At every each of the tide, water, which on the flood had to place new and substantial work upon them. At every ebb of the tide, water, which on the flood had found its way into the numerous voids, escapes through the wall in certain places in torrents. In addition to this, owing to the small size of the materials, the bearing has never been uniform upon the breadth of the grillage; the middle, while sinking with the weight, has left the outer steps of the foundation (and probably the inner) not far from their original height, thus showing that the outer piles (and probably the inner) take no part of the weight of the superstructure.

Under these circumstances, we are decidedly of opinion that Fort Delaware is irreparable. We are also of opinion that it would be improper to put new work upon the masonry of the old foundations. The piles of the foundation are doubtless all the better prepared for new work in consequence of the great weight that for years has been bearing upon them; but owing to the unequal pressure to which they have been subject, we think, before rebuilding, they should be again tried with the driver.

We do not consider it a part of our duty, under our instructions, to give an opinion on the subject of rebuilding this work. The government, no doubt, fully understands the value of the position, and that it is the only proper one for the defence of the Delaware. We take occasion, however, to say that in the course of the operation for reclaiming the island and protecting it from the action of the sea an embank-

course of the operation for reclaiming the island and protecting it from the action of the sea, an embankment of some height has been thrown up all around, which might easily be converted into a battery, and be substituted for the lower tier of the fort. Under such an arrangement, it might be necessary to give to the fort a height of two tiers only, instead of three.

We have the honor to be, with great respect, your most obedient,

JOS. G. TOTTEN, Lieut. Colonel Engineers, Brevet Colonel.

WM. A. ELIASON, Lieutenant of Engineers. A. MORDECAI, Lieutenant of Engineers.

Brigadier General Charles Gratiot, Chief Engineer.

DEPARTMENT OF WAR, January 13, 1831.

Sir: In obedience to a resolution adopted by the House of Representatives, of the 7th instant, calling on the Secretary of War "to inform the House whether any, and if any, what, additions are necessary to be made to the corps of military and topographical engineers, exclusively for military purposes," I have the honor to report:

With regards to the corps of engineers:

In my report to the President accompanying his message to Congress in 1829, I expressed a concurrence in the opinion, which has been urged for years past by this department, of the necessity for increasing the number of officers in this corps. The advantages which might result from such an increase in the construction of fortifications and other works of general improvement were not lost sight of. The recommendation, however, had reference mainly to such an organization as it was believed would tend to greater economy and efficiency in the discharge of the military duties of the corps in time of peace.

The necessity of an increase of their number is illustrated by the fact that whilst every officer of the

the necessity of an increase of their number is indistrated by the fact that whilst every omcer of the corps is now on duty, and but three of them employed in other than military duties, there are only four of the fortifications under construction, in the direction of which the superintending engineer is assisted by any officer of the corps. The necessity for such assistance in preparing detailed plans and superintending their proper execution, must be obvious to any who reflect on the varied and often complicated nature of those works. This deficiency in officers is imperfectly supplied, in a few cases, by an occasional and temporary detail from other corps of the army, or by the employment of citizens at high rates of compensation. The number of officers which should be added to the corps will be regulated by considering the number of fortifications that will probably be under construction at any one time, with other duties to

number of fortifications that will probably be under construction at any one time, with other duties to which the officers are liable. The table of "works projected," which accompanies the annual report from this department, will show that, in addition to those already commenced, forty-three have been planned for the Atlantic and Gulf of Mexico frontier; besides which, it will be remembered that no defences are yet projected for the extensive frontier bordering on Canada.

Referring, for the present, to the works required for the defence of the seaboard alone, we may suppose that about twelve or fourteen of them will be under construction or repair at one and the same time, and the number of officers requisite for their superintendence may be estimated as follows:

	Field officers.	Captains.	Lieutenants.
On the eastern Atlantic frontier, say	1	$^{-}2$	4
On the middle	1	4	8
On the southern	1 .	2	3
On the Gulf of Mexico	1	2	4
To which add—			_
At the seat of government	1	0	1
Military Academy	1	i	$ar{2}$
Board of engineers for fortifications, and to meet contingencies of		-	_
service	1	2	2
	_	_	<del>-</del>
Making a total of	7	12	24
		=	=

By such an arrangement there would be in each great division of the maritime frontier one field officer, who, besides having the immediate charge of a particular work, could act as a general inspector, and whose experience would enable him, in cases of need, to aid by his advice other officers within his district.

It is in accordance with these views that the project for an increase of the corps, heretofore presented to Congress, has been prepared, the details of which are contained in a bill reported at the last session by the Committee of the House of Representatives on Military Affairs.

On the subject of the topographical engineers, to which the resolution also refers, I shall have the honor to report in a few days.

I am, &c.,

JOHN H. EATON.

Hon. A. Stevenson, Speaker of the House of Representatives.

Annual report of work done in improving the navigation of the Ohio and Mississippi rivers in the present year ending September 30, 1831.

From the 1st of October, 1830, to the 9th of March, 1831, the steamboat Helepolis removed from the channel of the Mississippi river 1,334 snags or trees, taken from the whole line of the river between island No. 10, sixty miles below the mouth of the Ohio river, and the mouth of Bayou Plaquemine, twenty-one miles below Baton Rouge, a distance of 830 miles. During the same time that boat cut a channel through a neck of land near the mouth of Red river, through which the whole channel of the Mississippi river was turned, shortening the distance to the navigators of the Mississippi river eighteen miles; and to those navigating the Red and Mississippi rivers, between the Red River settlements and New Orleans, the distance has been shortened six miles. The distance from the new channel down the old bed of the Mississippi to the mouth of Red river is six miles, and from Red river, by the old bed down it, is twelve miles; consequently, by cutting the channel through, the water from the Red river now finds its way up the old bed of the Mississippi, and passes down through the new channel.

In October, November, and December of last year, I had the timber cut from off the falling-in banks of the Mississippi river, a distance of about 538 miles; at the same time all the timber was cut from under the banks and out of the island chutes for the same distance.

A channel was also cut through the bend of the river at a point called Burch's Bend. It has been navigated by twenty or thirty steamboats nearly all the high-water season of the last spring and summer. It will be the main channel of the river next spring, and shorten the distance from 24 to 28 miles. The effect produced during the extreme rise of water has been very important at Red river, as it will dry at least 200,000 acres of pine land lying on the Bayou Chaffilio and Red and Black rivers. The difference of the rise last year has been ascertained to be at least two feet at the mouth of Red river; the same effect will be felt at least sixty miles up that river, and about forty miles up the Black river. On the Bayou Chaffilio the effect produced has been great in proportion to the extent of country; the lands on its banks for many miles down are now above the highest floods.

The steamboat "Helepolis" was repaired in April and May last; left New Albany, Indiana, on the 8th

The steamboat "Helepolis" was repaired in April and May last; left New Albany, Indiana, on the 8th of June, and commenced operations in the Mississippi river, between the Ohio and Missouri rivers, where she continued until the water was too low for her to work in that part of the river to advantage: she then commenced work below the Ohio. Up to the 30th of September last she has removed from the main channel of the Mississippi river 727 snags, making together 2,061 snags removed this year by the steamboat "Helepolis." On the 10th of September last the new steamboat "Archimedes" commenced work at the mouth of the Ohio, and worked up the Mississippi river. From that time to the 30th of September she has removed from the low-water channels of that river 204 snags, added to those removed by the steamboat Helepolis, making an aggregate of 2,265 snags removed this year from the bed of the Mississippi river. That boat is quite as efficient as the Helepolis in every particular, except in running down a planter. In that operation the Helepolis has the advantage of nearly double the weight, which adds greatly to the effect when moving at the same velocity. By reference to the last of the two boats, it will be perceived that the Archimedes has cost about \$12,000 less than the Helepolis.

About the first of October last year the improvement of the Ohio river was commenced at the mouth of the Louisville and Portland canal, by removing logs, roots, &c., from the bottom of the channel of that river. For the first two miles below the place of commencement the number of logs was greater than

About the first of October last year the improvement of the Ohio river was commenced at the mouth of the Louisville and Portland canal, by removing logs, roots, &c., from the bottom of the channel of that river. For the first two miles below the place of commencement the number of logs was greater than at any point in the Ohio river. They were taken out, cut, and split in pieces in such manner as to enable the laborers to pile them along the shores; in November they were set on fire and all consumed. Many gentlemen of good judgment, who examined them at the time they were piled, estimated the quantity at 1,200 cords in the distance of two miles. That work was continued down to Rockport, a distance of 150 miles, and all the most dangerous logs and roots removed from the channel in that distance. On the 6th

day of December the men were discharged, the river being too high to work. That work was commenced

again on the 22d of September, and is now in progress.

On the 5th of November last the improvement of the Ohio river, at the Grand Chain, near its mouth, was completed, agreeably to the act of Congress providing for that particular object. The rocks formerly situated at that point have all been removed, so as to make an entire safe navigation at that place. For situated at that point have all been removed, so as to make an entire safe navigation at that place. For a particular description of the work done there, I beg leave to refer you to my letter to the department dated the 13th of November last. By the different operations alluded to, the navigation of both rivers has been very much improved in the last year, notwithstanding some losses have occurred charged to snags. During the last year the steamboats Grusader, Neptune, Daniel Boon, Fairy, and Union, have been sunk in the Mississippi river. The Grusader, by striking a root or log lying on the bottom of the river in the extreme low water in October last. The Neptune, by swinging off from the shore with her stern made fast with a line to the shore, being heavily laden with pig lead, broke and filled immediately; the engine was not started. The Daniel Boon, running close along shore, struck a log, was stove, and sunk. The Fairy struck a snag directly opposite the mouth of the Missouri river, and sunk in a few minutes. These four boats were all old and in a state of decay. The Union was a new boat, built of plank without a frame to support them, and, being a flat bottom and wall-sided, was very weak. She struck a snag that must have been loose, and have stopped or lodged there during the last spring freshets. At the place must have been loose, and have stopped or lodged there during the last spring freshets. At the place where the accident occurred the Helepolis had taken every description of snag out in the month of November last, when the water was at least ten feet below the stage when the boat struck. I am of the opinion that a principal cause of the loss of the whole five boats was from the weakness and insufficiency of their hulls. One keel-boat and three flat boats were lost during the extreme low water in October and November of last year; not one that has come within my knowledge since the rise of the water in December last. When those losses took place, the Mississippi was several feet lower than it had been for ten years previous. The snags on which the above-mentioned steamboat Crusader was stove, the keelboat, and one of the flat boats, have since been removed. Flat boats navigating the Mississippi river from the mouth of the Missouri to New Orleans now float at night with as much safety as they do in the Ohio river, by which means their passage is now made in one-half the time it was three years ago. I have no hesitation in stating, without the fear of contradiction from any well-informed gentleman, that the amount of property saved by the improvement already made far exceeds the whole amount of expenditure on all the work since 1824. For a proof of this statement, I will refer the department to the western members of Congress who travel on those rivers. Some of those gentlemen are familiar with the former and present situation of the obstructions in the river, particularly the Mississippi river, and the Ohio river at the Grand Chain.

The improvement of the Ohio river, under the act of Congress of the 2d March last, has unavoidably been delayed on account of the high stage of water in that river during the whole summer and fall of this I have made the necessary preparations for carrying into effect the instructions from the department, and have now at work from 500 to 600 men. Those men are employed quarrying stone at different places for the purpose of forming the required wing dams. Their labor will be advantageously applied at that part of the work; and should the water fall sufficiently low, a number of the most difficult and shoal bars in the river will be improved this fall.

I am, sir, very respectfully, your obedient servant,

HENRY M. SHREVE, Superintendent.

Brig. Gen. C. Gratiot, Chief Engineer, Washington. Louisville, Kentucky, October 13, 1831.

## United States Military Academy, West Point, June 21, 1831.

Six: The board of visitors invited by a circular from the War Department, of the 31st March, "to attend the general examination of the cadets of the United States Military Academy," in the discharge of the duty devolved on them have directed their inquiries to a full and free investigation of the course of instruction, military and scientific, and to the internal police, discipline, and fiscal concerns of the institution. This investigation, the results of which we propose in a succinct form to present to you, has impressed the board with a full conviction that the institution has substantially accomplished the leading objects of its establishment, and that, regarded in any light in which it may be viewed, whether in its connexion with the primary means of national defence, the cardinal design of its creation, or with the more remote but no less important concerns of our internal civil polity, to the success of which it is a valuable auxiliary, its claims upon the continued support and fostering patronage of the government are many and commanding.

The whole number of cadets upon the examination roll furnished to the board is two hundred and twenty-two. These are divided into four classes: the first consisting of thirty-three members, whose course of instruction has now been completed; the second of fifty-two, who have been three years in the institution; the third of sixty-two of two years' stending; and the fourth of seventy-five, admitted since the period of the examination of the last year. These classes have been everally divided into convenient sections arranged

agreeably to the relative merits of the cadets composing them, their grade being settled by the academic board, at short stated intervals, by an impartial recurrence to well-ascertained and fixed rules.

The course of instruction prescribed for each class will be shown by the synopsis herewith communicated, marked A. It is the purpose of the report to detail the observations of the board upon the examinations of the several departments in their order.

The studies of the first class are directed to engineering and the science of war, to ethics, rhetoric, national and constitutional law, to infantry tactics and artillery. Upon each of these branches of science the class have undergone a thorough examination, and it affords the board pleasure to state that its result has been as satisfactory as its process has been searching and laborious.

To engineering, both military and civil, the attention of the class has been minutely and profitably directed. In the whole course of military engineering, comprising field and permanent fortifications, attack and defence of places, and military communications, as well as in that of civil engineering, comprehending the important subjects of land and water communications by navigable rivers, canals,

common roads, bridges, and railroads; of hydraulic constructions and buildings, of nautical constructions, of carpentry, stone cutting, and civil architecture, the class have acquitted themselves in a manner meriting the most unqualified commendation. The most involved and difficult problems have been solved and demonstrated with a readiness evincive of the thorough familiarity of the class with those important branches of science, and reflecting upon the accomplished officer charged with this department of instruction the highest credit.

That these subjects have not engaged an undue share of the time and attention of the cadets the board are fully satisfied. The science of military engineering is intimately connected with that of war, and with every well-devised system of national defence. The primary and leading object of this instruction is to train up a portion of our youth for this indispensable branch of the public service, to fit them for the intelligent discharge of the high duties of superintending and directing the defences and commanding the armies of the nation. All experience teaches that these qualifications are not the acquirements of a day; that the emergency which calls for their exercise is not always sufficient for their creation. The principle of the art of war, comprehending in its present advanced stage of improvement all the exact and many of the physical sciences, with various incidental and collateral branches of learning, like all other knowledge, can only be attained by the application of the mind, aided and directed by competent and skilful instructors. That the duty of this application has been enforced, and thus assistance and

instruction afforded here, the examination of this class has abundantly evidenced. The science of civil engineering, as taught at this academy, the board regard as a branch of education fundamentally important. This may emphatically be styled the age of improvement. At a time when the energies of a discerning and patriotic public spirit are everywhere directed to the purposes of practical improvement; when in every portion of this wide-spread confederacy we are daily furnished with the manifestations of a desire by means of canals and railroads to connect the remotest portions of the Union, and through their agency to develop the resources and ranroads to connect the remotest portions of the Union, and through their agency to develop the resources and improve the condition of our country, the value of the knowledge imparted in this course cannot be overrated. That this branch of science can be taught in this academy with advantage experience has shown. That in the ordinary literary institutions of the country an attention sufficient to qualify for the discharge of the practical duties already indicated has not been bestowed may be safely inferred from the multiplied and pressing demand upon the War Department for aid, preferred by those engaged in the interesting works of improvement contemplated and in pregrees. It has been a whister of except and of just recovery that the means of assistance thus and in progress. It has been a subject of general and of just regret that the means of assistance thus invoked have not been within the competency of the government to afford. To meet these continually recurring applications for the services of persons skilled in this branch of science, no mode within the knowledge of the board is so likely to prove efficient as that of giving to the distinguished professor in this department the means of increased usefulness by a liberal enlargement of the stock of models, now very inconsiderable.

In aid of his instructions in the first branch of this science the model of a fortification, with all its parts complete, is regarded as indispensable. The expenditures of the government upon the permanent fortifications are liberal and recurring, and yet, in an institution designed to fit its students for this important branch of the public service there is not a single model by which they may be taught the mechanical construction of a work of this kind. A small sum appropriated to this object would insure an improvement in this branch of science which would be beneficially felt in the construction of the public

works necessary to the defence of our extensive inland and maritime frontier.

The model of a stone bridge, with its centering, and the caisson used in founding piers where the water is deep, and the foundation of rock; of a lock upon the most approved plan, and of a dry dock, the board think, would be found useful. To these might be advantageously added models in the department of architecture calculated to improve the taste in building. These would serve not only as the means of instruction to the students of this institution, but of extension general improvements to the increased instruction to the students of this institution, but of extensive general improvement; to the increased comfort of our private dwellings, and the embellishment and economy of our public edifices.

For these objects, the board would respectfully suggest, the employment of a modeller would be calculated most effectually and economically to accomplish.

In the science of war the class acquitted themselves upon their examination satisfactorily to the board. In the knowledge of the principles of infantry tactics and artillery they appear to be well-grounded. The examinations on these subjects in the recitation room have prepared the board to express a full concurrence in the favorable opinions indicated by former boards of visitors in relation to the modes of instruction pursued in this department, and of the merit of the professors directing them.

In the practical duties of the soldier the cadets of all the classes have been thoroughly instructed.

The board are at a loss for terms in which to express their admiration of the manly gracefulness of carriage and the steadiness of position maintained by them in the field, of the ease, promptitude, and precision with which their various evolutions in battalion performance, and of the skill and accuracy with which their

artillery is exercised and manœuvered.

For the maintenance of this admirable system of discipline, of which the flattering results above indicated are the fruits, and for the preservation of the health of the cadets, by furnishing them with the means of salutary exercise, the board earnestly recommend that a suitable building be erected to be used during the inclement seasons of the year, when the students of this institution cannot with safety be

The board cannot take leave of this branch of the subject committed to their inquiry without a decided expression of the satisfaction they have received from the evidence furnished by the cadets of their proficiency in the exercise of the piece, in target firing, and in the preparation of ammunition, rockets, &c. It has been to the board a subject of surprise and regret that this post is without the horses necessary for the ordinary artillery service, and they feel it to be their incumbent duty to press upon the government the necessity of a provision to meet this object. Twenty horses might be usefully employed, not only in the manner above-mentioned, but with great benefit to the cadets, in allowing them an opportunity of acquiring some knowledge of horsemanship, which in after life may prove to them valuable and important.

In the branches of ethics, rhetoric, national and constitutional law, the class acquitted themselves with great credit, evincing by their answers a familiarity with the principles of their text-books acquired and retained not so much by the mere effort of memory as by the application of the mind to their thorough

In this department much inconvenience has been experienced for the want of the books necessary to carry on the course of instruction, in which the library, although liberally supplied on other subjects, is lamentably deficient. The board respectfully recommend that a specific appropriation be asked to supply this deficiency.

The studies comprehended in the course of the second class are natural philosophy, chemistry, and

drawing

In the first of these branches, comprising magnetism, electricity, mechanics, opines, and describing, the class gave proofs of considerable attainment. In the solution of the most difficult problems their demonstrations at the black-board were neat, clear, and conclusive, and executed with a promptness and coolness which nothing short of a full confidence in their own attainments could inspire. The board have In the first of these branches, comprising magnetism, electricity, mechanics, optics, and astronomy, no hesitation in expressing their belief that no class of equal numbers can be found in any university in

the Union more thoroughly conversant with the subjects upon which they have been examined.

The philosophical apparatus has been much enlarged within the last two years, and is principally of French manufacture, of exquisite workmanship and beauty, and of the most modern and approved construction. For the purposes of a course of experimental philosophy it is, nevertheless, inadequate. The board would therefore recommend that a small annual appropriation be asked for its extension.

The examination of the class in chemistry gave much satisfaction to the board, and furnished evidence of the zeal and industry with which the acting professor and his assistant have devoted themselves to the discharge of their respective duties. In this department, and in that of natural philosophy, great inconvenience has been experienced for the want of suitable rooms for lectures, recitations, and experiments. At present the rooms in which the apparatus is kept are used for these purposes. This exposes the instruments to great injury, as the experiments and preparations cannot be made near them without A building to contain apartments would conduce to the convenience of the institution. Under this impression the board recommend that an appropriation be asked for its erection.

In drawing, the cadets of this and of the third class have made surprising progress. In topography, landscapes, and the delineation of the human figure, their performances are excellent, and in a high degree creditable to themselves and to the accomplished artist from whom they have received their instructions.

The course of instruction pursued by the third class embraces mathematics, French, and drawing. That of the fourth class is confined to mathematics and French.

In mathematics, instruction is afforded to the third class in analytical geometry, perspective shades and shadows, spherical projections, surveying, the differential and integral calculus, descriptive geometry, and plane and spherical trigonometry. And to the fourth in algebra, geometry, plane and spherical analytical trigonometry, and descriptive geometry. To say that in their thorough examination on these subjects the classes acquitted themselves well, would be but a feeble expression of the opinions of the board. They believe that, for accuracy and skill in the construction of the diagrams necessary for the demonstration of the problems proposed to them for solution, and the quickness, ease, and precision with which the results were attained, these classes have never been excelled.

The examination of the third class in mathematics commenced in the afternoon of the 10th instant, and was continued on the 11th, resumed on the 13th, and concluded about noon on the 14th. The examination of the fourth class, on the same subject, was commenced on the evening of the 16th, continued on the 17th and 18th, and resumed and concluded on the morning of the 20th. The examination throughout was creditable to the cadets and their instructors. The use which was made of the black-board at the examinations deserves to be known. There were two black-boards in different parts of the room; four cadets were called up at the same time, two to each board, and each cadet was told by the examining professor what he wished him to do; they then constructed the diagrams and wrote out their demonstrations and solutions on the board. While they were occupied, questions were put to one or more members of the class until one of those first called up was ready at the black-board. He then read his demonstration or solution; but this was done with a readiness which showed that it was fully understood. He was then questioned in relation to the demonstration or solution, and the examinafully understood. He was then questioned in relation to the demonstration or solution, and the examination continued until the cadet next to him was ready. By this means the student had time to reflect and to work out his demonstration or solution; he was free from embarrassment whilst thus engaged, because he knew that all present were attending to the person under examination. Besides the able professor who presides over this department, seven assistants are necessary to enable him to do justice to his classes, while the law provides but for one. This deficiency was formerly supplied by the selection of the most distinguished cadets; but it was found that the cadets thus selected were unable to progress with their class, and at the same time give useful instruction to others. Subsequently officers have been detailed from the army and assigned to the discharge of the duty; but as no compensation is allowed by law for this extra service, the officers detailed have no inducement to retain their places in the institution. The consequence is, that this most important department is continually subjected to the evils of frequent changes in the instructors. At the close of the present term, as the board are informed, every assistant except the one provided for by law leaves the institution, strikingly illustrating the necessity of some provision to guard against this great inconvenience. It is believed that the provisions of an act reported at the last session of Congress, (a manuscript copy of which is herewith communicated, marked B,) would, if adopted, correct this evil and many others to which the institution is exposed. The professor in this department has felt the want of a large theodolite, with Hassler's improvement, the purchase of which the board would respectfully recommend.

In French the attainments of these classes are respectable, and the examinations in this department

were very satisfactory to the board.

With regard to the police of the institution, the board have found much to commend, and nothing which, in their opinion, requires alteration. An admirable system has been matured, which is fully understood and vigilantly enforced. Everything which can conduce to the health and comfort of the cadets, consistently with a due attention to study and the performance of their military duties, has received attention.

The discipline established by the regulations of the academy is favorably illustrated in the personal appearance and manly deportment of the cadets, the neatness and uniformity of their dress and accourtements, and their strict and willing obedience to the orders of their superiors. The seeming rigor of the requirements prescribed has had the most salutary operation in engendering a spirit of manly and honorable emulation, the distinguishing characteristic of the students of this institution.

The relations subsisting between the superintendent and instructors, and the cadets, are in strict harmony with their respective duties, and calculated to inspire the latter with a strong feeling of self-respect. Every motive which can be addressed to their pride and indement to influence a devotion to

respect. Every motive which can be addressed to their pride and judgment to influence a devotion to science is here presented; and it affords the board unqualified pleasure to state that they have not been

unmindful of the advantages they enjoy, nor lost sight of the high destinies to which in the future

concerns of their government they may reasonably aspire.

The books and accounts of the quartermaster, and of the treasurer and paymaster have been examined, and found to be correct. A strict system of accountability has been established in regard to the receipt and disbursement of the public money, sufficiently guarded to prevent its misapplication; the accounts of the cadets are regularly and accurately kept; their clothing and other necessary articles are so furnished as to avoid all imposition, and at prices, if not below, certainly not above the ordinary rates.

The board likewise examined the food served up at the meals of the cadets, which they found of excellent quality, and prepared with a cleanliness and regard to comfort worthy of all praise. To the

many inquiries proposed to the cadets themselves, the reply has uniformly been that their food was not

only good, but abundant.

The medical department has also engaged the attention of the board. The hospital erected within a few years is convenient in its arrangement, airy, and comfortable. The concerns of this department are

exceedingly well directed by the distinguished surgeon under whose supervision it has been placed.

The fiscal concerns of the institution appear to have been conducted with great ability, and the appropriations of the government to have been expended judiciously and faithfully. By the practice of a judicious economy a considerable fund was not long since accumulated, which has been chiefly expended

in the erection of useful buildings, embracing a commodious hotel for the accommodation of the parents and friends of the cadets and of other persons visiting the academy.

In connexion with the subject of the public buildings, the board feel it to be their duty to reiterate the recommendation heretofore repeatedly made, that a competent appropriation for the erection of a compression of the purpose never was designed to be so appropriated. It is too small to accommendate the codets and others who focused it and in its lates. It is too small to accommodate the cadets and others who frequent it, and is in all other so appropriated.

respects inconvenient.

The library of the academy has been procured with much trouble and at considerable expense. It is valuable, and should be preserved. To provide for its security, the board would respectfully recommend that a fire-proof room to receive it be connected with the chapel which they propose should be erected. The room now occupied as a library, should this recommendation be effected, may be advantageously used as a lecture or recitation room.

A reference to the reports of former and successive boards of visitors will show that a strong conviction of the inadequacy of the existing rank and pay of the superintendent of this academy has long obtained. In this conviction, and the recommendations founded on it, the board entirely concur. The services required of and diligently performed by him are extremely laborious, the responsibility of his station is great, and the expense to which he is necessarily subjected very considerable. The zeal, talent, and industry which have been so long and conspicuously displayed by him in the faithful discharge of his important and arduous duties entitle him, in the judgment of the board, to the favorable consideration of the government.

The board forbear to multiply suggestions in relation to the wants of the institution already brought to the view of the government by boards of visitors who have preceded them. They believe that the prompt

and full gratification of these wants would eminently promote the public welfare, by giving increased efficiency to an institution whose interests are bound up with those of the nation.

Every facility has been afforded to the board in aid of their investigations by the superintendent and those connected with him in the administration of the affairs of the academy. To the merits of all, the board take pleasure in bearing testimony; in their capacity and devotion to science the national confidence may be safely reposed, in the assurance that the interests committed to their charge will be faithfully guarded and zealously advanced.

and zealously advanced.

We have the honor to be, sir, your obedient servants,

WINFIELD SCOTT, Major General U. S. A., President of the Board.

#### A BILL making further provision for the Military Academy at West Point.

Section 1. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States be, and he is hereby, authorized to appoint a

professor of chemistry and mineralogy in the United States Military Academy.

Sec. 2. And be it further enacted, That the professors of the Military Academy, from and after the passage of this act, shall receive each the pay and emoluments allowed to the professor of natural and

experimental philosophy.

SEC. 3. And be it further enacted, That the teacher of the French language and teacher of drawing

shall each receive the pay and emoluments of a major of infantry.

Sec. 4. And be it further enacted, That the President of the United States be, and he is hereby, authorized to appoint two other teachers of the French language, who shall each receive the pay and emoluments of a captain of infantry.

Sec. 5. And be it further enacted, That the President of the United States be, and he is hereby, authorized to appoint an assistant professor of chemistry and mineralogy, who, together with the assistant professors already provided, shall, if an officer of the army, receive so much in addition to his pay and emoluments as shall equal those of a captain of infantry; and if not taken from the army, shall receive the pay and emoluments allowed to a captain of light dragoons by an act entitled "An act to raise, for a limited time, an additional military force," passed the 12th day of April, 1808.

Sec. 6. And be it further enacted, That all lieutenants who shall, under the direction of the President of the United States, be detailed from the army to act as instructors, assistant professors, or assistant teachers in the Military Academy, shall, after the first year while so employed, be allowed each ten dollars per month in addition to his pay in the line.

per month in addition to his pay in the line.

Sec. 7. And be it further enacted, That each officer of the army in the actual command of a company of cadets shall be entitled to receive the same additional compensation as is allowed every officer in the actual command of a company in the army by the second section of an act entitled "An act giving further compensation to the captains and subalterns of the army of the United States in certain cases," passed the 2d day of March, 1827.

SEC. 8. And be it further enacted, That so much of the act entitled "An act making further provision for the corps of engineers," passed the 29th day of April, 1812, as confines the selection of assistant

professors to the corps of engineers and cadets shall be, and is hereby, repealed.

Sec. 9. And be it further enacted. That the professors and officers attached to the Military Academy who by law are entitled to forage shall receive in lieu thereof an equivalent in money at the rate allowed

to officers of the army, although they may not actually keep the horses for which they are entitled to forage.

SEC. 10. And be it further enacted, That all officers, professors, teachers, and their assistants, and all other persons authorized to be employed for the Military Academy, shall be subject to the rules and articles of war which are now, or which hereafter may be, established.

Synopsis of the course of studies at the Military Academy.

Class.	Department.	Section	Names of instructors.	Class books and subjects of study.
1	Engineering and Science of War.	1	D. H. Mahan, professor	Science of War and Fortification, by Gay de Vernan; Programme d'un Cours de Construction, par Syanzier; &c.
		2	Lieut. Mason, assistant professor	•
	Rhetoric and Moral Phi-	1	Rev. Thomas Warner, professor, and	Murray's large Grammar, Blair's Rhetoric, and Paley's Moral Philosophy,
	losophy.	2	Lieuts. Tillinghast and J. A. Smith, assistant professors.	
	Infantry Tactics	1	Capt. Hitchcock, instructor	1 *

679, 343 22

The accounts of fourteen officers remain to be received, which will probably reduce the balance reported about \$10,000. The remainder will be applicable to the service of the present quarter; and the whole of it, I have no doubt, will be faithfully accounted for at the termination of the quarter.

The large amount of public property under the administration of the department, whether in the hands of its officers or those of companies, is promply and faithfully accounted for.

The balance remaining in the treasury of the appropriation for the Quartermaster's department proper will, it is believed, be sufficient for the wants of the service to the end of the year.

Of the works under the direction of the department, the road from Alagua to Marianna, in Florida, which was in progress at the date of my last annual report, has been completed as far as the appropriation would permit. It has not been practicable, however, with the limited means at the disposal of the department, to bestow any labor on the section lying between Oak Hill and Marianna, a distance of sixteen miles. The estimate submitted for the repair of the road from Pensacola to Tallahassee embraces an item for the completion of this section.

The amount appropriated for repairs on the road from Jacksonville to Alachua Court-House, in Florida, has been applied to that object as far as it would go, but it was found altogether inadequate to the completion of the work. The section lying between Jacksonville and Black creek has been put in good repair, but nothing has been done on that between Black creek and Alachua, a distance of about fifty-five

I have submitted an estimate for its completion.

The road authorized at the last session of Congress from Washington to Jackson, in Arkansas Territory, has been put under contract within the amount appropriated for that object, and will be completed

early in the next year.

There was reason to believe that the military road in the State of Maine would have been finished during the present year, but the unusual wetness of the season has so retarded the operations of the contractors as to prevent the completion of this work. It is, however, so far advanced as to answer every purpose of a winter road to the military post at Houlton, and materially reduce the expense of transporting supplies.

In consequence of the reduction of the force at Green Bay, and the employment of the garrison at Fort Winnebago in the erection of barracks, the road authorized between those places has not been commenced. The necessary arrangements will be completed during the winter, and this object will receive

early attention on the opening of the next season.

The barracks authorized at Fortress Monroe and Fort Gratiot have been completed during the present year. Those at Fort Crawford and Fort Winnebago, which were in progress at the date of my last annual report, have been advanced as far as the available means would permit, but further appropriations will be required to complete them on the enlarged plan necessary to accommodate the increased garrisons which have been assigned to those posts.

which have been assigned to those posts.

The barracks authorized at Green Bay and Key West are in progress. The appropriation made for the former will, it is believed, be sufficient for their completion. For the latter a further appropriation will be required. The island being entirely destitute of military resources, every article of supply is necessarily obtained from abroad, which materially increases the ordinary expenses of such operations. Besides, the extreme heat of the climate, and the apprehended unhealthiness of the position, render more extensive accommodations necessary than are provided under ordinary circumstances.

Operations were resumed at the Delaware breakwater early in April, and on the 30th of September 81,791 perches of stone had been deposited, which, added to 135,079 perches deposited in the years 1829 and 1830. makes the quantity deposited to that date 216,870 perches.

and 1830, makes the quantity deposited to that date 216,870 perches. The work was estimated by the commissioners who located it to cost \$2,216,950.

The appropriations already made amount to \$620,000, viz: Amount of appropriations 22d of May, 1828 .... .....\$250,000 00 100, 000 00 62, 000 00 208, 000 00 Do......2d of March, 1831 ..... 620,000 00 Of which there was expended by the Navy Department previous to the transfer \$13,768 76 purchased previous to the transfer..... 2,964 40 10,804 36 Disbursements by the Quartermaster's department in 1829..... 64, 229 43 274, 170 15 Do...... do..... in 1830...... Do......in 1831 to 30th September. 175, 315 32 524, 519 26 Leaving a balance on the 30th September of..... 95, 480 74 Of that balance there was in the hands of the quartermaster at Philadelphia...... \$4,512 24 And in the treasury ..... 90, 968 50 95, 480 74

The whole of which will be required to meet the engagements of the department in the 4th quarter of the year.

For the next year I have estimated for \$270,000, and it is extremely desirable that that sum be obtained; for the contingent expenses of the work are heavy, and are about the same whether we have a large or a small appropriation.

Our operations have been confined during the whole of the present season to that branch of the work called the breakwater, in contradistinction of the ice-breaker; from its western extremity for a distance of more than two hundred feet it has been raised nearly to its destined height; the material used above

the plane of the lowest water, as well as on the outward slope, is of the largest class received, and has been put up in the most compact manner.

For more than six hundred feet in addition this branch of the work has been raised above the plane

of low water, and stone has been deposited on a base extending — feet further.

A large quantity of stone in blocks, weighing from one to five tons each, will be required next year for the sea slope and the summit of the work, and we ought to deposit at least 70,000 perches of the ordinary stone—If the contract system were abandoned, and individuals owning quarries could be assured that all the stone they should deliver at the breakwater another season would be received at a fair price, as much as we could deposit would be readily obtained.

Notice should be given early in December, so that those disposed to furnish stone might have time to

engage vessels and make the other preparations necessary to commence business early in the spring.

The want of quarters at the work, sufficient for the laborers and other persons employed, has been a serious inconvenience. One or two vessels anchored near it, and used as quarters, would be the means of saving much time, and would place the men more immediately under the control of the officers. a measure would not have been advisable heretofore from the uncertainty of adequate protection to the vessels in the event of storms; but the work is now so far advanced that no fears are entertained for the

So far as the experience of the two last seasons can be relied on as a test of the stability of the work, there is abundant reason for believing that it will have sufficient strength to resist the action of the ocean even when agitated by the severest tempests; and its advantages as a harbor may be inferred from the shelter it has already afforded during storms to vessels employed in transporting stone, as well as those engaged in commerce. Instances have occurred of vessels after parting their cables at their usual anchoring ground having been moored behind the breakwater, where they remained in perfect security during the most violent gales.

The work in its present condition, without permanent lights, presents some danger to vessels approaching it at night. There are several lighted vessels in the Delaware, under the direction of the Treasury Department, which are removed to Philadelphia during the winter. It would be a great accommodation to the commercial community if one of them were moored behind the breakwater during that season. In addition to the security which it would afford to vessels as a signal, it would answer the valuable purpose of demonstrating the advantages of the work.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, Quartermaster General.

Hon, Lewis Cass, Secretary of War.

#### REPORT OF THE PAYMASIER GENERAL.

Paymaster General's Office, Washington City, November 30, 1831.

Sir: I have the honor, herewith, to submit a tabular statement of funds advanced to the several paymasters between the 1st of October, 1830, and the 30th of September, 1831, amounting to one million one hundred and seventy-three thousand six hundred and sixty-one dollars and fifty cents. Of this sum

The order of the War Department of the 4th of April last, altering the districts and changing the stations of paymasters, has produced delay in the payment of some distant posts, as was foreseen and pointed out in my letter to the Secretary of War of the 8th of April. The order was repealed on the 16th of June following, too late to change the arrangements the department was required to make on the 1st of that month to carry it into operation. Owing to this, and to the death of Paymaster Biddle, the troops at Forts Howard and Winnebago are reported to have pay due from the 1st of May. As soon as it was ascertained that the arrangements to pay at these posts had failed, Paymaster Phillips was ordered to perform that service. He reports his intention to leave St. Louis on the 13th instant, and if it be possible

With the exception of the two posts just named, the troops are paid to as late a period as could be expected; and I have every reason to believe that all funds advanced prior to the 1st of October will be

accounted for before the close of the year without loss to the government.

In printing the report made to Congress last session by the late Secretary of War, a typographical error was committed, by which the transportation for the payment of one post is represented to cost the government \$8,000. As this is given as data to calculate what might be saved in that article by the proposed change in the organization of this department, it is important that the error be corrected. I have therefore obtained from the Third Auditor a statement of what was actually paid for the entire transportation of the department in the year 1830, amounting to \$6,041 66, or \$111 88 for each post, including arsenals. This may be considered a fair average of the annual cost. In connexion with this subject, it may not be improper to state the following facts, to show how far the present organization has answered the object for which the department was created.

Within the last eight years upwards of nine millions of dollars have been disbursed by the department, in small sums, without the loss of one cent to the government, and without having to resort to a single coercive measure to compel a more prompt settlement of accounts. This service has cost the government but little more than the minimum per cent. (allowed for accountability alone) on all other military dis-

bursements, in addition to the pay, emoluments, and expenses of the officers.

Respectfully, your obedient servant,

N. TOWSON, Paymaster General.

Hon. Lewis Cass, Secretary of War.

Statement of the moneys drawn from the appropriations for the pay department and remitted to the disbursing officers on account of payments for the fourth quarter of the year 1830, and the first three quarters of 1831; the amount unexpended and forming part of their estimates for the fourth quarter of 1831; the balances to be accounted for; the periods to which the troops have been paid, and accounts rendered.

N. TOWSON, Paymaster General.

#### REPORT FROM THE ORDNANCE DEPARTMENT.

Ordnance Office. Washington, November 21, 1831.

Sm: In compliance with your instructions of the 20th August last, I have the honor to submit here-

with a general report of the operations of this department.

Statement A exhibits an account of all public moneys remitted from the treasury through this office to disbursing officers and contractors in the year 1830, the amount expended and accounted for by these officers, and the balances unexpended and remaining in their hands on the 31st December, 1830. \$938,727 56 It will appear from this statement that the remittances during the year 1830, amounted to. 893,877 30

That during the same period the accounts rendered and settled amounted to ....... And that the balances remaining unexpended in the hands of disbursing officers on the 31st December, 1830, amounted to .....

44,850 26

Statement B exhibits the total amount of funds remitted to disbursing officers of this department and to contractors during the three first quarters of the present year. It will therein appear that the amount remitted during that period was

625,123 10 568,500 01

And that the accounts rendered amounted to ...... Leaving an unexpended balance in the hands of disbursing officers on the 30th September,

56,623 09

Statement C exhibits an account of some of the principal articles manufactured and repaired at the Statement C exhibits an account of some of the principal articles manufactured and repaired at the several arsenals and armories in the year ending with the 30th of September, 1831. By this it will be seen that 110 gun carriages and equipments, 997 holsters, and about 850 sets of accourtements for small arms, have been made at the arsenal; that 16,741 small arms have been cleaned and repaired; and that 26,481 muskets, and their appendages, have been manufactured at the national armories.

Statement D exhibits an account of the artillery, small arms, accourtements, and other ordnance stores, issued by this department to the army and marine corps of the United States during the year ending with the 30th September, 1831. In this it will appear that 34 field gun-carriages, 33 field guns, 2,209 muskets, complete, and about 700 sets of accourtements for small arms, are among the principal articles issued.

Statement E exhibits an account of the arms accourtements artillery artillery artillery artillery are procurred.

Statement E exhibits an account of the arms, accoutrements, artillery, artillery equipments procured, and of the expenditures made under the act of 1808, for arming and equipping the militia during the year ending with the 30th September, 1831.

By which it will appear, among other articles, that the artillery procured amounted to 58 6-pounder cannon, 103 field carriages, with equipments complete, 150 sets of timber for gun-carriages, and that the number of small arms procured amounted to 10,230 stands of muskets and rifles. The amount expended for this object being \$181,940 20.

Statement F is an apportionment of arms to the militia of the several States and Territories and of the District of Columbia for the year 1830; showing also the quantity of arms and military equipments distributed to the militia from the 1st of October, 1830, to the 30th September, 1831.

Statement G exhibits a general account of the public lead mines from 1821 to the 30th September, 1831, a period embracing the whole time during which they have been in charge of this department. It will appear by this statement that the whole productive amount of the lead mines while in charge of this department up to the 30th September, 1831, has been 51,622,072 pounds.

Statement H exhibits a detailed account of the operations of the lead mines during the year ending with the 30th of September, 1831, by which it will be seen that the total amount of lead manufactured during that period has been 6,449,080 pounds.

I have the honor to be, sir, respectfully, your obedient servant,

G. BOMFORD, Brevet Colonel, on Ordnance service.

Hon. Lewis Cass, Secretary of War.

GEO. BOMFORD, Brevet Colonel, on Ordnance Service.

ORDNANCE OFFICE, Washington, November 21, 1831.

Ordnance Office, Washington, October 28, 1831.

Sm: I beg leave respectfully to submit to your consideration the propriety of a reorganization of this department at some period during the approaching session of Congress. The facts and reasons going to show the importance and necessity of this measure have been communicated to your predecessors on various occasions since the year 1827, and have as constantly received the attentive and favorable consideration of the Executive and of the various military committees of the Senate and of the House of Representatives, to whom the subject has been referred.

Nor have the views of this department, as to the necessity of a more efficient organization, undergone any change since the date of my last report on this subject to your immediate predecessor, a copy of which is herewith transmitted, accompanying the bill reported at the last session of Congress by the Military Committee of the House of Representatives, and which is therein referred to as embodying the

views of this department on the subject of the proposed reorganization.

Appended to the report herewith forwarded is a statement of the additional expense which would arise under the provisions of the bill herein referred to, should it pass into a law; also a memorandum of the arsenals, depots, and other posts where officers are employed on ordnance service, accompanied by a statement of the number and grades of officers now serving in this department.

I have the honor to be, sir, respectfully, your obedient servant,
GEO. BOMFORD, Brevet Colonel, on Ordnance Service.

Hon. Lewis Cass, Secretary of War.

Ordnance Office, Washington, November 30, 1830.

Sm: In compliance with your instructions to report on the resolution of the House of Representatives, dated April 26, 1830, I have the honor to submit the following remarks:

The propositions contained in the resolution refer to the line of the army, and to all the several departments of the military service. It has, however, been considered proper to limit this report to such matters as concern the Ordnance department alone, for the reason that the officers who are charged with

the direction of the other branches of service are much better prepared, by experience and merited distinction, to report on all those points which concern their respective departments.

In reference to the question, "whether any reduction in the number of officers in the army of the United States can be made without injury to the public service," I have the honor to state that, by the present laws, no more than four officers are specially provided for the performance of ordnance duties, which the four company contains of the artillory regiments. viz: the four supernumerary captains of the artillery regiments. For any additional officers which the ordnance service may require, a contingent provision is made in the law, by giving to the President of the United States authority to detach from the regiments of artillery such number as may be necessary for

The officers who serve in the Ordnance department, and who may be considered as composing it, consist of the four captains provided by law, and such others as may, from time to time, be detailed from the artillery. The number of the latter is not prescribed by law or by regulation, and is not constant, but varying, according to the necessities of the service, and is generally about thirty. But whether this number be large or small, it has no effect to increase or diminish the whole number in service, as the change is effected by a mere transfer from one branch of service to another.

The entire abolition of the department would, therefore, make the military establishment consist of

only four officers less than at present.

In order that an opinion may be formed of the number of officers required for the performance of ordnance duties, it appears to be proper that the character, extent, and responsibility of those duties should be briefly stated.

The duties are defined by law, and consist in providing, preserving, distributing, and accounting for every description of artillery, small arms, and all the munitions which may be required for the fortresses of the country, the armies in the field, and for the whole body of the militia of the Union. In these duties are comprised that of determining the general principles of construction, and of prescribing in detail the models and forms of all military weapons employed in war. They comprise, also, the duty of prescribing

the regulations for the proof and inspection of all these weapons, for maintaining uniformity and economy in their fabrication, for insuring their good quality, and for their preservation and distribution.

The extent of these duties may be perceived by referring to the fact that, for carrying into effect the general purposes here stated, Congress has appropriated, for many years past, nearly one million of dollars per annum; and that, in order to fulfil these purposes, extensive operations are conducted at the following establishments, viz: two national armories, nine private armories, four cannon founderies, fourteen national arsenals, four ordnance depots, and an extensive region of public lead mines. These establishments are situated in the different parts of the Union, and they employ more than one thousand men, consisting chiefly of artificers and mechanics. They are all conducted under the general supervision, and (with the exception of the private armories,) under the immediate and special direction of the Ordnance depart-

To this brief outline of the character and extent of ordnance duties, it seems proper to add a few These are, in some material respects, peculiar to this branch of service alone, and do not exist in any other branch of the military service. The appropriations for the ordnance service are applied to the productions of arms and other military supplies of a durable character, which are stored in depot for future service, and are reserved to meet the future exigencies and defence of the country. They are not consumed and extinguished in the current service of the day, like most of those which are obtained by the expenditures of other branches of the military establishment. The value of ordnance supplies now in depot which have been accumulated under former appropriations exceeds eleven million dollars, and the value is constantly augmenting at the rate of nearly one million dollars per annum. This branch of service is, therefore, responsible that all the various munitions of war are provided in due proportion to the wants of the service, and are constructed on the most approved models and of suitable quality; that the whole body of the militia be efficiently armed and equipped to the fullest extent of the means appropriated to that object; that large annual disbursements be faithfully made and promptly accounted for; that they be applied to authorized purposes, and no other; and that they produce a just and substantial equivalent in military supplies of enduring value to the country, and that the accumulating product of these expenditures be securely preserved and duly accounted for.

From this brief statement of ordnance duties, it will be perceived that a greater number than four officers is necessary for the performance of them; and as this number is all which the ordnance service adds to the aggregate of the whole military establishment, it follows that it cannot be reduced without injury to the service. A reduction of the number of officers serving in the Ordnance department by details from the regiments would not lessen, in any degree, the aggregate of the army, and is, therefore, considered as not being within the scope of the inquiry contained in the resolution.

But as it is necessary that a considerable number of officers should always be detached from their regiments for ordnance service, it is also necessary that those regiments should possess an excess in order to be able to supply this demand without deranging the regimental service. The regiments of artillery from which alone officers for ordnance service can now be drawn are provided with five officers for each company, while the infantry companies, consisting of nearly the same number of men, are provided with This excess in the artillery regiments was provided expressly for the purpose of enabling them to furnish the details for ordnance service, as appears by the plan reported by the Secretary of War on the 12th of December, 1820, in pursuance of an order of the House of Representatives. This report is published in State Papers, vol. 1, 2d session 16th Congress, Document No. 21. It stated that the number of officers allotted to each company of artillery was greater than the regimental service required.

A reduction in the artillery regiments to an extent equal to the number usually detached from them

for ordnance service, and a permanent assignment to the latter of an equal number, it is believed, would be advantageous to both branches of service. A measure of this kind would leave four officers in each company for regimental duties, and would provide a sufficient number for ordnance service.

In reference to that clause of the resolution which calls for "a plan of the most efficient organization of the army" I beg leave to state that so much of the present organization of the army as provides for the ordnance service is considered defective, and the public interests require that a more efficient system

should be provided for this branch of service.

The principle on which the present system rests, that of furnishing officers for ordnance service by temporary details from the regiments, is inapplicable to duties of that character, more especially to such temporary details from the regiments, is inapplicable to duties of that character, more especially to such of them as are performed by senior officers who direct and control the most important part of them. From the general character of these duties, as described in a former part of this report, it may be readily perceived that experienced officers are necessary for their proper performance. They differ from those which are practiced in other branches of service. No other department is charged with the duty of devising and determining the plans and models of military weapons, nor with the supervision of extensive mechanical operations and fabricating establishments. No other performs any duties in immediate connexion with, or for promoting the efficiency of, the whole body of the militia, and none other is charged with the care and preservation of a vast amount of munitions of war; the responsibility of the ordnance, in this respect, being greater than that of all the other departments united. It is, besides, the only department, except the Engineer whose duties are but little affected by any change from peace to war or from war except the Engineer, whose duties are but little affected by any change from peace to war, or from war to peace, whose services have no immediate connexion with the line of the army, and whose duties would remain the same whether the peace establishment be large or small, or be entirely abolished. From the peculiarities of this service the experience acquired in other branches can be of little avail in this; yet, by the present system, its duties are required to be performed solely by officers detached for short periods from the regiments. And, since 1821, when this system was adopted, these duties, which include the disbursement of more than seven million of dollars, have been distributed among one hundred and sixty different officers, a large portion of whom were necessarily without previous experience in them.

The embarrassments incident to these fluctuating changes may be exemplified by relating those which occurred at a single post in one quarter of a year. Soon after the commencement of a quarter the proper commander transferred to his successor the balance of public funds, and the military stores on hand, and left the arsenal. Funds for the current service of the quarter were transmitted to the second commander, but did not reach him until he also had departed and was four hundred miles distant. The third commander also left the post and placed it under the surgeon, who, in his turn, was relieved by a

fifth. Funds were again transmitted, the former having been repaid into the treasury; but before they reached the post, the fifth commander to whom they were sent had been superseded by a sixth, and the quarter had expired, leaving the workmen employed at the post unpaid. These changes were all unknown to the department which is charged with directing the services of the post and is responsible for them until after each had occurred.

The several departments for subsisting, clothing, paying, healing, quartering, and transporting the army, and for constructing the military defences of the country, have each a separate and stable organization. The department for arming them alone remains subject to the fluctuations and embarrassments of an unstable system. Experience has fully demonstrated the wisdom of the laws which gave stability to the other departments, and an extension of the same principle to the ordnance service would doubtless prove alike beneficial.

Plans for a more efficient organization of the ordnance on a basis similar to that of other departments have at different times been submitted, and have received the consideration of the proper committees of Congress, who have uniformly sanctioned them by reporting bills for carrying them into effect. One of the bills thus reported passed one house, but was laid over at the close of the session in the other, for

want of time to act upon it.

The bill reported by the Committee on Military Affairs of the House of Representatives at the last session (No. 77) contains all the provisions which are considered essential for giving to this branch of service an efficient organization. It is believed, however, that some additional provisions would be found useful. I beg leave, therefore, respectfully to suggest that provision be made for appointing one sergeant useful. I beg leave, therefore, respectfully to suggest that provision be made for appointing one sergeant for each military post, whose duty it should be to receive and preserve the ordnance, arms, ammunition, and other military stores at the post; and, under the direction of the commander, to issue and account for the same under such rules as shall be prescribed by the Secretary of War. It is suggested, also, that the appointments be made by the Secretary of War from among those sergeants who have served in the army eight years at least, four of which to have been served in the grade of non-commissioned officer, and who shall produce certificates of faithful service and good moral character from their regimental and company commanders. It is also proposed that the sergeants thus appointed shall receive five dollars per month in addition to the pay which is or may be allowed to any company sergeant

manders. It is also proposed that the sergeants thus appointed shall receive five dollars per month in addition to the pay which is or may be allowed to any company sergeant.

In reference to this proposition, it appears proper to state, by the 3d section of the act of March 30, 1814, provision was made for appointing a junior lieutenant of each company of artillery, a conductor of artillery, whose duty it was made to receive and account for all military stores furnished for the use of the company, for which service he was to be allowed ten dollars extra per month. The act of March, 1815, fixing the peace establishment, continued the provision. It was also continued in the act of April 20, 1818, which remodelled the artillery. But as no such provision was contained in the act of March, 1821, which reduced the peace establishment, the office of conductor of artillery then ceased. And as the law was silent as to the performance of this duty, the Army Regulations have since confided it to the respective commanders of posts. This, however, has been found inconvenient in practice. It obliges the commanders to devote much of their time to the care and preservation of the military stores of the posts, and to making up the quarterly returns of them. This requires attention to numerous little details, which, in reference to the other and appropriate duties of a commander, are comparatively of minor importance. in reference to the other and appropriate duties of a commander, are comparatively of minor importance. By relieving the commanders of posts from this duty, and confiding it specially to a subordinate, (subject, however, to the directions of the former,) whose attention would not be diverted from it by more important avocations, more personal attention could be given to the care and preservation of valuable military stores, and it is believed the duty would be better performed.

The plan suggested, that of appointing experienced and faithful sergeants to this duty, would present to the meritorious of that grade an incentive to good conduct, and at the same time afford the means of rewarding it; and it is believed that the measure would have a beneficial influence upon the rank and file

of the army.

It should be observed that this measure is proposed to be applicable to the forts or posts which are garrisoned by the troops, and not to extend to the arsenals. The care of the public stores at the latter is confided to ordnance officers, but no ordnance officers are stationed at garrisoned posts, nor do they exercise any immediate control of the military stores there deposited.

Respectfully submitted.

GEO. BOMFORD, Brevet Colonel, on Ordnance Service.

Hon. J. H. Eaton, Secretary of War.

A copy. OCTOBER 28, 1831. GEO. BOMFORD, Brevet Colonel, on Ordnance Service.

### TWENTY-FIRST CONGRESS, FIRST SESSION, H. R. 77.

January 6, 1830.—Read twice, and committed to a Committee of the Whole House to-morrow.

Mr. Drayton, from the Committee on Military Affairs, reported:

A BILL providing for the organization of the Ordnance department.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the passage of this act, the Ordnance department shall consist of one colonel, one lieutenant colonel, two majors, and ten captains, and as many enlisted men as the public service may require, not exceeding two hundred and fifty.

Sec. 2. And be it further enacted, That the first section of the act, passed on the 8th of February, 1815, entitled "An act for the better regulation of the Ordnance department," and so much of the second section of the act entitled "An act to reduce and fix the military peace establishment of the United States," passed the 2d of March. 1821, as provides for one supernumerary cantain to each regiment of artillery to perform

the 2d of March, 1821, as provides for one supernumerary captain to each regiment of artillery to perform ordnance duty, and so much of the 4th section of the same act as merges the Ordnance department in the artillery, and reduces the number of enlisted men, be, and the same are hereby, repealed: Provided, That nothing contained in this act shall be so construed as to divest the President of the United States of authority to select from the regiments of artillery such a number of lieutenants as may be necessary for

the performance of the duties of the Ordnance department.

Sec. 3. And be it further enacted, That all officers and enlisted men authorized by this act shall be subject to the Rules and Articles of War; and that the officers shall receive the pay and emoluments now

allowed to officers who perform ordnance duties.

Pay and emoluments of artillery and ordnance officers, exclusive of double rations.

#### REPORT OF THE COMMISSARY GENERAL OF SUBSISTENCE.

Office of the Commissary General of Subsistence, Washington, November 30, 1831.

Sir: In conformity with your instructions of 20th August ultimo, I have the honor to present to your view a statement in duplicate of the moneys remitted and charged to contractors and the disbursing officers of the department in the 1st, 2d, and 3d quarters of the year, amounting to	\$252,443	31
To which is added the amount due them on the settlement of their accounts	735	51
Making an aggregate of  The sum accounted for is	253,178 232,257	
Leaving an outstanding balance of	20,921	51
fiscal operations of 1831	426	83

Leaving ...... 20,494 64

Actually in the hands of the disbursing officers of the commissariat at the expiration of the third, appli-

cable to the expenditures of the fourth quarter of the year.

It is a source of great pleasure to state, that of the moneys charged and remitted during the period embraced, no loss whatever has been sustained by government; and of eighty-nine officers disbursing in the department, only three accounts from the most remote posts have not been received. There is no doubt, however, of their reaching the office in a few days; but it is believed that if received the result of the statement would not be materially affected.

Very respectfully, your most obedient servant,

GEO. GIBSON, Commissary General of Subsistence.

Hon. Lewis Cass, Secretary of War.

Statement exhibiting the moneys remitted to contractors from January 1 to September 30, 1831; the sums charged to them on account of failures, and the amounts accounted for by them; the balances in the hands of the disbursing officers of the department December 31, 1830; the moneys remitted to them in the first, second, and third quarters of 1831; the sums charged to them on account of sales to officers on the frontier posts, sale of empty boxes, barrels, &c.; and the amounts accounted for by them for the same period; together with the balances in their possession at the expiration of the third quarter of the year.

## RECAPITULATION.

Total amount charged	\$252,443 31 735 51
Accounted for	253,178 82 232,257 31
Deduct this sum charged to contractors, not as advances or remittances, but as the difference between the contract prices and the purchases	20,921 51
made by agents of the department, to supply deficiencies.	426 83
Leaving actual balance in the hands of the assistant and acting assistant commissaries, to be accounted for in the 4th quarter of 1831	20,494 68

GEO. GIBSON, Commissary General of Subsistence.

Office of the Commissary General of Subsistence, Washington, November 30, 1831.

#### REPORT OF THE COMMISSARY GENERAL OF PURCHASES.

Commissary General's Office, Philadelphia, October 24, 1831.

Sir: I enclose four statements prepared by order of the War Department, as follows, viz:

No. 1. Statement of moneys drawn from the appropriation for the Purchasing department for 1831, during the first three quarters of 1831, amounting to \$102,511 42.

No. 2. Statement of moneys disbursed during the first three quarters of 1831, on account of the Purchasing department, and amounting (after deducting \$15,302 20 belonging to the appropriation for 1830) to \$97,369 14.

No. 3. Comparative statement of the cost of clothing for the army of the United States during the

years 1830, 1831, and 1832.

No. 4. Statement of the cost of clothing for the army of the United States during the year 1832.

The foregoing statements will, I hope, meet your approbation, and be received in good time.

With great respect, I have the honor to be, sir, your obedient servant,

Hon. Lewis Cass, Secretary of War.

### No. 1.

Statement of moneys drawn from the appropriation for the "Purchasing department" (for 1831,) during the first three quarters of 1831.

May 14 July 15	By Secretary of the Treasury's warrant No. 465, for.  By Secretary of the Treasury's warrant No. 796, for.  By Secretary of the Treasury's warrant No. 1,172, for.  By Secretary of the Treasury's warrant No. 1,612, for.	29, 834 02 32, 279 53

Commissary General's Office, Philadelphia, October 24, 1831.

C. IRVINE, Commissary General of Purchases.

Hon. Lewis Cass, Secretary of War.

SURGEON GENERAL'S OFFICE, October 20, 1831.

Sm: In compliance with an order of August 20th, I herewith enclose estimates of the expenses of the medical department of the army and of the Surgeon General's office for the year 1832. Accounts against the department being transmitted to this office for examination, and paid by warrant on the against the department being transmitted to this office for examination, and paid by warrant on the treasury, but \$1,550 have been advanced during the year, of which \$808 51 were unexpended on the 30th ultimo and the remainder has been accounted for. The expenses of the department for supplies has not materially varied since the reduction of the army in 1821, being at the rate of \$2 50 per man; the present estimate is therefore the same as heretofore. That for private physicians has increased in consequence of the deficiency in the number of medical officers, as the army has been distributed for some years past. The amount expended in 1829 and 1830, including the recruiting service, was \$28,966.

On the reduction of the army in 1821 it was distributed to 40 military posts and arsenals, including West Point. In January last there were 51 on the 30th ultimo there were 64 stations including the

West Point. In January last there were 51; on the 30th ultimo there were 64 stations, including the recruiting rendezvous, requiring a surgeon, and at the same period there were three surgeons absent in consequence of sickness and one on furlough, leaving but 49 for duty. If every officer of the department were constantly on duty, and but one assigned to a full regiment, instead of three as heretofore allowed by law, there would still be a deficiency of eleven. On this subject I beg leave to refer to a report to the department of August I, 1830, relative to a reduction of the officers of the army, contained in the third volume of the Executive Documents of the last session of Congress.

Allow me also to call the attention of the department to the several memorials presented and the

Allow me also to call the attention of the department to the several memorials presented and the several reports made in relation to graduating the pay of surgeons of the army in proportion to their term of service, and especially as they are now the only subordinate officers of either army or navy whose pay has not been increased. In 1816 an additional ration was allowed to all lieutenants of the army, and subsequently an additional ration to both captains and lieutenants, with \$10 per month to the army, and subsequently an additional ration to both captains and lieutenants, with \$10 per month to the former while on duty with their companies. In 1828 an addition of \$10 per month and one ration per day was made to the pay of lieutenants of the navy, and in the same year the pay of the surgeons and assistant surgeons of the navy was increased after the periods of five and ten years service. The senior surgeons after ten years, and "while in actual service at sea," receive \$85 per month more than the junior assistants, and \$37 per month more than the full pay and emoluments of the army surgeon when on actual duty with his regiment, while the latter can at no period and under no circumstances receive above \$11 per month more than the junior assistant or than he did at his first appointment.

As stated above, all the officers of the department are on duty except four, three from sickness and one on furlough for a short period. The reports and returns required by the regulations have been duly received. They show the hospitals to be well supplied and all public property under the charge of the surgeons has been satisfactorily accounted for. The total number of deaths reported in hospital during the year ending June 30 has been 126: of these 22 were from intemperance and 21 from consumption.

the year ending June 30 has been 126; of these 22 were from intemperance and 21 from consumption, leaving but 83 from all other causes.

Very respectfully, your obedient servant,

JOS. LOVELL, Surgeon General.

Hon. Lewis Cass, Secretary of War.

#### REPORT FROM THE TOPOGRAPHICAL BUREAU.

Topographical Bureau, November 7, 1831.

Sm: In obedience to your instructions of the 20th of August last, I have the honor to submit to you:

1. A statement marked A, exhibiting the amount drawn from the Treasury Department and remitted to the disbursing officers under this office from the 1st of October, 1830, to the 30th of September, 1831, inclusive, and also the amount of accounts rendered.

2. A statement marked B, exhibiting the number of the individuals employed under the class of civil

engineers and agents, under this bureau, and of the amounts paid to each for the same period.

3. A statement marked C, exhibiting the amount drawn from the treasury for the expenses of surveys and examinations in relation to the summit level of the contemplated canal across the Isthmus of Florida.

The application of the funds appropriated for surveys and the employment of the topographical

1. In making a survey of a route for the Michigan and Illinois canal, and in examinations and surveys of the Rock river and Des Moines rapids of the Mississippi, with a view to the improvement of the navigation of those rapids.

2. In making a survey of part of the Hudson river, with a view to the improvement of the navigation of that river near Albany.

3. In completing the drawings and reports of the surveys for the purpose of connecting by a canal the waters of Lakes Erie and Michigan with those of the Wabash.

4. In making surveys and examinations in relation to the contemplated Weymouth and Taunton

canal.

5. In making surveys and examinations in relation to the improvement of the Big Sandy river in Kentucky, and in relation to a road from Pikesville, on the Big Sandy, to the boundary of North Carolina, and from thence to the boundary of South Carolina.

6. In making examinations and surveys in order to ascertain the practicability of a railroad from

Winchester, Virginia, to Harper's Ferry.

- 7. In completing the drawings and reports of surveys of parts of the rivers Raritan and Delaware. 8. In making an examination of a route for a railroad from the Portage summit of the Ohio canal to the Hudson river.
- 9. In making examinations and surveys in relation to the contemplated canal to connect the waters of the Atlantic with those of the Gulf of Mexico across the Isthmus of Florida.

10. In completing the drawings of a reconnoissance of the sounds of North Carolina.
11. In completing the drawings of a survey in order to ascertain the military defences of the St. Mary's river, Maryland.

12. In completing the drawings of a survey of the Ohio, Beaver, and Chenango route of the Ohio and Erie canal from Pittsburg to Elk creek on Lake Erie, and to the harbor of Erie.

13. In completing the drawings of a survey of the Alleghany river from Pittsburg to French creek, of French creek to Le Bœuf, and of a route of a canal from thence to the harbor of Erie.

14. In completing the drawings of a survey of the Pennsylvania and Ohio canal from Big Beaver

river to Akron, in Ohio.

15. In completing the drawings of a survey of a canal route from the Connecticut river to Lake

15. In completing the drawings of a survey of the Oliverian and Baker's rivers.

16. In completing the drawings of a survey of a canal route to unite the waters of Lake Champlain with those of the Connecticut, by way of the valleys of Onion and Wells' rivers, in the State of Vermont.

17. In completing the drawings of a survey to connect the Savannah and Tennessee rivers by means

of a canal or railroad.

18. In superintending the construction of the Baltimore and Susquehannah railroad, the Patterson and Hudson river railroad, and Catskill and Conajoharie railroad.

19. In paying the civil engineers and agents employed on several of the foregoing items of duties,

the employ of whom was made necessary from the small number of topographical officers.

The subject of an increase and better organization of the corps of topographical engineers, and of the inconveniences resulting from their present condition, has been so frequently alluded to in executive communications that I shall now only bring to your consideration such views as have not been previously presented. The able report on this subject from your predecessor, Mr. Eaton, fully exposes the military considerations of the case, and also the number and organization required by the present wants of the country. To this I have only to add that the views therein unfolded are strengthened by every day's experience, and that the inconvenience resulting from a want of the organization proposed are continually

The reasons which may be alleged in favor of the proposed increase, in addition to those in the report alluded to, are such as apply to the survey of the coast.

The law of the 14th of April, 1818, commits that duty to the army and navy; and that part of the army to which this duty properly belongs is the topographical engineers. But owing to the few officers of this corps, and the pressing demand for their labors on other subjects, we have as yet done nothing under that law, except in such detail surveys of our harbors and bays as were made with a view to their military defences, but are highly valuable matter for purposes of filling up the cartoons of the general survey contemplated.

The scientific education derived at our Military Academy furnishes the necessary elementary know-ledge for this duty; and the military education acquired there and in the army establishes those habits of order, attention to duty, and subordination necessary in every vocation of life, and without which no extensive operations can be judiciously or economically conducted. The government, therefore, has at its command valuable materials for filling up the proposed corps in the officers of the present corps, and those graduates of the academy who have been on duty with it, and others from that institution in the several corps of the army, with officers capable at once of entering upon its duties, and of rendering efficient services.

In those services which would have to be performed in a survey of our coast, not only is mathematical knowledge requisite, but also a knowledge of and a habit of accurately using the fine and delicate instruments required in the necessary observations. This last and valuable knowledge can be obtained by those only who possess the mathematical and mechanical information involved in the use and construction of the instruments; and with the elementary knowledge which, it is but fair to suppose, is already possessed by the class of individuals before alluded to, there would only remain to be acquired a habit of accurately using the instruments.

It is but just to state that the ability to use fine instruments, and to observe correctly with them, is a work of time and of careful attention. But if we are not adequately organized, we cannot have officers to appropriate to that duty, and, of course, cannot say when the result of that time and careful attention will be possessed. If we have not, therefore, the necessary means, we must continue defective in a correct knowledge of our own coast, and also defective in the practical skill of a branch of our profession, the importance of which cannot be too highly estimated; in fact, everything depends upon it. It furnishes all the data for the calculations; and if defective, all the calculations are but authentications of error.

The requisite instruments have already been procured by the government, at a great cost, and under the personal supervision of a gentleman highly gifted in those matters, and are now in deposit under the care of this office. It needs only means and time to apply them to their intended uses, and to reap from

care of this office. It needs only means and time to apply them to their intended uses, and to reap from them the valuable results which they are so well adapted to yield.

It appears to me entirely unnecessary to urge upon your notice the various commercial advantages which will result from an accurate knowledge of our maritime frontier, nor the value of this knowledge to its military defences. These considerations are self-evident, and need no argument to maintain them. But it may be urged that there is something due to our national character, which requires that we should be no longer entirely indebted to the imperfect efforts of other nations for information of our own coast, and that we should, by our own labors, add something to the general mass of scientific knowledge by, at least, correct determinations of the geography of our own country. The present effort may also be the origin of a school which may hereafter furnish individuals adequate, as well by their capacity to observe as to calculate the results of observations, to enter into fair and honorable competition with the distinguished astronomers of Europe, some of whom made their first essays while officers of a similar corps.

guished astronomers of Europe, some of whom made their first essays while officers of a similar corps.

The duties of a corps of topographical engineers are essentially military and scientific; hence the advantages of having military habits and education added to the scientific knowledge of its members.

advantages of having military habits and education added to the scientific knowledge of its members. Its duties also benefit all the great interests of society, and eminently qualify its members for operations which might be considered as the peculiar province of the civil engineer. For instance, the survey of a country for military purposes furnishes also a good geographical map; the survey and construction of a road for military purposes, or for the transportation of the mail, is an equally good road for the merchant, the farmer, or the traveller; a canal for military purposes will serve equally well the wants of agriculture and commerce; and a survey of a bay or river, or harbor, in order to ascertain the military defences of either, furnishes also that precise knowledge of its shoals, bars, channels, tides, and currents, so valuable to the navigator. While a topographical officer, therefore, is collecting in his military operations the knowledge necessary for the military defences of the country, he also collects matter improving its geography, and bearing essentially upon its commercial and agricultural prosperity.

From the character of the duties of such a corps it may be seen with what facility and advantage it may have its attention, when necessary, turned to objects purely civil; and that even while pursuing

may have its attention, when necessary, turned to objects purely civil; and that even while pursuing these purely civil objects, from its military knowledge, its labors will be enriched by all the military considerations which the operations may develop; so that the labors of the corps, if judiciously directed, cannot fail to furnish the government with the most correct knowledge of the resources of the country civil and military; of its agricultural, commercial, mechanical, and mineralogical advantages, and of its military means of defence; as all these are subjects of the investigations of a topographical engineer.

Respectfully submitted.

JOHN J. ABERT, Lieutenant Colonel and Topographical Engineer.

Hon. Lewis Cass, Secretary of War.

Statement showing the amount of money drawn from the treasury and remitted to the officers and agents disbursing under the Topographical Bureau, from October 1, 1830, to September 30, 1831, inclusive, and the amount of accounts returned by each within the same period.

APPLICATION OF MASSACHUSETTS FOR A MORE PERFECT ORGANIZATION OF THE MILITIA OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 12, 1831.

### COMMONWEALTH OF MASSACHUSETTS.

Resolved by the senate and house of representatives, That the senators of this Commonwealth in the Congress of the United States be instructed, and the representatives requested, to use their exertions to procure the passage of a law for the more perfect organization of the militia of the several States.

Resolved, That his excellency the governor be requested to transmit copies of these resolutions to the senators and representatives of this Commonwealth in Congress, and also to the governors of the other States, in order that the same may be submitted to the legislatures thereof for their consideration.

In Senate, March 4, 1831.

Read twice and passed. Sent down for concurrence.

SAML. LATHROP, President.

In House of Representatives, March 7, 1831.

Read twice and passed in concurrence.

W. B. CALHOUN, Speaker.

March 8, 1831.—Approved.

LEVI LINCOLN

<sup>†</sup> Mr. Belin receives \$2 per diem in addition, while employed in surveying in Illinois and Missouri.

[1st Session.

ON CLAIM OF SOUTH CAROLINA FOR REIMBURSEMENT OF MONEY PAID FOR THE SUPPORT OF THE MILITIA OF THAT STATE DURING THE WAR OF 1812-15.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 15, 1831.

Mr. Drayton, from the Committee on Military Affairs, to whom was referred the memorial of the State of South Carolina, by Alexander Speer, comptroller general, reported:

That the object of the memorial, as therein set forth, is to obtain payment from the United States of the sums of money expended by the State of South Carolina upon her militia whilst in the service of the general government, together with interest thereon. As the claims of South Carolina depend upon the existence of the facts that her militia were in the service of the United States during the late war under such circumstances as constitutionally entitled her to reimbursement for the expenditures which she made upon them, and that these expenditures were appropriated for the purposes to which they were applied, the committee will state the substance of the evidence by which, in their judgment, these facts are fully and conclusively proved.

Before the commencement of the war with Great Britain, and for a long time afterwards, the State of South Carolina was almost destitute of any of the means of military protection, excepting such as could be furnished by her own resources. In the harbor of Charleston alone were there any forts, and these were in so feeble a condition that, at a period when a British squadron was engaged in sounding the depth of water off the bar, and its commander apparently meditating an attack upon the forts, the quantity of gunpowder in the harbor belonging to the United States was not more than sufficient to have enabled the garrison to fire a single round. Although this state of things was earnestly and repeatedly represented to the Department of War, only two small and very inadequate supplies of the requisite articles were obtained. The national government being unable to supply either cannon or ammunition for the security of the maritime frontier of South Carolina, to put muskets into the hands of the militia called out for that purpose, or to furnish the pecuniary funds to pay and feed those who were actually engaged in its service, the legislature of the State, prompt in the discharge of the duties which she owed to her citizens and to the Union, unanimonsly resolved "cordially to support the general government in the vigorous prosecution of the war until a peace could be obtained on honorable terms, and cheerfully to submit to every privation that might be required to accomplish that great object." Influenced by the spirit of this resolution, the State established manufactories of arms and of cannon balls; purchased every munition of war necessary for her troops; appropriated half a million of dollars for the defence of her maritime frontier; ordered a brigade of State troops to be enlisted, clothed, and equipped, and then to be offered to the general government; and, at her own expense, called out the militia at various times to protect the points which were menaced by the enemy. The State furnished with arms that po

Ist. The first claim is for interest on so much of the advances of the State during the war as have been or may be recognized and paid by the United States. On this point, it appears that, at the time these advances were made, the State, being unable to meet the various demands on the treasury by taxes upon her citizens, drew the whole amount from a fund which she had previously invested in an incorporated bank, and on which she was then receiving an average interest of nearly 12 per cent. Interest has heretofore been allowed by special acts of Congress to several States on similar advances, where the money was borrowed from banks, or where a previous promise to pay interest was made by an officer of the general government. The committee are clearly of opinion that the principle involved in the former class of cases applies to the advances by South Carolina, and they can conceive no substantial difference between the payment of interest and the loss of interest by a State on moneys applied to the service of the United States. In the case before us the claim is rendered still stronger by the amount of the loss having greatly exceeded the usual interest of money, which alone, however, is now claimed by South Carolina. With respect to the claim of some of the States, arising from a previous promise to pay interest, the committee, while they, of course, admit the obligation arising from such a promise, can by no means admit that advances, under circumstances equally meritorious, are less entitled to favor, because made without any previous stipulation whatever. In every view of the subject, therefore, the committee are of opinion that the State of South Carolina is entitled to the usual interest for these advances.

2d. The next claim is for the arms furnished by the State to the militia in the service of the United States. This account has been adjusted at the Ordnance department, and the number and character of the arms due to the State is duly certified by the proper officer. The State, however, claims to be paid the value of the arms in money, while the War Department, having no funds at its disposal applicable to that object, can only discharge the debt in kind. It appears that the State of South Carolina caused the arms in question to be manufactured, or purchased at an expense of from \$15 to \$17 per stand; that the present contract price is \$12; and that the State, though at the time the arms were furnished

she stood greatly in need of them, has now no use for them whatever. As the State is willing to receive payment for those arms at the present contract price, the committee can see no possible objection to their receiving the money in lieu of the arms, especially as this arrangement will cost the government nothingit only being necessary to lessen, to an equal amount, the number hereafter to be manufactured.

3d. The next claim is for cannon balls manufactured by the State, in consequence of no supplies being furnished by the United States, and when essential to the defence of Charleston. Those cannon balls were, it appears, rejected by the Ordnance department, in consequence of their not being exactly conformable to a standard established by that department. The evidence before the committee being conclusive to show that, at the time these balls were manufactured by the State, the United States had not furnished, and were unable to furnish them, and that the harbor of Charleston was almost defenceless; and it further appearing that the State used the best means within its power at the time to procure them of a suitable kind and proper quality, it is deemed just and reasonable that the State should be refunded the amount paid for said cannon balls.

4th. The next item of the claim is for transportation. On this point, it appears that, in marching troops to the places of rendezvous, it was often found necessary to employ a greater number of wagons than is allowed by the regulations of the army. In some instances ten or twelve wagons have been found necessary to enable a regiment to reach its place of destination; and it is stated that the number actually found necessary, and no more, were paid for by the State; while she has been allowed, in the settlement of her accounts, only eight to each regiment. The committee are of opinion that, under the circumstances of the case, the State of South Carolina ought to be remunerated for the expenses thus necessarily incurred for transportation.

5th. The next item of the claim is for the amount of compensation actually paid by the State to the paymaster general, commissary general, and other staff officers of the militia, employed by the State in making the expenditures which have been or may be recognized as chargeable to the United States. It appears that the State of South Carolina, thrown in a great measure on her own resources, and compelled to call out her militia, and to provide transportation, arms, and munitions of war of every description, had no alternative but to use the officers of her own staff for these purposes. Compensation was allowed to these officers by the State as a matter of course, and, under the peculiar circumstances of the case, it appears to the committee reasonable that the expenses thus incurred for the benefit of the United States should be refunded.

6th. The next item taken into consideration by the committee was for blankets, which, it appears, were furnished by the State to a regiment of militia actually in the service of the United States. It appears that the officers of the regiment united in a memorial to the legislature of South Carolina, representing that many of the men under their command were entirely destitute of blankets, and were therefore exposed not only to great suffering, but to the loss of health, and even of life itself. The legislature humanely interposed, and appropriated the sum of \$7,500, which was applied to supply those men with blankets who were destitute of that necessary article. The account for the blankets thus furnished has been rejected by the United States, on the ground that the troops, in the case in question, having been called out only for six months, were not entitled to blankets by the regulations of the army.

Although the issue of these blankets was not authorized by the regulations of the Department of War, yet, as they were furnished under the exigencies of such pressing want, the committee feel no hesitation in deciding that this item ought to be allowed.

The last item submitted was for the payment of interest upon the sums advanced by South Carolina, for which she has not been reimbursed, and which were rejected by the officers of the treasury, for the reasons already specified. As the claim for interest upon these advances is founded upon the same principle as upon the advances which have been already refunded, the committee are, therefore, of opinion that it ought to be admitted. South Carolina expended large sums on account of her militia in the service of the United States, the repayment of which she has never asked for. These expenditures were requisite for the uses to which they were dedicated; but it being supposed that they would not have been incurred by the United States, however flourishing her finances and resources might have been, no demand was made for remuneration. Other demands have not been preferred, in consequence of the inability of the State to procure vouchers to establish them, which is to be attributed to the inexperience or negligence of officers, or to the hurry and confusion in which many purchases were made and distributed. From these causes, the loss which has been suffered by the State exceeds fifty-nine thousand dollars, exclusive of interest.

All the items for which payment is required by South Carolina from the general government, as well those which have been allowed as those which have been disallowed, have been examined by the committee. The evidence to substantiate the latter was acknowledged by the proper officers of the treasury to be ample and satisfactory; they were rejected solely because they were inadmissible according to the regulations of the Department of War. Being inadmissible by these regulations, relief can only be afforded to the memorialists by the federal legislature. As the committee are of opinion that relief ought to be granted, they therefore report a bill.

#### In the House of Representatives, May 5, 1828.

Mr. McCov, from the Committee of Claims, to whom was referred a bill from the Senate for adjusting the claims of the State of South Carolina against the United States, reported:

That they have examined this bill, as also the items reported by the Committee on Military Affairs of the Senate, on which the bill is predicated, and do not concur in the opinion expressed by that committee, that the State of South Carolina is entitled to the remuneration asked for, and of consequence this committee think the bill ought not to pass.

The first item in the bill is for interest on advances in money made by the State of South Carolina, for defence of that State, during the late war, in procuring arms and munitions of war, and for pay and provisions, and transportation for the militia called into service during said war for defence of the State. This committee cannot better illustrate their views on the subject-matter of this bill than by a comparison of what was done by the State of South Carolina during that war with what was done by other States during the same period, and stating what has been done by special acts of legislation since the war in

favor of other States of the confederacy, and the rules of settlement applied to all the States in the settlement of their accounts against the United States.

It will be seen by the report of the Committee on Military Affairs of the Senate that the memorial of Alexander Speer, comptroller general for the State of South Carolina, on behalf of that State, is referred to, as enumerating the claims of that State against the United States. This document is not among the papers referred to this committee; therefore, they can only have reference to the report of the committee above referred to for the subject-matter which induced the passage of this bill by the Senate. By the report referred to it appears that, at the commencement of the late war, the State of South Carolina had the funds of that State invested in stock of a bank called the State Bank of South Carolina, from which she drew the whole of the advances made during said war, and on which she now claims interest on such portions of her accounts as have been allowed heretofore, or may hereafter be allowed by the United States. Several special acts have been passed since the close of the late war, directing interest to be paid to certain States and corporations for advances of money made to prosecute that war, to wit: Virginia, Maryland, Pennsylvania, Delaware, and New York, and the city of Baltimore; but in all those acts the amount of interest directed to be paid was confined to such part of the advances made as had been actually borrowed by those States, &c., and on which those States had paid interest up to the time the sums so borrowed had been refunded to such States; and in those cases the States were bound to show that such loans were actually expended for the use and benefit of the United States, as evidenced by the sums allowed and repaid to those respective States by the accounting officers of the United States. Virginia was the first State which asked of the United States payment of interest on moneys advanced and expended for the use and benefit of the United States, and third, by additional taxes levied on her citizens. Of the sum stated above, only \$100,000 had been refunded to her at the close of th

A counting officers of the United States, as has been those made by South Carolina; and more or less has been disallowed in nearly all the claims of States who made advances and incurred expenditures during that war, in the settlement of their claims, and for like reasons; and the same rule of settlement has extended to all. These disallowances will be found in all the State claims: in some instances, claims are made for payments made to State officers for services rendered, where it cannot be shown that they were in the service of the United States; in others, greater sums have been paid than the laws of the United States, or the rules and regulations for the army of the United States, authorized; in others, a want of vouchers to show that the money had been expended for the use and benefit of the United States, and if so, to whom, and for what. Those claims are all in progress of settlement, and are paid when vouchers are produced which will justify their allowance. This committee will here take occasion to say that it has not been the practice of this government to pay interest on accounts, and they think it would be highly inexpedient to do so, except in peculiar cases. Nor can this committee see any just reason why the officers and soldiers of the United States army, or of the militia whose monthly pay (as is notoriously the fact) was withheld from them months, and in many instances in the militia, for years are not equally entitled to interest with the States who made advances of money; nor is the reasoning less weak in favor of every individual, on the final settlement of whose account a balance shall appear to be due, who should not have interest from the date of the advance made, which caused such balance in his favor. Hence, Congress, in passing the laws heretofore referred to, directing interest to be paid to the States before named, restricted it to the sums actually borrowed and expended for the use and benefit of the United States.

The second item in this bill is for arms furnished to the militia

The second item in this bill is for arms furnished to the militia while in service during the late war, under the plea "that, at the commencement of the late war, South Carolina was nearly destitute of all means of defence except such as were furnished by the State herself; that the United States had not provided, and were unable to provide, cannon balls, muskets, powder, &c.; that during the said war that State purchased muskets, rifles, cannon balls, muskets, powder, &c.; that during the said war that State purchased muskets, rifles, cannon balls, &c.," for which payment is asked, whether the articles were delivered to the United States or retained by the State, on an assumed principle that in war the United States are bound to furnish all arms and munitions of war for defence of the several States. This committee think this assumption not warranted by either the law of the United States or the practice by the several States under the law of the United States. As early as May 8, 1792, Congress, in compliance with the provisions of the Constitution, provided by law for arming the militia of the several States by obliging each militiaman to furnish himself with a stand of arms.—(See chap. 134, vol. 2, United States Laws.) In many of the States this law, if not literally, has been substantially complied with: 1st, by obliging the militiamen to procure arms at their own expense, so far as practicable; and 2d, by applying the funds of the State to the purchase or manufacture of arms of all descriptions, to such extent as to enable the State, in that respect, to meet any emergency that might happen. Take the State of Virginia again for contrast. That State commenced as early as the year 1795, by purchasing arms, and 2dly, erected a manufactory and foundery at great expense, and carried on this manufactory until she had on hand arms both great and small, say muskets, rifles, pistols, swords, with all the apparatus thereto belonging to make the article complete for use, as also a large park af artillery, including la

tures, and may have use for arms for State purposes. It will be seen that the agent of the State of South Carolina has insisted on the settlement of this war account for arms, and to have money in lieu of that portion of arms due the State, procured by the United States under the appropriation of \$200,000 annually in aid of arming the militia; and the committee who reported this bill urged the same view, recommending, as South Carolina does not want the arms due her in settlement of the war account, that money should be paid in lieu. It will be seen, on examining this claim, that a certain number of arms belonging should be paid in lieu. It will be seen, on examining this ciaim, that a certain number of arms belonging to the State of South Carolina, on discharging detachments of militia, were given over into the care and keeping of the officers of the United States; that others were carried off by the militia, or otherwise lost to the State, as was the case in many others of the States. To that extent the United States have considered claims just, and to be repaid in arms. On settlement of these accounts, where the United States had loaned arms to States, or where United States arms had been delivered into the care of State officers, the same rule of settlement has been applied to all the States, and the committee see no cause why it should be relaxed in favor of South Carolina. Communications from Lieutenant Colonel Bomford, of the Ordnance department, to the committee, numbered 1, 2, 3, and 4, and the printed statement of the account in the pamphlet, will show the extent of the claim for arms, and the balance in arms due to South Carolina, and document marked A will show the rules by which all those accounts for arms have been settled—that there is, as per final settlement, due to South Carolina 2,489 muskets, ready to be delivered to order of the governor of that State when he shall designate the place for delivery. The printed pamphlet will show that, in relation to the cannon ball and shot, they are of little value to South Carolina or the United States, being unfit for use; and if otherwise, they are not a proper charge against the United States, further than what was used of them, if any.

The fourth item being for transportation, in this particular the committee of the Senate are mistaken when they say "that South Carolina has only been allowed pay for eight wagons and teams to a regiment in the settlement of her accounts." A letter from the Third Auditor, marked B, will show that payment has been made by the late Secretary of War for eighteen wagons and teams for transportation of Colonel Tucker's regiment, which consisted of only 550 men, on his certificate of their necessity, and no doubt, with like evidence, others will be paid, if any such necessity existed; and if there be no other evidence

to that point, it is assumed that in all other cases like causes existed.

The fourth item is for payment to certain staff officers of the State for their services in expending or disbursing money for those arms and accountements procured by that State during the war, but not in the service of the United States. The committee will only say, in reply to this item, that such claim may be made in favor of every State for all persons, either in peace or war, who are employed by such State to purchase arms and munitions of war, and that in no case is it a proper charge against the United States.

The committee recommend that the bill be rejected.

### IN SENATE OF THE UNITED STATES, January 22, 1828.

Mr. Harrison, from the Committee on Military Affairs, to whom was referred the memorial of Alexander Speer, comptroller general of South Carolina, praying, for and in behalf of the said State, for interest on her advances during the war, and also for the payment of certain accounts which have been heretofore disallowed, reported:

That the memorial of the comptroller general, for and in behalf of the State of South Carolina, sets forth that, for several years past, that State has made continual application at the proper departments of the national government for the adjustment of those claims which result from her disbursements for national defence during the late war; that in those applications she has been, in a great measure, unsuccessful; and that a large portion of her accounts remain unsettled, which cannot be adjusted otherwise than by the intervention of Congress; and that the State has therefore determined to bring the subject before that body, relying with confidence on being refunded the money which she advanced at the hour of the country's utmost need.

The claims of South Carolina, as set forth in the memorial, embrace, 1st, and principally, interest on her advances during the war; and, 2dly, sundry items of expenditure which have been disallowed by the proper officer of the Treasury Department, for reasons set forth by him on the account itself, and to which the committee will presently advert. In investigating these claims, the committee have received the testimony of gentlemen well acquainted with the situation of South Carolina during the war, and with all the circumstances under which the advances were made; and they will now proceed to state, as briefly as possible, all the facts established before them, and which they deem necessary to a clear understanding

of the merits of the claim in question.

It appears that at the time, and for a long time after the war was declared, the State of South Carolina was nearly destitute of all means of defence except such as were furnished by the State herself. Except in the harbor of Charleston, there were no fortifications; and even there the forts were in bad condition, and unprovided with the munitions of war. The United States had not provided, and, as it appears, were unable to provide, powder, cannon balls, muskets, or any of the materials essential to the successful defence of that important point. So complete was the destitution in all these respects, that it was proved to the committee by the United States officer who for two years commanded all the troops in the harbor of Charleston that, at one period, while a British naval force was actually in sight of the forts, the whole of the supplies on that station were found to be insufficient to have enabled the garrison to fire a single round; and that, though these matters were earnestly represented to the proper officers, but two small supplies (and those wholly inadequate to the object) were ever received. It was further proved to the committee that the national government being unable to supply arms and ammunition adequate to the defence of the maritime frontier of South Carolina, having no muskets to put into the hands of the militia called out for that purpose, and being, moreover, unable to furnish the necessary funds to maintain the troops in the actual service of the United States, the State (made acquainted with these facts) found herself called upon to supply those deficiencies. The State of South Carolina, faithful to her own honor, and zealous in the discharge of her duty as a member of the Union, did not hesitate a moment on the course to be pursued in such an emergency; and it appears that the legislature unanimously "resolved

cordially to support the general government in the vigorous prosecution of the war until a peace could be obtained on honorable terms, and cheerfully to submit to every privation that might be required to accomplish that great object."

In the spirit of that resolution the State proceeded to establish manufactories of arms and of cannon balls, and made purchases of all the munitions of war. She appropriated half a million of dollars for the defence of the maritime frontiers; ordered a brigade of State troops to be enlisted, clothed, and equipped, and to be then offered to the federal government; and, at her own expense, called out the militia from time to time, and marched them to the various points menaced by the enemy. To that portion of the militia actually mustered into the service of the United States the State turnished arms, and, in some instances, provisions and blankets, and she caused to be deposited in the arsenals at Charleston large supplies of cannon balls for the defence of that harbor; and it is proved that the State went so far as to advance, as her quota of the direct tax, a large sum of money long before the tax was imposed by Congress, which was paid over to General Pinckney, and applied to the support of the troops in the service of the United States. In making these expenditures under the superintendence of State officers, (all of whom were necessarily without experience,) it of course happened that the rules prescribed by the United States on such subjects were often overlooked or violated; indeed, they were in many cases unknown, and, under the circumstances in which the State was placed, could not have been strictly adhered to. In this patriotic course of conduct the State of South Carolina steadily persevered up to the conclusion of peace. At the termination of hostilities she made up her accounts, and sent an agent to Washington to come to a settlement with the United States. It is proper to be here observed that, of the various expenditures by the State for military purposes during the war, it appears that a considerable proportion thereof has been exclusively borne by the States, and that remuneration therefor has not been demanded of the United States. In making this discrimination, the State seems to have taken e

1. The first claim is for interest on so much of the advances of the State during the war as have been or may be recognized and paid by the United States. On this point, it appears that, at the time these advances were made, the State, being unable to meet the various demands on the treasury by taxes upon her citizens, drew the whole amount from a fund which she had previously invested in an incorporated bank, and on which she was then receiving an average interest of nearly twelve per cent. Interest has heretofore been allowed by special acts of Congress to several States on similar advances, where the money was borrowed from banks, or where a previous promise to pay interest was made by an officer of the general government. The committee are clearly of opinion that the principle involved in the former class of cases applies to the advances by South Carolina, and they can conceive no substantial difference between the payment of interest and the loss of interest by a State on moneys applied to the service of the United States. In the case before us the claim is rendered still stronger by the amount of the loss having greatly exceeded the usual interest of money, which alone, however, is now claimed by South Carolina. With respect to the claim of some of the States, arising from a previous promise to pay interest, the committee, while they, of course, admit the obligation arising from such a promise, can by no means admit that advances, under circumstances equally meritorious, are less entitled to favor because made without any previous stipulation whatever. In every view of the subject, therefore, the committee are of opinion that the State of South Carolina is clearly entitled to the usual interest for these advances.

2. The next claim is for the arms furnished by the State to the militia in the service of the United States. This account has been adjusted at the Ordnance department, and the number and character of the arms due to the State are duly certified by the proper officer. The State, however, claims to be paid the value of the arms in money, while the War Department, having no funds at its disposal applicable to that object, can only discharge the debt in kind. It appears that the State of South Carolina caused the arms in question to be manufactured or purchased, at an expense of from fifteen to seventeen dollars per stand; that the present contract price is twelve dollars; and that the State, though at the time the arms were furnished she stood greatly in need of them, has now no use for them whatever. As the State is willing to receive payment for those arms at the present contract price, the committee can see no possible objection to their receiving the money in lieu of the arms, especially as this arrangement will cost the government nothing—it only being necessary to lessen to an equal amount the number hereafter to be manufactured.

3. The next claim is for cannon balls manufactured by the State, in consequence of no supplies being furnished by the United States, and when essential to the defence of Charleston. These cannon balls were, it appears, rejected by the Ordnance department, in consequence of their not being exactly conformable to a standard established by that department. The evidence before the committee being conclusive to show that, at the time these balls were manufactured by the State, the United States had not furnished and were unable to furnish them, and that the harbor of Charleston was almost defenceless; and it further appearing that the State used the best means within its power at the time to procure them of a suitable kind and proper quality, it is deemed just and reasonable that the State should be refunded the amount paid for said cannon balls.

4. The next item of the claim is for transportation. On this point, it appears that, in marching troops to the places of rendezvous, it was often found necessary to employ a greater number of wagons than is allowed by the regulations of the army. In some instances ten or twelve wagons have been found necessary to enable a regiment to reach its place of destination; and it is stated that the number actually found necessary, and no more, were paid for by the State, while she has been allowed, in the settlement of her accounts, only eight to each regiment. The committee are of opinion that, under the circumstances

of the case, the State of South Carolina ought to be remunerated for the expenses thus necessarily incurred for transportation.

5. The next item of the claim is for the amount of compensation actually paid by the State to the paymaster general, commissary general, and other staff officers of the militia employed by the State in making the expenditures which have been or may be recognized as chargeable to the United States. It appears that the State of South Carolina, thrown in a great measure on her own resources, and compelled to call out her militia and to provide transportation, arms, and munitions of war of every description, had no alternative but to use the officers of its own staff for these purposes. Compensation was allowed to these officers by the State as a matter of course, and, under the peculiar circumstances of the case, it appears to the committee reasonable that the expenses thus incurred for the benefit of the United States should be refunded.

6. The last item taken into consideration by the committee was for blankets, which, it appears, were furnished by the State to a regiment of militia actually in the service of the United States. It appears that the officers of the regiment united in a memorial to the legislature of South Carolina, representing that many of the men under their command were entirely destitute of blankets, and were therefore exposed, not only to great suffering, but to the loss of health, and even of life itself. The legislature humanely interposed and appropriated \$7,500, which was applied to supply those men with blankets who were destitute of that necessary article. The account for the blankets thus furnished has been rejected by the United States, on the ground that the troops in the case in question having been called out only for six months, were not entitled to blankets by the regulations of the army. Though the conduct of the legislature of South Carolina in this instance is certainly worthy of high commendation, yet, as blankets have in no instance been allowed to troops in the service of the United States called out for six months only, the committee feel constrained to decide against the claim.

Having gone through all the items of the claim which it was supposed could be properly investigated by the committee, they beg leave to report a bill (in conformity with the principles herein set forth) for the payment of interest to the State of South Carolina, and for other purposes.

# DOCUMENTS.

### Part I.

Statements and letters showing the circumstances under which the advances were made, for which reimbursement is claimed by the State of South Carolina.

1st. Extracts from the message of Governor Alston to the legislature, with the accompanying papers, marked A, B, C, D.

2d. Report of committee of foreign relations.

3d. Statement of Colonel William Drayton, late a colonel in the army of the United States, then commanding the troops in the harbor of Charleston.

4th. Statement of General Tucker, now a member of the House of Representatives of the United States.

5th. Statement of Colonel Robert Y. Hayne, now a senator of the United States, quartermaster general of South Carolina during the late war.

### PART II.

Statement of the drafts on the banks by the State of South Carolina, out of which the advances were paid.

### PART III.

Documents in support of the claim for arms and cannon ball, numbered from 1 to 6.

#### PART IV.

Documents in support of the claim for blankets.

### PART V.

1st. The rejected items of the account presented by the State of South Carolina, with the reasons for such rejection-E.

2d. The account acknowledged and paid by the United States-F.

3d. Summary of the claims of the State—G.

### PART I.

Extracts from a message (No. 1) of his excellency the governor of South Carolina, delivered to both branches of the legislature, September 16, 1813.

"Fellow-citizens: Sensible of the inconveniences to which many of you would be subjected by a meeting at this season, it was with unaffected concern that I found myself constrained to exercise the constitutional power of convening you. But while a just regard to the duties devolved upon me rendered the exercise of that power unavoidable, I had too much confidence in your patriotism not to feel assured that all private considerations would be lost in your devotion to the public service. The period in which we live is a period of sacrifices, and it becomes men, worthy of the splendid destiny allotted to our beloved and favored country, not only to make them, but to make them with cheerfulness.

"From these ravages, so essentially disgraceful to those who have committed them, South Carolina has hitherto been happily exempt; nor is it probable, from the nature of her sea-coast, that she will at any time be much exposed to them. Accessible at two or three points only by the larger vessels of the enemy, the judicious application of a very moderate force would place us beyond the reach of any serious injury. But while our coast is thus unfriendly to the operations of ships of the line, or even frigates; indented with numerous bays and inlets, it leaves us vulnerable at many points by the light cruisers of the enemy. Of this, advantage has not failed to be taken. While the blockading squadrons, generally stationed before our ports, rendered all outward communications imminently hazardous, if not impracticable, privateers and armed barges fitted out for the occasion have, at different intervals, infested every sound and inlet from the Savannah to Winyaw. At one time all water communication with Charleston, whether from the northern or southern districts, was completely cut off—not the smallest craft could pass without risk of capture. The inconveniences to which our fellow-citizens generally, and the serious losses to which many of them were thus subjected, could not fail to excite a proper interest. Sensible of the importance of preserving safe, at least, the inland coasting trade, and justly apprehensive that these inimportance of preserving safe, at least, the inland coasting trade, and justly apprehensive that these inroads, if permitted with impunity, would be extended from our waters to our shores, I felt it incumbent
upon me to lose no time in adopting measures for repressing them. To effect this, a suitable number of cannon, adapted to the purpose, were directed to be mounted on travelling carriages, and detachments from
the militia, under the command of Lieutenant Colonel Youngblood, ordered to take post at the most
exposed points. Considering the co-operation of a certain naval force indispensable to the full attainment of the object in view, application (of which A is a copy) was at the same time made at the Navy
Department for such number of gunboats and barges as were deemed adequate to the purpose. To this
application no official answer has yet been returned, but informal assurance has been received that the naval force allotted to this State will be increased as soon as circumstances shall permit. Believing it incumbent upon the general government to provide for the defence of each member of the Union, representations (marked B) were also addressed to the War Department, in the hope of inducing such an addition to the regular troops here as might obviate alike the inconvenience and expense of calling out the militia, unless in the event of a serious descent. The answer of Mr. Secretary Armstrong (marked C) will sufficiently impress upon you the expediency of providing from our own resources such means as

will sufficiently impress upon you the expediency of providing from our own resources such means as shall be deemed requisite to our better security.

"There is another subject intimately connected with the business of defence which I avail myself of this occasion to bring to your view. It is the want of a manufactory of arms in this State. During a time of peace there was little difficulty in procuring arms either from the other States or from Europe; at present the difficulty amounts almost to an impracticability. It is suggested to you how far it may be prudent either to establish such a manufactory at the expense and under the direction of the State, or to extend to them such patronage as may induce a similar establishment by individuals.

"Aware of the general solicitude at this season for an early return to your families and friends and

"Aware of the general solicitude at this season for an early return to your families and friends, and as another opportunity of communicating with you will so soon present itself, I forbear to offer for your consideration any other subjects, by the short postponement of which the public service will sustain

no injury.

"I beseech the merciful and Almighty Disposer of Events to have you under His protection, and to "I beseech the merciful and Almignty Disposer of Events to have job and country. direct your deliberations to the honor, the happiness, and the true interests of our beloved country.

"JOSEPH ALSTON.

"Columbia, September 16, 1813."

A.

Letter from Governor Alston to the Secretary of the Navy, dated May 30, 1813.

Sir: The frequent representations made by my predecessor to the department over which you preside cannot have left you unapprised of the very defenceless condition of the sea-coast of this State. policy and necessity of extending to us the aid of the general government were so obvious that it was not unreasonably expected they would before this have obtained for us your consideration. As other matters, however, doubtless more urgent, if not more important, seem to have occasioned our situation to be overlooked, I beg leave very respectfully, but very earnestly, to invite your attention to it.

From the nature of our coast it is only at one or two points that anything is to be apprehended, except the predatory attacks of light vessels. Aided by the local facilities of defence, the judicious distribution of for without any house way and how even we have a contract will be a few without any fine predatory.

distribution of a few gunboats and barges would have rendered us secure. The utmost vigilance of the enemy's squadrons could only have intercepted our foreign and outward coasting trade, navigation from North Carolina to Georgia would have been carried on without interruption. tages of preserving the inland navigation thus open and free from annoyance are too apparent to require comment; they are, nevertheless, under thus open and free from amoyance are too apparent to require to mement; they are, nevertheless, under the present state of things, completely lost to us. Encouraged by the strange apathy exhibited on this interesting subject, and fully apprised that not a single measure of defence has been adopted, the enemy have gradually extended their depredations to almost every creek and inlet on the coast. The smallest barge can no longer pass from Georgetown to Charleston, or from Charleston to Beaufort or Savannah, without imminent danger of capture. In a little time there is every reason to apprehend these depredations will be extended still further. Georgetown, the entrepot of the Magnetic and richest part of South Carolina, which receives for exportation all the productions of the Wagnet finest and richest part of South Carolina, which receives for exportation all the productions of the Waccamaw, Little Pee Dee, Great Pee Dee, Black river, and Sampit, may at this moment be burnt or laid under contribution by a privateer of a single gun. Bull's bay, which completely commands the inland navigation to this city from the northern parts of the State and North Carolina, is at present entered by the most inconsiderable barges of the enemy with impunity; indeed, it is but a few days since that the squadron of light vessels blockading our harbor very leisurely watered and obtained supplies of fresh provisions on Bull's island. Apprised in time of their intention, a plan was immediately formed for intercepting them, which there is every reason to believe would have eventuated not only in making prisoners of the watering parties, but in the capture of two brigs. On consulting, however, with Cammodore Dent, I had the mortification to find that under late instructions from you the loan to the State of even a single barge was peremptorily interdicted. I need not add that the contemplated enterprise was necessarily abandoned.

Stono inlet, which commands the rear of Charleston, through which the enemy in four hours after entering it might fire the city without the smallest risk to himself, is at present open to the most contemptible invader.

North Edisto inlet, a few miles only more remote from Charleston, is similarly situated. Surrounded with valuable and highly-improved settlements, the smallest privateer might run up, and in the course of

six or eight hours destroy property to the amount of \$100,000.

St. Helena sound, which receives Pon Pon, Ashepoo, and Combahee rivers, has been, and, without some more efficient exertions, will doubtless continue to be, the scene of frequent and considerable depredations. One or two small schooners of the United States are occasionally on this station; but as it is well known to the enemy that they are frequently obliged to visit Beaufort and Charleston, their movements are watched, and the moment of departure is the signal for some new capture.

The constant danger to which Beaufort is exposed is scarcely less than that of Georgetown. At each of these places there is a thing called a fort, but at neither have the United States a single cannon ball or a pound of powder. Were these forts, however, even properly constructed and properly provided with the munitions of war, they would still afford a very incompetent protection. The one at Georgetown, from its situation, could only bring its guns to bear upon the enemy for a moment; the one near Beaufort could only be engaged with an enemy who should encounter it from choice, for the navigation of Broad river is even better than that of Port Royal river, and an enemy by ascending the former might effect a landing at about a mile from the town without the slighest possible interruption from the fort.

This, sir, is a short sketch of our situation. Under the expectation that it would before this have engaged the attention of the general government, I have hitherto forborne to avail myself of the resources of the State; but the late frequent depredations of the enemy, and the just apprehension that these depredations will become still more serious and extensive, render more decisive measures, in my opinion, indispensable. I have ordered out, therefore, to the most exposed points of our coast detachments of State troops, which preparations are made to increase as occasion shall require. To give complete efficiency to this force, however, either as regards the defence of the coast, or especially the protection of the inland praying it is essential to obtain for it, the congertation of a certain number of completes and harves navigation, it is essential to obtain for it the co-operation of a certain number of gunboats and barges. From the local circumstances which distinguish most of the inlets I have mentioned, fixed batteries could not be rendered of much avail, without an expense so enormous that it would not be expedient to incur it. A comparatively trivial sum, on the other hand, appropriated to the species of defence suggested, would afford an ample security. With ten or twelve gunboats (attended each by a barge or two) and as many hundred men judiciously distributed on our coast, Charleston would be the only point of any solicitude to us. Requiring so little, will it be too much, sir, for the State of South Carolina to expect that that little will not be withheld. Addressing myself to your department, I allude, of course, only to the gunboats and barges. I beg leave merely to add that should circumstances render it impracticable at present to allot more to this quarter, even two gunboats stationed in Winyaw, two in Bull's bay, as many at the junction of Broad and Port Royal rivers, and the two schooners now in that neighborhood constantly stationed in St. Helena's sound, would constitute an auxiliary force not a little to be desired.

I have the honor to be, sir, with great respect and consideration, your obedient, &c.

B.

Charleston, May 31, 1813.

Sir: The copies I have the honor to enclose of my communications to Major General Pinckney and Colonel Drayton, commanding the United States troops at this station, will explain to you the measures I Colonel Drayton, commanding the United States troops at this station, will explain to you the measures I have deemed it expedient to adopt for the better defence of our coast. Relying upon the protection of the general government, I have hitherto considered it unnecessary to avail myself of the resources of the State; existing circumstances, however, have rendered a resort to those resources indispensable. A reference to my letter to General Pinckney will show the situation in which the important posts of Georgetown and Beaufort had been left. In the four forts defending the harbor of Charleston, which no military man would consider properly garrisoned with less than 2,500 men, there are not at this moment more than 400; of which number, I am officially informed, there are 180 fit for duty. With the enemy almost daily on our coast, and, as hourly occurrences demonstrate, perfectly informed of our situation, it is only matter of astonishment that the outward posts of Fort Moultrie and Fort Johnson, which are totally unprotected in their rear, have not before this been carried by assault and the cannon spiked.

Except at this place and Port Royal, the nature of our coast affords sufficient protection against the larger vessels of the enemy; but it is so indented with bays and inlets that it is assailable at almost

larger vessels of the enemy; but it is so indented with bays and inlets that it is assailable at almost every point by light cruisers and privateers. This description of vessels have already commenced their depredations, and, there is every reason to believe, will extend them, if not repressed, still further. To afford protection to the most exposed parts of the coast, and to preserve the inland navigation as far as shall be practicable free from interruption, a detachment of State troops has been ordered out who will form a chain of posts between Charleston and Beaufort. Another detachment will be stationed on Bull's form a chain of posts between Charleston and Beautort. Another detachment will be stationed on Bull's island, which, completely commanding the inland coasting trade from the northern parts of this State and North Carolina to Charleston, it is of the utmost consequence should be closed against the enemy. Aided by ten or twelve gunboats, with a suitable number of barges, 1,000 or 1,200 men, judiciously posted, will leave us nothing to apprehend. Should the representations made to the Secretary of the Navy obtain for us the small naval force desired, Charleston will be the only point about which any solicitude will be felt. This solicitude, which is general and well founded, compels me earnestly to invite your attention to the very inefficient number of regular troops allotted to the defence of our capital. The propriety of protecting the coast generally by other troops than militais also respectfully submitted to your consideration.

I have the honor to be sir with high respect and consideration your obedient servent

I have the honor to be, sir, with high respect and consideration, your obedient servant

C.

The Secretary of War to the governor of South Carolina.

WAR DEPARTMENT, June 21, 1813.

Sin: I have the honor to acknowledge your excellency's letter of May 31, and to inform you that the subject of seaboard defence generally is now before Congress. When the means are granted by that body I shall have the pleasure to communicate with your excellency relative to measures for the further protection of South Carolina.

I beg you to accept the assurances of the great respect and consideration with which I have the honor to be your excellency's most obedient, humble servant,

His Excellency the Governor of South Carolina.

J. ARMSTRONG.

D.

Letters from Governor Alston to Colonel Drayton and General Pinckney.

Headquarters, Charleston, May 31, 1813.

Sir: In consequence of the removal from this harbor of so many of the United States troops, I have deemed it expedient to order out a detachment of the militia, under the command of Major Howard, consisting of two companies of artillery, two companies of infantry, one rifle company, and one troop of cavalry. These troops, intended as a reinforcement to your command, are now ready to march, and will assume any position you shall point out. Major Howard has instructions to place himself under your command, and conform on all occasions to your orders.

Colonel Drayton, of the United States Army.

HEADQUARTERS, Charleston, May 29, 1813.

Headquarters, Charleston, May 29, 1813.

Sir: Having been informed by Colonel Drayton of the very exposed situation of the forts in this harbor, in neither of which there are forty men fit for duty, and as the cruisers of the enemy are daily on the coast, sometimes sounding the bar, I have deemed it expedient, and conformable to the spirit of the communication I had the honor of receiving from you just before your departure from this place, to issue the enclosed general order. Colonel Drayton, who, in the obvious facility with which either Fort Moultrie or Fort Johnson might be carried by a handful of the enemy, perceives how much both his reputation as an officer and the safety of the city are involved, and is therefore anxious to be reinforced, informs me, nevertheless, that he has no orders on the subject, and has neither been vested with authority to receive the detached militia into the service of the United States, nor even to provide them while on duty with rations. Presuming that Colonel Drayton's not having been apprised of your communication to me, so far at least as related to his co-operation, nor furnished with corresponding orders, was merely the result of the pressure of other business which must have occupied your attention; and believing it essential that the reinforcement detached should not be delayed, I have not hesitated to direct the commissary general of this State to provide for the detachment the same supplies as are provided for troops of the United States. Reimbursement for the advances thus ordered on account of the general government can be made on your return. It is desirable, however, that orders should be issued for supplying the detachment through the ordinary agents of the United States as early as shall be convenient. In detaching these troops from Charleston, I have acted from what was conceived the urgency of the occasion. Should the aid of the militia be required for any length of time, it is intended to relieve them by ordering down such troops as you may judge necessary o you have the goodness to communicate to me your wishes on this state organized in the upper division. I pray you have the goodness to communicate to me your wishes on this subject. A memorial which I understand has been transmitted to you by the intendant of Georgetown will have apprised you of the danger of that post. The frequent approach of the enemy to that harbor, and the accurate and constant information which it is perfectly ascertained they regularly receive of our situation and movements, render it by no means improbable that the condition of what is called the fort might invite the visit of a marauding party. To repress, as far as practicable, attempts of that kind, Captain Brittain, who stated that he had not a sixtle state of the condition of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the sta single cannon ball or a pound of powder, was furnished before my departure with an order on the State arsenal, in that vicinity, for any articles he may require on loan for the United States service. He has accordingly mounted some twelve and nine-pounders, the only cannon there for which we had ball, which he will keep till a supply of ball and powder is received for the larger pieces belonging to the United States. In consequence of representations from Beaufort, stating that the United States troops in that quarter were still literally destitute of every kind of ammunition, and the alarm excited by the capture of certain vessels on the inland voyage to that place, within a very short distance of it, I have directed the keeper of the State arsenal there, likewise, to loan to the United States officer commanding the fort any articles he might require. In supplying these deficiences in the appointments of the United States troops, it is with the same spirit with which I shall always co-operate with them for the common defence; but I think it right to observe that the military equipments of the State are too inconsiderable to be relied on. You will, of course, take such order as you shall deem proper for the more certain and regular supplies from the general government. As your instructions were stated to relate merely to the defence of our fortifications, and no hope was entertained that the aid of the United States would be extended to other points, I have been induced, as you will perceive by the enclosed general order to General Cuthbert, to order out a detachment of State troops, as well for the protection of our maritime frontier as to prevent the interruption lately suffered by our inland coasting trade. The troops for this purpose will be increased as occasion shall require; but it is considered essential to the complete attainment of their object that they be aided by a naval force. Confident, from your accurate knowledge of our local situation, that your opinion will coincide with mine, it would be highly gratifying to me to have the weight of your representations to the Navy Department added to my own.

I have, &c.,

Hon. Major General PINCKNEY.

HOUSE OF REPRESENTATIVES OF SOUTH CAROLINA, DECEMBER 17, 1814.

Mr. HAYNE submitted the following report:

The committee of foreign relations, to whom was referred so much of the governor's message, No. 1, as relates to our foreign affairs, report:

That the history of the war in which the United States is now engaged must swell the bosom of every patriot with honest pride. Remote from the convulsions and free from the vices which it is the nature of despotic governments to create, America, in the full enjoyment of rational liberty, cultivated the arts of peace. In the struggle for power which tore asunder the nations of the Old World, America took no part; happy at home, she looked abroad only to extend the hand of friendship to all the nations of the earth. It was the monstrous injustice of Great Britain, her long-continued injuries, unprovoked aggressions, and unheard-of insults that overcame the patience of the American people, and roused them aggressions, and unheard-of insults that overcame the patience of the American people, and roused them to determined and manly resistance. As in the origin, so in the progress of this war, the most earnest desire for peace has been manifested by the American government. Such, however, has not been the disposition displayed by the enemy. Deaf to the calls of justice, he has waged a most cruel and sanguinary war, in violation of all the maxims held sacred by civilized nations, of the voice of humanity, and the mandate of heaven. In devastating our fields, burning our cities, and devoting to the scalping-knife the helpless and the innocent, Britain has "shut the gates of mercy on mankind," and taught the American people that they have nothing to expect but what they can acquire by the sword. To these injuries has now been added the insult of demanding, as the price of peace, terms the most degrading to the American people; terms "which would inflict the most vital injury on the United States by dismembering their territory, leaving their frontier exposed to British invasion and Indian aggression—by the loss of their territory—a portion of their citizens, and the admission of a foreign interference in their domestic concerns;" terms which should only be offered to a conquered country, and (to use the language of the Americerns;" terms which should only be offered to a conquered country, and (to use the language of the American commissioners) "will only be a fit subject for deliberation when it becomes necessary to decide upon the expediency of an absolute surrender of national independence." The spirit, however, which has met and subdued the enemy on the ocean, on the lakes, at Plattsburg, and at Chippewa, still exists in our country, and that spirit assures us that America can have no peace on such conditions. Whatever political differences may exist among the people of these United States, no true American will desert his country in such a struggle. We have asked for peace, and have met with insult. What, then, remains for a free and magnanimous people, but to call into action all the energies of the nation, and, by one great effort, to speak to the interests, if we cannot speak to the justice of the enemy. Every patriot is now required to rally around the standard of liberty, to support the Constitution of his country, and to aid the government in every measure for the vicorous prospection of the war. Impressed with these sentiments, the legislain every measure for the vigorous prosecution of the war. Impressed with these sentiments, the legislature of South Carolina do adopt the following resolutions:

1. Resolved, That we consider the present war as founded in justice, and forced upon the United States by the aggressions of Great Britain.

2. Resolved, That we regard the terms offered by the British commissioners at Ghent as an insult to the American people, and we do highly approve of the "unanimous and decided negative" of the American commissioners.

3. Resolved, That we will cordially support the government in the vigorous prosecution of the war until a peace can be obtained on honorable terms, and we will cheerfully submit to every privation that may be required of us by our government for the accomplishment of this great object.

In the House of Representatives, December 20, 1814.

Resolved, That this house do unanimously agree to the within report. Ordered, That the same be sent to the senate for their concurrence.

By order of the house:

R. GANNT, C. H. R.

In the Senate, December 21, 1814.

Resolved, That this house do concur with the house of representatives in the foregoing report. Ordered, That the same be returned to the house of representatives.

By order of the senate:

J. MURPHY, C. S.

# Colonel Drayton's statement.

In May, 1812, being then lieutenant colonel of the 18th regiment of the United States infantry, I was ordered to the command of Charleston harbor, within which were three forts, partly garrisoned by regular artillerists and partly by militia of the State. In the neighborhood of Charleston a detachment of militia infantry was posted, also subject to my orders. Shortly after entering upon my duties, and shortly before the declaration of war, I ascertained that there was almost an absolute destitution of ammunition and military stores of every description. To the best of my memory there was not a sufficient quantity of powder and ball for one discharge of the artillery in the different forts, which I made the subject of a communication to the Secretary of War, who replied to me that the wants I had pointed out would be remedied as son as practicable. Some small supplies of articles needed were furnished, within what

space of time I do not recollect.

Upon the appearance of a British squadron within a few miles of the forts, I again addressed a letter to the Secretary of War, stating to him the appearance of the British squadron, our expectation of an attack being made by it upon the forts, and that we had not a sufficiency of powder and ball for our defence, even should it be necessary for us to keep up a fire but for a short time. I cannot say precisely what was the answer I received from the Secretary, but my impression is that it was similar to that which had before been given.

I continued in the command of the harbor of Charleston, and of the troops in its vicinity, from May, 1812, until May or June, 1814, when I left the State and proceeded to the north, where I remained until the peace. During the whole time that I was in this command there never was such a supply of powder, ammunition, and military stores, belonging to the United States, as was nearly adequate, during a war, for the troops in the forts in the harbor. Had a requisition been made by the State authorities upon the officers of the United States for arms or other military stores for the militia of the State in the service of the general government, for the reason which I have stated, such a requisition could not have been complied with.

WILLIAM DRAYTON.

Washington, January 18, 1828.

### Statement of General Tucker.

Starling Tucker, a member of Congress from South Carolina, appeared before the committee and stated that he commanded during the late war one of the regiments called into actual service, and whose service has been since recognized and paid for by the United States. My regiment, when called out, was ordered to march to the seaboard, a distance of about two hundred miles. Neither baggage nor provisions being provided by the United States, it became absolutely necessary for the commanding officer to provide wagons for the transportation of the necessary baggage and rations to the place of destination; and, for this purpose, as well as I now recollect, I think about nineteen wagons were employed, and I well recollect that not one was employed beyond what was absolutely necessary. The rations were not only for the use of the regiment on the march, but for its subsistence after it arrived at the place of destination, at which place no rations were provided, except some damaged flour, not fit for use, and some spirits which had been furnished by the State.

STARLING TUCKER.

#### Statement of Colonel Robert Y. Hayne.

On the 16th June, 1812, I accompanied (as a lieutenant) a detachment of militia, composed of volunteers and drafted men from Charleston, South Carolina, to Fort Moultrie, where we were mustered into the service of the United States. A few weeks after the war was declared the detachment joined the regiment to which it belonged, consisting of ten full companies, at Haddrell's Point, in the harbor of Charleston. While at that station, in consequence of the destitute condition of many of the men, the officers united in a memorial to the legislature praying for a supply of blankets, which was furnished accordingly. I believe all the facts stated in that memorial to be strictly true. In the progress of the war, and throughout the most trying period of it, I was quartermaster general of the State, and at the same time a member of the legislature, and chairman of the committee of military affairs. In these situations I became thoroughly acquainted with the condition of the State in relation to its pecuniary resources and means of defence. It became my duty, as quartermaster general, (according to the organization of the quartermaster general's department under the laws of the State,) to inspect the arsenals, take an accurate account of the arms and munitions of war of every description, and, to a certain extent, to superintend the execution of the measures adopted for the general defence. As chairman of the military committee, every question which related to the means of carrying on the war (so far as the State of South Carolina was concerned) fell necessarily under my examination. From these sources I became, of course, well acquainted with all the proceedings of the State touching military affairs. Without attempting, after so great a lapse of time, to speak accurately as to dates, or the order of events, I think I cannot be mistaken in any of the material facts which have any bearing on the claim of the State now before the committee. It is very certain that the federal government did not provide (and I presume they

could continue to furnish money, as the public exigencies might require, before its capital as well as its credit should be utterly exhausted; and I also remember that, on a communication being received from General Pinckney informing the governor of the want of funds on the part of the federal government, even to sustain the troops then in their service, the legislature immediately directed a large sum (I think newards of two hundred thousand dollars) to be advanced to the officers of the United States, to be refunded or accounted for at some future period. About this time a brigade of regular troops were ordered to be raised, and \$500,000 appropriated for the defence of the maritime frontier. It was under such circumstances that the State of South Carolina made nearly the whole of the expenditures for which such circumstances that the State of South Carolina made nearly the whole of the expenditures for which reimbursement has been claimed of the United States. Muskets, rifles, pistols, swords, cannon balls, and indeed all the munitions of war, were manufactured or purchased, because the United States had not supplied them, and, as we understood and believed, were unable to supply them. The militia were called out from time to time and furnished with provisions and transportation by the State, as the exigencies of the country required, and the arsenals of the State, as well as its treasury, were freely thrown open to the officers of the federal government. The State did not stop to consider what portion of these expenditures might be justly chargeable to the United States, much less in what form the accounts were to be kept or the requisitions to be made in order to entitle herself becauter to represent the requisitions. She want on the or the requisitions to be made in order to entitle herself hereafter to remuneration. She went on to do what was deemed necessary to sustain the war and defend the country, without inquiring when or how her claims were to be adjusted. When, after the peace, this question came to be considered, commissioners were appointed to determine what portion of the expenditures of the State during the war ought to be charged against the United States. A very large proportion of these expenditures (probably more than half) were considered as a fair contribution by the State towards her own defence, and the balance than half) were considered as a fair contribution by the State towards her own defence, and the balance only has, it appears, been claimed of the United States, of which upwards of one hundred thousand dollars have been disallowed, for the reasons stated on the account itself. On looking over these rejected items, I can only say, from the general knowledge I possess in relation to them, that it is very certain that the amounts claimed by the State were necessarily expended in consequence of the failure of the United States to furnish articles essential to her defence, and that those articles were obtained on the best terms and in the only mode in which it was then possible to procure them; and that the officers employed by the State were the only agents then under her control through whom it was possible to carry on her military operations.

ROBERT Y. HAYNE.

Washington, January 18, 1828.

#### PART II.

Sums drawn from banks out of which the advances were made by the State of South Carolina for the United States

STATE BANK OF SOUTH CAROLINA, Charleston, January 15, 1827.

I hereby certify that the twelve first items on the first page of this sheet were paid to checks from the treasury office of this State on this bank, for the sums there stated, on the days on which they were severally charged, excepting the first item, which was paid on the 13th June, 1812, and the fifth item, which was paid on the 14th January, 1814.

SAMUEL WRAG, Cashier.

Bank of the State of South Carolina, Charleston, January 15, 1827.

I hereby certify that the items charged in this account, from August 14, 1813, to January 6, 1818, inclusive, were paid to checks from the treasury office of this State on this bank, for the sums charged; and the credits, from November 14, 1814, to December 23, 1816, were passed to the credit of the treasury at the dates expressed.

S. ELLIOTT, President. A. HENRY, Cashier.

STATE TREASURY OFFICE, Charleston, January 15, 1827.

I hereby certify that it appears from the books of this office that of the payments mentioned in the annexed account the first twelve were made by checks upon the "State Bank," and the remainder by checks upon the "Bank of the State of South Carolina."

CHARLES M. FURMAN, Treasurer.

TREASURY OFFICE, Charleston.

I further certify that the payments made by the State Bank in the year 1814, specified in the annexed statement, were from a fund which the legislature had directed to be deposited in the Bank of the State of South Carolina, to be held by the said bank for the benefit of the State, in the same manner and on the same terms with which they held the funds from which they paid the remaining items in the above account.

CHARLES M. FURMAN, State Treasurer.

I do certify that the sums drawn out of the Bank of the State, as within mentioned, were advanced by the said bank to the said State, whereby the State was deprived of the interest which would otherwise have been received on said sums. The bank, during that period, has paid interest to the State on other have been received on said sums. The bank, during that period, I sums in the possession of the said bank, at the following rate, viz:

For the year ending on the 1st October, 1814, 1.85 per cent.

#### PART III.

#### No. 1.

Colonel Bomford to C. J. Steedman, esq.

Ordnance Department, October 15, 1821.

It has been directed on the part of the honorable the Secretary of War that such of the cannon shot remaining from the purchases made by the State of South Carolina during the late war for the troops called into the service of the United States as may conform to the calibre adopted for the ordnance of the United States, and shall pass the regular inspection to be made by an officer appointed by the Ordnance department, will be received and accounted for by the United States at the present contract prices.

GEO. BOMFORD, Lieutenant Colonel, on Ordnance Duty.

C. J. Steedman, Esq., Agent for State of South Carolina, &c.

#### No. 2.

# Lieutenant Williams to Colonel Bomford.

Washington City, May 6, 1822.

Sir: Upon my arrival at Charleston, South Carolina, I commenced the inspection of the shot at the State arsenal, agreeably to my instructions. After inspecting two thousand of the eighteen-pounders, and finding but one hundred and twelve of the proper dimensions, which were much deficient in weight, I concluded that if the shot of the other calibres were as defective as the eighteen-pounders, it would be unnecessary to inspect the whole quantity. I therefore examined 500 of each calibre, which gave the following results, viz:

Of 500 24-pounders 43 were of the proper dimensions, the average weight of which was 21 lbs. 5 oz. Of 500 18-pounders 28 were of the proper dimensions, the average weight of which was 16 lbs. 10½ oz. Of 500 12-pounders 184 were of the proper dimensions, the average weight of which was 11 lbs. 3½ oz. Of 500 6-pounders 48 were of the proper dimensions, the average weight of which was 5 lbs. 8 oz. The diameter of the 24 and 6-pounders generally fell short, and the 18 and 12-pounders exceeded the established dimensions, and all were quite rough; the 12 and 6-pounders in particular were defective in

Finding the shot so generally defective both in dimensions and weight, I considered it unnecessary to proceed further in the inspection, unless it should be desired by the agent of the State. The agent was at this time absent from Charleston. Upon his return I addressed him a letter, communicating the result of the inspection, as above stated, and requesting him to inform me if it was his wish that I should proceed. To which I received the following answer:

"Charleston, March 12, 1822.

"Sir: I have the honor to acknowledge the receipt of your letter of the 9th instant, communicating the result of your inspection of a part of the shot purchased by the State of South Carolina during the late war, and that you had discontinued (owing to but few of the balls being of proper dimensions or weight) until you could learn my "wish and desire." I beg leave to request that you will continue until the whole are inspected, to enable me to make a proper representation or report on this subject, either to the War Department or the executive of the State, as circumstances may hereafter determine.

"I have the honor to be, &c.,
"CHARLES J. STEEDMAN, Agent for State of South Carolina.

<sup>&</sup>quot;Lieutenant W. E. WILLIAMS."

I therefore resumed the inspection, and, in addition to those formerly examined, I inspected 2,322 24-pounders and 1,608 6-pounders, of which 94 of the former and 17 of the latter were of the proper dimensions. When I had proceeded thus far I received the following communication from Colonel Steedman, upon which I discontinued the inspection altogether:

"Charleston, April 25.

"Sr: Since I last had the honor of addressing you I have submitted your letter of the 9th of March to his excellency the governor, who has instructed me to inform you it is considered unnecessary for you to proceed any further in the inspection of the cannon balls in the arsenal at Charleston, as he does not consider the claim of the State to rest upon the quantity that may pass inspection, but that the United States is bound for the whole.

"I am, respectfully, &c.,

"CHARLES J. STEEDMAN, Agent for State of South Carolina.

"Lieutenant W. E. WILLIAMS."

I examined the canister shot mentioned in my instructions. The 6-pounder canisters were much too small; they were filled with musket bullets. The 18-pounder canisters were too large and defective in quality; they were filled with cast-iron balls of various sizes, from 1/2 to 11/2 inch, and of irregular shape and very rough casting.

I have therefore to report, that I did not approve nor receive any of the shot submitted to my

inspection.

I am, very respectfully, your obedient servant,
W. E. WILLIAMS, Lieutenant U. S. Artillery, on Ordnance Duty

Lieutenant Colonel G. Bomford, on Ordnance Duty.

Note.—The diameters of the 6 and 24-pounder shot are from 1-20th to 1-10th of an inch less than the smallest established limit.

### No. 3.

## From Captain Wade to Colonel Steedman.

ORDNANCE DEPARTMENT, May 23, 1822.

Sir: All arms, &c., which have been delivered by the State to the United States troops, or to militia called into service by the United States, and which shall not have been returned by the general government, shall be credited to the State.

Where arms have been delivered by the State to militia called into service by State authority, and subsequently recognized by the United States, the government to be responsible only for such arms as were captured by the enemy, or otherwise lost or destroyed while said militia were in the service of the United States. Satisfactory vouchers for the delivery, return, capture, or loss of arms, to be produced by the party claiming credit therefor.

With regard to the charges for the repairs of arms, those only can be allowed where it is clearly established that the arms were delivered to a particular body of militia in good order, and those same arms subsequently returned in bad order, and the degree of damage ascertained at the time of their

return.

Respectfully, I am, sir, your obedient servant,

W. WADE, Captain, on Ordnance Duty.

By order of Lieutenant Colonel Bomford.

#### No. 4.

### Ordnance Department, Washington, January 17, 1827.

Six: I have received your notes of the 16th and 17th instant, and, in compliance with your request, I communicate herewith an account in which the balance due from the State of South Carolina to the United States, as stated on the books of the Third Auditor, has been carried to the account of arms due to the State, on the settlement made by this department in May, 1822.

By this arrangement, which has been approved by the Secretary of War, the number of muskets due to the State has been reduced from three thousand two hundred and sixty-seven, to two thousand four

hundred and eighty-nine. This balance, together with that of other arms and accoutrements now due to the State, will be paid by this department in arms of the same, or of different kinds, whenever desired.

I have the honor to be, respectfully, your obedient servant,

G. BOMFORD, Brevet Colonel, on Ordnance Service.

Alexander Speer, Esq., Comptroller General of South Carolina.

P. S.—The Secretary of War wishes it to be understood that his approval of the arrangement above mentioned must be considered as subject to the established usages of the treasury; and the measure cannot, therefore, be considered as final until it receives the sanction of the Treasury Department.

No. 5.

The State of South Carolina in account for arms with the United States. Cr. DR. Dec. 6, 1826 To balance due the United States, May 22, 1822 By 3,267 muskets, balance due the State on the war account, as per settlement made this on settlement made at the Treasury Department, (Third Auditor's office,) on the war day between Colonel Steedaccount of this date\_\_\_\_ \$9,333 71 man, its agent, and the Ord-Balance due the State, carried nance department, at \$12 down, being equivalent to 2,489 muskets. \$39,204 00 each\_\_\_\_\_ 29,870 29 39,204 00 39,204 00 Dec. 6, 1826 By balance due the State brought down, equal to 2,489 29,870 29 muskets \_\_\_\_\_

E. E.

GEO. BOMFORD, Brevet Colonel, on Ordnance Service.

ORDNANCE DEPARTMENT, Washington, January 17, 1827.

No. 6.

Ordnance Department, Washington, February 6, 1827.

Sir: I have now to acknowledge the receipt of your letter to this department of the 16th ultimo, and to state in answer that in the settlement of May, 1822, of the accounts between the State of South Carolina and the United States for arms and accourrements, the following articles having been charged and sufficiently vouched for on the part of the State, were admitted to its credit, viz:

3,267 muskets; 40 pistols; 3,244 cartouch boxes and belts; 3,014 bayonet scabbards and belts;

1,582 brushes and wires; 210 screw-drivers; 140 ball-screws; 115 gun worms.

An additional claim was made at the same time for the following arms and accourtements, stated to have been delivered by the State of South Carolina to Sergeant John McCord and Quartermaster Tandy Moss, of the militia, under General Moore; but the vouchers for which not being satisfactory were withdrawn, and consequently the State received no credit on account of them, viz:

750 muskets; 750 cartouch boxes and belts; 175 brushes and wires; 12 gun worms.

It is also understood that the State has a further claim for a number of cannon balls, which has not settled. The difficulty in regard to this item appears to be that they were of inferior quality, and remained on hand unexpended at the close of the war, and that the State required that the United States should receive them, such as they were, and to allow for them in the general account of supplies charged against the United States the current contract price. To this it was agreed on the part of the United States, so far as to receive and account as above for any and all of the ball which should be found, on inspection, to be suitable for the public service; and an officer of this department was accordingly instructed on the 5th of February, 1822, to proceed to make the inspection preparatory to a settlement upon that basis. The officer, however, had not proceeded far in his inspections before, upon the request of the governor of the State, he discontinued his inspections; and so the matter has remained ever since.

It may be proper to add in conclusion, that the same vouchers which sustain that portion of the account first above mentioned embrace other articles also, which not being considered ordnance stores, or as appertaining to this department, were not included in any settlement made by it. The articles

referred to are as follows, viz:

1,432 canteens; 740 camp kettles; 605 common tents; 60 officers' tents; 17,956 flints; 16 mess pans; 164 knapsacks.

Thus you have all the articles which have been claimed by the State of South Carolina, as well those which have as those which have not been allowed or decided on by this department.

Very respectfully, I am, sir, your most obedient,

GEORGE BOMFORD, Brevet Colonel, on Ordnance Service.

ALEXANDER SPEER, Esq., Comptroller General of South Carolina, Columbia, S. C.

#### PART IV.

To the governor of the State of South Carolina:

The officers of the third regiment of State troops, in the service of the United States, stationed in the harbor of Charleston, beg leave to submit to the consideration of your excellency the following representation:

The troops under our command were called into service under very peculiar circumstances. Those who inhabited the interior parts of the State—"who earned their daily bread by the sweat of their brows"—were, at the shortest notice, (many of them at a moment's warning,) taken from their homes without being able to make any provision for their own wants or those of their families. Destitute of every convenience—without blankets, almost without clothes—many of these men laid down their ploughs every convenience—without blankets, almost without clothes—many of these men laid down their ploughs when their corn most needed them, and marched to this post without any prospect of supplying these necessary articles. Deprived of the fruits of their industry, they are prevented from making that provision for their wants which they are accustomed to do at home. In addition to the shortness of the notice, there was another reason why these men came into service in an unprovided condition. They were in almost every instance led to believe that when they arrived here they would be supplied by the United States with every article necessary for their health and their comfort. So strongly was this idea impressed on their minds, that many arrived here without a single change of clothes. The United States do not, under existing laws, allow clothing to troops engaged in their service for a shorter period than twelve months; and as the pay of a soldier is not sufficient to be of any consequence in the purchase of such articles, the men under our command have no prospect of being relieved from their present lamentable situation. The present season of the year does not make a blanket an indispensable article, but as our term of service embraces nearly two months of the winter, it is difficult for us to conceive how

lamentable situation. The present season of the year does not make a blanket an indispensable article, but as our term of service embraces nearly two months of the winter, it is difficult for us to conceive how our men can exist without blankets when almost destitute of clothing.

We represent also to your excellency that our soldiers have no shelter from the heavy rains that fall at this season, being compelled to live in tents, which are by no means water proof. Their sufferings from this cause have already been great, and they must daily increase. We trust that this plain representation of facts must be sufficient to bring to your view the destitute condition of many of the men under our command. Yet, under all these circumstances, under every privation, no murmur has escaped their lips, though the abundant supplies by the United States to the regular troops in this harbor was calculated, by contrast, to excite discontent. That the national government will hereafter make such provision for the militia in their service as to remove these evils, we cannot doubt; but in the meantime they press heavily upon those who compose the first quota. meantime they press heavily upon those who compose the first quota.

In bringing these things to the view of your excellency, we have no consideration for ourselves. We feel ourselves, however, bound by every principle of humanity and duty to make this representation to you in behalf of those men whose lives and whose happiness are in a great measure intrusted to our care. To see those brave men who, by coming forward at this time in the service of their country, have sacrificed their private interest and manifested at least an inclination to do their utmost in the defence

sacrificed their private interest and manifested at least an inclination to do their utmost in the defence of her rights and the promotion of her honor, without shoes, without hats, and almost destitute of blankets and of clothes, must be painful to our feelings as officers and men, more particularly as they generally manifest a disposition to do their duty with alacrity and zeal.

With regard to the inconveniences arising from living in tents, we have understood that they are about to be remedied by the erection of temporary barracks by the patriotic citizens of Charleston. You will be better enabled to judge than we can be how far this plan will afford the desired relief in this respect. With respect to the other subjects of complaint, we bring them before you in the most perfect confidence that whatever is proper to be done in this respect will be done by you. Whatever may be done by this State on this subject may, perhaps, be sanctioned by the United States, so far as to make it a proper subject of charge against them; and it is more than probable that such provision will be made for the future as will render unnecessary any other application to the State authorities.

JOHN RUTLEDGE, Lieut. Colonel 3d Regiment State troops.
THOMAS PINCKNEY, Jr., Major.
JOSHUA W. GOONIER, Quartermaster.

	.	ACCOUNT OF COLONEL CCCHRAN, PAYMASTER GENERAL.	
		The charges made by the State are— For this sum paid by him, as per his account current, dated April 2, 1814	
		For this sum paid per his account current, dated January, 1816, and book of accounts, pages 35-4213,413 93	
	}	Amounting to47,588 07  The foregoing charges are presumed to be founded principally on vouchers for	
		Colonel Cochran's advances to enable them to pay off the militia and magazine guards.  The fact as to the first of them cannot be ascertained for want of the account current; that the second charge was of this description appears by the pages referred to. It is not on receipts for advances that any allowance can be made by the United States, but on the vouchers of the several paymasters for their	
		payments to the militia, &c.  If, from Colonel Cochran's accounts, be deducted for pay, &c., of militia and magazine guards, which are separately charged for by the State, (see letters F, I, K, L,) there will remain to be charged, in respect of his accounts, only the following sums, viz:	-
		For pay, &c., of the regiments commanded by Lieut. Cols. Carter and ? Youngblood, (see Colonel Cochran's book, pages 28, 30, 32, and 40). \$26, 678 66 For pay of Major Howard's detachment, (see page 33 of same book). 1, 438 80 For pay of magazine guards, of which James Scott was paymaster 283 84

# Accounts allowed by the legislature of the State of South Carolina.

Murdoch Murchison, for nine days' services as quartermaster, in conveying the 27th regiment of drafted militia from Marion Court-House to Georgetown, in November, 1814; nine days' services of his wagon and team, and for 254 rations, stated to have been furrinished to the militia during the march on the 26th, 27th, 28th, and 29th November, 1814. The regiment which then marched to Georgetown was that commanded by Lieutenant Colonel Alston, and F. M. Baxter was mustered and paid as the quartermaster thereof. With respect to the charge for team hire, see the remark on Samuel McConahay's account, voucher 21, of Quartermaster General R. Y. Hayne's account. Colonel Alston's first requisition on the contract includes subsistence for the days charged in the above account for 430 men, and which have been paid for by the United States. Major Champlain paid for marching subsistence of a detachment of 209 men of the regiment, at one ration per day each, including the same days. The regiment, as appears by Colonel Alston's ration returns, had not more than 540 men, after they were all assembled. Quartermaster Murchison's account is not supported by any other testimony than his own, and the proof of the payment of it by the State is wanting.  Dr. James H. Davidson:—his charges for services are overcalculated	\$86 22 2 83 202 50 30 00 14 21

### Summary of the claims of the State of South Carolina.

1st. Interest on advances to the United States during the war, the sums so advanced having been drawn out of the Bank of the State of South Carolina, from a fund then drawing an average interest of about twelve per cent., which interest was lost by the State, though only six per cent. is now claimed.

2d. Arms purchased by the State at about \$17, and furnished to the United States, who have disposed of them as their own. This account has been adjusted at the proper department, and the question is, if the State shall be paid in arms or in money. The State is willing to receive payment at \$12 a stand, and this can be made without costing the government a dollar, by merely keeping the arms in lieu of having the same number manufactured.

3d. Cannon balls manufactured by the State in consequence of no supplies being furnished by the United States, and when essential to aid them in defence of Charleston; rejected by the United States after the peace, in consequence of their not being exactly conformable to the standard prescribed after they

were made

4th. Blankets furnished to a small portion of the militia in the actual service of the United States in consequence of their entire destitution, as proved by the memorial of the officers. Those men only were furnished who were totally destitute.

5th. Transportation—no more wagons were ever used than the situation of the troops rendered abso-

lutely necessary; but in the settlement of our claims, only eight have been allowed to any regiment of 1,000 men. The claim is for the number actually paid for by the State, and without which the troops could not have been marched to the place of *rendezvous*.

6th. Commissions and other compensations necessarily paid by the State to the commissary general, paymaster general, and other heads of departments, under whom these expenditures were made, all of which are rejected because these officers were not considered in the service of the United States.

7th. There are various other items included in the claim which, either from their nature or the smallness of their amounts, are not now brought before the committee, some of which, it is believed, can be adjusted with officers of the proper department.

#### REMARKS.

1st Only a portion (it is believed less than half) of the amount actually expended by the State for military defence during the war has been claimed of the United States, and this claim has been confined to troops actually received into the service of the United States, or recognized by them, and for arms, &c., furnished to supply what the United States did not and could not furnish.

2d. Of the amount claimed, a large sum has been rejected for irregularity, and \$---- in addition,

for the reasons before stated.

3d. The State made these advances to the federal government in consequence of being given to understand that the means of the federal government were inadequate, and under a resolution unanimously passed by the legislature to aid the government to the whole extent of the resources of the State, and to look to a period of peace for the settlement of her claims.

22d Congress.]

No. 488.

[1st Session.

ON REGULATING THE PAY, EMOLUMENTS, AND ALLOWANCES OF THE OFFICERS OF THE ARMY OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 20, 1831.

Mr. Drayton, from the Committee on Military Affairs, to whom was referred the bill "to regulate the pay and emoluments and allowances of the officers of the army of the United States," reported:

The objections to the compensation which is made to the officers in the army of the United States, under the existing laws, are:

1st. That some officers receive a greater compensation than they ought to receive, whilst the com-

pensation of others is less than it ought to be.

2d. That many officers of the same grades, and performing duties of correspondent importance and responsibility, receive different rates of compensation.

3d. That several officers receive the pay and emoluments of their brevet rank when not performing

duties adequate to their brevet rank.

4th. That the regulations relating to the allowance of forage are liable to abuse, and operate unequally, as under them officers entitled to the same commutation, on that account, receive different amounts.

The foregoing objections will be considered in their order, with the alterations which are proposed

for the purpose of obviating them.

First objection.—A major general now receives monthly, for pay, \$200; for rations, (fifteen per day,) \$91; for forage, (seven horses,) \$56; for servants, (four,) \$54; total per month, \$401; per year, \$4,812. This, compared with the salaries of civil officers, is deemed too much, and it is also too high when compared with the compensation of grades immediately below that of a major general. For pay, rations, forage, and servants, a brigadier general receives \$3,084 a year, and a colonel in the staff, \$2,316 a year. It is,

therefore, proposed to allow to a major general monthly, for pay, \$160; for rations, (twelve per day,) \$72; for forage, (three horses.) \$24; for servants, (three,) \$40; being \$296 per month, and \$3,552 per annum.

A brigadier general now receives for pay, rations, forage, and servants, \$257 a month, or \$3,084 a year. The bill has reduced his monthly pay and emoluments to \$228 per month, or \$2,736 per annum, upon the same principles as it has those of the major general.

By this bill the pay and emoluments of a major are allowed to a surgeon, and those of a captain to a pagicant surgeon with eight dellars a month for the forage of one home and double their dellars.

an assistant surgeon, with eight dollars a month for the forage of one horse, and double their daily rations to each of them, after they have served ten years in their respective grades.

The importance of the duties of the surgeons, upon which the comfort, the health, and the efficiency of the army so essentially depend, are manifest and notorious; and yet the pay and subsistence of a surgeon amount to only \$63 a month, or \$756 a year; less by \$132 a year than those of a captain, which are \$888; and the pay and subsistence of an assistant surgeon amount to no more than \$52 a month, or \$624 a year; whilst a first lieutenant receives \$648 a year, and when he commands a company, which is very common, \$768 a year.

However long the surgeons continue in the service, their compensation remains the same, as they can rise no higher; neither can any lucrative employment be conferred upon them, unlike the military officers, who may be transferred to the staff, be ordered on extra duties, or obtain separate commands,

with the allowance of double rations.

From a statement of the Surgeon General made during the last session of Congress, it appeared that there were then in the army eight surgeons and forty-five assistant surgeons; that of the surgeons, one of them had been in the service seventeen years, two sixteen, one twelve, and one ten years; and that of the assistant surgeons, five had been in the service fourteen years, eight twelve years, five ten, and the rest from nine years to a recent date. For the whole of these periods their emoluments have been stationary, whilst in the ten years ending in 1830, fifteen captains have been promoted to majorities, nineteen to colonelcies and lieutenant colonelcies, besides numerous promotions from the inferior grades.

From causes doubtless accidental, but operating with peculiar hardship upon the medical staff, whilst the condition of every officer in the army below the rank of major has been improved, theirs has been unchanged. Nor is this the only injurious comparison of which they have a right to complain. Formerly the pay and emoluments of a surgeon and of an assistant surgeon in the army, were the same as those of a surgeon and of a surgeon's mate in the navy. By an act of Congress passed May 24, 1828, the pay and subsistence of a surgeon in the navy were raised to \$75 a month; after he had served five years, they were raised to \$87 a month; after ten years' service, to \$90 a month; and after twenty years' service, to \$100 a month. By the same act, the pay and subsistence of a surgeon's mate, after he has served five years, are \$57 a month; and after ten years' service, they are increased to \$69 a month. Thus a surgeon in the navy may now receive for his pay and subsistence \$100 a month, whilst a surgeon in the army can receive no more than \$63; and a surgeon's mate in the navy may receive for his pay and subsistence \$69 a month, whilst an assistant surgeon in the army is entitled to no more than \$52 a month. It ought also to be noticed that the promotion of a surgeon's mate is necessarily much more rapid than that of an assistant surgeon, there being in the navy 37 surgeons and 46 surgeon's mates, and in the army but eight surgeons, with 45 assistant surgeons. It should likewise be recollected that the military officers are educated by the government at West Point, by which they are exempt from the heavy expenses of a professional education, which are defrayed by the medical staff from their private resources. Influenced by the facts and recognized the resources which they are added the Committee on Williams Africa property to the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of by the facts and reasons which they have adduced, the Committee on Military Affairs propose to put the surgeons upon an equality with the majors, and the assistant surgeons upon an equality with the captains, with a provision, as surgeons cannot be promoted at all, and assistant surgeons but very slowly, that they shall, as an equivalent for these disadvantages, be entitled to double rations after they shall, respectively,

have served ten years.

Second objection.—As the law now stands, officers in the staff and in the Ordnance department are entitled to higher pay and emoluments than officers of similar rank in the engineer, the artillery, and the In foreign nations these distinctions in the emoluments attached to particular corps or regiments are almost wholly founded upon aristocratical privileges, or favoritism, or arbitrary classification, none of which motives were ever intended to prevail in our country. It is believed that the duties of officers in the engineer, artillery, and infantry, involve as much individual responsibility, and require as much labor and time as those of officers of the same rank in the staff and the ordnance. This bill, therefore, makes no

distinction between them.

Some differences, though not considerable, now exist between the emoluments of the Adjutant Some differences, though not considerable, now exist between the emoluments of the Adjutant General, and of the Inspectors General, the Commissary General of Subsistence, the Chief of the Ordnance department, and the Chief of the Corps of Engineers. The rank of these officers being the same, the bill grants to them the same pay and emoluments. As the Chief of the Engineers, though a brevet brigadier general, performs no more than the duties of a colonel, the highest officer in the corps of engineers, he is not regarded under the act of the 16th of April, 1818, to be entitled to a compensation beyond an officer of that rank. By limiting him, therefore, to it, no injustice is done to him.

Third objection.—By an act passed on 16th April, 1818, "officers of the army who have brevet commissions shall receive the pay and emoluments of their brevet rank, when on duty, and having a command according to their brevet rank, and at no other time." By the act of the 2d March, 1821, the army was reduced to about twelve regiments, under a succified number of regimental and staff officers, and three

duced to about twelve regiments, under a specified number of regimental and staff officers, and three general officers, viz: one major general and two brigadier generals. This organization shows it to have been the intention of Congress that a major general, under the President, should command the whole willians a stabilishment and that each of the brigadiers under the President, should command the military establishment, and that each of the brigadiers, under the major general, should command one-half Had there been no brevet officers, this must have been the regular distribution of the generals; and the circumstance of the existence of such officers cannot affect the principle of a system which was so framed as to be carried into execution without their intervention. Upon comparing together the acts of 1818 and 1821, it is apparent to the committee that an officer is not entitled to additional pay and emoluments by virtue of a brevet commission, unless he exercise under it a greater command than is annexed to the rank which he holds in the line of the army. A brigadier, therefore, with the brevet of a major general, under the present peace establishment, can never be entitled to the pay and emoluments of his brevet, unless a command should be devolved upon him, exceeding that of a department, or one-half of the troops. In ordinary military language, a brigade means two regiments under a brigadier; a division, two brigades under a major general; a corps d'armée, two divisions under a lieutenant general, &c.; but by the act of 1821, different extents of command than those which are usual, are given to a major general and to a

brigadier general, (the two highest grades in our service,) and in construing their duties and rights, we ought to be governed by the letter and spirit of our own legislation, and not by technical phraseology. The same act which has increased the ordinary commands of the major general and of a brigadier general has left those of regimental officers as they have always existed in the United States. The committee have applied the same rule to all brevet officers, in opposition to the practice which prevails in some instances, conceiving that in doing so they have conformed to the intent and meaning of the laws of the United States which they have cited.

Fourth objection.—Complaints have been made that the regulations respecting forage have sometimes been evaded, and that officers entitled to the same compensation for forage receive different amounts. To prevent any irregularities or inequalities, the officers, by the bill, are allowed a fixed sum for forage, which cannot be increased under any circumstances. The number of horses which they are entitled to keep has been reduced in many cases, and increased in none. They are permitted, at their option, to draw forage in kind because, sometimes, when in remote situations, or when travelling upon duty, on horseback, they

either cannot purchase forage or they are obliged to pay extravagant prices for it,

No other part of the bill is considered to require explanation, excepting so much of it as relates to the allowance of quarters and fuel to the Paymaster General and the Surgeon General. By the 3d section of an act of Congress of the 24th April, 1818, the Paymaster General is to receive a salary of \$2,500 per annum. By an act of the 14th April, 1818, some change is made in the Medical department of the army, and by its second section the annual salary of the Surgeon General is fixed at \$2,500. The tenth section of the act of Congress of 2d March, 1821, enacts that there shall be one Paymaster General, with the present compensation, and its 11th section declares that there shall be one Surgeon General, saying nothing about his compensation; but by the following section, "officers, &c., retained by this act, excepting those specially provided for, shall have the same rank, pay, and emoluments, as are provided in like cases by existing laws."

The 9th section of an act passed on the 24th April, 1816, says, "that the regulations in force before the reduction of the army," (which was on the 3d March, 1815,) shall "be recognized as far as the same shall be found applicable to the service, subject, however, to such alterations as the Secretary of War may adopt, with the approbation of the President." Anterior to the passage of this act, quarters and fuel were allowed, by the regulations, to the Paymaster and Surgeon General; and subsequently to its date, the same quarters and fuel were continued to them, by regulations founded upon the authority of the act of 24th April, 1816. It may, perhaps, be proper to remark that no act of Congress expressly grants quarters and fuel to an officer. From the major general to the lowest subaltern, the right to these allowances is derived exclusively from the regulations of the War Department, when approved of by the President, which, it has been shown, are sanctioned by law. Although the committee entertain no doubts as to the rights of the Payhave thought proper to examine the question, and to express their opinion.

The paper marked A, exhibits a statement of the existing and of the proposed pay and emoluments

of the officers.

The paper marked B, shows the gain and loss of the government by the alterations proposed in the bill.

No. 489.

[1st Session.

## ON THE SUBJECT OF DESERTION IN THE ARMY AND PROPOSED REMEDIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 27, 1831.

Mr. Drayron, from the Committee on Military Affairs, to whom the subject of desertions in the army had been referred, reported:

The committee have seriously reflected upon the importance of devising some remedy for an evil so injurious to the reputation and utility of the army and so detrimental to the public interests as desertion, and they have arrived at the conclusion that it is necessary to recur to rewards and punishments—the motives by which the mass of mankind is ordinarily influenced—to effect the object which is desired. The condition of the non-commissioned officer and soldier ought to be ameliorated, so as to induce those who are in respectable situations to enlist, with the prospect of deriving as much profit from their pay and other allowances as they could earn by their labor in civil occupations, and with the certainty of being taken care of and furnished with medicines and medical aid when disabled by wounds or sickness. The length of the term of service, which is five years, is also an objection against enlistment with many who would not be unwilling to serve for a shorter period, whilst of those who engage themselves for five years a large proportion desert after receiving their bounty, clothing, and pay for two or three months. It is, therefore, proposed to reduce the term of enlistment from five to three years; and, as a soldier who has acquired a knowledge of his duties and becomes habituated to the performance of them is more useful and efficient than a recruit, it is deemed politic to stimulate him to re-enlist, by moderate bounty and other advantages, by which not only the benefit of obtaining a better soldier will be secured, but the expense of transporting the recruit to the headquarters of his regiment be saved.

The committee believe that by adopting the few alterations which they have suggested, by abolishing the issues of critics and privates and privates and privates and by reservations enters from selling any

The committee believe that by adopting the few alterations which they have suggested, by abolishing the issues of spirits to non-commissioned officers and privates, and by preventing sutlers from selling any spirits, (regulations already within the power of the Executive and of the Department of War,) the rank and file of the army would gradually be composed of individuals so reputable that desertion, if not totally discontinued, would be comparatively rare.

But soldiers now in the army have entered it under circumstances different from those which it is desired should exist, and the fact is notorious that numbers of them are guilty of desertion. Whilst for

that crime sentence of death might legally have been pronounced by a general court-martial, the feelings of the community, as well as those of the members of the court and of the President, were so repugnant to the execution of the law in time of peace that it remained almost obsolete upon the statute book, and during the last session of Congress it was formally repealed. Since then desertions have increased to so great an extent that in a recent report of the Secretary of War it is estimated that they will amount in the year 1831 to 1,450, which exceeds one-fourth of the rank and file of the whole regular army. It is evident, unless a check be interposed to the progress of this evil, that the purposes for which the military peace establishment was organized will be utterly frustrated; and the committee can devise no check which, in their opinions, will be so salutary and effective as to authorize the infliction of corporal punishment upon deserters. Should this be regarded as a degrading punishment, it should be recollected that it is limited to those who have degraded themselves by fraud and perjury, and no fouler stain ought that it is immed to those who have degraded themselves by fraud and perjury, and no foller stain ought to attach to the meritorious soldier, on account of the delinquencies and chastisement of those who are members of the body in which he is enrolled, than to the virtuous citizen who is the member of a society in which certain crimes, when committed, are visited by the laws with disgraceful punishments. For the preservation of discipline in the navy this species of punishment is allowed, without the character of the sailors, as a class, being tarnished by it. The necessity which justifies its practice in the naval service for a variety of offences, would surely justify it in the land service in the particular case to which alone it is intended to be applied.

The committee, entertaining confident hopes that the respectability and physical strength of the army will be improved by the adoption of the measures which they have recommended, and by other provisions contained in their bill, and that the crime of desertion will be rendered incomparatively less frequent by the partial repeal of the law which interdicts the infliction of stripes upon the deserter, have reported the following bill to accomplish their objects. They also annex a letter from the Adjutant General, marked  $\Delta$ , by which it is shown that the passage of the bill which they propose, so far from occasioning an additional expense, will be attended with a considerable saving to the government.

#### A.

Adjutant General's Office, Washington, November 9, 1831.

Sir: The information you have requested me to furnish on the subject of desertions, is herewith respectfully submitted in the tables hereunto annexed.

#### TABLE No. 1.

Statement of the annual number of descritions from the army since the year 1823, specifying the number of soldiers who have descrited after joining companies, and the year of enlistment in which the descrition may have occurred; the number of recruits who have descrited from the rendezvous, or on their march to join their regiments; and also the probable amount of the annual loss in money in consequence of the crime of desertion.

	eserted before	Nun	Number and period of desertions after joining companies.					ıts.	Estimate	ed loss in n desertion.	noney by	
Year.	Number of recruits who deserted from the rendezvous, or before joining companies.	First year of enlistment.	Second year of enlistment.	Third year of enlistment.	Fourth year of enlistment.	Fifth year of enlistment.	Total from companies.	Aggregate number of de- sertions exclusive of convicts.	Total number of enlistments.	By recruits from rendez- vous.	By soldiers from compa- nics. <sup>\*</sup> Estimated.

The foregoing analysis contains all the information called for on this important subject, except so much as is embraced in the fourth interrogatory, to wit: "If the sum lost by desertion were divided among the soldiers, what would it give to each?"

To exhibit this result analytically, and in the most perspicuous manner, I submit two other tables.

TABLE No. 2. Monthly and annual allowance of pay to non-commissioned officers and privates under existing laws.

Rank.	Rate of monthly pay of each class.	Aggregate of monthly pay of each class.	Annual amount of each class.
11 sergeant majors 11 quartermaster sergeants 354 sergeants 424 corporals 14 principal musicians 212 musicians 108 artificers 4,462 privates	9 8 7 8	\$99 2,832 2,968 112 1,272 1,080	\$1, 188 1, 188 33, 984 35, 616 1, 344 15, 264 12, 960
Total Total	62	30,722	267, 120 368, 664

TABLE No. 3.

Supposed application of the sum annually lost by desertion to the monthly and annual increase of pay of the rank and file of the army, according to a bill intended to be reported by the Committee on Military Affairs of the House of Representatives.

Rank.	Rate of monthly pay of each class.		Annual amount of pay of each class.
11 sergeant majors 11 quartermaster sergeants. 106 first sergeants. 248 sergeants. 424 corporals. 14 principal musicians 212 musicians. 108 artificers, (artillery). 4,452 privates.	\$16 16 15 12 8 16 6	\$176 176 1,590 2,976 3,392 224 1,272 1,080 26,712	\$2,112 2,112 19,080 35,712 40,704 2,688 15,264 12,960 320,544
Total amount of proposed pay	105 62 43	37, 598 30, 722 6, 876	451, 176 368, 664 82, 512

REMARKS.—On referring to table No. 1, it will be seen that the aggregate amount lost by desertion for the eight years, inclusive of December 31, 1830, amounts to the sum of \$575,866; that the loss in 1829 is \$98,345, and, in 1830, \$102,087. It may be also seen that the average loss by desertion for the last two years is rather upwards of \$100,000; the loss during the present year (1831) will considerably exceed any previous year.

If \$82,512 of this average annual amount lost by desertion were distributed to the enlisted men of the army by way of additional pay, (see table No. 3,) it would be an annual expenditure less by \$17,000 than the sum now annually lost to the government by desertion—a pecuniary loss the most ungracious which the country can possibly sustain. I respectfully refer you to my report on this subject of January 25, 1830, Doc. No. 62, H. of R., page 9; and also to another report from this office, to the general-in-chief, of January 25, 1831.

If the sum lost by desertion in 1830 (\$102,087) be divided among the non-commissioned officers and privates of the army, (5,642,) it will give to each \$1 50 per month, or \$18 per annum.

The average loss by each desertion for the year 1830 is estimated to be \$81 60.

I am, sir, with great respect, your obedient servant,

R. JONES, Adjutant General.

22d Congress.

[1st Session.

## ON THE REGULATION OF THE ORDNANCE DEPARTMENT.

COMMUNICATED TO THE SENATE DECEMBER 29, 1831.

Washington, December 29, 1831.

Dear Sir: I have read the bill regulating the Ordnance department, which you were good enough to send me, and its general features appear to me to be salutary. If passed, I have no doubt but that the ordnance service would be greatly promoted by it.

I would venture to suggest whether it would not be best to make the pay of ordnance officers the same as that of the other corps of the army generally, and whether it would not be expedient to give to the chief of the Ordnance department the privilege of franking.

With great respect, I am, dear sir, your obedient servant,

LEWIS CASS.

Hon. Thomas H. Benton, Chairman of the Military Committee of the Senate.

IN THE SENATE OF THE UNITED STATES, DECEMBER 15, 1831.

Agreeably to notice given, Mr. Smith asked and obtained leave to bring in the following bill; which was read twice and referred to the Committee on Military Affairs.

January 4, 1832 -Reported without amendment ..

A BILL providing for the organization of the Ordnance department.

. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the passage of this act the Ordnance department shall consist of one colonel, one lieutenant colonel, two majors, and ten captans, and as many enlisted men as the public service may require, not exceeding two hundred and fifty.

Sec. 2. And be it further enacted, That the Secretary of War be authorized to select from the sergeants of the line of the army, who shall have faithfully served eight years in the service, (four of which in the grade of non-commissioned officer,) as many ordnance sergeants as the service may require, not exceeding one for each military post, whose duty it shall be to receive and preserve the ordnance, arms, ammunition, and other military stores at the post, under the direction of the commanding officer of the same, and under

and other military stores at the post, under the direction of the commanding officer of the same, and under such regulations as shall be prescribed by the Secretary of War, and who shall receive for their services five dollars per month in addition to their pay in the line.

Sec. 3. And be it further enacted, That the first section of the act passed on the 8th February, 1815, entitled "An act for the better regulation of the Ordnance department," and so much of the second section of the act, entitled "An act to reduce and fix the military peace establishment of the United States," passed the 2d March, 1821, as provides for one supernumerary captain to each regiment of artillery to perform ordnance duty, and so much of the fourth section of the same act as merges the Ordnance department in the artillery, and reduces the number of enlisted men, be, and the same are hereby, repealed: Provided, That nothing contained in this act shall be so construed as to divest the President of the United States of antiquity to select from the regiments of artillery such number of lightenants as may be necessary for the authority to select from the regiments of artillery such number of lieutenants as may be necessary for the performance of the duties of the Ordnance department.

Sec. 4. And be it further enacted, That all officers and enlisted men authorized by this act shall be subject to the rules and articles of war, and that the officers shall receive the pay and emoluments now

allowed to officers who perform ordnance duties.

No. 492.

[1st Session.

ON THE APPLICATION OF AN ASSISTANT SURGEON OF THE ARMY TO BE REIMBURSED FOR EXPENSES OF QUARTERS PAID BY HIM.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1832.

Mr. Drayton, from the Committee on Military Affairs, to whom was referred the memorial of Joseph Eaton, an assistant surgeon in the army of the United States, reported:

That the memorialist was ordered upon duty at Fort Preble, in Maine, and as there were no quarters at the post fit for his accommodation, he was for a certain period furnished with a room in the town of Portland; that he subsequently received an order to repair to the fort, but from the cause already stated he was under the necessity of hiring a room for his quarters. He therefore asks to be reimbursed the sums which he has expended in paying for quarters out of his private funds, which the government was bound

The fact that there was no room at Fort Preble which was fitted for the accommodation of the memorialist is certified by the Inspectors General Archer, Wool, and Croghan; by the commanding officer of the post; the assistant quartermaster; by Major General Scott, when on a tour of inspection, and by a number of officers in the service of the United States. The committee, therefore, have reported a bill, granting to the memorialist the sum of seven hundred and eighty-five dollars and twenty-one cents, being at the rate of \$140 a year, from September 1, 1821, to July 2, 1827—the memorialist having paid that amount for the hire of quarters, and having charged only what he has paid, which is less than he is entitled to under the regulations of the War Department.

REPORT, PLAN, AND ESTIMATE FOR THE CONSTRUCTION OF FORT GRISWOLD, IN THE STATE OF CONNECTICUT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 4, 1832.

DEPARTMENT OF WAR, January 3, 1832.

Sm: In compliance with a resolution of the House of Representatives of the 19th ultimo, directing the Secretary of War to report to that House "the plan and estimate for Fort Griswold, on Groton Heights, in the State of Connecticut," I have the honor to enclose a report of the chief engineer, which contains the information required.

I have the honor to be, very respectfully, your obedient servant,

LEWIS CASS

Hon. Andrew Stevenson, Speaker of the House of Representatives.

\$30,532.056

Engineer Department, Washington, December 29, 1831.

Sir: In obedience to the call of the House of Representatives of the 19th instant, which you have referred to this office, I have the honor to hand you herewith a copy of "the plan and estimate for Fort Griswold, on Groton Heights, in the State of Connecticut."

I am, very respectfully, sir, your obedient servant,

C. GRATIOT, Brigadier General.

Hon, Lewis Cass, Secretary of War.

Extract from the report of the board of engineers on the sea-coast fortifications.

Fort Griswold, New London, Connecticut, consists altogether, 1st, of a casemated redoubt serving as a keep; 2d, of a coverface, convering the masonry on the land side; 3d, of an advanced work and lower battery. 1st. The casemated redoubt is a square with rounded angles; its development, measured on the cordon, is 220 yards; its casemates can lodge the troops and also receive artillery and furnish a fire of musketry. One of its faces can cannonade across Thames river: the three others look towards the land; their casemates can furnish a direct fire upon the enemy, if lodged upon the terreplein of the coverface, and project vertical fires against his approaches. 2d. The coverface is bastioned; it is a kind of crown work, whose three capitals are each commanded by one of the faces of the redoubt, on which they fall perpendicularly. The side of each front of the coverface, measured between the flanked angles on the interior crest of the parapet, is 164 yards; its whole development, measured on the crest, is 510 yards. 3d. The advanced work is a small regular hexagonal tower of 54 yards in circuit, measured on the cordon; it is covered by a glacis of the same form, whose total development, measured on the interior crest, is 152 yards; the upper portion of the parapet of the tower which is not concealed by the glacis must be built in wood. The tower is rendered bomb-proof with timber and earth, and covered with a light roof, which might be occasionally taken off. The portion of the tower which is marked by the glacis bears fires of artillery and musketry on the terreplein of the covert-way, and projects vertical fires against the approaches of the enemy. This advanced work not only looks over the ground which the principal work cannot command, but bears on the fort reverse fires, which must oblige the enemy to attack the advanced work before they can besiege the principal fort. 4th. The lower battery R is destined to command over Thames river more closely than the fort; it communicates with it by a caponniere S; and

[1st Session.

ON ALLOWING A PENSION TO A PROFESSOR OF THE MILITARY ACADEMY WHO BECAME BLIND IN THE SERVICE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 4, 1832.

Mr. Drayton, from the Committee on Military Affairs, to whom the petition of Joseph du Commun was referred, reported:

By law no provision is expressly made for more than one teacher of the French language at the Military Academy of the United States; but, shortly after that institution went into full operation, it being found that one French teacher was not sufficient for the instruction of the cadets, the then President found that one French teacher was not sufficient for the instruction of the cadets, the then President directed a second teacher to be employed, with the pay and emoluments of a captain in the army, and Congress sanctioned this executive act, by making the necessary appropriation, which they have continued for fourteen years, viz: from 1817 to 1831. During the whole of this period, the petitioner has been the second teacher of the French language at the Military Academy, and, as appears by the most authentic and respectable testimony, "has discharged his duties with distinguished ability, and with great advantage to the institution." He is now totally deprived of his sight, a calamity which not only prevents him from performing his official functions, but which utterly incapacitates him from making any kind of exertion by which he might provide himself with the necessaries of life. Under these afflicting circumstances, he asks Congress to allow to him the pension which is granted to a captain in the army. circumstances, he asks Congress to allow to him the pension which is granted to a captain in the army, who has been totally disabled in the service.

who has been totally disabled in the service.

The sole question for the consideration of the committee, is, whether the case of M. du Commun comes within the provisions of the pension laws, which enact, that "if any officer, non-commissioned officer, musician, or private, in the army of the United States, shall be disabled by wounds, or otherwise, while in the line of his duty in public service, he shall be placed on the list of invalids of the United States, at such rate of pension, and under such regulations, as are or may be directed by law." According to strict technical construction, perhaps the petitioner would not be regarded as an "officer in the army of the United States;" but as he did, in fact, perform all the duties of such an officer—as he was appointed to that situation by the Executive—as the act of the Executive was confirmed by the legislation of Congress—and as he was disabled while in the military service of the United States, the committee are of opinion that he is embraced within the spirit and meaning of the pension laws, and therefore they report a bill for his relief. a bill for his relief.

[1st Session.

ON THE EXPEDIENCY AND COST OF THE ERECTION OF BARRACKS AT NEW ORLEANS.

COMMUNICATED TO THE SENATE JANUARY 4, 1832.

Documents laid on the table by the chairman of the Committee on Military Affairs, relating to Senate bill No. 44, "for the erection of barracks, quarters, and storehouses, and the purchase of a site in the vicinity of New Ŏrleans."

DEPARTMENT OF WAR, December 30, 1831.

Your note of the 28th instant, enclosing a resolution of the Senate, directing "the Committee on Military Affairs to inquire into the expediency of erecting barracks, stores, and other necessary buildings for the accommodation of the troops at New Orleans," and requesting my opinion upon the matter, has been received.

The enclosed report of the Quartermaster General, in favor of the object contemplated by the resolution, expresses the views of this department, and I have the honor respectfully to recommend the subject to the favorable consideration of the committee over which you preside.

I have the honor to be, very respectfully, your obedient servant,

LEWIS CASS.

Hon, Thomas H. Benton, Chairman Military Committee, Senate.

Quartermaster General's Office, December 29, 1831.

Sir: In answer to your inquiry relative to the expediency of erecting barracks, &c., at New Orleans, I have the honor to hand you enclosed a copy of a report made to one of your predecessors on that subject on the 22d of January, 1828, together with an estimate of the probable expense of such as were then deemed necessary.

I am not aware of any change of circumstances which would alter the views expressed at that time.

Very respectfully, I am, sir, your obedient servant,

T. CROSS, Major and Acting Quartermaster General.

Hon. Lewis Cass, Secretary of War.

QUARTERMASTER GENERAL'S OFFICE, January 22, 1828.

Orleans; and I earnestly recommend, should it be determined by the government to continue the troops at that city, that the work be immediately commenced. In addition to this estimate, about fifteen thousand dollars will be required to erect storehouses in the city of New Orleans, to replace those sold by the register of the land office during the last year. Sir: In compliance with your orders, I have the honor to submit an estimate for barracks, quarters,

In consequence of the sale of the barracks and storehouses at New Orleans, we are now compelled to pay rents in that city equal to the interest on one hundred and seventy thousand dollars; it is, therefore, obvious, that the public would be benefitted, in a pecuniary point of view, by constructing the work proposed, independently of the advantage to the discipline, police, and health of the troops.

In the estimate submitted I have not calculated on the labor of the troops, for experience has suffi-

ciently demonstrated that nothing is gained by using them in a climate so far south.

I have the honor to be, sir, your obedient servant,

Hon. Secretary of War, Washington.

THOMAS S. JESUP, Quartermaster General.

Estimate of the expense which would be incurred in the purchase of a site in the vicinity of New Orleans, and the erection of barracks, quarters, storehouses, &c., thereon, for a garrison of four companies of United States troops.

1. Soldiers' barracks:  Materials of all kinds  Workmanship and labor	\$14,039 55 18,719 41	
2. Officers' quarters:  Materials of all kinds  Workmanship and labor	13,389 50 17,852 66	\$32,758 96
3. Storehouses for quartermaster's and commissary's department, and shop for sutler:  Materials of all kinds  Workmanship and labor	1,485 90 1,981 21	31,242 16
4. Hospital:  Materials of all kinds  Workmanship and labor	1,650 00 2,350 00	3,467 11 4,000 00
5. Guard-house, office, stables and privies:  Materials of all kinds	1,550 00 1,950 00	3,500 00
6. Materials, workmanship and labor for erecting a brick wall enclosure around the establishment		3,000
For the necessary buildings		77,968 23 10,000 00
Total	• • • • • • • • • • • • • • • • • • • •	87,968 23

Quartermaster General's Office, January 22, 1828.

I certify that the navy arsenal, in the city of New Orleans, sold for the sum of \$126,310—one hundred and twenty-six thousand three hundred and ten dollars.

JNO. M. MOORE, Chief Clerk.

GENERAL LAND OFFICE, January 4, 1832.

22d Congress.]

No. 497.

[1st Session.

APPLICATION OF AN OFFICER OF THE ARMY TO BE INDEMNIFIED FOR LIABILITIES INCURRED IN OBEDIENCE TO ORDERS IN THE COMMAND OF AMELIA ISLAND IN THE WAR OF 1812-15.

COMMUNICATED TO THE SENATE JANUARY 4, 1832.

To the honorable the President and members of the Senate of the United States of America, now met and sitting:

The memorial of Major A. A. Massias respectfully showeth:
That some time in the years 1822 and 1824 suits were brought by Thomas Backhouse and C. W. Clark against your memorialist to recover damages for false imprisonment (as they alleged) during the time your memorialist was in command at Amelia; that on representation thereof to the War Department, the

United States attorneys were directed to defend the aforesaid suits; that they were so defended and carried up, by appeal, to the United States Supreme Court, but owing to a deficiency in point of form, (from the impracticability of taking up the appeal within ten days,) judgments were had against the sureties of your memorialist; that your memorialist hath so become (or rather hath been made and held) liable in a sum which, including payments already made and the balance to be liquidated, with all incidental costs and charges, will amount to \$2,704 47, as will more fully appear by reference to the account accompanying this memorial.

And now hereupon your memorialist respectfully submits that he ought not to be or to be held

And now, hereupon, your memorialist respectfully submits that he ought not to be or to be held responsible, of his own proper goods and chattels, for any matters in the premises aforesaid contained, for that because your memorialist was acting under the authority and by virtue of the commands of his superior officers, duly appointed and fully recognized, and clearly within the scope of the large discretionary powers to them (and thence to himself) delegated and decreed.

And your memorialist, for further cause, showeth that, under the powers aforesaid, the actings and orders by him had and issued were justifiable and necessary, by reason of the then state of insubordination of the island and due regard had to the safety and well-being of the post, with the peace and good order of the citizen and soldier. And for that the foregoing may not want confirmatory testimonials, your memorialist cometh and craveth reference generally to the vouchers, documents, and orders herewith transmitted, and more specially to the order No. 3, under date of July 12, 1812, and to letter No. 2, dated transmitted, and more specially to the order No. 3, under date of July 12, 1812, and to letter No. 2, dated Milledgeville, September 4, 1812, confirmed in letter No. 3 from his excellency Governor David B. Mitchell, then commissioner for the United States; also the order from Lieutenant Colonel Thomas A. Smith, under whose orders your memorialist then was, and which order is on the record accompanying this memorial; also the orders contained in orderly book No. 4; also Nos. 5, 6, 7, and 8—the orders of General Flournoy sanctioning the course and confirming the powers of your memorialist; also No. 9—the deposition of Archibald Clark, now collector at St. Mary's; also No. 10—the deposition of James Ferguson, aide to General Thomas Pinckney, who succeeded Governor Mitchell, and who continued the authority vested in your memorialist by Governor Mitchell; also papers numbered 11, 12, 13, 14, 15, and 16, directory to the United States attorneys. States attorneys.

And your memorialist lastly submits that, under the foregoing authorities, he ought of right to be reimbursed the aforesaid sum of \$2,704 47; and for the reasons aforesaid he respectfully soliciteth relief in this behalf at the hands of your honorable body. And your memorialist, as in duty bound, will ever

pray, &c.

A. A. MASSIAS.

DEPARTMENT OF WAR, April 13, 1832.

Sir: I beg leave to enclose to you a copy of my note of the 27th of January last, in answer to yours of the 18th, enclosing the memorial of Major Massias, which 1 presume has miscarried or been overlooked

by you.

Having just received a communication from Mr. Maxey, Solicitor of the Treasury, containing a letter from Judge Smith relative to the case of Backhouse against Massias, and the notes of the evidence in the case, I have thought it proper to submit a copy of these to your consideration, which are herewith enclosed, and also to return the memorial transmitted by you to this department.

I have the honor to be, very respectfully, your obedient servant,

LEWIS CASS.

Hon. Thomas H. Benton, Chairman of the Military Committee, Senate.

Washington, April 3, 1832.

Sir: I enclose herewith a copy of the minutes of the trial, and evidence taken in the case of Backhouse and Massias by the judge at the time thereof.

From these minutes the substance of the whole testimony exhibited in the case may be perceived, as

From these minutes the substance of the whole testimony exhibited in the case may be perceived, as well as the course of defence which was open to Massias at this trial by decision of the court.

It cannot but be remarked that not the slightest testimony was offered, or even attempted, to disprove, excuse, palliate, or show cause for the arrest of a simple, inoffensive non-combatant, on his way to St. Augustine; the bringing him back a prisoner to Fernandina, chaining him there in an open guard-house to an iron bolt, in common with negro slaves, and so confining him, refusing his friends access to him, for sixteen days; and finally, when induced to liberate him from the guard-house and from his chains, still restraining him by bonds to the limits of the village of Fernandina.

These facts are stated to show that no new trial could have benefitted the defendant or the United States, if it be possible that government can take on itself the responsibility of Massias's conduct in this transaction, and, as it is understood he has made complaints, also to show he was not severely dealt with by the court or jury.

Very respectfully, sir, your obedient servant,

JOSEPH L. SMITH.

JOSEPH L. SMITH.

Virgil Maxey, Esq., Solicitor of the Treasury.

Office of the Solicitor of the Treasury, April 12, 1832.

Sir: The claim of Major A. A. Massias for reimbursement of damages recovered against him being before another department of the government, I have thought it proper that I should transmit to you a letter received from Judge Smith, of East Florida, who presided at the trial of Massias, together with a minute of the evidence exhibited before the court.

I have the honor, &c.,

VIRGIL MAXEY, Solicitor of the Treasury.

### THE UNITED STATES TO A. A. MASSIAS, DR.

Dec. 31, 1831. For damages and costs in the case of Thomas Backhouse vs. Waters Smith and Richard Weightman as sureties in the case, (the appeal to the Supreme Court of the United States having been disregarded by the court at St. Augustine,) as per voucher A	29 38 21	09 44 62 <del>1</del> 54 50

## THE UNITED STATES TO A. A. MASSIAS, DR.

For damages in the case of C. W. Clark, which are not yet paid	\$500	00
For costs, interest, and other charges, which are presumed to be the same as those in the case		
of Backhouse		
For fee bill to Jas. S. Linn, clerk of the court of appeals, as per voucher B	35	28
-		
	735	28

I certify on honor that the within statement is, to the best of my knowledge and recollection, correct and true.

A. A. MASSIAS, Paymaster United States Army.

Copy of the judge's notes taken on the trial of the suit of-

THOMAS BACKHOUSE Assault and battery and false imprisonment. ABRAHAM A. MASSIAS.

Defendant's counsel move and inform the court that the question of the validity and legality of suits brought in the old county courts, called "General Jackson's courts," will be contested, and request that the question may be reserved.

Question reserved.

## Plaintiff's testimony.

Deposition of M. Arnau.—Swears that in 1812 Backhouse was taken from a gun-boat by a sergeant and two soldiers and taken with witness and two negroes to Massias, who ordered them in irons and so detained them together in the guard-house—an old building without a floor. Says he (Backhouse) was kept so chained to a bolt, with witness and two negroes, for sixteen days, with rations of one pound of flour and one pound of pork and one gill of whiskey; that no persons from without were allowed to have access or to communicate with him. When he left the guard-house he was accompanied by armed soldiers

Michael Malbrita deposes to the same effect, but that he (Backhouse) was so chained, he thinks,

about a month. When released, security was required from him that he would not leave the town.

George Atkinson deposes that some time in 1812 plaintiff was brought to Fernandina in a gun-boat and taken by defendant and confined in a guard-house there, with negroes and others, in irons, and denied, a part of the time, communication with his friends. When liberated, it was upon giving security, by

deponent and Phillip R. Yonge, that he would be of good behavior.

His provisions, while in the guard-house, were the same as a common soldier's.

C. W. Clarke knows plaintiff was imprisoned in August or July. He had been brought back in an attempt to reach St. Augustine; was brought back by a gun-boat of the United States. Plaintiff was kept in the guard-house fifteen or sixteen days. No person was permitted to speak to him or approach nearer than fifteen or twenty steps.

#### Defence.

Documents offered, including a letter from the Secretary of State, dated May 27, 1812, to Governor Matthews, and a letter from Colonel Smith. Objected to and excluded. Defendant excepts, and has leave to file his bill.

Defendant authorized to show that he was commanding officer at Fernandina; that he was there by order of a superior officer; and the state of the country, for the purpose of proving the necessity of his conduct towards the plaintiff, if in his power; not for the purpose of justification but to mitigate damages.

George J. F. Clarke thinks that Massias did not act from malicious and personal motives, but that

his conduct towards plaintiff was very flagrant.

SUPERIOR COURT, EAST FLORIDA.

I hereby certify that I have carefully compared the above and the foregoing with the notes of the judge taken at the trial, and that they are a correct copy of the same.

GEORGE GIBBS, Clerk. Per B. GIBBS, Deputy Clerk.

St. Augustine, January 6, 1832.

22D Congress.]

No. 498.

[1st Session.

ON THE CONSTRUCTION OF A MILITARY ROAD BETWEEN GREEN BAY AND PRAIRIE DU CHIEN, IN MICHIGAN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 6, 1832.

DEPARTMENT OF WAR, January 4, 1832.

Sir: In obedience to a resolution of the House of Representatives of the 22d ultimo, I have the honor to enclose copies of all the communications which have been made to this department on the subject of a road between Green Bay and Prairie du Chien.

And in further conformity with that resolution, I beg leave to state that I am personally acquainted with the route between those places, and that I concur in the general views taken in the communications.

The posts of Fort Howard at Green Bay, of Fort Winnebago at the portage of the Fox and Wisconsin rivers, and of Fort Crawford at Prairie du Chien, hold in check the numerous and restless Indians of that region. These posts command the important line of communication between the lakes and the Mississippi. region. These posts command the important line of communication between the lakes and the Mississippi. It is desirable that there should be the means of an easy and more rapid intercourse between them than is afforded by the Fox and Wisconsin rivers. The former of these is very crooked in its course, and the length of the route by water probably exceeds by one-third a practicable route by land. They are at times so shallow as to be navigated with great difficulty, and during five months of the year they are closed by the ice. Should circumstances occur, as they did four years since, to render an immediate concentration of troops necessary upon any part of this line, at a season of the year unfavorable to a movement by water, it would then become necessary to open a road. The subject has already engaged the attention of Congress, and an appropriation of two thousand dollars was made the 31st of May, 1830, for opening a road from Green Bay to Winnehago lake and thence to Fort Winnehago. Directions for opening a road from Green Bay to Winnebago lake, and thence to Fort Winnebago. Directions have recently been given to carry this provision into effect. From the nature of the country most of the route may be rendered passable with little labor, and it is only detached portions which would require any considerable work.

I have the honor to be, very repectfully, your obedient servant,

LEWIS CASS.

Hon. Andrew Stevenson, Speaker of the House of Representatives.

Inspector General's Office, Washington City, December 23, 1831.

Sin: In answer to your inquiries, I would remark that a road from Prairie du Chien to the Portage,

and from thence to Green Bay, whether considered in relation to the general interest of that country or the transmission of military supplies from one station to another, would be equally important.

The distance by water is about 300 miles, and by land not exceeding 200. The navigation of the Wisconsin and Fox rivers is closed from about the middle of November to the 1st of April, and at all times difficult on account of rapids in the one and sand bars in the other. It is not uncommon for boats, when the streams are low, to be detained several weeks in their passage from Fort Howard to Fort Crawford. Under these circumstances, and as the country is inhabited by tribes of savages who have ever been, and still are, hostile in their feelings and disposition toward the people of the United States, a road which would afford, at all seasons of the year, a free communication from one post to the other, appears not only necessary as it regards the transportation of troops and military stores, but to the protection of the white population. The Indians are unwilling to leave the country of their nativity, and, the investment of the country of their nativity, and, the investment of the country of their nativity. under the impression that the white inhabitants are determined to dispossess them of it, are constantly kept in a state of excitement; and but for the troops stationed amongst them, would not hesitate to raise the tomahawk and exterminate the whites. They might, however, in an evil moment, be induced to attempt the execution of their designs, and at a time when the navigation of the rivers might be closed, when it would be extremely difficult to concentrate your troops or furnish supplies from one post to another; and, consequently, the results might be no less fatal than the destruction of the white inhabitants. Hence I would recommend a road from Prairie du Chien to the Portage, and from thence to Green Bay, which, I am informed, can be easily made, and at a comparatively small expense. Besides the protection it might afford to the white population, it would, undoubtedly, encourage the settling of the country whenever the lands should be brought into market.

I have the honor to be, sir, with considerations of the highest respect, your obedient servant,

JOHN E. WOOL, Brigadier General United States Army.

Hon. Lewis Cass, Secretary of War.

Washington City, December 15, 1831.

Sir: I have been requested by Mr. Wing, the delegate from Michigan, to communicate to the War Department my views as to the importance (in a military point of view) of opening a road from Fort

Howard to Fort Crawford, by the way of Fort Winnebago.

From a knowledge of the country, acquired by a residence of several years at the two extreme points, I am enabled to give it as my opinion that such a road as is contemplated would not only facilitate and expedite the transportation of public stores between those points, but would, at all seasons of the year, insure a speedy co-operation of the troops in any military movement which might be ordered.

The distance by water is computed to be 360 miles, and such is the difficulty of navigation, that a loaded boat is not unfrequently twenty days in making the voyage; whereas a road judiciously laid out would insure the performance of the trip within eight days at any season of the year, and reduce the distance to 220 miles.

I have the honor, &c.,

JNO. GARLAND, Major and Acting Quartermaster U. S. Army.

Hon. Lewis Cass, Secretary of War.

Extract of a letter from Henry B. Brevoort and James B. Doty to Major General Macomb, dated Green Bay township, January 20, 1829.

"Your own accurate knowldege of the country lying between Lake Michigan and the Mississippi, renders it unnecessary for us to speak otherwise than in general terms of its geography. The prairies which commence on the Mississippi and Wisconsin rivers extend to the head of Winnebago lake, with the exception of occasional belts of woods along the water-courses and in other places of clusters or islands of open woods. It is confidently asserted that wheel carriages can even now pass from the lead mines to the Calmut village on Winnebago lake, which is not more than thirty-eight miles from this place.

The head of this lake is on the most direct route to Chicago and Fort Winnebago.

"You will readily perceive, therefore, how important it is that the road should be opened from that point to the bay, and we take the liberty of soliciting the aid of the troops to effect this object, which we

esteem of equal advantage and convenience to the government and the citizens.

"One of the undersigned (Judge D.) has just returned from that part of the country, having personally examined it with a view to obtain the best ground for a road; a sketch of which he respectfully transmits herewith.

"He feels confident that twelve men in one month can open this road to the Calmut village, passing, as it does, upon a high ridge of beach and maple land. If the road constructed by the citizens to the Grand Kan Rannoh should be followed as far as Plum creek, the distance for the new road would be

diminished to twenty-three miles.

"It is hoped that some gentleman duly qualified may be ordered to make the necessary surveys of these routes, and to ascertain, by a particular examination of the country, the practicability of so improving the communication between the lead mines and Lake Michigan, by the way of the Ford lakes and Winnebago lake, either by a road or canal, as to open new sources of wealth to New York, and to the people inhabiting the borders of the great lakes. The object is also of so great magnitude to the government that we cannot doubt of your giving it an attentive consideration."

22d Congress.]

No. 499.

[1st Session.

ON CLAIM OF AN OFFICER OF THE ARMY TO INDEMNITY FOR LIABILITIES INCURRED IN THE EXECUTION OF ORDERS AS COMMANDING OFFICER AT AMELIA ISLAND, IN FLORIDA, IN 1812-13.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 12, 1832.

Mr. Ward, from the Committee on Military Affairs, to whom was referred the petition of Major Abraham A. Massias, reported:

That it appears from the petition and documents referred to the committee, that in 1812 Major Massias, who was at that time a captain in the United States army, was, by an order of Lieutenant Colonel Thomas A. Smith, placed in the command of the troops stationed at Amelia island, after that island had been taken possession of by our government; that whilst he was so in command, and acting under the orders of his superior officers, Thomas Backhouse, a British subject, claiming to be a Spanish one, having

left the post of Fernandina, against the orders of the day, was taken a prisoner by Commodore Campbell, of the United States navy, and was confined at the island until the general's pleasure was known, when he was discharged upon his giving security not to violate said orders again; it also appears that C. W. Clark had been confined on said island by the predecessor of Major Massias, for disorderly conduct, and was confined in the guard-house at the time the major took the command at Fernandina, where he was was confined in the guard-house at the time the major took the command at Fernandina, where he was kept until he gave security, in compliance with the order of the general, for his good conduct; it also appears that Clark and Backhouse each commenced an action of assault and battery and false imprisonment against Major Massias in the county court in the eastern district of Florida; that in the action brought by Backhouse, issues in fact and in law were joined; that the issue in fact was first tried by a jury, and a judgment of \$1,000 was rendered against Massias; and that afterwards a judgment was rendered in favor of Backhouse on the issue of law. The Secretary of War directed Massias to take the cause up to the highest tribunal, and the United States attorneys were at the same time directed to attend to the suit in behalf of the government, and other counsel was also employed by the government to assist in the trial of said cause.

The cause was accordingly carried, first, from the superior court in the eastern district in Florida, and from that court, by writ of error, to the Supreme Court of the United States, where it is now pending

and undetermined.

That when the case was taken to the court of appeals of Florida, Massias executed an appeal bond with sureties, but as the writ of error was not taken out in ten days, it could not operate as a supersedeas; whereupon Backhouse instituted a suit on the appeal bond, and recovered a judgment against the securities of Massias, amounting to \$1,262 09 damages and costs. The United States attorney in Florida was instructed by the solicitor general to take every step which the law authorized for the protection of Massias and his sureties, which instructions were faithfully attended to. But these efforts proved unavailing, for the execution was ordered against the securities of Massias, in St. Augustine, and the judgment was paid by a draft upon Massias.

The case is fully supported by the following documents:

1st. Lieutenant Colonel Smith's order to Major Massias, to take command of Amelia island, and report himself to Governor Mitchell, a commissioner for the United States, with full powers to order and direct the concerns in Florida, both civil and military.

2d Governor Mitchell's orders relating to the police and command of the island of Amelia.

3d. General Flournoy's orders and letters relating to the same, particularly in the case of those confined on the island.

4th Certified copies of Major Massias's orderly book.

5th. Major General Pinckney's orders, as approved by his aide-de-camp. 6th. The affidavits of Archibald Clarke, now collector of St. Mary's; and-

7th. The deposition of Js. Ferguson, aide-de-camp to Major General Pinckney.

The petitioner states that he has been made liable not only for the payments already made, but for the balances to be paid in the two suits of Backhouse and Clark, together with the incidental expenses,

amounting to \$2,704 47.

This being a case in which an American officer, acting under the orders of his government in a foreign country, having done an act necessary to the maintenance of his authority, for which he has been made individually and personally responsible for the sum stated; and the government, in all similar cases, having provided indemnity, there are, in the opinion of the committee, the strongest reasons why it should be done in this case.

The committee cannot therefore refuse relief in this case without disregarding numerous examples arising out of the late war; without danger of preventing others from risking personal responsibility. when required by the exigency of the times, and withholding justice from the petitioner.

The committee therefore report a bill for his relief.

## The Secretary of State to D. B. Mitchell, esq., Governor of Georgia.

DEPARTMENT OF STATE, May 27, 1812

Sir: I have had the honor to receive your letter of the 2d instant, from St. Mary's, where you had arrived in discharge of the trust reposed in you by the President, in relation to East Florida. My letter arrived in discharge of the trust reposed in you by the President, in relation to East Florida. Ally letter by Mr. Isaacs has, I presume, substantially answered the most important of the queries submitted in your letter, but I will give to each a more distinct answer. By the law, of which a copy was forwarded to you, it is made the duty of the President to prevent the occupation of East Florida by any foreign power. It follows that you are authorized to consider the entrance, or attempt to enter, especially under existing circumstances, of British troops of any description as the case contemplated by the law, and to use the proper means to defeat it. An instruction will be immediately forwarded to the commander of the naval force of the United States, in the neighborhood of East Florida, to give you any assistance, in case of emergency, which you may think necessary and require. It is not expected, if you find it proper to withdraw the troops, that you should interfere to compel the patriots to surrender the country, or any part of draw the troops, that you should interfere to compel the patriots to surrender the country, or any part of it, to the Spanish authorities. The United States are responsible for their own conduct only, not for that of the inhabitants of East Florida; indeed, in consequence of the compromitment of the United States to the inhabitants, you have been already instructed not to withdraw the troops, unless you find that it may be done consistently with their safety, and to report to the government the result of your conferences with the Spanish authorities, with your opinion of their views, holding, in the mean time, the ground occupied. In the present state of our affairs with Great Britain, the course above pointed out is the more justifiable and proper.

I have the honor, &c.,

JAMES MONROE.

To all to whom these presents shall come, greeting:

I certify that the annexed writings have been compared with the record in this office and that they are true copies thereof.

In testimony whereof I, Henry Clay, Secretary of State of the United States, have hereunto subscribed my name and caused the seal of the Department of State to be affixed. Done at the city of Washington, this 3d day of October, anno Domini 1827, and of the independence of the United SEAL. States the fifty-second.

H. CLAY.

DEPARTMENT OF STATE, October 13, 1827.

Sir: I have had the honor to receive your letter of the 19th ultimo from Milledgeville, acknowledging the receipt of mine of the 6th of July, and communicating the state of our affairs with the Spanish

authorities in East Florida at the time you left Savannah.

The President finds, with regret, that the governor of East Florida has declined entering into any engagements with you to secure from molestation or harm such of the inhabitants as had been encouraged by Governor Mathews, in a mistaken view of his powers, to engage in certain revolutionary measures there; and also that, at the time when a fair and just provision in their favor was under discussion, he had made an attack upon the troops of the United States under the command of Colonel Smith, who had been necessarily advanced for the safety and protection of these people. It appears also that, in the same spirit, the governor of East Florida had excited the Indians to commit acts of hostility against the United States, and that there was serious cause to apprehend that, under his influence, the incursions of the Indian tribes against us would be increased, and the aggressions be proportionally more extensive and injurious. The conduct of the governor of East Florida has excited much surprise, more especially when the liberal and friendly conduct of this government towards Spain is taken into consideration. As soon as it was known that General Mathews had transcended his powers, the President revoked them and committed them to you, with authority to restore the territory to the governor of the province, on the condition that satisfactory assurance should be given you that the people who had acted at his instance, on the faith of the United States, should not be punished nor molested for it. It was hoped and presumed that this condition would have been promptly acceded to, or rather that a just policy would have anticipated it. It was impossible to foresee that the frank and liberal proposal of the United States to restore the territory to the Spanish authorities, after disavowing the conduct of their own officer and displacing

the territory to the Spanish authorities, after disavowing the conduct of their own omcer and displacing him, would by the authority of Spain have been met by acts of direct and open hostility.

The wrongs heretofore received from Spain, with which you are well acquainted, independent of other considerations of sufficient weight in themselves, would have justified the United States in taking possession of that province as an indemnity to our citizens. These wrongs have been borne in the expectation that the motive could not be mistaken, and that the period was not remote when the Spanish authorities, by whomsoever wielded, reciprocating a similar sentiment towards the country, would make ample reparation for them. To abandon the people who had relied on the faith of the country, however improperly pledged, to the resentments of the Spanish authorities, which evidently awaited them, while the government of Spain made no recompense to the United States for losses or atonements for insults, would have been equally unjust in itself and inconsistent with the sympathies due to their situations. would have been equally unjust in itself and inconsistent with the sympatmies due to their situations. To do it after the outrages more recently received, which you have communicated, without a satisfactory arrangement, would be still more reprehensible. On a full view of your conduct in this important and delicate transaction, I am happy to communicate to you the entire approbation and the thanks of the President. In accepting the trust you gave a proof of patriotism, and the discharge of its duties has been distinguished by the abilities and judgment which the nature of the case required. That more precise instructions were not given you for the reinforcement of the troops under the command of Colonel

precise instructions were not given you for the reinforcement of the troops under the command of Golonel Smith, in case the Spanish authorities should refuse to give you the satisfactory assurance desired in favor of the people of East Florida, to whom the public faith had been pledged, proceeded from a hope and belief that contingencies would not happen, and a confidence, if they did, that your judgment, looking distinctly to the nature of your trust and its duties, would supply the omission.

The President is aware that your duties in the office of chief magistrate of Georgia, which will now become more active, will render it difficult, if not impossible, for you in future to execute those with which you have been charged in regard to East Florida. Willing to relieve you from the burden, he proposes to transfer the powers lately committed to you to Major General Pinckney, with whose situation and functions that have a convenient relation. I have therefore to request that you will have the goods. and functions they have a convenient relation. I have therefore to request that you will have the goodness to communicate with him on that subject, and furnish him such information as may be useful to him.

I have the honor to be, &c.,

JAMES MONROE.

His Excellency DAVID B. MITCHELL, &c., &c., &c.

CAMP BEFORE St. AUGUSTINE, July 6, 1812.

Sm: You will proceed with a non-commissioned officer and nine privates of your company to Amelia island and relieve Captain Ridgeway in the command. He is to proceed to this place agreeably to the tenor of the order herewith, which you will deliver to him. You will be governed in all respects by such orders as his excellency Governor Mitchell has given Captains Ridgeway and Williams, and such others You will examine the seventeen boxes of fixed ammunition stored in St. Mary's, as he may give you. and retain four, two of round and two of cannister; the others to be shipped to Thomas Bourke, esq., United States agent, Savannah.

I am, sir, with high respect, your obedient servant,

T. A. SMITH, Lieutenant Colonel commanding.

#### ABRAHAM A. MASSIAS ads. THOMAS BACKHOUSE.

The evidence of Joseph Woodruff, taken in behalf of the defendant, and to be read in evidence on the trial of this cause by consent of the parties:

Personally appeared before Elias B. Gould, a justice of the peace for the county of St. John, Joseph Woodruff, who being duly sworn says: That he is well acquainted with the signature of Thomas A. Smith, late lieutenant colonel commanding the United States troops in Florida; that the letter now shown him, dated "Camp before St. Augustine, July 6, 1812," and marked "A. E. B. G.," is signed by the said Thomas A. Smith in his own proper handwriting, to the best of his knowledge and belief; that he knows his handwriting, and has often seen him write; and further saith not.

JOSEPH WOODRUFF.

f worn to before me, the 12th day of November, 1827.

ELIAS B. GOULD, Justice of the Peace.

Letters and orders from Governor Mitchell, commissioner for the United States, relating to the affairs on Amelia Island.

S1. Mary's, July 12, 1812.

Sir: When you arrive at Amelia you will furnish Captain Williams with a boat for the transportation of a detachment of his marines to the camp before St. Augustine; the remainder will remain with you under the command of one of their own sergeants until the boat returns for them, or some other opportunity offers for their conveyance to the same destination. Captain Ridgeway will go in the boat with Captain Williams, and the recruits from Savannah and the few men who were taken from Point Petre will remain until another apportunity is afforded for their transportation to the camp before St. Augustine. You will maintain strict discipline and subordination, and admit of no outrage or violence amongst the inhabitants of the place; you will not permit any one whom you are not satisfied is an American to have or use fire-arms or other offensive weapons; neither will you permit any negroes to remain there who cannot satisfy you of their general good behavior, and who have an owner in the place. All those pretending to claim their freedom, who cannot satisfy you of their being so in reality by the laws of the province, without any claim attaching to them by any citizen of the United States, you will secure and send to this place for safe-keeping, in case you are deficient in the means of securing them in Amelia.

You will not permit any property, particularly British property, to be taken from the island, nor will you admit of any provisions leaving the island upon any pretence, unless for the actual use and supply of such persons as may have leave to depart. the command of one of their own sergeants until the boat returns for them, or some other opportunity offers

of such persons as may have leave to depart.

Yours, very respectfully,

D. B. MITCHELL.

Captain Massias, Commanding United States troops on Amelia.

### From D. B. Mitchell to A. A. Massias.

MILLEDGEVILLE, September 14, 1812.

Sm: I assure you my long silence has not proceeded from any wilful neglect or contempt of your

Sm: I assure you my long silence has not proceeded from any wilful neglect or contempt of your correspondence, or of the subject matter of it, but from a long confinement by a violent attack of bilious fever, and at this moment it is with difficulty I can write.

I am surprised at the importunities of Mr. McIntosh on the subject of duties collected at Fernandina. He has had repeated conversations with me upon the subject, and I have uniformly told him I could not and would not assume any authority over them. When Mr. Lewis, of St. Mary's, acted as collector there, under the authority of General Mathews, all his collections and payments were at his own risk after my arrival, and of this I informed him and Mr. McIntosh both. That the people might not be wholly without law, I consented that you should enforce the customs and modes of proceeding used by the Spanish authority in the place before the transfer to the United States, but I can give no order for the payment of the money in your hands. It must await the fate of the province.

Should any future attempt be made to raise contributions by any authority whatever, you will use all your force to repel it, and, if possible, get hold and place in confinement the author of such an outrage on the American flag. Your idea in regard to the transfer is a very correct one. As long as the American flag is flying there, there is no other power can be acknowledged. I regret the sickness of your detachment and its reduction in number fit for duty. I hope you will not be long in that situation.

I am, sir, very respectfully, and with much esteem, your very obedient servant,

I its reduction in number no for daty. I hope you want have be less servant, I am, sir, very respectfully, and with much esteem, your very obedient servant,

D. B. MITCHELL.

Captain Massias, Commanding for the United States on Amelia Island.

Letters from Governor D. B. Mitchell, and a letter acknowledging the orders given by him in Florida.

MOUNT NEBO, July 1, 1828.

DEAR SIR: Your letter of the 21st of June is now before me, and I with pleasure comply with your request.

Whilst I was acting as commissioner of the United States, in 1812, at the time the troubles prevailed in East Florida, and the United States troops were, for certain purposes, placed under my command, it never was my intention, under the state of things then existing, to permit the exercise of any civil authority by any military officer, and you no doubt recollect my refusing to have anything to do with the regulations prescribed by General Mathews in regard to the collection of duties, &c., &c.; but after the declaration of war, and it was ascertained by the inhabitants that the troops were not likely to be soon removed, they petitioned me to have the laws and regulations enforced by the former Spanish commandant continued and enforced by the United States officer then in command of the post of Fernandina. This I consented to for their convenience and protection, and you, being at that time officer in command, received orders accordingly. As to the power which I had to sissue such an order there can be no doubt. My authority will be found on the records of the Secretary of State's office, and every living soul in Fernandina being under the immediate influence and protection of the arms of the garrison, the safety of the post, as well as the safety of the people, would have justified such an order, if I had chosen to issue it without the call of the inhabitants.

The suit which you speak of can only be considered as vexatious, for if properly defended no recovery can be had. If you or your counsel think proper to take out a commission and examine me as a witness, I will look over my papers with reference to that transaction, and state all I know on the subject. There can be no doubt of your ample justification, provided your conduct was not distinguished by some extraordinary acts of cruelty or oppression, which I presume was not the case.

I am, sir, very respectfully, your obedient humble servant,

D. B. MITCHELL.

Captain A. A. Massias, Paymaster, &c. &c.

Letters and orders from Brigadier General Flournoy, United States army, relating to the command on Amelia.

St. Mary's, December 14, 1812.

Sm: You were requested to furnish a statement embracing the power and authority vested in you, as the immediate commandant of the post at Amelia, from what sources, and from whom derived, and whether contained in written or verbal orders.

You will also render a statement of all moneys collected by virtue of the powers you possess. A full statement of all the circumstances attendant or connected with the detention of certain negroes claimed

by John Forbes & Co. will be expected.

I am well apprised that the smallness of your force on Amelia will not enable you to guard effectually against insurrection in that island, on the part of those attached to the British interest. You will, however, be steady in your discipline, and circumspect in your manner and intercourse with the inhabitants; and should an attempt be made, or contemplated to be made to drive you from your post, and to re-take the island, you are charged to give me the earliest information thereof, in which event I will march a regiment to the island, and put to the point of the bayonet every man however connected in the transaction.

I have the honor to be, with respect,

THO. FLOURNOY, Brigadier General United States Army.

Captain Massias.

## Letter from General Flournoy.

Fernandina, December 20, 1812.

Joseph Jackson having represented that he has business of a private nature to transact at Angustine, to which place be begs leave to go without molestation, it is ordered that he be permitted to depart

accordingly.

Michael Marbrete and others, in confinement for violating an order passed on the 19th November last for the government of this post, will be discharged upon his giving to the commandant (Captain Massias) satisfactory assurances that he will not again attempt a violation of any rule or order that may be imposed, but that he will conform himself to the regulations and encourage others to do so.

All persons free from suspicion of entertaining evil intentions towards the government of the United States will be permitted to visit St. Augustine, or other place in this province, leave being obtained from

the commandant.

THO. FLOURNOY, Brigadier General United States Army.

Extract from orderly book, Amelia Island, East Florida.

#### DETACHMENT ORDERS.

FERNANDINA, Amelia Island, July 12, 1812.

Pursuant to the order of Lieutenant Colonel Thomas A. Smith, of the 1st rifle regiment, commanding the troops of the United States in East Florida, and of this district, Captain Massias, of the rifle regiment, takes command of the detachment stationed at this and the following stations: Point Petre, Georgia, and Camp Pinckney, until further orders; the detail for guard and police will remain as heretofore. Captain Williams, United States marine corps, and Captain Ridgeway, of the United States rifle regiment, will deliver to the commanding officer all papers and orders touching the late command, and will held the measure in readings at a proposed with the detachment redemed to head greater the command. hold themselves in readiness to proceed with the detachment ordered to headquarters.

A. A. MASSIAS, Captain 1st Rifle Regiment, Civil and Military Commandant.

#### DETACHMENT ORDERS.

Fernandina, Amelia Island, East Florida, July 14, 1812.

Until further orders the guard will consist of one subaltern, one sergeant, two corporals, and sixteen men, (or privates,) with two supernumeraries, to be detailed from the whole strength of the detachment, with one non-commissioned officer, and a suitable number of the black prisoners for police duty, the whole to be under the charge of the officer of the day. The two field pieces, with a suitable supply of amunition, will always be in readiness for action at a moment's warning; every evening, at sunset, they will be stationed near the picket, under charge of two sentinels; all sentinels will be posted by the officer of the day, who has charge of the general police of the garrison and town; a non-commissioned officer and two privates will patrol the town, and visit the sentinels every half hour by day and every fifteen minutes by night; the officer of the day will go the grand rounds by day and night twice at least. Corporal Payton Payne, of the 1st rifle regiment, will act as quartermaster sergeant until further orders. The command rayne, of the 1st fine regiment, will act as quartermaster sergeant until further orders. The commanding officer expects vigilance from every one attached to his command; the nature of the service requires it. Every commissioned and non-commissioned officer, musician, and private, are hereby ordered to be under arms in front of the parade and guard station at the third tap of the drum preceding the reveille, which will take place at day-break; they will continue under arms until a man can be perceived at the distance of three hundred yards; they will also be under arms at tattoo every evening. No commissioned officer will be suffered to leave the post without first having permission from the commanding officer, and officer will be suffered to leave the post without first having permission from the commanding officer, and only one from each company or detachment can be absent at one time from his company; only one non-commissioned officer and two privates will be permitted to be absent at any one time, and that for one hour only, leave for this indulgence first having been obtained from the officer who shall command their company or detachment. No non-commissioned officer, musician, or private will be allowed to purchase liquor of any kind from the inhabitants, or from any one, without special permission from the commanding officer. Sergeant Austin, of the marine corps, will proceed with the remainder of Captain Williams's detachment to camp near St. Augustine, and report himself to the commanding officer. Four day's provision and twenty-four rounds of ball-cartridge will be issued to each of this command; they will embark at the battery landing on board of boats procured for their transportation. Signed by order of

A. A. MASSIAS, Capt. U. S. Rifle Regiment, Commanding.

#### PUBLIC NOTICE.

Fernandina, Amelia Island, July 26, 1812.

Pursuant to the order of Colonel Thomas A. Smith, of the United States 1st rifle regiment, commanding in East Florida, and of his excellency David B. Mitchell, governor of the State of Georgia, and commissioner of the United States relating to affairs in East Florida, Captain Massias, of the United States late in the officer states for an arms in East Florida, Capital Massias, of the officer states in the control of the garrison and town of Fernandina and its dependencies until further orders. "With a view to maintain peace and good order among the inhabitants, and that they may not be wholly without law to govern them," the laws and regulations which were in force on the island of Amelia and the town of Fernandina when under Spanish authority are again in force. All those concerned will govern themselves accordingly.

By order of

A. A. MASSIAS.

Capt. U. S. Rifle Regiment, Military and Civil Commandant.

## PUBLIC NOTICE.

Fernandina, Amelia Island, July 31, 1813.

Retailers of liquor will close their shops or taverns at 9 o'clock, (or tattoo,) when the drum will beat through the town; they will keep the same closed and cease to sell liquor until sunrise next morning. They are at all times strictly enjoined, upon pain of being disqualified from the privilege of vending liquor, from selling any liquor an enlisted soldier. Sailors will not be permitted to be on shore after nine o'clock at night, (or drum-beat,) those belonging to the service of the United States under the charge of an officer excepted.

Slaves and people of color will not be allowed to be out of their dwellings after nine o'clock at night, (drum-beat.) The patrol which will go the rounds every quarter of an hour will take up every one who shall not be furnished with a written pass, signed by the master, owner, guardian, or employer, (not a person of color.) The officer of the day will attend to the foregoing orders, and see them carried strictly into effect. All those confined at the guard for the violation thereof will be duly reported daily, at orderly hour, to the commandant, so that all cases may receive due examination and be acted upon without delay.

No vessel whatever, inward or outward bound, United States vessels hoisting the number of the day, as ordered by the commander, at the masthead excepted, will be suffered to pass the batteries without coming to an anchor under the guns of the same, in order that the officer of the guard, whose duty it is

to repair on board, make his examinations and report the same to the commandant.

No boat whatever will leave the harbor without first reporting to the officer of the guard. All row-boats belonging to fishermen and inhabitants will in future, when not in use, be anchored or staked in Front of the battery landing, under the charge of the guard, until required for use by the proper owner. No boat will be allowed to depart, unless in urgent cases, leave first being obtained from the commander, after sunset, and until sunrise, or gun-fire next morning. The commandant is compelled to adopt this measure to prevent smuggling, practiced heretofore to a shameful degree. Any inhabitant desiring a passport, and qualified to receive one, will apply to the commandant, who will grant the same, subject to the same rules heretofore granted by the commandant under Spanish authority, with this difference—no fee will be exacted.

The inhabitants are strictly enjoined to keep and maintain peace and good order. Every one who shall be found violating the same will be dealt with accordingly. All well disposed of the inhabitants are called upon to assist the authority in the fulfilment of the foregoing orders.

#### PUBLIC NOTICE.

Fernandina, Amelia Island, February 1, 1813.

Store and shop keepers of all descriptions are hereby notified that in future a tax of three dollars per Store and shop keepers of all descriptions are hereby notined that in future a tax of three dollars per quarter, payable one quarter in advance, for retailing license, heretofore granted by the Spanish authority, will be again exacted, to take date from the 1st instant. All sums arising therefrom to be applied to the maintenance of the poor, and will be paid over to Philip Young, esq., chairman of the committee for the distribution thereof. Store-keepers will immediately apply to Mr. Samuel Bitts for their licenses, to whom they will pay three dollars as aforesaid, and twenty-five cents for his fee as notary. He will be answerable to the committee for the relief of the poor for all moneys received.

A. A. MASSIAS, Capt. 1st Rifle Reg't, Civil and Military Comd't.

#### PUBLIC NOTICE.

Fernandina, Amelia Island, E. F., February 10, 1813.

To prevent the future recurrence of disputes relating to the right of ground or town lots within the limits of Amelia Island, all those claiming under grant of the King of Spain will present their claims to George Clark, esq., surveyor general for East Florida, who, under Spanish authority, possessed that office, and in possession of the Spanish records relating to claims. He is duly authorized to place each claimant in his or their proper grounds. All those who shall be found occupying grounds not his own will remove to the lot which shall be assigned to him by the surveyor general. He will be respected accordingly.

A. A. MASSIAS,

Creat Let Bide Booth Civil and Miking Comd'the

Capt. 1st Rifle Reg't, Civil and Military Comd't.

#### PUBLIC NOTICE.

FERNANDINA, Amelia Island, E. F., February 16, 1813.

Every proprietor of a town lot is hereby directed to regulate the same as laid out by the surveyor general, and remove all stumps and other obstructions in front of their respective lots without delay. All those who shall be inclined to ornament the town by planting trees in front of their houses are directed to plant them at the distance of eight feet from the front line of their lots. It is also required that the streets and enclosures be kept clean, and that the filth collected be immediately carried to the river, subject to the inspection of the officer of the day. This caution is indispensably necessary to secure the health of the town.

All owners of mules, horses, and hogs, are henceforward forbid allowing their stock to range at liberty within the limits of the town. The commons is found sufficient, and is appropriated for that purpose. A. A. MASSIAS

Capt. 1st Rifle Reg't, Civil and Military Comd't.

I certify that the within is a true copy of all the orders issued by me while in command at Fernandina during the years 1812 and 1813.

A. A. MASSIAS, Paymaster United States Army.

Charleston, December 21, 1831.

Deposition of James Ferguson, esq., relating to the command on Amelia Island.

United States of America, South Carolina District:

Personally appeared before me, Thomas Lee, district judge for South Carolina, James Ferguson, who, being duly sworn, makes oath and says that he was a lieutenant in the 8th infantry United States army, and aide-de-camp to General Thomas Pinckney during the last war; that he accompanied General Pinckney to the town of St. Mary's, in the State of Georgia, in May, 1813; that at the time of his arrival Major, then Captain, Massias was in command of the forces of the United States army at that time occupying Amelia Island, Spanish territory; that General Pinckney visited the town of Fernandina, where those forces were in garrison, and appeared to be satisfied with the conduct of Captain Massias in his command; that this deponent believes that part of East Florida has been occupied by General McIntosh, under the authority of the then governor of Georgia, honorable David Mitchell; and he knows that General Pinckney did not withdraw the troops until he received a commission from the office of the Secretary of the Department of State to treat with the Spanish authorities for the evacuation of East Florida; that this deponent

knows that Captain Massias acted under the orders of General Pinckney from the time he, deponent, reached St. Mary's until he was ordered to deliver up that part of the territory occupied by him to Governor Kindelan, and to return to the command of his company of riflemen stationed at Point Petre. Governor Kindelan, and to return to the command of his company of riflemen stationed at Point Petre. This deponent recollects that Captain Massias had charge of prisoners at Fernandina, but does not recollect to have heard the least intimation of any cruelty, or even harsh treatment having been used towards them, neither does he believe that there had been any; that he had frequent intercourse with the suite of Governor Kindelan, and with Europeans who belonged to the Spanish party, who most probably would have mentioned such conduct had Captain Massias been guilty of it. This deponent remained with General Pinckney in the encampment at Point Petre, three miles below St. Mary's, until the last day of July, 1813, and from what he saw and recollects, believes that General Pinckney was satisfied with the conduct of Captain Massias both in Fernandina and Point Petre; that General Pinckney, not having the services of an adjutant general until the arrival of Colonel J. K. Huger, which was after Captain Massias had evacuated Amelia Island, issued his orders through his aides-de-camp; and this deponent thinks that orders may now be found in General Pinckney's orderly and letter books relating to Cantain thinks that orders may now be found in General Pinckney's orderly and letter books relating to Captain Massias's command on Amelia Island.

JAMES FERGUSON.

Sworn to before me this 7th November, 1831.

THO. LEE, District Judge South Carolina.

Deposition of Archibald Clark, esq., collector at St. Mary's, Georgia, on the subject of command on Amelia

St. Mary's, November 1, 1831.

DEAR SIR: I have to acknowledge the receipt of your letter of the 18th ultimo, with enclosures, and now, in compliance with your request, and from a sense of public duty, proceed to answer the several questions you have propounded to me, and which will be answered to the best of my recollection, knowledge, and belief.

To your first question, whether I did not receive a verdict in favor of a client I represented when you commanded under the—(orders)—meaning the orders issued by Thomas A. Smith, your commanding officer, and subsequently under those received from General Mitchell, governor of Georgia, then acting as commissioner for the United States, I answer yes; and that I knew, at the time, you had been clothed with authority to exercise the powers of a Spanish commandant, which was understood to be both civil and military.

To the second I answer that the period referred to was in 1812 and 1813. I was made acquainted that Thomas Backhouse, an Englishman by birth, and then a resident of Amelia island, had been arrested by one of the vessels of the United States under Commodore Campbell, commanding the flotilla on the St. Mary's station, for a violation, or supposed violation, of the revenue laws, and was confined; but how or in what manner he got himself enlarged I never understood until the extract of General Flournoy's letter which you enclosed was read by me. These orders will speak for themselves.

To the third, what was the general character of Backhouse as far as came to my knowledge, I answer, he was always considered hostile to the United States up to that period, and to its interests.

To the fourth, what was the treatment to him and all others arrested during your command as officer of the post, I answer, and with truth declare, (and I do it with pleasure, because of my frequent visits to Amelia Island during the period of your command, and of the opportunities afforded me to know and estimate your conduct and management,) that it was marked throughout with a rigid regard to render the situation of the prisoners as comfortable as the then state of affairs and circumstances justified, and

with all the humanity that became an honorable and patriot soldier.

The fifth, what was your general conduct, taking all the circumstances into view, is answered in my answer to your fourth question; but did it require more than I have already expressed I would say that

answer to your fourth question; but did it require more than I have already expressed I would say that your conduct was such as gave me, as a citizen of the United States, the most perfect satisfaction.

To your sixth, do I know anything of the confinement of Willis Clark, I answer, I know nothing of my own knowledge. He was imprisoned, as I was then informed and believed, but whether by your authority, after you took command, I cannot at present recollect.

To the seventh, what was the general character of Willis Clark as to sobriety and orderly conduct, I answer that, having at that period no personal acquaintance with the individual named, I can only speak as to general report. If rumor was then true, and judging from my own personal observation, I would say that the conduct of Mr. Clark for sobriety was altogether the reverse of what it ought to have been.

In conclusion it, becomes me to make known that, at the period referred to I resided in St. Mary's

In conclusion it becomes me to make known that at the period referred to I resided in St. Mary's, and from the contiguity of Amelia Island, and my acquaintance with United States officers at that post, I made frequent visits, as well friendly towards the officers as on business; hence the knowledge I have, and which has enabled me to answer the questions propounded by you in the mode and manner I have done.

With sentiments of respect I remain, dear sir, your obedient servant,

ARCH'D CLARK.

Major A. A. Massias, Paymaster, &c.

Archibald Clark, being duly sworn, deposeth and saith that the answers made by him to the several and foregoing questions are just and true, to the best of his knowledge, recollection, and belief.

ARCH'D CLARK.

Sworn to before me this 5th day of November, 1831. J. NEWTON, Chappelle M. council of the town of St. Mary's, Georgia.

## Receipt of John Rodman for \$1,262 09-paid.

SUPERIOR COURT FOR THE EASTERN DISTRICT OF FLORIDA:

THOMAS BACKHOUSE WATERS SMITH AND RICHARD WEIGHTMAN.

Received, at St. Augustine, September 1, 1831, from Thomas Douglass, esq., attorney of the United States for this district, his draft on Major Abraham A. Massias, in my favor, for twelve hundred and sixty-two dollars and nine cents, payable at ten days sight; which draft, when accepted by Major Massias, shall be in full payment for the amount of the judgment in this cause, together with interest thereon and all costs; and on receiving notice of the acceptance of said draft I hereby agree to enter satisfaction on the said judgment, and also on the judgment in this court, in the suit of the said plaintiff against the said Major A. A. Massias.

JOHN RODMAN, Attorney for the Plaintiff.

Abraham A. Massias to the clerk of the court of appeals for the Territory of Florida, Dr.

## LEITERS AND ORDERS FROM THE WAR DEPARTMENT.

DEPARTMENT OF WAR, November 19, 1824.

Sir: I have received your letter of the 12th instant with its enclosures, and in reply to your request six: I have received your letter of the 12th instant with its enclosures, and in reply to your request that instructions be given to the United States district attorney for East Florida to defend the suits commenced against you by Bacus W. Clark and John Caslin, for acts on your part, as you represent, while in the exercise of your functions as commandant at Fernandina, in East Florida, during the late war with Great Britain; I have to state that instructions will accordingly be given to Mr. Macon, United States attorney for East Florida, and in the event of the suits being decided against you in the court below, he will be directed to report the trial to this department and be prepared to carry them up by

below, he will be directed to report the trial to this department and be prepared to carry them up by appeal to the next superior court, should it be deemed proper.

You will be allowed transportation of baggage from Charleston to St. Augustine and back, which you have incurred while attending to the defence of these suits; and whenever it shall become necessary for you to repair to that place for that purpose. The allowance of transportation of baggage from Charleston to this place cannot be made, as you ought to have applied to this department for leave to repair here, when it would have been decided whether your personal attendance here was necessary. The costs which you have already incurred on these suits will be allowed you, should your conduct, on the termination of them appear, as I am now impressed, to have been correct.

I have the honor to be, your obedient servant.

I have the honor to be, your obedient servant.

J. C. CALHOUN.

Major A. A. Massias.

### From the honorable James Barbour, Secretary of War.

DEPARTMENT OF WAR, April 20, 1826.

Sir: Colonel Joseph M. White is employed to aid in the defence of the suits commenced against you in the courts of Florida, and you will possess him with all the particulars in these cases necessary to enable him to make the best defence possible. If Colonel White do not return to Florida in time to be present at the first court, you will take the proper steps to have the hearing of the cases postponed to the next session of the court, or until he can attend.

I have the honor to be your obedient servant,

Honorable P. B. Porter, Secretary of War, to Thomas Ringgold, United States attorney at Tallahassee, East Florida, on the subject of suits pending against A. A. Massias.

DEPARTMENT OF WAR.

Sir: I understand that you are already apprised of the fact of certain suits having been prosecuted against Major A. A. Massias, of the army, for acts of his whilst in command at Amelia island, in the

The enclosed copies of communications to Mr. Douglass and J. Gadsden, esqs., of Charleston, will make you more fully acquainted with the views of the department, and of the obligations which it has assumed of defending the suits.

In accordance with those views, I have to request that you will defend these cases, and carry them

by appeal, if necessary, to the highest tribunal.

The copy of a letter from J. Gadsden, esq., to Major Massias, which is also enclosed, seems to place the subject on the proper footing, and I have only to add that the major, having been harassed for several years by the various proceedings growing out of these cases, it is confidently hoped that they may be soon brought to a favorable termination.

I have the honor to be your obedient servant,

P. B. PORTER.

THOMAS RINGGOLD, Esq., United States Attorney, Tallahassee.

Letters from the Secretaries of War, with instructions to defend the suits in Florida.

DEPARTMENT OF WAR, November 27, \$1827.

Sir: I have received your communication of the 16th instant, covering the copy of a letter from the district attorney of Florida, on the subject of the decision of a suit of Charles W. Clark against you for damages, growing out of acts on your part, as you represent, while in the exercise of your functions as commander at Fernandina, in East Florida, during the late war with Great Britain

A decision being had against you in the lower court, you will take proper measures to have an appeal

made to the next highest tribunal.

I have the honor to be your obedient servant,

JAMES BARBOUR. .

Major A. A. Massias, Charleston, South Carolina.

Department of War, April 21, 1828.

Sir: Being advised by Major A. A. Massias that the suits of Backhouse and Clark against him, which arose out of the performance of duties assigned to him at Amelia island, in the year 1812, have been removed from the court of East Florida to that of your district, I request that you will take charge of the same, making use of the evidence which he may lay before you, and which he deems to be amply sufficient for his protection.

I have the honor to be your obedient servant,

JAMES BARBOUR.

JOHN GADSDEN, Esq., United States District Attorney, Charleston, S. C.

DEPARTMENT OF WAR, November 10, 1831.

Sir: In answer to your letters of September 22 and 26, 1831, I have the honor to state that, in similar cases to that of Major Massias, applicants for relief have latterly been referred by this department to Congress, where necessary laws for such relief have been passed.

This practice I do not think it would be proper for me to interfere with, and I therefore return you

the papers which you forwarded to me.

Very respectfully, I am, sir, your most obedient servant,

LEW. CASS.

VIRGIL MAXCY, Esq., Solicitor of the Treasury.

Letters from Virgil Maxcy, esq., United States Solicitor.

Office of the Solicitor of the Treasury, September 12, 1830.

Sm: Your letter from Philadelphia, with the enclosures, have just been received.

Instructions have heretofore been given to the district attorney at Tallahassee to take the case of Backhouse vs. A. A. Massias up to the Supreme Court of the United States, and also to forward to Mr. Douglass the necessary document, to show that it had been done to prevent further progress in the suits against the securities; and I have to-day written to Mr. Douglass to inform him that these instructions n sent on. I have the honor to be, sir, your most obedient servant, V. MAXCY, Solicitor of the Treasury. have been sent on.

Major A. A. Massias, United States Army, Philadelphia.

P. S.—The papers received with your communication are herewith returned, as requested. vol. iv---104 b

Saratoga Springs, August 2, 1831.

Sir: Your letter of the 18th ultimo has, with its enclosures, been forwarded to me at this place, and I have instructed the United States attorney at St. Augustine to take such steps as may be necessary for ction of your sureties. I am, very respectfully, sir, your most obedient servant, V. MAXCY, Solicitor of the Treasury. the protection of your sureties.

Major A. A. Massias, Charleston.

22d Congress.

No. 500.

[1st Session.

AN INCREASE OF THE NUMBER OF SURGEONS AND ASSISTANT SURGEONS OF THE ARMY RECOMMENDED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 20, 1832.

Documents to accompany the bill H. R. No. 295, to increase the number of the surgeons and assistant surgeons in the army of the United States.

WAR DEPARTMENT, January 7, 1832.

 $D_{EAR}$  Sir: Agreeably to your suggestion that it would not be improper on my part, I enclose herewith a proposed bill for the increase of the medical corps, and the explanatory observations of the Surgeon General, showing the necessity of the measure.

I am, dear sir, respectfully, yours,

LEWIS CASS.

Hon. Thomas H. Benton, Chairman of Military Committee of the Senate.

SURGEON GENERAL'S OFFICE, January 13, 1832.

Sir: In reference to the proposed increase of the surgeons of the army, I have to state that, notwithstanding a very considerable increase of the number of military posts and stations, the number of medical

officers is less now than it has been at any period within the last twenty years.

Under the establishment of 1808, before the late war, there were sixty-nine surgeons and mates; under that of 1815, after the war, there were at first seventy-seven, and subsequently sixty-nine; while under that of 1821, with a trifling, if any, reduction of posts, it was reduced to fifty-three.

Even under the establishment of 1802, with half the force, and probably less than half the number

of stations, there were thirty-three surgeons and mates, and at least double that number is required at present.

On the reduction of the army in 1821 it was distributed to forty military posts and arsenals, including West Point. In January last there were fifty-one; on the 30th of September last there were sixtyfour stations, including the recruiting rendezvous, requiring a surgeon; and, at the same period, there were three surgeons absent in consequence of sickness, and one on furlough, leaving but forty-nine for duty. If every officer of the department were constantly on duty, and but one assigned to a full regiment instead of three, as heretofore allowed by law, there would still be a deficiency of eleven. The amount expended for private physicians, including the recruiting service, during the last three years, has been \$42,578. This, however, is by no means the actual cost to the United States. The mere prescription of medicine is but a small part of an army surgeon's duty; his hospital attendants are selected from the soldiery, and have, for the most part, neither the ability nor inclination to perform the duties required of them, even when they are sober and honest; but, in point of fact, one constant source of complaint from almost every surgeon is, that he can obtain but very few who possess either of these essential qualifications, so that it requires his repeated instructions, as well as his personal attendance, to secure even a reasonable share of attention to his patients by day and by night, and still greater vigilance to preserve the public property under his charge from waste and peculation; and even with the greatest exertions of the best surgeons, these things constitute an essential item in the estimate of the expenses of the department, and of the average bills of mortality.

In 1829 the surgeon at Oglethorpe barracks was taken sick about the first of August, and a citizen and personal friends, and by the officer who employed him, and has given ample evidence of his qualifications. The number present in August was ninety-five, and in October sixty-one; and the number of deaths reported for the quarter was twenty-three, being nearly one-half of those in the whole army for the same period. The chief cause assigned by the physicians for this mortality was the intemperance of his convalescents; and this was, no doubt, indulged at the public expense, as the extra bills for hospital stores convalescents; and this was, no doubt, indulged at the public expense, as the extra bins for hospital stories during this short period was seventy-five per cent. more than the amount paid for the whole annual supply for the station, furnished on the requisition of the surgeon. This is, of course, a strong case, but it differs only in degree from the great majority where private physicians are employed; so that an attempt to enforce accountability for public property at such posts has been found perfectly idle, there being no practicable means of securing an indemnity for losses, except the stoppage of the pittance of pay that may be due at the expiration of the service of the citizen employed, while he very reasonably contends

that he cannot be held responsible for property which, from the nature of the case, must be at the disposal

of pursers and soldiers, over whom he has no authority or control. But in consequence of the position of many of the military posts, especially in the south and west, it is often impossible to obtain a private physician, while it requires several months to send an army surgeon from another station where one can be had to supply his place. At least two efficient surgeons are now required at Cantonment Gibson, but the application of the present surgeon can only be complied are now required at Cantonment Gibson, but the application of the present surgeon can only be complied with by hiring private physicians at other posts from which the army surgeons must be sent. The sickness or death of a surgeon at many stations, as those on the Upper Mississippi, the Missouri, and the upper lakes, would, especially in the winter, leave the post without medical aid, as has been the case at Fort Snelling, and would have been recently at Tampa Bay, but for the accidental arrival of a citizen with a detachment of recruits. It is, therefore, believed that the public service actually requires an increase of the surgeons and assistant surgeons of the army, as it has been distributed for some years past; and that, in point of fact, such increase will not, on the whole, be attended with any material increase of expense to the government.

Very respectfully, your obedient servant,

JOS. LOVELL, Surgeon General.

Hon. Lewis Cass, Secretary of War.

22d Congress.]

No. 501.

1st Session.

#### COMPROMISE OF TITLE TO ISLAND ON WHICH FORT DELAWARE STANDS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 20, 1832.

Washington, January 20, 1832.

I respectfully invite the attention of Congress to the propriety of compromising the title of the island on which Fort Delaware stands in the manner pointed out by the accompanying report from the War Department. This subject was presented to Congress during its last session, but for want of time, it is believed, did not receive its action.

ANDREW JACKSON.

DEPARTMENT OF WAR, February 18, 1831.

Sir: The island below New Castle, upon which Fort Delaware is situated, is held by the United States under a cession by the State of Delaware. A citizen of New York, Dr. Henry Gale, alleges the

title to be in him by virtue of a grant of New Jersey, and of subsequent purchases made under that grant. The agent of Dr. Gale has proposed to surrender to the United States for the sum of \$17,000, subject to an examination as to the strength and validity of his title.

The United States having expended large sums in the construction of Fort Delaware, it is not proper that the right of property should be at all questionable.

I present to you explain the sum of \$17,000, subject to an examination as to the strength and validity of his title.

I present to you copies of an agreement entered into with the agent, and propose that authority be given by Congress to have the title inquired into, and, if ascertained to be defective, then to be compromised upon the terms stated in the agreement, for which purpose an appropriation will be necessary.

Very respectfully,

J. H. EATON.

The President of the United States.

It is agreed by James Latounette, agent and attorney in fact of Henry Gale, on the one part, and John H. Eaton, Secretary of War, of the other part, for and on behalf of the United States, as follows:

The United States are possessed of an island, on which is constructed Fort Delaware, situated about seven miles below New Castle, in the State of Delaware, which island is claimed by Henry Gale.

James Latounette, being agent and specially authorized to dispose of said island, proposes, and it is agreed to:

That the United States government may examine into said title, and, on being satisfied that the right and claim of said Gale is a valid one, shall pay the sum of seventeen thousand dollars.

And, on payment of said amount, said agent covenants and agrees to and with the said Eaton to convey the whole of said island, by good and sufficient title, to the United States.

This agreement to be submitted to Congress, and to be binding on the United States, if Congress shall well a proportion and the title row held be ascentained to be defective.

shall make the appropriation, and the title now held be ascertained to be defective.

Executed this 18th February, 1831.

JOHN H. EATON, Secretary of War. JAMES LATOUNÉTTE, Attorney for Henry Gale.

Witness: LAW. L. V. KLEECK.

22D Congress.]

1st Session.

#### ORGANIZATION AND ALLOWANCES TO THE TOPOGRAPHICAL ENGINEERS OF THE ARMY.

COMMUNICATED TO THE SENATE JANUARY 20, 1832.

Department of War, January 20, 1832.

Sir: In answer to your note of yesterday, I have the honor to observe that it appears to me inexpedient to make a permanent allowance of forage to the captains of the topographical corps. A portion of the year only can be occupied by these officers in the labors of the field, because the winter is unfavorable to their operations, and also because much time must be devoted to the preparation of their returns. During this period the public service does not require them to keep horses, and even (which is somewhat doubtful) should their duties while in the field require them at all times to be mounted, it would be more

doubtful) should their duties while in the neid require them at all times to be mounted, it would be more economical, agreeably to the present practice, to allow the necessary expense for this object from the contingent appropriation for surveys than to make a permanent allowance of forage.

I doubt, also, the expediency of limiting the executive discretion in the selection of officers for this corps. I think it should be left, as it was in the ordnance bill, without any statutory restriction. The just rights of the army will certainly not be neglected in filling the appointments created by this law. But there is a class of meritorious officers who have been associated and doing duty with the topographic learns (that of civil presidence) from which it was the proportion of the results and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law and Law an

graphical corps, (that of civil engineers,) from which it may be proper to make selections, and I should regret to see them wholly excluded by this provision.

I would also suggest the propriety of increasing the number of captains from eight to ten, and of reducing the second lieutenants from twenty to ten. It is an important object to have officers qualified to take charge of the surveys, and this we can only expect in the higher grades. The subalterns of the corps must act as assistants till they acquire the necessary practical knowledge. I think ten first and ten second lieutenants will be sufficient in the present state of the service for all the duties required of officers of those grades. And a reduction in the expense of \$5,528, according to the present laws, or of \$5,352 in the event of the passage of the bill in the House of Representatives regulating the pay of the army, will follow from this change.

I have the honor to be, very respectfully, your obedient servant,

LEWIS CASS.

Hon, THOMAS H. BENTON, Chairman of the Military Committee, Senate.

Difference between the topographical engineers as now existing and as proposed to be organized.

The present number of topographical engineers authorized by law is ten, namely, six majors and four captains. To these are to be added the civil engineers employed under the law of April, 1824, say seven, making the whole number of topographical engineers and of civil engineers acting as topographical engineers seventeen.

The annual expense of the present system, as just represented, is as follows:

For the topographical engineers	\$13,916 13,500
Total for one year	27,416

which, divided by seventeen, the number of officers, gives for the average yearly cost of each officer about sixteen hundred and thirteen dollars.

The proposed bill provides for one colonel, one lieutenant colonel, two majors, ten captains, and ten first lieutenants—in all twenty-four officers.

The annual expenditure under this bill will be about \$23,250, which amount, divided by the number

of officers it provides for, gives for the average annual cost of each officer about \$970.

A comparison of the two systems furnishes in favor of the bill proposed an aggregate annual saving of about four thousand dollars, an actual gain in the services of seven additional engineers, and an annual saving in the average annual cost of each engineer of between five and six hundred dollars, and furnishing also an efficiently and well-organized body of officers.

TOPOGRAPHICAL BUREAU, March 7, 1832.

Sir: Allow me to make a correction in the estimates and statements of differences which I handed to you on Monday. Having gone over the same with care in the office, I find it as follows:

The statement about the present topographical engineers and civil engineers acting as topographical engineers is correct, namely:

Topographical engineers	\$13,916 13,500
Cost per annum	27,416

Total number, 17; average cost, \$1,612.

Proposed corps to be paid at the same rates as officers of the present corps of engineers.

One colonel, one lieutenant colonel, two majors, ten captains, and ten first lieutenants will cost per annum \$24,300. Total number, 24 officers, occasioning—

1st. Aggregate saving annually, \$3,116.

2d. A gain of seven engineers.

3d. Average cost of each engineer by the proposed bill, \$1,012.

4th. Average gain per officer, \$600.

.The small errors, now corrected, arose from using the rates of the late bill reported in the House of Representatives generalizing the pay of officers, instead of the rates paid to the corps of engineers.

Believe me to be, with great respect, sir, your obedient servant,

J. J. ABERT.

Hon. Thomas H. Benton.

22d Congress.]

No. 503.

[1st Session.

ON THE EXPEDIENCY OF ESTABLISHING ARSENALS IN ALABAMA AND FLORIDA.

COMMUNICATED TO THE SENATE JANUARY 20, 1832.

DEPARTMENT OF WAR, January 20, 1832.

Sir: I have the honor to transmit herewith the report of the Colonel of Ordnance, upon the subject of establishing an arsenal in Florida, and another in the northern part of the State of Alabama.

Very respectfully, your obedient servant,

LEWIS CASS.

Hon. Thos. H. Benton, Chairman Military Committee, Senate of the United States.

Ordnance Office, Washington, January 19, 1832.

Sir: In answer to the resolution of the Senate, "inquiring into the propriety of establishing an arsenal in Florida, and another in the northern part of the State of Alabama," referred to this department, I have the honor to report:

That no application having heretofore been made either by the legislature of Alabama, or by any of her delegation in Congress, for the location of an arsenal in the northern part of that State, nor any exploration made by officers of this department with a view to the location of such an establishment, this department is not, therefore, prepared at present to express an opinion, whether an arsenal is necessary in that part of the State expressed in the resolution. If it shall be required, an officer can be directed to make the necessary exploration during the ensuing summer, and his report on this subject can be submitted for your decision before the meeting of Congress at its next session.

In relation to the necessity for the establishment of an arsenal in Florida, this department has no hesitation in expressing a decided opinion. The situation of this Territory, both with regard to its peculiar geographical position and the character of its population, warrants the establishment of an arsenal near the river Apalachicola, which stream possesses the advantage of a steamboat navigation for a considerable distance into the interior of the States of Alabama and Georgia. In a state of war, the necessity for this establishment becomes more evident, as the two nearest arsenals on which dependence must be placed for the necessary supplies of ordnance, small arms, and military stores for this Territory, are those at Augusta, on the Savannah river, and Mount Vernon, on the west bank of Mobile river, Alabama, which are too remotely situated to afford, with the necessary promptitude, such arms and munitions of war as might be required by the forts on the seaboard of Florida, or by an army operating in the field.

The arsenal at Augusta is situated about two hundred and sixty-nine miles from the junction of the Flint and Chattachoochee rivers, and it would ordinarily require about thirteen and a half days for military supplies to reach the Territory. From the Mount Vernon arsenal to the same point is about the same distan

and chattachoochee rivers, and it would ordinarily require about thirteen and a hair days for military supplies to reach the Territory. From the Mount Vernon arsenal to the same point is about the same distance, and the roads through this part of the country are, with little exception, of the same character. About the same length of time would therefore be required for the transportation of military stores from the Mount Vernon arsenal to the forks of the Apalachicola. From these facts, therefore, it would appear that, in the event of sudden commotion within or incursion from without the Territory, reliance for a prompt supply of arms and military stores cannot be placed on either of these arsenals; and on a recent occasion of a disturbance amongst the Indians, (Seminoles,) in the peninsula of Florida, much alarm was excited at the seat of government, (Tallahassee,) because of the fact of there being no deposit of small arms and ammunition within the Territory; and when a supply of small arms did arrive, they were soon lost or destroyed, by reason of

the Territory; and when a supply of small arms did arrive, they were soon lost or destroyed, by reason of there being no suitable persons to take care of them, and no proper place of deposit.

I have not hesitated to express a decided opinion in relation to that part of the resolution of the Senate which relates to Florida, because an exploration of this Territory has been made the preceding summer, by an officer of this department, expressly with a view to the location of an arsenal at some suitable point in Middle Florida. This exploration was made by order of the Secretary of War, at the earnest solicitations of the delegate in Congress from that Territory, and also in consequence of a memorial addressed to the Senate and House of Representatives of the United States, signed by several hundred of the most respectable citizens of Florida, praying for the establishment of an arsenal.

In concluding this communication, I would respectfully recommend that, for the establishment of an arsenal in Florida, the sum of \$20,000 be asked for the purchase of the site and the commencement of the necessary buildings.

necessary buildings.

I have the honor to be, sir, respectfully, your obedient servant, GEO. BOMFORD, Brevet Colonel, on Ordnance Service.

In the Legislative Council of Florida, January 30, 1832.

Be it resolved, That our delegate in Congress be requested to urge the passage of a law to establish an arsenal in this Territory as a measure highly important to the peace and safety of the country.

Resolved, further, That his excellency the governor be requested to transmit this resolution to the

delegate by the next mail.

I certify the foregoing to be true copies from the resolutions delivered to me from the council.

JAMES D. WESTCOTT, Jr., Secretary and Acting Governor of Florida. JANUARY 31, 1832.

22D CONGRESS.]

No. 504.

1st Session.

ON CLAIM OF AN OFFICER OF THE ARMY FOR AN ALLOWANCE FOR QUARTERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 21, 1832.

Quartermaster General's Office, January 17, 1832.

Sm: In compliance with your request, I send you enclosed a copy of my answer of the 10th instant to your inquiries relative to the claim of Lieutenant Harvey Brown for rent of quarters at St. Augustine. I have the honor to be, sir, your most obedient servant,

T. CROSS, Major and Acting Quartermaster General.

Colonel William Drayton, Chairman of Military Committee, House of Representatives.

## Quartermaster General's Office, January 10, 1832.

Sir: Your note of the 4th instant, enclosing the memorial of Lieutenant Harvey Brown, for rent of quarters while stationed at St. Augustine, and requesting to be informed "whether the account presented is correctly stated, and whether there be any other objection to its payment than that which is mentioned in the memorial," has been received by me, in the absence of the Quartermaster General. In reply to your inquiries, I have the honor to furnish herewith a copy of the correspondence which occurred on the subject between Lieutenant Brown and the Quartermaster General, together with the final remarks of the latter, and the decision of the Secretary of War on the case; and to observe that, if Lieutenant Brown be entitled to the allowance for the whole time, the account presented is correctly stated, the rate charged being reasonable. If, however, the claim should be adjusted on the principle suggested by the Quarter-master General, the time charged for would be curtailed seventeen months—leaving seventeen months and eighteen days to be paid for.

and eighteen days to be paid for.

Lieutenant Brown having stated in his memorial "that he reported the case from time to time to the Quartermaster General, and solicited to be permitted to so fit up the public quarters as to render them habitable," it is proper for me to remark that no such solicitation, or any suggestion to that effect, is to be found in Lieutenant Brown's letters; nor does it appear from the letters addressed to him by the Quartermaster General that any such application was made to this office and denied. The only repairs of consequence recommended by Lieutenant Brown, during the period comprehended in his claim, was a thorough painting of St. Francis barracks, which was immediately authorized and effected. The improvement necessary to have rendered the quarters amply sufficient for the accommodation of all the officers at the post, was the erection of four additional chimneys to rooms without fire-places.

I am, sir, respectfully, your obedient servant, &c.

How William Drayton, Chairman of Military Committee House of Representatives

Hon. WILLIAM DRAYTON, Chairman of Military Committee, House of Representatives.

A true copy from the records of this office.

THOMAS F. HUNT, Captain and Assistant Quartermaster.

QUARTERMASTER GENERAL'S OFFICE, January 17, 1832.

[Extract]

FORT MARION, July 4, 1826.

"General: I have made a charge in my account for quarters, which I hope will be allowed me, as I am under the necessity of living out of the barracks, in consequence of there being no rooms suitable for my family. It is true, I have resided out of the barracks ever since I have been at the post, and have not charged for quarters; but I was then doing company duty, and thought, therefore, that I was not entitled to my quarters out of the barracks. As I am now entitled to a kitchen, as well as a room, and there being none at the barracks, I hope you will consider my claim as equitable.

"I have the honor to be, &c.,

"HARVEY BROWN, Assistant Quartermaster."

Extract of a letter from the Quartermaster General to Lieutenant Harvey Brown, assistant quartermaster at St. Augustine, Florida, dated August 21, 1826.

"The charge for quarters cannot be allowed, for the reason that there are sufficient quarters at the fort. If we enforce the regulations in regard to other officers, we must observe them ourselves; besides, the indispensable expenditure on account of quarters during the present year will exceed the sum appropriated by Congress for that object."

#### [Extract.]

St. Augustine, September 20, 1826.

"General: I hope, sir, you will reconsider your decision as it respects my quarters; for, admitting the rooms at the fort were suitable for me to reside in, (which they are not,) still I could not occupy them, for they are now all, but one or two which leak, occupied, viz: two by the marshal, two by the sheriff, two as a magazine, two as ordnance stores, and one as commissary storeroom. It is true that, at the barracks, there are two rooms that I might occupy, but neither of them has a fire-place, and there is no kitchen unoccupied; so that it is impossible for me to live there, and I have necessarily to be at the expense of a house in the town.

"I have the honor, &c.,

"HARVEY BROWN, Assistant Quartermaster."

Brigadier General Jesup, Quartermaster General.

Occupied, as the quarters appear to have been, by civil officers, under the authority of the War Department, I should think Lieutenant Brown equitably entitled to quarters during the winter months. THOMAS S. JESUP, Quartermaster General.

Nore.—By winter months I mean those months for which the greater allowance of fuel is drawn, viz: from the 1st of November to the 30th of April.

T. S. J.

Disapproved the above.

J. H. EATON.

Extract from the Quartermaster General's letter to Lieutenant Harvey Brown, assistant quartermaster at St. Augustine, Florida, dated November 10, 1826.

"In reply to that part of your letter of the 20th of September, relating to quarters for yourself, I have to inform you that it is impossible to reverse the decision already made. To enable me to enforce the regulations where regimental and company officers are concerned, it is necessary that I should enforce them strictly in regard to the officers of the Quartermaster's department. There are, every year, so many more officers placed on detached duty than are included in the estimate, that it requires the most rigid application of the regulations to keep the expenditure on account of rent of quarters within the appropriation. This year, notwithstanding all claims such as yours have been rejected, that item has been considerably overdrawn."

WAR DEPARTMENT, April 21, 1829.

Harvey Brown, assistant quartermaster, claims for quarters, from July, 1826, to this time; his station

being at St. Augustine. The claim is disallowed:

1st. Because, by regulation of 1830, quartermasters are required to keep the public quarters in tenantable order. There being public quarters at St. Augustine, Captain Brown should have occupied them; and if not in repair, should so have reported, that orders to place them in repair might have been

2d. Captain Brown, on application to the Quartermaster General, was as early as the 21st of August, and afterwards on the 10th of November, 1826, informed that he could not be allowed compensation for

J. H. EATON.

22d Congress.]

Officers of the line employed in the staff and on other detached service.

The western department comprises all west of a line drawn from the southernmost point of East Florida to the northwest extremity of Lake Superior, taking in the whole of Tennessee and Kentucky; and the eastern department all east of such line, including Fort Winnebago.

The headquarters of the general-in-chief are in the District of Columbia.

The headquarters of the western department are at Memphis, Tennessee.

The headquarters of the eastern department are in the city of New York.

Those officers whose stations are changed by transfers and promotions will report for duty accordingly.

By order:

22d Congress.]

No. 506.

[1st Session.

APPLICATION OF CERTAIN OFFICERS OF THE ARMY THAT THE PAY OF SURGEONS AND ASSISTANT SURGEONS BE INCREASED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 30, 1832.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The undersigned officers of the army of the United States, deeply impressed with a sense of the value and importance of the services of the medical staff, and impelled by the friendly interest which the peculiar nature of their duties so naturally awakens in our minds, respectfully beg leave to make to your honorable body such representation in their behalf as we believe to be in consonance with the attributes of justice, and therefore best calculated to insure, on the part of your honorable body, the most

butes of justice, and therefore best calculated to insure, on the part of your honorable body, the most favorable consideration touching their present condition.

It is one of the cardinal principles flowing from the form of our government and resulting from the genius of our institutions that the rate of compensation shall always be in a direct ratio to the value of the services rendered; and, taking this principle for our guide, we believe it may be safely averred that the medical staff of the army labor under peculiar disadvantages, and that, independent of certain oppressive disabilities incidentally connected with the tenure of their appointment as medical officers, a spirit of justice calls for further legislative provision with reference to their pay and emoluments. It is not our design to touch upon details or to anticipate that liberal spirit which has ever influenced your honorable body by proposing any specific increase of compensation.

All the information necessary on the subject of the relative emoluments of the several branches of the army is presumed to be in the possession of your honorable body, but we should not do justice to the

All the information necessary on the subject of the relative emoluments of the several branches of the army is presumed to be in the possession of your honorable body, but we should not do justice to the subject did we fail to present for consideration some facts of primary importance, which we would fain hope may not fail to sustain our petition and induce your acquiescence. We regard it a leading defect of the present system of the organization of the medical staff that the same services are rendered by all its members; that they severally incur the same responsibilities, but receive unequal amounts of pay, &c.; that there is an absence of that great stimulus of human exertion, the prospect of bettering their condition by a graduated increase of emoluments, having reference to length of service, a defect which is found in no other branch of the service, and which is believed to be seriously detrimental to its best interest. It is to be presumed, from the vital importance to the efficiency of the army which results from the employment of the talented and well-educated members of the medical profession, that, in the legislative provision made for their support, there would be found sufficient inducement to retain them permalative provision made for their support, there would be found sufficient inducement to retain them permanently in service. Yet from the inadequacy of the compensation, with reference to their real necessities, the disproportionate rate of compensation between themselves and officers of assimilated rank, but more especially to the lucrative practice of the profession in civil life, it follows that resignations are, for the most part, confined to that class which is best calculated to give efficiency to the service and respectability to the medical profession.

Åmong the regulations which have been deemed necessary for the government of the medical staff, Among the regulations which have been deemed necessary for the government of the medical stair, there are a number which are singularly oppressive, and from the operation of which all other branches of the service are exempted. From their limited number they are subject to do duty even when under "arrest;" they cannot receive the indulgence of a furlough unless they provide a substitute to discharge their duties, except by the special sanction of the Secretary of War, and are, moreover, debarred the advantages of private practice, subject to the same restrictions.

We therefore pray that their compensation may be placed on such a footing as your honorable body.

on consideration of the subject, may deem correspondent to their services.

ent to their services.

JOHN STUART, Captain 7th Infantry.
J. L. DAWSON, 1st Lieutenant 7th Infantry.
J. WEST, Lieutenant 7th Infantry.

IST SESSION.

ON THE CONSTRUCTION OF A MILITARY ROAD FROM GREEN BAY TO PRAIRIE DU CHIEN, IN MICHIGAN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 31, 1832.

DEPARTMENT OF WAR, January 28, 1832.

SIR: Since my report of the 3d instant, relative to a road from Green Bay to Prairie du Chien, the enclosed communication has been received at the department, and is now transmitted, in further compliance with the resolution of the House of Representatives of the 22d ultimo.

I have the honor to be, very respectfully, your obedient servant,

LEW. CASS.

Sir: The undersigned officers of the United States army, stationed at Fort Winnebago, near the Fox and Wisconsin rivers, taking into consideration the great difficulties which exist at all times in the navigation of these rivers, and more particularly at low stages of water, and at the close of the season, as the fall supplies do not arrive either at Green Bay or Prairie du Chien in sufficient season to be transported up either of the rivers in boats, owing, as before stated, to the natural obstruction to navigation, are induced to trespass upon the honorable Secretary this representation, with a view of inviting the attention of the honorable representatives of the United States Congress to take into consideration the propriety of or the honorable representatives of the United States Congress to take into consideration the propriety of making an appropriation of a few thousand dollars for the purpose of repairing a road from Green Bay to a place called the Blue Mounds, in the Territory of Michigan, a distance of about 160 or 170 miles. A great proportion of this road requiring not the improvement of art, it being over a smooth and dry prairie country, the labor would be principally in the erection of a few short bridges, and making causeways over a few narrow swampy places. The undersigned are further influenced in making this appeal in the belief that facilities are necessary to be given for the transmission of military supplies, and also for the belief that facilities are necessary to be given for the transmission of military supplies, and also for the purpose of keeping up a lively intercourse between the military posts on this northwestern border.

J. H. PLYMPTON, Captain 5th Infantry.

L. ABBOTT, Assistant Surgeon U. S. Army.

A. J. CARTER, Lieutenant 5th Infantry.

THOS W. McBLANE, 2d Lieutenant 5th Infantry.

D. PERKINS, Lieutenant 5th Infantry.

H. P. VANCLEVE, 2d Lieutenant 5th Infantry.

G. LAW, Captain 5th Infantry.

A. JOHNSTON, Lieutenant 5th Infantry.

E. M. LACY, Lieutenant 5th Infantry.

C. C. DAVIES, 2d Lieutenant 5th Infantry.

Hon. Lewis Cass. Secretary of War.

Hon. Lewis Cass, Secretary of War.

22d Congress.

No. 508.

[1st Session.

ON AN APPEAL BY AN OFFICER OF THE ARMY FROM THE JUDGMENT OF A COURT-MARTIAL.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 4, 1832.

Mr. Drayton, from the Committee on Military Affairs, to whom the memorial and remonstrance of Lieutenant Colonel Woolley were referred, reported:

The memorialist states, inter alia, "that he held the rank of lieutenant colonel in the army, and is advised that he still holds the same, as will appear by a report of Major General Gaines, commanding the western department." That "the law of 1806, for establishing rules and articles for the government of western department." That "the law of 1806, for establishing rules and articles for the government of the armies of the United States, after enumerating all the offences meriting a separate specification, and annexing to each the penalty due to them, declares, by a sweeping clause, 'that all crimes not capital, and all disorders and neglects which officers and soldiers may be guilty of to the prejudice of good order and military discipline, though not mentioned in the articles of war, are to be taken cognizance of by a general or regimental court-martial, according to the nature and degree of the offence, and be punished at their discretion.'" That "he has been tried by a court-martial for punishing a soldier under a charge of conduct subversive of good order and m litary discipline;" that "the court found the fact of punishing with a few lashes, but, urged by the consideration that the act was the consequence of a precipitate temper, recommended his case to the clemency of the President, who, notwithstanding, insists on his dismissal from service." That "the act for which this excessive punishment was inflicted is not specified in the law as an offence;" that "it was formerly enjoined by the law as one of the means to be used in maintaining military discipline." That "subsequent enactments having withdrawn the injunction, but not forbidden the act, it is therefore a crime not known to the military law." And the memorialist believes that his case is "the first instance on record where the discretionary power given to a court-martial by the 99th article for the punishment of minor offences has been extended to the highest grade of punishment, and for an offence not known to the military law as a crime;" and he insists that, if it be thus extended, "the 99th article is manifestly unconstitutional." The memorialist further states, that "he would have endured his sentence in silence, had the ceremonials of the law been observed;" but he "avers that have endured his sentence in silence, had the ceremonials of the law been observed;" but he "avers that the court which sat in judgment upon him had no legal existence; and being driven to his appeal, he calls on Congress, with whom the conservation of constitutional law abides, to shield him from arbitrary will, the action of an incompetent tribunal, wholly astray from the legal exercise of sound discretion, and by which he is to be made the victim of cruel policy, (not followed up, but wholly departed from in subsequent cases); and which he solemnly avers is viewed by officers of high rank in the army as an act of monstrous injustice."

Annexed to the memorial is a letter written by Major General Gaines to the Secretary of War, in which he says, that "among the apparent errors which have occurred in the detail and proceedings of general courts-martial, he deems it proper to refer to those in the cases of Colonel Chambers and Lieutenant Colonel Woolley." The errors, as they apply to Lieutenant Colonel Woolley, are thus specified: He was tried by seven officers, four of whom were junior to him in rank, "whereas the 64th article of war requires that a general court-martial for the trial of an officer 'shall not consist of less than thirteen, where that number can be convened without manifest injury to the service.' The '75th article of war requires 'that no officer shall be tried but by a general court-martial nor by officers of inferior rank, if it can be avoided.'" officer shall be tried but by a general court-martial, nor by officers of inferior rank, if it can be avoided."

It seems that the commanding general stated, (in Colonel Woolley's case,) "that a greater number than the order designated could not be assembled without prejudice to the service. The word prejudice is by no means equal in its force and obligation to the words of the law, viz: manifest injury." General Gaines also alleges, that "a view of the monthly returns, at the period when trial was ordered, will show that the court could have been as full as the law required." The committee will not transcribe the reasonings which are relied upon by General Gaines, to invalidate the proceedings in the case of Lieutenant Colonel Woolley, as they may be seen at least to invalidate the proceedings in the case of Lieutenant Colonel Woolley, as they may be seen at length in his letter. The conclusion at which General Gaines arrives is, that, "in point of law, if not in point of fact, Lieutenant Colonel Woolley is, at this moment, an officer of the army; the proceedings against him, having been contrary to law, are void, or they are voidable, by the lawful interposition of the President of the United States.

It appears by the proceedings of a general court-martial held at Jefferson barracks on the 1st of March, 1829, that the memorialist was arraigned before it, and pleaded in bar to its jurisdiction, upon the ground that the court consisted of only seven officers, whereas by law there should not have been less than thirteen, when that number could be convened without manifest injury to the service. This plea being overruled, the memorialist pleaded not guilty. The charges, with their specifications, the sentence of the court, the confirmation of the sentence by the President, and his final order in the case, are all set forth in the following document:

General order announcing the decision of the general court-martial in Lieut, Colonel Woolley's case, May 1, 1829.

#### ORDER NO. 28.

Adjutant General's Office, Washington, May 1, 1829.

I. At a general court-martial, of which Colonel D. L. Clinch, of the fourth regiment of infantry, was president, held at Jefferson barracks, in the State of Missouri, on the 14th of March, 1829, by virtue of "order No. 3," emanating from the headquarters of the western department, Lieutenant Colonel A. R. Woolley, of the 6th regiment of infantry, was arraigned upon the under-mentioned charges, to wit:

#### CHARGE I.

"Conduct subversive of good order and military discipline."

Specification: In this: that he, the said Lieutenant Colonel A. R. Woolley, of the 6th regiment United States infantry, while commanding the regiment in question, did punish, with stripes and lashes, Private Thomas Powell, of company "D," of the regiment aforesaid; the punishment so administered being of such extreme severity as to have disabled the said Thomas Powell from the performance of his duty for the period of nine days. This at Jefferson barracks, in the State of Missouri, on or about the 12th day of December, 1828.

### CHARGE II.

## " Conduct unbecoming an officer and a gentleman."

Specification 1st.—In this: that he, the said Lieutenant Colonel A. R. Woolley, did, in his quarters at Jefferson barracks, Missouri, on or about the 22d day of November, 1828, and without any or adequate provocation, point his finger in an angry and threatening manner towards Captain J. Gantt, of the 6th regiment of infantry, then under his command. This whilst conversing on his, Captain Gantt's, official duties, in the presence of Captain B. Riley, of the aforementioned regiment, of Robert Stewart, a citizen, and of captain gant of the 6th infantry.

and of enlisted soldiers of the 6th infantry.

Specification 2d.—In this: that the aforesaid Lieutenant Colonel A. R. Woolley did, at Jefferson barracks, Missouri, on or about the 22d day of November, 1828, and without any or adequate provocation, address rude and ungentlemanly language to Captain John Gantt, an officer under his command, in terms as follows: "You have behaved ungentlemanly, sir." "You have made a false report, sir." "You have stated a falsehood in that note, sir." "You have wilfully and intentionally stated what you know to be false, sir." This in the presence of Captain B. Riley, 6th infantry, of Robert Stewart, a citizen, and of enlisted soldiers of the 6th infantry.

Specification 3d.—In this: that he, the said Lieutenant Colonel A. R. Woolley, while at Jefferson barracks, Missouri, and on or about the 22d day of November, 1828, did, through the medium of a malignant and highly colored charge, procure the trial, by general court-martial held at Jefferson barracks under orders of December 15, 1828, of Captain John Gantt, an officer of his command.

Specification 4th.—In this: that he, the said Lieutenant Colonel A. R. Woolley, having received from

Captain Gantt, an officer under his command, a report alleging a failure in the issue of provisions to his, the said Captain Gantt's company, on or about the 28th day of October, 1828, did address to him rude and ungentlemanly language in a conversation touching that report, in words as follows: "You, sir, have and ungentiemanly language in a conversation touching that report, in words as follows: "I'vu, sir, nave since your last return to duty attempted to give the commanding officer as much trouble as you could." "I will attend to your report, not to gratify you, but to satisfy myself, for I know it is not true." "You are too much in the habit of making reports of this kind." "I have discovered your drift." "I see you have a captain flapping at your elbow to push you on against me." "Go ahead, sir, you cannot run against the commanding officer long." This in a loud and angry voice, and with corresponding gestures, at Jefferson barracks, in the State of Missouri, on or about the 24th day of October, 1828, and in the presence of Captain Thomas Noel, of the 6th regiment.

Specification 5th — In this, that he the said Lieutenant Colonel A. R. Woolley at Jefferson barracks, on or

Specification 5th.—In this: that he, the said Lieutenant Colonel A. R. Woolley, at Jefferson barracks, on or about the 10th day of October, 1828, while commanding officer of the 6th infantry, and president of a general court-martial in session at Jefferson barracks, on or about the 10th day of October, 1828, did, then and there, and during the session of the court, address to its judge advocate, Second Lieutenant A. S. Johnston, of the 6th infantry, rude and ungentlemanly language, in terms as follows: "I see the mulish curl of your lip." "I have seen through the whole of this trial a disposition on your part to delay the proceedings of this court." "I have discovered your stubbornness."

Specification 6th.—In this: that he, the said Lieutenant Colonel A. R. Woolley, at Jefferson barracks, on or about the 10th day of October 1828, while commanding officer of the 6th infantry, and president of

on or about the 10th day of October, 1828, while commanding officer of the 6th infantry, and president of

a general court-martial in session at Jefferson barracks on or about the 10th day of October, 1828, did, then and there, and during the session of the court, address to First Lieutenant M. W. Bateman, of the 6th infantry, and a member of the aforesaid general court-martial, rude and ungentlemanly language, in words as follows: "Sir, if you ever give testimony against me I'll pull you up to the bull-ring." "I'll search you to the liver."

Specification 7th.—In this: that he, the said Lieutenant Colonel A. R. Woolley, while in command of the 6th regiment of infantry at Jefferson barracks, Missouri, and on or about the 17th day of October, 1828, having summoned Captain John Gantt to his, Lieutenant Colonel Woolley's quarters, and during a conversation touching the legal and judicious withdrawal of a pass on the part of the said Captain John Gantt, countersigned by the said Lieutenant Colonel A. R. Woolley in behalf of John Stanley, a private of Captain John Gantt's (G) company, 6th infantry, did, then and there, address to the said Captain Gantt rude and ungentlemanly language, in terms as follows: "How dare you infringe on the rights of this soldier?" "You shall not do it." "You dare not do it."

To all which charges and specifications the prisoner pleaded not guilty.

The court after mature deliberation on the testimony adduced, decide upon the following finding, to wit:

# Specification of 1st charge.

The court find the fact of Lieutenant Colonel Woolley having punished Private Thomas Powell, of company D, 6th infantry, with a few lashes on or about the time and at the place specified.

#### FIRST CHARGE.

Guilty of the first charge.

## 1st specification of 2d charge.

Guilty of the entire specification except that portion of it which alleges the presence of "enlisted soldiers," there being but one enlisted soldier present.

## 2d specification of 2d charge.

Guilty of the specification, except the words "you have wilfully and intentionally stated what you know to be false." And with the further expression of that part of it which alleges the presence of "enlisted soldiers," there being but one enlisted soldier present.

## 3d specification of 2d charge.

 $\it Guilty$  of so much of the specification as alleges the exhibition of a highly colored charge, (not a malignant one,) under the circumstances of time, place, &c., as specified.

4th specification of 2d charge.

Guilty of the specification.

## 5th specification of 2d charge.

The court find the facts set forth, without the inference of rude and ungentlemanly language deduced from them.

## 6th specification of the same charge.

The court find the facts set forth, without the inference attached to them, of rude and ungentlemanly language...

### THE SECOND CHARGE.

Guilty of the 2d charge, and do sentence him, Lieutenant Colonel A. R. Woolley, to be dismissed the service of the United States.

"The court, however, urged by the consideration, that the ungentlemanly acts ascribed, in the various findings, to Lieutenant Colonel Woolley, are all referable to the ascendency which an unsteady and precipitate temper exercises over him, respectfully recommend him to the clemency of the Executive—relying for a radical amendment in his mode of treating subordinates, and a general amelioration in his temper and feelings, upon the solemn and enduring nature of the lesson which his trial, his conviction, and the recovery of his former rank only through the considerate lenity of the Chief Magistrate, shall have all conspired to teach him."

II. In conformity with the 65th article of the rules and articles of war, the whole proceedings in the foregoing case have been transmitted to the Secretary of War, to be laid before the President of the United States for his confirmation or disapproval, and orders in the case. The Secretary of War has

returned the proceedings, with the following order:

### DEPARTMENT OF WAR, April 28, 1829.

The President of the United States, to whom has been submitted for consideration the proceedings of a general court-martial, of which Colonel D. L. Clinch was president, for the trial of Lieutenant Colonel A. R. Woolley, approves the same.

A. R. Woolley, approves the same.

The court has recommended Golonel Woolley to the clemency of the President, under a hope expressed, that, for the future, there will be "a radical amendment in his mode of treating subordinates, and a general amelioration in his temper and feelings, upon the solemn and enduring nature of the lesson which his trial, his conviction, and the recovery of his former rank, only through the considerate lenity of the Chief Magistrate, shall have all conspired to teach him."

It would affined the President much estimate and he adont the recommendation of the court, set

It would afford the President much satisfaction, could be adopt the recommendation of the court, set aside its verdict, and restore Colonel Woolley again to his rank and to his command. This, I am directed

to say, cannot be done, regard being had to the high obligation of seeing that the laws are faithfully executed.

Colonel Woolley is charged and found guilty of punishing a soldier with lashes. This is so flagrant a violation of the positive law of the country that the Executive clemency cannot be interposed, whereby to excuse, or justify hereafter, any similar conduct in others. Every soldier, before he becomes such, is a to excuse, or justify hereatter, any similar conduct in others. Every soldier, before he becomes such, is a free man; and, even after his enlistment, surrenders those civil rights only which are demanded of him by the legal, the constituted authorities of his country. By the laws of that country he feels and believes himself protected, when entering upon his enlistment, from everything of personal abuse, and personal degradation. Even by a court-martial, stripes or lashes cannot be inflicted, because the law prohibits them; still less should they be suffered to be inflicted by an officer, whose duty it is to be the soldier's protector in all his legal rights, and to watch over them with the justice and care of a father. cannot be subordinate and faithful while he sees himself subjected to the abuse and tyranny of his officer, in despite of the protection which the positive laws of his country assure to him. Personal violence on his part, towards an officer, carries with it the punishment of death; while he, for similar aggression towards him by his officer, is deprived of remedy, if after conviction by a court the offender shall find clemency through the interposition of the Executive.

By order of the President of the United States.

JOHN H. EATON.

III. Lieutenant Colonel A. R. Woolley, of the 6th regiment of infantry, consequently ceases to be an officer of the army of the United States. fficer of the army of the United States.

By command of Major General Alex. Macomb, commanding the army.

R. JONES, Adjutant General.

In all modern nations, whether monarchical, aristocratical, or republican; in which standing armies are maintained, peculiar regulations are established for their government. By the Constitution of the United States, the power "to make rules for the government of the land and naval forces," is vested in Congress. Under this power, on the 10th of April, 1806, an act was passed "for establishing rules and articles for the government of the armies of the United States," and this act constitutes the whole code of our law martial. According to it, various crimes and offences are triable by general or regimental courts; and by the 99th of its articles, "all crimes not capital, and all disorders and neglects which officers and soldiers may be guilty of, to the prejudice of good order and military discipline, though not mentioned in the foregoing articles of war, are to be taken cognizance of by a general or regimental courtmartial, according to the nature and degree of the offence, and be punished at their discretion." Other martial, according to the nature and degree of the offence, and be punished at their discretion." articles regulate the proceedings of the courts, and the number and rank of their members; and by the 65th article, "no sentence of a court-martial shall be carried into execution, until after the whole proceedings shall have been laid before the officer ordering the same, or the officer commanding the troops for the time being; neither shall any sentence of a court-martial, in time of peace, extending to the loss of life, or the dismission of a commissioned officer, be carried into execution, until after the whole proceedings shall have been transmitted to the Secretary of War, to be laid before the President of the United States for his confirmation or disapproval, and orders in the case.

Whether the court which sat upon the trial of the memorialist consisted of the requisite number of Whether the court which sat upon the trial of the memorialist consisted of the requisite number of officers; whether their rank was such as the Articles of War prescribed; whether the offence with which he was charged came within the meaning of the 99th article, were all questions properly to be determined by the court. The memorialist having offered no other plea in bar to its jurisdiction than that which has been mentioned, upon its being overruled went to trial upon the plea of not guilty. The court having convicted him, the proceedings were transmitted to the Secretary of War, and laid before the President "for his confirmation or disapproval and orders." The President rejected the recommendation of the court, confirmed its sentence, and ordered it to be carried into execution. In these proceedings the committee can perceive nothing which would call for the interposition of Congress, admitting their right to interpose; but Congress are not authorized to revise or to reverse the indement of any tribunal civil right to interpose; but Congress are not authorized to revise or to reverse the judgment of any tribunal, civil or military. Where an officer in the regular army of the United States conceives himself to be aggrieved by the illegal decision of a court-martial, his appropriate redress would seem to be an appeal to the federal judiciary; but from this he is precluded, as the judiciary act of 1789, which confers jurisdiction upon the federal courts, in the cases therein enumerated, does not grant to them any control over the judgments of courts-martial, which, when approved of by the President, are final and conclusive upon all subjects within their jurisdiction, and must so remain until the rules and articles for the government of the army, now of force, shall be repealed or altered by the authority which enacted them.

As the report of a former Committee on Military Affairs, made to this House on the 23d of December,

1829, in the case of Lieutenant James D. Cobb, might appear upon a superficial examination to be at variance with the opinion of this committee, the facts in that case will be stated for the purpose of showing the difference between them and those which are now under consideration.

On the —— day of ——, 1813, Lieutenant Cobb was tried by a certain number of military officers, denominated a general court-martial, and was sentenced by them to be cashiered. These officers had been ordered to assemble by Colonel Larned, who commanded a cantonment at Greenbush, in New York. On the 29th of January, 1814, after the dissolution of this court, a letter from the Secretary of War, under the directions of the President, was addressed to Colonel Larned, informing him that its proceedings were illegal, as he (Colonel Larned) was not authorized to order a general court-martial. On the 3d of February, 1814, Lieutenant Cobb was ordered by the Adjutant General to repair to Albany and to report himself to Colonel Larned, who had been instructed to institute a general court-martial for his trial. On the 9th of March, 1814, the Secretary of War communicated to Colonel Larned that the President of the United States had decided that Greenbush should be considered "a separate command," so far as related to courts-martial previously held there; that this decision of the President was a confirmation of the several sentences of the courts-martial which had been ordered by Colonel Larned, and that any further proceedings against Lieutenant Cobb were unnecessary. On the 28th of May, 1814, the Adjutant General wrote to Lieutenant Cobb that, the President having approved of the sentence of the general court-martial at Greenbush, he was no longer in the army.

The 65th of the Rules and Articles of War, authorize "a general commanding an army, or colonel The 65th of the Rules and Articles of War, authorize "a general commanding an army, or colonel commanding a separate department," to appoint general courts-martial. The President as "commander-in-chief of the army of the United States," may, in his discretion, order a general court-martial, but this power cannot be exercised by any other officer. Colonel Larned was not a general officer, nor did he command "a separate department," consequently he was as incompetent to originate a general court-martial as he was to create a court of star-chamber, or an ecclesiastical inquisition. The President pronounced Greenbush to have been "a separate department," in direct opposition to the fact, in contradiction of his unqualified recognition of that fact, and of his express decision that the proceedings of the court at Greenbush were illegal and void. The President, with whom is the exclusive power of confirming or disapproving of the sentence of a court-martial by which an officer is cashiered, having annulled the sentence proving of the sentence of a court martial by which an officer is cashiered, having annulled the sentence against Lieutenant Cobb, and declared the proceedings against him, ab initio, to be illegal and void, these proceedings were illegal and void; and as no court was afterwards convened for the trial of that officer, he never was convicted of any offence by any court whatsoever. Under these circumstances, the committee reported that Lieutenant Cobb was "entitled to all the rights of a 1st lieutenant of light artillery, until the time when that regiment was incorporated with the artillery," and a bill was passed by both branches of Congress, allowing to him his pay and enclyments during the point which interpreted branches of Congress, allowing to him his pay and emoluments during the period which intervened between his dismission and the incorporation with the artillery of the regiment to which he had been

As the memorialist, from some passages in his memorial, is manifestly under the impression that he was sentenced to be cashiered for a trivial offence, the committee feel themselves bound to observe that, by an act of 16th May, 1812, courts-martial are prohibited from sentencing a soldier to "corporeal punishment by stripes or lashes." Should an officer, then, assuming a power beyond that of a court, be permitted with impunity to inflict personal chastisement upon those under his command, a spirit of discontent and mutiny, in the opinion of the committee, would be excited in the army which must prove utterly destructive of "good order and military discipline." The committee recommend the adoption of the following resolution:

\*Resolved, That the memorialist have leave to withdraw his memorial and papers.

To the Senate and House of Representatives of the United States:

The undersigned says that he held the rank of lieutenant colonel in the army, and he is advised that he still holds the same, as will appear by the annexed report of Major General Gaines, commanding the western department.

The law of 1806, for establishing rules and articles for the government of the armies of the United The law of 1806, for establishing rules and articles for the government of the armies of the United States, after enumerating all the offences meriting a separate specification; and annexing to each the penalty due to them, declares, by a sweeping clause, "That all crimes not capital, and all disorders and neglects which officers and soldiers may be guilty of, to the prejudice of good order and military discipline, though not mentioned in the Articles of War, are to be taken cognizance of by a general or regimental court-martial, according to the nature and degree of the offence, and be punished at their discretion." The undersigned has been tried by a court-martial for punishing a soldier under a charge of conduct subversive of good order and military discipline. The court found the fact of punishing with a few lashes, but, urged by the consideration that the act was the consequence of a precipitate temper, the court recommended the case of the undersigned to the elemency of the Executive. The President, notwithstanding, insists on his dismissed from service dismissal from service.

The act for which this excessive punishment is to be inflicted is not specified in the law as an offence. It was formerly enjoined, by the law, as one of the means to be used in maintaining salutary discipline. Subsequent enactments have withdrawn the injunction, but have not forbidden the act. It is therefore a crime not known to the military law.

The undersigned believed that his son, a child, merited parental correction, and he was punished. It was discovered that he had suffered for the act of a soldier. Irritated at the injustice, and at the moment of discovery, the undersigned struck the soldier with the whip, with which he had chastised his child, a

few blows, not exceeding half a dozen.

This is believed to be the first instance on record where the discretionary power given to a courtmartial by the 99th article for the punishment of minor offences, has been extended to the highest grade of punishment, and for an offence not known to the military law as a crime; and if it be thus extended

the 99th article is manifestly unconstitutional.

Your remonstrant, however, would have endured in silence, and remained a passive victim, had the ceremonials of the law been observed in offering up the sacrifice. But he avers that the court which sat in judgment upon him had no legal existence; and now, being driven to this appeal, he calls on you, with whom the conservation of constitutional law abides, to shield him from arbitrary will, the action of an incompetent tribunal, wholly astray from the legal exercise of sound discretion, and by which your remonstrant is to be made the victim of cruel policy, (not followed up, but wholly departed from, in subsequent cases,) and which your remonstrant solemnly avers is viewed by the officers of high rank in the army as an act of monstrant singular. an act of monstrous injustice.

Respectfully submitted,

Washington, December 27, 1831.

A. R. WOOLLEY.

### General Courts-Martial.

Among the apparent errors which have occurred in the detail and proceedings of general courtsmartial, I deem it proper to refer to those in the cases of Colonel Chambers and Lieutenant Colonel Woolley.

1. Colonel Chambers was tried by a general court-martial, consisting of but five members, and they

all junior to him in rank. Lieutenant Colonel Woolley was tried by seven, of which four were junior to Whereas the 64th Article of War requires that a general court-martial for the trial of an officer "shall not consist of less than thirteen, where that number can be convened without manifest injury to the Of this fact or matter of opinion the commander ordering the court is supposed to be the judge. He is necessarily, in the first instance, the proper judge as to the number of officers that can, "without manifest injury to the service," be assigned to this duty. But if he cannot take from other duties the number required by law, he is directed to state, in his order constituting the court, that a greater number than the order designates "cannot be assembled without manifest injury to the service." This statement than the order designates "cannot be assembled without manifest injury to the service." This statement is considered to be in the nature of a report, made by the commandant who orders the court; but it is a report of the commandant's opinion upon the subject, rather than as a positive fact irrevocably settled. The report, therefore, can only be viewed in the light of any other official report, founded upon matter of opinion, so far as to settle the matter reported, until the contrary should appear from more positive evidence. And if the President, after taking a deliberate review of the state of the service, should be convinced that the number of officers could have been increased "without manifest injury to the service," he would infer that the commandant's opinion had been erroneous, and would be at liberty, in the just discharge of the duty confided to him, "to see that the laws are faithfully executed," to remit the punishment awarded by an unlawful court.

In the cases under consideration, it seems that the commanding generals stated that a greater number (than the orders respectively designated) "could not be assembled without prejudice to the service." The word prejudice, as here used, is by no means equal in its force and obligation to the words of the law, viz, "manifest injury;" which words were omitted in the orders in these cases, apparently to give place to the word "prejudice." A commander might think it in some sort a "prejudice to the service" to take an officer from the command of a fatigue party sent off twenty or thirty miles to obtain fuel or building timber, whilst the same commander would not, in an official report or order, deliberately certify that it would be a "manifest injury to the service" to recall the officer for a few days to attend the court, and, in the interim, to place the fatigue party under a sergeant, or even to recall it until the adjournment of the court. There are few, if any general officers, indeed, who would, in time of peace, certify that an officer stationed five hundred miles off could not, without "manifest injury to the service," be ordered from that distance, especially if the life or reputation of an officer or soldier should be injected with a stationary between the court of the service, and the laws and justice and the laws and justice of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service o required the presence of such absent officer. A view of the monthly returns for the periods at which these trials were ordered, with a knowledge of the fact that the country was in a state of profound peace, will

show that the courts should have been as full as the law required.

2. Colonel Chambers was tried by a court consisting of five officers, and each of them junior to him; Lieutenant Colonel Woolley was tried by a court consisting of seven officers, and four of them were his juniors; consequently they were both tried by their juniors, whereas the 75th article of war requires that "no officer shall be tried but by a general court-martial, nor by officers of inferior rank, if it can be avoided." If it can be avoided. This is imperative; and it will be manifest to any one who will look at the state of the service at the time that the court for the trial of Colonel Chambers might have consisted of two or three general officers, and of some colonels senior to him; and that the court for the trial of Lieutenant Colonel Woolley might have consisted of three general officers, and of seven or eight colonels and lieutenant colonels, senior to him. It is evident, therefore, that both these field officers, who had served faithfully during the war, were tried by courts composed of officers junior to them respectively; and it is likewise evident that this irregularity could have been avoided, and without manifest injury to the service.

These two requisites, being explicitly prescribed by law, should never be dispensed with, particularly

where the accusations are such as to threaten the life or the commission of the accused.

The good of the service often requires that in particular cases of vital importance to the army and the country exemplary punishments are demanded, and that the example, to be in the greatest possible degree effective, should fall upon officers of the higher grades. But the example, to be as it should be, forcible and awful, must always be the result of an investigation strictly comformable to the letter and spirit of martial law. In that case the example cannot fail to be attended with the most salurary effects: all the partial concerned, as well as the public, readily yield respectful obedience to the imperative operation of the law of the land, because this is the only known rule of right and of power which the citizens of a republic, in the plentitude of their sovereignty, impose upon themselves for the purposes of government—for enforcing what is right, and prohibiting what is wrong. But, upon the other hand, when the officer ordering a court, or the court itself, is found to depart from any known principle or rule of law, the parties affected, as well as the public, are dissatisfied; and, in place of saying to the sovereign power of the republic, "thy will be done," and of submitting without a murmur to a decree the offspring of law and justice, they are naturally shocked at the apparent lawlessness of the verdict pronounced, and are led to apprehend that even in this land of laws and equal rights arbitrary power may predominate over the prescribed rules of even-handed justice.

There can never be a necessity in our service, during a period of peace or war, to bring a field officer before a general court-martial composed principally of company officers. The court for such trials may always, "without manifest injury to the service," consist in part of general, and for the most part of field officers. Nor should the commander ordering the court be permitted to assign any other reason than that prescribed by law for omitting to order a full court, and of high rank, as the law directs.

Besides, it is a principle of law which is respected in most civilized countries, where the laws are designed to protect the rights of the citizen or the subject, that "all penal laws are to be construed in a manner most favorable to the prisoner." In applying this rule of law to the cases under consideration, it is much to be apprehended that so for from enjoying the benefit of this rule in cases of a questionable is much to be apprehended that so far from enjoying the benefit of this rule, in cases of a questionable character, the prisoners have been deprived of those benefits expressly secured to them by unquestionable enactments of law. Under these impressions I cannot but think that in point of law, if not in point of fact, Colonel Chambers and Licutenant Colonel Woolley are, at this moment, officers of the armyings against them, having been contrary to law, are void, or they are voidable by the lawful interposition of the President of the United States.

All which is respectfully submitted.

EDMUND P. GAINES, Major General by Brevet, Commanding. Hon. Secretary of War, Washington City, D. C.

22d Congress.]

## No. 509.

[1st Session.

MEMORIAL AND PROCEEDINGS OF A CONVENTION OF MILITIA OFFICERS OF PENNSYL-VANIA FOR THE IMPROVEMENT OF THE MILITIA SYSTEM OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 6, 1832.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

The memorial of a convention of citizens, assembled from the different military divisions of the Commonwealth of Pennsylvania, most respectfully represents: That the people of Pennsylvania are deeply impressed with the belief that the present militia system of the United States is burdensome and inefficient; that, since the passage of the act of 1792, the number of men included within its provisions has increased that, since the passage of the act of 1792, the number of men included within its provisions has increased so much, and will continue to increase so rapidly, that it is inexpedient for the government to attempt to arm and instruct the whole body. They also believe that on no occasion can the necessities of the country require the actual services of so great a number of armed men as is now included within the provisions of that act. They therefore most respectfully request your honorable bodies to revise the present militia system and to make such changes therein as shall enable the government to arm and to instruct at least a portion of those who may be subject to enrolment.

By order of the convention.

J. B. ALEXANDER, President.

Attest:W. S. Franklin, Secretary. JANUARY 6, 1832.

Proceedings of the Military Convention which assembled at Harrisburg, Pennsylvania, Monday, January 2, 1832.

The delegates chosen by the different military divisions and brigades of Pennsylvania met at the court-house in Harrisburg, on the 1st Monday of January, 1832.

On motion of Mr. Simpson,

Henry Frick, of Northumberland county, was called to the chair; and,

Ön motion of Mr. Franklin,

Reah Frazer, of Lancaster, secretary, for the purpose of organizing the convention.

On motion,

Messrs. Franklin, Alexander, of Cumberland, Paxton, Hambright, and Spencer were appointed a committee to examine the credentials of the delegates.

On motion, The convention adjourned until 12 o'clock, noon.

At 12 o'clock the convention again met.

Mr. Franklin, from the committee appointed to examine the credentials, reported the following list of delegates, viz:

## FIRST DIVISION.

## CITY AND COUNTY OF PHILADELPHIA.

1st Brigade.—City: Colonels James Page, Joseph S. Riley, Henry Simpson, Robert M. Lee,† Robert Cooper; Majors Chalkley Baker, Peter Fritz, William C. Browne,† Lieutenant George Bumm.†

2d Brigade.—County: Colonels John Thompson,† John L. Wolf,† A. R. Roumfort,† Kenderton Smith,†

Majors N. Nathans, L. Bomeisler, † Franklin Vansant, Captains Joseph Worrell, jr., A. T. Smith, † Lieutenant James Goodman.

## SECOND DIVISION.

## BUCKS AND MONTGOMERY.

1st Brigade.—Bucks: Major General W. T. Rogers, Colonels John Davis, Simpson Torbert, Joseph Hough,† Lieutenant Colonels Thomas Purdy, John Hart, Major Stephen Brock,† Adjutant Michael S. Haney,† Dr. Huston Thompson.

2d Brigade.—Montgomery: Lieutenant Colonels Thomas M. Jolley,† James Bush,† James Christman,† Major John H. Sheetz, Captain John H. Hill,† Lieutenants William Hamell,† William Matheys,† William

H. Gartley.

### THIRD DIVISION.

## CHESTER AND DELAWARE.

1st Brigade.—Delaware: Colonel Samuel A. Price, Lieutenant John K. Zeilin, J. M. G. Lescure, esq. 2d Brigade.—Chester: Colonel William Harris,† Em. Elton,† Majors Thomas Jones,† John Kerlin, Thomas H. Pearce, † Lieutenant David B. Reed.

## FOURTH DIVISION.

## LANCASTER.

Captain David Miller, Major Frederick Hambright, Captain William Downey, Colonel Reah Frazer, Captains John Flora,† William G. Yetter,† Lieutenant William B. Fordney, Major John McGlaughlin.

### FIFTH DIVISION.

#### YORK AND ADAMS.

1st Brigade.—York: Majors Henry Snyder, Jacob Hantz,† Colonels T. N. Haller,† John Keller,† Major Graham †

2d Brigade. -Adams: Colonel Michael C. Clarkson, Majors Andrew G. Miller, Jacob Sanders, Elijah

### Garretson.†

#### SIXTH DIVISION.

## DAUPHIN, LEBANON, BERKS, AND SCHUYLKILL.

1st Brigade.—Dauphin: Colonel W. S. Franklin, Lieutenant John Blattenberger, Captain E. W.

2d Brigade.—Schuylkill: Major William F. Dean.

Berks: General William High, Colonel Henry Boyer, John Potteiger, esq.

#### SEVENTH DIVISION.

### NORTHAMPTON, LEHIGH, AND PIKE.

1st Brigade.—Northampton: Brigadier General Shimer, † Colonel George Weber, Major Robert May Brooke,† Colonel John Hourten.† 2d Brigade.—Lehigh: Major General John Fogle, Major John W. Hornbeck, Colonel Walter C. Livingston.

## EIGHTH DIVISION.

## UNION, COLUMBIA, NORTHUMBERLAND, LUZERNE, SUSQUEHANNA, AND WAYNE.

1st Brigade.—Union: Colonel Charles M. Straub, Captain James Merrill. Northumberland: Major General Henry Frick, Major Samuel J. Packer.

Columbia: Colonel Joseph Paxton.

2d Brigade.—Luzerne: Captain Jacob Drumheller, Colonel John Butler, Lieutenant Chas. Dorrance.

#### NINTH DIVISION.

LYCOMING, POTTER, M'KEAN, BRADFORD, AND TIOGA.

1st Brigade.—Lycoming: General William B. Mitchell, Major Robert Fleming, Captain Wm. Piatt.

### TENTH DIVISION.

## CENTRE, CLEARFIELD, MIFFLIN, AND HUNTINGDON.

Juniata: Colonel William Kirk, Captain John Murphy, Andrew Parker, Charles W. Kelso, esqs., Major William Sharon.

Huntingdon: Captain John Criswell, Major David McMurtrie, Captains William Williams, David

1st Brigade.—Centre: Brigadier General James Irwin,† Colonel Andrew Gregg,† Major John Potter, Captain Samuel H. Wilson, Lieutenant W. W. Houston, Dr. Constant Curtin, Captains George Buchanan, David Duncan.

Mifflin: Brigadier General George McCullough, Dr. Joseph B. Ard, Majors A. S. Wilson,† David

Cummins, Richard Miles.

## ELEVENTH DIVISION.

### CUMBERLAND, PERRY, AND FRANKLIN.

1st Brigade.—Cumberland: General Willis Foulke, Captains Samuel Alexander, James McGowan,† John McCartney, Charles McClure, Lieutenants Mathew Spencer, Edward M. Biddle, Alexander Oliver,† William S. Ramsey, Adjutant John N. Gray, Colonels William M. Greer, William Stough, Majors Peter Lesher,† Samuel Tritt, John McCandlish, Captains George W. Woodburn, Samuel Redett.

Perry: Colonels Henry Fetter, Joseph Speck, Major William Clark, Lieutenant Albert C. Ramsey.

2d Brigade.—Franklin: Major Jacob Heck, Captains Jasper E. Brady, William B. Bard, Colonels John Wellace, John McCander.

Wallace, John McGeehan.

## TWELFTH DIVISION.

### BEDFORD, SOMERSET, AND CAMBRIA.

1st Brigade.—Bedford: Colonel William Compher, Captain Thomas B. McElwee, Lieutenant William Fletcher.†

2d Brigade,—Cambria: Major Isaac Teeter, Lieutenant Arnold Downing.

## THIRTEENTH DIVISION.

### WESTMORELAND AND FAYETTE.

1st Brigade.—Westmoreland: Major John B. Alexander, Adjutant J. H. Wells, Captains Morrison Underwood, Hugh Y. Brady, Jacob Gosser, Major Wilson Jack,† Captain Joseph Cook,† Jon. Row,† Lieutenant L. L. Bigelow, Captain Ben. R. Marchand.†

### FOURTEENTH DIVISION.

#### WASHINGTON AND GREENE.

Washington: Major General Charles De Hass,† Brigadier General Wallace McWilliams, Colonels Thomas Ringland, William Patterson, William Waugh, esq. Greene: Colonels William G. Hawkins, Andrew Buchanan.

### FIFTEENTH DIVISION.

#### ALLEGHENY, ETC.

1st Brigade.—Allegheny: General R. T. Stewart,†Andrew Bayne, esq. [Those marked with a dagger (†) did not take their seats in the convention.] The roll being called, 83 members answered to their names.

On motion of Mr. McElwee, the following resolution was adopted:

Resolved, That a committee be appointed, to consist of one person from each division, to be chosen by the delegates for each division, in order to report what officers are necessary for this convention, and to nominate persons to fill them.

Whereupon the following persons were appointed said committee:

1st d	ivision	, Mr. Page.	8th d	ivisioı	ı, Mr. Paxton.
$^{2d}$	"	Davis.	$9 \mathrm{th}$	**	Fleming.
3d	**	Price.	$10 \mathrm{th}$	"	Williams.
4 h	"	Hambright.	$11 \mathrm{th}$	**	McClure.
$5  ext{th}$	"	Miller, of Adams.	$12 \mathrm{th}$	"	Downing.
$6  ext{th}$	**	Roberts.	13th	"	Wells.
$7  ext{th}$	"	Fogle.	14th	46	McWilliams.

On motion of Mr. Ringland,

Resolved, That when this convention adjourns, it adjourn to meet at 3 o'clock p. m. Adjourned.

#### IN THE AFTERNOON.

On motion of Mr. Fordney,

Resolved, That the governor, heads of department, State treasurer, adjutant general, and the members of both branches of the legislature, be invited to take seats within the bar of this convention.

On motion of Mr. Straub,

Resolved, That a committee of five be appointed to carry the preceding resolution into effect.

Whereupon

Messrs. Straub, Page, Fordney, Riley, and Brady, of Franklin, were appointed said committee.

Mr. Page, from the committee appointed for that purpose, reported the following officers for the con-

President—John B. Alexander, of Westmoreland.

Vice-Presidents-WILLIAM B. MITCHELL, of Lycoming,

WILLIAM DOWNEY, of Lancaster.

WILLIS FOULKE, of Cumberland, and

Samuel A. Price, of Delaware. Secretaries—Simpson Torbert, of Bucks, and Walter S. Franklin, of Dauphin.

A motion was made that the report of the committee be adopted; which was agreed to unanimously. The several officers of the convention then took their seats.

Mr. Davis announced that Dr. Huston Thompson had been appointed to supply a vacancy in the delegation from the 1st brigade, 2d division.

A resolution was then offered by Mr. Miller; which was read as follows:

Resolved, That no division or county be allowed more votes in this convention than their respective votes by members in the legislature; but that the members elected or nominated and accepted be allowed seats in the convention.

The chair decided that the resolution was out of order.

An appeal from the decision of the chair was made by Mr. Miller and Mr. Simpson, and the decision of the chair was confirmed by the convention.

On motion of Mr. Roberts,

Resolved, That the editors of papers in this place be admitted to seats within the bar of this convention.

On motion of Mr. Alexander, of Cumberland,

Resolved, That a committee, to consist of one from each division, be appointed to suggest such matters as are most deserving of attention from this convention.

Which was agreed to.

The following gentlemen were selected by the delegates from each division as said committee:

1st di	ivision,	Mr. Page.	$9  ext{th}$	division	, Mr. Fleming.
$^{2d}$	"	Sheetz.	$10 \mathrm{th}$	"	Wilson.
3d	"	Zeilin.	11th	"	Alexander.
4th	"	Fordney.	$12 \mathrm{th}$	"	McElwee.
5th	**	Snyder.	13th	**	Brady.
6th	"	Franklin.	14th	"	Ringland.
7th	**	Weber.	15th	"	Bayne.
0+1	66	3.5			•

A motion was made by Mr. Alexander, of Cumberland, that the convention should sit in uniform; which was not agreed to.

On motion of Mr. Simpson,

Resolved, That when this convention adjourns, it will adjourn until to-morrow morning at 11 o'clock a. m.

Adjourned.

## Tuesday, January 3, 1832.

The convention met; and the roll being called, ninety-six members answered to their names.

On motion of Mr. Nathans, the following resolution was adopted:

Resolved, That the convention adopt for their government the rules and regulations adopted by the

house of representatives of this State.

Mr. Riley, from the committee appointed to invite the governor, heads of department, State treasurer, and the members of the senate and house of representatives to take seats within the bar of the convention, reported that they had performed that service.

On motion of Mr. Miller, of Adams, the foregoing committee were instructed to extend the invitation

to the attorney general of the Commonwealth.

After some time the governor, heads of department, State treasurer, and attorney general took their

A motion was made by Mr. Ramsey and Mr. Wells to reconsider the vote agreeing to the resolution adopting the rules and regulations of the house of representatives of this State for the government of the convention; which was not agreed to.

Mr. Page, from the committee on the subject, made the following report, in part:

That, inasmuch as it is universally conceded that the present militia system has fallen far short of
the grand object for which it was established, and has entailed much ignominy and disgrace upon our military reputation, we deem it expedient that it should be made the subject of amendment, reformation, or encouragement, as will best answer the purpose of reclaiming its character from the obloquy which it has incurred. In an examination of the various plans suggested, the committee have been actuated by a strong and earnest desire to select that which may be the means of adding to the strength and character of the State, and of rendering the performance of duty on the part of its citizen soldiers a matter of pleasure and pride.

Not authorized, by the tenor of the resolution by which they were appointed, to do more than draw the attention of the convention to such matters as may be necessary for their examination, they respectfully offer the following principles as the basis of a system to be recommended to the early and serious

attention of the legislature.

First. That the citizens of this Commonwealth liable to militia duty ought to be divided into two classes.

Second. That all such citizens, (not by law exempt,) between the ages of twenty-one and twenty-six years, ought to compose the first class, and be called the active militia.

That this class only ought to be subject to drill or military duty in time of peace.

Fourth. That the second class shall be composed of all persons liable to militia duty not embraced within the first class, and be called the second or reserved class.

Fifth. That the second class ought not to be required to do military duty, except when called forth to execute the laws, to suppress insurrections, and to repel invasions, and then such organization ought to be adopted as should unite the two classes into one.

Sixth. That all parades of ununiformed militia ought to be abolished.

Seventh. That the first class be required to uniform themselves; that they be furnished with arms and accourtements, camp equipage, music, powder, and five days' rations, in each year, and be required to parade, for drill and instruction, five days in each year.

Eighth. The committee, by reason of the peculiar locality of the first division, recommend that the

convention refer to the delegates from that division to prepare and report a system suitable to that division, so far as it is necessary the same should vary from the general system.

The first resolution being under consideration,

A motion was made by Mr. Merrill to postpone the question on the first resolution for the purpose of considering the eighth resolution; which was agreed to, and

Said resolution was adopted.

The question recurring on the first resolution,

It was adopted.

The second resolution being under consideration,
A motion was made by Mr. Miller, of Adams, to postpone the further consideration of the report for

the purpose of considering the following resolution:

Resolved, That the committee be instructed to report a plan for the better organization and encouragement of the present volunteer force, and that they be a separate force from the enrolled militia; and that parades of the militia be abolished, but they to be enrolled, officered, and classed for service, if required by any contingency.

Which was not agreed to.

A motion was then made by Mr. Frick to amend the resolution by striking out "twenty-six" and inserting in lieu thereof "twenty-eight."

On the question, Will the convention agree to the motion?

A motion was made by Mr. Wilson that the convention now adjourn, to meet this afternoon at 3 o'clock; which was agreed to.

### AFTERNOON.

Captain John Longenecker and Henry D. Overholtzer, esq., having been appointed by the delegates from the fourth division to fill the vacancies occasioned by the non-appearance of Captains Flora and Yetter, appeared and took their seats.

The following resolution was offered by Mr. Straub:

Resolved, That where vacancies may have occurred, by the non-attendance of delegates from any brigade, the delegates in attendance have authority to supply the vacancy. Which was not agreed to.

The convention resumed the consideration of the resolutions attached to the report to the committee appointed to suggest to the convention such matters as deserved their immediate attention.

The question recurring, Will the convention agree to the amendment to strike out "twenty-six" and insert "twenty-eight?"

It was determined in the negative.

A motion was then made by Mr. Davis to strike out the words "between the ages of twenty-one and twenty-six," and insert in lieu thereof "as will uniform themselves voluntarily according to law."

On the question, Will the convention agree so to amend?

A motion was made by Mr. Dean to amend the amendment by adding thereto the following: "And that every such citizen, between the ages of twenty-one and forty-five, who will not equip himself shall pay a certain sum in lieu thereof for the encouragement of volunteers and of the first class of militia;" which was agreed to.

The question recurring, Will the convention agree so to amend?

On motion.

The convention adjourned.

Wednesday, January 4, 1832.

The convention met; and the roll having been called, it appeared that the following gentlemen were in attendance:

Messrs. Foulke, Alexander, of Cumberland, · Messrs. Page, Messrs. Roberts, Riley, Dean, Simpson, High, McCartney, Boyer, McClure, Cooper, Baker, Potteiger, Spencer, Biddle, W. S. Ramsey, Fritz. Kern, Nathans, Kelchner, Worrell, Weber, Gray, Greer Vansant, Fogle, Goodman. Hornbeck, Stough, Tritt, Rogers, Livingston, McCándlish. Davis, Straub Torbert, Woodburn, Merrill, Purdy, Frick, Redett, Packer, Fetter, Hart, Thompson, Paxton, Speck, Clark, A. C. Ramsey, Drumheller, Bertels, Boileau, Mitchell, Heck, Sheetz, Fleming, Piatt, Gartley Brady, of Franklin, Potter. Richards, Bard, Zeilin, Wilson, Wallace, Price, Houston, McGeehan, Lescure, Curtin, Compher, Buchanan, McElwee, Kerlin, Reed, Duncan, Teeter, Miller, of Lancaster, McCullough, Downing. Alexander, of Westmorel'd, Wells, Hambright, Ard, Frazer, Cummings, Fordney, Wilson, Underwood, Brady, of Westmoreland, McGlaughlin, Miles. Kirk, Downey, Gosser, Longenecker, Bigelow, McWilliams, Murphy, Overholster, Parker, Snyder, Kelso. Ringland, Clarkson, Miller, of Adams, Sharon. Hawkins, Criswell, Patterson, Williams, Sanders, Waugh, Franklin, McMurtrie, Bayne. Blattenberger, Snare,

Mr. Page, from the committee appointed to suggest matters for the consideration of the convention,

made a further report; which was read as follows:

made a further report; which was read as follows:

1. That volunteer corps be encouraged as far as practicable; that, for that purpose, all volunteers, so long as they shall continue to perform military duty, shall be entitled to all the advantages which are allowed to the first class; they may fix their own days of parade, and impose such fines for absence on those days as they may please, and adopt such by-laws as they may approve; that they shall be subject to the same duty of encampment and service in time of peace as the first class; they shall be allowed the usual music at the public expense on their days of parading; that their officers shall take rank of militia officers of the same grade, and their corps shall take rank of the militia.

2. That any person, after his arrival at the age of twenty-six, may, if he will, continue to perform duty with, and be entitled to the advantages of, either the first class or volunteers, but not subject to contribution to the military fund; but on ceasing to perform duty, he shall contribute annually 50 cents to that fund.

that fund.

3. Every member of the first class and volunteers shall pay a fine of \$2 for every day of those required by law, in case he shall fail to parade in uniform without sufficient excuse.

4. That a committee be appointed to draught a memorial to Congress, asking a revision of the militia

laws of the United States.

5. That the proceedings of this convention be recommended to the early and serious attention of the legislature, and with that view, that the officers of the convention lay before them an authenticated copy

On motion of Mr. Simpson, the following resolution was adopted:

Resolved, That a committee of finance be appointed to collect funds and defray the expenses incidental to the meeting of this convention.

And Messrs. Simpson, McGlaughlin, Snyder, Roberts, and Piatt, were appointed said committee. The convention resumed the consideration of the second resolution attached to the report of the committee appointed to suggest matters for the consideration of the convention.

The question being on the amendment to said resolution offered yesterday,

The yeas and nays on said question were called for by Mr. Alexander and Mr. Davis, and are as follow:

#### YEAS.

Messrs.	Page,	Messrs. Hambright,	Messrs.	W. S. Ramsey,
	Simpson,	Frazer, .		Greer,
	Baker,	Fordney,		Stough,
	Fritz,	. McLaughlin,	•	Redett,

	Kerlin,	Biddle,		McCandlish.—58.
	Reed,		•	

#### NAYS.

So it was determined in the affirmative.

The convention then adjourned until 3 o'clock this afternoon.

### IN THE AFTERNOON.

The convention resumed the consideration of the amendment to the second resolution attached to the report of the committee appointed to suggest matters for the consideration of the convention. On the question, Will the convention agree to the resolution as amended?

A motion was made by Mr. Franklin further to amend the resolution by inserting between the words "shall" and "pay" the words "be called the second class, and;" which was agreed to.

The resolution as amended was then adopted.

The third resolution was then adopted, after being amended by striking out the word "this" and inserting in lieu "the first class."

The fourth resolution being under consideration, a motion was made by Mr. Merrill to postpone the further consideration of the same for the present for the purpose of considering the following:

Resolved, That it will be expedient to demand from those between twenty-one and twenty-six years of age who shall neglect or refuse to uniform and equip themselves a higher sum than from those who shall have arrived at the age of twenty-six; which was agreed to.
On the question, Will the convention agree to the resolution?

The yeas and nays were required by Mr. Riley and Mr. Cummings, and are as follow:

## YEAS.

Messrs. Reed,	Messrs. Buchanan,	Messrs. Alexander, of Cumberland,
Frazer,	Duncan,	McCartney,
McGlaughlin,	McCullough,	McClure,
Longenecker,	Ard,	Spencer,
Clarkson,	Cummings,	Woodburn,
Merrill,	Miles,	Speck,
Frick,	Kirk,	Clark,
Packer,	Murphy,	A. C. Ramsey,
Paxton,	Parker,	Heck,
Mitchell,	Criswell,	Downing,
Fleming,	Williams,	Wells,
Potter,	McMurtrie,	Underwood,
Wilson,	Snare,	Gosser.—38.

#### NAVS.

Messrs. Page, Riley, Simpson, Cooper, Baker, Fritz, Nathans, Rogers, Davis, Torbert, Purdy, Hart, Bertels, Boileau, Sheetz, Zeilin, Price, Kerlin, Snyder,	Messrs. Miller, of Adams, Sanders, Franklin, Roberts, Dean, High, Boyer, Weber, Kern, Kelchner, Lynn, Fogle, Hornbeck, Straub, Piatt, Sharon, Biddle, Ramsey, Gray,	Messrs. ------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

So it was determined in the negative.

The question recurring, Will the convention agree to the fourth resolution?

A motion was made by Mr. Torbert to postpone the question for the purpose of introducing the

following; which was not agreed to:

That the militia of second class shall be enrolled as usual by the proper officers, and that they shall annually pay the sum of. -, to be collected with the county rates and levies, and paid into the treasury of the Commonwealth.

That the second class shall be officered as usual, and that all the officers of the first and second class in each brigade shall annually meet for drill -- days, for which services they shall be allowed

per day; and if the officers request it the State should furnish them with the necessary camp equipage.

A motion was made by Mr. Franklin to recommit to the committee on the subject the report and resolutions, together with the report and resolutions made by said committee this morning; which was agreed to.

On motion, Mr. Roberts was substituted on said committee in place of Mr. Franklin.

On motion of Mr. Franklin, the following resolution was adopted:

Resolved, That no member of this convention be permitted to speak more than twice upon any question before the convention.

The convention then adjourned until 11 o'clock to-morrow morning.

## THURSDAY, January 5, 1832.

The convention met; and the roll being called, one hundred and eleven members answered to their names.

George Richards, esq., and Captain Philip Wager Reigart having been appointed to supply vacancies, took their seats:

The president of the convention presented the following resolution, transmitted to him by the speaker of the senate:

"In Senate, January 4, 1832. "Resolved, That the officers and members of the military convention, now sitting in Harrisburg, be invited to take seats within the bar of the senate chamber during the sitting of senate.

"Extract from the journal.

"W. S. FRANKLIN, Clerk."

Mr. Waugh presented to the convention the following resolution of the house of representatives:

"In the House of Representatives, January 4, 1832. "On motion,

"Resolved, That the officers and members of the military convention be invited to seats within the bar of this house.

"Extract from the journal.

"FRS. R. SHUNK, Clerk."

Mr. Simpson, from the committee to ascertain the amount necessary to defray the expenses of this convention, reported that they have inquired particularly into the matter confided to them, and offer the following; which was adopted:

Resolved, That the members of this convention be assessed the sum of seventy-five cents each, and that the same be paid into the hands of Walter S. Franklin, esq., one of the secretaries of this convention.

Mr. Page, from the committee to suggest matters for the consideration of the convention, reported:

1. That the citizens of this Commonwealth ought to be divided into two classes.

2. That all such citizens as will uniform themselves voluntarily, according to law, ought to compose the first class and be called the active militia; and that all such citizens between the ages of twenty-one and forty-five who will not equip themselves shall be called the second class, and pay a certain sum in lieu thereof for the encouragement of the volunteers and of the first class of militia.

3. That the first class only ought to be subject to drill or duty in time of peace.

And the following in conformity to the principles set forth in said resolutions:

1. That all militia trainings not in uniform should be abolished, and that the second class ought not to be required to do military duty, except when called forth to execute the laws, to suppress insurrections, and repel invasions.

2. That the first class be furnished with arms and accourrements, camp equipage, music, powder, and

- 2. That the first class be furnished with arms and accountements, camp equipage, music, powder, and five days' rations in each year, and be required to encamp for instruction five days in each year.

  3. The militia shall be enrolled, as required by law, by the proper officers, and every enrolled militiaman of the second class, except minors, should annually pay the sum of one dollar, to be collected as the county rates and levies are now by law collected and paid into the treasury of this Commonwealth.

  4. The second class should have such officers as may be necessary, and all the commissioned officers in each brigade or regiment shall assemble annually at such time or place as may be fixed upon by the commanding officer of such brigade or regiment for inspection and drill for ———— days in succession, for which attendance and service they should be allowed ——— dollars per day each to be paid out of the fund which attendance and service they should be allowed -- dollars per day each, to be paid out of the fund to be created as aforesaid.
- 5. That dollars per day should be allowed to each brigade or regiment for the pay of musicians during such annual parade, should they desire it, a sufficient quantity of camp equiage to be furnished each brigade or regiment for the acquirement of a knowledge of camp duty. At such parades the officers may by ballot select from their number the individual who shall act as the instructing officers of volunteers to drill in the same manner in brigade or regiment of volunteers; if there be no such brigade, then to be joined in the drill with the militia officers. Volunteers to have the right to make their own by-laws and manage their own funds.

6. The first class to be subject at all times to the requisitions of State executive, in compliance with

the provisions of the constitution.

- 7. That a committee be appointed to draught a memorial to Congress, to be signed by the president, vicepresident, and secretaries, in behalf of this body, asking a revision of the militia laws of the United
- 8. That the proceedings of this convention be recommended to the early and serious attention of the legislature, with that view that the officers of the convention lay before them an authenticated copy of the journal.

The first resolution reported by the committee was adopted.

The second resolution being under consideration, a motion was made by Mr. Miller, of Adams, to amend the same by inserting after the words "first class" "and organized volunteers;" which was not agreed to.

A motion was then made by Mr. Nathans to strike out "five," where it last occurs, and insert in lieu "three successive;" which was agreed to.

A motion was then made by Mr. Riley to further amend the resolution by striking out all after the word "nowder" and adding in lieu three of a fillenge "that the transfer and adding in lieu three of a fillenge "that the transfer and adding in lieu three of a fillenge "that the transfer and adding in lieu three of a fillenge "that the transfer and adding in lieu three of a fillenge "that the transfer and adding in lieu three of a fillenge "that the transfer and adding in lieu three of a fillenge "that the transfer and adding in lieu three of a fillenge "that the transfer and adding in lieu three of a fillenge "the transfer and adding in lieu three of a fillenge "three of the transfer and a ding in lieu three of the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfer and the transfe word "powder," and adding in lieu thereof as follows: "And that each company of not less than —— privates be allowed the sum of —— dollars per annum, to be appropriated by them for military purposes, in vates be allowed the sum of —— dollars per annum, to be appropriated by them for military purposes, in accordance with the by-laws of the respective companies;" which was not agreed to.

A motion was then made by Mr. Merrill to strike out the words "and be required," and insert "if they think proper;" which was not agreed to.

The resolution as amended was then adopted.

The third resolution was adopted.

The fourth resolution being under consideration, the first blank was filled with "three" and the second with "one."

The resolution as amended was then adopted. The fifth and sixth resolutions were then adopted.

The seventh resolution was then adopted, and Messrs. Merrill, Riley, Fritz, Fleming, and McClure were appointed a committee in pursuance thereof.

On motion of Mr. Cummings, the eighth resolution was postponed for the present.

The following resolutions were then offered by Mr. Torbert:

Resolved, That the committee appointed to draught a memorial to Congress recommending a revision of the militia laws of the United States be instructed to recommend the passage of a law appropriating to each State annually the sum of two thousand dollars for every representative to which it is entitled in Congress, to be expended under the direction of States respectively in disciplining the officers.

Resolved, That it be recommended to the legislature to pass a resolution requesting our senators and representatives in Congress to use their exertions to effect the passage of a law agreeably to the preceding resolution, and that copies thereof be forwarded to the executives of the several States for the concurrence of the respective legislatures.

Which were not agreed to.
On motion of Mr. Simpson, the following resolution was adopted:

Resolved, That the journal of this convention be printed, and that each member of the lesislature be furnished with a copy of the same, and that each member of this convention be furnished with three copies.

On motion of Mr. Cummings, the following resolution was adopted:

Resolved, That it be recommended to the legislature to so proportion the military force of this State that the corps of artillery be augmented.

Mr. Page, from the committee composed of the delegates of the first division, reported the following

resolution, which was adopted:

Resolved, That this convention, in consequence of the peculiar and exposed situation of the city of Philadelphia, recommend to the consideration of the legislature the propriety of such a variation in the general law as will permit the establishment in the district now composed of the city and county of Philadelphia of one division of volunteers, and granting for the purposes of supporting the same all the fines imposed and collected from the first and second class within the said district: Provided, That no claim be made by the said division on the general fund, and that it shall determine the number of days of encampment for its own instruction.

The convention adjourned until 3 o'clock this afternoon.

### IN THE AFTERNOON.

A motion was made by Mr. Wells and Mr. W. S. Ramsey to reconsider the vote agreeing to the resolution reported by Mr. Page, from the committee composed of the delegates from the first division.

On the question, Will the convention agree to the motion?

The yeas and nays were required by Mr. Wells and Mr. Davis, and are as follow:

#### YEAS.

Miller, of Adams,

Sanders,

So it was determined in the negative.
On motion of Mr. Williams, the following resolution was adopted:

Resolved, That application be made to Congress by this convention for the passage of an act appro-Resolved, That application be made to Congress by this convention for the passage of an act appropriating for the support and discipline of the volunteers and militia of each State a sum of money to be distributed annually, and in proportion to the representation of each State in Congress; which moneys so appropriated shall be placed at the disposal of the government of the States respectively.

On motion of Mr. Brady, of Franklin county, the following resolution was adopted:

Resolved, That there ought to be a provision made by the legislature for the election of one lieutenant for each company of infantry, artillery, and riflemen, and militia of the first class in this State, in addition to the number of officers now allowed by law.

On motion of Mr. Griswell the following resolution was adopted:

On motion of Mr. Criswell, the following resolution was adopted:

Resolved, That every freeman within this Commonwealth, who shall have equipped himself and served in a regularly organized volunteer company for the term of seven years, shall be exempt from military duty in time of peace.

The following resolution was offered by Mr. Straub:

Resolved, That this convention recommend to the consideration of the legislature of Pennsylvania the propriety of reducing the number that is, under the existing laws, required to compose a company of the first-class militia; which was not agreed to.

The following resolution was offered by Mr. Fleming:

Resolved, That volunteers hereafter to be organized of the same description of force have a similar

uniform; which was not agreed to.

On motion of Mr. Franklin, the following resolution was adopted:

Resolved, That it be recommended to the legislature to pass a law requiring all major and brigadicr generals and staff officers to equip themselves, and to parade at least once a year.

Mr. Merrill, from the committee appointed to draught a memorial to Congress, reported the following; which was adopted:

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

The memorial of a convention of citizens assembled from the different military divisions of the Com-The memorial of a convention of citizens assembled from the different military divisions of the Commonwealth of Pennsylvania most respectfully represents: That the people of Pennsylvania are deeply impressed with the belief that the present militia system of the United States is burdensome and inefficient; that, since the passage of the act of 1792, the number of men included within its provisions has increased so much, and will continue to increase so rapidly, that it is inexpedient for the government to attempt to arm and instruct the whole body. They also believe that on no occasion can the necessities of the country require the actual services of so great a number of armed men as is now included within the provisions of that act. They therefore most respectfully request your honorable bodies to revise the present militia system, and to make such changes therein as shall enable the government to arm and to instruct at least a portion of those who may be subject to enrolment.

The eighth resolution attached to the report of the committee to suggest matters for the considera-

tion of the convention was then adopted.
On motion of Mr. Davis,

Resolved, That a central committee of correspondence be appointed to promote the objects of this

Orderéd, That Colonel Walter S. Franklin, Captain E. W. Roberts, and Captain Hugh McIlwaine be said committee.

On motion of Mr. Torbert,

Resolved, That the delegates from each division appoint a committee of three to correspond with the central committee.

Whereupon the following persons were appointed:

First division.—Colonel James Page, Colonel Joseph Riley, Major N. Nathans, Philadelphia.

Second division.—Major General William T. Rogers, Doylestown; Colonel John Davis, Davisville; Colonel Simpson Torbert, Dolington.

Third division.—Major John Kerlin, Downingtown; Lieutenant John K. Zeilin, Chester; Lieutenant

David B. Reed, West Chester.

Fourth division.—Major Frederick Hambright, Lancaster; Major John Maglaughlin, Elizabethtown; Captain David Miller, Lancaster.

Fifth division.—General Michael Doudel, York; General Thomas C. Miller, Colonel Michael Clarkson,

Gettysburg.

Sixth division.—General George D. B. Keim, Reading; Major William F. Dean, Pottsville; Captain E. W. Roberts, Harrisburg.

Seventh division.—Colonel George Weber, Kreidersville; Major John W. Hornbeck, Allentown; Captain Oliver S. Dimmick, Milford.

Eighth division.—General Henry Frick, Milton; Colonel Joseph Paxton, Catawissa; Colonel C. M.

Straub, Selinsgrove.

Ninth division.—Colonel James P. Bull, Towanda; James Lowry, esq., Wellsborough; Major Robert Fleming, Williamsport.

Tenth division.—Captain William Williams, Huntingdon; Major Abraham S. Wilson, Lewistown; Cap-

tain George Buchanan, Spring Mills, Centre county.

Eleventh division.—General Willis Foulke, Carlisle; Major Alexander Magee, Bloomfield; Captain

Jasper E. Brady, Chambersburg.

Twelfth division.—Major Isaac Teeter, Ebensburg; Captain Thomas B. McElwee, Bedford; Captain

Daniel Weyand, Berlin.

Thirteenth division.—Major John B. Alexander, Greensburg; Colonel Samuel Evans, Uniontown, Fayette county; Lieutenant L. L. Bigelow, Adamsburg, Westmoreland county.

Fourteenth division.—Colonel John Buckingham, West Buckingham, Washington county; Colonel Isaac Hodgens, Washington, Pennsylvania; Major Corbly Garard, Whiteley, Greene county.

Fifteenth division.—Major E. Travilla, Major A. McFarland, Jonathan Large, esq., Pittsburg.

Sixteenth division.—Brigadier General John Dick, Meadville; Colonel William Hamilton, Mercer;

Colonel Joseph Vera, Beaver On motion of Mr. Merrill, the following resolution was unanimously adopted:

Resolved, That the thanks of this convention be, and they are hereby, tendered to the president, vicepresidents, and secretaries thereof, for the ability, impartiality, and diligence with which they have discharged their duties.

On motion of Mr. Miller, of Adams, the following resolution was unanimously adopted:

Resolved, That the thanks of this convention be tendered to the commissioners of the county of Dauphin for their kindness in granting the use of the court-house.

On motion of Mr. Nathans, the following resolution was unanimously adopted:

Resolved, That the thanks of this convention be, and they are hereby, tendered to the committee appointed to suggest matters for the consideration of the convention for their diligent discharge of

that duty.

On motion of Mr. Page,

Ordered, That Messrs. Page, Ringland, and Franklin be a committee to revise the proceedings of this

No. 510.

1st Session

ANNUAL RETURNS OF THE MILITIA OF THE UNITED STATES. FOR 1831.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 7, 1832.

DEPARTMENT OF WAR, February 6, 1832.

Sm: I have the honor to transmit herewith abstracts of the returns of the militia of the United States, required by the first section of an act of Congress of the 2d March, 1803, the more effectually to provide for the national defence, by establishing a uniform militia throughout the United States.

I have the honor to be, very respectfully, your obedient servant,

LEWIS CASS.

Abstract of the general annual returns of the militia of the United States, by States and Territories, according to the act of March, 1803, for the year 1831.

No. 511.

[1st Session.

ON THE EXPEDIENCY OF PROHIBITING THE APPOINTMENT OF CAPTAINS IN THE STAFF, OF REDUCING THE NUMBER OF CADETS, AND OF PROMOTING MERITORIOUS NON-COMMISSIONED OFFICERS OF THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1832.

Mr. Drayton, from the Committee on Military Affairs, to whom certain resolutions of the House were referred instructing them to inquire into the expediency of retaining captains with their companies, of vesting a discretion in the Executive to promote meritorious non-commissioned officers, of reducing the number of the cadets at the Military Academy, so as to enable the President to exercise this discretion, and of prohibiting the appointment of any cadet under the age of seventeen years, reported:

It is obvious to every one who is conversant with the details of an army that its police, good order, and discipline depend more upon the ability and personal attention of officers at the head of companies than of any others in a regiment. It is therefore peculiarly important that captains should not be removed from their appropriate commands. If permanently removed, they are succeeded by lieutenants, who do not feel so strong an excitement to the faithful and laborious performance of their duties, as the credit which they ought to receive for their exertions would not devolve upon themselves, but upon their absent captains. This necessarily tends to impair that professional pride and emulation without which a military body becomes a sluggish and comparatively an inclinient mass. If a captain be occasionally removed from his company, his place would frequently be supplied by those who have not his experience, and who differ from him in their opinions and dispositions. The progress of improvement would thus be retarded by a departure from uniformity of system, and disposition would be produced among the soldiers by novel and perhaps conflicting regulations, sometimes mildly and sometimes harshly enforced, according to the varying tempers of the officers in temporary authority. To remedy the injurious results which the committee have adverted to, they recommend the abolition of the practice of so employing captains as to detach them from the superintendence of their companies.

It is unnecessary to invest the President with a discretion to promote non-commissioned officers to second lieutenancies. This discretion he already possesses under the Constitution; but he cannot appoint second lieutenancies. This discretion he already possesses under the Constitution; but he cannot appoint a supernumerary or brevet officer without the special authority of Congress. By an act passed on the 29th of April, 1812, the President, when there is no vacancy in the line, is empowered to attach the graduates of the Military Academy to any corps, by brevets of the lowest grade, "provided that there shall not be more than one supernumerary officer to any company at the same time." This power being limited in its application to graduates of the Military Academy, cannot be extended to other persons. Should the President, then, confer a second lieutenancy upon a non-commissioned officer, he would place him over all the brevet second lieutenants previously existing, in violation of a principle of military usages along extablished that a departure from it expending number requirer gircumstances, would be extended so long established that a departure from it, excepting under peculiar circumstances, would be attended with the most injurious consequences. To enable the President, therefore, to act upon his discretion of promoting non-commissioned officers without violating military usage, the committee have inserted a

special provision in the bill which they propose to report.

To ascertain what reduction ought to be made in the number of the cadets at the Military Academy so as to enable the President to promote non-commissioned officers, even should all the graduates be appointed to brevet second lieutenancies, it will be necessary to calculate, with as much accuracy as practicable, the number of graduates which the present establishment furnishes, as well as the number of

vacancies which annually occur in the army.

The late Secretary of War, in his report to Congress on the —— day of January, 1831, stated that the number of vacancies for the preceding five years annually averaged twenty-two, while the number of graduates at the Military Academy annually averaged forty. The present Secretary of War, in his report to Congress at the commencement of this session, states the annual average of vacancies during the same period to have been twenty-three, and that of the graduates to have been forty. Neither of these statements agrees with the Army Register, from which it appears that the vacancies from resignations, deaths, &c., during the period referred to, (excepting the year 1828, for which no list was published,) were twenty-seven in 1826, thirty in 1827, twenty-five in 1829, and twenty-four in 1830. Now, assuming for 1828 the mean for the preceding and following year, which is twenty-seven, the whole number of vacancies for the five years was one hundred and thirty-three, making the annual average a little less than twenty-seven. In this estimate eight brevet second lieutenants are included, but it is immaterial in the result whether In this estimate eight brevet second lieutenants are included, but it is further to be remarked that they are added to the vacancies or subtracted from the graduates. It is further to be remarked that during the five years from 1826 to 1830 inclusive, the number of graduates was greater and that of the hand in any other equal period which could have been selected. Taking the whole of the interval from the reduction of the army in 1821 to this time, it will be found that the annual average of vacancies would be twenty-eight, and of graduates thirty-six. This being the number of graduates annually furnished by two hundred and sixty cadets, whose term of study is four years, if the cadets be reduced to two hundred and thirty-seven, and their term of study be enlarged to five years, the annual average of graduates would be about twenty-four, a number which would not interfere with the occasional promotion of non-commissioned officers, even should commissions be conferred upon all the graduates; but as the President's power of appointing supernumerary second lieutenants will not, should the bill now reported become a law, be restricted to the graduates at the Military Academy, he may exercise his discretion indiscriminately upon graduates and non-commissioned officers. By substituting five years as the term of study instead of four, the course of instruction at the academy would be extended and essentially improved by affording on conventing the course of instruction at the academy would be extended and essentially improved by affording an opportunity for comprehending within it much practical and scientific knowledge highly important in the education of an officer, from the acquisition of which the cadets have hitherto been excluded solely through want of time.

If the cadet remained only four years at the Military Academy, the committee would recommend that he should not be admitted into it until he was seventeen; but as it is contemplated that his term of study should be five years, it is considered to be preferable that he should be received at the age of sixteen, as

by the time that he has passed through his course of instruction he will have attained the age of twenty-

As connected with a part of the subject referred to the committee, they have introduced into the bill submitted by them some provisions for the improvement of the organization and of the general condition of the Military Academy, which they deem to be necessary in order to carry into more perfect execution the important objects for which that institution was erected.

To effect the foregoing purposes, the committee have reported the following bill:

#### TWENTY-SECOND CONGRESS, FIRST SESSION.

In the House of Representatives, January 4, 1832.

On motion of Mr. Wickliffe, 1st. Resolved, That the Committee on Military Affairs be instructed to inquire into the expediency of vacating all present and prohibiting all future appointments in the staff of the army from the captains of the line, and to require that each captain shall be kept with and in command of his appropriate company.

2d. That the Executive be vested with a discretion to appoint from the non-commissioned officers of

the army, where they may be found worthy of promotion, a certain portion of the second lieutenants.

3d. That, in order to enable the President to do this, the committee further inquire into the expedieny of reducing the number of cadets in the Military Academy at West Point, and to prohibit the appointment of any cadet who has not arrived at the age of seventeen years.

Attest:

M. S. CLARKE, Clerk.

22D Congress.]

No. 512.

[1st Session.

### ON A CLAIM TO LAND IN MICHIGAN UPON WHICH FORT GRATIOT STANDS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 13, 1832.

Mr. Drayton, from the Committe on Military Affairs, to whom the petition of Andrew Westbrook was referred, reported:

By referring to a letter dated the 16th June, 1829, written by the Attorney General of the United States to the Secretary of War, upon the subject of the petitioner's claim, it appears to the committee that he is not entitled to the relief which he seeks for; the committee, therefore, recommend the adoption of the following resolution:

Resolved, That the prayer of the petitioner ought to be rejected.

WAR DEPARTMENT, December 26, 1829.

Sir: Your letter of the 24th, and the accompanying papers, relative to the claim of Andrew Westbrook, have been received. As furnishing information on the subject, I send you a copy of a letter addressed from the department in June last to the commanding officer at Fort Gratiot, with the opinion which was given by Mr. Berrien, the Attorney General.

Very respectfully, your obedient servant,

JNO. H. EATON.

Col. W. Drayton, Chairman of the Military Committee.

DEPARTMENT OF WAR, June 17, 1829.

Sir: The delay in answering your communication of the 23d of April has been occasioned by the absence of the Attorney General from the seat of government. His opinion I now send you. He having settled that the United States claim to Fort Gratiot is valid and unaffected by that of P. Bonhommie, you will be expected to retain the post until ordered from this department to abandon it. If, for any imputed trespass, or for the retention of the fort and adjacent lands, suits shall be brought against you, or if, under any circumstances, legal proceedings shall arise, you will call for the aid of the United States attorney in Michigan, and employ an assistant counsel should you deem it advisable.

Should anything arise, you will forthwith advise the department. Suits against the United States

Should anything arise, you will forthwith advise the department. Suits against the United States officers for alleged trespasses becoming frequent, and the damages assessed being often excessive and wrong, it will become necessary to propose to Congress at the next session to direct appeals in all cases where the government shall be a party to the Supreme Court.

I have the honor to be your obedient servant,

J. H. EATON.

Attorney General's Office, June 16, 1829.

Sir: By the statement of the Commissioner of the General Land Office, it appears that the land on which Fort Gratiot stands, and certain lands adjacent to it, had, before the 21st August, 1818, been reserved by the President of the United States for military purposes, and that on that day letters were addressed to the register and receiver of the land office at Detroit, notifying to them the fact of such

The conflicting claim of Pierre Bonhommie to the same land, it appears by the same statement, was filed on the 31st December, 1808, under the provisions of the second section of the act of 3d March, 1807,

but no other proceedings appear to have been had upon such claim before that commission.

This claim was again presented to commissioners acting under the authority of the act of the 11th of May, 1820, and confirmed with a suggestion of the expediency of changing the location, as it includes the lands on which Fort Gratiot stands. The executive department having considered the report of this commission, particularly in relation to lands reserved for military purposes, as being exceptionable, the whole matter was referred to Congress, who thereupon passed the act of 17th April, 1828, which confirms the claims purporting to be confirmed, or recommended for confirmation by the commissioners last referred to, with a proviso that such act should not be construed (inter alia) "to extend to any lands occupied by the United States for military purposes."

From this summary it is manifest that Pierre Bonhommie has no claim which can be recognized by the executive department to any lands within the military reservation on which Fort Gratiot stands. Whatever right the priority of his location may have given to him, that right has not been recognized by Congress, under whose authority, as given by the act last referred to, a patent can only issue for so much

of the land embraced in his claim as lies without the limits of such military reservation.

It is seen by the statement of the Commissioner of the General Land Office that this land was many years since occupied by the United States for military purposes, and the fact is recognized in the decision of the commissioners. Whether the claim of Pierre Bonhommie, founded on the priority of his location to the military occupation of these lands by the government of the United States, ought to have been recognized by Congress, is not for us to decide. It suffices that that claim was inchoate, and not susceptible of enforcement but by the aid of the government, and that aid has been afforded on terms which expressly forbid the extension of the confirmation to the lands included within the military reservation.

In the natural posture of this metter, Lam therefore of oninion that it is the duty of the executive

In the actual posture of this matter, I am therefore of opinion that it is the duty of the executive department to maintain the claim of the United States to the lands so included within the military reser-

vation above referred to

I have the honor to be, very respectfully, sir, your obedient servant,

J. M. BERRIEN.

Hon. J. H. EATON, Department of War.

22d Congress.]

No. 513.

[1st Session.

ON CLAIM OF THE OFFICERS OF THE ARMY AT FORT DELAWARE TO BE REIMBURSED FOR LOSSES BY THE DESTRUCTION OF THAT FORT BY FIRE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 18, 1832.

Mr. Drayton, from the Committee on Military Affairs, to whom was referred the petition of several officers of the army, praying to be reimbursed for losses which they sustained in consequence of the destruction of Fort Delaware by fire, reported:

That, as a general principle, they should deem it inexpedient to make any compensation to officers for losses which they might incur from the casualty of fire; but as it satisfactorily appears that the petitioners and the garrison at Fort Delaware, in their zeal to preserve the public stores, utterly neglected all attention to their own property, the committee are of opinion that this special circumstance constitutes an exception to a general rule, and entitles the sufferers to relief. They therefore report a bill for that purpose.

To the honorable the Senate and House of Representatives:

The petition of the undersigned officers of the United States army formerly stationed at Fort Delaware, most respectfully showeth: That your petitioners, by the conflagration of the post above named, on the night of the 8th of February last, have sustained considerable losses by the destruction of a large portion of their furniture, stores, and the clothing of themselves and families; and they would state that during the time in which they were employed in endeavoring to arrest the progress of the flames, removing the powder from the magazines, and various other public duties incident to their situation, they were precluded from making those endeavors to save their own property which they otherwise might have made. And whereas their losses are in no manner to be attributed to their carelessness or negligence, but to their endeavors to save the public property, they most respectfully solicit that they may be remunerated therefor. In support of the above statement, they beg leave to refer to the report of the court of inquiry held in relation to the burning of Fort Delaware, of which Brevet Brigadier General Fenwick was president.

They would also represent that the annexed schedule contains, as they believe, a very small estimate of their respective losses. And in thus requesting aid, as in duty bound, your petitioners will ever pray.

W. W. MORRIS, Col. 4th Artillery.

B. K. PIERCE, Maj. U. S. Artillery.

JNO. GARDNER, Capt. 4th Artillery.

CHARLES WARD, Lieut. 4th U. S. Art.

ALFRED W. ELWES, Ass't Surgeon.

W. P. BAINBRIDGE, Lieut. U. S. Artillery.

Newcastle, Delaware, December 24, 1831.

Headquarters of the Army, Washington, January 27, 1832.

Sin: Your letter of the 24th of January, addressed to the Secretary of War, asking for a copy of the proceedings of the court of inquiry of which Brevet Brigadier General Fenwick was president, relating to the burning of Fort Delaware, has been referred to me. I have now the honor to transmit to you a copy of the proceedings in question.

Very respectfully, sir, your most obedient servant,

ALEX. MACOMB, Major Gen.

Colonel WM. DRAYTON, Ho. of Reps., Capitol.

Proceedings of a Court of Inquiry held at Newcastle, State of Delaware, by virtue of the following order:

### ORDER No. 4.

Adjutant General's Office, Washington, February 16, 1831.

On the demand of Brevet Major Pierce, of the 4th regiment of artillery, commandant of Fort Delaware, a court of inquiry, to consist of Brevet Brigadier General Fenwick, 4th regiment of artillery, Brevet Lieut. Colonel Bankhead, 3d regiment of artillery, and Brevet Major Payne, 4th regiment of artillery, members, will assemble at Newcastle, Delaware, on the 19th of February, 1831, or as soon thereafter as practicable, to inquire into the causes and circumstances which led to the burning of Fort Delaware, and to report the facts, together with their opinion thereon.

Lieut. Henry A. Thompson, adjutant of the 4th regiment of artillery, will act as recorder to the

Should any circumstance prevent the attendance of a member, the remaining member or members of the court will proceed to the inquiry notwithstanding.

By order of Major General MACOMB.

R. JONES, Adjutant General.

Newcastle, Delaware, February 21, 1831.

The court of inquiry assembled, pursuant to the above order. Present: Brevet Brigadier General Fenwick, 4th regiment of artillery; Brevet Lieutenant Colonel Bankhead, 3d regiment of artillery; Brevet Major Payne, 4th regiment of artillery, members; Lieutenant Henry A. Thompson, adjutant 4th regiment

of artillery, recorder.

Brevet Major B. K. Pierce, of the 4th regiment of artillery, commanding officer at Fort Delaware, being duly sworn, states: On the night of the 8th instant, at about half past ten o'clock, I heard the sentinel inside the garrison gateway give the alarm of fire. I immediately sprang from my bed and opened the front door of my quarters, from which I could see the greater part of the fort. I looked for a moment, but did not discover any fire. In the meantime the sentinel stepped upon the bridge and hailed the guard. I then observed the smoke ascending from the roof, and the fire shining through the crevice of the door (which is in the roof) over the centre of the quarters occupied by Lieutenant Tuttle, of the of the door (which is in the roof) over the centre of the quarters occupied by Lieutenant Tuttle, of the engineer corps. I then called as loud as I could for the troops immediately to turn out with axes, buckets, and whatever they could procure, directing the "long roll" to be beat at the same time. With the first men that appeared I repaired immediately to the stairway to the loft where I first discovered the fire; by this time the fire burst forth from the roof in a large body, and it was impossible for any of us to ascend into the loft in consequence of the flames and smoke. A line of men was formed without delay from the ditch to the steps, and the water was thrown on at this place. Finding it impossible to arrest the progress of the flames here, we repaired to another part of the fort to cut away the roof; but the smoke was so dense that we could not remain in the loft. Similar attempts were made at one or two places more with the me, but always met with the same dense smoke to repel us. The whole of the roof, in a very short time, was in a blaze. From the commencement of the fire, and during the whole night, the command were exerting themselves in endeavoring to arrest the fire, and saving all the public property they could. As soon as I discovered the fire spreading, I directed all the powder to be taken from the magazine and to be thrown through the embrasures on the outside. The powder exploded in consequence of the fire falling on it from the roof; there was no other explosion except that which occurred on the outside, and no damage done to the work by the explosion no damage done to the work by the explosion.

Question by the court. What means had you to extinguish the fire? Were there any public buckets,

were there any public buckets, fire engine, or hose? How was water obtained?

Answer. The only means we had were such axes, public and private, as were in the garrison. There were no public buckets, no fire engine, and no hose at the post. The water was obtained from the ditch around the fort by cutting through the ice.

Question by the court. What were the standing orders of the post respecting lights and fires? were they recorded to the officer of the great?

they regularly communicated to the officer of the guard?

Answer. The standing orders of the post are, that all lights and fires should be extinguished at the "taps" after tattoo; that no fire or lights should be carried across the parade except in lanterns. They were regularly communicated to the officer of the day and to the guard; and it was a standing order that the guard should be particularly vigilant in discovering and reporting any fire that should proceed from the chimneys or stove pipes, or other places. Aware of my responsibility as commanding officer, I was very particular in pressing upon the whole command the necessity of constant vigilance in regard to fires, particlarly as the roof was always exposed to such a casualty, being made of wood, and of very combustible material. As a means of precaution, the chimneys and stove pipes were frequently burnt out in wet weather.

Lieutenant Brown, 4th regiment of artillery, being duly sworn, states: When I was first alarmed I ran to the door, and the fire was then making its appearance over the quarters of Lieutenant Tuttle; the fire had not obtained the ridge of the roof. I could distinctly see the fire, and there is not a shadow of doubt in my mind but that the fire communicated to the roof of the large temporary wooden covering which surmounted the walls of the fort from the stove or chimney pipe appertaining to Lieutenant Tuttle's quarters. I am confirmed in this opinion from the fact that, as soon as I could put on my clothes, I proceeded to the magazine immediately contiguous to those quarters, and from thence could see no fire in any other part of the building, although, in a very few seconds, (such was the unparalled rapidity of the flames both to the right and left,) the flames and smoke were seen issuing from the windows on either side. When I reached the parade ground I found a few men clothed, and having ordered them to follow me, I hastily proceeded to the magazine, knowing the doors were wooden, and that no time was to be lost in disposing of the powder. When I got to the door I found that Major Pierce had already preceded me there, and that the men were, under his directions about entering the magazine. Finding my services not required there, I again proceeded to the parade, and from thence to my quarters. Having, as I first crossed to go to the magazine, ordered Sergeant Beal to take some men and go to the company storeroom, and endeavor to save the clothing, the sergeant undertook this dangerous duty, got safely to the storeroom, but was immediately followed by the smoke in such dense columns that his retreat was cut off, and he had to cut through company D's storeroom in order to escape. Finding now that all human exertions to save the upper building were vain, there being no fire engine at the post, I turned my whole attention to my family, and succeeded, with infinite difficulty, (the increase and rapidity of the flames being beyond all possible calculation,) in saving them. After having safely got them out, I attempted to return, in order to save my company quarters; but they were now all in one vivid flame, and there was no getting into the fort by the gateway. I therefore proceeded with ten or fifteen men opposite my quarters, crossed the hard-frozen ditch, and having crept through an embrasure again reached them. Having collected what few buckets we could, we commenced extinguishing the burning beams which were constantly falling on the balcony from the roof above. In this excessively arduous and dangerous employment the detachment continued for about six successive hours. The labor and exertions of the men were incredible; their conduct was beyond all praise. Apparently regardless of the immense flaming beams which were constantly falling, they continued without intermission to keep the fire down during the whole time, although the wooden fronts, the window shutters, windows, and casings were repeatedly in flames. I had very sanguine hopes that their exertions would be crowned with success, and that Lieutenant Morris's and my own quarters would be saved, when it was reported to me that the flames were undermining us. I ran down stairs, and found Lieutenant Morris's kitchen and all the beams overhead in flames. Not yet despairing of saving my own quarters, I directed Corporal Chanier and Private Beal to cut away the floor near a buttress, and where the passage was very narrow, intending here to make a final stand, when it was again reported to me that the fire had taken to the bottom of the floor of my quarters, both to the right and left. I soon found the report to be too true by the flames issuing forth in front and rear. All hope being now gone, I ordered the men to retreat for their lives, which the brave fellows all did in safety by means of a small back stairs which led to my kitchen and from thence through an embrasure, the fire surrounding them on every side. I cannot express in terms of sufficiently high presse my admiration of fire surrounding them on every side. I cannot express, in terms of sufficiently high praise, my admiration of the conduct of the detachment under my command. Their exertions were incessant from about 11 o'clock at night until, I think, about 5 o'clock in the morning, and during a large portion of this time exposed to great danger from the constantly falling timbers. So far as my knowledge extends, the police of the garrison, as it respects fires, has been to enforce the care and caution necessary at all times to be observed in guarding against this dangerous element; and for this purpose the sentinels have always had it in orders to see that all fires were extinguished at tattoo, and also to be vigilant and watchful, that if any

fires should occur they might immediately report it.

Licutenant Ward, 4th regiment of artillery, being duly sworn, states: I was officer of the day on the 8th instant. On my questioning the sentinels on going "the rounds," they all gave their orders as if they understood them correctly, particularly on the subject of fires. I found them all vigilant and attentive to their duties. The flues and chimneys were burnt out (in rainy weather) when it was deemed necessary to have them cleansed. The commanding officer, being under constant apprehension that some accident might occur from fire, endeavored at all times to press upon the command the importance of vigilance in covarding against fire

guarding against fire.

Lieutenant Tuttle, of the engineer corps, being duly sworn, states: The following are the facts as they occurred to me, although, from the confusion of the moment, I may not recollect all the particulars. On the first alarm, my assistant, accompanied by two privates, ascended the staircase over my quarters, and immediately returned and reported that the fire was progressing with surprising rapidity underneath the shingles along the roof, in a westerly direction, and, he thinks, from the distance of a few feet. The fire passed from one curtain to another, as nearly as I can recollect, without bursting from the intermediate faces and flanks. Every effort to save both public and private property was made during the space of nine hours. The quarters, however, were necessarily abandoned; all the officers remaining on the

of nine hours. The quarters, however, were necessarily abandoned; all the officers remaining on the parade, notwithstanding the dense and suffocating volumes of smoke.

Corporal Parsons, of company A, 4th regiment of artillery, being duly sworn, states: I was acting sergeant of the guard on the 8th instant. The orders I received from the non-commissioned officer commanding the guard whom I relieved, and from the officer of the day, were, to be vigilant about fires, and report them immediately on occurring; and these orders were given to all the sentinels, particularly to No. 2, at the gateway, he being a recruit, but was very attentive to his duty. No. 2 was posted particularly to guard against fires and to give the alarm.

Private Homesan, of company D, 4th regiment of artillery, being duly sworn, states: I was sentinel of the post No. 2 on the 8th instant and was posted at nine clock at night. I discovered a smoke about

of the post No. 2 on the 8th instant, and was posted at nine o'clock at night. I discovered a smoke about

half past ten, or between ten and eleven o'clock that n ght, when I immediately opened the gate and called for the corporal of the guard. I gave the alarm of fire immediately afterwards, and in a very short time the fire burst out from the roof over Lieutenant Tuttle's quarters, very near the stove pipe. My orders were to take charge of the public property; to see that there was no dirt or filth thrown on the parade; to allow no water to be taken from the tanks, except when issued under the charge of Corporal Hays; to prevent all noise and quarrelling; to see, after tattoo, that no light was taken across the parade or about the quarters, except in lanterns; to allow no one to pass without the countersign; if a fire was discovered, to call immediately for the corporal of the guard and give the alarm.

Lieutenant Turne further states: As far as I can judge, an excellent police has been preserved on sland. On the morning of the 9th instant, previous to the ascent of any other person, I visited the summit of the work, and, in presence of witnesses, discovered a portable furnace on the crown of the arch, where some citizens suppose that they first saw the fire, and at some distance in the same direction the remains of a lantern where the fire originated; or whether from accident or design, I can form no opinion.

The court, after a full examination into the causes of the conflagration of Fort Delaware on the 8th instant, have been induced to the following conclusion from the testimony presented to it. The evidence seems to establish the following facts: that the fire was communicated from a chimney to the roof by accident rather than design; that so soon as discovered every exertion was made and every means employed dent rather than design; that so soon as discovered every exertion was made and every means employed by the officers and men to extinguish it and arrest its progress; that their efforts were ineffectual, both from the want of engines and implements necessary on such occasions, as well as from the very combustible nature of the materials of the roof and platforms. It appears, moreover, from the testimony, that every precaution was taken by the commanding officer, Brevet Major Pierce, of the 4th regiment of artillery, from his instructions and his counsel, to guard against fire; that the guard and sentinels were particularly alert and attentive in the execution of their duty. The court is therefore unanimously of opinion that neither blame nor censure can attach to Major Pierce, the commandant, nor any of his command; that every exertion had been made within the power of the officers and men to save the public property; that although their great exertions proved unavailing, the court is in justice bound to express their further although their great exertions proved unavailing, the court is in justice bound to express their further opinion that much credit is due to them for their zeal and persevering efforts to contend with the difficulties constantly opposing them, even to the sacrifice of their private property, and the imminent danger to which their families were so long exposed.

The court adjourned to meet to-morrow, at 9 o'clock in the morning, in order to give the recorder time to relate a foir carrier of its representation.

time to make a fair copy of its proceedings.

Newcastle, Delaware, February 22, 1831.

The court met pursuant to adjournment. Present: Brevet Brigadier General Fenwick, 4th regiment of artillery; Brevet Lieutenant Colonel Bankhead, 3d regiment of artillery; Brevet Major Payne, 4th regiment of artillery, members; Lieutenant Henry A. Thompson, adjutant 4th regiment of artillery,

The proceedings having been read over, the court adjourned sine die.

JOHN R. FENWICK, Brevet Brigadier General. H. A. THOMPSON, Adj. 4th Reg. Art., Recorder.

Approved:

A. MACOMB, Major General, com'g the Army.

True copy:

R. JONES, Adjutant General.

JANUARY 27, 1832.

## ORDER No. 13.

Adjutant General's Office, Washington, April 27, 1831.

I. The proceedings of the court of inquiry of which Brevet Brigadier General Fenwick is president, held at Newcastle, Delaware, in pursuance of Order No. 4, and at the request of Brevet Major Pierce, of the 4th regiment of artillery, the commandant of Fort Delaware, to inquire into the causes and circumstances which led to the burning of Fort Delaware, have been received at general headquarters.

II. The following is the opinion of the court:

The court, after a full examination into the causes of the conflagration of Fort Delaware on the 8th instant, (March,) have been induced to the following conclusion from the testimony presented to it. The evidence seems to establish the following facts: that the fire was communicated from a chimney to the roof by accident rather than design; that so soon as discovered every exertion was made and every means employed by the officers and men to extinguish it and arrest its progress; that their efforts were ineffectual, both from the want of engines and implements necessary on such occasions, as well as from the very combustible nature of the materials of the roof and platforms. It appears, moreover, from the testimony, that every precaution was taken by the commanding officer, Brevet Major Pierce, of the 4th regiment of artillery, from his instructions and his counsel, to guard against fire; that the guard and sentinels were particularly alert and attentive in the execution of their duty. The court is therefore unanimously of opinion that neither blame nor censure can attach to Major Pierce, the commandant, nor any of his command; that every exertion had been made within the power of the officers and men to save the public property; that although their great exerting property approach the results of the property in the count is in instance bound to express their first that that although their great exertions proved unavailing, the court is in justice bound to express their further opinion that much credit is due to them for their zeal and persevering efforts to contend with the difficulties constantly opposing them, even to the sacrifice of their private property, and imminent danger to which their families were so long exposed.

I. The general-in-chief approves the opinion of the court. The court of inquiry of which Brevet Brigadier General Fenwick is president is hereby dissolved.

By order of Major General Macomb.

R. JONES, Adjutant General.

R. JONES, Adjutant General,

22d Congress.]

## No. 514.

[1st Session.

ON THE CLAIMS OF CONNECTICUT FOR THE SERVICES OF THE MILITIA OF THAT STATE DURING THE WAR OF 1812-15.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 23, 1832.

DEPARTMENT OF WAR, February 20, 1832.

SR: In obedience to the resolution of the House of Representatives of the 6th ultimo, directing the Secretary of War to report to that House "a statement of the claims of the State of Connecticut against the United States for disbursements made by said State, and for the services and expenses of her militia during the late war, and of such proceedings as may have been had at the War Department in relation thereto," I have the honor to transmit a report of the Third Auditor of the Treasury, which will furnish the information required.

I have the honor to be, very respectfully, your obedient servant,

LEWIS CASS.

Hon Andrew Stevenson, Speaker of the House of Representatives.

A schedule of correspondence, &c., of which copies or extracts accompanied the letter of the Third Auditor to the Hon. Secretary of War, dated February 18, 1832, having relation to the claims of the State of Connecticut.

Correspondence between the Secretary of War and the Governor of Connecticut.

- July 4, 1814.—Secretary of War to the Governor. Aug. 1, 1814.—Governor Smith to the Secretary of War. Aug. 11, 1814.—Governor Smith to the Secretary of War.

- Aug. 17, 1814.—Secretary of War to Governor Smith.

  Sept. 3, 1814.—Governor Smith to the Secretary of War.

  Sept. 14, 1814.—Governor Smith to the Secretary of War.

  Sept. 17, 1814.—Secretary of War to the Governor of Massachusetts. [A marginal note in the correspondence records evinces that a similar letter was written to the governor of Connecticut.]

  Oct. 10, 1814.—Governor Smith to the Secretary of War.
- Oct. 17, 1814.—Secretary of War to Governor Smith.

Correspondence between the Secretary of War and Brigadier General Cushing.

- July 12, 1814.—Secretary of War to General Cushing.
  July 27, 1814.—General Cushing to the Secretary of War, [extract.]
  Aug. 12, 1814.—General Cushing to the Secretary of War, [extract.]

  Aug. 30, 1814.—General Cushing to Governor Smith.
  Sept. 2, 1814.—General Cushing to Governor Smith.
  Sept. 9, 1814.—Governor Smith to General Cushing.

## Miscellaneous.

- Aug. 11, 1814.—Governor Smith's order to Brigadier General Lusk, referred to in the governor's letter

- to General Cushing of same date.

  Aug. 19 and 20, 1814.—Proceedings of the civil authority and selectmen of New Haven.

  Aug. 24, 1814.—Proceedings at a meeting of the governor and council.

  Aug. 27, 1814.—Letter of Brigadier General Isham to General Cushing, referred to in General Cushing's letter to the Secretary of War, September 8, 1814.

Sept. 12, 1814.—Letter of Brigadier General Cushing to Brigadier General Lusk, referred to in General Cushing's letter to the Secretary of War of the same date.

Sept. 12, 1814.—General Lusk's reply, referred to in General Cushing's letter to the Secretary of War of

the same date.

Sept. 12. 1814.—General Cushing's order, referred to in General Cushing's letter to the Secretary of War of the same date.

Oct. 31, 1816.—Statement of the claims of Connecticut.

Jan. 9, 1817.—Governor Smith's summary view of the circumstances under which the militia of Connecticut were in service.

Feb. 22, 1817.—Directions of the War Department as to the settlement of the claims. June 26, 1819.—Letter of the Third Auditor to Governor Wolcott.

Statement of remarks by the Third Auditor, made on the reinvestigation of the claims.

## TREASURY DEPARTMENT, Third Auditor's Office, February 18, 1832.

Sin: In pursuance of the resolution of the House of Representatives of the 6th ultimo, directing the War to report to that House a statement of the claims of the State of Connecticut against the United States for disbursements made by said State, and for the services and expenses of her militia during the late war, and of such proceedings as may have been had at the Department of War in relation thereto, and of which resolution a copy has been by you referred to this office, I have the honor to send to you herewith a transcript of the statement of the claims as prepared by the comptroller of the State, a transcript of the statement of the claims as prepared by the comptroller of the State, a transcript of the statement of the claims as prepared by the comptroller of the State, a transcript of the statement of the claims as prepared by the comptroller of the State, a transcript of the statement of the claims as prepared by the comptroller of the State, a transcript of the statement of the claims as prepared by the comptroller of the State, a transcript of the statement of the claims as prepared by the comptroller of the State, a transcript of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the statement of the claims as prepared by the comptroller of the script of the instructions given by the War Department on the 22d February, 1817, for my guidance in auditing them, and transcripts of certain other papers, and of the correspondence between the governor of the State and the War Department, between the governor and Brigadier General Cushing, and between the state and the War Department, between the governor and origadier General Cusning, and between the general and the War Department, wherein the circumstances on which the instructions seem to have been predicated are described. Soon after the date of those instructions, to wit, on the 11th March, 1817, a warrant was issued by the Secretary of War for an advance to the State of \$50,000 on account, and with which sum the State stands charged. Subsequently the claims received an examination in this office, and a detailed statement exhibiting the result was transmitted by me to his excellency Governor Wolcott on the 26th June, 1819, with a letter, of which a copy is herewith sent. No reply thereto has wolcott on the 20th June, 1819, with a letter, of which a copy is herewith sent. No reply thereto has ever reached me, and the claims remain unsettled. Since then decisions have been made by the War Department on the settlement of the claims of other States, which in some respects were applicable to those of the State of Connecticut. Owing thereto, and to other causes, it has been deemed proper to give to the latter another examination, and the result thereof is particularly explained in a long statement of remarks herewith transmitted. A schedule of the papers sent accompanies them. Various correspondence, other than that therein specified, is on file with the accounts, but being all dated prior to July, 1814, and relating only to militia, the services of which have been recognized by the general government, copies thereof are supposed to be needless, and have not therefore been furnished. copies thereof are supposed to be needless, and have not, therefore, been furnished.

With great respect, your most obedient servant,

PETER HAGNER, Auditor.

Hon. Lewis Cass, Secretary of War.

MILITARY

AFFAIRS.

A summary view of the circumstances under which the militia of the State of Connecticut were brought into service during the late war.

### 1813.

No part of the militia of Connecticut was brought into the field until the American squadron took No part of the militia of Connecticut was brought into the field until the American squadron took refuge in the harbor of New London from the superior naval force of the enemy, June I, A. D. 1813. The pay-rolls of the militia, called into service for the protection of the national vessels and the coast during that campaign were, it is believed, satisfied by the general government, excepting some small detachments suddenly ordered out to repel incursions of the enemy at various points, and who were discharged immediately after the exigency ceased and before notice could be given to the War Department. The pay-rolls of these detachments (small in their amount) were presented by the proper officer to the district paymaster, who informed me personally that he had received orders from Washington to discharge them, but that his funds had then failed. They were afterwards paid by the State and charged to the general government. If other charges appear in our account for militia services during that year the authority for such charges will be found in the correspondence already forwarded. During the same year advances were made by the national government to our quartermaster general and commissary general, in part, for expenses incurred in their respective departments. The assumption of all expenses general, in part, for expenses incurred in their respective departments. The assumption of all expenses of this nature will be seen in the letter from the Secretary of War of the 13th of July, 1813, and the report of Adjutant General Huntington referred to by the Secretary.

## 1814.

In the month of April, A. D. 1814, a division of boats from the blockading squadron entered the harbor of Pettipauge, in Saybrook, and burnt and destroyed a great number of our merchant vessels.—(See letter to Secretary of War, April 14, 1814.\*) The consternation produced along the coast by this measure rendered it necessary to place guards of militia at several points.—(See letter to the Secretary of War, April 28, 1814.) A subaltern's command of infantry was posted at Saybrook; a subaltern's command of cavalry at New Haven to serve as videttes, and a subaltern's command of infantry at Bridgeport. On the 19th of May, Inspector General Kingsbury, commanding the United States troops within this State, issued orders for the inspection and subsistence of these guards.—(See his letter of the 19th of May, in answer to mine of the 17th; see also letter from Secretary of War of 9th of May, 1814.) By referring to the letters of Colonel Kingsbury, under the several dates of 22d of May, 5th, 15th, and 23d of June, 1814, it will appear that guards of militia were continued at these points, increased at some of them, and new ones established at Stonington and at Mill River, in Fairfield. They were occasionally agumented in the course of the campaign, and a part of them remained until peace was concluded. It may be added that sections of these guards were posted at Blackrock, near Bridgeport, at Guilford, near New Haven, at Killingworth, near Saybrook, and at Mistick, near New London. On the 9th of August, 1814, the hostile squadron off New London attacked and bombarded the town of Stonington, and on the same day Brigadier General Cushing, who had taken command of the United States troops in this State, day Brigadier General Cushing, who had taken command of the United States troops in this State, requested of Major General Williams (who had my orders to furnish aid when necessary) a brigade of militia. The whole of Brigadier General Isham's brigade was thereupon immediately ordered into service. On the 10th General Cushing also requested of me seventeen hundred men, (commanded by Brigadier General Lusk,) being a majority of the detachment organized under the President's instructions of the 4th of July, 1814, which requisition was instantly complied with, and the men repaired to New London and its vicinity as early as was practicable.—(See General Cushing's letter of 10th of August, my reply, orders, &c., and letter from Secretary of War, July 4, 1814.) The command of the force thus in service was assigned to Major General Taylor, who had been detailed under the President's instructions of the 4th of July, 1814.

From the menacing operations of the enemy on our shores it was thought advisable by the governor and council to augment the force at *New Haven* and *Bridgeport* to six hundred men. The expediency of the measure was also admitted by General Cushing.—(See his letters of the 22d and 28th of August, 1814.) That force was accordingly ordered into service early in September, under Lieutenant Colonel

Sanford, to strengthen those points and relieve the guards previously stationed.

Some sections of militia were likewise called out in the course of the year 1814 on sudden alarms, and after repelling the enemy were dismissed, under circumstances similar to those which occurred

during the campaign of 1813.

Subsistence and supplies for our militia were furnished in part by the United States, the remainder by the State government.—(See Colonel Kingsbury's letter of 22d of May, and General Cushing's, August, 1814.) The accounts of the quartermaster general and commissary general will show to what extent advances were made by the State for those objects. The several muster-rolls and pay-rolls will also exhibit the number of men employed and the periods of service. I am not conscious that any militia were on duty who do not fall under some one of the exigencies and authorizations above-mentioned; nor do I believe that any considerable expense would have been incurred within this State during the war, but for the honorable purpose of saving our national vessels from centure or destruction. but for the honorable purpose of saving our national vessels from capture or destruction. JOHN COTTON SMITH.

JANUARY 9, 1817.

Correspondence between the Governor of Connecticut and the Secretary of War.

February 22, 1817.

The expenses incurred by the State of Connecticut on account of the militia called into service under the sanction of Colonel Kingsbury (see his letters of the 19th and 23d of May and 5th and 23d of June) will be assumed. Those incurred for the militia called out for the defence of the squadron at New London in 1813-14 will be assumed up to the 12th of September, 1814, after which period no part of the expenses

incurred by the State of Connecticut on account of militia services can be paid under the authority of the executive, as the militia were then withdrawn from the command of the United States officer and placed under that of a State officer, called into service by State authority, and not sanctioned by the President.

The expenses incurred for the militia called out by the governor of Connecticut and stationed at New

Haven under the command of Colonel Sandford cannot be assumed.—(See General Cushing's letter of the 28th of August, 1814.)

Any expenses attending the call of Major General Taylor into service cannot be paid.

GEORGE GRAHAM.

MR. HAGNER.

TREASURY DEPARTMENT, Third Auditor's Office, June 26, 1819.

Sir: I have the honor to transmit herewith a statement of the suspensions and disallowances arising on the examination in this office of the accounts of the State of Connecticut for expenditures made during the late war. This course has been adopted with the view of affording the State the opportunity of furnishing any explanations or additional vouchers before the account is stated for the decision of the comptroller. An early attention is requested to the subject.

With great respect, your excellency's most obedient servant,

PETER HAGNER, Auditor.

His Excellency Oliver Wolcott, Governor of the State of Connecticut, New Haven.

WAR DEPARTMENT, July 4, 1814.

Sir: The late pacification in Europe offers to the enemy a large disposable force, both naval and military, and with it the means of giving to the war here a character of new and increased activity and extent. Without knowing with certainty that such will be its application, and still less that any particular extent. Without knowing with certainty that such will be its application, and still less that any particular point or points will become objects of attack, the President has deemed it advisable, as a measure of precaution, to strengthen ourselves on the line of the Atlantic, and (as the principal means of doing this will be found in the militia) to invite the executives of certain States to organize and hold in readiness for immediate service a corps of ninety-three thousand five hundred men, under the laws of 28th February, 1795, and 18th of April, 1814.

The enclosed detail will show your excellency what, under this requisition, will be the quota of Connecticut. As far as volunteer uniform companies can be found they will be preferred.

The expediency of regarding (as well in the designations of the militia as of their places of rendezvous) the points, the importance or exposure of which will be most likely to attract the views of the enmy, need but be suggested.

A report of the organization of your quota, when completed, and of its place or places of rendezvous.

A report of the organization of your quota, when completed, and of its place or places of rendezvous,

be acceptable.

I have the honor to be, with very great respect, your excellency's most obedient and very humble servant, J. ARMSTRONG,

His Excellency the Governor of Connecticut.

The detail referred to in the foregoing letter is exhibited in a tabular statement of the quotas required from sundry States, and wherein the quota of Connecticut is set down at 300 artillery, 2,700 infantry; total number, 3,000. Number of regiments, 3. General staff, one major general, one brigadier general, one deputy quartermaster general, and one assistant adjutant general.

STATE OF CONNECTICUT, Sharon, August 1, 1814.

Sir: Your letter under date of the 4th July last reached me on the 16th of the same month. Although there appears to be no act of Congress expressly authorizing a detachment from the militia for the purpose mentioned in your communication, yet the respect due to a recommendation from the President having for its object the defence of the country induced me, without unnecessary delay, to convene the council of the State and to submit the proposition to their consideration. That honorable body having advised the executive to detach the number of militia suggested as the proportion of Connecticut, orders were immediately issued to that effect, and you will speedily be informed by the proper officer of their execution.

Permit me, sir, to observe that this measure will probably be less useful here than in those States where the same system of precaution may not have been previously adopted. In general orders issued where the same system of precaution may not have been previously adopted. In general orders issued on the 19th of April last, not only the whole body of militia, but every other description of military force in the State, were directed to be held in readiness to march at a moment's warning. The militia were thoroughly inspected; signals and alarm-posts established; arms and ammunition distributed along the coast at convenient places of deposit; in short, every preparation was made "to strengthen ourselves on the line of the Atlantic" which the means of the State would afford.

The detachment can be no otherwise completed than by a draft through the several brigades. Besides the derangement such a process must occasion, it is evident the corps thus dispersed cannot be brought into the field in season to repel a sudden and powerful incursion of the enemy. Reliance must, after all, be placed upon the troops nearest the scene of danger. But is there not reason to apprehend that all who escape the draft, as well as the volunteers composed of military exempts, may feel themselves excused from that degree of vigilance which they would be otherwise bound to maintain? To prevent this effect I am of opinion it will be still necessary to continue in force the regulations prescribed in the order of April last; and it is respectfully submitted whether the great object in view—the security of our maritime frontier-will not be as effectually promoted by dispensing with the proposed

organization within the limits of this State.

Pursuant to arrangement with Colonel Kingsbury, under the instructions of the President, guards are stationed at several points on the coast. In the absence of regular troops these guards have been hitherto composed of militia. They have, indeed, contributed essentially to the safety of our harbor; but the service falls with great severity upon that industrious class of citizens at this busy season of the year. I need but suggest, sir, that no advances have yet been made by the national government either for the wages of the men or the military supplies furnished by the quartermaster general of the State.

With great respect, I have the honor to be, sir, your obedient and humble servant

JOHN COTTON SMITH.

Hon. Secretary of War.

STATE OF CONNECTICUT, Sharon, August 11, 1814.

Sir: By a despatch from Brigadier General Cushing I am informed of a sudden and violent attack upon Stonington on the 9th instant, the issue of which was not known on the 10th when the express came away. As you will, doubtless, have received the same or more minute intelligence from that officer, it is unnecessary to detail the particulars as communicated to me, or to hazard any speculations upon the precise views of the enemy in this unexpected movement. That his object is ultimately to reach the national squadron in the Thames there can be little doubt; and that it will be pursued with vigor is rendered probable from the reinforcements which are said to have recently arrived. The attempt, I trust, will be repelled with a becoming spirit.

It will readily occur to you, sir, that the great number of militia brought into the field in consequence of these operations must create a pressing demand for supplies of every description. General Cushing has issued orders for subsistence; but it is understood there is a deficiency of ammunition, and of everything, in short, which appertains to the quartermaster's department. Immediate provision for those objects, as well as seasonable arrangements for the payment of the troops, seem essential to a continuance of the

service.

I have the honor to be, with great respect, sir, your obedient and very humble servant, JUHN COTTON SMITH.

Hon. John Armstrong, Secretary of War.

WAR DEPARTMENT, August 17, 1814.

Sir: I have the honor to acknowledge the receipt of your excellency's letter of the 1st instant and a subsequent report of your adjutant general, E. Huntington, that the requisition of 4th July had been complied with.

His Excellency J. C. SMITH, Governor of Connecticut, Sharon.

STATE OF CONNECTICUT, Hartford, September 3, 1814.

Sir: In consequence of the exposed and defenceless situation of the town of New Haven and borough of Bridgeport, I have thought proper, by the advice of the council, to order into service six hundred men for the protection of those places. The general officer of the United States located at New London has been advised of this procedure, and has also been requested to cause the troops to be duly mustered and supplied. He admits the propriety of the measure; but, as I understand, refuses to comply with the request, and on grounds which, in my opinion, are wholly inadmissible.

It is my duty, sir, to inform you of these circumstances, and to express the assurance I feel that you will order the requisite supplies to be immediately furnished.

Disposed as I am to repel the attempts of the common enemy by a prudent and vigorous employment.

Disposed, as I am, to repel the attempts of the common enemy by a prudent and vigorous employment of the military force at my command, I shall rely with confidence on such aid as it may be in the power of the general government to afford.

I have the honor to be, very respectfully, sir, your obedient and humble servant,

JOHN COTTON SMITH.

Hon. Secretary of War.

STATE OF CONNECTICUT, Hartford, September 14, 1814.

Sir: I am informed the agent of the United States at New London has refused any further subsistence to the militia now on duty in that vicinity upon the unfounded pretext that they are withdrawn from service by my authority.

Unwilling to hazard the safety of those posts and the national property in the river by disbanding the troops, I have directed the commissary general of the State to provide for them until the pleasure of

the President shall be known.

You will perceive the importance, sir, of apprising me without delay whether the agent is to be countenanced in the course he has thought proper to adopt; and also how far I am to rely on the general government for assistance in the necessary defence of the State.

The near approach of the session of the general assembly renders it desirable that I should be favored

with an early and explicit communication upon this highly interesting subject.

I have the honor to be, with great respect, sir, your obedient and very humble servant JOHN COTTON SMITH.

Hon. Secretary of War.

P. S.—To my letter of the 3d instant no answer is yet received.

DEPARTMENT OF WAR, September 17, 1814.

Sir: I have had the honor to receive your excellency's letter of the 7th instant.

The attack of the enemy on Baltimore, and probable eventual attack on other places, with the heavy duties incident thereto, pressing on this department have prevented my answering it at an earlier day.

It may be satisfactory to your excellency for me to explain the views and principles on which this government has acted in regard to the defence of our eastern frontier.

It was anticipated soon after the commencement of the war that while it lasted every part of the Union, especially the seaboard, would be exposed to some degree of danger, greater or less, according to the spirit with which the war might be waged. It was the duty of the government to make the best provision against that danger which might be practicable, and it was proper that the provision should continue while the cause existed.

The arrangement of the United States into military districts with a certain portion of the regular force, artillery and infantry, under an officer of the regular army, of experience and high rank, in each district, with power to call for the militia as circumstances might require, was adopted with a view to

afford the best protection to every part that circumstances would admit.

It was presumed that the establishment of a small force of the kind stated, constituting the first elements of an army in each district, to be aided by the militia in case of emergency, would be adequate to its defence. Such a force of infantry and artillery might repel small predatory parties, and form a rallying point for the militia at the more exposed and important stations in case of more formidable invasion. A regular officer of experience stationed in the district, acting under the authority and purpose the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of the results of suing the will of the government, might digest plans for its defence; select proper points for works and superintend the erection of them; call for supplies of ordnance, for tents and camp equipage, for small arms and other munitions of war, call for the militia and dispose of the whole force. These duties, it was believed, could not be performed with equal advantage by the officers of the militia, who, being called into service for short terms, would not have it in their power, however well qualified they might be in other respects, to digest plans and preserve that chain of connexion and system in the whole business which seemed to be indispensable.

On great consideration this arrangement was deemed the most eligible that could be adopted under the authority of the United States. Indeed none other occured that could be placed in competition with it. In this mode the national government acts by its proper organs over whom it has control, and for whose engagements it is responsible.

The measures which may be adopted by a State government for the defence of a State, must be considered as its own measures, not those of the United States. The expenses attending them are chargeable to the State and not to the United States. Your excellency will perceive that a different construction would lead into the most important, and, as is believed, into the most pernicious consequences. If a State could call out the militia and subject the United States to the expense of supporting them at its pleasure, the national authority would cease as to that important object, and the nation be charged with expenses, in the measures producing which the national government had no agency and over which it could have no control; this, however, though a serious objection to such a construction, is not the most weighty. By taking the defence of the State into its own hands, and out of those of the general government, a policy is introduced on the tendency of which I forbear to comment. I shall remark only, that if a close union of the States, and an harmonious co-operation between them and the general government are at any time necessary for the preservation of their independence and of those inestimable liberties which were achieved by the valor and blood of our ancestors, that period may be considered as having arrived.

It follows from this view of the subject, that if the force which has been put into service by your excellency had been required by Major General Dearborn, or received by him and put under his command, that the expenses attending it will be defrayed by the United States. It follows likewise, as a necessary consequence, that if this force has been called into service by the authority of the State, independently of Major General Dearborn, and be not placed under him as commander of the district, that the State of Massachusetts is chargeable with the expense and not the United States Any claim which the State may have to reimbursement must be judged of hereafter by the competent authority on a full view of all the circumstances attending it. It is a question which is beyond the authority of the Executive.

Your excellency will perceive that this government has no other alternative than to adhere to a system of defence which was adopted on great consideration, with the best view to the general welfare, or to abandon it, and with it a principle held sacred, thereby shrinking from its duty at a moment of great peril, weakening the guards deemed necessary for the public safety, and opening the door to other

consequences not less dangerous.

By these remarks it is not intended to convey the idea that a militia officer of superior grade, regularly called into service, shall not command an officer of the regular army of inferior grade when acting together. No such idea is entertained by the government. The militia are relied on essentially for the defence of the country. In their hands everything is safe. It is the object of the government to impose on them no burdens which it may be possible to avoid, and to protect them in the discharge of their duties in the enjoyment of all their rights

their duties in the enjoyment of all their rights.

The various points which are attacked and menaced by the enemy, especially in this quarter, where they are waging in considerable force a predatory and desolating warfare, make it difficult to provide immediately for all the necessary expenditures. Any aid which the State of Massachusetts may afford to the United States to meet these expenditures will be cheerfully received and applied to the payment and support of the militia of that State in the service of the United States. It will be proper that the money thus advanced should be deposited in some bank in Boston, that the disbursement of it may be made under the authority of the government of the United States, as in similar cases elsewhere. Credit will be given to the State for such advance, and the amount be considered a loan to the United States.

I have the honor to be, with the highest respect, sir, your most obedient humble servant, JAMES MÓNROE.

His Excellency Caleb Strong, &c., &c, &c.

A note in the margin of the correspondence record of the War Department indicates that a similar letter was written to the governor of Connecticut.

The governor of Connecticut will thank the Secretary of War to inform him whether his communications, under date of the 3d and 14th of September last, have been received at the War Department. Harrford, October 10, 1814.

WAR DEPARTMENT, October 17, 1814.

Sir: I have had the honor to receive your excellency's communication of ——. The letters mentioned in it had been before received.

The regulations of this department, in conformity to the laws of the United States, having designated commands for different grades of general officers of the militia—two thousand men for a brigadier general—and General Cushing not having called for more than two thousand men at any time, and there not being more than that number of militia in the field, it was thought that the command of them ought not to be committed to a major general of the militia. The tendency of such an arrangement would be to take the force assembled for the defence of the military district No. 2 out of the hands of the officer to whom the President had intrusted it. It was on this principle that my letter to your excellency of —— was addressed, and with intention to explain the principles on which the arrangements of this government were made for the defence of every part of the United States, which explanation I gave in a belief that it would be satisfactory, and that it was particularly my duty to give it at this very important crisis of our affairs. It is, however, distinctly to be understood, that if the whole quota assigned to Connecticut had been called into service, that it would have been proper to have committed the command to a major general of the militia, who, in cases where he and a brigadier general of the army of the United States acted together, would take the command of him.

His Excellency J. C. Smith, Governor of Connecticut.

Copy of a letter from the Secretary of War to several general officers, and of whom Brigadier General Cushing is shown to have been one.

WAR DEPARTMENT, July 12, 1814.

In performing this duty you will be careful to avoid all unnecessary calls, to proportion the call to the exigency, and to have inspected without delay all corps entering on service, to the end that men who, from any cause, are unfit therefor be promptly discharged, and that a due proportion in all cases be maintained between officers and privates.

Extracts from a letter of Brigadier General Cushing to the Secretary of War, dated New London, July 27, 1814.

"On my return to this place from my late tour to Rhode Island, I had the honor to receive your letter of the 12th instant, with inclosures.

"The quota of militia of the State of Rhode Island, or a corps to be substituted by the governor of that State, will be received and posted, as mentioned in my letter from Providence of the 21st instant, so soon as they can be obtained; but at the present moment I see no necessity for a call on the governor of Connecticut. It is, however, probable that this state of things may soon be changed, and a call for the militia become indispensably necessary. At any rate, the necessary camp equipage, quartermaster's stores, &c., ought to be provided and held in readiness for immediate service."

Extract from a letter of Brigadier General Cushing to the Secretary of War, dated New London, Aug. 12, 1814.

"By the letter of the 11th instant from Governor Smith, of which I inclose a copy, marked H, you will see that he has ordered the militia called for on the 10th, but, for the reasons therein stated, claims the right of placing a major general at their head. I shall endeavor to satisfy him that, with the number of men called for, a major general cannot be received, but if he should persist, how is the difficulty to be gotten over? Am I to recognize the major general, and resign the command to him? Will you order a major general of the army to this district, or can the case be provided for by brevet rank?"

Extract from a letter of the Secretary of War to Brigadier General Cushing, dated August 17, 1814.

"You will state to Governor Smith the nature and extent of our rules in regard to militia drafts. The staff they bring with them must be accommodated to the number of effectives called out and actually presenting themselves for inspection and service. Two regiments make a brigade, and two brigades a division. When any number less than four thousand is required a major general cannot be recognized. This regulation is so obviously founded on reasons of economy to the public, and justice to individuals, that I am satisfied the governor's good sense and public spirit will not for a moment resist it. If he should, the proximity of General Dearborn will afford a remedy."

## Extract from a letter of Brigadier General Cushing to the Secretary of War, dated

NEW LONDON, August 29, 1814.

"I deem it proper at this time to lay before you a copy of my correspondence with Governor Smith

from the 14th to the 28th instant inclusive.

"Unwilling to relinquish the project for introducing a major general of militia into the service of the United States, the governor has attempted to prevail on me to accept a command of six hundred men, to be posted at New Haven, under the command of Major General Taylor, who, it appears, must be provided for. I have agreed to accept the men, if properly officered, because it will enable me to discharge an equal number, which must otherwise be marched from this neighborhood; but I have pointedly refused to recognize the major general, or to have the men mustered and supplied on any other consideration but that of their being subject to my orders."

## MILITARY DISTRICT No. 2, HEADQUARTERS, New London, September 2, 1814.

Sir: I have the honor to enclose a copy of a letter from Governor Smith of the 30th August, with my

reply of this date.

It is now pretty evident that the governor and council have determined that their militia shall not be commanded by an officer of the United States, and it is possible an attempt may be made to withdraw the brigade now in service. I am, however, of opinion that this will not be done before the meeting of the legislature, and that in that body the measure will meet with the decided opposition of some of the most influential federalists in the State. eralists in the State. I am, sir, very respectfully, your obedient servant, T. H. CUSHING, Brigadier General.

Hon. John Armstrong, Secretary of War.

## Extracts from a letter of Brigadier General Cushing to the Secretary of War, dated

New London, September 8, 1814.

"The President's proclamation of the 1st instant was received yesterday, under cover from the Department of State, and I shall not fail to exert myself, to the full extent of such means as I can com-

mand, for the defence of this district.

"The President's proclamation authorizes me to 'call to the defence of exposed and threatened places portions of militia most convenient thereto,' but it may and probably will happen that a whole division of militia may be necessary, in which case a major general must be recognized, and hence the necessity of sending a major general of the army to command this district. I make these remarks under an idea that Governor Smith will not order his militia to disregard a call from the commanding officer of this district, when made in conformity with and under the sanction of the President's proclamation; and I know that, without such order from him, the whole or any part of the division in this vicinity would be immediately assembled on receipt of my requisition by its commander, who, though not tenacious of command, would, in the event of the whole division being called out, supersede me in the command of the district. To show you that there is no reluctance on the part of the militia to serve under my command, I transmit a copy of Brigadier General Isham's letter to me after he and his brigade were discharged from their late tour of duty. Major General Williams professes the same sentiments, but being of a higher grade, he could not, by the rules of service, act under the orders of a brigadier general."

## MILITARY DISTRICT No. 2, HEADQUARTERS, New London, August 1, 1814.

Six: I have been notified by the Secretary of War that on the 4th day of July last a requisition was made on the executive of the State of Connecticut for a body of militia, to be organized and held in readiness for immediate service; and I am instructed by him, "in case of actual or menaced invasion of the district" under my command, "to call for a part or the whole of the quotas assigned to the States of Connecticut and Rhode Island which shall have been organized and equipped under the aforesaid requisition." But in the performance of this duty I am charged "to avoid all unnecessary calls, to proportion the calls to the exigency, and to have inspected without delay all corps entering on service, to the ond that men who from any cause are unfit therefor he promptly discharged and that me and that me the end that men who, from any cause, are unfit therefor be promptly discharged, and that a due proportion in all cases be maintained between officers and privates."

It is not deemed necessary to call any part of the quota of Connecticut into the service of the United States at this time, but it is desirable that the draft be made and the men held in readiness for immediate service whenever circumstances may indicate an intention on the part of the enemy to invade any part of the State, and I have, therefore, to request your excellency to inform me whether the quota of militia required of this State by the aforesaid requisition has been or will be "organized and held in readiness for immediate service;" whether, on my requisition, the whole or any part of the said militia will be ordered into the service of the United States for the purposes before mentioned; whether my requisition for this purpose must be made to your excellency in the first instance, or to such general and field officers as may have been detailed for this service; and generally that your excellency would be pleased to favor me with all such information and opinions in relation to the objects and designs of the enemy, and to the

defence of this State, as you may think proper to communicate.

I have only to add that, as commanding officer of this military district, it will be my constant endeavor to preserve the strictest harmony and good will between the national troops and the militia, and that the

rights of the latter, as secured by the Constitution and laws of our country, shall be duly respected by every officer and soldier under my command.

I am, sir, your excellency's most obedient servant,

T. H. CUSHING.

His Excellency Governor SMTH.

STATE OF CONNECTICUT, Sharon, August 4, 1814.

Sm: I have the pleasure to acknowledge the receipt of your letter of the 1st instant.

The adjutant general is directed to send you a transcript of the general orders issued on the 28th ultimo for organizing and holding in readiness a body of militia, pursuant to a recommendation from the President of the United States. To that document I must refer you for answers to most of your inquiries.

Any sudden approach of the enemy must evidently be met by the troops nearest the place of attack;

and the officers of militia are already authorized and required in such emergencies to call out the force under their command immediately, and without waiting for particular instructions. In other cases, where

requisitions may be necessary and proper, there will be time to offer these to the executive of the State.

The militia, whenever their services are required, will expect to march under orders received from their commander-in-chief, and such orders as the exigency demands you may rest assured shall be promptly

given.

I am gratified, sir, at the solicitude you manifest for the protection of our maritime frontier, and I shall cheerfully communicate to you any information respecting "the objects and designs of the enemy and the defence of the State" which it may be in my power to afford. Equally satisfactory is the assurance that you will "endeavor to preserve the strictest harmony between the national troops and the militia." Your reputation, both as an officer and a citizen, is a sufficient guarantee that the "rights of the militia, as secured by the Constitution and laws of our country, will be duly respected."

With sentiments of sincere regard, I am, sir, your obedient and humble servant,

JOHN COTTON SMITH.

Brigadier General T. H. Cushing, &c., &c.

MILITARY DISTRICT No. 2, HEADQUARTERS, New London, August 10, 1814.

Sin: By Major General Williams's communication of this date your excellency will be fully informed of the state of things in this quarter, and by the enclosed district order, that the militia ordered out by him, at my request, are to form a brigade under the command of Brigadier General Isham.

Your excellency's communication of the 4th instant was received this morning, since which General Williams has furnished me with your general order of the 28th July; but I have heard nothing from the

adjutant general on this subject.

adjutant general on this subject.

• It is my opinion that the safety of this State requires that fifteen hundred infantry and two companies of artillery, duly officered, and to be commanded by a brigadier general of this State's quota of ninety-three thousand five hundred men, required by the President of the United States "to be organized and held in readiness for immediate service," should be immediately detached from the said quota and ordered to this place, for the purpose of relieving the militia now on duty here, if circumstances should justify the measure, or to increase our means of defence in the event of more formidable and vigorous operations on the part of the enemy; and I have the honor to request your excellency to make and place the said detachment under my command. It is desirable that the brigadier general to be detached on this service should be instructed by your excellency to report himself to me by letter immediately after he shall have been so detached, to inform me of his route to this place, and the probable time of his arrival, and to receive and obey any orders he may receive from me while on his march. and to receive and obey any orders he may receive from me while on his march.

I am, sir, your excellency's most obedient servant,

T. H. CUSHING, Brigadier General, Commanding.

His Excellency John Cotton Smith, Governor of Connecticut.

## DISTRICT ORDERS.

MILITARY DISTRICT No. 2, HEADQUARTERS, New London, August 10, 1814.

The militin of this State, ordered into service yesterday by Major General Williams, at the request of the commanding general of the district, are to be considered in the service of the United States, and will form a brigade under the command of Brigadier General Isham, who will furnish a return by regi-

ments to the adjutant general of the district the soonest possible.

Until the proper returns of General Isham's brigade can be obtained, the contractor will issue provisions on the requisitions of Major Goddard, countersigned by the commanding general; and the major will be held responsible for the proper application of all provisions so received, and which must be covered by regular returns so soon as the strength of the brigade can be ascertained.

By order of the commanding general

By order of the commanding general.

STATE OF CONNECTICUT, Sharon, August 11, 1814-9 o'clock a. m.

STATE OF CONNECTICUT, Sharon, August 11, 1814—9 o'clock a.m.

Sire: Your communication by express is this moment received. Major General Williams is directed to retain the militia now on duty until they shall be relieved by the force ordered out conformably to your request, or unless circumstances shall justify an earlier dismission. It is probable the draft for the new detachment is not completed; but Brigadier General Lusk, detailed under the orders of the 28th ultimo, is instructed by the return of the express to hasten it as fast as possible, and to march, without a moment's delay, with the first and third regiments, whose places of rendezvous are Hartford and Norwich. Their numbers will make the complement you require, including artillery.

As the force requested by you will constitute a majority of the detachment, there is an evident propriety that it should be commanded by the major general detailed pursuant to the recommendation of the President. He will accordingly be directed to enter the service as soon as the necessary arrangements will permit. In the meantime Brigadier General Lusk is ordered to report himself to you, agreeably to your desire.

to your desire.

As Major General Williams informs me there will be a deficiency of the munitions of war, the quartermaster general is directed to forward the necessary articles from the arsenal of the State immediately. I entertained a hope that the general government had by this time an abundant supply at New London.

I shall wait with great anxiety the issue of these serious and unexpected operations of the enemy. His progress and ulterior views, so far as they can be ascertained, are subjects on which any communications you may be pleased to make will be thankfully received.

I am, sir, very respectfully, your obedient and humble servant,

J. C. SMITH.

Brigadier General Cushing.

MILITARY DISTRICT No. 2, HEADQUARTERS, New London, August 12, 1814.

Sir: I have barely time to acknowledge the receipt of your excellency's letter of the 11th instant, and to enclose a copy of Brigadier General Isham's last report.

Captain Lee informs me that our flag at Stonington has been nailed to the flagstaff; that General Isham and his men are in high spirits, and anxious for the enemy to attempt a landing; and that the congreve rocket is considered quite a harmless thing.

I am, sir, your excellency's most obedient servant,

T. H. CUSHING.

His Excellency John Cotton Smith, Governor of Connecticut, Sharon.

MILITARY DISTRICT No. 2, Headquarters, New London, August 14, 1814—11½ o'clock p. m.

Sir: A brigade in the army of the United States should consist of two thousand men, and the detachment of militia required of your excellency by my letter of the 10th instant does not exceed seventeen hundred, which is probably less than any brigade of militia in the State of Connecticut. In asking for a brigadier general to command this force, I have certainly gone as far as I am authorized by my instructions from the War Department, which are, "that a due proportion, in all cases, be maintained between officers and privates;" and I trust that, on reflection, your excellency will relinquish the idea of ordering a major general to assume the command of less than a brigade. Should circumstances require a further call for men to the extent of a major general's command, including the seventeen hundred, I shall not fail to include that officer in my requisition.

The enemy left Stonington yesterday, and anchored near the Hammocks, and to-day he has taken a total with the seventeen hundred.

stand, with one seventy-four, one razee, one bomb vessel, and two brigs, between the mouth of Pequonock and Fisher's island, and about four miles from our shore. His barges were seen in different directions during the afternoon, and it is probable he will attempt something to night. We are on the alert in all directions, and hope to give a good account of any force he may hazard on land or bring in contact with our batteries. Besides the force already mentioned, he has in Gardner's bay one seventy-four, one or two

frigates, and two smaller armed vessels.

I am, sir, your excellency's most obedient servant,

T. H. CUSHING.

His Excellency John Cotton Smith, Governor of Connecticnt.

HARTFORD, August 17, 1814.

Sir: The first regiment of detached militia will rendezvous at this city to-morrow. Having myself just arrived, I despatched Colonel Trumbull, one of my aids, for the purpose of conferring freely with you on subjects intimately connected with the service.

As the enemy are said to have abandoned the attack upon Stonington, I will thank you to inform me of the number and position of the hostile squadron, and what apprehensions you entertain with respect to its future operations. I am also desirous of ascertaining what provision you are enabled to make for the troops; not merely for their subsistence, about which I presume there will be little difficulty, but for their accommodation in other respects. Have you tents or barracks, camp utensils, wood, forage, hospital stores, ammunition—in short, is your quartermaster's department furnished? and if not, you will pardon me for asking whether you are in funds for these objects, as well as for the payment of the militia who are to be relieved from duty by the present detachment? These, sir, are momentous inquiries. I sincerely

hope it will be in your power to oblige me with a satisfactory reply. Other topics, which time will not

permit me to particularize, will be suggested by Colonel Trumbull.

I had the pleasure to receive your favor of the 12th instant at the moment of my departure for this place. The outrage committed upon our territory, apparently without object or use, has been resisted with a spirit very honorable to the militia.

I am, sir, respectfully, your obedient and most humble servant,

JOHN COTTON SMITH.

Brigadier General Cushing.

MILITARY DISTRICT No. 2, HEADQUARTERS, New London, August 18, 1814.

Sir: I have been honored with your excellency's letter of yesterday by Colonel Trumbull, to whom I. beg leave to refer for information in relation to the strength and position of the hostile squadron on this coast, and on many other subjects suggested in your letter, a particular and minute reply to which would

require more time than I am able to spare at this moment.

It has not been in my power to supply the militia now in service with either tents or camp equipage, and they have been exposed to hardships and privation on this account, which I have felt and most sincerely regretted; but I have instructed the proper officer to provide these articles for the detachment destined for their relief, and have them at this place ready for delivery the soonest possible. On the score of wood, forage, hospital stores, and ammunition, there will be no difficulty; but I am sorry to say that at this moment I have not a well-arranged and well-furnished quartermaster's department, nor is the district paymaster in possession of funds for paying off the militia when discharged. His estimates will be sent to the Paymaster General and payments made immediately after funds are received for this purpose. But to the Paymaster General, and payments made immediately after funds are received for this purpose. But if these funds should not reach here before the men are discharged, I hope and trust that your excellency will give directions for paying them in the first instance from the funds of the State.

Since my letter of the 14th instant, of which a duplicate is enclosed, we have had a little affair at Mystic highly honorable to the militia and citizens concerned, and calculated to increase the mortification which the enemy must feel on a review of his conduct for the last ten days. I enclose a copy of Colonel

Belcher's report on this subject. I regret that it has not been in my power to wait on your excellency during my short residence in this district. Had I known in season that you intended to visit Hartford for the purpose of acting on the President's requisition of the 4th of July, I should have availed myself of so favorable an opportunity for paying my respects in person. I would do it now, but the enemy is at the door, and must be watched.

I am, sir, your excellency's most obedient servant, T. H. CUSHING, Brigadier General, Commanding.

His Excellency John Cotton Smith, Governor of Connecticut, Hartford.

HARTFORD, August 21, 1814.

Sm: Colonel Seth P. Staples, of New Haven, who is the bearer of this letter, will make you acquainted with the state of alarm existing there, and from the communications he will show you it will be perceived

what measures the local authorities deem necessary for the safety of the town.

I am clearly of opinion the means of defence must be increased at that place, it being at once the most inviting and accessible to the enemy of any portion of the State; so, to husband our force as to render the vulnerable points secure without exhausting the strength and resources of the country becomes an extremely important consideration. With your present prospect at New London, are all the troops you have required really necessary at and near that post? May not the services of the third regiment of detached militia, who rendezvous at Norwich on the 23d instant, be dispensed with at this time, and he recovered for future expenses generally as the militia in the greater of the State have been seen be reserved for future emergencies, especially as the militia in that quarter of the State have been so repeatedly called into the field? If you, however, judge them essential to the security of New London and its vicinity, they must repair thither. But in any event there should be no hesitation in providing for the defence of New Haven, and I shall be prepared to receive a requisition for this important object. In submitting your request, I think it is not expedient to limit the call to the detached militia. Colonel Staples will fully explain to you the effect of such an arrangement which, in a word, to strengthen New Haven, would materially weaken the whole extent of the sea-coast from Saybrook westward. A sufficient and equally effective force can be derived from other sources. Whatever course is pursued, there should and equally effective force can be derived from other sources. Whatever course is pursued, there should be no unnecessary delay, either in collecting the men or in preparing the requisite supplies.

I shall detain Colonel Staples no longer than to assure you, sir, that I am, with much respect, your

obedient and very humble servant,

JOHN COTTON SMITH.

Brigadier General Cushing.

P. S.—Your letter by Colonel Trumbull, with its enclosures, came duly to hand.

MILITARY DISTRICT No. 2, HEADQUARTERS, New London, August 22, 1814.

Sir: I had the honor to receive your excellency's letter of the 21st instant by Colonel Staples last evening.

It appears that the alarm at New Haven has been produced in part by reports which have run through the newspapers that the enemy are about to send an army to this country for the purpose of taking possession of Rhode Island, Long Island, or New York, as a place of depot, and that when such army shall arrive the destruction of the principal towns on the sea-coast will be attempted; and partly by information obtained from the fleet by individuals whose fears have been highly excited by the declarations of Mr. Stewart and others that New Haven is destined to inevitable destruction.

It is possible that a fleet and army may soon arrive on this coast, and that the destruction of the principal towns may be attempted, but I have no evidence on which I can rely that such force is destined to this quarter, or that anything here is to be attempted on land; and, in my estimation, the probability that a land force is now on its way to join the fleet in our neighborhood is very much diminished by the recent conduct of the fleet itself, which was calculated to create a pretty general alarm, and bring together

a force sufficient to repel his attempts when reinforced.

Since my last all the ships have withdrawn excepting a 74, now at anchor in Gardner's bay, and a large frigate on the outside of the race; and this and the apparent zeal of Mr. Stewart and others connected with the fleet for the safety of New Haven may be a stratagem on the part of the enemy to draw off the force from this place, and give him an opportunity to return and act against it with an increased force, and I therefore deem it inexpedient to dispense with the services of the Norwich regiment at this time, particularly as the whole of General Isham's brigade will be discharged on the 23d, 24th, 25th, 26th, and 27th instant.

I am fully of your excellency's opinion that our means of defence should be increased at New Haven; and so soon as Brigadier General Lusk's brigade shall have been formed, it is my intention to send a battalion of it to that place, if it can be spared from this quarter; and if not, I shall not fail to call on your excellency for an additional force.

I am, sir, your excellency's most obedient servant,

T. H. CUSHING, Brigadier General.

His Excellency John Cotton Smith, Governor of Connecticut.

## MILITARY DISTRICT No. 2, HEADQUARTERS, New London, August 24, 1814.

Sir: A copy of your excellency's letter to me of the 11th instant has been transmitted to the Secretary of War, and I have the honor to enclose an extract of a letter from him on the subject of militia drafts, and a copy of the rules referred to in his letter.

drafts, and a copy of the rules referred to in his letter.

In acting on the late requisition of the President for three thousand men to be organized for the service of the United States, I had presumed that your excellency would have pursued the course suggested by that requisition, and formed the State's quota into three regiments of one thousand men each; and, under that impression, in my letter of the 10th instant I did not express the number of privates, non-commissioned and commissioned officers required. It now appears that a different course has been adopted, and the quota of the State formed into four regiments. But although, in point of form, there is considerable difference between the three thousand men as organized by your excellency and the same number as organized in the army of the United States, yet, as a due proportion between officers and privates will be maintained, and no additional expense incurred, I shall consider the spirit and the intention of the rule as having been fully complied with by the organization which your excellency has been pleased of the rule as having been fully complied with by the organization which your excellency has been pleased to direct.

I am, sir, your excellency's most obedient servant, .

T. H. CUSHING, Brigadier General.

His Excellency John Cotton Smith, Governor of Connecticut, Hartford.

Hartford, August 25, 1814.

Six: The urgent applications made to me for further means of protection by the town of New Haven and the borough of Bridgeport have been laid before the council of the State at this present session. In pursuthe borough of Bridgeport have been laid before the council of the State at this present session. In pursuance of the resolution adopted by that honorable body, as well as from my own conviction of the propriety of the measure, I shall order into service six hundred infantry and artillery to be stationed at those two places, with perhaps a small section of cavalry to serve as videttes. One hundred men to take the place of the present guard will suffice, it is believed, for Bridgeport, whose citizens, following the example of their brethren in New Haven, propose to fortify their harbor by patriotic contribution.

Major General Taylor, already detailed to the command of the militia in service, will take his stand at New Haven with a more immediate view to the defence of that part of the State, and with authority to array a sufficient force at any intermediate point which may be suddenly attacked by the enemy

It is not deemed advisable to transfer to New Haven any part of the troops now at New London, unless a portion of them can be spared, exclusively of the third regiment. Should it appear, as I hope it will, that a reduction of the force at that post may be safely made, justice and humanity alike require that this regiment, detached from the third division, should be favored with the earliest relief from duty.

I trust, sir, you will readily concur in this arrangement, and will make suitable dispositions for mustering the troops which may be ordered to New Haven and Bridgeport, and for furnishing them with the requisite supplies.

Whilst I am writing, your letter of the 24th instant is received. As you seem, sir, not to have understood correctly the views of this government with respect to the late detachment, it is fit that I state

them to you distinctly.

The communication from the War Department under date of the 4th July last, relative to a detachment from the militia for the purpose therein mentioned, did not assume the style of a "requisition," and for the obvious reason, that there existed no law to authorize it. The invitation (for such was its purport) was accepted by the executive of the State, from a desire to co-operate in what appeared to the President a proper measure of defence for the Atlantic coast. The terms of compliance are contained in the general orders issued on the 28th of July, a transcript of which you have received. In organizing the regiments, I conformed as nearly as possible to the act of Congress passed the 8th of May, 1792. I am not informed that there is now in operation any other act of the national legislature on that subject. If your instructions from the War Department materially interfere with the requirements of this act, it is indeed a subject of regret, but not of doubt as to the authority which ought in such case to prevail. am happy, however, to perceive that you do not consider the difference as essentially varying the result.

To the observation of the Secretary of War, that "when a less number than 4,000 is required a

major general cannot be recognized," I shall only reply that, in apportioning the quota of three thousand to this State, he has expressly assigned a major general to command.

I am sir, very respectfully, your obedient and humble servant,

JOHN COTTON SMITH.

Brigadier General Cushing.

MILITARY DISTRICT No. 2, HEADQUARTERS, New London, August 28, 1814.

Sm: Your excellency's letter of the 25th instant was received last evening, and shall be submitted

to the Secretary of War by the next mail.

Not having "the communication from the War Department under date of the 4th July" before me when my letter to your excellency of the 24th instant was written, I inadvertently used the term requisition, when I should have employed that of invitation; and I beg leave to assure your excellency that this was done without any intention or desire of giving to the invitation of the President, or the acceptance of your excellency, a different understanding from that originally intended.

By the return of Brigadier General Lusk's brigade, herewith enclosed, you will find that no more than twelve hundred and two men, officers included, have joined and been mustered for service. This force,

though small, I have considered sufficient under present circumstances for New Haven and the sea-coast to Stonington inclusive, and arrangements are making for a major and three companies of the first regiment to take post at New Haven, and one company of the third to relieve the detachment at Stonington,

whose term of service will expire on the 29th of this month.

As it is the opinion of your excellency that six hundred men should be stationed at New Haven and Bridgeport, I shall make the necessary arrangements for the muster and supply of that number, so soon as I am informed by your excellency that they, with a due proportion of officers, have been ordered to New Haven for the service of the United States, and to receive and obey my orders. But I must expressly state that, under existing circumstances, a major general cannot be recognized as a part of the State's quota of militia now in service, or permitted to exercise command over them or the six hundred to

be posted at New Haven, who will be considered as a part of Brigadier General Lusk's brigade.

Should your excellency think proper to order six hundred men, duly officered, to rendezvous at New Haven, under the conditions in the preceding paragraph, it will be in my power to discharge a considerable portion, if not the whole, of the third regiment; and I shall suspend the march of the detachment of the first regiment to New Haven until I am a great of the first regiment to new Haven until I am a provided of your excellency's determination on this subject.

I trust your excellency will duly appreciate the fraukness with which this communication is made, and rest satisfied of my disposition to give effect to such arrangements in relation to the militia in service as you may desire, so far as they may be deemed compatible with a faithful discharge of the duties required of me by the government of the United States.

I am, sir, your excellency's most obedient servant,

T. H. CUSHING, Brigadier General.

His Excellency John Cotton Smith, Governor of Connecticut.

Hartford, August 30, 1814.

Sir: Colonel Ward has delivered me your letter of the 28th instant.

In referring you to the views of this government respecting the detachment lately organized, it was my design not to criticise your language, but to point your attention to the precise conditions upon which that detachment was formed. The right of command, you will perceive, is expressly reserved; the detachment thus constituted is accepted, and with a knowledge of the reservation just mentioned, you requested a large portion of the troops for public service. Whatever sentiments, therefore, may be entertained as to the right of the executive of the State to direct its military force, when ordinarily employed in the national service, it surely cannot be questioned in the present instance. If, at your particular desire, Brigadier General Lusk was ordered to report himself to you in the manner suggested in my letter of the 11th instant, I trust it evinces a spirit of accommodation which will be duly appreciated.

I think, sir, you will be satisfied, upon reflection, that you should have requested the major general, when you called for a majority of the detachment, especially if you consider that another brigade of militia was at that time on duty, and from appearances the services of both might become necessary. militia was at that time on duty, and from appearances the services of both might become necessary. That a brigadier general of the regular army, with no troops in the field, should insist on the command of two entire brigades of militia, whose brigadier generals held senior commissions, would have produced a case which neither precedent nor principle could justify. To avoid so unusual and embarrassing a state of things, it became my duty to order the major general into service. Having been properly detailed, no casual diminution of numbers can effect his right of command.

I enclose you the opinion of the council in relation as well to this point as to the employment of a larger force at New Haven and Bridgeport. Their opinion is in perfect accordance with my own, and will therefore be carried into effect. The troops destined for those posts will arrive at New Haven on the 8th, and at Bridgeport on the 13th of September next. If no officer of the United States appears to

muster them, that duty will be performed by an officer of the militia, agreeably to the late act of Congress.

If supplies are withheld by your order, they will be furnished by the proper officers of the State and

charged over to the United States.

It is hoped the services of the third regiment may be dispensed with for the present.

From the harmony with which the service was conducted the last season under an arrangement not essentially dissimilar, I flattered myself that a temper equally conciliatory would distinguish the present campaign. Whilst I lament that any difference of opinion should exist as to the particular mode of

defending our country at a moment when its dearests interests are in jeopardy, I cannot lose sight of the high duties which I am solemnly bound to discharge.

With respectful consideration, I am, sir, your obedient and humble servant,

JOHN COTTON SMITH.

Brigadier General Cushing.

MILITARY DISTRICT No. 2, HEADQUARTERS, New London, September 2, 1814.

Sir: Your excellency's letter of the 30th of August was received this morning by the southern mail. Whether I have understood "the views of this government (Connecticut) respecting the detachment Whether I have understood "the views of this government (Connecticut) respecting the detachment lately organized" or not is, in my estimation, a question of no importance at this time, since, by referring to my letter of the 10th of August, your excellency will there find the conditions on which the drafted militia now in service were asked for, and have been received into the service of the United States. If these conditions did not accord with "the views of this government, too," it is not for me to assign the motive which induced your excellency to make the detachment; but while I regret that any misunderstanding should exist on this subject, I feel confident that my communications have been explicit to leave a doubt as to the course authorized and enjoined by the government of the United States.

I have stated in my letter of the 28th of August the only conditions on which I am authorized to receive

I have stated in my letter of the 28th of August the only conditions on which I am authorized to receive and post a detachment of drafted militia at New Haven and Bridgeport. But your excellency's letter on this subject shall be sent to the Secretary of War by the next mail for his further instructions on the

subject.

Should the third regiment be discharged, agreeably to your excellency's request, there would remain but one regiment of drafted militia, (not eight hundred men, including officers,) and with this force [a brigadier general and his staff could not be retained.

I have made the necessary arrangements for relieving the detachment at Saybrook and Killingsworth on the 15th instant by detachments from the first regiment of drafted militia now in the service of the United States at this place.

I am, sir, your excellency's most obedient servant, T. H. CUSHING, Brigadier General, Commanding.

His Excellency John Cotton Smith, Governor of Connecticut, Hartford.

Hartford, September 9, 1814.

Sir: Conformably to the original arrangement, Major General Taylor now goes to take command of the militia on duty at New London and its vicinity. He will retain or reduce their present number according to existing circumstances. Upon this and other subjects connected with the safety of those posts, he is instructed, and will be disposed, to confer with you freely, and to promote, by all means in his power, that concert of operations on which the success of the service must essentially depend.

I am, sir, respectfully, your obedient and humble servant,

JOHN COTTON SMITH.

Brigadier General Cushing.

I certify that the foregoing is a true copy of the original.

M. MASON, Aide-de-Camp.

STATE OF CONNECTICUT, Sharon, August 11, 1814.

· Sir: The serious operations of the enemy in the vicinity of New London have induced General T. H. Cushing, commanding the United States troops in this district, to request fifteen hundred infantry and two companies of artillery from the detachment directed to be organized under the general orders of the 28th companies of artillery from the detachment directed to be organized under the general orders of the 28th ultimo, who are intended to relieve the militia ordered out by the major general of the third division. As you are detailed for this service, you are hereby directed to hasten the organization of the detachment as fast as possible, and without delay to embody the first and third regiments, whose places of rendezvous are Hartford and Norwich, and which regiments, as they include a sufficient number of artillery, will constitute the force required. You will inform General Cushing by letter of your state of readiness, and take his directions as to the route and place or places of destination, and conform to his instructions until the arrival of Major General Taylor, who will take the command as soon as his health and the necessary arrangements will permit. Your staff, as brigadier general of the detachment, the division inspector and deputy quartermaster general, detailed under the general order, will accompany you. The deputy quartermaster general will make the necessary arrangements for the transportation of the officers' baggage, artillery, and stores artillery, and stores

By order of the commander-in-chief.

W. M. SMITH, Aide-de-Camp.

Brigadier General Lusk.

At a meeting of the civil authority and selectmen of the town of New Haven on the 19th day of August, A. D. 1814.

Whereas information has been received that an additional force has lately arrived and joined the whereas information has been received that an additional force has lately arrived and joined the squadron of the enemy near New London, and a further addition is daily expected, and a predatory warfare has commenced at Stonington; and it appears from the examination of persons who have lately arrived from said squadron that the same kind of warfare will probably be continued; that the fleet of the enemy is about to proceed westward in the sound, and that New Haven, in their opinion, is in imminent danger of an attack:

\*\*Voted\*\* That Eli Whitney and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Calculation and Ca

Voted, That Eli Whitney, esq., Colonel Staples, and General Howe be a committee to inquire into the state of the means of defence of the town, and also what further measures, in their opinion, would be proper under existing circumstances, and make report to-morrow morning at 8 o'clock, to which time this

meeting is adjourned.

At a meeting of the civil authority and selectmen of the town of New Haven held, by adjournment, on the 20th day of August, 1814, the report of the committee appointed yesterday, regarding the defence

of the town, was read and approved.

Voted, That an express be forthwith despatched to his excellency the governor requesting that, for the defence of the city of New Haven and its vicinity, he will immediately order into service a regiment of militia or State troops, two companies of artillery, and one of cavalry, in addition to the force now within New Haven and its vicinity; and that his excellency the governor would immediately order into service the battalion of artillery annexed to the second brigade.

Voted, That in expectation of the forces necessary to man the works, it is expedient to recommend to the citizens of New Haven, East Haven, and the neighboring towns to form a level area and throw up a mound, which shall serve as a breastwork, on Prospect Hill, by voluntary contributions in labor and money; and that General Howe, Colonel Staples, Eli Whitney, esq., Captain Stephen Alling, and Major John Miles, jr., be a committee to devise and superintend the construction of the proper works, and request the aid of the inhabitants of New Haven, East Haven, and its vicinity, to construct the same, and generally

to devise such other means of defence as the interests of the town and its vicinity require.

Voted, That Colonel Staples is requested to proceed as an express, in pursuance of the foregoing vote,

and that the expense thereof be paid from the treasury of the town.

HENRY DAGGETT, Chairman.

A true copy; made, at the request of General Cushing, August 21, 1814.

SETH P. STAPLES.

At a meeting of the governor and council, held at Hartford on the 24th day of August, A. D. 1814, his excellency the governor laid before the council applications from the civil authority and selectmen of the town of New Haven, and the warden and burgesses of the borough of Bridgeport, for an increase of the military force stationed at those places; as also a correspondence, between him and Brigadier General Cushing, in regard to the command of two regiments of the militia of this State, now in service, and requested the advice of the council thereon.

The council, on mature deliberation, cannot doubt the right or expediency, under existing circumstances, of having in service from this State a major general authorized to command such portions of the

military force as is or may be in service for its defence.

On a view of the particular exposure of the town of New Haven and the borough of Bridgeport, and the increased danger of an attack, the council do advise that the application in their behalf be complied with, and that a portion of the military force of the State, to the number therein specified, be called into service and placed under the command of the major general of this State already detailed for public service.

New London, August 27, 1814.

Dear Sir: Having this day completed the discharge of all the troops in the service of the United States under my command, pursuant to your orders, gratitude forbids that I leave you without suitable expressions of my confidence and regard. For myself and staff, I return you our warmest acknowledgements for the liberal indulgence which you have been pleased to extend to our inexperience and imperfect efforts in the public service, and for your prompt and efficacious aid during our late tour of duty.

Instead of looking on us and our troops with the eye of strict discipline, and demanding correspondent

skill and discernment, your correct discrimination has enabled you to view us as cuizen soldiers.

That one of the veterans of the revolution, himself above the reach of flattery, and too sincere to bestow praise where it is unmerited, should have officially told us "that our arrangements for the defence of the sea-coast were considered highly judicious and military," be assured, sir, is the richest reward we can ever receive for our well-intended efforts in the service of our country. Our tour of duty, although short, has been necessarily attended with great privations and distress, but these have been borne without a murmur, in defence of the peaceful habitations of our unoffending neighbors. Of the little that could be done for the safety and protection of a neighboring village, delicacy does not forbid, and justice requires, that I say much was accomplished, and the troops under my command have left the service with regret that the enemy did not put his feet on the soil which bears freemen.

For your flattering attention and friendly counsel, we again assure the commanding general he holds

a firm place in our esteem.

With the highest respect, I have the honor to be your obedient servant,

JIRAH ISHAM, Brig. Gen'l, late Comm'g Brigade Conn. Militia in service U. S.

Brigadier General T. H. Cushing.

I certify that the above is a true copy of the original letter.

M. MASON, Aide-de-Camp.

В.

### DISTRICT ORDERS.

MILITARY DISTRICT No. 2, HEADQUARTERS, New London, September 12, 1814.

The brigade of drafted militia from the State of Connecticut having been withdrawn from the service of the United States by his excellency Governor Smith, and Brigadier General Lusk, the commanding officer of the said brigade, having refused to receive and obey the orders of the brigadier general commanding this military district, no further supplies of any description are to be delivered to him or his brigade for and on account of the United States, without an express written order from the brigadier general commanding, or from his superior officer actually in the service of the United States.

By order of the commanding general.

C.

New London, September 12, 1814.

Sir: I have the honor to acknowledge the receipt of your note of this morning. The following is an extract of the order of his excellency the captain general, dated the 28th of July, 1814:
"The troops thus detached are to be completely armed and equipped according to law, and, until otherwise directed, will be held in readiness to march at a moment's warning, for the purpose of repelling

invasions of the enemy, under such orders as they shall receive from the commander-in-chief."

The following is an extract of a letter of instruction to me from Governor Smith, dated Sharon,

August 11, 1814:

"You will inform General Cushing, by letter, of your state of readiness, and take his directions as to the route and place or places of destination, and conform to his instructions until the arrival of Major General Taylor, who will take the command as soon as his health and the necessary arrangements will

In addition to the above, Major General Taylor issued his orders to me under date of the 11th of September, 1814, directing me to "discontinue calling at the office of the commanding general of the district orders, and to obey no orders excepting such as shall be issued under the authority of this State." He has also required of me regularly to make report to him of the forces under my command.

From a perusal of the foregoing extracts, you will readily infer the only answer to your interrogations

which I have the power to make.

I am, sir, very respectfully, yours, &c.,

L. LUSK, Brigadier General.

Brigadier General Cushing.

I certify that the foregoing is a true copy of the original.

M. MASON, Aide-de-Camp.

MILITARY DISTRICT No. 2, HEADQUARTERS, New London, September 12, 1814.

Six: The usual reports of the brigade of drafted militia under your command in the service of the United States were not delivered to the adjutant general of the district yesterday, and report says that you have received and are acting under the orders of a militia officer not in the service of the United States. It has therefore become necessary that you assign a reason in writing for withholding your reports, and contradict or admit the fact of your having received and actually executing the orders of an ot in the service of the United States.
I am, sir, very respectfully, your obedient servant,
T. H. CUSHING, Brigadier General, Commanding. officer not in the service of the United States.

Brigadier General Levi Lusk,

Commanding a brigade of militia in the service of the United States, New London.

MILITARY DISTRICT No. 2, HEADQUARTERS, New London, September 12, 1814.

Sir: The preceding letters, marked A, B, C, D, and E, will show you the situation in which I am placed with respect to militia in the State of Connecticut, and that it will be impossible for me to repel any attack of the enemy within its limits, not directed against the forts in this harbor or the very small and inconsiderable battery in the neighborhood of New Haven.

The letter of Governor Smith was delivered to me yesterday morning by a gentleman styling himself the aid of Major General Taylor. I inquired whether his general had been ordered into service by the government of the United States, and assured him that if this was the case, I would most cheerfully resign to him not only the command of the drafted militia, but of this military district. He replied that General Taylor had no such orders, but that he had been ordered by Governor Smith to take command of the drafted militia of Connecticut in the service of the United States, and would immediately assume the command and issue his orders agreeably to the governor's instructions.

Finding that the usual report of the brigade was not furnished by Brigadier General Lusk, I sent for him to inquire the reason for this neglect, and to admonish him of the consequences which would ensue in the event of his failing to discharge the duties of his station as an officer in the service of the United States, and, as such, not accountable to Governor Smith or any of his militia generals. The brigadier requested a short time to make up his mind as to the course he should pursue, and I heard nothing more from him until two o'clock this day, when his answer to my note was received, and the enclosed district order immediately issued.

I understand that General Taylor is making arrangements for the supply of Lusk's brigade at this place and in its neighborhood, and it will readily occur to you that the power to call militia into service, vested in me by the President's proclamation, cannot be exercised to any beneficial result, since the moment such militia shall have assembled, in pursuance of my requisition, they will be taken from me by the State authorities

Your letter of the 7th instant was received this morning. I am, sir, very respectfully, your obedient servant,

T. H. CUSHING, Brigadier General.

Hon. James Monroe, Acting Secretary of War, Washington City.

## Remarks on the accounts of the State of Connecticut.

No. of youcher.	To whom and for what paid.	Sums disal- lowed.	Sums sus- pended.
	ACCOUNT No. 1.		
71 to 76	Pay, &c., of Major General Augustin Taylor and the officers of his staff, from August 16 to November 8, 1814	\$1,650 37	
	States army, that a major general could not be recognized. The requisition of General Cushing called for 1,700 men, to be commanded by a brigadier general; the number mustered into service, including officers, was only 1,202, and to the command of these Brigadier General Lusk was detailed. Had it been otherwise, deductions would have been requisite as follows, viz:  For 3 days' travelling pay and rations of General Taylor's 3 waiters, unprovided for		
	by law		
,	For pay, &c., of Hez. Goddard, the division quartermaster, from August 25 to November 7, 1814, he having received from the United tates the pay and emoluments of a deputy quartermaster general during this		
	period		
7 to 80	Pay, &c., of Brigadier General Levi Lusk and the officers of his staff, from August		
	18 to October 12, 1814		
81	President	410 33	
	Deduct: For pay, &c., after September 12		
	for which the allowance was received	1,247 50	t.
82	The sums paid for forage after September 12 amount to \$122 64, and are also unsustained by such certificates.  Pay of Captain Nathan Johnson's company from August 18 to October	ļ	
	31, 1814 \$1, 900 53 Subsistence of the officers and their waiters 163 80		
	2,064 33		
	Deduct: For pay after September 12		
	August 25, and having been paid from the 18th		
	pany, their services, according to his roll, not having commenced till August 23, and they having also been paid from the 18th		
	been made for 3	ļ	
	The residue of the payment for rations of one of the waiters is not supported by the requisite evidence of service.	1,370 67	
83	Pay of Captain Moses Goodman's company, from August 18 to October 26, 1814 \$\frac{1}{26}\$, 1814 \$\frac{1}{26}\$ Subsistence of the officers and waiters \$\frac{1}{26}\$ 150 00		
	1,839 47		
	Deduct :   1,070 44   For subsistence after September 12   96 00	1,166 44	
84	The officers received 2 days' travelling pay of 2 waiters after discharge, not authorized by law, \$1 02.  Pay of Captain Charles Abel's company, and part of Captain Amos Chaffee's company.	2,100 11	
	p my, from August 23 to October 28, 1814 \$1,910 28 Subsistence of the officers and waiters 146 60		
	2,056 88

	ACCOUNT No. 1—Continued.		
90	Deduct: For pay of the Santombor 12		
30	For pay after September 12		
	For 21 rations for the ensign, from the 18th to the 25th August, he having been paid from the former and been in service only from the		
	latter day 4 20 For 16 rations drawn by the ensign from the United States contractor		
	prior to September 12	į	
	26th instead of the 30th August, when his service commenced 1 83	\$1,192 00	
91	Waiter's travelling pay, \$1 44 Pay of Captain Jabez Collins's company from August 18 to October 29,		•
	1814		
	1,875 47		
	Deduct:		
	***************************************		
	Waiter's pay after September 12 is overcalculated, and includes travelling allowance, \$2 10.	1,217 67	
	One of the privates, whose services commenced after September 12, is noted on the muster-roll as having deserted, whereby he forfeited his pay, \$9 61.		
2 to 98	Pay of a detachment of militia stationed at New Haven in September and Octo- ber, 1814, under the command of Colonel Elihu Sanford, subsistence for the		
	officers and their servants, and forage for the horses of the field and staff officers. Inadmissible; the detachment not having been placed in the service of the United	7,043 55	
ĺ	States under the command of General Cushing, as required by him, but kept	1,020 00	
	under that of an officer appointed by State authority, and without the sanction of the President. Had this not been the case, deductions would have been re-		
	quisite, as follows: Pay, &c., of the field and staff officers, (Vo 92:)		
1	The subsistence of the colonel and one of his waiters is calculated for three days longer than their pay, and longer (according to the pay and		
Ì	receipt-rolls) than they were in service	į	
	Colonel Sanford's waiter		
	And the pay of the drum-major and fife-major is calculated at \$1 per month each more than is allowed by law		
	Payments for forage not sustained by certificates from the officers of their having actually kept in service the horses for which the money was		
	Pay, &c., of Captain J. A. Bishop's company, (Vo. 93:)		
ĺ	Two of the privates (Lyman Burwell and John Todd) have not signed the receipt-roll, and there is no other evidence of the payment of their pay.  23 60	1	
	Pay, &c., of Captain John Butler's company, (Vo. 94:)  Five instead of two musicians have been paid; difference between the pay		
1	of three of them and that of privates \$4 11  No proof of payment of the sums entered opposite the names of	[	
	Corporal Hall and the three waiters 40 73		
	The sums for the waiters include two days' travelling pay, each \$1 53, not provided for by law.		
	Pay, &c., of Captain John Buckingham's company, (Vo. 95:) Difference between musicians' and privates' pay for two of the	•¦	
	four musicians \$3 02 Three days' travelling pay of three waiters after discharge 2 31		
	Pay, &c., of Captain A. B. Curtis's company, (Vo. 96:)		•
	Same as in Captain Buckingham's company 5 33 Residue of the pay of the waiters for which there are no receipts 33 87		
1	Pay of John Walker, who is noted as having deserted on the 14th September, and returned to duty on the 5th October,		
	and who has been paid the same as if he had been in service		
	51 26		
	Pay of Lieutenant Abm Rogers's detachment, (Vo. 97:) Its services expired, according to the muster-roll, on the 20th October, and it has		
	been paid to include the 22d; the distance to and from camp is noted to have been but 32 miles, and of course it was not entitled to more than one day's		
	travelling allowance after discharge.  A day's pay of the detachment\$8 80		
	Two days' travelling pay of the waiter		•
99	Pay, &c., of the field and staff officers of the 3d regiment, commanded		
1	by Lieutenant Colonel William Belcher, for services from the 23d August to the 28th October, 1814		
	Deduct: ————————————————————————————————————

O.	Charge for Paymaster General's commissions at 1½ per cent on amount of his disbursements	101 42			
	74,626 83	1,119 40			
	No allowance can be made in respect of the accounts lodged with the district paymaster, and the compensation (the rate whereof will have to be determined by the Secretary of War, there being no law authorizing the payment of a commission to paymasters) to be allowed in respect of the State paymaster general's disbursements will have to be limited to the portion thereof assumed by the United States.				
	ACCOUNT NO. 2.	Į			
2–2	Colonel James Ward, commissary general: Payment to Samuel Hart, jr., for parts of 413 rations furnished at Saybrook by the contractor, not complete	19 30			
23	Inadmissible. The contractor has charged for all he supplied as complete rations.  His account was adjusted by Colonel Ward.  Colonel Ward's charge for balance of profit and loss on sundry articles of subsistence left on hand when the United States assumed the supply of rations in 1813				
	Deduct for two barrels of pork charged beyond the number sold, one barrel appearing to have contained only brine and salt, and the other is presumed to have had beef in it, the number of barrels sold of the latter article exceeding by one the specified quantity on hand \$31 00 Cost of one barrel of beef \$9 00 Under addition of the cost side of the pork account 6 00				
	Also for deficiency in the contents of 3 pipes of gin and 27 barrels of brandy, a loss presumed to have been attributable to leakage, and not to the circumstance on which Colonel Ward's charge is predicated.

Remarks on the accounts of the State of Connecticut-Continued.

No. of voucher.	To whom and for what paid.	Sums disal- lowed.	Sums suspended.
	ACCOUNT No. 2—Continued.		
3—8	No allowance can be made for his services after September 12, nor previously, so far as regards General Taylor, his aids, and Colonel Sanford's command. His purchases, &c., in respect of Lieutenants Cook, L. Smith, and R. Smith's detachments, including potatoes, amounted to about \$110, and for his services he has charged nearly \$40. Evidence of his appointment and of the necessity for his services as to those detachments should be furnished to enable the Secretary of War to decide on the allowance to be made. Upwards of \$42 of the sums charged are for travel, at 9 cents per mile, in addition to other compensation at \$2 50 per day. An assistant deputy quartermaster general was entitled to only \$1 93 per day and to no allowance for travel. Transportation of baggage is not		
3—9	allowable to an officer on travelling three or four miles to make a purchase, as here charged, but only when ordered on distant commands.  Payment to Nathaniel Griffing for rations and potatoes supplied in September, 1814. Not allowable. As to 35 rations for Lieutenant Reuben Smith's detachment, because rations for this detachment, which was in the United States service, were,	\$80 33	•
310	for the period in question, drawn from the United States contractor; and as to the remaining rations, because the same were furnished for part of Colonel Sanford's command.—(See foregoing remark on vouchers 92 to 98.)  Charged at 1 cent per ration beyond United States contract price.  Payments to sundry persons for fuel, straw, potatoes, medicines, hospital stores, &c., for militia under command of Brigadier General Lusk and Lieutenant Colonel Brainerd		
	Nursing sick soldiers to September 12, 1814	1,011 843	
	Residue inadmissible. The articles (except a portion of the potatoes, and for which no allowance is authorized by law or regulation) having been supplied after September 12, 1814.  Hospital account overcharged \$3.	, _	
3—11	Payments to Wm. Lord and others for wood, medical services, and medicines for Captain Aspinwall's and Captain Chaffee's companies, in service at Stonington \$30 63 Wood, August 29 and September 6, 1814 \$6 50 Medicine, &c., September 1 to 12, 1814 \$4 98 \$11 48		
		19 15	
3—12	Residue inadmissible. Supplied after September 12, 1814. Payments for fuel, straw, potatoes, &c., for Captain Nathan Johnson's company Inadmissible. The articles, with the exception of medicines, for which there is a charge of \$1 45 not vouched, having all been supplied after September 12, 1814	163 06	
313, 14	Payments for fuel, straw, potatoes, &c., for Major Noah S. Barnum's detachment	359 01	
315	Inadmissible. All furnished after September 12, 1814.  Payments for wood for Lieutenant Colfax's detachment	19 52	
316	Payments for fuel, straw, &c., for detachments commanded by Lieutenants Walker and Dowd	37 80	
3—18	Payment to Captain Benjamin Hurd for rations for his company, in service from September 6 to 15, 1814, at 17 cents		
319	Residue inadmissible. Payment to Lieutenant Colonel Benjamin Baldwin for 490 rations for	22 91	
	Captain Amos Fowler's company, September 8 to 14, 1814, at 20 cts.  Allow for 350 rations furnished from September 8 to 12, at 16 cents	42 00	
320,	Residue inadmissible. Payments to Ichabod Ward, Hubbil Brooks, and Solomon Dewey, for rations, &c., supplied by them	14,744 81	
21, & 22	Inadmissible. As to \$9 44 for 59 rations for three non-commissioned staff officers of the regiments commanded by Lieutenant Colonels Brainerd and Belcher, for days prior to September 13, 1814, and included in a return for October following, because the issues for those regiments before that day by the United States contractor appear to have exceeded the number they are shown by the rolls to have been entitled to, and the rations of these men ought to have been drawn, as the same became due, out of those issues. As to \$15 40 for beef and liquor purchased August 29, 1814, in consequence of bad meat and an insufficient quantity of liquor having been supplied by the contractor, because either the contractor ought to have been resorted to for a reimbursement of this expense, or the proper measures ought to have been taken at the time for having him charged with it in his account with the United States, long since settled, viz: a survey, condemnation, and notification to the accounting officers. And as to the residue, because the rations, &c., (with the exception of a portion of such as were for Colonel Sanford's command, and respecting which see foregoing remark on voucher 92 to 98,) were not supplied till after September 12, 1814. Had not this difficulty existed, deductions therefrom would have been requisite as follows, viz: For excess in the cost of 74, 057 rations, charged at 1 cent each; 1, 194 rations, charged at 2 cents each; and 732 rations, charged at 4 cents each higher than the United States contract price		; ,

No. of voucher.	'Po whom and for what paid.	Sums disal- lowed.	Sums suspended.
	ACCOUNT No. 2—Continued.		•
3—37	Deductions would otherwise have been requisite for 137 rations supplied beyond the number the men are shown by the rolls to have been entitled to; of this excess 62 are shown to have been drawn for Lieutenant Beach's waiter, and for whose subsistence he obtained the money allowance from the paymaster, at 20 cents		
338	Payment to Walter Budington for corn and oats and for keeping a horse	\$46 33	
339	Payment to Sereus E. Dwight for fuel, straw, potatoes, hospital stores, &c, for Lieutenant Beach's detachment	275 31	
310	Payment to Sereus E. Dwight for his services in procuring these supplies	38 64	
341	Payment to Enoch Foote for rations, fuel, straw, potatoes, &c., for Lieutenant Hanford's detachment	661 27	
342	Payment to Enoch Foote for sundries 217 75	,	
	Inadmissible as to an account of Doctor Daniel Beard for medical attendance on the sick of Captain Bennett's company, because the services were rendered after September 12, 1814———————————————————————————————————		
343	Payment to Doctor David Hull for medical services rendered to Lieut. Hanford's	48 00	
344	detachment	55 19	
345	for his companyInadmissible; not obtained till after September 12, 1814. Payment to James Ward, commissary general, for services, travelling expenses,	59 05	
41	postage, and stationery	108 76	
42	Payments to sundry persons for fuel and potatoes for militia under command of Major Young	25 22	
43	Payments to sundry persons for potatoes and hospital stores for militia under Major Young's command	20 97	
44	Payment to Major Young for an advance to Captain Aspinwall for wood and potatoes	6 29	
45	Payments to Brigadier General Levi Lusk, and the field and staff and other commissioned officers under his command, in lieu of fuel	179 01	
	1. On an account of Thomas Lee for expenses of removing Richard Lee, his son, a sick soldier, to his home, and of procuring for him medical aid, &c	48 34	
	been taken sick while in the service of the militia	59 81	

	hemarks on the accounts of the state of Connecticut—Contain		
No. of voucher.	To whom and for what paid.	Sums disal- lowed.	Sums suspended.
	ACCOUNT No. 2—Continued.		
46	4. On an account of Sylvester Peck for expenses incurred in removing him home and procuring medical ai!, &c., for him there, he having been taken sick while in service in the militia	\$40 21	
	it been otherwise, the foregoing remarks on Thomas Lee's case would apply.  5. On an account of Ezra Hinsdale, for expenses of procuring medical aid, &c., for his son, Wolcott Hinsdale, after his discharge  Not admissible. Whilst in service he appears to have been provided for by the hospital department.	82 79	
	6. On an account of Nathan Lyon, for boarding and nursing his son, David Lyon, who returned home sick on furlough	69 78	
	7. On an account of Solomon Rogers, for wood and candles for a guard at Waterford-Inadmissible. Supplied after September 12, 1814.  9. On an account of Hannah Phelps, for bread, meat, &c., furnished the militia	8 00	
	volunteers at the alarm at Stonington August 9 and 10, 1814  For "volunteers not attached to any particular corps, but who were on duty at Stonington and Mystic when the attack was made on the former place," the United States contractor appears to have issued 165 rations from the 10th to the 12th of August, 1814, and he appears also to have issued for the regiments of Lieutenant Colonels Belcher, Tracy, and Randall, whose services commenced on the 9th of August, rations for that day and for the subsequent days whereon those regiments remained on duty. The volunteers, therefore, to which Mrs Phelps's account applies must be more particularly designated before its admissibility can be judged of. The officer who commanded them should be named.		\$2 <b>4</b> 37
	10. On an account of Giles B. Hallam, for bread, cheese, liquors, &c., for Lieutenant Colonel Randall's regiment during the attack on Stonington, August 9 and 10, 1814	72 05	
	Inadmissible. Rations for this regiment for those days were drawn from the United States contractor to an extent as great as it was entitled to.  11. On an account of Isaac H. Osborn, for expenses of his sickness while a soldier	72 00	
	under command of Lieutenant Hanford.  Inadmissible. The expenses arose after September 12, 1814. The certificate of Lieutenant Hanford shows that he was sent home sick January 4, 1815, and that he returned on the 23d. For twelve days' attendance on him, room rent, diet, &c, an allowance appears to have been made by the State in the account of James Knapp, (vouchers 3—41 of account No. 2,) the amount of which is before charged.  12 On an account of Joseph Bulkley, for expense of his board and attendance on	21 85	
	him 21 days while sick Inadmissible. He also belonged to Lieutenant Hanford's detachment, and for 21 days' attendance on him, room rent, diet, &c., charges are made in the before- mentioned account of James Knapp.	25 60	
	13. On an account of Lieutenant Charles Park, for travelling rations for himself and waiter, four days. Inadmissible. The detachment he commanded was in the United States service, and was paid by the United States paymaster and supplied by their contractor. In his pay account he charged for rations for himself and waiter for only one day less than the entire period of service specified on the rolls; for his waiter's travelling allowance he was not entitled to any payment. He therefore obtained from the United States paymaster as much as he was entitled to, the one day's rations for himself amounting to no more than the three days' travelling rations of his waiter, for which he was paid. 14. On an account of Brigade Quartermaster Henry Wheat, for services in the	3 20	
	quartermaster and commissary departments after his discharge, for horse hire and forage previous and subsequent thereto, postage, stationery, &c  For horse hire and forage the charges, amounting to \$114, are inadmissible, the law not authorizing a brigade quartermaster to have a horse in service, and the residue cannot be allowed without the sanction of the Secretary of War. There are charges for boat hire, ferriage, cartage, postage, and stationery, not vouched, amounting to \$28.  16. On an account of the town of Guilford, for expenses of procuring surgical aid,	250 00	
	&c., for Jared Ball, who broke his leg while in service in the militia and was sent home	28 41	
	Inadmissible. The expenses arose after September 12, 1814. Charge for Mr. Ward's services as commissary general, 15 days. Inadmissible, the services having been rendered after September 12, 1814. Had it been otherwise, evidence of service and of the necessity for employing him would have been requisite to enable the Secretary of War to decide on the compensation to be allowed.	45 00	
5—1	Payment to Lieutenant Horatio G Lewis, for wood purchased for his detachment in November, 1813, and June, 1814, and for his proportion of fuel during several periods of service in 1813 and 1814, \$62 33.		
52, 3, 4	Disallowed as to the charges for his proportion of fuel, a money allowance in lieu thereof being prohibited by the regulations	26 33	
, -, 1	barrels of flour into bread, in August, 1814	28 25	
5—5	contractor.  Payment to Francis Arney & Co., for rum and gin for Lieutenant Colonel Randall's regiment of militia, August 10, 1814	12 67	
5—6	Payment to Lieutenant J. W. Hanford, for wood	8 00

No. of voucher.	To whom and for what paid.	Sums disal- lowed.	Sums suspended.
	ACCOUNT No. 2—Continued.		
5-7	Payment to Lieutenant Horace Beach, in lieu of nine cords of wood for his use Inadmissible after September 12, 1814; prohibited, besides, by the regulations. Charge for ten days' services of Mr. Ward as commissary general See remark on a similar charge above.	, \$63 00 30 00	
	ACCOUNT No. 3.		
	Account of J. Mix, quartermaster general, No. 1.		
A 2	Payments to sundry persons for seventeen horses and ten wagons and harness, purchased in June, July, and August, 1813	909.70	
	Before the admissibility of this item can be judged of it will be necessary to know for what purpose the horses, wagons, &c., were purchased; what necessity existed for thus procuring them, and in what manner they were employed. It will also be necessary to have produced the account of the above-mentioned sale, and evidence of the disposition made of the horses, wagons, &c., to which that sale did not extend. The account current of the quartermaster general expresses that four horses and one wagon and harness were delivered to E. Tracy, who was a deputy commissary of the United States, but no receipts from him are furnished nor is the date of delivery specified, and in his accounts with the United States no credit for any such delivery can be found. Another horse is represented to have died in service, but no certificate relative thereto is adduced, and the remaining four horses, wagon, and harness are in no way accounted for. As to \$1,003 of the payments, the vouchers are in the name of Jere, S. Halsey, a person employed to assist in purchasing the horses, &c., and require, therefore, to be sustained by the bills and receipts of the persons from whom his purchases were made.	903 50	7.
A 3	Sundry payments for transportation by land in June, July, and August, 1813		
A 4	14. Captain Noah Sabin, for transporting the artillery piece of his company from New London to Pomfret, June 25, 1813	10 75	
	38. Daniel Baker, boat	118 15	
A 9	Sundry payments for quarters \$87 35  Inadmissible as to part of the sum paid to Samuel Hurlbut, he having received \$8 10 for one month and twenty-three days, at \$30 a year, and hire at that rate, amounting to only \$4 42  Sundry contingent expenses \$262 31½	3 68	
:	7. E. Chappell, for boards and joists for the arsenal		
	Not properly chargeable to the United States 69. Ichabod Ward, State contractor, for provision barrels and boxes 13 18	00 30-

of cher.	To whom and for what paid.	Sums disal- lowed.	Sums sus- pended.
	ACCOUNT No. 3—Continued.		
E	The expense does not appear to have been incurred in respect of any militia in service, nor is it shown that the cannon were ever in the public use. The carriages, &c, would have to be delivered over to the United States if the expense were to be rendered admissible. Each of the accounts is unsupported by vouchers for the disbursements.  30. Ste & Henry Huggins, for 6 casks of gunpowder to prove State ordnance, March, 1814  Inadmissible. Not properly chargeable to the United States.  31. Titus Bradley, for transportation of ammunition from Hartford to New Haven,	\$135 <b>0</b> 0	
	March, 1814  Suspended. No evidence of connexion with the public service. No militia appear to have been then on duty.  39. Wm. Malay; credit is given in his account for \$5 as received of Colonel Ward;		\$4 0
	the amount received, and which is charged in the State account (see account No. 3, A $1_{-1}^3$ <sub>2</sub> ,) is \$9—difference——————————————————————————————————	4 00	
	40. Orchard Fowler; 41. Simeon Manvill, transportation of artillery and ammunition from New Haven to Killingworth, June 10, 1813	18 50	
	in transporting munitions from one part thereof to another, by way of preparation, and not for the use of militia in service or called out at the time, are not properly chargeable to the United States.  42. Captain Charles P. Miller, for transportation of the artillery piece No. 5 to and from New London, and to and from Saybrook, in June, 1813.  Disallowed. There is no receipt on the account. For its transportation to and from Saybrook Captain Miller received payment on another voucher, and for its transportation to and from New London a payment was made to Nathan Stark, and in respect of each of these payments a charge is made in another part of the State account.	18 00	
	44. Brevet Quartermaster Henry Wheat, for sundry payments charged as having been made by him in 1813.  The vouchers, 42 in number, to which his account refers must be furnished before any allowance can be made. A duplicate of his account was preferred in 1813, by Colonel Mix, to the Secretary of War, and which could not be acted on for		325 3
	want of the vouchers.  44. Charges in Aaron Halliday's account for cooking for the troops, and for earth-enware, &c., broken and lost  Inadmissible.  58. Major Chauncey Whittlesey, for hire of a wagon and horse to trans-	20 00	
	port his baggage to New London in August, 1813, 40 miles	3 00	
	baggage of Lieuténant Colonel Shepard and Major Smith to New London, 100 miles 38 50 See last note. Entitled to 22 00  66. Major Peter B. Gleason. The charge exceeds the amount paid	16 50 14	
	70. Captain E. H. Buell, for hire of three wagons to transport the baggage of his company to New London, at \$7 each 21 00  The regulations authorize the employment of only two 14 00		
	71. Asahel Deming, whose team was employed in the transportation of baggage to New London in September, 1813, for expenses of suits instituted against him for	7 00	
	avoiding toil-gates	6 22	
	78. Moss K. Botsford, for hire of wagon and two horses to transport the baggage of Lieutenant Colonel Shepard and Major Smith from New London in September, 1813	1 50	
	See note No. 64       22 00         82. Captain E. H. Buell, for hire of three wagons for transporting the baggage of his company from New London       21 00         See note No. 70       14 00	7 75	
	87. Major C. Whittlesey, for hire of wagon to transport his baggage from New London in September, 1813	7 00	
	90. John Babcock, jr., and J. Gordon, for services of two horses and driver, carrying Major G. L. Perkins's express, July 9, 1813, and toll Disallowed; the same being included in an account of Major Perkins, the whole amount whereof is charged in another part of the State account.—(See account	1 00 20 20	

No. of voucher.	To whom and for what pail.	Sums disal- lowed.	Sums sus- pended.
	. ACCOUNT No. 3—Continued.		
E	Not shown to be properly chargeable to the United States. The expense does not appear to have been incurred in respect of militia on duty at the time, there not having then been any in service. The carriage would have to be delivered over to the United States if the charge were to be rendered admissible.		
	92 Gersham Bun, for transportation of muskets from General Hubbard's to New Haven, and from New Haven to Fairfield, January 4, 1814	\$4 00	
	96. Titus Bradley, for transporting 12 casks of powder from Hartford to New Haven, and back again to Hartford, in April, 1814— No militia then in service at New Haven —(See same remarks.)  97. Foote & Brooks, for gunpowder furnished to S. P. Staples for proving iron ord-	6 00	
	nance belonging to the State, May, 1814	17 00	
	lery of his company, May 9, 1814  His company does not appear to have been then or previously in the public service.  The expense, therefore, as it could not have been occasioned by injuries sustained in that service, is considered to be not properly chargeable to the United States.  103. Elisha Buell, for transportation of muskets from New London to Marlborough, in November, 1813; from Marlborough to Hartford, and from New London to Marlborough, in February, 1814; from Marlborough to Hartford, and from New London to Marlborough, in May, 1814; and muskets and cartridges from Hart-	24 01	
	ford to Marlborough, and from Marlborough to Norwich, in June, 1814  There is nothing to show this expense to be properly chargeable to the United States.—(See foregoing note, No. 40-41.)	58 75	
	104. Joel Griffing, for transporting a brass field-piece from New London to Guilford; paid May 25, 1814  Same remark.  105. Nehemiah Hubbard, for payments made by him for cleaning arms and making	11 25	
	cartridges, &c., in May, 1814	43 19 <u>3</u>	
	106. Luther Bradley, for transportation in May, 1814, of muskets to Stamford, Norwalk, Killingworth, Bridgeport, and New Haven, and two cannon from the place where they had been proved, to New Haven  This would seem to have been such an expense as is excluded from allowance by the before-mentioned decision of the Secretary of War.—(See foregoing remark, No. 40-41.)	59 68	
	111. Richard McCurdy, for transportation of 4 boxes of muskets, 11 kegs of cartridges, and a bundle of flints, to Lieutenant Colonel Wm. Moore, 4th, at Waterford, in June, 1814	3 67	
	<ul> <li>113. Captain Amaziah Bray, for sundry expenditures: As to the payment to John E. Bray and Ph. Hill, for a journey to New Haven to procure artillery</li> <li>See same remark.</li> <li>120. Titus Bradley, for transportation in June and July, 1814, of 26 casks of</li> </ul>	5 00	
	powder, 346 cannon balls, &c., to New Haven, and 12 casks of powder and 8 boxes of cannon balls to Fairfield.  At each of these places there was only a lieutenant's command on duty, and for whose use it would seem that such supplies could not have been sent.—(See foregoing remarks, No. 40-41.)	38 53	
	121 Enoch Foote, for payments to Ebenezer Sherman and Israel Blackman, for transportation of rations from New Haven to Bridgeport, June and July, 1814, for the detachments commanded by Lieutenants Curtis and Parks.  These detachments were in the United States service, and the rations were furnished by the United States contractor, who, by his contract had to deliver them free of	31 00	
	any expense beyond the contract price. The charge is therefore inadmissible; it is, besides, unsustained by any vouchers for the payments to Sherman & Blackman. 124. Jos.Trumbull, aide-dc-camp to Governor Smith, for compensation for journeys at the governor's request, to confer with Generals Burbeck and Cushing, and Commodore Decatur, 7th and 24th June, 1813, and 17th August, 1814, at \$5 a day,		
	\$32; expenses of the journey in 1814, \$11 97.  The expenses of the journeys in 1813 are admitted in his account to have been paid to him at the time, and are charged in another part of the State account, amounting to \$32 39.		
	If, by a decision of the Secretary of War, an allowance should be made on Colonel Trumbull's account for pay, &c., (see foregoing remark on voucher No. 137 of account No. 1,) his charge for compensation on these journeys would not be admissible; they are therefore suspended.		\$32 0
	126. Luther Bradley, account dated New Haven, September 3, 1814, S21. Disallowed as to the charge for helving 30 pickaxes, presumed to have been for Lieutenant Colonel Sanford's command, (see foregoing remark on vouchers 92 to 98 of account No. 1)	10 00	
	127. Encoh Foote, for payments for transportation from New Haven to Bridgeport of provisions for the detachment on duty at the latter place in August, 1814, (same remark as on youcher No. 121).	19 00	
	128. T. & J. Dwight, for 22 shovels and 8 spades furnished, at New Haven 26th August, 1814  They are not shown to have been delivered to any militia in the United States service, and are presumed to have been procured for Lieutenant Colonel Sanford's	34 50	
	command.—(See above remark, No. 126, and Governor Smith's letter of 25th August, 1814.)  131. J. Ripley, for transportation of a box of pickaxes to New Haven, 27th August, 1814, (see above remark, No. 126)	2 50

	ACCOUNT No. 3—Continued.		
E	132. J. Stevens, for transporting an artillery piece from Stamford to Saugatuck, 4th August, 1814	\$3 50	
	133. Ste. Mcorehouse, for transporting an artillery piece from Saugatuck to New Haven, 4th August, 1814.  This was previous to the call of militia into service for the defence of New Haven, save a small guard which had been stationed there during the summer.—	4 50	
	(See said remark, Nos. 40 and 41.) 134. William Mansfield, for 100 tin pans for militia at New Haven Inadmissible Not procured till after 12th September, 1814, and they were, too, for Colonel Sanford's command.	66 67	
	135. Harry Phelps, for transporting an artillery piece from New Haven to Simsbury for the use of Captain Pettibone's company, in August, 1814.  An expense not properly chargeable to the United States, the company not having been then on duty, or under orders for actual service.	9 00	
	136. William S. and S. Hotchkiss, for 116 6-pound shot, furnished at New Haven 3d September, 1814, (see foregoing remark, No. 128)	20 88	
	137. Anson Brewster & Co., for fees on receiving and delivering powder, &c., at the magazine and Hartford from May, 1813, to 7th October, 1814	15 54	
	Allowance can be made only in respect to such charges as applied to militia in service prior to 13th September, 1814, and to make this a detailed account, with dates, &c., will be requisite.	13 02	
	139. Samuel Perkins, for transportation of field-piece and carriage from Windham to Norwich in June, 1814  No militia then on duty at either place.—(See note, Nos. 40 and 41.)  139. Nathaniel Griffing, for transportation of ammunition from New Haven to Guil-	4 00	,
	ford, 18th July, 1813; no voucher		\$3
	141 Charles Sherman, for boxes for ammunition, canisters, rings, blocks, flannel, paper, &c., September, 1813, and May, July, and August, 1814, at New Haven No evidence that the articles were procured for any militia in service at the time, or that the same were ever delivered to any militia in service prior to 13th September 1814.	22 98	
	tember, 1814; the militia on duty at New Haven in that year consisted only of a lieutenant's command, and the detachment commanded by Colonel Sanford; respecting which see remark on vouchers Nos. 92 to 98 of account No. 1.  142. Lieutenant Colonel Asa Comstock, jr., for expense of transporting the baggage of the field and staff officers of the 33d regiment, from the 15th to the 25th August, 1814  The receipt on the bill is not signed, and as he appears to have received \$19 84 on a bill made out in the name of Oliver Comstock, for transporting baggage for the 33d regiment, 15th and 26th August, 1814, (and in respect of which a charge is made in another part of the State account,) the charge of \$19 68 is presumed to	19 68	
	be an erroneous one. If otherwise, a voucher for the expenses paid by Colonel Comstock, and evidence of payment to him, will be requisite.  143. Lieutenant John L. Tomlinson, for transportation of the artillery and baggage of his detachment to New Haven in September, 1814  Disallowed. His detachment formed part of Colonel Sanford's command.  144. Captain Amaziah Bray, for sundry disbursements. Disallowed as to a portion	9 50	
	caused after the 12th September, 1814	2 05 5 50	
	146. Captain John Butler, for transporting baggage of his company, Sept. 8, 1814 The company was part of Colonel Sanford's command.	8 75	
	147. Captain John Buckingham, for transporting baggage of his company, September 8, 1814  The company was part of Colonel Sanford's command.  149, 150. Major General Aug. Taylor, and W H. Taylor and Charles S. Masters,	10 50	
	his aides-de-camp, for transportation of their baggage in September, 1814 Inadmissible.—(See remark on vouchers Nos 71 to 76, account No 1) Overcal- culated as to each of the aids, \$1 56, and as to the general, 20 cts.; in all, \$3 32.	88 60	
	151. Joseph B. Gilbert, for eight pans	7 00	
	September, 1814, (two bills)  One of the bills, amounting to \$40 82, shows the work to have been performed after the 12th, and the amount of the other bill is not shown to have been properly chargeable to the general government, there being no evidence that the remounting was rendered necessary by the use of the cannon in the public service.  153. Enoch Foote, for sundry payments for building barracks and mounting cannon, &c., at Bridgeport, in September and October, 1814 \$659 19  One of the bills contains a charge for storage of provisions, 5½ months, ending November 9, 1814, at \$2 per month, and which, so far as re-	61 40	;
	gards the part accruing before the 13th September, is admissible 7 19  What portion of the residue is applicable to articles furnished or work performed prior to the latter day is not ascertainable from the vouchers. Whatever it may have been, however, if it was (as is inferable) in respect of the part (Captain Bennett's company) of Colonel Sanford's command which was stationed at Bridgeport, that portion would be as objectionable as the other. One bill overcharged in the account 53.	652 00	
	154. William Strong, for expense of mounting two cannon on ship-carriages at Milford, and for superintending the work.	105 18	

No. of oucher.	To whom and for what paid.	Sums disal- lowed.	Sums sus- pended.
	ACCOUNT No. 3—Continued.		
E	Subsequent to September 12, 1814; and had it been prior thereto, no allowance could have been made without explanatory testimony and the sanction of the Secretary of War. It cannot be found that there were any militia on duty at Milford.		
	155. Samuel Nevins, rent of house for barracks, from 13th June to 5th October, 1814		
	156 David Buell & Co., for 222 9-pound cannon balls delivered at Saybrook and	\$4 40	
	New Haven	155 44	
	Haven, September 8, 1814  The company was part of Colonel Sanford's command.  160. Colonel E. Sanford, for transportation of the baggage of himself and other officers of his staff to New Haven, September 8, 1814	3 50 9 00	
	Not allowable.  161. Captain A. B. Curtis, for transportation of the baggage of his company to New		
	Haven, in September, 1814, &c  The company was part of Colonel Sanford's command.	15 75	
	163. Chauncey Deming, for transporting tin from New Haven to Farmington Not shown to have been transported before September 12, 1814; the receipt for the money is not dited till 1815, and there is nothing to show that the expense, if incurred before September 12, 1814, was properly chargeable to the United States.	1 20	
	164. Jos. B. Gilbert, for 9 milk pans, 1,500 tin cups, and 380 shot canisters, furnished in January and August, 1814. The articles are none of them shown to have been applied to the public service. No militia appear to have been stationed at Hartford, where the voucher is dated, and in January, 1814, there do not appear to have been any militia on duty.	145 07	
	Charge for freight of musket balls from Hartford to Saybrook  No date, no voucher, nor any explanation by which the expense, if incurred prior to September 12, 1814, can be ascertained to have been properly chargeable to the United States.	50	
F	John Mix, quartermaster general, for services, travelling allowance, stationery, postage, and occasional clerk hite.  In his account he has charged for numerous journeys performed between June, 1812, and November, 1814, occupying 213 days, and during which he is stated to have travelled 3,292 miles; within this period he has also charged for 45 days' services in office, and for stationery, postage, and occasional clerk hire. Of the sums charged there are several, amounting to \$144 40, for journeys, &c., in 1812 and 1814, before any militia were called out, and therefore deemed to be inadmissible: and others, for journeys, &c., after September 12, 1814, are so under the decision of the Secretary of War. Several more relate to journeys at times when there were no militia in service, or to places where there were none on duty, and concerning which there is no explanation manifesting them to be properly chargeable to the United States; the purposes of the other journeys, too, are either wholly without explanation or are but insufficiently explained. To enable the Secretary of War to decide on the allowance to be made, an exposition of the object of each journey will be necessary, and it should be accompanied by accounts and vouchers for the postage, stationery, and clerk hire,	1,169 63	
	exhibiting dates; the charge for postage amounts to \$40 15, and extends from July, 1812, to October, 1814.		
	Account of John Mix, quartermaster general, No. 2.  For sundry payments, amounting to \$130 36	•	
	2. Oliver Orris, for transporting of ammunition from Hartford to New Haven, Milford, Bridgeport, and Norwalk 36 00 After September 12, 1814; the expense, besides, is not shown to have been incurred in respect to any militia in service at those places at the		
	time. 3. Charge for 7 days' services of Mr. Mix at New London, in June, 1813, stated to have been omitted in his former account, and for his travel-		
	ling allowance		
	5. G. Hastings, for journey express from New Haven to New London 13 00 After September 12, 1814. 6 and 7. Charges for postage on 10 letters, and 3 days' services of Mr. Mix in answering them		
	After September 12, 1814.	89 86	
	Account of Jared Scarborough, quartermaster general, No. 3.		
1 B	Sundry payments for transportation by water		
	1. Elisha Chester, for ferriage of 16 barrels and 2 boxes of provisions for the detachment at Stonington, June 4, 1814		

## ${\it Remarks on the accounts of the State of \ {\it Connecticut}--{\it Continued.}}$

	ACCOUNT No. 3—Continued.		
6	65. Expenses of erecting signal poles		
	bills produced are not receipted.  66. The artillery were attached to Colonel Sanford's command		
	that service 2 00  The remaining expenditures charged in Colonel Scarborough's account comprise	\$3,525 69	
	several— For the erection of barracks, (vouchers 8, 30, and 30.) amounting to \$187 00 For cleaning and repairing arms, (vouchers 8, 24, 32, 61, 75, and 77,)		
,	amounting to 339 90  For mounting cannon, repairing harness, &c., (vouchers 30, 35, 37, and 48,) amounting to 184 66		
	For transportation of military stores after the war, (vouchers 60, 67, 68, 69, 70, 72, 73, 74, 75, 76, 80, 81, 83, 88, and 93,) amounting to 249 06 For storage of munitions, (vouchers 60, 61, and 92,) amounting to 72 87		
	For stationery, (vouchers 10, 13, and 81, &c.,) amounting to 14 37 For repairing wagons, and keeping and trimming horses, &c., (vouchers 12, 55, 79, and 93,) amounting to 35 34		
	For transporting powder to Saybrook and Killingworth, December, 1814, (voucher 17)		
	And for Colonel Scarborough's compensation		
	like items.  Voucher 59 is for a payment of \$22 75 to Major Jesse Smith for transportation of his and Adjutant Holley's baggage from Salisbury to Middleton, in October, 1814, and of the service of either of whom no evidence could be found.  Vouchers 28, 33, 57, 58, and 87, for advertising rules and regulations for the quar-		
	termaster's department, do not appear to be properly chargeable to the United States, \$10 25.  Vouchers 11 and 39 show that five 18-pounders and two brass 6-pounders, with carriages, harness, and apparatus, were loaned to the State by the United States, no evidence of their return is adduced, and the charges for their transportation and reparation, amounting to \$381 63, would have required to be sanctioned by the		
	Secretary of War before they could have been allowed.  Account of Jared Scarborough, No 4.		
	For various expenditures.  All after September 11, 1814, except a portion of the rent of the New Haven powder-house, which commenced on the 10th of that month, and is not, as has been previously noted, considered to be properly chargeable to the United States. The expenditures, as to \$110 91, were for horse keeping, &c., and commission on the sale of horses after the war; and as to \$35 75 more, for freight, &c., of military stores after the war. One of the bills, amounting to \$60 54, is not receipted.	166 91	
	- ACCOUNT No. 4.		
	Charge extracted from an account of Ebenezer Huntington, adjutant general, for detaching militia in May, 1812, under a requisition from the President A voucher, describing the services performed and evidencing the payment of the amount by the State, will be necessary before the admissibility of the charge can be judged of. There do not appear to have been any Connecticut militia in actual		\$12
1	service in 1812.  William Williams, for grant of assembly in his favor, passed May session, 1813  The condition of the grant is represented to be the lease of a lot and magazine or powder-house in New London, from the Rev. Henry Channing; the charge in the State account expresses the amount to be for repairs and rent of a building at New London for a magazine. In neither way is the expense shown to be properly chargeable to the United States; there is, besides, no proof of any expenditure by William Williams.	170 99	
2	Ichabod Ward, for an allowance granted by the general assembly in October session, 1813, for loss on a contract for supplying rations to the militia in that year  Not allowable without the special sanction of the Secretary of War. A charge of \$104 58, for balance of profit and loss on articles remaining on hand when the United States assumed the supply, is made in the State account No. 2; and in the account of Colonel Ward against the United States there are charges for payments to Ichabod Ward of \$80 for loss on hogsheads and beef shanks, and of \$165 for	200 00	
3	expenses in consequence of the troops having been unexpectedly dismissed. The report and papers connected therewith are not produced.  Ebenezer Huntington, adjutant general, for time, horse hire, and expenses on		
	various journeys in 1813, viz:       \$49 72         To Hartford, May 25 to June 2       \$12 75         New London, August 28       12 75         New Haven, September 4       43 08         New London, September 5       7 50		
	Pomfret, september 8.       14 50         New London, September 12.       7 50         New London, September 16.       12 75		

o. of icher.	To whom and for what paid.	Sums disal- lowed.	Sums suspended.
	ACCOUNT No. 4—Continued		
3	For time, making a detachment, September 8	\$180 <b>6</b> 5	
	The account is wholly silent as to the object of the journeys, except as to the one to Pomfret, which is expressed to have been "by resolve of assembly to settle limits of companies;" a matter, it would seem, peculiarly of State concern, and the attendant expense therefore not properly chargeable to the United States. Other of the charges may be alike objectionable. An account for his pay and emoluments as adjutant general, from June 3 to July 26, 1813, certified by Governor Smith, was rendered to and paid by the United States district paymaster, S. H. Eakin; had compensation for his services from May 25 to June 2 been then considered chargeable to the United States, it is inferable that the account alluded to would have been made to include the latter period as well as the former. The bill for printing general orders and circulars is not produced, nor any evidence of its payment by the adjutant general; neither is there any description of the purport of the orders and circulars whereby the expense of printing them is manifested to be properly chargeable to the United States. Expenses unconnected with militia in actual service are not so chargeable.  The charges should be fully explained in order to enable the Secretary of War,		
6	whose sanction will be requisite, to decide thereon.  Seth P. Staples, for services performed and expenses incurred in May and June, 1814, in carrying into effect a resolve of the general assembly, directing the commander-in-chief to take proper measures for the examination, proof, and preservation of certain iron ordnance of the State.	386 80	
7	A State concern, and the expense not properly chargeable to the United States.  Ebenezer Huntington, adjutant general, for forming 6 companies of ex empts, and filling and issuing 96 commissions to exempt officers, in May and July, 1814. \$30 00 For his annual allowance of stationery. 12 00		
	For journey and expenses to Hartford, July 29, 1814, to meet the governor, by his order, four days       27 00         For making a detachment in August, 1814       12 00         For payments to expresses       5 00         And for postages from December, 1813, to August, 1814       6 72	09.79	
9	The first and second items are clearly inadmissible as against the United States.  The object of the journey to Hartford must be explained before the propriety of the charge for it as against the United States can be judged of. The charges as to the expresses are unvouched, and those for postage are not shown to have been connected with the militia that were or had been in actual service. As to more than half the amount charged, the dates manifest the expense to have been incurred when there were no militia on duty.  Wm. C. Bull, for an injury sustained by the blowing up of an ammunition box while	92 72	
J	firing on the enemy at Pettipauge, on the 8th April, 1814.  The payment appears to have been made pursuant to a grant of assembly. No allowance on this charge can be made without the sanction of the Secretary of War, and to enable him to decide, the papers whereon the grant was founded will be necessary. Those produced do not show the nature of the injury, whether it was to the person or his property. A charge of \$19 is made in another part of the State account on a bill in his name of the same date for powder.	27 92	
10	Adjutant General Eben. Huntington, for his services and expenses on two journeys to New London, August 17 and September 11, 1814  Explanation as to the objects of these journeys will be necessary before the propriety of the charges for them as against the United States can be judged of. The first is expressed to have been on business with General Cushing, the nature of which is not mentioned, and General Cushing's letter to the governor, of the 18th August, is wholly silent on the subject. The last journey, it will be seen, was taken on the day next preceding that on which the militia were withdrawn from the command of the United States officer.		\$20 :
11	Walter Budington and W. S Hotchkiss, for expense of erecting a battery on the pier at New Haven, in August, September, and October, 1814	343 83	
12	Baptist Society in Waterford, for an allowance granted by the general assembly for damage done to their meeting-house by the militia detached for the defence of New London, and who are alleged to have rendezvoused at the meeting-house The papers whereon the grant was founded are not produced, and those exhibited do not show whether the damage was done before or after the 12th September, 1814, nor afford sufficient explanation whereby to judge of the admissibility of the charge if prior thereto. The building is not stated to have been used or occupied as barracks or quarters for the militia. The using one as a place for	80 00	
13	them to rendezvous or assemble at is not authorized by the regulations.  Proprietors of Fort Fenwick, for the use of land and damages done by the militia stationed there in 1813, 1814, and 1815

No. 515.

[1st Session.

STATEMENT OF CONTRACTS FOR CANNON AND SHOT MADE FROM 1820 TO 1832.

communicated to the house of representatives february 25, 1832.

DEPARTMENT OF WAR, February 24, 1832.

Sir: In compliance with the resolution of the House of Representatives of the 16th instant, directing the Secretary of War to lay before that House "a statement of the contracts, and with whom made, for cannon and shot, and the prices paid for each, from the year 1820 to the present time," I have the honor to transmit a report of the lieutenant colonel of ordnance, which affords the information required.

I have the honor to be, very respectfully, your obedient servant,

LEWIS CASS.

Hon. Andrew Stevenson, Speaker of the House of Representatives.

Ordnance Office, Washington, February 24, 1832.

SIR: In compliance with the resolution of the House of Representatives of the 16th instant, directing "that the Secretary of War be directed to lay before this House a statement of the contracts, and with

whom made, for cannon and shot, and the price paid for each, from the year 1820 to the present time," which was referred to this office, I have the honor to transmit herewith a statement which contains the information desired.

I have the honor to be, sir, respectfully, your obedient servant,
G. BOMFORD, Brevet Colonel, on Ordnance Service.

Hon. Lewis Cass, Secretary of War.

Statement of the contracts made by the Ordnance department for cannon and cannon shot from the year 1820 to December 31, 1831, showing with whom made and the prices paid for each.

APPLICATION OF INDIANA FOR A MORE PERFECT AND UNIFORM ORGANIZATION OF THE MILITIA OF THE UNITED STATES.

COMMUNICATED TO THE SENATE FEBRUARY 27, 1832.

A JOINT RESOLUTION relative to a more perfect organization of the militia of the several States.

Be it resolved by the general assembly of the State of Indiana, That our senators in Congress be, and they are hereby, instructed, and our representatives requested, to use their exertions, both by their votes and influence, to procure the passage of a law providing for a more perfect and uniform organization of the militia of the several States of the Union, in pursuance to the Constitution of the United States.

Resolved, That his excellency the governor of this State be directed to transmit to each of our senators and representatives in Congress a copy of the foregoing resolution; also a copy to the governors of other States in the Union, with a view that the same may be submitted to the consideration of their

respective legislatures.

H. H. MOORE, Speaker of the House of Representatives. DAVID WALLACE, President of the Senate.

Approved January 26, 1832.

No. 517.

[1st Session.

ON THE EXPEDIENCY OF ERECTING FORTIFICATIONS ON THE PENOBSCOT RIVER AND BAY, IN MAINE.

COMMUNICATED TO THE SENATE MARCH 1, 1832.

In the Senate of the United States, February 27, 1832.

On motion of Mr. Sprague-Resolved, That the Committee on Military Affairs be instructed to inquire into the expediency of providing by law that fortifications shall be erected and completed, as soon as may be, on the Penobscot river and bay, sufficient for the protection thereof. Attest. WALTER LOWRIE, Secretary.

The committee direct it to go to the Hon. Secretary of War for his opinion and observations. THOMAS H. BENTON.

DEPARTMENT OF WAR, March 1, 1832.

Sm: In answer to your note requesting my opinion in regard to "the expediency of providing by law that fortifications shall be erected and completed, as soon as may be, on the Penobscot river and bay sufficient for the protection thereof," I have the honor to enclose a report of General Gratiot, chief engineer, which contains the views of the department upon the subject.

I have the honor to be, very respectfully, your obedient servant,

LEWIS CASS.

Hon. Thomas H. Benton, Chairman of the Military Committee, Senate.

Engineer Department, Washington, March 1, 1832.

Sm: On the subject of the resolution of the Senate, relative to fortifying Penobscot river, which was referred by you to this office, I have the honor to report that, in projecting a system of defence for the coast of Maine, it has been found impracticable to provide for fortifying any considerable proportion of the numerous good harbors with which that coast abounds; and it was therefore determined by the board of engineers to recommend fortifying in the most careful manner that harbor which should appear to be best situated as a depot and rendezvous for a fleet, and which would thus be not only most useful to ourselves, but the greatest object of cupidity to an enemy. Such a harbor is found on Mount Desert island, and to this point it is proper that the first expenditures for fortifying the coast of Maine should be applied. The suspension for some years past of topographical surveys for military purposes has prevented the completion of that of Mount Desert island, and consequently the plans of defence are not prepared. Application has, however, been made to Congress during the present session for means to continue those surveys, and should they be granted, this will be one of the first in order.

The defence of other secondary points on this coast it will also be necessary to provide for, and among them, as one of the most importance, is that of Penobscot river; but the bay is so extensive, and provided with so many good anchorages, that the cost of defending it by permanent fortifications is altogether disproportioned to the present importance of the object. It is therefore proposed to protect the commerce of the river and bay by works placed at the Narrows, opposite Bucksport, the lowest point on the river at which this object can be readily effected. With regard to the urgency of constructing these works, it is thought that, considering their relative importance compared with that of many others not commenced, the board of engineers has with propriety classed them among those to be constructed at a remote period, as will appear by reference to their revised report and to the table of works annexed to my annual report at the commencement of this session.

I am of opinion, therefore, that it is not expedient to "provide by law that fortifications shall be erected and completed, as soon as may be, on the Penobscot river and bay." I will add, too, that the want of disposable officers of the corps of engineers would, under any circumstances, make it inexpedient to increase the number of works under construction beyond what is suggested in my general report.

Respectfully submitted.

C. GRATIOT, Brigadier General.

Hon. Lewis Cass, Secretary of War.

22d Congress.]

No. 518.

[1st Session.

ON THE EXPEDIENCY OF FUNRISHING THE MILITIA, WHEN IN THE SERVICE OF THE UNITED STATES, WITH BLANKETS AND CLOTHES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 8, 1832.

Mr. Drayton, from the Committee on Military Affairs, to whom was referred a resolution of this House instructing them "to inquire into the expediency of furnishing blankets and clothes to the militia when engaged in the service of the United States," reported:

That they deem it inexpedient to provide that the militia, when in the service of the federal government, should be furnished by it with clothes; but they are of opinion that the government ought to furnish them with blankets whenever they shall be in its service for a continued period of six months. They have therefore directed their chairman, in order to carry their intention into effect, to prepare an amendment to be added to "a bill to provide more effectually for the national defence by organizing, arming, and establishing a uniform militia throughout the United States, and to provide for the discipline thereof," which has been read twice and committed to the Committee of the Whole House on the State of the Union.
