.*

SIR: If I correctly understood the proposition which you submitted to me this morning, it may be thus stated:

Suppose the commission of major general, as provided for by the act of March 2, 1821, should be abolished, what would be the probable effect upon the army, so far as may relate to succession in commands, according to ordinary rules of service?

Without pretending to affirm what practical principle or system would be established by the government in the event of the contingency referred to, it is nevertheless fair to presume that the general officer next in rank and for duty in the field would succeed to the duties and responsibilities which had devolved upon the late major general, and he would therefore virtually be the general-in-chief of the army. The senior officer being thus assigned to the highest command, a simple process of detail or assignment would fall upon the senior of each intermediate grade in the descending line of rank, inclusive of captain and brevet major.

That is to say, the senior brevet brigadier (being a colonel) would succeed to the command of a department; his regiment would be commanded by the next field officer; and to supply the place of the absent field officer, the senior captain having the brevet of major would be assigned to the appropriate duties of his brevet commission.

I am, sir, with great respect and consideration,

R. JONES, *Adjutant General.*

General HARRISON, *of the Senate, Chairman of the Committee on Military Affairs.*

[1ST SESSION.]

## AMOUNT PAID TO OFFICERS OF THE ARMY ON ACCOUNT OF BREVET RANK, IN 1827.

COMMUNICATED TO THE SENATE MARCH 28, 1828.

DEPARTMENT OF WAR, *March 26, 1828.*

SIR: In obedience to a resolution of the Senate of the 11th instant, I have the honor of transmitting herewith statements of the Second and Third Auditors, showing the amount of money that has been paid to officers of the army, during the year 1827, on account of brevet rank, and which they would not have been entitled to receive apart from that brevet rank.

I have the honor to be your obedient servant,

JAMES BARBOUR:

The PRESIDENT of the Senate of the United States.

TREASURY DEPARTMENT, *Second Auditor's Office, March 19, 1828.*

SIR: I have the honor to hand herewith a statement exhibiting the additional amount received by the officers of the army, in virtue of their brevet commissions, during the year 1827, consisting of pay, subsistence, forage, and allowance for servants, as far as they can be ascertained from accounts rendered; prepared in pursuance of a resolution of the Senate of the United States of March 11, 1828.

I am, with great respect, sir, your most obedient servant,

WM. LEE.

HON. JAMES BARBOUR, *Secretary of War.*

*Statement exhibiting the additional amount received by the officers of the army, in virtue of their brevet commissions, during the year 1827, consisting of pay, subsistence, forage, and allowance for servants, as far as can be ascertained from accounts rendered; prepared in pursuance of a call of March 11, 1828, of the Senate of the United States.*

20TH CONGRESS.]

No. 383.

[1ST SESSION.]

ON THE SUBJECT OF APPROPRIATIONS FOR FORTIFICATIONS, AND ARMAMENT OF  
THE SAME, FOR THE YEAR 1828.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 29, 1828.

DEPARTMENT OF WAR, *March 29, 1828.*

SIR: I have the honor of transmitting herewith two communications: one from the officer in charge of the Ordnance office, and the other from the Quartermaster General, to which I would respectfully beg leave to call the attention of the Committee of Ways and Means.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. GEORGE McDUFFIE, *Chairman Com. Ways and Means, House of Reps.*

ORDNANCE DEPARTMENT, *Washington, March 17, 1828.*

SIR: Upon examining the act making appropriations for the military service for the year 1828, approved on the 21st instant, it is observed that no appropriation has been made for the armament of the new fortifications. As it is considered very important to the public service that the usual appropriation for this object should be made, I beg leave to submit for your consideration the expediency of communicating with the Committee of Ways and Means upon the subject.

The proposition for an appropriation for the armament of the new fortifications occupied for several sessions the attention of the respective Committees on Military Affairs of both houses, and all appeared to concur in the opinion that provision for a gradual supply of ordnance was necessary. The bill first reported for this object provided for an appropriation of \$100,000 per annum for ten years. It was made to embrace so long a period from the belief that the supplies to be obtained could be procured on more favorable terms, as the proprietors of foundries would be more willing to embark in the business of making cannon at reasonable prices if assured of continued employment. For more particular information upon this subject I beg leave to refer to a report from the Secretary of War, which is printed in the State Papers, Senate, 2d session 17th Congress, No. 30.

The first appropriation made for this object was in 1825, and the amount appropriated for that year was \$100,000. The same amount was appropriated for the year 1826. Under these appropriations contracts were made for each year separately; but owing to the delays incident to the establishment of a new or more extensive business, so small a portion of the cannon had been delivered at the close of the year 1826 that no appropriation for the year 1827 was proposed or made. Some of the contractors have now completed their engagements, and but a few cannon remain to be delivered by any of them.

The contracts which have been entered into were limited to the amount appropriated; but from all the circumstances under which the previous appropriations were made there was a reasonable presumption that they would be continued. The contractors had therefore reason to expect continued employment for their works; and under this expectation they have, I am informed, provided materials and made other necessary arrangements for proceeding regularly in their business. But if the sum proposed in the

annual estimates for this year be not appropriated, the regular operations of all their works will be interrupted, to the great injury of the contractors.

The interest of the public service also requires that the supplies of cannon for the new fortifications should be continued. A continuance of the appropriation is therefore, in the opinion of this department, as necessary to promote the public interests as to prevent losses to the contractors.

I have the honor to be your obedient servant,

GEO. BOMFORD, *Brevet Colonel, on Ordnance Service.*

HON. J. BARBOUR, *Secretary of War.*

QUARTERMASTER GENERAL'S OFFICE, *Washington City, March 29, 1828.*

SIR: When, on the application of several members of Congress from Georgia, you directed that two companies of artillery should be stationed at the city of Savannah, it became necessary to obtain a tract of land on which to erect barracks and other buildings for the accommodation of the troops. An agreement was made by the commanding officer, Captain John Erving, with the executor of Matthew McAllister, deceased, for about thirty acres of land adjoining the city, for which he stipulated that the United States should pay the sum of eighteen hundred dollars, and, until Congress should sanction the purchase, a rent of one hundred and sixty dollars per annum, (see paper No. 1.) Colonel Tatnall promised to obtain the necessary sanction, but was prevented by indisposition from attending to the business. In the meantime it was ascertained that the estate from which the purchase had been made was insolvent, and that there were several judgments against it, which it was feared would hold the property. Congress having adjourned, the only means of securing to the public the amount expended in building was, by an arrangement with the United States Bank, to have the land sold under the oldest judgment, and purchase it in. I did not hesitate to assume the responsibility which the occasion required, and gave to the quartermaster at Savannah, Lieutenant C. A. Waite, an order, of which No. 2 is a copy. That officer succeeded in securing the land at the price stipulated; but there being no law to authorize the purchase of land on public account, the accounting officers of the treasury have been compelled to reject the amount on the settlement of his accounts.

Lieutenant Waite having acted in obedience to my instructions, I am bound to refund to him the sum disallowed. I gave those instructions with a perfect knowledge that, without the sanction of Congress, a credit for the payment could not be obtained; but I saved to the public, by the responsibility which I assumed, from eight to ten thousand dollars.

I now respectfully ask that application be made to Congress for a law authorizing the accounting officers to settle the accounts of Lieutenant Waite. No appropriation will be required for that purpose.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Quartermaster General.*

HON. JAMES BARBOUR, *Secretary of War.*

No. 1.

Whereas a portion of a lot adjoining the south commons of the city of Savannah, say thirty acres, the property of the estate of the late Matthew McAllister, has been selected as a site for the erection of the contemplated barracks; and whereas it is the object of the parties selling and purchasing to ascertain the value of the same: Now it is agreed between Captain John Erving, of the fourth artillery, on the part of the United States government, and M. H. McAllister, executor of the estate of Matthew McAllister, that James Marshall and J. P. Henry, esqrs., be referees for the purpose of putting a proper valuation on said property, should Congress deem it proper to authorize the purchase of the same at said valuation; and that said referees do also determine what rent government shall pay until the passage of a law authorizing the purchase. The said referees are also to determine what rent per annum should be paid on a lease of twenty years, should Congress not deem it advisable to buy. It is also understood by and between the parties, that if the said mentioned gentlemen cannot determine, then they shall be authorized to call in a third individual as umpire.

J. ERVING, *Captain 4th Artillery.*

M. H. McALLISTER, *Executor of Estate of M. McAllister.*

SAVANNAH, *Georgia, May 15, 1826.*

We have decided that eighteen hundred dollars should be the price of the land if bought, and one hundred and sixty dollars the annual rent.

J. MARSHALL.

J. P. HENRY.

SAVANNAH, *June 1, 1826.*

I, Matthew Hall McAllister, executor of the estate of Matthew McAllister, deceased, do hereby assent to the above decision of the referees; and do agree, and bind myself, to make good and sufficient titles to the parcel of land above referred to and designated, to the United States, for the sum of eighteen hundred dollars, whenever Congress shall authorize the purchase of the same; provided such authority be given within twelve months from this date.

Signed and sealed at Savannah, (Georgia,) this 12th day of January, eighteen hundred and twenty-seven.

M. H. McALLISTER, *Executor of Estate of M. McAllister.*

## No. 2.

QUARTERMASTER GENERAL'S OFFICE, *Washington City, March 14, 1827.*

SIR: I have received your letters dated the 19th ultimo and the 2d instant. An appropriation of about fourteen thousand dollars has been made to complete the barracks at Savannah; but it is not thought advisable to expend anything more until the title of the land be placed beyond a doubt. Indeed, had the difficulty on that subject been reported to me, not a cent should have been expended. You will consult Colonel Fenwick and the district attorney; and if a sale of the property can be obtained which will secure the title, you are authorized to make the purchase, provided the amount shall not exceed that stipulated to be paid. As the troops were placed at Savannah for the protection of that city from a portion of its own population, and for no other purpose whatsoever, I consider the corporation bound to secure us from any imposition in regard to the land on which they are to be stationed. More than the stipulated price cannot, in any event, be authorized; and should the land not be obtained for that, and the public lose the work already done, I shall consider it my duty to recommend that the troops be withdrawn. Let me hear from you immediately on the subject.

I am, sir, respectfully, your obedient servant,

THOMAS S. JESUP, *Quartermaster General.*

Captain C. A. WAITE, *Assistant Quartermaster, Savannah.*

20TH CONGRESS.]

No. 384.

[1ST SESSION.]

IN RELATION TO THE ERECTION OF BARRACKS AT NEW ORLEANS, IN LOUISIANA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 31, 1828.

DEPARTMENT OF WAR, *March 26, 1828.*

SIR: In obedience to a resolution of the House of Representatives of the 14th instant, I have the honor of transmitting herewith reports from the Quartermaster General and from the officer in charge of the Ordnance department, exhibiting "the necessity for the erection of barracks at New Orleans; the time when, and the amount for which, the old barracks at that place were sold; likewise a description of the barracks and other buildings owned by the United States at Baton Rouge, together with their cost, and the number of troops that they can accommodate."

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives.*

QUARTERMASTER GENERAL'S OFFICE, *Washington City, March 24, 1828.*

SIR: In answer to a resolution of the House of Representatives of the 14th instant, directing that the Secretary of War communicate any information in the possession of the department showing the necessity for the erection of barracks at New Orleans, together with a copy of all correspondence on that subject; the time when, and the amount for which, the old barracks at that place were sold, and a copy of the correspondence in relation thereto; also, a description of the barracks and other public buildings owned by the United States at Baton Rouge, together with their cost, and the number of troops that they can accommodate, I have the honor to report that the old barracks at New Orleans having been sold, in compliance with an act of Congress, the troops were removed from that city to Baton Rouge, which had been selected by order of the government as the principal depot of arms for troops on the southwestern frontier. On the application of the authorities at New Orleans, communicated verbally, as I have understood, through the delegation in Congress from Louisiana, a part of the troops were ordered to return to New Orleans; and the barracks having become private property, and being the only buildings in the city suitable for troops, we have been compelled to rent them at an exorbitant price. It is no part of my duty to express an opinion as to the propriety of stationing troops at New Orleans, but it is proper to remark that, whether the subject be regarded in a military or a pecuniary view, if the troops are to remain there barracks should be erected.

The old barracks were sold, under the direction of the Treasury Department, on the second Monday of January, 1821, and the 1st Monday of January, 1827, and produced altogether \$52,341.—(See letter of the Commissioner of the General Land Office, marked A.) The amount paid for rents, in consequence of the sale of the barracks, already exceeds twenty thousand dollars; and we are now paying, for quarters and storehouses, eight hundred and twenty-six dollars per month.

The works at Baton Rouge consist of two ranges of officers' quarters and two ranges of barracks for soldiers, constructed of brick materials. Each range is 180 feet in length by 36 feet in width, two stories in height, with a piazza on one side. They are deemed sufficient for the accommodation of eight companies on the present establishment, with their complement of officers. There is also a temporary hospital, constructed of wood materials, sufficiently capacious for the accommodation of the sick of a garrison of that number in seasons of ordinary sickness. The entire sum expended on those buildings was

\$101,178 77; but, deducting the materials which remained on hand, and which were transferred to the Ordnance department, amounting to \$1,350, the expenditures would be \$99,828 77.

Besides the expenditure on account of barracks and quarters, it became necessary to purchase an additional quantity of land at Baton Rouge, when the erection of those buildings was determined on, for which \$13,500 was paid—making in all a sum of \$113,328 77. This, however, does not include the expenditure on account of an arsenal and a magazine, erected under the direction of the Ordnance department.

The only letter on file in this office, believed to be embraced by the resolution, is one from the quartermaster at New Orleans, dated the 19th of December, 1827, a copy of which (marked B) is submitted.

I have the honor to be, sir, your obedient servant,

THOS. S. JESUP, *Quartermaster General*.

HON. JAMES BARBOUR, *Secretary of War, Washington City*.

A.

TREASURY DEPARTMENT, *General Land Office, March 20, 1828.*

Sir: In reply to your inquiry, under the enclosed resolution of the House of Representatives, dated the 14th instant, I have the honor to state that, under the provisions of the act of Congress of the 20th April, 1818, entitled "An act authorizing the disposal of certain lots of public ground in the city of New Orleans and town of Mobile," the military barracks in New Orleans were offered for sale on the second Monday in January, 1821, in pursuance of a proclamation of the President of the United States, dated 31st July, 1820, at which time a portion of that property was sold, producing the sum of \$48,200. The residue thereof, not claimed by the Ursuline nuns, was offered for sale on the first Monday in January, 1827, in pursuance of a proclamation of the President, bearing date the 5th August, 1826, and produced the sum of \$4,341—the aggregate proceeds of the two sales being \$52,341.

I am, sir, very respectfully, your obedient servant,

GEORGE GRAHAM.

THOS. S. JESUP, Esq., *Quartermaster General*.

B.

QUARTERMASTER'S OFFICE, *New Orleans, December 19, 1827.*

Sir: I arrived here three days ago, and avail myself of the first opportunity to represent the inconvenience and expense of keeping a garrison in this city.

Lieutenant Colonel Taylor removed his command to the public quarters at Baton Rouge on the 1st July last, being authorized to remain there during the sickly season, and that having passed he felt himself obligated to return again to this place at the close of November; but it is well known that we have no public barracks here, and the only suitable buildings, the old Spanish barracks, being private property, we are compelled to hire at the rate of upwards of five thousand dollars per annum; and as the officers must be quartered in the vicinity of their men, houses cannot be obtained for them, with the most rigid economy, at less than about three thousand more, which, with the additional cost of fuel, &c., necessarily swells the expense of maintaining this portion of the army to a sum at the rate of not less than ten thousand dollars a year over and above what they would cost at Baton Rouge. And for what? Not to protect this city against its slave population, for at this season of the year there is an average increase of its white inhabitants of not less than ten thousand persons, four thousand of whom, at least, are of the hardy class of sailors and boatmen; while in the summer, when these strangers are all away, the troops themselves are compelled to abandon the place in order to preserve their health, and that, too, without any indications of revolt. In fact, an insurrection, if it ever takes place, will, judging from the past, take place at the plantations along the river, and the troops may reach most of them from Baton Rouge with as much if not more facility than from this city. There is also another reason why they should be stationed in preference at that place, which is, that it is the great depot of arms and ammunition, which would be immediately attempted to be seized upon in the event of any organized insurrection.

If these views of the subject, and the foregoing representation of the additional cost to the Quartermaster's department of keeping a garrison in this city, are entitled to any weight, an order upon the subject emanating from Washington would correct the evil.

I am, sir, with the highest respect, your obedient servant,

GEO. BENDER, *Major and Quartermaster, United States Army*.

Brigadier General JESUP, *Quartermaster General, Washington City*.

ORDNANCE DEPARTMENT, *Washington, March 23, 1828.*

Sir: In compliance with your instructions, I have the honor to report that the public buildings erected at Baton Rouge for the ordnance service consist of the following, viz: an arsenal, ninety feet long, thirty-six feet wide, and three stories high; a magazine, fifty-five by thirty feet, one story, arched; and a storehouse, one hundred and ten by forty-five feet, one and a half story high, all of which are of brick. Beside these, there are two small workshops. The total cost of these buildings was \$71,822.

I have the honor to be your obedient servant,

G. BOMFORD, *Brevet Colonel, on Ordnance Service*.

HON. J. BARBOUR, *Secretary of War*.

20TH CONGRESS.]

No. 385.

[1ST SESSION.]

## RELATIVE TO THE EFFICIENCY OF MOUNTED VOLUNTEERS FOR THE PROTECTION OF THE FRONTIERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 1, 1828.

HOUSE OF REPRESENTATIVES, *March 25, 1828.*

SIR: The enclosed is a copy of a resolution I intend to submit to the consideration of Congress. It proposes, first, the raising of eight companies of mounted volunteers, to be stationed upon our frontiers as a protection from the Indians; and, secondly, the disbanding from the existing peace establishment one regiment of infantry. By these propositions the military force of the United States remains undiminished. Representing a portion of the country holding within its bosom Indian possessions, and having upon its frontier large tribes of savages, my constituents have been exposed, in times of peace as well as war, to hostile incursions and attacks. It has occurred to me that the change proposed would give them security and preserve the peace of the nation. My experience in Indian warfare and knowledge of Indian character have convinced me that military posts and armed footmen are not efficient securities against their secret invasions and rapid movements. The fact is well known to you that during the time I had the honor to serve with you on the northwestern frontier bands of Indians passed our military posts, almost in view, and committed upon the neighboring settlement the most shocking massacres. The history of the two wars with England, and the intermediate Indian wars, is full of such occurrences. Campaigns by armies on foot against Indians have generally failed to produce desired results; whereas expeditions of mounted men have seldom failed to afford prompt protection and just chastisement. During the late war with England a few companies of mounted men were kept moving upon the Indiana, Illinois, and Missouri frontiers, and the success of their operations, comparatively without the loss of blood, is proverbial.

It is my opinion that a single company of such troops, stationed in the open country upon those frontiers, well armed and disciplined, would be a surer protection to the inhabitants of that region against sudden attacks and depredations, and a greater terror to the savages, than an entire regiment on foot or stationed in forts upon the line.

I have proposed mounted volunteers, and prefer them to regular recruits for such a service. Young men of vigor and enterprise, reared in the western country, acquainted with the Indian artifice and their mode of warfare, full of pride and patriotic spirit, would make such a corps an ornament to the service and formidable to an enemy. Besides, the soldier who carries with him the feelings of a citizen will do more acceptable service to the inhabitants around whom he is required to move.

Knowing that you have had great experience in Indian warfare, and that you feel a deep interest in every matter connected with the defence and peace of the country, I take the liberty to enclose you my proposition, and respectfully solicit your opinion upon it, which, when received, with your permission, I shall submit, together with the resolution; to the Committee on Military Affairs.

With great respect, I remain your obedient servant,

JOSEPH DUNCAN.

Major General E. P. GAINES, *Commanding United States Army.*

*Resolved,* That the Committee on Military Affairs be instructed to inquire into the expediency of attaching to the army of the United States eight companies of volunteer mounted gunmen, to be stationed on the western frontier of the United States, and of disbanding from the present peace establishment one regiment of infantry.

WASHINGTON CITY, *March 27, 1828.*

SIR: I received this evening your letter of the 25th of this month, enclosing a copy of a resolution which you design to submit to the consideration of Congress.

1st. For raising eight companies of mounted volunteers, to be stationed upon the western frontiers as a protection against Indians; and

2d. For disbanding one of the infantry regiments of our present peace establishment.

In reply, I have the honor to state that, as far as my experience enables me to form an opinion upon the subject, I concur fully with you in the belief that "mounted gunmen," or, in other words, *mounted riflemen*, constitute the most efficient of any description of force for the protection of our scattered western frontier settlements. But I am at the same time decidedly of the opinion that you cannot, without great injury to the service, disband any part of our regular force.

Although in an open field or prairie, in operations against Indians, and in almost every other description of field service, against the regular forces of a civilized enemy, a company of infantry is equal to a company of mounted riflemen; yet, as Indian armies or war parties are but seldom, if ever, met in action in an open plain, and as their superior knowledge of the country they inhabit, with their unequalled celerity of movement, enables them to elude the vigilance and keep out of the reach of the best of our infantry, and to select the *time* and *place* for battle—a time and place usually securing to them (the Indians) decided advantages—I am convinced that one company of mounted riflemen will contribute more to keep any of the western Indians in check, and consequently to afford better protection to an exposed slender frontier than three companies of infantry without the aid of horses.

If I am correct in this conclusion—and I believe that all experienced men will agree with me—it will be found that mounted riflemen are not only a more *effective*, but a more *economical* means of frontier defence than infantry.

A respectable force of infantry should, however, be held in readiness, at Jefferson Barracks, for example, to take the field and co-operate with the mounted riflemen whenever the frontier is menaced by large bodies of Indians.

For this purpose, as well as for the defence of New Orleans, in the event of a war with any foreign power, the position at Jefferson Barracks is admirably adapted for the location and instruction of a

brigade or more of infantry; from whence, with the aid of steamboats, this force may be conveyed in the course of a few days, at any season of the year, to New Orleans; and generally, for several months in the year, this force may be moved to any part of the western frontier, one thousand miles to the north or south of that post, in ten or twelve days.

Should the corps of mounted riflemen which you propose be authorized, it would render at least two regiments of infantry *disposable*; and although it is not for me to say, without particular instructions to that effect, where these two regiments should be posted, yet I may be permitted to assure you that there are many places upon the northern and Atlantic frontiers where these regiments may be advantageously stationed. There are several places where I deem such an additional force essentially necessary to enable us to be ready for action preparatory to war, and to act up to the approved maxim, viz: "to preserve peace, be prepared for war."

I like very much the name "volunteers." No American citizen should ever be *forced* to enter the ranks of the army; but when he voluntarily enters, he should be instructed and required to do his duty with the same strictness as a volunteer as if he were in the regular service; nor should any description of force be received in service for less than two or three years.

I am, with great respect, your obedient servant,

EDMUND P. GAINES.

General JOSEPH DUNCAN, *House of Representatives.*

20TH CONGRESS.]

No. 386.

[1ST SESSION.]

ORDER OF GOVERNOR BLOUNT FOR A REGIMENT OF TENNESSEE MILITIA FOR SERVICE  
IN THE CREEK WAR FOR SIX MONTHS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 5, 1828.

Mr. HAMILTON, from the Committee on Military Affairs, reported:

That in compliance with the assurance which they presented to the House in their report on certain documents from the Department of War, transmitted in obedience to a call of this House of the 16th January last, relative to the proceedings of a court-martial which was convened at or near Mobile for the trial of certain Tennessee militiamen; also upon a correspondence which took place between the Secretary of War and the governor of Tennessee respecting the militia drafts of that State during the late war; they now submit, to be placed upon the files of this House, a duly authenticated copy, hereunto subjoined, of Governor Blount's order of May 20, 1814, by which Colonel Pipkin's regiment was called into service for six months.

NASHVILLE, *May 20, 1814.*

SIR: In compliance with the requisition of Major General Thomas Pinckney, that the posts of Fort Williams, Fort Strother, Fort Armstrong, Fort Ross, and Forts Old and New Deposit should be kept up, the doing of which he has confided to you, until the objects of the government in relation to the war against the hostile Creek Indians shall have been fully effected; and from the probable expiration of the time of service of the troops now occupying those important posts, commanded by Colonel Bunch, prior to a final accomplishment of the views of the government in relation to the Creek war, you will, without delay, order out 1,000 militia infantry of the 2d division for the term of six months, unless sooner discharged by order of the President of the United States; or you may accept a tender of service of the above number of volunteer infantry from the 2d division for the aforesaid term, for the purpose of garrisoning the said posts, at your option; which latitude, in relation to calls for men to act against the Creeks in furtherance of the views of government in that behalf, is given to me by instructions from the War Department.

Those troops will be commanded by an officer of the rank of colonel, and will be required to rendezvous at Fayetteville on the 20th of June next; thence they will proceed to the above-mentioned posts, under your order, in such number to each as you shall assign.

It is important to the public interests that they should be at those posts between the 1st and 10th of July next, as about that time the term of service of the troops now there under Colonel Bunch will expire, and at which posts there is much public property committed to their charge.

You will order the muster-master to attend and muster the troops into service. You will call on the contractor for provisions, and on the assistant deputy quartermaster likewise for supplies in his department.

WILLIE BLOUNT.

Major General ANDREW JACKSON, *2d Division of Tennessee Militia.*

STATE OF TENNESSEE, *Montgomery county:*

Be it remembered that Willie Blount, late governor of Tennessee, this 1st day of March, 1828, personally appeared before Hiram Bobo, esq., a justice of the peace in and for the county of Montgomery, in the State aforesaid, and he being first duly sworn on the Holy Evangelists of Almighty God, deposed and saith that the foregoing writing, purporting to be a copy of an order from him to Major General Andrew Jackson, dated May 20, 1814, is a correct and true copy of his original order to Major General Andrew Jackson of May 20, 1814, on his files; that the foregoing copy is taken by himself from the file now in his possession of his official papers of that date; that a copy of said order was by him transmitted, shortly

after its date, by mail to the War Department; that he has reason to believe, and does believe, that the detachment required by said order to be called out was regularly mustered, agreeably to order, into service in the month of June, 1814; and that said detachment, to his knowledge, was put under the command of Colonel Pipkin, of the Tennessee militia. And further he saith not.

WILLIE BLOUNT, *late Governor of Tennessee.*

I, Hiram Bobo, justice of the peace in the county of Montgomery, State of Tennessee, hereby certify that the foregoing deposition was made and subscribed before me this 1st day of March, 1828.

HIRAM BOBO, *Justice of the Peace.*

20TH CONGRESS.]

No. 387.

[1ST SESSION.]

ON THE SUBJECT OF BREVET RANK IN THE ARMY.

COMMUNICATED TO THE SENATE APRIL 10, 1828.

DEPARTMENT OF WAR, *April 10, 1828.*

The Secretary of War, in replying to the communication of General Harrison on the subject of brevet appointments in the army, would beg leave to refer to the report of the Adjutant General and to the opinion of the Attorney General of the United States in relation to brevet rank, both of which are enclosed.

TABLE No. 1.

*Number and rank of brevet officers of the army now in the service, and whose brevets are exhibited on the Army Register of 1828.*

	Brevet major generals.	Brevet brigadier generals.	Brevet colonels.	Brevet lieutenant colonels.	Brevet majors.	Brevet captains.	Brevet first lieutenants.	Total.
<b>FIRST CLASS.</b>								
For "gallant actions or meritorious conduct" .....	3	4	6	8	4	1		26
<b>SECOND CLASS.</b>								
For "ten years' service in one grade" .....		3	3	9	24	4		43
<b>THIRD CLASS.</b>								
To represent lost lineal rank (by reduction, and known by the term "raise") .....		1			2	3	2	8
Aggregate.....	3	4	7	15	34	11	3	77

REMARKS.

1. Since the peace three colonels of the first class have been promoted to the lineal rank of colonel, one brevet lieutenant colonel has been appointed colonel in the staff, and two have been promoted to the lineal rank of lieutenant colonels; three brevet majors, four brevet captains, and one brevet first lieutenant have been promoted to the lineal rank of their respective grades. From which it appears there are fourteen brevet officers whose lineal promotions and appointments either equal or exceed the degree of their brevets; whilst twelve of the same class, viz: six captains, two majors, one lieutenant colonel, one colonel, and two brigadiers, whose respective brevets confer higher rank than their present lineal or regimental commission.
2. Of the second class it appears there are three brevet brigadiers, three brevet colonels, and eight brevet lieutenant colonels, twenty-one brevet majors, and one brevet captain, whose "brevet for ten years' service in one grade" exceeds their regimental or staff rank proper; whilst of the same class one brevet lieutenant colonel, three brevet majors, and three brevet captains have attained co-ordinate regimental or lineal rank.
3. Of the third class all except the brevet brigadier have been promoted to the regimental rank of their respective brevets.

TABLE No. 2.

*Showing the number of brevets now due officers of the army for "ten years' service in one grade," and which will be due, inclusive of the 31st of May, 1828.*

Brevet major general .....	1
Brevet colonel .....	1
Brevet majors .....	12
Brevet captains .....	9
Total.....	23

TABLE No. 3.

Showing the number of officers of the army who will be entitled to brevets for "ten years' service in one grade," up to the 31st of December, 1828.

Brevet brigadier general .....	1
Brevet colonel .....	1
Brevet majors .....	6
Brevet captains .....	4
Total .....	<u>12</u>

TABLE No. 4.

Recapitulation of the number of brevets for "ten years' service in one grade."

	Brevet major generals.	Brevet brigadier generals.	Brevet colonels.	Brevet lieutenant colonels.	Brevet majors.	Brevet captains.	Total.
Number of brevets for "ten years' service in one grade," exhibited in the Army Register of 1823.....		3	3	9	24	4	43
Number now entitled to brevet promotion for "ten years' service in one grade," and which will be due, inclusive of May 31.....	1		1		12	9	23
Number who will be entitled to brevet promotion for "ten years' service in one grade," inclusive of December, 1828.....		1	1		6	4	12
Aggregate for "ten years' service in one grade," inclusive of the year 1828.....	1	4	5	9	42	17	78

NOTE.—The forty-two brevet majors are captains in the line. The seventeen brevet captains are first lieutenants in the line, except three, who have attained co-ordinate lineal rank.

ADJUTANT GENERAL'S OFFICE, Washington, April 25, 1828.

R. JONES, Adjutant General.

OFFICE OF THE ATTORNEY GENERAL OF THE UNITED STATES,

February 20, 1828.

SIR: In relation to Major Worth's memorial, I beg leave to refer you to an opinion which I gave your predecessor on April 5, 1824, and which I presume is on file in your office. It is impossible for me to state my construction of the law in relation to a claim of promotion on service in *brevet* rank in terms more clear and distinct than I have done in that opinion.

If the opinion has been mislaid I will have great pleasure in furnishing you with a copy of it. Whether Major Worth's claim be within the principle of that opinion is a question so purely military and involving so much of military usage and practice, with which as a lawyer I cannot be supposed to be acquainted, that I can scarcely presume you expect me to hazard an opinion on it. So far as the law speaks it is my office to answer. But the usage and practice of the army lie beyond my sphere. I can only observe, in general, that in order to found a claim to promotion on ten years' service in the same grade, the service must be such as could be rendered only by an officer holding that grade. I will illustrate my meaning by some of the services enumerated by Major Worth.

He claims for service in the staff of General Scott; if that service might have been rendered by a captain *without additional rank*, it is not a service which could be rendered only by a major, and, therefore, is not within the principle of my opinion.

He claims also for service rendered in command of the post of Greenbush, where he had under his command one company and detachment of recruits of all arms; if that, again, is a service to which a captain might have been ordered, and in which, as *captain*, he could have commanded, it is not a service rendered *only by virtue of his grade of major*, and is, therefore, not within the principle of the opinion. Again, I am not sufficiently a master of the facts, there being no statement in the case from your department, to know whether Major Worth has been and now is *in the army of the United States*, and in *that army* is rendering services which he could *only* render *by virtue of his grade of major*. By the act of July 6, 1812, the President's authority to confer *brevet rank* is confined to *officers of the army*; and where length of service is the *basis* of promotion, to such *officers of the army* as "*shall have served ten years in any one grade.*" To give the claim, therefore, to promotion on this basis, the claimant must have been continually *an officer in the army*, and he must for ten years have served in one grade; *i. e.*, according to my construction of the law, must for ten years have rendered the services *appropriate* to that grade; by which I mean such services as *that grade only could have authorized him to perform, and which he could not have been regularly called to perform but in virtue of that grade.*

Major Worth's claim, so far as I understand the case, introduces a new question which I have never before been called to consider, and that is whether the ten years' service in the same grade must be *ten consecutive years*, or whether the ten years may be made up of irregular and desultory services at different times in the brevet grade, interspersed with services in the lineal grade, the latter being thrown out of the account and the former thrown together so as to form an aggregate of ten years.

If there has been a *practice* introduced on this subject, it would be unjust to change it to Major Worth's prejudice; but if there has been no practice, and the question is a new question, standing now for the first time on a construction of the law, my opinion is that the ten years' service contemplated by Congress was a service *for ten consecutive years*. Such is the impression which I derive from the phraseology of the law and from looking at the policy which seems to me to have dictated the provision.

It was my original opinion, as you will see by reference to it, that Congress meant nothing more by this provision than to anticipate a vacancy in the line, and to confer *by brevet* that rank which would have been conferred *by commission* had a vacancy existed, intending, as I conceive, that the brevetted officer should rest upon his brevet until a vacancy in the line should occur, and that whenever it should occur that he should drop into the line *by commission* on the grade previously conferred by his *brevet*. I did not and do not believe that Congress looked further than *one* promotion by brevet beyond the lineal rank held by the officer, and that they did not look to the case of his being borne away from his lineal ground by brevet upon brevet to the highest rank in the army.

I founded this opinion on the simple language of the law, which seemed to me by no means to contemplate consequences so remote and complex. But the law had been twelve years in operation when I was called to give the first opinion, and had received a settled practical construction by which brevet had been conferred upon brevet until the lieutenant or captain in the line had been raised by successive brevets to the rank of a general. The point having been thus practically settled that *brevet* rank was a proper basis under this law for further promotion by *brevet*, the question was, whether ten years' service was not placed by the law on the same footing with gallant actions and meritorious conduct? and it was manifest to me that it was. The language of the act seemed to me to place it beyond doubt. "The President is hereby authorized to confer brevet rank, 1st, on such officers of the army as shall have distinguished themselves by gallant actions; 2d, or by meritorious conduct; 3d, or who shall have served ten years in any one grade." The ten years' service, therefore, in any one grade gives precisely the same authority for a brevet as the gallant actions and the meritorious conduct; and as it had been settled that brevet might be conferred upon brevet for gallant actions and meritorious conduct, it seemed to me to follow that the ten years' service, being the precise equivalent in the law for gallant actions and meritorious conduct, brevet might be conferred on brevet in the latter case as well as in the former, provided the ten years' service were *in the brevet grade* on which the promotion was asked; that is, a ten years' service *commensurate with such brevet grade, appropriate to that grade, founded on the authority of that grade*; such as could be *properly rendered only in virtue of the grade* conferred by the brevet; for the service must meet this description in all its aspects to make it an equivalent for the gallant actions and meritorious conduct which formed the other basis of promotion.

Why was the provision extended to ten years' service in any one grade? A meritorious officer might have had no opportunity to distinguish himself; it would have been a heart-breaking business to a man of spirit to see others advanced over his head by the mere casualties of fortune over which he had no control, and to find himself serving all his life in the same rank without any hope of promotion. A captain in the line sees a lieutenant advanced over his head and made by successive brevets a major general, while he finds himself at the close of the war still a captain, without any reasonable prospect of advancement. This was the grievance which Congress proposed to remedy. It seems to me that the single case within their contemplation was *ten continued years of service in the same grade*. Service *in the line* was the *direct* object of their contemplation, where the ten years were *necessarily* ten consecutive years in the same grade. They looked *immediately* to the *first brevet* which was to act, of necessity, on *lineal* rank and *lineal* service, which *lineal* service must of *necessity* have been for ten consecutive years. This was the *prototype*, in their view, of brevet rank conferred on service. I believe, as I have said, it was all they contemplated; and though I have been borne from this ground by the practical exposition of the law on the other branch of it, yet I think we ought to adhere to that prototype as closely as we can; and as brevet rank could only be conferred on *ten consecutive years' service in the line*, so I think it can only be conferred on *ten consecutive years' service by brevet*.

It may be urged that the reason is the same, whether the ten years be *consecutive* or made of dismembered fragments, and that where the reason is the same the law is the same.

To which I answer that this maxim has never been pushed so far as to authorize us to speculate on what the legislature would probably have done if they had contemplated the case hypothetically put, and to assume our speculative conclusions or conjectures as the law. In the construction of a law the question always is, what did the legislature contemplate, and that only which they did contemplate is within the law. I am satisfied, for the reasons already given, that no case was before their mind's eye but the case of a service for ten consecutive years in the same grade, and that to apply the law to dismembered portions of time would be to apply it to a case which they did not contemplate; nor can it be admitted that *the reason is the same*.

Ten years of continual uniform service in the same grade, relieved by no relaxation, broken by no variety, is a very different thing, in the labor and pressure both upon the mind and body, from a sparse and desultory service, relieved and diversified by lighter duties.

There is another point of view in which I have never before been called to consider this act, which is this: the act merely authorizes the President to confer brevet rank—it does not *command* him. It is referred to his sound discretion to say whether the gallant actions or meritorious conduct have been sufficiently important to deserve such a mark of distinction; so also it is referred to his discretion to say whether the grade and the ten years' service in that grade have been of sufficient importance to deserve it. It may at first appear that there would be more difficulty in making the distinction in the latter case than in the former; but further reflection will correct the mistake and satisfy the candid inquirer that, in practice, the discrimination would call for as much sound judgment in the former as in the latter case. It is easy to conceive that the grade and the services appropriate to it may be little more than an honorary *sinécure*, and to confer a *brevet*, in every case, without distinction, would make the honor so cheap and common as to deprive it of the *stimulus* which the law intended.

The question propounded to me in 1824 was, whether the specific cases were within the scope of the *President's authority* under the act. But the general reference which you make of Major Worth's memorial,

and the general course of reflection on the act to which that reference has led me, suggests the propriety of now stating that the act is not *mandatory*, but the mere communication of an authority to be exercised by the President under the guidance of a sound discretion.

Without proposing to decide on the case of Major Worth, I have thus given you my general views of the law, leaving it to you to apply the principles to the particular case, which you are far more competent to do than I can be supposed to be; and I beg leave to repeat, what I have often found myself constrained to state, that legislation with regard to the army is so often blended tacitly with the existing usages and practice of the army, known only to military men, that it is with great distrust of my own judgment that I express an opinion on an act of Congress *purely military* in its character. The Secretary of War, by the nature of his office, by the archives of his command and with which he must be familiar, and by the council of military men of the first rank with which he is always surrounded, has means of understanding the legislative will in matters of this sort which the mere lawyer cannot possibly possess, cut off as he is from all this knowledge and experience and all those advantages. I have some reason to believe that my former opinion on this law was not satisfactory to your predecessor, and it was matter of regret to me to learn that it was, nevertheless, acted upon. With great deference, this ought not to have been done. It would have been much better, then, and permit me to say that it will be much better now, for the department to take its own course, or to call upon Congress for an explanatory act, than to adopt the errors of an Attorney General upon a subject so purely military, and which it would be no reproach to him to have misapprehended.

I have the honor to remain, sir, very respectfully, your obedient servant,

WM. WIRT.

Hon. JAMES BARBOUR, *Department of War.*

20TH CONGRESS.]

[1ST SESSION.]

STATEMENT OF THE AMOUNT OF MONEY PAID TO MAJOR GENERAL JACOB BROWN  
AND HIS AIDS FOR PAY AND EMOLUMENTS FROM 1820 TO 1828.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 9, 1828.

DEPARTMENT OF WAR, *May 8, 1828*

SIR: In obedience to a resolution of the House of Representatives of the 28th ultimo, directing the Secretary of War to inform the House "what sums of money have been received by the late Major General Brown, and also what sums have been received by his aids, in each year since 1820, for pay, subsistence, forage, quarters, conveyance of baggage; for the pay, subsistence, and clothing of waiters, and for all other emoluments and disbursements of office," I have the honor to transmit herewith statements of the Second and Third Auditors of the treasury, which furnish the information required.

I have the honor to be your obedient servant,

JAMES BARBOUR.

Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

TREASURY DEPARTMENT, *Second Auditor's Office, May 1, 1828.*

SIR: In pursuance of a resolution of the House of Representatives of the 28th ultimo, instructing the Secretary of War "to inform the House what sums of money have been received by the late Major General Brown; and also what sums have been received by his aids, in each year since 1820, for pay, subsistence, forage, quarters, conveyance of baggage; for the pay, subsistence, and clothing of waiters, and for all other emoluments and disbursements of office," I have the honor to enclose you a statement commencing the 1st day of January, 1821, and ending the 31st day of January, 1828, inclusive, embracing all the information in relation to the call, which the records and files of this office afford.

With great respect, your obedient servant,

WM. LEE.

Hon. JAMES BARBOUR, *Secretary of War.*

*Statement of the amount of money paid to the late Major General Jacob Brown and his aids; for pay, subsistence, forage, and pay, subsistence, and clothing of waiters, from January 1, 1821, to January 31, 1828; furnished in pursuance of a resolution of the House of Representatives of April 28, 1828.*

TREASURY DEPARTMENT, Second Auditor's Office, May, 1828.

WM. LEE.

TREASURY DEPARTMENT, Third Auditor's Office, May 3, 1828.

SIR: Agreeably to the resolution of the House of Representatives of the United States, adopted on the 28th ultimo, and by you referred to this office, I have the honor to hand you herewith a statement of the sums of money which have been received by the late Major General Jacob Brown and his aids in each year since 1820, on account of quarters, fuel, and transportation of baggage, and all other disbursements of office, so far as the same can be ascertained from accounts rendered to, and on file in, this office.

With great respect, your most obedient servant, PETER HAGNER, Auditor.

Hon. JAMES BARBOUR, Secretary of War.

A statement of the sums of money which have been received by the late Major General Jacob Brown and his aides-de-camp, for each year since 1820, for quarters, fuel, transportation, and all other disbursements of office, prepared in pursuance of a resolution of the House of Representatives of the United States of April 28, 1828.

TREASURY DEPARTMENT, Third Auditor's Office, May 3, 1828.

PETER HAGNER, Auditor.

20TH CONGRESS.]

No. 389.

[1ST SESSION.]

## CLAIM OF MASSACHUSETTS ON ACCOUNT OF MILITIA SERVICES DURING THE WAR OF 1812, 1815, CLASSIFIED, ARRANGED, AND EXEMPLIFIED BY DOCUMENTARY EVIDENCE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 10, 1828.

DEPARTMENT OF WAR, *May 9, 1828.*

SIR: In obedience to a resolution of the House of Representatives of the 15th of December, 1826, directing "that the Committee of the Whole House be discharged from the further consideration of the bill to authorize the settlement and payment of the claim of the State of Massachusetts for certain services rendered during the late war; that the same, with the claim of Massachusetts for military services, be referred to the Secretary of War; and that he be instructed to report to this House what classes and what amount of said claim may be allowed and paid upon the principle and rules which have been applied to the adjustment of claims of other States for military services during the late war, and to which the assumed authority of the governor of that State to control the militia, and to judge of the necessity of ordering them into service, does not apply; and also, if any parts of said claim are disallowed, to state the reasons for which the same are rejected," I have the honor to transmit herewith a copy of my instructions to the Third Auditor, marked A, and his report, with accompanying documents, marked B, in fulfilment of the duty assigned me by the above resolution.

I have the honor to be your obedient servant,

JAMES BARBOUR.

HON. ANDREW STEVENSON, *Speaker of the House of Representatives.*

A.

DEPARTMENT OF WAR, *December 22, 1826.*

SIR: The House of Representatives having resolved "that the Committee of the Whole House be discharged from the further consideration of the bill to authorize the settlement and payment of the claim of the State of Massachusetts for certain services rendered during the late war; that the same, with the claim of Massachusetts for military services, be referred to the Secretary of War; and that he be instructed to report to this House what classes and what amount of said claim may be allowed and paid upon the principle and rules which have been applied to the adjustment of claims of other States for military services during the late war, and to which the assumed authority of the governor of that State to control the militia, and to judge of the necessity of ordering them into service, does not apply; and also, if any parts of said claim are disallowed, to state the reasons for which the same are rejected:" the examination of those claims preliminary to the performance of the duty assigned to the Secretary of War, is referred to the Third Auditor. The whole claim in all its parts must be prepared. It will then be subjected to the following classification:

1st. Embracing all the items not warranted by the principles of adjustment adopted in settling similar claims made by other States.

2d. All the items embraced by such principles.

3d. Subdivide this classification by noticing what portion resulted from calls made by the executive of Massachusetts, and those by militia officers without the sanction of the executive; and note whether the calls made by the executive of Massachusetts were spontaneous, or made in compliance with calls made by the Executive of the United States; and in either case, whether he consented or refused to subject them to the authority of the government of the United States; adding, in every case of the calls, the circumstances, as far as they can be ascertained by the documents leading thereto.

As this claim has already in part been investigated by the Third Auditor, and some progress made in ascertaining the amount of this claim, so much thereof as is applicable to the duties now enjoined may be considered as performed.

I have the honor, &amp;c.,

JAMES BARBOUR.

PETER HAGNER, Esq., *Third Auditor.*

B.

TREASURY DEPARTMENT, *Third Auditor's Office, January 30, 1828.*

SIR: I have the honor, in relation to the claim of the State of Massachusetts, to inform you that agreeably to the directions contained in your letter to me of December 22, 1826, reciting a resolution on the subject passed by the House of Representatives, the claim has been examined, and as nearly as it has been found practicable, classified conformably to those directions, and I now send you statements exhibiting the result, marked A, B, C, D, E, F, and G, and also a synopsis of the whole claim, marked H.

These statements severally show, as well as could be derived from the vouchers, the aggregate of the charges, in respect of each particular call of the militia into service, and by whom or under what authority the same was made; and the documents explaining at whose instance every such call took place, and the circumstances occasioning it, are therein either fully set forth or the purport of them related.

General remarks in relation to the deductions enumerated in the statements are appended to the synopsis; and lest particular explanation concerning them may be deemed necessary, the rough notes in detail, made on the examination of the vouchers, and contained in books numbered from 1 to 12, inclusive,

are herewith transmitted. These should be returned to this office when done with, there being no copies thereof, nor any other means of supplying their places than could be obtained by a re-examination of those very numerous vouchers. The immensity of the labor attending the investigation of the claim, and its preparation in the mode required, may in some degree be judged of from these notes, but they convey a very imperfect idea of the time necessarily occupied in collecting from such an extensive mass of items those applicable to each distinct call, especially in the scattered state in which these were, and in dissecting, as had to be done in numerous instances, a voucher into a variety of parts. I notice this to account for the apparent great length of the period this business has been on hand.

With great respect, your most obedient servant,

PETER HAGNER, *Auditor.*

Hon. JAMES BARBOUR, *Secretary of War.*

A.

GUARDS

*Statement applicable to such items in the claim of the State of Massachusetts as relate to expenditures consequent on calls of militia into service (for guard duty) under the authority given to several major generals of militia by a general order issued by the adjutant general of the State, by direction of the State executive, on the 16th of June, 1814, an extract of which follows:*

“The constant alarm excited and kept up by the predatory course of warfare lately adopted on our seaboard renders it necessary that guards should be kept up at some of the places, those particularly exposed by having quantities of shipping lying therein. To facilitate the execution of such a purpose, and to render the necessary aid as prompt and efficacious as possible, his excellency the commander-in-chief directs me to signify it to you as his pleasure that you furnish to every town whose situation, from the present pressure of the war, is exposed to surprise and immediate danger, such military force, and more especially such guards by night, as its peculiar situation and circumstances require.”

*Guard at Scituate.*—From June 28 to November 5, 1814.

Aggregate expenditure.....		\$1, 285 61
Deduct payments for clothing.....	\$180 81	
Deduct payments for use of arms.....	36 07	
Deduct overpayments, &c.....	16 50	
Deduct rations reduced.....	59 22	
Deduct miscellaneous accounts.....	34 00	
		<u>326 60</u>
Admissible.....		<u>959 01</u>

At the instance of the committee of defence of the town of Scituate, Lieutenant Colonel Turner, by letter dated June 24, 1814, applied to Major General N. Goodwin for a permanent guard, the inhabitants having been in a state of constant alarm by reason of the repeated appearance of the enemy's vessels in or near the harbor. Agreeably thereto, General Goodwin on the same day issued a division order, pursuant to which the detachment first before mentioned entered on service.

*Guard at Cohasset.*—From September 25 to November 6, 1814.

Aggregate expenditure.....		\$193 37
Deduct payments for clothing.....	\$25 10	
Deduct payments for use of arms.....	5 00	
Deduct overpayments.....	10 95	
Deduct miscellaneous accounts.....	8 30	
		<u>49 35</u>
Admissible.....		<u>144 02</u>

In relation to this guard, a letter is attached to the pay-roll, of which the following is a copy:

CANTON, *February 9, 1815.*

GENTLEMEN: In the month of September last past I received an order from the commander-in-chief to place a guard at discretion in the town of Cohasset. Thomas Bourn, esq., and Captain Peter Lothrop were in Boston applying for the same. They had called on General Dearborn to furnish one at the expense of the general government, and he had not given his answer when I left town. My understanding was, that if they did not succeed with him they were to write immediately, and I would then order a sergeant's guard, which I considered necessary. They state that they expected an order would be left with my son in Boston. Had they informed me of their application failing with General Dearborn, I should have issued the order, as I consider the guard they have kept was necessary for their safety.

I am, with respect and esteem, yours,

ELIJAH CRANE, *Major General First Division.*

The Hon. BOARD OF WAR, *Boston.*

*At Plymouth.*—Four detachments, commencing June 20 and ending November 6, 1814.

Aggregate expenditure.....		\$4, 144 34
Deduct payments for clothing.....	\$512 50	
Deduct payments for use of arms.....	97 21	
Deduct overpayments.....	23 98	
Deduct rations reduced.....	205 74	
Deduct miscellaneous accounts.....	33 40	
		872 83
Admissible.....		3, 271 51

These four several detachments were in succession called out and discharged by division orders issued by Major General N. Goodwin on the 16th and 19th June, 9th July, 21st August, 24th September, 4th and 19th October, and 5th November, 1814. No explanations of the reasons are furnished. During the entire period of their service, a lieutenant and 22 men of the United States army were stationed at the Gurnet fort in Plymouth harbor; and in addition thereto, from the 4th of August to the end of October, two detachments of militia, (in service of and paid and supported by the United States,) one consisting of a lieutenant and 18 non-commissioned officers and privates of artillery, and the other of a lieutenant, ensign, and forty non-commissioned officers and privates of infantry, were also stationed there. From the 19th September to the 19th October, there was, too, in service at Plymouth, a large militia force under the command of Lieutenant Colonel Caleb Howard.

*At Duxbury.*—Four detachments, commencing June 25 and ending November 7, 1814.

Aggregate expenditure.....		\$2, 877 76
Deduct payments for clothing.....	\$356 93	
Deduct payments for use of arms.....	67 33	
Deduct overpayments.....	25 99	
Deduct rations reduced.....	130 53	
Deduct excess of rations.....	29 80	
Deduct miscellaneous accounts.....	161 73	
		772 31
Admissible.....		2, 105 45

These detachments appear to have been successively called out and discharged under division orders of Major General N. Goodwin, issued on the 16th and 19th June, 1st and 20th July, 21st August, 19th October, and 5th November, 1814. After the first of them had been some time on duty, viz: on the 4th of July, 1814, a letter appears to have been addressed to the general by the chairman of the committee of safety of the town of Duxbury, designating the stations at which the committee wished to have sentinels placed, and requesting that the officer might be directed to comply with the regulations of the committee; and this is the only application appearing to have been made by the town to the general in relation to these detachments.

In consequence of applications to General Dearborn on behalf of the citizens of Duxbury and Cohasset, who were desirous of having small forces stationed for the defence of those towns, and of anticipated similar applications from other places, he wrote to the State adjutant general on the 12th of August, 1814, a letter, of which a copy will be found at the end of this statement, and whereto no reply appears to have been made.

*At Kingston.*—Three detachments, commencing June 25 and ending November 3, 1814.

Aggregate expenditure.....		\$427 50
Deduct payments for clothing.....	\$59 75	
Deduct payments for use of arms.....	11 95	
Deduct overpayments.....	2 18	
Deduct rations reduced.....	21 96	
Deduct miscellaneous accounts.....	5 00	
		100 84
Admissible.....		326 66

These detachments appear to have been called out and discharged pursuant to division orders issued by Major General N. Goodwin on the 23d June, 1st July, and 21st August, and 26th October, 1814. Whether or not any application was made to him by the town for them does not appear.

*At Rochester.*—Four detachments, commencing June 24 and ending October 22, 1814.

Aggregate expenditure.....		\$2, 208 38
Deduct payments for clothing.....	\$288 96	
Deduct payments for use of arms.....	57 40	
Deduct overpayments.....	27 41	
Deduct rations reduced.....	114 69	
Deduct excess of rations.....	4 20	
Deduct miscellaneous accounts.....	15 00	
		507 66
Admissible.....		1, 700 00

For calling out and discharging these detachments, Major General N. Goodwin appears to have issued orders on the 22d June, 17th July, 10th August, 16th September, and 17th October, 1814. And the first and third of those orders required that the ensign, one sergeant, one corporal, and fifteen privates should mount guard at the harbor of Mattepois; and that the remaining sergeant, coporal, and nine privates should perform like duty at Sippicum harbor.

Prior to the first call an application appears to have been made to the general, of which the following is a copy:

ROCHESTER June 19, 1814.

SIR: By the request of the inhabitants of Mattaposset, I take the liberty to address you, having previously wrote to Colonel Washburn and received no answer. Our request is, if consistent with your orders, to have some assistance by a detachment from the militia of this regiment. Our situation is this: The British ships are almost all the time in the Vineyard sound. The Nimrod has appeared in our harbor, destroyed Wareham, and threatens destruction to this place. We have forborne calling for men as long as possible; but the case now becomes serious, and without some assistance we shall fall a sacrifice to our enemy. The militia and inhabitants of this place have been under arms for some time, and are almost exhausted with fatigue. Mr. Gideon Barstow, the bearer, can give you all the information.

With due obedience, sir, I remain your humble servant,

DANIEL B. LORING, *Captain.*

Major General Goodwin.

June 22.—Ordered one sergeant, one corporal, and fifteen privates for the above harbor.

N. GOODWIN, *Major General.*

*At Wareham.*—Two detachments, commencing June 24 and ending October 28, 1814.

Aggregate expenditure .....		\$1, 188 92
Deduct payments for clothing.....	\$170 67	
Deduct payments for use of arms.....	34 13	
Deduct overpayments.....	2	
Deduct rations reduced .....	53 11	
Deduct miscellaneous accounts.....	5 70	
	<hr/>	263 63
Admissible .....		<hr/> <hr/> 925 29

Division orders for calling out and discharging these attachments appear to have been issued by Major General N. Goodwin on the 20th and 21st June, 14th July, and 26th October, 1814. In a letter addressed by Curtis Tobey and Bartlett Murdock to General Goodwin, dated June 14, 1814, and asking, on behalf of the inhabitants of Wareham, for assistance, it is represented that on the 13th of that month the enemy came into Wareham and made considerable havoc, having set fire to a factory and burnt several vessels, and then returned aboard their shipping before any force against them could be collected.

*At Fairhaven.*—Three detachments, commencing July 10 and ending October 3, 1814.

Aggregate expenditure .....		\$311 66
Deduct payments for clothing.....	\$43 87	
Deduct payments for use of arms .....	8 79	
Deduct overpayments.....	4 34	
Deduct rations reduced.....	15 87	
Deduct excess of rations .....	3 60	
	<hr/>	76 47
Admissible .....		<hr/> <hr/> 235 19

These detachments are expressed at the head of the rolls to have been guards stationed at Scouticut Neck, in Fairhaven, by order of Lieutenant Colonel Lincoln.

No other information concerning them is furnished than is afforded by the communications between Lieutenant Colonel Lincoln and General Goodwin, introduced in another statement, relative to militia in service at New Bedford and Fairhaven. Corporal Aikin's detachment appears to have been on duty at the same place and for six days of the same period of that of Sergeant Pope; and during the whole time of service of both detachments other militia were in service at Fairhaven, as well as United States troops.

*At Westport.*—A detachment from June 18 to August 23, 1814.

Aggregate expenditure .....		\$767 63
Deduct payments for clothing.....	\$88 00	
Deduct payments for use of arms .....	17 60	
Deduct rations reduced.....	35 37	
Deduct miscellaneous accounts.....	73 00	
	<hr/>	213 97
Admissible .....		<hr/> <hr/> 553 66

Lieutenant Colonel Lincoln has certified on the muster-roll that this detachment was stationed at the harbor in Westport by his order. For further information see his communications, before referred to, which contain all that is furnished.

*At Dartmouth.*—Three detachments, commencing June 18 and ending August 12, 1814.

Aggregate expenditure .....		\$1,062 05
Deduct payments for clothing.....	\$150 51	
Deduct payments for use of arms.....	29 27	
Deduct overpayments.....	9 83	
Deduct rations reduced .....	52 29	
Deduct miscellaneous accounts .....	3 84	
		<u>245 74</u>
Admissible .....		<u><u>816 31</u></u>

These detachments are represented on the rolls to have been guards, stationed by order of Lieutenant Colonel Lincoln on Ricketson's Neck, in Dartmouth. The detachment commanded by Lieutenant Howland is stated to have been stationed at Dartmouth, and Lieutenant Colonel Lincoln has certified that the services were performed. At the head of the pay-roll this detachment is said to have been a guard ordered out on an alarm, and continued and detached under division orders of June 21, 1814. During the time it was in service (save the first three days) the detachments commanded by Sergeants Craw, Whelden, and Gifford were, in succession, also on duty, as is previously shown. The only other information furnished in relation to these detachments is to be found in the communications of Lieutenant Colonel Lincoln before alluded to.

*At Barnstable, Yarmouth, Sandwich, Brewster, and Harwich.*—Sundry detachments, commencing July 17 and ending November 11, 1814.

Aggregate expenditure .....		\$1,796 54
Deduct payments for clothing.....	\$255 75	
Deduct payments for use of arms.....	50 62	
Deduct overpayments.....	2 46	
Deduct rations reduced.....	93 75	
		<u>402 58</u>
Admissible .....		<u><u>1,393 96</u></u>

On the 5th July, 1814, Major General N. Goodwin, to whom applications for guards appear to have been made by the towns of Barnstable and Sandwich, issued a division order, directing a detachment to be made and posted by Brigadier General Lothrop and Major Cobb, as follows, viz: one sergeant, two corporals, and twelve privates at Barnstable, Hyannis, and Yarmouth; one sergeant, one corporal, and six privates at Brewster and Harwich; and a corporal and four privates at Sandwich. General Lothrop, before executing this order, addressed a note to General Goodwin, representing the portion allotted for Barnstable and Yarmouth to be too small to accomplish the intention of the order and asking to have a larger number of men. General Goodwin, however, in his reply, declined to increase it, deeming it to be sufficient. Notwithstanding this, the items last specified include the pay, rations, &c., of seven men more than were required by the order.

By a division order, issued on the 20th October, 1814, General Lothrop was required to discharge all the guards stationed at Yarmouth and Harwich; and by another order, issued on the 5th November, he was directed to discharge those doing duty at Barnstable and Sandwich.

The inhabitants and proprietors of the town and salt works of Brewster, to prevent the destruction thereof, complied with a call made on the 17th September, 1814, by Captain Baggett, of the British ship *Spencer*, for a contribution of four thousand dollars, and on the 22d of that month the guard which had been stationed in that town appears to have been discharged.

*At Falmouth.*—A detachment, from September 1 to December 1, 1814.

Aggregate expenditure .....		\$906 00
Deduct payments for clothing.....	\$82 50	
Deduct payments for use of arms.....	16 50	
Deduct rations reduced.....	29 70	
Deduct miscellaneous accounts.....	322 00	
		<u>450 70</u>
Admissible .....		<u><u>455 30</u></u>

Application for a guard appears to have been made by the town to General Goodwin on the 17th August, 1814, and on the 19th he issued a division order under which this detachment was called out. By another division order, issued on the 28th October, 1814, Captain Jenkins was directed to discharge six of the men, and to keep the remainder on duty a little longer if he thought them to be wanted; otherwise, to discharge the whole.

*At Orleans.*—A detachment, commencing October 15 to November 23, 1814.

Aggregate expenditure .....		\$94 64
Deduct payments for clothing.....	\$12 80	
Deduct payments for use of arms.....	3 20	
Deduct overpayments.....	61	
Deduct rations reduced.....	4 80	
		<u>21 41</u>
Admissible .....		<u><u>73 23</u></u>

Lieutenant Colonel Jonathan Snow, in a certificate annexed to the roll, states that these sentinels were ordered out by his command. And the performance of the service is verified by a certificate of Captain Henry Knowles, to whose company the men belonged. No other information in relation thereto is furnished.

*At Beverly.*—Sundry detachments, commencing June 14 and ending October 11, 1814.

Aggregate expenditure .....		\$2, 259 85
Deduct payments for clothing .....	\$239 76	
Deduct payments for use of arms .....	44 56	
Deduct overpayments .....	13 06	
Deduct rations reduced .....	94 05	
Deduct excess of rations .....	20	
Deduct payments for forage .....	14 66	
		<u>406 29</u>
Admissible .....		<u>1, 853 56</u>

These detachments were a succession of guards, consisting of one subaltern, one drummer, one fifer, two sergeants, two corporals, and twenty-four privates, called out in pursuance of division orders issued by Major General Amos Hovey; the first of them bearing date the 16th June, 1814.

*At Beverly and Manchester.*—Two detachments, commencing August 21 and ending October 22, 1814.

Aggregate expenditure .....		\$1, 184 30
Deduct payments for clothing .....	\$156 02	
Deduct payments for use of arms .....	28 56	
Deduct rations reduced .....	43 48	
		<u>228 06</u>
Admissible .....		<u>956 24</u>

On the 11th August, 1814, an order was issued by Major General Amos Hovey authorizing a guard, to consist of one lieutenant, two sergeants, two corporals, one drummer, one fifer, and twenty-four privates, to be stationed at Beverly and Manchester. Accordingly, on the 21st August, 1814, the first detachment entered on duty and continued in service till the 21st September, when it was relieved by the second detachment, which continued in service till the 22d October, 1814.

*At Beverly.*—A detachment from Colonel Dodge's regiment, commencing June 22 and ending August 24, 1814.

Aggregate expenditure .....		\$492 38
Deduct payments for clothing .....	\$59 17	
Deduct payments for use of arms .....	11 80	
Deduct overpayments .....	6 14	
Deduct rations reduced .....	22 41	
		<u>92 52</u>
Admissible .....		<u>392 86</u>

According to the pay-roll, one lieutenant, one sergeant, one corporal, and seventeen privates of Captain Joseph Hooper's company performed duty as guards at Beverly, from 3 to 59 days. The only information that has been found to elucidate the character of the service of this guard is an order issued by Colonel Dodge on the 28th of June, 1814, directing Captain Hooper to order out for the night of that day, one sergeant, and ten privates, and to continue the same until otherwise ordered.

*At Newburyport and Plumb island.*—Six detachments, commencing June 21, 1814, and ending March 10, 1815.

Aggregate expenditure .....		\$6, 021 39
Deduct payments for clothing .....	\$407 89	
Deduct payments for use of arms .....	78 49	
Deduct overpayments .....	3 42	
Deduct rations reduced .....	158 93	
Deduct miscellaneous accounts .....	2, 578 43	
		<u>3, 227 16</u>
Admissible .....		<u>2, 794 23</u>

On the 18th June, 1814, Major General Amos Hovey issued a division order directing Colonel Merrill, without delay, to detach a nightly guard, to consist of one sergeant, one corporal, one drummer, one fifer, and twelve privates, to be stationed at such places as would best promote the safety of the town of Newburyport. In obedience to said order, a nightly guard was established on the 21st June, 1814. By a division order, issued on the 22d June, 1814, the guard was increased to 14 privates, and was made permanent, and kept constantly on duty. By another division order, bearing date the 3d of October, 1814, the foregoing guard was discontinued, and in lieu thereof a guard consisting of one subaltern, one sergeant, two corporals, two musicians, and twenty-four privates, was ordered to be stationed on Plumb island, and such other places as should be deemed by the brigadier general best for the safety of Newburyport and its vicinity. This last-mentioned guard was kept up until the 9th of December, 1814, when it was, in obedience to a division order of that date, reduced to one sergeant, one corporal, and twelve

privates. This guard was kept in service at Fort Phillips, on Plumb island, until the 10th of March, 1815, when it was finally discharged under a division order of the 3d March, 1815.

*At Lynn.*—A detachment from Lieutenant Colonel Brimblecom's regiment, commencing June 27, and ending August 16, 1814.

Aggregate expenditure . . . . .		\$400 35
Deduct payments for clothing . . . . .	\$47 03	
Deduct payments for use of arms . . . . .	9 76	
Deduct overpayments . . . . .	69	
Deduct rations reduced . . . . .	35 16	
		<u>92 55</u>
Admissible . . . . .		<u>307 80</u>

By a division order, issued by Major General Amos Hovey on the 27th of June, 1814, Lieutenant Colonel Brimblecom was directed to furnish from his regiment a nightly guard, to consist of one sergeant, one corporal, one drummer, one fifer, and twelve privates, and to station them at such places as he should judge would "best protect the inhabitants of Lynn against any attacks from the enemy's boats." The guard was kept up until the 16th of August, 1814, when it was discontinued.

*At Marblehead.*—Detachments commencing June 16, and ending August 5, 1814.

Aggregate expenditure . . . . .		\$1,079 16
Deduct payments for clothing . . . . .	\$124 38	
Deduct overpayments . . . . .	6 65	
Deduct rations reduced . . . . .	42 87	
		<u>173 90</u>
Admissible . . . . .		<u>905 26</u>

By a division order, issued by Major General Amos Hovey on the 16th of June, 1814, Captain Prentiss was directed to furnish from the battalion under his command a nightly guard, to consist of one sergeant, one corporal, one drummer, one fifer, and twelve privates, and to station them at such places as he should judge best for the safety of the town. By a division order, bearing date the 2d of July, 1814, it appears that the "committee of safety in the town of Marblehead" had requested the major general to increase the guard which had been furnished in pursuance of the order of the 16th of June, 1814; and in accordance with that request Captain Prentiss was ordered to furnish a guard that should thereafter consist of one subaltern, two sergeants, two corporals, one drummer, one fifer, and twenty-four privates. This last mentioned guard was discontinued on the 5th of August, 1814, agreeably to a division order of the 4th of August, 1814.

*At Salem.*—Sundry detachments, commencing June 10, and ending August 5, 1814.

Aggregate expenditure . . . . .		\$1,103 98
Deduct payments for clothing . . . . .	\$158 45	
Deduct payments for use of arms . . . . .	19 60	
Deduct overpayments . . . . .	7 19	
Deduct rations reduced . . . . .	50 25	
		<u>235 49</u>
Admissible . . . . .		<u>268 49</u>

By division orders, issued by Major General Amos Hovey on the 10th and 11th of June, 1814, Colonel White was directed to furnish a nightly sergeant's guard, for the purpose of keeping "a strict lookout, and in the event of the approach of the enemy's boats, or of the enemy's landing," to give immediate notice thereof. It appears from a division order bearing date the 24th of June, 1814, that the selectmen and others of Salem, having represented to the major general that they were apprehensive that the nightly guards, furnished in pursuance of the division orders of the 10th and 11th of June, 1814, were not sufficient to answer the purposes for which they were intended, Colonel White was directed thereafter to furnish a guard to consist of one lieutenant, two sergeants, two corporals, one drummer, one fifer, and thirty privates, and to station them at such places as he should think best for the security of the town.

The last mentioned guard was discontinued on the 5th of August, 1814, agreeably to a division order of the 4th of August, 1814.

*At Fort Lee.*—Two detachments, commencing November 9, 1814, and ending March 7, 1815.

Aggregate expenditure . . . . .		\$1,082 92
Deduct payments for clothing . . . . .	\$70 00	
Deduct payments for use of arms . . . . .	14 00	
Deduct overpayments . . . . .	2 75	
Deduct rations reduced . . . . .	25 20	
Deduct miscellaneous accounts . . . . .	494 12	
		<u>606 07</u>
Admissible . . . . .		<u>476 85</u>

It appears from a division order issued by Major General Amos Hovey on November 8, 1814, that Brigadier General Derby was directed to detach, without delay, one corporal and six privates, and to station them in Fort Lee "for the preservation of the public works and property in said fort." The first

detachment was relieved by the second on January 8, 1815, which last-mentioned detachment continued in service till March 7, 1815, when it was discharged under a division order of March 3, 1815.

*At Biddeford.*—Three detachments, commencing June 20 and ending September 23, 1814.

Aggregate expenditure .....		\$2, 085 72
Deduct payments for clothing.....	\$205 06	
Deduct overpayments.....	26 98	
Deduct miscellaneous accounts.....	556 52	
		788 56
Admissible.....		1, 297 16

The first of these detachments entered on duty under a brigade order issued by Brigadier General McDonald on June 20, 1814, a few days previous whereto several companies had been called into service in consequence of an attack by the enemy, the particulars of which are explained in the statement relative to militia called out at alarms.

At the date of this order the general order of the State executive of June 16, 1814, had not reached the major general of the division whereto these militia belonged; but it appears to have been soon afterwards transmitted to him, and he to have issued, on June 28, a division order requiring that the brigadier generals should pay the strictest attention to the mode of conduct marked out in the general order, and that Brigadier General McDonald should, as to the detachment made by his order, direct that the guard be such only as was sufficient for the purposes therein mentioned and keeping sentries, especially by night, to give the alarm when the danger was approaching.

On the 21st July Brigadier General McDonald issued another order for detaching a sergeant and eighteen privates for thirty days, to report to Lieutenant Fairfield on the 27th, and when such of the first detachment as had not been previously discharged went off duty. This second detachment, though by what authority does not appear, was relieved on the 25th of August by another similar one, that remained in service till the 23d of September, at about which time three companies of militia ordered out for the defence of Saco harbor by General McDonald, and whose services commenced on the 19th and 20th of that month, are presumed to have arrived.

During the time these guards were on duty Colonel Isaac Lane, of the 33d infantry appears to have had a detachment of United States troops under his command at Saco.

*At Kennebunk Port and its vicinity.*—Five detachments, commencing June 19 and ending October 3, 1814.

Aggregate expenditure.....		\$1, 440 06
Deduct payments for clothing.....	\$173 55	
Deduct payments for use of arms.....	34 13	
Deduct overpayments.....	7 71	
Deduct miscellaneous accounts.....	59 68	
		275 07
Admissible .....		1, 164 99

The first of these detachments was called into service by a regimental order of Lieutenant Colonel John Mitchell, issued on June 19, 1814, and, as therein expressed, agreeably to the general order of July 3, 1812, and was relieved by the second detachment, under another order issued by him. Major General Ichabod Goodwin commanded the division wherein Kennebunk is situate, and to whom a letter, of which the following is a copy, appears to have been written:

KENNEBUNK, July 4, 1814.

DEAR SIR: The Adjutant General the week before last assured me that he would address you on the subject of detaching a number of men (under the order of 1812) as a guard for the protection of the place. Since that time we have been in the daily expectation of receiving from you an order to the colonel of the regiment for that purpose. We have had twenty men on duty for almost three weeks, which we have been obliged to keep and pay at the expense of the two towns. General Brooks said he would write you immediately on the subject.

In haste, yours, &c.,

G. W. WALLINGFORD.

ICHABOD GOODWIN, Esq., *Berwick.*

The general order of the State executive of June 16, 1814, is shown to have been transmitted to General I. Goodwin on the 24th of that month. On July 5, 1814, Lieutenant Colonel Mitchell issued a regimental order calling into service a lieutenant, two sergeants, two corporals, and sixteen soldiers, to guard the port of Kennebunk, Cape Porpoise, and Wells harbor, for thirty days, and under which the third detachment entered on duty. No division or brigade order is therein referred to, nor is any produced. The fourth detachment was made pursuant to a brigade order issued August 22, 1814, for the purpose, as therein stated, of taking the place of the men detached, *by order of the major general*, in July, as a guard for the harbor of Kennebunk, Cape Porpoise, and Wells, and of serving at those posts for thirty days. For the relief of this detachment the fifth was called out, by a regimental order of Lieutenant Colonel Mitchell dated September 3, 1814.

Henry Clark, of Kennebunk Port, in a deposition obtained from him in September, 1814, testifies that in the summer of 1814, in consequence of the attack on the town of Saco and the destruction of property at that place by one of the English ships, and the almost daily appearance of the enemy's vessels off Kennebunk Port, it was judged necessary for the safety of that place and the navigation in the river to have some of the militia ordered out and stationed at the point; that he and Horace Porter, at the request of the inhabitants, made such a representation to the major general, and requested that soldiers might be immediately ordered out, as an attack was daily expected; that a detachment was made accordingly; and that Oliver Walker and George Wheelwright, with a number of men, were stationed at the point.

*At York.*—Three detachments, commencing July 25 and ending October 25, 1814.

Aggregate expenditure .....		\$528 71
Deduct payments for clothing .....	\$86 25	
Deduct miscellaneous accounts .....	42 12	
		<u>128 37</u>
Admissible .....		<u>400 34</u>

There are no orders or correspondence produced in relation to the services of these detachments. At the head of the roll the men are stated to have been detached under three several orders from Major General Ichabod Goodwin, dated July 21, August 20, and September 18, 1814, and in the subsistence accounts they are expressed to have been stationed near the entrance of York harbor.

*At Harpswell.*—A detachment, commencing July 13 and ending July 25, 1814.

Aggregate expenditure .....		\$75 77
Deduct payments for clothing .....	\$10 80	
Deduct payments for use of arms .....	2 20	
Deduct overpayments .....	1 17	
Deduct miscellaneous accounts .....	11 78	
		<u>25 95</u>
Admissible .....		<u>49 82</u>

Major General King, by a division order dated July 9, 1814, directed Brigadier General McCobb to order the above detachment to be made from two companies belonging to Harpswell, and to be stationed at that place until further orders; and by another like order, dated on the 19th of July, he directed its discharge. On the day its services terminated, a company called out for the defence of Bath and its vicinity, and commanded by Captain Torry, entered on duty, and a sergeant and six privates whereof were ordered to be stationed where the services of this detachment had been performed.

In a letter to the State adjutant general from Major General King, dated July 8, 1814, reference to this detachment is made, as follows:

“The enemy having landed at Harpswell and taken some stock from the inhabitants, I have ordered a guard from the company doing duty on this river to that place.”

His order, it will be seen, was not issued until the following day; and it required, not a guard from the company then on duty, but a new detachment.

*At Wiscasset, Edgecomb, and Booth Bay, &c.*—A detachment, commanded by Sergeant Nathan Clark, from June 26 to July 2, 1814.

- A detachment, commanded by Sergeant John Fowle, from June 26 to July 2, 1814.
- A detachment, commanded by Sergeant John Baker, from June 27 to July 2, 1814.
- A detachment, commanded by Sergeant William Bradley, from August 1 to August 5, 1814.
- A detachment, commanded by Sergeant J. Harrington, from August 1 to August 10, 1814.
- A detachment, commanded by Ensign J. H. Becket, from June 26 to July 15, 1814.
- A detachment, commanded by Sergeant Frederick Bradford, from September 13 to October 6, 1814.
- A detachment, commanded by Corporal Nathaniel Pitcher, from June 30 to July 7, 1814.
- A detachment, commanded by Corporal Charles Hebner, from June 30 to July 15, 1814.
- A detachment, commanded by Lieutenant John Hunt, from July 6 to August 5, 1814.
- A detachment, commanded by Ensign John McIntyer, from September 5 to October 6, 1814.
- A part of Captain Moses Robinson's company, from June 2 to June 25, 1814.

The following remarks apply to the three first mentioned detachments at Wiscasset, &c.:

On the 24th of June, 1814, sundry companies of militia were called out at and in the vicinity of Wiscasset on an alarm. For their discharge, except three companies to be detached by Brigadier General Payson, a division order was issued by Major General King on the 22d of that month, and which directed the discharge of these three companies also, as soon as circumstances would justify. Three companies were accordingly detached and the rest of the militia discharged. By a brigade order of the 25th of June, General Payson directed the immediate discharge of all the troops on duty at Wiscasset, &c., except a sergeant, a corporal, and twelve privates, to keep watch day and night at each of the following places, viz: one at Wiscasset, one at Fowle's Point, one at Booth Bay, and one at the lower end of Squam island. Under this order, the detachments commanded by Sergeants Clark, Fowle, and Baker were made, and the companies were discharged. It does not appear that any guard was then detached for duty at Squam island. On the 28th of June, Major General King issued a division order, directing Brigadier General Payson to detach two companies for thirty days' service, and to discharge the companies then on service as soon as the detachment should be on duty. One of these companies, commanded by Captain Potter, entered on duty on the 2d of July, the day whereon the detachments of Sergeants Clark, Fowle, and Baker appear to have been discharged.

The following remarks apply to the 4th and 5th of the foregoing detachments, commanded by Sergeants Bradley and Harrington:

A company called out for thirty days' service, under command of Captain Potter, went off duty on the

31st July, 1814, and soon after that period a detachment of militia, called for by General Dearborn, was received into the United States service. On the 30th July, 1814, Brigadier General Payson appears to have issued a brigade order, wherein, after noticing that the time for which Captain Potter's company was doing duty would expire on the 31st, Colonel Cutter was required to direct it to be discharged, after bringing up to Wiscasset one of the pieces of cannon from Chase's Point, and to try to get a sergeant and six men to volunteer to keep a guard over the other cannon, until the new detachment of three months' men should arrive; or if he should not succeed in getting volunteers, to order out that number from any company in his regiment. And on the 1st of August, by another brigade order, he directed Colonel Cutter to order out a sergeant and six privates to guard the battery and guns at Wood's wharf for two or three days, unless sooner discharged. Under these orders the services of the detachments of Sergeants Bradley and Harrington are presumed to have been rendered. By a brigade order of the 9th of August, 1814, Colonel Cutter was required to discharge, forthwith, all troops on duty within his regiment, after ordering the guard at Chase's point to bring up the cannon and apparatus to Wiscasset, and likewise the quartermaster's stores.

The following remarks apply to the 6th, 7th, 8th, 9th, and 10th of the foregoing detachments, commanded by Ensign J. H. Becket, Sergeant Fred. Bradford, and Corporals Nathaniel Pitcher and Charles Hebner, and Lieutenant John Hunt.

In the statement as to militia called out at alarms, an entry and remarks will be found relative to a company stationed at Friendship from the 21st to the 25th of June, 1814, under the command of Captain Simon Parker. The detachment of Ensign Becket appears to have been made from that company, and to have commenced its services on the next following day; and, on the muster-roll, Lieutenant Colonel Samuel Thatcher has certified that the officer and men were authorized to do the duty by his order of the 21st June, (whereto reference is made in the remarks before alluded to,) and by consultation with him. On the rolls of the detachments of Corporals Pitcher and Hebner, there are also certificates of Lieutenant Colonel Thatcher, showing that the services of these detachments were, too, authorized by him, but no explanatory evidence from him, as to the cause of calling out any of these detachments, has been furnished.

Major General King, on the 27th of June, appears to have issued a division order, directing Brigadier General Payson to detach not exceeding twenty men from Colonel Thatcher's regiment, with a lieutenant, as guards for the frontier of that regiment, and to discharge the company then out as soon as the detachment should be on duty, should it not have been previously discharged.

A regimental order of Lieutenant Colonel Thatcher, dated on the 6th July, refers to a brigade order issued on the 28th June, and puts the detachment, made pursuant thereto, under the command of Lieutenant Hunt for thirty days, to serve as guards or patrols, and be stationed by him at such places as he should consider most proper for defending and guarding the several rivers and harbors within the limits of the regiment, and directs him to dismiss the men at the expiration of the thirty days. The services of this detachment commenced, it will be seen, on the 6th of July, and no reason is assigned why the detachments of Ensign Becket and Corporal Hebner, instead of being then discharged agreeably to General King's order, were continued in service nine days longer.

The following remarks apply to the 11th detachment, commanded by Ensign John McIntyer :

The services of this detachment do not appear to have been authorized or sanctioned either by Major General King or Brigadier General Payson. The detachment is expressed, at the head of the rolls, to have been made under a regimental order of Lieutenant Colonel Samuel Thatcher, and he has certified on the muster-roll that the services were performed by his order.

The following remarks apply to the 12th or last of the foregoing detachments, being part of Captain Moses Robinson's company:

According to the rolls, eight of the men were in service eight days, six others thirteen days, seven others seventeen days, seven others twenty-four days, and the captain twelve days, the period beginning on the 2d and ending on the 25th June, 1814. The subsistence account, however, expresses the period to have commenced on the 22d June, and to have terminated on the 13th July, 1814; and this, most probably, is the correct one, as, at the head of the muster-roll, the detachment is said to have been made under the general order of July 3, 1812, and a regimental order for enforcing it, dated June 21, 1814, "the enemy then being on the coast," and which none of the other documents show to have been the case so early as the 2d June, 1814.

Lieutenant Colonel Thatcher has certified that the detachment was, in his opinion, necessary, and properly ordered out, and that he was convinced the men did their duty.

In a note in the column of remarks on the muster-roll, the men are said to have been detached under the general order of July 3, 1812, and kept in service under the regimental order of June 21, 1814, "until they were relieved by detachments made under brigade orders." By whom they were ordered out does not appear, and no brigade order for their relief can be found recorded in the brigade order-book; nor are there produced the rolls of any detachment by which they were relieved, unless it be the one commanded by Lieutenant Hunt, before specified, which entered on duty on the 7th July, nearly a week previous to the termination of their services.

*At Camden.*—A detachment commanded by Ensign Joseph Hall, from June 26 to July 31, 1814.

A detachment commanded by Lieutenant Hanford, from August 8 to August 19, 1814.

A detachment of Captain Kinney's company, from July 21 to August 10, 1814.

Aggregate expenditure . . . . .		\$950 50
Deduct payments for clothing . . . . .	\$104 69	
Deduct payments for use of arms . . . . .	3 15	
Deduct overpayments . . . . .	14 46	
Deduct miscellaneous accounts . . . . .	198 83	
		<u>321 13</u>
Admissible . . . . .		<u>629 37</u>

The following remarks apply to the first of the above-mentioned detachments:

On the roll of the first detachment, Lieutenant Colonel Erastus Foote has certified that the troops therein mentioned were called out under the general order of July 3, 1812, there being imminent danger of invasion, and stationed at Camden harbor as guards, at the request of the civil magistrates and selectmen of Camden. As to the services for the month of July, 1814, it appears that Major General King, in a letter to the State adjutant general, dated June 27, 1814, wrote as follows: "General Payson forwarded me

this day a letter from Colonel Foote: three companies on the first alarm, were ordered out by Colonel Foote, and discharged, with the exception of forty-five men. I shall direct the discharge of twenty-five more, which, I think, will leave to that section of country about their proportion." And that, in a division order issued by General King on the day of that letter, General Payson was required to direct a detachment from Lieutenant Colonel Foote's regiment of twenty men, under a lieutenant, for thirty days, to serve as guards or patrols, at such places as Colonel Foote might direct; and for carrying this order into effect brigade orders appear to have been issued, and under which the services in July were performed.

The following remarks apply to the second of the foregoing detachments, commanded by Lieutenant Hanford:

This detachment appears to have been made by a brigade order issued by Lieutenant Colonel Foote on the 6th of August, in pursuance, as therein expressed, of a brigade order of the previous day, directing a detachment for the State service for thirty days of a lieutenant, a sergeant, a drummer, and twenty privates, to be stationed at the parapet at Camden harbor. And among the documents there is a letter relating to it, of which the following is a copy:

DIVISION ORDERS, 11TH DIVISION.

BATH, August 13, 1814.

Brigadier General PAYSON:

SIR: Your letter, under date the 10th instant, came to hand this day. I notice what you say in relation to the guard at Camden, having wrote the commander-in-chief some time since on the subject of a guard at that place, and not having received any reply, under existing circumstances there would not be a propriety in continuing of it, particularly as the justices and other inhabitants there think a large proportion of the men can be dispensed with. You will, therefore, on receipt of this letter, order the guard at Camden to be discharged. When the justices of the peace and other inhabitants will take the responsibility on themselves, I think there should not be any interference, except in the case of invasion or imminent danger, on the part of the military. The number of men considered necessary to do the duty of guards, on the part of the magistrates and other citizens of Camden, is not beyond the number that may be furnished by the town as a watch by night. In the day time every man almost in the town can do the duty as well as the guards themselves, from their particular situation. You will forward to Colonel Foote a copy of this letter, with your order, and believe me,

Respectfully, your obedient servant,

W. KING.

JOSEPH F. WINGATE, *Aide-de-Camp, and ordnance officer 11th division.*

And under a regimental order dated August 18, 1814, referring to this division order, the detachment was discharged.

The following remarks apply to the third or last of the foregoing detachments:

The men are stated, at the head of the muster-roll, which is certified by Captain Kinney, and countersigned by the selectmen of St. George, to have been ordered out at the request of the selectmen. No entry in relation thereto can be found in the order books of the major general, brigadier general, or lieutenant colonel of the regiment to which the company belonged.

*At Fort Burrows.*—Three detachments, commanded by Lieutenant Oliver Bray and Sergeant John Lowell, commencing the 5th November, 1814, and ending the 23d February, 1815.

Aggregate expenditure .....		\$1, 822 31
Deduct payments for clothing.....	\$177 99	
Deduct overpayments .....	7 48	
Deduct excess of rations.....	83 80	
Deduct miscellaneous accounts.....	397 50	
		<u>666 77</u>
Admissible.....		<u>1, 155 54</u>

The detachment commanded by Lieutenant Bray entered the service on the 5th November, 1814, under a division order, of which the following is a copy:

COMMONWEALTH OF MASSACHUSETTS.

DIVISION ORDERS, 12TH DIVISION.

HEADQUARTERS, PORTLAND, November 5, 1814.

Lieutenant Oliver Bray is authorized to raise, by voluntary enlistment, for the service of the State, three sergeants, three corporals, one drummer, one fifer, and forty-eight privates, for the term of sixty days, *unless sooner discharged*, to be stationed at Fort Burrows and Fish point, for the protection of the forts, ordnance, munitions of war, and other property belonging to the Commonwealth. Adjutant Bray will make daily reports of his proceedings to the major general, and use all possible despatch in obtaining the force required, without, however, subjecting the Commonwealth to any extra expenses or to any bounty whatever in procuring the enlistments. The major general will designate a second officer, and from time to time direct Adjutant Bray as to the duties to be required of him.

ALFORD RICHARDSON, *Major General.*

The foregoing described guard was discharged on the 25th November, 1814, and was succeeded the day following by the guard described in the division order, of which the following is a copy:

COMMONWEALTH OF MASSACHUSETTS.

DIVISION ORDERS, 12TH DIVISION.

PORTLAND, November 6, 1814.

Sergeant John Lowell is appointed to command a sergeant's guard at Fort Burrows for sixty days unless sooner discharged, and is empowered to enlist for that term of time one corporal and twelve pri-

vates, liable to be discharged as before stated. Sergeant Lowell will be considered accountable for the safe keeping of all the ordnance, munitions of war, barracks, and other property, in Forts Burrows, Allen, and Lawrence, belonging to the Commonwealth or United States.

ALFORD RICHARDSON, *Major General.*

This last-mentioned guard was discharged February 23, 1815.

*At North Yarmouth.*—A detachment commencing September 11, and ending October 25, 1814.

Aggregate expenditure.....	\$100	33
Deduct payments for clothing.....	\$14	58
Deduct overpayments.....	72	
		<u>15 30</u>
Admissible.....		<u>85 03</u>

This guard consisted of one corporal and three privates, and entered on duty under a regimental order issued by Lieutenant Colonel Samuel Baker on the 11th September, 1814, and was stationed at North Yarmouth.

*Recapitulation.*

Aggregate expenditures on account of guards.....	\$39,810	39
Deductions therefrom:		
Payments for clothing.....	\$4,475	13
Payments for use of arms.....	718	49
Overpayments.....	238	92
Rations reduced.....	1,289	38
Excess of rations.....	130	60
Payments to officers for forage.....	14	66
Sundry miscellaneous charges.....	5,231	67
		<u>12,098 85</u>
Admissible.....		<u>27,711 54</u>

The letter, of which the following is a copy, appears to have a general bearing on the expenditures detailed in this statement:

MILITARY DISTRICT No. 1, *Headquarters, Boston, August 12, 1814.*

SIR: The citizens of the towns of Duxbury and Cohasset are very desirous of having some small force stationed for the defence of their respective villages and vessels, and it is probable that similar applications will be made from other places on the sea-coast. If practicable, it would be very desirable to have such small detachments as may be required in such cases turned out from the immediate vicinity of the several places, respectively, without the formality of troubling his excellency the governor on every such occasion. Will you be so obliging as to inform me whether an authority is or probably may be vested in yourself, or in any committee of which you are a member, for giving the necessary orders for turning out such small detachments as I have alluded to, say of twenty-five or fifty men, for such places as it may be deemed necessary or expedient to afford such protection to. It is not easy to decide at present, or probably at any one time, the precise number of places that it may be expedient to post such detachments at or the number of men for each. The movements of the enemy, and his measures from time to time, must, in a considerable degree, determine what shall be probable or necessary to be done on our part; hence the convenience of having small detachments from the militia made in the most prompt and convenient manner.

If neither yourself nor any committee of which you are a member now possess such authority as I have mentioned, would not his excellency the governor probably think it advisable to grant the necessary authority? Any communications you may please to make in reply to my observations will confer a favor on

Your very humble servant,

H. DEARBORN.

Major General JOHN BROOKS, *Adjutant General of the State of Massachusetts.*

TREASURY DEPARTMENT, *Third Auditor's Office, January 30, 1828.*

No answer to the foregoing letter has been found among the documents furnished in support of the State's claim.

PETER HAGNER, *Auditor.*

B.

ALARMS.

*A statement applicable to such items in the claim of the State of Massachusetts as relate to expenses occasioned by calls of militia into service in consequence of alarms, and without any other authority from the State executive than is given by a general order thereof, issued on the 3d July, 1812, whereof the following is an extract:*

“The commander-in-chief further orders and directs that the generals, and other officers of the whole militia of the Commonwealth, bearing in mind the possibility of a sudden invasion, hold themselves, and the corps under their respective commands, in constant readiness to assemble and march to the defence of

any part or parts of the Commonwealth, pursuant to the orders to be given by him; but without waiting for such orders in case of actual invasion, or such imminent danger thereof as will not admit of delay."

*First alarm at Scituate.*—Six companies, and Lieutenant Colonel Turner's field and staff, for the 11th and 12th days of June, 1814.

Aggregate expenditure.....		\$251 59
Deduct payments for clothing.....	\$27 54	
Deduct payments for use of arms.....	3 83	
Deduct overpayments.....	14 44	
Deduct rations reduced.....	8 19	
Deduct payment to officers for forage.....	1 59	
Deduct miscellaneous accounts.....	5 25	
		60 84
Admissible.....		190 75

In this case the calls appear to have been occasioned by several barges from two British ships-of-war having, on the morning of June 11, 1814, entered Scituate harbor, and set fire to some and taken other vessels. The particulars will be found more fully explained in pages 80 and 81 of the printed documents accompanying the President's message to Congress, of February 28, 1824.

*Second alarm at Scituate.*—Five companies of Lieutenant Colonel Turner's regiment, for the 18th, 19th, 20th, 21st, 22d, and 23d days of June, 1814.

Aggregate expenditure.....		\$291 21
Deduct payments for clothing.....	\$37 97	
Deduct payments for use of arms.....	7 26	
Deduct rations reduced.....	13 65	
		58 88
Admissible.....		232 33

These companies formed part of Lieutenant Colonel Turner's regiment; and in a letter addressed by him on June 24, 1814, to Major General N. Goodwin, to whose division the regiment belonged, (see page 83 of the before-mentioned public documents,) he represents that, on the Sunday evening then last, a ship, two brigs, and several small craft, came to anchor near Scituate harbor; that on the application of the inhabitants near the harbor, he, on the Monday morning, ordered the middle company in Scituate to march to the harbor and keep guard twenty-four hours, and the company in Hanover to relieve them on the Tuesday morning, and that he directed Captain Talman to furnish a sergeant's guard for three nights. It would not seem by this letter of the commanding officer of the regiment, which appears to have been written at the time of the transaction, and at the place where it occurred, that (exclusive of a sergeant's guard) more than two companies were called out, and one of them but for twenty-four hours. Five companies, it will be seen, have been paid; two of them for one day each, another for two days, and the remaining two for three days each.

*Third alarm at Scituate.*—Captain Daniel Elme's company for July 1, 1814.

Aggregate expenditure.....		\$29 68
Deduct payments for clothing.....	\$3 70	
Deduct payments for use of arms.....	73	
Deduct overpayments.....	1 07	
Deduct rations reduced.....	1 38	
		6 88
Admissible.....		22 80

No explanation of the cause of this company's being then called out can be found in any of the documents furnished in support of the State's claim.

*Fourth alarm at Scituate.*—Six companies, and Lieutenant Colonel Turner's field and staff, for the 6th, 7th, 8th, 9th, and 10th of July, 1814.

Aggregate expenditure.....		\$342 20
Deduct payments for clothing.....	\$39 81	
Deduct payments for use of arms.....	4 71	
Deduct overpayments.....	28 53	
Deduct rations reduced.....	10 05	
Deduct payments to officers for forage.....	3 19	
Deduct miscellaneous accounts.....	4 25	
		90 54
Admissible.....		251 66

According to a letter from Lieutenant Colonel Turner to Major General Goodwin, dated Scituate, July 9, 1814, (see pages 84 and 85 of the printed documents before referred to,) a fishing-boat, on the morning of the 6th, was called alongside the British ship *Nymph*, the captain whereof sent to the town a memorandum of some sauce and provisions wanted, retaining a man from the boat as a hostage for their delivery; and Lieutenant Barrell (who for several days had been stationed at Scituate harbor, in command of a militia detachment of two sergeants and eight privates) and the committee of defence, having, on consultation, decided not to comply with the request, it was agreed between the committee and Lieu-

tenant Colonel Turner to prepare for defence. An alarm ensued. The troops in the town and its vicinity were called upon, and a force of five companies of infantry and one of artillery soon collected, which was thought to be a sufficient one to oppose what the Nymph could land, although the Bulwark was in sight; and on the 7th, it appearing that the Bulwark was steering over to the north shore, and the Nymph easterly, and almost out of sight, the militia called in for the purpose was discharged.

*Alarms at Cohasset.*

Captain Joshua Bowker's company, for the 13th, 14th, 15th, and 16th June, 1814.	
Captain William Peak's company, for the 12th and 13th June, 1814.	
Captain Samuel Tolman's company, for the 13th, 14th, 15th, and 16th June, 1814.	
Captain E. F. Jacob's company, for the 12th, 13th, 14th, and 15th June, 1814.	
Lieutenant Colonel Tenner's field and staff, for the 13th, 14th, 15th, and 16th June, 1814.	
Captain Zenas Smith's company, for the 13th, 14th, 15th, and 16th June, 1814.	
Captain Duncan McB. Thaxter's company, for the 11th, 12th, 15th, 16th, and 17th June, 1814.	
Captain Martin Fearing's company, for the 11th, 12th, 14th, and 15th June, 1814.	
Captain Joseph I. Whiton's company, for the 11th, 12th, 14th, and 15th June, 1814.	
Captain Jacob Loud's company, for the 12th, 13th, and 14th June, 1814.	
Captain Moses L. Humphrey's company, for the 11th, 12th, 13th, 15th, 16th, and 17th June, 1814.	
Captain Benjamin Derby's company, for the 11th, 12th, and 13th June, 1814.	
Captain Jona. Cleverly's company, for the 12th, 13th, and 14th June, 1814.	
Captain Peter Lothrop's company, for the 11th to the 17th June, 1814.	
Lieutenant Colonel Samuel Webb's field and staff, for the 11th to 17th June, 1814.	
Captain Ralph Arnold's company, for the 12th and 13th June, 1814.	
Captain Thomas Tirrell's company, for the 12th and 13th June, 1814.	
Captain Edmund M. Smith's company, for the 12th and 13th June, 1814.	
Captain Edward Vinton's company, for the 12th and 13th June, 1814.	
Captain John Belcher's company, for the 12th and 13th June, 1814.	
Captain Calvin White's company, for the 12th and 13th June, 1814.	
Captain John Lillie's company for the 12th and 13th June, 1814.	
Captain Francis Davenport's company, for the 12th and 13th June, 1814.	
Lieutenant Colonel Barnabas Clark's field and staff, for the 12th and 13th June, 1814.	
Aggregate expenditure.....	\$2, 659 55

	602 04
	2, 057 51

Of the occasion of the call of these militia into service the fullest explanation furnished is afforded in page 82 of the before-mentioned printed documents, and in a certificate at the foot of the pay-roll of Captain Lothrop's company, a copy whereof follows:

COHASSET, June 11, 1814, 6 o'clock a. m.

This town being alarmed by the enemy's barges at the entrance of the harbor, where they captured and set fire to a coasting sloop, and it being the general opinion of the inhabitants that they would attempt the destruction of the vessels in the harbor, I ordered out the militia, agreeably to general orders of the 3d July, 1812; were kept under arms till the 17th at sunset, and were then discharged by order of Lieutenant Colonel Samuel Webb.

SAMUEL WEBB, JR.,

*Lieutenant Colonel, Commanding 2d Regiment 1st Brigade, 1st Division.*

The companies of Captains Thaxter, Fearing, Whiton, and Humphreys, of Lieutenant Colonel Webb's regiment, were, it will be seen, after having been discharged on the 12th or 13th June, again called out on the 14th and 15th; the cause of the latter is unexplained. By a general order of the governor, dated at Boston, June 13, 1814, Lieutenant Colonel Webb was required to detail from his regiment, for two months' service at Cohasset, a captain, lieutenant, ensign, four sergeants, four corporals, two musicians, and sixty privates, and this force appears to have been accordingly detailed and stationed at Cohasset from the 15th June to the 16th August, 1814. If the companies above alluded to were called out, or others kept in service for the purpose of carrying this order into effect, the expense attending such service would not, it is considered, be allowable.

*Alarm at New Bedford.*

Captain Stall's company, for the 13th, 14th, and 15th June, 1814.	
Captain Swift's company, for the 14th and 15th June, 1814.	
Captain Nathaniel Nelson's company, for the 13th, 14th, and 15th June, 1814.	
Aggregate expenditure.....	\$104 44
Deduct payments for clothing.....	\$13 39
Deduct payments for use of arms.....	1 00
Deduct rations reduced.....	5 07
	19 46
	84 98

The circumstances giving rise to the call of these militia into service are explained in the letter of Lieutenant Colonel Lincoln to General Goodwin, dated June 21, 1814, set forth in the statement as to militia called out under the general order of the 16th of that month for the defence of New Bedford and Fairhaven.

*Alarms at Barnstable and its vicinity.*

Captain Calvin Crocker's company, for the 28th and 29th January, 2d and 3d February, 17th and 27th September, and 2d and 3d October, 1814.

Captain Thomas Swift's company, for the 29th, 30th, and 31st January, and 3d, 4th, and 5th October, 1814.

Captain Obed B. Nye's company, from the 28th January to 3d February, and from the 3d to 12th October, 1814.

Lieutenant Edward Nye's company, for the 29th, 30th, and 31st January, 1814.

Lieutenant N. B. Gibbes's company, from the 6th to the 12th October, 1814.

Captain Benjamin Hamblin's company, for the 29th, 30th, and 31st January, and from the 3d to 12th October, 1814.

Lieutenant James Fish's company, from the 7th to the 15th October, 1814.

Captain Timothy Parker's company, from the 28th to the 31st January, 1814.

Captain Timothy Parker's company, from the 3d to the 7th October, 1814.

Captain Seth Hamlin's company, from 28th to 31st January, 13th and 14th June, and 3d, 4th, 6th, 7th, 8th, and 9th October, 1814.

Captain Weston Jenkins's company, from 28th to 31st January, 13th to 18th June, 3d to 6th and 7th to 15th October, 1814.

Captain Micajah Handy's company, for 2d and 3d February, 17th September, and 3d, 4th, 6th, and 7th October, 1814.

Captain Ebenezer Lothrop's company, for 2d, 3d, and 4th February, 17th September, 2d, 3d, 4th, 6th, and 7th October, 1814.

Captain Jonathan Hallett's company, for 17th and 27th September, 2d and 3d October, and 5th and 6th November, 1814.

Captain Joshua Hamblin's company, for the 2d, 3d, and 4th October, 1814.

Captain Elnathan Lewis's company, for the 2d, 3d, and 4th October, 1814.

Lieutenant Colonel David Nye's field and staff, for services in January, February, June, September, and October, 1814.

Captain Josiah Whitman's company, for the 9th and 10th July, and 15th September, 1814.

Captain Moses Higgins's company, for the 4th, 5th, and 10th July, 13th and 14th September, 2d and 3d October, and 19th and 20th December, 1814.

Captain Abiel Crosby's company, for the 14th and 15th September, 1814.

Captain Henry Knowles's company, for the 4th, 5th, and 10th July, 14th and 15th September, 2d and 3d October, and 19th and 20th December, 1814.

Captain Freeman Foster's company, for the 15th and 16th September and 3d and 4th October, 1814.

Captain Obed Brookes's company, for the 15th and 16th September and 3d and 4th October, 1814.

Captain Nathaniel Snow's company, for the 15th and 16th September, 1814.

Captain Hugh Nickerson's company, for the 15th and 16th September, 1814.

Captain Harding Knowles's company, for the 17th and 18th August, and 14th, 15th, and 16th September, 1814.

Captain Nathan Nickerson's company, for the 15th and 16th September and 3d and 4th October, 1814.

Lieutenant Colonel Jonathan Snow's field and staff, for the 15th and 16th September and 3d and 4th October, 1814.

Brigadier General Ebenezer Lothrop, for services in February, June, September, and October, 1814.

5,045 26

Of the militia called out at Barnstable and its vicinity, those in service in January, 1814, appear to have been called out by regimental orders, issued by Lieutenant Colonel David Nye, on the 28th of that month, and wherein the British brig Nimrod is represented to have anchored off the wharf at Falmouth and demanded the field-pieces and other property lying there, and threatened, in case of refusal, to fire upon the town.

Those which entered on duty in February, 1814, are also alleged to have been called out by him, but his orders are not produced, nor is the cause explained, unless the letter from him to General Goodwin (whereof the following is a copy) relates thereto, and which it probably does, no militia appearing to have been called out in the interim:

FALMOUTH, *March 16, 1814.*

Sir: Being actually invaded, I have called out the militia under my command for the defence of this town, viz: from the three companies in Sandwich, about 60 men, officers included, for three days, with provisions for that time; then discharged them. On the bombardment of the town, I called the remainder of the militia in Sandwich, and Captain Crocker's in Barnstable, and afterwards made other detachments,

while the British lay in Tarpaulin Cove and off the harbor, which I hope will meet your honor's approbation, it being agreeable to your orders of July, 1812.

Yours, &c.,

DAVID NYE, *Lieutenant Colonel, Commanding 1st Regiment, 3d Brigade.*

General N. Goodwin.

The call of Captain Hamblin's company into service on the 13th June, 1814, appears also to have been by a regimental order of Lieutenant Colonel Nye, which mentions, as the cause, the Nimrod's having anchored in the bay opposite Falmouth, in the midst between there and Rochester, and an inability to determine the ultimate design of the enemy.

As to the services of Captain Whitman's company in July, 1814, it appears that on the 8th of that month a letter was written to the principal inhabitants of Wellfleet, by the captain of the British ship Nymph, demanding an inquiry into the conduct of the master of the schooner Bee, of Wellfleet, which had, on the 5th, been captured by the ship's tender, and two men put on board her; of whom one is alleged to have been, by the master, (who had men secreted below,) most inhumanly treated, by throwing him overboard, and endeavoring, with billets of wood, to beat out his brains whilst in the water; and the other he was suspected to have murdered, and then, with his crew, escaped in a fog; and further demanding to be informed of the result, that the British captain might inflict that punishment which was due for such atrocity. According to a paper annexed, purporting to be a copy of a letter from Captain Whitman to Lieutenant Colonel Snow, the threatened punishment (in the event of the non-delivery of the man, who, in the reply, is declared to have been neither murdered nor ill-treated, but committed to the care of an officer) was the laying the town in ashes and burning every vessel belonging thereto. Captain Whitman, in consequence of this affair, is stated to have had his company on duty two days, and Lieutenant Colonel Snow has certified that, in his opinion, the captain had good and sufficient reason.

The other militia in service in July were the companies of Captains Henry Knowles and Moses Higgins, each of which received pay, &c., for the 4th, 5th, and 10th of that month. Lieutenant Colonel Snow has certified on the rolls that these companies turned out for the defence of Orleans on these days; and this is all the information which can be found on the subject.

The services of Captain Harding Knowles's company, on the 17th and 18th August, are stated in a certificate of Lieutenant Colonel Snow to have been at an alarm occasioned by the enemy's landing at Eastham.

The militia in service on the 17th and 27th September, 1814, are certified by the brigade major to have been called out by Brigadier General Lothrop, since deceased. Of the cause of either of these calls there is, however, no explanation.

Relative to the services in October, it appears that on the 3d a brigade order was issued by Brigadier Lothrop, calling out Captain O. B. Nye's company for the defence of Barnstable, which, as the order expresses, was threatened to be laid in ashes by the enemy, whose squadron was in Barnstable bay and was expected to make an immediate attack; the order also states that the major part of the whole brigade had been ordered to march there.

On the 6th October several companies appear to have been called out by Lieutenant Colonel David Nye, and the cause thereof is explained in a letter from him, of which the following is a copy :

FALMOUTH, *October 8, 1814.*

DEAR SIR: I beg leave most respectfully to inform your honor that on the 6th instant, about 11 o'clock in the evening, I received information from the committee of safety that six vessels of the enemy had that afternoon come hard in Tarpaulin Cove, and that, in their opinion, the neighborhood militia ought to be called in to our assistance; and I sent orders to the officers commanding the infantry at Sandwich to march immediately to the defence of this town, which they immediately complied with by furnishing about one hundred and fifty men. The number of vessels has increased every day since they first appeared, which was one seventy-four, three frigates, one brig, and one schooner; yesterday they were joined by two more; this day it is said that one or two others have joined the fleet; but we have not been able to obtain any considerable information respecting them, only that they are frequently passing off and on this morning; and it would seem that the vessels had fallen in there, and that they were no particular fleet, and Admiral Hotham was bound to Halifax; and most of the fleet being under sail and appearing to be going from thence, I have ordered the troops to be dismissed.

Yours,

DAVID NYE, *Lieutenant Colonel Commandant.*

On the roll of Captain Henry Knowles's company for services on the 19th and 20th December, 1814, Lieutenant Colonel Snow has certified that the company turned out for the defence of Orleans; and the following extract from a letter addressed by Wm. Myrich, jr., to General Goodwin, on the 26th of that month, states the particulars of the attack:

"You have heard, it is probable, that the Newcastle has been aground on the cape, the consequence of which has brought the enemy upon us in a very sudden manner. On Monday last, the 19th instant, in the dusk of the evening a barge with twenty-two men came to the creek where our vessels lay, and immediately entered on board four of our vessels, and hoisted sail on them before they were discovered by the people, and began to fire on the houses and people on the shore; four or five of the militia stood the fire of the enemy for a considerable time before others could come to their assistance; at length they drove them from two sloops (after they had set fire to them) and killed one and wounded two of the enemy without any loss of life on our part. But they took away with them one sloop and one schooner laden partly with salt. This expedition has cost the enemy nine prisoners, driven on shore (in the schooner they took from Orleans) at Yarmouth, and two men and two barges at Orleans, besides the killed and wounded."

*Alarm at Saco and Biddeford.*

Captain W. Waterman's company, for the 17th, 18th, 19th, and 20th June, 1814.

Captain S. Woodsam's company, for the 16th, 17th, and 18th June, 1814.

Captain Samuel Merrill's company, for the 16th, 17th, and 18th June, 1814.

Captain James Curry's company, from the 16th to the 21st June, 1814.

Captain Thos. Benson's company, for the 16th, 17th, and 18th June, 1814.  
 Captain Sam'l Moody's company, from the 16th to 20th June, 1814.  
 Captain Thos. Warren's company, from the 16th to 20th June, 1814.  
 Major John Spring and staff, from the 16th to 21st June, 1814.  
 Brigadier General John McDonald, for the 17th, 18th, and 19th June, 1814.

A deposition of Thomas Cutts, of Biddeford, dated 17th November, 1824, represents, that on the morning of the 16th June, 1814, the British ship Bulwark, of about 90 guns, anchored and despatched five large boats with one hundred and sixty men or more, with orders, as he learned, from the commanding officer to burn and destroy; and who landed on the beach near his wharf and burnt three vessels, took out another, cut down the frame of a large ship on the stocks, and entered his stores and took therefrom property to a considerable amount.

The muster-rolls of the militia are certified by Major John Spring, who had the command of them; and to sustain the charges in respect of their services, letters have been produced, of which the following are copies. The first of them, it will be seen, gave authority to Major Spring to order out the militia. According to the rolls the services of several of the companies commenced before this authority was given, and the communication from him to which this reference is made is not amongst the documents. That it contained, however, information of his having previously called out the militia, is evinced by the letter to General Goodwin:

LIMERICK, June 17, 1814.

I have this moment received your communication by the hand of Mr. Cumston, wherein you inform me that a British force has landed in or near Saco, and destroyed some property, and that said force now is near Saco harbor; therefore, you will order out a sufficient force of the militia under your command, and erect such fortifications on those points of the river as shall enable you to repel any force which the enemy may presume to send against you. You will proceed with due caution, and preserve good order and firmness. Captain Warren, of the artillery, will attach himself to the troops, and act with you under your command. I shall be to your assistance immediately.

Yours, &c.,

JOHN McDONALD, *Brigadier General.*

Major JOHN SPRING, *Com. of the 1st Reg. in the 2d Brig. and 6th Division.*

LIMERICK, June 14, 1814.

DEAR SIR: Last evening I received a messenger from Major Spring, commanding the first regiment, informing me that a British force came into Saco harbor, and had landed, burnt, destroyed, and carried away a considerable amount of property, and said force now lay in Saco harbor, and was able to land seven hundred men, with brass pieces; and that he had ordered out a part of the militia under his command, which now was on duty, and waited for directions from me.

I am this morning bound to Saco to see what is necessary to be done, and there shall wait for directions from your honor, that I may proceed with propriety. Please to send by the hand of my brigade major.

JOHN McDONALD, *Brigadier General.*

Major General GOODWIN.

SATURDAY, 5 o'clock, June 19, 1814.

SIR: Received yours by Major Fogg, which informs me that the enemy had landed, burnt, and destroyed considerable property near Saco harbor, and that you expected to be at Saco this day, and that Major Spring had called out part of the first regiment. I expect there are continental troops quartered at Saco, who will afford all the assistance, with such of the militia as may be mustered, to make the best defence in their power. You will call out the company of artillery, if necessary, and watch the motions of the enemy, if they have not withdrawn, and take all the necessary steps which you may judge expedient for the protection of persons and property. I expect to be at Saco on Monday if possible.

In haste, from

ICHABOD GOODWIN, *Major General.*

Brigadier General McDONALD, *at Saco.*

There appears to have been at the time about one hundred and sixteen United States troops at Saco, under the command of Colonel Isaac Lane, of the 33d regiment of infantry; no application for any militia is shown to have been made by him.

*Alarms at Bath.*

Captain James Williams's company, for 20th, 21st, and 22d June, 1814.  
 Captain Thomas Motherwell's company, for 20th, 21st, and 22d June, 1814.  
 Lieutenant Samuel H. Rogers's company, for 20th, 21st, and 22d June, 1814.  
 Ensign Davis's company, for 23d and 24th June, 1814.  
 Captain John Pettes's company, for 20th, 21st, and 22d June, 1814.  
 Captain William Torrey's company, for 20th, 21st, and 22d June, 1814.  
 Captain Jeremiah Fisher's company, for 20th, 21st, and 22d June, 1814.  
 Captain William Davenport's company, for 20th, 21st, and 22d June, 1814.  
 Captain Richard Heagen's company, for 20th, 21st, and 22d June, 1814.  
 Captain Ellis Percy's company, from the 20th to 26th June, 1814.  
 Captain Abel Boynton's company, for the 20th, 21st, and 22d June, 1814.  
 Lieutenant Colonel Reed's field and staff, from the 20th to 22d June, 1814, &c.  
 Captain Thomas S. Estabrook's company, for the 20th, 21st, and 22d June, 1814.  
 Captain Joseph Duston's company, for the 20th, 21st, and 22d June, 1814.  
 Captain Peter Jordan's company, for the 20th, 21st, and 22d June, 1814.  
 Captain R. T. Dunlap's company, for the 20th, 21st, and 22d June, 1814.  
 Captain Ebenezer Warren's company, for the 20th, 21st, and 22d June, 1814.  
 Captain David Johnson's company, from the 20th to 25th June, 1814.  
 Lieutenant Colonel Charles Thomas's field and staff, for the 20th, 21st, and 22d June, 1814, &c.  
 Captain Nathaniel McLellan's company, for the 20th, 21st, and 22d June, 1814.  
 Captain Samuel Trues's company, for the 20th, 21st, and 22d June, 1814.  
 Captain Hugh Gatchell's company, for the 20th, 21st, and 22d June, 1814.  
 Captain George F. Patton's company, for the 20th, 21st, and 22d June, 1814.  
 Captain Ebenezer Hatch's company, for the 21st and 22d June, 1814.  
 Captain Aaron Dwinall's company, for the 20th, 21st, and 22d June, 1814.  
 Captain John White's company, for the 20th, 21st, and 22d June, 1814.  
 Captain John Wilson's company, for the 20th, 21st, and 22d June, 1814.  
 Captain H. Purinton's company, for the 20th, 21st, and 22d June, 1814.  
 Captain Peter Whitney's company, for the 20th, 21st, and 22d June, 1814.  
 Lieutenant Colonel Abel Merrill's field and staff, from the 20th to 23d June, 1814.  
 Captain Peter O. Alden's company, for the 20th, 21st, and 22d June, 1814.  
 Captain Nathaniel Sprague's company, for the 20th, 21st, and 22d June, 1814.  
 Captain Nathaniel Walker's company, for the 20th, 21st, and 22d June, 1814.  
 Captain Richard Heagan's company, for the 3d, 4th, and 5th July, 1814.

The following remarks apply to Colonel Reed's regiment, and in part to Colonels Thomas and Merrill's regiments, and the artillery companies commanded by Captains Alden, Sprague, and Walker.

A division order of Major General King, dated May 16, 1814, directs that in case of either threatened or actual invasion the officer first receiving the information should govern himself by the order of the commander-in-chief dated July 3, 1812, and should give immediate information to the major general of such measures as had been adopted. Another like order, issued by him on the 17th of June, 1814, designates an alarm post for each of the companies of Lieutenant Colonel Reed's regiment, and requires that whenever information should be received of any disposition of the enemy to land in the vicinity of Bath three guns should be fired near the gun-house in that place, and that the commanding officers of such companies respectively should assemble the same with the least possible delay, at the alarm posts so designated, upon the signal of alarm being given, or, if occasion required, upon any other notice or information.

And in Lieutenant Colonel Reed's regimental record book there are entries as follows:

"Monday morning, about 9 o'clock, June 20, 1814, a messenger arrived from Phipsburg, informing the major general that a British man-of-war was at the mouth of the Kennebec river, and that her barges were above the fort, proceeding up the river, on which the alarm guns were fired, the bells rung, and every man was soon at his alarm post."

"About noon, informed that the barges had not come into the Kennebec, but had gone up Sheepscot, from whence they returned to the ship (which was the Bulwark 74) in the afternoon."

The following remarks apply to Colonel Thomas's regiment:

Entries in the record book of Lieutenant Thomas's regiment mention that at about 10 o'clock in the morning of the 20th of June, an alarm was made at Brunswick; that the companies of Captains Estabrook, Jordan, Dunlap, and Duston reached Bath in the afternoon of that day, and those of Captains Warren and Johnson on the following morning; that in the afternoon of the 21st a council was held at General King's; that he afterwards addressed the troops, and his aid read an order for their discharge; and that at or near sunset they were discharged by the lieutenant colonel at Bath.

Captain Johnson's company appears to have been, by a separate division order of General King, dated June 21, directed to march to Harpswell, and there take post at the most exposed place and wait for further orders; and by another like order, issued on the 25th of June, this company was then discharged.

The following remarks apply to Lieutenant Colonel Merrill's regiment:

The companies of Lieutenant Colonel Merrill's regiment were, by a regimental order issued by him

on the 20th of June, required to appear forthwith at the court-house in Topsham, armed, equipped, and supplied as the militia law directed, and thence to proceed to Bath to repel an invasion; and they appear to have been discharged under the same division order as were the companies of Lieutenant Colonel Thomas's regiment.

The following remarks apply to the artillery companies of Captains Alden, Sprague, and Walker:

No copy of any order for calling out these artillery companies is produced, nor does it appear by whose order they were called out. A brigade order for the discharge of Captain Sprague's company was issued on the 22d of June, and which takes no notice of the companies of Captains Alden and Walker.

The following extracts from letters addressed by Major General King to the State adjutant general explain the measures pursued by him in relation to the militia called out, as before specified, for the defence of Bath and its vicinity:

BATH, June 21, 1814.

"Since my letter of the 18th a seventy-four has anchored near Seguin; they have made several attempts to land at the mouth of this river and on the Sheepscot, and have been beat off in every instance, with the exception of a landing they effected at Fowle's Point, where they spiked a six-pounder. I have ordered four companies into the fort at Georgetown; other companies are ordered out at various points on the back river, which, together with those in this town, will amount to little short of six hundred. I shall immediately proceed down the river and learn the situation of things there, and then discharge such proportion of the troops as our safety will justify."

BATH, June 24, 1814.

"Referring his excellency to my letter of the 21st instant, in the morning, for the occurrences previous to that time, I proceeded, immediately after closing that letter, to the United States fort at the mouth of the river, and there received information that the barges had been again sent off from the Bulwark, and that they took a direction for Damariscotta; the ship was then under way and following in the same direction. Being convinced that the enemy had met with more opposition at the mouth of this river, as well as on the Sheepscot, than they expected, and that there was no probability of their return, the companies from Bath were ordered to return to that place. The companies from Phippsburg then in the fort, as well as the companies from Georgetown, on the east side of the river, were ordered to be discharged, with an exception of a detachment of forty men from the Phippsburg companies, that number having been requested by the lieutenant of the fort; and they will remain in service and wait the orders of the commander-in-chief, our magistrates and people generally being solicitous that this should be the case."

The troops assembled at Bath were discharged, with the exception of the troops of the town, on the evening of the 21st, and those belonging to the town the next morning. The troops from Woolwich stationed at Hurlsgate were discharged on the evening of the 21st instant, with the exception of a detachment of twenty men, which was discharged on the 22d.

The following remarks apply to the services of Captain Heagan's company in July, 1814:

Of the cause of the call of Captain Heagan's company into service at this period no information can be found in the documents, nor does it appear by whose order it was in service.

*First alarm at Wiscasset.*

Captain John Erskine's company, for the 3d, 4th, and 5th of April, 1813.

Captain James Hunnewell's company, for the 6th, 7th, 8th, and 9th of April, 1813.

Captain Dan'l R. Adams's company, for four days in April, 1813.

Captain Dan'l R. Adams's company, for three days in April, 1813.

Aggregate expenditure.....		\$233 32

By a brigade order of General Payson dated April 3, 1813, and issued, as therein expressed, pursuant to general orders of July, 1812, and in consequence of the threatening aspect of the invading force off the harbor, Colonel Ezekiel Cutter was directed to order out immediately the north company in Wiscasset for the defence of the town and harbor. Agreeably thereto, an order was issued by Lieutenant Colonel Cutter, directing Captain Erskine to assemble his company without delay. By a brigade order of April 5, 1813, this company was directed to be immediately discharged; and by another like order of April 6, 1813, the south company in Wiscasset was directed to be ordered out for the defence of the town and harbor; and on the 9th, by another like order, this company was directed to be forthwith discharged.

The following remarks apply to Captain Daniel R. Adams's company.

Major John McKown has certified on the rolls that these militia were ordered out by him on the occasion of the sloop-of-war Rattler entering the harbor of Townsend, in Boothbay, and the barges of which were repulsed.

A letter from Governor Strong to the State adjutant general, dated April 13, 1813, contains the following paragraph, and which is presumed to have relation to the call of the foregoing companies into service:

"General King, in his letter, states that 200 of the United States troops were at Wiscasset; but notwithstanding, as the militia were called out by such respectable advice, I presume that under all the circumstances it was a discreet measure. Such alarms may frequently happen, but it is impossible to foresee the particular circumstances, and therefore general instructions only can be given. These will be found in the general order of the 3d of July."

*Second alarm at Wiscasset.*

- Captain John Erskine's company, from the 18th to the 24th of June, 1814.
- Captain James Hunnewell's company, from the 20th to the 24th of June, 1814.
- Captain Samuel Johnson's company, from the 20th to the 24th of June, 1814.
- Captain Henry Whitney's company, from the 20th to the 24th of June, 1814.
- Captain Samuel Tarbox's company, from the 20th to the 23d of June, 1814.
- Captain Samuel G. Wilson's company, from the 20th to the 23d of June, 1814.
- Captain David R. Adams's company, from the 20th to the 24th of June, 1814.
- Captain Wm. Reed's company, from the 20th to the 23d of June, 1814.
- Captain Robert McLean's company, from the 21st to the 23d of June, 1814.
- Lieutenant Colonel Ezekiel Cutter's field and staff, from the 18th to the 24th of June, 1814.
- Captain Nathaniel Morse's company, from the 20th to the 22d of June, 1814.
- Captain Jacob Auld's company, from the 20th to the 24th of June, 1814.
- Captain Erskine's company, from the 21st to the 24th of June, 1814.
- Captain McLean's company, from the 24th to the 25th of June, 1814.
- Captain Tarbox's company, from the 24th to the 25th of June, 1814.
- Captain Reed's company, from the 24th to the 26th of June, 1814.
- Captain David R. Adams's company, from the 30th of June to the 5th of July, 1814.
- Captain W. M. Reed's company, from the 29th of June to the 5th of July, 1814.
- Captain S. G. Wilson's company, from the 30th of June to the 5th of July, 1814.
- Captain Jacob Auld's company, from the 29th of June to the 5th of July, 1814.
- Major McKown, from the 27th of June to the 5th of July, 1814.

Captain Erskine's company appears to have been called out pursuant to an order, of which the following is a copy :

BRIGADE ORDERS.

SECOND BRIGADE—11TH DIVISION, *Wiscasset, June 18, 1814.*

The brigadier general, viewing the threatening aspect of the enemy on our sea-coast, and taking into view the petition or request of citizens of this town, and governing himself by the general orders of July 3, 1812, directs that Lieutenant Colonel E. Cutter, of the first regiment, detach sixty-four of the rank and file and officers to make one company of infantry complete. They will rendezvous at Major Abiel Wood's wharf, each being equipped agreeably to the militia law; and any delinquents will be dealt with according to the 24th section of the militia law.

By order of Brigadier General David Payson:

SAMUEL PAGE, *Brigadier Major, 2d Brigade, 11th Division.*

The letters whereof copies follow also relate to the call of Captain Erskine's company into service:

*WISCASSET, June 18, 1814.*

SIR: Mr. Sheppard, the bearer, will hand you a request of the justices of the peace and other citizens, for a company of militia to be called out and kept in service during the threatening aspect of the enemy on our sea-coast. I have given orders, in compliance with the above request, for a company immediately to assemble. I therefore wish for your orders whether they shall be continued in service, or how long. We are without powder or balls for the artillery; will you please to inform the governor of this circumstance, and request a supply.

Respectfully, yours,

DAVID PAYSON.

*BATH, June, 18, 1814.*

SIR: I now enclose, for the consideration of the commander-in-chief, a letter from Brigadier General Payson. The people of Wiscasset being at this time considerably alarmed, I have stated to General Payson, in reply, that the company might remain out until the pleasure of the commander-in-chief is known, which I hope to be advised of by return mail.

I am, sir, respectfully, your obedient servant,

WM. KING.

Hon. JOHN BROOKS

No copy of any reply to the foregoing letter is furnished. The following remarks apply to Colonel Cutter's regiment:

No division or brigade orders for calling out Lieutenant Colonel Cutter's regiment, except the company commanded by Captain Erskine, appear to have been issued. At the heads of the rolls they are chiefly

represented to have been ordered out by Lieutenant Colonel Cutter; but of the orders he issued for that purpose no copies are furnished, nor any explanations as to the cause.

The companies commanded by Captains Nathaniel Morse and Jacob Auld belonged to Lieutenant Colonel Eben. Thacher's regiment of artillery, and appear to have been in service, one of them at Wiscasset, and the other at Boothbay, and, as is presumed, under the same circumstances as the regiment of Lieutenant Colonel Cutter was. Of the orders for calling them out no copies have been furnished.

As to the company commanded by Captain Erskine, from the 21st to the 24th of June, 1814, it appears that a regimental order issued on the 21st of June, and whereby the officers and privates were required to be assembled immediately for marching; and by another like order, issued on the same day, Captain Erskine was directed to repair with the company under his command to Fowle's Point, on Sheepscot river, and, when there, to make such breastworks for the defence of the river as the situation would admit of.

The following extract from a letter of Major General King, dated Bath, June 24, 1814, and addressed to the Hon. John Brooks, the State adjutant general, relates to the several companies before noticed, belonging to Lieutenant Colonels Cutter's and Thacher's regiments:

"On the 22d, in the morning, I proceeded to Wiscasset, and there received information that the enemy had been in the Damariscotta river and near to the fort, which, however, they did not choose to attack. Being informed that there were ten companies out for the defence of the town and various narrow passes in the river below Wiscasset, an order for the discharge of all but three companies was issued, the magistrates of the place, and some from other towns, having requested this number of companies for their defence. The officers whom I assembled to advise with concurring with the magistrates in opinion, I did not think it my duty to discharge a larger number until the pleasure of the commander-in-chief should be known, particularly after being informed of the situation of the garrison. In order that I should be enabled to make up an opinion understandingly in relation to the number of men that should be retained in service at and near Wiscasset, I sent for Captain Perry, the commanding officer of the fort, and requested him to state to me what number of men he considered necessary to defend his fort in case of an attack. His answer was 'one hundred at least.' To the question 'how many men have you in the fort?' he answered 'eight.' Captain Perry was informed, if he wanted more men and would make the request, he should have them; his answer was that he had no instructions to make any such request. I consider it necessary to state these facts to show that we are not only *not defended by the United States, but that there is no disposition to do it.*"

The division order for discharging the militia is dated June 22, and directs Brigadier General Payson to detach the three companies it excepts from the regiment of Lieutenant Colonel Cutter, and to keep them on duty until further orders from the major general, unless, in the opinion of General Payson, they might sooner be discharged, which would be as early as circumstances would justify.

This order was followed by a brigade order of the same date directing Lieutenant Colonel Cutter to discharge the companies on duty, with the exception before expressed, and to detail a field officer to command the battalion which would be retained in service; and, by a regimental order dated on the 23d of June, three companies were required to be detached from the several companies of the regiment, in such portions as are therein designated: one of them to be under the command of Captain McLean, and to be stationed at Wiscasset; another of them to be under the command of Captain Tarbox, and be stationed at Fowle's Point, on Jeremy Squam island; and the other of them to be under the command of Captain Reed, and be stationed at Boothbay; and Major McKown was directed to take charge of these detached companies.

By a brigade order issued by Brigadier General Payson on the 25th of June, 1814, Lieutenant Colonel Cutter was required to discharge the troops doing duty at Wiscasset, Squam island, and Boothbay, except a sergeant's command at each post, whose duty it would be to keep guard day and night; and relative whereto entries will be found in the statement as to militia employed on guard duty.

The following remarks apply to the companies commanded by Captains Daniel R. Adams, W. M. Reed, S. G. Wilson, and Jacob Auld, whose services run into July, 1814:

On the 29th or 30th (the date being altered from the former to the latter) June, 1814, General Payson appears to have issued a brigade order, wherein, after noticing that a representation had been received from Boothbay of that place being threatened with invasion from a considerable force of the enemy, and of the commanding officer there not having a force sufficient, direction is given to Lieutenant Colonel Cutter to order Captain Wilson, with the company under his command, to repair immediately to Boothbay, and report to Major McKown; and a regimental order to this effect appears to have been issued by Lieutenant Colonel Cutter on the 30th June. Of the orders for calling out the other companies copies are not furnished. A letter of General King to the State adjutant general, dated July 4, 1814, mentions that the British ship Tenedos had been at anchor in Boothbay harbor a week, and that the ship's barges had been out every day attempting a landing, but had been beaten off in every instance.

*Alarms at Bristol.*

- Captain Benjamin Flint's company, for the 21st and 22d June, 1814.
- Captain Richard Hiscock's, company for the 21st and 22d June, 1814.
- Captain Joel Howe's company, for the 21st and 22d June, 1814.
- Captain James Robinson's company, for the 21st and 22d June, 1814.
- Captain John Sprowl's company, for the 21st and 22d June, 1814.
- Captain John Winslow's company, for the 21st and 22d June, 1814.
- Lieutenant Colonel Robert Day's field and staff, from 21st to 22d June, 1814.

The following extract from Major General King's letter to the State adjutant general, dated June 24, 1814, and before referred to, relates to these militia:

"From Wiscasset I proceeded, on the 22d, to Damariscotta. Eight companies from the regiment of Colonel Day had been out; they were all discharged but one company, which is stationed at various places, and will remain until the pleasure of the commander-in-chief is known. It may be considered as a fortunate circumstance that the enemy did not attack the fort at Damariscotta, as there was but one heavy gun, and that without balls. They had, however, taken the precaution to procure stones to fire in case it was necessary to make a defence. The last information which I had of the movements of the enemy left them at St. George's, where they had burnt some small vessels, which is a subject of regret. The fort having one man only in it, and the militia not having been out in time, has been destroyed. This, while it encourages the enemy, will stimulate the government of the United States, it is presumed, to a little more exertion, at least so far as it respects their own fortifications."

*Alarms at Bristol continued.*

Lieutenant Joseph Richards's company, from the 21st to the 30th June, 1814.  
 Captain Benjamin Flint's company, from the 30th June to the 1st July, 1814.  
 Captain Richard Hiscock's company, from the 30th June to the 1st July, 1814.  
 Captain Joel Howe's company, from the 30th June to the 1st July, 1814.  
 Captain James Robinson's company, from the 30th June to the 1st July, 1814.  
 Captain John Winslow's company, from the 30th June to the 1st July, 1814.  
 Captain James Yeates's company, from the 30th June to the 1st July, 1814.  
 Captain John Sprowle's company, from the 29th June to the 3d July, 1814.  
 Lieutenant Colonel Robert Day's field and staff, from the 30th June to the 1st July, 1814.  
 Sergeant James Blunt's command, from the 29th June to the 4th July, 1814.  
 Captain Simon Parker's company, from the 21st to the 25th June, 1814.

	220 06
Admissible .....	531 43

The company under the command of Lieutenant Joseph Richards appears to have entered the service pursuant to a regimental order of June 20, 1814, and is presumed to be the company referred to in the foregoing extract from General King's letter as the one remaining in service and stationed at various places.

The following remarks apply to Lieutenant Colonel Day's regiment :

In the regimental report made by Lieutenant Colonel Day, for the 30th June and 1st July, 1814, he has noted in the column of remarks as follows:

"On the night of the 29th instant, at twenty minutes past one o'clock a. m., our guards were attacked at Pemaquid Old Fort by three of the enemy's barges, supposed 300 men, when hailed by our guards, and immediately commenced firing; succeeded, however, in driving them off. The barges then proceeded to New Harbor, where they made an attempt to land at ten minutes past four o'clock a. m., where they met with a warm reception by our guards and militia. They were, however, beaten off, and supposed a number killed, as they were seen to fall. We had one man slightly wounded.

"ROBERT DAY, *2d Regiment, 2d Brigade, 11th Division.*"

The following remarks apply to Sergeant James Blunt's command:

It is remarked on the muster as follows: "At four o'clock a. m., June 29, the alarm gun was fired at Pemaquid Old Fort; proceeded there immediately with a part of the company residing in this vicinity, and succeeded in driving the enemy, with other assistance, from our land. June 30, the committee of safety thought proper for us to remain on duty for the present. July 4, at four o'clock p. m., the fears of the inhabitants being generally subsided, and the enemy having left these harbors, discharged the men under my command, by and with the advice of the selectmen and the committee of safety of this town."

The company to which these men belonged formed part of Lieutenant Colonel E. Thacher's regiment of artillery. It would seem, however, by their being comprehended in the regimental report of Lieutenant Colonel Day, before noticed, that they were placed under his command; and it is manifested, by the companies of his regiment having been discharged on the 1st of July, that no necessity existed, in his opinion, for keeping them longer in service. They appear to have entered on duty one day earlier than the companies of his regiment.

The following remarks apply to Captain Simon Parker's company:

This company belonged to a regiment commanded by Lieutenant Colonel Samuel Thatcher, who appears, on June 21, 1814, to have issued a regimental order, wherein, after referring to the general order of the State executive of July 3, 1812, and to certain division and brigade orders for carrying the same into effect, direction is given for strict obedience to these orders; and on the muster-roll, Lieutenant Colonel Thatcher has certified that, under his order of June 21, 1814, Captain Parker, the sergeants, and privates performed the duty mentioned in the roll; and that he, in the opinion of the lieutenant colonel, exercised his discretion very properly on the occasion; the company is expressed to have been stationed at Friendship, but what the occasion was is not explained.

*Alarms at Camden.*

Captain Calvin Curtis's company, for the 22d and 23d June, 1814.  
 Captain Samuel Tolman's company, for the 22d and 23d June, 1814.  
 Captain Asher Palmer's company, for the 22d and 23d June, 1814.  
 Captain Asher Palmer's company, for the 24th and 25th June, 1814.

Aggregate expenditure.....	\$346 30
Deduct payments for clothing.....	\$32 76
Deduct overpayments.....	1 00
Deduct excess of rations.....	8 75
Deduct miscellaneous accounts.....	102 24
	<u>144 75</u>
Admissible.....	<u>201 55</u>

These three companies belonged to a regiment commanded by Lieutenant Colonel Erastus Foote, and appear to have been called out by an order issued by him on the 22d of June, 1814, in consequence, as is therein expressed, of a representation of the magistrates and selectmen of Camden, and other information, that a British force was off the coast, and that their barges had entered George's river and destroyed much property.

The services of Captain Palmer's company for the 24th and 25th of June, 1814, were, according to a certificate of Lieutenant Colonel Foote indorsed on the roll, performed under a regimental order of June 24, 1814.

Major General King appears to have, on the 27th of June, 1814, addressed to the State adjutant general a letter, of which the following is an extract:

"General Payson forwarded to me this day a letter from Colonel Foote. Three companies, on the first alarm, were ordered out by Colonel Foote, and discharged, with the exception of forty-five men. I shall direct the discharge of twenty-five more, which I think will leave to that section of the country about its proportion. That the people will complain generally in this section of the country that they have not the necessary number of men I have no doubt; but as the alarms may be frequent and of considerable continuance, it is better that there should not be too many on duty at a time."

*Alarms at Thomaston.*

Captain E. Sprague's company, from the 22d to the 27th of June, 1814.  
 Captain Archibald G. Coombs's company, from the 22d to the 26th of June, 1814.  
 Captain John Haskell's company, from the 22d to the 27th of June, 1814.  
 Captain John Haskell's company, from the 21st to the 22d of August, 1814.  
 Brigadier General David and staff, from the 18th to the 24th of June, 1814.  
 Major General William King and staff, from the 20th to the 25th of June, 1814.  
 Captain Elkanah Spear's company, from the 22d to the 27th of September, 1814.  
 Captain George Coombs's company, from the 20th to the 25th of September, 1814.  
 Major A. G. Coombs and staff, from the 21st to the 27th of September, 1814.  
 Captain Calvin Curtis's company, from the 21st to the 23d of September, 1814.  
 Captain Samuel Tolman's company, from the 21st to the 23d of September, 1814.  
 Captain Asher Palmer's company, from the 21st to the 23d of September, 1814.  
 Captain Noyes Payson's company, from the 21st to the 23d of September, 1814.  
 Captain James Weed's company, from the 21st to the 23d of September, 1814.  
 Major John Wilson and staff, from the 21st to the 23d of September, 1814.  
 Captain George Coombs's company, from the 2d to the 3d of November, 1814.  
 Captain Calvin Curtis's company, from the 3d to the 7th of November, 1814.  
 Captain Samuel Tolman's company, from the 2d to the 7th of November, 1814.  
 Captain Asher Palmer's company, from the 2d to the 7th of November, 1814.  
 Captain Noyes Payson's company, from the 3d to the 7th of November, 1814.  
 Captain James Weed's company, from the 2d to the 7th of November, 1814.  
 Lieutenant Colonel E. Foote's field and staff, from the 2d to the 7th of November, 1814.  
 Captain Jona. Fuller's company, from the 3d to the 7th of November, 1814.  
 Captain David Grafton's company, from the 3d to the 7th of November, 1814.  
 Captain John W. Lindley's company, from the 3d to the 7th of November, 1814.  
 Captain Simon Parker's company, from the 3d to the 5th of November, 1814.  
 Captain Lemuel Andrews's company, from the 3d to the 7th of November, 1814.  
 Captain Moses Robinson's company, from the 3d to the 7th of November, 1814.  
 Major Reed's staff from the 3d to the 7th of November, 1814.  
 Captain John Haskell's company, from the 3d to the 7th of November, 1814.

Aggregate expenditure.....	\$3, 531 51
Deduct payments for clothing.....	\$394 46

	<u>874 00</u>
Admissible.....	<u>2, 657 51</u>

The following remarks apply to Captains Sprague and Coombs's companies for service in June, 1814:

Captain Sprague's company is stated, in a certificate of Lieutenant Colonel Foote indorsed on the roll, to have been called out by Lieutenant Dwight, under the general order of July 3, 1812; and in a certificate of Lieutenant Colonel Foote, on the roll of Captain Coombs's company, said company is expressed to have been called out under said general order and company orders of June 22, 1814, there being an actual invasion.

The services of Captain Haskell's company in June, 1814, appear to have been rendered in obedience to an order issued by Major Ebenezer Thatcher on the 22d of June, 1814. The cause is not assigned.

The services of Captain Haskell's company in August, 1814, are represented to have been performed at West Keag, in Thomaston; and Lieutenant Colonel E. Thatcher, in a certificate on the muster-roll, states that in his absence, and there being no senior officer present, Captain Haskell ordered out a part of his company for the defence of Thomaston, under the order of 1812. The occasion of the call is not mentioned. No other militia appear to have been called out at this period.

As regards the services of Captains Coombs and Spear's companies in September, 1814, Lieutenant Colonel Foote has certified, on the rolls of the former, that it was called out by Major A. G. Coombs, under the general order of July 3, 1812, the enemy's fleet being at anchor near the shore of Thomaston, and attempting depredations with their barges. The company of Captain Spear is stated at the head of the roll to have been called out by a regimental order, but none such is recorded in Lieutenant Colonel Foote's orderly book, nor has he certified the rolls; but there is a certificate of the performance of the service from Major Coombs thereon.

On the rolls of Captains Curtis, Tolman, Palmer, Payson, and Weed's companies, there are certificates of Lieutenant Colonel Foote representing that in his absence they were called out by Major Wilson, under the general order of July 3, 1812, to support the detached company stationed at Camden, the enemy's fleet being at anchor off that place, and their barges attempting depredations.

The companies commanded by Captains Coombs, Curtis, Tolman, Palmer, Payson, and Weed, in November, 1814, appear to have been called out by a regimental order issued by Lieutenant Colonel E. Foote on the 2d of November, 1814, in consequence, as therein expressed, of "the enemy's force, consisting of one frigate, one brig-of-war, and one bomb-ketch, being now off Camden, and their commander having demanded of the citizens of Camden the restoration of a sloop and cargo seized by the officers of the revenue or the payment of £20,000, the amount of the vessel and cargo, and having threatened, in case his demand is not complied with, to destroy the village of Camden and lay waste the whole coast within his command."

According to a letter of Lieutenant Colonel Thatcher to Colonel Sumner, dated the 17th December, 1814, it would seem that the companies commanded by Captains Fuller, Grafton, Lindley, Parker, Andrews, and Robinson, in November, 1814, were called out by a regimental order issued in his absence by Major Reed on the 3d November, 1814. The cause of the call is not explained; but, as the companies were in service at Camden, it is presumed to have been the same as is before set forth with regard to the companies of Lieutenant Colonel Foote's regiment.

As regards the services of Captain Haskell's company in November, 1814, Lieutenant Colonel E. Thatcher has certified on the muster-roll that the services were rendered in pursuance of an order issued by him. The company is stated to have been stationed at Thomaston, an adjoining town to Camden, and on the same occasion, it is presumed, for which the militia of Lieutenant Colonels Foote and Thatcher's regiments were called out.

*Alarm at Mount Desert island.*

A part of Lieutenant Colonel John Black's regiment, from seven to nine days, in March and April, 1813.

Aggregate expenditure.....	\$537 64

The following letter from Lieutenant Colonel Ulmer, to the adjutant general of the State, explains the circumstances under which he called out his regiment on the 2d September, 1814:

LINCOLNVILLE, *September 29, 1814.*

SIR: On the 2d instant I was informed of the enemy's landing a force of about 500 or 600 men at Belfast, which is ten miles from my residence, and immediately I ordered the regiment of militia which I have the honor to command to be under arms and to march against him. I was, at the first instance, informed they had marched to Hampden with about 300 men, with an intention to destroy the shipping on the Penobscot river. I accordingly put myself in motion, with as many of my regiment as could immediately be collected to pursue him, and to co-operate with the force at Hampden. In this I was disappointed; having marched within ten miles of that place through woods, &c., I there learned, to my great mortification, the total defeat of all the militia at that place. I then fell back to Belmont, five miles from Belfast, and there encamped, waiting for reinforcements which I expected, with an intention then to attack the enemy, then in Belfast; taking care to cut off and prevent supplies going to him from the extensive country around about there. On the 6th instant he precipitately embarked with his whole force from Belfast, and we marched in and took the ground they had lately left, expecting then

an immediate attack would be made on Camden. At that time Colonel Cummings, with his regiment of the 11th division, was encamped in Belmont with me. We being destitute of any general officer in the 10th division, I acted under the orders of Major General King, of the 11th division, who was on the spot, and continued to do so until the 21st instant, when I received a communication from Colonel Sumner, accompanied with some additional remarks made by the bearer of said despatch, the original of which I enclose for your consideration and notice. I must confess, to me it appears quite novel and unpleasant to see George Watson, or any private gentleman, not officially authorized, nor in any way concerned in the militia of this Commonwealth, interfering or assuming any unwarrantable command of any part of the 10th division, although they unhappily are at present in an unpleasant situation; yet I feel myself in duty bound, and always ready, to obey any orders I may receive from my superiors, and from proper authority. In obedience to the despatch received and alluded to, I have dismissed the regiment under my command, with orders to hold themselves in readiness to march at the shortest notice, wherever they may be ordered by his excellency the commander-in-chief. The effects produced by their discharge is the almost daily passing of beef, cattle, grain, and supplies of almost every description the country affords, from Belfast and other places in the vicinity of the Penobscot river, in large quantities, bound towards the enemy at Castine; which, as I am credibly informed, can be proved, and, I think, might be prevented by vigilant militia guards, stationed on and about the Penobscot river, in proper places. I am extremely sorry to see so many as there appears to be in Belfast and its vicinity show such striking marks of favor for the enemy, and prejudices against our own militia, as evidently seen, with an intention to trade with and supply the enemy all in their power. The enemy at Castine frequently send out their foraging parties and plunder the inhabitants, which they attempted on the 23d instant, in Northport, with five barges. I met them with a party of my regiment, and they were repulsed. Sometimes they demand their fire-arms, and at other times such supplies as they may want, frequently robbing houses, &c. Desertion from Castine has been quite common, and I believe would be still more so, if there was any military force on or near the Penobscot river, on this side, to secure and assist them in their escape. I have taken the liberty to give you this information, not wishing or meaning, by any means, to dictate; but always ready to obey, and relying on his excellency's doing all that can be done for the general good and security.

I have the honor, sir, to be, with high consideration and esteem, your most obedient and very humble servant,

JACOB ULMER,

*Lieut. Col., Commanding 2d Reg., 1st Brig., 10th Division, Massachusetts Militia.*

General JOHN BROOKS.

A copy of the communication referred to in the foregoing letter appears to have been forwarded by Colonel Sumner to the State adjutant general, prefaced by the following remarks:

Mr. George Watson has requested me to forward the enclosed papers. In consequence of his representations, and other intelligence, and by the advice of General Sewall, I wrote a letter of which the following is a copy:

WISCASSET, *September 20, 1814.*

LIEUT. COL. ULMER: Since I have arrived in this place I have learned that you intend to take the responsibility of ordering out the troops of the 10th division, or a part of them, to the Penobscot.

The change of circumstances on that river, which has become our eastern frontier, is such, that some general arrangement will be made by the government for the regulation of the officers in that quarter. From my knowledge of the views of the government respecting that position, I think no authority vested in the commanders on that station would be usefully exercised by them till they have special instructions from headquarters. I therefore think that you had better report to the commander-in-chief the situation of the people on that frontier, and act according to such directions as you shall receive.

*Alarm at Hampden.*

Captain John Emery, jr.'s, company, for three days in September, 1814.  
 Captain Abraham Hill's company, from the 2d to the 4th of September, 1814.  
 Captain Solomon Blake's company, from the 2d to the 4th of September, 1814.

## C.

## MILITIA CALLED OUT UNDER THE GENERAL ORDER OF JUNE 16, 1814.

*A statement applicable to such items in the claim of the State of Massachusetts as relate to expenditures consequent on calls of militia into service under the authority given to several major generals of militia, by a general order issued by the adjutant general of the State, by direction of the State executive on the 16th June, 1814, an extract of which follows:*

"The constant alarm excited and kept up by the predatory course of warfare lately adopted on our seaboard renders it necessary that guards should be kept up at some of the places, those particularly exposed by having quantities of shipping lying therein. To facilitate the execution of such a purpose, and to render the necessary aid as prompt and efficacious as possible, his excellency the commander-in-chief directs me to signify it to you as his pleasure that you furnish to every town whose situation, from the present pressure of the war, is exposed to surprise and immediate danger, such military force, and more especially such guards by night, as its peculiar situation and circumstances require."

*At Scituate.*

A detachment consisting of Lieutenant Elisha Barrell, two sergeants, and eight matrosses, from the 1st July to 6th September, 1814.

Aggregate expenditure.....		\$634 21
Deduct payments for clothing.....	\$85 36	
Deduct overpayments.....	10 35	
Deduct rations reduced.....	20 22	
Deduct miscellaneous items.....	109 25	
Deduct payments to officers for quarters and fuel.....	2 25	
		<u>227 43</u>
Admissible.....		<u>406 78</u>

This detachment was in service pursuant to a division order issued by Major General N. Goodwin on the 28th June, 1814, directed to Lieutenant Colonel Turner, and requiring him to detach from the artillery company under his command a lieutenant, one of his pieces, with apparatus complete, and a sufficient number of non-commissioned officers and privates to manage the same; to be marched immediately to the harbor of Scituate, for the defence of that place and its vicinity, and be under the command of Lieutenant Colonel Turner. The town is not shown to have applied for this force. On the 24th June, 1814, an application, at the instance of the town, for a permanent guard was made by Lieutenant Colonel Turner to the general, and who, on that day, issued a division order, under which a sergeant, two corporals, and fifteen privates of infantry, were stationed at Scituate during the whole of the period this artillery detachment was in service. Both detachments were discharged on the 6th September, 1814, in consequence of a division order issued by him on the 29th August, 1814; and, agreeably to this order, another guard was called out, and remained in service till November 5, 1814. \*

*At Plymouth.*

Captain Edward F. Jacob's company of artillery, from the 19th September to the 19th October, 1814.  
 Captain Peter H. Pierce's company of infantry, from the 21st September to the 15th October, 1814.  
 Captain Samuel Cushman's company of infantry, from the 26th September to the 19th October, 1814.  
 Captain Elisha Daggett's company of infantry, from the 26th September to the 19th October, 1814.  
 Captain Joshua Howe's company of infantry, from the 20th September to the 18th October, 1814.  
 Captain Nehemiah Lincoln's company of infantry, from the 20th September to the 16th October, 1814.  
 Captain Nathaniel Edson's company of infantry, from the 20th September to the 12th October, 1814.  
 Captain Isaac Keith's company of infantry, from the 20th September to the 15th October, 1814.  
 Captain Sears Washburn's company of infantry, from the 20th September to the 12th October, 1814.  
 Captain Nathaniel Eddy's company of infantry, from the 21st September to the 12th October, 1814.  
 Captain Greenleaf Pratt's company of infantry, from the 21st September to the 15th October, 1814.  
 Captain Joseph Le Barron's company of infantry, from the 21st September to the 12th October, 1814.  
 Lieutenant Colonel Caleb Howard's field and staff, from the 20th September to the 19th October, 1814.

Aggregate expenditure.....		\$16, 500 65
Deduct payments for clothing.....	\$1, 765 68	
Deduct payments for use of arms.....	292 47	
Deduct overpayments.....	204 84	
Deduct rations reduced.....	1, 025 79	
Deduct excess of rations.....	44 57	
Deduct payments to officers for forage.....	50 38	
Deduct payments to officers for servants.....	17 29	
Deduct payments to officers for quarters and fuel.....	67 59	
Deduct miscellaneous items.....	2, 162 17	
		6, 530 78
Admissible.....		10, 869 87

The foregoing militia appear to have been called out by a division order issued by Major General N. Goodwin on the 17th September, 1814, and to have been discharged under other like orders issued by him on the 8th, 12th, and 15th October, 1814.

The circumstances occasioning the call are set forth in a written application made to General Goodwin on the 13th September, 1814, by the selectmen and committee of safety of the town of Plymouth; wherein, after requesting him, pursuant to a vote at a town meeting held on that day, to order out for the defence and protection of the town and its vicinity such a portion of the militia as he should judge necessary for the purpose, they proceed: "The time having arrived, in our opinion and that of all wise and prudent men, that we are in danger of an invasion from the enemy, and it has become imminent and alarming, there being a large British force in our bay, daily in sight from the town, taking and destroying even our little fishing vessels; and they have landed at Brewster and other towns in the bay; put some under heavy contributions and threatening others. Their boats and barges have landed several times, one of which was sunk by the small fort at the entrance of our harbor, and, from information which we can fully rely upon, it is the intention and determination of the squadron to attack our fort, making a landing at the same time, and destroy the shipping at our wharves; in doing which they must destroy a great part of the town. Under these impressions, the inhabitants of all ages and situations are moving into the country with their families and effects. We do, therefore, think it indispensably necessary for you to call in some troops to our aid and assistance; such a number as will be necessary to repel an attack. While you are affording aid to other towns within your command, we trust you will not leave us defenceless at this critical and important crisis; therefore, we rely on your granting our request." Appended to this there is the following note: "Notwithstanding the foregoing application for assistance, (and many previous ones,) it being my native town and place of residence, I did not order out any troops before I consulted with his excellency the commander-in-chief and the commissioners for the sea-coast defence at Boston personally on the subject."

General Dearborn appears to have, on the 8th of July, 1814, made a requisition on Governor Strong for certain detachments of artillery and infantry, to be placed at different posts on the seaboard of the State, and to remain in service of the United States for three months. This requisition was complied with by the State executive, and the detachments were received into the United States service, and were paid and supplied by the United States.

Of these detachments, a lieutenant and 18 non-commissioned officers and privates of artillery, and a lieutenant, ensign, and 40 non-commissioned officers and privates of infantry, were, by General Dearborn's direction, marched to the Gurnet fort in the harbor of Plymouth, and where they, together with a lieutenant and 22 men of the United States army, were stationed from the 4th of August to the end of October, 1814, a period comprehending the whole time of service of Lieutenant Colonel Howard's regiment.

It will be seen, too, on reference to the statement relative to guard duty, that there were, during the same time, between 30 and 40 more militia stationed at Plymouth.

*At New Bedford and Fairhaven.*

Captain Samuel Stall's company of artillery, from the 16th of June to 1st of August, 1814.

Captain Reuben Swift's company of artillery, from the 17th of June to 30th of June, 1814.

Captain Wm. Nye's company of artillery, from the 17th of June to 29th of June, 1814.

Captain Jonathan Davis's company of artillery, from the 18th of June to 28th of June, 1814.

Captain Nathaniel Nelson's company of artillery, from the 16th of June to 5th of July, 1814.

Captain Simeon Ashley's company of artillery, from the 18th of June to 30th of June, 1814.

Captain Lynde Hathaway's company of artillery, from the 20th of June to 28th of June, 1814.

A letter, of which the following is a copy, explains the cause of the call of these militia into service:

NEW BEDFORD, June 21, 1814.

Sir: The bearer of this, Lieutenant Frederick Mayhew, I send to you, express, to communicate the situation of this place. Sir, we are in a state of great alarm. On the morning of the 13th instant, at daybreak, about nine barges full of men appeared in our harbor. By information since received it appears that there were in the barges about four hundred men. I immediately called out three companies of our militia in this vicinity, and in the evening, the enemy disappearing, they were discharged. On the 16th I received a communication from the selectmen of our town with a request to call out five hundred men from the regiment under my immediate command to protect this town and harbor, which request I complied with. We have now about three hundred and fifty men under arms in this town and Fairhaven; under these circumstances I thought proper to send an express to you for advice and direction, and should be extremely gratified was it convenient for you to visit us in these times of agitation. We every hour expect an attack. Our force is very small. We have a small fort, with seven guns and 23 men and boys, and two gunboats with about twenty men and boys, which are all the defence our general government has thought proper to furnish us. We have a great amount of property in this port, upwards of fifty ships and brigs, together with a great number of small vessels, exposed to the enemy. We have but very little means of defence, only one small company of artillery and six small pieces of cannon, and very little

ammunition. I have sent an express to the governor, who will probably return by way of your place. Under these circumstances I wish for orders by this express, if convenient.

Yours, very respectfully,

BENJAMIN LINCOLN, *Lieut. Col. 2d Regiment, 2d Brigade.*

Major General Goodwin.

This letter and the rolls of the seven companies last before specified are far from corresponding, so far as respects the number of militia in service at New Bedford and Fairhaven at the time the letter was written. According to it, only about three hundred and fifty men were then under arms there; whereas the rolls, the certificates of services on which are not dated till some months after the companies were discharged, exhibit a force which, with the field and staff officers, exceeded 520.

Captain Isaac Lane's company of artillery, from the 29th of June to the 9th of July, 1814.

Captain Nathaniel Wilder's company of infantry, from the 24th of June to the 10th of July, 1814.

Captain Gain Shaw's company of infantry, from the 24th of June to the 8th of July, 1814.

Captain Joseph Cushman's company of infantry, from the 24th of June to the 10th of July, 1814.

Major Levi Pierce and staff, from the 23d of June to the 10th of July, 1814.

The company of artillery and three companies of infantry last mentioned were called out by division orders, issued by Major General N. Goodwin, on the 21st June, 1814, in consequence of the letter of Lieutenant Colonel Lincoln, to him before set forth, and to which he appears to have replied as follows:

HEADQUARTERS, *Plymouth, June 22, 1814.*

Your letter, by express, I have this moment received, stating the situation of your place requires all your energy in those difficult times. I flatter myself you are competent to the duty imposed, and presume, should the enemy attempt an attack, you will give a good account of them. Under the present excitement, I think you are justified in calling in the troops to your aid and assistance in defence of the place. You will retain them no longer than the exigency of the case requires, and, being on the spot, you must be the best judge.

Upon your representation, and considering the weakness of the United States garrison, together with the possibility of an attack from the enemy, I have ordered the company of artillery from Norton, and a battalion of infantry, under the command of a major, from Colonel Abiel Washburn's regiment, being the nearest your place, to be placed under your command, as by the order enclosed.

You will direct the troops to mount guard day and night. If more remains than is necessary for that purpose, you will place them in the fort, with a sufficient number of others to man that fortress, by permission of the commanding officer there, as it appears that the United States troops stationed there are insufficient to defend it. Should the number of troops that I have ordered, in your opinion, be insufficient for the defence of New Bedford and its vicinity, you will order a further supply or detachment from your regiment from those most remote, or from those residing nearest you, belonging to the second brigade. In case you should be invaded, upon any alarm I presume the militia generally would march to your assistance; orders have been already given to that purpose. You will dismiss the troops, or most part thereof, when you shall judge the safety of the place will permit. But as necessity obliges us for our defence to make those supplies of men, &c., which in justice and good faith should have been made by the general government, we must have strict regard to economy, and no expense should be incurred but what, in your opinion, is indispensable. Upon the arrival of the above detachment you can dismiss some that are there, if you judge expedient, and call in others. You must exercise your judgment. I hope soon to hear from you.

NATHANIEL GOODWIN, *Major General 5th Division.*

Lieutenant Colonel BENJAMIN LINCOLN, *2d Brigade.*

Captain William Nye's company, from the 30th June to the 10th July, 1814.

Captain Silas Shepard's company, from the 8th July to the 25th July, 1814.

Captain Giles G. Chase's company, from the 8th July to the 25th July, 1814.

As to the company in service from the 30th June to the 8th July, under command of Captain Nye, no explanation is furnished. It was probably called out to relieve the other company that had been commanded by him, and which was discharged on the 29th June. The companies of Captains Shepard and Chase belonged to the third regiment, and the reason for calling them out appears in the following letter:

NEW BEDFORD, *July 3, 1814.*

SIR: Agreeably to your orders the detachment from Colonel Washburn's regiment have arrived, under the command of Major Peirce, also the artillery from Norton, and are on duty. Their prompt attention to order and discipline does them honor. I have to state, however, that in consequence of your instructions, I have ordered out two companies from the third regiment in this brigade (being nearest to us) for the purpose of relieving those now on duty from the second regiment, and to supply the place of others discharged, it being my opinion the number on duty is inadequate for the defence of so important a place as this. Having already had a great proportion of the troops from the second regiment on duty, the pressing calls of their families and little plantations were such as induced me to discharge more than I otherwise should. Last evening I received a communication from Captain Shepard and Colonel Deane, of the third regiment, which induces me to think they will not join, as ordered. We have only 390 men, officers included; have hove up a battery at the Smoking Rocks to annoy the enemy, should they again attempt to enter our harbor. We need some lumber to complete the battery and to mount the guns that we have taken out of some vessels in the river; wish to know if I should be justified in procuring the same. The commandant of the United States garrison is opposed to the militia being quartered there. If that fortress is to be defended, it must be without the walls; there are not men sufficient to defend it. Should the enemy get possession, they will command both sides of the river. The enemy are in sight of the harbor continually.

Yours,

BENJAMIN LINCOLN, *Lieutenant Colonel.*

General Goodwin.

To the foregoing letter the following reply appears to have been sent:

HEADQUARTERS, *Plymouth, July 4, 1814.*

The major general extremely regrets the necessity of retaining in service so large a detachment of the militia for the defence of New Bedford and its vicinity. On the arrival of the two companies you have detached from the third regiment and second brigade, you will discharge the troops belonging to the fourth regiment, first brigade, under the command of Major Peirce. Should your force be insufficient to protect your town, the number must be augmented by a new draft, it being extremely inconvenient for farmers to be long absent from home at this busy season of the year.

By order of the major general, 5th division:

N. HAYWARD, *Aide-de-camp.*

Lieutenant Colonel BENJAMIN LINCOLN.

Captain William Nye's company, from the 25th July to the 6th August, 1814.

Captain Reuben Swift's company, from the 25th July to the 12th August, 1814.

The commencement of service of these two companies agreeing with the date at which the detachment referred to in the following letter was to enter, they are presumed to have been part thereof. No other explanation in relation to the call of them into service can be found in any of the documents furnished.

NEW BEDFORD, *July 21, 1814.*

SIR: Nothing of much importance has occurred since you left this place, excepting a small affair at Westport harbor. On Friday night last a British barge, with thirty or forty men, entered there; but our small guard stationed there being vigilant, after exchanging a few rounds with them, they thought best to return to the ship. The British force in our sound has been recently augmented. I have this day ordered a detachment of 170 men, (officers included,) Monday next, from the third regiment, and shall discharge those on duty from the second regiment; have stationed eighteen at Slocum's river, and reduced the guard on Scouticut Point to four, with tar barrels, and placed the others in various places. The whole number of troops is 210, artillery included. A considerable alarm has been excited by the augmentation of the British force off the harbor; and the recent arrival of the privateer Yankee, which has been very mischievous to the enemy, and their determination to obtain her, keeps them off here in expectation of taking her. I am strongly importuned by our citizens to call in more force, and I wish your instructions on that head. If troops are taken, I would suggest the propriety of taking them from the interior. The inhabitants met yesterday, and agreed to furnish me with materials to complete the small fort, also a guard boat.

Yours, &c.,

BENJAMIN LINCOLN, *Lieutenant Colonel.*

General GOODWIN.

As appears by the foregoing letter and the following one, General Goodwin had personally visited New Bedford, and had given directions for a reduction of the force under Lieutenant Colonel Lincoln's command to about one hundred men; he, notwithstanding, kept in service nearly double that number.

HEADQUARTERS, *Plymouth, July 23, 1814.*

SIR: I should have written you before this had I not waited for an answer from the adjutant general, which I have not yet received. But, sir, I presume you have discharged the detachment of guards doing duty at Russell's Mills, and reduced the others at Westport and Ponigansett, and also the troops from the 3d regiment, and called in some of the 2d regiment to supply their places, (in part,) agreeably to my directions when I left you; and you will retain no more troops than is sufficient for guards, sentinels, &c., viz: 40 for the harbor, cove, sentinels at Russell's Mills and head of the river; 40 to be stationed at the fort; 21 at Ponigansett and Westport, making in the whole about 100. I expect orders daily respecting the distribution of the troops, and will give you information. You will observe, by orders accompanying this, that part of the detachment is to be stationed at Fairhaven. You will lose no time or exertion in having the detachment from your brigade completed and marched to the place of rendezvous, as directed; to expedite the business, forward you 50 general orders and 60 blank rolls to be distributed.

Yours, with due respect,

NATH'L GOODWIN, *Major General 5th Division.*

Lieutenant Colonel BENJAMIN LINCOLN.

N. B.—You will endeavor to cultivate harmony with the officer commanding the United States fort, that you may act in concert in case of an attack.

On July 29, 1814, General Goodwin appears to have replied to the foregoing letter of Lieutenant Colonel Lincoln of the 21st, and of that reply the following are extracts: I received yours of the 21st with its enclosures; I am sorry you ordered so large a number of men from your regiment—they cannot be wanted; I stated to you in my last of the 23d instant a number that I imagined necessary, and is about the same number of men as when with you. On the arrival of the detached artillery and infantry you will discharge Captain Hall's (Stall's) company of artillery, and all the troops doing duty at Fairhaven and New Bedford, excepting the sentinels necessary to be detained as named to you in my last; those with the assistance of night signals, viz: 9 at Scouticut, 6 at foot of the Rocks, 3 at Lighthouse Point, 3 at the westerly point of the cove, 10 row-guard across the cove to Dartmouth shore, 3 up the cove, 3 at Russell's Hill, 3 at the head of the river, 21 at Dartmouth and Ponigansett, varying their positions as you may judge best. I am happy to be informed your committee are to supply materials to enable you to finish your little fort. I hope soon to hear they have manned it with exempts; surely they cannot be so blind to their own interest, safety, security, and protection, as not to do it.

The detached artillery and infantry referred to were called out on the requisition of General Dearborn, and will be hereafter more particularly noticed.

Captain Noah Reed's company, from August 10 to September 10, 1814..

To this company the following letter is presumed to have reference:

NEW BEDFORD, *July 31, 1814.*

SIR: To relieve the troops we have now on duty from my regiment, I have this day ordered a detachment from the 4th regiment, one company of 77 men, (officers included,) which was our only alternative, or be left without men. Should this proceeding not suit your approbation, you will please give immediate advice, and the order shall be countermanded. The people here are all very much alarmed; it is reported that an expedition is fitting out by the enemy for this place, which I hope will prove to be nothing but report.

In haste, I am yours, with respect,

BENJ. LINCOLN, *Lieutenant Colonel.*

General Goodwin.

On the 8th and 9th of August, 1814, a company of infantry, commanded by Captain Kingman, and a detachment of artillery, commanded by Lieutenant Lane, constituting together (including officers) a force of nearly 90 men, (being parts of certain militia detachments called out pursuant to a requisition of General Dearborn upon Governor Strong, and which were received into the service of and were paid and supplied by the United States,) arrived at Fairhaven and remained stationed there till November, and where, too, a detachment of regular troops, consisting of a lieutenant and about twenty men, were also stationed from June to November.

Captain Joseph Reed's company, from September 6 to October 6, 1814.

This company is represented in a letter of Lieutenant Colonel Lincoln to General Goodwin, dated September 3, 1814, to have been, agreeably to the general's orders, detached from the 3d regiment for one month to relieve those of the 4th regiment. The colonel mentions that he had discharged all the men from Westport, and had then on duty at Clark's cove, Scouticut, with signals; in all 69.

Captain Samuel Wilbor's company, from the 27th September to the 18th October, 1814.

Captain Seth Staple's company, from the 27th September to the 20th October, 1814.

Captain John Hood's company, from the 25th September to the 19th October, 1814.

Captain Joseph Watson's company, from the 25th September to the 20th October, 1814.

Major E. Hunt's company, from the 30th September to the 19th October, 1814.

Major General N. Goodwin appears to have issued, on the 19th September, 1814, a division order requiring Lieutenant Colonel Lincoln to detach one major, four captains, four lieutenants, four ensigns, and 280 non-commissioned officers and privates, to be formed into four companies, and stationed at New Bedford, Fairhaven, and vicinity, and to have accompanied the order with a letter, of which the following is a copy:

PLYMOUTH, *September 19, 1814.*

Enclosed is an order providing for the defence of your place. I believe the time has arrived that we must make preparation to defend ourselves, being left by that government who is bound in duty and good faith to protect us. The late depredations of the enemy, by their unheard-of mode of warfare, not practiced by any civilized nations, leave us no hopes or expectation of lenity from them. We are left to make every exertion in our power to repel a hostile invading foe. I hope the late disasters will teach them moderation and a just sense of propriety. They, by way of excuse, say we set them the example. They have landed at Eastham, and taxed the salt-works \$1,200; also at Brewster, \$4,000. If you can give Major Pope the command of this detachment, I presume you will. Last week, in Boston, General Dearborn informed me he had consented to the exchange of Kingman. It is highly important to have a good officer to command that fortress. Suppose the term of the last detachment from the 3d regiment has nearly expired. You will use your own judgment respecting detaining them till that time. You will make the detachment from that part of your brigade most remote, if compatible with your former drafts of duty—not make a general detail. Should you be assailed by the enemy, you will alarm the country—do not neglect your night signals. I have received no answer to my last two letters of the 20th August and 3d instant.

NATHANIEL GOODWIN, *Major General.*

Colonel B. LINCOLN.

For the discharge of the last-mentioned detachment, a division order, of which the following is a copy, was issued:

HEADQUARTERS, *Plymouth, October 15, 1814.*

In compliance with orders received from the commander-in-chief, you are hereby directed to discharge immediately the four companies of militia, now doing duty at New Bedford, Fairhaven, and its vicinity, that were detached agreeably to my order to you of the 19th of September last. If you want troops to defend your place, your committee will apply directly to the commander-in-chief, he having resumed all the power to himself, and most properly; at least I presume so, by the late order. You will advise me of the receipt of this by the first mail.

NATHANIEL GOODWIN, *Major General 5th Division.*

Colonel B. LINCOLN, *New Bedford.*

Lieutenant Colonel B. Lincoln and part of his field and staff, for different periods between the 13th of June and the 18th of October, 1814.

Major General N. Goodwin, for extra services performed by him between the 16th of June and the 16th of November, 1814.

The services of General Goodwin and Colonel Lincoln, and the field and staff officers of his regiment, are connected with the different detachments that were called into service at New Bedford, &c.

Aggregate expenditure on account of the foregoing detachments at New Bedford, &c. . . . .	\$21, 538 17
Deduct payments for clothing . . . . .	\$2, 318 62

Admissible.....			<u>2,366 27</u>

As regards this company the information contained in the following copies and remarks has been collected from the documentary testimony, &c.

*To his excellency the commander-in-chief of the Commonwealth of Massachusetts:*

The undersigned, the selectmen and others, a committee of general safety and defence of the town and harbor of Portland, respectfully acquaint your excellency that, considering the great consternation and alarm which universally prevail among the inhabitants of this town, the committee, as instructed by the town, applied to Brigadier General Alford Richardson, the senior officer of this division, for a military force for the immediate defence of the town and harbor; to which General Richardson made the reply of which a copy is enclosed. General Richardson, it seems, does not feel himself authorized to act, under any emergencies whatever, with his existing orders, although he does conceive that the commanders of the Portland regiment of infantry and battalion of artillery are authorized to act. Yet these commanders consider they have no authority unless it be *previously* vested in their superiors; and they therefore cannot comply with the request of the town, in ordering out two companies of infantry.

Under these circumstances, we are constrained to beg your excellency, in the most earnest terms, to issue an order for two or more companies of infantry forthwith to be ordered out. The principal part of the United States forces have marched off.

The inhabitants are removing their goods and effects out of town, in consequence of our want of preparations of defence. In fine, a universal consternation prevails, and the inhabitants, unless better protected, will generally remove their families and effects.

A full meeting of the town was held on Monday last, and the committee act by order and vote of the town.

Such is our defenceless condition that we want a permanent force as long as these threatened circumstances of invasion exist.

We have the honor to be, with the most respectful consideration, your obedient servants,

DANIEL TUCKER,  
JOS. H. INGRAHAM,  
COTTON B. BROOKS,  
PETER WARREN,  
LEMUEL WEEKS,  
ROBERT ILSLEY,  
A. W. ATHERTON,

*Selectmen and Committee of General Safety and Defence for the town of Portland*  
PORTLAND, June 22, 1814.

NORTH YARMOUTH, June 21, 1814.

SIR: Yours of yesterday has this moment been handed me, in which you observe that the danger of invasion is now so imminent the committee of safety desire me immediately, if I shall conceive myself properly authorized under the general order of July 3, 1812, to order a detachment of two companies to be made, to serve in the interim while an answer is expected from his excellency the commander-in-chief. I do not conceive that I am authorized by said general order of July 3, 1812, to order a detachment in any case, but do conceive that Lieutenant Colonel Nichols and Major Weeks are clothed with all the power necessary to call out the troops under their commands, or any portion of them, "in case of actual invasion, or such imminent danger thereof as will not admit of delay." If said general order has been complied with, the troops in the neighborhood of Portland are in constant readiness to assemble and march to the defence of any point the enemy may choose to attack.

As senior and commanding officer of the 12th division I shall cheerfully co-operate in every necessary and proper measure to be taken for the defence and safety of the town of Portland, and promptly carry into effect any orders that I may receive from his excellency the commander-in-chief for that purpose.

I am, sir, very respectfully,

ALFORD RICHARDSON.

DANIEL TUCKER, Esq., *Chairman of the Committee of Safety, Portland.*

At the foot of the official copy of the general order of June 16, 1814, referred to at the head of this statement, it is noted that a copy thereof was sent to General Richardson on the 24th of that month; and by his orderly book it appears that, on the same day, the letter next hereinafter set forth, giving additional instructions, was written to him:

ADJUTANT GENERAL'S OFFICE, *Boston, June 24, 1814.*

SIR: Since my letter to you of this date was written, I have thought that some special notice of the town of Portland might be expected. The committee of safety of that town express strong wishes that two companies may be stationed there. The commander-in-chief had flattered himself that a measure of that sort would not have been required, as he learned from General Cushing, on Saturday last, that two companies of United States troops were retained at that post in consequence of the menacing movements of the British cruisers on that part of our maritime frontier.

However this may be, the subject is referred to your discretion, and the commander-in-chief entertains no doubt that the result will justify the confidence he places in your judgment. That some force may with propriety be called out as a guard for that town is indisputable, and the sooner the measure is adopted the better. I recommend to you an immediate interview with the selectmen and committee of safety.

I am, very respectfully, sir, your obedient servant,

J. BROOKS, *Adjutant General.*

Brigadier General ALFORD RICHARDSON.

PORTLAND, *June 27, 1814.*

SIR: The undersigned, the selectmen and others, a committee of general safety and defence of the town and harbor of Portland, appointed by the town at the last annual town meeting, having addressed letters to the commander-in-chief, the adjutant general, and yourself, upon the exposed situation of this place, and finding that the governor has intrusted the defence of this town and neighborhood to your discretion, we beg leave to call your immediate attention to the defence of Portland, the shipping and other property exposed to the predatory depredations of the enemy now on our coast, burning and carrying off such effects as come within their reach; and we are of opinion that two companies of infantry are indispensable necessary for this purpose.

We are, sir, very respectfully, your obedient servants,

DANIEL TUCKER,  
JOS. H. INGRAHAM,  
COTTON B. BROOKS,  
PETER WARREN,  
LEMUEL WEEKS,

*Committee of Safety.*

Brigadier General ALFORD RICHARDSON, *North Yarmouth.*

On June 28, 1814, General Richardson, by a division order, directed the detaching, forthwith, of one captain, one lieutenant, one ensign, four sergeants, four corporals, one drummer, one fifer, and sixty-four privates, to form one company, for the service of the State, for sixty days, and to march to the town of Portland and report themselves to Major Weeks, who was requested to make such disposition of them as he should judge most conducive to the safety of the place, after advising with the selectmen and committee of general safety and defence of said town and harbor, until further orders. Under this order Captain Andrews's company appears to have entered on duty; and another division order of General Richardson, issued August 29, 1814, required its discharge on the 2d September then next, and when it appears to have been discharged accordingly.

In the beginning of August, 1814, about two hundred infantry and artillery, under Majors Rogers and Weeks, (being part of certain detachments which were furnished on the requisition of Major General Dearborn, and were received into the service of and were paid and supplied by the United States,) entered on duty at Forts Scammel and Preble, in the harbor of Portland; and when it would seem by the application hereafter set forth to have been contemplated by General Richardson to discharge Captain Andrews's company, and from then so doing he was probably deterred by the representation therein made.

PORTLAND, *August 6, 1814.*

SIR: The undersigned, committee of general safety and defence for the town and harbor of Portland, having understood that you had it in contemplation to discharge the detachment of militia now performing duty at Fort Burrows, beg leave to state their reasons why said detachment should be continued on duty the remaining part of the term for which they were detached:

1st. The cause of alarm and dangers of invasion have by no means decreased since the application was made for a detachment. On the contrary, it is known that an expedition is fitting out from Halifax, and it is at least as probable that its destination is for this as any other place.

2d. The detachment ordered into the service of the United States, it is understood, is to be the whole force to defend Forts Preble and Scammel, as the rest of the United States troops are to be withdrawn; consequently the town will not be benefited by even a guard from this military force.

3d. If this detachment is disbanded it will subject the town to the expense of a military watch, which is a burden that ought not to be thrown on the town at a time when it is subjected to extraordinary expenditures.

4th. The detachment can for the remaining term of service, which is understood to be less than a month, be very advantageously employed, a part of the time on fatigue, to complete the works at Fort Burrows, and throw up a breastwork on Fish point for the better security, in time of attack, of the heavy ordnance on travelling carriages. The town is at this moment mounting a thirty-two and twenty-four-pounder at their own risk, to be placed at Fort Burrows as a further safeguard to that post.

5th. The detachment having undergone all the inconveniences of assembling for the defence of the

town, would it not be good policy, even as it respects the militia, to let them serve out the last month, that they may draw pay for the expected term of service? It certainly would be more satisfactory to the men, and encouragement to the militia in these times is a very desirable object, although it would not be proper to continue the detachment for this reason only.

Captain Andrews will pay strict attention to the drill and discipline of his men, and the advantages to be gained in this way will in a degree indemnify the Commonwealth for the expenses.

It cannot, it is conceived, be an object with the State government, in competition with the safety of a town like this, to incur the trifling expense of one company as a guard to the town, so long as the present state of alarm and anxiety exists among the inhabitants.

We trust, sir, you will think proper to continue, under all these circumstances, the present detachment on duty to the expiration of the two months.

We are, with great esteem and respect, your obedient servants,

DANIEL TUCKER,  
JOSEPH H. INGRAHAM,  
PETER WARREN,  
ROBERT ILSLEY,  
A. W. ATHERTON,

*Committee of Safety.*

General RICHARDSON.

*At Portland.—Continued.*

Lieutenant Colonel Joseph E. Foxcroft's regiment, from September 10 to 24, 1814.

Lieutenant Colonel Josiah Hobb's regiment, from September 8 to 20, 1814.

Lieutenant Colonel John Burbank's regiment, from September 7 to 20, 1814.

Lieutenant Colonel Martin Nicholls's regiment, from September 7 to 19, 1814.

Major L. Weeks's staff, from October 9 to 27, 1814.

Brigadier General James Irish and his staff, from September 7 to 20, 1814.

Colonel William Ryerson's regiment, from September 14 to 27, 1814.

Colonel Samuel Holland's regiment, from September 14 to 27, 1814.

Colonel Cyrus Carter's regiment, from September 13 to 27, 1814.

Major John Greenwood's battalion, from September 13 to 22, 1814.

Major Alden Blossom's battalion, from September 12 to 24, 1814.

Major James Steele's regiment, from September 13 to 24, 1814.

Brigadier General John Turner and his staff, from September 12 to 27, 1814.

Brigadier General John McMillan and his staff, from September 13 to 24, 1814.

Major General A. Richardson and his staff, from November 8 to 9, 1814.

The following documents show the circumstances under which the foregoing enumerated troops, which were drawn from the 12th and 13th divisions, and were commanded by Major General Alford Richardson, assembled at Portland in September, 1814:

PORTLAND, *September 5, 1814.*

At a meeting of the magistrates, selectmen, and committee of safety, fully attended, after taking into consideration the present alarming situation of this town and harbor, in consequence of the increasing force of the enemy, the destruction of the Capitol, the taking of Eastport, Castine, Belfast, &c., and the strong apprehensions that we are daily exposed to an invasion from the enemy, and conceiving that one of the emergencies contemplated by the laws of the land for calling out the militia does exist, it was unanimously voted that application be forthwith made to Brigadier General Richardson, the senior officer of this division, to order out two thousand five hundred men, for the defence of the town and harbor of Portland, until relieved by other troops, or until the existing cause of alarm cease.

The secretary was directed to furnish General Richardson with a copy of the foregoing vote. Adjourned to 3 o'clock in the afternoon.

Attest:

A. W. ATHERTON, *Secretary.*

MONDAY, *September 5, 1814, at 3 o'clock p. m.*—The gentlemen within-mentioned met agreeably to adjournment, and voted so far to modify the within vote as to request of General Richardson to hold his whole division in requisition, and to order, as soon as may be, into actual service two full regiments thereof, to be stationed in the town of Portland or its vicinity. *Voted*, that General Richardson be also requested to order into actual service the regiment under command of Lieutenant Colonel Nichols, to be stationed in Portland, to guard the town until the other troops shall arrive.

In the absence of Captain A. W. Atherton, I certify the foregoing to be a true copy of the votes of the meeting.

DANIEL TUCKER, *Chairman.*

## COMMONWEALTH OF MASSACHUSETTS.

## DIVISION ORDERS.

NORTH YARMOUTH, *September 6, 1814.*

The senior and commanding officer of the twelfth division having received a request from the magistrates, selectmen, and committee of safety of the town of Portland, occasioned by the present alarming situation of that place, in consequence of the increasing forces of the enemy, the destruction of the Capitol, the taking of Eastport, Castine, and Belfast, and the apprehension of an immediate invasion, that he would order a large detachment from said division for the defence of the town and harbor of Portland, orders that one thousand two hundred and fifty-three men, including officers, be detached from the infantry of the twelfth division, to remain in service until the first day of October next, unless sooner discharged.

By order of Brigadier General Alford Richardson, senior and commanding officer of the twelfth division.  
EDWARD RUSSELL, *Brigadier Major, 1st Brigade.*

At an adjournment of the meeting of the magistrates, selectmen, and committee of safety, Tuesday, September 6, 1814, it was voted that Brigadier General Irish be requested forthwith to order out the whole brigade under his command, to repair direct to Portland for its defence, and there to make the detachment of his quota of two regiments, and to remain there until relieved by other troops.

By order of the meeting.

DANIEL TUCKER, *Chairman.*

Brigadier General IRISH, *Gorham.*

PORTLAND, *September 7, 1814.*

SIR: You will, with all possible despatch, carry the within request into immediate effect.

JAMES IRISH, JR., *Brigadier General, 2d Brigade, 12th Division.*

Major FRANCIS OSGOOD.

## COMMONWEALTH OF MASSACHUSETTS.

## DIVISION ORDERS.

PORTLAND, *September 10, 1814.*

Brigadier General James Irish, jr., of the second brigade, will retain the troops of his brigade, now in Portland, until further orders.

Brigade Major Russell will transmit this order.

ALFORD RICHARDSON, *Brigadier General, commanding 12th Division.*

ADJUTANT GENERAL'S OFFICE, *Boston, September 9, 1814.*

SIR: I have received your letter dated the 7th instant. The state of your frontier, now the British forces have fallen down to Penobscot, must be not only in a state of alarm, but of danger. The orders under which you have been acting have been discretionary. They must be so still. And should a large force menace Portland, you must call on both Brigadiers Turner and McMillan, of the 13th division, for such a part of their force as you may need; they will both be prepared for the call. It is possible that one of the commander-in-chief's aides may shortly be with you. In the mean time you must exercise your discretion, and act with vigor. You will receive herewith a commission for Paymaster Lobdell.

I am, very respectfully, sir, your most obedient servant,

J. BROOKS, *Adjutant General.*

To Major General ALFORD RICHARDSON.

ADJUTANT GENERAL'S OFFICE, *Boston, September 9, 1814.*

SIR: As an attack on some part of the sea-coast of the 12th division may soon be expected that may require more force than the militia of that division can furnish, Major General Richardson has been directed to apply to you for such a part of your brigade as he may need as a reinforcement. It is the order, therefore, of his excellency, the commander-in-chief that, in the event of a requisition from Major General Richardson, you forthwith comply with the same, and cause the troops ordered out to march with all possible despatch to the place he shall point out.

I am, very respectfully, sir, your obedient servant,

J BROOKS, *Adjutant General.*

Brigadier General JOHN TURNER.

P. S. I have sent an order to General McMillan to the same effect as this, with this difference, that it is to march to the aid of the 6th division.

HEADQUARTERS 12TH DIVISION MASSACHUSETTS MILITIA, *Portland, September 11, 1814.*

SIR: By a letter received this morning from the adjutant general I am directed to call on you and Brigadier General McMillan for such part of your force as I may need should a large force menace Portland. The British have left Penobscot with most of their force, and have been, as I understand, reinforced. This town is in danger of being attacked every hour. The services of the troops of your brigade, as well as the whole of the 13th division, may be wanted as soon as they can possibly arrive here. You will, therefore, be pleased to have your troops on the march to this town as soon as possible.

I am, &c.,

ALFORD RICHARDSON, *Major General.*

Brigadier General JOHN TURNER.

On the 19th September, 1814, Major General Richardson issued an order for forming a detachment from the troops then assembled at Portland for the United States service, and the particulars of which will be found set forth in the statement as to militia called into service by the State executive. That detachment appears not to have been fully organized before the 25th or 26th of September, 1814, at, or previous to which time, the services of the militia assembled at Portland and not included in the detachment had ceased, with the exception of those of General Richardson and his staff, which continued till the 9th November, 1814, and those of two artillery companies, and the staff of Major Weeks, who commanded them, which terminated on the 27th October, 1814.

*At Bath, Wiscasset, &c.*

Lieutenant Samuel H. Rogers's detachment from the 22d to 5th July, 1814.

In the letter of Major General King to the State adjutant general dated the 24th June, 1814, an extract whereof is set forth in the statement relative to militia called out at an alarm at Bath and its vicinity, reference, it will be seen, is made to a detachment of forty men excepted out of an order issued on the 21st of that month for the discharge of certain militia on duty at the United States fort at the mouth of the Kennebec river, and on the opposite side of that river, and which was to be continued in service at the request of the lieutenant of the fort.

Another order appears to have been issued by General King, on the 22d June, 1814, in which he directs the discharge of all except twenty men, who were to remain in that fort. Under this order Lieutenant Rogers's detachment was made, and under another division order issued by General King on the 5th July it was then discharged.

On the 27th June, 1814, a letter appears to have been written by General King to the State adjutant general, an extract of which follows. In it more than one letter of the 23d from the State adjutant general is, it will be observed, referred to, but only one of that date is produced, and which, with slight variations, is of the same import as the general order of the 16th June, 1814, noticed at the head of this statement.

"Your letters, under date the 23d instant, are now before me. No more of the militia have been retained in service than is necessary to guard the various points and narrow passes on the river. When we were first alarmed some of the companies were ordered into the forts, which were almost destitute of men, presuming they would be more useful there than in any other situation. But as I had no instructions that would authorize me to place them under the command of any officer of the United States, they were, therefore, when in these forts, under the command of their own officers. It is so manifestly improper that in the same fort there should be officers acting independently of each other, that, unless it is the intention of the government of the United States immediately to place the necessary number of men in the forts at Georgetown, Edgecomb, and Damariscotta, the most acceptable service they can render the people on these rivers is to withdraw what troops they have, as interested individuals could do more voluntarily than there is now done by the United States, and these persons would act at least in concert with the militia." In the reply of the State adjutant general to this letter, dated July 1, 1814, General King was instructed as follows: "In relation to any posts occupied by the United States troops as forts I am instructed by the commander-in-chief to observe to you that should application for aid in case of danger from the approach of an enemy be made to you by the officers commanding them, from an authority derived from the President of the United States, you forthwith furnish the number of men required. It will not be expected, however, that an officer of the militia of superior grade to the United States officer commanding at any such post should be assigned to that service. The idea of two independent commands at one military station is absurd. Among officers of the same grade precedence to the national commission will be expected, but beyond this I presume the United States government would never exact a concession. In furnishing men to reinforce and defend a fort commanded, for example, by a captain of the United States army, no officer of the militia above that grade should be detailed for that duty. Between General Cushing and myself two opinions on this subject did not exist, and all arrangements contemplated by us were intended to comport with this principle."

Captain Joseph Duston's company, from June 27 to July 11, 1814.

Captain Joseph Duston's company, from July 9 to July 27, 1814.

Captain William Torrey's company, from July 25 to August 6, 1814.

By a division order, issued by Major General William King on the 24th June, 1814, Brigadier General McCobb was required to detach from his brigade one full company of infantry, for the defence of the town of Bath and the vicinity, to be stationed at such place or places as he might think best, and to be continued in service until the pleasure of the commander-in-chief should be known. Under this order, and brigade and regimental orders issued pursuant thereto, the first-mentioned company, commanded by Captain Duston, entered on duty. On the 2d July he issued another division order, wherein, after mentioning that the detachment then on duty had been ordered to be furnished at less notice than would have been convenient to the soldiers, direction is given for discharging them, except the commissioned officers, after having served fifteen days, and also for General McCobb's ordering out another detachment of the same number of non-commissioned officers and privates, to take the place of those to be discharged.

Agreeably to this order, and to brigade and regimental orders issued in consequence thereof, the second company under Captain Duston's command was detached, and, having entered on service, the first company was, by a brigade order issued on the 11th July, then discharged. General McCobb, by another division order of the 18th July, was directed to detach a full company, with the requisite number of officers, to relieve the detachment then out, which was to be discharged after having performed fifteen days' service, or as soon after as the detachment then ordered should be on duty. Conformably to this order, and to brigade and regimental orders issued in compliance therewith, the company of Captain Torrey was detached; and on the 27th July (it having previously entered on duty) the second company of Captain Duston was, by a brigade order then issued, discharged.

On the 8th July, 1814, a requisition appears to have been made upon Governor Strong by Major General Dearborn for certain militia detachments, to be placed at different posts on the sea-shore of the State, and to remain in the service of the United States for three months. This requisition was complied with, and the detachments were paid and supplied by the United States. Their services appear to have commenced early in August; and, by a division order of Major General King, dated on the 2d of that month, Brigadier General McCobb was required to order the portion thereof from his brigade to proceed to the garrison of Phippsburg, and there observe such orders as might be received from General Dearborn,

and to discharge the militia then on duty in the State service on the 5th August, when a brigade order for discharging Captain Torrey's company appears to have been issued, and on the following day it was discharged.

As to the circumstances occasioning the call of the companies of Captains Duston and Torrey into service, it appears that a requisition or petition, signed by the selectmen of the town of Bath, nine justices of the peace and twelve other persons, was presented to General King, of which the following is a copy:

"BATH, June 24, 1814.

"At a meeting of the selectmen of the town of Bath, in the county of Lincoln, and the magistrates of said county residing in said town, and other inhabitants, voted unanimously that, in the present alarming situation, arising from the depredations of the enemy on our coast and in our vicinity, we request and petition Major General King immediately to detach for actual service two full companies of militia for the defence of this town and vicinity, to be continued in service till discharged by the commander-in-chief. We are induced more particularly to urge this request from information recently received from the enemy, which cannot be doubted, of their intention to attack this place."

It appears also that General King, in a letter to the State adjutant general, dated at Bath on the 24th of June, 1814, after detailing various calls into service of the militia of his division, and the measures he had pursued as to their discharge, expressed himself as follows:

"I also enclose the copy of a petition handed me this morning, from which I am to infer that there has been, in the opinion of the magistrates, a larger number of troops discharged than the safety of this place will justify. It was quite an object with me to lessen the expense as much as possible. In order to discharge the troops at Wiscasset and Damariscotta, I considered it necessary to discharge those first that were ordered out here. As there has been one company kept in service at Damariscotta and three at Wiscasset, I am inclined to think that I shall order out at least one company at this place, until the pleasure of the commander-in-chief is known, which I hope to be advised of by return mail, as also his opinion in relation to the other companies now out."

The reply to this letter and to another letter of General King's is dated July 1, 1814, and the following is an extract therefrom:

"I have to acknowledge the receipt of your several letters dated the 24th and 27th ultimo, and have great satisfaction in expressing to you the approbation of his excellency the commander-in-chief as to the arrangements you have made and the measures you are pursuing for the safety of the navigation, &c., on the seaboard of your division. The value of property at stake is great, and the commander-in-chief wishes and expects the means of protection, when within your control, to be commensurate to the object, whatever expenses may be incurred.

"The care you have taken personally to visit the most important and exposed parts of your division, and to regulate the number of men to be held in service, and the promptitude with which the men have turned out on the late alarming occurrences, are subjects highly satisfactory to the commander-in-chief."

Captain Aaron Potter's company, from July 2 to July 31, 1814.

Captain James Yeates's company, from June 28 to July 28, 1814.

Lieutenant Samuel Johnson's detachment, from July 4 to July 10, 1814.

Captain William M. Reed's company, from July 6 to July 10, 1814.

In elucidation of the services of these last mentioned three companies and detachment, the following information has been collected from the documents; the extracts are from letters of Major General King to the State adjutant general.

*Letter dated June 24, 1814.*

"In order that I should be enabled to make up an opinion understandingly in relation to the number of men that should be retained in service at and near Wiscasset, I sent for Captain Perry, then commanding officer of the fort, and requested him to state to me what number of men he considered necessary to defend his fort in case of an attack. His answer was, 'one hundred at least.' To the question 'how many men have you in the fort?' he answered 'eight.' Captain Perry was informed if he desired more, and would make the request, he should have them. His answer was that he had no instructions to make any such request. I consider it necessary to state these facts, to show that we are not only *not defended by the United States, but that there is no disposition to do it.*"

*Letter dated June 27, 1814.*

"There is now on these rivers more than 40,000 tons of shipping. The owners have commenced moving their vessels up the rivers; when this is effected, the number of the militia out can be reduced. But the least number that now will satisfy the people is one company for the various passes on the Kennebeck, one on the Damariscotta, Bristol, and Boothbay, and one at Wiscasset, and on the Sheepscot. To the latter place the force will be so much less than is expected, that in my order to General Payson I shall permit him to exercise a discretion to let two companies remain until I obtain an answer to my letter of the 24th instant, provided he should think absolutely necessary—as there is no other place where there is any number of vessels, so there is no other within my division where I think there is much danger."

On the day of the date of the last mentioned letter, a division order appears to have been issued by General King, directing Brigadier General Payson to detach from his brigade two companies, to serve as guards or patrols principally by night, to prevent surprise at the points most exposed in the Sheepscot and Damariscotta rivers, and the towns of Bristol and Boothbay for 30 days, unless sooner discharged. This was followed by a brigade order, requiring Lieutenant Colonel Cutter to detach one company, and Lieutenant Colonel Day another; and agreeably thereto the company of Captain Potter was detached by Lieutenant Colonel Cutter, and that of Captain Yates by Lieutenant Colonel Day. On the 2d July, General King issued a division order directing the company of Captain Potter, then on duty at Wiscasset, to proceed immediately to Boothbay; Captain Reed to select from the troops at Boothbay a company with a complement of officers, for a term not exceeding 30 days; and General Payson to order out not exceeding

45 men, under a lieutenant and ensign, to do the duty of guards at Wiscasset and on the Sheepscot river that was to have been performed by Captain Potter; and to discharge this detachment as soon as Captain Potter could do the duty intended for him. Conformably to this order, the company of Captain Reed and the detachment of Lieutenant Johnson entered on duty.

*Letter dated July 4, 1814.*

"Having been absent for several days at and near Boothbay, making the necessary arrangements for the defence of that place, is the reason for not having communicated to you the situation of the enemy for a few days past.

"The only ship now lying in our waters is the Tenedos; she has been at anchor in Boothbay harbor now a week. The barges of this ship have been out every day, and have been constantly attempting a landing either at Boothbay, Damariscotta, or Bristol, where they have in every instance been beat off; in some instances with considerable loss to themselves; with no other loss, however, on our part, than one man killed from Captain Reed's company at Boothbay, on the 2d instant. Having examined some men who had been on board the frigate and reported themselves to have been taken, as to the questions asked them by the officers of the frigate, I am convinced it is their intention to make Boothbay harbor, which is one of the best in this district for their purpose, their place of rendezvous. As this harbor is equally distant from Damariscotta, Wiscasset, and Bath, by the back river, in the event of their being permitted to have the least communication with the shore, or the fishermen in the bay, which is their object, they would every day get from them the most correct information as relates to the state of preparation at the above places. This must either be submitted to, or there must be at least two companies out at Boothbay. The latter I have considered the most correct course to be pursued, and have, at the request of the selectmen and magistrates, ordered a company, in addition to one company from Boothbay, to that post, as long as the frigate or any other ship of that size remains there, or until the pleasure of the commander-in-chief shall be made known to me, which I hope to be advised of by return of mail." "The place of the company ordered to Boothbay is now supplied from the militia near the posts, for a few days, presuming that it will not be necessary for the detached company ordered to Boothbay to remain there but a short time, when they will do the duty intended for them."

*Letter dated July 8, 1814.*

"I acknowledge, with great pleasure, the receipt of your letter under date the 5th instant. To defend the people on the seaboard of my division from the depredations of the enemy, and to do this in a way that would be likely to meet the approbation of the commander-in-chief, has been my object. It is, therefore, with great satisfaction I receive the information that the measures I have pursued are approved by his excellency. Since my letter of the 4th, the Tenedos has left the harbor of Boothbay; and no other vessel appearing there to take her place, Reed's company has been discharged. Potter's company, detached to do duty as guards on the Sheepscot and at Boothbay, has been ordered on that service; and the forty men which took the place of Potter's company on the Sheepscot have been discharged."

Of the letter referred to of the 5th July, from the State adjutant general to General King, no copy is furnished.

A few days after the discharge of the companies of Captains Potter and Yeates, the militia called out on the requisition of Major General Dearborn, and which, as has been previously noticed, were received into the service of, and were paid and supplied by the United States, entered on duty; and so many of them as were furnished from Brigadier General Payson's brigade were by General King's division order, of the 2d August, directed to be marched to the garrison at Edgcombe, St. George, and Damariscotta, and there to observe such orders as might be received from General Dearborn.

*At Wiscasset and several other towns between the Sheepscot and Penobscot rivers.*

Captain David Grafton's company, from the 3d to the 8th September, 1814.

Captain John W. Lindley's company, from the 3d to the 9th September, 1814.

Captain Simeon Parker's company, from the 3d to the 10th September, 1814.

Captain George Clouse's company, from the 4th to the 10th September, 1814.

Captain Philip Keisar's company, from the 4th to the 10th September, 1814.

Captain Charles Miller's company, from the 4th to the 10th September, 1814.

Captain Moses Robinson's company, from the 4th to the 9th September, 1814.

Captain Jonathan Fuller's company, from the 5th to the 8th September, 1814.

Captain Lemuel Andrews' company, from the 5th to the 8th September, 1814.

Lieutenant Colonel Samuel Thatcher's field and staff, from the 3d to the 10th September, 1814.

Orders, of which the following are copies, appear to have been issued for calling out Colonel Thatcher's regiment :

#### BRIGADE ORDERS.

2D BRIGADE, 11TH DIVISION, *September 2, 1814.*

The enemy having occupied Castine and Belfast, the commanding officer of the brigade considers the time as now arrived when it becomes the indispensable duty of the militia to fly to arms. Lieutenant

Colonel Thatcher of the third regiment will order his whole regiment immediately to assemble near John Gleason's tavern, in Thomaston. The troops must all be well equipped for actual service and with three days' provision, himself, his field officers and staff, and will meet the commanding officer of the brigade there as soon as possible.

DAVID PAYSON, *Brigadier General 2d Brigade, 11th Division.*

REGIMENTAL ORDERS.

SEPTEMBER 3, 1814.

All the officers, non-commissioned officers, and privates of the 3d regiment, 2d brigade, and 11th division, will immediately obey the above order and assemble at the place above-mentioned, armed and equipped according to the above order, and also with three days' provision.

SAMUEL THATCHER, *Lieut. Col. 3d Regiment, 2d Brigade, 11th Division.*

JESSE PAGE, *Adjutant.*

Captain John Haskell's company, from the 5th to the 9th September, 1814.

This company belonged to Major Ebenezer Thatcher's regiment of artillery, and to have been, by a regimental order issued by him on the 3d September, 1814, pursuant, as therein expressed, to brigade orders of the same date, called into service to do duty with the regiment of Lieutenant Colonel Samuel Thatcher.

Captain Elkanah Spear's company, from the 3d to the 9th September, 1814.

Captain George Coomb's company, from the 3d to the 9th September, 1814.

Captain Calvin Curtis's company, from the 3d to the 12th September, 1814.

Captain Samuel Tolman's company, from the 3d to the 10th September, 1814.

Captain Thomas Kinney's company, from the 3d to the 9th September, 1814.

Captain Asher Palmer's company, from the 3d to the 10th September, 1814.

Captain Noyes Payson's company, from the 3d to the 9th September, 1814.

Captain James Weed's company, from the 3d to the 9th September, 1814.

Lieutenant Colonel Erastus Foote's field and staff, from the 2d to the 9th September, 1814.

The assembling of this regiment near Camden harbor, in Camden, appears to have been directed by a brigade order issued by Brigadier General Payson, similar in form and of the same date as that before set forth relative to the regiment of Lieutenant Colonel Thatcher.

Captain Gideon Barton's company, from the 3d to the 20th September, 1814.

Captain Moses Burley's company, from the 3d to the 20th September, 1814.

Captain Job Lord's company, from the 3d to the 20th September, 1814.

Captain James Daggett's company, from the 3d to the 20th September, 1814.

Captain John M. Sinclear's company, from the 3d to the 20th September, 1814.

Captain Robert Thompson's company, from the 3d to the 20th September, 1814.

Captain James Wallace's company, from the 3d to the 20th September, 1814.

Lieutenant Colonel John Comings's field and staff, from the 3d to the 20th September, 1814.

The militia of this regiment is stated at the head of the rolls to have been called out by a regimental order of Lieutenant Colonel Comings, dated 3d September, 1814, and of which no copy is furnished. It does not appear that any order for calling out this regiment was issued by Brigadier General Payson.

Captain John Erskine's company, from the 6th to the 12th September, 1814.

Captain Benjamin Goodwin's company, from the 6th to the 12th September, 1814.

Captain Joseph Johnson's company, from the 6th to the 12th September, 1814.

Captain Samuel Johnson's company, from the 6th to the 12th September, 1814.

Captain Robert McLean's company, from the 6th to the 12th September, 1814.

Captain Aaron Potter's company, from the 6th to the 12th September, 1814.

The foregoing six companies constituted one of the battalions of the regiment commanded by Lieutenant Colonel E. Cutter.

Captain John Glidden's company, from the 7th to the 12th September, 1814.

Captain Richard Hiscock's company, from the 7th to the 12th of September, 1814.

Captain James Robinson's company, from the 7th to the 12th of September, 1814.

Captain John Winslow's company, from the 7th to the 12th September, 1814.

Captain James Yeates's company, from the 7th to the 12th September, 1814.

The foregoing five companies formed one of the battalions of a regiment under command of Lieutenant Colonel Robert Day.

Lieutenant Colonel Robert Day's field and staff, from the 6th to the 12th September, 1814.

Colonel Day commanded the two next preceding battalions:

Captain David Boynton's company, from the 11th to the 23d September, 1814.

Captain Benjamin Flint's company, from the 10th to the 23d September, 1814.

Captain John Glidden's company, from the 13th to the 23d September, 1814.

Captain Richard Hiscock's company, from the 13th to the 23d September, 1814.

Captain J. Robinson's company, from the 13th to the 23d September, 1814.

Captain A. Richardson's company, from the 10th to the 23d September, 1814.

Captain John Sproul's company, from the 10th to the 15th September, 1814.

Captain J. Winslow's company, from the 13th to the 23d September, 1814.

Captain James Yeates's company, from the 13th to the 24th September, 1814.

Lieutenant Colonel Robert Day's field and staff, from the 13th to the 23d September, 1814.

Captain David R. Adams's company, from the 10th to the 28th September, 1814.

Captain John Erskine's company, from the 13th to the 28th September, 1814.

Captain Benjamin Goodwin's company, from the 13th to the 28th September, 1814.

Captain James Hunnewell's company, from the 10th to the 28th September, 1814.

Captain Joseph Johnson's company, from the 13th to the 28th September, 1814.  
 Captain Samuel Johnson's company, from the 13th to the 28th September, 1814.  
 Captain Robert McLean's company, from the 13th to the 28th September, 1814.  
 Captain Aaron Potter's company, from the 13th to the 28th September, 1814.  
 Captain William M. Reed's company, from the 10th to the 28th September, 1814.  
 Captain Samuel Tarbox's company, from the 10th to the 28th September, 1814.  
 Captain Samuel G. Wilson's company, from the 10th to the 28th September, 1814.  
 Captain Henry Whitney's company, from the 10th to the 28th September, 1814.  
 Lieutenant Colonel E. Cutter's field and staff, from the 10th to the 28th September, 1814.  
 Lieutenant Colonel Cutter commanded the next foregoing twelve companies.  
 Lieutenant William McCobb's detachment of artillery, from the 12th to the 28th September, 1814.  
 Captain Nathaniel Morse's company, from the 10th to the 28th September, 1814.  
 Captain Marius Howe's company, from the 10th to the 29th September, 1814.  
 Lieutenant Colonel Eben Thatcher's field and staff, from the 10th to the 29th September, 1814.  
 Lieutenant Colonel Thatcher commanded the next preceding three companies or detachments.  
 Captain John Chism's company of cavalry, for the 5th and 6th September, 1814.  
 Captain Isaac Bernard's company of cavalry, from the 5th to the 9th September, 1814.  
 Captain John Chism's company of cavalry, from the 10th to the 24th September, 1814.  
 Major Thomas McCrate and staff, from the 5th September to 5th October, 1814.  
 Major McCrate commanded these companies of cavalry.  
 Brigadier General David Payson and his staff, from the 4th to the 28th September, 1814.  
 General Payson commanded the five regiments of infantry and the detachments of artillery and cavalry last hereinbefore specified.

For calling out, &c., and discharging the militia of Brigadier General Payson's brigade, in service in September, 1814, as hereinbefore specified, division orders appear to have been issued by Major General William King, as follows, viz.:

*September 5.*—Directing Brigadier General Payson to order out, without delay, the regiment of Colonel Thatcher to rendezvous at Warren; the regiment of Colonel Foote to rendezvous at Camden; one battalion of Colonel Day's regiment, and one battalion of Colonel Cutter's regiment, to rendezvous at Nobleborough, to be commanded by Colonel Day, and to be marched to Union; the artillery company of Captain Haskell to rendezvous at Thomaston; and the cavalry of Major McCrate to rendezvous at Wiscasset and Thomaston; one of the companies to proceed to Union, and the Major to consider himself on duty at Wiscasset. Also directing that the regiment of Colonel Comings, then out, as therein expressed, should remain near Belfast.

*September 6.*—Directing the discharge of Captain Chism's company of cavalry.

*September 7.*—Directing the discharge of the regiments of Colonels Thatcher and Foote (with the exception of one company, which Colonel Foote was to detach from his regiment to do duty at Camden) as soon as, in their opinion, the safety of Camden and its vicinity would permit, each determining in relation to his own regiment.

*September 9.*—Directing Brigadier General Payson to call out the remaining battalions of the regiments of Colonels Cutter and Day, with the artillery and light infantry attached thereto; and, when out, those officers to command their respective troops; and which, with the exception of one company at Bristol and another at Boothbay, were to rendezvous at Wiscasset.

*September 19.*—Directing the discharge of Lieutenant Colonel Coming's regiment.

*September 27.*—Directing Brigadier General Payson to detach four companies for fifteen days' duty on Squam island, and three more companies for forty days' service at other places; granting permission to Captain Reed to raise a company for forty days' service at Boothbay; requiring Major McCrate to continue in service twenty-six cavalry for vidette duty, under his direction, and Colonel Thatcher to discharge the artillery under his command; and declaring that no other troops than those designated in this order were to consider themselves in State service.

*At Bath and its vicinity.*

Captain Benjamin Davenport's company, from the 5th to the 9th of September, 1814.

Captain John Pettes's company, from the 5th to the 9th of September, 1814.

Captain Thomas Motherwell's company, from the 5th to the 9th of September, 1814.

Adjutant Z. Hyde and Quartermaster Charles Clapp, from the 5th to the 9th of September, 1814.

By a division order, issued by Major General King on the 5th of September, Brigadier General McCobb was required to detach from his brigade three companies, to rendezvous at Bath without delay; and by a brigade order of the same date, issued, as therein expressed, in obedience to that division order, the companies of Captains Davenport, Pettes, and Motherwell were directed so to rendezvous. The adjutant and quartermaster do not appear to have been called into service by either division, brigade or regimental order.

Lieutenant J. C. Whitmore's detachment, from the 6th to the 10th of September, 1814.

Captain William Hubster's company, from the 7th to the 12th of September, 1814.

Lieutenant Robert Hunter's detachment, from the 7th to the 11th of September, 1814.

As is previously shown, a division order was issued by Major General King on the 5th of September,

1814, requiring Brigadier General McCobb to detach three companies, to rendezvous at Bath without delay; and pursuant whereto, a brigade order was issued on the same day, and under which three companies, commanded by Captains Davenport, Pettes, and Motherwell, forthwith entered on and remained in service till the 9th. Another brigade order appears to have been, on the 5th of September, issued by Brigadier General McCobb, and professedly in obedience to the same division order, requiring Colonels Thomas and Reed each to detach one company from his regiment, to rendezvous at Bath without delay; and Lieutenant Colonel Merrill to detach a subaltern and all the rank and file of Captain Roger's company, to rendezvous in like manner; and under this latter brigade order, and regimental orders issued in conformity therewith, the three companies or detachments last specified entered on duty, thus putting into service six companies or detachments instead of three, as called for by Major General King.

Captain J. Williams's company, from the 11th of September to the 1st of October, 1814.

Captain T. Motherwell's company, from the 10th of September to the 1st of October, 1814.

Captain F. D. A. Foster's company, from the 10th of September to the 1st of October, 1814.

Captain John Pettes's company, from the 10th of September to the 1st of October, 1814.

Captain William Torrey's company, from the 10th of September to the 1st of October, 1814.

Captain Jeremiah Fisher's company, from the 10th of September to the 1st of October, 1814.

Captain B. Davenport's company, from the 10th of September to the 1st of October, 1814.

Captain Ellis Parcy's company, from the 10th of September to the 1st of October, 1814.

Captain R. Heagan's company, from the 10th of September to the 1st of October, 1814.

Lieutenant Colonel Andrew Reed's field and staff, from the 10th of September to the 1st of October, 1814.

Colonel Reed commanded the next preceding nine companies.

Captain R. D. Dunning's company, from the 9th to the 29th of September, 1814.

Captain Joseph Duston's company, from the 10th to the 29th of September, 1814.

Captain Peter Jordan's company, from the 10th to the 29th of September, 1814.

Captain R. T. Dunlap's company, from the 10th to the 29th of September, 1814.

Captain S. Snow's, company, from the 10th to the 29th of September, 1814.

Captain David Johnson's company, from the 10th to the 29th of September, 1814.

Captain E. Warren's company, from the 10th to the 29th of September, 1814.

Captain William Webster's company, from the 13th to the 29th of September, 1814.

Lieutenant Colonel C. Thomas's field and staff, from the 10th to the 29th of September, 1814.

Colonel Thomas commanded the next preceding eight companies.

Lieutenant Robert Hunter's company, from the 12th to the 28th of September, 1814.

Captain Nat. McLellan's company, from the 10th to the 28th of September, 1814.

Captain Samuel True's company, from the 10th to the 28th of September, 1814.

Captain Aaron Dwinal's company, from the 10th to the 28th of September, 1814.

Captain Peter Whitney's company, from the 10th to the 28th of September, 1814.

Captain Hugh Gatchell's company, from the 10th to the 28th of September, 1814.

Captain David Hayne's company, from the 10th to the 28th of September, 1814.

Captain George F. Patten's company, from the 10th to the 28th of September, 1814.

Captain Henry Snow's company, from the 10th to the 28th of September, 1814.

Captain Ebenezer Hatch's company, from the 10th to the 28th of September, 1814.

Captain John White's company, from the 10th to the 28th of September, 1814.

Lieutenant Nat. Sandford's company, from the 10th to the 28th of September, 1814.

Lieutenant Colonel Abel Merrill's field and staff, from the 10th to the 28th of September, 1814.

Colonel Merrill commanded the next preceding twelve companies.

Captain Peter O. Alden's company, from the 10th to the 29th of September, 1814.

Captain Nathaniel Sprague's company, from the 10th to the 29th of September, 1814.

Captain Nathaniel Walker's company, from the 10th to the 29th of September, 1814.

Lieutenant Samuel Noble's detachment, from the 10th of September to the 1st of October, 1814.

Major Daniel Holden and staff, from the 10th to the 29th of September, 1814.

Major Holden commanded the next preceding four companies or detachments.

Captain Abel Boynton's company of cavalry, from the 6th to the 29th of September, 1814.

Captain Samuel Jack's company of cavalry, from the 6th to the 29th of September, 1814.

Major Benjamin Ames and his adjutant, from the 5th to the 30th of September 1814.

Major Ames commanded the next preceding two companies.

Brigadier General Denny McCobb and his staff, from the 10th of September to the 1st of October, 1814.

General McCobb commanded Colonels Reed's and Thomas's regiments of infantry, and Majors Holden's and Ames's battalions of artillery and cavalry.

The militia of General McCobb's brigade, in service in September, 1814, as before specified, appear to have been called out pursuant to division orders, issued by Major General King, as follows, viz: three companies under an order issued on the 5th of September, requiring them to rendezvous at Bath without delay; and the residue of the brigade under an order issued on the 10th of that month, directing that the same should report at Bath forthwith; and for discharging the militia of this brigade, division orders appear to have been issued by Major General King, on the 27th, 28th, and 30th of September, 1814.

Major General William King and staff, from the 5th to the 30th September, 1814.

 Major Chandler commanded the next preceding four companies.  
 Brigadier General William Gould and his staff, from the 12th to the 28th of September, 1814.  
 General Gould commanded the next preceding five regiments of infantry, and the last mentioned battalion of artillery.  
 Captain Stephen Lovejoy's company, from the 13th to the 24th of September, 1814.  
 Captain Richard Smith's company, from the 13th to the 24th of September, 1814.  
 Captain Joseph Sylvester's company, from the 14th to the 25th of September, 1814.  
 Captain Levi Barrett's company, from the 13th to the 26th of September, 1814.  
 Captain Joseph Hitching's company, from the 14th to the 25th of September, 1814.  
 Captain Stephen Morrill's company, from the 13th to the 26th of September, 1814.  
 Captain Amasa Lessley's company, from the 13th to the 25th of September, 1814.  
 Captain William Pullen's company, from 14th to 25th September, 1814.  
 Captain James Minott's company, from 14th to 25th September, 1814.  
 Sergeant Ansel Tobey's company, from 13th to 26th September, 1814.  
 Lieutenant Colonel Elnathan Sherwin's field and staff, from 14th to 25th September, 1814.  
 Colonel Sherwin commanded the next preceding ten companies.

Captain John Greenleaf's company, from the 13th to the 26th September, 1814.  
 Captain Elias Work's company, from the 14th to the 26th September, 1814.  
 Captain George Gray's company, from 13th to 26th September, 1814.  
 Captain Joseph Patton's company, from 14th to 25th September, 1814.  
 Captain Daniel Flander's company, from 14th to 25th September, 1814  
 Captain Nathaniel Russell's company, from 14th to 25th September, 1814.  
 Captain Daniel Beedy's company, from 13th to 26th September, 1814.  
 Captain Isaac Holt's company, from 14th to 25th September, 1814.  
 Lieutenant Colonel James Waugh's field and staff, from 14th to 25th September, 1814.  
 Colonel Waugh commanded the next preceding eight companies.  
 Captain John Moore's company, from 12th September to 1st October, 1814.  
 Captain Trial Hall's company, from 12th September to 1st October, 1814.  
 Captain Joseph Wing's company, from 13th to 30th September, 1814.  
 Captain Robert Fletcher's company, from 12th to 30th September, 1814.  
 Captain Daniel Wyman's company, from 12th to 30th September, 1814.  
 Captain Daniel Crowell's company, from 12th to 30th September, 1814.  
 Captain Jeremiah Farwell's company, from 12th to 29th September, 1814.  
 Captain James L. Child's company, from 12th September to 1st October, 1814.  
 Captain Benjamin Robinson's company, from 12th to 30th September, 1814.  
 Captain Joel Wellington's company, from 12th September to 1st October, 1814  
 Lieutenant Benjamin I. Rackliff's company, from 12th September to 1st October, 1814.  
 Lieutenant Colonel Herbert Moore's field and staff, from 12th September to 1st October, 1814.  
 Colonel Moore commanded the next preceding eleven companies.  
 Brigadier General William Kendall and his staff, from the 14th to the 25th September, 1814.  
 General Kendall commanded the next preceding three regiments.  
 Major General Henry Sewall and his staff, from the 14th to the 28th September, 1814.  
 General Sewall commanded the next preceding eight regiments of infantry and battalion of artillery.  
 Captain Thomas Eastman's company of cavalry, from 11th September to 6th November, 1814.

Major General Sewall, by a division order issued on the 11th September, 1814, directed that the regiments commanded by Lieutenant Colonels Stone and Sweet, and Captain Ladd's company of artillery, should march immediately for Wiscasset; that the regiments commanded by Lieutenant Colonels Blasdel and McGaffey should, on the 13th September, march to Hallowell; that the regiment of Lieutenant Colonel Moore should, on the same day, march to Pittston; that the company of artillery at Waterville should then march to Augusta; that Captain Eastman's company of cavalry should march to Augusta, to be ready to act as expresses, as occasion might require; that Brigadier General Kendall should order two of his nearest regiments (being those of Lieutenant Colonels Sherwin and Waugh) to march on the 14th September for Hallowell; and that Brigadier General Gould should order the remaining regiment of his brigade (being Lieutenant Colonel Fairbank's) and the artillery of Monmouth, to march on the same day for Gardiner.

According to the rolls, the services of the regiments of Lieutenant Colonels Stone and Sweet, and of the artillery companies of Captains Ladd and Ranlet, were performed at Wiscasset, and those of Lieutenant Colonel Moore's regiment partly there and partly at Edgecomb; the other five regiments, the remaining artillery companies, and the company of cavalry, do not appear to have been marched to the sea-coast, but to have been kept on duty in the interior, at towns varying in distance from 20 to 60 miles from Wiscasset.

Aggregate expenditure on account of the foregoing detachments at Wiscasset, &c. . . . .	\$44, 089 77
Deduct payments for clothing . . . . .	\$4, 542 81

From the documentary evidence adduced, the information contained in the following copies, extracts, and observations has been collected, as elucidatory of the circumstances under which the before-mentioned militia of the divisions of Major Generals King and Sewall, in service in September, 1814, were called out, stationed, and discharged, &c.:

WISCASSET, *August 31, 1814.*

SIR: I have just received information, by express from Camden, that a large fleet was entering the Penobscot river, supposed to attack Castine and other places on the Penobscot river; and they will, it is probable, next bend their course this way. I have not received the particulars, except that the number of ships is stated by my informant to be sixteen; other accounts say twenty sail. Please to inform Major General King, who is now in Boston, of the above news. I shall immediately set out for Camden, and do what we can to prevent the enemy from committing any depredations within my brigade.

In haste, your obedient servant,

DAVID PAYSON.

Hon. J. Brooks.

BATH, *September 2, 1814.*

DEAR SIR: An express arrived here last evening, bringing information of an attack upon Castine, by a pretty formidable force of the enemy, consisting of ten or twelve frigates and smaller vessels, accompanied by six or eight transports; the number of troops the latter contained not precisely ascertained.

It is, however, understood that the place surrendered after the slight resistance a very inferior force was enabled to make; and it is said that several of the vessels were afterwards seen standing in a direction of Camden and Belfast. In the absence of General King, I conceive it my duty to communicate the above information, with the least possible delay, to you.

I have the honor to be, very respectfully, dear sir, your obedient servant,  
 JOS. F. WINGATE, *Aide-de-Camp*, 11th Division.

Hon. JOHN BROOKS, *Adjutant General*.

BATH, *September 5, 1814.*

SIR: I obtained the information of the enemy's landing at Castine and Belfast on my way to this place. I find the people here expect something done for their further defence. I shall order out, from General Cobb's brigade, three companies, to do duty on the Kennebec until the pleasure of the commander-in-chief is known, or until I obtain more correct information in relation to the views of the enemy. I shall leave for Wiscasset this day; and, as I am at present advised, shall order to that place three companies also, and one company at Damariscotta. I shall proceed on immediately to Camden, and there make such arrangement for the defence of what may be now considered a part of our eastern frontier as on inquiry may be necessary. As General Blake will be much engaged on the Penobscot river, I shall have such a force near Belfast as will be able to drive the enemy from that place in a few days, and hope to have some advice on this as well as the other movements by return of mail. I shall write you again from Camden; and in the meantime remain, respectfully, your obedient servant,

W. KING.

General Brooks.

BELFAST, *September 8, 1814.*

SIR: Since my letter of the 5th instant, I proceeded to Wiscasset. Learning that the British were fortifying Belfast, I immediately ordered out Colonels Comings's and Thatcher's regiments, and a battalion each from Day's and Cutter's regiments, to take up their line of march without delay from this place. When I arrived at Warren, on the 6th, I received information from Belfast that the enemy were leaving that place, and had taken the west passage on their way to Camden. Colonel Foote's regiment was out. I ordered Thatcher's to that place, where I left them on the 7th, in the morning, with orders for their discharge as soon as the vessels left Clam Cove, which were then there at anchor. The vessels which left Belfast, with three others from Castine, passed Camden on the 6th at night, and early in the morning of the 7th, in all ten sail, in sight of the regiments of Thatcher and Foote. Believing that there — not be an attack made upon Camden, and as Comings's regiment was within a few miles of Belfast, I ordered him to that place, where I met him on the afternoon of the 7th. I also met at Belfast a regiment commanded by Colonel Ulmer, who requested me, in the absence of the major general of the 10th division, and being also deprived of the services of the general of brigade, (Blake,) to direct the movements of his regiment, which I have consented to, until the pleasure of the commander-in-chief shall be made known to me. I shall recommend to the officers commanding regiments within General Blake's brigade a compliance with the general orders of July, 1812, and shall endeavor to get such a force together as will prevent the enemy from taking down the Penobscot the vessels, all of which they consider as prizes. I have sent an express to General Sewall, advising him of the situation of things on the Penobscot, and have named to him that two or three of his regiments, if immediately ordered to the Penobscot, to strike the river at Bangor, would be of great service at the present moment, particularly if commanded by himself in person. I am sensible of the very great responsibility which I take upon myself, in the first place, in leaving the district of my local command at a time when an attack may soon be expected, and also in consenting to organize and command troops with whom I am unacquainted, and who are very far from being well equipped. As no effective movement can be made with the troops now under my command until the arrival of General Sewall, or a reinforcement from his division, I shall avail myself, probably, in two or three days which may elapse, to visit Bath and Wiscasset, to put those places in the very best possible state of defence.

I have the honor to be, sir, very respectfully, your obedient servant,

WILLIAM KING, *Major General* 11th Division.

Hon. JOHN BROOKS, *Adjutant General*, Boston.

BATH, *September 11, 1814.*

SIR: Since my letter to you of the 8th instant, from Belfast, I have been at Wiscasset, and have ordered out the remaining battalions from Cutter's and Day's regiments, together with the artillery attached to them; so that two regiments are now at Wiscasset, with the exception of one company at Boothbay, and one other company at Bristol. I have ordered to Bath Thomas's, Merrill's, and Reed's regiments, and expect they will be all in this day. The expedition which the enemy have fitted out from the Penobscot consists of all the vessels and troops which were at Belfast, seven vessels which lay off Owl's Head, and which I have not been able to ascertain with correctness whether they were ships-of-war or transports. To these must be added six armed vessels which left Castine on the 9th instant, the same day the fleet left Clam Cove, (near Owl's Head,) which have been at anchor there. On the 9th, in the evening, they were off Bristol; had some barges out, and attempted a landing. They did the same on the 10th, at noon. The barges were from a ship, a gun brig, and a schooner; no other part of the fleet then in sight. Their intention is evidently to divide our force, which will be avoided as much as possible. The people on the shore of the seaboard will complain. I hope it will be without a cause, for I am confident no other place

can be an object for them in this district, with their present force, excepting Portland, Bath, or Wiscasset; and it is probable that one of these places is to be shortly attacked. Was it their intention to attack either Boston or Portsmouth, they would have taken with them their whole force, which is not the case, as they have left one 74 west of Long island, near Belfast, and two 74's and two frigates at Castine.

One battalion of Colonel Thatcher's regiment was discharged on the 8th instant, and, agreeably to my orders to Colonels Thatcher and Foote, the remainder of Thatcher's regiment was discharged on the 9th, as also one battalion of Foote's. I have not received advices of this from those officers, but they were ordered, when the fleet left the cove, immediately to discharge the troops, as above, which I presume they have done. Every preparation is making at Bath and Wiscasset for the defence of these places. Should there not be an attack within two or three days, I shall commence, by degrees, to discharge the militia. [A lengthy statement on the subject of the application to General Sewall, referred to in the last preceding letter, and on his declining to accede to the proposition there made, is here omitted, as immaterial to the present purpose.]

MONDAY MORNING.

The enemy's fleet is east of us, or in the offing. Three armed vessels only were seen on the coast from Seguin to Bristol yesterday. A letter has this morning been forwarded to me from Wiscasset from General Sewall, directed to the committee of safety of that place, of which a copy is enclosed. I am much pleased to find that General Sewall is so prompt in aiding in the defensive measures of this division. Should General Sewall consent to let three of his regiments remain on the seaboard, at and near Bath and Wiscasset, a large proportion of the troops of this division could be discharged, as they could be assembled again at a very short notice. I have not been honored with any instructions from the commander-in-chief since I left Boston. At this important crisis instructions as particular as the situation of things will permit will be quite agreeable to me. I expect to have an interview with General Sewall this afternoon—the result I shall advise you of; and have the honor to remain, respectfully, your obedient servant,

WM. KING, *Major General 11th Division.*

Hon. JOHN BROOKS, *Adjutant General, Boston.*

WISCASSET, *September 11, 1814—Sunday Morning, 8 o'clock.*

SIR: We have been informed from several quarters, and in many ways to be depended upon, that a British fleet of seven or eight sail were yesterday off the mouth of our river and approaching; other reports, which we think may be relied upon, say they were landing men near Boothbay and Damariscotta, and we have not, in our opinion, a sufficient force here to repel an attack by so formidable a force. We therefore request that you will order out two or three regiments from your division—say about 1,000 men at least—to march forthwith to this place and the neighborhood for our protection. Our present force here does not exceed one thousand men.

ABIEL WOOD,  
SAMUEL CONEY,  
SAMUEL MILLER, *Committee of Safety.*  
DAVID PAYSON, *Brigadier General.*

Major General HENRY SEWALL.

On the receipt of this application, General Sewall appears to have issued his division order, the purport of which is before set forth.

AUGUSTA, *September 12, 1814.*

SIR: Although I had advised your excellency, by letter of the 5th instant, that having put the division under my command in requisition to march on the shortest notice, I should wait your excellency's further orders, yet, by an urgent request from the committee of safety, &c., at Wiscasset, of yesterday morning, stating that a British fleet was off their harbor; that they expected an attack every hour; that the militia assembled there did not exceed a thousand; and requesting me forthwith to send 1,000 men for their relief, I was induced yesterday afternoon to order out the principal part of this division. Two regiments, with a company of artillery, were directed to march this day, and several of the companies of one of them were at Wiscasset this morning by 8 o'clock; three regiments more to-morrow, to halt at Hallowell and Gardiner; and three more on Wednesday next, unless countermanded. Whether it will be necessary to move the whole of this force to Wiscasset I cannot yet decide. No new alarm is excited at Wiscasset to-day. To facilitate the communication of intelligence, I have established a line of expresses, from the cavalry, on the roads to Wiscasset, Bath, Belfast, and Hamden.

I am, respectfully, your excellency's most obedient servant,

H. SEWALL, *Major General 8th Division.*

His Excellency Governor STRONG.

Colonel Wm. H. Sumner, (who appears to have been constituted an executive agent for providing defensive means in the district of Maine, and whose appointment and instructions will be found set forth in the statement as to militia called into service by the State executive,) in a letter dated Portland, September 15, 1814, and addressed to Adjutant General Brooks, after detailing his transactions at that place, Saco, Biddeford, &c., says: "I have given you, sir, this particular recital, (which I fear you will be tired of reading,) hoping that, if I have not acted on proper principles in this case, you will have the goodness to instruct me more particularly in the course to be pursued in the Lincoln and Kennebec divisions, which will next receive my attention, as nearly the whole of both of them are now ordered out by Generals Sewall and King, of which you are probably officially advised. I shall proceed on the same principles of reduction as I get there, unless otherwise advised; in doing which, I shall feel greater confidence if I should be informed that thus far my conduct meets the approbation of his excellency and that of the commissioners."

In a letter from Adjutant General Brooks to Colonel Sumner, dated 24th September, acknowledging the receipt of the before-mentioned letter of the 15th and other communications, Colonel Sumner was told that the same had been laid before his excellency the commander-in-chief, the council, and the board of commissioners, and produced an expression of entire approbation from each of the gentleman to whom they were presented.

Another letter from Colonel Sumner to Adjutant General Brooks, dated Wiscasset, September 19, 1814, contains as follows: "General King agreed to meet me this forenoon at General Sewall's quarters in this place. From them I learn that from General King's division there is one regiment stationed at Georgetown, engaged in building a fort, two at Bath, and three at Wiscasset. This disposition was made by General King without a knowledge of General Sewall's intent. While General King was at Bath, the committee of safety of Wiscasset wrote a pressing letter to General Sewall requesting 1,000 men. Upon consultation with his friends, he immediately marched his nearest regiments, some of the companies in which were notified in the afternoon, and the next morning at 8 o'clock were in Wiscasset, having in the meantime equipped themselves and marched a distance of 21 miles. This is the most remarkable instance of expedition I have known; but the whole country is animated with the same spirit, and march with the most zealous alacrity. The river companies having marched away, the inhabitants then became alarmed, and General Sewall not knowing the extent of the danger at Wiscasset, ordered out all the rest of his division, except one regiment, and they are now encamped on the banks of the Kennebec awaiting orders. The troops of both these divisions are supplied by the selectmen of their respective towns. We have dismissed one of General King's regiments this evening, and all agree that further reductions are necessary, which will be carried into effect immediately, and of which I shall advise you. I have some hopes, also, of getting General Chandler to supply a detachment both for this place and Bath, if they are placed in the United States service, to which there appears to be no objection."

On the 22d of September, 1814, an arrangement appears to have been made by Generals Sewall and King and Colonel Sumner, under which General Sewall was to furnish nine companies for the defence of Wiscasset and Sheepscot river, and eight companies to be stationed at Bath and Phippsburg; and General King was to furnish four companies for the towns of Bristol, Boothbay, Cushing, Camden, &c.; and it was stipulated, that until General Sewall should furnish his detachment for Wiscasset, he should retain of his troops then there a number somewhat greater than that detachment, and that General King, for the defence of the Kennebec, should retain of his troops then stationed there about the same number as was intended for its defence until General Sewall's detachment should arrive to relieve them. The entries as to these detached troops will be found in the statement as to militia called out by the State executive. It does not appear that this arrangement was intended to extend to any cavalry, nor that Colonel Sumner sanctioned the retention in service of troops of that description belonging to General Sewall's division. The cavalry company of Captain Eastman, which was called out on the 11th of September to act as expresses, was, it will be seen, kept in service until November 6, 1814, the time at about which the detached troops were discharged, and during the greater part of whose services there were cavalry of General King's division on duty as videttes.

PETER HAGNER, *Auditor.*

TREASURY DEPARTMENT, *Third Auditor's Office, January 30, 1828.*

D.

EXECUTIVE CALLS.

*A statement applicable to such items in the claim of the State of Massachusetts as relate to expenditures consequent on the calls of militia into service by the State executive; also, on the erection, by authority thereof, of works of defence; and on the purchase, by the same authority, of ordnance, arms, ammunition, accoutrements, camp equipage, and other military stores.*

*At Boston.*

Expenditures in respect of eleven different companies or detachments in service in succession, from June 12 to June 23, 1814, as night guards at Chelsea bridge, and of Captain Sullivan's company, stationed from the 13th to the 23d of the same month at the navy yard in Charlestown .....		\$781 99
Deduct for clothing .....	\$152 55	
Deduct for use of arms .....	20 07	
Deduct for excess in the price of rations beyond the United States contract price .....	28 05	
	200 57	
Admissible .....		581 42

General orders of the State executive for calling out these militia, and expressing the calls to have been made at the instance of Commodore Bainbridge, are shown to have been issued on the 12th and 13th of June; and letters, of which the following are copies, appear to have been written on the subject. In a written declaration of Captain Sullivan, he says that the guards and company were under the orders and command of the commodore.

NAVY YARD, *Charlestown, June 13, 1814.*

DEAR SIR: The force of the enemy in Boston bay justifies, in my opinion, apprehensions of an attack being made on this place, and calls for united exertions to repel it. The important public property intrusted to my charge within this establishment, might, in such an event, suffer severely, and would, in a considerable degree, expose the towns of Boston and Charlestown. I therefore hope that such measures will be directed by his excellency the governor of the Commonwealth of Massachusetts as shall guard against the threatening danger. I beg leave particularly to recommend that orders be given to the militia in this neighborhood to hold themselves in readiness to act immediately on the alarm; that a guard with two pieces of artillery be stationed every night on this side of Chelsea bridge to give the alarm, and repel the enemy if advancing by that passage; and that a lookout be kept on the heights beyond Chelsea meeting-house to watch the movements of the enemy, and to make them known, if of moment, by a man on horseback, to carry the intelligence to the navy yard, &c. Should his excellency the governor be pleased to direct the foregoing arrangements to be made, it will contribute to the safety of the United States property within this navy yard. At the bottom are the signals which will be made from this yard in cases of alarm, when the assistance of five or six hundred of the militia might prove of the utmost importance to the preservation of the public stores and the seventy-four at this place

I am, dear sir, with sentiments of high esteem and respect, your obedient servant,  
WILLIAM BAINBRIDGE.

General JOHN BROOKS.

P. S.—I will feel obliged by your ordering the New England Guards and their artillery to do duty within this navy yard every night until Monday or Tuesday next. My only reason for preferring the New England Guards is that I am acquainted with the officers, and know many of the corps.

*Signals.*—By day: two guns fired in quick succession, and a red flag hoisted in the navy yard. By night: three guns fired in quick succession, two lanterns hoisted perpendicularly, and the navy yard bell rung as loud as possible.

MEDFORD, *June 12, 1814.*

MY DEAR SIR: Your letter of this date I have received and laid before his excellency the commander-in-chief, and I have this moment been instructed by him to call out a company of militia to guard the approach to the navy yard by the way of Chelsea. Brigadier General Austin, of Charlestown, is charged with executing that order. The commander-in-chief is fully disposed to do every thing in his power to aid you in defending the navy yard and the ships in the harbor, which his authority by the Constitution warrants.

I shall see you to-morrow, and make some further communications on the subject of defence.

I am, with sentiments of great respect and esteem, my dear sir, your obedient servant,  
J. BROOKS.

Com. WILLIAM BAINBRIDGE.

NAVY YARD, *Charlestown, June 23, 1814.*

DEAR SIR: I have received your communication of this day in behalf of the New England Guards, whose services in guarding the United States ship Independence of 74 guns, on the stocks within this yard, can at present be dispensed with. The disposition and conduct which have been manifested by the valuable corps under your command, in rendering their military services within this establishment under my command, claims and receives my grateful thanks. I beg you, sir, to present the same to them, with my best wishes for their fame and happiness.

Believe me, with real regard, yours, most sincerely,

WILLIAM BAINBRIDGE.

Captain GEORGE SULLIVAN, *Commanding the New England Guards.*

Expenditures in respect of a regiment commanded by Lieutenant Colonel Peter Osgood, in service from the 1st to the 30th July, 1814.....		\$13, 775 35
Deduct for clothing.....	\$1, 656 76	
Deduct for overpayments.....	265 16	
Deduct for excess in the cost of rations beyond the United States contract price.....	1, 494 04	
Deduct for excess in the number charged for beyond that to which the troops were entitled.....	106 25	
Deduct for allowances to officers for quarters.....	136 96	
Deduct for sundry miscellaneous items.....	461 94	
		4, 121 11
Admissible.....		9, 654 24

It appears that a general order for calling out the regiment commanded by Lieutenant Colonel Osgood was issued by the State executive on the 22d June, 1814, and another like order for its discharge on the 30th July following. An extract from the records of the executive council shows that on the 9th June,

1814, a committee was appointed to consider and report on the memorials of the select men, &c., of the towns of Boston and Charlestown, praying for the aid and assistance of the State in enabling them to protect and defend said towns and their vicinity. Neither the memorials referred to nor the report of the committee are produced, nor any other document explaining the cause of the call of the regiment into service

Expenditures in respect of a corps commanded by Major General Joseph Whiton, in service from about the 10th September to the beginning of November, 1814, and consisting of himself, his two aides-de-camp, an adjutant general, a quartermaster general, two deputy quartermasters general, an assistant quartermaster general, Brigadier General Maltby and staff, Brigadier General Bliss and staff, five regiments of infantry, a regiment and battalion of artillery, and a battalion of riflemen, constituting a force of about 3,700 men.....		\$169, 326 09
Amount of credits, viz: \$37 18 refunded, and \$543 for fuel, forage, &c., sold by the quartermaster general.....		580 18
		168, 745 91
Deduct for clothing.....	\$18, 526 93	
Deduct for use of arms.....	2, 352 68	
Deduct for overpayments.....	4, 528 58	
Deduct for excess in the cost of rations over the United States contract price, and in more being charged for than the troops were entitled to.....	17, 105 36	
Deduct for allowances to officers for forage.....	867 06	
Deduct for allowances to officers for seryants.....	882 71	
Deduct for allowances to officers for quarters and fuel.....	1, 155 48	
Deduct for sundry miscellaneous items.....	4, 348 85	
		49, 767 65
Admissible.....		118, 978 26

On the 6th of September, 1814, a general order of the State executive appears to have been issued, whereby, after a preamble in these words, "The war between the United States and Great Britain having lately become more destructive in consequence of violations of our territory by the forces of the enemy, which continue to menace our cities and villages, the shipping in our harbors, and private property on shore," his excellency the commander-in-chief ordered the whole of the militia to hold themselves in readiness to march, at a moment's warning, with arms, ammunition, and accoutrements, as the laws of the United States and of the State of Massachusetts required; and, the more effectually to meet impending danger, he further ordered the troops therein particularly designated, belonging to the 1st, 2d, 3d, 4th, 5th, 7th, and 9th divisions, to march immediately to Boston, to serve for three months, unless sooner discharged. Under this order the services of General Whiton's command appear to have been rendered; and, as applicable thereto, there has been collected from the documentary evidence the correspondence hereafter set forth.

HEADQUARTERS MILITARY DISTRICT No. 1, Boston, September 4, 1814.

SIR: Having received information of the enemy having taken possession of Castine with a formidable force, it is not improbable that his views may extend to our principal towns on the sea-coast, from Penobscot to this place. I therefore deem it my duty to request your excellency to order out, for the service of the United States, 2,000 infantry and 200 artillery, exclusive of the town of Boston, for the defence of this harbor, town, and vicinity; and 200 infantry and 50 artillery from Kittery, Berwick, and York, to aid in the defence of the harbor and the public ships in the harbor of Portsmouth; and also 1,000 infantry and 100 artillery for the defence of Portland and its immediate vicinity; and, likewise, 1,000 infantry, with 100 artillery, for the defence of the seaboard between Kennebec and Penobscot rivers. The number of officers, non-commissioned officers, &c., I will particularly detail to General Brooks, the adjutant general, and also the place and places of rendezvous.

I am, sir, with the highest respect, your obedient seryant,

H. DEARBORN.

His Excellency Governor STRONG.

HEADQUARTERS MILITARY DISTRICT No. 1, Boston, September 5, 1814.

SIR: The movements and force of the enemy on our eastern coast appearing to require a considerable additional defence or force, I have deemed it my duty to request his excellency the governor of this State, as well as the governor of New Hampshire, to order out from the two States 5,200 infantry and 550 artillery. From this State the infantry amount to upwards of 4,200 and 450 artillery, exclusive of officers, non-commissioned officers, and musicians, to be organized and to rendezvous as stated in the enclosed detail. To prevent any unnecessary delay it will be desirable that some of the principal officers should be ordered to the respective rendezvous as early as may be, to receive and organize the troops as they may arrive in companies or detachments. It will be necessary that the infantry appear well armed and equipped, and with a suitable supply of ammunition; and that the artillery companies have their field-pieces, with their tumbrels and ammunition complete.

I am, sir, with respect, your obedient and humble servant,

H. DEARBORN.

Major General JOHN BROOKS.

NAVY YARD, *Charlestown, September 5, 1814.*

DEAR SIR: As I feel extremely anxious in these perilous times, when our country is menaced both north and south by a powerful enemy, to know what security can be calculated upon in this quarter of our country, I am induced to ask the favor of you to communicate to me, as far as is consistent with your official duty and the propriety of my request, the measures that are adopted by the commander-in-chief of this Commonwealth for the defence of this post and the vicinity.

I beg leave to assure you that every means within my naval command has been prepared, and will be executed, for the defence both of the public and private property against any attack the enemy may make. Permit me to assure you that I shall receive with the utmost respect, and keep with proper secrecy, the information of the arrangements that may be making by you. Without the least disposition to dictate, I respectfully suggest the immediate embodying and drilling a respectable force of the militia, to be stationed in different quarters in the vicinity of Boston; to place videttes to prevent the possibility of surprise; batteries on Dorchester heights and Noddle's island, and breastworks thrown up on North Battery wharf. These precautions would in all probability prevent an attack; and, if it did not, would enable us to make an honorable resistance. Allow me, my dear general, to say that, if the militia is not embodied in the field, I should much fear the work of destruction would be over before they could rendezvous or oppose—for four or six hours would be all the time the enemy would require. I am confident your friendship for me would induce you to excuse any impropriety in this communication, should any therein exist. I should have verbally communicated with you had not indisposition prevented it.

With sentiments of real regard and very great respect, I am, dear sir, your obd't serv't,  
WM. BAINBRIDGE.

HON. JOHN BROOKS, *Adjutant General of the Commonwealth of Massachusetts.*

BOSTON, *September 6, 1814.*

SIR: Will you permit me to suggest to you the propriety of your proposing to his excellency the expediency of having orders issued for placing the whole of the militia within twenty or thirty miles of the sea-shore on the alert, and in perfect readiness for marching on the shortest notice, and having suitable signals established for giving notice for turning out and being ready to march? We ought not, under present circumstances, to neglect any practicable measures for adding to our means of defence.

I am, sir, your obedient, humble servant,

H. DEARBORN.

Major General BROOKS.

BOSTON, *September 7, 1814.*

SIR: The troops of the United States which, at different periods, were stationed on the sea-coast of this State, have been afterwards ordered to join the army on the western frontier, so that very few have remained in the State. We have therefore found it necessary, in the course of the last and present year, to call out small bodies of militia as guards to the towns most exposed. As the danger has increased, the number of detached militia has been augmented, and I have now issued the enclosed general order for the protection of Boston and the towns and property in its neighborhood, and shall immediately issue an order of a similar kind for the security of the District of Maine.

A few weeks since, agreeably to the request of General Dearborn, I detached 1,100 militia for three months for the defence of our sea-coast, and placed them under his command as superintendent of this military district; but such objections and inconveniences have arisen from that measure that it cannot now be repeated. The militia called out on this occasion will be placed under the immediate command of a major general of the militia. I will thank you, sir, to consult with the President, and inform me whether the expenses thus necessarily incurred for our protection will be ultimately reimbursed to this State by the general government, and I shall be particularly obliged if you will favor me with an answer as soon as may be, as the legislature of the State will meet on the 5th of the next month.

I am, sir, with great respect, your most obedient and humble servant,

CALEB STRONG.

Mr. Secretary MONROE.

HEADQUARTERS, *Boston, September 11, 1814.*

SIR: Will you be so obliging as to inform me whether the companies of militia that have recently been ordered by his excellency the governor to this town are to be considered, on their arrival, as in the service of the United States, as it will be necessary, in that case, to have them furnished with quarters and subsistence.

I am, sir, with great respect, your obedient servant,

H. DEARBORN.

Major General JOHN BROOKS, *Adjutant General of the State of Massachusetts.*

DEPARTMENT OF WAR, *September 17, 1814.*

SIR: I have had the honor to receive your excellency's letter of the 7th instant. The attack of the enemy on Baltimore, and probable eventual attack on other places, with the heavy duties incident thereto pressing on this department, have prevented my answering it at an earlier day. It may be satisfactory

to your excellency for me to explain the views and principles on which this government has acted in regard to the defence of our eastern frontier.

It was anticipated, soon after the commencement of the war, that while it lasted every part of the Union, especially the seaboard, would be exposed to some degree of danger, greater or less, according to the spirit with which the war might be waged. It was the duty of the government to make the best provision against that danger which might be practicable, and it was proper that the provision should continue while the cause existed. The arrangement of the United States into military districts, with a certain portion of the regular force, artillery and infantry, under an officer of the regular army of experience and high rank, in each district, with power to call for the militia as circumstances might require, was adopted with a view to afford the best protection to every part that circumstances would admit. It was presumed that the establishment of a small force of the kind stated, constituting the first elements of an army, in each district, to be aided by the militia in case of emergency, would be adequate to its defence. Such a force of infantry and artillery might repel small predatory parties and form a rallying point for the militia at the more exposed and important stations in case of more formidable invasion. A regular officer of experience stationed in the district, acting under authority and pursuing the will of the government, might digest plans for its defence; select proper points for works and superintend the erection of them; call for supplies of ordnance, for tents and camp equipage, for small arms, and other munitions of war; call for the militia and dispose of the whole force. These duties, it was believed, could not be performed with equal advantage by the officers of the militia, who, being called into service for short terms, would not have it in their power, however well qualified they might be in other respects, to digest plans and preserve the chain of connexion and system in the whole business, which seemed to be indispensable. On great consideration, this arrangement was deemed the most eligible that could be adopted under the authority of the United States. Indeed, none other occurred that could be placed in competition with it. In this mode the national government acts by its proper organs, over whom it has control and for whose engagements it is responsible. The measures which may be adopted by a State government for the defence of a State must be considered as its own measures, not those of the United States. The expenses attending them are chargeable to the State and not to the United States. Your excellency will perceive that a different construction would lead into the most important and, as is believed, into the most pernicious consequences. If a State could call out the militia and subject the United States to the expense of supporting them, at its pleasure, the national authority would cease as to that important object and the nation be charged with expenses in the measures producing which the national government had an agency and over which it could have no control.

This, however, though a serious objection to such a construction, is not the most weighty. By taking the defence of the State into its own hands, and out of those of the general government, a policy is introduced on the tendency of which I forbear to comment. I shall remark, only, that if a close union of the States, and a harmonious co-operation between them and the general government are at any time necessary for the preservation of their independence, and of those inestimable liberties which were achieved by the valor and blood of our ancestors, that period may be considered as having arrived.

It follows, from this view of the subject, that if the force which has been put into service by your excellency has been required by Major General Dearborn, or received by him and put under his command, the expenses attending it will be defrayed by the United States. It follows, likewise, as a necessary consequence, that if this force has been called into service by the authority of the State, independently of Major General Dearborn, and be not placed under him as commander of the district, the State of Massachusetts is chargeable with the expense, and not the United States. Any claim which the State may have to reimbursement must be judged of hereafter by the competent authority, on a full view of all the circumstances attending it. It is a question which is beyond the authority of the Executive. Your excellency will perceive that this government has no other alternative than to adhere to a system of defence which was adopted on great consideration with the best view to the general welfare, or to abandon it, and with it a principle held sacred, thereby shrinking from its duty at a moment of great peril, weakening the guards deemed necessary for the public safety, and opening the door to other consequences not less dangerous. By these remarks it is not intended to convey the idea that a militia officer of superior grade, regularly called into service, shall not command an officer of the regular army of inferior grade, when acting together. No such idea is entertained by the government. The militia are relied on essentially for the defence of the country. In their hands everything is safe. It is the object of the government to impose on them no burdens which it may be possible to avoid, and to protect them in the discharge of their duties, in the enjoyment of all their rights.

The various points which are attacked and menaced by the enemy, especially in this quarter, where they are waging, in considerable force, a predatory and desolating warfare, make it difficult to provide immediately for all the necessary expenditures. Any aid which the State of Massachusetts may afford to the United States to meet these expenditures will be cheerfully received and applied to the payment and support of the militia of that State in the service of the United States. It will be proper that the money thus advanced should be deposited in some bank in Boston, that the disbursement of it may be made under the authority of the government of the United States, as in similar cases elsewhere. Credit will be given to the State for such advances, and the amount be considered a loan to the United States.

I have the honor to be, with the highest respect, sir, your most obedient humble servant,  
JAMES MONROE.

His Excellency CALEB STRONG, &c.

Boston, October 1, 1814.

SIR: In the month of May last I held a conversation with Brigadier General Cushing, at that time the superintendent of military district No. 1, on the subject of a detachment of militia being called out by your excellency, and placed under his command, for the defence of the sea-coast, and particularly of this town and the forts in the harbor.

In this conversation he stated to me the incompetency of the United States troops for manning even one of those fortresses, and expressed great solicitude to have such a number of men furnished him by the State as to secure the forts under his care from surprise. The general, the same interview, observed that

he was fully sensible of the feelings of the militia officers in being placed under the command of United States officers. But to obviate that difficulty as far as was in his power, he added that in case of an attack or alarm, he should immediately repair to one of the forts himself, and that the other fort should be committed to the defence of the militia, which should be subject to the command of no officer of the United States army but himself. In another conversation with General Cushing, some little time afterwards, the same ideas were expressed.

With entire respect, I have the honor to be, sir, your excellency's most obedient servant,  
J. BROOKS.

His Excellency CALÉB STRONG.

OCTOBER 13, 1814.

DEAR SIR: I have handed to the Secretary my answer to General Dearborn's letter in July; at the same time I wrote to General Brooks that if he could make the same arrangements with General Dearborn as was proposed by General Cushing, I wished him to issue an order for calling out the militia by General Dearborn, but otherwise not. What the arrangement was you will see in General Brooks's report, which he handed me the other day, and which I wish you to return, after having it copied, if you desire a copy.

After receiving General Dearborn's letter of the 4th September I laid it before the council. They thought that the militia would not, without extreme reluctance, if at all, be induced to turn out, if they were to be placed under the officers of the United States; and, in my opinion, some of the most respectable militia officers in the neighborhood concurred. The council, therefore, unanimously advised to place the militia under one of their own major generals, and I issued the order of 6th September. The same day General Dearborn's aide called on me to know if I had any answer to send to General Dearborn. I told him that I had just issued a general order, which I would immediately enclose to General Dearborn. He replied, there was no occasion for that, as General Dearborn had that general order. He inquired of me who was to command the militia to be called out. I told him that a major general of the militia would command them. He said that General Dearborn did not expect that, and would personally call on me and converse on the subject. I told him that I should wait on him with pleasure. I expected that he would call, but he did not; and I have not, since that time, seen or corresponded with him.

I am, sir, your humble servant,

CALEB STRONG.

Hon. THOS. H. PERKINS.

A requisition appears to have been made by Major General Dearborn upon Governor Strong on the 8th July, 1814, for certain artillery and infantry detachments of militia, constituting together, including officers, a force of about 1,300 men, to be in United States service, at different posts on the seaboard of the State, for three months; and, in compliance therewith, these detachments appear to have been ordered out and placed in the United States service, and to have been paid and supplied by the general government. Their services commenced early in August, and terminated in the beginning of November; and four full companies thereof, commanded by a lieutenant colonel, appear to have been stationed at Fort Warren, in Boston harbor. The letters, of which the following are copies, have reference to militia which, soon after their date, appear to have been called out, and also placed in the service of and been paid and supplied by the United States. They were on duty at Forts Warren and Independence till about the end of November. Brigadier General H. A. S. Dearborn was the officer in service with them, and whose measures for defence are described in a letter addressed by him to Colonel Perkins, set forth in the entries as to fortifications, &c.

ADJUTANT GENERAL'S OFFICE, Boston, September 17, 1814.

SIR: As the commander-in-chief has authorized me to make a detachment, to be placed under your orders, upon Forts Independence and Warren, agreeably to the suggestion made by you a few evenings since, I have to request you to favor me with a sketch of the number and grade of the officers you should wish to be employed on that service, both artillery and infantry. A considerable proportion of the troops will be ready to receive your orders the day after to-morrow. Should, however, the enemy, in the mean time, appear, the commander-in-chief will furnish you with reinforcements from other parts of the militia.

I am, very respectfully, your obedient servant,

J. BROOKS.

Major General DEARBORN.

HEADQUARTERS, Boston, September 17, 1814.

DEAR SIR: In conformity with your note of this day the following sketch will show the number and grade of the officers for one thousand infantry and two hundred artillery, exclusive of a brigadier general, which I take for granted is to be the one I proposed.

*Infantry.*—2 lieutenant colonels, 2 majors, 10 captains, 30 lieutenants, 10 ensigns, 1 adjutant, 1 quartermaster, 1 paymaster, 1 surgeon, 2 surgeons' mates, 1 sergeant major, 1 quartermaster sergeant, 2 principal musicians, 50 sergeants, 40 corporals, and 20 musicians.

*Artillery.*—1 major, 2 captains, 8 lieutenants, 12 sergeants, 12 corporals, and 4 musicians.

I am, sir, respectfully, your very humble servant,

H. DEARBORN.

Major General BROOKS, *Adjutant General.*

Expenditures in respect of sundry companies and detachments in service at Fort Strong from 21st September, 1814, to the 28th February, 1815.....		\$3, 024 19

Fort Strong, where the services of these companies, &c., are stated to have been rendered, appears to have been, by State authority, constructed at a place called Noddle's island, under the superintendence of Loammi Baldwin, engineer, with whose accounts the copy of a letter is filed, of the following import:

Boston, September 21, 1814.

DEAR SIR: The works at Noddle's island have been prosecuted so far that a guard stationed there would be of the first importance; many inconveniences as to the tools would be avoided by such a measure, as we have already lost several of them. I think it my duty to ask your attention to the subject, and to request that a guard may be placed at the fort as early as the arduous duties of your office will permit you to make such an arrangement.

With very great respect, your obedient servant,

LOAMMI BALDWIN.

Hon. JOHN BROOKS, *Adjutant General, Boston.*

According to the roll, the first of the companies entered on duty on the day of the date of this letter, and was detached under a general order of the same date. The other companies, &c., were called out in succession to relieve each other, and as expressed at the heads of the rolls, by brigade or regimental orders. Of these, or of the general order before alluded to, no copies are produced, nor any further documents in relation to these troops, except three general orders, issued by the State executive on the 8th and 30th November, 1814, and the 30th January, 1815; the first for reducing the force to twelve men, and the next for furnishing a guard of fifteen men for two months, and the last for continuing it another month. The force in service at a time consisted of a company during the first four weeks, of a lieutenant's command during the next three weeks, and of a sergeant's during the residue of the period. Exclusive thereof, as is before shown, there were on duty at and in the vicinity of Boston, for a considerable portion of this period, (and within which nearly two-thirds of the last-mentioned expenditures arose,) a very large militia force in State service, under Major General Whiton, and another in United States service, under Brigadier General Dearborn.

*Cape Ann to Boston.*

Expenditures incurred in erecting and keeping flag-staffs in the fall of 1814 ..... \$597 53

A paper, of which the following is a copy, has been found amongst the documentary evidence. It is endorsed as being a letter from Colonel Perkins, but has not his signature.

Boston, September 23, 1814.

SIR: It is recommended to you to establish immediately signals between Cape Ann and Boston, to communicate the information of the approach of any *large number of ships*. It is thought that at present nothing more than this can be done with sufficient promptitude for the occasion. You will therefore undertake to erect a flag-staff, of sufficient height, at Gloucester and intermediate stages between that place and this town, and provide flags for them and persons to attend them. A spy-glass should be supplied, by loan or purchase, to each station, and a confidential person placed at each, with a regular relief, sufficient to keep up a constant and vigilant attention to the object. You must, either by yourself or a committee of your town, make this arrangement, and that without loss of time. One station on an eminence at Gloucester, one between Gloucester and Salem, one at Chelsea, and communicated from thence to this town. You will determine upon the sites of the flag-staffs, and procure the flags, which will be paid for by this board. You will understand that it is the wish of the board that in no case are signals to be made but when a fleet of not less than *fifteen ships* are in sight, otherwise the sea-coast will be kept constantly in alarm. We are making similar arrangements on the south shore. Sentinels from the day-dawning to night-fall should be kept; as the lights will be suspended at the light-houses, it is not apprehended that a fleet will approach after dark. Men in whom perfect confidence can be placed should be the sentinels, and boxes built at each station for their protection against the weather, unless there are dwelling-houses immediately in the neighborhood. It is probable your avocations will prevent your personal attendance in the execution of this business; if so, employ some active confidential men, who will attend to it. We presume the flags may be borrowed, which should be done if practicable, as we wish the utmost economy in the expenditures, which, with all our care, will be very great. Should you employ persons at the intermediate stages, Mr. Hough, at Gloucester, Mr. Nicholas Thorndike, at Beverly, being active men, are recommended to your attention. Pool's hill, at Manchester, is mentioned as nearer to Salem, and giving as good a view to the northeast as Pigeon hill. It is not probable that a fleet will attempt this bay but in clear weather, when the flags can be seen. You will please to acknowledge the receipt of this letter, and inform this board of the measures you are taking in the premises.

In behalf of the board of commissioners for the sea-coast defence.

Brigadier General S. DARBY, *Salem.*

The disbursements were made by Brigadier General Darby.

*Cohasset.*

Expenditures in respect of a company commanded by Captain Cleverly, in service for two months, ending August 16, 1814.....	\$2, 856 92
Deduct for clothing.....	\$420 00
Deduct overpayments.....	2 86
Deduct excess in the cost of rations beyond the United States contract price.....	137 43
Deduct allowance to officers for rooms .....	4 00
Deduct miscellaneous items.....	55 45

Admissible..... 2, 237 18

An application, of which the following is a copy, appears to have been addressed to his excellency Caleb Strong, governor and commander-in-chief.

*To his excellency the governor of the Commonwealth of Massachusetts:*

We, the subscribers, beg leave to represent to your excellency that we have been called upon in our military capacity to aid in protecting the town and harbor of Cohasset from invasion expected to be made by the British force now off that place. It appears they have landed a force at Scituate, burned and carried off all the vessels in that harbor, and have threatened to do the same at Cohasset; as yet they have been prevented by the militia of Hingham, Weymouth, &c. It appears that the harbor of Cohasset is very much exposed to a sudden invasion from the enemy; and it would be in their power to destroy all the shipping and other property around the harbor before any assistance could possibly be afforded from the militia of the neighboring towns, unless a sufficient force could be afforded them to prevent at the first attack. The shipping now in the harbor of Cohasset is valuable, and worth perhaps \$100,000 or more. The harbor is resorted to by many vessels passing from Cape Cod and all the south shore, as a retreat from the enemy, and has been the means of saving many vessels from capture. It is our opinion that if they could be furnished by this Commonwealth with two twelve-pound carronades, and one six-pound cannon, a sufficient quantity of ammunition, one full company of artillery, and two companies of infantry, it would enable them, with their own exertion, to protect the place from invasion, and thereby save to the inhabitants of that town and the Commonwealth a valuable property, and perhaps be the means of saving many valuable lives. We therefore pray your excellency to take into consideration their situation, and afford them such assistance as in your wisdom may be thought proper, and that with as much speed as may be.

BARNABAS CLARK, *Lieutenant Colonel 3d Regiment, 1st Brigade.*  
 SAMUEL WEBB, JR., *Lieutenant Colonel 2d Regiment, 1st Brigade, 1st Division.*  
 WASHINGTON CUSHING, *Major 2d Regiment, 1st Brigade, 1st Division.*  
 JAMES THAYER, *Captain.*  
 SIMEON WHITE, *Captain.*  
 ZEBADIAH HOLLIS, *Captain.*  
 BENJAMIN DERBY, *Captain Artillery.*  
 EDWARD F. JACOBS, *Captain Artillery, 1st Brigade, 5th Division.*  
 SAMUEL FRENCH, *Fourth Lieutenant.*

COHASSET, June 13, 1814.

The governor, in a general order, dated headquarters, Boston, June 13, 1814, after expressing that he had taken into consideration the representation of the distressed situation of the navigation and town of Cohasset, from the presence of the British force near the harbor of that town, directed that a detachment of one captain, one lieutenant, one ensign, four sergeants, four corporals, two musicians, and sixty privates, be detailed forthwith by Lieutenant Colonel Samuel Webb, jr., assembled and marched to Cohasset; the term of service not to exceed two months, and the detachment to be sooner discharged if the safety of the port and town would permit.

Under this order the company commanded by Captain Cleverly was detailed and stationed at Cohasset; and under another general order of the governor, issued on the 10th of August, 1814, the company was discharged on the 16th of that month.

It appears that pursuant to a resolution adopted at a special meeting of the inhabitants of the town of Gloucester, held on the 13th June, 1814, a petition was presented to the State executive, of which the following is a copy:

*To his excellency Caleb Strong, esq., governor of the Commonwealth of Massachusetts:*

The inhabitants of the town of Gloucester, in the county of Essex, beg leave respectfully to represent: that the local situation of this town renders it peculiarly exposed to the depredations of the enemy, who have already begun, even within our harbors and creeks, to burn, sink, and destroy the few coasting vessels which remain to us; and the barges from the enemy's ships in our bay on this morning entered one of our harbors, landed on our wharves, burnt several vessels, and carried off others before the inhabitants could assemble to repel them. Our dangers and fears are hourly increasing for the safety of our families and dwellings; our feelings are indescribable when we behold our shores illuminated with the nightly ravages of the foe. We therefore respectfully request that two companies of infantry and four

pieces of travelling artillery, with ammunition, be granted by your excellency and your honorable council, for the immediate succor and protection of your petitioners; and, as in duty bound, will ever pray.

LONSON NASH, *Moderator*.

TIM. ROGERS, *Town Clerk, pro tem.*

Attest:

GLOUCESTER, June 13, 1814.

No copy is furnished either of any reply to his application or of any general order issued by the State executive in consequence thereof; but in the orderly book of Major General Hovey a division order is recorded, dated Salem, June 16, 1814, issued, as it expresses, "in obedience to orders from his excellency the commander-in-chief," and requiring Lieutenant Colonel Appleton, without delay, to detach from his regiment, for actual service by day and night, one captain, one lieutenant, one ensign, one drummer, one fifer, four sergeants, four corporals, and sixty-four privates; and by the orderly book of Lieutenant Colonel Appleton it appears that in conformity with this division order the company of Captain Haskell was detached. It entered on duty on the 21st June; and on the 4th of August a division order appears to have been issued by Major General Hovey, directing the discharge thereof, and other troops, they being, as therein stated, relieved by a detachment ordered for three months' service. The detachment here referred to was furnished and placed in the United States service on the requisition of Major General Dearborn, dated the 8th July, 1814, and was paid and supplied by the United States. A letter of Major General Hovey, dated Salem, August 6, 1814, and addressed to Lieutenant Colonel Appleton, contains as follows: "Yours of the 5th I have received, wherein you say that you have received the division order of the 4th, to discharge the detached company from your regiment; this order was founded on a communication from the adjutant general of the 3d, wherein he says: 'I have no doubt myself that as soon as the detachment for the United States arrive at its station, the State guards may be dispensed with; therefore I felt it my duty to discharge the guards in Gloucester, Salem, and Marblehead. I am fully sensible of the satisfaction Captain Haskell and his company have given to the inhabitants of Gloucester, but I am of the opinion that they cannot be continued in service in consequence of the detachment for three months' service.'" In the record book of the committee of safety of the town of Gloucester there is an entry showing that at a special meeting, held on the 7th August, a committee was appointed to wait on Major General Hovey, to request the continuance of the company commanded by Captain Haskell; and Major General Hovey, by a division order of the 9th August, "in consequence of a representation made to him by the selectmen and chairman of the committee of safety in the town of Gloucester, of the 8th instant, stating their exposed situation and constant danger of being harrassed by the enemy," countermanded his division order of the 4th so far as related to Captain Haskell's company, and directed its continuance in service till the last of September, if not sooner discharged by order of the commander-in-chief; and by another division order issued by Major General Hovey on the 29th September he, after noticing that the term of service of Captain Haskell's company had nearly expired, and that it had been represented that the danger to which the town of Gloucester was exposed was as great as it was when the company was first ordered into service, ordered its further continuance till the last of November, unless sooner discharged by order of the commander-in-chief.

At another meeting of the committee of safety of the town of Gloucester on the 9th of September, 1814, a committee, according to the records, was appointed to wait upon his excellency the governor of the Commonwealth and upon the committee of defence, to represent to them the defenceless and exposed situation of the town, and to request immediate reinforcements of guns, ammunition, and men; and the letter, whereof the following is a copy, is presumed to have been the result:

ADJUTANT GENERAL'S OFFICE, *Boston, September 13, 1814.*

SIR: His excellency the commander-in-chief directs that you detach one company of 75 privates, properly officered, from the 2d regiment and 2d brigade of your division, to be without delay sent to Gloucester, to be stationed in that town ninety days unless sooner discharged. The captain will report himself on arrival at Gloucester to Major Robert Elwell, jr., who is hereby appointed to the command of all the detached troops in the service of the State stationed in that town.

I am, very respectfully, sir, your obedient servant,

J. BROOKS.

Major General AMOS HOVEY.

Agreeably thereto, Major Elwell appears to have entered on duty on the 15th September, and the company of Captain Witcher on the 19th of that month.

An order for the immediate discharge of the two companies commanded by Major Elwell was issued by the State executive on the 29th of October, 1814; and they and the major were soon after discharged accordingly.

As connected with the services of these militia the testimonials hereafter set forth have been collected from the documentary evidence adduced.

SALEM, August 17, 1814.

SIR: Enclosed are sundry returns, viz: from a company of infantry commanded by Captain Benjamin Haskell of Gloucester, of the Essex Guards in Salem, and the Sea Fencibles in Newburyport, and also the detachment from the 2d division for three months' service, pursuant to general orders of the 18th ultimo. This detachment was mustered in their respective brigades on the 1st day of August, and on the 2d marched to the division rendezvous in Salem; the men, arms, and equipments were in good order. On their arrival in Salem they were immediately assigned to their several posts, viz: Salem, Marblehead, and Gloucester. On the 4th I issued orders to discharge Captain Haskell's company and to discontinue the night guards in Salem and Marblehead; but as soon as the detachment arrived in Gloucester, I had a very pressing letter from the selectmen and committee of safety, stating their exposed situation, and that the detachment just arrived had gone to the United States fort and would not be able to give them that protection which their local situation absolutely required. They informed me that Captain Haskell's company was in a good state of discipline and was willing to be continued in the service of this Commonwealth if necessary; that the company was divided and on duty at the harbor, Sandy bay, and Squam, and had given great satisfaction to the inhabitants. The request of the selectmen, &c., was so urgent, and, I thought, so reasonable, that Captain Haskell's company might not be discharged, that I counter-

manded the order of the 4th so far as related to the discharge of said company, and ordered that they be continued in service until the last of September, unless sooner discharged by order of the commander-in-chief.

[Passages relating to other matters are here omitted.]

Since writing the above I have been called on by Messrs. Nash and Hough, of Gloucester; they inform me that in Stage fort, so called, where a part of Captain Haskell's company are stationed, were three 18-pounders, property of the United States, which were received for by the committee of safety, and to be delivered to the United States when demanded. An officer of the United States has lately demanded and received them, which leaves the fort destitute of ordnance. I have no doubt but Stage fort is well situated to annoy the enemy should he have the temerity to approach Gloucester harbor or its vicinity; and beg leave to give it as my opinion, that if the committee of defence have on hand a pair of 18 or 24-pounders to dispose of, they would be judiciously placed in said fort under the care of Captain Haskell.

I am, very respectfully, sir, your humble servant,

AMOS HOVEY, *Major General 2d Division.*

Hon. JOHN BROOKS, Esq., *Adjutant General.*

WENHAM, August 17, 1814.

DEAR SIR: The bearers, Lonson Nash and Benjamin K. Hough, esquires, will show you a vote of the committee of safety of Gloucester, authorizing them to apply to the executive of the Commonwealth for four 18-pounders, to be used in the defence of that town, to supply the place of those withdrawn by the authority of the United States. They will give you information of the circumstances attending the removal of the United States artillery, from which you will conclude that considerations of safety to the town had no influence on the measure. Perhaps your application to General Dearborn may procure their restoration, especially as the whole United States force there, twenty regular artillerists excepted, and these perhaps recruits to be drilled and then marched away, consists of the militia of the Commonwealth lately detached, and these under the command of an officer in whom the citizens have not that confidence which they place in the detachment of *their own militia*, serving under the orders of the governor. It appears that the heavy artillery removed from the town's fort are now absolutely useless, and that they were taken away merely because the town declined delivering the possession of *its own fort* to the United States.

Under these circumstances I am inclined to think it expedient, if General Dearborn cannot be persuaded to restore the cannon, that three or four battering pieces should be furnished from the park of the Commonwealth, with the requisite apparatus and ammunition for the town's fort afore-mentioned. Because if such kind of defence of that harbor be expedient, it should be such as can be relied on, and in strength of force as to numbers as may be reasonably effectual. And it may be questioned whether, in this point of view, both detachments of militia, with the handful of regular artillerists, are more than adequate to such defence. I presume the governor will in a few days be in Boston, and General Cobb also, as one of the council. If any consultation on this and other similar subjects should be deemed requisite, you will have the goodness to inform me. I purpose being in Boston in commencement week.

I have the honor to be, with respect and esteem, dear sir, your obedient servant,

TIMOTHY PICKERING.

General JOHN BROOKS, *Boston.*

ADJUTANT GENERAL'S OFFICE, *Boston, September 12, 1814.*

SIR: The State quartermaster general reports that there are in the United States fort at Gloucester one 12-pounder and three 18-pounders iron cannon, belonging to the State, which were mounted on garrison carriages with apparatus complete in the year 1798. A committee of Gloucester has represented that the people of that town have erected a fort and built a barrack within it for the accommodation of a company of soldiers, and were furnished with three pieces of artillery, 18-pounders, on loan from the United States for the use of their fort, but that they have lately been taken away. The present emergency is so pressing I have to request, and I do it with earnestness, that the three 18-pounders may be returned to Gloucester, while the alarm and the urgent necessity of employing every efficient means of defence shall continue. A committee of the town of Gloucester will wait on you herewith.

I am, very respectfully, sir, your obedient servant,

J. BROOKS.

Major General HENRY DEARBORN.

The result of this application is not shown.

GLoucester, *September 8, 1814.*

SIR: This morning at two o'clock the enemy effected a landing of 60 or 70 men at Sandy Bay, and took the fort in that place, in which were stationed a non-commissioned officer and ten privates of Captain Haskell's company. Such was the density of the fog that the sentinel was surprised before an alarm could be given. The enemy, after setting fire to the guardhouse and spiking the pieces, retreated to their barges before a force could be collected sufficient to obstruct their retreat. One of the barges, after hauling off, and in the act of firing on the dwellings of the citizens, sprung a leak and rendered it necessary for those that were in her to swim for the shore. By this circumstance, five of the privates who were taken in the fort were recovered and thirteen of the enemy were taken prisoners. These are now in custody and shall wait your direction respecting them.

JAMES APPLETON, *Lieut. Col., &c., 2d Reg., 1st Brig., 2d Div.*

AMOS HOVEY, Esq., *Major General 2d Division.*

SALEM, *September 9, 1814.*

Sir: I have only time to say that your letter of yesterday I have just received. Keep a good lookout and deliver your prisoners to the marshal.

Yours, respectfully,

AMOS HOVEY, *Major General 2d Division.*

Lieutenant Colonel APPLETON.

The record of the last two letters in Lieutenant Colonel Appleton's orderly book is followed by a note in these words: "The above-mentioned prisoners, belonging to the Nymph frigate, the inhabitants of Sandy Bay by some means or other exchanged them for an equal number of American prisoners on board the Nymph." A letter proposing the exchange, from the captain of the ship Nymph, addressed to the commanding officer of the militia or chief magistrate of Sandy Bay, is filed among the papers.

LEANDER, *1 p. m., Tuesday.*

Sir George Collier believes the boat on shore a fisherman. He desires to examine her without recourse to arms; and if objected to he will land or destroy every house within two miles of the cove. This the inhabitants may rely upon.

G. R. COLLIER.

*To the principal inhabitant or militia officer on shore.*

GLOUCESTER, *September 21, 1814.*

We whose names are hereto annexed, selectmen of the town of Gloucester, in the county of Essex, do certify and declare that during the summer and fall of the year 1814, when we were at war with Great Britain, the inhabitants of the town were constantly exposed to the depredations of the enemy. The fear and alarm of the people were great. A single day scarcely passed without seeing, within shot distance of our dwellings, some of the enemy's ships. Half of the dwelling-houses of our whole population, which exceeds six thousand, were greatly exposed. The enemy was constantly attempting to land, and was prevented from this and other outrages only by the militia. The occasions for calling them out were very frequent, by night as well as by day. In one instance the enemy landed, and after burning a small house turned his fire on other houses; and one house still shows where the balls of the enemy passed through it. In another instance (month of September) the enemy attempted to land a number of, probably 150, men in two barges, covered by the fire of Sir George Collier, then lying off our town, but after a sharp contest with the militia who were assembled, they were repulsed. On this and other occasions the greatest consternation prevailed; many people with their effects were removed from town. And in another instance a richly laden packet was chased into our harbor, run ashore, and deserted by the crew, but was saved by Captain Sayward's company of artillery, and other militia, under the direction of Lieutenant Colonel Appleton, even after the enemy had got out his boats to board her. Our dependence on the militia for defence and security at that time was known and felt by all, and the committee of safety frequently requested in behalf of the town that they might be increased.

CHARLES L. ROBERTS,  
DANIEL H. RODGERS, *Selectmen of Gloucester.*

[Endorsed.]

GLOUCESTER, *September 21, 1824.*

We, the undersigned magistrates in the said county of Essex, and residing in this town, having examined the within, do certify that it is correct in all respects.

HENRY PHELPS, *J. P.*  
ISAAC ELWELL, *J. P.*

The detached militia in the United States service within the limits of Major General Hovey's division were, according to the rolls, on duty from the beginning of August to the beginning of November, 1814, and consisted, including officers, as follows:

Force.	Where stationed.
78.....	Fort Lee, Salem.
63.....	Fort Sewall, Marblehead.
62.....	Fort Defiance, Gloucester.

*Beverly.*

Expenditures in respect of a company of artillery and another of infantry commanded by Captains Putnam and Farnum, in service from the 20th and 22d of September to the beginning of November, 1814.....		\$3,578 74
Deduct for clothing.....	\$468 39	
Deduct for use of arms.....	70 30	
Deduct overpayments.....	20 92	
Deduct excess in the cost of rations beyond the United States contract price...	131. 88	
Deduct miscellaneous items.....	104 50	
		795 99
Admissible.....		2,782 75

The State executive appears to have issued on the 16th of September, 1814, a general order, requiring Major General Hovey to detach for service at Beverly one company of infantry and one company of artillery, to continue in service ninety days; and on the 29th of October another like order directing their discharge forthwith. An application for such a force appears to have been addressed to the governor, and of which the following is a copy:

*To his excellency the governor of the Commonwealth of Massachusetts, and the commander-in-chief of the army and navy, &c.:*

Respectfully represent the subscribers, in behalf of a large number of the inhabitants of the town of Beverly, in the county of Essex, that the said town is in a situation much exposed to a sudden attack of the enemy, and that most of the houses in the commercial part of it are within the reach of his frigates and smaller armed vessels; that two companies of the Commonwealth's troops, one of artillery and one of infantry, may be well accommodated in this town; and they believe may be here stationed so as to render the most essential service to the public, as they will be serviceable not only in repelling any attack on this town, but may also be marched from this place in a very short time to any one of several other probable points of attack. Stationed here, they will be less than seven miles from Manchester, two from Salem, six from Marblehead, and four from Danvers, where there is a considerable quantity of shipping collected from different towns to attract the enemy's attention, and about fifteen miles from Charlestown, and the same from Gloucester. On these views of the subject, the said inhabitants respectfully submit to your excellency's consideration the expediency of stationing in this town two such companies; and if the public service will permit one, and but one, to be stationed in this town, then the expediency of placing here one company of artillery. During the last revolutionary war the government thought proper to station a regiment in this town.

We are, most respectfully, your excellency's obedient servants,

N. DANF.  
MOSES BROWN.  
THOMAS STEVENS.

BEVERLY, *September 15, 1814.*

*Sundry places.*

Expenditures in respect of two detachments of cavalry in service as videttes, one of them from the 5th to the 22d, and the other from the 7th to the 21st October, 1814.....	\$481 79
Also, compensation paid to Major General Hovey for "military services, pursuant to the orders of his excellency the commander-in-chief of the 10th and 24th of June, and the 23d of August, 1814, and expenses occasioned thereby," and payments to his aid, &c., for expenses of travelling express with division orders .....	389 74
	871 53
Deduct for clothing.....	\$47 84
Deduct for overpayments.....	27 20
Deduct for miscellaneous items.....	421 23
	496 27
Admissible .....	375 26

Major General Hovey was directed by a general order of the State executive, dated 26th September, 1814, to establish a communication between himself and the adjutant general's office at Boston, and between himself and the commanding officers of brigades and regiments within his division, by videttes, to be taken from the cavalry, and stationed at such distances as he might judge necessary for the most speedy transmission of orders, and, if needful, of intelligence; and by another like order, dated the 19th October, 1814, the line of videttes was required to be discontinued.

No services in the field appear to have been rendered by Major General Hovey, and of the orders of the 10th and 24th June and 23d August, no copies can be found amongst the documentary testimony.

*Saco, Biddeford, and Arundel.*

Expenditures in respect of the services of three companies, commanded by Captains Woodman, Stimson, and Small, and of Major Samuel Merrill and his adjutant, from the 19th September to the 12th October, 1814; and in respect of two other companies, commanded by Captains Strout and Appleton, in service from about the latter period to the 10th and 12th November, 1814 .....	\$4,895 59
Deduct for clothing.....	\$633 82

	1,169 78
Admissible .....	3,725 81

As to these militia the following copies, extracts, and observations are deemed to be applicable:

The situation of the district of Maine, now assailed by the enemy, appearing to us to require the presence of an executive agent, who should promptly provide every practicable means of defence, we, by virtue of the powers conferred on us by the governor, with advice of council, by his commission bearing date the 16th day of June last, do hereby appoint you to be that agent, relying on your ability, fidelity, zeal, and energy to perform the duties of the agency in the manner best adapted to the actual circum-

stances of that district. The following ideas have occurred to us, and we present them to you as useful to bear in remembrance:

As the enemy is in force to operate by land as well as by water, we think it necessary to caution you and our fellow-citizens there against too great a reliance on water batteries or other fortifications of any kind. It will be his obvious policy—and the policy has been already exhibited in his practice—to avoid encountering such works where the object aimed at is otherwise attainable. This object appears to be principally, if not solely, the destruction of all the shipping in our harbors and rivers; for, notwithstanding the President of the United States has announced in his proclamation of the 1st instant that Admiral Cochrane has, by a direct communication, avowed his purpose to be to employ the force under his direction in destroying and laying waste such towns and districts upon the coast as may be found assailable, yet we are unwilling to believe the avowal to be thus unqualified in its terms, and intended to be so savage and cruel in its effects. We are rather inclined to think that this devastation is to be confined to the shipping in our waters, of which the destruction will undoubtedly be as universal and complete as the force of the enemy can accomplish, while he may not regret the destruction of buildings contingent on the burning and destroying of vessels.

Under this view of the subject, we think it necessary, and of the first importance in contemplating the mode of defence, to guard against the enemy's approach by land. For this end, every exposed town and its environs should be carefully viewed to find the practicable and probable landing places, and the routes by which he may reach the town and its shipping, and then to consider and adopt the best means of defence. Breastworks, whether of earth or fallen trees, will avail nothing, excepting in narrow passes, nor there, if by a moderate detour he can go around them. In the warfare practiced by the enemy, the best defence will be the firm breasts of our citizens, with the light artillery and small arms for their weapons. To obtain a competent force of this kind, you will consult with the generals and principal officers in the district, whose commands comprehend the places to be defended. We trust they will all pay a prompt and punctual attention to the general orders of the commander-in-chief of the 6th instant, particularly by inspecting the equipments of their militia, and causing them to be in readiness for immediate and active service. Where such great interests are at stake, great sacrifices are called for. Some days spent in putting their arms in order, in preparing ammunition suited to their guns, in exercising with them, and in learning the simplest manœuvres, and to break, disperse, and promptly to rally again, will enable them to meet the enemy with confidence, and with the best prospects of defeating him, and saving their towns and property from destruction. Being aware that considerable additional supplies of ammunition may be indispensable, you are hereby authorized to purchase them on the best terms in your power, and to draw bills for the amount on the commissioners, which will be duly honored. If the ammunition which may be wanted cannot be procured in the district, nor in Portsmouth, then you will give the earliest possible information thereof to the adjutant general, that supplies may be sent from Boston. Perhaps, too, by that time some arms may be furnished. When the militia shall be called into actual service, it will be necessary to furnish them with provisions, fuel, straw, and forage. This we hope and trust will be done by the government of the United States; but if that government declines to do it, you are hereby authorized to contract for the above articles on the best terms you can, the same to be delivered by the contractor or contractors in the same quantities to officers and soldiers as they are furnished to the regular troops of the United States. Your compensation will be fixed hereafter; for your necessary expenses you will draw on the commissioners of defence. Given under our hands September 10, 1814.

DAVID COBB,  
T. PICKERING,  
J. BROOKS,

*Commissioners for Sea-coast Defence.*

WILLIAM H. SUMNER, Esq.

Boston, September 10, 1814.

SIR: As the commissioners for military defence have appointed your their agent to repair to the district of Maine and to assist in providing every practicable means of defence for that part of the State, I will suggest such circumstances in relation to that subject as have occurred to me.

The major generals or commanders of divisions are authorized, in case of invasion or imminent danger of it, to call out such part of the militia as they may think necessary for the protection of such exposed towns. In forming a judgment in cases of this kind, we have ground to expect that no men will be more impartial; as, on the one hand, they will be solicitous to afford reasonable protection to the inhabitants of the coast, and, on the other, will be unwilling to call the militia from their homes except in cases of necessity. Hitherto experience has served to confirm these expectations, for, so far as I have been informed, those officers have conducted with great prudence and discretion. As we can only conjecture what are the views of the enemy, and the state of things is continually changing, it is impossible to ascertain beforehand, and at a distance, what measures may be necessary; they must therefore, for the most part, be referred to the commanding officers of the militia who are in the neighborhood, and in whose judgment I repose full confidence. You will confer with them, and such other officers as you may judge proper, on the subject of defending the coast, and will give your aid for the march of detachments or whole corps for the defence of any post or place that may be deemed to require support. Portland will deserve your first attention, unless you find, on your way thither, that Portsmouth is immediately menaced; in which case you will confer with General Ichabod Goodwin, and make the requisite arrangements with him to meet the emergency, before you proceed further. The several major generals will communicate to you the orders under which they now act, which, with the instructions you will receive from the commissioners, and your knowledge of my ideas on the subject of defence generally, will assist you in guiding your judgment. I observe that the people of Portland have proposed that the militia to be called out shall be put under the command of General Chandler. If the militia are satisfied with that arrangement I shall make no objection to it. The United States, I presume, have made contracts for the supply of the troops called into service in the district of Maine, and it is desirable that the militia who may be now on duty should be supplied that way. I wish you to inform me or the commissioners of whatever may appear to you of importance, and am, with sincere regard, your obedient servant,

CALEB STRONG.

Colonel Wm. H. SUMNER.

A letter from Colonel Sumner to Adjutant General Brooks, dated Portsmouth, September 12, 1814, and relating to the defence of that place, shows that he had on that day had an interview with General Goodwin; and in another letter of his to the adjutant general, dated Portland, September 15, 1814, after noticing certain measures which had been suggested to him relative to the defence of Wells and Arundel, he proceeds as follows: "Saco and Biddeford were the next objects of my attention. There is some shipping here, and a great quantity of lumber at some miles from the sea. A company would afford them sufficient protection as a guard attached to the two thye-pounders they have. But when they complained that Governor Strong had done nothing for the defence of the State till lately, and now only for the defence of Boston, and in the next breath told me that a company of United States troops was yesterday marched from there to Plattsburg, I could only restrain my indignation long enough to explain to them some of the common principles of our Constitution, as it respected the duties of those administering them. There is no convincing or satisfying those whose only objects are to produce discord and dissatisfaction. As this post is in York county, and in General Goodwin's division, I have left them for your decision."

Saco, *September 15, 1814.*

Sir: We have to request that you would take the trouble to call on us to-morrow to take into consideration what can be done for the defence of this part of the seaboard, as the inhabitants are very much alarmed, and we want to see you here very much, if you are not too much engaged. We should like to see you as early as you can make it convenient.

Yours, with due respect,

BENJAMIN PIKE,  
AARON SCAMMON,  
TRISTRAM JORDAN, JR.,  
*Selectmen of Saco.*  
ISRAEL LASSEL,  
SAMUEL MERRILL,  
*Selectmen of Biddeford.*

Brigadier General JOHN M'DONALD.

This application appears to have been laid before Major General Goodwin, and by whom an order has been written thereon to this effect:

*ALFRED, September 16, 1814.*

Brigadier General M'Donald will repair to Biddeford, and if, in his opinion, troops are necessary to strengthen the guard at Biddeford and Saco harbor, he will order the light infantry companies in his brigade to march there as guards, as soon as possible, on the sea-coast; and when danger approaches, his brigade will be ready to march, at a moment's warning, to any point where he may be ordered. The towns will supply the men ordered from them.

ICHABOD GOODWIN, *Major General.*

Major Merrill will take the command of the light infantry companies.

On the following day brigade orders are shown to have been issued by Brigadier General M'Donald, calling into service Major Merrill and the three companies commanded by Captains Woodman, Stimpson, and Small.

A letter from Adjutant General Brooks, dated Boston, September 22, 1814, and directed to Major General Goodwin, after requiring him to detach from his division a force for the defence of Portsmouth, and which was received into the service of, and was paid and supplied by, the United States, contains as follows: "Respecting the calls which have been made on you from Biddeford and Saco, Arundel and York, I am instructed to observe, as the opinion of the commander-in-chief, that under the present aspect of danger the three companies you have ordered to the two former places are sufficient. In relation to the other exposed points of your district, the commander-in-chief expects that you continue to exercise your discretion in ordering out troops for their security."

The communication informing the State executive of the call of these three companies into service is not among the documents, nor is it shown by whom or in what way the information was furnished. Pursuant to the letter last noticed, a division order appears to have been issued by Major General Goodwin, calling into service the force thereby required for the defence of Portsmouth, and containing further directions, as follows: "Captain Edward Small will be ordered to march his company to Arundel, and relieve the guard stationed there, who will be discharged, and he will receive his orders from Colonel Mitchell. The other companies of light infantry will relieve the guard stationed at Jordan's Point, in Biddeford, and take charge of that post; the present guard to be dismissed. The men are to continue in service three months, unless sooner discharged, from the time of their arriving at the places appointed for their stations."

The guards referred to appear to have been discharged on the 23d September, 1814. The charges for their pay, &c., are remarked on in the statement relative to militia called out for guard duty.

As to the companies of Captains Strout and Appleton, it appears that Major General Goodwin, by a division order dated October 3, 1814, directed Brigadier General M'Donald to detach one hundred men, to form two companies, and be completely officered, one to be stationed at Biddeford and Saco, and the other at Arundel, and to continue in service two months after their reaching those posts, unless sooner discharged; and further directed that Major Merrill, with the troops under his command, should be discharged as soon as relieved by the new draft. This order was issued, as appears by a note of General Goodwin on one of the copies, at the request of Brigadier General M'Donald, who, by another division order, issued by Major General Goodwin on the 4th of November, 1814, was required to discharge these militia as soon as possible.

With regard to the militia in service in 1813, the documents hereafter set forth, dated in that year, and the accompanying remarks, afford all the information which can be found among the testimony furnished.

PORTLAND, *September 14, 1813.*

SIR: The sense of the town of Portland having yesterday been taken at a meeting duly convened, respecting the unguarded and defenceless state of the town and forts in the harbor, and it having been communicated to the town during their meeting that several vessels of war were then close in by the light-house, it was unanimously agreed by all present that one of the exigencies contemplated in the Constitution for calling out the militia exists, and has for some time existed, namely, that the town is, and has been, in "imminent danger of invasion" from the enemy. Whereupon the following vote was passed without a dissenting vote, viz: Voted, that the committee of safety of the town of Portland be requested to procure immediately a sufficient number of men to man Forts Scammon and Preble, and to engage them for such time as shall be necessary, not exceeding 60 days, and that the expense thereof be defrayed by the town, and that the treasurer be instructed to make such advance as shall be necessary for carrying this vote into execution, and that the said committee be further instructed to make application to Brigadier General Irish to cause a detachment of the militia for the protection of the town of Portland as soon as may be.

Attest:

SAMUEL HORNER, *Town Clerk.*

Brigadier General JAMES IRISH, Jr.

The undersigned, the committee above alluded to, are unanimously of the opinion that the exigencies contemplated by the Constitution do exist, and that two companies of infantry should forthwith be ordered out for the protection of the forts, harbor, and town.

We are, respectfully, your obedient servants,

DANIEL TUCKER,  
JOS. H. INGRAHAM,  
PETER WARREN,  
LEMUEL WEEKS,  
ROBERT ILSLEY,  
A. W. ATHERTON,

*Committee of General Safety and Defence of Portland.*

On the day of the date of this application Brigadier General Irish appears to have issued an order for the detaching of one hundred and thirty-six militia for the defence of Portland, with two captains, two lieutenants, and two ensigns, to repair to that town without delay and do duty for sixty days, if not sooner discharged.

ADJUTANT GENERAL'S OFFICE, *Boston, September 18, 1813.*

SIR: I acknowledge the receipt of your letter dated the 14th instant enclosing the proceedings of Portland. In the several orders to which you refer you will find a guide under every circumstance of invasion that may occur. I am preparing a communication to his excellency the commander-in-chief, in which I shall enclose your letter and the proceedings of Portland, to be transmitted by the next mail.

I am, respectfully, your obedient servant,

J. BROOKS.

Brigadier General JAMES IRISH.

Brigadier General Irish, by an order dated September 19, 1813, directed to Captain Abel W. Atherton, and professing to be issued "pursuant to order from the commander-in-chief" after noticing that the captain had been regularly detailed to command two companies of infantry detached for the defence of Portland and its vicinity, required him to repair to Jordan's Point battery in said town, there to take command of said detachment.

JORDAN'S POINT, *September 25, 1813.*

SIR: As Colonel Larned is absent I take the liberty to inquire of you whether you have any objections to placing the guns belonging to the United States at this battery under my care during the time the detachment of infantry now in service here remains at this post, which will not exceed sixty days. Should the enemy make an attack and succeed in passing the fort with the wind and tide favoring him, this post would be the *last stronghold* for the defence and protection of the town. It becomes my duty, therefore, to obtain your permission to exercise these guns occasionally, and to use them against the enemy in case of an assault. I shall take particular care that neither the guns nor any of the property here belonging to the United States shall be injured. It has been said that Colonel Larned had it in contemplation to send a sergeant's guard here, under the idea, I have understood, that this detachment would be discharged. You will, no doubt, be glad to learn that it will be now unnecessary to reduce your force at the forts for this purpose. If, in fact, the enemy should make an attack upon the forts, you might, if acceptable, in any emergent case receive a strong reinforcement immediately, for I should be glad to co-operate with you in any proper manner to repel an invading foe.

I have been directed to take command of "Jordan's Point battery, and there remain until further orders." Notwithstanding this order, I wish it explicitly understood that I claim no control, without leave, over the United States property here, viz: the guns, coverings, and gun-house. But the point on which the battery stands is *exclusively* under the jurisdiction of this Commonwealth, and I have, besides this constitutional authority, obtained leave of some of the largest proprietors to occupy it. If, however, you should differ from me in opinion respecting the expediency of sending a United States detachment here, they will be well received and put under this command, according to military usage. Should you not feel authorized to act on these requests, I must beg of you to lay this communication before Colonel Larned as soon as he returns. A written reply will much oblige your obedient servant,

A. W. ATHERTON,

*Commanding Detachment of Infantry in the service of State at Jordan's Point.*

R. R. KENDALL, Esq., *Captain commanding Forts Scammel and Preble.*

BOSTON, *November 23, 1813.*

SIR: This morning I received your communication dated the 17th instant, and have enclosed it to the governor; and as I have received no instructions from him relative to the subjects mentioned in the application of the committee of safety for Portland, I must wait until I hear from him and shall be authorized to advise you. It is very much to be regretted that any serious misunderstanding should have arisen between Captain Atherton and the commanding officer of the United States troops. I persuade myself, however, that the prudence and good sense of the parties concerned will prevent violence of any kind from taking place.

I am, respectfully, sir, your obedient servant,

J. BROOKS.

Brigadier General JAMES IRISH.

ADJUTANT GENERAL'S OFFICE, *Boston, December 2, 1813.*

SIR: Yesterday I received a letter from his excellency the commander-in-chief, in which he expresses an opinion that, under existing circumstances, no additional orders ought to be given for calling out another detachment of militia to be stationed at Portland.

I am, respectfully, sir, your obedient servant,

J. BROOKS, *Adjutant General.*

Brigadier General JAMES IRISH.

PORTLAND, *December 20, 1813.*

SIR: I had the honor to receive your communication of the 1st instant. The desire I feel of exonerating myself from censure in the late transactions has induced me to break through the forms of etiquette, in these cases so necessary. I have taken the liberty to forward, for your perusal, the Portland Gazette, which contains a just statement of the whole proceedings. It is desirable that the commander-in-chief should have a knowledge of these facts. The claim I derived to hold Fort Burrows was threefold: 1st, by order of the government of this Commonwealth, through Brigadier General Irish; 2d, because it is not a regular post belonging to the United States: they do not own the ground, nor has it been ceded to them; 3d, because I had leave of the principal proprietors to occupy the same with the Commonwealth's troops. It was considered, if a United States officer, from resentment or caprice, could unnecessarily dispossess the troops of the State of this ground, he might pursue them from post to post without the limits of the State. Colonel Larned was not actuated by the most honorable motive of providing for the "common defence;" on the contrary, he threw every obstacle in the way of our protection. He had not men sufficient to defend even the forts in the outer harbor, and he was unwilling the militia should afford that protection which the United States could not furnish. The United States have already three regularly ceded posts in this town and harbor, and since the war they have not had a sufficient number of stationary men to defend one of them. Colonel L. is endeavoring to obtain Fort Burrows for a fourth; but the inhabitants will oppose it almost unanimously. Hence their anxiety to keep possession through the winter. It will be highly gratifying to myself and officers to know that we do not absolutely incur the censure of the commander-in-chief. We have in all respects obeyed orders.

I have the honor to be, with perfect respect, your most obedient servant,

A. W. ATHERTON.

Adjutant General JOHN BROOKS, *Boston.*

ADJUTANT GENERAL'S OFFICE, *Boston, December 27, 1813.*

SIR: Your letter dated 20th instant was received on Tuesday last, and a copy of it forwarded to his excellency the commander-in-chief the next day, who must undoubtedly approve of the promptitude with which you have obeyed his orders, and of your wishes to support the honor and the rights of Massachusetts. But you must be sensible of his great care to avoid every cause of misunderstanding and collision between the government of this State and that of the United States; and I would take the liberty to observe, without, however, having any instructions from the governor for so doing, that, besides the constitutional obligation of the general government to provide for the public defence, all the rights of war, excepting the right of immediate defence in case of invasion, are vested exclusively in that government. It may be observed, likewise, that if in time of war a State has a right to raise troops, or to call out the militia into actual service, the legislature of this State has passed no law for that purpose. The most the legislature has done respecting the employment of troops extends merely to the calling out competent guards for the safety of the munitions of war belonging to the State. That a State may establish arsenals and be prepared at all points for defence there can be no doubt; nor can it be presumed that the United States can rightfully seize the military stores of a State and convert them to their own use without the consent of the State. It would be an act of violence not to be justified upon any ground whatever. But I am not ready to admit that a State can establish a military post of any kind which the constitutional powers of the national government will not pervade and control. The commander-in-chief, I presume, will not be here until the 8th of January. Should he direct any communication to you, his orders shall be promptly executed. The pay-rolls of your detachment are no doubt preparing; if they should not be completed, I should recommend not to have the sums carried out as it is usual against each man's name. The rule established by the committee on accounts, to whom pay-rolls are usually referred, I do not understand. The rate of pay, &c., is different from that of the United States.

I am, very respectfully, sir, your obedient servant,

J. BROOKS.

Captain A. W. ATHERTON.

As to the before-mentioned militia, in service at Portland in 1814, reference is made in the first instance to the requisition of Major General Dearborn and the letter of Governor Strong, before set forth in the entries relative to Major General Whiton's corps on duty at Boston, and to Lieutenant Colonel Sumner's appointment and instructions, set forth in the foregoing entries respecting militia in service at Saco, Biddeford, and Arundel; and next, to the following copies, extracts, and remarks, as containing all the material information collected from the documents as applicable to Lieutenant Colonel Ryerson's command:

HEADQUARTERS, *Boston, September 7, 1814.*

SIR: As I discover no particular provision in the general order of the 6th instant for turning out immediately any of the militia in the district of Maine, will you be pleased to inform me whether any orders have recently been issued to the militia of that part of the State.

I am, sir, very respectfully, your obedient servant,

H. DEARBORN.

Major General Brooks, *Adjutant General, State of Massachusetts.*

No evidence of any reply is furnished.

PORTLAND, *September 11, 1814.*

SIR: I have this moment received a letter from the adjutant general's office, military district No. 1, Boston, in which I am informed that the governor has refused to order out the militia on the requisition of General Dearborn, for the defence of Portland, and that it is improper for me to issue rations to any troops other than those in the United States service, whether militia or regulars, and directing me to deliver none. I give you this early information that other provision may be made for the State militia now under arms for the defence of Portland. I have also received a letter from Captain Perry, at Wiscasset, who says that he had received an express, half-past one o'clock yesterday morning, from General King, informing him that seven sail of the enemy's ships had left Castine and stood to the westward. The general has ordered out another battalion of militia.

Yours, respectfully,

JOHN CHANDLER.

Captain DANIEL TUCKER, *Chairman of the Committee of Safety and Defence, Portland.*

PORTLAND, *September 12, 1814.*

SIR: I received your letter of the 9th instant yesterday morning; messengers were immediately despatched to Generals Turner and McMillan, who I understand are coming in with their troops as soon as possible. Every exertion is making for a vigorous defence of this place. Forts Scammel and Preble have in both about two hundred men. If those forts fall, the town must follow. General Chandler does not feel himself authorized to receive any militia into them. It would be of the utmost importance to have four hundred men sent to those forts, in addition to those already there, which cannot be done but by ordering them into the service of the United States. Should his excellency think proper to order any troops into the service of the United States for these forts, and should think proper to order from the 13th division, the troops of that division will be nearly all here in a few days; they may be drafted on the spot.

I am, very respectfully, your obedient servant,

ALFORD RICHARDSON, *Major General.*

Hon. JOHN BROOKS, *Adjutant General.*

*Extract of a letter from Colonel Sumner to Adjutant General Brooks, dated Portland, September 15, 1814.*

"I communicated to General Richardson the letters of instruction from his excellency the governor and the commissioners, and explained to him their views. He was fully sensible that his arrangements were too extensive for the object to be defended, and said he intended (till he was yesterday advised by my letter to the committee that I should be here the next day) to have reduced his command to about 1,500 from the interior, keeping those in reserve in the vicinity and in town. I was happy to find that he had already made up an opinion, which I expected to form when I had made myself more acquainted with the posts, and had consulted with the committee of safety and got such information as was easily attainable. Early yesterday morning I addressed a note to the committee of safety, informing them of my arrival, who requested me to meet them at 12 o'clock. After having communicated to them the nature of my authority, I endeavored to explain to them the motives which had induced the government to send me hither and their views in relation to the system and mode of defence. They expressed their gratitude for the promptness with which General Richardson had acted, and their confidence both in him and General Chandler. They had no objection to have General Chandler in the chief command, except that they should lose the services of General Richardson. I stated to them the difficulties which would probably arise from having two heads at one station, and that General Chandler would not give up the forts to General Richardson, thinking it his duty to defend them as well as he could, though not half manned; and that General Richardson, who ranks above General Chandler, would in no case receive orders from him; that the forts, to be efficient, must be manned with more men than the United States could furnish, and must be protected by militia on the heights in their rear; General Richardson could not order a part of his corps into the forts under General Chandler; and that an officer of his rank would not be willing to act the subordinate part of protecting General Chandler's rear. Various other suppositions were made, which the said committee said had for some time excited great apprehensions of the result in their mind; but, as Generals Richardson and Chandler seemed to agree very well, they had hoped this would continue; and not being military men, nor knowing how to obviate the apprehended difficulties, they had omitted to touch upon a question of so great delicacy to both the gentlemen in the hope that they should get through their present difficulties without collision. In fact, the gentlemen here seem to have rested their confidence in their military matters altogether to the numbers detached, and hope that the newspaper proclamation of their strength will prevent the enemy from attempting to carry their town. Finding the expression of confidence in General Chandler pretty universal, and General Richardson having no desire to retain the command, and concurring with me in opinion that it was desirable to save as much expense to the Commonwealth as possible, I addressed a note to General Chandler, and met him by assignment in the afternoon, and stated to him that he was misinformed of the fact, as he had written to the committee, that Governor Strong had refused to place any militia, by General Dearborn's request, under the United States officers for the protection of the district of Maine. The only answer which Governor Strong had given to General Dearborn's request for troops was a communication of the general's orders of the 6th of September, and that the governor had no objection to complying with the request, so far as to place them under a United States officer who possessed the public confidence, and would not use his power over them, when placed under him, so as to render the situation of the troops uncomfortable, or that of their officers dishonorable, and who would employ the forces for the purposes only for which they were drafted. He appeared very accommodating, and said he would do everything in his power, as he was well acquainted with the character of our militia, consistent with military principles and his understanding of his duty, to render the situation of both the officers and men of the Massachusetts line as comfortable as the nature of the service would admit if they were placed under his command. He said, however, that he was in a sub-command, and that he could not enter into any express convention for which he had no authority. This morning I called the attention of the committee by a note to take the subject of placing the troops under General Chandler's command into distinct consideration, and to communicate to me their views and wishes; to which they answered that no objection could be made to such arrangement, 'unless it should grow out of disaffection among the officers and men of General Richardson's command, and become necessary to make a reduction of the force.' General Chandler met General Richardson and myself by assignment. I stated to him that I had learned that Major Weeks, a respectable officer of the artillery of this town, who, by virtue of the order for placing 1,100 men in the United States service, had been detached and placed in the command of Fort Scammel by him, had yesterday placed over him Major Lane, of the United States line, much to the injury of the feelings of an officer who had considered his only alternatives as victory, death, or Halifax; and, in case of attack, had determined to bury himself in his fort. General Chandler, anticipating me, interrupted, to observe that he extremely regretted that the manner of doing this had been so offensive to an officer he so much respected; was sorry he had not explained to Major Weeks his reasons for doing it before his order was issued, being assured that he should have satisfied him of the propriety of it. Fort Scammel was the key of the harbor; and though Major Weeks was zealous, and had almost worn himself down with fatigue in attending to his duty, yet he had no practical experience in garrison duty; and as he had an officer on the station who was generally respected, and was well instructed in garrison duty and defence, and as the hour of danger was then supposed to be commencing, he could not, consistently with his duty, do otherwise than to place this important post under the command of the most experienced officer on the station; he, however, would do anything thought advisable for healing the breach. I told him that before I could enter into any further arrangement, I should expect his consent to place Major Weeks in some other honorable and distinct command, to which he assented. Fort Burrows, in the town, (a station which I know Major Weeks wanted,) is the place proposed for him, and it is agreed to by General Chandler. I informed General Chandler that, from the disposition he had shown, I was sure he did not wish to violate any military principles, nor, by disaffecting the officers and men, to lessen their efficiency; that I understood there were in town a great number of United States officers who had no men to command, and that if troops were detached a suitable number of officers would be detailed with them, and that I should not expect United States officers placed over them, thereby destroying their authority and making them a mere medium of communication to their own men of others' orders. He had not, he said, a thought of that, excepting in the forts, where it would be necessary to place experienced men; and that he should only place round his person some of the United States officers, who would be of great assistance to him in time of action. I told him that the short period for which the detachment would be made, made it unnecessary for me to stipulate as to the place of their employment; and he observed that he believed there was no danger but what they would be employed for the defence of the town. I have before me

his note, in compliance with my request that he would furnish me with his ideas of the numbers necessary for the defence of the post, stating that 1,000 infantry and 100 artilleryists, as is requested by General Dearborn, together with the 200 already under his command, and 60 more which he expected would make their retreat from Machias, according to orders, through Orrington, to this post, and the militia of the vicinity in reserve, was the number proposed, and he thought would be sufficient; and that 1,100 would be as many as he should be willing to place in the United States service for this place.

"About two hundred militia, infantry and artillery, under Majors Rogers and Weeks, being part of the detachment called for by General Dearborn's requisition of July 8, 1814, appear to have been stationed at Forts Scammel and Preble, in Portland harbor, from the beginning of August to the beginning of November, 1814. Allusion is made to these in the last preceding extract. They were placed in the service of, and were paid and supplied by, the United States."

Major General Alford Richardson, by a division order issued September 19, 1814, after reciting that the President of the United States, through his officers, had requested of his excellency the commander-in-chief a detachment from the militia of 100 artilleryists and 1,000 infantry, with a proper proportion of officers, for the defence of the town and harbor of Portland, to remain in the service of the United States for forty days, unless sooner discharged by the President, and that the major general of the 12th division had been authorized and directed to make such detachment, did order that detachments should be made of two captains, four lieutenants, six sergeants, five corporals, three musicians, and one hundred privates of artillery, and of one lieutenant colonel, two majors, eleven captains, seventeen lieutenants, sixteen ensigns, fifty-six sergeants, fifty-five corporals, two principal musicians, twenty-two other musicians, and 1,000 privates of infantry, and that these troops should report themselves to General Chandler.

*Extract of a letter from Lieutenant Colonel Sumner to Adjutant General Brooks, dated Wiscasset, September 19, 1814.*

"The arrangements for the defence of Portland which were suggested to you in my last were completed. In order to keep a sufficient reserve, I was obliged to consent that a part of the detachment of 1,100 men to be placed under the United States authority should be taken from General M'Millan's brigade. Considering the strong force of General Goodwin's division, and the great probability that M'Millan's brigade never will be called for by him, and if they were, are at so great a distance that they would not arrive in time to be useful; and as they were, the principal part of them, here, having marched, some of them, one hundred and sixty miles, from Sandy river, I hope this part of the arrangement will meet your approbation. The detachment will be made, 750 from Generals Turner and M'Millan's brigades, and 350 from General Richardson's division, principally taken from Colonel Foxcraft's regiment; and the detachment will be arranged upon the principle of your order of July 18, 1814, and will be under the command of Colonel Foxcraft, who will have under him a proper proportion of officers in addition to the 1,100 rank and file. There will therefore be 400 men of the United States troops, of a former detachment of the militia, 1,100 to be detached for forty days, (unless sooner discharged by order of the President of the United States,) the whole under the command of General Chandler, together with 500 men of the militia and volunteer corps, well disciplined for militia, under the command of Colonel Nichols, in the town of Portland, forming a body of 2,000 men on the spot for its defence. General Richardson's reserve of 2,000 men, consisting of the militia within twenty miles distance, can be all there in twenty-four, and half of them in six hours. To preserve the discipline and numbers of the Portland regiment, they are to be drilled once a week; and General Richardson will also retain the whole or a part of a company of cavalry to act as videttes, and will remain at Portland himself to call in the reserve in case of necessity. Major Weeks is to have a distinct command in Fort Burroughs, which I have agreed General Chandler should take possession of till the major's time of service expires (unless it is requested by government in the meantime) for that purpose; and to him will also be committed the charge of the State stores in that fort, which, for a long time before he was detached, had been committed to his care. With this arrangement (I have great pleasure in giving you the information) there appears to be the greatest satisfaction, both among the defenders and the defended, the economists and the alarmists. The town with this force ought to be safe. It is, however, far from being the case. It has at the entrance into the harbor two United States embargo forts or batteries; Fort Preble, of fourteen 18-pounders and some smaller ones, is on a point of land from Cape Elizabeth; Fort Scammel is opposite it, on a small island across the channel, (three-quarters of a mile,) open and unprotected in its rear, though some defences are now throwing up. But outside of these forts is Bang's island, with a fine protected place for landing men; and two 18-pounders on that island could drive every man out of Fort Scammel; and Fort Scammel commands Fort Preble. After the fall of these forts the enemy's ships might anchor in the harbor, subject to the annoyance of Fort Burroughs, New Fort, and some other small batteries. The ships and vessels are all hauled up above the bridge and are prepared to be sunk, and all valuable property is removed from the town, and the houses stripped of their furniture; if the enemy should succeed in capturing the forts, they might enter the town, burn, sink, and destroy the property, but would get no prizes. Against a sudden attack the committee have taken great pains to guard. They have telegraphic communications fifty miles west, and east to Pemaquid Point, in the town of Bristol, which give signals of the approach of a privateer or a fleet by day, and tar barrels or beacons to give the alarm by night; and these are so situated also as to be seen by the surrounding country, which is to forward its militia without further notice."

*Extract of a letter from Colonel Sumner to Adjutant General Brooks, dated September 22, 1814.*

"The satisfaction which was generally expressed by the officers and men at being placed under General Chandler's command, and the desire that they might be so commanded of the committee of safety in that town, as communicated to the governor before I left you, and afterwards expressed by them to me, were the principal reasons which induced me, according to my instructions, to order the troops detached for that post into the service of the United States. Scarcely had the detachment been made (and I do not know that General Richardson had yet completed it) before General Chandler is ordered from that post to another, then commanded by Colonel Walbach, an officer more intelligent than any one I know in the United States service, and where General Chandler will be entirely useless. What reason could there have been for such a change?"

*Extracts of a letter from Adjutant General Brooks to Colonel Sumner, dated September 24, 1814.*

"Your several communications, under the dates of the 15th, 20th, and 21st instant, have been received and laid before his excellency the commander-in-chief, the council, and the board of commissioners; and I have the satisfaction to assure you that they produced an expression of entire approbation from each of the gentlemen to whom they were presented."

"The provision for the security of Portland is deemed judicious and liberal. And it is a source of great satisfaction to his excellency that you left that town in so tranquil a state."

*To Major General ALFORD RICHARDSON, commanding the militia called out for the defence of the town of Portland:*

The undersigned ask leave to represent that, by a general order of the date of the 20th day of September current, they are given to understand that a detachment of the militia to the amount of 1,100 artillery and infantry is to be made and placed under the command of Brigadier General Chandler, an officer of the United States, and in the service of the same.

Against this disposition of any part of the militia of this Commonwealth the undersigned ask leave respectfully to remonstrate. And in doing this, they would request that the course of conduct which they consider it their duty to pursue may not be attributed to any motive dishonorable to the soldier or disreputable to the man. The promptness and alacrity with which they have assembled at this place, at the moment when danger was threatening their fellow-citizens of the metropolis, is an assurance that they are ready to defend their country from invasion, and have courage to preserve it unpolluted by any hostile foot. They, therefore, in remonstrating against this arrangement, think they have a claim to be heard, and that the reasons which may be offered may be candidly weighed by the major general, and that an ultimate decision may not be made without mature deliberation and reflection.

And first, your remonstrants are opposed in principle to the arrangement, inasmuch as they consider it unconstitutional and subversive of the sovereignty of the Commonwealth of Massachusetts.

The Constitution of the United States provides that the President shall be commander-in-chief of the militia of the several States when called into actual service of the United States. But we believe that this command is to be exercised by the officers of the militia appointed by the States, and in this way only.

This construction the undersigned consider as sanctioned by the opinion of the supreme judicial court, delivered to his excellency the governor in August, A. D. 1812.

Having thus shown, in the opinion of your remonstrants, the unconstitutionality of the contemplated arrangements, the undersigned will be excused for pointing out some of the evils which may result from a different construction. General Chandler is himself a subordinâte officer, and can make no pledge which he may not be compelled to violate, or violate obligations paramount to any which he may stipulate with regard to the station of troops under his command. The undersigned therefore consider that, when once under the command of an United States officer, it will not be in the power of any officer in this Commonwealth to prevent their being marched to any post where the President may please to direct. They may be compelled to abandon the defence of those whom they volunteered to protect, and marched from their families to some place more assailable to the enemy, or deemed more important by the President of the United States. The probability that they will is strengthened by the desire manifested to have the militia at the control of the United States officers.

Again, it is a well known fact that the officers of the United States hold the militia in the most sovereign contempt. They have no regard to their local habits or feelings. By a law of the United States officers of the United States of the same grade take rank of the militia when incorporated with them. In this way the old and honorable militia officer is liable to be commanded by the stripling, for whom family influence or political motives may have procured a commission. Where have we a pledge that the many incumbents of offices in the army of the United States whom we see in our streets, without men to command, may not be incorporated with us and our troops, and thus we be reduced to a cipher, and our men in effect given up to the caprice of those who have no sympathy with their situation? Can General Chandler give such a pledge? We think not. He himself may be bound by others' orders, whatever may be his disposition. We are not insensible that the proposed arrangement is intended to save expense to the Commonwealth. But we apprehend the United States are, and will be, bound by the national compact to pay the expense of our defence, whether the militia is put under the control of United States officers, or are commanded by their own. If the United States have the injustice to refuse a claim so well founded, we can only say that the objects of the national compact are at an end.

But shall his excellency the governor give up his prerogatives, and those of the Commonwealth, because the United States are unjust? On principles of economy, then, we cannot agree that the proposed arrangement has any advantage above any other; and should the United States be so unreasonable as to refuse to let the militia defend those posts which are exclusively within their control, unless the militia will be put under United States officers, and this, too, when it is acknowledged that the United States have no adequate force to defend those posts, we can only say it is time they were surrendered into other hands.

The officers of the militia will not conceal the repugnance which they have to bring themselves, and having their men exposed in posts, from their weakness wholly inadequate to any effectual defence. For these and many other reasons which might be mentioned, the undersigned respectfully remonstrate against the arrangement proposed by general orders of the 20th day of September, and to give Major General Richardson a clear understanding of the repugnance which they, and the troops under their respective commands, feel in submitting to be placed under the command of General Chandler, or any other officer of the United States; at the same time pledging themselves to be ready for any danger or emergency, while they can be commanded by their own appropriate officers, the men of their choice.

Pelatah Smith, major.  
 Stephen Blake, captain.  
 Stephen Pratt, lieutenant.  
 Ebenezer Rawson, major.  
 Philip Eastman, captain.  
 Henry Frost, captain.  
 Samuel Robinson, captain.

James Steel, major.  
 J. B. Osgood, Brigade major.  
 Robert Andrew, jr., ensign.  
 John Kilborn, captain.  
 William Morrison, captain.  
 William Benjamin, ensign.  
 Dominicus Record, ensign.

Henry Fazewell, major.  
Jonathan Bemis, captain.  
James Charles, captain.  
Joseph Colly, lieutenant.  
Elijah Huston, lieutenant.  
Stephen Berry, captain.  
Aaron Ingalls, ensign.  
Eber Rice, lieutenant.

PORTLAND, *September 24, 1814.*

5 majors, 10 captains, 8 lieutenants, and 7 ensigns: total, 30.

Of these officers, 3 majors, 5 captains, 2 lieutenants, and 2 ensigns, do not appear to have been detached for United States service; the remaining 18 were in the detachment commanded by Lieutenant Colonel Ryerson, and formed less than one-third of the number of commissioned officers he had under him.

*Extract of a letter from Colonel Sumner to Adjutant General Brooks, dated Portland, September 25, 1814.*

"In my letter of the 19th instant, informing you of the arrangements made for the defence of Portland, I observed that they were such as gave the greatest satisfaction. This was so general that I was not acquainted with a single person who had any objection to it. I did not hesitate, therefore, to leave with General Richardson a direction when his detachment was completed to place it in the service of the United States, and that quarters and rations should be prepared by them to be delivered to the troops. I wrote to Brigadier General Chandler, informing him that Major General Richardson is now making a detachment from the militia of ten hundred infantry and one hundred artillery, exclusive of officers, which, when completed, will be placed by him in the service of the United States for the defence of Portland, according to the request made thereof by officers acting by virtue of the authority of the President of the United States, for forty days, unless, before such detachment is completed, different instructions shall be received by him from his excellency the commander-in-chief. I went yesterday to Hollowell and Augusta with General Sewall. At 12 o'clock last night, at Gardner, I received by express from Major General Richardson a letter, of which the following is a copy."

PORTLAND, *September 24, 1814.*

Sir: Serious and alarming difficulties have arisen since you left this place, in consequence of the order to place the officers and men under General Chandler.

Many of the most respectable officers declare they will lose their commissions before they will submit to what they call a conscription. The same feelings are prevalent among the men. One company marched off on Wednesday; some were persuaded to return, and some brought back by force, but two escaped.

Another difficulty in executing the arrangements has arisen. Brigadier General Chandler has been ordered to command at Portsmouth, and left this place yesterday. Lieutenant Colonel Starks is now in command. Under these circumstances I have directed the detachment to report to me, and shall not deliver it over to the United States officers until further instructed. Your presence appears to me indispensably necessary. When I see you I will enter into detail.

I am, very respectfully, sir, your obedient servant,

ALFORD RICHARDSON, *Major General.*

Colonel WM. H. SUMNER.

"After requesting General King by letter to excuse me for not meeting him according to agreement at Bath, I left Gardner, and upon my arrival here this afternoon found such a spirit of disaffection in the Oxford detachment from General Hubbard's division, arising from an expected order for placing them in the United States service, that if the order was issued it would probably render it necessary for us to call in a part of General Richardson's division to compel its execution.

"Having received advice yesterday that seven transports, with 1,000 troops on board from Castine, joined the squadron off Owl's Head on Thursday evening, (and which were also seen there on Friday morning,) I had serious apprehensions that the fleet now composed of 15 sail of transports, with from 2,700 to 3,000 troops on board, might strike a destructive blow upon this place before order could be restored. Independently of other considerations, and agreeably to the wish of the committee of safety, which I immediately convened and consulted, I requested General Richardson to continue the troops under his own orders, and to take the command of them himself. It became absolutely necessary for General Richardson to command, as Lieutenant Colonel Ryerson, who was detailed for the command of the detachment, (and not Colonel Foxcraft, who it was supposed would have been,) is qualified for fatigue duty only.

"You perceive that my letter informing General Chandler of our intent to make a detachment, also notifies him of General Richardson's order to place it under his command when made, unless, before such detachment is made, different instructions should be received by him from his excellency the commander-in-chief. If the present course is approved of by his excellency the governor, I will thank you by the next mail to forward to General Richardson his instructions, that the United States officers on this station may have as early notice as possible."

*Extract of a letter from Adjutant General Brooks to Colonel Sumner, dated Bath, September 27, 1814.*

"Your letters dated 23d and 25th instant have been received. Under the unexpected occurrences at Portland you undoubtedly made the best arrangements possible. General Richardson, I presume, will conduct his department with propriety, and will give great satisfaction to the people in and about Portland."

BATH, *September 27, 1814.*

Sir: By my letter of the 17th instant, as well as by my personal communications when I had the pleasure of seeing you at Portland, you were informed that in consequence of the general confidence in you, which was there expressed both by the committee of safety and defence of that town, and by the major and brigadier generals commanding the militia which had been called into service for the defence of Portland, in obedience to my instructions from his excellency Governor Strong, I had requested Major

General Richardson to detach 1,100 men, with a suitable proportion of officers, from the militia, and to order them into the service of the United States for the defence of that town, under your command. General Richardson accordingly made the detachment, but, before it was organized, learned that the greatest unwillingness was expressed both by the officers and men at being ordered into the service of the United States, and that some of the most respectable officers had declared that they would lose their commissions rather than submit to it, and that a company which had marched off the ground had been brought back by force. On the receipt of his express despatch stating these circumstances, I immediately left important arrangements which were then making for the defence of other posts of this district and repaired to Portland. I there learned that the dissatisfaction of the militia at being ordered into the United States service after it was understood that you were ordered from that post to command at Portsmouth was so great that an order requiring it could not probably be carried into effect but by compulsory means.

Aware of the indefensible state of the town, so long as the confusion which would have been consequent on the contemplated order should continue, and being informed that fifteen transports with troops on board had been seen, two days previous, off Owl's Head, with which the enemy might strike a destructive blow before order could be restored, I did not hesitate to request General Richardson to continue the detachment under his own command.

It gives me great pleasure to assure you that there is the greatest good understanding between General Richardson and Colonel Starks, now commanding at Portland; and that there will be the most harmonious co-operation between these two gentlemen and the troops under their respective commands for the protection and defence of that important town. [The remainder of this letter relates to Major General King's district, and with an extract of a letter dated 28th September from Colonel Sumner to Adjutant General Brooks, explaining his motives for writing it, will be found set forth in the entries respecting the militia in service at Bath, Wiscasset, &c.]

I have the honor to be, &c.,

W. H. SUMNER.

Brigadier General CHANDLER.

*Extract of a letter from Major General Dearborn to Adjutant General Brooks, dated September 28, 1814.*

"Will you please to inform me whether I may expect a detachment for Portland, where their services are very necessary at this moment."

[It does not appear that this received any reply.]

*Extract of a letter from Colonel Sumner to Adjutant General Brooks, dated Bath, September 28, 1814.*

"After the occurrences which have taken place, (though I almost fear to do it,) yet my duty requires that I should again express to you my belief that, by the arrangements made at Portland, of which you were informed in my last, satisfaction is once more given to the town and the officers and men detached for its defence. If, after reading the enclosed remonstrance to General Richardson, you could be informed of all the other circumstances which induced our last determination, you would readily believe that this satisfaction could not have been given without some exertions, and in no other way than by that adopted, so as to render the place as secure as the military means there collected would warrant. I had the honor to communicate to Lieutenant Colonel Starks, commanding the United States forces in that place, the circumstances which had induced an alteration in the plan before intended for the defence of the town by placing the militia under General Chandler's command, and to assure him that no means should be omitted on our part to give the United States forts all the protection which our militia could afford, and of our disposition, in every particular, to co-operate with him and the forces under his command, in providing by our united efforts every proper security against apprehended danger. This disposition was reciprocated by him; and to enable us more effectually to carry the views of both parties into effect, he agreed that Major Weeks and Adjutant Bray (two intelligent militia officers placed in the United States service by a former detachment, and by whom many of our important operations will be conducted,) should receive their orders from and make their returns to General Richardson. I am sorry, however, to inform you that the detachment of the militia which was made principally from Oxford county, and which I inspected before I left Portland, is undisciplined, badly armed, miserably provided, and worse commanded. These men, who are without or have useless muskets, will therefore be placed in Fort Burroughs and the other batteries, or put on fatigue duty, and the residue so divided in their stations as to leave each division under the command of the most intelligent of their officers. Though it is the only means of defence we can at present afford, yet my short experience convinces me that the system of defence by militia is the most troublesome and expensive as well as the least efficient that could have been devised by a wise people."

*Extract of a letter from Major General Richardson to Colonel William H. Sumner, dated Portland, September 30, 1814.*

"I have not yet sent any troops to Fort Scammel, and fear, when I attempt it, to be under the necessity of calling in a stronger force than I now have to compel obedience. A few of the officers wish to do their duty, but the most of them are worse than their men. To arrest or discharge them would be useless, as there is no prospect of getting better to supply their places. To break them would be impossible, as they would be tried by those who are governed by the same unmilitary principles as themselves."

*Extract of a letter from Colonel Sumner to Major General Richardson, dated Wiscasset, October 1, 1814.*

"As to your refractory troops, I have lost all patience with them. We have yielded too much to them already. I would have obedience, by using policy first; and, if that did not answer, by force. If you order over one company, and they see the places, and know that a plenty of boats are there to take them off in case of too much danger, others will also be willing to follow. Perhaps they may be ordered over at first to do fatigue duty by day and return to their quarters in town at night, and afterwards you can have their tents sent over and keep them there. If plans of policy do not answer, call on the Portland regiment to compel the execution of your orders, and arrest the first officer who refuses and as many as refuse, and trust the issue."

*Extract of a letter from Colonel Sumner to Adjutant General Brooks, dated Wiscasset, October 1, 1814.*

"In the arrangements made for the defence of Portland, Bath, and Wiscasset, I have been governed by the principle which his excellency the governor had regard to, in making a detachment for the defence of Boston before I left there, not to order out for any place under the authority of the State a greater number of troops than the United States, or the officers acting under their authority, would have undertaken to defend it with upon their own responsibility. This was our general rule, and was varied from only when we thought the necessity of the case authorized an increase of force. When the detachment of one thousand infantry was made at Portland, with the expectation of placing it in the United States service, according to General Dearborn's request, it was organized into one regiment, according to the principles of the general order of July 18, which directed a detachment of a similar number of men to act under the same authority. Since it has become necessary for Major General Richardson to retain the command of that detachment, he will not find the organization so convenient as that provided by our militia law. He, however, upon looking over his roster, thought, by arranging the detachment into two regiments, and thereby increasing the number of officers, he should only augment the expenses of the government without adding to the security of the people or diminishing his own trouble."

*Squam Island.*

Expenditures in respect of the services of Lieutenant Colonel E. Cutter, four officers of his staff, and four companies, commanded by Captains Adams, Goodwin, Sprowl, and Winslow, for fifteen days in September and October, 1814, and in respect of the erection of a battery.....		\$3, 441 31

By a division order of Major General Wm. King, dated September 27, 1814, he directed Brigadier General Payson to order a detachment of two companies from Lieutenant Colonel Cutter's regiment, and a like detachment from Lieutenant Colonel Day's, for fifteen days' services at Squam island; and by the same order he directed that Lieutenant Colonel Cutter should consider himself commander of these troops. Under this order the militia last specified appear to have entered on duty. As will be hereafter shown, an arrangement was entered into between Major Generals King and Sewall, and Colonel Sumner, for detaching, for forty days' service, two regiments of General Sewall's division and four companies from the division of General King, to be taken in part from militia then on duty, and the remainder from militia to be drawn from their homes; and a letter of Colonel Sumner to the State adjutant general, dated October 1, 1814, contains a statement on the subject to the following effect: "As the companies from General Sewall's division, which were not detached here, could not be expected in less than a week, General King kept four additional companies of his division for fatigue duty fifteen days, unless sooner discharged. General Sewall's detachment is now all here, and in a few days the stockade on Squam island will be finished, and the four additional companies will then be dismissed."

The companies were discharged, two of them on the 12th, and the other two on the 15th October.

*Bristol, Boothbay, Cushing, Camden, &c.*

Expenditures in respect of part of a company commanded by Captain Flint, in service from the 30th September to the 8th November; part of a company commanded by Lieutenant Levi Soul, in service from the 5th October to the 14th November; a company commanded by Captain Kinney, in service from the 1st October to the 9th November; a company commanded by Captain Palmer, in service from the 12th September to the 11th October; a company commanded by Captain Curtis, in service from the latter date to the 19th November; and a company commanded by Captain Reed, in service from the 29th September to the 9th November 1814.....		\$9, 139 81

Under the arrangement before alluded to, and which will be hereafter more fully set forth, Major General King was to furnish for the frontier towns of Bristol, Boothbay, Cushing, Camden, and such other towns and places as required defence, four companies under captains, who would each have a separate command. Agreeably thereto, General King, by his division order of the 27th September, 1814, before referred to, directed the ordering out for forty days' service, unless sooner discharged, of two companies from Lieutenant Colonel Foote's regiment, to do duty within the local district of his command, and of one company from the regiments of Lieutenant Colonels Thatcher and Day, to do duty on the seaboard, at such places as the colonel might direct; and by the same order General King gave permission to Captain Reed to raise a company of volunteers for forty days' service at Boothbay. Captain Flint's command was taken from the regiment of Lieutenant Colonel Day, and Lieutenant Soul's from that of Lieutenant Colonel Thatcher, and together were in force about equal to a company. One of these commands was stationed

at Bristol, and the other at Cushing, Friendship, and Waldoborough. The companies of Captains Kinney and Curtis belonged to Lieutenant Colonel Foote's regiment, and the former was stationed at Thomaston and St George, and the latter at Camden. Captain Palmer's company was detached from the same regiment, under a division order of General King issued on the 7th September, and was stationed at Camden for thirty days, commencing, as is before shown, on the 12th of that month, and terminating on the 11th October, when the company of Captain Curtis entered on duty there. The arrangement of Generals King and Sewall, and Colonel Sumner, applied therefore, to the company of Captain Palmer, only during a portion of its service. Captain Reed's company was stationed at Boothbay.

These companies were all in addition to the force called for by Major General Dearborn's requisition; and it does not appear to have been in contemplation to place any of them in the United States service.—(See Adjutant General Brooks's letter to Major General Dearborn of the 4th October, 1814, and the reply thereto, both hereafter set forth.)

*Sundry places.*

Expenditures in respect of several detachments of cavalry, in service in September and October, 1814.....	\$1,094 68
Deduct excess for rations, &c.....	22 20
Admissible.....	1,072 48

Two of the detachments were taken from the brigade of Brigadier General McCobb, and the remainder from Major McCrate's battalion, belonging to the brigade of Brigadier General Payson. The brigade of Brigadier General McCobb was ordered out by Major General King on the 10th September, 1814, and soon afterward entered on duty; and by division orders of the 27th and 28th of that month General King directed the discharge thereof, with the exception of twenty men of the cavalry, officers included, and a small detachment of artillery; and by another like order, dated the 4th October, he directed Brigadier General McCobb to discharge the cavalry then on duty, except five, who were to be posted for vidette purposes, and for whose discharge an order issued on the 31st October.

Major McCrate, by a division order of General King of the 22d September, 1814, was required to establish lines of videttes from Wiscasset to Camden, from Wiscasset to Boothbay, and from Wiscasset to Bath, and also up the Kennebec, should General Sewall consider it necessary, and to forward communications from Colonel Sumner at all times with promptitude. For discharging the militia of General Payson's brigade, save certain detachments, General King issued a division order on the 27th of September, 1814, and by this he directed Major McCrate to continue in service 26 of his command for vidette duty. The services of any cavalry of either brigade, as videttes, do not appear to have been stipulated for in the arrangement between Generals King and Sewall and Colonel Sumner, (nor to have been required by Major General Dearborn;) but as the same are shown to have been performed whilst the troops detached pursuant thereto were on duty, and as Colonel Sumner appears to have been informed by a letter of General King, addressed to him on the 2d October, of the general's intention (which the rolls evince to have been soon afterward carried into effect) to reduce the number to be kept out as videttes, the employment of the cavalry detachments before mentioned for this purpose is presumed to have had the colonel's sanction, and the expense thereof is, therefore, entered in this statement.

*Bath and Wiscasset.*

Expenditures in respect of the services of Lieutenant Colonel Sweet, two majors, a surgeon, surgeon's mate, quartermaster, paymaster, adjutant, chaplain, sergeant major, quartermaster sergeant, two principal musicians, and eight companies, having therein, including officers of all grades, about 570 men, stationed at Bath and its vicinity in September, October, and November, 1814; of Lieutenant Colonel Sherwin, two majors, a surgeon, surgeon's mate, quartermaster, paymaster, adjutant, sergeant major, quartermaster sergeant, two principal musicians, eight companies of infantry, and a company and detachment of artillery, having therein, including officers of all grades, about 640 men, stationed at Wiscasset and its vicinity in September, October, and November, 1814; and of Brigadier General Payson, and his brigade major and brigade quartermaster, stationed at the latter place during the same time; also, in respect to the reparation of barracks at Coxe's Head, the erection of a fort there, and a battery and gun-house at other places; the cost of ammunition, mounting cannon, &c.....	\$43,472 47
Amount credited for articles sold after the war.....	174 31

	10,644 32
Admissible.....	32,653 84

These militia, with the exception of Brigadier General Payson and the two officers of his staff, were part of Major General Sewall's division.

Among the preceding entries concerning the troops called out in September, 1814, for the defence of Boston, is the copy of a requisition from Major General Dearborn upon Governor Strong for certain militia detachments for United States service, and whereof 1,000 infantry and 100 artillery were for the

defence of the seaboard between Kennebec and Penobscot rivers, within which limits the militia before specified, belonging to the divisions of Major Generals King and Sewall, were on duty; and among those entries there are also copies of other documents connected with that requisition. The appointment of Lieutenant Colonel Sumner and his instructions are set forth in the foregoing entries relative to the militia called out for the defence of Saco, Biddeford, and Arundel, and of a letter from Major General Dearborn to Adjutant General Brooks, dated 7th September, 1814, a copy will be found in the entries as to the militia in service at Portland. The additional information, which has been collected from the documentary evidence as pertinent to the subject, is contained in the following copies and extracts:

EASTERN SUB-MILITARY DISTRICT, *Headquarters, Portland, September 18, 1814.*

SIR: Do you consider it absolutely necessary to keep constantly in service at Georgetown, Wiscasset, or any of the ports east of those places, a larger force than is sufficient to garrison the forts? If you do, I will thank you to inform me what number you should deem necessary, and I will write immediately to General Dearborn on the subject. In the meantime, should Colonel Sumner, aid to Governor Strong, arrive at Bath, and conclude to place under my command, (as he appears to be authorized to,) in the service of the United States, a body of militia, (which, I think, from some interrogations he applied to me the other day, he probably will do,) not exceeding two battalions, I will consider them in the service of the United States, until the decision of the commanding general of military district No. 1 shall be known on the subject; and I have no doubt but that they will be continued in service until the season is so far advanced as to render their services unnecessary.

I will thank you to give me your opinion on the subject with as much promptness as you can conveniently, whether Colonel Sumner visits you or not.

Should a larger number of militia be received into the service of the United States than is necessary to garrison the forts, you will readily perceive the propriety of their having as little communication as possible with the forts; at the same time to have them quartered in such a manner as to render the greatest possible aid to the forts. The troops that have been some time in the forts are better prepared to defend them than new troops; it will not therefore be expected that any change will be made relative to the command of the garrison without my order. The troops received into the United States service must be mustered and inspected.

Very respectfully, your obedient servant,

JOHN CHANDLER.

Major General KING.

A requisition was made by Major General Dearborn upon Governor Strong on the 8th of July, 1814, for certain detachments of artillery and infantry for United States service at different posts, and was complied with; and nearly 200 infantry and artillery, part of these detachments, (which were received into the service of, and were paid and supplied by, the United States,) appear to have been stationed for about three months, commencing in the beginning of August, 1814, in the United States forts and garrisons at Damariscotta, St. George's, Edgcombe, and Phipsburg, (being all within the limits of General King's district,) and to these, it is presumed, allusion is made in General Chandler's letter.

WISCASSET, *September 19, 1814.*

SIR: Your letter under date of the 18th instant is now before me. You ask if I consider it necessary to keep in service at Georgetown, Wiscasset, &c., a larger force than is sufficient to garrison the forts. I answer that we have not a fort in this section of the country; that our batteries are calculated for defence against vessels only; and that in most of the cases they would be taken by about an equal number of land forces, landing in their rear, as the batteries contain of ours. The batteries themselves are to be defended only by land troops, and this will require, I fear, more than we shall be able to obtain. I have had a consultation with General Sewall and Colonel Sumner on this subject; and as far as I have been able to ascertain their opinions, 1,000 men is considered necessary at this place, and 800 at Bath and Georgetown, exclusive of a few Augusta troops, and a former detailment.

The men will be mostly taken from General Sewall's division, and they will be, I am confident, ordered out and paid by the State, if the United States decline doing it, which I hope will not be the case. The economy of the general government has already cost us nearly half of the district, and if it be continued without State interference Sir John Sherbrooke will have the whole before winter sets in. I am inclined to think the number named by General Sewall and Colonel Sumner is short of what is necessary; but we would begin with them. There will not be the least difficulty in relation to the officers now commanding the batteries continuing to command, as they certainly should do. The troops to be ordered out will, I trust, occupy positions much stronger and better capable for defence; and will, I trust, be able to defend the batteries.

WILLIAM KING.

Brigadier General CHANDLER.

EASTERN SUB-MILITARY DISTRICT, *Headquarters, Portland, September 20, 1814.*

SIR: Yours of yesterday has been received, which contains an extract from General Dearborn's of the 4th instant, by which it appears that it was undoubtedly General Dearborn's instructions to have 1,100 men for the defence of the coast east of Kennebec. I have therefore written Colonel Sumner on the subject, and presume he will order them out accordingly. A copy of my letter to him is enclosed. I have this morning received an order to repair to Portsmouth, New Hampshire, and assume the command of that post. I shall probably leave here the day after to-morrow; it will therefore be impossible for me to visit you. So soon as the troops, which may be ordered out by the governor, shall be in the service of the United States, I wish them to be disposed of in such a manner as you may judge most proper for the defence of the coast. I shall enjoin it on all the officers of the several posts and detachments on and east of the Kennebec, under my command, to respect your opinion in all cases relative to the disposition of the troops for the defence of the coast. Should a greater force than 1,100 be necessary for the protection of the country on and about the Penobscot, I can only say to you that I have no authority from the President to make a requisition on Governor Strong for troops; but Colonel Sumner, who is now with you, appears

to be empowered to detach such a number as may be necessary. Perhaps he will deem it proper to order out a detachment immediately for the Penobscot. In the mean time I will write to General Dearborn on the subject, and enclose to him a copy of your letter, and he will, perhaps, think proper to make a further requisition for troops to protect that part of the country.

Very respectfully, sir, your obedient servant,

JOHN CHANDLER, *Brigadier General.*

Major General WILLIAM KING.

EASTERN SUB-MILITARY DISTRICT, *Headquarters, Portland, September 20, 1814.*

SIR: I am informed by General King that General Dearborn has requested his excellency Governor Strong to order out and place in the service of the United States 1,000 infantry and 100 artillery, for the defence of the sea-coast from Kennebec to Penobscot; but I understood you to say, when here, that General Dearborn's requisition was for a certain number of men, without apportioning them to any particular place. As there can be no doubt, however, but that the 1,100 men above mentioned were intended by General Dearborn for the defence of that coast, I should wish to have them ordered into the service of the United States accordingly. I will write to General King relative to the disposition of any detachment that may be made.

Very respectfully, sir, your obedient servant,

JOHN CHANDLER, *Brigadier General.*

Col. WM. SUMNER, *Aide-de-camp to Governor Strong.*

EASTERN SUB-MILITARY DISTRICT, *Headquarters, Portland, September 21, 1814.*

DEAR SIR: I have this morning received your letter of yesterday, by which I understand it to be your opinion, and the opinion of General Sewall, that 1,800 troops are necessary for the defence of Wiscasset, Bath, Georgetown, &c., exclusive of the few now at the forts and batteries. I have no doubt but that Colonel Sumner will order a detachment of 1,100 men, according to General Dearborn's requisition. I wrote to him on that subject, and enclosed to you yesterday a copy of my letter. If 700 men more are necessary for the defence of the country, it will certainly be proper to receive them into the service of the United States, and I will do it if Colonel Sumner will order a detachment to be made; but I have no authority to make a requisition on the executive of the State for troops; I will, however, write immediately to General Dearborn on the subject, and I presume he will make the necessary requisition. Should a detachment be made, you will readily perceive the necessity of having an officer of the Quartermaster General's department in your quarter; General Dearborn directed me to appoint one for that part of the district, but I have not been able to find a suitable character, not being acquainted with the inhabitants.

Very respectfully, sir, your obedient servant,

JOHN CHANDLER, *Brigadier General.*

General WM. KING

*Extract of a letter from Colonel Sumner to Adjutant General Brooks, dated September 22, 1814.*

"The day I left Portland I requested, by note to General Chandler, information from him whether he considered any part east of that as requiring defence, and whether, if troops were ordered out for the defence of them, he would pay and supply them at the United States expense. This, in conversation before, he thought would be done if an officer of rank which he should send with me, if possible, or General King, who, otherwise, he would write to on the subject, should think any troops necessary for the defence of the eastern part of the district. On my arrival at Bath, General King informed me that he had received no communication from General Chandler, though General Dearborn had written him that he had requested 1,000 infantry and 100 artillery for the defence of the country east of Portland. As General Chandler had no information on this point, he sent him a copy of General Dearborn's letter. The same day he received from General Chandler a letter stating that if he thought it necessary to call for any troops for the defence of the country east of Portland, he would receive them, not exceeding two battalions, till General Dearborn's advice or orders respecting them should be received. The objections to receiving such a detachment were, the inefficiency of it, the inability of the United States commissary here to furnish suitable rations, and the conditions annexed to it; and lastly, if the United States organization was adopted, which we supposed would be expected, we should not have officers enough for the extensive frontier on which they might be stationed.

"We proceeded in making a detachment of two regiments of infantry under two lieutenant colonels, and one company of artillery from General Sewall's division for the posts at Bath and Wiscasset, and four companies of infantry from General King's, for other places as above. While thus engaged General King received a letter from General Chandler, informing him that he was ordered to take command at Portsmouth, and enclosing to him a copy of a letter which (in the letter to General King) General Chandler said had been sent to me, but which has not come to hand, requesting 1,100 men to be placed in the United States service for the defence of the country between the Kennebec and the Penobscot."

WISCASSET, *September 22, 1814.*

"By an arrangement made by General Sewall, General King, and Lieutenant Colonel Sumner, for the defence of Bath and Wiscasset, and the sea-coast of General King's division, it is understood that General Sewall shall furnish eight companies of 64 rank and file each, and one company of artillery of 50 men, for the defence of Wiscasset and Sheepscot river, and eight companies of infantry of 64 rank and file each, for the Kennebec, to be stationed at Bath and Phippsburg; the infantry to be arranged into two regiments under the command of lieutenant colonels. General King will furnish for the frontier towns o

Bristol, Boothbay, Cushing, Camden, and such other towns and places as require defence, four companies under captains, who will each have a separate command.

"Until General Sewall shall furnish his detachment for this post, he shall retain of his troops now here a number somewhat greater than is intended to be stationed here after the detachment is made. General King, for the defence of Kennebec, will retain of his troops now stationed there about the same number as is intended by this arrangement for its defence, till General Sewall's detachment arrives to relieve them."

A true copy of the agreement entered into by and between Major General Sewall, Major General King, and Lieutenant Colonel Sumner, at the time and place of its date.

Attest:

H. SEWALL, *Major General 8th Division Militia of Massachusetts.*

WISCASSET, *Friday, September 23, 1814.—1 o'clock, p. m.*

I have just received a letter from General King enclosing one to him, of which the annexed is a copy, from General Chandler. General King in his letter requests me to inform him of our determination, and of the number we would advise him to detach in addition from his division. To which I wrote the answer, also herewith communicated. We were misinformed when told that a frigate and a transport or two were seen going up the Penobscot. None have gone up. I have also learned that Lieutenant Colonel Ulmer has dismissed his regiment.

I have the honor to be, sir, your most obedient and very humble servant.

WM. H. SUMNER.

Hon. JOHN BROOKS, Esq.

The letter referred to of General Chandler is the one before set forth, dated September 21; of the answer to General King the following is a copy. General King's letter is not furnished:

WISCASSET, *September 23, 1814.*

SIR: After our determination yesterday upon the number of troops to be detached, the mode of organizing them into two regiments, the places where they are to be stationed, and the service they were to be employed in, and having also made a contract for the supply of their rations, I wrote to the adjutant general and informed him of the course we had agreed on, the reason which induced it, and that it was determined the detachment should be kept in the State service till his determination of the course to be pursued was received. General Sewall has already proceeded and made his detachment from the regiments which were here, and is just starting to Hallowell to complete it there, of which he requested me to advise you. Under the circumstances, we have concluded to preserve the arrangements yesterday made between us and to wait the orders of the government, which will soon be received.

There were seven ships seen on Wednesday evening passing Camden for Owl's Head. I shall be at Bath on Monday.

I have the honor to be, sir, &c.

WM. H. SUMNER.

Major General KING.

Colonel Foote says the ships were seen off the White islands, near Owl's Head.

*Extract of a letter from Colonel Sumner to General Chandler, dated Bath, September 27, 1814.*

"Your answer of the 20th instant to my letter of the 17th, in which I inquired whether, if you thought any position of the country east of Portland required protection, you should think proper to take troops into the United States service therefor, I have just received on my arrival here this evening. In this you express your desire that eleven hundred men, which you state had been requested by General Dearborn of Governor Strong for the defence of the seaboard from the Kennebec to the Penobscot, may be ordered into the service of the United States. You are well aware that the state of anxiety and alarm which had for some days existed in this part of the district was such that prompt and efficient measures were necessary to be adopted for its security. Not having received an answer to mine to you of the 17th, I was engaged with Generals Sewall and King on the 20th in making arrangements for this purpose. We all agreed in the opinion that, in addition to the United States forces, a regiment at least would be necessary for the defence of each of the towns of Bath and Wiscasset, and that four companies more would be required to defend other less important places. While thus engaged General King received a letter from you, stating that you would receive a body of militia not exceeding two battalions, and consider them in the service of the United States till the decision of the commanding general of military district No. 1 should be known on the subject. To that proposition the following objections arose: first, that the number of troops requested would be quite inadequate for the defence of so extensive and assailable a frontier; second, that the condition annexed to your request for placing the troops in the United States service rendered it uncertain whether the troops, if detached, would be retained in that service by the commander of the military district; third, that if, after a detachment should have been made, and all the militia which was then called in for the protection of the seaboard discharged, the commander of the military district should dismiss the detachment, large towns and thirty or forty thousand tons of shipping would remain entirely unprotected for some days, which would be required to provide new means for their defence; fourth, that the United States contractor here for furnishing rations to the troops in the service of the United States could only be able to comply with the terms of his contract by the means which the government should furnish him, and at the rate at which he had contracted to supply them was such that it would be impossible for him to obtain such supplies. We accordingly proceeded and detached the number of both officers and men which we considered necessary, and assigned them their posts and

duties. Of all which doings, in my despatch of the next day, the government was informed. After this plan and arrangement had in part been carried into effect by General Sewall, and the officers commanding troops of his division not detached had received their order of discharge, General King informed me of your willingness to receive into the United States service a larger number of troops than you had before proposed, thereby obviating a part of the objections which had induced us to make the aforementioned plan; the substantial ones yet remained to its proposed change. I was extremely sorry, also, to learn from the same source of your removal in the command in the capital of this district to Portsmouth, which could not but have some influence on our decision. I have taken the liberty thus minutely to mention the particulars of our proceedings, lest by the omissions of the details an imputation might have been made of an indisposition in me to place the militia in the service of the United States, according to the principles we had agreed on, to which his excellency the governor had no objections; and to induce you to attribute the course pursued to the desire I had strictly to comply with the instructions I had received, 'promptly to provide every practicable means of defence for the inhabitants of this district.'

*Extract of a letter from Colonel Sumner to Adjutant General Brooks, dated Bath, September 28, 1814.*

"On my arrival here yesterday I took from the post office General Chandler's letter to me of the 20th instant, (a copy of which you have been furnished with, taken from General King's letter,) requesting 1,100 men to be placed in the United States service for the defence of the country between the Kennebec and Penobscot. Having received many communications from him, in compliance with the rules of civility, which require some answer, I wrote one, of which a copy is herewith forwarded, hoping thereby in some degree to strengthen our claims for remuneration from the government of the United States for the great expenses which he had incurred in our necessary defence. At the request of General King I yesterday accompanied him to Cox's Head, near the mouth of the Kennebec, to view a fort with two bastions which he has been erecting on that very elevated and commanding position. He took the responsibility of this upon himself, in consequence of the badness of the situation of the natural fort, and the inattention of the national government to keep even the platforms in repair, and into which he would not venture any of the troops. Without this new fort there was nothing to prevent the enemy from entering this river at his pleasure. The expenditures for it will be from ten to twelve hundred dollars; the labor has been done by the militia. He has borrowed for the new fort three eighteen-pounders of General Chandler, and wants two small pieces to protect the curtains of his fort. For this purpose I have ordered a three-pounder of ours here to be mounted, and have purchased a nine-pound carronade, with all its apparatus, and about four hundred pounds of grape and round shot, for fifty-five dollars."

HEADQUARTERS, *Boston, September 28, 1814.*

Sir: Your communication of this day has been duly received. In reply to your proposition it will be necessary for me to observe that the authority I possess for requesting and receiving a detachment of militia for the service of the United States directs their organization, the principles of which are detailed in my communication to you of the 5th instant. I will readily receive into the service of the United States the 1,800 men you mention, provided it is understood that they are to be organized agreeably to the principles I have alluded to; and there will be no objection on my part to their being considered, after being duly organized and mustered, in the service of the United States from the day the detachment of 1,800 was formed, excluding, however, any supernumerary officers. Will you please to inform me whether I may expect a detachment for Portland, where their services are very necessary at this moment?

I am, sir, very respectfully, your obedient servant,

H. DEARBORN.

Maj. Gen. BROOKS, *Adjutant General of the State of Massachusetts.*

Of the communication referred to no copy is furnished.

*Extract of a letter from Colonel Sumner to Adjutant General Brooks, dated Wiscasset, October 1, 1814.*

"At my first interview with Generals Sewall and King, at this place, we thought that 1,800 men would be necessary permanently to be stationed on the assailable points of the seaboard, from the Kennebec to the Penobscot, and General King informed General Chandler, who had requested information on that point, of the result of our conference. Knowing, as General Chandler had before told me, that he should not act without General Dearborn's orders, and that those would not probably be received under a week, and being fully impressed with the necessity of dismissing within that time three or four thousand of the troops then under pay, and whose families were suffering, we concluded the next day to detach for the defence of this part of the country 1,100 men, which General Dearborn, by letter, had before informed General King he had requested of Governor Strong for this purpose; and which, upon further consideration, we thought would be sufficient, if the infantry was organized into two regiments and the whole of the Hallowell regiment was kept in reserve. We accordingly proceeded on this plan, and one of the regiments is stationed at Bath and the other at Wiscasset. This system both the generals approved, having no doubt that the United States plan of organization for this extensive seaboard, assailable at so many points, was not so good as ours, and believing that if General Chandler should be instructed to receive the detachment into the service of the United States, that the plan adopted would be considered by him as the most convenient and suitable which, under existing circumstances, could be devised. We also kept the Hallowell company of artillery in reserve, and detached but fifty artillerists, so that the whole number of men detached is 1,050, rank and file. General King, in one of his letters to General Chandler, which was forwarded to General Dearborn, observed that, 'the economy of the general government has already lost us one-half of the district, and if it is continued, without State interference, Sir John Sherbrooke will have the whole before the winter sets in.' General Dearborn is wounded by this remark, and answers that if the district had not been protected it was not his fault or that of the government of the United States; he had called on Governor Strong for militia, often and again, and had tried various means

of getting an answer, which he never could; he is desirous of *harmonizing* with the State government, has lent them ammunition, &c.; but that, even with respect to the propositions which the committee of the council had made up for ordering out 1,800 men, (as he says was agreed on by us here as a suitable detachment,) nothing decisive had taken place. I stated to General King the course pursued by General Dearborn, in the appointment of Colonel Loring at Boston, his furlough to the major at Salem, and the appointment of Major Lane over Major Weeks, at Portland, &c., and said that, with General Cushing, or any other United States officer but General Dearborn, Governor Strong never had any difficulty; and that if General Dearborn was desirous of harmonizing with Governor Strong he was unlucky in taking his pitch, for what was harmony to his ear was discord to every one else. General King agreed that such a course as General Dearborn had pursued would have been very offensive here, &c. By this letter I learn that you have conversed with General Dearborn respecting placing 1,800 men in the United States service. The commissioners never learned from me that we had agreed on this number, which was never decisively done, and they will give me leave to express a hope that, if it should be thought best to place the 1,050 men into the United States service, they will do it as they are detached and organized, for the season of operations would nearly be over before a new organization could be made. I hope the commissioners will consider the propriety also of requesting General Dearborn to adopt our contract for supplies to the troops with Mr. Wood, as Mr. Herryman, the United States contractor, could not obtain for them such as they would be satisfied with for 17 cents, and perhaps not at any rate, as Mr. Wood has purchased all the necessary articles which were for sale in this neighborhood. As the companies from General Sewall's division, which were not detached here, could not be expected in less than a week, General King kept four additional companies of his division, for fatigue duty, fifteen days, unless sooner discharged. General Sewall's detachment is now all here, and in a few days the stockade on Squam island will be finished, and the four additional companies will be then dismissed. Brigadier General Payson commands here, and General King volunteers his services at Bath."

BATH, October 2, 1814.

DEAR SIR: Yours of the 2d is now before me. I have not received anything further from General Dearborn since you left this place. I shall write General Payson, and direct a further discharge of the cavalry, as there is more on duty than will be necessary, after you leave, for videttes.

I send you, by the bearer of this, some paper, and am, respectfully, your obedient servant,

WILLIAM KING.

Colonel SUMNER.

*Extract of a letter from Colonel Sumner to Adjutant General Brooks, dated Wiscasset, October 3, 1814.*

"General Dearborn having written to Brigadier General McCobb, of the 1st brigade of the 11th division, who is also a colonel or lieutenant colonel in the United States infantry, directing him to take the command of the troops of the United States and the militia detached on this station, an order to place them under a United States officer is anticipated by our militia here, and resistance is already talked of. Orders from General McCobb, acting under Governor Strong, they have been, and will continue willingly to obey; but Colonel McCobb, under General Dearborn's orders, they do not wish to see. If, however, such an order is issued, I will not leave the country until I see it executed."

ADJUTANT GENERAL'S OFFICE, Boston, October 4, 1814.

SIR: This morning I have received a letter from Lieutenant Colonel Sumner that has placed the subject of the detachment drawn from the 8th and the 11th divisions of the militia for the defence of the Kennebec in a clear and definite point of light; it appearing, from this communication, that his former one respecting eighteen hundred men, and which was the subject of my letter to you dated the 28th ultimo, was misconceived by the government here.

It now appears that a detachment of eighteen hundred men, although at the moment it was thought by Generals Sewall and King, and Colonel Sumner, to be advisable, yet that it was not actually made. The following extract of a letter from Colonel Sumner, dated at Wiscasset the 1st instant, will best explain to you the course of the business as it passed between the three gentlemen above named. [The extract here referred to is comprised in the one previously set forth, commencing where that begins, and ending with the figures and words "1,050 rank and file."] From this extract you will perceive the whole number of men detached for the defence of Bath, Wiscasset, &c., the manner of their organization, and the reasons upon which that organization was founded. As it appears to have been the intention of the officers who made the detachment, as well as the commander-in-chief, that when formed it should be considered under your control, in the service of the United States, I am instructed to observe that it now remains with you to determine whether you will receive the detachment into that service, or otherwise. In Colonel Sumner's letter some reference is made to the supply of rations for the troops in the district of Kennebec, which, as it falls within the jurisdiction of the commissioners for sea-coast defence, I shall refer particularly to that board.

I am, very respectfully, sir, your most obedient servant,

J. BROOKS.

Major General HENRY DEARBORN.

ADJUTANT GENERAL'S OFFICE,  
Military District No. 1, Headquarters, Boston, October 5, 1814.

SIR: I am directed by Major General Dearborn to say to you, in answer to your communication of yesterday, that the 1,050 militia detached for the defence of the coast from Kennebec to Penobscot will

be received into the service of the United States; the general reserving the right to organize them into two battalions, one for Bath, and the other for Wiscasset, (each battalion to be under command of a lieutenant colonel,) in lieu of two regiments, as proposed by you.

I have the honor to be, very respectfully, your obedient servant,

GEORGE P. PETERS, *Assistant Adjutant General.*

Hon. JOHN BROOKS, *Adjutant General of the State of Massachusetts.*

*Extract of a letter from Colonel Sumner to Adjutant General Brooks, dated Bath, October 9, 1814.*

“Brigadier General (alias Lieutenant Colonel) McCobb informs me that General Chandler has written and informed him that 1,150 militia will be placed in the United States service, under him. Not having been informed by you of this determination, I presume General Chandler has merely communicated to him his expectations. General McCobb thinks, the time of their service having nearly half expired, that if this should be the case a considerable part of the residue would be taken up in the inspections and arrangements of them. General King hopes it will not be the case. He does not like the principle of placing the State troops under United States officers, thereby depriving the officers of the militia of their authority at the only time when it was worth possessing. He says if this plan is pursued the State will never get respectable men to command in the militia.”

BATH, October 17, 1814.

Sir: At the time of the alarm at this place I advised with the officers on the subject of sending to Hunnewell's Point, in the rear of the United States battery, a detachment to defend the battery. They were unanimously opposed to the measure. As it was considered necessary to have some work at the mouth of the river that could be defended, one of the regiments then out was employed on fatigue duty at Coxe's Head in erecting a fort, I think in a good situation, and which I think can be defended.

At the time the work commenced, as the appearance of things did not admit of delay, I signed an order, on the requisition of General McCobb, directing Quartermaster Clap to furnish a number of articles specified, the whole amounting to about two hundred dollars; but I find, in completing the works, a considerable addition has been furnished. The articles have been furnished under the direction of Quartermaster Clap, one of the representatives, to whom I beg leave to refer you. I should have wrote you particularly on the subject of this fort at the commencement, but Colonel Sumner's arrival made it necessary for me to be some time at Wiscasset. He, at the same time, assured me that he was perfectly satisfied with the arrangement, and that he would write to you to that effect. General Chandler, when commanding this sub-military district, was so well convinced that the battery of the United States at the Point could not be defended, that he directed three of their eighteen-pound cannon to be mounted on the Head, as soon as the work would permit, which has been done. I hope there will be no unnecessary delay in adjusting the bills of Quartermaster Clap, who will be able to explain most particularly every transaction.

I am, sir, respectfully, your obedient servant,

W. KING.

Hon. JOHN BROOKS.

BATH, November 3, 1814.

Sir: I suggest to you that the militia now stationed at Coxe's Head will be discharged in a few days. The garrison and ordnance will be exposed. If the State will put the barracks in a comfortable repair I will place a detachment of the United States troops at that place during the winter as a guard.

I am, sir, very respectfully, your obedient servant,

DENNY McCOBB.

General WILLIAM KING.

*Extract of a letter from Joseph H. Peirce, Secretary of the Board of War, to Colonel Sumner, dated Boston, November 7, 1814.*

“A communication has this day been laid before the board by Major General King, addressed to him by Colonel Denny McCobb, respecting some necessary repairs to be done to the barrack at the works on Coxe's Head, in Kennebec river. We therefore request you to make suitable inquiry, or to visit the place if convenient, and cause the said barrack to be put into a state to render comfortable the guard who may be stationed at that work during the ensuing winter, and without loss of time. You will please to confer with Colonel McCobb as to the number and nature of the guard which he proposed in his letter to General King should be stationed there, and make report to the board before entering into any definitive arrangement on this point.

*Summary.*

Aggregate expenditures .....		\$813, 286 83
Deduct for clothing.....	\$34, 592 14	
Deduct for use of arms.....	4, 269 13	
Deduct for overpayments.....	6, 606 31	
Deduct for excess in the cost of rations over the United States contract price, and in more being charged for than the troops were entitled to..	22, 221 07	
Deduct for allowances to officers for servants.....	\$1, 209 37	
Deduct for quarters and fuel.....	1, 323 56	
Deduct for forage.....	1, 020 47	
	<u>3, 553 40</u>	
Deduct for other miscellaneous items.....	14, 382 75	
		<u>85, 624 80</u>
Admissible.....		<u>227, 662 03</u>

Expenditures incurred in constructing the works of defence, and in procuring the military stores hereafter enumerated, viz:

Fort Strong on Noddle's island, and several other batteries, &c., at and in the vicinity of Boston, in the fall of 1814.....		\$30, 123 58
Platforms in Boston in 1813.....		873 59
Barracks at South Boston in July, 1814.....	\$2, 075 58	
Deduct amount credited for proceeds of sale of these barracks, &c., in 1815.	1, 032 43	
		<u>1, 043 15</u>
Six hulks, for the purpose of being sunk, if necessary, in Boston harbor, September, 1814.....	35, 734 14	
Deduct amount of sales thereof, after the war.....	27, 592 83	
		<u>8, 141 31</u>
Sundry artillery, carriages, and apparatus, harness, tumbrels, &c., made in 1813 and 1814.....		25, 683 56
2,645 muskets, furnished in 1813 and 1814.....		32, 996 69
6,100 cartouch boxes, and 6,100 bayonet scabbards and belts, furnished in 1813 and 1814		12, 331 97
54,595 pounds of gunpowder, furnished in 1813 and 1814.....		39, 274 20
Cannon and musket-balls, lead, flannel, paper, wads, junk, shot canisters, tubes, &c., &c., in 1813 and 1814.....		13, 328 14
Work, &c., in the laboratory, in 1813, 1814, and 1815.....		4, 900 42
815 pieces of duck, and making 1,436 wall and common tents; also, tent poles, lines, buttons, rings, &c., in September, 1814.....		19, 249 62
2,693 canteens, 840 camp kettles, 1,534 pans, 168 pails, and other articles, September and October, 1814.....		2, 619 75
Admissible.....		<u>190, 565 98</u>

The several sums last specified, amounting together to \$190,565 98, although extended into the admissible column, could, in no part, agreeably to the rules which have been applied to the settlement of the accounts of other States, be allowed by the accounting officers without special directions to that effect from the Secretary of War, to whom each particular case, with a representation of the circumstances attending it, would have to be submitted. Under decisions of the late Secretary, allowances have been made to other States for ammunition, camp equipage, accoutrements, &c., necessarily procured for the use of militia called into actual service, and whose services were recognized by the general government; and for the expense of mounting cannon and constructing temporary works of defence for them; the articles thereby becoming the property of the United States, and which the States receiving such allowances had to deliver over or account for. In the present case it is utterly impracticable to ascertain from the papers what portions of the supplies enumerated were so procured, or were used by the militia in service. The acquisition of munitions of war for a general system of defence would seem to have been the chief object of the expenditures, and the fullest explanation which can be collected from the documentary evidence, as well with respect to the necessity or expediency of incurring them, as to the authority under which they were made, is contained in the following copies, &c.

## COMMONWEALTH OF MASSACHUSETTS.

IN THE YEAR OF OUR LORD ONE THOUSAND EIGHT HUNDRED AND THIRTEEN.

A RESOLVE authorizing the governor, with advice of council, to adopt certain defensive measures for the protection of the town and harbor of Boston, and the towns, harbors, and shores of the Commonwealth, and for other purposes:

*Resolved*, That the governor, with advice of council, be, and he hereby is, authorized to adopt such defensive measures, and to carry the same into immediate execution, as may be deemed necessary to protect the town of Boston, its harbor and vicinity, and the towns, ports, and harbors of this Commonwealth from the invasion of an enemy during the present war.

And for the purposes aforesaid, the governor is hereby authorized to employ any officer or officers, person or persons skilled in the science of engineering and gunnery; also to mount such number of heavy cannon, mortars, and howitzers on travelling or fort carriages as may be deemed necessary; to provide munitions of war in sufficient quantities, and all the necessary apparatus for a powerful train of heavy artillery; to ascertain and designate the posts or places where such artillery can act with the greatest effect against the enemy's shipping entering or attempting to enter our posts and harbors; to

cause batteries to be constructed, and breastworks to be thrown up where it may be deemed necessary, with furnaces to heat shot.

And the treasurer of this Commonwealth is hereby authorized and empowered to borrow of any bank or banks in this Commonwealth a sum of money not exceeding one hundred thousand dollars, to be applied to the purposes aforesaid, and to be accounted for accordingly; the aforesaid money to be borrowed in such sums as the governor, with advice of council, shall from time to time direct; and the governor is hereby authorized from time to time to issue his warrants upon the treasury for such sums as may be deemed necessary for carrying into effect the purposes of this resolve.

*And be it further resolved,* That the governor be requested to apply to the Executive of the United States and respectfully request such supply of muskets belonging to the United States as may be conveniently furnished, and as may be considered the proportion to which this Commonwealth may be entitled, to be apportioned and distributed to the several towns of this Commonwealth for the use of the militia thereof, in such manner as the governor, by and with the advice of the council, may deem most for the public service.

Set down for concurrence:

SAMUEL DANA, *President.*

In the House of Representatives, February 27, 1813. Read and concurred:

TIMOTHY BIGELOW, *Speaker.*

Approved:

CALEB STRONG.

FEBRUARY 27, 1813.

COUNCIL CHAMBER, *March 2, 1813.*

The committee of council appointed to take into consideration the resolve of the honorable legislature passed on the 27th of February last, report that it would be expedient for the governor, with the advice of council, to appoint three judicious persons skilled in military affairs, who, in the recess of the council, shall direct the purchase of at least one thousand stand of arms for the use of the State, and give directions for putting into complete repair the arms now in the State arsenal which are worth repairing, and also to purchase such quantities of powder and shot and other articles in the quartermaster general's department as in their judgment the exigency of affairs may require, and to mount such a number of pieces of heavy artillery, either on garrison or travelling carriages, as to them may seem most expedient, and in their discretion to loan a portion of such pieces to the militia companies in Boston, or other parts of the State, if thereto requested, for the purpose of rendering such companies expert in the use of heavy artillery, and to provide them with such ammunition as they may think proper in order to their improvement therein. And further, to view the harbor of Boston, and the places adjacent, so as to form a satisfactory opinion of the most proper sites for the erection of batteries and other works to defend the town and harbor of Boston if such measures shall hereafter appear to be necessary, and generally to carry into effect the obvious intentions of the legislature in the resolve aforesaid.

D. COBB, *per order.*

In council, March 2, 1813. Report read and accepted.

ALDEN BRADFORD, *Secretary of the Commonwealth.*

It appears that on the 2d of March, 1813, the council advised and consented to the appointment of the Hon. William Heath, Hon. David Cobb, and Hon. John Brooks, to be agents for carrying into effect the foregoing resolve and report; and that on the same day the governor appointed and commissioned them accordingly.

NORTHAMPTON, *April 15, 1813.*

DEAR SIR: I have just received your letter of the 12th. The applications for arms, &c., I had no doubt would be very numerous if the war continued. We have a great number of towns on the coast and navigable waters which are exposed to alarms from the enemy, every one of which will probably request some means of defence; for if the militia are supplied with arms, which may not be universally the case, there is a number of exempts in every town who are probably destitute and will wish to be furnished. It will not probably be in our power to comply with all the requests of this sort, even if we should apply the whole sum appropriated by the legislature to purchase the articles, but we must do the best we can with the means we possess; and I wish you and the other gentlemen to make such advances as, in your discretion, you shall think will best comport with the views of the legislature. The lieutenant governor and Mr. Prescott, I have no doubt, will be willing to afford you any assistance in their power.

I have received a letter from General Armstrong in answer to the letter which, at the request of the general court, I wrote to the President, in which he says that the arms provided in virtue of the act of Congress have been inconsiderable in proportion to the militia to be supplied; and the President has deemed it most conducive to the general interest to supply, in the first instance, the frontier States and the militia who have come forward in the service of their country. You will remember that when the number of arms to be purchased was mentioned, some gentlemen expressed their expectation that we might procure of the United States a considerable number; this resource failing, I am confirmed in the opinion that more should be purchased than we proposed.

I expect to go to Boston the week before the meeting of the council.

I am, sir, with much regard, your obedient servant,

CALEB STRONG.

General Brooks.

COMMONWEALTH OF MASSACHUSETTS.

The undersigned, appointed by a commission from his excellency the governor, bearing date the 2d day of March, 1813, to carry into effect certain resolves of the general court for the protection of the town of Boston, its harbor and vicinity, and the towns, ports, and harbors of this Commonwealth from the inva-

sion of an enemy during the present war, having attended to the several objects intrusted to their discretion, do themselves the honor to report a statement of the course of measures they have adopted, the present condition of the arsenals and laboratory of the State in the department of the quartermaster general, and the amount of disbursements that have attended the execution of the objects of their commission.

The first subject that engaged the attention of the commissioners was the state of public arsenals. An interview with the quartermaster general, and a personal inspection of the laboratory, proved to them that, excepting in heavy cannon, there was almost an entire destitution of the munitions of war required for the occasion. To supply these indispensable means of defence, and to mount a suitable train of heavy artillery, in addition to a small number already mounted, became an object of primary importance. Accordingly, on the 4th day of March last, the commissioners, at their first meeting, directed the quartermaster general to provide, as speedily as possible, and in every practicable case by contract, the munitions of war as specified in the schedule marked No. 1, herewith presented, and to cause to be mounted the number of heavy cannon expressed in the same document. While these measures were carrying into effect, a change in the aspect of the war took place from the destination of a large fleet from Great Britain to the coast of the United States, and the appearance of British cruisers on the coast of this State in particular. Under these circumstances, which, in many instances, excited lively apprehensions of danger in our maritime towns, the commissioners were induced, from time to time, to augment the means of defence by larger supplies of the most essential munitions of war, and by a respectable addition of heavy ordnance, mounted, after the most modern and approved models, upon travelling carriages, so as to be able to command, if necessary, in aid of the stationary cannon mounted on garrison carriages, a powerful train of disposable artillery, susceptible of rapid movement and of occasional location. Schedule No. 2 exhibits the number and description of heavy ordnance now fit for service, together with the quantity of military stores, &c., in like condition, in the hands of the quartermaster general. The commissioners would here observe that the ground occupied by the quartermaster general as a laboratory and a depot for the military stores of the Commonwealth, being very limited and inconvenient, they have made application to the selectmen of the town of Boston for a small part of the common for the purpose of arranging a park of artillery, and having been very readily answered in the affirmative, most of the mounted pieces now occupy that station. Thus the commissioners conceive they have essentially fulfilled the primary intentions of their commission and of the legislature, in having caused to be mounted such a number of heavy cannon on fort and travelling carriages, provided with all the necessary apparatus for a train of heavy artillery, and in replenishing the arsenals of the State with a respectable complement of the munitions of war. The other measures contemplated by the resolve that formed the basis of the executive power and of the commission under which they act, the commissioners conceive to be of a prospective and contingent rather than of an unconditional and positive character. The employment of engineers, the construction of batteries, and the throwing up of breastworks appear to be the remote views of the legislature, to justify the execution of which some danger must be known to exist, rendering it necessary or expedient for the public safety that resort should be had to those ulterior measures. Such, however, have been the impressions of the commissioners from the nearest and most distinct view they have been able to take of the subject now under review, that they have ever been impressed with great confidence that means of defence equal to any actual degree of danger were prepared or were in operation. In forming this estimate of the adequateness of those means for the exigencies of the moment, in connexion with the number, the bravery, and the patriotism of the militia, it is proper to observe that reference has been had to the state and quality of the British force on our maritime frontier, and, of course, its capacity for effective operation. Against a powerful fleet, co-operating with an army, a different and far more exalted grade of preparation would have been demanded. But considering the kind of warfare Great Britain has instituted against the United States, and the adaptedness of their measures to effect its accomplishment, the destruction of our commerce, and the incapacity of the British power on our coast to seize and maintain any important station in the populous parts of our country, a further extension of our defensive measures was deemed inexpedient and superfluous.

Soon after the commissioners entered upon the duties of their appointment, they received applications for aid in cannon, muskets, powder, apparatus for artillery, the raising of batteries, embodying the militia, &c., from various towns and places in the Commonwealth. The articles solicited were various. But in every instance when application was made, and an authorized agent appeared to receive and receipt for military stores, a supply was afforded. But the considerations already suggested, with the limited amount of the appropriation for objects of such vast magnitude, compelled us to restrict the supplies to such limits as consisted with the claims of others, under circumstances of equal exposure to invasion, agreeably to the several views of the legislature, as indicated by their resolves. It was, moreover, deemed highly important to hold in reserve as large a proportion of the appropriation as possible, not only with a view to economy, but to meet the ultimate objects of the legislature in case of invasion. Embodying the militia was in nowise within the power of the commissioners. The aid usually furnished was designed to repel desultory and predatory incursions, and was of course modified by circumstances. Schedule No. 3 contains a specification of the kind and quantity of military stores sent from the arsenal, with their destination. The town of Boston, as the metropolis and great emporium of Massachusetts, received the early and solicitous attention of the commissioners. The several eminences and wharves in that town, and the grounds in its vicinity, were carefully viewed and examined, with a view of ascertaining their positive and relative merits as positions for batteries. But, from the considerations which have been already stated, the exercise of the ultimate powers of their commission has been deferred. And the commissioners are happy to find that events have given sanction to their reasonings and to the course of measures they have pursued; and that the Commonwealth having in its arsenals the means of protecting its maritime frontier, highly improved and augmented, the time has arrived when the defence of the State will be referred to the wisdom and guidance of the legislature.

W. HEATH.  
DAVID COBB.  
JOHN BROOKS.

MAY 29, 1813.

*Schedule of sundry articles required of the Quartermaster General as necessary for the defence of the harbor of Boston, &c., &c.*

Six 32-pounds cannon, six 24-pounds cannon, sixteen 18-pounds cannon, to be mounted on garrison carriages. These pieces of ordnance, as well as four 24's, four 18's, and six 12's, already mounted, (the ten latter on travelling carriages,) are to be immediately provided with the requisite apparatus and equipments for actual service. This requisition will include the horse harnesses and chains for moving the cannon to a battery when necessary. A drag for moving heavy ordnance, in addition to one on hand, and both to be furnished with screws, harness, and chains; 20 platforms for the 32, 24, and 18-pounders, to be immediately constructed, and ready to be transported and laid down in the most easy and expeditious manner; 100 shovels; 6 iron bars; — pickaxes, (enough on hand;) 20 wheelbarrows; 20 handbarrows; 1,000 muskets, with bayonets and accoutrements complete; 10 tons gunpowder; 22 tons of shot, different sizes; 2 furnaces for heating shot.

SCHEDULE No. 2.

*Statement of articles purchased in compliance with orders from the commissioners for sea-coast defence, State of Massachusetts, in March last.*

1,000 small arms, at \$11 50 .....	\$11, 500 00
1,000 cartouch boxes, belts, and scabbards .....	2, 000 00
22 tons of shot, at \$100 .....	2, 200 00
500 quarter barrels powder, 12, 500 pounds .....	10, 900 00
28 fort carriages for heavy guns, at \$85 .....	2, 380 00
80 sets of harness for heavy field artillery .....	1, 600 00
Plank, timber, and labor for platforms .....	1, 000 00
1 cannon, drag, and screw .....	150 00
30 pieces flannel .....	780 00
White rope for gin falls, drag ropes, slings, &c .....	300 00
Cartridge paper for cannon, muskets, twine, &c .....	200 00
8 heavy cannon, now mounting on travelling carriages, with apparatus .....	3, 200 00
Junk and yarn for wads, labor in fixing ammunition, and boxes for packing ammunition ..	900 00
Contingent expenses not ascertained .....	3, 000 00
	40, 110 00

P. S.—The article of contingent expenses includes the intrenching tools, furnace for heating shot, the mounting and moving cannon and military stores, and sundry other expenses, the amount of which could not be ascertained.

The third schedule contains a detail of deliveries of cannon, small arms, accoutrements, and ammunition for defence of Kennebunk harbor, Portland, and the town of Surry.

[Extracts from the Journals of the Council.]

COMMONWEALTH OF MASSACHUSETTS.

*To the honorable David Cobb, John Brooks, and Timothy Pickering, esqrs., greeting:*

Whereas, by a resolve of the legislature of this Commonwealth, passed on the 27th of February, 1813, our governor, with advice and consent of council, was authorized to adopt such defensive measures, and carry the same into execution, as might be deemed necessary to protect the town of Boston, its harbor and vicinity, and the ports and harbors of this Commonwealth from the invasion of an enemy during the present war; and whereas, by a resolve passed on the 16th of June, 1813, our governor, with the advice of council, was authorized to erect such fortifications and establish such batteries as might be deemed necessary for the defence and protection of such towns within this Commonwealth as are most exposed to invasion and the casualties of war, and to purchase, mount, and furnish for the use of such towns, a competent number of pieces of ordnance, with other suitable munitions of war, and to establish signals by which to give timely notice to vessels navigating along the coast of an enemy's approach, and to purchase such number of fire-arms for the use of the Commonwealth as shall appear to be necessary; to provide a sufficient guard for arsenals, parks of artillery, and military stores; and to employ one or more persons skilled in the science of engineering and gunnery; and whereas, by a resolve of the 14th of June, instant, our governor is requested and authorized to adopt any and every such measure as to him may appear necessary or expedient for the defence, protection, and security of this Commonwealth or any part thereof; and whereas, the council have advised that it is expedient for the governor to appoint three judicious persons, skilled in military affairs, who shall superintend and cause to be carried into effect such defensive measures, and to make such purchases as are contemplated by the resolves aforesaid:

I, therefore, by the authority derived from the said resolves, and by the advice of the council of this day, copies of which will be herewith delivered to you, confiding in your military skill and in your fidelity and patriotism, do hereby appoint and commission you, the said honorable David Cobb, John Brooks, and Timothy Pickering, esqrs., for the purposes specified in the said advice of council, that the intentions of the legislature, expressed in the said resolves, may be fully carried into effect. And you will, from time to time, make such communications to the governor and council relative to your proceedings as may give them full knowledge thereof.

Witness his excellency Caleb Strong, our governor and commander-in-chief, and the seal of the Commonwealth hereunto affixed, at Boston, this sixteenth day of June, anno Domini one thousand eight hundred and fourteen, and in the thirty-eighth year of the independence of the United States of America.

CALEB STRONG. [i. s.]

By his excellency the governor:  
ALDEN-BRADFORD, *Secretary of the Commonwealth.*

## COMMONWEALTH OF MASSACHUSETTS.

IN COUNCIL, *June 16, 1814.*

The committee appointed to consider and report on the expediency of keeping a distinct record of the expenses incurred by the executive of this Commonwealth, in protecting the citizens thereof during the present war, with a view of exhibiting the same to the government of the United States for indemnification, report that the commissioners appointed this sixteenth day of June, to adopt and carry into effect such defensive measures as may be necessary to protect the town of Boston, its harbor and vicinity, and the ports and harbors of this Commonwealth from the invasion of an enemy during the present war, be requested to keep a distinct and separate record of all the applications which have been made since the commencement of the war with Great Britain, or which may be made during its continuance, from the people of this Commonwealth, or any of them, to his excellency the governor and council, or to the commissioners above mentioned, for aid and assistance in guarding against or repelling the attacks of the enemy within the limits of this State, and the proceedings thereon; and the commissioners aforesaid be also requested to collect and keep distinct accounts of all expenses incurred, or which may be incurred, for the protection or defence of the Commonwealth for the period aforesaid, in addition to such as may be made under their immediate superintendence or direction, to the end that a claim may hereafter be made on the United States for the expense incurred, by affording that protection and defence which the State has a right to expect, and which it is the duty of the government of the United States at all times, and more especially during the existence of war, to provide and to secure, which formed one of the leading inducements for the establishment of the government of the United States, and for surrendering to it all the principal sources of the revenue of the State; and that the commissioners aforesaid be authorized to employ such clerks or assistance as may be necessary to carry the preceding order into full effect.

And the report having been read and considered, is accepted.

ALDEN BRADFORD, *Secretary of the Commonwealth.*

Commodore Bainbridge appears, in a letter to Adjutant General Brooks, one of the commissioners, dated September 5, 1814, and set forth in the foregoing entries relative to General Whiton's corps in service at Boston, to have suggested the construction of batteries on Dorchester Heights and Noddle's island, and breastworks on North Battery wharf.

BOSTON, *Sunday Evening, September 8, 1814.*

Colonel Thorndike and Colonel Perkins, accompanied by Major General Dearborn and suit, visited Fort Warren, Fort Independence, and Noddle's island.

Fort Warren is at present under the command of Lieutenant Colonel Page, of fifth regiment, first brigade, third division, of the militia of Massachusetts. The troops under his present command consist of 415 militia, together with a lieutenant, one sergeant, one corporal, and thirteen privates of the United States troops. The works are, a water battery, called the "*West Head battery*," on which are mounted ten twenty-four-pound cannon. Another work on the southeast point of the island, called "*South Point battery*," similar to the one above mentioned, and mounting also ten twenty-four-pounders. The works on the summit of the island are defended by six twelve and two twenty-four-pounders in the inner work, and by ten twelve-pounders in the outer work, presenting in the aggregate a defence of thirty-four pieces of ordnance. A new work is erecting at this time between the fort on the summit and the "*West Head Water battery*."

Fort Independence is at present garrisoned entirely by United States troops, about 350 in number. General Dearborn has since furnished some minutes respecting the number of pieces on the two fortresses collectively, which see. Furnaces for heating shot are erected in both the fortresses.

On the new fort now erecting on *Noddle's island* about 600 workmen were actually under employ, and the works are progressing with a spirit suited to the exigency of the moment. The engineer, Loammi Baldwin, esq., and the gentlemen who assist him, appear to take great interest in the success of their object, the evidence of which is very perceptible in the rapidity and perfection with which the plans have hitherto been executed. A highly commendable zeal and spirit of patriotism pervades all classes of our fellow citizens in their volunteering their services to work on this and the different fortifications about to be erected in the vicinity of Boston. This laudable ambition will no doubt be continued until the works are completed.

By order of the visiting committee.

JOSEPH H. PIERCE,  
*Secretary to the Board of Commissioners for Sea-coast Defence.*

ADJUTANT GENERAL'S OFFICE, *Boston, September 18, 1814.*

SIR: By the last returns there appears to be mounted at Forts Independence and Warren—

Of 50-pound columbiads.....	4
Of 32-pound columbiads, long.....	29
Of 24-pound columbiads, long.....	39
Of 12-pound columbiads, long.....	22
Of 6-pound columbiads, on travelling carriages.....	4
Of 10-inch mortars.....	4
Total pieces of ordnance mounted.....	102

The mortars have been mounted since the return for August.

Yours, with due respect,

GEO. P. PETERS, *Adjutant General.*

It does not appear to whom this note was addressed; it is indorsed as having been received from General Dearborn, September 18, 1814.

Boston, September 19, 1814.

DEAR SIR: I take the liberty of offering for consideration a rough sketch as an outline of such works as may be contemplated for the defence of the town by way of the neck; the sketch has been hastily made this morning without scale or dividers. The width of the street is mere conjecture. The most approved modern European engineers considered the principle exhibited in the sketch called Creweille as best adapted for field fortifications; it undoubtedly affords a more destructive fire than any other kind of breastwork.

Your humble servant,

Major General Brooks.

H. DEARBORN.

FORT INDEPENDENCE, September 25, 1814.

SIR: Your communication of the 23d has been received and attentively perused. On this and Governor's island there are a sufficient number of men for manning all the works which are now erected or begun. The defenceless positions on Governor's island referred to, have been examined some time since, and works are planned for their defence which I shall lay out on the morrow and cause to be erected. I shall be very glad to receive assistance from the citizens in labor, and should it be afforded, it is desirable that each man should bring a spade, shovel, pickaxe, or wheelbarrow. If a party could be sent of one, two, or three hundred men on Tuesday they can be employed to advantage, as it is highly important that the batteries and such works as cover them should be finished as soon as possible. On the island I have laid out, in advance of the southeast bastion, a battery for three mortars, which will be finished in three days; I have likewise laid out a work from the corner of the south battery on Governor's island, which was commenced yesterday morning; a corner to the west water battery was commenced some days since, and is in great forwardness.

I have received 1,500 pikes from the laboratory in Albany, which were sent to the two garrisons by the order of Major General Dearborn, for the defence of the curtains and bastions of the forts and the parapet of the batteries. All the forts and batteries under my command will, by the morrow or next day, have an ample supply of ordnance stores of every kind. If it could be effected, it is very desirable the Boston and Charlestown sea-fencibles should be stationed in the batteries to be erected on the east and north side of Governor's island every other week alternately, with their cannon and equipments. Two mortars will be placed in Governor's island, and furnaces are and will be erected for heating shot sufficient to supply all the guns with hot shot which can be brought to bear on ships at the same moment, in all the works on the island. I have directed and am now making a new kind of wad for the curtain between Dearborn and Winthrop bastions, which are in rear of the water battery on Fort Independence, and for the hot shot, which will obviate the difficulties you have mentioned. I have this day written to Commodore Bainbridge in relation to the position of the United States ships, and expressed an opinion that if the hulks are immediately sunk and it shall be found the channel is sufficiently obstructed to prevent the near approach of the ships of the enemy, it is advisable to have the Independence and Constitution moored above them to co-operate with the garrisons. I should like to have a consultation with the committee who have in charge the sinking of the hulks as to the site.

The signals which have been established to announce the approach of the enemy are three guns in the daytime from Forts Independence and Warren, and in the night three guns from each fort and a tar-barrel lighted on the crown of the counterscarp opposite to the west curtain of Fort Warren. To discover the approach of the enemy a guard boat is sent from this fort every night, near the mouth of the harbor, with rockets or signals. I recommend that the troops which are to reinforce Fort Independence and Warren, on the event of an alarm, be stationed at Dorchester Point in the old work, which should be repaired. Boats in sufficient number should be stationed there for transporting the troops, which should be sent to the two islands in the following proportion, viz: two-thirds to Governor's island and the remainder to Fort Independence. There should be a large proportion of field artillery, with *case* shot. You may be assured that everything in my power will be done to make a successful defence of the works which I have the honor to command. It gives me great pleasure to learn the determination of the Executive in relation to the absolute necessity of rendering these fortresses impregnable, and you may be assured I shall be happy to co-operate with the military board in such arrangements as may be thought advisable for the protection of the capital of Massachusetts, and the preservation of the honor of our common country. On the event of an alarm Major General Dearborn will assume the command of the two forts, and take the immediate command of one, and the other will be assigned to me.

I am, respectfully, your obedient servant,

HENRY A. S. DEARBORN.

THOMAS H. PERKINS, Esq.

As is before shown, the writer of this letter was the brigadier general on duty with the detachments of Massachusetts militia, placed in the United States service at Boston, and paid and supplied by the general government. The State does not appear to have defrayed the expense of any of the measures pursued by him.

Boston, October 5, 1814.

The commissioners for the defence of the sea-coast, appointed under commissions from his excellency the governor, by and with the advice and consent of the honorable council, beg leave, respectfully, to report:

That they have attended to the duties enjoined upon them by their commissions by purchasing, from time to time, small arms, powder, ball, camp equipage, and other munitions of war. The arms, with accoutrements and ammunitions, have been distributed to towns on the sea-coast, having in view those which are most exposed to the incursions of the enemy, as will appear by the schedule of the quartermaster general. They further report that they have caused to be mounted on carriages, suited to the service to which they are destined, the ordnance belonging to the State; a portion of which has

been sent to the outer posts where they were wanted, and a part retained for the fortifications now erecting in the metropolis and its vicinity.

In places particularly exposed, demands have been made for the aid of military force, and the adjutant general has been instructed to furnish detachments for this service on such a scale as circumstances would permit, as will appear by the returns of that officer.

The commissioners have ordered the erection of fortifications on the following sites, a part of which are already finished and the others constructing under the superintendence of Colonel Baldwin, whom they have employed as their principal engineer: The old forts on the heights of South Boston are ordered to be repaired, and working parties from this and the neighboring towns are daily employed in this service. A battery is to be raised at South Boston Point, opposite to Fort Independence, which will be within point-blank shot of the channel, and will produce a cross-fire, should the enemy attempt that passage. It is intended to throw fortifications across the turnpike and old roads leading from South Boston to Dorchester, both of which are flanked by marshes, which the enemy cannot pass.

To prevent the enemy from landing at Commercial Point, is constructed there, and with the same view, a battery; and other works on a pretty extensive plan have been thrown up in advance of the hill in Dorchester, called Savin or Old Hill, both of which are near to the shores where the enemy would probably land should this place be his object. The ground on Savin Hill affords a very favorable position for the operations of militia, being covered with trees, and being broken in perpendicular cliffs of rock. The positions already named being secured, the only one on which the enemy could make a landing on the south of the town is at Squantum; and this the commissioners think can hardly be attempted, considering the distance by this route to the capital and the nature of the country through which he must pass. The bridges on the Neponset being destroyed, a detour must be made as high up that river as Boise's mills before a good fording place can be met with, making a distance of not less than 16 or 17 miles, exposing him during his progress to the galling fire and destructive attacks of a brave and martial population. On Noddle's island works are now erecting and in great forwardness. To prevent the approach of the enemy to Charlestown, should he land at Chelsea, it is contemplated to erect works across the neck, between Mystic river and Charlestown mill-pond, and the renovation of the works on Bunker's Hill, if on further examination it should be thought to be expedient or within the views of the commissioners. To prevent the approach of the enemy by the bridges connected with the town, and by those at Chelsea, Charlestown, Brighton, and Cambridge, care has been taken to place each of them under special charge of two discreet persons at each bridge, who have under their command fifty or sixty axe-men, who will be instructed to destroy a portion of each bridge when the exigency may arrive which shall require it. The portion of each bridge to be destroyed should be, in the opinion of the commissioners, not less than one hundred feet, inclusive of the draw; it is only in the *last extremity* that this expedient will be resorted to, and not until ulterior directions are given by this board. With those measures of precaution, and the efficient services of the militia, upon whom they rely, the commissioners feel persuaded that no successful attempt can be made upon the metropolis by land.

It has been thought proper to convene at this place a meeting of the major generals and brigadier generals of the 1st, 2d, 3d, 5th, and 9th divisions, and of Major General Whiton, and the other general officers of the detachment under his command, that a concert in operations might be entered into, and from which we have to expect the best consequences. We do not doubt, from the returns of those officers, that a body of not less than 18,000 effective men may be brought to a point with a heavy train of artillery in a very short time after an alarm is given of the approach of an enemy. Videttes are in readiness to communicate with the officers of divisions, brigades, and regiments, and signals are established on the coast to announce the approach of a fleet.

It is known to his excellency the governor and council that a strong detachment of the militia, agreeably to the returns of the adjutant general, has been ordered to Forts Warren and Independence, under the command of Brigadier General Dearborn, 1st brigade, 1st division, of the militia of Massachusetts, and precautions have been taken to throw reinforcements into those forts should occasion require it. The commissioners further report that they have caused to be purchased six vessels, which are prepared to be sunk in the channel in the event of an attack, thus obstructing the approach to the town by heavy ships. The commissioners have been much aided by a committee of the Boston Marine Society in this service.

Considering the high state of preparation for defence of Fort Independence, and the improvements made and making at Fort Warren, the commissioners cannot but feel great confidence that an attack will not be made on the harbor of Boston, or, if made, that it will prove abortive.

The commissioners cannot but regret that the new 74-gun ship lying at Charlestown is not in a situation to aid in defending the entrance to the harbor, not being supplied with cannon, and not having her complement of men, although it must be well known to the Secretary of the Navy that the destruction of that ship and the Constitution would be the principal inducement for the enemy to attempt our port. Had the ship Independence been supplied with her battery of cannon and her complement of men, she, with the frigate Constitution, might have aided materially in the defence of the town by being placed above the sunken hulks protected by the forts.

The commissioners further report that they have applied to General Dearborn, commanding the first military district of the United States, for a supply of muskets on account of the proportion of arms due from the United States to this State from the general government, under a law passed April 23, 1808, and have received from him one thousand six hundred stands, which have been received for and distributed, as before stated. They have a promise from Major General Dearborn for a further supply of arms on the same account as soon as they are received from the arsenal at Springfield. Major General Dearborn has loaned to the commissioners some cannon-howitzers and munitions of war, with a proportion of such other military stores as are not wanted for the service.

From the heavy expenditures of money in the purchase of cannon, arms, munitions of war, hulks, subsistence for the troops, &c., the commissioners have to state that the money received from the treasurer under the resolves of the legislature of February 27, 1813, and February 25, 1814, amounting together to two hundred thousand dollars, has been nearly absorbed, and heavy debts are accumulating, which will require to be provided for at an early stage of the meeting of the legislature.

It is painful to the commissioners to state to his excellency and the honorable council that, from the great extent of sea-coast of this State, and the constant alarm which has pervaded it, large bodies of the militia have been called into service for the defence of their homes, their wives, and their children. Left almost entirely defenceless by the general government, who have sent the principal part of the regular force which had been enlisted into the public service to the Canadian frontier, in place of keeping them

to defend our shores from invasion, it has been necessary to call the husbandman from the harvest of summer labor and the mechanic from his workshop to bear the musket and encounter the fatigues of a campaign.

It is apprehended by the commissioners that not less than ten thousand men have occasionally been in the field, to pay and subsist whom will be required more means than are at the command of the State, without very heavy additional burdens.

In behalf of the commissioners for sea-coast defence.

DAVID COBB.

His Excellency the GOVERNOR.

---

CIRCULAR.

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *War Department, July 22, 1814.*

All cases in which general officers commanding armies or districts may judge it necessary or conducive to the public service to order arms, accoutrements, or other ordnance stores to be delivered for the use of the militia of any particular State or Territory, such arms, &c., shall be delivered in pursuance of the provisions of the act of Congress passed April 23, 1808, for arming the whole body of the militia, and receipts or other proper vouchers are to be required from the governor of the State or Territory in behalf of which such delivery of arms, &c., shall be made, which receipts or other vouchers shall be transmitted to the office of the commissary general of ordnance, who is hereby directed to keep a correct account of all arms, accoutrements, &c., so delivered, debiting each State, Territory, &c., with the amount of arms, accoutrements, &c., which may be delivered for the use of the militia of such State, Territory, &c.

By order of the Secretary of War.

JOHN R. BELL, *Assistant Inspector General.*

His Excellency CALEB STRONG, *Governor of Massachusetts, Northampton.*

---

ADJUTANT GENERAL'S OFFICE, MILITARY DISTRICT No. 1,  
*Headquarters, Boston, September 3, 1814.*

SIR: I have the honor to acknowledge the receipt of your communication dated September 1, 1814, on the subject of the delivery of arms, &c., to the militia, in answer to which General Dearborn directs me to say that he has no other authority to deliver arms to the militia than what is contained in the instructions from the War Department of July 22, 1814, a copy of which I had the honor to enclose you on the 10th August, 1814.

With much respect, I am, sir, your obedient servant,

GEORGE P. PETERS, *Acting Adjutant General.*

J. BROOKS, Esq., *Adjutant General Massachusetts Militia, Boston.*

---

COMMONWEALTH OF MASSACHUSETTS.

FRIDAY MORNING, *September 17, 1814.*

The subscribers having been appointed a committee from the military commissioners of sea-coast defence to wait upon Major General Dearborn, to ascertain whether he was authorized to deliver to any officer acting under the authority of this Commonwealth any fire-arms belonging to the United States, as part of this Commonwealth's proportion of fire-arms, to which it is entitled by virtue of a law of Congress passed on the 23d day of April, 1808, and also to ascertain whether he would lend this State any munitions of war, provided that it should be required, have attended the service assigned them, and report: That they have called upon General Dearborn and requested him to inform them whether he had any fire-arms which he was authorized to deliver to any person or persons, as part of this Commonwealth's proportion of arms due from the United States, to which he replied, in substance, that he had, in Boston, about 1,200 stand, but he was not sure he was authorized by the War Department to deliver them for any other purpose than to arm the militia that was in actual service under the United States, but if they were wanted for the use of the militia that was to be employed in the defence of the State, he saw no reason why he should not deliver them, provided he could have such a receipt from the proper officers as would make this State accountable for the arms thus delivered, and that he would send an order to Springfield for two thousand more; and that he would deliver all that could be spared; and would, moreover, lend to the Commonwealth all the munitions of war which he had under his care over and above what was wanted for the service of the United States, should this State wish to borrow them.

ISRAEL THORNDIKE,

T. H. PERKINS, *Committee.*

---

COMMONWEALTH OF MASSACHUSETTS.

HEADQUARTERS, *Boston, September, 17, 1814.*

SIR: Please to deliver to Amasa Davis, esq., quartermaster general, twelve hundred stands of arms, as part of this State's proportion of arms due from the United States to this State, by virtue of a law passed by Congress on the 23d of April, 1808, the said arms being intended for the use of that portion

of the militia now called out for the defence of the seaboard of this Commonwealth, or which may hereafter be ordered for similar purposes.

CALEB STRONG.

Major General DEARBORN, *Commanding First United States Military District.*

SIR: On the above request, you will please to deliver, immediately, one thousand muskets and bayonets complete to Colonel Davis, quartermaster, and take his receipt.

H. DEARBORN.

Captain TALLCUT, *Ordnance Department.*

*Mem.*—The arms were received accordingly.

BOSTON, *September 20, 1814.*

SIR: I am desired to apply to you, in behalf of the commissioners for sea-coast defence, to know from you when they may expect the arrival of the arms from Springfield. As the demands are very pressing from Cape Cod and the province of Maine, the commissioners are very desirous that the quantity of arms to be received from the United States army should be extended as far as possible, that the many calls made may be at least partially supplied. You will also oblige the commissioners by informing them what sized cannon ball remain in your arsenal, which can be loaned to the State. Some 18 or 32 pound ball are wanted, and the commissioners wish to know if you can supply them.

I am, with respect, your obedient servant,

T. H. PERKINS.

Major General DEARBORN, *Military Commander of the First Military District.*

HEADQUARTERS, *Boston, September 21, 1814.*

DEAR SIR: In answer to your note of yesterday, I must observe, that not having yet received any answer from Springfield, I cannot say with any certainty how soon or what number of arms will arrive from Springfield, but I depend on an answer to my letter by the next mail; and as soon as it arrives, I shall have the pleasure of giving you the earliest information. I have this moment received a return of the 18, 24, and 32 pound balls in the arsenal; some part of them will be required at the forts. On hand, of 18 pounds, 753; of 24 pounds, 452; of 32 pounds, 545; of 6 and 12 pounds, there are upwards of 6,000. I think I may loan the State, of 18 pounds, 400; of 24 pounds, 200; of 32 pounds, 200; and, if required, 1,000 six and 1,000 twelve pound, or more if necessary.

I am, sir, your obedient humble servant,

H. DEARBORN.

Colonel T. H. PERKINS.

BOSTON, *September 24 1814.*

SIR: I have this morning received a line from the storekeeper at Springfield, informing me that my order for two thousand muskets would be complied with.

Yours, respectfully,

H. DEARBORN.

Colonel THOMAS H. PERKINS.

BOARD OF COMMISSIONERS FOR THE DEFENCE OF THE SEA-COAST, *Boston, September 26, 1814.*

SIR: You were pleased to say you would loan to this board a quantity of powder and other munitions of war. From communications from Wiscasset, it appears that about a ton and a half of powder is necessary at that place; it is understood that there is at the fort at Edgcomb between four and five tons of powder. The object of this letter is to know if you will order to be delivered from the public stores or magazines at that fort the quantity of powder alluded to as a part of the parcel to be loaned us.

In behalf, &c.,

ISRAEL THORNDIKE.  
THOMAS H. PERKINS.

Major General DEARBORN.

P. S.—If General Dearborn will be at leisure, Colonels Thorndike and Perkins will call on him at half-past three o'clock.

A letter from Colonel Sumner to the president of the board of war, dated Wiscasset, January 12, 1814, [should have been 1815,] transmitting "Brigade Quartermaster Thomas Nickels's returns of sundry articles borrowed of the United States," contains the following passage: "The return of 30 casks of powder were borrowed by the commissioners of sea-coast defence of General Dearborn, upon whose order on Captain Perry, commanding the United States garrison in this harbor, I received them of Captain Perry, (excepting four casks, which had been before delivered at the request of General King,) as the agent of said commissioners." The casks are shown, by Quartermaster Nickels's return, to have contained 3,000 pounds. A ton more powder is, by a return of Oliver Bray, shown to have been borrowed of the United States at Portland.

Boston, September 27, 1814.

SIR: I take the liberty of enclosing a copy of a letter from Colonel Sumner. You and every other candid man will decide whether such language is proper and useful at this time: *A war declared without the consent or approbation of the government of this State.*

Your very humble servant,

H. DEARBORN.

Colonel THOS. H. PERKINS.

The following is the copy referred to:

SEPTEMBER 21, 1814.

SIR: The present situation of our country is such that the government of this State has found it necessary to assume the attitude of defence in a war declared without its consent or approbation. The national government is bound by the Constitution to protect and defend its citizens against invasion, and for that purpose has the power to receive all duties upon imposts and tonnage, and has also the power to lay internal taxes, all of which have been done by it; yet, owing to the want of a proper application of its resources, or an indisposition to apply them to the uses for which they were intended, the State governments are called upon to defend themselves. The government of this State has determined to do this, so far as its population and resources will enable it; it therefore applies those resources to the defence of those places on the sea-coast which are most assailable and have the greatest interest at hazard. In conformity to this plan, the arms which the State had on hand, and vast supplies of ammunition, have been furnished them, and there are no arms in the quartermaster's care which have not been distributed. More are contracted for, and when received will be delivered to those inhabitants on the frontier and other towns which most need them, and the petition of the selectmen of Sebec will receive their earliest attention.

I have the honor to be, sir, your most obedient servant,

WM. H. SUMNER, *Aide-de-Camp to his Exc'y the Commander-in-Chief,  
and Agent to the Commissioners of Sea-coast Defence.*

Captain EZEKIEL CHASE, *Sebec.*

Boston, September 27, 1814.

SIR: I hasten to answer the note received from you to-day. In all cases collision between the government of the United States and the individual States is to be regretted, and, under existing circumstances, very much to be deprecated. The copy of the letter you communicated contains expressions of *opinions entertained by the writer*, and which should not, most assuredly, implicate either his excellency the governor or the board of commissioners. It cannot be considered as the intention of Colonel Sumner to produce a rupture of the good understanding which so happily exists between you as the commander of the United States military district and the board with which I have the honor to act, which will be always ready to aid, as far as it has the power, to defend our common country. You were so good as to say you would ascertain the quantity of leaden ball, buckshot, or lead which you can loan to the commissioners for the use of the State, and hope the result of your inquiries will enable you to extend the quantity beyond what you thought would be within your power. If you could also loan a further quantity of powder at Portland, either fixed or otherwise, it would oblige us. Communications from Portland inform us that neither powder nor lead is to be found there, and that they are in a great state of alarm. I enclose you a receipt, such as the board think should be given; please to make such an alteration in the phraseology as you may think proper, and fill the blanks with the quantity you can spare of the several articles when the receipt shall be handed you, and the order for delivery received. If Brigadier General Dearborn is in town, please to inform him that a body of laborers will be furnished for Fort Warren on Thursday.

I am, sir, respectfully, your obedient servant,

THOMAS H. PERKINS.

Major General DEARBORN.

Boston, September 27, 1814.

SIR: Your friendly note of this day has been received and duly appreciated. The enclosed memorandum contains the kind and quantity of articles I have it now in my power to loan the State. I presume the muskets will be in town this evening, or to-morrow at furthest. The ordnance is principally at Lexington. My son made a requisition this morning for one of the 8-inch howitzers for a particular purpose, which I have ordered for him.

I am, sir, your obedient humble servant,

H. DEARBORN.

Colonel THOS. H. PERKINS.

BOARD OF COMMISSIONERS FOR SEA-COAST DEFENCE, Boston, September 28, 1814.

SIR: I am instructed by the commissioners to say they have given an order on you for the articles which you have informed me you will loan to the government. When the articles are delivered, this board will give you such a receipt as you may think proper. As soon as you can ascertain what muskets are wanted for the militia doing duty at the forts, and also the quantity delivered to Governor Gilman, you will have it in your power to inform me what further supply of this all-important article can be given

us. The demands are constant and extensive, and are imperiously demanded by the situation of our south shore and of Maine. It is therefore very important that the number should be increased as much as possible, to enable us to meet the demand.

As it is understood that 1,800 troops in the district of Maine are to be taken into the service of the United States, it is expected by this board that, from your large supplies in that quarter of the munitions of war, those troops will be supplied with cartridges, which will diminish the quantity which this board wishes to send (if it has the means) into that part of the State. It is presumed that the 1,100 militia already in the United States service in Maine are supplied with cartridges. I have communicated to Brigadier General Dearborn a set of signals, established between Gloucester and this place, to announce an approaching fleet.

I am, sir, your obedient humble servant,

THOS. H. PERKINS,  
*Per order of the Board.*

Major General DEARBORN.

Boston, *September 28, 1814.*

SIR: You will please to deliver to General Davis, within mentioned, the articles within specified, and take his receipt for the whole, to be returned when called for.

H. DEARBORN, *Major General.*

Captain TALCOTT, *of the Ordnance Department.*

The 18-pound balls are at Fort Independence.

*Memorandum enclosed.*

200,000 musket balls.  
25 barrels musket powder, in addition to 30 loaned at Wiscasset.  
1½ ton of pig lead.  
5 8-inch howitzers, with carriages, &c.  
3 12-pounders, light, with carriages, &c., and perhaps two others.  
800 18-pound balls.  
250 24-pound balls.  
250 32-pound balls, and 600 muskets  
2 10-inch mortars, without beds.

COMMONWEALTH OF MASSACHUSETTS.

HEADQUARTERS, *Boston, September 28, 1814.*

SIR: Please to deliver to Brigadier General Amasa Davis, quartermaster general, six hundred stands of arms, as part of this State's proportion of arms due from the United States to this State, by virtue of a law passed by Congress on the 23d of April, 1808; the said arms being intended for the use of that portion of the militia now called out for the defence of the seaboard of this Commonwealth, or which may hereafter be ordered for similar purposes

CALEB STRONG.

Major General DEARBORN, *Commanding First United States Military District.*

Six hundred stands of arms were received into the State arsenal October 4, 1814.

COMMONWEALTH OF MASSACHUSETTS.

HEADQUARTERS, *Boston, October 6, 1814.*

SIR: Please to deliver to Brigadier General Amasa Davis, quartermaster general, two hundred stands of arms, as part of this State's proportion of arms due from the United States to this State, by virtue of a law passed by Congress on the 23d of April, 1808; the said arms being intended for the use of that portion of the militia now called out for the defence of the seaboard of this Commonwealth, or which may hereafter be ordered for similar purposes.

CALEB STRONG.

Major General DEARBORN, *First United States Military District.*

Received of Captain George Talcott, Dep. Com. Ord., the following pieces of ordnance, small arms, ammunition, equipments, and ordnance stores, loaned to the commissioners for sea-coast defence, and executive authority of the Commonwealth of Massachusetts, by order of Major General Dearborn, under the proviso that said articles are to be returned in good condition when demanded, viz:

Four brass 8-inch howitzers on field carriages, with limbers, trail staves, lead aprons, tompons, and collars, complete.

Three light iron 12-pounders, field carriages, with limbers, ammunition boxes, trail staves, lead aprons, tompons, and collars, complete.

Four 8-inch howitzers, sponges and rammers.

Three 12-pounders, sponges and rammers.

Three 12-pounders, ladles and worms.

Five powder-horns, (strapper,) with ten priming wires, seven linstocks, and seven portfire stocks.

Twenty-four bricoles, three haversacks, and fourteen implement straps.

Wheel harness complete for fourteen horses, and leading harness complete for eight horses, including twenty-two halters.

Twenty-five barrels, containing twenty-five hundred pounds musket powder.

One hundred and eleven boxes, containing one hundred and ninety-nine thousand eight hundred musket balls, weighing eleven thousand and one hundred pounds.

Seventeen pigs of lead, weighing thirty-three hundred and sixty pounds.

One hundred and seventy-five 32-pound cannon shot.

AMASA DAVIS, *Quartermaster General.*

UNITED STATES ARSENAL, *Charlestown, October 6, 1814.*

BOARD OF COMMISSIONERS FOR SEA-COAST DEFENCE, *Boston, October 22, 1814.*

In the beginning of the present month of October, the Hon. Israel Thorndike and Hon. Thomas H. Perkins called on Major General Dearborn, commanding the United States military district No. 1, and requested a further supply of small arms from the number due from the United States to this State. General Dearborn agreed to furnish two hundred stands accordingly. On the 6th instant his excellency the governor was called upon by the commissioners for an order to receive the said arms, which order was immediately furnished by his excellency, and the quartermaster general called upon General Dearborn and presented the order for the arms. General Dearborn, however, peremptorily refused to deliver them, as appears by the statement (now enclosed) from the quartermaster general. The order signed by his excellency is also herein enclosed.

In behalf of the commissioners.

DAVID COBB.

The statement referred to of the quartermaster general is not with the paper. The governor's order is before set forth.

NORTHAMPTON, *December 26, 1814.*

DEAR SIR: I have this moment received the enclosed letter from General Dearborn. Any ordnance, ordnance stores, or ammunition borrowed by this State must have been obtained by the commissioners for sea-coast defence or the board of war. I can hardly suppose General Dearborn intends the powder furnished in the district of Maine; however, I wish you to consult with the board of war and do what, in a view of all circumstances, is right and proper to be done in the business. I have not written to General Dearborn and will therefore thank you to notify him if any measures are thought proper to be adopted in pursuance of his request.

I am, with sincere regard, your most obedient servant,

CALEB STRONG.

General Brooks.

General Dearborn's letter is not produced, nor is the result of his application shown.

In addition to the two and a half tons of gunpowder borrowed at Wiscasset and Portland, as before noticed, and the ordnance and other stores specified in the receipt of the State quartermaster general, previously set forth, further loans appear, by returns of Brigadier Quartermaster Nickols and Lieutenant Bray, to have been made by the United States at Wiscasset and Portland of twenty-five thousand two hundred musket cartridges, three thousand musket flints, one hundred and ninety-two common tents, twenty-six wall tents, two hundred camp kettles, and two hundred mess pans; of these articles, one hundred and five tents, fifty-one mess pans, and fifty-six camp kettles are shown to have been returned to a United States officer.

According to a statement of Quartermaster General Davis the State received from the United States, under the law of Congress of April 23, 1808, muskets and bayonets as follows, viz:

August 26, 1813 .....	1, 500
September 20, 1814 .....	1, 000
October 3, 1814 .....	600
	3, 100

E.

MILITIA AT EASTPORT.

*A statement relative to a regiment of militia called out for the defence of Eastport and its vicinity, in July, 1812.*

Lieutenant Colonel Oliver Shead's regiment, from July 21 to August 31, 1812.

Aggregate expenditure .....	\$4, 295 52
Deduct overpayments .....	52 14
Deduct rations reduced .....	592 04
Deduct miscellaneous items .....	260 24
	884 42
Admissible .....	3, 411 10

The following documents show the circumstances under which Colonel Shead's regiment was called into service:

EASTPORT, *June 28, 1812.*

SIR: The town of Eastport having, by their vote in a regular town meeting, appointed us a committee of safety, we feel it to be our duty to state to you that we think the situation of this place unsafe without some protection from the militia, and that we hope you will order out that portion of it which you may think proper for our safety.

LEWIS FRED. DELESDEMES, *Chairman, per order.*

General JOHN BREWER.

CUSTOM-HOUSE, *Passamaquoddy, July 13, 1812.*

SIR: I have this moment received a letter from the Secretary of War, of which the following is a copy:

WAR DEPARTMENT, *June 27, 1812.*

SIR: Your letter of the 8th instant has been received. The enclosure from General Brewer was transmitted to General Dearborn, who is charged with the defence of the sea-coasts in New England.

Respectfully, sir, your obedient servant,

W. EUSTIS.

L. TRESCOTT, &c.

I have also, by this mail, received a letter from General Dearborn, of which the following is a copy:

BOSTON, *July 1, 1812.*

DEAR SIR: A letter from John Brewer, of your place, to the Secretary of War, of June 6, in which he states the situation of that part of the country, and particularly Moose island. I have, on the 22d instant, by order of the President of the United States, requested the governor of this State to order into the service of the United States, for the defence of our sea-coast, a body of militia taken from those that had been detached and held in readiness for service. One company of artillery and four companies of infantry were for your place; but the governor has declined or neglected to comply with the requisition, and, of course, other measures must be taken.

Very respectfully, sir, your obedient servant,

H. DEARBORN.

Colonel TRESCOTT.

The foregoing completely shows us what we are to expect. What do you think? Will it not be in your power to afford something further as a protection to this place? It is certainly not safe with only its present guard, and the stores that are in it invite the enterprise of the enemy.

In haste, I am, dear sir, your obedient servant,

L. TRESCOTT.

Brigadier General JOHN BREWER.

ROBBINSON, *July 14, 1812.*

SIR: From the exposed situation of this place at this time, and our danger still increasing, and we having kept a watch for ten nights past, which, from the smallness of our numbers, has become too burdensome to be any longer borne, we therefore request you, a commanding officer of the militia, to order out such portion of that body as, in your judgment, is necessary for the protection of this place, presuming the government will sanction so just a request.

THOMAS VOSE,  
JOHN BALKAM,  
JONAS BOND,  
ABEL BROOKS,  
CHARLES SIBLEY,

*Committee of Safety for said town.*

SECOND BRIGADE, TENTH DIVISION, *Robbinston, July 15, 1812.*

Agreeable to general orders from the commander-in-chief, under date of the 3d instant, the brigadier general, by that order, and by the application from the collector of the port and the committees of safety of the towns of Eastport and Robbinston, feels authorized, and considers it his duty, to order the third regiment, under the command of Lieutenant Colonel Oliver Shead, and the company of artillery at Eastport on military duty, for the purpose of defending the lives and property of the inhabitants within the bounds of said regiment, and repelling any invasion of the enemy.

The brigadier general orders that the third regiment, under the command of Lieutenant Colonel Oliver Shead, be immediately assembled and put on military duty in defence of the country against its enemies and every invading foe. The Eastport artillery company will also assemble for the aforesaid purpose.

Lieutenant Colonel Shead will order the several companies on duty in their several local situations, (excepting the Lubec company, which will be attached to the Eastport companies,) and when the whole of any company is not required on constant duty, one-half may do duty weekly, alternately.

Lieutenant Colonel O. Shead will call on the several towns for supplies for the aforesaid troops until government otherwise provide.

This order to be in rigid force until further orders.

JOHN BREWER, *Brigadier General.*

The foregoing is a copy of an order issued at the time of its date, in consequence of applications from Eastport, Robbinston, and Colonel Lemuel Trescott, collector of the customs for the district of Passamaquoddy; the originals, marked A, B, and C, accompany this affidavit. It was also the opinion of the best-informed men among us that the measure was necessary, in which opinion I fully concurred. I also, at the same time, wrote the commander-in-chief, and sent it by my brigade major, Bentlett, express, giving him information of my proceedings, and that, "placed as we are on the borders of the enemy without defence, and with solid reasons for supposing they would shortly attack us, either for plunder or conquest, we cannot but be alarmed; our detached settlements afford to the enemy every prospect of success if they attempt any predatory excursions; our militia (although willing to defend their towns) are in a great proportion without arms, ammunition, or any warlike equipments; and from their poverty, as well as the scarcity of such articles, are unable to procure them, and many of our best soldiers are daily leaving the place for want of employment. It may also be observed that the means of gaining a support from the industry of the inhabitants is totally cut off. We have heretofore received a comfortable living from fishing, the lumber, and a foreign trade, all of which is now at an end; and the inhabitants must generally leave the country, unless some means of support is afforded by government, either by embodying the militia under pay, or by supplying them with the necessaries of life."

In consequence of the foregoing order to Lieutenant Colonel Shead, the companies commanded by Captains Jairus Keen, John M. Perry, John W. Reynolds, and Thomas Vose, junior, the company of artillery commanded by Captain William Hill, and the light infantry company under the command of Sergeant *Abijah Gregory*, were on duty a part, if not all, the time until the detached militia arrived, which was on the last of August. My orders for their discharge are dated August 28, 1812. Lieutenant Colonel Shead and Adjutant John Wood are both dead. When Eastport was captured in July, 1814, the books and papers belonging to Lieutenant Colonel Shead's regiment were all lost.

JOHN BREWER.

STATE OF MAINE, *October 14, 1824.*

WASHINGTON, ss:

Then John Brewer, who subscribed the above, made solemn oath that the same is true.  
Before me,

J. R. CHADBOURN, *J. P.*

TREASURY DEPARTMENT, *Third Auditor's Office, January 30, 1828.*

It will be seen, by referring to the statement as to the militia in the service of the United States, that the executive of Massachusetts, on the 5th August, 1812, issued an order, (expressed to be in pursuance of a requisition of Major General Dearborn,) and in which General Sewall was directed to detach three full companies of infantry, and have them marched as soon as possible to Eastport. It would seem that the detachment thus ordered did not reach Eastport until about the last of August, when, as stated by General Brewer, Colonel Shead's regiment was discharged.

PETER HAGNER, *Auditor.*

F.

MILITIA IN THE UNITED STATES SERVICE.

*A statement relative to the militia ordered into the service of the United States by the executive of Massachusetts.*

<i>At Eastport.</i> — Captains George and Chamberlain's companies, from the 11th to the 31st August, 1812.		
Aggregate expenditure .....		\$7, 074 36
Deduct for overpayments .....	\$2, 484 39	
Deduct for rations reduced .....	858 58	
Deduct for miscellaneous items .....	827 38	
		4, 170 35
Admissible .....		2, 903 91

On the 5th of August, 1812, the executive of Massachusetts issued an order from which the following is an extract: "By the general order of the 3d July last Major General Henry Sewall is appointed to command the eastern division of the militia, which was detached under the order of the 25th of April last, consisting of all the detached militia in the district of Maine. The commander-in-chief having been requested by Major General Dearborn, by order of the President of the United States, to detach a part of the militia, which was detached under the said order of the 25th April, to march to Passamaquoddy for the defence of the posts and harbors on the eastern borders of the Commonwealth, and considering that that part of the State is in a peculiar manner in danger of invasion, and that disorderly persons may attempt to disturb and annoy the peaceable inhabitants in that neighborhood and endanger their lives and property, has thought fit to order, and doth hereby order, that three full companies of infantry of the eastern detached division of the militia be designated by Major General Sewall, and, after being completely armed and equipped, ordered to march as soon as possible to Eastport, in the district of Maine, which is appointed the place of rendezvous. The said three companies will form a battalion, under the command of a detached major, to be designated by Major General Sewall, who will also designate an adjutant and quartermaster, and order the whole to march without delay to the place of rendezvous."

In obedience to the foregoing general order, Major General Sewall issued an order on the 11th August, 1812, detailing a major, and the companies commanded by Captains Thomas Vose, jr., Joshua Chamberlain, and Thomas George, for the service of the United States at Eastport.

It appears from the documents that the executive of Massachusetts notified the Secretary of War, by letter, on the same day that his order was issued, (August 5, 1812,) of his having ordered this detachment to Passamaquoddy; but from some unexplained cause the detachment appears not to have been received into the service of the United States until the 1st of September, 1812; from which time to the 31st December, 1812, when it was discharged, their monthly pay was paid by the District Paymaster Freeman, of the United States army; their subsistence, too, appears to have been furnished by the United States contractor in part from the 1st of September and from the 1st of October, regularly, to the end of the service.

The companies commanded by Captains Chamberlain and George have been paid by the State of Massachusetts from the 11th to the 31st of August, 1812; and their pay for this period, with sundry charges for transportation, subsistence, and other supplies, furnished both before and after the 1st of September, 1812, constitutes the State's claim against the United States on account of the detachments stationed at Eastport under the aforesaid orders.

*At Castine.*—A detachment of eleven men, from the 26th August to 3d September, 1814.

Aggregate of expenditure .....		\$115 20
Deduct for payments for clothing.....	\$7 37	
Deduct for use of arms.....	1 26	
Deduct for overpayments.....	46	
Deduct for excess of rations .....	65 00	
		<u>74 09</u>
Admissible.....		<u>41 11</u>

On the 18th of July, 1814, a general order was issued by the executive of Massachusetts, in accordance with General Dearborn's requisition, for detailing a detachment of two hundred artillery and nine hundred infantry, exclusive of officers, for the service of the United States. Of this detachment, one company of ninety privates, with the requisite officers, were to be detailed from the 10th division, and were directed to march to Castine. A division order to carry into effect the foregoing general order was accordingly issued on the 6th of August, 1814; and by another division order, bearing date the 12th of the same month, the detachment was directed to rendezvous on the 26th, from which time to the 3d of September, 1814, a part of Captain Isaac Perry's company, consisting of eleven men, were paid by the State for services alleged to have been rendered at Castine under the aforesaid orders.

The residue of Captain Perry's company appears to have been stationed at Edgecomb under the command of Lieutenant Henry Little, and were paid and supplied by the United States from the 26th of August to the 26th of November, 1814.

*At various places.*

Aggregate expenditure .....	\$579 14
-----------------------------	----------

The militia, on account whereof these expenditures appear to have been incurred, were placed in the service of the United States pursuant to requisitions of General Dearborn, and were paid and supplied by the United States. The amount, as above charged by the State of Massachusetts, is composed of various small sums paid for transportation of baggage, and rations supplied to portions of sundry companies prior to their arrival at the places where the services were rendered, and will be principally admissible unless payments rendering them otherwise shall be found to have been made by the United States, and, to ascertain which, various searches, requiring considerable time, will be necessary.

RECAPITULATION.

Aggregate expenditure .....		\$7, 768 60
Deduct for payments for clothing.....	\$7 37	
Deduct for use of arms .....	1 26	
Deduct for overpayments.....	2, 484 85

G.

INADMISSIBLE ITEMS.

*A statement applicable to items in the claim of the State of Massachusetts of a class not allowable, on the principles of adjustment applied to claims of other States, for military services during the late war.*

Payments for the hire of sundry boats sent to sea in 1812 .....	\$4, 061 00
---	-------------

It appears that on the 24th of June, 1812, the legislature of Massachusetts, on the petition of Ozias Goodwin and others, "*Resolved*, That his excellency the governor be, and he is hereby, authorized and requested to cause a sufficient number of boats or vessels to proceed immediately to sea, at the expense of the Commonwealth, for the purpose of giving notice to all American vessels that may be found upon our coast of the declaration of war by the Congress of the United States

Brought forward.....	\$4,061 00
against Great Britain, to the end that they may be enabled to adopt such measures for their safety as the occasion may require; and that the governor be authorized to draw his warrants on the treasury for the amount of the expenses that may be necessarily incurred thereby."	
Under this resolve the expenditure appears to have been made by a committee appointed for the purpose by the governor and council. No other State is known to have made a similar charge, and the expense is not considered to be properly chargeable to the general government.	
Payments for wages and provisions of seamen on board the guard brig Henry, at Salem, in October and November, 1814.....	404 78
No explanation as to their services, or the authority under which they were performed, is furnished.	
Expenditures in respect of sundry militia called out at Boston in September and October, 1814.....	\$9,762 04
And of sundry other militia called out in the same months at Salem, Marblehead, &c.....	7,992 99
	17,755 03

The following extracts from general orders of the State executive show the purpose for which these militia were called out. They were on duty according to the rolls at different times and for different numbers of days, varying from two to ten. No claim in respect of such duty has been preferred by any other State, and the expense attending its performance is not considered to be of a nature properly chargeable to the United States.

*Order, dated September 6, 1814.* "The security of the town and harbor of Boston being an object of primary importance, the commander-in-chief while he wishes to direct the principal energies of the State to the attainment of this end, is solicitous to render the militia of Boston itself as efficient as possible. With this view he orders the infantry of the 3d brigade of the 1st division, commanded by Brigadier General Welles, to be called out by regiments, in rotation, two days successively, for the purpose of improving their discipline already respectable, and of enabling them to practice the higher duties of the field."

*Order, dated September 16, 1814.* "For the greater security of the seaports within the second division, and to render as efficient as possible the internal military strength of those places, the commander-in-chief orders that the several companies and regiments in the towns of Salem, Marblehead, Beverly, Gloucester, Newbury, Newburyport, Amesbury, and Salisbury, be assembled for the purpose of instruction in military tactics two days in each week until further orders."

The amount includes \$2,166 50 for clothing, \$259 29 for use of arms, \$265 76 for overpayments, \$846 84 for excess in the cost of rations beyond the United States contract price, and \$664 43 for miscellaneous items

Expenditures in building two gun-houses and in removing another.....	2,252 74
The United States have in no case been considered properly chargeable with expenses of this nature.	
Expenditures in respect to the under-mentioned detachments, viz:	
Of several, each consisting of a sergeant, two corporals, and twelve privates, in service successively for one week, from May 22 to October 13, 1813, as guards at the gun-house on Boston common.....	1,241 88
Of members of several artillery companies, for services, three or four at a time, as guards at the gun-houses of such companies, respectively, in Boston, from September 11 to October 16, 1814.....	240 80
Of a sergeant, corporal, and twelve privates of Captain Parker's company, in service from September 22 to October 6, and of a like detachment from Captain Sullivan's company, in service from the latter day to October 13, 1814, as guards at Faneuil Hall.....	174 65
Of sundry detachments from Captain Skillings's company, each consisting of a corporal and eight privates, in service in succession from the 13th to the 26th of September, and from the 4th to the 9th of October, 1814, as guards.....	105 80
And of several detachments, each consisting of a sergeant, corporal, and twelve privates, in service in succession from September 24 to October 25, 1814, as guards at the State arsenal at Charlestown.....	323 47
	2,086 60

At the heads of the several rolls of the guards in service in 1813, they are expressed to have been detached agreeably to general orders dated May 21, 1813; and on October 13 following, the State executive, in another general order, after expressing that the commander-in-chief had thought fit to discontinue the guard at the park of artillery on the common in Boston, ordered out on May 21, dismissed the guard then on duty there.

The guards from the artillery companies are alleged to have been detached under brigade orders of September 11, 1814, whereof no copy is produced, nor any explanation of the reasons for calling them out.

It is not shown by what authority the detachment from Captain Parker's company was in service; that from Captain Sullivan's appears to have been called out under brigade orders issued on October 6, 1814, expressing it to be as a relief to the nightly guard then stationed for the security of Faneuil Hall, (a part whereof is understood to have been used as a place of deposit for arms,) and requiring it to be placed every night at sunset and continued till sunrise, for one week, and accommodated in a room assigned by the selectmen.

No information showing by whom the detachments from Captain Skillings's

Brought forward.....\$26, 560 15  
 company were ordered out, or where their services were rendered, can be found in the documents.

As to the detachments on duty at Charlestown arsenal, it appears that by a general order of the State executive, issued on September 24, 1814, Brigadier General Austin was required to furnish a guard for the arsenal in Charlestown, under the direction of Peter Tufts, esq., to consist of a sergeant, a corporal, and twelve privates, and to be relieved weekly until further orders; and that by another like order issued on October 24, 1814, the former one was revoked, and the guard directed to be dismissed.

The sums charged include \$369 81 for clothing, \$12 54 for use of arms, over-payments amounting to \$17 03, an excess in the cost of rations beyond the United States contract price of \$178 21, and a miscellaneous item of \$6. The residue is considered wholly inadmissible against the general government. The account of the State of New York contained charges to a considerable amount for pay, &c., of detachments employed as guards at various arsenals during the war, and which were disallowed by direction of the Secretary of War.

Payments for the transportation of arms and ordnance stores from Boston to various towns, in 1813 and 1814, and from sundry towns to Boston, in 1815 and 1816, bridge toll, &c..... 5, 289 17

These are not shown to have been consequent on the calls of any militia into service, either of the United States or of the State, but would seem to have been occasioned in the distribution of arms, &c., intended for general preparation and in the subsequent return thereof; and the late Secretary of War having decided that charges against the United States for expenses of this nature are not admissible, such charges have been disallowed. In cases where the transportation related to militia called out or in service at the time, and whose services were recognized by the general government, the expense has been allowed.

Allowance made by the board of war to Adam Rupp, a laborer employed at Fort Strong, for the purpose of discharging his surgeon's bill and expenses, up to February 15, 1816, in consequence of an amputation occasioned by an injury received in firing the guns at that fort in November, 1814, when making experiments..... \$200 00  
 Charge in respect of a pension of \$72 per annum for life, made to him by the State legislature..... 1, 296 00  
 1, 496 00

There is no law or regulation under which these items could be admitted; and as to the annuity, the State is not shown to have paid the amount charged.

Payments made to aides-de-camp, brigade majors, and adjutants for fees for copying and recording general, division, brigade, and regimental orders during the war, and for distributing the same..... 3, 772 38

These are not considered to be properly chargeable against the general government, and it is believed that by no other State have such charges been made.

Allowance made to the State treasurer, pursuant to a resolve of the legislature passed June 15, 1815, for extra services performed by him for two years past. 500 00  
 Allowance made by another resolve to his clerk, for extra services performed by him..... 166 66

Charge for services of the State adjutant general: it is shown that from February 22, 1813, to March 2, 1816, his salary was \$2,000 per annum, and that from the latter date it was reduced by law to \$1,500; and the difference between those rates for the period above specified, being three years and ten days, is charged..... 1, 541 66  
 2, 208 32

No items of this nature are deemed to be chargeable to the United States.

Compensation allowed to the commissioners of sea-coast defence, the board of war, their respective clerks, Lieutenant Colonel Sumner, and sundry incidental expenses of their offices..... 13, 154 31

For services rendered by commissioners, boards of war, accountants, &c., charges have been made in the accounts of several of the States, and under decisions of the late Secretary of War have been disallowed, as inadmissible against the United States.

Total..... 52, 480 33

NOTE.—This statement extends only to such items as appear to be wholly inadmissible, on the principles alluded to at the head of it. In each of the other statements items are embraced which, on those principles, are partially inadmissible, and the inadmissible portions have been there deducted, and will form a very large addition to the amount above specified.

PETER HAGNER, Auditor.

TREASURY DEPARTMENT, *Third Auditor's Office, January 30, 1828.*

*General remarks as to the deductions before enumerated.*

The sums specified under the heads "clothing" and "arms" are not allowable on the principles of adjustment adopted in settling claims of other States.

The deduction of those specified under the head "overpayments" has arisen principally from erroneous additions and calculations from officers having received pay, &c., at higher rates than allowed by law, and travelling allowance for a longer time than the distance from their homes entitled them to, and from individuals having, in many instances, been paid on two sets of rolls for the same day's service, and the portion thus arising is likewise inadmissible on the principles before alluded to. The deduction of the remainder of the sums specified under this head have been caused by information gathered from the documentary evidence, tending to show that, in some instances, the time of service specified in the rolls is longer than the militia named therein were on duty, and the admissibility of the amount of such deductions would depend on the production of testimony showing their impropriety by reconciling the apparent discrepancies.

Under the head of "rations reduced," nearly all the deductions are for the difference between the rates of charge in the State account for such as were furnished to militia in service in 1814 in Massachusetts proper and the United States contract price in that part of the State, the latter being at seventeen cents and the charges, in part, at twenty cents, and in other parts at twenty-five cents. The residue thereof is for difference between the United States contract price in 1812 and 1813 and the rates charged for rations supplied to militia in service during those years. The deductions under this head have been made in accordance with the views of the late President, as signified in a letter from the Secretary of War to the State agents, Messrs. Sullivan and Peirce, dated November 13, 1823.

The deductions under the head "excess of rations" are for such as are charged for beyond the number the militia to whom they appear to have been supplied are shown by the rolls to have been entitled to, and are considered inadmissible.

The deductions under the heads of "forage," "servants," and "quarters and fuel," are for allowances made on these accounts to certain of the commissioned officers. As to the forage, no allowance was authorized after the passage of the law of July 22, 1813, to any officer for more horses than he should actually employ in the public service, and in the cases to which these deductions apply there is not the requisite evidence that the officers respectively employed a horse or horses in the public service at all. As to the servants, the law of March 30, 1814, rendered it necessary to have them named on the muster-rolls, and in the instances where the allowances have been deducted this provision of the law has not been attended to. In lieu of quarters and fuel, the regulations in force during the war prohibited any money allowance, and from the vouchers for the allowances deducted it would seem that they were of this nature, there being no evidence of the expenditure of the money by the officer.

The sums deducted under the head "miscellaneous" could none of them be admitted, save in some few instances where the items are at present inadequately vouched, unless by direction of the Secretary of War, before whom each case, with a representation of the attendant circumstances, would have to be laid for his decision. The charges to which they relate are chiefly for the expense of erecting works of defence, mounting cannon, building barracks, the cost of munitions of war, &c., purchased and not accounted for, compensation of officers whose services, with forces such as they commanded, were not warranted by the rules of organization, &c.

PETER HAGNER, *Auditor.*

TREASURY DEPARTMENT, *Third Auditor's Office, January 30, 1828.*
