Sir: I have received your letter of February 5, and have requested the commissary general of subsistence to correct the mistake respecting your suspension from the duties of your office. His letter will have shown you that it was not intended to separate you entirely from the business of emigration, but to confine your services to the re-examination of contracts, as that is the most pressing and important matter, and as it was presumed to be impracticable for you officially to perform both branches of duty at the same time. You perceive it is expected that you will resume the direction of the emigrating business as soon as you have finished the investigation of the contracts.

The President, on full consideration, has determined to make an experiment, to remove the Creek Indians by contract; and an arrangement for that purpose has been entered into, and it is believed with such stipulations as will be safe for the government and for the Indians. All that is expected by the department is, that you should zealously co-operate in endeavoring to procure the removal of the Creeks, and as far as possible aid the efforts of the contractors while they keep themselves within the line of their duty; and I am sure that I shall not be disappointed in this expectation.

You appear to concede that this system of removal would be more economical to the United States; and if the contract is faithfully superintended and executed, it will certainly secure the comfort of the Indians and faithfully fulfil all our promises to them. You have full power to see the most ample justice done to them, and if this justice is not done, you have authority to make other necessary arrangements. Under these circumstances, I am at a loss for any reason to yield to the idle whims of the Indians, and indulge them in unnecessary preferences, which amount in fact merely to a wish that certain individuals, rather than others, should be concerned in their removal. It is well known that interested persons may easily induce the Indians to prefer almost any request; and I have no doubt that some such influence has operated upon them, and has led them to make representations to you. You state the case very justly with regard to your own responsibility; and certainly that responsibility is lessened by the contract system.

The President is not now willing to change it until a fair experiment has been made. When this is done, and the effect fails, then it will certainly be proper to recur to the former mode. Captain Page, however, in whose judgment and knowledge of this subject great confidence is placed, expressed while here his firm conviction that the plan of removing the Indians by contract might be successfully carried into effect. I have to request, therefore, that you will, in conjunction with Captain Page, use your best efforts to co-operate with the contractors, and to give them an opportunity of making a decisive experiment on the operation of removing the Indians.

You express your regret at the bad success which has attended the emigration. It is, indeed, seriously to be regretted; but so far as the causes have been made known here, they have been attributed to the situation of the Indian contracts, rather than any peculiar mode adopted for the removal of the Indians.

I feel great solicitude upon this subject. The state of affairs with the Seminoles, and the possibility that the Creeks may join them, or may themselves commence hostilities, increase the anxiety I have had for the removal of these Indians. If they once break out, I think their destruction inevitable. A regard for our own citizens would require the adoption of the most prompt and decisive measures. General Scott has full authority to call out any force that may be required to subdue them, or to repel their aggressions. I will thank you to correspond freely and fully with him on the subject, and to keep him advised of any indication that may appear among these Indians to commit hostilities. The same information you will please to communicate from time to time to this department. And in your intercourse with the Indians, I have to request that you will enjoin upon them, as they value their own existence, the necessity of being tranquil while they remain in Alabama, and of preparing for their removal as quick as possible.

LEWIS CASS.

Colonel JOHN B. HOGAN, *Fort Mitchell, Alabama.*

WAR DEPARTMENT, *March 12, 1836.*

GENTLEMEN: Your letter of the 1st instant to the Secretary of War has been referred to this office. I am instructed to say that you are fully aware of the great desire of the President to remove the Creek Indians without unnecessary delay. But the President has another duty under the treaty besides that of removing them. He is bound to take care that the treaty is faithfully executed, and that the Indians are not defrauded of their property. With all the allegations and statements before the War Department, how could he justify it to himself or to the country to stop all these investigations on the mere ground that he was desirous of sending the Indians away? By doing this he would violate the plainest principles of justice, and bring the government into reproach. You recommend that Doctor McHenry's returns of cases set aside should be confirmed, and that the further prosecution of the matter in General Sanford's and Mr. Tarrant's districts should be stopped. The reason urged for this course is, that there are but few fraudulent cases in the two latter districts. And how few ought there to be to justify an examination? The allegations here do not lead to a confirmation of this opinion that there are but few cases; and if there are just grounds to suspect any, those thus suspected ought to be inquired into. And it would, indeed, be a bad justification on the part of the government to assume that there were few cases of fraud, and that therefore the whole matter should be stopped, and the Indians sent away.

The investigations have not been conducted agreeably to the intentions of the department. By the possession and certificate of a contract, *prima facie* rights are certainly acquired by the party holding it. It may, indeed, have been improperly and fraudulently obtained. But this must be shown by some evidence before it can be set aside. The returns made from Doctor McHenry's district do not exhibit, with the exception of a very few cases, in which a summary of the evidence is given, and with the exception of others, stated to have been set aside by the consent of the parties, any grounds for the action of the President. They have been, therefore, returned, and detailed instructions have been given as to the mode of proceeding. Two gentlemen of high character in Georgia have been associated with Colonel Hogan, and all the necessary information for their prompt action has been transmitted to them. They have been requested to proceed with as much despatch as possible, and to close the whole matter with the least possible delay. Immediately on receiving their report the President will make his decision, and those contracts not reversed will be delivered to the parties. When a reversal takes place a new contract may be entered into and certified without delay, and for that purpose one or more additional certifying agents will be appointed.

I do not see the necessity of appealing to each Indian to ascertain whether fraud has been committed. If a contract is fraudulently obtained, I should suppose that the Indian party would, of his own accord, make the complaint, particularly as all the Indians must know the investigating commission will be going through their country for the purpose of making these inquiries. The instructions have never been to make indiscriminate investigation. The examining agents are directed to inquire into those only where probable cause is shown. It is impracticable to define here what shall be a probable cause. That must be intrusted to the discretion of the agents.

You will see by this communication that the President deems it his indispensable duty, from which he cannot depart, to investigate these allegations of frauds wherever there is probable cause to suspect their existence, even if the causes are but few. You will see, also, that in doing this, he considers himself bound not to exercise an arbitrary discretion, but to judge in each case upon a summary of such facts as may be collected and exhibited. And you will finally see that every measure which seemed to be proper to bring these investigations to an immediate close, and thus to lead to the removal of the Indians without unnecessary delay, has been authorized.

Very respectfully, &c.,

LEWIS GASS, *Secretary of War.*

Messrs. JOHN W. A. SANFORD & Co., *Columbus, Georgia.*

WAR DEPARTMENT, *April 14, 1836.*

In acknowledging the receipt of the letter from J. W. A. Sanford & Co., contractors for removing the Creek Indians, to the commissary general of subsistence, dated March 30, 1836, General Gibson will inform the contractors that the department gives no consent to this measure.

General Gibson will also signify, in answer to their letter of March 28, the gratification of the department at the prospect which they express of being able to remove so many of the Indians during the present season.

General Gibson will also transmit to Colonel Hogan a copy of the letter from the contractors to the commissary general, dated March 30, 1836. But at the same time he will inform Colonel Hogan that the department is satisfied that there has been a misapprehension with respect to Colonel Hogan's views, and that the letter is sent merely to afford Colonel Hogan an opportunity of putting the matter in its proper light. And the department is the more satisfied on this subject in consequence of the very judicious proposition recently made by Colonel Hogan to allow Captain Page and some of the contractors to accompany him to the Indian towns, and of his promise to co-operate with them in order to induce the Indians to remove; which promise, it appears by the contractor's letter of March 28, must have been faithfully complied with by Colonel Hogan.

General Gibson will also write to the contractors, stating that a copy of their letter has been sent to Colonel Hogan, and for the reasons stated. He will also inform them that the department exceedingly regrets to see these continued manifestations of a want of confidence between the contractors and Colonel Hogan. The public service is injured by it, without corresponding advantage to any one. Nor does there seem the least necessity on either side for such a state of feeling. Let them both be requested to go on and discharge their respective duties, and disregard all private feelings.

General Gibson will also inform the contractors that Colonel Hogan's recent communications respecting their operations evince a cordial desire of promoting the objects of the government. And that Colonel Hogan has faithfully fulfilled his promise is apparent from the contractors' letter of March 28, in which they state their prospect of success, after having had interviews with the Indians in the presence

of Colonel Hogan. After this manifestation of the favorable intentions of Colonel Hogan, it is not very obvious why the letter of March 30 was written.

Very respectfully, &c.,

LEWIS CASS.

The COMMISSARY GENERAL OF SUBSISTENCE.

MARDISVILLE, *Alabama*, March 27, 1835.

SIR: At a council at Cooswoda, near Tuskegee, the county seat of Macon county, the Indians held their councils altogether in private. I believe the chief object of the meeting was to give an account of their late visit to Texas. After they had interchanged their views and opinions with each other, they sent for and gave me an account of their visit to Texas, and of their determination to emigrate forthwith, or as soon as practicable, to that country; and showed me an instrument of writing by which it appeared they had made a purchase of a gentleman by the name of Hodgkiss, agent for a Spanish or Mexican gentleman by the name of Brasores, of a grant of land belonging to Brasores. They have agreed to pay for this grant \$80,000, \$20,000 of which they are to pay immediately, and the balance when the title to the grant is completed by Brasores. It is a large body of land, and described by the delegation to be one hundred miles square. I could not learn from them where the grant of land lies, but it is described by them as being wholly uninhabited. Tuskenehaw, Opothleholo, Mad Blue, and Little Doctor, held a private communication with me, and from them I learned that they were unwilling that I should communicate their views to the President, but they are extremely anxious to have a conference with him themselves. I think they are fearful that he would not approve of the course they have adopted, but would urge them to go to Arkansas, a place which they seem to have an unconquerable aversion to. From what I could learn of their views, they wish the President to call a delegation to Washington, and think if they could see him, and converse with him themselves, he would forward their views.

They wish to make some arrangement in relation to their perpetual annuity, and to be allowed to emigrate themselves to the country they have purchased. Their object, I believe, is to raise the money to pay for their late purchase.

From what I could learn of them, they wish Barrant Dubois, a white man, who has married a native, to accompany them to Washington, as he went with them to Texas and has their confidence; his interest they consider identified with theirs.

I knew not what advice to give them on the subject, as I had no knowledge of the course the department would pursue in such a case, and, of course, proposed to communicate their wishes to the department, which they seemed unwilling for me to do. I have, however, thought it my duty to apprise the department of these movements, and, if it is not inconsistent with propriety, I wish this communication to be considered a private one, and, as the department is now in possession of the wishes of these people, I see no necessity in letting them know by what means the information was obtained. I feel, however, justified in what I have done, as the department can now forward or oppose their views; the latter of which I feel persuaded it will not do unless it is considered for the benefit of the Indians themselves.

I remain, &c., &c.,

LEONARD TARRANT.

Hon. LEWIS CASS, &c.

WAR DEPARTMENT, *April 14*, 1835.

SIR: I have received your letter of March 27, and have laid it before the President. I do not see any good reason for considering your communication as a private one, as the matter relates exclusively to a subject of public concern. I therefore write to you officially, although I shall not communicate the fact to the Indians, as you seem desirous that they should not know that the department had any knowledge of the subject.

As to their coming here, it is out of the question, so far, at any rate, as relates to their expenses being borne by the government. We have no funds for such a purpose, and, if we had, the journey would be unnecessary, for all the business they can have to do would be much better done by written communications than by personal interviews. You will therefore discourage any such attempt on their part.

Their project of emigrating to Texas cannot receive the sanction of the United States. The procedure would give offence to the Mexican government; and you will therefore signify to them upon all proper occasions that in the attempt they will not receive the slightest aid from the United States. There is no necessity for the measure, for the country offered them west of Arkansas is amply sufficient, both in extent and fertility, for their permanent establishment and subsistence; and the repugnance which you think they evince to going there is but an idle whim, which ought not to be yielded to. I am apprehensive, from what you state, that they have been encouraged in this project by some persons in Texas who are desirous of procuring their money, and who would only lead them into difficulty, both as regards their title and their political condition.

I do not understand from your letter whether or not the Creeks are about to address a communication to this department on these subjects. If they do, the answer given will be in conformity with these views. If they do not, you will seek some proper occasion to convey to them the sentiments of the government on the subject.

In all your intercourse with them, however, I would thank you to impress upon them the necessity of an immediate and entire removal. No other course remains promising them the slightest chance of eventual improvement or even of existence.

Very respectfully, &c.,

LEWIS CASS.

LEONARD TARRANT, Esq., *Mardisville, Alabama*.

FORT MITCHELL, *Alabama, August 20, 1835.*

Sir: It is reported several communications have been forwarded to the department that the Creek Indians were greatly opposed to their being removed by *contract*, and that they would die where they now lived. My reason for addressing you on this subject is to say to you that the spirit of opposition on the part of the *Indians* does not exist; they being told that an officer of the army would accompany each and every party to see that they did not suffer on the road gives general satisfaction to all who have any disposition to remove.

I profess to know something of Indian character, and I make bold to assert that their being removed by contract will not retard the progress of emigration, but greatly facilitate it; and I flatter myself that the company now empowered to remove them will be able to show to the department and the citizens of Alabama that there does not exist that spirit of opposition on the part of the Indians.

I remain, &c.,

S. C. BENTON.

General GEORGE GIBSON.

CONTRACT.

Articles of agreement entered into this seventeenth day of September, one thousand eight hundred and thirty-five, between George Gibson, commissary general of subsistence, under the authority of the President of the United States, on the part of the United States, and John W. A. Sanford, Alfred Iverson, John D. Howell, Benjamin Marshall, Luther Blake, and Stephen M. Ingersoll, of Georgia, to be known in said article as and acting under the firm of John W. A. Sanford and company.

This agreement witnesseth that the said George Gibson, for and on behalf of the United States, and the said John W. A. Sanford and company, their heirs, executors, and administrators, have agreed, and by these presents do mutually covenant and agree:

I. That the said John W. A. Sanford and company, their heirs, &c., shall remove the Creek Indians, occupants of the Creek nation, in the State of Alabama, from said nation to a point in the new country allotted to the Creeks, west of the Territory of Arkansas, and within twenty miles of Fort Gibson—to wit, men, women, and children, with their slaves, and their goods and chattels—as hereinafter provided in manner and form, and for the consideration specified in these articles of agreement.

II. That the said John W. A. Sanford and company, their heirs, &c., shall collect the Indians together at convenient times and places, and that the Indians shall be subsisted by them from the day they commence to march to the place of assemblage.

III. That the said John W. A. Sanford and company, their heirs, &c., will despatch to the new country aforesaid parties of one thousand Indians or more, under the conduct of such agents as the said John W. A. Sanford and company, their heirs, &c., may deem it proper to appoint, the Indians having first been carefully enrolled.

IV. That the following shall be the rations and the kind and quantity of transportation to which the Indians, &c., shall be entitled: the ration of bread shall be one pound of wheat flour, Indian meal, or hard bread, or three-fourths of a quart of corn; the meat ration shall be one pound of fresh or three-fourths of a pound of salt meat or bacon, and, with fresh meat, two quarts of salt to every hundred rations. The transportation shall be one six-horse wagon and fifteen hundred pounds of baggage to from fifty or eighty persons. The provisions and transportation shall be the best of their kind. The average daily travel shall not exceed twelve miles.

V. That the provisions shall be issued daily, if practicable, and not less frequently than every other day, as well while at rest as during the travel, until the day inclusive of arrival at the point of destination west; and that there shall be established, within three months, points upon the entire route westward, at which the provisions are to be issued.

VI. That the sick, those enfeebled from age or other cause, and young children, shall be transported in wagons or on horseback; that those who may be pronounced unable to proceed may be left on the route at some proper place, and under the care of some proper person, at the expense of the United States.

VII. That the Indian ponies shall be given, from the day of starting westward, one half gallon of corn each; provided such disposition in the active operations of the removal may be made of them (not to include the hauling of the wagons before mentioned) as the said John W. A. Sanford and company, their heirs, &c., may deem proper, but that they will not be separated from the company to which their owners respectively are attached, nor compelled to carry any other baggage or persons than those belonging to the family of their owners.

VIII. That the said John W. A. Sanford and company, their heirs, &c., shall be entitled to twenty dollars a head for each person transported from the Creek nation to the place of delivery before mentioned; and for all persons who may die, or be necessarily left on the way, as authorized by article six of this contract, an amount in proportion to the distance travelled; provided that the evidence herein required in cases of arrival westward, &c., to be furnished to the proper department; the amount due to the said John W. A. Sanford and company, their heirs, &c., to be paid promptly at such points as may be previously indicated by them, and under instructions hereafter to be given by the War Department

IX. That the said John W. A. Sanford and company, their heirs, &c., shall not coerce the Indians to remove, all threats and violence towards them being prohibited; and that they shall be treated by the said John W. A. Sanford and company, their heirs, &c., and by the agents of the same, with lenity, forbearance, and humanity.

X. That the United States will furnish the following agents:

1st. A superintendent, whose duty it shall be to remain within the limits of the Creek nation during the proper season for operations under this contract, for the purpose of seeing that its stipulations are fulfilled by the parties thereto. He shall receive his instructions from the commissary general of subsistence, and will not be accountable in any way for his acts to the said John W. A. Sanford and company, their heirs, &c.; and that such superintendent shall decide whether fifty or eighty, or any intermediate number of Indians ought, consistent with the health and comfort of the Indians, to be assigned to each wagon.

2d. Two or more military agents, one of whom shall accompany each party west. The duties of these agents shall be to attend particularly to the treatment received by the Indians, their rations, and transportation; to remonstrate against any course of conduct on the part of the agents of the said John W. A. Sanford and company, their heirs, &c., inconsistent with the letter and spirit of this contract, and to protest to the proper department; and if a remedy can be found in a pecuniary expenditure, to make it, which, if approved by the Secretary of War, shall be deducted from the payments to be made under this contract to the said John W. A. Sanford and company, their heirs, &c.

3d. A surgeon for each emigrating party, whose duty shall be to attend to the sick thereof. He shall also be the arbiter in cases of difference of opinion between the agents of the United States and of the said John W. A. Sanford and company, relative to the quality of provisions, the time and place of issuing the same, and the time of starting and stopping on the daily travel; and he shall also decide whether invalids may be left on the way, and take care that they are provided for agreeably to article six of this contract, and enter upon the roll the time and place of such occurrence, with the date of decease of all Indians who may die on the route.

4th. A disbursing agent in the new Creek country west of the Mississippi, whose duty it shall be to receive the Indians as they arrive, to muster them, and certify upon the roll presented to him by the agent of the said John W. A. Sanford and company, their heirs, &c., the result of that muster, said muster to take place on the day of arrival (if practicable) at the point of destination.

And that the said John W. A. Sanford and company, their heirs, &c., shall render every facility to the aforesaid superintendent, military, medical, and disbursing agents, that may be necessary to enable them freely to attend to the duties of their several offices.

XI. That the said John W. A. Sanford and company, their heirs, &c., will without delay, and within sixty days from the date of this contract, commence active operations in the Creek nation, Alabama, and by and before the first day of July next remove to within the limits of the Creek nation west five thousand persons. And it is expressly understood that the rights of the said Sanford and company, their heirs, &c., under this contract, so far as regards the removal of Indians from Alabama, cease after the removal of five thousand Indians, or on the first day of July, one thousand eight hundred and thirty-six, allowing afterwards due time for Indians moved prior to that date to reach the new country west.

XII. And it is further agreed, that within the period specified in article eleven for the termination of this contract, whatever expense per head, in addition to that stipulated to be paid to said John W. A. Sanford and company, their heirs, &c., may be incurred by the United States, shall be repaid to the United States by said John W. A. Sanford and company, their heirs, &c., and be recoverable by suit at law. And it is also hereby reserved to the United States to annul this contract to all intents and at any time the aforesaid George Gibson may deem proper; but it is understood that the privilege guaranteed in section eleven to the said John W. A. Sanford and company, their heirs, &c., of time for the removal of those who start before the termination of the contract, shall be extended to this case.

Provided, and it is hereby understood by the contracting parties, that all such matters as are merely in the nature of regulations, and do not affect the pecuniary interest of the said John W. A. Sanford and company, their heirs, &c., are saved to the United States, and that under all circumstances the United States have complete control of their own officers and agents. And further, that where infractions of this contract exist, they must be alleged by either party at the time of their occurrence, and that no effect whatever is to be given hereafter to allegations not thus brought forward.

24TH CONGRESS.]

No. 692.

[1ST SESSION.]

APPLICATION OF RHODE ISLAND THAT THE FORTIFICATIONS FOR THE DEFENCE OF NARRAGANSET BAY MAY BE COMPLETED WITHOUT DELAY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 6, 1836.

IN GENERAL ASSEMBLY, *May Session, A. D. 1836.*

Resolved, That, in the opinion of this general assembly, it is highly expedient that all such fortifications as may be adequate to the best defence and protection of the waters of the Narraganset bay and its adjoining coasts and country be completed by the United States in such manner and at as early a period as is consistent with the convenience of the government and a proper regard to the effective construction and durability of said works, as well as to the importance of its waters for the purposes of navigation.

Resolved, That, in the opinion of this general assembly, supported by the united opinions of the most eminent engineers, the Narraganset bay is susceptible of a complete defence; that being accessible at all seasons of the year, and with almost every wind, to the largest fleets which this country can ever maintain, it offers within its bosom the only safe station comprising such advantages north of the Chesapeake bay; that it is invaluable as a port of expedition and naval rendezvous, and that thus, not only this State, but the whole Union is interested in its effective defence.

Resolved, That our senators and representatives in Congress be requested to lay these resolutions before the respective bodies of which they are members, and to use their best exertions to obtain the necessary appropriations to carry into effect the views of this general assembly as heretofore expressed.

True copy. Witness:

HENRY BOWEN, *Secretary*.

No. 693.

[1ST SESSION.]

RECOMMENDATIONS FOR AN INCREASE OF OFFICERS IN THE ORDNANCE AND QUARTER-MASTER GENERAL'S DEPARTMENTS, AND OF THE RANK AND FILE OF THE CAVALRY, ARTILLERY, AND INFANTRY OF THE ARMY.

COMMUNICATED TO THE SENATE JUNE 12, 1836.

WAR DEPARTMENT, *May 11, 1836.*

SIR: At the request of Colonel Bomford, I transmit, for the consideration of the Committee on Military Affairs of the Senate, a letter from him on the subject of some legislative provision for the ordnance corps.

Very respectfully, your most obedient servant,

LEWIS CASS.

Hon. THOS. H. BENTON, *Chairman of the Committee on Military Affairs, Senate.*

ORDNANCE OFFICE, *Washington, January 26, 1836.*

SIR: The duties confided to this department require that a greater number of officers should be afforded for their performance. The usual detail has been necessarily broken up by calls for officers in Florida, and the good of the service appears to demand a permanent increase of the ordnance corps by the addition of twenty lieutenants.

I have the honor to enclose herewith a sketch of a bill embracing such provisions as are deemed necessary to secure the services of a sufficient number of officers, and to place the department on a footing similar to that which it held prior to the reduction in 1821.

I have the honor to be, very respectfully, sir, your obedient servant,

G. BOMFORD, *Colonel of Ordnance.*

Hon. LEWIS CASS, *Secretary of War.*

Reasons for the proposed act for the better regulation of the Ordnance department.

SECTION 1. The importance and extent of the duties confided to the Ordnance department demand that all proper aid should be afforded for their prompt and efficient discharge.

Although the law provides for the selection of lieutenants from the regiments of artillery to assist in the performance of ordnance duty, the requisite number can seldom be spared from their companies, and at this time, in particular, the detail is broken down by demands for the service in Florida. The officer commanding one of the principal arsenals of construction is now without a single assistant; another arsenal of construction is in charge of an artillery officer. Two extensive arsenals now erecting are supervised, one by an artillery officer, the other by a military storekeeper. Two other arsenals are in charge of storekeepers; one important arsenal and another of less consequence in the charge of ordnance sergeants. The whole force of the department is devoted to providing the *materiel* called for at the present crisis for arming the forts, and the frequent change of officers cannot but impair its energies and impede its operations. Previous to the reduction in 1821 the corps numbered forty-four officers. The proposed increase will make it consist of thirty-four, which is the least number that can be considered sufficient to perform the duties, extended as they have become since that period.

Pay, &c.—By the law of the 14th May, 1812, ordnance officers were allowed the rank and pay of infantry officers, with additional rations, and to the captains forage. The law of 8th February, 1815, gave to all ordnance officers the pay of dragoons, with the exception of forage to those below the rank of field officers. This pay was continued till the reduction in 1821. The public duties of an officer in command of an arsenal require him to travel in a limited circuit to procure necessary supplies, and the existing regulations do not permit a charge for transportation when the distance travelled is less than twenty miles. The command of an arsenal is equal to the command of a company in all matters relating to responsibility. The captain of a company receives and issues the clothing and arms for his company and makes the quarterly returns. The captain at an arsenal performs the same duty, and is further respon-

sible for large amounts of public property in his charge, and makes the various returns quarterly, semi-annually, and annually. He does not command a company in the technical sense of the word, but he commands men, and is responsible for their arms and clothing.

WAR DEPARTMENT, *May 26, 1836.*

SIR: I have the honor to transmit a communication from the acting quartermaster general in relation to an increase of the officers of the department under his charge, and to ask for it the favorable consideration of the Committee on Military Affairs.

Very respectfully, your most obedient servant,

LEWIS CASS.

Hon. THOS. H. BENTON, *Chairman of the Committee on Military Affairs, Senate.*

QUARTERMASTER GENERAL'S OFFICE, *Washington, May 24, 1836.*

SIR: The public interest imperiously demands an increase in the number of officers of this department, as, with the very few officers whom we now have for the discharge of its multifarious, complicated, and extremely laborious duties, we have to avail ourselves, in many instances, of almost any officer of the line that can be obtained, whose inexperience and want of knowledge in the affairs of the department must of necessity involve the department in much embarrassment; and losses will consequently be the result, not only in a pecuniary sense, but the well combined arrangements of a general commanding in the field may sometimes prove abortive and of no avail, in consequence of some failure in the officers acting in the department to perform the duties implicitly relied on by him. Acting in the character of quartermaster general, as I now am, I conceive it to be due to the quartermaster general, to the Secretary of War, to the President, and to the country, to make this representation.

There is another consideration which is of great importance to the public interests. There is no officer of the department who, by virtue of his appointment in it, is of a higher grade than major, save the quartermaster general; and this circumstance is of much practical injury, from the fact that, when serving with troops other than of the regular army, the experienced officer in his department, who is well acquainted with the rules and forms of the service, with military matters, best routes of transportation and communication, and the facilities for the movement of troops, &c., is subject to be controlled by one who has very little experience, if any, and whose habits of life have in the main been such as to render him unsuited to the duties required of an officer of this department. I need not dwell on the injury which would result from such a state of things. Besides, a major in the quartermaster's department, being, as he is, separated from the line, has very little to hope for on the score of promotion, for the gap, if I may use the term, between him and the next grade above, viz., that of a brigadier general, is so great that his chance of advancement is precarious in the extreme, if not wholly hopeless. If the two intermediate grades were authorized it would add greatly to the efficiency of the department, and would be no more than justice to its officers. We all know that men look forward to advancement in whatever situation they may be placed: cut this expectation off, and there is no longer an incentive to exertion, other than the passive efforts of doing just sufficient to maintain a certain position, or to avoid being thrown back.

The increase which suggests itself to me as necessary to the proper and efficient performance of the duties of the department, under present circumstances, is fourteen officers, (making, with those already in it, thirty-nine, including the quartermaster general,) viz:

Two assistant quartermaster generals, with the rank, pay, and emoluments of colonel of cavalry.

Two deputy quartermaster generals, with the rank, pay, and emoluments of lieutenant colonel of cavalry.

Ten assistant quartermasters, with the rank, pay, and emoluments of captain of cavalry; those already in service to be placed on the same footing.

I would therefore respectfully suggest that an organization, in some such form as the following, would be of great service to the public:

One quartermaster general, with the rank, pay, and emoluments as authorized by existing laws.

Two assistant quartermaster generals, with the rank, pay, and emoluments of colonel of cavalry.

Two deputy quartermaster generals, with the rank, pay, and emoluments of lieutenant colonel of cavalry.

Four quartermasters, (the number provided for by existing laws,) with the rank, pay, and emoluments of major of cavalry.

Thirty assistant quartermasters, with the rank, pay, and emoluments of captain of cavalry. All vacancies of assistant quartermasters to be filled from officers of the line who shall have served at least two years with their companies, or in the line with troops; and officers thus taken from the line for such appointment to be separated entirely from the line; and promotion in the department to take place as in regiments and corps.

Even with this organization cases would arise when, from urgent necessity, officers of the line might be required to perform duties in the department; and if provided for by law, would conduce to the public good.

When the present condition of the country, the great and indispensable demands for the services of officers in this department, (the most important one of all others when troops are in the field and engaged in active operations,) the fact that many volunteers (perhaps as many as ten thousand) may be received into service by the President under a law just passed, the proper and economical disbursement of the public funds, the security and preservation of public property, the vigorous and successful prosecution of military enterprises, defence of the country, and protection of its citizens, so far as depends on a department of such vast importance, are taken into view, I cannot but believe that the increase and organization suggested are called for by every consideration connected with the good of the country. The quartermaster general, before he left here, was satisfied of the indispensable necessity of an increase in the

department; and had he not left for the south he would have taken some action on the subject, and I doubt not he would have suggested that the two grades between his own and the next in the department be provided for.

All of which is most respectfully submitted.

I have the honor to be, very respectfully, your obedient servant,

THOMAS F. HUNT, *Major and acting Quartermaster General.*

Hon. LEWIS CASS, *Secretary of War, Washington.*

24TH CONGRESS.]

No. 694.

[1ST SESSION.]

ON AN INCREASE OF THE NUMBER AND RANK OF OFFICERS IN THE COMMISSARY GENERAL'S DEPARTMENT OF THE ARMY.

COMMUNICATED TO THE SENATE JUNE 17, 1836.

OFFICE OF COMMISSARY GENERAL OF SUBSISTENCE, *Washington, June 16, 1836.*

SIR: My attention has been called to the *amendment* of the "bill for the increase of the military establishment of the United States," reported to the Senate yesterday. I owe it to the department over which I have the honor to preside to request an increase of its officers. As now organized, this department consists of one commissary general of subsistence, one major, one captain, and as many assistant commissaries of subsistence, taken from subalterns of the line, as the service may require. The recent increase, and the contemplated additional increase of the army, produce a correspondent increase of the duties and responsibilities of the department. Of my own rank I forbear to speak, but it is due to the long, faithful, and efficient services of those who have aided me in the administration of the department to ask an addition to the number of the immediate officers of the department, and an increase of rank correspondent with the increase of its duties.

The important depots at St. Louis, New Orleans, New York, and Detroit, require the services of officers of great experience. Extensive purchases are frequently made at those points; a general supervision, particularly as regards the west and northwest, is required over the arrangements and operations of contractors; a single failure at a remote part is productive of loss and inconvenience. The recent passage of the volunteer bill will greatly increase the duties of the department.

*These, though not *non-commissioned* regimental staff, are placed under that head, because *two* of that class would be superseded by them.

I respectfully call your attention to the fact that, although required by law to perform the duties of assistant quartermaster, in addition to their duties in the Subsistence department, assistant commissaries of subsistence receive no forage, and, in effect, no more than fourteen dollars per month, in addition to their pay in the line. The construction given to the act of March 2, 1827, deprives assistant commissaries of subsistence of the additional ration then granted to captains and subalterns.

I feel that the additional officers asked for will greatly subserve the interest of the service.

I have the honor to be, &c.,

GEO. GIBSON, *Commissary General of Subsistence.*

Hon. THOMAS H. BENTON, *Chairman of the Military Committee, Senate of the United States.*

AMENDMENT.

SEC. 22. *And be it further enacted*, That, in addition to the officers of the Subsistence department, provided for by existing laws, there shall be in the said department one lieutenant colonel, with the rank, pay, and emoluments of a colonel of cavalry; three majors, with the rank, pay, and emoluments of majors of cavalry, and as many assistant commissaries, to be taken from the subalterns of the line of the army, as the service may require, who shall be entitled to receive twenty dollars per month, in addition to their other pay and emoluments; and nothing in this act shall be so construed as to prevent their receiving the additional ration of which they have been deprived by the proviso of the "Act giving further compensation to the captains and subalterns of the army of the United States in certain cases," approved March 2, 1827.

24TH CONGRESS.]

No. 695.

[1ST SESSION.]

EXPLANATORY ESTIMATES OF EXPENSES OF MILITIA AND VOLUNTEERS FOR SUPPRESSING INDIAN HOSTILITIES IN FLORIDA, AND INSTRUCTIONS TO GOVERNOR R. K. CALL, VESTING THE COMMAND IN HIM IN 1836.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 18, 1836.

WAR DEPARTMENT, June 27, 1836.

SIR: I have delayed, until this time, submitting an estimate of the appropriations necessary to be made for the suppression of Indian hostilities, in the hope that some information might be obtained which would render these estimates less conjectural than they must be under existing circumstances; but nothing has yet been received which will enable the department to judge with much probability what will be the extent or the expense of the operations which may be required for the subjugation of the Creek and Seminole Indians. The campaign against the Creeks must be continued until they are subdued. Upon the suggestion of Governor Call, he has been authorized to undertake an expedition against the Seminole Indians during the present summer. If this expedition be successful, these Indians may be reduced to submission without much delay. From the nature, however, of the climate of the country and of the warfare, it would be obviously imprudent to make such a calculation upon the successful issue of this expedition as to leave the government without the means of preparing for and resuming operations as soon as the season will permit, should the expedition fail. I have therefore looked to this state of things in submitting these estimates, and I enclose herewith a copy of a letter to Governor Call, by which the committee will ascertain the measures which are contemplated and the instructions that have been given.

In addition to these difficulties, it has been considered advisable to call into service a brigade of the East Tennessee volunteers, for the purpose of stationing them in the Cherokee country, to prevent or suppress any hostilities that may be meditated or attempted by the Cherokee Indians.

I have stated that the estimates must, from necessity, be very conjectural, but the grounds upon which they have been formed will be found in the accompanying letters from the heads of the respective military bureaus. The expense of the East Tennessee brigade was not taken into view in their calculations, that measure having been determined upon subsequent to the date of these letters. I have not asked for any additional sum on this account, because I am in hopes the services of the troops will not be long required among the Cherokee Indians, and because I am under the impression that, before the whole appropriation asked for is drawn from the treasury for the purposes specified, the next session of Congress may commence, and that the requisite appropriations, if any, can then be asked for with a full knowledge of all the necessary circumstances.

Of the sum of \$300,000, appropriated by the act authorizing the raising of volunteers, \$97,700 have been drawn from the treasury. That appropriation is applicable as well to the equipment and payment of the new regiment of dragoons as to the expenses of the volunteers, and I am of the opinion that the residue of the appropriation had better be left for the dragoons, and for such expenses connected with the volunteers as may arise and are not now foreseen, and that the appropriation for the suppression of Indian hostilities may be made independent of this balance. Circumstances may require the quotas assigned to Arkansas and Missouri to be brought into service; and if so, there should be a fund on hand to meet their expenses.

It will be seen that the paymaster general estimates for.....	\$1,168,000
The quartermaster general.....	1,300,000
The commissary general of subsistence.....	248,000
The officer at the head of the Clothing bureau.....	19,000
The surgeon general.....	4,500
	<hr/>
	2,739,500
	<hr/>

The appropriation for the suppression of the Creek hostilities is exhausted. Of that for the suppression of the Seminoles, \$710,143 are unexpended. The paymaster general thinks that of this sum \$100,000 will be required to pay claims against his department already existing; and the quartermaster general estimates that similar claims against his department will amount to \$300,000. Therefore the sum of \$300,000 of the existing appropriation for the suppression of the Seminole hostilities would remain applicable to future operations, and is to be deducted from the amount of the above estimate, which will have the sum to be appropriated about \$2,400,000.

I would suggest the propriety of making the balance of the Seminole appropriation, and likewise the appropriations now asked for, applicable to the suppression of any Indian hostilities. When operations are going on at the same time and in the same district of country against different Indian tribes, it is impracticable to keep the supplies so separate as to enable the accounting officers to determine with precision to which appropriation they should be charged. Steamboats, wagons, and other means of transportation, may be employed at the same time for both operations; and supplies may be purchased for one, and it may be found necessary to use them for the other. And in addition, other Indian disturbances may possibly require expenses previously to the next session of Congress. I therefore take the liberty of enclosing the form of an appropriation, in conformity with this suggestion, which, if approved by the committee, will render the appropriation applicable to the suppression of any Indian hostilities.

The committee will observe I have inserted the word "prevention" in addition to the word "suppression," used in the former acts. This change may be necessary to authorize the payment to the East Tennessee brigade, who will be employed among the Cherokees, where no hostilities have been actually commenced, but where prudence demanded, from the peculiar state of things existing there, that measures should be taken to prevent these Indians from commencing hostilities.

From the magnitude of the appropriation now asked for, and from the other circumstances attending this subject, I have been induced to submit the whole matter to the consideration of the President of the United States, and I am instructed by him to say that he has examined and approved this letter.

Very respectfully, your most obedient servant,

LEWIS CASS.

HON. C. C. CAMBRELENG, *Chairman Committee of Ways and Means, House of Reps.*

WAR DEPARTMENT, *June 25, 1836.*

SIR: I enclose, for your information, copies and extracts of letters from Major General Scott, in which he makes his suggestions respecting the preparations that will be necessary for conducting the campaign against the Seminole Indians during the next autumn. As you have recommended an expedition against those Indians the present summer, and have received authority and means to undertake it, it would not be proper for the department at this time to direct any preliminary arrangements, looking to operations hereafter. As, however, an expedition of this nature must be necessarily uncertain in its result, it is proper to refer the whole matter to you, the command in Florida being vested in you, to cause such preparations to be made for the subjugation of the Seminole Indians as the circumstances of the country and the nature of the warfare may require. This subject is therefore committed to your discretion; and should you find that a renewal of operations will be necessary hereafter, you will then please to proceed to have all such arrangements made as you may deem necessary to their speedy and successful issue. You will have before you the suggestions of General Scott, and after considering them, you will determine for yourself what preparations may be required, and take your measures accordingly. The various staff officers will procure such supplies as you may require, and should articles be wanted which cannot be furnished in Florida, arrangements must be made for procuring them where they can be got upon the best terms. In cases where the expenditures will be considerable, and where the supplies can probably be obtained upon better terms in the Atlantic cities, and transported to Florida in season for your operations, you had better correspond with the chiefs of the military bureaus at this place, and request them to have the articles procured and forwarded. If steamboats are purchased under the recent authority to employ them upon the Gulf of Mexico, and upon the rivers running into it, they can be used in the operations against the Seminoles, as it is to be presumed the Creek difficulties will be over before autumn. If hired only for the above purpose, the contract will be continued, or they must be purchased at your discretion. As to the establishment of posts, the collection of depots of provisions, the means of transportation, and the preparation of all other articles and supplies which may be requisite for these anticipated operations, you will make such arrangements as you may deem proper the moment you become satisfied that the state of things will require these arrangements. The whole subject is committed to you. If the Indians are not subdued previously, a vigorous effort must be made to terminate these hostilities as soon as the heats of summer are over. And they must, under any circumstances, be put an end to.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

PAYMASTER GENERAL'S OFFICE, *Washington, June 14, 1836.*

SIR: In my letter to you of the 10th instant I had the honor to state that it would probably require an additional appropriation of \$650,000 for the pay of volunteers and militia employed in suppressing the hostilities of the Creek Indians. The calculations were based on the supposition that there would be eight thousand troops in the field, one-half of which would be mounted, and that they would remain three months in service. The whole amount that would be required was \$850,000, of which I had at that time drawn \$200,000 from the appropriation on account of the Creek war.

Assuming that there may be four thousand volunteers and militia required, in addition to the regular troops in Florida, to suppress the Seminoles, one-half to be mounted, and that they will be in service four months—

It will require for the pay of the mounted troops.....	\$341, 696
And for the foot.....	176, 304
<hr/>	
Making.....	518, 000
Which added to the.....	650, 000
<hr/>	
For the Creek war, makes.....	1, 168, 000
<hr/>	

This sum, it is supposed, will be sufficient to pay all volunteers and militia now serving, or that may hereafter be called into service, to operate against those Indians.

Of the \$760,143 60, reported by the Comptroller to be in the treasury on the 10th instant, for the suppression of Seminole hostilities, as stated in my letter of that date, this department will probably want \$100,000 to complete the payment of the troops that have served in Florida.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

HON. LEWIS CASS, *Secretary of War.*

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, June 11, 1836.*

SIR: I have the honor to accompany this with estimates in duplicate of the probable amount required to subsist the militia and volunteers during the present campaign in the Creek nation, and the approaching autumnal and winter campaigns in Florida.

From all the information collected, it is computed that the former will number 8,000 men, making, for 93 days, 744,000 rations, which, at 20 cents, will amount to \$148,800, and the latter at 4,000 men, for 124 days, 496,000, at the same price, \$99,200, aggregating \$248,000.

The ration has been calculated at the above cost in consequence of its component parts, particularly that of the meat, being nearly, if not quite, twofold its value twelve months since, ascertained from the purchase of stores recently shipped for the Creek campaign.

Very respectfully, your most obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

HON. LEWIS CASS, *Secretary of War.*

Estimate of the probable amount required to subsist the militia and volunteers in the Creek nation and in Florida during the present and anticipated campaigns.

Required for 8,000 men in the Creek nation 3 months, viz: from 15th of July to 15th of October, 1836.....	\$148, 800
Required for 4,000 men in Florida 4 months, viz: from 15th of October, 1836, to 15th of February, 1837.....	99, 200
<hr/>	
	248, 000
<hr/>	

GEO. GIBSON, *Commissary General of Subsistence.*

OFFICE OF COMMISSARY GENERAL OF SUBSISTENCE, *June 11, 1836.*

QUARTERMASTER GENERAL'S OFFICE, *Washington, June 14, 1836.*

SIR: I have the honor to state that, under the supposition that eight thousand men will be in the service for three months for the operations against the Creek Indians, and four thousand men for four months for the operations against the Seminole Indians, the sum of eight hundred thousand dollars for the former, and five hundred thousand dollars for the latter, will be required for the service of the quartermaster's department, in addition to previous appropriations.

This estimate is entirely conjectural, for the operations of the department depend so much on circumstances which cannot be foreseen, the fluctuations in the prices of supplies and transportation, the value of services, and the difficulties to be encountered in moving troops and supplies in the field, the obstructions in the routes of communication and transportation, and the other innumerable contingencies incident to military operations, that no detailed estimate on any fixed basis of calculation other than I have stated can be made.

I am, sir, most respectfully, your obedient servant,

THEO. F. HUNT,

Major and Assistant Quartermaster, assigned to Quartermaster General's duties.

HON. LEWIS CASS, *Secretary of War, Washington.*

SURGEON GENERAL'S OFFICE, *June 11, 1836.*

SIR: Agreeably to your instructions, I have to report that about \$4,500 may be required for medical supplies, provided under an act for suppressing hostilities by the Creek Indians.

Very respectfully, your obedient servant,

JOS. LOVELL, *Surgeon General.*

HON. LEWIS CASS, *Secretary of War.*

CLOTHING BUREAU, Washington, June 13, 1836.

Sir: I have the honor to inform you that the sum of nineteen thousand dollars will be required to complete the payment for various articles of camp equipage ordered for the troops (militia and volunteers) employed in the suppression of Creek hostilities.

Most respectfully, your obedient servant,

JNO. GARLAND, Major United States Army.

Hon. LEWIS CASS, Secretary of War.

24TH CONGRESS.]

No. 696.

[1ST SESSION.]

EXPLANATORY ESTIMATES OF THE INCREASE OF EXPENSE CORRESPONDING WITH A CERTAIN INCREASE OF THE ARMY, AND A STATEMENT OF THE NAMES AND POSTS OF THE OFFICERS OF THE QUARTERMASTER GENERAL'S DEPARTMENT, AND THE NECESSITY FOR AN INCREASE OF THEIR NUMBER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JUNE 23, 1836.

Mr. RICHARD M. JOHNSON, from the Committee on Military Affairs, laid the following documents before the House, which were ordered to be printed:

Estimate of increase of expenditure for the proposed increase in the two regiments of dragoons.

INCREASE IN THE TWO REGIMENTS.

4 sub-adjutants, warrant officers:		
Pay, at \$192 each per annum.....		\$768 00
Clothing, at \$30 each per annum.....		120 00
Subsistence, two rations each per day, at 20 cents per ration.....		584 00
20 sergeant majors of companies:		
Pay, at \$192 each per annum.....		3,840 00
Clothing, at \$30 each per annum.....		600 00
20 quartermaster sergeants of companies:		
Pay, at \$192 each per annum.....		3,840 00
Clothing, at \$30 each per annum.....		600 00
20 saddlers:		
Pay, at \$240 each per annum.....		4,800 00
Clothing, at \$30 each per annum.....		600 00
—		
64		15,752 00
—		
From which deduct—		
2 sergeant majors of regiments:		
Pay, at \$192 each per annum.....	\$384 00	
Clothing, at \$30 each per annum.....	60 00	
2 quartermaster sergeants of regiments:		
Pay, at \$192 each per annum.....	384 00	
Clothing, at \$30 each per annum.....	60 00	
20 first sergeants of companies: .		
Pay, at \$180 each per annum.....	3,600 00	
Clothing, at \$30 each per annum.....	600 00	
—		
24		5,088 00
—		
40 increase in dragoons. Pay, clothing, and subsistence for sub-adjutants.....		10,664 00
—		
To which add—		
36 men, (sub-adjutants included above,) 365 days, 13,140 rations, at 13 cents per ration.....	1,708 20

<hr/>		
44	9,336	00
1,088 increase in the artillery. Pay, clothing, and subsistence for sub-adjutants.....	119,584	00

To which add—

1,080 men, (sub-adjutants included above,) 365 days, 394,200 rations, at 13 cents per ration.....	\$51,246	00
1,088 men, 1,725½ cords fuel per annum, at \$3 50 per cord.....	6,040	41
1,088 men, 143,616 lbs. of straw per annum, at one cent per lb.....	1,436	16
<hr/>		
	58,722	57
Increase of expenditure.....	178,306	57

Estimate of increase of expenditure for the proposed increase in the seven regiments of infantry.

INCREASE IN THE SEVEN REGIMENTS.

14 sub-adjutants, warrant officers:		
Pay, \$192 each per annum.....	\$2,688	00
Clothing, \$30 each per annum.....	420	00
Subsistence, 2 rations each per day, at 20 cents per ration.....	2,044	00
70 sergeant majors of companies:		
Pay, \$192 each per annum.....	13,440	00
Clothing, \$30 each per annum.....	2,100	00
70 quartermaster sergeants of companies:		
Pay, \$192 each per annum.....	13,440	00
Clothing, \$30 each per annum.....	2,100	00
70 sergeants:		
Pay, \$144 each per annum.....	10,080	00
Clothing, \$30 each per annum.....	2,100	00
140 corporals:		
Pay, \$96 each per annum.....	13,440	00
Clothing, \$30 each per annum.....	4,200	00
2,100 privates:		
Pay, \$72 each per annum.....	151,200	00
Clothing, \$30 each per annum.....	63,000	00
<hr/>		
2,464	280,252	00

From which deduct—		
7 sergeant majors of regiments:		
Pay, \$192 each per annum.....	\$1,344 00	
Clothing, \$30 each per annum.....	210 00	
7 quartermaster sergeants of regiments:		
Pay, \$192 each per annum.....	1,344 00	
Clothing, \$30 each per annum.....	210 00	
70 first sergeants of companies:		
Pay, \$180 each per annum.....	12,600 00	
Clothing, \$30 each per annum.....	2,100 00	
<hr/> 84		<hr/> \$17,808 00
2,380 increase in the infantry. Pay, clothing, and subsistence for sub-adjutants.....		262,444 00
To which add—		
2,366 men, (sub-adjutants included above,) 863 rations, at 13 cents per ration	\$112,266 70	
2,380 men, 3,678½ cords of fuel per annum, at \$3 50 per cord.....	12,874 16	
2,380 men, 314,160 lbs. of straw per annum, at one cent per lb.....	3,141 60	
		<hr/> 128,282 46
Increase of expenditure.....		<hr/> <hr/> 390,726 46

RECAPITULATION.

	Increase of numerical strength.	Of expenditure.
Dragoons.....	40	\$12,646 66
Artillery.....	1,088	178,306 57
Infantry.....	2,380	390,726 46
	<hr/>	<hr/>
Total.....	3,508	581,679 69
	<hr/> <hr/>	<hr/> <hr/>

In these statements no calculation is made for an increase of expense for quarters; some would, no doubt, result from an increase in the numerical strength of the regiments, but to what amount cannot be stated. The same remark is applicable to transportation of troops or stores, the medical department, the recruiting service, and the supply of arms, &c., and camp equipage.

MEMORANDUM.

REGULARLY APPOINTED OFFICERS OF THE QUARTERMASTER'S DEPARTMENT.

Quartermasters.

1. Brevet Lieutenant Colonel H. Stanton, New York.
2. Major T. Cross, Washington city.
3. Major J. B. Brant, regular station, St. Louis, Missouri. Ordered to Alabama for duty in the field, thus leaving St. Louis without an officer of the department. The duties there are now performed by an officer of the line who happened to be there when Major Brant received his orders. Under existing laws the officer of the line can get no compensation for the duties performed by him in the department.
4. Major H. Whiting, Detroit, Michigan.

Assistant quartermasters.

1. Brevet Major Thomas F. Hunt assigned to the duties of the quartermaster general, under the direction of the Secretary of War, during the temporary absence of the quartermaster general.
2. Brevet Major J. Clark, New Orleans.
3. Lieutenant O. Cross, New Orleans. Has charge of the erection of barracks in that city, and assists Major Clark in his various duties.
4. Lieutenant G. H. Crosman, New Orleans. Sick at the last dates. If he was well enough, he has been ordered by Major Clark to accompany stores, &c., for the scene of operations against the Creek Indians. If he was not well enough, Lieutenant Cross has doubtless been ordered.
5. Brevet Major E. Mackay, Philadelphia, Pennsylvania.
6. Captain Samuel Shannon. Ordered to Tallahassee for duty connected with Governor Call's operations against the Seminoles.
7. Captain Charles Thomas, Fort Gibson, Arkansas.
8. Lieutenant John P. Davis. Ordered to accompany a squadron of dragoons from Fort Gibson, Arkansas.
9. Lieutenant E. B. Babbitt, Fort Towson, Arkansas.
10. Lieutenant R. D. C. Collins, Little Rock, Arkansas. Superintending the construction of several roads in Arkansas.
11. Lieutenant E. B. Alexander, Fort Jesup, Louisiana.
12. Lieutenant Thomas Swords, Fort Leavenworth, Missouri.
13. Lieutenant C. Dimmock, Augusta, Georgia. Should be at Savannah, where important duties require his presence, but he cannot be immediately relieved at Augusta. An officer of the line is tempo-

rarily on duty in the department at Savannah, but there are duties there which he cannot attend to; they should be attended to by Lieutenant Dimmock himself.

14. Lieutenant John L'Engle, Charleston, South Carolina.
15. Lieutenant M. M. Clark, Fort Drane, Florida.
16. Lieutenant C. A. Waite, at Columbus, Georgia. On duty with troops in the field.
17. Lieutenant J. W. Barry. Ordered to Fort Mitchell, Alabama, for duty with troops in the field.
18. Lieutenant F. D. Newcomb. Expected at Washington city, when he will be ordered to Augusta, Georgia, or to serve with troops in the field against the Creek Indians.
19. Lieutenant A. R. Hetzel. Ordered to Tennessee with General Wool for service with troops that may be in the field connected with operations which may take place in reference to the Cherokee Indians.
20. Lieutenant S. B. Dusenbery, Picolata, Florida. Sick at the last dates.

Storekeepers of the Department Acting Assistant Quartermasters.

1. H. A. Fay, Albany, New York.
2. H. Johnson, Pittsburg, Pennsylvania.

Acting Assistant Quartermasters who are either officers of the Subsistence department, or who hold no staff appointment.

1. Captain Thomas Childs, Fort Sullivan, Eastport, Maine. He is an officer of the line, and can get no compensation for duties in the department.
2. Lieutenant J. M. Hill, Hancock barracks, Maine. He is an officer of the line, and can get no compensation for performing duties of the department.
3. Lieutenant J. H. K. Burgwin, Boston, Massachusetts. He is stationed there on the recruiting service, and we have been compelled to avail ourselves of his services for duty in the department.
4. Lieutenant W. A. Thornton, Watervliet, New York.
5. Lieutenant J. E. Blake, West Point, New York.
6. Lieutenant Colonel A. C. W. Fanning, commanding Fort Trumbull, Connecticut. No officer acting in the department being left at that post, he received the money and property of the department. He can get no compensation for duty in the department.
7. Captain E. S. Hawkins, Baltimore, Maryland. He was on the recruiting service, and his services are availed of for duty in the department. Holding no staff appointment, he can get no pay for staff duty.
8. Colonel J. B. Walbach, Fort Severn, Maryland. He is the only officer left at the post, and has charge of the property and makes such disbursements there as are necessary, and attends to the other duties of the department there; but he can receive no pay for such duty.
9. Lieutenant J. B. Scott, Washington arsenal. He can get no pay for the duties he performs in the department.
10. Lieutenant John B. Magruder, Fort Washington. An officer of the line; he can get no pay for duty in the department.
11. Brevet Captain T. Green, Fort Monroe, Virginia.
12. Major H. Saunders, Fort Johnston, North Carolina. An officer of the line.
13. Lieutenant J. F. Lee, Fort Macon, North Carolina. An officer of the line.
14. Lieutenant John Mackay, Savannah, Georgia. An officer of the line.
15. Lieutenant S. H. Drum, Darien, Georgia.
16. Lieutenant J. D. Searight, Garey's Ferry, Florida.
17. Lieutenant L. B. Webster, Saint Augustine.
18. Lieutenant Jno. C. Casey, Fort Brooke, Tampa Bay, Florida.
19. Lieutenant E. Kibby, Mobile, Alabama.
20. Lieutenant M. W. Batman. Ordered to Alabama for service with troops in the field.
21. Lieutenant H. L. Scott, Baton Rouge, Louisiana.
22. Lieutenant H. S. Williams, camp on the Sabine. An important position.
23. Captain J. B. Clark, Saint Louis. Supplies the place of Major Brant.
24. Lieutenant W. K. Hanson, Fort Coffee, Arkansas.
25. Lieutenant B. S. Roberts, Fort Des Moines.
26. Lieutenant George Wilson, Fort Crawford, Prairie du Chien.
27. Lieutenant J. McClure, Fort Snelling, Falls of St. Anthony.
28. Lieutenant E. M. Lacy, Fort Winnebago. Portage of the Fox and Wisconsin rivers.
29. Lieutenant R. E. Clary, Fort Howard, Green Bay.
30. Lieutenant L. T. Jamison, Fort Dearborn, Chicago, Illinois.
31. Lieutenant J. W. Penrose, Fort Mackinac.
32. Lieutenant J. R. D. Burnett, Fort Brady, Sault de Ste. Marie.
33. Lieutenant A. B. Eaton, Fort Gratiot.
34. Captain J. B. Taylor. Ordered to Tennessee to accompany troops to the Creek country.

Besides these officers, there are others acting with troops in the field, whose names have not been reported to the Quartermaster General's office—officers taken from the line in consequence of the emergencies of the service. Some of those whose names are given above are officers of the Subsistence department, and if regularly appointed in that department get an extra compensation as officers of that department.

Be it, &c., That, in addition to the officers of the Quartermaster's department provided for by existing laws, there shall be twenty assistant quartermasters, if so many shall be necessary, to be taken from the line of the army, who shall have the same pay, in addition to pay in the line, and forage as are allowed to assistant quartermasters by existing laws.

Be it, &c., That, in addition to officers of the Quartermaster's department provided for by existing laws, there shall be in the said department one assistant quartermaster general, with the rank, pay, and emoluments of colonel of cavalry; one deputy quartermaster general, with the rank, pay, and emoluments of lieutenant colonel of cavalry; and twelve assistant quartermasters, to be taken from the officers of the line, with the same pay, in addition to pay in the line, and forage as are authorized by existing laws.

Be it, &c., That, when the public interests require the services of officers of the line or of any other branch of the staff for duty in the Quartermaster's department, it shall be lawful for such officers to be selected for such duty, under such regulations and orders as shall be approved by the President of the United States: *Provided*, That each officer who may be thus selected for temporary duty in the Quartermaster's department shall be allowed, for the time that he actually performs duty therein, at not exceeding the rate of twenty dollars per month, in addition to his other pay and allowances; and, if he be not an officer entitled to forage, he shall be allowed forage for two horses.

24TH CONGRESS.]

No. 697.

[1ST SESSION.]

STATEMENT OF THE MANNER IN WHICH THE TOPOGRAPHICAL ENGINEERS AND THE OFFICERS SERVING UNDER THEM ARE EMPLOYED.

COMMUNICATED TO THE SENATE JUNE 24, 1836.

WAR DEPARTMENT, *June 23, 1836.*

SIR: I have the honor to transmit a report of the officer at the head of the Topographical bureau, which has been prepared in compliance with the resolution of the Senate of the 18th instant, inquiring "in what manner the topographical engineers and the officers serving under them are now employed."

Very respectfully, your most obedient servant,

LEWIS CASS.

Hon. M. VAN BUREN, *President of the Senate.*

TOPOGRAPHICAL BUREAU, *Washington, June 21, 1836.*

SIR: In obedience to a resolution of the Senate of the 18th instant, I have the honor to submit to you the enclosed tabular statements. As the civil engineers are officers of this bureau, a statement of their present employ is also submitted.

Presuming the resolution to have for its object the obtaining of a knowledge of the duties of the officers of the Topographical bureau, which cannot well be exhibited under the words "now employed," as the present arrangement of the whole is considered subject to any modifications which the laws or resolutions of the present Congress may make necessary, I have the honor to submit a copy of the annual report of the 2d of November last. This report also explains the rules under which the various surveys are made.

There are generally about thirty officers of the artillery and infantry on topographical duty; but the Indian disturbances have occasioned all but the few named to be ordered to their regiments, and I am informed that it is in contemplation to order the whole of those that remain to their proper line duties.

I am, very respectfully, sir, your obedient servant,

J. J. ABERT, *Lieutenant Colonel Topographical Engineers.*

Hon. LEWIS CASS, *Secretary of War.*

A.

Statement showing the manner in which the corps of topographical engineers are now employed.

Names of officers and their assistants.	Nature of their duties.	Remarks.
Lieutenant Colonel J. J. Abert, topographical engineer. Assistant, Lieutenant W. Hood, 4th infantry.	In charge of the Topographical bureau, and exercising general supervision of the corps of topographical and civil engineers.	
Lieutenant Colonel J. Kearney, topographical engineer. Assistant, Lieutenant C. Graham, 3d artillery.	Upon the survey and estimate of a route for a railroad on the eastern shore of Maryland.	This survey was undertaken under a resolution of the legislature of Maryland, asking for the services of a government engineer for that purpose.
Lieutenant Colonel S. H. Long, topographical engineer. Assistants, Lieutenants J. G. Simmons, 7th infantry, and J. F. Cooper, 2d infantry.	Surveying a route for a railroad from Belfast, Maine, to Quebec, Canada.	Under a resolution of the legislature of Maine, asking for the aid of United States engineers.
Major H. Bache, topographical engineer. Assistant, Lieutenant R. S. Dix, 7th infantry.	Surveying a route for a railroad from Merrimack river to Connecticut river.	Upon an application from an incorporated company.
Major W. G. McNeill, topographical engineer....	Preparing report and drawing of the survey of Georgetown harbor, South Carolina.	This survey was made with a view to the erection of fortifications for the defence of said harbor.
Major J. D. Graham, topographical engineer.....	Superintending the construction of the Long Island railroad.	Upon an application from an incorporated company, but subject to other duties as soon as required.
	Superintending the opening of a road from the northern boundary of Florida, by Marianna, to Apalachicola.	Under the act of Congress passed June 30, 1834.
	Surveying a route for a railroad between Pensacola, Florida, and Columbus, Georgia.	Under an application from an incorporated company.
Captain W. Turnbull, topographical engineer. Assistant, Lieutenant J. E. Johnston, 4th artillery.	Superintending the construction of the Potomac aqueduct.	Upon an application from an incorporated company, in aid of which Congress have appropriated funds.
Captain W. H. Swift, topographical engineer....	On the survey of the coast.....	Assistant to Mr. Hassler, the duty being by virtue of a law of the United States.
Captain W. G. Williams, topographical engineer. Assistants, Lieutenants T. Drayton, 6th infantry, and J. G. Reed, 7th infantry.	Surveying a route for a railroad from Charleston to Cincinnati.	Upon an application from a senator from South Carolina on behalf of the State.
Captain A. Canfield, topographical engineer.....	Waiting orders.....	Just returned from duties in Florida, as a topographical engineer, with the army.
Lieutenant J. M. Berrien, 5th infantry. Assistants, Lieutenant E. Rose, 3d artillery, and A. J. Center, 5th infantry.	Surveying the shores of the western lakes and certain harbors and roads in Michigan.	The survey of the lake shore is for military and commercial purposes under the order of the United States. The harbors and roads are on the application and at the expense of incorporated companies, but also aid to develop the military and commercial resources of the Territory.

B.

Statement showing the manner in which the corps of civil engineers, employed under the act of April 30, 1824, are now employed.

Names of civil engineers.	Nature of their duties.	Remarks.
W. B. Guion, civil engineer.....	Waiting orders at Washington..	To be put on duty as soon as the appropriations are passed, the present appropriation being nearly exhausted.
G. W. Hughes, civil engineer, and C. N. Hagner, assistant civil engineer.	Employed on the survey, plan, and estimate of the route for a canal from Washington to Annapolis, Maryland.	Under a resolution of the legislature of Maryland, asking for the services of a government engineer to make the survey.
H. Stansbury, assistant civil engineer.....	Waiting orders at Washington.....	The remark in Mr. Guion's case applies to this.
W. R. Palmer.....	Assistant to Major J. D. Graham, in Florida.....	
G. W. Featherstonhaugh.....	Assistant to Captain Williams, in South Carolina.	
J. D. Webster.....	Waiting orders at Washington.....	

TOPOGRAPHICAL BUREAU, Washington, June 21, 1836.

JANUARY 12, 1836.

Mr. R. M. JOHNSON, from the Committee on Military Affairs, to whom was referred the reorganization of the corps of topographical engineers, reported:

That they refer to their report of the last session and to the report of the Topographical bureau of this session as a part of the present report, and they also report a bill.

DECEMBER 16, 1834.

The Committee on Military Affairs, having duly considered that part of the President's message, referred to them, which relates to the corps of topographical engineers, beg leave to report:

That the subject of reorganizing and enlarging this corps has been recommended to the consideration of Congress by four different Executives, and that, on several occasions, bills to effect these objects have been reported by various Committees on Military Affairs.

There is no part of the army as defective in its organization as this, and subject, in consequence, to as great inconveniences in the execution of its duties. It consists of six field officers and four captains, to which are generally attached as many as thirty lieutenants of artillery and infantry.

These lieutenants are so attached by temporary details; and the effect of this system is to take from their proper duties those who were intended for the line, and to force upon another and highly interesting branch of service inexperienced and, consequently, incompetent assistants. These assistants, after a short tour of duty, are again called back to the line, and others, entirely new to the duty, are assigned to their places. Such a course has, as it could not fail to do, led to great delays in the execution of the duties of the corps; has exposed it to the errors inevitable from the employ of inexperienced assistants; has procured but partial returns in comparison with either the numbers or the expense of the system; and has kept this corps, comparatively speaking, stationary in its scientific operations, and continually in the execution of the most simple details.

The officers temporarily attached have the requisite theoretic information from their education at the Military Academy, but the short period of their service with the corps of topographical engineers does not admit of a development of that theory into practice, nor of their attempting the higher walks of their profession. After returning to their duties in the line they soon forget the little practical knowledge they acquired during the short period they were with the corps, and, while there, must also, from the want of its use, have forgotten much of the knowledge of their proper line duties. It is a system, therefore, productive only of injury to the officer, to every branch of service, and, consequently, to the government, which is interested in all.

It is also a system at variance with true principles of economy, as its effect is to produce the fewest and least valuable results at the greatest expense.

The duties of such a corps are essentially military and scientific; it is therefore necessary that its members should have both military and scientific knowledge, as both have to be called into action in the exercise of their proper functions.

In Europe, where the military avocation is so much more extensive than in our country, the duties of a corps of topographical engineers are rarely extended to occupations purely civil. These last are committed to a distinct body of officers called the corps of ponts and chaussee. But the more limited military operations of our country do not yet render such a division of labor necessary, and the duties of two such corps can be well executed by one; but as the military functions of the corps are by us the most required, so it is therefore absolutely necessary that its members should be military as well as scientific. The two qualifications are essential to their proper duties—the latter only in operations purely civil; but in the execution of the latter, if the officer also possesses military knowledge, it gives a double value to the purely civil duty upon which he may be engaged by the military views and reports which should always be required of him.

Happily for our country, we possess at present in abundance the finest materials for such a corps in the graduates from the Military Academy who now pervade our army so extensively, whose education, both military and scientific, furnishes all the requisite qualifications, and who, added to the officers now forming that corps, would place at once at the command of the Executive all that the wants of both the government and the country have so long and so repeatedly called for.

The committee are also of opinion that these desirable views may be fulfilled and a suitable organization effected without any serious increase of expense. But even this additional expense, trifling as it really is, will not be encountered until, in the judgment of the President, the promotions to the full organization proposed may be found expedient. The plan is to furnish the additional numbers required by the corps by permanent transfers and appointments from the army, and for the army to be proportionally reduced. Such a plan would relieve the corps from the present pernicious system of temporary details, and would not be to the prejudice of the army, as the army now spares officers for these duties permanently.

The present details are temporary in reference to individuals only, but permanent in reference to numbers.

Now, as the corps has generally had from twenty-five to thirty lieutenants of artillery and infantry attached to it by detail, the pay of these officers is really chargeable upon that corps, although it does not appear so in the estimates, being there merged in the pay of the artillery and infantry. If permanently transferred, they would still draw their pay, but it would appear under the head of an estimate for the corps of topographical engineers, and the estimates of the artillery and infantry would be proportionally reduced.

In effecting the transfers, however, certain modifications ought to be made in the rank of the corps essential to its well being. These modifications would be to give to it a full colonel and six additional captains. It has now six field officers and four captains. One of these six draws the pay of a lieutenant colonel; five that of major. The modifications would therefore add only to the annual expense the difference between the pay of one major and one colonel, and the difference between the pay of six lieutenants and six captains.

On examining into the law in relation to the topographical engineers as now existing, the committee find a singular inconsistency in the pay of its officers. All of the field officers receive cavalry pay; the captains only the pay of the infantry. It is presumed to have originated in mistake. All have to be mounted in the execution of their duties; all should therefore receive the pay of mounted troops. An arrangement of this kind becomes also necessary in another point of view. Unless there is some such provision in the law those officers of the corps who now receive dragoon pay would, on a reorganization, suffer a reduction, which we presume to be the desire of no one.

To carry these views into effect, the committee beg leave to submit the accompanying bill.

TOPOGRAPHICAL BUREAU, *Washington, November 2, 1835.*

SIR: In obedience to your instructions of the 4th of September last, I have the honor to submit to you a statement, marked A, exhibiting the amount drawn from the Treasury Department and remitted to the disbursing officers under this bureau, from the 1st of October, 1834, to the 30th of September, 1835, inclusive, and the amount of accounts rendered.

The topographical and civil engineers have been employed upon, and the funds appropriated for services for the year 1835 have been applied to, the following objects:

1. An examination of the route for a railroad from Memphis, in Tennessee, to the Atlantic ocean.
2. A report and estimate of the cost of the construction of the Portage summit of the Ohio canal—that is, the canal from Pittsburg to Lake Erie.
3. Survey with a view to the improvement of the Cumberland river from Nashville, Tennessee, to the head of navigation in Kentucky.
4. The report of the geological investigations made of the public lands and of the Territory of Arkansas.

5. A survey of the harbor of St. Joseph's, in the Territory of Michigan.

6. A survey of the harbor at the mouth of Trail creek.

These surveys and reports, from one to six inclusive, have been completed since the last annual report, and were reported to Congress during its last session.

7. A survey of the Delaware river from Newcastle to Port Penn, and a survey of Pea Patch island. These surveys embrace an exposition of all the facts necessary in the digesting of a system of the defences of that pass in the river, as well as all those necessary to its navigation. The duty is completed and the maps delivered to the bureau.

8. A survey of the Brandywine shoal. The object of this survey is to determine the best position on the shoal for the construction of a light-house. It is a highly important point in the navigation of the Delaware bay, but its exposed situation and the composition of the shoal make it one also of extreme difficulty in the establishing of a foundation which will endure and sustain the superstructure for the light.

The appropriation for this object was made in June, 1834, and in the following words:

"For rebuilding the light-house on Brandywine shoals, in the bay of Delaware, thirty thousand dollars: *Provided, however,* That, before the commencement of the work, a resurvey, plan, and estimate shall be made, and that then it shall be in the discretion of the proper department to enter upon the rebuilding of the said light-house, or to report such survey, plan, and estimate to Congress as shall be considered best for the public interests."

The survey was commenced as soon as the necessary arrangements could be made, and it was ascertained in a short time that the appropriation was entirely inadequate to the object, which, as a measure preliminary to the building of the light-house, required that an artificial foundation should be established upon a sandy shoal, in the mouth of a wide bay, and exposed to the violence of the waves of the Atlantic.

Under these circumstances, the alternative presented by the law was adopted, and the survey, plan, and estimate, were presented to Congress during its last session.

As it was not acted upon, additional investigations have since been made, and their result is the foundation of an item in the estimate from this office for the "rebuilding of the light-house on the Brandywine shoal."

The report, estimate, and plan, in all their details, are daily expected from the engineer who had this survey in charge, which, as soon as received, will be laid before you.

The amount appropriated in the act of June 30, 1834, was \$30,000, of which \$1,550 have been drawn out of the treasury for the necessary preliminary surveys. The total amount of the estimate of the engineer is \$123,985 93, leaving for the object a deficiency of \$95,535 93, which amount constitutes an item in the estimates of this bureau.

9. In the drawings and reports of various parts of canal routes across the States of Maine, New Hampshire, and Vermont, in order to complete a series of surveys for the same objects which had been partially attended to some years since. All the field-work of these surveys is completed; the drawings and reports only have to be made; these, it is expected, will be delivered to the bureau during the ensuing winter.

The delay which this work has experienced has been an unavoidable result, from the small number of the corps, which forced the bureau to extend the attention of the officers superintending this to other duty.

10. The drawings and reports of the military defences of parts of the coasts of North and South Carolina. The system of army details, which removes our assistants before the completion of the particular duty upon which they have been engaged, together with a diversion of the attention of the superintending officers to other surveys, has occasioned the delays which these works have experienced. There is, however, every reason to believe that they will be completed during the ensuing winter.

11. A survey of a canal route from Cape Fear river, through the Waccamaw lake, to the Waccamaw river, North Carolina. The returns of this are daily expected.

12. An examination of the construction of the canal around the Muscle shoals of the Tennessee river.

13. An examination of the route for a railroad from Portland, in the State of Maine, to Quebec, in Canada.

14. The survey of a route for a railroad from the Connecticut river, to intersect the Concord railroad, in New Hampshire.

15. The survey of a route for a railroad from Boston, in Massachusetts, to Whitehall, in New York.

16. A survey of the harbor of East Thomaston, in Maine.

No. 16 is completed, and the results are expected at the bureau early during the ensuing winter. Numbers 13, 14, and 15, are not in as great a state of forwardness. The extensive views embraced by these three, and the lateness of the season when the attention of the officer who has them in charge was called to 14 and 15, render it highly probable that no definite report will be made by him until during the course of the next year.

17. A survey of the Christiana river from Wilmington to the Delaware, with a view to improve the entrance of the Christiana. This is completed.

18. A survey of Provincetown harbor and its vicinity. The survey of this position, so important in the military defence of the coast east of Cape Cod, and as a point of shelter for our commerce from a pursuing enemy, or from storms, is now completed. All the field-work is done, and the drawings and reports will also be during the present year.

19. The survey of a route for a ship canal around the Falls of Niagara, effecting a junction with the two lakes, Erie and Ontario. The field-work of this duty is completed; the drawings and reports are in progress, and will be delivered to the bureau during the ensuing winter.

20. A survey of the channel between the North and South Hero islands, on Lake Champlain. This

duty is also so far completed that the drawings and reports will be delivered to the bureau during the present year.

21. A survey of a route for a road from the Alabama line, by Marianna, to the town of Apalachicola, in Florida. This duty was completed, but before entering upon the opening of the road, as required by the law, it was thought advisable to examine a different route which would apparently much shorten the distance. This examination is now making.

22. A resurvey of the route of the national road between Springfield, Ohio, and Richmond, Indiana; also from Springfield, by way of Dayton and Eaton, to Richmond. This duty has been completed, and the drawings and report delivered to the bureau. These last have also, in conformity with the law, been submitted to the President, who has affixed his approbation to the location of the direct route.

23. A survey of the Maumee river, from its mouth to Maumee city, completed, and the drawings received.

24. A survey of the route for a railroad from Detroit to Pontiac.

25. Also the route of a railroad from Detroit to the St. Joseph's river.

These surveys have been completed and the returns duly made.

26. A survey of the route of a road from Chicago to Fort Howard, on Green bay.

27. A survey of the mouth of Gallean river.

28. A survey of the mouth of Black river.

29. A survey of the mouth of Milwaukie river.

These four (26, 27, 28, and 29) are now in progress, and it is expected will be completed this fall and the ensuing winter.

30. A survey of a railroad from Memphis, Tennessee, to such point on the lines of the States of Virginia and Tennessee as may be best adapted, in the opinion of the engineer, to facilitate the continuation of the road to the Chesapeake. The survey is now in progress.

31. A survey of a route for a road from the Maumee river, through the northern counties of Indiana, to or near the rapids of the Illinois river, and thence to the Mississippi river, at some point between Rock Island and Quincy. The field-work of this survey is completed, and the drawings and reports are expected to be delivered to the bureau during the course of the present year.

32. The survey of the following routes for roads in Indiana:

Lawrenceburg and Indianapolis railroad;

Madison and Lafayette railroad;

Evansville and Terre Haute railroad;

Columbus and Jeffersonville railroad;

New Albany and Vincennes turnpike road;

New Albany and Crawfordsville turnpike road.

33. In superintending the construction of the aqueduct over the Potomac at Georgetown. This may truly be considered one of the most interesting and one of the most difficult of civil constructions ever attempted in our country. The object of the work is to conduct the Chesapeake and Ohio canal over the river Potomac, at the upper end of Georgetown, and thereby to furnish to its trade a termination in the fine harbor of deep water at Alexandria.

The length of the aqueduct is 1,700 feet, (including the causeways,) sustained by two abutments and six piers, at a height of 29 feet above the common high tides of the river. These abutments and piers are all to rest upon the natural rock foundation which is found throughout the length of the aqueduct, at a depth nearly uniform of 30 feet below common high water, making the total height of each pier 59 feet.

The successful establishment of a foundation at such a depth in water and mud is among the most difficult problems in the practice of the engineer; and the experience of the world has furnished so few instances of similar attempts that he is comparatively without those guides which are in other instances so easily obtained.

But the persevering efforts of science and mechanical skill supplied the deficiency of information from precedents, and, overcoming all obstacles, triumphed in the successful establishment and completion of one pier during the course of the last season, and in a successful issue to the greatest difficulties in the establishment of a second, and of one of the abutments.

This work is the result of the enterprise of an incorporated company; but as the United States furnished a proportion of the funds for its aid, the company considered it advisable, and applied to have its expenditure placed under the direction of an officer of the corps of topographical engineers, that any desired investigation in reference to the faithful and judicious application of the means allowed by the United States could be made independently of their control, and that they might also, in so difficult and rather unprecedented an undertaking, avail themselves of the presumed science of its officers.

It affords me much satisfaction to add that a frequent inspection, as well of the work as of the expenditures, has resulted in a conviction of the great skill and judgment of the engineer, and of the faithful application of the funds. The books exhibit the most minute detail of expenditure for every object, and his mechanical arrangements have been justly admired by all who have visited the work. The engineer is prepared, whenever it shall be called for, to present the most satisfactory statements, descriptions, reports, and drawings, in reference to the whole.

34. In the survey of a railroad from Pensacola, in Florida, to Columbus, Georgia. Although Pensacola is one of the finest harbors on the Gulf of Mexico, and, in fact, of the United States, and although it is also at present an established navy yard and navy depot, yet, as the land in its vicinity is extremely poor, and there is no river leading from its harbor to the interior, its commercial advantages are but partially felt, and the population necessary to its defence exposed to hazardous and difficult or tedious and dilatory methods of access. The remedy for these evils is in improving all means of communicating with the richer soil and denser population of the interior; and the road now being surveyed will eminently accomplish these objects. It will open to the products of the interior a cheap and rapid means of access to an uncommonly fine harbor, and will enable that harbor to command for its defence the strength of the interior in the shortest possible time. It possesses, therefore, a highly national aspect, deserving of the patronage which has been extended towards it by the general government in permitting its officers to superintend the work.

35. In a continuation of the mineralogical and geological investigations of the public lands, the Territories, and the Indian country. The highly interesting results from the geological investigations of the last year, under the same officer who has now those of this year in charge, are the best earnest of the manner in which these will be performed.

His instructions were, that, "it being desirable to have some knowledge of the mineral structure of the Coteau du Prairie, an elevated ridge which separates the Missouri from the St. Peter's, a tributary of the Mississippi, you are directed to proceed to that vicinity, and to make such investigations as the season and the nature of your opportunities will admit. It is desirable also that you should take Green Bay in your way, with a view to the examination of the mineral structure in the vicinity of the Wisconsin river."

Early history had mentioned the "Coteau du Prairie" as a locality rich in its deposit of copper in its various forms. Records which are presumed to be deserving of confidence state that many tons of this mineral had been taken, at an early period of our history, to France, and there smelted to advantage. There is no doubt that it exists in that region; but in what quantities, and in what particular places, has yet to be ascertained.

From the known intelligence, great zeal, and untiring perseverance of Mr. Featherstonhaugh, no doubt is entertained that all that can be will be done in accomplishing the discovery; but he has to contend with the difficulties of an unknown and wilderness country, and in a climate affected early in the season with the inclement weather of winter. Should his report, therefore, not be as much in detail as is desirable, (of which there is some reason to fear,) there is no doubt that every accessible general indication will be ascertained, sufficient to form the most encouraging basis and the best justification for future and more detailed investigations.

The great interest which is felt by the country, in reference to this particular duty, exhibited by an unparalleled demand for the report of the proceedings of last year, is no equivocal proof of the value which is placed upon it and the advantages which are anticipated to result from it. Such investigations are beyond the resources of individuals, and the States limit those which they authorize to the extent of their Territories. If the United States does not, therefore, complete the chain of knowledge by a continuation of its efforts in reference to the public lands and the Territories, an extensive region, rich with the most valuable ores, will continue to remain unknown. Under these impressions I have hazarded a small item, in the estimate from this office, to enable it the more satisfactorily to complete a duty which has been so fortunately begun.

It may probably be observed that, in the foregoing statement of surveys, there are many enumerated which were not ordered by a resolution of either house of Congress, or by any law.

The rules which have been prescribed for this office, in these matters, are as follows: That, 1st, surveys ordered by law, and for which there are generally specific appropriations, should be attended to.

2d. Surveys ordered by resolutions of Congress. The expenses of these are paid out of the annual appropriation for surveys, including the pay of the civil engineers, which is taken out of the same appropriation.

3d. Surveys of a national or highly interesting commercial character, applied for by States or incorporated companies. In these cases, such officers as can be spared (with their instruments) are allowed to be assigned. All other expenses, including those for additional engineers or additional instruments, are supplied by the parties interested in the survey, the United States being subjected to no charge on these accounts; or, in other words, confining the aid from the United States to the mere loan of such engineers and of such instruments as can be conveniently spared.

In the execution of the foregoing duties, the whole force of this bureau, in military as well as civil engineers, has been employed. Its military engineers consist of the corps of topographical engineers and such lieutenants of the army as are detailed for its duties; its civil engineers, of those authorized to be employed under the authority of the law of the 30th April, 1824.

The first embraces, of the corps of topographical engineers.....	10 officers.
Of lieutenants now detailed for this duty from the army.....	26 officers.
The second, being citizens without military rank employed, under the act of April 30, 1824	13
	—
Making the whole force of engineers employed under this bureau equal to.....	49
	—

The evils of these military details arise from—

1st. The shortness of the time in which an officer, being placed on the duty, has to acquire that practical knowledge in the use of instruments, and the habit of applying his scientific knowledge to results in practice, without which he can be of no value.

2d. The apathy which oppresses a temporary detail, from the consciousness that if he labors it is to acquire that which, as soon as it is obtained, he will, in all probability, be removed from the only sphere of action in which it can be applied.

3d. When the temporary detail is endeavoring partially to acquire a knowledge of the duties of the corps to which he is attached, he must, from the very nature of things, lose by its disuse much of the knowledge of his proper arm of service, and when he returns to it be consequently a less valuable officer than when he left.

4th. The corps is, under this system, continually exposed in the execution of its duties to those consequences which must flow from the services of unqualified and consequently incompetent assistants, and is forced, from this cause, to increase its demands upon the army that it may compensate partially by numbers for deficiencies in experience. These demands, if complied with, but increase the general evil before alluded to; they cannot be complied with but partially, as the line has duties for which these subordinates were intended, and which it would not do to neglect. We are placed thereby in a continued series of unpleasant bickerings with the line. The corps endeavors to retain its experienced assistants as long as possible, because they are essential to the well-doing of its duties. The line regrets these details, however temporary; it seeks to reduce them to short periodical tours, and is continually endeavoring to get back the older assistants. It is a system, therefore, in which the permanent interests of the line and of the corps are diametrically opposed, and which, as might well be supposed, by the occasional success of either, has left one or the other exposed to the reproach of negligence or favoritism.

There is no one more strongly impressed than myself with the efforts which the line now makes in order to aid us in our duties, and that it cannot do more without a sacrifice of its own; but, at the same time, I must acknowledge that, after many years of experience, I am satisfied that the duties of the topographical engineers can only be carried to that extent of perfection and intelligence which the country has a right to expect by a system which shall permanently attach its assistants to the corps.

The effect of these details from the army for the duties of the corps may be expressed in a few words. If temporary and periodical, it is a sacrifice of the duties of the corps; if permanent, while they yet retain their rank and its privileges in the line, it is, to the extent of the number detailed, a sacrifice of the interests and duties of the line.

The civil engineers employed under the act of April 30, 1824, are officers without military commissions or military rank. The law recognizes no distinction of grade or of title between them, although the custom of service has divided them into the two classes of civil engineers and assistant civil engineers. The rules and articles of war and the army regulations cannot be extended over them. There is, therefore, an absence of legal authority in relation to their control, and also of defined right in relation to their privileges, from which it will be seen that no subordination or authority can well be established in such a service. No serious evils have yet resulted from it, owing, however, more to the correct moral bearing of the gentlemen who hold these appointments than to any well-defined power over them. Among the greatest inconveniences of this arrangement is the difficulty of associating the two kinds of engineers on the same duty. The military engineer is unwilling to be placed under the civil, and probably cannot be by law, or in a way that would involve any legal responsibility. The civil engineer is equally unwilling to be viewed as subject only to be commanded, without the hope of ever enjoying the right of commanding in turn. It is a moral prostration of his branch of service to another, without the prospect of ever being relieved from it, and adapted to engender painful and unpleasant feelings, as well as being in itself unjust.

Another evil is, that this mixed arrangement of military and civil appointments is destructive of a proper *esprit de corps*, and of that united emulation which exerts the whole mass of mind to elevate the duties of that branch to which it belongs.

With a service so constituted, and beset with inconveniences so detrimental to its duties, this bureau has been struggling for years, sparing no efforts, however, to do the best which could be done with the means placed at its disposal.

The means have already been represented generally. I shall now speak of them numerically and economically, with a view of submitting a plan which will, if adopted, remedy all the evils and without additional cost.

The military engineers consist, 1st, of the corps of topographical engineers, ten in number. Of these, one receives the pay of a lieutenant colonel, five have the pay of majors, and four the pay of captains. The annual compensation of the whole is \$14,496.

2d. Of the temporary details from the army. These vary from 25 to 30. There are now 26 on this service. The annual compensation of these is \$23,344.

The civil engineers consist of those employed under the act of the 30th of April, 1824. Taking the average of the last three years, their number is 13, and their annual compensation is \$16,700.

The entire annual cost of the whole number of officers on topographical duty is therefore \$43,540.

In the above statement it will be perceived that the officers detailed from the army are included in the sum of the total cost. All these details receive their pay out of the general appropriation for the army, and it does not therefore appear in any estimate for the corps of topographical engineers or for surveys; yet, as this number is always employed on topographical duty, their pay is justly chargeable to that branch of service, and is therefore included in the sum of its annual cost.

The compensation for the civil engineers is taken from the customary annual appropriation for surveys.

From the foregoing it will therefore be perceived that the present force and rank of officers for topographical duty consists, in its present mixed and complicated organization, of one lieutenant colonel commanding, five majors, four captains, twenty-six lieutenants of artillery and infantry, and thirteen civil engineers.

Now, the remedy proposed is to incorporate the whole or part in one regular corps, with the usual grades of military rank, and to subject the whole to the rules and articles of war.

The subject has been treated with much ability by the chairman of the Military Committee in a report to Congress during the last session. Allow me respectfully to refer you to that report for some views which are not incorporated in this.

But taking the opinion of the distinguished chairman of that committee as the best basis for an improved organization, it results in the recommendation of a corps to consist of one colonel, one lieutenant colonel, four majors, ten captains, ten first lieutenants, and ten second lieutenants: in all, thirty-six engineers, of which the total annual cost will be \$40,454. Our present imperfect organization gives forty-nine engineers, of which the total annual cost is \$43,540, making an annual difference in favor of the organization of \$3,086.

The plan submitted presents two questions which require explanation—one referring to the numbers, the other to the cost.

The lesser numbers of the proposed plan are considered capable of doing more duty than the greater numbers of the existing plan, because, 1st, of their better organization; 2d, and of always controlling the experience acquired, which, accumulating to the same individuals, gives that facility and aptness of execution, and readiness in the application of theoretical knowledge, which will enable the lesser numbers in the one case to do more and better work than the greater numbers in the other. It is, in fact, but an application of the simple axiom, that he who is acquainted with the theory and practice of any profession can do more of it, and better, than any number of those who have not this knowledge.

3d. The number is also based upon the consideration that these were now, and would for many years be, fully adequate to the wants of the general government for topographical duties.

In reference to the cost, two considerations have been made: one to be found in the report of the Military Committee of the last session, which reduced the army proportionally to the number transferred from it to the corps. This, of course, would result in a positive reduction of the army estimates or a transfer of a portion to the estimates of the corps, and would make a positive saving of the amount previously stated; but the army would probably suffer inconvenience from the reduction. It is divided into so many small posts, and extended over so vast a space of country, that it could not feel less the inconveniences of the reduction than it does those of the details. These are already oppressive to its duties. Although the reduction of the army estimate would be thereby a proportional reduction of army expenditure, the reduction would be at the expense of the organization of the army and of its duties, and might therefore, although a saving, not be considered a true economy.

The other, to leave the army as it is, and organize the corps as it should be. Under this consideration

the total amount of present appropriations absorbed by the proposed organization would be, for the corps of topographical and civil engineers, \$31,200; but as the total cost of the proposed corps is stated to be \$40,454, it would leave an annual deficiency over our present appropriations of \$8,254.

Under either view, the authority to employ civil engineers under the act of the 30th April, 1824, is to be repealed. Of course the amount of their annual compensation ceases with the passing of the law for the new organization.

But as a plan which leaves the army in its present form is, under all circumstances, the better, that for the organization of the corps, which will be presently submitted to you, will be made in accordance to it.

The plan submitted last year, while it authorized a complete organization, embraced a feature of periodical promotions until the organization should be complete. Such a course is not unfrequent in the extension of scientific corps, when the materials for supplying places have to be formed; but when, as in our circumstances, we have abundant officers, properly educated, experienced in its duties, and who in fact are now performing them, such a course cannot be advisable but on the supposition that a full organization is not now wanted. As we already are obliged to employ more than the organization contemplated, this supposition cannot be well sustained; and believing, as I do, the whole number are wanted, I have considered it the better course at once to submit a correct plan to your consideration.

It has been previously observed that the present corps consists of one lieutenant colonel commanding, five majors, four captains; to which are attached twenty-six lieutenants of artillery and infantry, thirteen civil engineers.

The plan proposed adds a colonel to the corps, takes away one major, and from the lieutenants and the civil engineers takes six captains, ten first and ten second lieutenants.

I have hitherto confined myself to an exposition of the kind of organization which now exists for topographical duties, its defects and inconveniences. Although many of the advantages of the modifications proposed are to be inferred from these, yet it may be well to state a few of the important public services which this corps has to perform, but to which, from its present defective organization, its attention has been applied but imperfectly.

Heretofore its duties have been principally directed to surveys for the defences of the posts and harbors on the Atlantic, including the water approaches to the positions to be fortified.

These surveys generally embrace some extent of coast as well as of inlets, and, from the facts which have to be collected, constitute also very valuable but rather limited charts for navigation; but the land approaches to these positions remain yet to be surveyed.

Surveys of our harbors and of our rivers on the coast, with views to their improvement, and also to obtain more accurate charts of them than now exist. Although much has been done under this head, yet the greater part of our coast, and particularly from the Delaware south, has yet to be attended to. These surveys form valuable details to be introduced in the great survey of the coast now being made, and which, with a proper understanding with the principal of that survey, may be introduced into his charts with great facility.

Surveys of the harbors and shores of our western lakes. It is only some of the principal harbors of these lakes to which the attention of the corps has yet been directed—those affecting the present lake navigation, and requiring immediate improvement. The connecting links between these harbors, the inlets of a secondary class, and the rivers which empty into them, have hitherto received but little attention. Our imperfect organization and limited numbers were embarrassments to the activity and extent of our operations which could not be overcome.

Surveys for common roads, railroads, and canals. Although these may be considered as purely of a civil character, yet a finer school of practice than they furnish for the topographical engineer cannot well be imagined. He obtains on these duties expertness in the use of instruments; the habit of investigating the resources of a country, commercially, morally, and physically; its supplies in provisions, timber, metals, and means of construction; its population, and the best means by which it can be commanded in cases of emergency; its military aspect, hilly, level, or mountainous, and the various roads which intersect the path of his survey. While he is, therefore, apparently engaged on an object ostensibly of mere profit to its undertakers, he is perfecting himself in the practice of his profession, acquiring exact and persevering habits of investigation, improving his *coup d'œil*, and gathering the most valuable information in relation to the capabilities of self-defence, of the locality of the survey, and its ability to aid in the defence of other parts of the country.

Surveys of the inland frontiers of our Atlantic and western States. Singular as may be the acknowledgment, yet it is nevertheless the fact, that this highly important service has hitherto received but little attention. It embraces not merely a geographical knowledge of the frontiers named, but accurate topographical surveys of the vicinities of all our western posts; of the best routes for roads of communication between the posts and with the interior for supplies and assistance. We have hitherto been able to direct but very feeble efforts to these important objects. The fault is not that of this bureau, but of the inadequate means placed at its disposal. Although there is an annual appropriation of twenty-five and sometimes thirty thousand dollars for surveys, yet as considerably more than half of this is required for the salaries of the civil engineers, it leaves but a small portion for the expenses of surveys. This small portion is generally absorbed in the execution of those surveys directed to be made by resolutions of Congress, and of some parts of our sea-coast, the latter being a continuation of the surveys directed some years since in reference to a regular digested system of sea-coast defence. We are, therefore, left without the means of bestowing our efforts on the western frontier; and the position of appearing to neglect so important a duty, in which this bureau has been placed, is shown by the foregoing remarks to have been beyond its power to obviate.

Should the organization proposed be adopted, it will leave the whole appropriation for surveys free from the deductions for the salaries now paid out of it, and the bureau may then place a brigade of officers on the western frontiers to commence the execution of those important duties. Should it not be adopted, it will be seen that the bureau will be as unable as heretofore to attend to them unless a separate appropriation is granted, and which is asked, in order to meet the contingencies of the case, in the estimate now submitted.

The survey of the coast. It would be superfluous to speak of the necessity of this survey, of its immense importance to our commerce and navy, and of its extensive influence over any system of defence for the Atlantic frontier.

Of the methods by which alone such a duty ever has been executed by any nation, or ever can be correctly, the books are full, and from the same sources we may also draw the best conclusions of the time and means and qualifications which such a labor requires. Applications have been made to this

bureau for aid in officers, but it has been unable to furnish but one. It was a cause of serious regret, but yet beyond the power of this bureau to remedy, and only in the hands of Congress by legislative action.

We have but one school in our country which may be considered as thoroughly mathematical in its course—the military school at West Point; and it is to this school only to which we can look for individuals sufficiently qualified to enter upon the duties of this survey and justly aspire to a knowledge of its highest practical operations. I do not mean by this to say that there may not be citizens who of their own taste and own force of mind are not equally qualified, but these are only rare exceptions to a rule, the correctness of which will stand the proof of a comparison of the course of mathematical instruction and habits of study pursued at West Point with those of any other school or college in our country.

Now, then, if the desire is that this great work should not cease with the life of the present highly informed gentleman who superintends it, and that in course of time we should have numbers capable of conducting it and of executing any of its parts, we must give them the opportunity of acquiring the necessary practical knowledge by placing them upon it. This can be done only by allowing to the corps within whose proper province such duties naturally fall the necessary numbers. We can then place upon this duty a brigade of officers, from whose efforts may be justly anticipated the results of adequate education, facilities in practice, and of order and subordination of conduct.

The superintendence of constructions purely civil. There is no corps in our country to which the duties of a corps of *ponts et chaussees* so properly belong as to the topographical engineers. It is so intimated in the report of the Military Committee of the last year, and it seems to me an unequivocal dictate of common sense to say that the corps which is employed in making the survey, digesting the plan, and forming the estimate of a work, is, from the very nature of the case, more fully imbued than any other can be with the considerations and unity of view which its construction involves, and therefore better qualified to superintend it. The subject does not seem to admit of much reasoning, but stands, like an axiom, upon the clear truth in its annunciation.

Having now exposed generally to your consideration the defects of the present organization of this bureau, its evils to the service, the remedy, and the general duties which the corps will be called upon to execute, I have in conclusion appended to this report the form of a short bill, which appears to me best adapted to effect the desired organization.

Respectfully submitted.

JOHN J. ABERT, *Lieutenant Colonel Topographical Engineers.*

Hon. LEWIS CASS, *Secretary of War.*

A.

Statement showing the amount of money drawn from the treasury and remitted to the officers and agents disbursing under the Topographical bureau from October 1, 1834, to September 30, 1835, inclusive, and the amount of accounts rendered by each within the same period.

A BILL for the better organization of the corps of topographical engineers.

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the corps of topographical engineers shall be organized and increased by regular promotions in the same, so that the said corps shall consist of one colonel, one lieutenant colonel, four majors, ten captains, ten first lieutenants, and ten second lieutenants.

SECTION 2. *And be it further enacted,* That vacancies created by said organization, over and above those which can be filled by the present corps, shall be taken from the army, and from such as it may be deemed advisable of the civil engineers employed under the act of April 30, 1824, and that the pay and emoluments to the officers of said corps shall be the same as are allowed to officers of similar rank in the regiment of dragoons.

SECTION 3. *And be it further enacted,* That the authority to employ civil engineers, in the act of April 30, 1824, and the authority by law for the employment of the present corps of topographical engineers, be, and the same are hereby, repealed, after the passage of this act, and that all letters and packages on public business to and from the chief of the corps now authorized be free from postage.

SECTION 4. *And be it further enacted,* That the officers of said corps shall be subject to the rules and articles of war, and to such regulations in relation to their duties as the President may think proper to adopt.

24TH CONGRESS.]

No. 698.

[1ST SESSION.

ANNUAL STATEMENT OF THE ARMS MADE AND EXPENSES INCURRED AT THE NATIONAL ARMORIES IN 1835.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JULY 2, 1836.

WAR DEPARTMENT, July 1, 1836.

SIR: I have the honor to transmit a report of the colonel of ordnance, furnishing the information called for by the act of Congress concerning armories, dated April 2, 1794.

Very respectfully, your obedient servant,

LEWIS CASS.

Hon. JAMES K. POLK, *Speaker of the House of Representatives.*

ORDNANCE OFFICE, Washington, June 30, 1836.

SIR: In pursuance of an act of Congress concerning armories and arsenals, passed April 2, 1794, I have the honor to transmit herewith a statement of the expenditures at the national armories, and of the arms, &c., made therein, during the year 1835.

I have the honor to be, sir, your obedient servant,

GEO. BOMFORD, *Colonel of Ordnance.*

Hon. LEWIS CASS, *Secretary of War.*

24TH CONGRESS.]

No. 699.

[2D SESSION.]

ANNUAL REPORT OF THE SECRETARY OF WAR, SHOWING THE CONDITION OF THAT DEPARTMENT IN 1836.

COMMUNICATED TO CONGRESS, WITH THE ANNUAL MESSAGE OF THE PRESIDENT, DECEMBER 6, 1836.

DEPARTMENT OF WAR, December 3, 1836.

SIR: In compliance with your directions, I have the honor to lay before you the usual annual reports of the several divisions of this department, and to submit, for your consideration, a summary of the contents of those documents, together with such additional statements and suggestions as seemed to me to be required by the present condition and necessities of the public service.

I.—THE ARMY.

1. *Organization and force.*—It appears, from the report of Major General Macomb, and the tables annexed to it, that the regular army of the United States consists of 648 commissioned officers, and 7,310 non-commissioned officers, musicians, artificers, and privates; making an aggregate of 7,958—organized as follows: General staff, 14, viz: one major general commanding; two brigadier generals, each commanding one of the two military districts into which the United States are divided; one adjutant general; two inspectors general; one quartermaster general and four quartermasters; and one commissary general of subsistence and two commissaries. Pay department, 18, viz: one paymaster general and seventeen paymasters. Medical department, 76, viz: one surgeon general, fifteen surgeons, and sixty assistant surgeons. Purchasing department, 3, viz: one commissary general of purchases and two military storekeepers. Corps of engineers, 22; topographical engineers, 10. Ordnance department, (including 294 non-commissioned officers and enlisted men;) two regiments of dragoons, each containing ten companies of sixty privates each; four regiments of artillery, each containing nine companies of forty-two privates each; seven regiments of infantry, each containing ten companies of forty-two privates each.

The present actual force of the regular army, according to the last general return, is 6,283; but it also appears from that return that, after making the necessary deductions for sickness and other circumstances, the available force for service in the field, at the latest dates, was 4,282. The difference between the actual force (6,283) and the force allowed by law (7,958) is 1,320, and is occasioned by the fact that only 360 recruits have yet been obtained for the new regiment of dragoons authorized by the act of the last session, and by the vacancies caused by expiration of service, and other casualties, in the other regiments.

2. *Distribution and present position of the troops.*—The eastern department, under the command of Major General Scott, includes thirty posts, from twenty of which the troops have been mostly withdrawn for service in the Creek country and in Florida. The whole number of officers of the line and men at the several stations in the eastern department, including absentees, is therefore now only 1,124. Of that number, 113 are at Fort Winnebago; 114 at Fort Brady; 105 at Fort Mackinac; 149 at Fort Howard; 67 at Fort Dearborn; 122 at Fort Gratiot; all which posts are on the northwestern frontier, or in that vicinity; and the remainder at posts in the Atlantic States.

The western department, under the command of Major General Gaines, now includes twenty posts and four temporary stations. Several of these posts have also been evacuated, and the troops ordered to Florida; so that the whole number of officers of the line and men now stationed at them, including absentees, amounts only to 2,458. Of that number, 233 are at Fort Snelling; 185 at Fort Crawford; 321 at

Fort Leavenworth; 132 at Fort Gibson; 158 at Fort Towson; 44 at Fort Coffee; 360 at Fort Jesup, and 124 at a station seventy miles from that place; 147 at Camp Sabine, and 428 at Camp Nacogdoches; all which posts and stations are in the northwest, or on or near the western frontier; 136 at Fort Mitchell, Alabama, and 53 at Fort Cass, Tennessee.

The regular force serving in Florida consists of the four regiments of artillery, five companies excepted; eight companies of the fourth regiment of infantry; one company of dragoons, and a battalion of 320 marines; making in the aggregate about 2,000, according to the latest returns received at the Adjutant General's office. After deducting the number reported sick and absentees, the efficient regular force for field service in Florida will not exceed 1,500.

For want of the necessary returns of the volunteers serving in that quarter, the estimate of that auxiliary force at this time is less accurate; but, from the best data in the Adjutant General's office, it may be thus computed: Tennessee volunteers, about 1,200; Alabama volunteers, 300; Florida volunteers, 250; and Washington City volunteers, 59; amounting in all to about 1,800, besides 730 volunteer Creek Indians, who have been mustered into the service of the United States, and are now employed with the army. The whole active force, then—regular, volunteer, and Indians—now in Florida, is probably somewhat less than 4,000.

Besides the volunteers above mentioned, there are also now employed of that description of force, 361 in Tennessee, under the command of Brigadier General Wool; 537 in Arkansas, under the command of Brigadier General Arbuckle, and 58 in Alabama; making, when added to those serving in Florida, an aggregate of near 2,800.

3. *Movements during the last year, and now in progress.*—At the date of the last annual report from this department several companies had been placed in Florida, under the command of Brigadier General Clinch, for the purpose of restraining any hostile intentions on the part of the Seminole Indians, and of enforcing the execution of the treaty providing for their removal. It was then hoped that an open rupture would be prevented; and it was confidently believed that the eleven companies actually in Florida, amounting to 536 officers and men, would be amply sufficient, with the reinforcements then under orders, and with such aid as might be derived from the local militia and volunteers, to put down any hostile attempt which might be made by the disaffected portion of the tribe. Both these expectations were disappointed, and a protracted warfare ensued, which has not yet been terminated.

The most important military operations growing out of this state of things are mentioned in the accompanying report of Major General Macomb, which brings down the narrative of events in Florida to the retirement of the forces under Governor Call from the Withlacoochee in October last. Authentic intelligence of that event reached the department on the 1st ultimo, through the medium of letters received by some of the bureaus, and of officers direct from Florida. By the same channels of information it was also ascertained that the health of Governor Call had been so much impaired by sickness and fatigue as to make it doubtful whether he could renew the campaign with the promptitude and energy demanded by the crisis. On the 4th ultimo, no report having been received from that officer, and it being deemed necessary that the department should act without further delay, on the information then in its possession, despatches were sent by express to Governor Call and to Major General Jesup, expressing to the former the surprise and disappointment of the President at the failure of his movement, and calling for an explanation, and directing the latter to assume the command. General Jesup was also instructed to establish posts at or near the mouth of the Withlacoochee, at Fort King, and at Volusia, and, after taking the proper measures for securing through them the safety of the frontier and for procuring sufficient and regular supplies, to concentrate all his disposable forces, and to proceed without delay to possess himself of the positions occupied by the Indians, and of the whole country between the Withlacoochee and Tampa Bay. Should the war thereafter be continued, he was then directed to take such advanced positions to the south of Volusia and to the east and south of Tampa Bay as the nature of the country might admit, and to push from them such further operations as might be necessary to the most speedy and effectual subjugation of the enemy.

No acknowledgment of the receipt of the despatches of the 4th of November has yet reached the department; but it is known that Governor Call and General Jesup have both been very actively engaged in preparing for offensive movements; and the latest intelligence gives reason to hope that the objects of the campaign will soon be accomplished. But as these expectations may be disappointed, and as the term of service of the Tennessee volunteers, who compose a very important part of the force serving in Florida, will expire on the 1st of January, it has been deemed important to make provision for supplying their places, in part at least, from the regular army. With this view, the commanding officer of the second regiment of dragoons was directed, on the 26th ultimo, to organize the recruits enlisted for that corps into companies, and to hold them in readiness to be moved to Florida on the shortest notice. It is also expected that two additional companies of artillery may be prepared for the like purpose during the present month. After maturing these arrangements, information was received at the department that General Jesup had recently called on the governor of Alabama for a battalion and on the governor of Georgia for a regiment of volunteers, to meet the contingency of a want of force on the discharge of the Tennessee brigade. This call has been approved as a proper precautionary measure; but it is believed that the other troops now in Florida will be sufficient, especially when reinforced as above suggested, for all available purposes, even should the war be continued; and that the services of the volunteers last called for may therefore very soon be dispensed with.

I beg leave to refer to the report of the general-in-chief for a succinct account of the operations rendered necessary by the hostile movements of the Creek Indians. To that account, however, it is but just to add that the marine corps, at a very alarming juncture, generously volunteered their services to aid in suppressing those hostilities, and were accordingly employed for that purpose. Since the termination of their tour of duty in the Creek country, they have been moved to Florida, where they now compose a most efficient portion of General Jesup's force.

Indications of a mischievous disposition having been exhibited by the Winnebagoes and other tribes in the northwest, some movements of the troops in the upper Mississippi were had in the months of July and August last, which produced the desired effect of awing them into quietness.

The movements of the forces under the personal command of Major General Gaines, on the western frontiers of Louisiana and Arkansas, are sufficiently stated in the report of the general-in-chief. General Gaines has recently been relieved of this command by Brigadier General Arbuckle, who was instructed, under date of the 10th of October last, to make a full report of the condition of things in that quarter. He was also particularly advised, that under the instructions previously given to General Gaines, that

officer was not to advance into the territory claimed by Mexico, and if he should have advanced, was, to retire, unless the Indians were actually engaged in hostilities against the United States, or unless he had undoubted evidence that such hostilities were intended, and were actually in preparation within that territory. On the 11th ultimo a communication was received from the officer in command at Camp Nacogdoches, giving an unfavorable account of the health of the troops at that post, and stating that their continuance there during the winter would make it necessary to construct barracks and quarters for their comfortable accommodation. In consequence of this communication, Brigadier General Arbuckle was instructed, under date of the 12th ultimo, to take all necessary measures to restore the health of the troops, and, in the event of his deciding to retain possession of Camp Nacogdoches, to provide at that place all needful accommodations. He was also informed that it was not in the power of the department, with the limited information then in its possession, to give any positive order in regard to the further occupation of the post. The opinion was, however, expressed, that there seemed to be no adequate cause for any longer maintaining a position so unhealthful and inconvenient; and he was instructed, in case he had not already withdrawn the troops, to give the requisite orders for that purpose immediately on the receipt of that communication, unless he should then have in his possession information satisfying him that the maintenance of the post is essential to the protection of our frontiers and to the due execution of our treaty stipulations, as explained in the previous instructions to General Gaines and to himself.

In the month of June last it became necessary to call on the governor of Tennessee, under the act of the last session, for a volunteer force sufficient to put down any hostile attempt on the part of the dissatisfied Cherokees, and to insure the peaceful execution of the treaty then lately concluded with that tribe. The command of the troops to be raised for this purpose was committed to Brigadier General Wool, who immediately repaired to the Cherokee country, and is yet in command there. The force under him amounted at one time to about two thousand four hundred and fifty, but has lately been reduced to three hundred and sixty-one—a number sufficient, from present appearances, to prevent any difficulty in that quarter. Much praise is due to General Wool for the promptitude and zeal with which he has devoted himself to the execution of his duties.

The whole number of militia and volunteers mustered into the service of the United States, in the various movements and operations above mentioned, appears, from the rolls received in the office of the adjutant general, to have been about twenty-four thousand five hundred. In the case of the Tennessee volunteers mustered by General Wool, a larger number appeared than had been called for; but as they acted in good faith, and under patriotic impulses, and as the commanding general deemed it best to receive them, it seems proper that provision should be made for their pay. Legal provision will also be required for the just settlement of many of the accounts growing out of the employment of militia and volunteers, and for the satisfaction of claims which, though equitable, cannot be allowed by the accounting officers.

In executing the first section of the act of the 28th of May last, "to provide for the payment of expenses incurred and supplies furnished on account of the militia or volunteers received into the service of the United States for the defence of Florida," it has been decided that this section does not authorize any allowance for horses or other property impressed into the service of the United States, nor for any special damage done to individuals or their property by the troops of the United States or the enemy. Some of these cases ought undoubtedly to be provided for by Congress; and perhaps, under the peculiar circumstances which attended them, provision should be made for embracing the whole.

In addition to the movements now in progress, already mentioned, the troops stationed at Fort Dearborn, Chicago, have been ordered to proceed to Fort Howard and to join the garrison at that post; and seventy-five recruits are on their way to join the first regiment of dragoons at Fort Gibson. The public property at Fort Dearborn will remain in charge of the late commandant of the post.

4. *General staff.*—The reports of the chiefs of the different staff departments exhibit a perspicuous view of their operations during the past year.

I beg leave to call your attention to the communication of the adjutant general, setting forth the difficulties which have been and are yet experienced in various branches of the public service for the want of additional staff officers.

The fiscal operations of the quartermaster's and subsistence departments have been unusually heavy, in consequence of the hostilities in which the army has been employed. It is due to these two important arms of the service that I should state that, from the time when adequate means were placed at their disposal by Congress, nothing has been omitted on their part to provide the necessary supplies for the troops in the field.

The report of the acting quartermaster general states the progress made, or rather the inability to make progress, in the construction of the roads and other works with which the department is charged. It also exposes, in a lucid and convincing manner, the utter insufficiency of this branch of the service, as now organized by law, to the execution of the duties committed to it.

The expenditures incurred during the past year in the emigration and subsistence of Indians will appear in the report of the Commissioner of Indian Affairs, to whose office that business was transferred by a regulation made on the 1st ultimo. This change was made from a conviction that the interests of the service would be promoted by bringing all matters belonging to any one branch under the care of the bureau to which they properly belonged. The clerks and messengers allowed by law have been transferred with the business.

The complaints made in the accompanying papers, as to the want of sufficient strength in the staff departments, appear to me to be well founded.

The present system seems to have been framed upon the principle of concentrating the business of those departments at the seat of government, and of employing therein a very small number of officers commissioned in the staff, the deficiencies being supplied by selections from the lines. This arrangement is very well adapted to a time of profound peace, when officers can be spared from the line without injury to the service, when the positions of the troops are chiefly permanent, and when the changes which occur are made with so much deliberation as to afford ample time for preparing adequate means of transportation and supply; but when large bodies of troops, whose numbers and movements may be varied by unforeseen contingencies, are to be supplied in the field, and at a great distance from the seat of government, the system is worse than insufficient; it is the parent of expense, confusion, and delay. During the time necessarily occupied in the transmission of despatches to and of instructions from the War Department, the state of things may be so entirely changed as to render the instructions inapplicable; and even if it remain unaltered, the loss of time in military operations is always a great evil, and sometimes a fatal one. To prevent inconveniences of this sort, it is evidently necessary that staff officers

of experience and rank should be associated with the commander; and to supply such associates the staff departments must be enlarged. On the other hand, to make the line of the army truly effective, officers should not be taken for staff service or other detached duties in large numbers nor for long periods from their companies. And when, to relieve the weakness of the staff, on a pressing contingency, officers are selected from the line, the difficulty, instead of being remedied, is only exchanged for a new and possibly a greater one. The embarrassments occasioned by these causes during the operations of the year have been of constant recurrence and of the most serious character.

5. *Pay department.*—So far as the regular army is concerned, there is nothing in the report of the paymaster general demanding particular remark. His suggestions in regard to the services and responsibilities of the paymasters who have been or who may be employed in making payments to militia and volunteers undoubtedly demand the attention of Congress. In order to a clear understanding of this subject, it should be observed that, after the reduction of the army on the conclusion of the late war, and until the act of July 14, 1832, the Secretary of War appears in several instances to have exercised the power of making discretionary allowances to paymasters of the army of the United States, for the risks and losses sustained by them in making payments to militia and volunteers. These allowances were made in the shape of *commissions* on the money paid, and were usually fixed at two and a half per cent. The only ground on which such a power could have been exercised was the absence of any legislative provision making it a part of the regular duty of the army paymasters to make payments to militia and volunteers. But by the third section of the act of the 14th of July, 1832, it was made the duty of the district paymasters of the army of the United States, "in addition to the payments required to be made by them to the regular troops, to make payment to all other troops in the service of the United States whenever required thereto by order of the President." The discretionary power before possessed by the Secretary of War to make an extra allowance for payments to the militia and volunteers was, as I suppose, taken away by this provision; and it was doubtless in consequence of this change that the second section of the act of the 2d of March, 1833, expressly provided "that the Secretary of War be authorized, at his discretion, out of the moneys appropriated by this or any former act for the payment of the militia ordered into the service of the United States according to law, during the last year, to allow and pay to the district paymasters of the army of the United States, employed in making such payments, a commission on the sums respectively paid by them, not exceeding one per centum upon the amounts."

The act of the 14th of January, 1836, making appropriations for the suppression of hostilities commenced by the Seminole Indians, provides "that the sum of one hundred and twenty thousand dollars be, and the same hereby is, appropriated, out of any money in the treasury not otherwise appropriated, to defray the expense attending the suppression of hostilities with the Seminole Indians in Florida, to be expended under the direction of the Secretary of War, conformably to the provisions of the act of April 5, 1832; 'making appropriations for the support of the army;'" and the same reference is in effect made in the subsequent acts. When the act of the 5th of April, 1832, thus referred to, was passed, the discretionary power spoken of above was possessed by the Secretary of War, and was exercised in the settlement of the paymasters' accounts under that act by the allowance of a commission of two and a half per cent. In a case of peculiar hardship, and of just merit also, which occurred before the resignation of the late Secretary of War, the paymaster general, under the impression that the general reference to the act of the 5th of April, 1832, contained in the acts of the last session, included authority to allow a percentage, recommended such an allowance to the extent of one per cent. The Secretary of War referred the case to me as Attorney General, and called for my opinion as to the power of the department to allow the proposed commission. My opinion was, that the discretionary power was taken away by the act of 1832, above quoted, and also by the act of the 3d of March, 1835, making additional appropriations for the Delaware breakwater and other works, and that the intent to confer such a power was not sufficiently apparent in the general reference to the act of 1832 to authorize the allowance applied for. But as it would seem from the report of the Paymaster General that justice requires that additional compensation should be allowed, I concur in recommending a special provision, similar to that inserted in the act of the 2d of March, 1833.

6. *Medical department.*—The number of cases treated by the officers of the medical department during the year ending the 30th September last was 14,356; of which number only 139 died. This result may well be taken as evidence of the professional skill of the surgeons and assistant surgeons, and of the care with which their duties are performed. For other matters respecting this department I beg leave to refer to the report of the surgeon general *ad interim*. His suggestions in regard to the pay of hospital stewards, and the repairing and erection of hospitals at the different military posts, appear to me to be worthy the attention of Congress.

7. *Purchasing department.*—The report of the commissary general of purchases exhibits the several amounts drawn and disbursed for clothing, camp equipage, &c., during the present year, with estimates for the like service for the year 1837.

8. *Engineers and topographical engineers.*—The reports of the chief engineer and of the head of the Topographical bureau exhibit the progress made during the last year upon the fortifications and other works under their care.

The failure during the session of 1834-'35 of the bill containing the usual appropriations for fortifications occasioned a suspension of those works during the year 1835; and though liberal appropriations for resuming them were made at the last session of Congress, yet it unfortunately happened that the season for active operations was too far advanced at the time of the passing of the appropriation laws to allow of much progress during the present year. Operations have been also retarded by the difficulty of procuring laborers, and still more by the insufficiency of the Engineer department to furnish an adequate number of engineers to superintend the constructions. Several important works authorized at the last session have not even been commenced, and but little has been done towards the completion of those previously undertaken. The like remarks are applicable to the various improvements in harbors on the seaboard and lakes, and at the mouths and in the channels of navigable rivers.

From the causes above stated but a small portion of the sums appropriated by the present Congress for the engineer and topographical service has yet been expended. The balances of those appropriations may, however, be expended without any further law; and measures will be taken for resuming operations at an early day and with all practicable vigor.

In the last annual report of the Secretary of War he stated the insufficiency of the corps of engineers and of the topographical corps to the expeditious and economical performance of the duties committed to them, and recommended their increase. His suggestions on this subject were approved by you,

and the attention of Congress was invited to them in your message. The propriety of such a measure is greatly strengthened by the present condition of those branches of the service and by the delays and embarrassments occasioned by a want of the necessary force. In connexion with the proposed reorganization of the topographical corps, it may well be questioned whether the existing arrangement as to the civil engineers attached to that corps, and the practice of lending the topographical engineers to the States and to incorporated companies, ought longer to be continued. In my judgment, it would be better that all the engineers in the service of the United States should belong to one or other of the organized military corps. And the information derived from the services of engineers when employed by the States or by companies, though useful in a military point of view, does not seem to me sufficiently important to counterbalance the inconveniences and objections incident to the practice.

9. *Ordnance department.*—It appears from the report of the colonel of ordnance that \$857,570 45 have been expended and accounted for during the first three quarters of the present year, being about \$207,000 more than was expended in the same service during the corresponding quarters of the year 1835. These moneys have been expended in the manufacture, repair, and purchase of ordnance, ordnance stores, small arms, and accoutrements, and in building materials, the details of all which will appear by the statements annexed to Colonel Bomford's report.

During the year ending on the 30th of September, 1836, the sum of \$220,813 38 was expended in procuring and distributing artillery, small arms, accoutrements, &c., under the act of 1808 for arming and equipping the militia of the States and Territories.

The munitions of war issued during the year ending on the 30th of September, 1836, have been very large, in consequence of the actual hostilities in which the army has been engaged.

No returns of lead made at the United States lead mines have been delivered to the superintendent during the last year; and there yet remains due to the United States, on account of rent lead which accrued prior to the 30th of September, 1835, an aggregate of 493,313 pounds. It appears that the refusal to account for and to pay over the rent reserved in the leases mentioned in the last annual report has become general, the lessees denying the validity of the laws under which the leases were made, and that suits have been commenced against several of the delinquents, but are not yet determined. Colonel Bomford recommends the selling of the mineral lands as the most effectual mode of terminating the difficulties now existing between the government and the inhabitants, and of securing to the United States the value of the mines.

Of the works authorized by acts passed at the last session of Congress, and belonging to the ordnance department, all have been greatly delayed, and some entirely suspended, by the want of the necessary officers to conduct them. The interests of the service, as well as the just claims of contractors, whose payments are frequently delayed from inability to make the proper inspections, call loudly for an increase of this corps.

10. *Proposed increase in rank and file of artillery and infantry.*—In compliance with the suggestion of General Macomb, and with my own convictions of duty, I beg leave to invite your attention to a proposal for the increase of the rank and file of the artillery and infantry.

The insufficiency in several respects of our present military establishment has already been noticed. It is greatest in the general staff and the rank and file; those arms of the service being much less numerous in proportion than the officers retained in the line of the army. The object of Congress in this arrangement evidently was, on the one hand, to reduce the rank and file and the general staff to the lowest allowable point, and, on the other, to retain in the line officers enough to preserve an amount of military knowledge and experience competent to the direction of a larger effective force, whenever such a force might be required by special emergencies or by the permanent interests of the country. This policy was recommended, at the time of its adoption, (1821,) by the existence of other and more pressing claims on the treasury, and by the comparatively few calls then made for active military operations. In both these respects our condition is now widely different. The extinction of the public debt, whilst it gives us the ability to attend to other subjects of national importance, lays us under new obligations to do so. We have a much larger number of fortifications and other posts to be garrisoned, and our Indian relations have now reached a point which demands an effective military provision.

There are thirty-two forts on the Atlantic seaboard and the Gulf of Mexico, each of which ought to be garrisoned by a force adequate at least to the preservation of the public property, and to the retaining of some knowledge of artillery practice. This will require, as I understand, an average of about ninety-six men to each post, or about three thousand in the whole. The rank and file of the present regular army, supposing the new regiment of dragoons to be filled, amounts in the total to seven thousand and sixteen; from which number a large deduction must always be made for sickness, arrests, occasional absence, and time lost in recruiting and marching. The effective force, exclusive of officers, which may be relied on under the present arrangement, can therefore scarcely ever exceed six thousand men; a force utterly inadequate to the necessities of the public service, inasmuch as it affords, after the scanty provision for the seaboard above suggested, only about three thousand for the interior.

In that part of this report which relates to Indian affairs I shall have occasion to specify some of the weighty reasons which make it necessary that we should establish additional posts on our western borders and in the Indian country, and that each should be permanently garrisoned by a respectable force. We have now in that region sixteen posts, including three temporary stations, the whole of which are now occupied by about three thousand men, including a regiment of Arkansas volunteers recently called into the service. All, probably, will agree that the present force at several of the existing posts is inadequate; and a deliberate survey of the immense field of operations and of the various interests involved will, I think, lead to the conclusion that this branch of the service cannot safely be left for the next five or ten years with a force at any time less than from five to seven thousand men.

The seaboard may be provided for in the manner above suggested, and adequate protection may be given to the interior and to the Indian country by augmenting the number of men in each company of artillery and infantry to one hundred. This would increase the legal force, independently of commissioned officers and non-commissioned officers of artillery and infantry, to twelve thousand and thirty, from which we might at all times expect to command an available force of not more than about ten thousand effective men. Two plans for a similar increase in the rank and file of the army were submitted to Congress in the report of the Secretary of War of the 8th of March, 1836, and the accompanying communication of General Macomb, of the 7th of that month, both of which communications were laid before the Senate of the United States, in compliance with a resolution of that body. I refer to these documents for the details of those plans, and for an estimate of the expense, which, according to the statements then made, would

be, for the increase above proposed, about \$850,000 per annum. Such an addition to the heavy expenses of our present establishment should undoubtedly be well weighed before it is incurred; but if we may judge from the experience of the last few years, the measure is as plainly called for on the score of economy as it is by other and more impressive considerations. The expenses occasioned by the hostile aggressions of the Sac and Fox Indians in 1832 amounted to more than three millions of dollars, and the several appropriations for suppressing Indian hostilities made by Congress at the last session, and amounting to five millions of dollars, have already been drawn from the treasury; and though a considerable amount is yet in the hands of disbursing officers, the whole will be required to meet expenses already incurred.

If it be one of the first objects of legislation to guard against the evils of war, then must it be admitted that the prevention of Indian hostilities, so far as human foresight is competent to that end, should be the great care of the Congress of the United States; for whilst our exposure to such hostilities is imminent, the evils which attend them are so peculiar and unmitigated as to bring on those public agents who may neglect to guard against them the most fearful responsibility. The presence of an adequate military force at or near each of the points where the Indians are numerous is the most effectual, if not the only effectual, means of security and defence. In my judgment, such a force cannot be furnished by our present establishment; and as neither militia nor volunteers can be employed for permanent garrisons, the object can only be effected by the increase of the regular army. I trust it will be provided for without delay.

11. *Proposed revision of the pay of certain officers.*—My attention having been called, by repeated resignations and other circumstances, to the pay of the subordinate grades, I have looked into the subject with some care, and the result is a decided conviction that the pay of the several grades above that of second lieutenant, and below that of colonel, ought to be increased, and that a new principle of periodical increase in each grade ought also to be introduced.

By the law, as it now stands, there is no increase of the fixed pay and emoluments, except when the officer is promoted; and as promotion in time of peace is generally very slow, officers may serve over ten years in a single grade, and, after a service of twenty or thirty years, may still rise no higher than a majority, or even a captaincy. On the other hand, it will occasionally happen that resignations or other casualties may produce numerous vacancies within a comparatively short period in particular regiments, which may lead to rapid promotions, so that a second lieutenant may, within three or four years after entering the service, be advanced to a captaincy. To remedy the inadequacy of the present system when promotion is slow, and to prevent its inequality when its movement in particular regiments is rapid, it has occurred to me that it would be expedient and just to introduce the additional feature of increasing the pay after five years' service in any one grade, agreeably to the precedents established by the act of 1834, in relation to surgeons and assistant surgeons of the army, and by the act of 1835, regulating the pay of surgeons in the navy. Concurrently with the introduction of this principle, I would also revise the scale of pay and emoluments, with a view to a moderate increase of the different grades above that of second lieutenant, and under that of colonel.

I think it would be just to allow to second lieutenants, for the first five years from the date of their commissions, the present pay and emoluments of their grade; and to those who have been in commission over five years the present pay and emoluments of the first lieutenant; to first lieutenants, for the first five years, the present pay and emoluments of a captain; and to those who have been commissioned over five years a corresponding increase; and in like manner to provide for an increase in the pay of those captains, majors, and lieutenant colonels who shall have been in commission over five years, taking care, however, in all cases, that the increase by means of five years' service in one grade shall not be more than one-half the difference between the first pay of such grade and the first pay of the next grade. The effect of this double arrangement for increase of compensation would be to secure to the officer the certainty of an increase of pay at periodical stages corresponding to the probable increase in his wants and in the value of his services; but it would not interfere with the ancient and just practice of increasing the pay of the officer on his advancement to a higher grade. When promotions are slow the principle is greatly needed, and then it would apply; when they are rapid it would not be needed, and would not take place.

As the pay, emoluments, and allowances now given by law depend on the grade of the officer, the corps to which he belongs, and his particular position and circumstances, the attempt to state them in this place would lead to inconvenient prolixity; and should you think proper to submit the subject to Congress, the proper information can be laid before the committees of that body. It is, however, deserving of consideration whether the principle adopted in the act of 1835, regulating the pay of the navy, by which all allowances (except for travelling expenses when under orders) are prohibited, and a gross sum in lieu thereof added to the pay, may not, to some extent at least, be advantageously followed. The whole subject undoubtedly demands revision, especially with a view to retain in the departments of engineering, and other branches requiring scientific attainments of a high order, experienced and valuable officers. Several of that class have retired from the army during the year, induced, as I have reason to suppose, by the inadequacy of the existing compensation and the great demand for their services in civil life.

12. *Proposed increase in the pay of privates; land bounty on re-enlistments.*—I think it highly expedient that the pay of privates should also be increased. They are now allowed, when serving as cavalry in the regiments of dragoons, eight dollars per month; in all other cases, six dollars per month. No bounty is given, except on a second enlistment, which is encouraged by a gratuity of two months' pay. In consequence of the great increase in the price of labor, it has been found difficult during the last year to procure able-bodied men to supply the places of those soldiers whose term of service had expired; and the recruiting of the second regiment of dragoons, and to fill up vacancies in the other regiments, goes on very slowly. I submit whether it be not advisable to increase the regular pay; and as the services of an experienced and disciplined soldier are far more valuable than those of a new recruit, I cannot doubt the propriety of increasing the bounty on re-enlistment. It might be granted in land at less inconvenience to the government than if paid in money, and would probably be equally acceptable to the soldier. And as the service of the army, for some years to come, will be chiefly on our western frontiers, most of the men, when discharged in that region, would probably find it for their interest to become actual settlers. The policy of the government in regard to the disposition of the public lands would thus be promoted, and the settlers whom this arrangement would plant on the frontiers would be found, from their military

knowledge, among the most useful of their class. These objects might be still further promoted by giving an increased quantity of land on the condition of actual settlement.

13. *Proposal for employment of chaplains.*—Some provision, as it appears to me, should be made for securing to the army the services of chaplains. The act of April 12, 1808, required one chaplain, with the pay and emoluments of a major of infantry, to be appointed to each brigade. This provision was continued in force until superseded by the act of the 3d of March, 1815, fixing the military peace establishment, and there is now no authority for employing such an officer in the army at the public expense, except at the Military Academy.

The Constitution of the United States has wisely provided that Congress "shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof;" but this cannot lessen the obligation of Congress to furnish to the officers and men employed in the military service such opportunities of religious worship and of moral culture as may be compatible with the appropriate duties of the army. And when it is considered that even the common soldier resumes, sooner or later, the character of a citizen, how important does it become that he should be shielded as much as possible from the pernicious influences to which a military life is usually exposed. The enlightening and tranquilizing effects of a regular attendance on public worship, and the aid which a judicious and devoted chaplain may give in the promotion of discipline and subordination, ought not to be overlooked in the organization of an army.

Since 1815 the services of chaplains at the fixed posts have frequently been secured by voluntary contributions, collected and applied, as I understand, by the council of administration. As the officers composing that council will be enabled to consult the wishes of the garrison, and are in other respects better qualified to make judicious selections for services of this nature than the authorities at the seat of government, I recommend the passage of a law authorizing them to select and employ chaplains from time to time, and giving to the persons so employed the pay and emoluments of such grade as Congress may think proper to prescribe. To each regiment, when employed in the field, the like arrangement might be extended.

14. *General condition of the army, &c.*—The vacancies in the rank and file being numerous, and many officers of the line being engaged on detached service, or absent with leave or on furlough, the army, though in a high state of discipline, has not been found in the fittest condition for active field service. And notwithstanding the successive orders which have been issued, directing officers to join their regiments, the deficiency in officers has not yet been supplied, many having resigned, and others being so situated, by reason of sickness or other causes, as to make a suspension of the orders in respect to them unavoidable. These circumstances, however, only enhance the merits of the officers and men, whether regulars, marines, militia, or volunteers, who have encountered the difficulties, privations, and perils of field service on the western frontier and in the south. Several instances have occurred during the war with the Seminoles in which our troops have nobly sustained the honor of the American name, and those who will dispassionately consider the events of the past year will find in the services of the army many strong claims on the confidence and gratitude of the nation.

The general-in-chief has noticed, in his report, and in appropriate terms, the gallantry and good conduct of Brigadier General Clinch, who commanded in Florida on the breaking out of hostilities in that quarter. The merits of that officer were so highly appreciated by this department that his resignation was not accepted until it had been ascertained to have been rendered necessary by important private affairs. In consequence, doubtless, of pending inquiries, General Macomb's report intimates no opinion as to the conduct or operations of any other general officer in Florida or in the Creek country. This forbearance was manifestly proper, and will be imitated by the department. But it is not inconsistent with the rule thus adopted to express the hope that it may ultimately appear that nothing has occurred to justify permanent estrangement between soldiers who trod together the path of renown, nor to dim the lustre of those honorable services which each has rendered to his country.

II.—MILITIA AND VOLUNTEERS.

It has already been stated that within the last year no less than about 24,500 militia and volunteers have been mustered into the service of the United States. As these forces, when in actual service, form a part of the army of the United States, such particulars concerning those employed during the year as seemed proper to be noticed in this report have been presented under the preceding head.

The defective organization of the militia was noticed at length in the last annual report of the Secretary of War; and the outlines were suggested of a plan for its improvement, which received your sanction, and was submitted to Congress in the opening message of the last session. No legislative action having been had upon the subject, I deem it my duty to invite it to your renewed attention. If any arguments in addition to those heretofore urged were needed on this point, they would be found in the experience of the last year. Whilst the calls on the militia have been answered in a manner highly honorable to their patriotism, they have led to new illustrations of their deficiencies in organization and discipline. The matter has very often been presented to the consideration of Congress; and until the constitutional power of organizing, arming, and disciplining this arm of national defence shall have been more adequately exercised, it will continue to be a duty to invoke their enlightened interposition.

III.—FORTIFICATIONS, ARSENALS, ROADS, ETC.

The present condition of our fortifications, arsenals, and other works of public defence, will sufficiently appear by reference to the accompanying documents from the engineer and ordnance departments; and the elaborate and very able report of the late Secretary of War, of the 7th of April last, transmitted to the Senate with your message of the following day, contains so full a view of the measures proper to be taken for their completion and armament, as to make any further observations on that point superfluous in this place. I would, however, particularly invite your attention, and also that of Congress, to the proposals contained in that paper, and in the last annual report, for the establishment of a national foundry for cannon, and to the suggestions on the subject of depots for arms, then also submitted.

The reports of the chief engineer, and of the head of the topographical bureau, must also be referred to for a succinct account of the present condition of the Cumberland and other roads, and of the harbors and other improvements authorized by law.

IV.—MILITARY ACADEMY AT WEST POINT.

The report of the board of visitors, giving the results of the last annual examination, is well calculated to confirm the favorable opinion so generally entertained in respect to this institution. It also states some facts which, it may be hoped, will remove some of those misapprehensions which have occasionally prevailed to the prejudice of that establishment.

By the existing law, each cadet, on his appointment, is required to sign articles by which he engages to serve five years unless sooner discharged. As four years of this term, by the regulations in force since 1819, are to be spent at the academy, the engagement secures to the United States only one year's service after graduation. It appears, however, from the report of the visitors, that out of 841 graduates, the total number from the commencement of the institution, only 65 had resigned at the end of their term of enlistment. The visitors also ascertained that, out of the same number, 403 still remained in the army; and that of the others, 15 had been killed in battle, and 106 had otherwise died in the service. These facts illustrate the value of the institution as one of the effective means of providing for the national defence.

Whilst it thus appears that the public service has not been materially prejudiced by the early resignation of the graduates, I am yet inclined to think that its interests should be more effectually secured. In my judgment, the engagement for service after graduation should be considerably prolonged; and the graduate should be made liable by law, in case of his discharge short of the prescribed term, for neglect of duty or other misconduct, to pay to the government an equivalent for the expenses incurred in his education and support. Such a provision would not only be just in itself, but seems due to other considerations. As there is no constitutional authority to maintain the institution, except as a part of the military establishments necessary to the defence of the country, it should be so regulated as to contribute directly to that end. Such, also, seems to have been the design of the act of 1812 in prescribing the articles above referred to. There was at that time no prescribed term of study; and as the position of the cadet on his entrance was regulated by the extent of his attainments, he might, and, as I understand, usually did, complete his course in about two years. It was, therefore, intended by the framers of the act of 1812 that a term of army service should be secured equivalent, in some measure, to the expense incurred by the government. I recommend the reassertion of this principle in a new enactment, adapted to the changes since made in the term of study.

The board of visitors having submitted various propositions for the enlargement of the public buildings, and of the courses of instruction, I have deemed it due to the subject, as well as to the high character of the board, to present their suggestions to your consideration, and to that of Congress. They are accordingly embraced in the estimates made by the chief engineer, with a single exception, which could not be submitted in that form. The recommendation thus excepted relates to the duties of the chaplain. By the second section of the act of April 14, 1818, it is provided that there shall be one chaplain stationed at the Military Academy at West Point, "who shall also be professor of geography, history, and ethics." To assist the chaplain in the duties of his professorship, an officer of the army has been associated with him, and the two instruct in the branches above named, and also in grammar and rhetoric, and in the elements of political science, including the law of nations and the constitutional law of the United States. It has been found physically impossible for the chaplain to give adequate attention to his clerical duties, and, with the aid of one assistant, to instruct in a suitable manner in the various studies above named. The consequence is, that the religious instruction of the cadets receives less attention than is commensurate with its importance, and with the probable intent of the act of Congress. The visitors, therefore, recommend, and the suggestion strikes me as important, either that the functions of the chaplain be separated from those of the professor, or that another assistant be provided to aid him in the professorship. The latter mode of relief may be extended by executive regulation; but the former is deemed most appropriate, and for that reason the interposition of Congress is solicited.

V.—INDIAN AFFAIRS.

The report of the Commissioner of Indian Affairs, herewith laid before you, embraces a detailed account of the operations of his office during the past year.

It appears from that document that within this period more than eighteen thousand Indians, of whom four hundred were Seminoles, sixteen thousand nine hundred Creeks, and the remainder Pottawatomies, have reached the west bank of the Mississippi, on their way to their new homes; and that arrangements have been made for the removal of the residue of those tribes at as early a day as circumstances shall allow. The mere process of removal has been conducted with greater expedition, as much economy, and as little of suffering and privation to the Indians, as in former years; but the opposition made by the hostile portions of the Seminoles and Creeks, already noticed under a former head, has subjected the government, in those cases, to the painful necessity of resorting to coercive measures, which, in respect to the Seminoles, are yet continued.

The same report also exhibits the progress made by the commissioners appointed in pursuance of the resolution of the House of Representatives of the 1st of July, 1836, requesting the President of the United States "to cause measures to be taken for investigating certain alleged frauds in the purchase of the reservations of the Creek Indians, and the causes of their hostilities." The investigations, thus directed, have necessarily suspended the action of the Executive on many contracts for the sale of Creek reservations; and there are also other difficulties in respect to them, which will probably require the intervention of Congress.

A commissioner has recently been appointed to certify contracts and to take proof of residence, under the treaty with the Choctaws of the 27th of September, 1830, and has probably entered on the duties assigned him.

The provisions in the treaties of 1832 and 1834 with the Chickasaws, which are to be carried into effect before their removal, have been nearly completed; and an arrangement, it is hoped, will soon be concluded between them and the Choctaws west of the Mississippi for a portion of the territory assigned to the latter.

Measures have been taken for fulfilling the engagements of the United States contained in the treaties with the Chippewas and Ottowas, the Swan Creek and Black River bands of the Chippewas, and

the Wyandots, ratified at the last session of the Senate; and, so far as allowed by the short time which has since elapsed, those engagements have been faithfully executed.

Immediately after the ratification of the treaty with the Cherokees east of the Mississippi, the initiatory measures for carrying it into effect were taken by the department; and, though much retarded by various unforeseen occurrences, they are now going on with all the despatch of which the case is susceptible. The military movements deemed necessary to the maintenance of peace and to the enforcement of the treaty have already been noticed. Efforts have recently been made by Mr. John Ross, and by those of his people of whom he is understood to be the leader, to excite opposition to the treaty, and to prevent its execution; but it is believed that the steps taken by the government will be sufficient to counteract those efforts. The more intelligent part of the Cherokees are well satisfied with the treaty; and the prompt and faithful execution on our part of its very liberal provisions will doubtless secure the good will of the great mass of the nation, and issue in their peaceful establishment with their brethren in the west.

Treaties have been made with the Indians who have emigrated from New York to Green Bay for lands on both sides of Fox river, and with four bands of Pottawatomies residing in the State of Indiana for the extinguishment of their title to the sections of land reserved for them in the treaties of October, 1832. Negotiations have also been commenced with the Indians of New York for the extinguishment of their title to lands in that State, and for their removal to the west of the Mississippi. With a view to the extinguishment of the Indian title to the country between the State of Missouri and the Missouri river, negotiations were opened with the tribes interested therein for the relinquishment of their rights; and treaties to that effect have already been concluded with the Ioways and Sacs of Missouri, Omahas, Yancton and Santie Sioux, and Ottos and Missourias. Measures have also been taken for opening negotiations with the united nation of Ottowas, Chippewas, and Pottawatomies, for an exchange of the lands north of the Missouri river assigned to them by the treaty of Chicago of 1833, for lands south of that river; and with the Miamies for a cession of their lands in Indiana.

The commissioner points out several defects in the laws relative to Indian affairs, and, for the purpose of remedying those defects, submits various propositions, to which I beg leave to call your attention as worthy of being presented to the consideration of Congress. He also recommends the removal of the seat of the superintendency of Indian affairs from St. Louis, where it is now fixed by law, to Fort Leavenworth, or some other point on the Missouri river, and the substitution of full agencies for the present sub-agencies of the Creeks, Cherokees, and Osages, as measures rendered necessary by the onerous nature of the duties now pressing on the incumbents of those offices, and by the great accessions recently made, and hereafter to be made, to the tribes west of the Mississippi.

From the facts stated by the commissioner it would seem that the proviso to the act of the 3d of March, 1835, making appropriations for the Delaware breakwater, &c., operates harshly on the military officers in the Indian department. I concur in the propriety of asking from Congress, as an act of justice to those officers, the allowance of a commission on disbursements, as recommended by the commissioner.

Connected with the general subject of our Indian relations are two measures, proposed by the commissioner, which I deem of great moment. They are, the organization of an efficient system for the protection and government of the Indian country west of the Mississippi, and the establishment of military posts for the protection of that country and of our own frontiers, in addition to those now authorized by law.

These measures are due to the numerous tribes whom we have planted in this extensive territory and to the pledges and encouragements by which they were induced to consent to a change of residence. We may now be said to have consummated the policy of emigration, and to have entered on an era full of interest to both parties. It involves the last hopes of humanity in respect to the Indian tribes; and though, to the United States, its issues cannot be equally momentous, yet they deeply concern our prosperity and honor. It therefore behooves us, at this juncture, seriously to examine the relations which exist between the United States and the inhabitants of the Indian country, to look into the duties which devolve on us, and to mature a system of measures for their just and constant execution.

In almost every treaty providing for the emigration of an Indian tribe, the impossibility of preserving it from extinction, if left within the limits of any of the States or organized Territories of the United States, and thus exposed to the advances of the white population, is expressly recognized. The advantages which the tribe will derive from its establishment in a territory to be exclusively occupied by red men, under the solemn guarantees and the paternal care of the United States, are uniformly insisted on. In the treaty with the Choctaws of the 27th of September, 1830, the wish of the tribes to be allowed the privilege of a delegate in the House of Representatives of the United States is expressly mentioned; and though not acceded to by the commissioners of the United States, yet they insert it in the treaty, "that Congress may consider of and decide the application." In the late treaty with the Cherokees east of the Mississippi, it is expressly stipulated "that they shall be entitled to a delegate in the House of Representatives whenever Congress shall make provision for the same." It is not to be doubted that the hopes thus held out to these tribes had an important influence in determining them to consent to emigrate to their new homes in the west.

Although some of the Indians have made considerable advances in civilization, they all need the guardianship of the United States. To leave them to the barbarism of their own institutions, with the inadequate assistance of an agent and the slight control of the general superintendent, would be imprudent as it regards ourselves, and unjust towards them. Under such a system hostilities will frequently break out between the different tribes, and sometimes between them and the inhabitants of our frontiers, attended in both cases by the usual consequences of savage warfare. To fulfil, in their true spirit, the engagements into which we have entered, we must institute a comprehensive system of guardianship adapted to the circumstances and wants of the people, and calculated to lead them gradually and safely to the exercise of self-government; and, at as early a day as circumstances will allow, the expectations authorized by the passages above quoted from the treaties with the Choctaws and Cherokees should be fulfilled. Indeed, from the facts stated by the commissioner, it is scarcely to be doubted that the Choctaws are already in a condition to justify the measure. The daily presence of a native delegate on the floor of the House of Representatives of the United States, presenting, as occasion may require, to that dignified assembly the interests of his people, would, more than any other single act, attest to the world and to the Indian tribes the sincerity of our endeavors for their preservation and happiness. In the successful issue of those endeavors we shall find a more precious and durable accession to the glory of our country than by any triumph we can achieve in arts or in arms.

The duty of planting a line of posts near the borders of the Indian country, and of opening along it a free communication for the passage of troops, has already been recognized by the present Congress by the act of the 2d of July, 1836, "to provide for the better protection of the western frontier." This law authorizes the President to cause to be opened a military road from some point upon the right bank of the Mississippi, between the mouth of the St. Peter's and the mouth of the Des Moines, to Red river; and it contemplates the establishment of military posts at such places along said road as the President may deem most proper for the protection of the frontier and for the preservation of the necessary communication. But this line of posts, though it will probably be sufficient, if well garrisoned, to protect our own frontier, will not be all that caution and good faith will require. To exercise the necessary supervision over the emigrated Indians, to preserve peace among the different tribes, and to protect them from their savage neighbors, we must also establish posts at convenient positions in the interior of their country.

The establishment and maintenance of these various posts is due to the emigrated tribes for other reasons. By the most sacred pledges the territory in which we have planted them is to be perpetually theirs; the white man, with certain specified exceptions, is not to reside among them. These pledges have been given in the utmost sincerity, and the American people cannot but desire that they should be honorably redeemed. Without a strong military force—a force adequate to repress the encroachments of the civilized and more powerful race—how can we hope for their fulfilment? In the history of the Indian tribes from the Atlantic to the Mississippi, and, indeed, in the history of barbarians in every quarter of the globe, when pressed upon by a civilized population, we may read the issue of these pledges, unless we take early and efficient measures for their fulfilment. These measures must be such as will arrest the causes which, in all other cases, have ended in the extinction of the weaker race. The operation of those causes cannot be controlled by parchment guarantees or mere moral considerations; to resist and counteract them a physical force must be employed sufficiently powerful and vigilant to keep them constantly in check. To my view, nothing is clearer than the ultimate failure of the great experiment we have commenced with the emigrated Indians, unless we secure to them, by military protection, the place and the time for the fair trial of that experiment. If we leave them unprotected, they will fade away as other tribes have faded, and the process, as in their cases, will be diversified by the same sanguinary events. The only difference will be, that as the Indians on our western frontiers are concentrated in greater force than has ever before been known in the history of the race, their inroads, if not more frequent, will probably be more terrible and disastrous than any which have yet occurred.

When it is considered that the emigration of the present year includes great numbers recently engaged in open hostilities, and that, besides these, there are probably many others who cherish unfriendly feelings, though never manifested in overt acts, is it unreasonable to suppose that they will seize the first favorable opportunity to gratify the strongest of savage passions, and to re-enact the scenes which have so recently been exhibited in the south? From them, and from the events yet passing before us, we may learn how much of individual suffering and of national calamity may be occasioned by even a small Indian force, organized by stealth, and acting with characteristic quickness and ferocity. If those events shall only teach us to provide, by wise forecast, against the repetition of similar disasters, they will not have been without their use. It is to guard against the recurrence of any such event, as well as to fulfil our plighted faith to the tribes now settled in the west, that I have felt it my duty to enforce at such length the views presented by the commissioner.

VI.—PENSIONS, ETC.

The sums paid to pension agents for disbursements during the current year amount to \$2,699,430 66,	
viz:	
For paying invalid pensioners.....	\$276, 450 00
For paying revolutionary pensioners under the act of March 18, 1818	675, 112 66
For paying pensioners under the act of June 7, 1832, including payments made in 135 cases allowed under the act of July 4, 1836.....	1, 563, 376 00
For paying pensioners under the act of May 15, 1828.....	137, 320 00
For paying claims under the act of July 5, 1832, granting half pay to the officers of the Virginia State troops....	47, 172 00
	2, 699, 430 66

the particulars of which will appear by the report of the Commissioner of Pensions, and the accompanying tables.

Under the act of the 4th of July last, granting half pay to widows and orphans in certain cases, 436 claims have been presented, of which 135 have been admitted, and 22 rejected. The remainder have not yet received official decision. The payments already made under this act have been from the standing appropriation made by the act of June 7, 1832; but it would seem to be more appropriate that they should be specially provided for, and an estimate for that purpose will accordingly be submitted.

It is observed by General Macomb, and also by the Commissioner of Pensions, in their reports, that the existing pension laws do not extend to the widows and orphans of officers and soldiers of the regular army all the benefits now enjoyed by the widows of officers and soldiers in other branches of the service. This arises from the circumstance that the first section of the act of the 4th of July last is expressly confined to the widows and orphans of persons who served as militia or volunteers. I concur in the suggestion that this difference ought to be removed. The third section of this law has been construed to apply to those widows only whose husbands died before its passage. As this construction, though demanded by the words employed, makes a distinction in the operation of the law which may not have been designed, it is perhaps worthy of being submitted to the attention of Congress.

It appears from the accompanying report of the operations of the Bounty Land Office that 876 claims for services rendered in the revolutionary war, and 692 for services rendered during the last war, were presented during the year ending the 30th of September last; and that of the former, 40, and of the latter and similar claims, previously presented and suspended, 128 were allowed.

VII.—FISCAL CONCERNS OF THE DEPARTMENT.

To exhibit at one view a summary of the various fiscal operations of this department during the year 1836, I have caused to be prepared the tabular statement marked A, hereunto annexed, to which I beg leave respectfully to refer.

It appears from that document that on the 1st day of January, 1836, the various sums then under the control of the department, as unexpended balances of former appropriations, or by virtue of the standing appropriations made by the revolutionary pension and claims acts of May 15, 1828, June 7, 1832, and July 5, 1832, and the acts of April 23, 1808, and April 29, 1816, for arming and equipping the militia, amounted in the aggregate to \$5,675,746 12.

The estimates made by this department for the service of 1836, and transmitted to the Secretary of the Treasury, and by him laid before Congress at the commencement of the last session, amounted to \$8,393,282 49, making, when added to the above sum of \$5,675,746 12, an aggregate of \$14,069,028 61, which was all then supposed by the department to be required for the service of 1836, on account of the objects then authorized by law. But in consequence of the military operations which became necessary during the session, the conclusion of the treaty with the Cherokees and other Indian tribes, and the various increased or new expenditures directed by Congress, there was appropriated at the last session, for the service of this department, an aggregate of \$23,242,331 28; being an excess of appropriations over the estimates of \$14,849,048 79, and making, when added to the unexpended balances and standing appropriations above mentioned, the sum of \$28,919,077 49, applicable to the service of 1836, and liable to be drawn out of the treasury during the year, if needed for disbursement—although it was doubtless known, when the appropriations were made, that in many cases only portions thereof would be so needed during the year.

During the first three quarters of the year 1836 there was drawn from the treasury and placed in the hands of disbursing officers the aggregate amount of \$13,514,456 27; the expenditure of which, so far as the accounts have been rendered and settled, will appear by the reports of the several bureaus, and of the accounting officers, hereunto annexed.

It is estimated that the expenditures which will be made during the fourth quarter of 1836 will amount to \$6,807,626 92. In this sum is included all that remained at the end of the third quarter of the different appropriations, amounting to \$5,000,000, made during the last session for the suppression or prevention of Indian hostilities. Indeed, those appropriations have already been expended, or drawn from the treasury and placed in the hands of disbursing officers for expenditure.

Should the expenditures of the fourth quarter of 1836 conform to the preceding estimate, the expenditures of the year will have amounted to \$20,322,083 19, and the unexpended balance which will remain in the treasury on the 31st day of December, 1836, applicable to the service of 1837, will be \$8,595,994 21; but under the standing appropriations for pensions, &c., and for arming the militia above mentioned, there will also be under the control of the department, for the year 1837, so much as may be required for those objects.

The aggregate of the estimates made by this department for the service of the year 1837, and transmitted to the Secretary of the Treasury, to be included in his general estimate to be laid before Congress, is \$10,758,431 33; which, if confirmed by the requisite appropriations, will make, when added to the balance of \$8,595,994 21, estimated to remain in the treasury on the 31st day of December, 1836, an aggregate of \$19,354,425 54 applicable to the service of 1837, besides the amount which may be required from the standing appropriations above mentioned.

The various bureaus and offices of the department to which the sums making the above-mentioned aggregates are respectively referrible, will appear by the table annexed, marked A; and the details of each aggregate, except those of the estimates, will appear in the documents from those bureaus, and from the accounting offices, accompanying this report. The details of the estimates for 1837 are included in the statement transmitted to the Secretary of the Treasury, as above mentioned.

The estimates for the year 1837 include only those objects which are authorized by existing laws. The estimates for the Engineer office, the Topographical bureau, and the Ordnance department embrace, in accordance with the usual course of legislation, various amounts which, when added to the present unexpended balances, will constitute, in the case of each of those bureaus, an aggregate amount much larger, in all probability, than can be actually expended in the year 1837.

On the other hand, the estimates above mentioned include nothing for the suppression of Indian hostilities, nor for new works, nor any other objects not already authorized by law. A further appropriation is immediately needed for the suppression and prevention of Indian hostilities, including the maintenance of the volunteers on the southwestern frontier. The subject does not admit of specific estimates; but there is danger that at least one million of dollars will be required for this purpose.

In concluding, I desire to express my obligations to the experienced and able heads of the several branches of the department for the aid they have given me in the preparation of this report. Having very recently undertaken the temporary care of the department, and many of its affairs being very foreign to my ordinary studies and pursuits, I have had, in this matter as well as in others, constant occasion for their assistance. They cannot be held responsible for all the suggestions contained in this paper, but from me, at least, are justly entitled to this tribute.

I have the honor to be, sir, with high respect, your obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

The PRESIDENT of the United States.

Schedule of the documents accompanying the report of the Secretary of War.

- No. 1. Report and documents of the major general commanding the army.
- No. 2. Letter of the adjutant general, on the subject of increasing the number of officers in the adjutant general's department.
- No. 3. Report of the acting quartermaster general.
- No. 4. Report and statement of the commissary general of subsistence.

- No. 5. Report of the surgeon general *ad interim*.
 No. 6. Report and statement of the paymaster general.
 No. 7. Report and statements of the commissary general of purchases.
 No. 8. Report and documents of the chief engineer.
 No. 9. Report and statements of the chief of the Topographical bureau.
 No. 10. Report and statements of the chief of the Ordnance department.

No. 1.

REPORT OF THE MAJOR GENERAL OF THE ARMY.

HEADQUARTERS OF THE ARMY, *Washington, November, 1836.*

SIR: In compliance with the instructions of the Acting Secretary of War, under date of the 9th September last, I have the honor herewith to submit the following statements and returns:

1. A report showing the organization of the army, marked A.
2. A general return of the army, marked B.
3. Distribution of the troops in the eastern department, marked C.
4. Distribution of the troops in the western department, marked D.
5. Statement showing the number of recruits enlisted in the army from January 1, 1836, marked E.

Since my last annual report, giving an account of the operations of the army, the troops have been variously engaged.

In consequence of the indisposition of the Seminole Indians to comply with the treaty stipulations entered into with the government in regard to their emigrating to the country west of the Mississippi allotted to them, and the hostile attitude taken by some of their principal chiefs, three companies of artillery were ordered, on November 24, 1834, to Tampa Bay; and the company at St. Augustine was at the same time ordered to Fort King, then garrisoned by a company of infantry. The same order placed Brevet Brigadier General Clinch in command of the troops in Florida. On February 14, 1835, five additional companies of artillery were ordered to join the command of General Clinch in Florida; making the whole force in Florida ten companies. On October 22, 1835, General Clinch was authorized to order the two companies of artillery from Forts Wood and Pike, Louisiana, to Florida. These, with the two companies placed at his disposal on October 15, would increase his command to fourteen companies. On December 9, 1835, General Clinch was informed that the governor of Florida had been requested to place at his disposal such militia force as he might require. It appears that on November 30, 1835, the regular force in Florida consisted of eleven companies, amounting to five hundred and thirty-six officers and men, and posted as follows:

St. Augustine.....	One company.
Fort King.....	Six companies.
Fort Brooke.....	Three companies.
Key West.....	One company.

The four companies placed at the disposal of General Clinch in October arrived at Fort Brooke between the 27th of November and 28th of December.

On December 23 a detachment of one hundred and ten men, including officers, took up the march from Tampa Bay for Fort King, to join General Clinch. On the fifth day, on the march, the detachment was attacked by a large body of Indians concealed, and cut off, with the exception of one or two men.

On the 29th of December General Clinch, with six companies of regular troops, amounting to about two hundred men, proceeded from Fort King towards the Withlacoochee, to attack the Seminoles, who were in force on the left bank of that river. In this expedition he was joined by Governor Call, with between four hundred and five hundred volunteers of Florida.

On the 31st of December General Clinch, with the regular troops under his command, crossed the Withlacoochee. He was here attacked by a large body of Indians, and, after a spirited engagement, the Indians were finally defeated, and fled into the hammocks. In this affair it will appear that the regular troops bore the brunt of the action. Out of the two hundred regular troops who crossed the river with General Clinch, fifty-seven were killed or wounded, including four officers. Of the four hundred or five hundred volunteers who had joined General Clinch with a view of aiding in subduing the Indians, only twenty-seven men and three officers took part in the action. Why so many remained out of the action is not explained. Had the same zeal and bravery been displayed by the whole force as was evinced by the regular troops, there is little doubt but that the war would have been terminated with the battle of Withlacoochee.

As soon as information of this affair reached the War Department it was determined, lest the communication with General Clinch might be intercepted, to call on the governor of South Carolina to place at the disposal of General Eustis, commanding officer at Charleston, such a force as he might call for; which was accordingly done; and this officer was directed to proceed with that force, together with the United States troops stationed at Charleston and Savannah, to St. Augustine; thence to open a communication with General Clinch, and co-operate with him.

About this time it was intimated to the War Department that there was reason to apprehend that parties of the Creek Indians might join the Seminoles. In consequence of this intimation, and from the belief that the operations might become more extended, Major General Scott was ordered, on the 21st of January, to proceed to the theatre of hostilities, and there assume the command. He was invested with authority to call on the executives of Florida and the adjoining States for such militia force as he might deem necessary. At the same time six companies of artillery and one hundred dragoon recruits, all from the seaboard, were ordered to Florida. It was estimated that the whole number of regular troops in Florida, and on their way, at that time, amounted to twelve hundred, including officers.

While General Scott was making his preparations for the campaign, General Gaines, who was at Pensacola, hearing of the hostile conduct of the Seminoles, and of the attack made by them on the detachment which marched from Tampa Bay on the 23d of December, immediately proceeded to New Orleans,

and there, with the assistance of the governor of Louisiana and the citizens of that place, raised a corps of volunteers of about 1,000 men, and with the detachment of the regular troops in that vicinity proceeded to Tampa Bay, and thence marched to Fort King, and from Fort King to the Withlacoochee, near to the battle ground of General Clinch, where he encountered the Indians. Finding his provisions and ammunition nearly consumed, he formed a camp, protected by fallen timber, and sent a despatch to General Clinch, at Fort Drane, for supplies. In this situation he was relieved by the arrival of General Clinch with provisions, when the whole force moved to Fort Drane; when General Gaines, in consequence of previous orders received by him to repair to the frontier of Louisiana, turned his command over to General Clinch, and left Florida. About this time General Scott reached Fort Drane, for the purpose of prosecuting the war according to his plan of operations.

With a considerable force of regular troops and volunteers he marched into the Indian country in three divisions: one conducted by General Clinch, from Fort Drane; one by General Eustis, from Volusia; and another by Colonel Lindsey, from Tampa Bay, concentrating on a point near the Withlacoochee, where the Indians were believed to be embodied. After a fruitless search for the enemy, the three divisions finally concentrated at Tampa Bay, where, finding the term of service of the volunteers had nearly expired, and the season near at hand when, in the opinion of General Scott, it would, on account of the insalubrity of the climate, be unsafe longer to keep the field, he determined to return with his troops through the country bordering on the Withlacoochee, still with a hope of finding the Indians, and bringing them to battle. But again failing to do so, General Scott ordered the volunteers to be discharged, and distributed the regulars in positions proper to cover the frontier, and, at the same time, to give repose to them after the fatigues and sufferings of long and painful marches. General Scott returned to St. Augustine, and there learning that hostilities had broken out among the Creek Indians in Georgia and Alabama, left Florida about the 21st of May, and repaired, according to orders previously received by him from the War Department, to Columbus, in Georgia. Not knowing whether General Scott, in consequence of his ill health, as reported by him, would be able to take the direction of affairs in the Creek country, Brevet Major General Jesup was, in the month of May, invested with the command, and charged with the removal of the Creeks to the lands allotted them beyond the Mississippi. In order to enable him to carry into effect his instructions, authority was given him to call out a suitable volunteer force from the adjoining States and Territory. All the remaining troops on the sea-coast, including the marine corps, were placed at his disposal; making a force, in regular troops, of about 1,500 men, and of volunteers 9,000. Generals Scott and Jesup met at Columbus, and there concerted and arranged the plan of operations. It being determined by the Executive to leave the direction of the Creek affairs in the hands of General Jesup, General Scott was, on the 28th of June last, recalled, when he resumed the command of the eastern department. General Jesup, having a competent force, caused the hostile Creeks to submit; and having fulfilled the object of his appointment, he discharged all the volunteers, except the Tennessee brigade, amounting to about 1,500 mounted men, and the regular troops, which he retained for prosecuting the war against the Seminoles, under Governor Call, of Florida, who had been invested with the command of the troops in Florida, and charged with the conduct of the war in that quarter.

Whilst preparations were making for entering Florida with additional troops, several handsome affairs took place between the regulars and the Indians, in all of which the regular force was successful against superior numbers, especially at Micanopy and Fort Drane.

General Jesup was directed to assume the command in Florida as soon as he could accomplish his arrangements for sending off the Creeks to the westward; but his instructions, by some accident, did not reach him. He, however, met Governor Call at Tallahassee in the month of September, when the governor offered to resign to him the command; but as the governor had made his arrangements for the campaign, General Jesup declined taking the command, but entered into the views of Governor Call, and consented to act with a body of troops in aid thereof.

On the 19th day of September Governor Call, with the Tennessee mounted volunteers and about 140 Florida militia, marched to Suwanee old town with ten days' rations. He was met at Fort Drane by Brevet Lieutenant Colonel Pierce, of the regular army, with a supply of provisions for about seven days more, and 160 men of the regular army, who had been stationed at Gary's Ferry. On the receipt of this supply Governor Call made a forward movement to the Withlacoochee, when his advance parties skirmished with the Indians; but owing to the rise of the waters of that river, it having overflowed its banks, the troops were unable to ford it.

Governor Call, finding his supplies of provisions short, and having no depots established in the country, was obliged to retire upon Fort Drane with his whole force. The regular troops and the friendly Indians under Captain Lane, who afterwards joined him, he retained in that position, and sent the Tennessee brigade to Gary's Ferry until he could establish his depots of provisions more in advance, and resume offensive operations.

While Governor Call was on his march to the Withlacoochee, General Jesup was using his endeavors to send the regular troops, marines, and the regiment of friendly Creeks above mentioned to Tampa Bay; but owing to the fall of the water in the Apalachicola, the transports could not navigate that river without great difficulty and a considerable loss of time. The friendly Indians under Captain Lane, however, with a small detachment of regular troops, reached Tampa about the 5th of October, and proceeded towards the main body under Governor Call, and having passed through the Seminole country, joined that officer at Fort Drane. General Jesup had been, in the meantime, to Tampa, but finding there but few supplies and no means of transport, returned to St. Mark's, and ordered from New Orleans the necessary supplies and equipage, and by our last advices is using his endeavors to get on the remaining troops, consisting of the marine corps and detachments of the regular army.

The troops on the northwestern frontier have been in motion from the Mississippi to the lakes, within the Wisconsin Territory, with a view of producing some effect on the Winnebago and other tribes of Indians in that quarter, said to be disposed to be mischievous, but have resumed their respective stations. These movements had the desired effect.

In the month of January Major General Gaines was ordered to the western frontier of Louisiana to assume the personal command of all the troops of the United States employed in any part of the region adjoining the Mexican boundary; and in February the 6th regiment of infantry was ordered from Jefferson Barracks to Fort Jesup, a post within 25 miles of the Sabine, with a view of protecting the frontier from the incursions of the Indians, and, at the same time, to keep peace among the Indian tribes themselves which inhabit the adjoining country. Instructions were also given to General Gaines to fulfil the treaty stipulations entered into between Mexico and the United States, in reference to the Indians on the western

frontier, whether belonging to the territory of the United States or Mexico, and especially to maintain a strict neutrality in regard to the contending parties in Texas.

From information received by General Gaines that the Indians meditated hostilities, he conceived it his duty to call on the executives of Louisiana, Mississippi, Tennessee, and Alabama, for a force consisting of three brigades and one battalion, to aid him in maintaining peace on the frontiers, and repelling any attack from the Indians. Shortly after, finding that he had been deceived in reference to the intentions of the Indians, he recalled his requisition for militia on the States above mentioned before they could be embodied.

At a subsequent period General Gaines, becoming convinced that the necessity for a militia force on the frontiers did actually exist, repeated his requisition for militia, which proceeding being disapproved by the President, they did not march to the frontiers. The general, however, as a precautionary measure, ordered the squadron of United States dragoons, and six companies of the 7th regiment of infantry, stationed at Fort Gibson, to march to Fort Towson, on the Red river, where they arrived about the 17th of May, and finally pushed these corps in advance as far as Nacogdoches, where they still were at the last reports from that place, dated in September. A camp was also formed on the left bank of the Sabine.

From the reports received from the commanding officer at Nacogdoches, he is of opinion that there is no necessity for the continuance of the force at that place; and from the views taken of the state of affairs on the Mexican frontier by the general officer who has succeeded General Gaines in the immediate command in that quarter, and the instructions he has received, the belief is entertained that by this time the United States troops at Nacogdoches have been withdrawn, and returned to their respective stations within our border.

By instructions from the War Department, Brevet Brigadier General Wool was directed to proceed to the Cherokee country with a view of settling the difficulties and allaying the excitements which prevailed among different parties of that tribe, lest they should eventually lead to open rupture. A competent force of volunteers was placed at the disposal of General Wool to check any irregularities and to maintain order. General Wool is still on that duty, but with a very limited force, having brought matters to such a state as not to require more at present.

Early in the season Inspector General Wool made a tour along the coast, and inspected the troops and arsenals, and reported favorably of their condition; but having been ordered to the Cherokee country, to take charge of affairs there, as well as the command of a portion of the volunteers called into the service of the United States, his inspections have, in consequence, been limited. Inspector General Croghan is now on a tour of inspection up the Mississippi and along the western frontier; no report has as yet been received from him.

I felt it my duty to report to the War Department the insufficiency of the present military establishment for the purpose of protecting the frontiers and garrisoning the forts on the sea-coast, and of performing the many and arduous duties required of the troops. It was proposed at the last session of Congress to increase the army by augmenting the rank and file, so as to make the whole number ten thousand men, and at the instance of the Secretary of War I submitted a project for that purpose, dated March 7, 1836, which was communicated to Congress by him on the following day, and to which I beg leave to refer.

The regiments of artillery and infantry have, since the late war with Great Britain, been placed on the lowest possible establishment, as to rank and file, consistent with a regard to the preservation of military knowledge and discipline among them; but for operations in the face of an enemy, the rank and file were reduced too low for any efficient service, a company of artillery having, when full, only forty-eight rank and file, and that of the infantry forty-six. Taking into consideration the short period of enlistment, which is now three years, the fatigue and exposure of the troops when in the field, (which is, for the most part, in wilderness countries, where there are to be had no other comforts than those they carry with them,) the diseases to which they are subjected by constant exposure, especially in insalubrious countries, without reckoning the casualties of war, it is not to be expected that any company will be able, one month after taking the field, to present under arms more than two-thirds of its original number; for, independently of the casualties just alluded to, the soldiers of the regular army are obliged to become the drivers of the trains of artillery, of provisions, and of other supplies, as well as the laborers on all occasions where labor for the service is required, as no troops for these special duties are provided by law in the American army, as are in other services; and experience has proved, wherever militia and volunteers have been called into the service, that these duties have devolved on the regular troops. I would then recommend, in order to render the army efficient and capable of performing the duties required of it, as well as on the score of economy, that every company of artillery or infantry be augmented to one hundred rank and file, so that there may always be, in each regiment, for duty with arms, a respectable force.

I would also respectfully submit to your consideration the propriety of increasing the number of officers in the engineer department, including the topographical engineers, in the ordnance department, and the quartermaster's department. The duties required of these several staff departments have been so extensive and multifarious that they have not been able to perform them without the aid of a great number of officers from the line of the army, and, consequently, it has measurably diminished the efficiency of the regiments from which these officers have been withdrawn. It would be better, in my opinion, to provide at once a sufficient number of officers for the several branches of the service, and to organize them into distinct corps or departments, so that, being constantly employed on one duty, they will be better acquainted with that duty, and more competent to perform it. The chiefs of the several branches of the staff will, in their reports, indicate what is required to render their respective branches of the service most efficient.

In closing this report, I beg leave to draw your attention to the fact that there is no provision made by law for the widows and orphans of the officers of the regular army who may die in consequence of wounds or diseases contracted by exposure in the service, while there is a provision of that nature for all other descriptions of troops, whether militia, rangers, sea fencibles, or volunteers, as will appear by the act of the 4th July, 1836. There are the widows and orphans of several meritorious officers and soldiers to whom the extension of the provisions of that law would be a great relief, and I trust that you will see the justice of urging on Congress the application of that law to the members of the regular army.

I have the honor to be, sir, very respectfully, your most obedient servant,

ALEXANDER MACOMB, *Major General, Commanding-in-chief.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

REMARKS.

- The posts with this mark (*) prefixed have been evacuated, the troops having been ordered to the south, and are now serving in Florida and the Creek nation.
- Of the regular force serving in Florida, consisting of artillery, infantry, marines, and one company of dragoons, one field officer, Lieutenant Colonel Crane, four assistant surgeons, and two companies of artillery, in the aggregate 106, and 100 sick belonging to the regiments in the field, were, on the 31st of October, reported on the Fort Marion return, St. Augustine.
- By the last reports and returns (dated November 1 and 6) received from Fort Brooke, Tampa Bay, it appears that there were present at that post, one field officer, Major Churchill, and ten companies of *artillery*; three field officers, Colonel Henderson, Brevet Lieutenant Colonels Miller and Freeman, and six companies of *marines*, and two companies of *infantry*; six surgeons and assistants, 120 Alabama *volunteers*; and another detachment of about 180 Alabama *volunteers* was expected to arrive on the 12th of November. The residue of regular troops and volunteers are operating in the interior of Florida.
- Many of the company officers reported absent by their respective commanders are serving elsewhere in Florida, on duty connected with the service in that quarter. The number on the sick list, as reported on the 31st of October, is about 388.
- The *estimated* volunteer force serving in Florida (returns of the same not having been received) is as follows:

Tennessee volunteers, about	1,200
Alabama volunteers, about	300
Florida volunteers, about	250
Washington city volunteers, about	59
	1,809

6. Seven hundred and thirty Creek Indians have been mustered into service and accepted as volunteers.

HEADQUARTERS OF THE ARMY, Washington, November 30, 1836.

REMARKS.—1st. The posts with this mark (*) prefixed have been evacuated, and the troops ordered to Florida, where they are now serving; those with this mark (†) have been abandoned. 2d. The occupancy of the post at Nacogdoches being temporary, there is reason to believe that by this time the United States troops have been withdrawn, and returned to their respective stations. 3d. Seven companies of Arkansas mounted volunteers have been recently mustered into service, and according to the last returns 464 were present at Fort Towson, and 133 at Fort Gibson. 4th. On November 1 there were five companies of Tennessee volunteers, aggregate 361, serving in the Cherokee country, Tennessee, under Brevet Brigadier General Wool. 5th. In October, one company of Alabama volunteers, 58 strong, were at Irwinton, Alabama. 6th. For the Fort Brooke garrison, see table C, (eastern department) part 3, of the remarks. The line dividing the two departments, being an imaginary one, cannot be regarded during military operations in Florida. HEADQUARTERS OF THE ARMY, Washington, November 30, 1836. ALEX. MACOMB, Major General, Commanding-in-chief. ADJUTANT GENERAL'S OFFICE, Washington, November 30, 1836. R. JONES, Adjutant General of the Army.

Balance in the hands of recruiting officers on the 30th of September, 1836.....

Respectfully submitted.

R. JONES, *Adjutant General.*

Major General ALEXANDER MACOMB, *Commander-in-chief United States Army.*

No. 2.

LETTER OF THE ADJUTANT GENERAL.

ADJUTANT GENERAL'S OFFICE, *Washington, November 26, 1836.*

SIR: The importance of the subject, I trust, will justify me in respectfully requesting your attention to the correspondence of your predecessor, Mr. Cass, with Mr. Preston and Mr. Goldsborough, of the Senate, and members of the Committee on Military Affairs, relative to the proposed augmentation of the general staff, when the new bill for increasing the army was under revision in June last. The correspondence referred to, and the incipient measures then taken by the Secretary of War, will be found on the records of the War Office. As the time and occasion for a recurrence to this subject appear to be proper, it may be also useful now briefly to advert to former organizations of the general staff of the army, since a retrospect to the well-adjusted systems under obsolete laws may serve to show the importance of the adjutant general's department of the staff at former periods of the service, and now aid in forming a more just estimate of its usefulness and relative value.

After various modifications of the general staff, pending the declaration of and during the late war with Great Britain, the act of March 3, 1813, provided for one adjutant and inspector general of the army, with the rank of brigadier general, and eight adjutants general of division, each with the rank of

colonel of cavalry. The duties of a division adjutant general were limited to the particular division in which he served, while those of the adjutant and inspector general extended to the entire army, being then, as the adjutant general now is, stationed in the War Office, and then an indispensable functionary of that department of the executive government. The inspector's department consisted of eight inspectors general, each with the rank of colonel of infantry, and sixteen assistants, with the rank of major.—(See *organization No. 1 of the table.*)

At the close of the war, in 1815, nearly the entire staff of the army was abolished. But such were the requirements of the public service that President Madison provisionally retained such branches of the staff as were deemed to be indispensably necessary for the service. Of this provisional staff so retained were the adjutant and inspector general of the army, and two adjutants general of *division*, each of whom was assigned to one moiety of the army for duty with the troops under the orders of the respective commanding generals, while the principal staff officer, with the rank of brigadier, continued to discharge his important functions in the War Office. The act of April 24, 1816, confirmed the provisional arrangement of the President, and the staff retained in virtue of his authority was now incorporated in the permanent peace establishment.—(See *organization No. 2 of the table.*) This organization of the staff, under the confirmatory act of 1816, was still less perfect than it should have been; and, among other improvements, as seen by the act of April 14, 1818, it was further completed by the addition of another important officer—that of quartermaster general of the army, with the rank of brigadier; and, like the adjutant and inspector general of the army, he was also assigned to duty in the War Office.—(See *organization No. 3 of the table.*)

This efficient and harmonious system, which the experience of the war with Great Britain and six years' subsequent peace had tested and matured, continued in successful operation until the reduction of the army in 1821, when the whole structure was greatly disturbed and impaired. The department of orders and of military correspondence, of inspection, instruction, &c., was reduced, dismembered, and nearly broken up. The incumbents were disbanded—namely, the adjutant and inspector general of the army, the two adjutants general of division and their four assistants; and, in lieu of these, one adjutant general was retained, on whom devolved all the duties of the central office of orders and military correspondence in the War Department, with the reduced rank of colonel; being the precise grade of the staff officer which had been deemed formerly to be *no more than requisite* for a single division of the army.* The only staff officers of the adjutant and inspector general's department retained for habitual duties with the troops in the field or in garrison were the division inspector generals, whose services generally alternate between the eastern and western departments—a geographical arrangement analogous to the previous north and south divisions of the army. The four assistant inspectors were also disbanded under the act.

It cannot be doubted that the public service has suffered and continues to suffer for want of an adequate staff for service in the field and habitual duty *with the troops*. This has been demonstrated in our recent military operations; and the lamentable deficiency, both in number and of the *proper description*, of staff officers at every point where troops, whether regular or militia, have been concentrated or been put in motion is too palpable, and ought not to be doubted by any whose duty it may be to know the wants and understand the true condition of the army. The military operations under Generals Gaines, Scott, Jesup, Clinch, Eustis, &c., and various official reports, show the destitute state of the service as to the inadequacy of the adjutant general's, inspector's, and quartermaster's departments of the staff in the field. Like the diseases of the human body, which baffle the skill of the ablest physician when concealed by the timid patient, so, if the wants of the army be kept out of view, or remedial measures be untried, then the evils so long felt and now much complained of by officers of experience and known devotion to the public weal can never be cured. In order, therefore, to illustrate this subject, and with a view to spread some facts before you, I beg leave to make the following extracts from my communication to the Secretary of War, dated June 26, 1836:

"While at St. Augustine, in command of the army in Florida, Major General Scott was without a single officer for duty in his personal staff; no one to act as adjutant general, or even perform the duties of aide-de-camp. And, more recently, on changing the scene of his operations to the Creek nation, that general has been compelled, from the necessity of the case, to seize upon that excellent officer, *Paymaster Edmund Kirby*, (who is always ready, and ever amongst the first for active service with the troops,) and assign him to the performance of duty in almost every branch of the staff. He is, at the same time, his adjutant general, inspector general, his aide-de-camp, and has performed duty as quartermaster and commissary; has mustered in and out of service, and paid the militia; all this when the execution of his appropriate duties, assigned him by the paymaster general, required his presence elsewhere."†

"In another point of the frontier, (the southwest,) Major General Gaines, in his communication to the Secretary of War, dated Camp Sabine, 20th of April, writes: 'At this moment I know not an officer or soldier sufficiently acquainted with the *topography* of this whole line of frontier to be able to conduct a single day's movement upon it without the risk of suffering severely from an enemy better acquainted with the country.' The same distinguished general, in another communication to the Secretary of War, dated the 10th of May, states: 'I avail myself of the occasion to request that legal provision may be recommended by the President which will enable me to have an *assistant adjutant general* and an *assistant inspector general permanently attached to my staff*, by which means I should have in the appropriate way the services of my aide-de-camp, and be thereby relieved of much of the sedentary labor of copying, and of many other duties such as usually, in all respectable armies, devolve upon aides-de-camp, but which have long occupied much of my time.'"

In his communication to the adjutant general of the 17th of October, 1835, being then in command of all the troops serving in Florida, Brevet Brigadier General Clinch states that: "It is now nearly twelve months since I was placed in command of the troops in Florida, during which time I have had no staff—even a private with me whose services I could claim, except as a matter of courtesy. A colonel commanding a regiment has his regimental staff to aid him in the discharge of his duties. I, however, whilst assigned by the general-in-chief to an *arduous and important* command, have not even a confidential private to copy my letters and orders."

And in his letter of the 16th of May, from St. Augustine, Brevet Brigadier General Eustis writes that: "Major General Scott, being still indisposed and having no staff officer with him, has directed me

* For superadded duties, see adjutant general's report made to the Secretary of War, dated April, 1836.

† About this time (the month of June) the aggregate force under the orders of General Scott, in Georgia and Alabama, exceeded 10,000.

to address this to you." The like destitution of the service is seen at other points; and the consequences are now injuriously felt by Brevet Brigadier General Arbuckle, on whom has devolved the highly responsible command of the southwestern army, and the general direction of affairs on the frontiers of Louisiana and Arkansas. And that officer has neither assistant adjutant general nor inspector. Even an aide-de-camp, it is said, is not allowed him by law.

To the testimony of the experienced officers above mentioned I must now add that of my own, relative to the central office of the adjutant general of the army, pertaining to the War Office, and as established at the seat of government. And I deem it useful to remark that, for want of the proper denomination of officers of the adjutant and inspector general's department in the field—officers who, from habit and experience, are conversant and familiar with the practical duties of this branch of service—no monthly return of all the forces serving in the Creek nation or in Florida has been received from any commanding general of either army; and the War Office is now destitute of these important returns, which are not only now necessary for present use, but are also required for the archives of the department.

To supply these obvious wants of the service in the department of orders and military correspondence; to insure better accountability with reference to the *personnel* of the army and of the militia when in the service of the United States; the rendition of exact returns and reports enjoined by the Articles of War and General Regulations, and of musters and inspections of troops, militia as well as regulars, I respectfully submit for your consideration the expediency of requesting legal provision for the appointment of eight assistant adjutants general, four of whom to be of the *brevet* rank of major, and four of the *brevet* rank of captain of cavalry, each with the pay and emoluments of their respective cavalry grades; provided, that they shall also perform the duties of assistant inspectors general when the exigencies of the service may require.

Even in a state of peace and perfect tranquillity at every point of our widely-extended western frontier, yet ever liable as these are to be disturbed, the public interest now, and at all times, requires the habitual services of not less than five or six of the class of staff officers herein proposed to be provided for. Of this class, two should always be on duty with the commanding general of the western department; one, but preferably two, should serve under the orders of the general commanding the eastern department; and the presence of one, if not two, with the officer, of whatever rank he may be, charged with the immediate command and conduct of affairs on the southwestern frontiers, is indispensable necessary. To insure *exact uniformity and regularity of official action* in the central office of orders, military correspondence, and of the initiatory duties relative to "military commissions" in the War Department, it is also necessary that one assistant adjutant general, but *preferably two*, should be assigned to duty there, in lieu of the two officers, which the necessities of the case, now and for several years past, require to be taken from their regiments for duty as acting assistants to the adjutant general of the army.

As the number of officers of the line is fully adequate, in my humble opinion, to furnish the officers necessary to fill appointments in the staff which may be clothed with *rank* in the army, I respectfully recommend that the provisions of the 4th section of the "Act for the better organization of the general staff of the army," approved March 3, 1813, be made applicable by law to the assistant adjutants general, should authority for their appointment be granted by Congress.* A recurrence to this salutary practice, adopted in time of war, and continued until very recently, will not only best subserve the *public* interest in every military point of view whatever, but, widening the field by guaranteeing promotion in the line, would thereby enable the Executive to make the best selections for all subordinate staff appointments. For, it should not be doubted, if subordinate appointments in the staff be only granted at the price of the regimental commission, the *most competent*, active, and aspiring young officer, who regards the army as his profession, and who looks forward to the chances of better advancement and higher rank in the line than can be opened to him by any staff organization, would reject, unhesitatingly, the boon at such a sacrifice. This is no fiction, for the records show that the case has occurred. Again, if economy is to be at all regarded, (and it may, perhaps, be the least considered in any question of the public good,) the additional annual expense of the assistant adjutants general, if taken from the line, would only be \$7,524, being the difference of pay between the grades of the line and the staff, supposing the eight staff officers herein proposed to be taken equally from the captains and subalterns. If these eight staff appointments be not based upon commissions in the line, then the requisite annual appropriation would be \$15,100.

In affirming that the number of officers of the line is adequate to the supply of staff appointments which may confer rank in the army, the opinion should be qualified with the proviso that the employment of the officers of the line away from their regiments and companies should be restricted to the military staff of the army proper; and that the practice of assigning them to any description of business not congenial to the spirit and character of military duty proper be discontinued. I may here appropriately remark, that, to the *long separation*† of so many officers from the troops, and their consequent estrangement from all military duty by reason of their more civil vocations, which gradually, but surely, allure them to other pursuits in the reasonable hope of better fortune than can await them in the army, should they return to it, may probably be ascribed one of the causes of many of the resignations tendered during the present year. Of the number of officers absent in the interior, whose civil pursuits have been interrupted, had they joined their regiments on the frontiers when required to do so by recent orders, many resignations were tendered almost immediately on receiving the order, and others were forwarded almost immediately after complying with its first mandate.

The right of an officer to quit the army under ordinary circumstances, with a view to the improvement of his fortune and prospects in life, may not be doubted. But the *policy* of our system, (now beginning to be corrected by "General Order" 69 of October 15,) which separates him *for years* from the line of his profession, and employs him on business which teaches him so to rate the value of his commission as often to throw it up when remanded to his regiment under any requirement of the public service, must be admitted to be greatly at variance with the true interest and primary object for which it is presumed that the army was created and destined to subserve. And if this system of indiscriminate and onerous detail of so many officers for business which estranges them from the line of their professional duties be continued, the army certainly must become less and less efficient for active field service at any crisis which may arise. In respectfully adding incidentally these remarks,

* Vide Table A, and "Remarks."

† There are instances of officers being separated from their companies for ten, twelve, and even fifteen years. And there are also instances of officers holding commissions in the army for several years, who resigned without ever having joined, or performed any military duty with the army.

I speak as one who looks only to the *efficiency* of the *army*, with a view to the fulfilment in the best manner of all the high duties which it may be supposed to owe to the republic—as an institution, for whose military service it was created, and by which its members have been educated with a view to the national defence.

I respectfully submit herewith table A, which may be useful for general reference, as it comprises a relative view of the three branches of the general staff at the several periods of our military history therein specified, to wit: 1st, during the late war, or according to the act of March 3, 1813; 2d, after the first years of peace, as provided by the act of April 24, 1816; 3d, as altered and increased by the act of April 24, 1818; 4th, as reduced and dismembered by the act of March 2, 1821; and 5th, as provided for by existing laws.

My remarks relative to the proposed increased staff, it will be seen, are, for proper reasons, restricted to the adjutant general's department, as the wants in other branches have doubtless been communicated by the respective chiefs, who best understand the description and measure of all necessary augmentation.

I am, sir, with great respect, your obedient servant,

R. JONES, *Adjutant General of the Army.*

Hon. B. F. BUTLER, *Secretary of War.*

A.

Tabular statement of the number and rank of the commissioned officers of the adjutant general's, inspector's, and quartermaster's departments of the staff of the army, having military rank, at the several periods of the service designated by the acts authorizing the several organizations.

Period of organization and date of the act.	Adjutant general's department.				Inspector general's department.			Quartermaster general's department.					
	Adjutant and inspector general, with the rank of brigadier general.	Adjutants general, with the brevet rank of colonel of cavalry.	Assistant adjutants general, with the brevet rank of major of cavalry.	Total.	Inspectors general, with the brevet rank of colonel of infantry.	Assistant inspectors general, with the brevet rank of major of cavalry.	Total.	Quartermaster general, with the rank of brigadier general.	Quartermaster general, with the brevet rank of colonel of infantry.	Deputy quartermaster general, with the brevet rank of major of cavalry.	Quartermasters, with the rank of major.	Assistant deputy quartermaster general, with the brevet rank of captain of infantry.	Total.
(No. 1.) March 3, 1813	1	8	16	25	8	16	24	8	8	33	43
(No. 2.) April 24, 1816	1	2	4	7	2	4	6	2	2	4	8
(No. 3.) April 14, 1818	1	2	4	7	2	4	6	1	2	16	19
(No. 4.) March 2, 1821	1	1	2	2	1	2	3
Provided by existing laws	1	1	2	2	1	4	5

REMARKS.—1. All the officers of the adjutant and inspectors general's departments during the war and after the peace, inclusive of March 2, 1821, when the peace establishment was reduced, held rank in the army (except the adjutant and inspector general of the army) in virtue of commissions *by brevet*. 2. According to the provisions of the act of March 3, 1813, the quartermaster general attached to the principal army held the *brevet* rank, &c., of brigadier general. 3. Of the sixteen colonels of the staff, of whom *eight* were *adjutants* general, and *eight* *inspectors* general of division, all except *three* were taken from, and held rank in, the line of the army, contemporaneously with their commissions and *brevet* rank in the staff, according to the provision of the 4th section of the "Act for the better organization of the general staff of the army," approved March 3, 1813." And the thirty-two *assistant adjutants* and *assistant inspectors general* having the brevet rank of major, were required by the act to retain their regimental commissions.

NOVEMBER 26, 1836.

R. JONES, *Adjutant General.*

No. 3.

REPORT OF THE ACTING QUARTERMASTER GENERAL.

QUARTERMASTER GENERAL'S OFFICE, *Washington, November 22, 1836.*

Sir: In compliance with your order, I have the honor to submit a report of the operations of the quartermaster's department during the first, second, and third quarters of the present year; and, as heretofore, to make it more complete, the fourth quarter of the last year is included.

By the last annual report, which embraced, in part, the operations of the third quarter of the year 1835, the balance remaining in the hands of disbursing officers, for which accounts had not then been rendered, was \$162, 126 16.

To which is to be added:

1st. Remittances, viz:

In the 4th quarter of 1835	\$220, 729 58
In the 1st quarter of 1836	574, 296 02
In the 2d quarter of 1836	804, 375 62
In the 3d quarter of 1836	1, 452, 626 50
	\$3, 052, 027 72

2d. The proceeds of the sales of public property become unfit for service, or no longer required for public use, and rents received for public grounds and buildings not required for military purposes

19, 778 49

Making the total to be accounted for

3, 071, 806 21

	Brought forward.....	\$3, 071, 806 21
Of which the following sums have been accounted for:		
1st. By expenditures, viz:		
In the 1st, 2d, and 3d quarters of 1835, the accounts for which were received after the date of the last annual report.....		\$28, 650 90
In the 4th quarter of 1835.....		202, 141 26
In the 1st quarter of 1836.....		446, 694 77
In the 2d quarter of 1836.....		619, 615 09
In the 3d quarter of 1836, so far as the accounts have been received.....		692, 766 18
		\$1, 989, 868 20
2d. By payments into the treasury, and warrants rendered unavailable by the casualties of the service, returned and cancelled.....		80, 399 30
Making the total accounted for during the fiscal year.....		\$2, 070, 267 50
And leaving a balance in the hands of disbursing officers, to be hereafter accounted for, of.		1, 001, 538 71

The outstanding balance is unusually large; but it will be observed that the fiscal operations of the year have exceeded three millions of dollars. It results, in part, from the heavy remittances which were necessarily made towards the close of the third quarter, the employment of irregular agents, and the difficulty of rendering accounts promptly during active operations.

In consequence of the want of officers for active service in the field, most of the public works under the direction of the department at the date of the last report have been necessarily suspended during the present year. But little progress has therefore been made with them; nor can they be resumed or prosecuted to advantage under existing circumstances, with the present limited number of officers at the disposal of the department.

It became necessary, early in the season, when operations had just been commenced, to withdraw from the Delaware breakwater the officers charged with superintending the construction of that important work, and no alternative presented but to seek relief from it altogether. It was accordingly, with the sanction of your predecessor, transferred to the engineer department.

The total amount of the various appropriations which had been made for that object, prior to its transfer in June last, is..... \$1, 530, 000 00

Of which there was expended by the Navy Department, while the work was under its direction.....	\$10, 804 36
And by the quartermaster's department.....	1, 454, 813 61

Making the total expended.....	1, 465, 617 97
--------------------------------	----------------

And leaving a balance, subject to the disposal of the engineer department, of.....	64, 383 03
--	------------

The operations on the various roads in Arkansas were suspended in the month of August, the services of the officer charged with their superintendence being required at one of the military stations, in consequence of the collection of troops on the Sabine frontier. Considerable progress, however, had been made with these works prior to their suspension, and it is believed that the balances of the appropriations applicable to them had been nearly expended before the operations ceased. I have not deemed it my duty to estimate for any further appropriations for those roads. They are chiefly in the interior, connecting places of but little importance, and having no relation to military operations, may now, with propriety, it is thought, be committed to the superintending authority of the State.

A detachment of sixty men, detailed from the army, was placed at work in February last on the road leading from Fort Towson to the northern boundary line of Louisiana. The party was withdrawn in June, in consequence of the approach of the sickly season in that country; but it has passed over eighty-five miles of the road, making the necessary repairs and rebuilding the bridges over the principal streams. The work was probably resumed early in the present month, and will be prosecuted through the season as rapidly as circumstances will permit.

The road from Fort Howard, at Green Bay, to Fort Crawford, at Prairie du Chien, in the Wisconsin Territory, has been in progress by the labor of the troops during the present season, and has probably been completed by this time, as well as the limited appropriation made for that object would authorize. This road, passing, as it does, by Fort Winnebago, and thus connecting three of our military posts, is deemed of high importance in its relation to the defence of that frontier; and a further appropriation is recommended to give it a more perfect finish and to keep it in repair.

Appropriations were made at the last session of Congress for continuing the improvement of several rivers in Florida, and there were unexpended balances remaining of former appropriations for various roads there. The active military operations which have been carried on in that Territory during the whole season have necessarily suspended such of those works as were in progress, and prevented any measures being taken to commence others. Nothing can be done towards those objects until hostilities shall have ceased there, and quiet be restored to the country.

The various appropriations made for other special objects coming under the authority of the department have been put in a course of application, with the following exceptions, namely: that for the removal of the troops from Fort Gibson, that for barracks at Fort Jesup, and that for a wharf at Fort Wolcott, at Newport, Rhode Island. In reference to the first object, the department awaits the action of higher authority in selecting the new position which is to be occupied before the arrangements connected with the building operations can be made. The second has been suspended upon the suggestion that Fort Jesup, being twenty-five miles from the Sabine, is too remote from the frontier, and that a more advanced position would probably be occupied. As the appropriation is specifically for Fort Jesup, legal provision will be necessary to authorize its expenditure elsewhere; and as accommodations are much wanted for the troops on that frontier, I submit the expediency of obtaining authority to apply the appropriation to the erection of barracks and quarters at such place in the vicinity of Fort Jesup as it may be deemed

proper to occupy. The wharf at Fort Wolcott has been postponed for want of an officer to attend to its construction.

Charged, as I am, but temporarily with the direction of the quartermaster's department, I feel restrained from making many suggestions in relation to it, which would come with more propriety from its chief, now absent on a high and important command; but there are some that I cannot omit consistently with a faithful discharge of the trust confided to me. The necessity for an improved organization of the department is one of them. This has been represented heretofore to your predecessor, and was by him brought before Congress at the last session. It is now my duty to repeat the suggestion, and to urge it with earnestness.

There is perhaps no country, considering the relative force, where the duties of the quartermaster's department are so arduous as they are in our own—especially in conducting our Indian wars. It necessarily results from difference of circumstances. In highly-improved and thickly-settled countries, where the facilities of transportation are great and the means of supply abundant, there cannot be much difficulty in moving and supporting armies; and even in our own country, on the Atlantic border and on the great lines of communication in the west, where those advantages exist, the difficulty is comparatively small. But these are not the scenes of our Indian wars. They lie beyond the frontier, in the swamps and fastnesses of the wilderness, far removed from the sources of supply, and the heavy task of moving and sustaining our armies, under these circumstances, belongs to the quartermaster's department.

Experience had shown that the present organization, both as to number and grades, was barely sufficient to meet the demands of the service ten years ago, when the army was measurably inactive. It is altogether inadequate now to a proper discharge of the heavy and important duties which devolve upon the department, under present circumstances, when not merely the regular army but large masses of volunteers and militia are called into active service. During the present year there have been four separate armies in the field, mustering from two to ten thousand men each, and operating under circumstances involving great difficulties in regard to transportation and supplies; and considering our extensive and complicated Indian relations, a similar state of things will, in all probability, too often recur. If it be supposed that the present organization of the department, whose executive officers consist of but four majors, six captains, and fourteen lieutenants, drawn from the line, is equal to such an emergency, it is undoubtedly an error.

Prior to the year 1818 there were division quartermaster generals with the rank of colonel, who were executive officers, and attended the army in the field when occasions required. In my humble judgment, there has not been a period since the war of 1812 when the necessity for such officers was half so urgent as it is at the present time. There is now no executive officer whose rank is sufficient to give him precedence in his own department in a campaign; and the case has twice occurred recently where the quartermaster general of a Territory, by virtue of his superior rank as colonel, became entitled to the chief direction of the operations of that department of the staff by whose agency the army was to be moved and supported—a duty second only in importance to the chief command. I submit whether it is right that the advantages of twenty years' experience in the details of the department should thus be measurably lost to the service for want of adequate rank to render it available.

By an act of the last session of Congress ten thousand volunteers were authorized to be received into service, and the duty of moving and supplying these also devolves upon the quartermaster's department. It must be obvious that in proportion as an irregular and temporary force is substituted for a regular and permanent one, so is the necessity for an increased regular staff, especially in that department which is to move and supply the army. It will be found the surest, if not the only, means of rendering that description of troops efficient, and of enforcing anything like system and economy in their operations.

I would, therefore, without entering further into the details of the subject at this time, respectfully recommend that at least four officers corresponding with the former division quartermaster generals, and two quartermasters, and eight assistant quartermasters, be added to the present organization of the department, the whole to be separated from the line; and also that provision be made for a limited number of forage and wagon masters, whose services are so important at the large depots of forage and in conducting the wagon trains. The expense would not be worth a moment's consideration, when compared with the military advantages alone which would result from the improvement; but it would, in fact, be a measure of wise economy.

Another point to which I would ask your attention is the necessity of having the duties of the department prescribed and limited by law. Inadequate as it is, with its present organization, to do justice to its own appropriate duties, it is nevertheless burdened with duties appertaining to other departments of the service, involving much labor and heavy pecuniary responsibility. Among these are the payment of Indian annuities and the purchase of supplies for the department of Indian affairs, amounting in the present year to near eight hundred thousand dollars, not included in my report, and which is disbursed at great risk by the officers of the quartermaster's department without compensation. This business has no connexion with the military service; and as it frequently requires the officers to quit their stations and leave their own duties to be performed by agency during their absence, it is clearly incompatible with their primary obligations, and they should therefore be relieved from it; but if they must continue to be charged with it, I trust that some compensation will be provided for them. It has already been the subject of complaint, which the following extract of a report from one of the officers engaged in that service will show is not without just grounds: "My Indian account," he observes, under date 11th October, "for the last quarter is over half a million of dollars; a great portion of which has been disbursed under circumstances that involved unusual risk of error and loss. It is unjust, I conceive, to subject officers to the hazard of being ruined or seriously embarrassed without awarding them any corresponding remuneration." I will only add, in reference to this subject, that, apart from the objections stated, it is worthy of consideration whether the imposition of such heavy extra duties upon a public agent may not affect the validity of the bond given by him for the faithful performance of his own duties, and thus impair the security for the public funds.

A further source of embarrassment to the operations of the department is the liability of its officers to be called upon to make good the deficiencies in other branches of the staff. Besides their subjection to duty in the subsistence department, which, being of a kindred character to their own, occasions no serious inconvenience, it is provided by law "that, in addition to their duties in the field, they shall, when thereto directed by the Secretary of War, purchase military stores, camp equipage, and other articles requisite for the troops;" and under this authority the officers of the department are frequently required,

in active service, to provide large supplies of camp equipage, to purchase medicines and hospital stores, and occasionally arms and ammunition; duties which they are not altogether prepared for by their ordinary pursuits, and which have the injurious effect of diverting to other objects the funds provided to meet the engagements of their own department.

In the distribution of the mass of duties appertaining to the staff of the army, the governing principle, I humbly conceive, should be the greatest subdivision consistent with the preservation of unity and concert of action. From the extent of the extra calls which are made upon the quartermaster's department, a doubt may well be entertained whether the adjustment of the relative duties of the several departments, which was supposed to constitute the chief merit of the system, has been so fully attained as is desirable. It is at least questionable whether a department whose own duties are arduous, and on the prompt discharge of which so much depends, should be subjected to so wide a range of responsibility for other branches of the staff. But if the necessities of the service shall be deemed to require a continuance of this feature of the system, it forms a strong additional reason for the improved organization which is herein suggested.

I have the honor to be, sir, your most obedient servant,

T. CROSS, *Major, Acting Quartermaster General.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

No. 4.

REPORT OF THE COMMISSARY GENERAL OF SUBSISTENCE.

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, December 6, 1836.*

SIR: In compliance with directions from the Department of War, of the 9th of September last, I have the honor to submit a statement of the moneys remitted and charged to contractors and disbursing officers of the department for the first, second, and third quarters of the year, together with the balances in possession of the latter on the 31st of December, 1835, amounting to..... \$1, 082, 164 33
To which is to be added the balances due them on the settlement of their accounts..... 46, 923 77

Aggregating..... 1, 129, 088 10
The amount accounted for is..... 984, 282 44

Leaving a balance of..... 144, 805 66

From which is to be deducted:

This sum, charged to contractors as the difference in price of stores purchased to supply deficiencies on failures..... \$539 61
Balance due by Lieutenant Allston at the period of his decease..... 610 97
Balances in the hands of assistant commissaries on the 31st of December, 1835, who made no disbursements in 1836..... 260 00
And this amount remitted late in the third for expenditures of the fourth quarter 64, 200 00
65, 610 58

Leaving..... 79, 195 08

actually in possession of the disbursing officers of the department, applicable to the expenditures of the fourth quarter of the year.

Of one hundred and forty-two officers disbursing the public money on account of subsistence for the first three quarters of the year, the accounts of eight only were not received at the completion of this statement; three have been rendered since, and the remaining five are those of officers actively engaged in the Indian campaign, which no doubt will be promptly rendered the moment that a relaxation from duty affords the proper opportunity.

The amount due by Lieutenant Allston at the period of his decease, it is believed, is sufficiently secured, and will eventually be paid; so that not a cent will be lost to the government of the amounts remitted the present year.

The balance to the credit of the appropriation for subsistence, December 31, 1835, was... \$208, 954 85
The amount appropriated for 1836..... 495, 400 00
Transfers authorized by acts of Congress..... 133, 372 64
Refunded from officers' accounts..... 8, 780 33

Making a total of..... 846, 507 82
Of which there remained in the treasury on the 30th of September..... 375, 508 19

Making the amount drawn from that appropriation for the three quarters..... 470, 999 63

The amount expended by the disbursing officers of the department, it will be perceived by the statement, is \$984,282 44, being an excess of \$513,282 82, which sum has been drawn from the various appropriations for suppressing Indian hostilities; which being exhausted, the balance on account of subsistence will now be held strictly applicable to the purchase of such stores as may be required for all the troops of every description at present mustered in the service of the United States.

Very respectfully, your most obedient servant,

GEORGE GIBSON, *Commissary General of Subsistence.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

Statement exhibiting the moneys remitted to contractors from January 1 to September 30, 1836; the moneys paid to them by the agents of the department; the sums charged to them on account of failures, and the amount accounted for by them; the balances in the hands of the disbursing officers of the department December 31, 1835; the remittances to them in the first, second, and third quarters of 1836; the sums charged to them as transfers from one officer to another; sales to officers and citizens on the frontier posts; sales of surplus provisions, empty barrels, boxes, &c.; and the amount accounted for by them during the same period, together with the balances in their possession at the expiration of the third quarter of the year.

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, Washington, December 6, 1836.

GEORGE GIBSON, Commissary General of Subsistence.

No. 5.

REPORT OF THE SURGEON GENERAL.

SURGEON GENERAL'S OFFICE, *December 2, 1836.*

SIR: In consequence of the death of the late surgeon general, by which melancholy event the service has lost one of its most valuable and meritorious officers, it becomes my duty to report the condition of the department over which he presided with so much honor to himself and advantage to the government.

The amount advanced on account of the medical department of the army during the first three quarters of the present year has been eight thousand three hundred dollars; of which sum five thousand and ninety-one dollars and seventy-six cents have been expended, and for which accounts have been rendered and settled; leaving a balance in the hands of the disbursing officers of three thousand two hundred and eight dollars and twenty-four cents, and for which they are accountable. The amount paid by warrants on the treasury for claims presented and admitted during the same period has been twelve thousand five hundred and twenty-four dollars and sixty-one and a half cents. During the same period there has also been advanced to Surgeon Thomas G. Mower, the purveyor of medical supplies for the army, on account of Indian hostilities, eight thousand five hundred dollars; of which seven thousand one hundred and ninety-six dollars and one cent have been expended, and for which his accounts have been received and settled.

The annual medical and hospital supplies for the army were all transmitted in due time to the several posts and received in good order, which, with the other property in charge of the officers of the department, have been fully and satisfactorily accounted for by the returns of the surgeons and assistant surgeons; from which it is also perceived that the hospitals are all well supplied with every article necessary for the sick, and of the best quality; and in consequence of the well-arranged system of responsibility which has been adopted and practiced in relation to the supply, as well as expenditure, the expenses of the department continue about the same as for the last year.

The whole number of cases which have been treated by the officers of the medical department during the year ending the 30th of September last has been fourteen thousand three hundred and fifty-six; of which number *only* one hundred and thirty-nine have died. Of these, seventeen at Fort Gibson, (fourteen in the fourth quarter of 1835,) seven at Fort Towson and vicinity, thirteen at Fort Jesup and vicinity, eight at Camp Sabine and Nacogdoches, five at Fort Mitchell, seventy-five at the different posts and stations in Florida, and fourteen at other posts. Of the whole number of deaths, three were of yellow fever, twenty-five of remittent fever, two of typhus fever, ten of congestive fever, nine of intemperance, nineteen of consumption, thirteen of dysentery, nineteen of gun-shot wounds, seven of gastro enteritis, and thirty-two from other causes, (twenty of which occurred during the third quarter of the present year, at Camp Call, Suwanee old town, Florida, principally from yellow, remittent, and congestive fevers.)

The law requiring an examination by a medical board previous to appointment in the army has proved of the greatest advantage, by securing that professional knowledge so essentially necessary to enable an officer of the medical department faithfully to perform the important duties required of him.

Fifty-six applicants, who were recommended as qualified for appointment, have been authorized since the last annual report to present themselves for examination; of this number, twenty-one failed to attend; seven, after presenting themselves, withdrew without an examination; and of the remainder, only thirteen were found qualified to receive the commission they had applied for, being less than one-fourth of those who had been authorized to attend. The nature of the service requires that the examinations should be rigid, not only in relation to the professional acquirements of the candidates, but also as to their physical qualifications and moral habits; for every surgeon and assistant in the army, from the very nature of the service, is at all times subject to be called on to decide in the most important cases, when so far distant from any settlement as to render it impossible for him to obtain any professional advice or assistance, which, under similar circumstances in civil life, would be resorted to.

I would respectfully call your attention to the present regulations relative to hospital stewards. There are no persons in the service who are so badly paid for their services, which are important and very arduous, as they are. It is essentially necessary they should be honest, intelligent, and sober; and such individuals who are competent to compound and administer the medicines as prescribed by the surgeon cannot be obtained for the present compensation. I therefore most respectfully suggest that a steward to an hospital at a post of more than four companies be allowed the pay, clothing, and rations of a sergeant of ordnance; and at all other posts the pay, clothing, and rations of the first sergeant of a company.

For the propriety and necessity of asking an appropriation for repairing and erecting of hospitals at the different military posts, I must refer you to the very full and lucid report of the late surgeon general on that subject.

Very respectfully, your obedient servant,

BENJAMIN KING, *Surgeon General ad interim.*

Hon. B. F. BUTLER, *Secretary of War ad interim, Washington.*

No. 6.

REPORT OF THE PAYMASTER GENERAL.

PAYMASTER GENERAL'S OFFICE, *Washington, December 1, 1836.*

SIR: I have the honor herewith to lay before you a tabular statement showing the sums advanced to the several paymasters of the army from the treasury from the first day of October, 1835, to the first day of October, 1836; to which are added the balances remaining to be accounted for on the 1st of October, 1835; the amount unexpended and forming part of their estimates for the fourth quarter of 1836; the balances to be accounted for; and the periods to which the troops have been paid.

It was not until late in the season that the additional paymasters authorized by the act of last session, except one, entered on duty. This left to the old officers the whole burden of paying the volunteers

and militia serving in Florida, Georgia, and Alabama, amounting to three times the number of the regular army. This duty, always a difficult one, has been performed with less delay and inconvenience to the troops than generally attends such payments, and much less than I anticipated; but in doing it the officers of this department have been unavoidably subjected to great hazard, and, I fear, to serious losses. It has been the practice in previous Indian wars to have the muster-rolls of the volunteers and militia sent to this place to be examined and approved by the accounting officers before they were placed in the hands of paymasters. In most cases the pay-rolls were prepared in this office and audited before settlement; and notwithstanding the paymasters were thus relieved from much responsibility, the Secretary of War was authorized to allow a percentage on the amount disbursed to cover losses.

At the commencement of the late and present hostilities it was considered highly important to hold out inducements to the militia of the adjacent country to volunteer their services, and one of the inducements was prompt payment. This could not be effected if the rolls were to be first examined and the accounts audited at this place; your predecessor, therefore, after maturely considering the subject, determined to suspend so much of the regulation relating to the payment of volunteers and militia as required the rolls to be transmitted to this place and audited before settlement. This removed the safeguard of the officers of the pay department, and they have since been and now are subject to a most hazardous, and, I fear, in some cases, ruinous duty, unless some provision is made to cover disallowances in the settlement of their accounts. To form an opinion of the losses to which they are liable, it is necessary to have a knowledge of the circumstances under which the duty is performed. One great difficulty arises from the militia serving under the different organizations given to them by their State laws, and all varying from that prescribed by the laws of the United States that are to govern in the settlement of paymasters' accounts. Another difficulty is caused by the irregularity of the service, and the imperfect evidence to establish it; and a third, from the pay-rolls and accounts being necessarily prepared under circumstances calculated to prevent accuracy. The troops are generally discharged by regiments, sometimes by brigades, always impatient to return to their homes, and importunate to be paid; the paymaster cannot begin to prepare his accounts until after the discharge takes place; of course, he must always perform that duty in a hurry, and frequently surrounded by persons conversing with and questioning him. Under such circumstances, he has to judge of and pay claims of doubtful character, and to make long and perplexing calculations, without time to re-examine and test their accuracy. If he differs in opinion with the accounting officers in construing the law, or applying it, or if he errs in his calculations in favor of the claimant, the latter receives the benefit, and the paymaster loses the amount; if the error is favorable to the government, the government receives the benefit and not the paymaster.

I trust that, on examining the subject, you will think the disbursing officers of this department equitably entitled to such additional compensation for this onerous duty as will cover the losses to which they are liable under a careful performance of it.

It was believed that the references in the appropriation laws of the last session to the act of April 5, 1832, as a guide for the disbursement, gave to the Secretary of War the same power to allow paymasters a percentage as was exercised under the act referred to; but as the Attorney General entertains doubts of that authority, I respectfully request that you will lay the subject before Congress, with such remarks as you may think necessary and proper.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

Statement of moneys drawn from the appropriations for the pay department and remitted to the disbursing officers on account of payments for the fourth quarter of 1835 and the first three quarters of 1836; the amount unexpended and forming part of their estimates for the fourth quarter of 1836; the balances to be accounted for; the periods to which the troops have been paid and accounts rendered.

No. 7.

REPORT OF THE COMMISSARY GENERAL OF PURCHASES.

COMMISSARY GENERAL'S OFFICE, Philadelphia, November 1, 1836.

SIR: In obedience to instructions of the War Department, dated the 14th of October, 1836, I have prepared, and have the honor of enclosing, my moneyed estimates for the year 1837, marked A and B, as follows, viz:

A. For clothing, camp equipage, &c., for one year ending October 31, 1838.....	\$206, 940 08
B. For the expenses of the Commissary General's office during the year 1837	8, 000 00
Total	<u>214, 940 08</u>

I also enclose ten statements, numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10, prepared in obedience to your order, viz:

1. Statement of moneys drawn from the treasury of the United States on account of various appropriations during the first three quarters of the year 1836.
2. Statement of moneys received and disbursed on account of the "purchasing department" during the same period.
3. Statement of moneys received and disbursed on account of "appropriations for volunteers and militia" to the 30th of September, 1836.
4. Statement of moneys received and disbursed on account of "appropriations for suppressing hostilities of Creek Indians" to the 30th of September, 1836.
5. Statement of moneys received and disbursed on account of "appropriation for additional dragoons," &c., to 30th of September, 1836.
6. Statement of moneys received and disbursed on account of "appropriation for repressing hostilities of Seminole Indians" during the first three quarters of 1836.
7. Statement of moneys received and disbursed on account of "appropriation for the suppression of Indian hostilities in Florida," per act of April 1, 1836, to September 30, 1836.
8. Statement of the expenditure of the contingent fund of the Commissary General's office during the first three quarters of the year 1836.
9. Comparative statement of the cost of army clothing during the years 1835, 1836, and 1837.
10. Statement of the cost of clothing, &c., for the United States army during the year 1837.

The above statements will, I hope, be entirely satisfactory.

Since making out the enclosed statements Nos. 1 and 7, I have received the report of the Second Auditor of the Treasury Department, by which I am informed my accounts for the second quarter of 1836 have been acted upon, and the disbursements passed to my credit

I have deducted \$30,000 from the gross amount of the moneyed estimate A, for clothing, &c., that may remain on hand after the issues for this year may have been completed, which is as much as can be deducted with safety.

Whatever balances of the different appropriations remain undrawn will be required to enable me to execute the orders of the War Department; to settle all accounts to the end of the year; and to have clothing made during the approaching winter, so as to be ready for an early spring issue. I have therefore to request the money may be reserved for the operations of this department, as the whole will be required.

I have the honor to be, sir, with high respect, your most obedient servant,

C. IRVINE, *Commissary General of Purchases.*

Hon. B. F. BUTLER, *Secretary of War.*

No. 8.

REPORT FROM THE ENGINEER DEPARTMENT.

ENGINEER DEPARTMENT, *November 30, 1836*.

SIR: In compliance with your instructions, I have the honor to submit the following report, relating to the operations of this department during the year ending on the 30th September, 1836. It is accompanied by four tabular statements, marked 1, 2, 3, and 4. The first two relate to its fiscal concerns; the third exhibits the works projected by the board of engineers which have not been commenced, with an estimate of their cost; and the fourth shows the respective appropriations referred to this department during the past year, with the name and station of the superintendent of each work.

FORTIFICATIONS.

The appropriation for this branch of service became available in July last. Some time necessarily elapsed in giving instructions to the several officers, and in their making and commencing their plan of operations. The difficulty, at that advanced period of the year, of procuring mechanics and laborers, nearly all of whom had made their engagements for the season, caused a tardy commencement of operations, especially at those works where they had been suspended an entire year for want of funds; and to the time embraced by the annual report, (30th September,) they had scarcely got into full operation. This is the cause why little progress has been made during the past year; and, so far as the several works are concerned, I shall have little either of interest or importance to report.

Fort Warren, Boston harbor, Massachusetts.—The work performed at this fort from its commencement has been chiefly confined to those fronts which are designed to command the main channel and entrance to the harbor. The entire excavations on these fronts will probably be completed this autumn, except those for foundations of walls not commenced, and a small mass of earth on a high level on the coverface, which, to save expense, is left to be transferred to the terrepleins and parapets of the main work, after the completion of the casemates. The whole quantity of earth excavated is ninety-nine thousand two hundred and eighty-seven cubic yards.

Although, since the commencement of operations in July, due efforts have been made to collect the

requisite force, the masons on the work have not at any time exceeded thirty. They have been employed exclusively on the piers and walls of front No. 1. Six piers for arches of thirty feet span will be completed within the present month. Five other piers are in various stages of progress, and so far advanced that arrangements will be made to commence the arch work next spring.

Fort Independence, Boston harbor, Massachusetts.—The small balance of former appropriations unexpended on the 30th September, 1835, was applied, during the last quarter of that year, to the hammering of stone for facing the scarp. At the beginning of the present year, when the work was suspended for the want of funds, three thousand five hundred and sixty cubic yards had been received, of which three thousand and forty-four, making forty-eight thousand eight hundred and thirty-nine superficial feet of face, had been hammered; leaving seven thousand superficial feet to be dressed, to complete the quantity required for the new scarp. One hundred thousand dollars were appropriated in July last for rebuilding this fort, on the plan recommended by the board of engineers and approved by the Executive. Since then, a suitable force has been employed in demolishing the old walls and buildings, and clearing away the earth and rubbish along the fronts facing the channels, the curtains and flanks of which are among the parts of the work to be casemated. This will soon be completed, and arrangements made for commencing the masonry next spring, and prosecuting it with vigor.

Fort Adams, Narraganset Roads, Rhode Island.—In consequence of there being no appropriations for this work for the year 1835, the operations were discontinued from the spring of last year till July of the present year, and were resumed with vigor the moment the current appropriation was granted. The excavations of earth and rock in all the ditches of the fort are finished. A small portion of the excavation of the esplanade, and a considerable part for the parade itself, remains to be executed. Such portions of the stones removed on these excavations as were suitable have been applied to the masonry of the fort. The remainder, and all the earth, have been used in forming the embankments of some of the fronts. All the excavations for the communication from the fort to the redoubt are executed, and the earth has been applied to the formation of the communication parapets, which are finished. The glacis, terrepleins, and embankments of certain fronts, with their places of arms and covert ways, are completed, with the exception of some turfing. The masonry of the several fronts of the fort is well advanced, and in parts completed. Some of them have all the arches turned, roofed, leaded, and covered with earth. On others, the entire masonry is completed, with the exception of the breast-height walls. All the gun embrasures (in number 104) and all the carronade embrasures (in number 67) are built. The two large ovens, many of the cisterns, and fireplaces for soldiers' barracks, are finished. All the walls of the communication from the fort to the redoubt (in length 2,850 feet) are completed, as well as about two-thirds of the walls under water for the permanent wharf. On the exterior faces of the scarp walls, and for exposed corners, granite of a durable quality, hammered to a rough face, is used. The interior of the walls and the inner faces, nearly the whole of the piers, and all the foundations, are of gray Wacke slate, which occurs abundantly on the public domain, is obtained with good beds and faces, and costs much less than any other stone. Most of the lime used within the year has been burnt in kilns on the spot; the quality is superior to any found in market, and costs less. A portion of hydraulic lime is now added to all mortar designed for stone masonry, experience having shown that that composed of sand and lime alone suffers much injury from the frost, however carefully made and applied. The estimate for 1837 is predicated upon the plan of finishing the scarp of the west front, and the scarp and piers of the north front; to turn the arches of the north front; to finish the parade wall; to finish putting on the eastern parapets of the fort; to build the breast-height walls; and to make all possible progress in the masonry of the redoubt.

Fort Schuyler, Throg's Neck, East river, New York.—No exertion has been spared, since funds became available for this work, to advance the operations as rapidly as possible; but the demand for mechanics has been so great ever since the opening of the season, and even before it, that not more than fifty masons could ever be collected; whereas two hundred were designed to be employed. Operations, in consequence, have been comparatively limited, and, in addition to other impediments, occasionally embarrassed by strikes for unreasonable prices on the part of those by whom stone was to be supplied. The sea wall has been carried to its height around the front of the fort and where it forms the revetment of the right flank of the glacis. A part of the foundation of the counterscarp wall has been laid, and the culvert finished. The graduation of the site has been commenced, and will be sufficiently advanced to begin the foundations of the wall of the main work so soon as the masons can be spared from the sea wall or others engaged to commence them.

Fort Columbus and Castle William, Governor's island, New York.—It is anticipated that the repairs of these works will be completed the present working season. The masonry of Fort Columbus is now finished, except the construction of some offices and steps and the laying of a small portion of coping, flagging, and the completion of some traverse circles and pintle beds. The necessary plastering and painting will be finished this month, as well as the iron work and roofing of the barracks, at which time it is also expected the carpentry will be completed.

The flagging of the barbette platform of Castle William has been relaid on a thick bed of cement mortar, which appears to be perfectly tight. The platforms of the second tier and floors of the third tier have been laid and the galleries repaired. All the work required to be done is expected to be completed in the course of the year. The south battery requires little more to be done than to lay the traverse circles, the foundations of which are prepared.

Fort Mifflin, Delaware river, Pennsylvania.—The necessity which existed in December, 1835, of putting some position on the Delaware in a state of defence to protect Philadelphia against the approach of an enemy by water, led to the repair of this fort, as being advantageous for the effectual protection of the river, and susceptible of being fitted up in less time than any other point. The masonry was found to be in good condition; the ramparts and parapets, constructed of earth, required reforming; and all the wood-work of the platforms, gateways, sallyports, magazines, caserns, and barracks, entirely decayed and unfit for use, even to the roofs and floors of the quarters, and the ditches were filled up. The ramparts and parapets have been formed and the ditches excavated and widened. The quarters for officers and soldiers have been repaired, the scarp walls pointed, and four hundred and sixteen running feet raised two feet in height, to make it uniform with the other parts of the work, and the walls of the magazine raised and covered with earth, and all parts thoroughly repaired. The whole work will probably be completed this fall, except, perhaps, some pointing and the erection of gun-sheds, which may be arrested by unfavorable weather.

Fort Delaware, Delaware river.—In the last annual report it was stated that large supplies of material had been previously collected, and arrangements made for construction whenever funds should be available

for that purpose. The work remained suspended till July last, when the appropriation was made for its continuance, but at too late a season to effect anything advantageously. As soon as a force of laborers could be collected the excavations for the foundations were commenced, and the earth applied in forming a glacis. Some progress has been made in driving piles for the foundation of a magazine and the scarp of the front on the Delaware channel, and a further supply of material has been procured. The impracticability of procuring laborers and mechanics at so late a period of the year, even at the highest rate of wages, is the cause of so little progress; and this cause existed not only at the site of the work, but at all places whence materials were to be drawn.

Fort Monroe, Hampton Roads, Virginia.—The appropriation granted at the last session of Congress for completing in a permanent manner all the parts of this work, and referred to this department for application, remains untouched in the treasury. After making a distribution of the officers among all the works, and in nearly every instance assigning the superintendence of several to the same individual, the services of none could be procured for the one in question.

Fort Calhoun, Hampton Roads, Virginia.—Operations at this work were resumed about the middle of July last, and notwithstanding the exertions that were made, a full force could not be assembled before the middle of September. They have been employed in removing from the walls the stone necessary for the superstructure and mole previously accumulated for the compression of the foundation, preparing machinery and buildings. Care has been taken, in removing the stone, to preserve the equality of pressure as much as possible. It is not anticipated to have the foundation laid open and preparations made for commencing the masonry of the work before March next.

Fort Caswell, Oak island, North Carolina.—The appropriation for completing and strengthening this work has been applied as far as circumstances would permit. The dike around the ditch has been repaired, and preparations made to commence immediately the permanent lock to regulate the admission of water into the ditches. Arrangements are also in progress for beginning the necessary masonry at an early period of next year, and which could not be commenced sooner for want of brick.

Fortifications in Charleston harbor, South Carolina.—Nothing has been yet done towards applying the appropriations for the fortifications in this harbor, no officer being available for that purpose. As was stated in my last report, the operations were abruptly arrested in March, 1835, for want of funds, and at this time I am not aware of the condition or state of the works. The difficulty of obtaining the right of site for the new work designed for the protection of the harbor still exists, and furnishes another impediment to resuming operations.

Fort Pulaski, Cockspar island, Georgia.—There has been no progress in the construction of this work for the last year. Since the appropriation became available, all the means at the disposal of the local engineer have been applied to restoring the canal, flats, material, machinery, &c., injured by decay, to their former condition. From the preparations, however, now made, it is expected that the masonry will be resumed in a few days. The casualties attendant on this work have added materially to its cost of construction, as will be seen by reference to the estimate to complete.

In the original design for this work by the board of engineers no revetment was contemplated for the sides of the ditches and feeder. Experience has since shown that the mud which constitutes the island, when exposed to the influx and reflux of the sea, will assume, in combination with the water, a demi-fluid state; thereby filling up the ditches, impairing the strength of the fort and health of the garrison. Further, in cases of severe blows and high tides, the water will flow over the dikes, and, in case of no revetment walls, will sweep the earth of the slopes and dikes into the ditches in a few moments. It is believed by the local engineer that if the revetment of the scarp of the demi-lune be not constructed in less than one year after the completion of the fort, one-half of its rampart will have fallen into the ditch. An estimate has been made for revetting with masonry the scarp of the demi-lune, counterscarp of main work and demi-lune, and the sides of the feeder to the ditch, between the advanced and remote tide locks; amounting in the aggregate to \$150,000, which is, in part, embraced in the estimate for the next year's operations, and will be so applied, unless restricted by the act of appropriation.

Fort Marion, St. Augustine, Florida.—This work is presumed to be in the same condition in which it was reported in 1834. No officer being disposable for the application of the appropriation of the last session of Congress, a civil agent has been appointed to take charge of the operations, who has reached his place of destination, and is now making some preparatory arrangements.

Fort Pickens, Pensacola harbor, Florida.—The appropriation of last year for this fort has been sufficient to pay off the arrearages due on account of giving increased dimensions to the scarp walls of one of the bastions, as stated in my last report. The small balance remaining on hand will be applied to sundry improvements, by which the condition of the work will be benefited.

Fort on Foster's Bank, Florida.—The operations at this point have steadily advanced during the year 1835, and for upwards of six months of the present year, notwithstanding the want of funds. The amount of work thus executed upon the individual credit of the superintending engineer and the responsibility of the contractors, and the great loss thereby saved to the United States, was explained in my last report. Some delay in getting the remainder of the bricks required will have prevented the completion of the whole of this work before the end of the year. The fort in all its parts has been faithfully constructed, and is in excellent condition. Some alterations from the original plan have been adopted, by increasing the height of the scarp wall and the thickness of the bomb proof of casemates, and giving additional dimensions to several parts of the masonry. These alterations and improvements have necessarily involved an additional cost to the works, which, added to other items not embraced in the original estimate, will form the difference between that and the actual cost. This excess of cost will, however, have been beneficially incurred, since it provides for increased strength and permanency to the works.

Fort Morgan, Mobile Point, Alabama.—The casemates intended for officers' quarters, mentioned in my last report, have been completed.

Fort Livingston, Grand Terre, Louisiana.—Nothing has been done at this point during the year, for want of an officer to take charge of the work. A keeper and one laborer have been employed to take care of the premises and materials belonging to the United States, and to improve the lands.

Fort Jackson, Louisiana.—This work is not considered in a state of defence. From the nature of the foundation, it was deemed prudent at the time of its construction not to put on the earthen parapets until time had imparted to the work a greater solidity. It is also without furnaces for heating shot; and casemates for additional magazines, storerooms, &c., require to be fitted up. An estimate for these purposes is accordingly submitted.

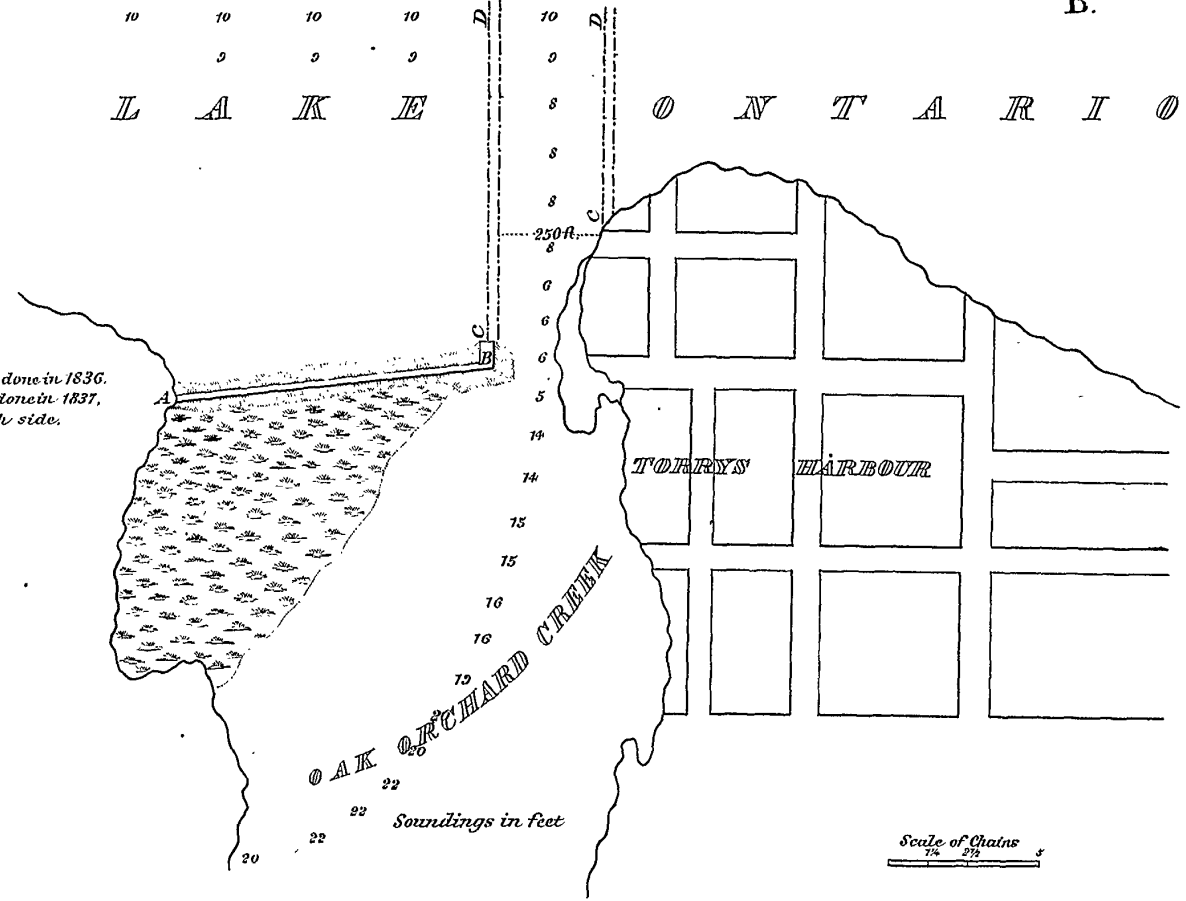

Contingencies of fortifications.—Ten thousand dollars were appropriated at the last session of Congress

under this head. They have been applied to the defraying of the expenses of a survey on Lake Champlain repairs at Fort Morgan, Bienvenue, Dupré, Forts Wood and Pike.

The appropriation of \$100,000 for "*incidental expenses*" has been applied to the restoration of Fort Mifflin, purchase of additional land at Fort McHenry, preparing gun traverses and platforms, furnaces for heating shot, and fitting up magazines, &c., at Boston harbor, Newport, New York, Fort McHenry, Fort Severn, Fort Washington, Fort Calhoun, Fort Caswell, Fort Pulaski, and forts on the Gulf of Mexico.

HARBORS AND RIVERS.

Chicago harbor, Illinois.—The season had so far advanced when the appropriation for this work became available that workmen and laborers seeking employment in the country had made permanent engagements elsewhere; and therefore little progress has been made since my last annual report, other than to procure a dredging machine and materials. Operations have been delayed, since they were resumed this year, by boisterous and unfavorable weather, which has prevented any extension of the *north pier* into the lake. The *south pier* has been extended 150 feet, and, should the weather allow, it is contemplated to carry it 280 feet further this fall, and to endeavor to raise its height, no part of which is now more than one foot above the surface of the lake. This will make both piers of equal length, extending twelve hundred and sixty feet into the lake, and across the crest of the outer bar into full eleven feet water. It is believed that, by means of the dredging machine, a channel sixty feet broad and of sufficient depth will be opened along one of the piers this fall, which will admit vessels from the lower lakes to enter the river and lay up for the winter. Eight hundred cords of stone have been deposited in the piers this year, and it is contemplated the next season to extend the *north pier* about 100 yards further into the lake, which will probably be sufficient to secure a safe entrance and protect the channel from being filled with the moving sands. The great and increasing trade and prosperity of the town of Chicago and adjacent country urge the importance of a speedy completion of the improvement of this harbor; and therefore the full amount of the estimate asked is recommended to be granted.

Harbors on the south shore of Lake Erie.—The progress of these works has been retarded, first, by the lateness of the season at which the appropriation for their continuance became available; second, from the necessity of changing the general superintendent of the greater number of them, whose services were elsewhere required; and third, from the unprecedented, continuous and violent storms, and the rise of the water on that shore of the lake more than $2\frac{1}{2}$ feet higher, on an average, than has been known for twelve years. Their condition in detail is set forth in the report of the general superintendent, which, from the great interest felt in their prosperity, is annexed, marked A, and to which I beg leave to refer.

Mouth of Oak Orchard creek, Lake Ontario, New York.—Five thousand dollars were appropriated at the last session of Congress for the formation of a harbor at this place. The work has been commenced, and the pier extending from the western shore, to contract the mouth of the creek, has been completed. The piers to be constructed on each side of the channel, and to extend 1,160 feet into the lake to deep water, will be embraced in next year's operations. A sketch of the plan of improvement pursued is appended, marked B.

Mouth of Genesee river, New York.—Operations at this point since the appropriation for 1836 became available have been confined to repairing those portions of the piers that have been found to subside in the sandy bed of the lake. The local agent reports that they remain firm, and that the channel is open and as deep as the navigation of the lake requires. The more special object of the last appropriation, viz: the permanent stone-work, has not and cannot be carried into effect until the waters of the lake sufficiently subside to allow the masonry to be begun at such a point as to insure its being always covered, even at the lowest stages, thereby securing the preservation of the timber-work below. The unusual height attained by the waters of the lake in June last forbids the construction above described, and they have not yet subsided. Arrangements have been made for procuring a sufficient quantity of stone and of a suitable kind.

Big Sodus bay, Lake Ontario, New York.—The operation of dredging out the channel between the piers at this place has been satisfactorily advanced since the work was resumed this season, one-half of it having been opened to sixteen feet depth of water, and which at the lowest stage of the lake will afford a draught of fourteen feet. The work is represented to give evidences of remaining a permanent improvement.

Oswego, Lake Ontario, New York.—This work has been much retarded and embarrassed the past year by the extraordinary high water in the lake, which has been about thirty-three inches above its ordinary level. The labor and expense of preparing the bed of the pavement of the mole and arranging the stones at the base were consequently much augmented, and the process of quarrying large stone for the base of the mole was entirely abandoned in consequence of the quarries being overflowed by the water from the lake. The operations for the year have been limited to removing the temporary construction around the foundation of the light-house and rebuilding it in a more permanent manner, to laying about 13,500 square feet of pavement, and receiving 2,843 tons of paving stone. The report of the local agent, giving a concise history of the operations since the year 1833 and his views relating to its construction, is appended, marked C, to which I beg leave to refer for more particular information.

Perhaps it would be interesting to observe at this place the effect produced by the works just described upon their immediate vicinity, and what benefit the country at large will derive from their construction.

The four last named are on Lake Ontario. The improvement at Oak Orchard creek has but just commenced, and is spoken of as one of the points for the debouche of the ship canal around the Falls of Niagara. One railroad has been extended along the margin of the Genesee towards the piers at its mouth, and a second projected and chartered. A canal has been commenced from Sodus bay, by which a communication through Cayuga lake into Pennsylvania, thence through the Susquehanna river canal to Chesapeake bay, will be opened for the commerce of the northern lakes to the New York and southern markets. This line of intercourse, uniting the northern and southern States by the strong tie of mutual and commercial interests, and furnishing an easy and expeditious route for military transportation from the northern to the southern frontier, must be considered a work of a truly national character.

A branch of the New York and Erie canal already extends to Oswego, through which the produce of the shores of Lake Ontario is conveyed to be distributed through the whole country. From the time of the first commencement of these works, in 1829, the navigation and tonnage on the lake have more than

doubled in extent and quality, and the population surrounding these districts has increased in a ratio of one-third.

Monument on Steel's ledge, Maine.—As stated in the last annual report, this structure was then completed with but a slight exception. The agent in January last reported that his operations had been brought to a close, and recommended that the small balance of funds in his hands should be applied in buoying out the channel leading to the mouth of the Penobscot river, the direct course to Prospect harbor, Buckport, Frankport, and Bangor, which at present can only be safely navigated at certain stages of the tide. It was estimated that it would cost about one hundred and fifty dollars to mark out the channel and render it secure at all tides; but as the appropriation was specific for a monument on the ledge, the department believed it had no authority to sanction this application. It is now recommended that the balance of this appropriation may be applied to the purpose above mentioned, and is therefore included in the estimate to be reappropriated for that object.

Breakwater on Sandford ledge, Portland harbor, Maine.—Ten thousand dollars were appropriated at the last session of Congress for the commencement of this object. The officer under whose general superintendence the work was placed reports that no permanent agent had yet been appointed to take charge of the operations, but that the gentleman consenting at his request to assist in the preliminary arrangements had informed him that a contract had been made for constructing the first section of the breakwater, extending on Sandford's ledge four hundred yards from the shore.

Piers at Kennebunk, Maine.—The sum of \$7,500 for continuing this work was appropriated in July. As much of the most favorable season for operations had then passed, the work, if commenced, could not be completed this year; and it was apprehended that if left in an unfinished state, exposed to the action of the sea during winter, its safety would be endangered. The agent was therefore instructed to limit his operations to the collection of materials, and to such arrangements as might be necessary for commencing the work next spring.

Deepening the channel of the Cocheco branch of the Piscataqua river, leading into Dover harbor, New Hampshire.—Arrangements have been made by the general superintendent for commencing the necessary operations for this improvement, for which \$5,000 were appropriated in July last. No report of the progress of the work has yet been received.

Merrimack river, Massachusetts.—The agent at this place reports that the breakwater under his charge is complete, with the exception, perhaps, of a few tons of stone, for which the available means are sufficient.

Breakwater at Sandy bay, Massachusetts.—Ten thousand dollars were appropriated by Congress at its last session for this object. The work has been commenced, and up to the 30th of September 5,635 tons of stone had been deposited on the site of the breakwater. The balance of the funds applicable for this year will be absorbed by contracts which have been made for the delivery of materials during the fall and winter. A liberal appropriation for the prosecution of this important work next year is earnestly recommended.

Preservation of Rainsford island, Massachusetts.—The preservation of this island was first commenced by the State of Massachusetts, whose legislature in 1835 granted \$4,500 for the purpose. The appropriation of \$15,000 by Congress at its last session for the same object has been applied in continuation of the work thus commenced; and up to the 30th of September, 485 cubic yards of masonry, 128 running feet of coping, and about 380 cubic yards of embankment, have been executed. The wall proposed for the preservation of the island is contemplated to be about 1,200 feet long, averaging about 7 feet to 12 feet; 800 feet of this distance has been worked on. In front will be placed a quantity of ballast stone for its protection, and the space between the wall and natural bank will be filled in with earth and small stone.

Duxbury, Massachusetts.—Five thousand dollars were appropriated at the last session of Congress "for preserving the point of land leading to the fort and light-house at the Gurnet." The general superintendence of the necessary operations was committed to an officer of the corps of engineers. Agents have been appointed to conduct the work, and such instructions given them as were deemed sufficient. No report of their progress has been received.

Plymouth beach, Massachusetts.—The amount of last year's appropriation (\$500) has been applied to repairing the breakwater and brush fence injured by the storms of last winter. The grass that has been planted to protect the beach and arrest the drifting sand is represented to be increasing; and the estimate asked for by the local agent for next year, he states, can be applied to much advantage in extending the wall on the northeast side of the breakwater, planting grass and repairing fence.

Provincetown harbor, Massachusetts.—The plantation of grass at this place is represented by the local agent to be in a flourishing condition; about 200 acres have been planted this season, and the same quantity is contemplated in the estimate for next year.

Hyannis breakwater, Massachusetts.—The present length of this breakwater is upwards of 1,100 feet. The foundation of the eastern extremity is extended as far as the plan contemplates; but before it is completed on the top it is desirable that all settlement should cease. This end is much exposed to the action of the sea and ice, and requires to be constructed of large stone. It is also on this end that a beacon-light, if built, must be placed. The west end requires to be extended agreeably to the plan about 200 feet. The completion of this breakwater is represented to be important to commerce and navigation, as it is the best, if not the only, harbor from Cape Cod to Vineyard sound, and affords commodious and safe anchorage for vessels on that coast. Its completion in a permanent manner, it is estimated by the agent, will cost about fifteen thousand dollars—five thousand dollars for the completion of the east end and construction of a beacon-light, and ten thousand dollars to finish the west end. The working season at this place is stated to be not more than six months in the year, and that the last was particularly unfavorable to the progress of operations.

Mouth of Bass river, Massachusetts.—Ten thousand dollars were appropriated by Congress at its last session for the improvement of the harbor at the mouth of this river. The general superintendence of the proposed works was committed to an officer of this department, who was directed to visit the scene of operations and give such instructions as the case required. Three individuals who, it was supposed, would equally represent the interests of the community affected by the contemplated improvement, were selected to take immediate charge of the works. Before the proper arrangements could be made, so much of the working season had elapsed that it was not considered advisable to execute any portion of the work this year. Very little could have been done, and so little that it would probably be of greater harm than good. It is expected that every preparation will be made by the agents the ensuing fall and winter for commencing operations in the spring.

New Bedford, Massachusetts.—The application of the sum appropriated by Congress (\$10,000) for the removal of the wreck in this harbor has been committed to local agents appointed to superintend the work; but from the late period at which the appropriation became available, and the delay attendant on completing the necessary arrangements, the season had so far advanced that it was represented to the department that to commence operations before next spring would be attended with great additional expense, as the principal part of the work lies under water. It was therefore considered more advantageous to make the requisite preparations for beginning at that time.

Breakwater at Church's cove, Rhode Island.—Ten thousand dollars were appropriated in July last for constructing a breakwater at this place according to a project of Lieutenant Colonel Anderson, of the topographical engineers. Instructions as to the manner of executing the work have been given to the agents selected to superintend it. It is considered advisable that, before making any actual commencement, there should be purchased a small portion of the ground at the junction of the breakwater with the shore, so that the United States may possess the fee simple of the land above and below water on which they build, and also the right of way to and from it. Measures have been taken to ascertain the practicability of making such purchase, and an estimate will be presented for the purpose so soon as the terms can be ascertained.

Thames river, Connecticut.—An agent has been appointed to apply the appropriation of ten thousand dollars for deepening the channel of this river. He has been directed to conform in his operations to the project of Major Bache, of the topographical engineers, upon which the appropriation was based, and to bestow all his attention upon the upper pier there spoken of, until the general superintendent could make arrangements to visit Norwich and give more particular instructions. No report of operations has been received.

Saybrook harbor, Connecticut.—Twenty thousand dollars were appropriated for improving this harbor by removing the bar at the mouth of Connecticut river. It was found by Colonel Totten, to whose general superintendence the work was assigned, that no plan of improvement had been made, and that a minute survey was necessary to form such a project as would give reasonable expectation of proving beneficial, which, if possible at all, would be a problem as delicate and difficult as it was important. A requisition has been made for an officer of the topographical engineers to make the necessary survey.

Bridgeport harbor, Connecticut.—Ten thousand dollars were also appropriated for deepening the channel leading into this harbor; and it is proposed—1st. To dredge a channel of 8 feet draught and 100 feet wide through the outer bar. 2d. To increase the width of this channel to 150 feet, should there be funds sufficient. 3d. Should the appropriation hold out, to increase the width to 200 feet; and 4th. With any remaining funds to open a channel of 8 feet depth and 100 feet width through the inner bar; ultimately increasing the dimensions of the channel as the success of the first operation and the liberality of Congress shall justify or permit. Local agents have been appointed to execute the work, but no report of operations has been received.

Fairweather island, Connecticut.—Measures have been taken to apply the appropriation of \$10,000 for constructing a sea wall for the preservation of this island according to the project of Mr. Farnham. Agents have been appointed to carry it into effect, but no report of operations has been received.

Southport harbor, Connecticut.—Fifteen hundred dollars were appropriated for securing the public works at this place. A local agent has been appointed to carry out the project on which the appropriation was based. He reports that the contract entered into for the protection of the dike and channel is in a good state of progress; that its completion will absorb the whole appropriation; and that about 15,000 cubic feet of the wall will be left unfinished, which will leave that part of the dike constantly exposed to the action of the sea and in great danger of being swept into the channel. He estimates that about \$1,000 will be necessary for the continuation of the wall, and to be required for the protection of the channel and harbor.

Harbor of Westport and beach at Cedar Point, Connecticut.—Three thousand dollars were appropriated for improving the harbor of Westport, and \$1,000 for securing the beach at Cedar Point. These have reference to the same harbor, and agents have been appointed to carry into effect the wishes of Congress. The particular object of the first-mentioned appropriation is the cutting a canal through the "great marsh" according to the project of Colonel Anderson, of the topographical engineers; and the further protection to be afforded to Cedar Point is contemplated to be obtained by a leaning wall, of large stones, 4 feet thick, and 4 or 5 feet above high water, extending from the end of the point to the high part of the gravel beach. No report of operations has been received.

Staten island, New York.—Nineteen thousand five hundred dollars were appropriated at the last session of Congress for building an ice-breaker on this island. The department was in possession of no plan, report, or other information, by which it could ascertain the manner in which it was designed to apply these funds. The general superintendence of the necessary operations was assigned to Major J. L. Smith, of the corps of engineers, who learned, through the collector of New York, that the object of the appropriation was to provide a *breakwater* at the quarantine ground, to protect the public wharf and buildings from northeast gales. Upon examining the plan proposed for this object, another presented itself better adapted for the purpose, which was consequently adopted. Nothing has yet been done towards the construction of the work, nor has the general superintendent found time to make any preliminary arrangements, except to ascertain the practicability of procuring piles. His report, entering into the details of the subject, is annexed, marked D, to which I beg leave to refer you.

New Brunswick harbor, New Jersey.—The application of the sum (seven thousand dollars) appropriated for improving this harbor, by removing the obstructions in the Raritan river, according to the plan reported by Major Bache, of the topographical engineers, was also assigned to the general superintendence of Major Smith. It was not before late in August that he was put in possession of the chart of the river and a copy of the report and estimate. When upon the point of proceeding to make a personal examination of the obstructions in question, he learned that the soundings of this river were required in connexion with the survey of the coast, the use of which, to aid in carrying on the requisite operations for improving its navigation, was politely offered by the officer in charge of this duty. He therefore has deferred his examination until said officer shall be engaged in these soundings.

Little Egg harbor, New Jersey.—The appropriation of \$5,000 for the protection and improvement of this harbor referred to the preservation of *Tucker's island*. So soon as the plan and report alluded to in the act of appropriation were received, Major Smith, the general superintendent of the work, met by appointment the owner of the island on the site of the contemplated operations, when such arrangements were entered into as the case required. It was intended to have commenced the works this fall, with a

hope of completing a part of the plan proposed; but some delay having occurred in acquiring the necessary information, they will not now be commenced before next year, which perhaps is not to be regretted as they will acquire a greater stability by being built early in the season and all together, thereby mutually supporting and sustaining each other.

Hudson river, New York.—The plan adopted for the improvement of the navigation of this river has been stated to be that devised by the special board of engineers, constituted for the purpose of investigating the subject. The progress made the past season in advancing the system there proposed, the beneficial alterations suggested by experience, and a detailed account of the operations on each section of the whole embarrassed district of navigation, extending between the towns of Waterford and New Baltimore, as well as those contemplated next year, are fully set forth in the report of the local engineer, marked E, to which I refer for more particular information.

Removal of the bar in the Delaware, near Fort Mifflin, Pennsylvania.—Fifteen thousand dollars were appropriated in July last for removing this bar, with a view to improve the harbor of Philadelphia. The officer to whom the subject was referred has made an examination of this obstruction, and reports that, in his opinion, no permanent good can be effected in any effort to remove the same. His whole communication on the subject is appended, marked F.

Chester harbor, Pennsylvania.—Three thousand dollars were appropriated for the repairs of this harbor. The amount is now pledged for repairing the timber-work of the five piers and wharves, with the three connecting bridges, forming the harbor. The plan adopted has been, first, to renew the most defective part of the works and progress with the other parts until the funds should be exhausted. The southern pier, wharf, and the connecting bridge, with their mooring posts, have been completed, and some progress made in cutting away the defective timbers of the northern piers. It is anticipated that the wood-work of these will be completed by the first of December, and filled as far as the material from the old work will allow, when the available funds will be absorbed, and a small additional sum required to perfect and complete the work. This harbor was the only one last winter in a condition to give even a partial shelter to vessels. The present repairs will make it more secure for some years.

Wilmington harbor, Delaware.—Fifteen thousand dollars were appropriated for improving this harbor, by removing the bar at the mouth of Christiana river, according to the plan recommended by Major Bache, of the topographical engineers. Three of the members of the city council of Wilmington have been selected to take charge of the necessary operations. It has been thought advisable to omit so much of the "plan of Major Bache" as forms any part of the projected jettee in the Delaware at the mouth of the river, as it is not now seen that it will be productive of the desired results. The estimate made by the local agents, for the completion of this improvement, exceeds the original estimate of Major Bache by the sum of \$11,165 42, which is explained: 1st, by the greater cost of blasting and removing the rocks below the old ferry; 2d, the difference between the actual cost of the requisite and necessary machinery and that of the estimate; and 3d, by the additional amount "for services in extending the operation of dredging through the year 1838." But by omitting the construction of the jettee, as above recommended, the excess of the cost of executing the project, as estimated by the local agents, will be \$934 24, leaving \$15,747 73 to be appropriated next year.

Harbor of Newcastle, Delaware.—The repairs of the harbors on the Delaware river, for protecting its commerce against floating ice, owing to the limited appropriation, and being contrary to the plan recommended from year to year, have progressed in a manner to do but little good until this season. The work executed under the appropriation of 1835 consisted in cutting down to low-water mark, and rebuilding with large masses of granite, one of the old piers at Newcastle, and the removal to low-water mark of the wharf work connecting it with the shore. This has served to check any further deposits within the harbor, and to remove a portion of what had previously accumulated. The appropriation of the last session of Congress, for the further improvement of this harbor, became available at so late a period that timber in the large quantities required for the construction of the two contemplated piers could not be obtained in any of the markets accessible to this place. A sufficiency for one pier, up to low-water mark, was obtained with some difficulty, and at a high price. No wharf-builder being found willing to contract for doing the work this season, it was undertaken by the day. Such progress has been made in its construction that no doubt remains of its being so far finished as to be sunk in position before operations are suspended for the winter.

Some progress has also been made in preparing and cutting large masses of stone to form all that part of the pier above low water, and the whole is contracted to be delivered by the end of December. A centre "mooring pier," the wood-work of which was much decayed, has been removed and partially rebuilt with masonry. Contracts will be made this fall for the supply of timber needed next spring for the second pier; the balance of funds on hand being sufficient to authorize this course, upon the supposition that Congress will now grant the sum necessary to complete the work as designed, and calculated to make a safe, permanent, and secure harbor, as required by the compact between Delaware and the United States. Ten per cent. more than the original estimate for this harbor will be necessary, in consequence of the prolonged period of executing the work, the increased prices of materials, and the high advance in wages of mechanics and laborers, since it was proposed.

In addition to the above-mentioned harbors, the commerce of the Delaware will find security at Six Piers, and at near Fort Mifflin, repaired as part of the defences of the river. The harbor first used by vessels ascending the bay, Port Penn, remains in a dilapidated state. The officer charged with the superintendence of the works on the Delaware has found no time to examine its condition, or to prepare a statement of the extent of the repair it may require, nor are any funds available for making any temporary repairs or renewing mooring posts to give partial security to vessels the approaching winter.

Delaware breakwater.—The further prosecution of this work was assigned to this department the past season. The operations of the year are detailed in the report of the general superintendent, marked G. The quantity of work done, and the protection at this time afforded, will there be seen, as well as the alterations proposed and the benefits anticipated. Concurring fully in these views, I recommend them to your favorable consideration, and have embraced in the annual estimates the amount deemed necessary for 1837.

Harbor of Baltimore, Maryland.—Twenty thousand dollars were appropriated by Congress at their last session for deepening this harbor, the application of which, upon the recommendation of the mayor, was placed in the hands of the port wardens of the city. The plan proposed by them, and acceded to by the department, was to hire the dredging apparatus belonging to the city of Baltimore; believing that the wishes of Congress and the interests of the city would be complied with more effectually than by

any other method, as the season had far advanced. About one-half the amount appropriated had been expended up to the 30th of September.

Dismal Swamp canal, Virginia.—Fifteen thousand dollars were granted by Congress at its last session for improving the debouches of this canal. The department having no officer to place in charge of the work, its execution was offered to the board of directors of the canal company, which, after some reluctance on their part, was accepted, as being the only way by which any portion of the appropriation could be applied this season, or the benefits expected be derived.

Ocracoke inlet, North Carolina.—It was contemplated to apply the appropriation granted by Congress at its last session, according to the project then recommended, in constructing a jettee to throw the current of Wallace's channel over the shoal separating that channel from Beacon island slue. Owing to the exposed position of the proposed jettee, it was desirable to enter upon its construction in that season of the year most favorable for the operation, and which experience has shown to be between April and August; after which time violent gales are frequent on that part of the coast. The appropriation not becoming available till late in July, it was considered most prudent to defer the commencement of the work till next year. The price of labor in that section of country has advanced 25 per cent., which of course will increase the cost of the jettee, and \$1,800 are asked for, in addition to the funds now available.

By a register kept by the collector of Ocracoke, it is ascertained that 1,116 vessels have passed out of the inlet within the last year; from which it is estimated that the trade passing through this inlet furnishes constant employment for ninety-three vessels, or for about 9,300 tons.

Pamlico river, North Carolina.—An appropriation of \$5,000 for improving the navigation of this river below the town of Washington was made at the last session of Congress. Its object was to cut a channel through a shoal which prevents vessels drawing over seven feet water from coming up to the town. No preliminary surveys or observations having been made, and the other duties of the officer to whom the general direction of the operations was obliged to be committed not allowing him to make the necessary examinations, the dredging machine employed at Ocracoke inlet was set to work in the present channel-way. The shoal is about 600 yards wide, and 9,636 cubic yards have been excavated and removed. It is expected that a channel fifty yards wide will be opened with the available funds, through which vessels drawing eight feet of water may pass. Should a prosecution of this work be determined on, it is recommended that a survey be commenced as soon as possible, and an accurate examination be made of the currents of the river in all its stages.

Beaufort, North Carolina.—Upon the arrival of the officer at Beaufort charged with the application of the appropriation of \$5,000 for the improvement of this harbor, he had reason to suppose that it was the intention of Congress to appropriate it for the purpose of removing obstructions in *Cove sound*, the only navigable communication leading into the interior of the State, and that a mistake had been made in the caption of the bill. From such data as were in his possession he was unable to suggest any project for expending \$5,000, "for the improvement of the harbor of Beaufort," by which any good or permanent effect might be produced, and the department could not authorize its appropriation to any other.

New river, North Carolina.—An appropriation of \$5,000 was also made for removing obstructions at the mouth of this river. The act of appropriation contemplated the application of the dredge-boat belonging to the Cape Fear river for this purpose. Upon examination it was found that the shoalness of the water at the mouth of the river rendered it impracticable to work there either the Cape Fear or Ocracoke boat. The necessity of a survey at this point for the purpose of ascertaining the best mode of improving the navigation of the river is more apparent than at Pamlico, and is likewise recommended.

Cape Fear river, North Carolina.—The plan which has been pursued for the improvement of this river, both by the State of North Carolina and the United States, is that recommended by Mr. Fulton, civil engineer of North Carolina, with certain modifications. It consists in shutting up all the channels at those points where obstructions are caused by their intersection, except the one selected as the most eligible, and diminishing the width of the river by means of jetties, thereby producing more uniformity in the current, a greater velocity, and a corroding action on the bed of the river. Dredging was also to be used in aid of these works, relying upon the increased velocity of the current to prevent future deposits in the channel. The execution of this plan was commenced by the State of North Carolina in 1823, and acted on till 1829. In 1829 the United States took charge of the operations, which have consisted in the construction of jetties and in the excavation of the channel, up to the present period, with but few interruptions. Five of the jetties recommended have been constructed, and one, built by the State, repaired. In 1827 nine feet was the greatest draught of water that could be carried to Wilmington; now vessels drawing twelve and a half feet can pass over the shoals, and it is anticipated that, by prosecuting the system, vessels drawing fourteen feet will be enabled to reach the wharves of Wilmington—the greatest depth that can be carried over the bar at the mouth of the river. The operations of the past season have been confined to dredging on the middle shoal, securing jettee No. 3, and repairing and securing jettee No. 7. It is contemplated the next year to reconstruct the dike between Campbell's island and the western shore, built by the State of North Carolina, to place in good repair the jetties now constructed, remove the logs and stumps from the channel, and, if necessary, construct the jetties to act on the lower shoal, for which an appropriation is asked of \$10,000. The value of these improvements to the State of North Carolina will be seen when it is recollected that the trade of Wilmington embraces the exports and imports for one-third of the State; that its exports consist in naval stores, sawed lumber, timber, staves, shingles, rice, cotton, tobacco, and flaxseed, besides some other articles; that the shipping engaged in its trade amounts to 76,931 tons, besides a large amount of tonnage in coasting vessels, carrying domestic produce, not included.

The cost of these improvements has exceeded the estimates, which is attributable, in fact, to the impossibility of predicting, with any degree of certainty, the effects of hydraulic operations, and the results of injuries and disasters beyond human control.

Savannah river, Georgia.—Operations on this river have been embarrassed by failing to obtain the authority of South Carolina to proceed with the obstruction between Hutchinson and Argyle islands; by the employment in Florida of the steamboat used in towing the loaded flats to a place of deposit; by sickness and desertion among the hands, and the impracticability of procuring another boat to supply the place of the one withdrawn. The report of the local engineer enters into a detail of the subjects here touched on, and will show the efforts that have been made to obtain more favorable results. From these considerations, and a desire to lay before you full information on this subject, the whole report is appended, marked H. At the same time the question is respectfully submitted for your consideration, What steps must now be taken

as regards that part of the system of improvement adopted relating to the proposed obstruction between Hutchinson and Argyle islands?

Brunswick harbor, Georgia.—Ten thousand dollars were appropriated by Congress in July last for the improvement of the harbor by removing the Brunswick bar. The officer charged with the superintendence of the work reports that, owing to the late day on which the funds became available and the pressure of other duties, nothing has yet been done further than to elicit information.

Inland pass between St. Mary's and St. John's, Florida.—During the past year a dredge-boat, two mud flats, and one wood flat, have been completed for the service of this work. From the time the dredge-boat was established at work, which did not take place till late in June, 1,300 cubic yards of mud, &c., have been removed from the channel way, and is represented to have improved materially the passage. The operation of dredging at this place is necessarily slow, as the boat can only work while afloat, and can load but two flats at about high water. The officer detailed on this service, and who had commenced a survey for the purpose of ascertaining the best mode of surmounting the difficulties of many short turns in a narrow and shallow channel, had made such little progress when his services were required with his company, that his labor and the expense of preliminary preparations were lost. A complete project of this improvement has not yet been made for want of an accurate survey.

Apalachicola, Florida.—Ten thousand dollars were appropriated by Congress at its last session for removing a mud shoal, called Bulkhead, from East Pass to this place. It was deemed advisable, upon the recommendation of the mayor of the town, to postpone the commencement of this work until the results of the operations in the *strait channel* by Mr. Griswold should be exhibited. In the meantime, the officer charged with the general superintendence of the work will cause an examination to be made of the East Pass channel to ascertain the nature and extent of the impediments it contains.

Mobile harbor, Alabama.—It has been stated in the previous annual reports that the operations for improving the Choctaw Pass in this harbor had been carried on by contract. The dredging machine used by the contractor was so much injured by storms in November last as to be rendered unworthy of repair. Up to that time the contractor appeared to have been diligent in the prosecution of his work, and efforts were made to renew the contract, which he declined. Proposals have since been invited for the excavation of the channel, in order to afford it increased depth and width, without success, though the department is given to understand that a gentleman from New Orleans has offered to undertake the work; and it is hoped that an agreement will be made by which this work will no longer be delayed.

Pasagoula river, Mississippi.—Owing to the necessity of making considerable repairs in the dredging machine, and also to the difficulty and expense of carrying on the work during the severe winds and storms which prevail in the winter and spring months, operations for the improvement of this river were not commenced till late in April. The work has since been prosecuted with great energy by the present contractor, and with as much success as circumstances would admit; but owing to the ruinous state of the machine, and the unusually low tides which have prevailed during the third quarter, as large an amount of earth has not been excavated as might otherwise have been expected. Should the weather prove at all favorable, the work will be completed as far as proposed during the ensuing winter. The examinations made of the work executed the preceding, as well as the current year, go to show that the outer extremity of the pass, which is excavated through soft mud, as feared in my last report, fills up nearly as fast as excavated, and that four feet is the greatest depth of water that can be depended on; and it seems doubtful whether even this depth will continue for any length of time. No further appropriation will be necessary.

Red river, Louisiana.—The progress made in removing the great raft on this river will be seen by reference to the report of Captain Shreve, marked I. In accordance with his recommendation, made in former years, and of the necessity of which he is more and more convinced, \$15,000 are embraced in the estimates for next year for working a dredge-boat in order to keep open the channel way, and \$8,000 for building the necessary boat, in addition to the \$15,000 appropriated last year for the purpose, and which, from the increased price of materials and labor of all kinds, is not sufficient. \$65,000 are, besides, asked for by Captain Shreve for his operations this winter. A less sum he thinks will be unavailing, and the importance of its early appropriation he represents in an urgent manner, to which I beg leave to add my earnest recommendation.

Ohio and Mississippi rivers, below the Falls of the Ohio.—The report of the operations for the improvement of these rivers from the falls of the Ohio to the mouth of the Mississippi is annexed, marked K, from which will be seen the progress made during the year, and their present condition. To this is added the reports of the officer of this department who inspected these works.

Ohio river, above the Falls.—The report from the officer charged with the improvements of this portion of the river has not yet been received.

Arkansas river, Arkansas.—During the past working season nine hundred and twenty-eight snags have been removed from the bed of the river, and fourteen hundred and eighty-one trees cut off its sand-bars and under its banks. Although by these means its navigation has been considerably benefited, yet much remains to be done to render it safe. The accumulation of timber in this river is very rapid, owing to the great number of trees deposited in the channel by the caving in of its banks, particularly below Little Rock, and which must continue until the lands on the banks are cleared, or the timber felled from them. This latter plan is considered very essential to the permanency of any improvement that may be made by the removal of the snags now in the channel.

Cumberland river.—The wing dam and embankments at Line islands, extending in length one thousand six hundred and eighty-seven yards, with a base of from twelve to eighteen feet, and six feet high, have been completed, and are found to answer all the purposes intended, and to give a safe and uniform channel the whole length of the islands. The improvements at Dover shoals, in Tennessee, have been commenced by extending a wing dam from the left bank for the purpose of forcing the current down the right shore. Owing to the large quantity of material at hand, this work has advanced rapidly, and four hundred and fifty yards of the embankment, from three and a half to four feet high, have been completed. Two hundred and eighty-three snags, and one hundred and eighty-seven logs have been removed by the snag boat from the channel-way between Nashville island and the Big Eddy, when operations were suspended by high water. In consequence of a disaster to the boat in March last, her aid has been lost to the operations this season. Arrangements have been made to rebuild her this winter. On the 8th of August the river rose at Clarksville twenty-five feet in thirteen hours; all the small streams from Harpeth to Line islands overflowed their banks, forcing into the river whole trees, logs, and rocks, and depositing at some places bars of gravel and sand across the river, making its navigation intricate and dangerous. It is estimated by the local agent that, to repair the damages of the late freshet, it will cost from three to four

thousand dollars. For further particulars relating to the improvement of this river I refer to the report of the officer of engineers, who has made an inspection of the works, marked L.

Pier near the city of St. Louis, Missouri.—Fifteen thousand dollars were appropriated by Congress at its last session for building a pier to give direction to the current of the Mississippi near this place. The department having no officer available, the execution of the work was offered to the corporate authorities of St. Louis, who declined its acceptance by a resolution of their board of aldermen. Captain Shreve was afterwards directed to take the first opportunity his duties would allow to draw up a project of the proposed pier, and commit its construction to some suitable person. He has informed the department that the season is too far advanced to attempt anything before next summer, and that the months of June or July next will be as early as the work can be commenced to any advantage. He, at the same time, has suggested the propriety of making a further appropriation, as the sum now available is too small to accomplish any work sufficient to remove the bar from the harbor of St. Louis, or to prevent its encroachment on the landing; and that not less than \$50,000, in his opinion, can effect the object in view.

Mississippi river above the mouth of the Ohio, and the Missouri river.—Forty thousand dollars were appropriated at the last session of Congress for improving the Mississippi river above the mouth of the Ohio river, and the Missouri river. The report of Captain Shreve, to whom the duty was assigned, is annexed, marked M.

LIGHT-HOUSES AND BEACON-LIGHTS.

The condition of the light-houses on the south shore of Lake Erie will be seen from the report of the officer to whom their construction is committed, (marked A.)

The agent of the department for those at Genesee and Big Sodus reports that he has not found it necessary to extend his operations beyond the preparation of copper fixtures, frames, lanterns, and lamps, which have not been placed in the beacons, as he wished to wait for a firm subsidence of the works into the bed of the lake, the only security of their permanency. He also reports that during a late storm the beacon at Genesee river has subsided and fallen; that, from the lateness of the season, he shall not rebuild it before spring, and for which he has sufficient funds on hand.

The operations for the light-house at Oswego are nearly brought to a close. The tower is completed; the iron, glass, and copper for the lantern and windows procured, and the lantern itself nearly completed. The lamps have been ordered by the superintendent of light-houses, and are expected in a few days. The funds now available it is expected will finish the work.

Nothing has been done towards the construction of the light-house on Goat island the past season. So soon as the appropriation granted in fulfilment of the estimate became available, proposals were invited for the construction of the whole work, or the supplying of materials. Only one proposal being received upon this invitation, and that for a part of the work, offers were made to persons experienced in such operations, but none were found willing to undertake it for a sum justified by the appropriation. It was then wished to commence the work immediately by daily labor, which was found impracticable, as materials could not be collected before operations would have to be suspended by the weather. Proposals were advertised anew for beginning the work in the spring, which, if unsuccessful, will be commenced by daily labor.

ROADS.

Roads from Detroit to Fort Gratiot, and to the mouth of Grand river, in Michigan.—No appropriations were made for these roads at the last session of Congress; nor has any report from the agent of the department been received stating their present condition. The first has been completed, as stated in my last report; and the arrearages due, as there explained, have not been liquidated for want of funds.

Road from Detroit to Chicago; Saginaw road; territorial road from Sheldon's to the mouth of St. Joseph's; territorial road from Niles to the mouth of the river St. Joseph's; territorial road from Clinton to the rapids of Grand river; road from Port Lawrence to Adrian; road from Vistula (now Toledo) westwardly to the Indiana State line.—For the condition of these roads I must refer you to my last annual report. No appropriations have since been made for their continuance, nor has the department received any report of their present condition. The presence of the officers charged with their superintendence was necessary with their companies, and I have not learned what progress has been made in the application of the balances of former appropriations.

Road from La Plaisance bay to the road leading from Detroit to Chicago.—The progress on this road is not such as was anticipated or could be wished. The whole is under contract for a certain portion of labor, which should have been completed some time since. Yet, from the commencement of the season, scarcely a week has elapsed of weather favorable to operations. Constant rains have kept the earth in a state unfit for working, and the enormous price of provisions and labor during the whole season has interfered with the contractors. Such parts as do not seem likely to be finished without this course will be resold. The importance of completing this road according to the plan commenced by the department in 1833, and which had to be abandoned for a more economical system, is urged in strong terms by the superintendent. He has submitted an estimate for this purpose amounting to \$23,000.

Road from Line creek to Chattahoochee river, Alabama.—In my last annual report it was stated that all the funds for this road had been expended; and that, from a misapprehension of the agent, there was an arrearage due of \$1,544 50, for which no appropriation was made, and which is again inserted in the estimates for next year.

Road from Memphis to the St. Francis river.—The efforts that have been made to advance the construction of this road, and the many causes that have concurred to retard it, together with the progress in the work, are fully set forth in the report of the superintendent, which is hereto appended, (marked N,) for your information.

Cumberland road in Indiana, and Illinois.—No report has been received from the officer charged with this work. It will be laid before you upon its arrival.

Cumberland road in Ohio.—For the condition of that portion of this road yet in the hands of the general government, as well as for the progress made in its construction, I beg leave to refer to the report of the superintendent herewith submitted, marked O.

Cumberland road, east of the Ohio.—The report of the superintendent of that portion of this road lying in the States of Pennsylvania and Maryland, giving a detailed account of the progress made in its repair, is appended, marked P. It will be perceived that the completion of the bridge over Dunlap's creek, which was anticipated at the date of my last report, has been delayed by the unprecedented wet weather, high water in the river, and scarcity of mechanics. The difficulties interposed by the authorities of Bridgeport to its location caused so much delay in commencing the masonry for the abutments that the contractors, who had engaged to finish the work before the great rise in the price of labor, provisions, and mechanics' wages took place, not being able to commence their operations early last season, declined to comply this year with the terms of the contract made the last, and thus caused an increase in the cost of its construction. The great rise in the price of iron, of which the bridge is to be constructed, from \$35 to \$55 per ton, and the withdrawal of all the officers of the army has made it necessary to employ civil agents, which was not considered in the original estimate, and also materially added to its cost, and now renders necessary for its completion and to perfect the whole work \$7,183 63, or a fraction less than one per cent. on the original estimate. All the repairs are finished except the execution of the contract for completing the bridge over Will's creek, and that for furnishing the masonry, casting the iron work and putting it in place for Dunlap's creek bridge.

That portion of the road lying in the State of Virginia having been turned over to the State the last year, I have nothing to communicate concerning it.

Military Academy, West Point.—The state of this institution, as well as its capacity for great usefulness, are exhibited in the annexed report of the last board of visitors, marked Q. All the wants of the academy respecting the course of tuition, the necessity of larger, more secure, and comfortable buildings, are there detailed; and I beg leave particularly to call your attention to the present inadequate provision for imparting instruction in the studies of chemistry, mineralogy, and geology, the last two of which are now entirely omitted, as well as to the insufficiency of the rooms provided for the professors of natural philosophy and chemistry. The remarks of the board in relation to the course of *religious instruction* deserve your serious consideration, and the importance that is attached to a separation of the duties of chaplain from the professorship of ethics. The introduction of cavalry tactics into the school is, under the present organization of the army, so essential that I have embraced in the estimates for next year a sum for the purchase of horses necessary for its instruction, and for that of light artillery, and which is required by the demands of actual service and the policy of government, more than to complete the military education of the cadets.

In the general estimate of funds required for the current expenses of the academy has been included the cost of erecting a building for recitation and military exercises, new barracks for the military detachment stationed at the post, and a barn and public stables. The building first named has been commenced under former appropriations, and will unite under one roof a large hall for military exercises, sixteen recitation rooms, and quarters for all the assistant professors connected with the institution. The condition of those now used for these purposes has been so fully set forth by the board of visitors that no further recommendation can be wanting to enlist your favorable consideration.

Site for fortifications on Lake Champlain.—The resolution of the Senate of the 18th of April last, referred to this department, has not yet been complied with. A requisition for the survey was made on July 12, and which it is believed has not been completed, from the officer detailed for the purpose being assigned to other duties.

Site for a fort on the Gulf coast of Mississippi.—A requisition was made on the 15th of July last for a brigade of topographical engineers to make the survey in question, in order to comply with the resolution of the Senate of April 20, which was referred to this department. The report of the survey has not yet been received.

Mouth of the Mississippi river.—Seventy-five thousand dollars for increasing the depth of water at the mouth of this river was appropriated by Congress at its last session, which, by the act of appropriation, required a previous survey before it could be applied. A request was made on July 12 that a brigade of topographical engineers should report to the engineer officer on the Gulf of Mexico for the purpose; but having recently learned that no topographical officers could enter on the duty this fall, the whole subject has been committed to that officer.

Office of the chief engineer.—The business of the office has been steadily increasing for many years, and is constantly augmented by reference of new objects provided for at each succeeding session of Congress. An idea of this increase may be gathered from the fact that in 1823 the whole amount of funds referred for application was \$520,150, and which has regularly augmented up to the present time to \$3,643,271 76. The duties of the clerks have consequently so increased that a proper record of transactions cannot be kept up; and the salary allowed, while much below that in other departments whose business, whether in magnitude or responsibility, is believed to be no greater, is not sufficient to remunerate them for their services, nor to command such as either the interest or despatch of the public business requires.

It will be seen by the foregoing report of the operations that in many instances no provision could be made for applying certain appropriations to the objects intended, while in others the arrangements, though the best within the control of the department, were not such as could have been wished. The desire to fulfil the wishes of Congress led me to impose upon the officers of the department more duty than they can properly execute, and more, I am aware, than the interests of the separate works would authorize. However frequently and earnestly I have represented the impolicy of this course, I cannot refrain from bringing before you the propriety of adopting some measures either to reduce the duties now devolved upon the department, or to enlarge its powers of action commensurate with the wants of the service. The reasons for such a step, drawn and substantiated by the annual history of operations, have been so often given that they need not now be repeated; and I will only add that under the present organization of the corps of engineers, the wishes of Congress, so far as they depend upon this branch of the service, cannot be complied with, the public interest cannot be attended to, nor the defence of the country keep pace with the number of appropriations. Under these circumstances, I must again recommend that the number of clerks in the office be increased to seven, with salaries equal to those in the civil departments, and that the corps of engineers be doubled in its numbers.

All of which is respectfully submitted.

C. GRATIOT, *Chief Engineer.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

No. 1.

Statement exhibiting the fiscal concerns of the Engineer department for the year ending September 30, 1836, in which the funds that had accrued within that period, and the manner of accruing, are stated and accounted for, by showing their application.

Designation of the works.	Available for 1836, and whence derived.			Amount available accounted for.			
	From appropriations for 1836.	From balances remaining undrawn from the treasury, and in the hands of agents, September 30, 1835.	Aggregate available.	Amount applied, corresponding with the amount of accounts rendered to September 30, 1836.	Amount undrawn from the treasury October 1, 1836.	Balances in the hands of agents October 1, 1836.	Aggregate accounted for, corresponding with the aggregate available.

A.

Annual report.—Works on south shore of Lake Erie.

OFFICE OF SUPERINTENDENT PUBLIC WORKS, *Lake Erie, Buffalo, N. Y., September 20, 1836.*

SIR: I have the honor to report that I assumed the duties of general superintendent of such of the works on the south shore of Lake Erie as are confided to the engineer department, by your direction, from the 1st to the 9th of August last; my predecessor having on the last named day ceased to disburse.

With the remark, applicable alike to every work on this lake, that the appropriations were not received for this year until late in the month of August, and that the season from that time has been such a one as has never before been known, of continued and violent storms, generally from some northwardly direction, with the water of the lake, on an average, at two feet eight inches greater height during the whole season than it has been in any season for twelve years past, I offer the following report of the progress of the works:

Black Rock, New York.—The funds appropriated for this work have been principally applied to the completion of the mole on Bird island; and this has been very effectually accomplished. About 300 feet of this work have been put down this season; the quantity of stone used is 200 cords. The whole extent of the mole is now 620 feet in length, with a base of 30 feet, and raised 3 feet above the ordinary level of the lake—a solid and permanent structure, entirely of stone. It is found to answer perfectly the purposes of its construction. 2d. The transverse pier. This work, during the last fall and winter, sustained some damage by the displacing of the large coping stone; these have been replaced, and the work repaired in a very thorough manner. 3d. The pier running from the shore for the purpose of arresting the sand and preventing its accumulation at the mouth of the harbor. A portion of this work, of about 220 feet, was removed during the recent gale on the lake; but the available means will not allow it to be repaired this season. It will be secured from further damage without delay. To repair this and to construct a similar work at about 300 yards up the lake, which is deemed quite necessary, the sand having accumulated so as nearly to have passed around the head of the present pier, the estimate, marked A, is submitted. The drawings heretofore submitted to the department by Lieutenant Brown and Colonel Totten render it unnecessary for me, at this time, to do more than simply to refer to that of the latter. The pier heretofore constructed is near the point E. The accumulation of sand on the southeastwardly side of this renders either the construction of a similar work about 300 yards southeastwardly from this, or the extension of the present work, necessary. As the former would be attended with the least expense, it is respectfully recommended.

Buffalo harbor, New York.—1st. During this season the breach made in the flagging on the summit of the mole around the light-house by the storm last November has been repaired; the stone being now replaced on edge, firmly wedged in the manner adopted for the inclined plane of the same work. 2d. The breaches in the inclined plane near the shore (made during the above-named storm in November last) have been effectually repaired. 3d. The cross wall has been completed. 4th. The old piles which were not in a line with the work have been pulled up, and a row of contiguous piles driven in all the vacant spaces in front of the towing path, extending to the easternmost bounds of the public ground. 5th. The whole of the towing path wall, flagging, and stone posts are placed and complete. 6th. The shallows in front of the works and public land have been dredged, and portions of the old obstructions have been removed; this excellent and important work is completed. A small appropriation is required to repay the advances made by the superintendent, Isaac S. Smith, esq., for which see accompanying estimate, marked B.

Dunkirk harbor, New York.—The progress on this work during the season has consisted in—1st. The building up to five feet in height above the surface of the water and finishing off 156 feet of the west pier, and 166 feet to the height of four feet above the water—making 322 feet. Of the foregoing, 120 feet left unfinished last fall was carried away by storms and ice to three and a half feet below the water, and is now rebuilt. This portion of the work is constructed in a depth of ten feet of water, and is twenty-two feet in width. The west pier is entirely complete on the present plan. 2d. Building up 200 feet of the west end of the outer pier to the height of four feet above the surface of the water. To repair this effectually it was necessary to cut down and remove, one foot below the surface, 140 feet of this work during this season. This is also now complete and in good condition. 3d. Filling up with stone, plank-ing, and capping 280 feet of the outer pier left unfinished last fall, the stone having been carried out by the storms and ice during the gales last fall and winter to the depth of four feet; this is now finished and in good order. Of this pier 1,120 feet still remain to be repaired this season. The repairs will consist of filling it up anew with stone, heretofore carried away at different heights, and covering the whole anew with plank—a repair rendered necessary by the decayed state of the present plank and the danger of still further injury to the work from the storms. The harbor of Dunkirk has recently been rendered of vastly more importance than heretofore by the decision of the Hudson and Erie Railroad Company to terminate that great work at this place. It has been found a valuable harbor in the severe and sudden storms to which Lake Erie is liable, and it appears to be of infinite consequence that it should be made permanent. It is therefore respectfully recommended that the necessary steps should be taken the coming year to construct the piers of stone, laid in hydraulic cement above the water, in a manner somewhat similar to the construction of the mole at Buffalo harbor; and with this view the estimate, marked C, is respectfully submitted.

Erie (or Presque Isle) harbor, Pennsylvania.—The operations on this work commenced, in common with nearly every work on the lake, about the 10th of August. The nature and the necessity of this work have been so perfectly described heretofore that I confine myself to describing the work applied thereon since the above-named period. 1st. Repairs: The appropriation for 1835 having been exhausted in September of that year, leaving the work in an unfinished state, it has been exposed to the severe storms, and the action of the ice, and the currents from that time until August of this year. The injuries occurring from these causes have been heretofore described by the superintendent. The first step in the operations of this year has been to replace the side logs at different places where they had been taken off by the above causes, secure them, and fill the work anew with stone where it had been washed out. If the material can be procured, this portion of the work (generally the piers denominated the harbor piers) will be secured by flagging it with large stone—a means of security from the experiment on which last year the happiest results have followed. A crib-work has been constructed and filled with stone around

the houses belonging to the government, and situated on the north channel pier. This work is 140 feet in length, and was rendered absolutely necessary to protect those buildings, which, during this year, have been frequently floated by the extraordinarily high water of the lake. The residence of the light-house keeper being among those benefited and secured, the superintendent of the light-house joined in defraying the expense of this work, that department furnishing a moiety of the materials. Though the repairs are by no means complete, it is believed the work will be secured from further injury after placing the flagging. 2d. The new work: This was commenced, agreeably to the plan of the late superintendent, Lieutenant Brown, of the engineers, at the head of the island, (Presque Isle,) and has been prosecuted with vigor up to this time. The work, being principally on dry land or where but a small depth of water exists, has not been so liable to interruption by storms as other works on the lake; but the same cause has enhanced the expense of the transportation and deposit of stone within the cribs. Excellent pier work, in length 600 feet, has been placed and nearly completed, and is partially filled with stone, of which material 600 cords are deposited in and near the work for the purpose. Piles on each side of the pier have been driven about one-third of the present length, and will be driven along the whole, and the work secured this fall. A repair of the machinery and the construction of a new pile-driver for the foregoing work have been necessary. The work at the head of the island being at a distance of about four miles from any house, it became necessary, as a preliminary step, to erect barracks for the accommodation of the mechanics and laborers at that point; two frame houses, each 30 feet by 18, and a workshop and stables, have accordingly been built. The sum of \$9,102 has been expended of this year's appropriation, and the residue thereof will be advantageously expended during the season.

In all previous views of the great importance of this harbor I most fully concur, and respectfully recommend an early and vigorous prosecution of the work, on the present judicious plans, for the coming year. For this purpose the estimate, marked D, is submitted. Also, accompanying this report, is a drawing offered by the late superintendent, C. W. Kelso, esq., showing the amount and position of the new work of this year.

Conneaut harbor, Ohio.—The small appropriation made for this work has been applied thus far in the excavation of the bank of the creek at a point within the piers, with a view so far to widen the stream as to enable vessels to *turn* after entering the harbor, instead of backing out, as is now done—a process for steamboats of much difficulty, and even danger, from the sea dashed against the unprotected stern of the vessel. About 2,500 cubic yards have been removed of the earth, after the requisite preparations of coffer-dam and pumps had been made, and the excavation will be continued until the appropriation is expended. The accompanying sketch, forwarded by the superintendent of this work, will explain the nature of the improvement, which is doubtless quite necessary; and the estimate E is submitted for the work for 1837. It is not perceived that the sand beach has made any material advance on the piers since the last year, nor has it since then injured the harbor by deposit at its mouth. No repairs of the piers have been deemed necessary.

Ashtabula, Ohio.—The work already accomplished, and which will be accomplished this fall, consists of—1st. Continuing the piers: Six cribs, each 34 feet in length and 18 feet wide, have been framed and sunk, thus adding to the length of the west pier 204 feet, and carrying that work to a depth of from 10 to 12 feet of water; the average height from the bottom of the lake of this pier is 18 feet, well filled with stone; when finished, it will be 20 feet in height from the bottom of the lake; it will be perfectly secured this fall. 2d. Excavation: The rock, which had been the most serious obstacle to the entrance of vessels, has been removed by the dredge, after having been cut up by the machinery for the purpose to the depth of 21 inches in an average width of 50 feet, and effecting a channel 215 feet in length, and affording a depth of water of nine feet across the entire rock bar; much of the face of the rock which yet remains to be excavated has been laid bare by the removal by the dredge of a large quantity of sand, gravel, and pebbles. Estimate F is herewith submitted.

Beacon-light at Ashtabula.—This work is nearly completed, and will be in operation before the close of the season. It is a hexagonal structure of wood, substantially and handsomely built, of 14 feet diameter at the base, and 8½ feet at the disk. It is built on a foundation of strong crib-work 30 feet square, 21 feet in height from the bed of the lake, and nine feet in height above low-water mark, and perfectly secured with stone. The height will be 39 feet above the level of the lake, and the top of the dome 43 feet, reached by a winding staircase inside. Colored glass will be used to distinguish this beacon from others. This, with the lamps and reflectors, is procured. The estimate F, herewith submitted, includes an amount for rendering permanent the foundation of this structure. The appropriation of the whole amount of that estimate, as well for this as for the harbor improvement, is respectfully recommended.

Cunningham creek.—This work has had nearly the amount of the appropriation of this year (only \$1,275) expended on it, and the remainder will be expended during the season. The work from the shore has been connected with the crib foundation of the beacon-light, so that the latter is accessible. The foundation of the light-house has also been repaired, strengthened, and secured. It is, doubtless, known to the department that the present work is entirely incomplete, being but a small portion of the originally planned work. Estimate G is submitted herewith.

Grand River harbor, Ohio.—This work is probably more exposed to the violent storms than any other on the lake, and I am sorry to report that it has suffered considerably since the last annual report. The end of the west pier has been torn up by the action of the lake; the timber displaced, and a large body of stone, probably 100 cords, washed out and thrown over the pier, including also the flagging of large stone placed last fall to secure this work. Fortunately, the stone has been carried on the *outside* of the pier, precisely where it is in contemplation to deposit it in the plan for the permanent construction of the work. This damage is now in process of repair, and will be secured this fall so as to prevent further injury. It has been found by the local superintendent impossible to procure stone to prosecute the work this season on the plan contemplated in the estimate. The stone has heretofore been taken from the bed of the lake, but this supply has been cut off by the exceeding high water of the present year, and the weather has been too boisterous during the whole season to bring the material from a distance. It is still hoped that a period of good weather this fall may be found of sufficient length to proceed effectually with the operations to the extent of the appropriation; yet it is impossible to speak with certainty. A barrack for laborers has been constructed on the west side of the river, and the machinery in part repaired. A portion of the wood-work of the pier has been replaced.

Cleveland, Ohio.—The operations for rendering this work permanent, as contemplated by the appropriation of this year, have advanced satisfactorily. They consist principally, in the present state of the work, in throwing on the outside of the present piers stone to form an inclined plane, preparatory to

removing the wooden portions of the work above water, and replacing them by a permanent and proper work of masonry laid in cement. The stone this year consumed in this object has amounted to about 7,000 perches. The facilities offered by the quarries on the Ohio canal, terminating at this point, have enabled the superintendent to procure stone without difficulty and without interruption, though at a higher price, as are all materials, than heretofore. A large amount of materials has been procured, and will be used this season if, as is hoped, the weather will allow. These consist principally of large stone for the surface of the stone piers, piles, and timber. Some injuries sustained by the works in the gales of the last and the present season have been well repaired. An estimate, marked I, for the work during 1837 is submitted. The department is too well aware of the importance of this harbor, and of the necessity of its speedy and permanent completion, to render any other recommendation for the adoption of the estimate necessary.

Black River harbor, Ohio.—The operations on this work during the year consist of—1st. A general repair and rebuilding the machinery; the pile-driver has been rebuilt, and is now in admirable condition, and the crane and stone scows extensively repaired; new crane scows will doubtless speedily be found necessary, as the present ones are very old. 2d Repairing the present work, injured by the violent storms to which this harbor is greatly exposed; the east pier has been repaired by replacing timber carried away, driving piles anew, and filling it with stone at different points where it had been washed out. The water has been so high as to render dredging with the present machines impossible, and, indeed, unnecessary, until it falls to its ordinary level. A large amount of stone is on hand, and will be used the first favorable weather. Further excavation, by dredging away the gravel bar within the piers, should the lake be lower, will be necessary.

Beacon light-house at Black river.—The timber for the foundation is framed and in readiness to sink on the first favorable weather; the piles to secure this work are nearly all driven, in number 56, and would long since have been driven had the weather allowed. The stone to fill and secure this foundation has also been purchased and deposited on the piers ready for use. The timber for the entire light-house is framed and in readiness to erect, and the lantern entire is being made by contract. The work will doubtless be finished this fall.

Huron harbor, Ohio.—The appropriation for this harbor was made entirely for the purpose of repairing the works heretofore injured by the action of the elements. This has been so far done as to secure the work against any further probable injury from the same cause this season; but the weather has, as at other works, prevented the repairs to the extent necessary, and which it was hoped would before this have been made. It is still believed that the amount of the appropriation will be beneficially expended this fall, as the weather at this time is such as to allow of labor on the work. The beacon light-house constructed last season proves an excellent structure.—(See estimate L.)

La Plaisance pier.—This work continues in good repair, and will require no further appropriation.

River Raisin harbor ship canal.—Since the last annual report of this important work, the operations have advanced steadily and satisfactorily, although in several instances unfavorably interfered with by causes beyond the control of those engaged. The operations have been directed to—1st. Constructing a permanent dam on both sides of the canal, which will at the same time prevent the sliding of the heavy embankments, and secure them hereafter from suffering injury by the action of the water, whether from currents or the wash of steamboats in passing. Piles have been driven, in pursuance of this plan, on both sides of the work, at ten feet apart in a distance of about 3,000 feet; the whole length of the canal being 3,960 feet. Caps are framed and secured on these piles, along a distance of 2,020 feet; and sheet-piling driven behind the caps, and the dams entirely finished along 1,880 feet of the work. The unusual and continued high water and severe storms have prevented the entire completion of this portion of the labor during the season, but it will be done during the winter. 2d. The excavation. The water with which the work was last fall filled was pumped out, and the canal, during the winter and the early part of this season, completed to the length of 1,880 feet, excepting only the remains of the dams across it, two in number, and a small portion of the bottom of the work, not quite finished, when the laborers were driven from their work by an unprecedented rise in the water at the west end of the lake, and the forcing in of one of the cross dams. To explain this second occurrence of the accident, I beg leave to state the fact that an accurate observation has shown the mean height of Lake Erie at the western extremity to have been 2 feet 8 inches higher during the whole season, from April to September, than last year even, at which time it was considered unusually high. A highly respectable gentleman informs me that he has resided on the waters of the lake 44 years, and that he has never known the waters so high through any previous season by a difference of two feet. The water at this height interfered somewhat with the progress of the work; but when raised some feet in addition by a violent gale of wind from the north-east, the pressure became so unexpectedly great that the cross dam the furthest from the lake (not the dam which gave way last season) was crushed in, and the whole filled. The amount remaining of the appropriation for 1836 was so small that it was deemed preferable to apply it in the construction of the piers, and of machinery necessary to complete the work next season, rather than to remove the water again until the available amount should be sufficient to complete the excavation. If the water the coming season be at its ordinary level, it is still thought that economy will be consulted in completing the work with the spade; but if, on the contrary, the lake should continue at the present extraordinary height, it is recommended to complete the excavation by dredging. An offer has been submitted (by the contractors for the steam dredging machine) to execute the whole work of excavation at 20 cents per cubic yard; they using for the purpose the machine now being constructed, and the government completing the pile dam. 3d. Piers. These are well in progress, on each side of the mouth of the canal, to the distance of 450 feet into the lake, that being about half the requisite length. It has been found impossible to make a reasonable contract for timber or stone, and both are purchased in market. In addition to this, a quarry has been opened by laborers employed, and the stone is now being procured to fill the piers, principally in that manner. 4th. Mechanics have been employed in constructing an excellent pile-boat, stone, and crane scows for this and the coming season, and the repairing the old machinery.

It is greatly to be regretted, particularly in the case of this work, that the appropriation for the year had not been earlier made, and a sufficient amount to complete the work. The number of hands may be increased, without increasing the expense, except in proportion to the additional work done, and the excavation completed in one season. The winter is decidedly the season most favorable to this work, the excavation as well as the piers. There is not a shadow of doubt of the perfect and complete success of the work. An estimate for its completion on the present plan the coming year, marked M, is submitted, and the appropriation of the whole amount respectfully and earnestly recommended.

Steam dredging machine for Lake Erie.—An appropriation of \$8,000 was made at the last session of Congress for this object. The exceeding necessity of a dredging boat of this description has been felt, and its construction recommended by every engineer or superintendent of works on the lake from year to year. A contract has been made with Messrs. Lyon and Howard, of New York, for the construction of a boat and machinery; the latter to be so made as to secure the purposes of locomotion, as well as excavation. The smallest sum at which a boat calculated for service on the lake, and for moving from harbor to harbor as required, could be made, is \$15,500; and for this sum the boat is to be completed in June, 1837. With a view to the supervision of the general superintendent, during its construction, and with the entire approbation and preference of the contractors, the River Raisin harbor, Michigan, was the point selected for building. Probably at no place on the lake can it be built to greater advantage, and that is the point at which it is proposed first to put its qualities to the test. The difference between the amount of the appropriation and the necessary cost (\$7,500) has been apportioned, with the approbation of the department, amongst the different works on the lake, according to their available pecuniary means, as in case of all other contingencies. An estimate is submitted, marked N, for the decision of the department as to its recommendation for an appropriation for the purpose of refunding to the several works the amount contributed by them respectively for this object.

GENERAL REMARKS.

The operations on every work on Lake Erie may be carried on at 25 per cent. less cost, and far more certainty and rapidity, by receiving the amounts for prosecuting them early in the season. If the appropriations are made in season, more work may be done in June and July than in all the residue of the time in the year.

All of which is respectfully submitted by, general, with perfect respect, your obedient servant,
HENRY SMITH, *Captain U. S. Army, Sup. Pub. Works, Lake Erie.*

Brig. Gen. GRATIOT, *U. S. Army, Chief Engineer, Washington, D. C.*

CHARLES W. KELSO, *Superintendent Presque Isle Harbor.*

ERIE, Pennsylvania, September 30, 1836.

E.

Estimate of funds required for the operations at Conneaut river, Ohio, during the year 1837

For labor in excavating 40,000 yards of earth, at 16 cents per yard.....	\$6,400 00
For subsistence in doing the same....	1,000 00
Other contingencies, for tools, machinery, smithery, &c.....	400 00
Compensation for disbursing.....	200 00

Amount of estimate 8,000 00

REMARKS.

The object to be accomplished by the appropriation asked for at this time is, to carry out the plan of operation of last season, by excavating a suitable place in the channel of the Conneaut for *steamboats to wind*, and further improve the harbor, (according to a sketch herewith transmitted,) by excavating an elbow of land that projects into the river a few rods from its mouth, so as to afford a safe and commodious harbor for the numerous vessels that seek the Conneaut harbor for *safety in storms*. The above estimate, it is believed, will be sufficient to complete the desired object.

A. DART, *Agent.*

Approved and respectfully submitted.

H. SMITH, *Captain U. S. Army, on Engineer duty.*

F.

Estimate of funds required to complete the works at Ashtabula, Ohio, and the amount necessary for the operations of the year 1837.

Nature of operations to which the sum required will be applicable.	Extent.	To complete.		Amount required for the year 1837.
		Amount.	Aggregate.	
Raising old work.	Timber	15,968 feet	\$1,277 44	
	Stone.....	900 cords	4,050 00	
	Plank.....	14,000 feet	196 00	
	Spike.....	640 pounds	64 00	
	Iron.....	600 do	42 00	
	Carpentry	750 days	750 00	
	Common labor	1,820 do	910 00	
	Foreman	260 do	650 00	
	Boarding	280 weeks	560 00	
	Team work	30 days	60 00	
			8,559 44	\$5,400 44
Stone at angle W. pier	200 cords	900 00		
Stone at beacon pier	200 do	900 00		
Superintendent	260 days	520 00		
Forage	2 years	400 00		
Channel	{ Rock cutting	33,200 yards	3,200 00	
	{ Dredging	33,200 do	3,200 00	
			9,360 00	6,160 00
Excavating to enlarge inner harbor....	60,000 do	12,000 00		
			12,000 00	7,500 00
			29,919 44	19,060 44

Respectfully submitted.

H. SMITH, *Captain, on Engineer duty.*

G.

Report and estimate for 1837.

In pursuance of an order of the department, I have to report to you the present condition of the public works now under my charge at Cunningham creek, Ohio.

It is believed that the appropriations of the last session of Congress will be sufficient to accomplish the necessary repairs, and finish the present west pier and beacon-light at this place; the whole of which is expected to be used this season. There has been no appropriation for the extension of this work (except for beacon-light) since 1833. One was then asked for by the engineer in charge, and was also, recommended by Colonel Totten in his report of that year. The importance of this work is becoming more and more apparent, as the improvement of the country advances, and no appropriation, I think, can be made on Lake Erie where a small amount of money will be of as great public benefit.

I therefore recommend the extension of the works at this place on the same plan submitted in the report of the engineer in 1833, and now on file in the department; and for that purpose I make the following estimates, to wit:

For east pier, according to plan No. 2.

400 cords of stone, at \$4 per cord.....	\$1, 600 00
14,400 feet flat and squared timber, at 5 cents per foot, running measure.....	700 00
3,000 feet ties, at 3 cents per foot running measure.....	90 00
9,000 feet of plank, at \$15 per thousand.....	1, 350 00
Blacksmith's bill.....	840 00
2,000 pounds spike, at 12 cents.....	240 00
6 tons of bolt iron, at \$140 per ton.....	840 00
For labor and subsistence of hands.....	2, 750 00
2 crane scows and tools.....	550 00
Amount of estimate for east pier.....	<u>8, 960 00</u>

Estimate for breakwater, plan No. 2, 200 feet long, 28 feet wide, and 22 feet high.

19,330 feet square and flat timber, at 5 cents.....	\$966 50
8,000 feet of round ties, at 3 cents.....	240 00
550 cords of stone, at \$4 per cord.....	2, 200 00
4 tons of bolt iron, at \$140 per ton.....	560 00
1,500 pounds spike.....	180 00
5,600 feet of plank, at \$15 per thousand.....	840 00
2,000 feet white oak posts, at 8 cents per foot.....	160 00
For labor and subsisting hands.....	2, 975 00
Total amount for breakwater.....	<u>8, 121 50</u>

Total amount for east pier.....	\$8, 960 00
Total amount for breakwater.....	8, 121 50

17, 081 50

which is supposed to be sufficient for the completion of the works at this place, according to plan No. 2.

I would here remark that the rapid increase of business in the immediate vicinity of these works calls loudly for their completion, they being in the immediate vicinity of several of the most important iron-works in the north part of the State of Ohio, and demand such facilities as will enable them to do their business at that place; and no doubts remain as to the utility of the harbor, and of the perfect practicability of its construction on the plan alluded to. Therefore the above appropriations are advised to, and asked for the coming year, at Cunningham creek, Ohio.

OCTOBER 1, 1836.

R. HARPER, *Superintendent of Public Works.*

General C. GRATIOT, *Chief of the Engineer Department, United States.*

I.

Estimate of funds required for securing and rebuilding the public works constructing at Cleveland, in the State of Ohio, in a permanent and durable manner, with stone and masonry, for the year 1837, predicated on estimate, made out for this place, October 1, 1834, for one hundred and twenty-five thousand three hundred and twenty dollars.

Nature of workmanship, materials and contingencies embraced in the intended application of the funds required for the works, not including the present appropriation.	Extent.	Cost.	Remarks.
Perch of stone, at \$1.....	40, 000	\$40, 000	Stone to be laid in solid masonry, and to be placed outside the piers, to form an inclined plane.
Perch of stone, in block, at \$4.....	2, 000	8, 000	
Mechanics and laborers.....		4, 160	
Superintending.....		720	
Contingencies.....		800	
		53, 680	

A. W. WALWORTH, *Agent.*

CLEVELAND, Ohio, October 1, 1836.

Approved and respectfully submitted.

H. SMITH, *Captain United States Army.*

L.

HURON, Ohio, November 5, 1836.

SIR: The following estimate I have made, and now forward you, for the purpose of having an appropriation made to build our piers of stone:

The west pier is 68 rods long, (from the sand beach to the outer end to form an inclined plane,) 40 feet wide at the bottom, and 8 feet above the water. It will require 4,141 cords of stone, at \$6 per cord.....	\$24, 846 00
The east pier is 60 rods long, and to form an inclined plane, as above stated. It will require 3,654 cords of stone, at \$6 per cord.....	21, 924 00
	<u>46, 770 00</u>

For repairing the present piers next season it is estimated we shall require the following materials, viz:

300 sticks of timber, 30 feet long, 12 inches square, at \$2 each.....	\$600 00
450 sticks of timber, 13 feet long, for ties, at 50 cents each.....	225 00
150 cords of stone, at \$6 per cord.....	900 00
12,000 feet of plank, at \$20 per thousand feet.....	240 00
Labor, board, and tools.....	600 00
	<u>2, 565 00</u>

Yours, very respectfully,

JOHN B. WILBOR, *Supt of Public Works, Huron, Ohio.*

Captain HENRY SMITH, *U. S. Army, General Supt of Public Works on Lake Erie.*

M.

Estimate for 1837 of funds required to complete the River Raisin harbor, Michigan.

1. DAMS TO SUPPORT EMBANKMENT.

Piles, 300, at \$3 each, driven.....	\$900 00
Square timber for caps, 3,000 feet, at \$8 per foot, running measure.....	240 00
Plank, (2-inch sheet piling,) 60,000 feet, at \$12 per thousand.....	720 00
Carpentry in framing caps, and labor in driving sheet piles.....	960 00
	<u>\$2, 820 00</u>

2. EXCAVATION.

Canal, 83,627 cubic yards, at 20 cents per yard, (by contract).....	16, 725 40
River and between piers.....	10, 800 00
	<u>27, 525 40</u>
Carried forward.....	30, 345 40

	Brought forward.....	\$30,345 40	
3. PIERS.			
Placing cribs within the piles and planks now driven, with a view to permanent work; 26 cribs, each crib 30 feet long, 10 feet wide, and 8 feet high; timber 640 feet, at 10 cents per foot, placed.....	\$64 00		
Tie pieces, 40 in number, (5 to each course,) at 30 cents each.....	12 00		
Brush.....	2 00		
Cap pieces, 4 of 12 feet each, 48 feet, at 12½ cents per foot, placed..	6 00		
Workmanship and contingencies not included above.....	70 00		
26 cribs, at each.....	154 00	\$4,004 00	
Stone to fill 26 cribs, 612 cords, at \$6 per cord.....		3,672 00	7,676 00
For 500 feet additional pier-work on each side of outer harbor to 10 feet of water; 1,000 feet of pier; 34 cribs; for each crib, (30 feet long, 15 feet wide, and 14 feet high,) hewed timber, 1,260 feet, placed.....	88 00		
Tie pieces, 70, (5 to each course,) at 75 cents each, placed... ..	53 00		
Piles, 10, at \$3 each, driven.....	30 00		
Brush.....	5 00		
Cap pieces, 85 feet, at 12 cents per foot, placed.....	10 20		
Stone, 39 cords, at \$6 per cord, deposited.....	234 00		
Workmanship not included above, and contingencies.....	130 00		
34 cribs, at each.....	550 20		18,700 20
Superintendent, 12 months, at \$75 per month.....		900 00	
Commission on disbursements.....		730 00	
Contingencies, repairs, &c.....		3,000 00	4,630 00
Amount required.....			61,351 60

The amount now remaining unexpended of the appropriation for this year will be entirely expended this season, and the above estimate is predicated on the state in which that expenditure will leave the work.

In explanation of the excess of the present estimate and previous appropriations over the original estimate by the same officer, it is respectfully remarked:

1. That from causes which could not be known at the time of making the first estimate, and which have since been explained to the department, it was found necessary to change the original plan of simple excavation to one embracing the side-dams, an alteration by which economy, in the end, as well as durability are greatly consulted.

2. All labor and materials are from fifty to one hundred per cent. higher the last and the present year than in 1834, when the estimate was made. Labor (ordinary) was, for a laborer, from \$10 to \$12 per month. Now it is difficult to procure good hands at \$30 per month. Materials are in the same proportion.

3. The state of the lake and the weather the last season and the present (different from any previous year for many years) has materially enhanced the cost of the work done, and has caused additional expense from unforeseen inundations, high winds, and continued bad weather.

These causes combined fully account for the difference. But one cause in addition may, it is hoped, be mentioned without impropriety. The small sums appropriated cause a cessation of the work frequently when it could be prosecuted to the best advantage and with the best economy. Were a sum sufficient to complete it appropriated, and placed at the disposal of the chief engineer, economy as to time and means might be greatly consulted.

All of which is respectfully submitted.

H. SMITH, *Captain United States Army.*

N.

Estimate of funds required to refund to the different works on Lake Erie their respective proportions, advanced in 1836, for a steam dredging machine.

Names of the works.	Amount.
Black Rock harbor.....	\$143 50
Buffalo harbor.....	46 65
Dunkirk harbor.....	961 29
Presque Isle harbor.....	1,302 35
Conneaut harbor.....	217 02
Ashtabula harbor.....	353 86
Cunningham Creek harbor.....	110 72
Grand River harbor.....	695 06
Cleveland harbor.....	1,388 77
Black River harbor.....	580 83
Huron River harbor.....	397 60
River Raisin harbor.....	1,302 35
Total.....	7,500 00

C.

OSWEGO, October 13, 1836.

STA: At the time I took charge of the works, in the spring of 1833, the piers were completed according to the original plan; the stone mole for the protection of the west pier had been commenced, but nowhere finished. A considerable deposit of stone had been made in it, sufficient, it is believed, to have made a mound of the required dimensions, had they been stone of the proper kind and of sufficient size to have maintained their position by their weight; but up to the close of 1833 the stone deposited were as required by contract, a part weighing 1,000 pounds, or upwards, and the remainder from 100 to 500 pounds. These were moved by the action of the water with nearly the same facility as the gravel on the beach, and being a kind of sandstone (the only kind which can be procured in the immediate vicinity) which, when wet, is easily abraded, were constantly grinding and wasting, and the *debris*, in the form of sand, passing through the openings between the cribs and over the pier in large quantities, forming a sand bank inside. Vast quantities of stone were also thrown over in those places where the pier is only the width of a single crib, forming with the sand a bank which rises to within from four to six feet of the surface, and prevents vessels from lying alongside of the pier at those places. Where the pier has been fortified by counterforts, and is of double breadth, the sand was arrested in its progress through the pier, and the stone were principally thrown over on the counterforts.

In consequence of the unfinished state of the mole, the pier was much more exposed to injury than if there had been no deposit of stone outside, and required heavy repairs and some additional counterforts or buttresses inside for its support, which were made, besides depositing in the mole and counterforts about 1,606 cords of stone—the whole involving an expense of about \$7,123 for the year 1833. At the close of that season a considerable portion of the mole was raised above the water, and some parts as high as the top of the pier. The next spring no part of it was visible, and the water was from two to four feet deep along the outside of the pier, and the work was but little further advanced than it was the year before. This result convinced me that it was useless to throw in any more small stone, and accordingly, in 1834, I procured stone of from two to four tons each for that purpose. The operations of that year were limited to depositing about 1,630 cords of these stone in the mole, and repairing the damages of the preceding year, at an expense of about \$7,803. These stone were also found to be insufficient, but small portions of the mole remained above water the next spring.

In 1833 Colonel Totten, of the engineers, inspected the work, and recommended a plan for securing and rendering it permanent. His plan for securing the work was to raise the mole to a certain regular slope, and pave it with flat limestone, with their edges in a horizontal line, forming the surface, and their faces perpendicular to it. This would form a perfectly secure pavement, if the lower tier could rest against anything immovable, but a formidable difficulty arose in securing the foot of this pavement; no better mode, however, suggested itself at that time.

In conformity with Colonel Totten's plan, estimates were forwarded, in 1833, for paving the mole in the manner stated above, for raising the outside of the work eight feet higher, and for removing the wood-work, which was even at that time much decayed, and substituting masonry.

In the spring of 1835, having occasion to visit the stone quarries at Chaumont bay, to procure limestone for paving the mole and for the light-house, I found a bed of stone admirably adapted to the former object. It consisted of the upper tier of stone, about two feet thick, and separated by natural rifts, perfectly parallel, and from two to three feet apart, from which rectangular blocks could be broken off of any required lengths. The use of these obviated the difficulty of paving with small flags, and I accordingly adopted the plan of paving with these stone, placed in an inclined position, using blocks eight or ten feet long and weighing about five tons for the lower tier. These are placed side by side, with their upper surfaces forming an inclined plane, and running down as far below the surface as they can be placed with accuracy.—(See the accompanying drawing.)

The only difficulty still is in securing the foot of the pavement, but it is less formidable than with the small stone; they must rest upon the bank of large irregular stone thrown in promiscuously, but at the depth of four or five feet the action of the water is much less than at the surface. About 150 feet in length of this pavement were completed in 1835, presenting a surface of about 4,500 square feet.

This pavement was commenced at the west end of the pier, that being the portion of the work most decayed, and laid on a bed, which had been almost entirely formed that season, and consequently not thoroughly settled and compacted. It was laid down more as an experiment than as the result of a well-founded conviction of its success, and I confess I entertained some doubts of its stability; but it remains perfectly unmoved, although tried last fall by one of the severest gales ever experienced on the lake. I therefore proceed in this part of the work with the utmost confidence that it will answer the purpose for which it is designed.

The operations of 1835 on this work consisted in quarrying and depositing in the mole large stone for the foot of the pavement to rest against it, and small stone for the bed of the pavement, and depositing small stone in the cribs surrounding the foundation of the light-house. About 4,396 cords of stone procured from the quarries at this place were thus deposited; the large stone weighed from four to five tons each. About 1,115 tons of limestone were procured for paving the mole, and about 747 tons laid down in the pavement. The whole at an expense of \$13,380.

The operations this year have been very much embarrassed and retarded by the extraordinary high water in the lake, it having been about thirty-three inches above the ordinary level. The labor and expense of preparing the bed and placing the foot stones of the pavement were consequently greatly augmented, and the work of quarrying large stones for the base of the mole had to be abandoned entirely, in consequence of the water from the lake overflowing the quarry. There will therefore be required next year a further and considerable deposit of large stone in the mole.

The contract made last year with Colonel Camp, for 3,000 tons of limestone for paving mole, has been fulfilled, and a new contract made with him for 2,000 tons, on which he has delivered about 707 tons. A new contract has also been made with A. and S. Davis for 3,000 tons of the same kind of stone, on which they have delivered about 248 tons.

The operations this year, up to the 30th September, have been limited to removing the temporary construction around the foundation of the light-house, and rebuilding it in a more substantial manner. Quarrying and carrying out small stone for that object and for the bed of the pavement, and laying down about 450 feet in length, or about 13,500 square feet of pavement, making the whole length of pavement

finished 600 feet; 2,843 tons of paving-stones have been received, and about 2,250 tons laid in the mole; the whole involving an expense of \$12,894. The pier enclosing the foundation of the light-house, intended also to support the pier head, is nearly ready for the flooring and planking.

The substitution of the large block for the small flags in the pavement will evidently require an alteration of the ultimate profile of the work. I propose, in lieu of the curved surface, the masonry wall eight feet high, as represented in the drawing which accompanies this report; the outer face of this wall to be constructed of the same kind of stones used in the pavement, and laid in water lime, with a heavy coping projecting three or four inches, as represented in the drawing, to throw the sheet of water back. The inner wall of the breakwater and the inner wall of the pier may be of smaller stone.

I have made an estimate for completing the work, founded upon the estimates forwarded in 1833, with such alterations as the alteration of the profile and the increased price of labor and materials of every kind demand, which is forwarded herewith.

The amount called for by the estimate is \$111,942, about one-third of which, or \$37,733, in addition to the balance of the old appropriation, may be expended to advantage next year. I would therefore respectfully recommend that Congress be asked to appropriate the whole amount, and make \$37,314 available for the next year's operations.

The timber-work of the piers is very much decayed, particularly the south side of the west pier, some portions of which are so rotten that the timber can be picked to pieces with the fingers, and a walking-stick can be thrust through many of the timbers. Of course it is very important to the safety of the harbor that the substitution of stone for the old timber should commence next spring, as these decayed portions are even now in danger of being crushed by their own weight, and filling the harbor with the stone and rubbish from the cribs.

Very respectfully, your obedient servant,

R. C. SMEAD, *United States Army.*

General C. GRATIOT, *Chief Engineer, Washington City.*

D.

For building an ice-breaker on Staten island.

GOVERNOR'S ISLAND, *New York, October 14, 1836.*

SIR: Your letter of the 11th July last assigned to me the superintendence of the application of the appropriation above stated, but did not furnish any plan or report, or in fact any information from which I could ascertain how or where it was designed that the application should be made.

The letter from the collector of New York to the Secretary of the Treasury, referred to me by your indorsement dated the 10th ultimo, enabled me to procure the required information through the collector.

Instead of an ice-breaker, I discovered the work provided for by the appropriation was a breakwater, which was required at the quarantine ground on Staten island, to protect the public wharf and stores there from northeast gales.

The ground plan proposed for this breakwater appeared to be of adequate extent, and well arranged to fulfil the purpose for which it was designed, and also well adapted to its position, which was well selected; but the manner of building it, which had been intended, was less favorably regarded.

The plan sent to Washington was for a solid block of crib-work or pier-work, to be filled with dock stones, the former two sides each 100 feet long, joined at right angles. It was afterwards proposed to have alternate blocks and openings, which, it was expected, would save some expense in the building, and, by means of the openings, prevent the accumulation of alluvial deposits.

Besides the objection to this plan or its amendment, that they both refer to the mode of building, that, though very expensive, is less durable than others that are cheaper, and less practicable of repair than any other, there is this decided objection: the depth of water at average high water would be 12 to 23 feet; but, in addition to this depth, there is a depth of mud which was ascertained to be at least 15 feet, and was supposed to be from 5 to 10 feet more in some places. This mud, especially the upper strata, is very soft, and it is supposed the blocks would sink into it several feet, and, according to the conjecture of one of the wharf-builders, as much as 15 feet; but there appeared to be no certainty whether the sinking would be more or less, or whether it would be regular or unequal.

Having ascertained, or rather having been informed, that below this mud there was a bed of rock, I did not hesitate to express my preference for a mode of building that would be sustained by piles driven to the rock. I explained my views on the subject, and found them to be satisfactory to all the parties interested in the success of the project.

A rough estimate convinced me that piers of cut stone, built in the most substantial manner upon foundations well secured by piles, could be furnished and laid within the means afforded by the appropriation. The plan I proposed was to have five of these piers at the angle and three at each of the ends, (as is shown on the margin,) the interval being filled with piles of the largest size, saturated with corrosive sublimate to protect them from the salt-water worm. There should be also temporary wharves, formed of piles of the largest size, to facilitate the building of the piers; and they of themselves, when properly secured at the tops, would, it is believed, be almost sufficient as a breakwater.

Nothing has been done as yet towards the building. I have not had time to attend to the matter further than to ascertain the practicability of getting piles, and to engage wharf-builders to examine the plan and take the subject into consideration. But if I could be a little at leisure, I think I could make arrangements for driving the piles for the temporary wharf and the spaces intermediate of the piers during the remainder of the present season, if the season should not be very boisterous.

I am, sir, very respectfully, your obedient servant,

JNO. L. SMITH, *Major of Corps of Engineers.*

General C. GRATIOT, *Chief Engineer, Washington City.*

E.

ENGINEER OFFICE HUDSON RIVER IMPROVEMENT, *Albany, New York, October 22, 1836.*

SIR: I have the honor to submit herewith a report of the progress made the present season in the improvement of the navigation of the Hudson river between the towns of Waterford and New Baltimore, together with a statement of the condition of the works on the 30th of September last, which have been constructed under the appropriations granted by Congress for that object.

The plan of improvement adopted is that devised by the special board of engineers constituted for the express purpose of investigating this important subject, and consists in the preservation of the channel shores liable to abrasion, and in the erection of dikes and dams of different altitudes, varying with the greater or less gravity of the deposit forming the obstructions to be removed. These artificial works are so arranged, with respect to the numerous islands spread over this portion of the river, as to produce more uniformity in the width and direction of the channel, and, by confining the water in time of freshets within narrower limits, impart a greater velocity to the stream, and, consequently, an increased corroding action on the bed of the river, thereby removing the shoals obstructing the navigation and keeping open the channel in time to come. In aid of these works, and with a view of operating more immediately on the shoals, resort has been had to dredging.

At the suggestion of Captain A. Talcott, one of the members of the special board of engineers, the sand and gravel taken from the bed of the river have been employed in the construction of the dikes entering into the system of improvement, instead of the timber piers originally proposed.

The chief advantages obtained by this substitution are, the employment of indestructible materials in works requiring great permanence, and relieving the river below of a large deposit which it would otherwise be liable to receive. The form adopted for the dike is that of a trapezium, the upper surface or summit being horizontal, and ten feet in width; the side towards the channel sloping in the proportion of three to one of the height, the opposite side being in the ratio of two to one of height. The sand and gravel forming the body of the dike is placed upon alternate layers of brush carried up to low-water mark, and secured in place by piles and stone; above the level of low water the surface of the dike is lined with stone regularly laid for a depth of 15 inches. The experience of the past season has demonstrated most conclusively that this modification in the manner of constructing the dikes is admirably calculated to answer the purposes of stability in resisting the abrading action of a freshet, and the force of the ice upon its breaking up in the spring.

The whole distance of embarrassed navigation has been divided into three sections, as follows, viz: the first or upper section, extending from the town of Waterford to the city of Troy; the second or middle section, from the city of Troy to that of Albany; and the third or lower section, from the latter city to the town of New Baltimore.

On the upper section the operations have been confined to dredging alone; this being considered the most judicious course, as, from the limited means placed at our disposal for this section, but a small portion of the dike connecting the foot of the sloop lock with Hay island could have been completed, and would necessarily have been left in a very exposed state. One of the steam dredging machines belonging to the government has been employed since the beginning of September in removing the shoals below the dam, so as to give a channel sixty feet in width, and six and one-half or seven feet in depth to the city of Troy. This, it is expected, will be accomplished the present season. Above the dam the only obstruction to the navigation was a deposit at the head of the sloop lock, which has been nearly removed at the expense of the inhabitants of Lansingburg—the authorities of the village having expended about \$1,000 for that object.

Operations were commenced on the middle section the 24th of August by the employment of the steam dredging machine belonging to the corporation of Troy in excavating on the Washington bar; on the 29th of the same month one of the government steam dredges was also put in operation on the same shoal. The deposit, as removed, was placed in the dike at Port Schuyler, commencing at a point on the west-shore above the wharf at that place, and terminating at the northern extremity of Breakers island. The object of this dike is the removal of Washington and Van Buren bars, by contracting the channel and shutting out the water flowing between Breakers and Hillhouse islands, and between the latter island and the main on the west, thus directing the mass of water into the eastern channel, and causing an increased corroding action on the shoals above mentioned. Four hundred and seventy running feet of the upper part of this dike have been formed and partially revetted with stone; one hundred and forty feet more have been raised three feet above high-water mark, and seven hundred and ninety feet to the height of the latter level, an opening being left in this portion for the ingress and egress of vessels to and from the wharf at Port Schuyler. This modification in the original form of the dike was made at the suggestion of Captain Talcott, with a view of accommodating the commercial interests of this place, and to avoid any claim for damages which might have been set up had the communication to the wharf been cut off. An extension of this dike has also been made, as recommended in my letter to the department under date of the 15th of August last, and for the reasons therein set forth. The quantity of gravel removed this year from Washington bar is twenty thousand one hundred and thirty-one cubic yards. It is proposed, should the season permit, to complete the piling and brushing of this work to its termination at the head of Breakers island, carrying up the body of the dike at the same time to low-water mark, and completing, as far as practicable, the northern extremity, so as to leave as little exposed to the action of floods as possible. During the last season the channel shore of Breakers island had been revetted with stone, as also that of Hillhouse island, with the exception of about one hundred running feet, which it is contemplated to effect the ensuing year.

On the 10th of August operations were resumed on the lower section at the Overslaugh bar with one of the government steam dredges, the extension of the dike connecting Bogart and Beacon islands being carried on simultaneously with the excavation. But little, however, was effected until towards the close of the month, in consequence of the many interruptions to the work by the failure of the machinery of the dredge, and the unsatisfactory manner the contractors for the dredging performed this service.

The contract was accordingly annulled on the 20th of August. On the 24th of the same month another of the government dredges was put in operation on the Overslaugh bar.

The quantity of sand removed from this shoal the present season is twenty-one thousand eight hundred and fifty-one cubic yards, all of which has been placed in the dike constituting part of the system of works intended to relieve the obstruction.

Nine hundred and seventy-two running feet of this dike have been formed and revetted since the

commencement of operations this year, which, added to twelve hundred and fifty-two feet finished at the close of the last season, make two thousand two hundred and twenty-four feet completed up to the 30th of September last. A further portion has been brought above high-water mark.

Every exertion will be made to close this dike the present season, in order that a beneficial result may be obtained for the navigation of this difficult point.

The channel shores of Bogart and Beacon islands, and that portion of Papscanee island extending from its northern extremity to Van Wie's pier, were revetted with stone last year.

The estimate for the next season's operations contemplates for the upper section the completion of the lower dike connecting the foot of the sloop lock with Hay island, together with the dredging that may be necessary in order to obtain a depth of seven feet water, which is all that is required for the navigation above the city of Troy; and a greater depth than this would involve extensive rock excavation, which would be very expensive.

A more permanent improvement to the navigation of this part of the river might be obtained by the construction of a dam four feet in height, with a sloop lock across the river at Fish island. This would insure a sufficient depth of water, and, at the same time, give a more lateral extension to the channel, which is now very much confined.

On the middle section it is proposed to complete the dike already commenced at Port Schuyler, and construct the dams uniting Cuyler's and Patroon's islands with the west shore, in order to the removal of Round shoal. Connected with this improvement is the protection of the channel shores of those islands, which it is intended to revet the next year, together with the unfinished portion of Hillhouse island.

On the lower section it is proposed to complete all the works contemplated between the city of Albany and the upper part of Bear's island, which includes the removal of Cuyler's and the Overslaugh bars, forming the most considerable obstacles to the free navigation of the Hudson. These works comprehend a dike 1,700 feet in length, running from the head of Small island downward on the west side; a dam connecting this island with Westerloo island, and another uniting this latter with Bogart island; a dike 1,400 feet in length, running downward from a point on the east shore opposite this last-named island; another of the same length, extending upward from the head of the same island; and another, 2,900 feet in length, running downward from the southern extremity of Beacon island; cutting off and removing 700 feet of the outer end of Van Wie's pier, and revetting the lower part of Papscanee island.

To accomplish the whole of the improvement contemplated the next year will require the construction of two additional steam dredging machines and sixteen lighters, which have accordingly been estimated for.

All which is very respectfully submitted by your obedient servant,

H. BREWERTON.

Brigadier General GRATIOT, *Chief Engineer, Washington City.*

F.

Memoir on the removal of the bar in the Delaware river, near Fort Mifflin.

Fifteen thousand dollars were appropriated in July of this year (1836) for improving the harbor of Philadelphia by removing the bar in the Delaware river, near Fort Mifflin.

No survey had ever been made, or plan suggested, for accomplishing the object for which this appropriation was made. The undersigned being required by the chief engineer to carry the intent and meaning of the law into effect, sought for information, and could find no person who could give him any knowledge of the inconveniences sustained by the commercial interest of Philadelphia by the existence of the bar in question. With the aid of a skilful river pilot the undersigned examined the position at and about this bar; the result of which was, that no work could be done at this position that would or could be of any advantage to the commerce of the river, without doing a permanent injury to some other part of the Delaware. Under these circumstances no work was attempted, nor does it seem that this bar presents any great obstacle to the navigation of the river by the largest class of merchantmen, as at *low water* it could be crossed, on the day of making the examination, with *sixteen feet of water*, and at high water with *not less than twenty-one feet*.

It appears that this bar stretches up and down the river, in a line from the pier opposite Fort Mifflin to the head of islands extending down to the quarantine ground, separating the deep-water channel, passing down in front of Fort Mifflin, and there terminating from the deep water, parallel thereto, and extending up the Jersey shore, even to the pier opposite the fort; thus separating two parallel channels by a bar of sixteen feet water, without crossing which no vessel of over twelve feet water can ascend or descend the river.

The fact was ascertained that the deepest water on this bar changes position, and varies in depth repeatedly, and is at this time deeper than the pilots have ever before known it, and not less than three hundred yards north of where it was two years since. The causes that seem to create these frequent changes I conceive to be the annual freshets of the Schuylkill and Delaware rivers, and the deflection of the daily tides during that period of the winter when the shoals are covered with ice. A freshet from the Schuylkill is naturally thrown, with all its force, *across the bar* in question; thereby deepening it, and forms slack water on the Delaware shore, within which great deposits are made, annually increasing the islands before alluded to.

A freshet from the Delaware is naturally thrown, with all its force, down the *Delaware shore*, forming slack water on and about the bar in question.

Here, then, are two great causes of variable force, acting annually to change the character of the bar, and altogether beyond useful control.

The grounding of ice on the shoals in the winter is another great disturbing cause, acting in an uncontrollable and variable manner to deflect the daily tides; sometimes throwing the volume of water up and down one shore, and then another, and as often causing the deposit or removal of the sediment left where some previous eddy so placed it.

The question then arises, whether or not we cannot create something to counteract the variable flow of the Schuylkill and Delaware freshets, and the variable deflection of the daily tides caused by ice

grounding on the shoals. In reply to which, the affirmative may, with confidence, be given; and the result, too, would doubtless be the removal entirely of the bar in question, and would be accomplished by the construction of very extended and continued wharves from Fort Mifflin in a southeasterly direction, to force all the water of the two rivers invariably across the bar. But the consequences would be incalculable injury to miles of the river below, and very doubtful whether or not a worse bar would not be formed somewhere below, even on the Jersey shore. The inevitable tendency of such a remedy would be to form an extended eddy from Fort Mifflin down to and throughout the Lazaretto channel, the whole of which would then become an immense mud flat; thus destroying a very useful steamboat and small-craft channel, besides throwing large tracts of land off the navigable watercourse, and thereby materially injuring its value.

Believing, as I do, the preceding to be the existing state of the bar in the Delaware, near Fort Mifflin, its causes of formation and variation, with the evil consequences likely to result from an attempt to remove it, I cannot too strongly recommend that, in this instance, nature be left to work for herself, unaided by art.

It may not be amiss to refer to another scheme that might suggest itself for removing and deepening this bar by dredging machines. That it could be done is not doubted; but, when done, what security is there that such deepened parts would remain so, with the variable causes of change as heretofore set forth, and the facts, placed beyond doubt, of the bars shifting yearly?

All of which is respectfully submitted to the chief engineer.

RICH'D DELAFIELD, *Captain of Engineers.*

PHILADELPHIA, *September 30, 1836.*

G.

PHILADELPHIA, *November 28, 1836.*

SIR: I enclose herewith a memoir on the progress of the operations in the construction of the Delaware breakwater to the 30th of September, 1836. Wherefrom you will perceive that the quantity of material used this season, to the date above noted, is 41,218 tons 14 cwt. of stone; making a total since the commencement of the work of 718,934 tons; the cost of which, with every expense of putting it in place, has been \$1,560,389 27, forming an extended barrier against the waves of the Atlantic of 4,620 feet in length above low water, and measuring above the high-water level 3,209 feet; and has given shelter since 1st September, 1833, up to the 31st August of this year, as stated in the annexed table, recording the number of days' shelter (not number of vessels) afforded in each year:

From September 1 to December 31, 1833, 4 months.....	866
From January 1 to December 31, 1834, 12 "	1, 739
From January 1 to December 31, 1835, 12 "	3, 543
And from January 1 to August 31, 1836, 8 "	3, 742

in which enumeration no vessel is included that was in any way connected with the construction of the work.

Respectfully, your obedient servant,

RICHARD DELAFIELD, *Captain of Engineers.*

Brig. Gen. CHARLES GRATIOT, *Chief Engineer.*

PHILADELPHIA, *November 28, 1836.*

SIR: I have the honor to forward you the annual report of operations at the Delaware breakwater. It has been delayed to this late hour in consequence of the impossibility of sooner getting the necessary information.

Operations of the season.—The further prosecution of the works at Cape Henlopen having been committed to the charge of the Engineer department in May, 1836, Lieutenant Park, of the corps of engineers, was ordered to the immediate superintendence of the breakwater, under the direction of Captain Delafield. The bill of appropriation of \$100,000 was approved on the 2d of July; and between the 8th and 14th of the same month purchases were made of ten different individuals of 1,000 tons of stone each, to be delivered from the quarries in Pennsylvania and Delaware within thirty days from date, at the same rates as for stone furnished the two preceding years, namely, for stone in pieces over two tons in weight, \$2 44 per ton; and for pieces from a quarter of a ton to two tons, \$1 74 per ton.

The deliveries were all made within the time specified; the operations for the season commencing with the deposit of the first vessel-load of stone on the 18th of July.

On July 29 a contract, the most favorable that was offered, was made with William J. Leiper for the delivery of 44,000 tons of stone, at the rate of \$2 60 per ton for pieces over two tons in weight, and \$1 90 per ton for pieces between a quarter of a ton and two tons. 25,000 tons of this were to be from the Delaware quarries, situated on the Brandywine, Christiana, and Naaman's creek, and at Quarryville; 8,000 tons to be in pieces of more than two tons' weight, and the remainder to weigh more than a quarter of a ton each piece; 15,000 tons of this Delaware stone to be delivered this season before the 15th of November, the remainder the next spring. The other 19,000 tons of this contract were to be delivered from the Pennsylvania quarries, on Ridley and Crum creeks; one-half the pieces to weigh between a quarter and two tons each, and one-half over two tons; the whole to be delivered before November 15, 1836.

Most of the stone has been deposited this season at the east end of the breakwater proper, a small portion only having been placed at the west end of the ice-breaker. The work has latterly been pushed upon the breakwater proper to bring its eastern end up above low water, as accidents have heretofore happened from vessels running upon the stone that did not appear.

The whole quantity of stone delivered this season up to September 30, inclusive, amounts to 41,218

tons 14 cwt.; of which 40,575 tons 16½ cwt. were put upon the breakwater proper, and 642 tons 17½ cwt. were upon the ice-breaker.

Present dimensions of the work.—In compliance with the suggestion of the board of survey appointed November, 1834, the length of the breakwater proper, within which a shoal has been forming, has not been increased this season; but the stone has been used in completing the portions already commenced, none of which are, however, yet finished. The present dimensions of the work are:

	Whole length at bottom.	Length above low water.	Length above high water.
Breakwater proper.....	<i>Feet.</i> 2, 743	<i>Feet.</i> 2, 583	<i>Feet.</i> 2, 031
Ice-breaker	1, 710	1, 437	1, 178
		4, 020	3, 209

That part of the breakwater above high water averages about ten feet in height above the lowest water mark; its width averaging about seventy-five feet at the same mark. The ice-breaker averages nine feet in height, its width at the low-water line being seventy-five feet. For a detail of the dimensions of the works I would respectfully refer to the accompanying drawing, No. 2.

The whole quantity of stone deposited upon both works, up to September 30, 1836, is 718,934 tons 17 cwt.; of this, the portion that has been paid for (708,963 tons 14 cwt.) cost \$1,321,019 45, exclusive of contingencies. The quantity necessary to complete them, with the total length, 1,700 yards proposed by the commissioners, and a height of three feet above the highest tide known, is 450,014 tons.

Kind of stone, whence obtained, &c.—All the stone for the work has been furnished from the quarries on the Hudson and the Delaware rivers, principally from the latter; no stone having been brought from the Hudson since 1830. The contractors are men of standing and resource, who have, with a few exceptions, furnished stone to the work from its commencement, and who have fulfilled punctually their contracts.

The quarries on the Delaware river, from which the stone has heretofore been obtained, and which can furnish an inexhaustible supply, are in the States of Delaware and Pennsylvania, extending from Wilmington, in the former, to four miles north of Chester, in the latter State. Of this stone, that from Delaware is decidedly superior, consisting either of pure feldspar, or a very compact aggregation of quartz, feldspar, and hornblende. The stone from Pennsylvania is composed of quartz, feldspar, and mica, in various proportions, but all containing a large quantity of mica. The presence of this last mineral renders it peculiarly liable to *chemical decomposition*; and as the aggregation is in many stones but loose, it is liable to a further decay from the *attrition of the waves*. The experience of the work within the few years it has been in construction has shown that the stones *have decayed from both these causes*.

The destruction of the heavy masses that are used in the breakwater will not be the work of one year, or of a few years, but it is surely the better policy, in the construction of a work to last forever, to use the least perishable material that can be obtained. It is proposed in future to obtain the greater portion of the stone used from the better quarries, and it is hoped this can be done without any increase of cost.

Plan of administration.—The method of conducting operations this season has been essentially the same with that of preceding years; the contractors deliver the stone at the work at so much per ton; if it is to be placed below low water, the vessels throw it in the places designated with their own crews; but if it is to be placed upon the top of the work, the United States are at the expense of cranes and hands for placing it.

The government has agents at each quarry, who inspect each stone, mark, and number it; they weigh each stone over two tons in weight, and see that none are sent under ¼ of a ton. The weight of the small stone is determined throughout the season by the *floatation marks* of each vessel; these marks are determined at the commencement of the season by weighing in a whole cargo of stone, and are permanently fixed with strips of copper at stem and stern; for each succeeding cargo the vessel is loaded exactly to the same line, and, of course, (due precautions being taken against fraud) carries the same quantity of stone. The large stone being all directly weighed, the quantity of each kind is thus known.

The captain of the vessel receives from the agent at the quarries an invoice of the *number and quantity* of stone taken on board; if the delivery at the breakwater correspond with this invoice, it is countersigned by an agent of the government there, and constitutes the voucher to the disbursing officer for the payment of the stone. If any stone should be lost overboard, or missing in any way, the certificate of delivery of the agent at the breakwater is the voucher, deducting for deficient stones the absolute weight if over two tons, and the maximum of two tons if a small stone.

The stone below low water is, as before mentioned, thrown there at once by the crews of the vessels, without any expense to the government. The stone for the top of the work is taken out of the vessels by cranes fixed permanently, and at considerable cost, at convenient distances along the work. It is transferred by these to a car that runs upon a spar railway, and is thus transported some distance each way from the crane; it is then thrown from the car, and is placed in its final position by hand.

The repeated handlings of the stone, by this method, before it reaches its final resting place, render it liable to objection on account of the great expense; it is hoped the next season to demonstrate the practicability of a more economical method, by the introduction of some portable machine, which, at the same time, will cause no greater delay to the vessels than at present experienced.

The force employed this season for superintendence, manœuvre of machines, and placing of stone, has not varied much from 110; at the quarries the number of agents averages 18.

The number of cranes in use was generally four.

Manner of laying the stone.—In the earlier stages of the work, the experiment was tried of using together large and small stone (from ten to one hundred pounds weight) in finishing a portion above low water. The advantage hoped to be gained was, that the small stone, by filling the crevices left between the large, should increase the stability of the mass. Experience has proved the hope fallacious; the small stone, instead of serving to oppose the motion of the large, seem to have acted *as rollers* or fulcrums to increase the power of the waves; for while the portion composed of large stone alone has remained com-

paratively stable, that in which the small stone has been used has required repacking every spring. In consequence, the use of stones less than two tons weight for the part of the work above low water has been latterly discontinued, and it has been thought best to throw these together, without taking any particular pains to pack them, as near the form of the profile as practicable, and leave to the waves the task of consolidating them.

Height to which it is proposed to carry the work.—The height above the lowest spring tides to which it was contemplated by the commissioners to raise the work was twelve feet. This determination was based upon the supposition of the highest spring tides being nine feet above low water, thus leaving a height of three feet above the highest high water known. There was a provisional recommendation, however, in their report: if the tides should be found afterwards to be higher than nine feet, to raise the top of the work proportionably.

In January, 1836, the tide observed at the work was nine and a half feet above low water. During the storm of December, 1833, the tide was higher than this—how much it is impossible to say, as the gale was not at its height until high water at night; but twelve hours after the violence of the gale had abated, the water was *entirely over the work*, so that it must have been at least ten and a half feet above low water.

In 1831 there was a tide one foot ten inches higher than that of December, 1833; this was ascertained from actual measurement by a gentleman who resides about six miles from the breakwater, on the coast, and who measured it in his own house. This is the highest tide of which any account has been received.

The work has nowhere been carried to the first proposed height of twelve feet, but for a distance of about seven hundred feet it has been apparently finished at the top, affording a comparatively smooth pavement at the height of ten feet; many of the stones of this pavement have been rooted up by the waves, and some of them transported a distance of twelve or fifteen feet; every spring requires the repacking of a considerable number of them. Many articles have also been washed from the top of the work and lost during gales; the shanty for the laborers was carried away in 1833, and in danger during the gale of October of this year. These facts seem to point out a necessity of raising the work *at once to its final height*. The high tide of 1831 being at least twelve feet above low water, it is now proposed to carry the work three feet above this, or fifteen feet above low water.

With the security of this height, there would seem to be no ground for apprehension as to the perfect stability of the work. The severe tests to which it has already been subjected in some of the most violent storms known on our coast go to show that the only danger to be apprehended is from the waves dashing *in bulk over the top of the work*. Though the masses that compose the top of the work are from 4,000 to 13,000 pounds in weight, yet, when completely immersed, they lose one-third of their weight, and being, as it were, isolated, they are carried, by the prodigious force of the waves, entirely across the work to the interior slope. But if the height of the stone above the water is sufficient to prevent this, the wave is broken upon the exterior slope, and its force expended in throwing the spray to a great height above, and completely over the work. A few stones are always moved upon the exterior slope with every gale, but this is only the effect of the waves consolidating the work. A register has been kept of the force of the wind for several years; it appears by this that *the greatest* force, till very lately, *was fourteen and a half pounds upon the square foot*, but on the 11th of October of this year it was eighteen pounds.

State of the harbor, &c.—There seems to exist no reasonable doubt that the advantages of a secure harbor upon the coast will be gained by the breakwater. A record has been kept of the *number of days' shelter* (not number of vessels) afforded by the work for the last three years, since September, 1833.

The following is an abstract of this record from September 1, 1833, to August 31, 1836:

Years.	Ships.	Brigs.	Schooners	Sloops.	Pilot boats.	Total.
1833.....	22	178	372	167	127	866
1834.....	49	314	667	303	406	1,739
1835.....	153	569	1,715	461	645	3,543
1836.....	265	651	1,869	471	486	3,742
Total.....	489	1,712	4,623	1,402	1,664	9,890

It shows at a glance how valuable has already been the shelter afforded to the commerce of the Delaware bay.

This shelter will be more considerable as the work progresses, but will still be insufficient without some change in the original project.

The eastern extremity of the ice-breaker bears at present northwest from the west end of the breakwater proper, at a distance of 400 yards; through this gap the waves, raised by the winds from the northwest to northeast, roll with great violence, and are found to produce serious inconvenience to the vessels that are even under the direct lee of the breakwater. Besides, when there are many vessels in the harbor, the length of the breakwater is not sufficient to protect them without crowding. As it is not advisable to lengthen the breakwater proper to the eastward, it seems absolutely necessary to interpose some obstacle to these waves; for this, two methods have been proposed: first, to unite the western end of the breakwater proper with the eastern end of the ice-breaker. The effect of this would be, undoubtedly, to shut in the harbor securely from all dangerous waves, and to render it sufficiently capacious; but a strong objection to the plan would be, that it would injure materially, if not completely destroy, the anchorage of the harbor.

A reference to the map will show that this plan would leave the harbor with two openings. One of 900 yards, communicating immediately with the ocean; the other of 2,000 yards, looking up the bay. The flood tides, entering by this passage of 900 yards, would not be nearly sufficient to fill the harbor, which would, of course, have to be supplied by the tide coming round the west end of the ice-breaker. These two tides meeting would form a slack water, and in all probability deposit the sediment with which the waters here are constantly filled over a large portion of the present harbor, and eventually shoal it too much for large vessels. It has been urged, however, that the ebb tide, by the velocity with which it would be drawn through the seaward passage, would create a current sufficient to carry off the deposits.

The ebb tide would enter the harbor at a passage of 2,000 yards, and leave it at a passage of 900 yards, and would, undoubtedly, at this passage, create a strong current; but the velocity of the current throughout the harbor, supposing all the water that enters to leave by the seaward passage, would be inversely proportional to its section; and as a portion of the momentum of the ebb tide is lost on entering by the resistance it meets, it follows that over a large portion of the harbor (and that the most important) the velocity would be even less than that of the common ebb tide. This idea of the force of the ebb tide being sufficient to remove the deposits of the flood seems to be sufficiently controverted by the formation of a shoal within and along the breakwater. The means depended upon for the removal of the deposit, in the event of joining the two works, are in operation in greater force now, but are, nevertheless, insufficient to remove the shoal.

The method proposed by Captain Delafield to cover the gap is to prolong the ice-breaker, curving it in towards the breakwater. In order to obstruct the tide as little as possible, a buoy was floated from the western extremity of the ice-breaker till it bore northeast from the extremity of the breakwater. It is proposed to establish the extension of the ice-breaker upon the line passed over by this buoy, and which is of course the line of the current. It will leave a passage between itself and the breakwater of 280 yards, (see drawing No. 1,) measured across the tide. As this passage will be but little used by vessels entering the harbor, 280 yards is thought amply sufficient by shipmasters whom I have questioned, as well as by the superintendent of the work, who has had the advantage of observation for several years, and whose opinion can be relied upon. This prolongation will intercept all direct waves produced by winds from northwest to northeast, and produce a sufficient shelter for the shipping in the harbor.

The storm waves raised by more easterly winds will still roll into the gap and round the breakwater to the harbor, and incommode the shipping; but their force will be so much deadened it is not apprehended they can be destructive or injurious.

This plan, by covering the gap effectually, and preserving at the same time the current of ebb tide that is now drawn powerfully through it, will accomplish the object of shelter without increasing the area of slack water, and it is therefore strongly recommended.

The length of addition to the ice-breaker, as at present finished, will be 500 yards. To construct this it is proposed to take the stone originally intended for the 300 yards of the eastern end of the breakwater proper, (which it is not proposed to continue further eastward than at present,) thus requiring an increase over the original estimate for 200 yards in length.

200 yards, 134,853 tons, at \$2 13½.....	\$292,181 00
Contingencies, about 16½ per cent.....	48,603 00
Total cost.....	<u>340,784 00</u>

SHOALS, DEPOSITS, ETC.

The effect of the breakwater upon the bottom has been—1st. The removal of a shoal of 16 and 17 feet water to a depth of 21 and 22, thereby increasing the harbor of 18 feet water and over, between the east-northeast line from the extremity of the breakwater, and the north line from west end of the ice-breaker to an area of one-third of a square mile, and between north and south lines, at each extremity of the work, to an area of two-thirds of a square mile. 2d. The formation of a mud shoal outside the eastern end of the breakwater proper, which can in no event be injurious. 3d. The formation of a mud shoal outside the western end of the ice-breaker, which it is not at all probable will increase to obstruct the passage of vessels drawing less than 18 feet water, which vessels alone can now enter by this passage. 4th. A small deposit of hard bottom, about 800 feet west-southwest from the western end of the breakwater. This is supposed to have been produced by the storm waves rolling in through the gap. No danger is, however, to be apprehended from this, as the soundings of each succeeding year, since its discovery in 1834, show there has been no increase of the deposit; the soundings of this fall show a depth of one foot more than in 1834. 5th. The formation of a large mud shoal just within the breakwater proper, the highest part being opposite the west end. The existence of this shoal, when it was first discovered, excited some apprehension that the harbor might be materially injured if it increased; but a careful examination of the cause of its formation and its present form would seem to show that, beyond a certain line, there is no probability of this. The evident cause is the eddy of the flood tide around the pile. After the first third of the flood the tide runs with a considerable current down, along the inside of the work, while it is running up at a short distance from it; the meeting of these causes the deposit of the shoal, the exterior boundary of which agrees very nearly with the line of the eddy.

The drawing No. 1 was intended to show the progressive formation of the shoal; but, owing to the imperfect state of the record of observations in the office, it has been impossible to obtain the satisfactory result anticipated.

The figures in blue are the original soundings of 1828, by Lieutenant Sherburne. They refer to medium low water, and should be diminished about one foot in a comparison with the other soundings of the drawing, which are all referred to the lowest spring tide.

The lines and figures in orange show the few soundings made in 1833; those of 1832 were so similar it was not thought advisable to confuse the drawings with them.

The figures and lines in yellow are the soundings, and 18, 21, and 24 feet curves of the fall of 1834.

The shaded sienna line is the boundary of the mud bottom, as taken from the late Captain Lane's map without date, but made, it is believed, from observations taken in the fall of 1834 and spring of 1835. This is the only drawing showing the boundary of the mud bottom in the office.

The line in carmine, shaded, is the boundary of mud bottom as determined from soundings by Lieutenant Hetzel, taken this spring. As the nature of the bottom is not recorded upon all these soundings, the delineation of the form of the mud bottom cannot be perfectly accurate, but it is nevertheless sufficient to show that no great change can have taken place.

The soundings of this fall are in black, and show that the curves of 18, 21, and 24 feet, and the boundary of the mud bottom have moved eastwardly with the progress of the work. The least depth found upon the crest of the shoal is 14 feet, being 2 feet less than the least soundings of 1834, and 6 inches less than the least of last spring. Considering the discrepancies of the casts of different leadsmen, throwing as they are obliged to do in uneven water, the difference of depth of the spring and autumn of this year

must be considered little or nothing. The difference between the present depth and that of 1834 is only 2 feet; showing that as the shoal rises it increases proportionally slower. The increase at the crest is greater than at any other part of the shoal. The whole deposit since 1828 has been at the crest from a depth of 25 feet to a depth of 14; making 11 feet in 8 years.

The southern boundary of the mud deposit seems to be well defined and limited by the course of the channel current of the flood from the eastern end of the pile, which it will probably never pass; and this fact would seem to show the imperative necessity of extending the work no further east. The shoal is bounded towards the west end by the current of ebb tide through the gap, and it is scarcely possible that it can extend any further in this direction. The delineation of the *boundary of the mud bottom*, from the last soundings, would show an apparent decrease of the deposit unless the soundings of different periods (designated by their colors) at the same place are particularly noted; these show that the water has been gradually shoaled; the *common bottom* (marked C upon the drawing) is composed of mud and sand; and according as one or the other predominates from local causes, the character of the bottom is determined, and the irregularity of the shape of the deposit accounted for. The edge of the mud deposit passes through the several depths of water from 29 feet to 21 feet. The dimensions are at present a length of about 2,000 feet and a width of from 700 to 1,100 feet.

The foregoing considerations seem to warrant the conclusion that this shoal can never materially injure the harbor, provided the breakwater proper be kept at its present length.

ICE-BREAKER.

The object of the establishment of the ice-breaker, so called, was to stop the ice in its passage down the bay and deflect it from the harbor. It has not been found to accomplish this object, but has served a most useful purpose in increasing the harbor and covering it from northern winds. Its original purpose must be accomplished by other means.

ICE PIERS.

The method of preventing, by a range of piers or other means, the ice from entering the harbor and carrying the vessels from their moorings, is a point of great delicacy, and it appears to me one of great difficulty of execution. It is certainly much easier to condemn a bad project than to propose a good one; but it is my sincere conviction, after giving the subject all the consideration due to its importance, that the proposed plan of an establishment of a range of piers 250 yards apart, at the distance of more than one mile from the ice-breaker itself, would totally fail of the object proposed. The ice does not come down in *hard* cakes and sweep vessels from their moorings by the momentum of a large extent of surface; in that case perhaps the range of piers above might answer the purpose by breaking it up into small pieces; but the ice is quite soft, and acts in parting the moorings of vessels in this way: a single cake of ice strikes and is retained; another very shortly strikes this, and is by the force of the tide *lifted upon it*, and of course nearly sinks the mass of the two; a third cake is raised upon this, and so on, till in some cases an absolute depth of 14 feet of ice has been measured. This mass, rising and falling with the swell and impelled by the current, becomes too powerful for the strength of the cables, and soon parts them. Now, it seems hardly probable that piers at a distance of from two to three miles, and allowing masses of ice to pass between them 250 yards across, can have much effect upon this action; besides, there being an interval of more than one mile left between the ice-breaker and the commencement of the piers, the tide might, and in my opinion would, bring into the harbor the largest masses.

If, in order to obviate these difficulties, the piers be brought further down, (say nearly or quite to the ice-breaker,) and the distance between them lessened, the question then arises, will not this great obstacle interfere too much with the tide, slacken the current, and shoal the harbor? I should certainly suppose so; it would certainly be a dangerous experiment.

Before attempting to answer the question whether there is any feasible plan of protecting the vessels from ice without endangering the harbor itself, I should wish the advantage of the personal observation of one winter—an immediate decision not being important.

I have had the honor already to transmit a statement showing the estimates, appropriations of the several years, and expenditures to the 30th of September, 1836, so far as the accounts are recorded in the books of the office. It is impossible to obtain all the expenditures of this year, as the officers of the quartermaster's department in charge of the work were ordered suddenly away, and have, as yet, had no time to settle their accounts. There was also a separate "Statement of funds expended to September 30, 1835, and since that date to September 30, 1836." From these it appears that the total quantity of stone paid for up to September 30, 1835, was 668,522 tons 12 cwt., which cost, (contingencies included—about 16½ per cent. on stone)..... \$1,435,539 27
 Since deposited, 50,412 tons 5 cwt..... 124,850 00
 To complete the work, with length of 1,700 yards and height (3 feet above highest tide) originally proposed, will require 450,014 tons..... 1,129,736 00
 For addition of 200 yards to ice-breaker, 136,853 tons..... 340,784 00

Total stone, 1,305,802 tons Total cost..... 3,030,909 00

In making the estimate the price paid this year for stone was assumed as the basis, viz: \$2 60 per ton for stone over two tons in weight each piece, and \$1 90 per ton for the smaller—the proportion being one-third of small stone and two-thirds large. The contingencies were taken at the same percentage as for the expenditures prior to September 30, 1835.

An estimate of funds necessary for operations in 1837 was also sent. It was calculated for a period of five months, from the 15th of April to the 15th of September. Later operations are precarious, the weather being frequently (as in the present season) so severe as to impede them for weeks together.

The drawings have been delayed, waiting for the soundings of the fall; they will be forwarded in a few days.

All of which is respectfully submitted.

FRED. A. SMITH, *Second Lieutenant of Engineers.*

Captain R. DELAFIELD, *Corps of Engineers.*

To Brigadier General CHARLES GRATIOT, *commandant corps of engineers*, by Richard Delafield, captain of engineers.

H.

Report of the progress made in the improvement of the navigation of the Savannah river, from the city of Savannah to its mouth, to the year ending September 30, 1836, inclusive.

Fort Pulaski, October, 1836.

The year ending September 30, 1833, arrangements were made preparatory to a plan for the improvement of the river, as follows: An officer received his instructions from the undersigned to make an accurate survey and soundings of the river from above Hutchinson's island to Four Mile Point, and commenced his operations. The old dredge-boat sunk in the channel at Savannah was raised, the machinery torn out, and the hull removed; the dredge-boat at Nantucket, Massachusetts, dismantled, and the machinery removed to Savannah river, to be there used, if necessary, and the hull sold; and preparations were made for constructing a dredge, tow-boat, and mud flats.

The year ending September 30, 1834, the survey and soundings were completed, a plan for the improvement made and submitted, and the dredge-boat, tow-boat, and mud flats about three-fourths finished, and the machinery thereof in Baltimore subject to order.

The year ending September 30, 1835, the obstruction contemplated between Hutchinson's and Argyle islands was commenced, and much material collected for its prosecution, when it was ordered by the department to be suspended in consequence of the second article of the treaty of Beaufort, concluded in 1787 between the States of South Carolina and Georgia, which required this passage to be left open and unobstructed by the citizens of either State. Consultation was had with the United States district attorneys for these States relative to this treaty, and a consequent application recommended to be made to the governors of the respective States for authority to proceed in the prosecution of the obstruction. The dredge-boat, tow-boats, and mud flats were finished, but the operation of dredging was commenced late in the season, and the breaking of the shaft of the engine of the dredge, combined with general sickness and a difficulty in procuring competent engineers, prevented much progress in removing the sand and mud from the bottom of the channel. Two thousand eight hundred cubic yards of sand and mud were removed this year from the channel at the wrecks.

During the year ending September 30, 1836, application was made to the governors of the States of South Carolina and Georgia, respectively, (see copies Nos. 1 and 2, hereunto appended,) for authority to proceed with the obstruction between Hutchinson's and Argyle islands, and resulted in a full grant of authority on the part of the State of Georgia, (see No. 3, hereunto appended,) and a contingent grant on the part of the State of South Carolina, by the appointment of a commission to meet and confer with the undersigned, and to examine the site of the proposed obstruction, &c.; to report to the governor on the expediency of granting the authority required; and in case the commission should report that the said obstruction will work no injury to the citizens of the State, or materially affect the navigation of the Savannah back river, that the governor be authorized to grant the said authority under the great seal of the State, on the express condition that if, at any future period, the said obstruction should be found to fill up the channel of said back river so as seriously to injure the navigation, this authority is to be revoked and the obstruction removed.—(See No. 4, hereunto appended.) Accordingly, a conference with the commissioners was invited by Judge Huger several times, and attended by the undersigned punctually; but it never happened that the third member was present, and at the last adjournment Judge Huger informed the undersigned that whenever the commission could all be assembled at a time he would advise him thereof. As much time has elapsed since the last adjournment of the commissioners, and as some opposition was made to the commission by citizens of South Carolina against the execution of the said obstruction, the undersigned cannot flatter himself with the prospect of authority to proceed with the said obstruction, under the existing law of the State of South Carolina, and leaves the future action on this subject to the department, without the hazard even of an opinion at present. It is proper to remark here that the plan hereunto appended, (see F,) showing the degree of obstruction for which authority was asked of the respective States, was fixed upon under the conviction that such a degree of obstruction would have the desired effect, and that a greater degree would meet with a decided negative from the State of South Carolina.

The operation of dredging has been continued as long as practicable during this year, with occasional interruptions beyond the power of the undersigned to foresee and prevent. Four thousand eight hundred and eighty-eight cubic yards of mud and sand have been removed this year from the channel at the wrecks, resulting in an absolute increase in depth of the channel at that place of seven inches. On the 6th of December the dredge-boat was without both captain and engineer, which circumstance was taken advantage of to make some important additions, alterations, and improvements in the machinery, to adapt it better to the strong and cross-currents at the wrecks and the capacity of the individuals in charge and on board. On the 13th of February, by an order of Major General Scott to my assistant in Savannah, the steamer *Essayons* was ordered into Florida, and has not yet been returned, and the dredge-boat left without the means of towing the loaded flats to a place of deposit. The first consequence of the said order was the sinking in the channel, opposite Savannah, the flat on which the pile-driver was placed. This flat was raised by a company that desired the use of the pile-driver free of expense, and was sold, after the pile-driver was removed, for ten dollars. The second consequence was the necessity of employing the hands on board the dredge-boat at towing and warping the loaded and empty mud flats, which resulted in sickness and desertion of the slaves, and finally a cessation of operations. The 11th of May the main shaft through the uppermost drum of the inclined plane of the dredge-boat broke; but by activity and attention to orders by the manufacturers in Charleston, a new shaft was procured and put in complete by the 27th of the same month. The boat, however, has not been at work since, as the hands that did not desert were unable to work, and others could not be procured at any price. Arrangements have been made to procure hands by the 1st of November, when it is expected to resume operations.

Application was made on the 28th of July to the department to cause the steamer *Essayons* to be returned to the service of the river; but the efforts of the department, notwithstanding the abundance of time the quartermaster's department has had to furnish boats better suited to their object than the *Essayons*, have not been successful. Yet the department has authorized the purchase of a steamer to supply the place of the *Essayons*; which it is also expected will be inoperative, although an effort is now making to find a boat suited to the object.

For a view in some measure of the importance of this improvement to the country generally, see No. 6, hereunto appended.

The operations this year, as heretofore, have been conducted with a view to efficiency, system, and economy, as far as it was practicable for the undersigned to enforce it, and a proper record of all transactions kept in the office. On reference to the returns and statements, there will be found to have been appropriated prior to September 30, 1835..... \$75, 043 06

In treasury undrawn September 30, 1835.....	29, 643 06
In hands of agent September 30, 1835, a negative of.....	864 88
Available for the fourth quarter of 1835 and the year 1836.....	28, 778 18
Expended during the year ending September 30, 1836.....	8, 577 30
In treasury undrawn September 30, 1836.....	16, 243 06
Deposited to the credit of the Treasurer of the United States on account of this service in 1836.....	1, 420 71
In hands of agent September 30, 1836.....	17, 663 77
Available for the fourth quarter of 1836.....	3, 301 58
	20, 965 35

Thus showing an additional appropriation for the year 1837 necessary, inasmuch as the undrawn appropriation of the year 1835 will revert to the treasury in 1837. Accordingly, an estimate is hereunto appended, marked No. 5. An estimate to complete, under existing circumstances, appears impracticable to any degree of certainty.

It may be asked, as there has been a large balance of appropriations unexpended for the last two years, why some other plan has not been recommended, as a substitute, for the obstruction. In such a case, the reply is simply that none other than dredging can benefit the navigation, even temporarily.

Respectfully submitted.

JOS. K. F. MANSFIELD, *Lieutenant Corps of Engineers.*

General C. GRATIOR, *Chief Engineer.*

No. 1.

FORT PULASKI, near Savannah, Georgia, November 12, 1835.

SIR: As I have been required by the Engineer department at Washington to carry into effect the law of Congress making appropriation for the improvement of the Savannah river from the city of Savannah to its mouth, I consequently, by the advice of the War Department, have the honor to apply to you to obtain the consent of the State of Georgia, jointly with the State of South Carolina, with a view to enable me to carry into effect such a part of the plan for the improvement of the river as by the treaty of Beaufort, concluded between the States of South Carolina and Georgia in the year 1787, cannot be now executed, as will be seen by the second article of that treaty, and the interpretation of the same by the Executive of the United States.

The plan contemplates an obstruction to the passage of water between Hutchinson's island and Argyle island to the height of half-tide level, except a channel-way of three feet deep and one hundred feet broad at low water; thus leaving a channel-way of about nine feet deep at high water of neap tides, sufficient for any purpose that it might be required for at any future day.

With a view that there be no misunderstanding of what is required by legislative aid of the States of Georgia and South Carolina on this subject, a map of that part of the river, with a plan thereon showing the degree of the contemplated obstruction, is herewith transmitted.

I cannot, in duty, close this communication without expressing a hope that it will receive from you a favorable and early consideration.

I am, very respectfully, sir, your most obedient servant,

JOS. K. F. MANSFIELD, *Lieutenant of Corps of Engineers.*

His Excellency WM. SCHLEY, *Governor of the State of Georgia.*

No. 2.

FORT PULASKI, near Savannah, Georgia.

SIR: As I have been required at the Engineer department at Washington city to carry into effect the law of Congress making appropriation for the improvement of the Savannah river to its mouth, I consequently, by the advice of the War Department, have the honor to apply to you to obtain the consent of the State of South Carolina, jointly with the State of Georgia, with a view to enable me to execute such a part of the plan for the improvement of the river as by the treaty of Beaufort, concluded between the States of Georgia and South Carolina in the year 1787, cannot now be commenced, as will be seen by the second article of that treaty, and the interpretation of the same by the Executive of the United States.

The plan contemplates an obstruction to the passage of water between Hutchinson's island and Argyle island to the height of half-tide level, except a channel-way of three feet deep and one hundred feet broad at low water; thus leaving a channel-way of about nine feet deep at high water of neap tides, sufficient for any purpose it might be required for at any future day.

With a view that there be no misunderstanding of what is required by legislative aid of the States of South Carolina and Georgia on this subject, a map of that part of the river, with a plan thereon showing the degree of the contemplated obstruction, is herewith transmitted.

I cannot, in duty, close this communication without expressing a hope that it will receive from you a favorable and early consideration.

I am, very respectfully, your most obedient servant,

JOS. K. F. MANSFIELD, *Lieutenant of Corps of Engineers.*

His Excellency GEORGE McDUFFIE, *Governor of the State of South Carolina.*

No 3.

IN THE HOUSE OF REPRESENTATIVES, *December 9, 1835.*

The committee on internal improvement, to whom was referred the governor's message in relation to the proposed improvement of the navigation of the Savannah river, by an obstruction to be placed between Hutchinson's and Argyle islands, respectfully report:

That they cannot perceive that the treaty of Beaufort, made in 1787, between the States of South Carolina and Georgia, can be an obstacle to the proposed improvement in the navigation of the Savannah river; that the second section of that treaty reserves to the citizens of each State only equal privileges and equal exemptions from tolls, hindrances, &c.; that it will be obvious, from reading that section, that it was intended to deny to the citizens of South Carolina the right to the use of the south channel of said river lying to the south of Hutchinson's island; and so long as the south channel was so denied to them the right to the use of the north channel (which branches from the south channel at the upper end of Hutchinson's island) was reserved to them; that after the adoption of the Constitution of the United States it was considered and understood that the citizens of Carolina were at liberty to use the south channel; and no objection being made, the north channel was seldom used by them; and more seldom still was the course laid down by that treaty for their use pursued. Upwards of twenty years since an attempt was made to stop this northern channel of the river at the identical spot proposed. No objection was made from any quarter; a line of palisades was driven; and had the work been successful, probably no objection would have been made. It was not so, however; and although the work thus done has caused such an accumulation of alluvial matter as nearly to prevent the use of this communication with the main river, it has not produced that effect upon the main channel which is promised from the proposed work. Your committee, from an examination of the chart of the river, are satisfied that the obstruction proposed will improve the navigation of the river, and will do no injury to individuals; and that, therefore, the State of Georgia should cheerfully yield her consent to it. Nor can they believe that the legislature of South Carolina will withhold her consent when it is considered that her citizens now enjoy the use of the south channel on precisely an equal footing with the citizens of Georgia; that this communication of the north branch with the main channel is now become useless to the citizens from the accumulation before mentioned; that the proposed obstruction will improve the main channel of the river; that the back river and this northern branch will still convey to the low or river lands in Carolina an ample supply of fresh water for irrigation; and therefore beg leave to offer the following resolutions:

Resolved by the senate and house of representatives of the State of Georgia in general assembly met, That the assent of the State of Georgia to the proposed improvement to be made under any act of Congress in the navigation of Savannah river, by throwing or building an obstruction across the north channel of said river from any point on Hutchinson's island, is hereby freely and fully given and granted.

Resolved, That his excellency the governor be authorized to correspond with the executive of South Carolina, and to obtain through him a like authority and assent from the legislature of South Carolina for a work which will be of important and equal benefit to the citizens of both States.

Resolved, That his excellency the governor communicate these resolutions to the United States engineer having charge of said work at Savannah, and also to the War Department.

Read and agreed to.

JOSEPH DAY, *Speaker of the House of Representatives.*
JOSEPH STURGES, *Clerk.*

Attest:

IN SENATE, *December 22, 1835.*

Concurred in.

ROBERT M. ECHOLS, *President of the Senate.*
ARTHUR A. MORGAN, *Secretary.*

Attest:

Approved December 24, 1835.

WILLIAM SCHLEY, *Governor.*

No. 4.

IN THE SENATE, *December 16, 1835.*

The joint committee on federal relations, to whom was referred the message of the governor covering certain communications from Lieutenant J. K. F. Mansfield, an officer of the corps of engineers of the United States at Savannah, Georgia, asking from the State of South Carolina permission to make an obstruction across a branch of the Savannah river, with the view of deepening the main channel of that river, beg leave to report:

That they have carefully considered the subject, and, participating with the executive in the sincere desire to promote the commercial prosperity of a neighboring State, whenever this can be effected without injury to the citizens of our own, recommend the adoption of the following resolutions:

Resolved, That D. E. Huger, Langdon Cheves, and Charles Parker, esqs., be, and are hereby, appointed commissioners on the part of the State of South Carolina to meet and confer with Lieutenant J. K. F. Mansfield, of the corps of engineers, and to examine the site of the obstructions proposed to be thrown

across the branch of the Savannah river, to extend from the point of Argyle island to the point of Hutchinson's island; and that said commissioners be requested to report to his excellency the governor of this State on the expediency of granting permission for constructing this obstruction; and, in case the said commissioners should report that the said obstruction will work no injury to the citizens of this State, or materially affect the navigation of the Savannah back river, that the governor be authorized to grant the permission requested, under the great seal of the State, on the express condition that if, at any future period, such obstruction should be found to fill up the channel of said back river so as seriously to injure its navigation, this permission is to be revoked, and the obstruction removed.

Be it further resolved, That the executive warrant for granting the above permission be recorded in the secretary of state's office before it is delivered to the said officer of the corps of engineers of the United States, at Savannah, Georgia.

I hereby certify the foregoing to be a correct copy of the report and resolutions agreed to by the senate on the 16th December, and concurred in by the house of representatives on the 17th December, 1835.

JACOB WARLEY, *Clerk of the Senate.*

No. 5.

Estimate of funds requisite to continue the operations of dredging for the improvement of the Savannah river during the year 1837.

2 captains to dredge and steamer, 365 days each.....	\$2, 160
2 engineers.....	1, 800
2 mates.....	960
16 hands.....	5, 760
2 cooks.....	720
600 cords wood.....	3, 600
Subsistence.....	2, 700
Repairs of machinery and unforeseen expenses.....	2, 300
Required by appropriation in 1837.....	<u>20, 000</u>

REMARK.—If the appropriation of 1835, of \$20, 000, be reappropriated in 1837, the above estimate will be uncalled for.

No. 6.

The population of Savannah may be stated at 11, 000. The exports for one year, from 1st October last, were:

235,315 bales Upland cotton, at prices from 16 to 19 cents.....	\$13, 000, 000
9,872 bales Sea Island cotton, at 30 to 40 cents.....	1, 000, 000
24,701 tierces rice, at \$16 to \$20.....	400, 000
Lumber.....	1, 112, 207
	<u>15, 512, 207</u>

Thus the exports of one year amount to about fifteen millions five hundred thousand dollars, exclusive of hides, tobacco, tallow, &c.

The imports for the same period, foreign and coastwise, are estimated to exceed twelve millions of dollars.

The amount of tonnage arrived and cleared is as follows:

On foreign vessels entered.....	29, 758 tons.
On foreign vessels cleared.....	68, 167 tons.
	<u>97, 925 tons.</u>
On coasting vessels enrolled and licensed.....	89, 128 tons.
On coasting vessels registered.....	45, 460 tons.
	<u>232, 513 tons.</u>

In the same period 538 vessels arrived as follows:

Ships.....	147
Barks.....	38
Brigs.....	184
Schooners.....	169
	<u>538</u>

The number of vessels owned in Savannah in whole or part—37 ships and brigs, besides smaller vessels.

Regular packets ply to all the principal ports in the United States. To New York there are three lines employing twenty vessels, many of them ships of the first class.

There are from twenty-five to thirty steamers, and upwards of sixty tow-boats, now employed on the river trading to Augusta, Charleston, Darien, St. Mary's, St. Augustine, and the St. John's river, Florida. Steam packets are preparing to ply between Savannah and Norfolk, Baltimore, New York, &c., &c.

It may safely be affirmed of the future business of Savannah that it will continue to increase annually in proportion as the population of the State becomes more dense, and the quantity of land under cultivation increases. The completion of the railroad, and the other improvements now in progress, will likewise certainly tend to the increase of business.

NOTE.—The above information has been furnished through the politeness of Colonel Williams, of Savannah.

I.

LOUISVILLE, Kentucky, November 21, 1836.

SIR: For my annual report of work done for the removal of the great raft in Red river during last year, I beg leave to refer the department to my letter dated July 6, 1836, in which I have given a full statement of the operations on that work during that period. I have, however, to inform the department that I have, on yesterday, despatched Captains Moorhead and Tyson with the steamboats *Souvenir* and *Java*, and about two hundred men, destined to the raft. With that force I contemplate finishing the removal of the raft this season, by the assistance of the new boat now building for preventing the new accumulation of obstruction in the great raft, so called. With the new boat I shall proceed to the raft so soon as it is possible to finish her, which I anticipate will be accomplished in all the month of December. I would here beg leave to urge the necessity of an appropriation to finish that important work at as early a day in the approaching session of Congress as it may be found practicable to pass such a bill.

By reference to my estimate for that object of this day's date, amounting to \$65,000, you will see very nearly what the expense of this year will be, and a less sum wholly insufficient.

The laborers now on their way to the raft are hired at \$25 per month. The wages of mechanics of every description are from \$10 to \$25 per month higher than in former years. Subsistence has advanced from last year from twenty to thirty per cent. I have used every means in my power to economize, and have my men at an average of \$10 per month below the usual wages in the merchant boats on the Ohio and Mississippi rivers.

I am, sir, very respectfully, your obedient servant,

HENRY M. SHREVE, *Superintendent, &c.*

Brigadier General CHARLES GRATIOT, *Chief Engineer, Washington.*

LOUISVILLE, July 6, 1836.

SIR: I have the honor to inform the department that my accounts for disbursements made for my last expedition to Red river, and for the removal of the great raft, have been settled and forwarded by this morning's mail. The amount expended during the last four quarters has been \$64,961 40. The whole amount expended under my superintendency for that object is \$157,338 62.

The first year (1833) seventy miles of the raft were broken up and taken out of the river. During the second year's operations, (1835,) that part of the river from which the raft was removed in 1833 was cleared of the green timber, and some remnants of the raft not thoroughly removed were taken out, and sixty miles of the raft removed.

This year twenty-one miles have been removed, leaving nine miles yet to be taken out, besides a canal which I contemplate cutting through a point of land one hundred and sixty yards, which will shorten the river seven miles, and facilitate the removal of the remainder of the raft. The last thirty miles of the raft that has been removed have required as much labor as the first one hundred and twenty miles. This great difference in labor has been occasioned by the increased quantity of timber, and its particular location.

The last thirty miles were in a part of the river from which a large portion of the water had been carried off by being forced out of the river above the head of the raft on its right bank, through a number of bayous that communicate with a chain of the lakes about thirty miles in length, lying between the river and the high land on its southwest side, distant from the river about four miles, and bounded by the high land to the southwest. The water flows through those lakes, and falls into the river through three bayous, about forty miles below the head of the raft, and one hundred and twenty miles above the original foot of the raft. Ten miles below the head of the raft there is also a large bayou running out of the river on its left bank, called the Willow Chute. Eleven miles lower down there is another extensive outlet on the same side, called Benevares bayou. Those two streams carried off all the water that flowed down through the upper end of the raft, and left the river a dead pond for nearly twenty miles, except in high water, when a portion of the water that flowed down through Caddo lake, on the right bank, flowed up the old bed of the river, and passed off through Benevares bayou and the Willow Chute, which fall into the Bodean and Bestinear lakes on the northeast side of the river. Those lakes empty their waters into the river through two channels below the original foot of the raft, called the Loggy bayou and Coshada Chutes. The Willow Chute and Benevares bayou have been filled with timber from the raft, and are partially stopped. The raft has been removed one mile above the Willow Chute. The remaining nine miles will probably not be so difficult to remove as the last thirty miles below have been; still it contains a larger quantity of timber in proportion to distance. But that timber is not so deeply imbedded in the mud and sand, nor is it so much overgrown by green timber as that which has been removed during the present year, a great portion of which had more the appearance of a forest than a river. The remainder of the raft will be removed with less labor, as it has the advantage of a greater portion of water flowing through it, and a less number of islands to be removed than has been taken out of the river below. Under these circumstances, the department may calculate with confidence that the whole raft will be removed by the month of April next, provided the appropriations estimated for are made at the present session of Congress, which I hope will be the case, as I am desirous of finishing the work at as early a day as it is possible to accomplish it. When the raft is all removed, the navigation will be good, and will

admit of steamboats of two hundred and fifty tons passing through that part of the river where it was located at least nine months in each year. There have been twenty-seven trips made this year, from January 1 to May 25, by steamboats, as high as Coates's Bluff, which is one hundred and fifteen miles above the original foot of the raft. The navigation from that bluff to the head of the raft will be better than it is below so soon as the remainder of the raft is removed. I am of the opinion, however, that, to make the improvement permanent, it will be necessary for the government to keep one boat at work for several years after the raft has been removed. The river has been contracted in its width at many points by the deposits occasioned by the location of the raft. Those alluvial bottoms are washing away by the action of the current on the banks, and will continue to deposit the timber that stands on them in the stream. Many logs that yet remain on the bottom of the river will be loosened by the same cause, and rise to the surface of the water. Those that have heavy roots will form snags, which, together with the trees that fall in from the alluvial bank, must be removed as they accumulate, otherwise the raft may reform and obstruct the navigation. That kind of obstruction will not accumulate longer than four or five years, after which time there can be no renewal of the raft; the river will have been opened to its original width, which will give it sufficient capacity to carry off all the timber that flows down during its annual freshets.

The removal of the raft will extend the steamboat navigation from its lower end to Fort Towson, a distance of 720 miles. That part of the river between the head of the raft and the mouth of the Kiamichi river, 560 miles, may be much improved in its navigation by removing the snags from its bed, which can be done at a small expense by the boat that will be necessary to complete the improvement in the raft. I would therefore recommend that provision be made for that operation to be carried on at times when the boat alluded to can leave the raft with the least loss of time in her operations there, and when the water in the river is at the most favorable stage for the removal of the snags above.

To attempt an estimate of the amount of funds yet necessary to complete this improvement would be so much at random that I cannot venture an opinion on the subject. However, my present calculation is that \$45,000 will be sufficient to build a boat and finish the work. But so much depends on the price of labor and subsistence, which is advancing so fast that no calculation can be made to estimate, with any degree of correctness, what any work will cost that depends on those two items to so great an extent as does the work in question, I can make no calculation on obtaining labor to finish that work at a less rate than twenty-five dollars per month, nor have I any assurance that it can be had at that rate. The wages now paid on steamboats navigating the western rivers are much higher. In my report dated 1st July, 1835, I stated that there was no doubt that the whole work of removing the raft would be gone through during the course of the last winter and spring; but experience has shown a different result, which was owing, in part, to the remainder of the raft being much more difficult to remove than I had calculated, and from the great loss of time during this year from sickness among the laborers. By reference to the pay-rolls, it will be seen that 9,006 days' work is charged as lost time, amounting to a deduction in pay of \$7,347 15. The loss to the progress of the work was in a much greater proportion, as it required a deduction from the effective force to nurse and attend to the sick, besides the debility occasioned by the sickness that prevailed among a larger portion of the whole force employed during the year.

The location of the raft is very unfavorable, being in a climate that will not admit of men laboring in the summer and fall months, and where there is no labor to be procured. Consequently, all the force necessary to execute that work must be taken from the Ohio river. The nature of the work is in itself calculated to produce disease. The men are constantly exposed to the sun, and a large number of them must work in the water, surrounded by a dense mass of decaying timber, of which the raft is composed. Still, under all these disadvantages, I shall probably accomplish the removal of the remainder of the raft by April next, and at as small an expenditure as I can by any means effect the object.

I am, sir, very respectfully, your obedient servant,

HENRY M. SHREVE, *Superintendent, &c.*

Brigadier General CHARLES GRATIOT, *Chief Engineer, Washington.*

K.

Annual report of work done for the improvement of the navigation of the Ohio and Mississippi rivers during the year ending the 30th September, 1836.

Louisville, Kentucky, September 30, 1836.

By reference to the monthly reports of the masters of the steam snag-boats Helepolis and Archimedes, on file at the Engineer department, it will be seen that 1,491 snags were removed from the bed of the Mississippi river, between the 1st October, 1835, and the 29th of February, 1836; and that 3,434 trees were felled from the caving-in banks of that river within the same time. Those boats were worked in the Arkansas river a portion of the time above stated. For a report of which see my report for the Arkansas river.

On the 1st of March the snag-boats were laid up at St. Louis, Missouri, for safe-keeping and repairs. Their engines, boilers, and hulls were extensively repaired by the 14th of August last, when they proceeded to work. It will be seen by reference to reports of their masters, on file at the Engineer department, that 546 snags were removed by them in August and September from the bed of the Ohio and Mississippi, below the mouth of the Ohio river, and 3,358 trees felled from the caving-in banks of the Mississippi river, (those boats were employed a portion of the months of August and September above the mouth of the Ohio river; see report for the Mississippi above the Ohio, and for the Missouri river;) making the whole number of snags removed from the Ohio and Mississippi, from the 1st of October, 1835, to the 30th of September, 1836, 2,037; and the number of trees felled from the banks of the Mississippi within the same time 6,792. About one-half of the number of snags removed were from the accumulation of the last year; the remainder were removed from parts of the river where it had changed its channel, and exposed snags that had been buried in sand banks for many years. The trees that have been felled were of those standing on the margin of the river, and where the banks are falling in, carrying the timber with them, and forming in such places dangerous obstructions; being more destructive to the flatboats than to steamboats, but liable to damage all kinds of craft that navigate the river.

To fell them before the banks cave in, the stumps, being nearly as heavy as the earth in which they grow, sink to the bottom, and lie so deep below the surface as to be out of the reach of boats navigating the river. The trunks and tops of the trees float off on the surface of the water, and never become dangerous to the navigation.

To fell the trees in this situation requires much less labor than to remove the snags that would be formed by their falling into the river with the roots attached to them.

From all the experience I have had in the improvement of the Mississippi, Arkansas, and Red rivers, where the alluvial banks are continually throwing their heavy forests into their channels, I am clearly of the opinion that felling the timber from the banks not only produces a very beneficial effect in the improvement of the navigation, but tends evidently to stay the progress of the caving of the banks.

I have urged the subject in all my reports on the improvement of the Mississippi river, and will again beg leave to recommend that provision be made to extend that portion of the work.

But little was done during October and November, 1835, in the improvement of the Ohio river, except to quarry rock and to prepare it for finishing the dam, formerly begun at Three Mile island.

The river was at too high a stage at that time to admit of placing the rock on the dam. The steamboats Java and Souvenir have been repaired since their return from the Red river raft, and commenced work in the Ohio river about the 10th of September instant, and have made some progress in raising the dam formerly built at the head of Cumberland island. The channel at that place is progressively improving, and I have no hesitation in stating that the improvement at that point will be eminently successful when the dam is raised three feet higher.

The foundation is now permanent, and will, in all probability, remain so, as the accumulation of gravel and sand above and below the rocks has risen to two-thirds of its height from the bottom of the river. The work at the Sister islands and Scuffletown bars has been successful to the full extent of my most sanguine calculations. At the Three Mile bar the work has not been completed, owing to the unusual high stage of water for the last two years during the summer months. The dams at French island are yet perfect, but require raising on the old foundation, particularly the lower wing; when that is done the channel at that place will be good and of sufficient depth.

The Ohio river has been navigated during the past summer and fall with but little interruption, partly owing to the improvement of the bars, but principally to the favorable stage of the water.

The Mississippi river, from the mouth of the Ohio to New Orleans, is now as safe to navigate as it can be made for many years. The accumulation of snags will continue in the same ratio, gradually decreasing as the banks of the river are cleared of its timber. To keep that navigation as safe as it now is will require the removal of the annual accumulation of snags from its bed, at an average expense of fifty thousand dollars a year.

There have been no losses of any importance occasioned by obstructions in the Mississippi river during the current year, notwithstanding the increase of commerce on it has been much greater than in any previous one. The number of boats now trading on that river being over four hundred, a large portion of those built within the last two years are of extended capacity to do business, by their great increased speed and improvement of construction.

I have no data by which I can give a correct estimate of the amount of tonnage, or value of the produce and merchandise transported up and down that river; I therefore omit any statement on that subject for the present.

I am, sir, very respectfully, your obedient servant,

HENRY M. SHREVE, *Superintendent, &c.*

Brigadier General C. GRATIOT, *Chief Engineer, Washington.*

MEMPHIS, August 23, 1836.

SIR: Since the last report I had the honor to submit to the department, in July, 1835, relative to the operations progressing under the superintendence of Captain Shreve, for the improvement of the Mississippi and Ohio rivers, I have twice visited and inspected his work on these rivers above this place. The snag-boats, which, at the time of my last reports, were undergoing repairs at St. Louis, commenced work on the 28th of August, 1835, and continued on the Mississippi and Arkansas rivers until the 1st of March, 1836. During this period they removed from the bed of the Mississippi 1,978 snags, and cut from the bank 3,535 trees; and during the same period 928 snags were removed from the bed of the Arkansas, and 1,481 trees felled from the banks; being 1,714 snags and 2,507 trees more than the preceding year.

My first inspection during the current year was in December. At that time the improvement effected by the labors of the snag-boats was abundantly manifested throughout the whole extent of the river visited. Very few snags were met with, and those such as had, by their remote position from the channel or their insignificance, escaped the attention of the boats. The river was at this period in good boating order: not so low as to exhibit those snags which are visible at extreme low water only, nor so high as to conceal more elevated ones, had there been such in the channel. The experience of each year strengthens the conviction that the navigation of the Mississippi may ultimately be made entirely safe and easy. I would cite its condition in December last in support of this opinion. At that time a boat under proper management incurred but little risk of injury from snags.

During the latter part of winter and the spring of the present year the Mississippi attained or nearly attained its extreme high-water mark, and remained high during a longer period than any year since 1828. The banks, therefore, became saturated and softened, so that, when the river began falling rapidly, having no longer the support of the water, they caved to an unusual extent—more than in any one season since 1828. Twice during the winter and spring the river rose and fell, and each time with the same effect upon the banks. These remarks apply generally to the river, but are more especially applicable to the right bank, between the head of Canadian Reach and the mouth of the Ohio, and thence to Cape Girardeau, and at intervals from thence to St. Louis. In addition to the snags thus formed, a considerable number are annually supplied to this section of the river from the Missouri, whence they are brought by the ice.

The policy of clearing the trees from the banks in such places as are likely shortly to cave in, which has been presented for the consideration of the department in a former report, and the necessity of adopting it ultimately, cannot more clearly be shown than by contrasting the condition of the river in

December, 1835, before the overflow, and in June, 1836, the time of my last inspection, after the overflow had subsided. In December, as already stated, the navigation was almost entirely free from snags and other obstructions; in June it exhibited a larger number of recently-formed snags near the shore than has been witnessed on any former inspection. Had the trees which formed these snags been cut, they would either have floated off harmlessly, or, what is equally probable, would ere this have been converted into wood for steamboat purposes. This, as shown in a former report, could have been effected at comparatively small expense. Their removal will give employment for the season to the snag-boats; and while these boats are so employed, and until the work of removal is entirely accomplished, the navigation will be attended with corresponding difficulty and hazard. The snag-boats, having undergone the necessary repairs, will proceed with their operations as early as the season will admit—probably by the first of September. One of these boats, I am informed by the superintendent, will not last more than the present season before a new hull will be necessary. Having examined this boat, I fully concur with him in this opinion. The machinery, with some repairs, will answer for the new boat.

Nothing was done on the Ohio river during the last season, except quarrying a few rocks for the dam at Three Mile island. In December, and in June following, I found the Ohio higher than was expected. I could not learn, therefore, of the effects or condition of the dams, as they were all covered by water.

At Cumberland island the river does not yet appear to have excavated for itself a continuous channel through the bar, which is cut and worn into detached lumps. Being of coarse gravel, its removal is necessarily slow. There can, however, be no reasonable doubt of ultimate success. The plan of operations for the present year will be communicated by the superintendent in his annual report. The continued rains have doubtless greatly retarded if not wholly interrupted his work on this river.

My duties on the Memphis and St. Francis road have so entirely engrossed my time that I have been able to visit neither Red river, Arkansas, nor the Mississippi below Memphis. It is my purpose to avail myself of that portion of the ensuing winter when the operations on the road will necessarily be limited to visit and inspect Captain Shreve's operations on those rivers.

The results produced on the Mississippi sufficiently vouch for the fidelity and energy with which the work has been prosecuted. These results are no less useful and important to the public than creditable to the superintendent.

I have the honor to be, sir, very respectfully, your obedient servant,

A. H. BOWMAN, *Lieutenant of Engineers.*

General CHARLES GRATIOT, *Chief Engineer.*

L.

MEMPHIS, July 1, 1836.

SIR: Since my report in August I have examined the work in progress for the improvement of the Cumberland river, under the superintendence of Captain McKnight.

From that time to the present the operations on this river have been principally confined to the dam at Line island, which has been raised and prolonged at the lower extremity. The wreck of the steamboat which here obstructed the channel has been entirely removed. There still remain many logs and stumps on the left bank of the river at this place that prevent boats from availing themselves of the best water, which is near the shore; these it is the design of the superintendent to remove. It is probable that the entire work at Line island will be completed by the 30th of September; when finished, the navigation will be permanently improved.

Above Line island no important changes were observable in the works previously constructed. The dam at Davis's ripple had sustained slight injury, some of the upper stones having been displaced, probably by drift during the winter or spring flood. The head of Harpeth island appears to be giving way. To protect this from the further encroachments of the river it will be necessary to prolong the upper dam until it unites with the island. Probably, from examination, it will be found expedient to continue this dam till it joins the lower one, which will give perfect security to the island. It is all important to arrest the action of the water upon Harpeth island, since the alluvion from it, spreading itself over the extensive shoal below, would greatly enhance the difficulties of navigating that part of the river.

The banks of the Cumberland have fallen in to a greater extent during the past season than in any former year.

That branch of the improvement which consists in the removal of logs, stumps, and projecting trees, and which was considered complete, will require the further attention of the superintendent.

Those works which have been named in former reports as forming part of the system proposed and adopted for the improvement of Cumberland river, and which have not yet been finished, will, in succession, be taken up and completed.

I have not been furnished by the superintendent with a project of his intended operations for the season. No deviation, however, is expected from that adopted last year, which was to finish as he ascended all dams and other improvements.

This work, during the past year, has been retarded by the difficulty of procuring hands and by sickness.

The present summer has been unfavorable from excessive rains, which have several times raised the river above the dams.

Efforts have not been wanting on the part of the superintendent to collect a sufficient force to carry on his work rapidly; such, however, is the scarcity of laborers, that, up to the time of my inspection, his efforts had, to a great degree, been unsuccessful. From his untiring zeal and perseverance the most satisfactory results may yet be confidently expected during the present summer and fall.

I am, sir, very respectfully, your obedient servant,

A. H. BOWMAN, *Lieutenant of Engineers.*

General CHARLES GRATIOT, *Chief Engineer.*

M.

Annual report of work done for the improvement of the navigation of the Mississippi river above the mouth of the Ohio, and for the Missouri river, during the year ending the 30th of September, 1836.

LOUISVILLE, Kentucky, September 30, 1836.

Agreeably to instructions from the department in August last, I proceeded to examine the Rock river and Des Moines rapids of the Mississippi river. By that examination I have come to the conclusion that a perfect channel can be opened through both of those chains of rocks. For a particular description of which, with the plan of operations, I beg leave to refer to my letter to the department dated the 16th of September last.

Since that date the water in that river has continually been at too high a stage to have effected anything towards opening a channel, if the necessary preparations had been made.

But if the stage of the water had been favorable nothing could have been done, as the season was so far advanced, when the appropriation was made for that object, that it was impracticable to build the necessary boats and prepare the machinery and tools required to carry on that work earlier than July next. The boats, machinery, &c., necessary for removing the obstructions at the rapids are now building, and will be ready for the commencement of the work in the ensuing summer.

The steam snag-boats Helepolis and Archimedes, as will be seen by reference to the monthly reports of the captains of those boats, on file at the department, removed from the bed of the Mississippi river, above the mouth of the Ohio river, during the months of August and September of this year, 189 snags, and felled from the islands and caving banks of the same river 3,730 trees.

The navigation of the Mississippi river, in that part where the snags have been removed, (say from the mouth of the Missouri to the mouth of the Ohio,) is now comparatively good, having but very few snags remaining in it; all of which, that are visible, will probably be removed during the month of October by the steamboat Archimedes, now operating in that part of the river.

I am, sir, very respectfully, your obedient servant,

HENRY M. SHREVE, *Superintendent, &c.*

General C. GRATIOT, *Chief Engineer.*

LOUISVILLE, Kentucky, September 16, 1836.

SIR: In obedience to your order of the 27th July last, I proceeded to Rock river rapids, where I made such examinations as I deemed requisite to obtain a knowledge of what was necessary to be done to improve the steamboat navigation over them, and to make myself acquainted with the preparations required to execute the work. I have also extended my examination to the rapids of the Des Moines. To give my views more fully, I compared my examinations with Lieutenant N. B. Buford's map of surveys made in 1829. I accordingly furnish the department with copies from the outlines of his drawings, with my corrections of the location of the rocks and chains of rocks in each of those rapids.

In ascending the Rock river rapids from Fort Armstrong the first obstruction is found one mile up, consisting of a ledge of rocks stretching from the island to the west bank of the river, leaving a channel running through the ledge, as represented by the *red* line drawn on the map to mark the channel. Through that channel, which crosses the river nearly at right angles, there is a depth at low water of from $4\frac{1}{2}$ to 5 feet, which would be a sufficient depth if it ran in a line with the shores of the river or the current; but by its running across the river, it is very difficult to work a boat through it, particularly when the boat is descending the river. To improve this channel, I would recommend that it be straightened by cutting off the points of the reef, as marked by the *black* lines drawn through them in the chart, which will make a channel 120 feet wide.

The second obstruction is at a small island near the head of the Rock island. At that place there is a flat reef, stretching from the island to the west shore; the deepest water is near the small island. To improve that point it will be necessary to excavate the reef a depth of about 30 inches, 200 yards by 120 feet wide, and to remove a number of large loose rocks found immediately above this chain.

The third obstruction is a ledge of rocks projecting from the east shore about two-thirds across towards the west shore, and a similar ledge running out from the west shore towards the east shore, terminating about 100 feet beyond the point of that running from the east shore, and about 100 feet above the latter, leaving a channel of sufficient depth between them; but, from the very short turn to be made by a boat in passing between them, it will be necessary to cut off the points of those ledges, in order to straighten the channel, which, with the removal of some loose rocks above those ledges, will be sufficient to make a safe channel at this point.

The fourth obstruction is at the foot of Campbell's island and near a small island, where there is a flat reef stretching across the river from the foot of Campbell's island to the west shore, intersecting the small island on each side. To improve this place, it will be requisite to excavate the rock from about 100 feet below the small island up to midway of the island, distant about 500 feet. The depth of excavation here will be 2 feet, and 120 feet in width. There are also some loose rocks to be removed at this point, which will complete the improvement there.

The fifth obstruction is at the head of Campbell's island, being a chain of rocks passing obliquely from the head of the island to the west banks. There is a channel at this place, crossing through the chain obliquely, of $3\frac{1}{2}$ feet depth; but being difficult to make by a steamboat, it will be necessary to cut off the point of the reef, and deepen the channel 18 inches at this place.

The sixth obstruction, at Davenport's island, is a flat rock projecting out from the east shore towards the island, running over half the width of the river. There are also several reefs running out from the island, nearly intersecting the reef from the east shore, and a middle reef lying between them, which makes the navigation here extremely difficult and dangerous, as the channel is divided. To make a safe channel here, I would recommend to cut off the point of the reef which passes over from the east shore and straighten the channel, which, with the removal of the loose rock in that vicinity, will make a safe channel at that place.

 by *Napoleon B. Byford* 1829
CORRECTED
 by *Henry M. Shawe* 1836
1836

The seventh and upper chain, known by the name of the Sycamore chain, is formed by four distinct reefs, running out, first, from the west shore, within 100 feet of the east bank, immediately above which there is a reef running out from the east shore about 100 yards; a third reef, passing over from the west shore, terminating within 50 yards of the east shore, and 100 feet above the reef from the east shore below; there is also a fourth reef running from the east shore, which runs out from that shore about 150 yards, terminating above the third reef, leaving a serpentine channel winding around the points of those reefs, making it extremely difficult to navigate, and very dangerous to pass at a medium stage of the water. To improve this chain, it will be necessary to cut off the points of the four reefs, as shown by the black lines drawn across them on the chart. This being done, as also some masses of loose rock removed, that lie above those reefs and scattering along the channel at different points for about one mile above this chain, all the difficulty and dangers to the navigation on the Rock river rapids will be overcome when boats are navigated by experienced pilots. Buoys have been recommended by Lieutenant N. B. Buford; I do not, however, believe that buoys can be so put up or fastened as to withstand the pressure of the ice during the winter. I have made some experiments on the subject in the Ohio river, at the Grand chain, in the fall of 1830. When the rocks were removed from that place, buoys were placed in the river to mark the channel; they were fastened in the best possible manner with chains of sufficient length, made of iron $\frac{3}{4}$ of an inch diameter, fastened into the solid rock bottom with an eye-bolt secured by a wedge at its lower end. Of six of those buoys not one stood the ice of the first winter, nor do I believe that it will be possible to secure them on the rapids of the Mississippi in such a manner as to be useful. It would be a better plan to establish pilots, authorized by law to be located at the rapids, with fixed salaries.

The Des Moines rapids can be so improved as not to require buoys or licensed pilots. The first obstruction at the foot of the Des Moines rapids is at the big rock described by Lieutenant N. B. Buford. I would recommend, in the strongest terms, that a channel be opened at these rapids, commencing near the shore on the west bank of the river, opposite the big rock, and running along the bank to Lafferty's, distant $8\frac{1}{2}$ miles; thence in a straight line to the southeast point of the small island at the head of the rapids, passing below the point of that island to the west shore, which brings it clear of the shoals and above the rapids. By pursuing that plan, the navigator will have the shore for his guide, and cannot miss the channel at any stage of the water; consequently it will not be necessary to excavate a channel more than 90 feet wide, which width can be more easily navigated along the shore than a channel of 300 feet would be in the middle of the river, and following the meanders of the natural channel that now exists between the reefs.

I have examined the shore along the whole line, and, from the soundings, am of the opinion that less excavation will be required to make a channel along shore 5 feet deep by 90 feet wide than would be required to make a channel of equal depth 120 feet wide by following the track that is now navigated by steamboats.

Beginning at No. 1, as marked on the chart, crossing the first reef to No. 2, a distance of $1\frac{1}{4}$ mile, will require an excavation of an average of $2\frac{1}{2}$ feet; from No. 2 to No. 3, a distance of three miles, will require an average of 1 foot of excavation, and some loose rocks to be removed; from No. 3 to 4, $1\frac{1}{2}$ mile, the excavation required will be 3 feet; from No. 4 to 5, 1 mile, it will be necessary to excavate an average of 18 inches, and remove some loose rocks; from No. 5 to 6, a distance of $1\frac{1}{2}$ mile, but little will be required to make the channel complete; from 6 to 7, a distance of 1 mile, will require an average excavation of 6 inches, and the removal of some loose rock; from 7 to 8, distant $\frac{2}{3}$ of a mile, will require an excavation of about two feet; from No. 8 to 9, a distance of $\frac{1}{2}$ of a mile, will require an excavation of about 18 inches. This course shortens the route $1\frac{1}{2}$ mile, making the whole distance, following the shore from the foot of the lower chain to the head of the rapids, $10\frac{1}{2}$ miles.

The amount of labor necessary to improve the channel by following the shore will be less than that recommended by Lieutenant Buford's report. As the channel along shore need not be more than 90 feet wide, the labor can be executed much cheaper near shore than it can be done in the middle of the river. The laborers near shore will lose no time in going to and returning from their work; whereas those that would be employed in the middle of the stream must lose one hour at least every day, which will make 10 per cent. difference in the amount of labor.

Under all these circumstances, I would recommend that the improvement be made along shore. I would also beg leave respectfully to suggest to the department that the lower Des Moines rapids be improved first, for the following reasons: 1st. There is one and a half foot more water on the upper rapids than on the lower rapids. 2d. To improve the lower rapids, and extend the navigation 140 miles further up the river, will be a matter of great importance to all that extent of country on each side of the river for that distance, which is populating very rapidly. And as the Rock river rapids have 18 inches more water on them than the Des Moines rapids have, the improvement of the lower or Des Moines rapids will at once remove a large portion of the great difficulty, inconvenience, and expense occasioned by the obstructions in the rapids. For example, I passed down over the Rock river rapids, on board the steamboat Missouri, to Fulton, about the 24th ultimo, with a cargo of lead, and about 60 passengers. The boat arrived at the upper reef or Sycamore chain about sunset, and passed over the rapid with her freight and passengers all on board. She did not touch the rocks, notwithstanding it was dark before she had got half the distance over them. On arriving at the Des Moines rapids on the next day the freight was all taken out in lighters; the passengers also crossed over on the lighters, and the boat struck the rocks four different times. This evidence is conclusive, leaving no doubt on my mind that the lower rapids should be improved first. I have conversed with many persons well acquainted with the navigation of that river, who are all of the opinion that the Des Moines rapids should be first improved.

I have to inform the department that, from the late period of the year and the location of the rapids, nothing beneficial can be done this year. It will require two months at least to make preparations to be able to commence the work, which would bring the month of November. At that period the water will be so cold that it will be impracticable for men to work in it.

The preparations necessary will be a steamboat, which must be built, as no suitable boat can be bought; two machine boats similar to those used by me at the Grand chain on the Ohio river in 1830, to raise and remove the rocks; several scows to boat rocks, drills, crowbars, and tools sufficient to work two hundred men, with boats to transport and quarter them in. I have made arrangements for building the machine boats and steamboat. The engine that was formerly in the "Pearl" will (a part of it) answer to propel the proposed boat, which will cost \$6,500 to build the hull of the boat and repair and put up the old engine in her.

If this plan of preparations should be sanctioned by the department, you will please inform me of

the same as soon as practicable, so that all the necessary arrangements may be made for the same previous to my leaving this place for the Red river raft.

The work on the rapids cannot, under any circumstances, be commenced earlier than July next. Still, the boats should be built and every preparation made in time to be ready for the first low water.

To attempt to make an estimate for the completion of this improvement would be altogether at random, as so much depends on the stage of water, health of the men, and price of labor, that it is impracticable to form a correct opinion. But, as relates to its practicability, I have no hesitation in stating that it can be effected so as to remove all the difficulties that now exist, making the navigation as safe and easy over the rapids as it now is above and below them. As to its importance, that has been shown by the report of Lieutenant N. B. Buford.

However, the seven years that have elapsed since the date of that report have made a vast change in the navigation of the Mississippi above the Missouri river. At that period (1829) the steamboats had but commenced to navigate that part of the river. At intervals of three to four weeks a single boat was seen passing. Now, there is no point in the whole line of that river, when the water is sufficiently high, that a steamboat is not seen every day passing crowded with passengers and laden with all the varieties of merchandise that the wants of the country demand. The rapid sale of the public lands in that section is a sufficient testimony of the importance of the navigation of that noble river. My knowledge of the resources and wealth of that region is yet too limited for me to attempt to report on that subject, nor do I deem it necessary at this time to say more.

I have the honor to be, sir, your obedient servant,

HENRY M. SHREVE, *Superintendent, &c.*

Brigadier General C. GRATIOT, *Chief Engineer, Washington.*

N.

MEMPHIS, *September 30, 1836.*

SIR: At the time of my last annual report the entire embankment of the Memphis and St. Francis road was under contract. There now remain in the hands of contractors but seven of the western miles. The causes which led to the abandonment of those contracts and the injurious effects upon the progress of the work have already been made the subject of a report to the department.

The contractors sustained heavy losses from unexpected difficulties in the construction of the embankment, to overcome which their resources and time were unsuccessfully expended. It was sufficiently evident that they could not accomplish their undertakings, and to coerce them to further efforts would have been to waste in a fruitless attempt the little that remained of the working season. Before quitting, an experiment was made by the contractors to substitute oxen and scrapers for barrows and shovels. By this change it was expected to avoid the most serious obstacles to the advancement of the work, viz: the want of hands and the liability to disease. The most favorable results were confidently expected; the experiment did not, however, succeed, and was finally abandoned.

The failure of the contractors to fulfil their engagements, their losses, and the difficulties which it was now discovered would present themselves in the construction of a road through this swamp, rendered it extremely improbable that a second attempt to execute the work by contract would eventuate more successfully than the first had done. This consideration, together with the unavoidable delay in again advertising the embankment for contract, and the inevitable dispersion of the laborers on the slightest suspension of the work, induced me to abandon the contract system, and to proceed at once to its execution by hired labor. The greater part of the working season was already consumed, leaving but little time for preparation. As soon as the contractors declared their inability to proceed further, the hands in their employment were taken into the service of the United States.

PLAN OF OPERATION.

The greatest physical obstacle in the construction of this work is the swampy nature of the soil, which renders it difficult to form the embankment, and increases the expense and labor of transporting provisions (all of which are drawn from the river) to an enormous expense. The plan which at once suggests itself to lessen the labor of transportation is to commence on the river, and finish the work as it advances into the swamp. This, however, is not practicable, nor would it be good policy. There is comparatively but a small portion of the road that can be worked upon in the winter. It is necessary, therefore, to select for summer operations such parts as would be impracticable in the rainy season, reserving the drier sections for the winter. A depot for provisions was established about the middle of the fifth mile, at the point where the road leaves the river. It was determined to penetrate the swamp, selecting, as the work advanced, only such miles as would be impracticable in winter, leaving the higher and drier ones to be completed as the companies returned after the commencement of the fall and winter rains. By this manner a good road was secured for the transportation of provisions, and such portions of the work as could be prosecuted during the winter reserved for that season. In pursuance of this plan, the companies continued to advance as long as it was practicable, when they were withdrawn and put upon the miles next the river, which are drier, sandy, better drained, and nearer the depot.

This disposition of the laborers continued until the latter part of winter, when arrangements were made for prosecuting the operations in the spring with an augmented force. The favorable prospects of the work were suddenly reversed by an overflow of the Mississippi, which covered all the miles nearest the river, and rendered a speedy retreat from that section necessary. A large portion of the laborers left, rather than proceed further into the swamp to those miles which were not overflowed and had been reserved for such an emergency. By this overflow the force was reduced to little more than one hundred. These were advanced to a ridge of land lying upon Grandee lake, where the work is light and dry. In June following more than half of this number, alarmed at the sickness of last year, left the country. From that time to the present the force has varied from fifty to one hundred and twenty-five hands. No exertions have been spared to attract men to the road. Agents have been sent to different parts of the country where hands have been represented as more abundant.

Having learned from undoubted authority that laborers were receiving higher wages on the Vicksburg, Grand Gulf, Natchez, Bayou Sara, and New Orleans railroads than had been previously given here, on the 1st of July wages were advanced two dollars per month. This, together with the excellence of provisions and the certainty of prompt payment, it was hoped would draw to the work as many laborers as were wanted. These expectations, however, have been disappointed. Apprehension of disease, which the panic of last year has magnified beyond the reality, is doubtless the cause of this aversion to engage upon the road. The hands this summer have enjoyed an unusual degree of health, and it is hoped the unfavorable impressions of last year will be effaced. The number of hands is daily increasing, and several companies are shortly expected from the north.

CAUSES WHICH HAVE RETARDED THE WORK.

The failure of the contractors, and the causes which led to it, gave the first serious check to the progress of the embankment. The scarcity of laborers; the total absence in the country of every resource required in the execution of such a work, and the difficulty of creating them; sickness amongst the hands; excessive rains, added to the obstacles already enumerated, arising from the swampy nature of the country, are the prominent causes which have prevented the advancement of the work during the season. Every exertion has been made to overcome or remove such as were within the control of human means. That my unaided efforts have not been more successful is not a subject of surprise, when the nature of the undertaking is understood. Since the 1st of November, 1835, when the work was received from the hands of the contractors, the labor-rolls of the overseers exhibit fifty-nine working days wholly or in part lost by rain—more than one-fifth of the whole time. In no country could this excessive wet weather be more prejudicial to the construction of embankment than in this swamp, which, being perfectly level, and composed of a tenacious clay, retains the rain water until it is carried off by the slow process of evaporation.

There has been no period, during the last twelve months, when it would have been practicable to work on the road between the west end of the seventeenth mile and Blackfish lake, because of the standing water; for which reason, upon completing the seventeenth mile, it will probably be necessary to withdraw from the swamp, and that, too, at a period when, in ordinary seasons, the work on that section could be most profitably pursued.

The contractor has done but little on the west end since my last report, having encountered the same difficulties in collecting and retaining hands that have been experienced here. For this reason he has been suffered to retain the contract, not without a hope that his exertions to assemble a force would finally succeed. These expectations, to a certain extent, have been realized, and it now seems probable that he will finish during the present fall as far as the St. Francis river.

CHANGES IN THE ORIGINAL PLAN.

It will be recollected by the department that a change in the mode of construction on the first four miles was proposed and sanctioned by the honorable Secretary of War. The alteration consisted in the substitution of solid embankment for hollow bridges over several sloughs that cross the line of the road. The embankment of the fourth mile, including the principal of these sloughs, was completed early in the fall, that no advantage arising from its settling might be lost. Serious apprehensions were entertained by many persons that the embankment could not sustain itself against the thrust of sixteen feet of water which could press it when the Mississippi should attain its high-water mark. It is a source of gratification that all the expected advantages set forth in proposing the change have been fully realized. The lands lying on the south side of the road, which were formerly submerged during the annual inundation of the Mississippi several feet, were protected by the embankment so effectually that for many weeks after the waters had risen several feet on the north side of the road, the laborers on the south side continued their excavations for the finishing of the curve. The water ultimately flowed backwards upon this part of the country, having turned the lower extremity of the embankment; not, however, until the laborers had completed their work. Having adopted the plan of finishing such parts of the road as were commenced, (especially where it was liable to overflow from the river,) scarcely any of the embankment was washed away. The extremity, which it was my purpose to have secured with a timber frame when the river should overflow its banks, was unexpectedly caught, owing to the rapidity of the rise, without any defence against the action of the water. About one hundred and fifty feet of the road were carried away; this being of recent formation, washed readily. This was the only damage the embankment sustained from the overflow. It is estimated by the oldest inhabitants here that the Mississippi, during the spring inundation, attained its extreme height within six inches; and the indices drawn from marks on the trees serve to confirm this opinion. Assuming the high-water mark at six inches above this last overflow, the line established as the surface of the road (as it was designed to be eighteen inches above high water) having been, during that overflow, two feet above the surface, the water remaining against the embankment more than two months without percolating it, removes the only doubt I ever entertained of its stability and superiority over open bridge-work, which is perishable and expensive.

PROGRESS OF THE WORK.

From the history of the work during the past season, it will be gathered that three causes have principally retarded its progress: the failure of the contractors, wet weather, and the inadequacy of the force. When the laborers shall have completed the seventeenth mile, upon which they are now engaged, there will remain unfinished on the east end of the road 400 cubic yards on the sixth mile, 8,951 on the third, 34,731 on the second, and 7,500 on the first; making an aggregate of 51,582 cubic yards. When this shall be finished, the road will be done to the seventeenth mile, inclusive.

Since my last report bridges have been constructed over Brushy bayou. Beaver lake, the first bayou west of Sand slough, and the one over the third bayou, are nearly completed. As the embankment does not progress as rapidly as was anticipated, the commencement of the remaining bridges will be delayed until the embankment shall be so far advanced that they may be finished at the same time. The road has been somewhat injured by washing; this is chiefly confined to those places which have been subjected to the action of heavy rains while the embankment was fresh and unsettled.

To prevent further injury from this cause, grass seed of suitable quality has been procured and sown

upon the slopes. I have recently discovered that the Bermuda grass, so favorably known for its valuable qualities in protecting embankments from washing, is indigenous to this region. I shall cause the slopes to be covered with this grass, by which they will be effectually secured from washing in future.

The same policy that has been observed in the progress of the work since it fell into the hands of the United States will be pursued during the ensuing year. The embankment will continue to be pushed forward towards Blackfish, so long as the season will permit. With a view to remove, if possible, the standing water which covers the country generally from the seventeenth to the thirty-first mile of this road, a company of ditchers have been directed to advance into the swamp, and, beginning at a bayou on the twentieth mile, to open a ditch of suitable dimensions connecting with that on the seventeenth mile. As there is a fall of several feet in this distance, it is hoped that the ground through which it passes will be so drained as to render it practicable to work on it, even after the setting in of the winter rains. Should this fail in producing the desired effect, the forces will be employed during the rainy season upon such portions of the works as are, by their proximity to lakes and bayous, better drained.

The importance of completing this work as speedily as possible is sensibly felt, and commensurate exertions have been made for its accomplishment. It is plain, however, from the experience of the past season, that an adequate force to finish it in less than two years and a half cannot be assembled.

With these unimportant exceptions, a breach already named, the work is now completed to the seventeenth mile; the adjacent country, which is equal in fertility with any part of the Mississippi valley, is thus furnished with an easy communication to the river. The region through which the unfinished portion of the road passes is entirely destitute of resources, and is uninhabited except by three or four families. From the nature of its soil and from local situation but little of it can ever be inhabited. Both public and private lands situated on or near that part of the work which is completed have been much enhanced in value. This road, when finished, will be the principal channel through which the tide of emigration to the rich region of Arkansas will pour its thousands. The facilities which it will afford in developing the resources of the southern and western portions of this State are more important than its influence on the lands adjacent to it, which are comparatively of limited extent. It was believed at the time of the last annual report that the appropriation already made would be fully adequate to the completion of the road. Owing to the rise in the price of labor and provisions, it will be found insufficient. The estimate herewith submitted for the additional amount necessary to complete the work is predicated upon the advance in the prices of labor and provisions, to which it bears a direct ratio.

Before closing this report, I beg leave to submit to the consideration of the department some facts directly affecting the object proposed to be attained by the construction of the Memphis and St. Francis road. The appropriation of March 2, 1833, was made with the declared purpose of causing to be permanently constructed a road in the Territory of Arkansas, from a point opposite Memphis to the house of William Strong, on the St. Francis river, or towards such other point on the same as the engineer appointed to report thereupon may recommend, for the purpose of establishing a constant communication from the point above named towards Little Rock. Since the time of the first appropriation, the Mississippi, by one of those changes so frequent in its course, has receded from the eastern bank, leaving an extensive bar where the principal channel once ran, which, from its recent formation, is not sufficiently solid to admit travelling over it in its present condition; and being directly opposite the termination of the road, on the west bank of the river, occupies the point at which the ferry should terminate on this side. At high water, and at the medium stage of the Mississippi, the ferry-boats effect a landing by ascending Wolf river to the bluff. This is not practicable at extreme low water, when the current in that stream is too strong for ascending boats. At such periods it is necessary to effect a landing above or below the mouth of Wolf river. If above, a second ferriage is unavoidable before reaching the town; and if below, the distance across the Mississippi is necessarily increased to more than two miles. The inconvenience arising from either alternative can only be avoided by the continuation of the road from a point opposite its present termination to such a point in the town as the mayor and town council shall designate. This prolongation of the road appears clearly to come within the object contemplated by the law making the first appropriation; since without it a constant communication between this place and the St. Francis river cannot at all times be effected. The length of the proposed continuation is four hundred yards. An estimate of the cost will accompany this report. Should these views meet your approbation, it is hoped that an appropriation will be called for at the next session of Congress to carry them into execution.

I have the honor to be, sir, very respectfully, your obedient servant,

A. H. BOWMAN, *Lieutenant of Engineers.*

General CHARLES GRATIOT, *Chief Engineer.*

O.

COLUMBUS, Ohio, November 3, 1836.

SIR: The operations for continuing the construction of the Cumberland road, in Ohio, were resumed about the middle of the month of July last, after a partial suspension of the work during the preceding part of the year, arising from the want of an appropriation for its continuance; the advances made, on its own responsibility, by the Clinton Bank of Columbus, having prevented the operations from being entirely suspended. This institution having, in July last, declined further agency in relation to the disbursements on the Cumberland road, the Merchants and Manufacturers' Bank of Pittsburg was therefore selected for that purpose, and has, with the aid of the officers attached to the road, performed the duties of the agency in a very satisfactory manner.

Upon recommencing operations, after the passage of the act of 2d July last, appropriating \$200,000 for the continuation of this road, it was found that the general dispersion of the workmen and laborers, consequent upon the interruption above mentioned, and the great demand throughout the country for every species of labor, together with the high prices of produce, rendered an advance in the previous rates of labor of men, teams, mechanics, &c., indispensably necessary to enable the operations to be resumed, at that advanced state of the season, with the vigor necessary to compensate for the delay and injury arising from the suspension of the work.

The second section of the act of Congress of 2d July last, granting an appropriation of \$200,000 for continuing the Cumberland road in Ohio, required that the moneys appropriated by that act "be expended

in completing the greatest possible continuous portion of said road in the said States, so that such finished parts thereof may be surrendered to the States, respectively." After duly considering the limitations imposed by the act above referred to, it was found, after an attentive examination into the state of the road from Columbus to Springfield, that owing to the advanced state of the season the only continuous portion of road which could be completed and surrendered before its close was the first fourteen miles from Columbus, west, to the town of Jefferson. The necessary arrangements were therefore made for the completion of this section within as short a time as practicable, and the preparation of metal for the nine miles in continuation. The first eleven miles immediately east of Springfield had been graded and bridged, and there remained ten miles to grade on the division comprised between Columbus and that town, lying principally across the summit dividing the waters of the Scioto and Miami rivers. As the quarries, from whence the material for the masonry and cover of the road are chiefly drawn, lie at each extremity of this division, viz: on the Scioto and Mad rivers, it was decided to carry on, in addition, the operations of quarrying and hauling stone from Springfield, and preparing metal for the section of road already graded and adjoining that town on the east, with a view to the most advantageous application of the available funds. The operations, agreeably to the above plan, were, on the 15th September, so far changed as to concentrate them to the first twenty-eight miles west of Columbus, in conformity with the instructions of the department of the 5th September, requiring them to be confined to such a portion only as the amount appropriated would complete.

During the year terminating on the 30th September, 1836, the metallic covering of the division of road lying east of Columbus was completed, under the superintendence of Lieutenant Brewerton, and surrendered to the State of Ohio.

On the division of road comprised between Columbus and Springfield, 20,518.57 perches of metal, equal to 6,217 $\frac{3}{4}$ rods of single layer, have been prepared on the sides of the road, for the cover of the twenty-three miles west of Columbus, and of the eleven miles east of Springfield; the preparation of metal for the latter having been suspended on the 15th September.

The bridge across the Scioto river, at Columbus, has been completed, with the exception of setting the iron railing intended to surmount the terrace walls connected with the eastern abutment, which will be put up by the middle of November. In addition to the completion of this structure, 761 perches of masonry have been laid in culverts and stone bridges, between Columbus and Springfield, comprising all the masonry to be laid on this division, except 230 perches, which will be completed about the 8th November.

Ten miles of road have been graded between Columbus and Springfield, during the year ending 30th September, 1836, leaving, at that date, seven miles to be done to complete all the grading required on this division, except the smoothing and preparing of some portions already graded for the reception of the metallic cover.

Active operations are now in progress for the completion of the cover of the section of road from Columbus to Jefferson; nearly the whole of the metal required having been prepared, and a commencement made at putting on the third layer of three inches, with a proper allowance for wear; four miles being now finished, and the completion of the whole expected in time to be surrendered during the ensuing winter. This section of the road passes over swampy and unfavorable ground, and being much shaded by the dense growth along its border, has presented many obstacles to its rapid completion.

The bridge over Little Darby creek, on the fourteenth mile, is now undergoing a thorough repair, and preparations made for entirely reshingling and repainting the whole structure, to renew the defective timbers and supply additional bracing. The foundation of the eastern abutment, upon which the water of the stream was encroaching, has been secured by a deposit of brush and stone. Some slight additions to the framing of the bridge over Big Darby, on the thirteenth mile, will be made previous to the completion of this section.

For the nine miles in continuation, to one mile beyond the town of Lafayette, the preparation of metal is now in rapid progress, and it is expected the whole amount required for this section will be in readiness to lay upon the road at the commencement of favorable weather in the ensuing spring.

Material.—The stone for the metallic cover of the section of road adjoining Columbus on the west, as also for the masonry to the twenty-eighth mile, excepting the bridges across the Darbys, has been drawn from the quarries on the Scioto river, which afford a compact secondary limestone well adapted to building purposes, and forms also a good metal, although not equal in hardness to the darker species found near the Ohio river. In receding from the Scioto some beds of limestone are found on the Big and Little Darby creeks, which afford a sufficiently good metal, yet the supply obtained from the latter source is found inadequate and difficult to be obtained; and it is only in the valleys of the principal streams where a constant and unailing supply may be depended upon. From Jefferson to Springfield, a distance of twenty-nine miles, the country is wholly without veins or quarries of stone. On this section a considerable quantity of very superior metal has been furnished by the stones taken from gravel-pits along the line of the road. These stones vary from one-half to one hundred pounds in the natural state, and are composed of hard compact limestone. The supplies from this source are, however, uncertain and precarious; and in general the whole section of country lying between the Scioto and Mad rivers fails in supplying the requisite quantity of stone at a convenient distance from the line of road. It is, therefore, necessary to depend mainly upon the quarries at each extremity of this division; the distance to which the material requires to be hauled for the purposes of the road rendering this indispensable part of the construction very expensive, which accounts for the magnitude of this item of expenditures and estimates.

The only lumber on this division available for building purposes is the oak, ash, and walnut; the first mentioned being considered unfit for the permanent structures of the road, unless selected with great care. It is to this source that may be traced the failure in the Little Darby bridge, constructed by contract, and of an inferior quality of oak timber.

The country to the west of Springfield is more favorable in respect to materials for construction than the district east of that place. Good stone for building and macadamizing is found on the Mad river, Miami, and Still Water rivers, and near the Indiana State line. The facilities also as regards lumber are decidedly superior in comparison with those on the east—ash and poplar being abundant and of suitable quality for constructions.

A careful estimate of the cost of completing the whole road to the Indiana State line has been made, and is herewith submitted, being condensed into a tabular form, marked C, and appended to this report. It will be perceived that the amount required by the above estimate is greater than that shown by former estimates in reference to the subject of completion, which may be accounted for by the increased rates of labor and other species of work at the present time. It is not expected either that these rates will be

diminished in succeeding years, owing to the great and increasing demand for labor, and the number and magnitude of the public works in progress in the western States.

After the road shall have been completed upon a permanent plan, the expense of keeping it in repair will arise almost wholly from the renewal of the metallic cover, which, from the extent of the transportation over it in heavy coaches and wagons, is subjected to great wear. The vast amount of travel and emigration which follows this national thoroughfare, and the annual increase thereof, is such as to defy any attempt at even a conjectural estimate of the amount which may be expected after the lapse of a few years, and the final completion of the road. The amount of tolls already collected, and their rapid increase, afford satisfactory evidence of their future competency, with proper care and management, to keep the road in good and sufficient repair.

With regard to the time in which the completion of this work may be expected, it is obvious that it will depend entirely upon the means which may be annually furnished for its continuance, and the stage of the season at which they may become available. Should, however, the whole amount annually required by the superintending engineer be furnished at an early day of each successive year, its final completion may be expected in three and a half years from the present date.

The estimate of funds required for the continuance of this road during the year 1837 is founded upon the following plan of operations:

1. To complete entirely the road from Columbus to Springfield.
2. To complete the clearing and grubbing to the State of Indiana.
3. To grade the road west from Springfield, 19 miles, to the Miami river.
4. To construct the masonry of bridges and culverts to the Miami river, including the quarrying of stone for the bridge across that stream.
5. To erect the wooden superstructures of the bridges across Mad river and Jackson and Donnel's creeks, west of Springfield.

It will be observed that the principal item of expense for the unfinished part of the road between Columbus and Springfield is for the metallic cover, which arises from the distance to which the material will require to be hauled, a due allowance having been made for the probable supply of stone which may be drawn from gravel-pits along the line of road.

The sum of \$293,300, as per accompanying estimate, is therefore required for the continuance of the Cumberland road in Ohio during the year 1837, which it is respectfully recommended may be furnished without any abatement of the amount stated.

Respectfully submitted.

G. DUTTON, *Lieutenant United States Engineers.*

Brigadier General C. GRATIOT, *Chief Engineer.*

A.

Summary statement of the funds available and expended during the year ending September 30, 1836.

On hand September 30, 1835, per report of Lieutenant Brewerton, of that date.....	\$34, 920 98
Sales of public property	150 06
Appropriation for the year 1836.....	200, 000 00
<hr/>	
Amount available for the year ending September 30, 1836	235, 071 04
Expenditures during the year ending September 30, 1836	129, 882 45
<hr/>	
Amount available September 30, 1836	105, 188 59
<hr/>	
Of the above amount of \$105,188 59, there was in the treasury September 30, 1836.....	90, 262 78
In the Merchants and Manufacturers' Bank of Pittsburg.....	14, 211 81
In the Clinton Bank of Columbus, Ohio.....	714 00
<hr/>	
Total.....	105, 188 59
<hr/>	

Application of the sum of \$129,882 45, expended during the year ending September 30, 1836.

Division of road.	Grading.	Masonry.	Wooden super-structures of bridges.	Metallic covering.	Tools and machinery.	Contingent.	Aggregate.
East of Columbus completed, and surrendered to the State of Ohio				\$21,963 85			\$21,963 85
Between Columbus and the town of Springfield, 43 miles..	\$26,521 56	\$12,142 42	\$7,465 00	51,461 64	\$3,219 42	\$7,108 56	107,918 60
	26,521 56	12,142 42	7,465 00	73,425 49	3,219 42	7,108 56	129,882 45

B.

Estimate of funds required for continuing the construction of the Cumberland road, in Ohio, during the year 1837.

Division.	Clearing and grubbing.	Gratuation.	Masonry of bridges and culverts.	Wooden superstructures of bridges.	Metallic covering.	Quarrying and grading tools.	Contingencies.	Aggregate.
Between Columbus and Springfield, 43 miles.....		\$26,250 00	\$2,550 00	\$3,550 00	\$246,746 97	\$1,500 00	\$4,773 03	\$285,370 00
Between Springfield and the Indiana State line, 53.7 miles....	\$18,480 00	50,500 00	23,318 00	11,500 00	2,500 00	1,750 00	113,048 00
Total.....	18,480 00	76,750 00	30,868 00	15,050 00	246,746 97	4,000 00	6,523 03	398,418 00
Deduct amount on hand September 30, 1835.....								105,188 59
Amount required for the year 1837.....								293,229 41

The above amount of \$293,300 (very nearly) will be required for the operations of 1837.

G. DUTTON, Lieutenant United States Engineers.

C.

Estimate of the amount of funds required to complete the Cumberland road, in Ohio, September 30, 1836.

Division.	Clearing and grubbing.	Grading.	Masonry of bridges and culverts.	Wooden superstructures of bridges.	Metallic covering.	Quarrying and grading tools.	Contingencies.	Aggregate.
From Columbus to Springfield, 43 miles.....		\$26,250 00	\$2,550 00	\$3,550 00	\$246,746 97	\$1,500 00	\$4,773 03	\$285,370 00

Amount required to be appropriated to complete the road, September 30, 1836.....								812,791 41

G. DUTTON, Lieutenant Corps of Engineers.

P.

Memoir on the progress made in the repair of the Cumberland road east of the Ohio, in the States of Pennsylvania and Maryland, during the year ending September 30, 1836.

The operations of the past year have been confined to completing work in progress at the date of my last annual report.

The contracts made in August, 1835, for putting on the third and last stratum in the State of Pennsylvania, west of the Monongahela river, and the first fourteen miles west of Cumberland, in the State of Maryland, in rapid progress at the date of the last annual report, were completed principally by the close of the year. There were, however, several sections through the mountains, the time for completing which had been extended on account of the difficulty of procuring material, that have all been completed during the past summer.

The side roads throughout the State of Pennsylvania, and parts of them in Maryland, were formed, shaped, and put in order last fall, and the waterways throughout opened.

The masonry of bridges Nos. 2 and 3, over Braddock's run, was completed last month. The masonry of the large bridge over Will's creek is progressing well; the two arches have been closed, and centres struck, and the whole structure may be finished by the end of October. The six arches of these three bridges are ellipses, and the stones forming them are all of large masses, cut and prepared on all their surfaces to conform with the curves of the arch from intrados to extrados, and end to end of the arches. The execution and workmanship, as also the material of these bridges, are very excellent and calculated to last for ages. Of the design I must leave others to judge.

The southwestern abutment and wing, with guard-walls, of the Dunlap's creek bridge have been completed, and the northwestern abutment and wing-walls have been built ten feet high. At the date of my last report it was expected that this bridge would have been completed by this time; but the unprecedented wet weather, high water in the river, and great scarcity of mechanics have prevented it.

On account of the unfavorable state of the weather the contractors could not commence the masonry of this bridge in the spring until May 9; from which time to September 30 they have lost about two months, or forty-five working days, by wet weather and high water. Their loss of time, together with consequent derangement of the operations by high water, will prevent the bridge being finished this fall.

One hundred and forty tons of pig iron for the castings of the superstructure of the Dunlap's creek bridge were purchased last spring at Portsmouth, Ohio; half of which has been delivered at the foundry in Brownsville, near the site of the work. This metal is of the soft gray kind, and esteemed by judges as equal to any on the western waters for foundry purposes. The patterns for the castings of the bridge have all been made, and the castings are now being made very rapidly.

It is hoped to have this work finished for accommodating the travel in all the month of July of next year.

The quantity of work done during the year consists in preparing to four-ounce and spreading on the road 37,557 perches of macadamized metal; spreading on the road 40,076 other perches of prepared metal; putting in order and forming 30,819 running rods of side-roads; constructing 4,177 perches of masonry; cutting and setting 3,009 running feet of coping on the parapets of old and new bridges; taking up and relaying 830½ feet of old coping on the parapets of the old bridges; and removing 5,074 cubic yards of earth for embankment.

There remain to be executed at this date the contract for completing the bridge over Will's creek, the contract for building the masonry and making the castings for the Dunlap's creek bridge, and putting the castings in place.

The sum of \$7,183 63, or a fraction less than one per cent. over the original estimate for perfecting the repairs of this road and to be applied to the Dunlap's creek bridge, will be necessary. The withdrawal of every officer of the army and civil agent acting as assistant engineers to aid me in conducting the extended operations on this road has compelled me to seek for other assistants in the civil walks of life, the salaries for whom formed no part of the original estimate, and were not supposed to be necessary, as officers of the army, well qualified for the service, were detailed for these duties. The officers of the army associated with me in this duty were required with their companies, and the civil agent superintending the eastern end of the road was induced to leave by a very advantageous offer from the State of Illinois, with a salary very far above the sum I was authorized by the Secretary of War to pay him. The greatly increased prices of pig iron needed for the Dunlap's creek bridge, since making the original estimate, (then \$35 per ton and now \$55,) is another heavy item in this increased cost of the whole work. In addition to which, was the inability of the contractors for masonry of the Dunlap's creek bridge to comply this year with the terms of the contract made last year, owing to the immense increase in the price of laborers' and mechanics' wages, provisions, and every necessary of life. Their obligation was to have finished the work long ere this rise in the price of wages and provisions took place, and could in all probability have done so had the site of the bridge been definitively fixed to have enabled them to commence with their work early last season. A long and protracted correspondence grew out of the location of this bridge, by the refusal of the authorities of the town of Bridgeport to permit its being located on the site selected by the engineer as best suited for the public interest. The result was so much time lost that the contractors were thrown into this year with the bulk of their work to perform, and declined doing it under existing circumstances. This additional sum is now asked to finish the whole work caused as above stated.

All of which is respectfully submitted by your obedient servant,

RICHARD DELAFIELD, *Captain of Engineers.*

Q.

UNITED STATES MILITARY ACADEMY.

Report of the board of visitors invited by the Secretary of War to attend the general examination of the cadets of the United States Military Academy.

SIR: The undersigned have, in compliance with your request, attended the annual examination of the cadets at this post, and herewith report the result of their investigation.

Having been instructed by their letter of appointment to "make a full and free investigation in regard to the course of instruction, both military and scientific, to the internal police, discipline, and fiscal concerns of the institution," the board of visitors entered upon and have conducted their examinations with the most rigid scrutiny. Every facility for this purpose was afforded by the officers of the institution.

In order most effectually to discharge their duty, the board committed the different branches of their investigation to committees of their members, whose separate duty it became to examine into—1st, the fiscal affairs; 2d, the internal police; 3d, the course of instruction; 4th, religious instruction; and 5th, the military education and discipline of the academy.

These several committees have submitted to the board the result of their respective investigations; and their reports, after having been sanctioned by the entire board, are herewith transmitted to the Secretary of War for his more particular information upon those several subjects.

1. *The fiscal affairs.*—The quartermaster's and paymaster's departments were carefully examined, and satisfactory evidence furnished that the sums appropriated had been properly disbursed with strict regard to the objects intended. The particular appropriations necessary for the year are set forth in the estimate marked No. 1, annexed to the report of the committee, and are recommended by this board.

The board believed it to be their duty to examine also into the fiscal affairs of the cadets, and they are happy to express their full approval of the discipline and regulations upon this subject. Each cadet receives in pay and rations \$28 per month, and no more. With this sum he is obliged to pay his board

and to provide all the furniture for his room—all his books, his clothing, and every necessary; the government providing nothing for him but instruction, arms, and a room to lodge in. By a very salutary regulation \$2 a month are reserved out of each cadet's pay until he leaves the institution. Thus if he is dismissed, he has the means of returning to his family; if he graduates, the means of providing himself a proper uniform. The wisdom of this provision is apparent from the fact (which this board has satisfactorily ascertained) that the greater part of the cadets are of indigent parentage.* To preserve an entire equality among them in this respect, the regulation which forbids "any cadet to apply for or receive money or any other supply from his parents, or from any person whomsoever, without permission from the Secretary of War," is strictly enforced. Rigid economy, therefore, is required from the cadets to enable them with their pay to meet the necessary demands upon their funds. They are obliged to keep accurate accounts of their expenditures, and if any of their pay remains unexpended for necessaries, they are not permitted to receive it unless for very special purposes.

They are thus with great care taught lessons of order and economy, which become of the utmost value to them in after life, and which have already so distinguished the graduates of the academy that the experiment of making them the disbursing agents of the government on its public works has been eminently successful. And it is doubtless from this cause that they present the excellent example of having disbursed millions of the public funds without a dollar's defalcation.

This is considered by the board of visitors as the legitimate result of the course of education at the academy. And it must be apparent to every one that the strict morality, high sense of honor, and the lessons of order and economy which they are taught, render them invaluable agents of the government, and will compensate the nation for the very moderate expenditure which is incurred in their education.

2. *The internal police.*—This comprehended, among other things, an inquiry into the provisions for the comfort and the regulations for the conduct of the cadets while in barracks pursuing their studies.

This meets the entire approval of the board.

The fare of all the cadets is precisely alike. They eat at a common table. The furniture of their rooms and their conveniences are the same. In the barracks they sleep on the floor, and on the ground when in camp. They go through guard duty in succession; and, in fine, such are the regulations and discipline that the combination of military duties with their scientific studies is well calculated not only to make them industrious and laborious, but to inure them to the hardships of a soldier's life.

This branch of the inquiry involved an examination into the situation of the public buildings, and their fitness for the purposes intended. The accommodation for the cadets in respect to room is by no means adequate to their comfort. In rooms of about twelve feet square three and four and sometimes a greater number of cadets are compelled to reside. These rooms are badly constructed. In winter time some of them are very cold, not having sufficient protection from the wind, and in summer some are uncomfortably warm from an absence of ventilation. The buildings which the cadets occupy are, in fact, in no respect different from the ordinary barracks of the army, except that they are more uncomfortable and built of more substantial materials. The judicious expenditure of a small sum upon this subject would, in the opinion of the board, be very desirable.

The want of accommodations for the professors and their assistants is still more manifest. The crowded state of their laboratory and philosophical rooms adds much to the labor of the instructors, and consumes much of their time. Besides, this is the hazard to which much valuable property is necessarily exposed. The philosophical apparatus and the library, which are very valuable, are now in the same building with the chemical laboratory, and consequently very much exposed to danger from fires. Nothing but extraordinary care has preserved them until this time, and it certainly would not excite the wonder of the board if they should learn, at an early day, that they were all consumed. The expenditure of \$6,000 would, in the opinion of the board, erect a suitable fire-proof building, and thus guard against the unfortunate destruction of property which could not be replaced for less than \$100,000.

3. *The course of instruction.*—By the regulations of the War Department for the government of the academy two studies are enumerated (among those which are to be taught to the cadets) which are entirely omitted, viz: mineralogy and geology; although among the required and necessary studies no adequate provision has been made by law for the endowment of a professorship. All the power which the War Department has over the matter is to detail a lieutenant of the army for duty; but as this officer cannot receive any additional compensation for this duty, he has no inducement to qualify himself for teaching. This is the cause why that branch of education has been abandoned, and it cannot probably be resumed without a special provision by law. The importance of these studies, in a military point of view, is too evident to require from the board any other expression than that of their hope that a reform in this respect will be speedily accomplished.

This, however, is not the only provision which the board deem necessary in order to place the different branches of instruction on a proper footing. The very thorough course of instruction pursued at the academy necessarily requires a large number of instructors, seventeen of whom receive no other compensation for their services than the pay of a lieutenant in the line. That pay they would receive if with their regiments; and then they would not be subjected to the arduous task now imposed upon them. Consequently, a situation at this academy is rather avoided by the officers of the army than sought after, and, when once assumed, is abandoned as soon as circumstances will permit; and the board have ascertained that during the three years ending on the 1st instant twenty-six officers have abandoned their situations at the point, and that one professor and four assistants will leave before the end of the approaching vacation; making a change of thirty-one instructors in little more than three years. This constant change is a serious evil, and the interests of the institution certainly require a remedy.

It cannot excite the surprise of the department that, under existing circumstances, these changes should frequently occur. Whatever may have been the education of an officer, it is no slight task to qualify himself to instruct, and properly to instruct; and it cannot be expected that any one would voluntarily assume these extra labors when no compensation whatever is allowed for them.

Another difficulty is, that an officer, when he becomes duly qualified as an instructor, finds in civil life far greater inducements; and that class of individuals most useful to government from their scientific attainments have frequent offers of three or four times their present compensation to assume the duties of some civil station. Nothing but the strong sense of obligation to the nation for their education, which

* Thus in one class (the only one we inquired of, and that selected accidentally) we found that out of 48 cadets 26 were of parentage who were unable to give them a liberal education; and instances are within the knowledge of some of the members of this board where individuals from the humblest walks of life have attained the highest honors of the institution.

pervades the graduates of this institution, has prevented a more ready acceptance of these offers; and this board do not hesitate to declare their firm conviction that if government would allow to these individuals only one-half the remuneration which they can readily obtain in civil life for the same services, the sense of obligation to which we have alluded would retain them in the service of the nation.

The present situation of the professorship of chemistry is a fair illustration of the evils of the present system. This professorship is not endowed, and this study can be taught only by detailing an officer of the army for this purpose. The present teacher receives as his entire compensation \$767 per annum, not as much as he would receive if on staff duty at some other post; and although by long study and practice he may well qualify himself to teach, he is liable at any moment to be ordered to other posts; and although some of the assistant professors in other branches receive extra compensation, yet he is not allowed any, although at the head of a department, and performing duties as laborious and responsible as almost any other professor.

The board of visitors feel these evils so strongly that they beg leave to suggest a representation of them to Congress, in the confident belief that there will be no hesitation among the representatives of the nation in providing the necessary remedies.

Notwithstanding all these difficulties, the course of instruction is very perfect. The cadets are taught the *rationale* of their studies, to think for themselves, and to apply their scientific attainments to actual practice. The periodical examinations of the cadets not only test their proficiency in their studies, but guard against the bestowal of the care of government upon improper objects. Any one who is found unwilling or unable to undergo the hardships of his academic life, to submit to the rigid discipline of the institution, or to manifest a suitable proficiency in his studies, is dismissed. This sifting operation, if we may so call it, is productive of admirable results. Those only who are found worthy are permitted to enter the service of the nation. The unworthy are discharged.* The cadets are, in fact, part of our army. They enlist for five years, and like other branches of the service are promoted only when their conduct justifies it.

It became a question with this board whether this term of enlistment was long enough, and whether the privilege of resigning at the end of one year after the close of their education had not been so far abused as to deprive the government of such benefits from the services of the graduates as would afford a just compensation for their education.

But an examination produced this result: that of the total number, 841, who had graduated, only 65 had resigned at the end of their term of enlistment.†

4. *Religious instruction.*—In this branch the education is at present necessarily deficient. The same individual is now obliged to officiate as chaplain of the post and as instructor in rhetoric, moral philosophy, and political science. He has only one assistant, and it is physically impossible for those two individuals adequately to discharge all these duties; some of them must be, and necessarily are, neglected. The religious instruction of the cadets appears to the board to be a matter of too much importance to be neglected. The best remedy for this evil which suggests itself would be the separation of the duties of the chaplain and professor. Next to this would be the appointment of a clerical gentleman as an assistant in the duties both of chaplain and professor; and if neither of these is practicable, then, in the opinion of the board, an officer of the army ought to be detailed as second assistant to the professor. This improvement must commend itself to the favorable attention of the department by every consideration affecting the permanent welfare of the cadets.

5. *Military education and discipline.*—Upon this subject the board cannot do better than to refer to the full report made by the committee on that branch of our investigation, and to express their full concurrence in its views.

The board, however, feel themselves called upon to add their conviction of the importance of adhering strictly to the sound principles laid down by the President of the United States in his letter of the 8th of December, 1835, in relation to Cadet Hammond. The restoration of cadets to the academy after their dismissal for incompetency or misconduct is not only subversive of the necessary discipline of the post, but must result in the application of the bounty of the government to unworthy objects. This board believed it to be within the proper range of their inquiries to ascertain how far the regulations of and mode of education at West Point conformed to the objects for which the academy was instituted. They supposed the institution was "designed not only as a school in which the youth of the United States are to be instructed in the art of war, but they are, in all cases of exigence, to serve as an actual defence to the community." This object seems to be kept constantly in view.

The school is strictly military in its character, instructing the young men in the art of war and fitting them to defend our country.

It is believed to be true, as a general rule, that some previous education is necessary to qualify a man to exercise the art of war. (To this, as to every other general rule, there are doubtless brilliant exceptions.) If in those rude days when every battle was but a series of single combats, and when brute force and physical courage were the only qualifications of a soldier, long and arduous training was an indispensable prerequisite, how much more is it necessary now, when war has become a science, and when the mental more than the physical qualities of man determine the issue of the contest? When this science, unlike all others, shall change its nature, as to be imbibed by intuition, then, and not till then, can a country, extensive as ours is, and almost surrounded by savage and intractable enemies, and in its

* The board examined the effect of this practice upon four classes :

One of which, begun with 106 members, graduated	45
One of which, begun with 108 members, graduated	43
One of which, begun with 119 members, graduated	36
One of which, begun with 111 members, graduated	56

So that of..... 444 who entered, only.. 180

graduated, and the board are informed that 160 of that number are now in the service of the nation.

† This examination further showed that of 220 cadets who had, from the first organization of the academy till 1835, either resigned, declined a commission in the army, or been dropped, 20 left the army one year after their graduation, 45 the second year, 28 the third year, 28 the fourth year, 13 the fifth year, 11 the sixth year, 8 the seventh year, 13 the eighth year, 7 the ninth year, 9 the eleventh year, 4 the twelfth year, 8 the thirteenth year, 4 the fourteenth year, 6 the fifteenth year, 5 the sixteenth year, 5 the seventeenth year, 1 in the eighteenth year, 1 in the nineteenth year, 1 in the twenty-first year, and 1 in the twenty-third year. And of the residue of the number of graduates 403 still remained in the service of the country, 15 had been killed in battle, and 106 had died in the service.

rapid prosperity coming in collision with the interests of powerful nations, dispense with at least such preparations for war as naturally will flow from the education of a portion of our youth for this special purpose.

This board are free to express their opinion that this academy is admirably calculated and conducted for the attainment of this end. All its studies and practices are essentially military, involving at once a knowledge of the science and an habitation to the hardships of war; so that, in case of actual conflict, we have the nucleus of an army and a satisfactory guarantee against the misfortunes which visited our arms at the commencement of the last war with Great Britain; and in peace we have a well-trained band of officers, devoted to the service of the country, capable of defending our frontiers and extending our fortifications; of carrying on our great system of internal improvement; of guarding us against the impositions of foreign empires; but, above all, of developing and calling into action the undiscovered resources of our new States.

These are advantages which we believe do necessarily flow from this institution. They can be attained only by arduous and indefatigable labor on the part of cadets and teachers. This labor cannot be produced without adequate inducements. To this end, government must provide for the education. Unless it does, the poorer classes will be deprived of the advantages of such instructions, and the richer will discover no motive for undergoing the hardships necessary to its attainment.

These advantages are happily combined in this institution, and, with the fostering care of the government, may easily be made to conduce to the permanent welfare of the whole nation.

In conclusion, the board of visitors earnestly recommend this institution to the care and attention of the government. Their examination affords them ample reason to know that the intention of the nation in regard to it is faithfully executed. "The instructors teach in defiance of obstacles," and the graduates, after a most searching and rigid scrutiny, have evinced a knowledge of their profession, which cannot but be valuable to the country whenever its exigencies shall call it into practice.

WEST POINT, June 18, 1836.

Hon. LEWIS CASS, *Secretary of War*.

FISCAL AFFAIRS.

The committee appointed by the board of visitors to inquire into the fiscal concerns of the Military Academy report:

That they were referred to the quartermaster's department as the place where the superintendent transacted the moneyed affairs of the institution; that they there examined the books and accounts, exhibiting the appropriations made at different times, and the manner in which they had been disbursed; that they viewed the chapel and other works, not yet completed; the design, size, and arrangement were well adapted to the situation and objects intended.

Your committee also proceeded to the paymaster's department; they there discovered that moneys originating from the rents of lots, and from wood, hoop poles, &c., taken from the land connected with the establishment, making about \$700 for the year 1835, were carried to the post fund. The important branch of the paymaster's duties consists in his being treasurer for paying the cadets. Each cadet receives \$16, and rations worth \$12, making \$28 per month; and purchases at the store such articles as the superintendent thinks proper, and at prices fixed by a board of officers. The storekeeper is obliged to furnish each cadet with an account book, and enter in that book, at the time of delivering, the articles furnished; the cadet keeps this book, and settles with the treasurer. This regulation seems to be rigidly enforced. Whilst it protects the cadet from undue advantage, it teaches him system and attention to his own concerns.

There has been appropriated \$20,000 for the erection of a building for military exercises in winter. Of this sum a part remains unexpended; and the superintendent estimates that \$25,000 more will be

necessary for this object for the present year. It is evident that a building of this kind is very necessary for the comfort and health of the cadets, as they must at times neglect their necessary exercises, or take them exposed to the inclemencies of the seasons.

In addition to that, the superintendent has forwarded to the committee an estimate of funds required for the service of the United States Military Academy for the year 1836, (marked No. 1,) and herewith submitted, embracing many objects which are deemed by him and considered by us very important. We believe that a small institution like this is necessary in our extended and growing country. When the military system is generally neglected, (in cases of emergency and necessity, which we cannot expect, whatever we may desire to be always exempt from,) there may be those of our countrymen at hand, and settled through our population, able to impart the required instruction. We take pleasure in stating that our investigations have conducted us to the conclusion that those intrusted with the charge of the instruction here have been faithful and economical, and that nothing is wanted to make the Military Academy of great national advantage but a patronage, the cost of which would be small when compared with other matters, perhaps not more indispensable to the welfare and honor of the country.

E. HERRICK, *Chairman.*

No. 1.

General estimate of funds required for the service of the United States Military Academy at West Point, New York, for the year 1836.

For travelling expenses and accommodation of the board of visitors.....	\$2, 000 00
For general repairs, fuel, forage, stationery, printing, postage, transportation, and miscellaneous expenses.....	29, 130 00
For the department of philosophy.....	6, 300 00
For the department of engineering.....	500 00
For the department of mathematics.....	125 00
For the department of drawing.....	310 00
For the department of artillery.....	50 00
For the increase and expenses of the library.....	800 00
For the department of chemistry.....	800 00
For the construction of two small wooden buildings (filled in with brick) for quarters for assistant professors, with families.....	4, 000 00
For the construction of a suitable yard and permanent shops for artificers, such as carpenters, blacksmiths, painters, &c., the whole to be substantially built of stone.....	10, 000 00
For the erection of a building for military exercises in winter, in addition to amount already appropriated, as per plan already provided.....	25, 000 00
For the purchase of horses for the school of cavalry and evolutions of light artillery.....	9, 390 00
For completing the chapel.....	3, 500 00
For a drawing room for the professor of drawing.....	800 00
For amount overrun in 1834 and 1835, by the board of visitors.....	382 48
	<hr/>
	*93, 087 48
	<hr/>

INTERNAL POLICE.

MR. PRESIDENT: The committee, to whom was referred the subject of police, in pursuance of the duty assigned them, have visited the hospital, barracks, and other buildings designed for the use and accommodation of the cadets at West Point, and beg leave to state the following facts: The hospital contains eight rooms for the accommodation of the sick, the whole of which, they are happy to state, have never been tenanted—a strong evidence of the healthy situation of the establishment, particularly when accompanied by the report of the surgeon, who states that his sick report does not exceed an average of five, and a majority of these ephemeral cases of slight headache, or something of that character. On the subject of the barracks, your committee would beg leave to state the following facts: The rooms of the south building are entirely too small, and the openings have been made without regard to the prevailing winds of winter; and hence the rooms are cold and comfortless during the inclement season. Your committee would also suggest the propriety of making the rooms spoken of single. The rooms in the north building are larger, and better adapted for the purpose for which they were designed. Your committee, however, disapprove of the course pursued in the practice of putting four and even five young gentlemen into one room—a practice at once unfavorable to morals and industry, and which nothing but necessity can excuse. The commons or boarding we found highly to be commended.

The room appropriated for the professor of natural philosophy we found wholly unfit for the purpose. This room is small, and unprovided with seats for the class, or any competent provision for securing the instruments, which are fine. Upon examining this room, our admiration of the extent and accuracy of knowledge exhibited by the class during examination was much heightened, together with astonishment at the patience and labor the professor must have displayed in communicating such varied knowledge, so confined in point of space as hardly to be able to use any of his instruments with facility.

The professor of chemistry labors under all the inconveniences above described, and nothing but a determination to instruct in defiance of obstacles could have enabled either of these gentlemen to have brought forward pupils so well prepared as the unanimous testimony of the board of visitors justifies your committee in reporting them to have been.

One fact your committee lament to have become acquainted with. The professor of chemistry, whose labors have been so profitable to his young pupils, has had no provision made for salary, and has done all his duties without compensation. This surely should not be. Your committee beg, in closing this report,

* This sum was reduced in the Engineer department to \$34,004 78, which amount has been asked to be appropriated this year by Congress.

to state that the rooms referred to are under one roof, as is also the library. Thus public property, to a very large amount, is in the most unsafe condition imaginable, exposed constantly to destruction by fire; and as the present building is unfit for the use to which it is appropriated, they beg leave to suggest the propriety of erecting a building fire-proof and more suitably arranged; the cost of such a building would not exceed six thousand dollars.

LEWIS MARSHALL, *Chairman.*

COURSE OF INSTRUCTION.

Although somewhat foreign to, and only indirectly connected with, the part assigned them, the committee on the course of instruction, from a sense of that duty which they owe to the cadets and professors, to themselves and to their country, feel bound to express, not only their satisfaction with the evidence which has in the course of the examination been afforded of the talents, the accuracy, and the progress of those examined, and of the ability and faithfulness of their instructors, but to add that their anticipations have been more than realized. They feel themselves justified in declaring it as their belief that the progress and accuracy of the cadets examined (numbers being equal) cannot be surpassed by the students of any of the literary institutions of our country. This declaration rests upon and proceeds from a knowledge of the subject-matter of the examination, as well as from a comparison of this with similar examinations to which, either for reasons resulting from the nature of their office or from other relations in society, they have been called to attend.

When this committee look into and examine the course of instruction originally designed to be pursued and perfected, they are forcibly struck with the wisdom displayed in the selection and arrangement of the studies therein embraced. Their adaptation, as far as they go, to the exigencies and situation of the government must be apparent to all who will take the time and subject themselves to the trouble of even a superficial examination. The importance and even the necessity of an institution to teach those branches of science immediately connected with the military defence of the country was perceived and acknowledged at an early period. To these other branches were added, and in a few years the course of instruction, to its present extent, was adopted. The committee regret that more liberal provisions had not been enacted by which the present plan could have been carried into full and successful operation; but this, like all other institutions the nature and effects of which can at first be but imperfectly understood, appears to have been placed in a condition to await the success of experiment. The situation of the financial concerns of the government at the time might, perhaps, serve, in some degree, as an apology for the contracted and uncertain provision made. Were, however, the studies originally selected and designed to be taught in this institution pursued and attended to, prudence might have forbidden the utterance of any complaint at this time; but inasmuch as some of the studies are entirely omitted, and inasmuch as those omitted are of vital importance in relation both to the literary character of the institution itself and to the beneficial influence anticipated from its establishment and operation, the committee must express their deep regret that such a state of things exists, and at the same time express a hope that it will be changed by the government making such appropriations as will warrant the employment of professors qualified to teach and instruct the members of the institution in the different branches of mineralogy and geology. These are the studies omitted, and, the committee are sorry to add, omitted for want of funds to support the necessary number of professors. Surely in these days, when improvements of almost every kind are so rapidly advancing onward to perfection, causing the desert to blossom as the rose and the wilderness to wave with the golden harvest, this committee need not consume their time in illustrating and proving the importance of these branches. Suffice it to say that the farmer, the mechanic, the professional man, yea, every department of society must feel and acknowledge their importance and utility; and while they are a national advantage they are also a nation's glory, the splendor of which can never shine with a lustre so pure or so extensive as in a government like ours. Were the committee further to indulge in argument to illustrate and prove their importance and utility, they would especially turn their attention to the vast regions of newly-acquired territory, and to those yet more extensive regions from which the savage must, before long, recede—the profitable exploration of which necessarily demands the aid of those sciences. Besides, it ought to be borne in mind that this institution was designed not merely to make soldiers for the defence of the country, but with this character to unite that of the scholar, the gentleman, and virtuous citizen; and where is the individual who will not acknowledge that while the present prescribed mode of instruction reflects the highest honor on the wisdom and patriotism of those who laid the plan, it has placed the country in an attitude, in relation to the condition of its armies, which commands not only the respect and approbation of our own citizens, but the admiration of other nations? The committee do not say too much when they assert that this institution has produced the most salutary effects upon the military department in point of intelligence, morality, gentlemanly and orderly conduct, as well as upon the skill and discipline connected with the art of war, which ought with all to be, and is with every patriot and lover of his country, a subject-matter of national pride, and a source of the purest gratification; for in this way it has been the lot of our government to prove to the world that it is practicable, with perfect safety to all our political institutions, to establish and carry into successful operation plans of education and improvement by which the physical and intellectual and moral strength of our government is at the same time increased. From these facts the committee, before they close, must express their regret at the apparent deficiency that exists in this institution on subjects properly included under the head of "rhetoric," which is professed to be taught. The committee refer to the subject of English grammar, and more especially accuracy in pronouncing and distinctness in enunciation. These defects pervade, in a greater or less degree, every class and every section of the different classes. Under the head of rhetoric, as given in detail by the professors, these distinct parts are specified; yet, when the committee examine the authors or text-books used for the purpose of teaching and explaining all the parts of what is generally known and included under the head of English grammar, they find that Dr. Blair's lectures stand alone, and alone are used as a text-book. The committee feel very confident that, from the mode of teaching rhetoric, as systematized by Dr. Blair and adopted by all who follow his footsteps, but little information can be given or received, without more than common labor, as to those subjects in relation to which they complain of apparent deficiency. In examining into the cause of this state of things the committee discovered that only a principal and one assistant, owing to the state of the funds, were employed in teaching rhetoric, moral philosophy, and political science,

while at the same time the duties of chaplain devolved upon and were discharged by the principal. This explains satisfactorily to the committee the existing cause of the deficiencies complained of, and entirely exempts the professors in this department from the charge of delinquency. These, however, are deficiencies which must be removed. Their existence, more than any others, must tend to affect the literary character of the institution as well as that of the cadet. The reason is obvious. The English language is, and probably will continue to be, the language employed in all the various spheres and departments of life, and, at the same time, the knowledge of its grammatical construction is more widely diffused; consequently, an error in giving to a syllable its proper accent, or to a vowel its proper sound, strikes the ear, awakens the attention, and even incurs the censure of the tyro himself, whose organs of senses as a guide generally supersede the reasoning faculty, but in these cases are a sure and safe criterion. The committee, therefore, recommend that a distinct professorship of elocution be added to the institution, and that, if practicable, this addition be made at an early period. Should the addition of such a professor be impracticable, the committee would suggest the propriety of separating the duties of chaplain from those of professor of moral philosophy, and that the time thereby acquired be employed in instructing the cadets on the subject of elocution, as handmaids and special helps to the progress and accuracy of the members of the institution in obtaining an understanding of their own language.

The committee would not only recommend but urge upon the professors the exercises of writing composition at least once in two weeks, and public speaking as often, leaving the delivery of the speeches, as to their publicity, to the discretion of the various instructors, whether they shall be before a whole class, or one section of said class, or before all the classes collected. This will be best and most profitably arranged by adopting the progress and perfection of the student as the guide. The committee have made these suggestions in relation to the English language in the mode set forth because they believe that the one or the other of these modes would, with greater facility than any other, be adopted, and more speedily carried into operation. The plan of a preparatory school has been suggested. Such an institution, the committee feel convinced, would aid much in removing existing difficulties, so far as the time and labor of instructors, consisting only of the present number, are objects of consideration, and, in point of economy itself, would ultimately best comport with the limited state of the funds set apart for the benefit of the institution. Besides, by this plan, one of the purposes, and by no means the least in importance, to wit: to bring to light, and into successful and useful exercise, the talents of young men, which otherwise poverty would conceal or obstruct, must be answered. And here the committee take the liberty and embrace the opportunity to denounce the popular prejudice that this institution is for the benefit of the rich, and in its operations confers its favors exclusively on this class. The philanthropy and patriotism and wisdom of the individuals who devised the plan of instruction, and have aided in raising the institution to its present state of perfection, and existing facts themselves, forbid, and with all intelligent and impartial men will effectually prevent, an opinion so inconsistent with the nature of our institutions from entering the mind. But to return to our subject: granting for a moment, what may be the case, that any or all of the plans suggested by the committee would necessarily increase the expenditures, and consequently require from the government larger appropriations; at no time will this objection be made by the man who understands the nature and properly appreciates the principles of his government; for he knows and believes that "intelligence is the life of civil liberty," and he, too, knows and believes that literature and the light of science are necessary to give a proper direction to the physical strength which a nation possesses, and is equally necessary and useful in appointing and fixing the bounds or limits within which the same strength ought to be restrained. More especially ought such an objection at this time, whether we consider the situation of many parts of our country or the state of the treasury, to have no weight; the truth is, that the objection is only used as a cloak for a principle, which, in its operation, must subvert that order and dissolve those relations in society which have long existed, and which although, in some instances, are the result of circumstances in which the individuals have had no agency, yet will generally be found, upon an accurate investigation, to be the result of individual merit and enterprise. In the days of Cromwell it was appropriately called the *levelling system*. In a government like ours the great object ought to be to increase its physical and intellectual strength, by the selection of objects whose talents, improved by education, will increase the physical strength of the nation, and shed more extensively the light of science, without regard to the condition of said objects, whether noble or ignoble, high or low, rich or poor. That such is the theory and practice of this institution, its present condition and the circumstances of its members most conclusively prove. If these things, then, be so, objections on the score of increased expenditures are not even the small dust of the balance. In conclusion, this committee do therefore not only recommend, but urge the importance and utility of placing the opportunities of literary attainments, and the salaries of the teachers and professors selected to assist and direct the youth to this object, upon an equal footing, as to the branches of education omitted and herein recommended, with the first literary institutions of our country. Independent of the consideration that such a plan might be expected to allay the opposition and diminish the ground occupied by the enemies of the institution, the committee verily believe that such a plan is the best calculated to promote the prosperity and advance the true interests of the country, while it will necessarily shed an additional lustre on our national character.

All of which is respectfully submitted.

JQHN MUSHAT, *Chairman.*

JUNE 17, 1836.

RELIGIOUS INSTRUCTION.

The committee appointed to inquire into the course of religious instruction at the United States Military Academy have attended to the duty assigned them, and ask leave to report:

That they are impressed with the paramount importance of morality and religion to the young men of this institution. They should go forth to the active duties to which their country may call them with minds not only stored with useful knowledge, but deeply imbued with Christian principles, to be their *shield* for the fiery darts of temptation, their friendly *aid* through all the warfare of life, and their final *passport* at the gates of heaven.

The utility of such instruction is recognized on the part of the government by the appointment of a chaplain—an appointment which the friends of these intelligent and interesting youth (now removed from the immediate beneficial influences of parental restraint and counsel, and from the Christian privileges of their childhood) must, with your committee, regard as a salutary and desirable provision.

It must, however, be apparent to every reflecting mind that the benevolent design of the government, and the wishes of the friends of the academy, cannot be fully realized without the frequent inculcation of divine truth.

But the committee find that there are no daily prayers at the academy, and that the whole course of religious instruction is confined to one service on the Sabbath. Besides the pulpit exercises, there are other duties which the chaplain might profitably perform, if time and his other duties would permit. But the chaplain is also professor of ethics, and in this department is required to teach English grammar, rhetoric, moral philosophy, and the elements of political science, including the law of nations and the constitutional law of the United States, and his time must necessarily be much engrossed with these various subjects; the committee would therefore unanimously recommend that a respectful suggestion be made to the Secretary of War to separate the chaplaincy from the professorship, or, if this cannot conveniently be done, to appoint an additional assistant in the department of ethics, under the general superintendence of the chaplain, that the time of the latter may not be occupied daily with the sections, but more exclusively devoted to the religious welfare of the cadets.

The committee would not omit, in conclusion, the fact that the conveniences of public worship are increased by the completion of a neat chapel, which has been opened during the session of the board of visitors.

Respectfully submitted.

G. F. DAVIS, *Chairman.*

UNITED STATES MILITARY ACADEMY, *June 14, 1836.*

MILITARY EDUCATION AND DISCIPLINE.

The committee on military affairs, after giving the various subjects under consideration all the attention which the short time given them, arising from the new organization of the committee on the 15th, would permit, have deemed it their duty to confine themselves to the subjects most closely allied to the military departments in the academy, and have therefore selected from the various military branches which are or should be taught the following material on which to found their report, viz: civil and military engineering, cavalry, artillery, and infantry tactics; together with some suggestions as to improvements in the ordnance and fixtures. The vast importance of the first-named science, whether as applicable to the "art of war" for permanent defence on our extended frontier and seaboard, or in extending the incalculable benefits of civil engineering to every section of our infant and yet boundless country, renders this science, in the estimation of your committee, one of paramount consideration. It will add permanency and architectural beauty to our public works and buildings. It will facilitate the construction of railroads and canals, the formation and improvement of harbors and roadsteads, the removal of obstacles in our otherwise navigable rivers, and in every point in which those branches of science are here taught and disseminated through each State and to every section of our extended and rapidly-improving country *can be viewed*, must, in the opinion of your committee, satisfy even the most sceptical that the benefits of this institution in these points of view alone are *incalculably great*. Much credit is due to Professor Mahan for the standing those branches maintain, and for accomplishing so much with but *one* assistant professor and a great deficiency of models.

Your committee would strenuously recommend that a permanent additional professor be added to this department; and for the purpose of completing a set of models which are so indispensable in studying this science, (*as they speak direct to the eye,*) recommend the annual appropriation of five hundred dollars for five years.

One of the "three arms of service" your committee deeply regret to perceive is not taught in the academy. In any light in which this subject can be reflected, cavalry must be deemed of the highest importance. Our present Indian war tells this in language that cannot be misunderstood. Celerity of movement against such enemies on our almost boundless prairies is so obviously important that your committee cannot restrain an expression of astonishment that instruction in this important branch of the "art of war" should have been so long withheld from this institution. Can the graduate stand before the world and have the proud consciousness that he is, in fact, a "soldier," while he is a stranger to an important arm of the service to which he is attached, and which is an indispensable requisite to a staff or dragoon officer, to which place in the service he may be at any moment called? And should the introduction of cavalry tactics in this institution be the incipient step to an entire precedence of the graduate over civilians (except in very extraordinary cases) for appointments in the new cavalry regiments, your committee will have accomplished an object which is founded in common justice to the "*thorough-bred soldier*," and which will immediately tend to render the service *more permanent and respectable*.

Your committee, therefore, strongly recommend that forty horses be purchased and kept at this post for practicing cavalry evolutions, as well as for manœuvring the field battery, which is now performed by the cadets, and which is an extremely arduous duty.

The department of artillery received from your committee the special consideration which its importance demands. The graduating class evinced great proficiency, not only in the examination hall, but also in the laboratory, as well as the manœuvres of the battery in the field, mortar practice, and target firing. Great credit is due to Lieutenant Anderson, the instructor in this department, for conducting the graduates so creditably through this complicated science, and in the absolute want of several fixtures essentially requisite to the successful prosecution of it. To put this department on a proper footing, your committee unite in recommending the appointment of a permanent assistant instructor. The aid now given Lieutenant Anderson is that of a temporary detail from the army. Such aid is deemed by your committee wholly inadequate in this important branch of instruction.

The following munitions and fixtures are deemed absolutely necessary in this department, and are strongly urged by your committee for immediate adoption, viz:

1. A light field battery of four or six pound brass guns and two howitzers.
2. A light battery of twelve-pound iron guns and a twenty-four-pound howitzer.
3. Four siege mortars mounted on iron beds.
4. One new eprouvette.
5. Two barbette twenty-four-pound guns.
6. A quantity of good projectiles, solid and hollow.
7. A ballistic pendulum.
8. Models of Congreve rockets, tools, &c.
9. The erection of a target at the foot of the "Crow's Nest," or elsewhere, for target firing.
10. A casemate defence.
11. Barbette and mortar batteries and platform.

The whole will cost an inconsiderable sum in comparison with the advantages to be derived. Your committee do not feel themselves competent to make a correct estimate of the cost, and leave with great confidence this matter in the hands of the superintendent.

In infantry tactics the most desirable result was developed both in the examination hall and in the field. Each cadet of the first class was thoroughly examined in evolutions of the line and battalion in the hall; and with a view to ascertain correctly whether a corresponding field practice had been given to the students, a battalion drill was ordered, the direction of which was promptly tendered to your committee, who proceeded to call from the lines, to take command of the battalion as instructors. A number of the cadet officers of various rank (without previous notice) received directions from your committee as to the evolutions to be performed. The result gave the most unqualified satisfaction. Your committee would here take occasion to recommend to the instructor of infantry tactics to throw each cadet of the first class occasionally in command, with a view to qualify him for that station which each graduate must assume on entering the army. This department is successfully conducted by Major Fowle, who requires an additional assistant instructor of tactics, for the following important reason: the necessary division of the battalion into four companies renders four instructors (one to each company) necessary. There being but three, your committee strongly recommend such an appointment with as little delay as possible, as his services will be immediately required, and are very important during the encampment.

In conclusion, your committee would do injustice to themselves, the superintendent, professors, and instructors generally, did they not express their unqualified satisfaction at the manner in which each department which came under their supervision is managed. From the superintendent down, all vie with each other to surmount obstacles, and to maintain that high standing for the institution which it truly merits. Some of the obstacles would be removed if the recommendations and improvements suggested by your committee be carried into effect; and in submitting this report, they are bound to say they have been cautious to recommend nothing not absolutely necessary to a perfectly successful prosecution of the various branches of science submitted to their consideration.

◊ All of which is respectfully submitted.

MORGAN L. SMITH, *Chairman.*

Letter of the President of the United States in relation to Cadet Hammond's restoration to the Military Academy.

WASHINGTON, December 8, 1835.

Cadet Hammond will be restored to the Military Academy after the 1st day of January next if he shall then be found competent to enter the class he left.

In directing this restoration, however, I am influenced more by a regard to the remission of punishments, which has recently taken place at the Military Academy, and which may have induced Cadet Hammond to think lightly of the offence he committed, than by any extenuating circumstances in his case. He has been guilty of a serious military offence. A proper subordination is essential in all the departments of the army. As it is the duty, so should it be the pride, of the young gentlemen at the Military Academy to obey the laws, regulations, and orders for the government of that institution.

The very improper proceedings which took place, and which led to the conviction of Cadet Hammond, are highly censurable. If the cadets experience injuries from any person at the Military Academy, whether in authority or not, the regulations point out the mode in which redress shall be obtained. This must be pursued, and it will always be found effectual. But if they undertake to decide in their own cases, and tumultuously to seek their own remedy, it is obvious that the discipline of the academy, and the institution itself, would be destroyed. This will never be suffered. In this case the proceedings were marked with another extraordinary feature. A claim seems to have been interposed, and, in fact, practically asserted, to carry from the commons certain victuals, which, if not consumed at the table, belonged to the contractor; and the resolutions passed in support of this claim appear to be as grave as if some unalienated principle of human nature were to be wrested from these young gentlemen. All this is in very bad taste, and, what is still worse, it is wrong in itself. I need not point out the error of the pretensions set up by these young gentlemen. I am sure they will perceive it at once in their moments of reflection.

I had hoped that a lenient system of administration would be found sufficient for the government of the Military Academy. But I have been disappointed, and it is now time to be more rigorous in enforcing its discipline. If the young gentlemen who are sent and educated there by their country will not demean themselves as they are required to do by the regulations, they must suffer the prescribed punishments. Hereafter, therefore, the sentences of courts-martial will, when legal and regular, be confirmed; and the punishment will be remitted only in cases recommended by them, or where the circumstances may appear so very favorable as to justify such a measure.

But the members of the institution must make no calculations on a favorable result. Let them look to their obligations, and fulfil them faithfully. Unless they do, they must expect to be visited by adequate punishments.

That these views may be known, the Secretary of War will communicate this order to the superintendent of the Military Academy, who will cause the same to be promulgated there.

ANDREW JACKSON.

No. 9.

REPORT FROM THE TOPOGRAPHICAL BUREAU.

TOPOGRAPHICAL BUREAU, *Washington, November 15, 1836.*

SM: In obedience to your orders of the 9th of September last, I have the honor of submitting to you the following statements and report:

1. Statement A, exhibiting the amount required for the current expenses of the topographical engineer service for surveys for the year 1837.

This statement embraces estimates for two objects:

One for military surveys on the coast and frontier, \$15,000.

The other for surveys under the act passed April 30, 1824, \$30,000.

2. Statement B, exhibiting the amount required for the Topographical bureau for the same period.

This statement embraces the pay for clerks, the pay for a messenger, and the sum required for the contingent expenses of the office, amounting to \$4,335.

With this statement are two submitted items: one in reference to the compensation to be paid to the first clerk. At present this compensation is fixed at \$1,000; but it is entirely disproportioned to the intelligence required, the labor which has to be performed, or to the amount paid to other clerks similarly situated in other offices. From these considerations, an increase in his salary of \$400 per year is respectfully recommended.

The other is in reference to the messenger; his compensation at present is \$500 per year. The general compensation to messengers in the various offices is \$700. Now in this office there is but one messenger, who, in addition to his general out-door duties, has to attend to three rooms. Viewing his situation, then, in reference to his labors, the estimate of similar services in the public offices generally, and the great increase in the prices of all the necessaries of life, his present compensation is entirely inadequate; and it is respectfully recommended that the same should be raised to \$700.

3. Statement C is an exhibit of the amount transmitted to the disbursing officers of this bureau from the 1st day of October, 1835, to the 30th day of September, 1836, and of the amount for which accounts have been received for the same period.

4. Statement D* is an exhibit of the expenditure of the contingent fund.

5. I am also directed by your letter to exhibit statements of the manner in which the appropriations of the last session of Congress for objects under the direction of this bureau have been applied; the present condition of those objects; and, also, to exhibit a general view of the operations of the bureau since the last annual report.

6. That part of this direction which relates to the manner in which appropriations have been applied will be found exhibited in the statement C; and that which relates to the present condition of those objects, and to a general view of the operations of this bureau, will be found in the subsequent remarks.

7. The duties of the bureau consist in all surveys required to be made for the government, or by its orders, and also in the superintending of such constructions as the War Department shall assign to it.

8. Surveys. These have been somewhat limited during the last year in consequence of the want of an enlargement of the corps, the lateness of the period at which the appropriation bills were passed, and the great want of officers with the troops in the field on the frontiers. Early in the season the necessities of the army were such that it was found proper to withdraw from topographical duty the greater part of the officers of the army who were then assigned to that duty; and lately, from the same cause, all those who had been previously left have been withdrawn and ordered to join their respective companies.

In addition to this, eight of the officers of the corps of topographical engineers (the whole corps consist of but ten) have been ordered to join the troops on the south and northwestern frontier. From which it will be readily perceived that the means of this bureau for the execution of its duties have been greatly limited, and of consequence its operations.

9. These operations have been as follows:

10. A partial survey of a line for a railroad on the eastern shore of Maryland, on an application and at the expense of that State.

The officer in charge of this duty being ordered to the frontier, it is doubtful if he can be ready with his report, plan, and estimate before he will have to leave; every exertion will, however, be made to accomplish the work in time to prevent the disappointment which would otherwise result.

11. The survey, plan, and estimate of a route for a railroad from Belfast, in the State of Maine, to unite with a railroad from the Canada line to Quebec.

12. The survey of the Androscoggin river, from the falls at Brunswick to the Kennebec.

13. The survey of the ledge of rocks at Owl's Head harbor.

14. The survey of the passage into Cobscook bay. Nos. 11, 12, 13, and 14, are under the superintendence of the same officer. The first two are made on the application and at the expense of the authorities of the State of Maine; the last two in pursuance of laws of the last session of Congress. The whole are incomplete. The service required of the officer superintending these surveys, as well as of his assistants, with the troops on the frontier, rendered it necessary that they should be ordered there.

15. The survey of Crow shoal, Delaware bay, with a view to the construction of a breakwater and artificial harbor, in pursuance of a law of the last session of Congress. This survey is incomplete; the officer in charge of the same, with his assistants, being required with the troops on the frontier.

16. The survey, plans, and estimates, and the construction of various routes for railroads in the States of New York, Connecticut, Massachusetts, Rhode Island, and North Carolina. These duties are on the application and at the expense of the authorities and parties interested, and are under the superintendence of one officer; but his services being required with the troops on the frontier, he has been ordered to join them.

17. The survey, plan, and estimate of a route for a railroad from Pensacola, Florida, to Columbus, Georgia, on the application and at the expense of the authorities of Florida and of parties interested.

18. The survey of the coast of the State of Mississippi, in compliance with a resolution of the Senate. These two surveys were under the same officer; but his services being required with the troops in the field in Florida, he has been ordered to join them.

19. The survey of the coast. The officer of the corps heretofore on that duty is still retained upon it.

* Statement D has been taken from this report to be transmitted to Congress by the Secretary of War during the first week of the session, as required by law.

20. The survey, plan, and estimate of the route for a railroad from Charleston, South Carolina, to Cincinnati, Ohio. This survey has been partially made, and is on the application and at the expense of the authorities and parties interested; but as the services of the officer superintending the same, and his military assistants, were required with the troops on the frontier, he and his assistants have been ordered to join them.

21. The survey of a part of Lake Champlain, with a view to its military defences, in consequence of a resolution of the Senate. This survey is partially made; but as the officer and his assistants were required with the troops on the frontier, they have been ordered to join them.

22. The survey of the mouth of the Mississippi, with a view to an improvement of the entrance of that river, by direction of a law of the last session of Congress. No order has yet been taken on this subject. As the season approached in which field operations in that quarter became practicable, the wants of the troops in the field left this bureau without an officer to assign to that duty.

By a reference to the reports on plans for improving the entrance of this river, it will be seen that it is a subject replete with difficulties, and which could be intrusted only to an experienced and highly-informed engineer.

23. The survey of the bar and harbor of Georgetown, South Carolina, by virtue of a law of the last session of Congress. No order has yet been taken on this survey; the reason, there is no officer whatever to assign to it. This, perhaps, may not be considered so much a matter of regret, as the amount appropriated for the survey is entirely inadequate to its execution, or even to a judicious commencement.

The amount appropriated in the law is one thousand dollars. This bureau is not aware by whom or on what authority the estimate for this amount was made; but being well satisfied of its inadequacy to the object contemplated, and with a view of determining this point, the question of an estimate was referred, in September last, to an officer of great experience in hydrographic surveys, as well as of the particular locality of this survey, having some years since been employed upon, and partially completed, a survey of Georgetown harbor.

His estimate for the survey of the bar, and for as much as is yet requisite to complete the survey of the harbor, amounts to the sum of \$4,384.

24. The survey of the mouth of the river Connecticut, with a view to its improvement.

The officer of this corps, who is on the survey of the coast, has also had this survey assigned to him; and the plan, report, and estimate are expected to be completed in time to be laid before Congress at an early period.

25. The survey, plan, estimate, and location of the route of a canal from Georgetown, D. C., to Annapolis, in Maryland, on the application and at the expense of the authorities of that State. This will be completed during the present season.

26. The survey of the headwaters of Chesapeake bay, directed by a law of the last session of Congress.

This survey will be completed in time to be laid before Congress at an early period during the ensuing session.

27. The survey, plan, and estimate of the route for a railroad in the State of Missouri, on the application and at the expense of the parties interested in the same. This survey will be completed this season.

28. The survey of the St. Francis, Black, and White rivers, in Missouri and Arkansas, by virtue of a law of the last session of Congress, and with a view to the removal of the rafts on said rivers. This duty is now in execution, but it is doubted if the appropriation will prove adequate to the survey of the three rivers.

29. The survey of the harbor of Richmond, Virginia, with a view to its improvement.

The plan, report, and estimate of this survey will be done in time to be laid before Congress at an early period.

30. The geological investigations authorized in the Territories, public lands, and in the Indian country, are being made with the vigor and intelligence which have always characterized the labors of Mr. Featherstonhaugh, and interesting reports are anticipated from him during the course of the ensuing winter in reference to the country now occupied by the Cherokees.

The report of the investigations of the past year has been received since the last annual report, and duly submitted to Congress. It has been printed by order of the Senate, and will show the advantages and extent of such examinations. Its value is much enhanced by interesting maps of a part of the country which had been hitherto but little explored.

31. Constructions. The various works of construction assigned to this bureau being placed, (with two exceptions,) in consequence of the want of officers, under civil agents, they will not on that account be exposed to the interruptions consequent upon the necessity of sending the officers to the troops in the field. These works are:

32. The opening of a road from the State line of Alabama, through Mariana, to Apalachicola. This road was authorized by a law of Congress of June 30, 1834; but as the survey and plan had first to be made and approved, some time had to be necessarily occupied in these preliminary operations. It is now, however, in a state of active progress. The officer in charge of this work has been lately ordered to join the troops in Florida; but as he will be at times in the vicinity of the work, he can still bestow his attention upon it. It will not, therefore, be suspended.

The amount required to complete this road is estimated at \$20,313.

33. All the constructions under this bureau, except No. 31, are the result of laws of the last session; but the lateness of the period when the appropriation bills were passed, and the time lost before civil agents having some knowledge of these matters could be obtained, have of necessity limited the operations to the mere beginning of the works and to the procuring of materials.

34. The building of a breakwater or pier at the harbor of Burlington, Vermont. Arrangements for the collecting of materials have been made, and it has been already ascertained that the increase in the prices of materials and labor, over those which were relied upon when the estimate was made upon which the appropriation was founded, will occasion a proportional and considerable increase in the cost of the work.

The original estimate was made upon the prices of 1833, and amounts to \$28,727.

The estimate of the present year has not yet been received from the agent; but, on consulting with the officer who had been placed in the position of inspector of the works on that lake, reasoning from analogy in reference to the increase in the prices of labor and materials, and from the necessity of making

a stronger work than appears to have been contemplated in the first instance, it is doubted if the improvement can be accomplished at a less cost than \$50,000. The amount appropriated was \$10,000, leaving yet to be provided the sum of \$40,000.

35. The deepening of the channel between the North and South Hero islands, Lake Champlain, State of Vermont.

Several large isolated rocks have been removed from this channel; but the general operations requiring the use of a dredging machine, of which there is none on the lake, it became necessary to have one constructed. It is now being made, and will be ready for use early the next spring.

The appropriation for this work was founded upon an estimate of prices collected in 1834. It is not improbable that it will also be affected by the late and general increase in the prices of labor and materials. The estimate was for \$25,669. The amount appropriated was \$15,000, leaving a balance required for the next season of \$10,669, which is probably as much as can be judiciously expended during the next season.

36. The building of a breakwater or pier at the harbor of Plattsburg, Lake Champlain, State of New York. Materials for this work are now being collected.

The estimate upon which the appropriation is founded was made in 1833, and amounted to \$24,003.

That upon present prices of labor and materials has not yet been received; but, from reasons similar to those stated in No. 34, it is doubted if the ultimate cost of the work for this harbor can be placed at a less sum than \$45,000. The appropriation was for \$10,000, leaving a deficiency to be provided amounting to \$35,000.

37. The improvement of the harbor of White Hall, Lake Champlain, State of New York.

There was no plan for this improvement, and no previous survey having been made, it was difficult to ascertain the precise object of the law. Eight thousand dollars were appropriated.

Having had a survey made, and it being ascertained that a dredging machine would be necessary, whatever plan for the improvement might ultimately be adopted, the construction of one has been directed, and will be ready for use by the spring. This machine will also be used at the channel between the two Heroes; that is, but one is to be constructed for both places.

Its operation at White Hall will be to deepen and widen the present channel of the harbor. But one of the greatest difficulties experienced at this harbor is a want of space. It is not sufficiently large for its commerce, and the improvement most desired is an enlargement of the present harbor. The best plan which has been presented for this object is to cut an additional passage through the flat lands, on the side opposite the present site of the town. Should this be adopted, it will require an additional appropriation of \$22,000.

38. The improvement of the harbor of Black river, Jefferson county, State of New York.

As there was neither regular survey of this harbor, nor plan for its improvement, the first action under the appropriation has been to have a survey made, and a plan and estimate for the improvement. But being without any officer for the duty, and it being very difficult to obtain a civil agent suitably qualified, it was not until the 8th day of September that orders for the duty could be given.

The survey has been made, and the estimate for the improvement amounts to	\$26, 998 77
The appropriation was for.....	5, 000 00

Leaving a deficiency to be supplied amounting to.....	<u>21, 998 77</u>
---	-------------------

39. The improvement of the harbor at the mouth of Salmon river, Lake Ontario, State of New York.

The operations for this work have as yet been limited to the collecting of materials, and to the constructing of the requisite machinery.

Five thousand dollars were appropriated for this improvement. I am not aware by whom the estimate was made, and, although the plan appears to have been obtained from the War Department, yet no survey, plan, estimate, or report was ever made under its direction. But being well satisfied that the appropriation was entirely inadequate to the object, and that the plan, which appears to have been under the consideration of the committee, was not the most judicious or the most economical, an officer of much intelligence, and of much experience in these kinds of improvements, was directed to repair to the locality, and, after a careful personal examination, to revise both the plan and estimate. His examination has resulted in a modification of the plan, and in an estimate amounting to \$72,081.

The improvement is highly important to the navigation of that lake.

40. The improvement of the harbor at the mouth of Cattaraugus creek, Lake Erie, State of New York.

The work has been commenced, and materials for its continuation during the next season are being collected.

The amount estimated for the whole work is.....	\$102, 000
The appropriation was for.....	15, 000

Leaving a balance, to be provided for of.....	<u>87, 000</u>
---	----------------

41. The improvement of the harbor of Portland, Lake Erie, State of New York.

The work has been commenced, and materials being collected for its continuation.

The estimate for completing this work amounts to.....	\$60, 000
The appropriation was for.....	10, 000

Leaving a balance to be provided of.....	<u>50, 000</u>
--	----------------

Should it be found necessary hereafter to add an eastern breakwater, for the more complete security of the harbor, it will require an additional appropriation of \$23,500.

42. The constructing of two piers, and the improving of the harbor of Vermillion, Huron county, Lake Erie, State of Ohio.

A suitable agent for this work could not be obtained before the 4th day of August. He was immediately ordered there, has commenced the work, and is collecting materials for its continuation.

The original estimate was made in 1832, and is affected by the late general increase in the prices of

materials and labor. The plan is also somewhat modified, the piers being made larger than at first contemplated; experience having proved that the smaller pier, being insufficient to withstand the shock from the surf of the lake, was soon destroyed.

The estimate for the work amounts to.....	\$61, 563
The appropriation was for.....	10, 000
	51, 563

Leaving a deficiency to be provided of.....

43. The constructing of a pier or breakwater at the mouth of the St. Joseph's, Michigan.
 Later surveys, and a more elaborate investigation have occasioned a modification in the plan at first proposed, but not involving any increase of cost.

The estimate made upon prices of September 1836 amounts to	\$67, 559
The appropriation was for.....	20, 000
	47, 559

Leaving a deficiency to be provided of.....

44. The constructing of a breakwater and harbor at Michigan City, State of Illinois.
 In this, as well as No. 42, the requisite machinery is being made, and arrangements have been entered into for the delivery of materials, preparatory to the active operation anticipated for the next season.

The original estimate for this work has likewise felt the effect of the increased value of materials and labor. It was made in February, 1835, and amounted to \$84,240.

The revised estimate upon prices of September, 1836, amounts to \$95,609.

The appropriation for the last year was for \$20,000.

And the least amount which will be required for the next year is estimated at \$58,217.

Statement E is a connected exhibit of the estimates for the various harbor improvements, under the direction of this bureau, and herein referred to.

In conclusion, allow me again to call your attention to the organization and increase of the corps of topographical engineers.

The subject has been so frequently brought to the notice of the department and of Congress, and explanations of its advantage and necessity are stated in so much detail in communications from this bureau, as well as in a report from the Military Committee of the House of Representatives, that they leave nothing further to be said, or only, in addition, to refer to the facts detailed in this report, which prove the utter inability of the bureau to execute the duties assigned to it under the various laws of Congress without further aid.

It may also be well to add that the aid heretofore received from the army is now no longer to be obtained.

The extreme inconvenience to which the army has been exposed, from the system of military details for duties out of the line, not only during the Indian disturbances on our frontier, but for years before—a system, the parent of extravagance, confusion and discontent, and which even in its partial action has (as events have proved) to be abandoned on every slight emergency—has induced the President to check it by a positive limitation of the number which can in any event be detailed for detached duty.

Under the foregoing circumstances it will be seen that there is no remedy but in a better organization of the corps.

In relation to that organization, I will merely submit a copy of the bill, which met with the approbation of Congress in its last session, having passed the Senate twice, and having been three times reported to the House, and passed through a second reading there—once as a bill from its own Military Committee, and twice in bills from the Senate.

Respectfully submitted.

J. J. ABERT, *Lieutenant Colonel Topographical Engineers.*

Hon. B. F. BUTLER, *Secretary of War.*

A BILL for the better organization of the corps of topographical engineers,

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the corps of topographical engineers shall be organized and increased by regular promotions in the same, so that the said corps shall consist of one colonel, one lieutenant colonel, four majors, ten captains, ten first lieutenants, and ten second lieutenants.

SEC. 2. *And be it further enacted,* That vacancies created by said organization, over and above those which can be filled by the present corps, shall be taken from the army, and from such as it may be deemed advisable of the civil engineers employed under the act of the 30th April, 1824, and that the pay and emoluments to the officers of said corps shall be the same as are allowed to officers of similar rank in the cavalry of the United States.

SEC. 3. *And be it further enacted,* That the authority to employ civil engineers in the act of the 30th April, 1824, and the authority by law for the employment of the present corps of topographical engineers be, and the same are hereby, repealed, after the passage of this act; and that all letters and packages on public business, to and from the chief of the corps now authorized, be free from postage.

SEC. 4. *And be it further enacted,* That the officers of said corps shall be subject to the rules and articles of war, and to such regulations in relation to their duties as the President may think proper to adopt.

A.

Estimate of funds that will be required by the Topographical bureau for the prosecution of surveys for the year 1837.

Designation of appropriation.	Amount.
For defraying the expenses incidental to making examinations and surveys under the act of April 30, 1824, of which sum five thousand dollars shall be appropriated and applied to geological and mineralogical surveys and examinations in the Indian country, on the public lands, and in the Territories of the United States.....	\$30, 000
For surveys of a military character and for the defences of the Atlantic and western frontier.....	15, 000
Total.....	45, 000

J. J. ABERT, *Lieutenant Colonel Topographical Engineers.*

TOPOGRAPHICAL BUREAU, November 10, 1836.

No. 10.

REPORT FROM THE ORDNANCE DEPARTMENT.

ORDNANCE OFFICE, *Washington, November 12, 1836.*

SIR: In obedience to your order of the 9th of September last, I have the honor to transmit a report of the general result of the proceedings and operations of this department between the 1st of October, 1835, and the 30th of September, 1836.

The papers marked A and B present a general view of these concerns during the last-mentioned period, as well in regard to the amounts of expenditures under the several heads of appropriations as in reference to their objects, and to the various ordnance stations where they have been made.

The first of these (A) shows the whole amount of funds remitted from the treasury to disbursing officers and contractors in this department, during the year 1835, to have been

\$934, 588 73

That the portion of that sum which was expended and accounted for, during the same period, amounted to

840, 550 69

And that, at the close of the year, there remained unexpended and in the hands of disbursing officers the sum of

94, 038 04

Statement B exhibits the total amount of funds remaining in the hands of disbursing officers at the close of the year 1835, and which have been remitted to them and its contractors during the first, second, and third quarters of the year 1836. This amount will be seen to have been

1, 053, 324 67

And the portion of this sum expended, and for which accounts have been rendered during the same period, will be seen in the same statement to have amounted to

857, 570 45

The unexpended balance exhibited in the same statement as being in the hands of the disbursing officers at the close of the third quarter of 1836 having been

195, 754 22

Statement C presents a view of the general result of the operations at the several arsenals and armories of the United States in the manufacture, repair, and purchase of the principal articles of ordnance, ordnance stores, and building materials. It exhibits the result of these operations to the extent to which they have been completed during the year between the 1st of October, 1835, and the 30th of September, 1836, indicating, among other articles of ordnance and ordnance stores which have been fabricated or procured, the following, viz: Of artillery—33 42-pounder, 57 32-pounder, 50 24-pounder, and 77 6-pounder iron cannon; 110 32-pounder casemate carriages; 86 32-pounder casemate chassés; 21 24-pounder casemate carriages; 55 24-pounder casemate chassés; 37 32-pounder barbette carriages; 153 24-pounder barbette carriages; 92 field carriages; 68 caissons, and 3 travelling forges.

Of small arms manufactured and procured, viz: 22,650 muskets, complete; 3,034 (Hall's) rifles, made at the national armories; and at the private factories, 8,600 muskets, complete; 701 (Hall's) rifles; 301 carbines; 801 artillery swords, and 3,260 cavalry sabres.

Of accoutrements for small arms: 20,168 sets for infantry; 7,100 sets of rifle accoutrements; 1,607 sets for cavalry, and 2,699 sabre belts.

Statement D shows the extent of the operations during the year between the 1st of October, 1835, and the 30th of September, 1836, which have occurred in procuring ordnance and ordnance stores, under the act of 1808 for arming and equipping the militia of the States and Territories. This statement presents also a view of the expenditures under the act, which have resulted during the same period in procuring the stores, amounting for all objects to \$221,813 38. It exhibits, among other articles of ordnance stores procured, 2 12-pounder brass howitzers, with their carriages and equipments complete; 77 6-pounder iron cannon; 51 6-pounder field, and 31 24-pounder howitzer carriages and equipments, complete; 67 caissons; 8,300 muskets; 701 (Hall's) rifles; 301 carbines; 801 artillery swords; 3,260 cavalry sabres, and 4,250 sets of infantry, rifle, and cavalry accoutrements.

Statement E exhibits the amount of ordnance and ordnance stores which have been apportioned, for the year 1835, to the several States and Territories, under the act of 1808 for arming and equipping the

militia; this apportionment being founded on the recent returns of the strength of the militia, as made by the adjutant generals of the militia of the several States to the adjutant general of the army.

Statement F shows the several articles of ordnance and ordnance stores which have been distributed to the militia of the States and Territories during the year between the 1st of October, 1835, and the 30th of September, 1836.

Statement G presents a view of the munitions of war issued by this department during the year, between the 1st of October, 1835, and the 30th of September, 1836, to the army. In this it will appear that 158 32-pounder, 153 24-pounder, and 35 6-pounder iron cannon; 2 4-pounder brass cannon; 2 24-pounder brass howitzers; 86 32-pounder and 10 24-pounder casemate carriages; 26 32-pounder, 102 24-pounder barbette carriages; 1 12-pounder and 35 6-pounder carriages; 10 24-pounder howitzer carriages; 8 caissons; 21,279 muskets; 3,281 rifles; 380 pistols; 303 cavalry sabres; 19,908 sets infantry, and 1,303 sets of rifle accoutrements, are among the principal articles issued.

Statement H exhibits the amount of lead made at the United States lead mines from the year 1821, when their superintendence was transferred from the Treasury to the War Department, to September 30, 1835, and the amount accruing to the United States for rents for that period, viz:

Total amount of lead made from 1821 to September 30, 1835.....	75, 571, 609 lbs.
Total amount of rent lead accruing for the above period.....	5, 909, 216 "
Amount of rent lead due the United States and yet to be collected, as far as returns have been made to the superintendent.....	493, 313 "

No returns of lead have been made to the superintendent during the year ending September 30, 1836.

In the annual communication from this to the War Department, dated November 20, 1835, the difficulty which existed respecting the collection of rents was particularly stated. A considerable number of the persons engaged in smelting, under licenses obtained for that purpose from the government, had refused to make returns of the lead made by them, or to pay their stipulated rents. The delinquency has since become general. The smelters contend that the act of March 3, 1807, "contains no authority for collecting rent lead under a license for *smelting* lead ore; and that any law authorizing the leasing of public lands within the limits of a State is unconstitutional."

Suits have been ordered against several of the delinquents to test the validity of the foregoing objections; and the result of which is not yet known at this department.

The licenses for smelting will all shortly expire, and no more will be issued unless the most confident assurance be given that no further objections will be made to a compliance with the conditions of the license bonds.

From the great extent of the mineral lands, and the conflicting interests which have arisen between the purchasers and occupants, as well as the probability that the United States may derive no benefit for a long time by a continuance of the present system, the expediency of selling the mineral lands in that region is forcibly presented. Such a measure has been repeatedly urged by this department, and is again recommended, as the most effectual mode of reconciling all difficulties and securing the interest of the United States in that quarter.

Diligent and strenuous efforts have been made to accomplish the various objects set forth in the laws of appropriation, passed during the last session of Congress, for the service of this department; but, for the want of officers to aid in conducting its operations, the works at Liberty, Missouri; Memphis, Tennessee; Little Rock, Arkansas; Baton Rouge, Louisiana; Fayetteville, North Carolina; Charleston, South Carolina; the magazine at the arsenal in Washington city; and the erection of the shot furnaces along the sea-coast, have been all unavoidably delayed and some of them suspended.

A like inconvenience has been felt at the principal arsenals of Watervliet, Pittsburg, Washington city, and Watertown, where extensive operations are progressing and unavoidably impeded by the want of the necessary and usual assistance of officers. The departments for the inspection of cannon and small arms and accoutrements are subject to the same inconvenience; the former being entirely suspended, and the latter progressing with difficulty for the want of additional force.

There is another and very serious inconvenience which extends to every post of the department when there is but one officer, and more especially to those commanded by the chiefs of inspections. These officers, with other commanders of posts who are unaided by assistant officers, are frequently and unavoidably absent on business connected with the posts or the inspection of cannon or small arms, and during these absences are obliged to leave their post sometimes for many days without an officer, and in charge of irresponsible persons wholly unacquainted with the various points (many of them matters of military science) connected with the business of the posts, and which require daily and hourly decision. Such inexperienced persons, from want of the proper authority under the laws and regulations, are in many cases wholly incapable of acting; and where their delegated authority from the officer is sufficient, they must either decide as the cases arise, and most probably erroneously, or postpone action to the arrival of an officer; and in this manner the public business is either encumbered with inconvenient and expensive delays, or perhaps with the still greater expense of a wrong decision, which cannot be remedied.

It cannot be disguised that, unless the service of this department be relieved by the proper authority from these disadvantages, its immense *materiel* of war, and extensive buildings and machinery in all parts of the country, are liable to sustain the most serious losses from fire, defective preservation, and other causes, while its system of service may be deranged by irregularity in the current business at the arsenals, and by complexity and confusion in its business transactions with the chief of the department.

I had the honor to submit for your decision, on the 28th ultimo, a communication from the lieutenant colonel of ordnance, inspector of armories and arsenals, urging the difficulty of his proceeding with the inspections in his department, with the present inadequate allowance of transportation, and requesting to be relieved from the more distant inspections, in consequence of the heavy expenses in which they involve him.

It is proper here to remark that the same complaints have been repeatedly made by the other officers employed in the inspections of this department.

I have the honor to be, sir, respectfully, your obedient servant,

GEO. BOMFORD, *Colonel of Ordnance.*

HON. B. F. BUTLER, *Secretary of War ad interim.*

A.—Statement of the money expended through the Ordnance department in the year 1835.

24TH CONGRESS.]

No. 700.

[2D SESSION.

STATEMENT OF THE NUMBER OF OFFICERS AND SOLDIERS OF THE ORGANIZED MILITIA AND VOLUNTEERS OF THE SEVERAL STATES AND TERRITORIES, THEIR ENTRY AND CONTINUANCE IN THE SERVICE OF THE UNITED STATES DURING THE WAR OF 1812-15, AND WHEN THEY WERE REGULARLY DISCHARGED, ETC.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 13, 1836.

WAR DEPARTMENT, *December 12, 1836.*

SIR: In answer to a resolution of the House of Representatives of the 29th of April last, I have the honor to transmit herewith a report of the Third Auditor, containing the information called for by that resolution relative to the officers, non-commissioned officers, and soldiers of the militia, rangers, and volunteers, "who entered the service of the United States under the several acts of Congress providing for the defence of the country during the late war with Great Britain, and were regularly discharged."

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Hon. JAMES K. POLK, *Speaker of the House of Representatives.*

TREASURY DEPARTMENT, *Third Auditor's Office, December 12, 1836.*

SIR: Pursuant to the resolution of the House of Representatives of the United States, passed on the 29th of April last, I have the honor to transmit herewith a statement of the number of commissioned officers, non-commissioned officers, and soldiers of the organized militia-men, mounted militia-men, volunteers, and rangers, "who entered the service of the United States during the late war with Great Britain, and were regularly discharged, distinguishing the different description of corps, time when they respectively entered the service, and term of continuance therein."

Immediately after receiving the resolution, with the instructions of the late Secretary of War to furnish the information required, as many of the clerks as could consistently be spared from other indispensable duties of the office were employed on this subject. The documents necessary to be referred to being exceedingly voluminous required great care in their examination, and involved much labor in ascertaining each grade and number of officers and militia-men, the periods of service of the different corps and detachments, and reducing the whole number and periods of service into the condensed form exhibited by the statement, which will account for its not having been furnished at an earlier period.

I have the honor to be, very respectfully, your obedient servant,

PETER HAGNER, *Auditor.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

Note.—The foregoing statement, prepared from documents in the office of the Third Auditor, exhibits the condensed number of commissioned officers, non-commissioned officers, and private soldiers of militia, volunteers, and rangers, ascertained to have entered into service for the defence of their country in the late war with Great Britain. It is deemed proper here to remark that in many instances the same officers have been found in command of companies and detachments under different calls for short periods of service in the different years, in some cases as often as eight or ten times, in which no doubt many non-commissioned officers and privates were also in service for a part of such tours of duty; therefore in making out the statement the course pursued has been to take the whole number borne on the rolls as often as they were found to have entered the service and been paid; this consequently swells the number of officers, non-commissioned officers, and privates to an aggregate greatly exceeding the actual number of individuals who entered and served in the late war. As regards that part of the resolution which requires "also distinguishing the number of those who were entitled under the laws of Congress to a bounty in land from the United States, by reason of such services, from those to whom no such bounty was promised by law," it has been deemed sufficient here to state that there is no law which makes provision for a grant of land to militia, volunteers, or rangers in the late war, excepting the provision contained in the act of February 6, 1812, relative to volunteers, and that allows a bounty in land of 160 acres to the heirs and representatives only of non-commissioned officers and soldiers who may be killed in action or die in actual service.

24TH CONGRESS.]

No. 701.

[2D SESSION.]

THE NUMBER AND COST OF FORTIFICATIONS, ARSENALS, AND ARMORIES COMPLETED AND IN PROGRESS.

COMMUNICATED TO THE SENATE DECEMBER 14, 1836.

WAR DEPARTMENT, December 13, 1836.

Sir: In answer to a resolution of the Senate of the 1st of July last, I have the honor to enclose you reports from the chief engineer and the colonel of ordnance, containing the information called for in that resolution relative to fortifications, armories, and arsenals.

Very respectfully, your obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Hon. M. VAN BUREN, *President of the Senate.*

ENGINEER DEPARTMENT, Washington, December 9, 1836.

Sir: I have the honor to hand you a statement containing the information called for by the resolution of the Senate of the 1st July last, so far as relates to the fortifications of the United States, and as can be furnished by the files of this department; and to be,

Very respectfully, your obedient servant,

C. GRATIOT.

Hon. B. F. BUTLER, *Secretary of War ad interim.*

Statement exhibiting the number of fortifications now finished, those undertaken and in progress, and the original estimate of the cost of each; the amount of money already expended thereon, and the unexpended balances of appropriations, in compliance with a resolution of the Senate of July 1, 1836.

No.	Designation of the work.	Estimates.		Am'ts already expended.	Unexpended balances of appropriations.

12	Fortifications in Charleston harbor, South Carolina†.....	324,711 23	145,000 00	5,288 72	150,288 72
13	Fort Pulaski, Cockspar island, Georgia.....	374,000 00	552,800 00	345,088 27	130,000 00	2,911 73	132,911 73
14	Fort Marion, St. Augustine, Florida.....	44,330 40	20,111 45	49,988 55	49,988 55
15	Fort on Foster's Bank, Florida.....	163,343 00	262,000 00	234,993 14	6 86	6 86
16	Fort at Grand Terre, Louisiana.....	264,517 52	21,230 41	53,769 59	53,769 59

* The cost of Castle Pinckney under this head, owing to the appropriations thereto having been made in common with other forts at Charleston "for fortifications in Charleston harbor," cannot be specified. It is included in the expenditures on account of "fortifications in Charleston harbor." (See "Forts under construction.")

† The expenditures here exhibited on account of "fortifications in Charleston harbor" include the entire cost of Castle Pinckney, which, for reasons stated above, cannot be specifically shown.

REMARK.—The estimates and cost of the forts finished, though not called for by the resolution of the Senate, are furnished to make the statement more complete. Respectfully submitted.

ORDNANCE OFFICE, *Washington, December 10, 1836.*

SIR: I have the honor to transmit herewith a statement made in obedience to the resolution of the Senate of the 1st July, 1836, requiring certain information relating to the arsenals and armories of the United States.

I have the honor to be, sir, respectfully, your obedient servant,

G. BOMFORD, *Colonel of Ordnance*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

Statement concerning arsenals and armories of the United States, under the resolution of the Senate of the 1st July, 1836.

ARMORIES AND ARSENALS "FINISHED."

Armories.—Springfield, Massachusetts; Harper's Ferry, Virginia.

Arsenals.—Watertown, Massachusetts; Fort Monroe, Virginia; Vergennes, Vermont; Watervliet, New York; Rome, New York; Pittsburg, Pennsylvania; Frankford, Pennsylvania; Pikesville, Maryland.

Arsenal, Washington city, D. C.—This arsenal is considered as finished, yet from time to time, as the amount of munitions in depot and the work done increases, it becomes necessary to add additional buildings. The position itself, upon a point of land between the two rivers, is contracted, and the space insufficient for the operations progressing there. The extension of the ground by filling in has been therefore provided for in the annual estimate for the year 1837.

Arsenal near Richmond, Virginia.—The government have thought it advisable to abandon this arsenal in consequence of the unhealthiness of the situation and the difficulty of access.

Arsenal, Augusta, Georgia.

Arsenal, Mount Vernon, Alabama.—This arsenal is finished, excepting the brick walls, shutters, coping, &c., amounting to \$14,070, which sum is embraced in the annual estimate for 1837.

Arsenal, Baton Rouge, Louisiana.—This arsenal may be considered as finished; but, in consequence of the smallness and dilapidated state of the old magazine and quarters for enlisted and hired men, new ones are required to be erected.

Arsenal, Charleston, South Carolina.—This arsenal, a mere storehouse, may be considered as finished, (having been built during the war of 1812,) but its ruined state and contracted dimensions render it indispensable to make extensive repairs and additions, in order to fit it up only as a suitable storehouse for that important position, to effect which an appropriation of \$20,000 was made during the last session of Congress.

NOTE.—As the amount of property in depot in the department increases annually, it becomes necessary to add occasionally a building to the different arsenals and armories, stated above as finished, and to make necessary repairs for preservation, according to the exigencies of the service in the different sections of the country.

Armories and arsenals "undertaken and in progress."

Augusta, Maine.—It is expected that the amount embraced in the annual estimate for 1837, if granted, will finish this arsenal.

Fayetteville, North Carolina.—For the want of officers the operations of this arsenal were not commenced until a very late period; but a small portion of the appropriation has therefore been expended.

Chattahoochee, Florida.—The operations at this arsenal are progressing as rapidly as possible.

St. Louis, Missouri.—This arsenal is nearly finished, and will probably be completed by the amount embraced in the estimate for 1837, if granted.

Detroit, Michigan.—The provision in the estimate for 1837 will probably complete this arsenal.

Governor's island, New York.—This small depot is nearly finished.

Memphis, Tennessee; Liberty, Missouri; Little Rock, Arkansas.—The sites for these three arsenals have been selected. The drawings, instructions, &c., have been arranged; but, for the want of officers, nothing has as yet been done toward their erection.

NOTE.—With regard to all the works "undertaken and in progress" it must be remarked that, in consequence of the great rise in the price of labor, provisions, and materials since the passage of the appropriations, the several sums will fall considerably short of effecting the objects contemplated by the law.

"Original estimate of the cost" of works undertaken and in progress.

Augusta, Maine.—No original estimate was prepared, but erected under the act of 3d March, 1827.

Fayetteville, North Carolina.—The estimate prepared, amounting to \$134,185, was for the erection of the arsenal buildings proper, exclusive of connecting walls, exterior walls, gates, roads, fences, wharves, machinery, &c., most of which would depend upon the particular location adopted, and not known when the estimate was made.—(Vide report of the Military Committee No. 372, 1st session 24th Congress.)

Mount Vernon, Alabama.—No original estimate made, but erected under the act of 24th May, 1828.

Chattahoochee, Florida.—No original estimate made, but erected under the act of 5th April, 1832.

St. Louis, Missouri.—No original estimate made, but erected under the act of 20th May, 1826.

Detroit, Michigan.—No original estimate made, but erected under the act of 28th June, 1832.

Memphis, Tennessee; Liberty, Missouri; Little Rock, Arkansas.—An estimate was prepared for the erection of a small depot in Missouri, amounting to about \$25,000; also, one for a small depot in Arkansas which amounted to \$42,236. The act of 2d July, 1836, provides for the purchase of sites and the construction of arsenals for the deposit of arms in Arkansas, Missouri, and at Memphis, Tennessee, provided that the cost of such arsenals shall not exceed \$14,000 each.

"Amount already expended" on works undertaken and in progress.

At Augusta, Maine.....	\$140,326
At Fayetteville, North Carolina.....	7,590
At Chattahoochee, Florida.....	138,666
At Detroit, Michigan.....	99,300
At Memphis, Tennessee.....	2,500
At Liberty, Missouri.....	2,500
At Little Rock, Arkansas.....	5,000

"Unexpended balances" (on the 5th December, 1836) "of appropriations" of works undertaken and in progress.

Fayetteville, North Carolina.....	\$37,410
Memphis, Tennessee.....	11,500
Liberty, Missouri.....	11,500
Little Rock, Arkansas.....	9,000

G. BOMFORD, *Colonel of Ordnance.*ORDNANCE OFFICE, *Washington, December 10, 1836.*

24TH CONGRESS.]

No. 702.

[2D SESSION.]

EXPLANATORY ESTIMATE AND RECOMMENDATION OF THE SECRETARY OF WAR FOR AN
APPROPRIATION FOR THE SUPPRESSION OF INDIAN HOSTILITIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 21, 1836.

WAR DEPARTMENT, *December 19, 1836.*

SIR: I have the honor to send herewith the draught of a bill making further provision for the suppression of Indian hostilities, the urgent necessity of which was stated to the President in the annual report of this department, and by him communicated to Congress. The bill is not confined to Florida, but it is proposed in such terms as to provide for any contingency which may occur in our Indian relations. The estimates are prepared with the like view, and, as will be seen by the accompanying papers, amount to near two millions of dollars. The sum of one million, mentioned in my annual report, was named before I had received any estimate from the quartermaster general, and before I had been apprised that the estimate of the commissary general of subsistence, previously received, and included in the general estimates, would require to be increased.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*HON. C. C. CAMBRELENG, *Chairman of Committee of Ways and Means, House of Reps.*QUARTERMASTER GENERAL'S OFFICE, *Washington, December 8, 1836.*

SIR: It becomes my duty to represent to you the necessity for an immediate appropriation for the suppression of Indian hostilities. The various appropriations made at the last session of Congress for that object are all so nearly exhausted as to preclude remittances to the extent required; and, in order to meet the exigencies of the service, I have been obliged to authorize the disbursing officers at New Orleans, Savannah, Charleston, and elsewhere, to draw for the necessary funds to enable them to furnish the supplies required for the Florida campaign, hoping that an additional appropriation will have been made by the time the drafts shall be presented here for payment. It is impossible, from the nature of that service, to submit a specific estimate of the amount that will be necessary under each head of expenditure; but, from the extent of the requisitions already received from the disbursing officers, and the calls that will probably be made hereafter, I would suggest that at least one million of dollars be appropriated for the objects due from the quartermaster's department, such as the means of transportation, forage, and other necessary supplies.

I have the honor to be, sir, very respectfully, your obedient servant,

T. CROSS, *Major, Acting Quartermaster General.*HON. B. F. BUTLER, *Secretary of War ad interim.*OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, December 19, 1836.*

SIR: I have the honor to state that the continued increase in the price of provisions leads me to fear that the amount asked for in my estimate for subsistence for 1837, and submitted to you on the 5th ultimo, may fall short. I therefore request that the sum of \$218,361 25 may be included in your estimate on

account of subsistence "for suppressing Indian hostilities." This will be an addition of only five cents to the present price of the ration.

Very respectfully, your most obedient servant,

GEORGE GIBSON, *Commissary General of Subsistence.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

PAYMASTER GENERAL'S OFFICE, *City of Washington, December 2, 1836.*

SIR: The appropriations made by Congress at the last session for the suppression of Indian hostilities having been expended, or drawn from the treasury and placed in the hands of the disbursing officers, it becomes necessary to draw the early attention of Congress to further appropriations. The subject is one that does not admit of specific estimates, but I am of opinion that the demands on the pay department will require at least \$600,000, if the war should continue a few months longer, with a force equal to that which is now employed, including the volunteers on the southwestern frontier.

I have the honor to be, very respectfully, sir, your most obedient,

N. TOWSON, *Paymaster General.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

24TH CONGRESS.]

No. 703.

[2D SESSION.]

EXPLANATORY ESTIMATES FOR RIVERS AND HARBORS, FOR THE MILITARY ACADEMY,
FOR FORTIFICATIONS, AND FOR CERTAIN ROADS DURING THE YEAR 1837.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 21, 1836.

Estimate of funds that will be required for the improvement of rivers, harbors, &c., in the year 1837.

For the improvement of the harbor of Chicago, Illinois.....	\$67, 920 00
For work at the harbor near the mouth of the river Raisin	61, 351 60
For removing obstructions at Huron river	2, 565 00
For the improvement of Cleveland harbor, Ohio	53, 680 00
For the removal of obstructions at Cunningham creek, Ohio	8, 960 00
For the removal of obstructions at Ashtabula creek, Ohio.....	19, 060 00
For the removal of obstructions at Conneaut creek, Ohio.....	8, 000 00
For the improvement of the harbor of Presque Isle, Pennsylvania	98, 000 00
For improvements at Dunkirk harbor, New York	47, 784 00
For works at Buffalo harbor, New York	7, 000 00
For the improvement of Black Rock harbor, New York.....	9, 180 00
For a dredging machine on Lake Erie	7, 500 00
For improving the harbor at the mouth of Oak Orchard creek, New York.....	18, 000 00

24TH CONGRESS.]

No. 704.

[2D SESSION.]

EXPLANATORY ESTIMATES FOR THE SUPPORT OF THE ARMY AND THE SEVERAL BRANCHES OF THE MILITARY ESTABLISHMENT DURING THE YEAR 1837.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 21, 1836.

No. 1.

ESTIMATE FOR THE PAYMASTER GENERAL'S OFFICE.

PAYMASTER GENERAL'S OFFICE, *Washington, October 19, 1836.*

SIR: I have the honor, agreeably to your instructions of the 9th ultimo, to submit the estimates of the pay department for the year 1836.

The paper marked A is a statement in detail of the funds required to pay the army. It differs from the estimate of last year \$125,703 95, which is thus accounted for:

Increase of the estimate for 1837.

One regiment of dragoons, per act of May 23, 1836.....	\$116,857 00
Three additional paymasters, per act of July 4, 1836.....	4,590 00
One surgeon added to those who have served ten years.....	292 00
Three additional surgeons, per act of July 4, 1836.....	4,590 00
Three assistant surgeons added to those who have served five years.....	360 00
Five additional assistant surgeons, per act of July 4, 1836.....	5,095 00
	131,784 00
Deduct amount of General Macomb's claim for arrears of brevet pay, &c., included in estimate for 1836.....	6,080 05
	125,703 95

The paper marked B is an estimate, also in detail, of the funds required to pay the Military Academy. It remains the same as that of last year.

The paper marked C is the estimate of the expenses of this office for the year 1837, and is of the same amount as that for 1836.

I have also the honor to enclose a statement of the contingent expenses of the office for the first, second, and third quarters of the year 1836, as required by an act passed at the last session of Congress.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

C. A. HARRIS, Esq., *Acting Secretary of War.*

A.

Estimate of the pay of the army, subsistence of officers, and such allowances in lieu of forage and clothing as may be drawn in money for the year 1837.

No. 2.

ESTIMATE OF THE SUBSISTENCE DEPARTMENT.

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, November 5, 1836.*

SIR: In compliance with instructions from the Department of War, under date of 9th of September ultimo, I have the honor to submit an estimate of the probable amount required to subsist the regular troops, militia, and volunteers, in the service of the United States in 1837, aggregating \$913,445.

Of this sum, \$608,072 66 will be required to subsist the regular troops, and \$305,372 34 to subsist the militia and volunteers.

The sum estimated for the regular troops in 1837 exceeds that of 1836 \$157,672 66, and arises from two causes: first, the extraordinary increase in the price of provisions throughout the whole country; and, secondly, the necessity of subsisting an additional regiment of dragoons.

The estimate for the salaries of clerks is the same as 1836, and is predicated upon the act of 3d of March, 1835, rendering permanent the present mode of supplying the army.

The estimate for contingencies of the office exceeds that for 1836 \$100, owing to the purchase of fuel out of this fund, in lieu of being supplied with that article, as for the last three or four years, by the Department of War.

An estimate for the actual compensation of messenger, at \$700, is also submitted; this application will require an act of Congress, and has been rendered necessary by an act of that body at their last session, prohibiting the employment of orderly sergeants in any of the military bureaus; the person now employed acted in that capacity, and is now engaged as messenger.

The compensation asked is precisely the same as that paid to a great portion of the messengers in the civil employments; his duties are as arduous, and as faithfully performed, and there is no reason why he should not receive the like remuneration for his services.

Very respectfully, your most obedient servant,

GEORGE GIBSON, *Commissary General of Subsistence.*

Hon. B. F. BUTLER, *Acting Secretary of War.*

Estimate of the probable amount required to subsist the regular troops, militia, and volunteers, in the service of the United States in 1837.

Troops in the line and recruits.....	\$458, 805 00
Ordnance men at the various arsenals.....	18, 250 00
Two regiments of dragoons.....	104, 390 00
Militia and volunteers in the Florida campaign.....	292, 000 00
Rations of sugar and coffee for the whole, in lieu of whiskey.....	40, 000 00
	913, 445 00

GEORGE GIBSON, *Commissary General of Subsistence.*

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, November 5, 1836.*

COMMISSARY GENERAL'S OFFICE, *Philadelphia, November 1, 1836.*

C. IRVINE, *Commissary General of Purchases.*

HON. B. F. BUTLER, *Secretary of War.*

No. 4.

ESTIMATES FOR THE SURGEON GENERAL'S OFFICE.

SURGEON GENERAL'S OFFICE, *November 12, 1836.*

SIR: Agreeably to your instructions, I herewith enclose estimates of the expenses of the medical department of the army, and of the Surgeon General's office, for the year 1837.

The estimate for the salary of the messenger is increased in consequence of the increased price of all articles of subsistence, the former allowance being deemed inadequate to the support of a family.

The estimate for extra losses and damages is thought essential and necessary. Much of the bedding, &c., has been already destroyed in Florida, and most of the surgical instruments and hospital furniture which fall into the hands of the militia may be considered as entirely lost, or rendered totally unfit for use, independent of the great injury which instruments must sustain in field service, with the greatest possible care.

Very respectfully, your obedient servant,

BENJAMIN KING, *Assistant Surgeon.*

HON. SECRETARY OF WAR, *Washington.*

Estimate of the expenses of the medical department of the army for the year 1837.

Medicine, instruments, and dressing.....	\$7,000 00
Hospital stores, bedding, &c.....	8,000 00
Furniture for dispensaries.....	1,000 00
Stationery and printing.....	1,000 00
Packing boxes, cask, &c.....	1,000 00
Medical books and vaccine matter.....	500 00
Private physicians and medicines furnished.....	12,000 00
Extra supplies, from loss, &c.....	2,000 00
Other contingencies.....	1,000 00
Extra damages and losses sustained in surgical instruments, bedding, &c., in field service...	5,000 00
Total.....	38,500 00

BENJAMIN KING, *Assistant Surgeon.*

No. 5.

ESTIMATE FOR THE QUARTERMASTER'S DEPARTMENT.

Estimate of funds for the service of the quartermaster's department for the year 1837.

I. REGULAR SUPPLIES.

For fuel.....	\$75,000 00
For forage for the horses of officers when required in kind, and for horses, mules, and oxen in the service of the quartermaster's department at the various posts.....	30,000 00
For forage for the horses of two regiments of dragoons.....	90,000 00
For straw for soldiers' bedding.....	3,000 00
For stationery, including company and other blank books for the army; certificates for discharged soldiers; blank forms for the pay and quartermaster's departments; and the printing of department orders, army registers, and general regulations.....	10,000 00
	\$208,000 00

2. BARRACKS, QUARTERS, AND STOREHOUSES, ETC.

For repairing and enlarging barrack, quarters, storehouses, and hospitals at the several posts; for erecting temporary cantonments at such post as shall be occupied during the year, and gun-houses for the protection of the cannon at the forts on the seaboard, including the necessary tools and materials for the objects enumerated, and for the authorized furniture for the barrack-rooms of non-commissioned officers and soldiers.....	\$50,000 00	
For rent of quarters for officers, and barracks for troops at posts where there are no public buildings for their accommodation, and of storehouses for the safe-keeping of subsistence, clothing, &c., and of grounds for summer cantonments and encampments, and for military practice.....	45,000 00	\$95,000 00

3. TRANSPORTATION OF OFFICERS' BAGGAGE.

For mileage to officers, or the allowance made to them for transportation of their baggage when travelling on duty without troops.....		50,000 00
--	--	-----------

4. TRANSPORTATION OF TROOPS AND SUPPLIES.

Of the army, including the baggage of troops when moving either by land or water; freights and ferriages; the purchase or hire of horses, mules, oxen, carts, wagons, and boats for the transportation of troops and supplies, and for garrison purposes; drayage and cartage at the several posts; hire of teamsters; transportation of funds for the pay department; the expense of sailing a public transport between the posts on the Gulf of Mexico, and of procuring water at such posts as from their situation require it.....	\$130,000 00	
Of clothing, from the depot at Philadelphia to the stations of the troops.....	10,000 00	
Of subsistence, from the places of purchase and the points of delivery under contracts to such places as the circumstances of the service may require it to be sent.....	12,000 00	
Of ordnance, from the founderies and arsenals to the fortifications and frontier posts, and of lead from the western mines to the several arsenals.....	25,000 00	177,000 00

5. INCIDENTAL EXPENSES.

For postage of letters and packets received by officers on public service.....	13,000 00	
For expenses of courts-martial and courts of inquiry, including the additional compensation of judge advocates, members, and witnesses, while on that service, under the act of March 16, 1802.....	20,000 00	
For extra pay to soldiers employed in the erection of barracks and quarters, the construction of roads, and on other constant labor, for a period of not less than ten days, under the act of March 2, 1819.....	20,000 00	
For expenses of expresses from the frontier posts; of escorts to paymasters; of the necessary articles for the interment of non-commissioned officers and soldiers; hire of laborers; compensation to clerks in the offices of quartermasters and assistant quartermasters at posts where their duties cannot be performed without such aid; and compensation to temporary agents in charge of dismantled works, and in the performance of other duties.....	14,000 00	
For the purchase of horses to mount the second regiment of dragoons.....	85,000 00	
For various expenditures necessary to keep the two regiments of dragoons complete, including the purchase of horses to supply the place of those which may be lost and become unfit for service, and the erection of additional stables.....	40,000 00	192,000 00
		<u>722,000 00</u>

NOTE.—The expenditures made through the Quartermaster's department rest, with few exceptions, upon the authority of the regulations made in pursuance of law. See the 5th section of the act of 3d March, 1813, entitled "An act the better to provide for the supplies of the army of the United States, and for the accountability of persons intrusted with the same;" and the 9th section of the act of 24th April, 1816, entitled "An act for the better organization of the general staff, and making further provision for the army of the United States."

The item for fuel, and that for repairing and enlarging barracks, quarters, &c., have been slightly increased beyond the estimate for the present year, in consequence of the addition of a regiment of dragoons to the army at the last session of Congress, which will occasion an increased expenditure under those heads.

For the same reason the item for forage for dragoon horses has been increased to double the amount of the last estimate, which comprehended but one regiment; and a new item of \$85,000 is introduced for the purchase of horses to mount the second regiment, and \$10,000 added to the item for various expenditures to keep the two regiments complete and erect additional stables.

The item for transportation of the army has been increased from \$96,000 to \$130,000, the former sum having been found inadequate to meet the expenditures under that head. Although there was a balance of \$31,600 of the appropriation for 1835 carried to the service of the present year, the whole amount was exhausted on the 30th of September, and remittances on that account were necessarily suspended. In an

item so very important as transportation of the army, the extent of which results from circumstances that cannot be foreseen, the estimate should be liberal. Of the sum asked for under this head it is believed that about \$15,000 will be required to make good the deficiency of the appropriation for the present year.

The item for expenses of courts-martial and courts of inquiry has been increased from \$5,500 to \$20,000 to meet the heavy charges that will be incurred under that head by the investigation which has been ordered into the causes of the failure of the first campaigns in Florida and the delay in opening the Creek campaign. Considering the number of witnesses that will probably be required, the distance they will have to travel, and the time which such an investigation must necessarily occupy, the amount asked for is deemed the smallest that could safely be estimated.

The item for transportation of ordnance has been reduced \$5,000, and that for postage \$500. All other items remain the same as they were in the last estimate.

T. CROSS, *Major, Acting Quartermaster General.*

QUARTERMASTER GENERAL'S OFFICE, *November 2, 1836.*

Estimate of funds for contingencies of the army in the year 1837.

For contingencies of the army \$3, 000 00

T. CROSS, *Major, Acting Quartermaster General.*

QUARTERMASTER GENERAL'S OFFICE, *November 2, 1836.*

NOTE.—There are no data upon which an estimate for *contingencies* of the army can be founded. The appropriation is confided to the discretion of the Secretary of War, with no other restraint than that imposed by the obligation to report the expenditures to Congress annually, in conformity with the fifth section of the act of 3d March, 1809. For many years past the sum appropriated under this head had been \$10,000; at the last session of Congress, however, it was reduced to \$3,000, and I have adopted that sum in this estimate without knowing the reasons which induced the reduction of the amount asked for.

T. CROSS, *Major, Acting Quartermaster General.*

Estimate of salaries of clerks and messenger, and of contingent expenses of the Quartermaster General's office for the year 1837.

One clerk, at \$1,600 per annum.....	\$1, 600 00
One clerk, at \$1,200 per annum.....	1, 200 00
Four clerks, at \$1,000 per annum each.....	4, 000 00
One messenger, at \$500 per annum.....	500 00
	<u>7, 300 00</u>

As per act of Congress of 9th May, 1836:

For contingencies 600 00

T. CROSS, *Major, Acting Quartermaster General.*

QUARTERMASTER GENERAL'S OFFICE, *Washington City, November 2, 1836.*

No. 6.

ESTIMATE OF THE ADJUTANT GENERAL'S OFFICE.

ADJUTANT GENERAL'S OFFICE, *Washington, November 5, 1836.*

SIR: Pursuant to your instructions, I respectfully submit the following estimate of the expenses of the recruiting service of the army for the year 1837.

1. "Two months' extra pay," allowed by the act of March 2, 1833, to each musician and private who may re-enlist into his former company or regiment, to wit:

For 200 re-enlisted musicians and privates, at \$12 for each man..... \$2, 400 00

2. *Contingent expenses.*

Including quarters, fuel, bunks, straw, compensation to citizen surgeons for examination and medical attendance, magistrate's fees for administering the oath of allegiance to recruits, and all other expenses on their account until put in march to join their regiments, at \$9 per man for 5,496 recruits, exclusive of the number (200) of soldiers that will, it is calculated, re-enlist.....	49, 464 00
From the above sum of \$49,464 deduct the balance of the appropriation for "expenses of recruiting" for the current year, which, it is calculated, will remain in the treasury on the 31st of December, 1836....	17, 502 00
Total amount required to be appropriated for "expenses of recruiting".....	<u>31, 962 00</u>

Recapitulation.

Amount required for "two months' extra pay" allowed to each musician and private who may re-enlist	\$2,400 00
Amount required for "expenses of recruiting"	31,962 00
Aggregate sum required to be appropriated for the recruiting service for the year 1837	34,362 00

Remarks and explanations.

The number of recruits, as above estimated for, to fill up the rank and file of the army for 1837, is calculated as follows, to wit:

The number of recruits required for the several regiments of the army, on the 30th of September, is	1,888
To which add the number of discharges that will take place by the expiration of service, from the 1st of October to the 31st of December	494
Add, also, the estimated number of casualties by deaths, desertions, and discharges for disability, &c., for the same period	372
	2,754
From the above deduct the number of recruits in depot, or on the march, and not assigned to regiments	351
Deduct, also, the estimated number that may be enlisted from the 1st of October to the 31st December, 1836, inclusive	300
	651
Number of recruits required to complete the military establishment on the 31st of December, 1836	2,103
To the above number of vacancies (2,103) add the number of discharges on account of the <i>expiration of service</i> for the year 1837	2,104
Add, also, the estimated number of vacancies occasioned by <i>deaths, desertions, and discharges for disability, &c.</i> , for 1837	1,489
Total number of recruits (inclusive of re-enlistments) required for the military establishment, exclusive of the enlisted men of the ordnance department for the year 1837	5,696

Respectfully submitted.

R. JONES, *Adjutant General.*

Major General ALEXANDER MACOMB, *Commander-in-chief U. S. Army.*

No. 7.

Estimate of the amount that will be necessary to be appropriated for arrearages prior to the 1st of July, 1815, payable through the office of the Third Auditor, and for half-pay pensions to widows and orphans for the year 1837, viz:

Arrearages prior to July, 1815, in addition to the unexpended balance of the year 1836 of \$4,511 80	\$1,000 00
Half-pay pensions to widows and orphans, in addition to the unexpended balance of the year 1836 of \$133 62	4,000 00
	5,000 00

PETER HAGNER, *Auditor.*

TREASURY DEPARTMENT, *Third Auditor's Office, November 11, 1836.*

No. 8.

Estimate for the service of the ordnance department for the year 1837.

A.—For the national armories		\$360,000
B.—For the armament of fortifications, viz:		
Providing in part the cannon, howitzers, mortars, cannon balls, shells, gun-carriages, mortar-beds, &c., for the fortifications completed and for those now erecting		200,000
C.—For the current expenses of the ordnance service, viz:		
Repairing small arms at the several arsenals and depots	\$47,025	
Repairing field artillery carriages	14,500	
Ordinary repairs to keep the public buildings in order at the several arsenals and depots	12,000	
Repairing and preserving military stores at arsenals and forts	8,575	
For the purchase of a supply of laboratory paper	15,000	
Providing ordinary military supplies for the army	9,750	
Miscellaneous expenses at arsenals, including stationery, printing, fuel, forage for public horses, and other incidental expenses	12,500	

Estimate for the service of the ordnance department for the year 1837—Continued.

EXPENSES AT THE LEAD MINES, VIZ:		
Compensation to the persons employed in collecting rents, receiving and distributing lead.....	\$2, 500
Stationery, printing, fuel, and forage for public horses.....	625
For the payment of amounts claimed for defending suits against the United States agent for leasing mineral lands in the mining district.....	1, 500
		\$4, 625
ARSENALS.		
D.—St. Louis, Missouri:		
For the erection of a timber shed, 151 by 30 feet.....	4, 615
For the building of a gun-carriage shed, 105 by 30 feet.....	2, 473
For the construction of three water cisterns, with connecting pipes and wells.....	2, 194
For the erection of connecting walls between gun and timber sheds and adjoining buildings, including two gates.....	5, 048
For making drains and cesspools, to carry off water, levelling and graduating area, making cart roads in front of the buildings, and for a fence between the old quarters and arsenal.....	1, 778
For a driving room, near the laboratory building.....	300
For fitting up the machinery for the armory, tilt-hammer, and smith shops, with the necessary wheels, shafts, lathes, &c., &c.....	2, 640
For erecting a house for the keeper of the magazine, and enclosing the same with a suitable fence.....	1, 200
For erecting a stone wall for enclosing the arsenal grounds, (2,204 perches,) with stone coping, at \$2 75 per perch, including excavation.....	6, 061
For repairing the buildings and fences, and repainting some of the buildings, at this post.....	1, 301
		24, 610
E.—Mount Vernon, Alabama:		
For completing the brick wall, to enclose all the buildings at this arsenal, removing earth, gravelling grounds, finishing cisterns, guard-house, &c.....	10, 000
For procuring blinds or shutters for the arsenal and soldiers' barracks.....	1, 256
For covering the coping of the gun shed walls, magazine walls, connecting walls, and the walls in front of the two blocks of officers' quarters, with copper, viz: 6,332 pounds copper, at 35 cents.....	\$2, 234
For the services of a competent mechanic, to execute the above work, and brazing materials.....	455
	2, 689
For the erection of a flag-staff.....	125
		14, 070
F.—Apalachicola, Florida:		
Towards completing the arsenal and other buildings in Florida, under the act approved April 5, 1832.....		70, 000
G.—Detroit, Michigan:		
For erecting additional officers' quarters in the northwest angle of the arsenal square, and finishing the grading inside the same and outside the surrounding wall.....	12, 000
For painting the arsenal and other public buildings, including the surrounding wall.....	5, 000
		17, 000
H.—Augusta, Georgia:		
For erecting a new stable; building a cistern to contain water; for a new piazza around the soldiers' barracks; and for new floors to the old magazine, armorers' and other workshops.....	1, 840
For making new gutters and spouts, fences and additions to some of the buildings of the arsenal, and repainting some of the public buildings.....	850
		2, 690
I.—Pittsburg:		
For conducting water from soft spring to the arsenal, and other buildings, in iron pipes; constructing a reservoir of stone, with cement; hydrants, fire plugs, &c.....	3, 000
For raising and underpinning stone walls—800 perches, at \$2 50....	2, 000
For grading street, and completing paving or flagging gutters.....	1, 797
For building two small houses, for fire engines.....	500
For resetting and jointing coping on gable ends of brick buildings, and on brick connecting walls, and adding 100 feet coping.....	475
		7, 772
K.—Frankford, Pennsylvania:		
For permanent enclosure of the public ground at this arsenal with a brick wall and stone coping.....		9, 500

Estimate for the service of the ordnance department for the year 1837—Continued.

L.—Washington city:			
For completing the sea wall, now in progress, to the northern boundary or ends of the penitentiary wall, 1,600 feet—1,600 perches of stone, and laying the same, at \$2 per perch.....	\$3, 200
Towards filling up the marsh on the southeast and east fronts of the arsenal ground, between the sea wall and the present shore.....	12, 000
For completing magazine and keeper's house.....	10, 000
For repairing the public wharf.....	400
		\$25, 600
M.—Fort Monroe arsenal:			
For extending and repairing wharf.....	600
For repairing shops, timber sheds, and other public buildings.....	1, 150
For additional machinery and fixtures to smiths' and finishing shops.....	1, 700
		3, 450
N.—Pikesville, Maryland:			
For taking down the old wall and putting up a new one on the front line of the public grounds.....	2, 141
For opening and enlarging sewers and drains; new floors to cellars and workshops; and for repainting the arsenal storehouses, &c....	2, 160
		4, 301
O.—Harbor of New York:			
For finishing the necessary buildings constructing at Governor's island; for a small depot for munitions of war, including the graduation of the grounds and the construction of permanent skidding for heavy cannon.....		2, 337
P.—Watertown, Massachusetts:			
For building a carriage-maker's and carpenter's shop, of brick, two stories high, 100 feet long by 40 feet wide.....	8, 000
For one steam-engine of 8-horse power.....	\$1, 000
For forges, bellows, anvils, &c., for forging shop.....	1, 200
		2, 200
For altering and repairing roofs and gutters of the public buildings.....	1, 800
For building two additional rooms to the commanding officer's quarters.....	1, 500
For building a gate house.....	1, 000
For sinking a well near the new workshop.....	\$300
For repairing the large wharf.....	300
		600
		15, 100
Q.—Watervliet arsenal, New York:			
For completing the permanent wall around the public grounds, viz:			
For constructing 3,950 linear feet of stone wall, including coping, all other materials and labor, at \$5 66½ per foot.....	22, 377
For constructing a lattice bridge across the Erie canal.....	1, 740
For constructing a road from the timber shed (crossing the afore-mentioned bridge) to workshops, viz:			
Filling in 6,000 yards of earth, at 26 cents.....	1, 560
For filling in and grading public grounds around the new shops, 6,560 yards of earth, at 26 cents.....	1, 705
For extending the smith shop 120 feet in length, giving 10 additional forges.....	4, 944
For thorough repairing brick-work, roofs, and flooring of south gun-house.....	670
For additional machinery to shops, viz:			
Constructing race-way, culvert, water-wheel, and other fixtures for working tilt-hammer and machinery connecting with the water-shop.....	3, 086
For repainting old buildings, enclosures, &c.....	500
		36, 582
R.—Kennebec arsenal, Maine:			
For constructing 62,100 feet of stone wall on northeast and south lines of the arsenal lot, at 25 cents per cubic foot.....	15, 525
For 15,708 feet, superficial measure, of coping for the above, 50 cents per foot.....	7, 854
For constructing 4,756 perches of river wall, at \$2 50 per perch....	11, 890
For graduating and preparing the grounds for constructing the walls on the north, east, and south lines, and excavating the trenches for the same.....	3, 350
For constructing a road from the wharf to the magazines, armorers' and blacksmiths' shops; and for removing the high ridge on the north side of the lot which is parallel to and near the line of the wall.....	4, 750
For prosecuting the improvements now in progress, filling the north and south ravines, constructing culverts through the same, and for the gradual improvement of the post.....	6, 460
For building an office; completing the piazza to No. 1 quarters, and finishing quarters No. 2.....	1, 659
For building an additional stable and converting the same into quarters.....	2, 497
		53, 985

Estimate for the service of the ordnance department for the year 1837—Continued.

S.—Fayetteville, North Carolina:			
Towards completing the arsenal and other buildings near Fayetteville, North Carolina, under the act approved June 14, 1836.....		\$75,000
T.—Baton Rouge, Louisiana:			
For completing the powder magazine and quarters for enlisted and hired men at this post.....		11,432
U.—For the purchase of 1,500 percussion cannon locks, at \$10 each			\$373,429
For the manufacture of 550 elevating machines for barbette and casemate carriages, at \$15 each.....			15,000
For the purchase of sponges for field and battering cannon.....			8,250
V.—For the rifle factory at Harper's Ferry armory, viz:			1,960
For erecting a stone wall 250 feet long, 12 feet high, and 6 feet thick, for the protection of the rifle works.....		1,874
For building a shop for browning gun barrels, of brick, 20 feet by 22 feet, two stories high.....		1,114
For erecting a tilt-hammer shop, of stone, 35 feet long, 20 feet wide, and 15 feet high, and machinery for the same.....		2,995
For erecting a workshop for jobbers, of brick, 25 feet long, 22 feet wide, and 20 feet high.....		1,538
For erecting a jobbing shop for smiths and spring-makers, 25 feet by 25 feet, of brick.....		1,048
			8,569
			<u>1,091,183</u>

Recapitulation.

For the national armories.....	\$360,000
For the armament of fortifications.....	200,000
For the current expenses of the ordnance service.....	123,975
For the arsenals.....	373,429
For the purchase of percussion cannon locks.....	15,000
For the manufacture of elevating machines for barbette and casemate carriages.....	8,250
For the manufacture of sponges for field and battering cannon.....	1,960
For the rifle factory at Harper's Ferry armory.....	8,569
	<u>1,091,183</u>

NOTES.

A.—The sum of \$360,000, herein estimated for the national armories, is the same in amount as has been appropriated for those establishments since 1822, except for the years 1835 and 1836, when the amount appropriated was only \$330,000 for each of those years; the additional sum of \$30,000 estimated for, beyond what was appropriated for the years 1835 and 1836, being generally required by the interests of the public service, and partly in consequence of the rise of wages, and the necessity of procuring new tools at both the armories.

B.—In a report from this office, of the 8th of March last, in answer to a resolution of the Senate, \$17,840,249 was stated to be required to arm completely and supply with munitions all the fortifications then finished, progressing, or in contemplation by the board of engineers; but the armament of the forts and batteries more immediately required for the defence of the Atlantic frontier will require, it is estimated, about \$3,000,000.

By these statements, the sum of \$200,000, inserted in the estimate, is presumed to be small; yet, for want of officers, a greater sum could not be advantageously expended during the year 1837.

C.—The sum of \$123,975 has been inserted for the current expenses of the ordnance service, being about \$48,000 more than was appropriated for this branch for the year 1836; this increase being required principally in consequence of the necessity of repairing a large quantity of small arms, which have sustained injury by the troops serving in the campaigns against the Indians, and for the purchase of a supply of laboratory paper.

D.—The erection of the timber and gun-carriage sheds is deemed indispensable for the preservation of the carriages and timber.

The construction of three cisterns to contain water is considered essentially necessary, as a measure of security against accident from fire. The sum of \$2,048 has been embraced for the completion of the connecting walls at the arsenal, according to the original design.

The inequalities of the ground included within the buildings to be constructed require cutting down and filling with earth drawn from a distance. Roadways are also necessary in front of the buildings; and, from the nature of the slope of the grounds, a covered drain and cesspools will be necessary.

The most of the machinery is now on hand at this arsenal; the sum of \$2,640 has therefore been embraced in this estimate for having it fitted up ready for use. The magazine is situated about three-fourths of a mile below the arsenal, and within one hundred and fifty yards of the public road; and the country around it is yet entirely uncultivated, and considered insecure from prairie fires, or wilful design, being remote from the arsenal. The sum of \$1,200 has therefore been embraced in the estimate for its protection. The necessity for enclosing the grounds at the post is daily becoming more apparent. The

fence now enclosing the arsenal tract on three sides is of posts and palings, and has been so long up, that, from decay, it requires continually to be repaired; besides which, it affords no security to some of the buildings.

E.—The sum of \$28,812 was appropriated, at the last session of Congress, for erecting a permanent brick wall to enclose all the public buildings at the arsenal; but, in consequence of the great rise in the price of materials and labor, this amount is found inadequate. The officer in charge of this work reports that lime, for instance, is double the price that it was when the last estimate was prepared. Labor has also increased fifty per cent., and mechanics' wages thirty-three per cent. The sum of \$10,000 has therefore been inserted in this estimate for completing the wall. The other sums inserted in this estimate are deemed necessary towards the completion of the work, according to the original design.

F.—The officer in charge of this post has estimated the sum of \$89,246 for the completion of the public works at Chattanooga, in order that the intention of the act approved April 5, 1832, be carried into effect as early as practicable. The sum of \$70,000 only has been embraced in this estimate for the expenditure during the ensuing year, which amount it is considered will be sufficient for that period.

G.—The officer in charge of this arsenal estimates the sum of \$17,000 as necessary to be expended in the year 1837 for the completion of the work according to the original design, and in order to fulfil the intention of the fifth section of the act, No. 152, approved 28th June, 1832.

H.—The items under this head are deemed sufficiently explanatory.

I.—An appropriation of \$3,000 was made at the last session of Congress for the purchase of the water right, and for the expenses of conducting water to the arsenal. This amount has proved insufficient, in consequence of the sum of \$2,000 having been paid for the purchase of the former. The sum of \$3,000 has therefore been embraced in this estimate for the completion of this object.

The grading of the streets in the borough of Lawrenceville renders necessary the work for which this estimate is made; and, when the grading shall be completed, the continuation of the gutters will be indispensable.

There are no rooms suitable for the fire engines; and the building of two small houses to contain them is deemed necessary. The coping on the buildings and connecting walls requires to be jointed, so as to prevent the water from getting through; and, as these joints will take about one hundred feet, that quantity of new coping will have to be added. This is a very necessary repair.

K.—A partial appropriation was made at the last session of Congress for the construction of a brick wall and coping on the eastern boundary of the public lands at this post. It is proposed to extend the same kind of enclosure, so as to embrace all the ground occupied at this arsenal. For this purpose the sum of \$9,500 has been embraced in this estimate.

L.—In regard to the sea wall, and filling up the flats and marsh, it is observed that, by the proposed improvement, at least four acres will be reclaimed, which will be invaluable, both on account of the limited space belonging to the United States and the health of the place. This estimate is based on actual measurement, and is believed to be as low as it can be done for. The expense is, however, trifling, in comparison to the benefit that will arise from prosecuting this desirable object. Besides, the work is commenced, and will be lost if this improvement is not completed.

A partial appropriation was made at the last session of Congress for the purchase of a site and cost of construction of a new magazine and keeper's house, near the arsenal. The sum of \$10,000 has been inserted in this estimate for the completion of these objects.

M.—The wharves are continually filling up; and, as one is indispensable for the use of the arsenal, it is requisite to extend the one now in use twenty feet, to allow a vessel to come alongside. To effect this object, and to make some repairs to the wharf, the sum of \$600 has been embraced in this estimate.

Several of the buildings are getting out of repair, and it would be true economy to repair them before their defects become more serious.

As the steam-engine recently procured affords sufficient power, it is proposed to procure additional machinery for the use of this post, as a large portion of the work can be performed more economically with machinery than is at present done by hand, and will greatly facilitate the operations conducting at this arsenal.

N.—This wall has, in consequence of the length of time it has been built and the severity of the last two seasons, been thrown down, or started in several places. The wall proposed to be built is estimated to be of sufficient strength and durability to withstand the pressure of the earth against it and the effects of rain and frost.

The cellars are required for storage of many articles, and are frequently inundated in consequence of the want of capacity in the sewers and drains to carry off the water. It is proposed to enlarge the drains and sewers, as well as to make new floors to the cellars and some of the workshops. To effect these objects, and to repaint some of the buildings for their preservation, the sum of \$2,160 has been embraced in this estimate.

O.—The officer in charge of this work has estimated that the sum of \$2,337 is required for its completion, in consequence of the great increase in the price of materials, &c., since the estimate for the year 1836 was prepared.

P.—The carpenters' shop at this post is too narrow and contracted for heavy work, or for the accommodation of three or four workmen in the lower story, the upper one only being suited for lighter kind of work. It is proposed to build the new shop in the immediate vicinity of the new forging shop, so that power from a steam-engine may be communicated to both shops with as little loss as possible. The great facilities to be obtained in many of the operations conducting at this post by the application of steam power over that of manual labor justify the expenditure asked for the purchase of a steam-engine, with forges, bellows, &c.

By the report of the officer in charge of this post it appears that the gutters to some of the buildings require altering, and several of the roofs need repairs for their preservation. The sum of \$1,800 has been inserted in this estimate to effect these objects.

The officers' quarters at this arsenal being small, and the rooms in consequence contracted and inconvenient, this item is found necessary to enlarge them. As many of the buildings are surrounded by the outer fence of the public grounds, and no sentinels being stationed at the gates, it is proposed to erect a small house near it, to be occupied by one of the enlisted men for the security of the post.

Q.—An appropriation was made at the last session of Congress towards constructing a permanent stone wall around the land at this post. The sum of \$22,377 has been inserted in this estimate for its completion.

The enlargement of the Erie canal, which traverses the public ground at this post, renders a new bridge necessary; and the public convenience requires a change of its position, in order to a more direct communication between the water and other shops and timber sheds. The works erected on the banks of the canal this year have been planned with a view to this bridge. The road is rendered necessary by the same causes as above and the increased height of the proposed new bridge, and is indispensable for communication as above. The sum of \$1,705 has been inserted for completing the grading of the public grounds around the shops, which will greatly increase the convenience of out-door work and of access.

The present forging shop has been found entirely inadequate to the operations of the post, even with the temporary sheds in the field; an increase is necessary to enable this department of the work to perform its part.

The sum of \$670 has been inserted for a thorough repair of the south gun-house, which is deemed necessary for its preservation. The sum of \$3,086 has been embraced for procuring some additional machinery, which it appears will be required for conducting the various operations at the post during the ensuing year.

R.—The arsenal lot is at present enclosed by a common fence, which is in a very dilapidated condition, though erected only seven or eight years since. A high and permanent enclosure is therefore deemed necessary for the security of the public property at this post. A heavy coping on such a wall as it is proposed to erect here is considered indispensably necessary; without such a finish, it is believed the wall would be destroyed in a few years.

A river wall, connecting the north and south walls, is required to complete the enclosures around the lot. This should be seven or eight feet thick at the base, to give it sufficient strength to support the bank in its rear and to resist the action of the frost and the action of the river during high freshets. The north line of the proposed wall must necessarily cross a deep ravine, which should be filled up to the height of about fifteen feet; and the trenches for the foundation of the wall on the north and south side and east end must be excavated to the depth of at least three feet below the surface of the ground to be secured against the frost. The ascent from the wharf to the arsenal, magazine, &c., by the present route is very precipitous and difficult; by changing its location, the ascent can be made much more gradual and easy, and will be in every respect an improvement to the post. The ridge on the north side, and the one running through the middle of the lot, should be cut down, and the north and south ravines filled up, to render the land available for building purposes, and to facilitate the transaction of the business of the post.

Culverts (in the ravines to be filled up) are required, to receive the water running from the upper end of the lot, and prevent the washing of the grounds. An office is required, none having been built at the post, and there being no suitable rooms that can be appropriated for that purpose.

The building designed for a stable is entirely too small to accommodate the public teams. It can readily be converted into a dwelling; and additional quarters for the accommodation of the mechanics are much wanted.

The officer in charge of this arsenal being much absent from the post in the inspection of cannon, the arsenal, and all the work progressing there, is thus, for the want of officers, unavoidably left in charge of a sergeant.

S.—Under the act approved June 14, 1836, to establish an arsenal of construction in the State of North Carolina, the sum of \$45,000 was appropriated towards the purchase of a site and its erection. The site has been purchased, and arrangements are making for procuring the requisite materials this fall, in order that the intention of the act may be carried into effect as early as practicable. The whole sum will probably be expended in the spring.

It was not until recently that an officer could be assigned to this duty, the delay having arisen in consequence of the difficulty of obtaining officers for the transaction of the business of the department.

T.—The appropriation made at the last session of Congress for the accomplishment of these objects has been found insufficient, in consequence not only of the great increase in wages and the price of materials, but, in some measure also, in consequence of the appropriation being inadequate. The sum of \$11,432 has therefore been inserted in this estimate for the completion of the magazine and quarters for the mechanics at the post.

This work has been unavoidably delayed by the great amount of business transacting by Captain Newton, his sickness, and the want of an officer to assist him.

U.—The percussion locks, sponges, and machines for pointing and elevating cannon, are obviously indispensable to the proper and efficient working of the batteries. These are but a small portion of what will be necessary, and are intended to make a few batteries along the sea-coast complete for service.

V.—The sum of \$1,874 has been embraced for the erection of a stone wall, for the protection from freshets on the Shenandoah river, at the rifle factory. This wall is represented to be of great importance, in order to prevent the destruction of much valuable property at those works. The building of a shop for browning barrels is much needed, as that at present used is decayed, and is situated at an inconvenient distance from the rifle factory. The erecting of a tilt-hammer shop, and procuring the requisite machinery for the same, is represented to be essentially necessary. The machinery for welding gun barrels executes the work much better and at much less expense than working by hand, besides, the machinery can be advantageously applied in the fabrication of some of the component parts of small arms.

In consequence of the present crowded state of the shops in which the rifles and carbines are stocked, it becomes expedient to erect two small additional shops for the use of the jobbers and spring-makers; to effect which, the sum of \$2,568 has been embraced in this estimate.

GEO. BOMFORD, *Colonel of Ordnance.*

ORDNANCE OFFICE, *Washington, November 16, 1836.*

No. 705.

[2D SESSION.]

ON THE EXPEDIENCY OF PROVIDING FOR CARRYING INTO EFFECT THE RESOLUTION OF CONGRESS OF JUNE 17, 1777, FOR THE ERECTION OF A MONUMENT TO THE MEMORY OF GENERAL DAVID WOOSTER, OF THE REVOLUTION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 23, 1836.

Mr. COLES, from the Committee on Military Affairs, to whom was referred the memorial of citizens of Connecticut, praying Congress to carry into effect resolutions passed on the 17th day of June, 1777, to erect a monument to the memory of General Wooster, reported :

That the said resolutions, taken from the Journals of Congress, vol. 2, page 168, are in these words :
 "Resolved, That a monument be erected to the memory of General Wooster, with the following inscription : In honor of David Wooster, brigadier general in the army of the United States. In defending the liberties of America, and bravely repelling an inroad of the British forces to Danbury, in Connecticut, he received a mortal wound on the 27th day of April, 1777, and died on the 2d of May following. The Congress of the United States, as an acknowledgment of his merit and services, have caused this monument to be erected.

"Resolved, That the executive of the State of Connecticut be requested to carry the foregoing resolution into execution, and that five hundred dollars be allowed for that purpose."

Your committee are satisfied that the monument to the memory of General Wooster has not been erected, and that no money has been paid from the treasury of the United States for that purpose.

They are of opinion that the resolutions above recited contain a pledge of the national faith, the fulfilment of which is due alike to the honor of the illustrious body by which those resolutions were passed, and to the memory of the distinguished general officer whose life was sacrificed on the altar of his country.

[2D SESSION.]

EXPLANATIONS OF THE ESTIMATES FOR FORTIFICATIONS FOR THE YEAR 1837.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 30, 1836.

WAR DEPARTMENT, *December 28, 1836.*

SIR: The accompanying report of the chief engineer contains explanations in reference to the estimates for fortifications, as requested in your letter of the 24th instant.

General Gratiot will endeavor to see you also, and give you such further explanations as you may desire.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Hon. C. C. CAMBRELENG, *Chairman Committee of Ways and Means, H. R.*

ENGINEER DEPARTMENT, *Washington, December 28, 1836.*

SIR: In compliance with your instructions, I have the honor to offer the following explanations in relation to the estimates for fortifications submitted by this department for the year 1837, and to which the honorable chairman of the Committee of Ways and Means of the House of Representatives draws your attention in his note of the 24th instant.

The causes which conduced to the limited expenditures during this year on the several fortifications are fully explained in my report to you of the 30th ultimo, to which I beg leave to refer for more detailed information touching each locality. As regards the large estimates made for some of the works for 1837, those situated north of the 37th degree, being located in sections of the country populous and abounding in operatives and materials of every description, can be pushed to any extent which may be required, or the means within the disposal of the Executive will permit, during the next season of operations, the commencement of which dates from the return of the mild weather. The estimates were framed, therefore, with the intention of forwarding the works during the next year to the utmost these resources would allow, and thereby regaining in part the time lost by the failure of the appropriations for 1835, and the passage of those for 1836 at too late a period to be advantageously applied.

The sums asked are deemed not larger than can be profitably expended during the year on each of the objects to which they respectively refer.

The works south of the 37th degree are carried on to most advantage during the autumn, winter, and spring, which will account for the large amount of the appropriation for these remaining unexpended, as operations were either not commenced, or but partially so, on the last day of September; since then, however, some of these balances, as well as those for all the works, have been greatly diminished, as will be shown below.

Only \$50,000 of the \$100,000 asked for Fort Calhoun will be applied to the construction of the fort; the remainder being intended for a permanent wharf—an indispensable appendage to the erection of the work—which cannot be delayed to a later period.

The unexpended balance of the last appropriation for Fort Pulaski, Georgia, is now being applied, and by the end of March next, it is believed, will be nearly or entirely exhausted. The sum asked for this work—\$229,000—embraces the operations for two years—viz: from the 1st of April next to the middle of July, and again from the middle of October to the middle of July, 1838; before which time it is not probable that the appropriation for that year would become available, and the whole working season would thereby be lost.

The estimates submitted for a fort on Foster's Bank and Fort Jackson are required for the completion of both, as explained in my report of the 30th November, to which I beg leave again to refer.

The item for incidental expenses is intended for the various purposes of repairs and enlargement of sites, when the same may be necessary, as signified in the words of the estimate, and is deemed an essential fund for the preservation of our fortifications, which would be subjected to much injury if the power of making early repairs, by means of this fund, were denied to the Executive.

The item for contingencies will be applied in making such examinations as may be ordered either by act or resolution of Congress or by the Executive.

The balances which remain in the treasury at this time for the several objects embraced in the estimates are:

For Fort Warren.....	\$140, 000 00
For Fort Independence.....	91, 500 00
For Fort Adams.....	65, 000 00
For Fort Schuyler.....	180, 000 00
For Fort Delaware.....	73, 380 00
For Fort McHenry.....	22, 140 00
For Fort Calhoun.....	99, 100 00
For Fort Pulaski.....	76, 500 00

The estimates for the first quarter of 1837 for only two of the works have as yet been received—viz: for Fort Adams, amounting to \$30,000, and for Fort Pulaski of \$61,000; so that the probable balance which will remain in the treasury on recommencing operations in the spring will be, on account of Fort Adams, 35,000, and on account of Fort Pulaski, \$15,500.

The balances on account of the other works will be probably reduced in a similar ratio.

I have the honor to be, sir, very respectfully, your most obedient servant,

C. GRATIOT.

Hon. B. F. BUTLER, *Secretary of War ad interim.*

[2D SESSION.]

APPLICATION OF CITIZENS OF CLINTON AND ESSEX COUNTIES, IN NEW YORK, FOR THE CONSTRUCTION OF A MILITARY ROAD FROM PLATTSBURG TO WHITEHALL, IN THAT STATE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 30, 1836.

To the honorable the Senate and House of Representatives of the United States in Congress assembled :

The undersigned, inhabitants of the counties of Clinton and Essex, residing along and contiguous to the margin of Lake Champlain, in the State of New York, beg leave respectfully to represent to your honorable bodies: That your petitioners have seen, with lively interest and approbation, a notice of a petition to your honorable bodies by the citizens of Washington county, of said State, praying that appro-

priations may be granted to improve the navigation of Lake Champlain, to erect a light-house on Crown Point, and to construct breakwaters near the harbors of Port Kent and Plattsburg.

In addition to these highly necessary and beneficial public improvements, your petitioners would respectfully recommend to your honorable bodies the construction of a military or national public road, from Whitehall, in the county of Washington, to Plattsburg, in the county of Clinton, along the margin of said lake. The advantages of such a work, both to our State and nation, are most obviously vast and numerous; among which your petitioners would suggest the following:

The consummation of the contemplated work would form a connecting link in the great and extended chain of internal improvement and public transportation, already completed and in a state of forwardness, between the cities of Boston and New York, and the extended northern and western frontiers. When it is considered that, in addition to the facilities of water transportation by means of the Hudson and northern canal to Whitehall, during the season of navigation, it forms the junction of the Albany and Troy, as also the great eastern railroads; and that a road, at the public expense, has been constructed from Plattsburg, west, through the counties of Clinton and Franklin, thereby affording a cheap and speedy communication between that point and Ogdensburg, on the St. Lawrence; and when it is considered that for more than six months in the year these necessary and extended lines of public transportation are, by the closing of the navigation, interrupted and rendered useless for want of the proposed connecting link, none will doubt, it is believed, the expediency of its immediate accomplishment. This would afford a safe, cheap, and speedy communication, at any season of the year, "in peace or in war," between our commercial cities and seaports and Plattsburg—an important military post, as experience has taught us—and thence along the whole range of western frontier. The delay, difficulty, and vast expense of transporting troops and ordnance, during the last war, from Whitehall to Plattsburg, over a circuitous and rough road in the State of Vermont, and the difficulties attending the crossing of Lake Champlain at safe and convenient points, may with justice and force be adverted to in aid of the prayer of your petitioners. But your petitioners will forbear to recount the numerous and valuable advantages to be derived, both in a public and private point of view, and will briefly disclose the obstacles which have hitherto and still do present themselves to the accomplishment of the work in question by private or individual enterprise.

Though the route through which the proposed road is designed to pass is mostly over a level and cultivated country, and where the owners and occupants of the soil are able and willing to make and keep in repair a tolerably good road through their respective possessions and towns, yet from the southern part of the county of Essex to the village of Whitehall, a distance of about thirty miles, the country, along the only practicable route for a road is mostly uninhabited, owing to the unevenness and unproductiveness of the soil. The United States mail is now carried thrice a week over the proposed route; but during the cold season of the year, from Whitehall to Putnam, a distance of about twenty miles, it is transported on the ice in a one-horse sleigh, or on horseback, or by the carrier on foot; and during the season of navigation it is transported between those points partly by water, in a small boat or canoe, and partly by land, on horseback, or by the carrier on foot; whereas the contemplated road would insure the transportation of the United States mail in covered carriages, in a secure, cheap, and expeditious manner; affording, as it most surely would, profitable employment for a line of daily stages to ply between Whitehall and Plattsburg.

Your petitioners, therefore, earnestly solicit your honorable bodies to grant the prayer of their petition.

[2D SESSION.]

AMOUNT OF APPROPRIATIONS NECESSARY TO COMPLETE CERTAIN MILITARY ROADS.

COMMUNICATED TO THE SENATE JANUARY 2, 1837.

IN THE SENATE OF THE UNITED STATES, *January 2, 1837.*

Mr. HENDRICKS, from the Committee on Roads and Canals, submitted the following documents in relation to Senate bill No. 87, "making appropriations to complete certain military roads in the State of Arkansas:"

QUARTERMASTER GENERAL'S OFFICE, *Washington City, December 31, 1836.*

SIR: In compliance with your request, I herewith furnish you with a copy of Lieutenant Collins's estimate of funds for the completion of certain roads in Arkansas, which was forwarded to this office by him on the 5th of December, 1835.

I am, sir, respectfully, your obedient servant,

T. GROSS, *Major, Acting Quartermaster General.*

HON. A. H. SEVIER, *United States Senate.*

Estimate of funds required to complete roads in Arkansas.

For the road from Little Rock to St. Francis river, in the direction of Memphis.....	\$30,000 00
From Fort Smith to Jackson.....	25,000 00
From Strong's to Batesville.....	35,000 00
From Helena to the mouth of Cache.....	10,000 00
From Little Rock to Chicot.....	20,000 00
From Missouri line to Red river, (Fulton).....	20,000 00

[2D SESSION.]

APPLICATION OF THE LEGISLATURE OF KENTUCKY FOR THE PAYMENT OF THE MILITIA OF THAT STATE CALLED OUT ON THE REQUISITION OF GENERAL EDMUND P. GAINES IN 1836.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1837.

PREAMBLE AND RESOLUTION in relation to the troops raised under the proclamation of the governor of this State for Camp Sabine.

Whereas the lieutenant and acting governor of the State of Kentucky in July last issued his proclamation, under the requisition of General E. P. Gaines, of the United States army, calling upon the militia of this State for one thousand volunteers, to rendezvous at Frankfort, the seat of government, on the 17th of August, 1836, to march to Camp Sabine, the headquarters of General E. P. Gaines, to engage in the service of the United States, in protecting the southwestern frontier; and whereas the patriotic young men of the State promptly responded to the call, and prepared, at considerable expense, for the service, but orders were given by the executive for their discharge before they had commenced their march for Camp Sabine: Therefore—

Be it resolved by the general assembly of the Commonwealth of Kentucky, That our senators in Congress be instructed, and our representatives from this State requested, to use their best exertions to procure the passage of a law by Congress to make suitable provisions for the payment of the troops thus called and received by the executive of this State for said service.

JNO. L. HELM, *Speaker of the House of Representatives.*
C. A. WICKLIFFÉ, *Speaker of the Senate.*

Approved December 16, 1836.

[2D SESSION.]

APPLICATION OF TENNESSEE THAT THE VOLUNTEERS OF THAT STATE BE PAID FOR EQUIPPING THEMSELVES FOR SERVICE TO THE UNITED STATES.

COMMUNICATED TO THE SENATE JANUARY 9, 1837.

Memorial of the General Assembly of the State of Tennessee to the Congress of the United States:

Your memorialists would respectfully represent that during the present year three several calls have been made upon the citizens of Tennessee, by the proclamation of their governor, to enter into the service of the United States as volunteers. The first and third of these calls were made under requisitions of Major General Edmund P. Gaines, and the second by that of the Secretary of War. Under every call more than twice the number actually required promptly enrolled, organized, and prepared themselves for the service. For the circumstances under which the several proclamations were issued, the number of their patriotic citizens who volunteered under them, and the manner in which they were disappointed and unexpectedly rejected, your memorialists would refer to the several communications made by Governor Cannon to them during their present session, with the accompanying documents herewith transmitted. The message of the 8th of October exhibits the numbers that volunteered, organized, and reported under the different calls, but many of the companies reported under every proclamation, and are, therefore, thrice counted. There were, however, a number of companies made up, but failed to report themselves to the executive, on account of understanding that the requisitions were filled, who incurred heavy expenses in equipping for the service. This class is not enumerated in the message, but is, in the opinion of your memorialists, entitled to the favorable consideration of Congress. It will be seen that many of the companies reported were mustered into service and immediately discharged; others were retained a short time in the service, and then ordered home or discharged.

Your memorialists would further represent that the said volunteers incurred considerable losses both of time and of money, and made many sacrifices in preparing and qualifying themselves for the efficient service of their country. Many of them gave up their crops, others lost their employments, others again entered into heavy responsibilities for those who were unable to supply themselves with horses, equipage, &c., and all have sustained considerable damage. Though there is no existing law of Congress providing for such cases, yet your memorialists will not allow themselves to doubt that Congress will, without hesitation, make special provision for the ample reward of such patriotic devotion to our common country, and such almost unexampled readiness to meet the dangers of war and climate at the call of their government, which has been in this instance evinced by our fellow-citizens. It need not be suggested to a Congress of the United States, that not only justice and equity, but the highest considerations of public policy, require that the spirit of patriotism which has been so signally displayed by the volunteers on this occasion should be fostered and encouraged. It would also be unnecessary to remind you that Tennesseeans have never been backward in encountering perils and braving every danger when required by their country. It will be seen, in this instance, that they were ready, nay, eager, to exchange the quiet and

comforts of home for the dangers and hardships of the campaign; to quit their own salubrious climate, where they were blessed with health and peace and plenty, and encounter all the hazards of throwing themselves upon a southern or western frontier, in that season of the year, too, when disease assumes its most malignant forms. It will also be remembered that there was nothing selfish in this movement, for they were not in any instances threatened by danger within their own borders, but it was to rescue their countrymen at a distance from the horrors of an Indian war, that they were so ready to sacrifice their means, desert their homes, and shed their best blood if necessary.

They would also bring to your view and consideration the disbursements made by the executive of their State, out of his own means, in defraying the necessary expenses of organizing and marching said troops in some instances, for in other and many cases they defrayed their own expenses. The executive staff were also engaged for a considerable time in their respective duties, and are entitled to compensation. But, for a full understanding of the extent and nature of their advancement and services, reference is here made to the message of the governor on that subject.

Your memorialists consider it only necessary to bring the cases of their volunteer constituents to your consideration. They ask nothing at your hands but a just and equitable remuneration for actual losses and sacrifices incurred in proposing to serve their country, under a reasonable expectation that they would be received, and that their services were required. Any method that the wisdom and justice of Congress may devise to answer this end, either by a certain number of months' extra *per diem* and commutation pay, or otherwise, will be satisfactory to them. They ask nothing in the name of bounty, and would accept no gratuity, but only demand a fair recompense for expenses and losses. This they feel assured the Congress of the United States will not deny them. They therefore submit the case with full confidence to the consideration of your honorable body.

EPHRAIM H. FOSTER, *Speaker of the House of Representatives.*
JONATHAN WEBSTER, *Speaker of the Senate.*

Adopted October 25, 1836.

24TH CONGRESS.]

No. 712.

[2D SESSION.]

ON THE PURCHASE OF THE PATENT RIGHT OF JOHN H. HALL TO HIS RIFLE, AND ON
MAKING PROVISION FOR HIS EMPLOYMENT FOR MAKING THE SAME.

COMMUNICATED TO THE SENATE JANUARY 14, 1837.

Mr. TIFTON, from the Committee on Military Affairs, to whom was referred the petition of John H. Hall, reported:

That on an examination into the case of the petitioner it appears his improvements in the construction of fire-arms, and particularly of the rifle, have been subjected to the test of a rigid and scientific comparison with other small arms used in the military service of the United States, by officers well qualified to form correct estimates of their relative efficiency in the public service; and that such comparison has resulted in the conviction, on their part, of the superior qualities of the rifle invented by the petitioner over the other arms in use; and it also appears that this arm has undergone the additional test of a long course of experiment and practical use in the hands of the appropriate corps of the army, in all which it has been found well suited to the purposes for which it was intended. These facts being established, and the invention being of a nature calculated, if not exclusively, certainly in a material degree, for the public service alone, and not likely, from any probable application to private use, to remunerate the individual for the cost and merit of its discovery, the committee deem it but just that a suitable pecuniary reward should be extended to him by the government on his relinquishing to the United States his patent right for this and other important discoveries in the fabrication of fire-arms which he has heretofore made, or which he may hereafter, for the space of twenty years, make in the construction of fire-arms, as proposed by him; and inasmuch as the services of the petitioner are found to be important in attending personally to the manufacture of arms at the public armories, it is deemed advisable to make suitable provision for his future employment.

In conformity with these views, the committee report a bill for the benefit of the petitioner, and submit the report made at the last session of Congress by the Military Committee of the House of Representatives, with the documents attached thereto, that the whole may be printed together, to present a full view of the subject.—(For this report and documents, see volume 6, Military Affairs, State Papers, No. 649, page 104.)

24TH CONGRESS.]

No. 713.

[2D SESSION.]

MEMORIAL OF CERTAIN NON-COMMISSIONED OFFICERS OF THE ARMY THAT PERSONS OF THEIR GRADES BE PROMOTED TO COMMISSIONS FOR FAITHFUL AND MERITORIOUS SERVICES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 16, 1837.

We, the undersigned non-commissioned officers in the American army and Americans by birth, respectfully represent to the honorable the Senate and House of Representatives of the United States of America, as soldiers of our native country and supporters of her institutions and laws, that the condition of the ranks of the army needs the fostering care and especial regard of your honorable bodies. While the commissioned officers of the army and navy have been petitioning, year after year, for relief and additions to their pay, the soldiers have remained perfectly quiet, in hopes some kind friend would bring up their cause next for your consideration; and believing the time now to have arrived for us to speak in our own behalf, we do so most respectfully.

The institution at West Point has for the last eighteen years furnished *all* the commissioned officers for the army, to the total exclusion of every enlisted soldier, no matter what his services, qualifications, or merit have been; which, in the opinion of the undersigned, is *contrary to the true spirit of the Constitution of our country, and in opposition to all our republican institutions*. When the patriotic soldier seriously reflects that being enlisted excludes him from preferment, and that not one of his grade can ever obtain promotion, either by acts of bravery or otherwise, and that most of his officers are men who know not the soldier's wants by actual experience, he naturally loses his ambition, and either becomes a miserable outcast, deserts, or quits the army in disgust. In fact, very few Americans will ever enter the service under such circumstances; and we attribute, in a great measure, the present abandoned and degraded condition of the American soldiery to no other cause, and are consequently led to believe that were a portion of the officers promoted from sergeants, the ranks of the army would in a few years be greatly improved, and a meritorious and faithful class of officers be added to the army.

We are not, however, among those who wish for a *total* annihilation of the Military Academy, for we believe the institution a good one; we only ask for an equal chance with the rest of our countrymen. We are personally acquainted with many officers now in service who rose from the ranks, and certainly they are no disgrace to the American army. Under the usages which have for a long time and do now govern the army there is no chance for the soldier—not even a vestige of hope that he can under any circumstances rise above the rank of a sergeant; he is doomed to serve out a servitude of years, despised and degraded by all his countrymen, notwithstanding his qualifications and merits may be of a superior kind. We therefore look upon those laws, usages, or regulations which totally exclude any class of Americans from the just reward of his merit alike prejudicial to the good of our country and the respectability of the army.

The pay of the higher grades of the non-commissioned officers should be increased so that they could live respectably with due economy, (a medium grade between the commissioned officers, non-commissioned officers, and privates, consisting of the sergeant majors, quartermaster sergeants, ordnance sergeants, and first sergeants of companies, should be established;) old faithful officers and soldiers should have the exclusive privilege of suttling for the troops, and every other encouragement given to those who risk their lives and property and spend the bloom and vigor of youth in the service of their country, consistent with the good and welfare of our republic.

Our position at present in the army forbids us entering fully into details to elucidate all we wish to say; but feeling assured that our motives will be duly appreciated, we leave the conclusions and inferences to be drawn by the wisdom of Congress, and pray for an investigation of the subject which we seek to bring to your notice.

WILLIAM GILL, *late Ordnance Sergeant, Fort Moultrie, South Carolina.*

No. 714.

[2D SESSION.]

ON THE NECESSITY FOR AN IMPROVED ORGANIZATION OF THE QUARTERMASTER GENERAL'S DEPARTMENT.

COMMUNICATED TO THE SENATE JANUARY 20, 1837.

WAR DEPARTMENT, *January 18, 1837.*

SIR: I herewith transmit and respectfully commend to the favorable consideration of the Committee on Military Affairs of the Senate the accompanying communication from the acting quartermaster general, which clearly sets forth the necessity of "an improved organization of the quartermaster's department." I enclose also two sections, and beg leave to request their substitution in the place of that portion of Senate bill No. 5, reported with amendments on the 9th instant, which relates to the quartermaster's department, and which, on a consultation with Major Cross, I found defective in several particulars.

Very respectfully, your obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Hon. THOMAS H. BENTON, *Chairman of Committee on Military Affairs, Senate.*

QUARTERMASTER GENERAL'S OFFICE, *Washington, January 14, 1837.*

SIR: Having in my annual report stated only the general considerations which call for an improved organization of the quartermaster's department, I beg leave now to add a few suggestions somewhat more in detail for the information of the Committee on Military Affairs, to whom the subject has been referred.

The necessity for an increase of the number of officers is very urgent, as is clearly shown by the events of the past season, when various important works of improvement have been suspended for want of agents to conduct them.

Nor were these the only objects that have suffered. During most of the last year there has not been a disposable officer of the department to station at either of the posts to the north and east of this city, though it has been necessary to send important supplies from Baltimore, Philadelphia, and New York, for the southern campaigns.

In the whole of the northwestern region there has been but one officer of the department, (stationed at Detroit,) and in the west it became necessary, at the opening of the Creek campaign, to withdraw the quartermaster even from the important station of St. Louis, leaving but one officer, and he a junior assistant quartermaster, for all the western posts lying north of Arkansas. In fact, nearly the whole force of the department has been required for active service in the field, in connexion with the large bodies of troops which have been assembled in Florida, Alabama, Georgia, Tennessee, Louisiana, and Arkansas, while special agents, without experience, and not under bonds to the United States, have been necessarily employed to attend to important duties elsewhere, involving the expenditure of large sums of public money.

It is at all times productive of inconvenience to the service to withdraw experienced agents from their permanent stations; but it is especially so when those stations are the great sources from whence are to be derived the supplies destined to support the armies engaged in active operations in the field. Such, however, has been the state of things in many instances during the past season, and it cannot be avoided under existing circumstances with the present limited organization. I feel, therefore, fully

warranted in saying that the twelve additional officers proposed will be barely enough to meet the present necessities of the service.

But much as the deficiency in the *number* of officers has been felt, the want of some *higher grades* to attend the armies in the field, to look to their supply and economy, and to take charge of remote districts and conduct the operations within them, has been still more embarrassing to the service.

It cannot reasonably be expected of an officer holding the very humble rank of major or captain to perform the high and important duties of chief quartermaster to an army of six or eight thousand men engaged in active operations, and composed for the most part of irregular troops, who are comparatively helpless. It is clear that, under such circumstances, nothing like system, order, or economy can be introduced or enforced; and that delays, confusion, and waste will be the necessary consequence. If he should possess the rare capacity required for such a task, he would still lack the authority necessary to enable him to do justice to his station, and which adequate rank alone can confer.

Serving, as the regular army usually does, with large bodies of militia and volunteers, the officers of the department almost invariably find themselves subordinate to the local quartermasters, and thus the chief direction of the most important operations frequently belongs, of right, to an officer wholly destitute of experience in the details of the service, and acting under no pecuniary responsibility to the United States. This striking defect would be corrected and many other advantages secured to the service by authorizing the two additional grades which have been suggested.

The necessity for higher grades in seasons of active operations is, indeed, manifest to all who have had the slightest experience. However able may be the general who shall undertake to conduct a campaign without experienced officers of the quartermaster's department, clothed with sufficient rank and authority to entitle them to direct and control its complicated operations, he will be more than fortunate if he is successful.

A general cannot enter into the perplexing details involved in the collection of supplies from remote points, the formation of depots, the organization of trains, and the various other objects dependent upon the quartermaster's department, without neglecting his higher and more appropriate functions as commander-in-chief—enough in themselves at all times to engross his undivided attention.

With every assemblage of troops deserving the name of an army, there should, beyond all doubt, be an assistant quartermaster general attached to the personal staff of the commanding general, charged with the direction of all the operations of the department; ready at all times to lay before the general correct information as to the state of the supplies in depot, as well as those in course of preparation, the means of transportation, the practicability of establishing new depots at advanced positions, and the time which would be required to do so—considerations on which all the movements of the army depend, and by which they must necessarily be governed.

Besides the advantages to be derived from the services of those higher grades in seasons of active operations, they would at other times be placed in charge of those districts which are too remote from the fountain of authority here either to be reached by a wholesome supervision or to depend upon instructions from hence to meet those cases of emergency which frequently arise, and which require prompt and decisive action.

New Orleans, St Louis, Detroit, and New York, are the four great central positions at which officers of rank at least equal to the grades proposed should be located. I have therefore suggested that number and no more; and of these two only are of the highest grade. They would ordinarily be charged with the disbursements at those great stations, far exceeding those at any other places, and quite too large either to be imposed upon or confided to a junior officer of humble rank and compensation; and having authority over all subordinate agents within their districts, they would be able to correct many abuses which are now, probably, never discovered, or if discovered, are allowed to pass unnoticed for want of adequate authority on the part of the officers to apply the proper remedy. Thus, economy would be promoted by the arrangement, and increased efficiency secured to the service.

I beg you to observe, sir, that, in proposing these additional grades for the quartermaster's department, I am not seeking to introduce anything new into the public service, but merely to revive offices which have existed heretofore under circumstances far less pressing than those of the present time.

The two assistant quartermaster generals proposed correspond precisely with the two quartermaster generals of division provided for by the act of the 24th of April, 1816, organizing the staff of the peace establishment of that date. Their duties certainly will not be less important, while their responsibilities will be much greater, resulting from the increased expenditures now made through the agency of the department for objects of improvement which were then unknown to the service. It is, therefore, but just and reasonable that their rank should be the same.

And so likewise with the two deputy quartermaster generals proposed. By the act of the 3d of March, 1799, that office was instituted, and clothed with the rank of lieutenant colonel. The duties now are certainly not less arduous and responsible than they were at that early day, and, in proposing a revival of the office to meet the wants of the service, the same rank may reasonably be asked for it.

As to the assistant quartermasters, they correspond so precisely with the former assistant deputy quartermaster generals that when they changed title in 1821 their official bonds were not even renewed; the rank of captain was then enjoyed by the latter grade, and would therefore seem to be due in justice to the former. As they are to relinquish their rank in the line of the army, it is necessary to provide distinct ranks for them in the staff, as well for the purpose of regulating their compensation as to establish uniformity in that respect among themselves, the want of which has occasioned inconvenience to the service.

I will only add, in conclusion, that if higher considerations did not call for the additional grades proposed, they might justly be deemed necessary to give something like form and symmetry to the organization of the department, and thus offer to its junior members a reasonable prospect of advancement. At present there is no intermediate grade between the brigadier general at its head and the majors, some of whom have served more than sixteen years in that capacity without any chance of promotion, while junior majors of the line have passed on to the grade of lieutenant colonel and colonel. In other departments of the staff a regular gradation is preserved, similar to that in the organization of regiments, and common justice demands that it should be so likewise in the quartermaster's department.

I have the honor to be, sir, your obedient servant,

T. CROSS, *Major, Acting Quartermaster General.*

HON. B. F. BUTLER, *Secretary of War ad interim, Washington.*

SECTION — *And be it further enacted,* That the President of the United States be, and he is hereby, authorized, by and with the advice and consent of the Senate, to add to the quartermaster's department not exceeding two assistant quartermaster generals, with the rank of colonel, two deputy quartermaster generals, with the rank of lieutenant colonel, and eight assistant quartermasters, with the rank of captain; that the assistant quartermasters now in service shall have the same rank as is provided by this act for those hereby authorized; and that the pay and emoluments of the officers of the quartermaster's department shall be the same as are allowed to officers of similar rank in the regiments of dragoons: *Provided,* That all appointments in the quartermaster's department shall be made from the army; and when officers taken for such appointments hold rank in the line, they shall thereupon relinquish said rank, and be separated from the line of the army; and that promotion in said department shall take place as in regiments and corps.

SECTION — *And be it further enacted,* That the quartermaster general be, and he is hereby, authorized from time to time to employ as many forage-masters and wagon-masters as he may deem necessary for the service, not exceeding twenty in the whole, who shall be entitled to receive each forty dollars per month, and three rations per day, and forage for one horse; and neither of whom shall be interested or concerned, directly or indirectly, in any wagon or other means of transport employed by the United States, nor in the purchase or sale of any property procured for or belonging to the United States, except as an agent for the United States.

24TH CONGRESS.]

No. 715.

[2D SESSION.]

APPLICATION OF ALABAMA THAT THE PAY OF THE MILITIA WHEN IN THE SERVICE OF THE UNITED STATES BE INCREASED.

COMMUNICATED TO THE SENATE JANUARY 21, 1837.

MEMORIAL of the senate and house of representatives of the State of Alabama, in general assembly convened, in favor of an increase of the pay of the militia when in actual service.

To the Senate and House of Representatives of the United States in Congress assembled:

Your memorialists respectfully represent unto your honorable bodies that their attention has been drawn to the subject of the compensation allowed by law to the citizen soldier when called into the service of the United States, and its inadequacy is so manifest in every point of view that they cannot, in justice to those they represent, omit bringing the subject directly before that authority who possess the exclusive power of applying the remedy. Whatever may be the opinion of your memorialists as regards the compensation of the regular soldiery, they must refrain from expressing their views, inasmuch as they feel that they have no immediate concern with that subject. No identity, however, in their judgment, exists with these cases. The consideration which should influence the action of Congress in the former will be found wholly inapplicable in the latter, particularly as relates to the privates of the regular army. In joining the service there is no holy zeal for *liberty*, nor impassioned love of country. They are known to take the bounty and to enter the army precisely as they would hire into any other employment. Indeed, many are believed to seek it as an asylum from hunger, want, and misery, entailed upon them by their hideous and ungovernable vices. Not so with the citizen soldier; he is not moved by the attraction of a paltry bounty, nor influenced by the hope of ultimate gain to himself. While pursuing the peaceful walks of private life, and engrossed and fettered by the various ties of his social relations, he is aroused by the call of his country to *arms!* At once he pauses in his avocations, hesitates not to sacrifice his private interests, however great, on the altar of the general good; bursts asunder the delicate bands that bind him to his home and to his family, and flies with the unconquerable spirit of a *freeman* to the tented field or untented wilderness. It is not expected or desired by your memorialists, or their constituents, that you will authorize a reimbursement of the collateral or incidental deprivations of the citizen soldier, nor, indeed, that you will provide *adequate* compensation for his actual loss of time and property, or necessary expenditures of private funds; but the present paltry pay is so grossly inadequate, even below the compensation allowed our soldiers during the last war with Great Britain, when our federal treasury was not only exhausted, but millions in default, that it does seem that wisdom, good policy, and even justice require that now our government treasury is running over, and inundating the whole land with the surplus revenue, at least a reasonable compensation—some slight solace for the emptied pockets of the sufferer—should be provided for those who, at the sound of their country's tocsin, forget self, in the view of danger to their fellow-citizens, tear themselves from all the comforts and endearments of home, and voluntarily repair where duty calls, in defence of the frontier from savage massacre, or the shores of their beloved country from foreign invasion: Therefore—

Be it resolved by the senate and house of representatives of the State of Alabama in general assembly convened, That our senators in Congress be instructed, and our representatives be requested, to use their best endeavors to obtain an increase by Congress of the pay now allowed to the militia when called into the service of the States of the Union to a sum more commensurate with their actual loss of time and their expenditure of private funds for their equipment and comfort.

And be it further resolved, That the governor transmit to each of our senators and representatives in Congress a copy of the foregoing memorial and resolution.

A. P. BAGBY, *Speaker of the House of Representatives.*
HUGH McVAY, *President of the Senate.*

Approved December 23, 1836.

C. C. CLAY.

TUSCALOOSA, January 6, 1836.

The above is a true copy.

T. B. TUNSTALL, *Secretary of State.*

No. 716.

2D SESSION.

ON THE OPERATIONS OF THE ARMY UNDER GOVERNOR R. K. CALL, IN FLORIDA, AND INSTRUCTIONS TO MAJOR GENERAL JESUP TO ASSUME THE COMMAND IN 1836.

COMMUNICATED TO THE SENATE JANUARY 23, 1837.

WAR DEPARTMENT, *January 20, 1837.*

SIR: Pursuant to the resolutions of the Senate of the 14th and 18th instant, I have the honor herewith to transmit copies of the correspondence called for therein.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

HON. MARTIN VAN BUREN, *President of the Senate.*

No 1.

WAR DEPARTMENT, *November 4, 1836.*

SIR: On the 29th ultimo a rumor reached this city, through the Charleston papers, that you had marched, with the troops under your immediate command, to the Withlacoochee, and there discovered the enemy in considerable force, and that, instead of crossing the river and attacking him, you had fallen back upon Fort Drane to obtain provisions. From the tenor of your last despatch, under date of October 10, in which you stated that Major Pierce had united with you the day before, making your force thirteen hundred and fifty strong, and bringing seven days' rations for the whole army; that with these supplies you intended marching to the Withlacoochee, in the hope of encountering the enemy in his strongholds, and that the depots at Volusia and at the mouth of the Withlacoochee would afford the means of replenishing your supplies, it was confidently hoped that this rumor would prove erroneous. It was, however, substantially confirmed by various communications received during the early part of the present week, which also gave us the additional intelligence that Colonel Lane, with the regulars and friendly Indians under his command, after marching from Tampa Bay to the Withlacoochee, had also retired to Fort Drane; that the Tennessee brigade, having sustained a serious loss in horses, and being destitute of forage, had been moved to Black creek; and that, in consequence of these untoward events, and for the want of horses, transportation, and supplies, your operations are likely to be suspended for several weeks. The mails since, though they have not brought us any communication from yourself, have furnished ample details as to all these events, which have been still further elucidated by the verbal statements of Lieutenant Mitchell, lately of your staff, who, it appears, had been despatched to this place and to Philadelphia on business connected with the replenishing of your supplies. That officer also reports that at the time of his departure you were suffering severely from sickness and fatigue.

In the meantime, the preparation of such orders from this department as the exigency of the case requires has been deferred, in the hope of receiving your official report; but the mail of the last night having failed to bring it, it is deemed indispensable to the public interest to take, without further delay, such measures as appear to be required by the facts within the knowledge of the department.

Although no definitive judgment has been formed as to the occurrences above referred to, I am yet instructed by the President to express to you his disappointment and surprise that you should have commenced the execution of a campaign of so much importance, and so long meditated, without first taking effectual measures to secure all needful supplies from the various depots which for several months have been subject to your orders; and, above all, that after approaching with so large a force within so short a distance of the enemy, and finding him apparently disposed to give battle, you should have retired without a more serious attempt to cross the river and to drive him from his position. This disappointment and regret are greatly increased by the consideration that these retrograde movements will probably have the effect to expose the frontiers to new invasions by marauding parties, and to encourage the Indians in their resistance; thereby increasing, beyond what might otherwise have been needed, the severity of the measures which will now be required to subdue them. It is due to these considerations, and also to the army and to yourself, that the circumstances connected with your late movements should be distinctly explained; and in case you shall not have transmitted a full report on the subject before the receipt of this communication, you will do so without delay. In the meantime, it is hoped that the army will soon be prepared to resume offensive operations; but as there is reason to fear that the state of your health will not allow you to finish the campaign with the promptitude and energy which the crisis demands, the President deems it expedient to relieve you from your command. By his direction I have, therefore, this day instructed Major General Jesup, if he shall not already have united with you, to do so at once, or to communicate with you on the subject without delay, and thereupon to assume the command of the army serving in Florida, which you will accordingly be pleased to transfer to him. A copy of the despatch to him is herewith transmitted to you, and the original is borne by the same messenger who will deliver you this communication.

Should General Jesup not be at your headquarters on the arrival of the messenger, you will take the earliest measures to despatch him to the place where you shall have the best reasons to suppose that officer will be found, with the utmost expedition; and in the meantime you will make all such dispositions as may be in your power for promoting the plan of the campaign prescribed in the instructions to General Jesup; and after he shall have relieved you, you will also be pleased to co-operate, so far as the state of your health and your other engagements may allow, in the execution of his duties.

I am, sir, very respectfully, your obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

His Excellency R. K. CALL, *Governor of Florida.*

No. 2.

WAR DEPARTMENT, *November 4, 1836.*

SIR: Before this commission reaches you, you will have become fully acquainted with the retrograde movements of Governor Call, and the other events connected therewith which have recently occurred in Florida. These circumstances have for a time suspended offensive operations; and from the feeble state of Governor Call's health it is to be feared that he will not be able to prosecute the campaign when resumed with that promptitude and energy which the crisis demands. The President has therefore determined to commit to you the command of the army serving in Florida, and the general direction of the war against the Seminoles.

You will, accordingly, on the receipt of this communication, should you then be at Governor Call's headquarters, and if not, so soon as you can reach there, or can communicate with him, assume the command of all the forces in the Territory.

The hostile Indians having been discovered in considerable force on the banks of the Withlacoochee, and it having been also ascertained that their principal camps and settlements are situated on the south side of that river, you will immediately make all suitable arrangements for a vigorous attack upon their strongholds, and for penetrating and occupying the whole country between the Withlacoochee and Tampa Bay. With a view to this end, you will first establish posts at or near the mouth of the Withlacoochee, at Fort King, and at Volusia; and you will take the proper measures for securing through them the safety of the frontier. You will, also, through the same posts, and by such means of transportation as may be most certain and economical, make permanent arrangements for procuring sufficient and regular supplies. So soon as those dispositions shall be completed, you will concentrate all your disposable forces and proceed without delay to cross the Withlacoochee, and to possess yourself of the positions now occupied by the Indians, attacking and routing them in their strongholds, and scouring the whole country between the Withlacoochee and Tampa Bay.

Should you succeed in bringing the Indians to a general engagement, and in defeating them therein, the ready submission of the tribe may probably be expected. If, however, they should abandon their present position on the Withlacoochee before you reach it, or you should drive them from it without entirely subduing them, you will then take such advanced positions to the south of Volusia, and to the east and south of Tampa Bay, as the nature of the country may admit, and push from them such further operations as may be necessary to the most speedy and effectual subjugation of the enemy.

The above direction to attack the enemy in his strongholds, and to possess yourself of the country between the Withlacoochee and Tampa Bay, you will regard as a positive order, to be executed at the earliest practicable moment. In other respects, you will exercise a sound discretion, and will adopt such measures as you may deem best calculated to protect the frontiers and to effect the subjugation and removal of the Indians.

Great confidence being reposed in your prudence, energy, and skill, it is deemed unnecessary to urge you to promptitude or activity, or to impress on you the importance of early and frequent communications.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Major General THOMAS S. JESUP, *United States Army, Florida.*

NOTE.—A postscript was added to the original letter to General Jesup acknowledging letters received from him after the preparation of the above, and enclosing a communication from the acting quartermaster general; but as it is believed that this postscript was not included in the copy sent to Governor Call, it is not now sent.

No. 3.

HEADQUARTERS, *Volusia, December 2, 1836.*

SIR: Your letter of the 4th ultimo was delivered to me by Lieutenant Johnston a few miles from this place on my approach, and I regret exceedingly that my ill health, and the many important official duties which have claimed my attention, should have compelled me to delay my answer until the present time.

I shall surrender most cheerfully to General Jesup the command of the army, in which the President has been pleased to supersede me, and have given Lieutenant Johnston every facility in my power to find the camp of that officer. I must be permitted to say that I regarded your letter as the most extraordinary document I have ever read.

It informed me of a rumor which had reached Washington very unfavorable to my conduct and military character. It reminds me of the means and supposed means I possessed of achieving a victory over the enemy; of the unwillingness of the department to credit the rumor, but that it had been *substantially confirmed by various communications received, &c., and further "elucidated" by the verbal statement of Lieutenant Mitchell, "late of my staff," &c.*

You proceed to state that "*no definitive judgment has been formed as to the circumstances above referred to,*" and that, *although no definitive judgment has been formed as to the occurrences above referred to,* you are yet instructed by the President to pronounce on me what every one must conceive to be the deepest censure, and to supersede me in the command of the army: thus inflicting the severest penalty and the highest disgrace in the power of the President to visit upon me were my guilt established by the most incontrovertible testimony. All this is done without waiting to receive my official report, which I am called on to make without delay.

Now, sir, should I be so fortunate as to show by a plain statement of facts, which can be supported by the oaths of hundreds of honorable men, that injustice has been done me, can injury be repaired? May I hope for that magnanimity which will acknowledge error and redress wrong? My official report of the incidents of the march to and from the Withlacoochee was made to the late Secretary of War, and forwarded from Fort Drane on the 19th of October last. It was made *while suffering under the most severe indisposition*, and does not do justice to many of the officers under my command or to myself. But I did

not feel culpable for anything that occurred, and therefore made no defence of my conduct. Lest it should not have been received by the department, a copy is herewith enclosed. Allow me to offer a remark on the evidence on which I have been condemned. As to the "rumor," it is intangible, and I shall say nothing about it; nor are the communications which you mention as having been received entitled, in my estimation, to higher credit, as they must have been destitute of truth. For Lieutenant Mitchell, who seems to have "elucidated" the whole matter, and whom you seem to have considered as a member of my staff, sent on to Washington and Philadelphia by me on business connected with the replenishing of my supplies, I must say, if he made such representations, he was truly unfortunate in communicating facts. For the want of an ordnance officer, so often complained of to the department by the officers in command in Florida, I appointed Mr. Mitchell to take charge of the ammunition in the same order in which my staff was announced to the army. He marched with us from Suwanee Old Town, and lived in the family of General Armstrong until a few days before our return from the Withlacoochee to Fort Drane, when he came into the mess with myself and staff. On our arrival at the latter place he applied for permission to go to Black creek, which was readily granted. He suggested that he might be of service in procuring and forwarding clothing and blankets, which I intended to order the quartermaster at Black creek to purchase for the friendly Indians, as it had been represented by their commander that they were in great want of those articles.

At Black creek I understood he applied to one of my aids, then at that place, for an order to proceed to Charleston and Philadelphia to make those purchases. This was done without my knowledge, and certainly very contrary to my intention, as I did not wish him to go further than Black creek. He has forwarded no clothing for the Indians, nor has he made any report of his proceedings. I have to request that this officer may be ordered without delay to join his company at Fort Clinch, on the Withlacoochee. As to his having been sent by me to replenish my supplies, the statement is erroneous.

The Indians were almost naked, and I felt it my duty to have them clothed on the requisition of their commander. I shall now proceed to answer the complaints or accusations which you were instructed by the President to prefer against me, in the order in which they are made; and, first, as it regards his "disappointment and surprise that I should have commenced the execution of a campaign of so much importance and so long meditated without first taking effectual measures to secure the necessary supplies." When I formed my plan of campaign, which was submitted to the department, Micanopy, but ten miles distant from Fort Drane, was held as a military post, and was relied on as one of the depots from whence supplies could be drawn for the use of the army while engaged in that quarter. Tampa Bay was another depot already established, and I proposed another near the mouth of the Withlacoochee, and one at this place. So soon as I was advised of the time when the Tennesseans would leave their cantonment in Alabama for Florida, I sent an express to Colonel Crane, commanding the forces in East Florida, to employ the whole transport train at Black creek in carrying supplies to Micanopy. In a few days after this I learned with surprise and embarrassment that Micanopy had been abandoned by that officer. This gave the enemy undisputed possession of the country forty miles further north. They were bravely met and fought on several occasions by Colonels Warren and Mills, of Florida, and Captain Tomkins, of the United States artillery; but they were too numerous for our forces, and I had not the means of driving them back and advancing other posts until I entered the country with the Tennessee brigade. In pursuance of my plan of campaign, abundant supplies of every kind were deposited at Black creek, and steamboats were in readiness with which provisions and forage could be conveyed to this place in twelve hours.

This is on the eastern margin of the peninsula. I was as fully prepared as the nature of the country would admit of, and as any general could have been at the opening of a campaign. On the western side of the peninsula I had only sufficient force to establish a depot at the Suwanee Old Town, where supplies were placed for the use of the army when advancing into the enemy's country. At St. Mark's ample stores of every kind were deposited, ready to be conveyed to the Withlacoochee whenever the army should advance to use and protect them. Before this it was impossible, with the means which I possessed, to establish that depot.

On the 19th day of September I marched with the Tennessee brigade from Tallahassee for Suwanee Old Town, where we arrived on the 24th. Before I left Tallahassee, in addition to the supplies at the Old Town, a large brig, loaded with an assorted cargo, had sailed from St. Mark's to the mouth of the Suwanee. Other vessels were known to be on their way from New Orleans with additional supplies; and the quartermaster was ordered to charter a still further number to carry the public stores from St. Mark's to the same destination. The steamboat *Minerva*, calculated from her draught of water to enter and ascend the Withlacoochee, then lying at Mount Vernon, on the Apalachicola, was chartered on the 17th of September to take in a cargo of forage and ammunition from one of General Jesup's depots on the Chattahoochee, and proceed to the mouth of the Suwanee, where she was by appointment to be on the 24th of September. The steamboats sent me by the government, under the command of naval officers, were already in the Suwanee river, where I found them on my arrival. One of these boats, the *Izard*, was ordered by Commodore Dallas to return to Pensacola; the other two required repairs, and their crews were prostrate by disease. I ordered the *Izard* to remain, and permitted the other two, neither of which could enter the Withlacoochee, to proceed to Pensacola for supplies and fresh crews, expecting them to return as soon as possible; but they have never yet returned to their station, nor am I informed in what manner they have been employed by Commodore Dallas. On the 29th day of September, General Read, of Florida, then at Suwanee Old Town, was selected, for his well-established intrepidity of character, his untiring perseverance, and his knowledge of the Withlacoochee, to take command of a detachment of Florida militia, and a small detachment of regular troops daily expected from Key West to arrive at the mouth of the Suwanee, and with the steamboat *Izard*, and two large barges, which of themselves were capable of carrying six hundred barrels of freight, to proceed to the mouth of the Suwanee, where it was supposed he would find the steamboat *Minerva* and several other vessels with supplies, and proceed at once with them all to the mouth of the Withlacoochee, only thirty-five miles distant, and to ascend the river with the steamboats and barges, and establish a depot at Graham's camp, about fifteen or twenty miles above the mouth.

Thus prepared, on the same day, the 29th of September, the army marched without a wagon train, carrying ten days' supply of provisions on their riding and pack horses, to attack the enemy at Fort Drane, which had been for some time abandoned by our troops. The night before an express was sent to Major Pierce, at Black creek, advising him of my intended movements, and directing him to advance without delay with his forces, and all the transport wagons with supplies for the army, relying on the large crops of corn

known to have been made at General Clinch's and McIntosh's plantations for forage for our horses. On the 1st day of October the army arrived at Fort Drane, and but for the escape of an Indian from a party we surprised and destroyed, about ten miles off, who gave intelligence of our approach, the whole Mickasucky tribe would have been surprised, and perhaps destroyed. We were greatly disappointed in finding no corn at either the plantation of General Clinch or McIntosh. Though large crops were made, it had all been destroyed by the Indians and cattle, which had free access to the fields.

We, however, found an abundance of sugar-cane, on which our horses were fed, and on which they were greatly improved. The express sent to Major Pierce did not, from some cause, arrive at Black creek by three days as early as it should have done. But expecting my orders to advance, his wagons were all loaded and in readiness, and in two hours after the arrival of the express, though it was late at night, his whole train was in motion, and he joined me on the evening of the 8th of October. I reported to the department that he brought me seven days' rations for the whole army. This was according to the report made to me at the time, but the estimate did not hold out, and many of the companies received but five days' rations. With this supply I resolved to follow the trail of the enemy in order to find his stronghold, in preference to taking the roads made by our armies in former marches; and as a further security against the necessity of being compelled to fall back for supplies in any contingency, I had ordered two steamboats and several schooners to be laden with forage and provisions, and to sail immediately up the St. John's river, and come to anchor in Lake George, there to await a signal from me to advance to Volusia, only six miles distant. These orders were promptly executed. The vessels ascended and took their stations, where they remained until they were ordered by the express boat to return to Black creek. The army marched on the evening of the 9th from Fort Drane. The trail of the enemy led us to his stronghold in the cove of the Withlacoochee. We arrived at this point on the morning of the 13th. That day was spent in attempting to cross the river without success. The next morning, the 14th, the army having less than two days' rations to subsist on, it became necessary to march to one of the depots for relief. I found the cove of the Withlacoochee so much lower down the river than I expected, and consequently so much further from Volusia, that I deemed it impossible for the army, without great distress, to reach the latter place, as it would require a march of six or seven days. I called a council of war to advise with the officers, and after hearing my views they were adopted, and it was almost unanimously determined that we should march to the depot ordered to be established on the Withlacoochee. We accordingly took up the line of march for that place.

Major Goff, of the Tennessee brigade, was sent with two hundred men in advance, to ascertain the situation of the depot; if he should not find it, to fire signal guns, with his whole command, until he received a response from General Read. He advanced to Graham's camp, the place directed for the depot. He remained there during the night of the 15th, the signal guns were fired on the evening preceding, and on that morning, without receiving a reply. Despairing of finding a depot or of hearing from General Read, the country being impassable by land to the mouth of the river, and having no boat to descend by water, he determined to retire, and sent an express to meet and inform me of the result of his examination. On the 16th the express met me about noon, ten or twelve miles from the point designated for the depot. The army was immediately halted; General Read had not been heard from since the 29th of September; the provisions of the army were almost entirely exhausted; relief must be had as soon as practicable, or extreme suffering was the inevitable consequence. The army could not reach Graham's camp, on the Withlacoochee, that night. If we advanced further, and spent two more days without finding relief, the consequences must have been fatal.

In this trying situation something must be done, and done quickly. After a few moments' consultation with General Armstrong and Major Pierce, I resolved to march to Fort Drane, where it was certain we could get beef for the army and sugar-cane for the horses. In this we were not disappointed. We reached Fort Drane the night of the 17th; an express was sent to Black creek to forward supplies, which met the army with great despatch, and relieved its necessities. I trust I have abundantly shown that, from the state of preparation, as early as the 29th of September I had every reason to expect that the depot ordered to be established at Graham's camp, on the Withlacoochee, would be completed by the 16th of October at least.

Let us now examine the causes which are known positively to have led to this disappointment and to my distressing embarrassment. Before the 5th day of October General Read was at the mouth of the Withlacoochee with an abundant supply of everything for the use of the army. He ordered the officer commanding the steamboat Izard to carefully examine the entrance into the mouth of the river; then to enter, and to ascend to the point designated for the depot. In this attempt the steamboat unfortunately, through mistake or accident, was thrown across the channel, which, being narrow, she grounded at the bow and stern at full tide, and when the water fell she broke in two from the weight of her engine and sunk. The destination of the steamboat Minerva having been changed by General Jesup, (certainly with no expectation that it would embarrass my movements in the smallest degree,) who ordered her, as I have been officially informed by her enterprising captain, to take at least one trip to the mouth of the Apalachicola with the Creek warriors before she took in a cargo on the Chattahoochee for the Withlacoochee. She was also ordered by Colonel Lane to make a second trip, in which she was greatly delayed by a fall of the Chattahoochee, and instead of arriving on the 24th of September, according to appointment, she did not make her appearance until the 22d day of October. In the meantime General Read, with his usual energy and untiring perseverance, proceeded to fortify a large barge, which he loaded with supplies, and was in the act of passing the bar to ascend and establish the depot at all hazards when the Minerva appeared in view. On that very day General Read, aided by that invaluable officer, Colonel Wood, a member of my staff, who had taken the temporary command of the Minerva for this expedition, succeeded in ascending the river and establishing the depot, where there has been an abundant supply of public stores ever since.

Now, sir, permit me to ask, is the accusation just, and can it be supported in truth, that I did commence "the execution of this important campaign without having first taken effectual measures to secure all the needful supplies?" I answer that it is not, and the charge cannot be supported, as is proven by the fact that the Minerva, on the first day of her arrival, succeeded in establishing the depot. That the steamboat Izard should have been lost may be attributed alone to the arrangement of the government in selecting naval officers to navigate steamboats in narrow channels and rivers who have been instructed only in navigating ships on the ocean. Had the Izard been navigated by one skilful from long practice in the management of steamboats, it is the opinion of General Read that there would have been no difficulty in ascending the stream.

It may be asked why I did not make known all these facts in my official report of the 19th October. I answer that many of them had not then transpired; others were then unknown to me. But had they all been communicated on that day, they could not have saved me, as the President was pleased to censure and supersede me in command of the army on rumor, without waiting for my official report. Having answered fully, as I conceive, the first ground of complaint alleged against me, I proceed to the second charge.

"That after approaching so near the enemy with so large a force, and finding him disposed, apparently, to give me battle, I should have retired without a more serious attempt to cross the river and drive him from his position." In answer to this charge, I say, and will maintain with facts, that the passage of the river with the means I possessed, and within the time in which our supplies required it to be done, was a rational impossibility, and could not have been accomplished by General Jackson himself. This fact was fully ascertained at the time, and has been further confirmed, to the satisfaction of the whole army, on our last visit to the cove.

I may not speak of myself, or my own desire to cross and give battle to the enemy. But I can assure the President that the brave Tennesseans, headed by their gallant leader, were impatient at every moment's delay in pursuing the enemy; and that they have never stopped at any barrier, however formidable, which could be overcome by hardy enterprise. When we arrived at the river on the morning of the 13th, General Armstrong and myself entered the swamp with the spies and advanced guard. We had been induced to believe the stream was fordable, and that a passage could be forced in the presence and under the fire of the enemy. Under this belief we resolved to make the attempt. The spies, through mistake, had preceded the guides, one of whom was a prisoner, captured the evening before. A halt was ordered, to give the guides time to advance to the front, and take the trail to the ford. I halted myself in view of the river, which was so wide, from its overflowing the banks, that I took it to be one of those lakes so frequently found in the swamps of this country. General Armstrong advanced with the guides to the head of the spies, and approached the supposed ford. The guides entered the river. Major Lauderdale, a gallant and veteran soldier, was close behind them. General Armstrong, than whom a braver man never lived, was the first person in advance, and at the water's edge; the two front horses were already swimming, when the Indians poured in a heavy volley from the opposite side of the river. Our advance retired, fortunately, without any loss or injury. The fire was returned with great spirit by the spies. General Armstrong rejoined me, and reported the river to be at least 200 yards wide, swimming from bank to bank, with driftwood passing rapidly down the current. I immediately ordered all the horsemen to retire from the swamp, satisfied with the impracticability of swimming the stream in the presence of the enemy. After reaching the open ground in the rear, Major Gordon most gallantly volunteered to lead his battalion on foot to give a further examination to the river, and to engage the enemy. He was authorized to do so, and he and his command advanced with great intrepidity to the bank of the stream, when they received the fire of the enemy, which was instantly returned, and continued until they were ordered to retire, having silenced the yells and nearly the firing of the enemy. As stated in my official report, the gallant Major Gordon and three of his brave followers were wounded in this affair. The report of Major Gordon and his officers confirmed the opinion I had at first formed, that the passage of the river on horseback was impossible. The next mode of crossing was by the construction of rafts. This was proposed. I have previously said that I marched from Suwanee Old Town with no other transportation than pack-horses; hence, we brought with us no other tools than a few axes. I called on Major Pierce, who informed me that he had no others than those required by the pioneers. We had not expected to meet such a barrier, and was therefore unprepared to overcome it. To construct rafts to land a sufficient number of men to meet a formidable body of Indians would have been the work of some time with the best preparation. With us it could not have been accomplished before the last ounce of provisions in our camp would have been consumed. Besides, there were no suitable materials to be found in the neighborhood for the construction of rafts. The pitch pine, it is well known, will sink almost as soon as lead; and the hard heavy wood of the swamp, except when it is found dead and dry, is but little more favorable.

I have had more than one occasion in the south to make the experiment, and know that it will not succeed. But admitting, for the sake of argument, that a sufficient number of rafts of the best materials could have been constructed in one hour to cross the whole army at a single trip, could its passage have been effected in the presence of the enemy without great slaughter? A raft could not have been carried over in less than ten or fifteen minutes, during which time the men would have been exposed to the deadly aim of a concealed enemy. It may be said that the rafts might have been built, and the men crossed over at some other point than that occupied by the enemy. But the falling of the trees, and the sound of the axes in procuring materials to construct the raft, would soon attract the attention of a vigilant enemy, and he would be prepared to meet you wherever you might attempt to cross, unless you went to some distant place. I assure you, sir, that the passage of this river at any point is exceedingly difficult, and almost impassable, without boats. I am aware that the President is of opinion that if we had passed into the cove we should have found an abundance of corn; but in this he is entirely mistaken. I examined the cove in person, and am well convinced that there could not have been five bushels of corn raised in it, nor was there any appearance of corn having been brought to it from any other place, which corroborates the statement of all the prisoners that they made no corn, and were living alone on beef. Even this article was generally unfit for use, and we destroyed hundreds of cattle which our hungry troops would not use.

Our subsequent difficulties in crossing the river, after the water had fallen four feet, proves it to have been impossible at the time the first attempt was made, as we still found it swimming in some places, and in all others deep fording, presenting a width of 220 yards, bordered on both sides with deep cypress swamps.

I have yet to speak of the stream flowing from the lake into the river, which the detachment of Tennessee troops, under the command of Lieutenant Colonel Gill, attempted to cross without success on the 13th day of October. This formed another barrier, and with the lake on the north, and the Withlacoochee on the south, constituted a defence equalled only by the cove itself. On our last visit to the Withlacoochee, supposing the passage into the cove would be obstinately defended by the enemy, the Tennessee brigade, with its usual gallantry, claimed the honor of forcing the passage. It was awarded to them; but while they were preparing to advance, a report from the friendly Indians sent to reconnoitre the banks informed me that four of their number had already crossed, and could find no recent sign of the enemy. On receiving this intelligence, General Armstrong, Colonel Trousdale, and the other

officers present, with the same spirit of chivalry which induced them to make the request, knowing it was my wish, in the first instance, that the regular troops and Creek warriors should be sent into the cove, declined the permission granted them, and asked permission to seek a new enterprise at the stream flowing from the lake and the towns beyond it, where Lieutenant Colonel Gill and his brave followers had fought so gallantly on the 13th of October. Accordingly, the Tennessee brigade was ordered to that point; they approached in the confident expectation of finding the enemy, then strongly posted and in large force. They were disappointed. They found no other impediment to their march but the stream itself, and the swamps and marshes with which it was bordered on both sides. The water had greatly subsided, but the stream was wide and deep, in some places still swimming, the banks boggy, and covered with a dense undergrowth.

The report of General Armstrong and all the officers of his brigade proves the impossibility of crossing, when the attempt was first made, on the 13th of October, and sustains the high character of Colonel Gill for his bearing and good conduct on that day. I have already, in my official report of the 27th ultimo, mentioned the destruction of the towns beyond this stream by the regiment under the command of Colonel Trousdale, accompanied by Major Barrow, the aid of General Armstrong, who gallantly volunteered his services on this occasion. I trust, sir, that the difficulties which presented themselves in the passage of the river, the want of means to overcome them, and the necessity which required that the army should march immediately to a depot for supplies, show sufficient and abundant reasons why I did not cross the river, and drive the enemy from his position. When I marched from the camp opposite the cove, my route was down the banks of the Withlacoochee, merely avoiding its swamps, which were impassable. I had, as I have shown, a right confidently to believe I should find supplies in a march of thirty-five or forty miles. I expected to cross one-half of the army in boats at that point, and in a few days march up on both sides, and attack the enemy. The idea of a "retrograde" movement had never been conceived by me or any officer of my command. I thought it best to march this short distance on the line of the enemy's barrier to a point where the pressing necessities of the army could be supplied, where a portion of it might be crossed over the river with its baggage without difficulty, and from whence the whole force could arrive at the cove in five days, attack, and route the enemy. I deemed this more judicious than to exhaust the last remnant of our supplies in a fruitless effort to cross the river, which, in our situation, was believed to be impossible. Yet this charge of making retrograde movements has been made by the Department of War, sustained by the high authority of the President of the United States, and constitutes the first sentence in the order to General Jesup, by which I am superseded. All this is done on "rumor," and before a "definite judgment has been formed" of my conduct. I believe the explanation I have given, and the proofs I am prepared to offer, will not only acquit but justify me in the opinions of all unprejudiced men; but the judge who condemns the prisoner on "rumor" unproved, and causes him to be executed before a "definitive" judgment is formed of his guilt, will seldom admit, on any testimony, however conclusive, that the unhappy man died innocent.

That I did not meet with supplies on the Withlacoochee, according to my expectations, I have and still consider one of the greatest misfortunes which could have befallen me, and has been a source of the deepest mortification.

But it was from no fault of mine, for I had prepared all the necessary means to insure success, and but for the circumstances which I have mentioned, which could not be anticipated by any one, the depot would have been established before the 5th of October. When, however, I failed in all these well-grounded expectations, what was next to be done? Should the army perish in the wilderness, or should it march in pursuit of food? I preferred the latter, and it was done.

The several complaints which you have mentioned against me, when taken collectively, amount to the charge of having made a retrograde movement before the enemy. This charge will be repelled by the united voice of the whole army which I have the honor to command, and I am prepared to meet it in such a manner as will satisfy my friends and country of the injustice which has been done me.

The apprehensions of the President for the safety of the frontier, supposed to have been exposed by what you have been pleased to denominate "my retrograde movements," were entirely unnecessary, and must have arisen from his want of information of my position at Fort Drane, and of the fact that the last scout of the enemy had been destroyed or driven across the Withlacoochee.

Since writing the above, I have the satisfaction to inform you that Major General Jesup has arrived at my camp, and on this day (4th of December) I shall surrender to him the command of the army in Florida. Feeling a deep interest in the prompt and successful termination of this troublesome war, I am highly gratified at being relieved in command by an officer of such distinguished merit. But I owe it to him, as my successor, to say that he may, and most probably will, meet with embarrassment and delays in the execution of his high trust which have not and cannot be anticipated by the government. He will find, as others have done, that the transportation of supplies into the interior, even now, when all the depots are established and well furnished, will be attended with the most serious embarrassment, and that, to keep an army constantly acting against the enemy, another force of equal size should be employed in constructing and garrisoning posts, and in protecting the transport train in its passage. Believing, sir, that I have sustained the deepest injury, and that I have been visited with the greatest injustice by the orders of the President, communicated in your letter of the 4th ultimo, I must avail myself of the common privilege of demanding an investigation of my conduct. I have therefore respectfully to request that a court of inquiry may be ordered to assemble to inquire into and report on all the official improprieties with which I am charged. In making this request I have no right, perhaps, to offer a suggestion with regard to the time or place when and where the court should assemble, but it is a duty I owe to myself to inform the department that, by the fatigue and exposure I have encountered in the prosecution of this campaign, during a continued stage of enfeebled health, I have contracted a disease of the lungs which would cause a visit to the north during the winter months to be attended with the most fatal consequences. It would, therefore, be to me a matter of vital importance that some other time or place should be selected. So soon as I shall have passed this ordeal I shall, with great pleasure, tender to the President of the United States my resignation as governor of the Territory of Florida.

I have the honor to be, most respectfully, your obedient servant,

R. K. GALL, *General Commanding, &c.*

Hon. B. F. BUTLER, *Acting Secretary of War, Washington*

No. 4.

(Copy of copy enclosed in No. 3.)

HEADQUARTERS, *Fort Drane, October 19, 1836.*

SIR: I had the honor, on the 9th instant, to inform you of my contemplated march to the Withlacoochee.

On the evening before my arrival Colonel Randall, the adjutant and inspector general, was ordered, with Major Upshan, of the Tennessee brigade, to advance with the spies under the command of Captains Lauderdale and Wilson, and the front guard, under command of Colonel Trousdale, and select an encampment about four miles from the river. In the performance of this duty they surprised a party of the enemy, killed ten warriors, and captured eleven women and children. But five of the warriors escaped, and several of them were traced for some distance by the blood. We learned from the prisoners that the stronghold of the enemy was immediately on the opposite side of the river, and not more than four miles distant, and that one of the principal negro towns was about three miles distant, situated between the Withlacoochee and a stream flowing into it from a large lake. The next morning I attempted to cross the river, but found it swollen by the heavy rains and out of its banks. The enemy was in possession of the opposite side, and gave us a volley as soon as we appeared, but without effect. Two hundred good marksmen, under the command of Major Gordon, were ordered to dismount and take possession of the bank of the river; this was done with great gallantry by all the officers and men engaged, and a partial fire ensued, which continued for some time, when, ascertaining the impracticability of swimming our horses under the fire of the enemy where the river was near two hundred yards wide, I caused the detachment to retire. In this fire Major Gordon was slightly wounded in the breast, and two of the privates were wounded, but not dangerously. The loss of the enemy was not ascertained, but supposed to be much greater than ours. On the same day Lieutenant Colonel Gill, of the Tennessee brigade, was despatched to attack the negro town above described. He was met at the stream, which constitutes the principal barrier of defence, by a body of negroes and Indians, who disputed his passage with great obstinacy for one hour and a half, when the enemy was driven from his position, as it is believed, with considerable loss; several were seen to fall, and one in particular, who was seen to fall from a tree. Our loss was three killed—our faithful Indian guide Billy, and privates McKinley and Daniel H. West, of the Tennessee brigade, and eight wounded, but, I am happy to say, none of them dangerously.

The stock of our provisions being nearly exhausted, we were compelled the next day to march to our supplies, having every confidence that the depot at the mouth of the Withlacoochee had been established, from which we were not more than thirty miles distant. We marched to that place for relief, but we were unable to penetrate the country to the mouth of the river; and on our arrival at the lowest practicable point, not hearing anything of the party ordered to establish the depot, I was compelled, most reluctantly, to fall back on this place. But for this disappointment I am confident the war might have been closed in ten days. As I had expected, Colonel Lane's regiment was operating near me on the river, and has this morning united with me. On his arrival at Tampa Bay he had a skirmish with the enemy within a few miles of the fort, in which he defeated and drove them at all points. The loss of the enemy was not ascertained; that of Colonel Lane was two regular soldiers wounded. On his march to the Withlacoochee, he again encountered the enemy on the lakes and swamps of the river. In his approach the men were sometimes up to the shoulders in water, and were compelled to carry the ammunition on their bayonets.

With all these disadvantages he continued to advance, and routed the enemy from his strong position. On this occasion he had one of his warriors wounded. What effect was produced on the enemy was not ascertained, as they fled so soon as the barrier was passed. I have ordered the mounted men to fall back on Black creek to forage horses, which have been without grain for more than twenty days. I shall remain here with Colonel Lane's command, and, while our horses are recruiting, will have a large quantity of provisions despatched here, and from this shall advance a post within cannon shot of the stronghold of the enemy on the Withlacoochee. This is a place of great strength, from the natural barrier it presents to every approach, and where, I learn from the prisoners, the women and children were concealed during the last winter and spring. I have despatched an officer to ascertain the situation of the depot at the mouth of the Withlacoochee, to enable me to open a communication by land or water. I hope in ten days to be able to take the field again, and that the war will be closed in a short time.

I have the honor to be, very respectfully, your obedient servant,

R. K. GALL, *General Commanding the Army of Florida.*

HON. SECRETARY OF WAR, *Washington.*

NOTE.—The original of the above has never been received by the department.

No. 5.

WAR DEPARTMENT, *December 30, 1836.*

SIR: I have this day had the honor to receive and to lay before the President your communication of the 2d instant, with the accompanying copy of a report addressed by you to the Secretary of War on the 19th October, the original of which has never reached the department; and as it has not been alluded to in any communication heretofore received from you, it was not until this day that the department had any intimation that such a report had been made.

The several topics embraced in your last communication will receive an early and deliberate consideration.

In the meantime I hasten to correct certain erroneous impressions which you appear to have imbibed, to the prejudice of an officer referred to in my letter of the 4th ultimo. Speaking of that communication, you observe: "It informed me of a rumor which had reached Washington very unfavorable to my conduct and military character. It reminds me of the means and supposed means I possessed of achieving a

victory over the enemy; of the unwillingness of the department to credit the rumor, but that it had been *substantially confirmed by various communications* received, and further 'elucidated' by the verbal statement of Lieutenant Mitchell, 'late of my staff,' &c. In a subsequent part of your communication you again allude to this officer, and make the following observations and statements: "As to the rumor, it is intangible, and I shall say nothing about it; nor are the communications which you mention as having been received entitled, in my estimation, to higher credit, as they must have been destitute of truth. For Lieutenant Mitchell, who seems to have 'elucidated' the whole matter, and whom you seem to have considered as a member of my staff, sent on to Washington and Philadelphia by me, on business connected with the replenishing of my supplies, I must say, if he made such representations, he was truly unfortunate in communicating facts. For the want of an ordnance officer, so often complained of to the department by the officers in command in Florida, I appointed Mr. Mitchell to take charge of the ammunition, in the same order my staff was announced to the army. He marched with us from Suwanee Old Town, and lived in the family of General Armstrong until a few days before our return from the Withlacoochee to Fort Drane, when he came into the mess with myself and staff. On our arrival at the latter place he applied for permission to go to Black creek, which was readily granted.

"He suggested that he might be of service in procuring and forwarding the clothing and blankets which I intended to order the quartermaster at Black creek to purchase for the friendly Indians, as it had been represented by their commander that they were in great want of those articles. At Black creek I understood he applied to one of my aides, then at this place, for an order to proceed to Charleston and Philadelphia to make those purchases. This was done without my knowledge, and certainly very contrary to my intention, as I did not wish him to go further than Black creek. He has forwarded no clothing for the Indians, nor has he made any report of his proceedings. I have to request that this officer may be ordered, without delay, to join his company at Fort Clinch, on the Withlacoochee. As to his having been sent by me to replenish my supplies, the statement is erroneous.

"The Indians were almost naked, and I felt it my duty to have them clothed, on the requisition of their commander."

That part of my letter of the 4th of November, referred to in the passages above quoted, is in the following words: "On the 29th ultimo a rumor reached this city, through the Charleston papers, that you had marched with the troops under your immediate command to the Withlacoochee, and there discovered the enemy in considerable force; and that, instead of crossing the river and attacking him, you had fallen back upon Fort Drane to obtain provisions.

"From the tenor of your last despatch, under date of October 10, in which you stated that Major Pierce had united with you the day before, making your force thirteen hundred and fifty strong, and bringing seven days' rations for the whole army; that, with these supplies, you intended marching to the Withlacoochee, in the hope of encountering the enemy in his strongholds; and that the depots at Volusia and at the mouth of the Withlacoochee would afford the means of replenishing your supplies, it was confidently hoped that this rumor would prove erroneous. It was, however, substantially confirmed by various communications received during the early part of the present week, which also gave us the additional intelligence that Colonel Lane, with the regulars and friendly Indians under his command, after marching from Tampa Bay to the Withlacoochee, had also retired to Fort Drane; that the Tennessee brigade, having sustained a serious loss in horses, and being destitute of forage, had been moved to Black creek; and that, in consequence of these untoward events, and for the want of horses, transportation, and supplies, your operations are likely to be suspended for several weeks.

"The mails since, though they have not brought us any communications from yourself, have furnished ample details as to all these events, which have been still further elucidated by the verbal statements of Lieutenant Mitchell, lately of your staff, who, it appears, had been despatched to this place and to Philadelphia on business connected with the replenishing of your supplies. That officer also reports that, at the time of his departure, you were suffering severely from sickness and fatigue.

"In the meantime the preparation of such orders from this department as the exigency of the case requires has been deferred in the hope of receiving your official report; but the mail of the last night having failed to bring it, it is deemed indispensable to the public interest to take, without further delay, such measures as appear to be required by the facts within the knowledge of the department."

On a more careful perusal of this extract you will perceive that my letter did not inform you that any rumor "unfavorable to your conduct or military character" had been *elucidated* by the verbal statements of Lieutenant Mitchell. The observation is, that certain *events* in respect to which ample details had been furnished by the mails received at Washington prior to 4th of November had been further elucidated by the verbal statements of that officer. There is nothing in this expression which can warrant you in inferring, as you seem to have done, that the verbal statements of Lieutenant Mitchell were derogatory to your character, or that he had given countenance to any rumor of that nature.

But it is due to Lieutenant Mitchell that this correction should not be confined to a mere exposition of the erroneous character of the inferences you have drawn from the language of the department. As an act of simple justice to him, I have to inform you that he made no statements in respect to any such rumor. Having called on me in my official capacity as acting head of the War Department, on the business with which he was charged, I proposed to him such inquiries in regard to the events which had then recently occurred in Florida, and to the actual posture of affairs when he left the army, as were calculated to obtain any information which he might be able to communicate. His replies were characterized not only by perfect respect towards yourself, but apparently by great candor. He placed in my possession a newspaper article, originally addressed to the editor of the Florida Herald, and published in an extra number of that paper of the 21st of October, and referred to it as a full and accurate account, so far as it extended, from the pen of one of your aides. His verbal statements corresponded with that article, but brought down the account to a few days later, and gave the additional intelligence mentioned in my letter, as to the state of your health at the time of his departure.

You will also perceive, on a more careful examination of the above extract, that it does not represent Lieutenant Mitchell as one of your staff at the time of his communication to the department, nor does it allege that he had been sent on *by you* on business connected with your supplies. The suggestion is, that he was "*lately* of your staff" and that "he had been despatched to this place and to Philadelphia," &c., without saying by whom. The passage above quoted from your last communication substantially confirms this suggestion, to which it should be added that he was also charged with a requisition from General Armstrong for clothing for the Tennessee brigade.

A copy of that part of this letter which relates to Lieutenant Mitchell will be transmitted to that officer, and it is not doubted that you will take pleasure in extending to him the like justice which you invoke for yourself.

B. F. BUTLER, *Secretary of War ad interim.*

His Excellency R. K. CALL, *Governor of Florida.*

No. 6.

WAR DEPARTMENT, *January 14, 1837.*

SIR: In my letter of the 30th ultimo I had the honor to acknowledge the receipt on that day of your communication of the 2d of the same month, and to reply to so much of it as related to Lieutenant Mitchell. Pursuant to the assurance then given, I now proceed to notice, so far as deemed just to you or necessary in other respects, the several topics embraced in your letter.

You have been pleased to characterize the communication addressed to you on the 4th of November last as a document in the highest degree extraordinary and unjust; and the excited feeling likely to be produced by such an impression is displayed in every part of your reply. Under the influence of this feeling you indulge in many remarks not at all necessary to the explanation of your conduct or the defence of your character; you charge the President and the department with the injustice not only of condemning you unheard, but of inflicting on you, without proof and on mere rumor, the severest penalty which the case admitted; you impute to us the mockery, after thus visiting you with all the consequences of actual guilt, of calling for an explanation of your conduct; and you more than once intimate doubts as to the willingness of either to repair, even after the clearest demonstration, the wrongs we may have committed. For reasons which, in your cooler moments, will readily occur to you, no reply will be made to these parts of your communication.

It is believed that all your exceptions to the language and directions of my letter are founded on an erroneous view of its true scope. The object of that paper was two fold: first, to require an explanation of the causes which led to the failure of the movement made by the troops under your command in the month of October last; and, secondly, to transfer the command of the forces serving in Florida and the general direction of the war against the Seminoles to General Jesup. For each of these measures, distinct and, as it was thought, ample grounds were stated by the department. In your reply you have not discriminated between these two purposes; you treat the whole as a censure, or rather as a punishment for presumed misconduct; and, to sustain this view, you entirely overlook the particular reasons on which the various parts of the communication proceeded.

In giving you the views of the President and of the department on the material points discussed in your reply, the original order and design of my letter will be carefully adhered to.

The propriety of the call for explanation must be determined by the circumstances known to the department at the time when it was made. These were briefly enumerated in my letter, as derived not from rumor, nor from unfriendly communications, but from various authentic sources to which, in the absence of any report from you, we were obliged to have recourse. Of these statements, that which was most relied upon, so far as it proceeded, was the account addressed by one of your own aides to the editor of the Florida Herald, and originally published in that paper. But, as no report had been received from yourself, it was thought to be due to your station and personal character that the general grounds on which the action of the department was founded, and the reasons which led to it, in the absence of such a report, should be distinctly suggested in the instructions. The rumor from the Charleston newspapers being the first intimation which reached us of the failure of your movement on the Withlacoochee was referred to as introductory of the subject, but the measures directed by the President were expressly placed on the various confirmatory accounts subsequently received.

It is a sufficient answer to all your objections to the nature of this evidence, that it was the best within the reach of the department, and that it came from so many sources and was so corroborated by undoubted facts, as to be worthy of full credit. A further, and, if it were needed, a still more decisive answer is to be found in the fact that, of the various circumstances stated in my letter, there is not one which is not substantially admitted in your communication of the 2d ultimo, or in the enclosed copy of your still missing despatch of the 19th of October.

The case presented two prominent particulars, each of which excited disappointment, surprise, and regret. The first was that, with such ample means and such abundant time for adequate preparation, you should have commenced your forward movement to the enemy's strongholds without taking effectual measures to secure the needful supplies; and the second, that a more serious attempt had not been made, after coming up with the enemy, to cross the river and to drive him from his position. That these points were well calculated to produce such emotions in the mind of the President, no one better knows than yourself. Your correspondence with the department up to and including your last despatch, (that of October 10,) had authorized other and very different expectations. That the public would entertain the like feelings, and would not be satisfied without full explanation on both subjects, was equally plain. For these and other reasons, briefly stated in my letter, you were required to transmit a detailed report of all the circumstances connected with your movements. That this call was well warranted by the existing posture of affairs is a point too obvious to need remark; you have yourself conceded it by giving a minute and elaborate explanation. Its sufficiency is therefore the only matter which, under this head, is yet to be considered.

The various facts detailed in your report in respect to the measures taken by you to secure the necessary supplies, whilst operating on the Withlacoochee, have been maturely weighed by the President and the department. We concur with you in thinking that you had good reason to expect, when you marched from Fort Drane on the 9th of October, that the depot previously ordered to be established by General Read at Graham's camp would be completed by at least the 16th of October; and we are also satisfied that the causes which prevented the establishment of that particular depot at that time are by no means to be imputed to any act or omission of yours. This remark, however, must not be understood as sanctioning your complaints against the naval officers employed in navigating the steamboats; the justice of which, on the facts now in possession of the department, is not perceived.

In thus explicitly exonerating you from any responsibility for the failure of General Read's efforts to establish the depots in question, the fullest measure of justice to which you are entitled is believed to have been awarded you. But it is due to candor, and is called for by the peculiar language of your letter, to say that it yet remains to be regretted that you should have marched from Fort Drane with so scanty a supply of provisions before you had ascertained that the projected depot—a depot so indispensable to the success of your movement—had been actually established. The direction to General Read involved several distinct measures, and its accomplishment was very liable to be defeated by accidents beyond his control. There seems, therefore, to have been a want of due caution in moving to a position where you would be thrown on him for the subsistence of your force, without first knowing that his supplies would certainly be accessible. On the other hand, it is not doubted that the error of judgment above imputed to you had its origin in the ardent desire of yourself and of the troops under your command to meet the enemy and to hasten the conclusion of the war. Under these patriotic impulses, it is, perhaps, not strange that you should have counted with too much confidence on the efforts of General Read, and should have overlooked the contingencies by which they were liable to be defeated. All this is cheerfully allowed by the President, and I take pleasure in stating it. More than this, with the views now entertained by him and the department, it seems to us impossible, consistently with justice, to concede. And, with respect to your general operations, it is still a subject of disappointment and regret, considering the time and means allowed you, that more effectual measures were not taken for securing such supplies as might have enabled you, on commencing offensive operations, to maintain the positions to which you might advance, and to prosecute the campaign with steadiness and vigor. The delay which this would have required might better have been incurred than to risk the far greater delay and the other injurious consequences of a retrograde.

The circumstances set forth in your communication for the purpose of explaining your retirement from the river, without a more serious attempt to cross it, have also been deliberately considered. The conclusions of the President and of the department on this part of the case, if not so favorable as you desire, are yet sufficiently so to exempt yourself and the army under your command from the imputations which you suppose to be implied in the call for explanation. At the same time it is my duty to remind you that the passage of the Withlacoochee was effected on the 16th of October (only a day or two after you abandoned the attempt) by Colonel Lane, with the regulars and Indians under his command, at a place about three miles from your encampment. It was also accomplished on the 13th of November by your own army.

These facts prove that the difficulties of the passage, though doubtless at all times very great, were not insuperable. Cogent and perhaps sufficient reasons for the abandonment of the enterprise on your first movement are, however, to be found in your total want of provisions (except such as your men would not use) and other supplies, and in the great loss of horses which your troops had sustained; but this only increases our regret at the original cause of these untoward circumstances. Had you been as well supplied on the 13th of October as you were on the 13th of November, neither the river nor the arms of the enemy would have prevented the accomplishment of your great purpose—the encountering of the Indians in the cove of the Withlacoochee. Before I leave this point, it is proper I should observe that, in speaking of your movements as "*retrograde*," reference was had not to your march along the river in quest of the expected depot, but to the retirement of the army to Fort Drane and Black creek—the former thirty miles, and the latter near one hundred miles from the Withlacoochee. It is in this sense, also, that the expression is used in the despatch to General Jesup; and you will allow me to express my surprise at the erroneous construction you have given it, and still more at the strictures upon it in which you have thought proper to indulge.

The transfer of the command to General Jesup, when properly understood, will be seen to have been not only right, but unavoidable. Throughout your letter you have treated this step as a removal for misconduct. This feature of your letter, and the animadversions and complaints connected with it, are the more extraordinary, since, in the communication to yourself, and in that of the same date to General Jesup, (a copy of which was enclosed to you,) the transfer of the command to the latter was expressly attributed to the apprehension that you might not be able, in your then feeble state of health, to finish the campaign with the promptitude and energy demanded by the crisis. In no part of your communication have you once alluded to this fact, or to the weighty considerations connected with it, as the assigned and sufficient reason for changing the command; although it appears from your own statements that the account of your sickness given to the department was strictly true. Nor do you seem to have recollected that it was originally designed, and so made known to you at an early day, that the command should be taken by General Jesup on his arrival in Florida. It is true the department afterwards acceded to the very liberal suggestion of that officer, that, as you had prepared the plan of the campaign, you should be allowed to conduct it; and had the condition of things remained unaltered, this arrangement, probably, would not have been interfered with. But their condition had been entirely changed by the retirement of the army from Withlacoochee; the suspension of offensive operations; the want of an official report from you; the short period remaining for the service of the Tennessee volunteers; the necessity produced by that cause, and by other considerations, for the utmost promptitude; and, above all, by your own severe sickness. Under these circumstances, and knowing, as we did, that General Jesup had arrived in Florida, with what propriety could the campaign have been left, at a juncture so critical, to the contingencies of your recovery? How could it be foreseen that you would survive; or, if you survived, that you would be able in due season, or at any time, to take the field? On a more dispassionate review of this branch of the case, you cannot help perceiving that, in the language you have used in respect to it, you have done the President great injustice; and I trust you will be convinced that the measure in question, at the time and under the circumstances referred to, was not merely an act of prudence, but of imperious duty.

In answer to your request for a court of inquiry, it is perhaps sufficient to remark that, as you are not now in the military service of the United States, it is believed there is no authority to organize such a court; and even if the power were clear, the President is of opinion that there exists no adequate cause for its exercise. The call upon you for explanation has been fully complied with. No difference exists as to any material fact; and though he is obliged, upon your own statement, to impute to you the errors of judgment above mentioned, yet he does not deem them of such a character as to demand any further investigation. Should you, on the receipt of this letter, still desire a court of inquiry, you will please repeat your request, and it shall receive a fuller consideration.

Before closing this letter, I am instructed to inform you that the efficient measures taken to redeem the time lost by the failure of your first movement, and the energy, fortitude, and courage displayed by all the forces under your command on resuming the campaign, and especially in the several engagements in the cove of the Withlachoochee and the Wahoo swamp, as stated in your report of the 27th of November, have received, as they deserve, the high approbation of the President. It is also due to you to add that General Jesup, in despatches recently received from him, has borne testimony in the strongest manner to the merits of your general plan of operations, and to the efficiency of the measures in progress when he assumed the command. The first of these despatches which came to hand was published by the department, as an act of justice to yourself, in the *Globe* newspaper of the 27th ultimo.

Since commencing this communication a resolution has been received from the Senate calling for your explanatory letter. Its transmission to that body will supersede the necessity of a compliance with the request contained in your letter of the 20th ultimo.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

P. S.—The President's directions for the preparation of this letter were given some time since, and it was commenced on the day of its date; but from the pressure of matters in the department requiring immediate action, and of my other official duties, its completion has necessarily been delayed.

JANUARY 20, 1837.

No. 7.

JACKSONVILLE, *December 20, 1836.*

SIR: In the last annual message of the President of the United States I find the following remarks: "The result of the first movements made by the forces under the direction of Governor Call, in October last, as detailed in the *accompanying papers*, excited much surprise and disappointment."

Not having been informed by you of the authors or the nature of the "communications" mentioned in your letter of reproach, dated on the 4th of November, or through any source, of the character of the "*papers*" which excited so much the "surprise and disappointment" of the President of the United States, I have respectfully to request that I may be furnished with a copy of those "*papers*," which appear to have been sufficiently important to lay before Congress, and this, too, before I have been informed of their contents, or had an opportunity of replying to them; thus forestalling public opinion, and impressing it with a belief of my having committed great official improprieties, even before (according to your own statement, made evidently under the sanction of the highest authority) the President and yourself had formed a "*definite judgment of my conduct.*"

The President further remarks, that a "full explanation had been required of the causes which had led to the failure." Now, sir, in common justice I have a right to expect that my letter in answer to yours of the 4th of November, which contains the explanations required, will also be laid before Congress.

Very respectfully, your obedient servant,

R. K. CALL.

Hon. B. F. BUTLER, *Acting Secretary of War.*

No. 8.

[Extract.]

WAR DEPARTMENT, *January 7, 1837.*

SIR: I have had the honor to receive your three several letters of the 20th ultimo.

The papers referred to by the President in that part of his message quoted by you are the annual report of Major General Macomb to me, as acting head of this department, and my annual report to the President, both which are contained in the accompanying printed pamphlet, which I have the honor, by the President's direction, to forward to you.

I am also directed by the President to inform you that after your communication of the 2d ultimo shall have been replied to by this department, it will be laid, together with such reply, and with my letter of the 4th of November last, before Congress, should you then desire it.

[The residue of this letter related to other subjects.]

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

His Excellency R. K. CALL, *Governor of Florida, Jacksonville, Florida.*

24TH CONGRESS.]

No. 717.

[2D SESSION.]

APPLICATION OF WISCONSIN THAT ARMS AND AMMUNITION MAY BE FURNISHED TO THAT TERRITORY FOR DEFENCE AGAINST THE INDIANS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 23, 1837.

To the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the council and house of representatives of the Territory of Wisconsin respectfully represents: That this Territory is particularly exposed to the depredations of various tribes of Indians settled within its limits and contiguous thereto. Experience and the recent difficulties with these unrelenting foes to the enterprising settlers of the country have conclusively shown your memorialists the necessity of constant preparation to prevent and effectually repel any attack that may be contemplated or attempted by them hereafter; and as the citizens must always depend upon their own resources during the early stages of difficulties with the Indians, your memorialists respectfully request that Congress will cause three thousand stands of arms to be deposited within the Territory for the use of the citizens—one-half to be rifles, and the balance muskets—and one thousand pistols of the late model recommended for the first regiment of dragoons. Also four light brass field pieces, not to exceed three hundred pounds in weight, (three-pounders,) fixed on carriages, with a supply of fixed ammunition for the whole sufficient for a campaign of four months.

Your memorialists deem it unnecessary to detail facts to prove the expediency and necessity of granting their request, as the recent and present difficulties with the natives in various parts of the United States and its Territories, and the disadvantages under which the white citizens labor in their controversies with the Indians, are familiar to all.

All which is respectfully submitted.

P. H. ENGLE, *Speaker of the House of Representatives.*
HENRY S. BAIRD, *President of the Council.*

24TH CONGRESS.]

No. 718.

[2D SESSION.]

APPLICATION OF ALABAMA THAT THE PAY AND ALLOWANCES OF VOLUNTEERS AND MILITIA WHEN CALLED INTO THE SERVICE OF THE UNITED STATES MAY BE INCREASED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 23, 1837.

MEMORIAL of the senate and house of representatives of the State of Alabama in favor of an increase of the pay of the militia when in actual service.

To the Senate and House of Representatives of the United States in Congress assembled:

Your memorialists respectfully represent unto your honorable bodies that their attention has been drawn to the subject of the compensation allowed by law to the citizen soldier when called into the service of the United States, and its inadequacy is so manifest in every point of view that they cannot, in justice to those they represent, omit bringing the subject directly before that authority who possess the exclusive power of applying the remedy. Whatever may be the opinion of your memorialists as regards the compensation of the regular soldiery, they must refrain from expressing their views, inasmuch as they feel that they have no immediate concern with that subject. No identity, however, in their judgment, exists with these cases. The consideration which should influence the action of Congress in the former will be found wholly inapplicable in the latter, particularly as relates to the privates of the regular army. In joining the service there is no holy zeal for liberty, nor impassioned love of country. They are known to take the bounty and to enter the army precisely as they would hire into any other employment. Indeed, many are believed to seek it as an asylum from hunger, want, and misery, entailed upon them by their hideous and ungovernable vices. Not so with the citizen soldier. He is not moved by the attractions of a paltry bounty, nor influenced by the hope of ultimate gain to himself. While pursuing the peaceful walks of private life, and engrossed and fettered by the various ties of his social relations, he is aroused by the call of his country to arms! At once he pauses in his avocations, hesitates not to sacrifice his private interests, however great, on the altar of the general good; bursts asunder the delicate bands that bind him to his home and to his family, and flies with the unconquerable spirit of a freeman to the tented field or untented wilderness. It is not expected or desired by your memorialists or their constituents that you will authorize a reimbursement of the collateral or incidental deprivations of the citizen soldier, nor, indeed, that you will provide *adequate* compensation for his actual loss of time and property, or necessary expenditure of private funds; but the present paltry pay is so grossly inadequate, even below the compensation allowed our soldiers during the last war with Great Britain, when our federal treasury

was not only exhausted, but millions in default, that it does seem that wisdom, good policy, and even justice, require that now our government treasury is running over, and inundating the whole land with the surplus revenue, at least a reasonable compensation—some light solace for the emptied pockets of the sufferer—should be provided for those who, at the sound of their country's tocsin, forget self in the view of danger to their fellow-citizens, tear themselves from all the comforts and endearments of home, and voluntarily repair where duty calls, in defence of the frontier from savage massacre, or the shores of their beloved country from foreign invasion: Therefore—

Be it resolved by the senate and house of representatives of the State of Alabama in general assembly convened, That our senators in Congress be instructed, and our representatives be requested, to use their best endeavors to obtain an increase by Congress of the pay now allowed to the militia when called into the service of the States of the Union, to a sum more commensurate with their actual loss of time and their expenditure of private funds for their equipment and comfort.

And be it further resolved, That the governor transmit to each of our senators and representatives in Congress a copy of the foregoing memorial and resolution.

A. P. BAGBY, *Speaker of the House of Representatives.*
HUGH McVAY, *President of the Senate.*

Approved December 23, 1836.

C. C. CLAY.

No. 719.

[2D SESSION.]

ARMY REGISTER FOR 1837.

COMMUNICATED TO THE SENATE JANUARY 26, 1837.

WAR DEPARTMENT, *January 25, 1837.*

SIR: I have the honor to transmit a communication from the adjutant general, with fifty-five copies of the official Army Register for the members of the Senate, in compliance with a resolution of February 1, 1830.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

HON. M. VAN BUREN, *President of the Senate.*

ADJUTANT GENERAL'S OFFICE, *Washington, January 25, 1837.*

SIR: I herewith respectfully present to you fifty-five copies of the official Army Register for 1837, required to be furnished by the Secretary of War for the use of the members of the Senate of the United States, as enjoined by a resolution of that body dated December 13, 1815.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

HON. BENJAMIN F. BUTLER, *Secretary of War.*

Register of the army of the United States for 1837.

The western department comprises all west of a line drawn from the southernmost point of East Florida to the northwest extremity of Lake Superior, taking in the whole of Tennessee and Kentucky; and the eastern department all east of such line, including Fort Winnebago.

The headquarters of the general-in-chief are in the District of Columbia.

The headquarters of the western department are at Memphis, Tennessee.

The headquarters of the eastern department are in the city of New York.

Those officers whose stations are changed by transfers and promotions will report for duty accordingly.

By order:

R. JONES, *Adjutant General.*

24TH CONGRESS.]

No. 720.

[2D SESSION.]

ADDITIONAL EXPLANATORY ESTIMATES FOR THE SERVICE OF THE ORDNANCE DEPARTMENT DURING THE YEAR 1837.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 28, 1837.

WAR DEPARTMENT, *January 24, 1837.*

SIR: I have the honor to transmit herewith a letter from the colonel of ordnance, accompanied by a special estimate of the further sums that will be necessary for the service of the ordnance department during the present year, and beg leave to request that the committee will cause them to be embraced in the proper bill.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

HON. C. C. CAMBRELENG, *Chairman Committee of Ways and Means, House of Representatives.*

ORDNANCE OFFICE, *Washington, January 21, 1837.*

SIR: I have the honor to transmit herewith the special estimate for additional appropriations for the service of this department for the year 1837.

I have the honor to be, sir, respectfully, your obedient servant,

G. BOMFORD, *Colonel of Ordnance.*

HON. BENJAMIN F. BUTLER, *Secretary of War ad interim.*

Special estimate for additional appropriations for the service of the ordnance department for the year 1837.

FOR THE NATIONAL ARMORY AT HARPER'S FERRY, VIRGINIA.

A.—For constructing a river wall in the range of the shops on the Potomac 1,624 feet long, 9 feet at base and 3 feet at top, extending from the upper corner of the tilt-hammer shop to a point on the river near Doring's brick house, containing 6,246 perches of stone wall, at \$2 45 per perch.....	\$15, 302 00
For making the embankment to the same, containing 37,832 cubic yards, at 50 cents per yard.....	18, 916 00
For constructing 619 feet of stone arching over tail races, water-wheels, sluices, &c., containing 792 perches, at \$5 per perch.....	3, 960 00
For constructing 1,238 feet of stone walling, for the support of arches, 3½ feet thick, 6 feet high, making 1,000 perches, at \$2 45 per perch.....	2, 450 00
For the completion of the tilt-hammer shop, commenced in 1834.....	6, 656 00
For making the embankment of the new canal at this armory water tight, viz: mud-puddling inner side of the embankment 1,560 feet in length, 5 feet thick, average breadth 26 feet; making 7, 511 cubic yards, at 86 cents per yard.....	6, 459 00
Total for Harper's Ferry armory.....	\$53, 743 00

ARSENALS.

B.—For the purchase of a site for constructing a new magazine to contain from 2,500 to 3,000 barrels of gunpowder, at the United States arsenal, Baton Rouge, Louisiana.....	5, 000 00

For the national armory at Harper's Ferry, Virginia	\$53, 743 00	
For arsenals	23, 099 50	
For the purchase of copper rifle flasks	17, 000 00	
		<u>\$93, 842 50</u>

NOTES.

A.—The construction of a river wall along the range of shops on the Potomac river is rendered highly desirable, in consequence of the confined state of the buildings;—hemmed in on one side by the river, and by high and precipitous ledges of rocks on the other. Besides, it will be the means of reclaiming a space of fifty feet wide by sixteen hundred and twenty-four feet long, in the rear of the shops, and render it available for building purposes.

The superintendent in charge of this armory states that the appropriation for the construction of the tilt-hammer shop has proved insufficient; partly in consequence of the great rise in price of materials and labor since the original estimate for this object was prepared, and partly owing to the change of the location of the building, as it became necessary to increase the width and depth of the foundations from five to seven feet, and enlarge the thickness about six feet more than was originally deemed sufficient, which greatly augmented the amount for excavation, walling, and filling; and the substitution of cast iron water wheels for tub wheels, which, though decidedly preferable, are more difficult in their construction, and of more expensive materials, yet more durable.

It appears to be indispensably necessary to make one of the sides of the new canal impervious to water; it is now faced with flat stones, through the fissures of which the water, when let into the canal, forces its way. The leaks in this way consume, it is calculated, about one-fourth of the whole head of water. To remedy this defect, it is proposed to face the whole inner side down to the bed of the canal with a coat of good puddling, five feet thick.

B.—An appropriation was made at the last session of Congress for the erection of a new magazine at the United States arsenal at Baton Rouge, Louisiana, and the officer in charge of that post was directed to select a site and proceed with the building. In the execution of this duty he transmitted a plat of the ground at the arsenal and pointed out the position, which position, it appears, was in possession of the garrison at Baton Rouge; not pertaining to this department. The Secretary of War directed the officer in charge of the garrison to report upon this subject. He has recently made this report, stating that the site selected would be in the vicinity of the hospital, and very objectionable on that account, and will materially affect the health, comfort, and convenience of the garrison. As no suitable ground belonging to the United States can therefore be obtained at this post for the erection of the magazine in accordance with the appropriation, the sum of \$5,000 has been embraced in this estimate for the purchase of a proper site.

It should be remarked here that this department is not in possession of the value of land in the vicinity of this post, and could not be, in consequence of the lateness of the report of the officer commanding the garrison, who decided against the location of the magazine on the garrison grounds. The site may probably be procured for a less sum than \$5,000, (though it is known that land there is very high;) in that event, the surplus amount not required will revert to the treasury.

C.—The purchase of three acres of land adjoining the eastern side of the ground-plat at the United States arsenal, Frankford, Pa., for which the sum of \$2,000 was appropriated at the last session, has not been made, in consequence of the owner of the ground demanding for it a greater sum than was authorized by the act of appropriation. As the additional land appears to be indispensable, to give more space around the magazine and principal arsenal, and to afford room to prove powder; and it appearing, also, that it cannot be procured for a less sum than \$3,000, the sum of \$1,000 has therefore been embraced in this estimate, (being an addition to the former appropriation,) in order that this land may be obtained, as was originally designed.

D.—In May, 1834, the sum of \$1,800 50 was appropriated for the purchase of three acres of land on the Alabama river, and building a (temporary) warehouse and dock at the Mount Vernon arsenal; but it was found that this amount was wholly insufficient for these objects, the land being held at a high rate, and the titles, in many instances, defective, particularly at the point where it was first intended to put the warehouse and wharf. For these reasons nothing has been done towards this work. The importance now of having a warehouse and wharf attached to the arsenal on the river has been fully demonstrated by the recent Indian wars. For the want of such an establishment large shipments of ordnance and ordnance stores have been unavoidably exposed to the weather, and, in some instances, have been injured. The sum of \$6,599 50 has therefore been embraced in this estimate, for the purchase of land, building a permanent brick warehouse, &c., on the Alabama river, for the use of this arsenal.

E.—The blacksmith's shop at the Watertown arsenal was accidentally destroyed by fire on the sixth instant. The sum of \$3,500 has therefore been embraced in this estimate, for rebuilding the shop with as little delay as possible. The officer in charge of this post states that it was owing, in a great measure, to the want of an adequate supply of water that the blacksmith's shop was consumed, the well nearest to that of the fire having failed some time since. It is proposed to construct a large reservoir to contain water for security against accidents by fire.

An additional gun-carriage house is much wanted, in consequence of the great accumulation of munitions of war at this post during late years; and with the view, not only for the better preservation of the military stores now deposited there, but to provide suitable room for additional supplies.

F.—A supply of rifle flasks is much needed, in consequence of the stock on hand being exhausted by the recent issues to the troops in the field. The sum of \$17,000 has been inserted for procuring 10,000 of the recently improved pattern.

G. BOMFORD, *Colonel of Ordnance.*

ORDNANCE OFFICE, *Washington, January 21, 1837.*

[24TH CONGRESS.]

No. 721.

[2D SESSION.]

ORDERS FROM THE WAR DEPARTMENT AUTHORIZING CALLS FOR VOLUNTEERS AND MILITIA FROM SEVERAL STATES AND TERRITORIES TO SUPPRESS THE HOSTILITIES OF THE CREEK AND SEMINOLE INDIANS IN FLORIDA, ETC.; THE NUMBERS FROM EACH STATE, ETC.; THE WHOLE NUMBER OF REGULARS AND MILITIA EMPLOYED, AND PERIODS FOR WHICH THEY WERE PAID.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1837.

WAR DEPARTMENT, *February 7, 1837.*

SIR: Enclosed are the copies of orders issued by this department respecting calls for "volunteers or militia-men," called for by a resolution of the House of Representatives dated the 26th of December last. The other requirements of that resolution are complied with, so far as this can be done by the department, in the accompanying report and documents prepared by the adjutant general, (dated January 18, but not completed and laid before me till the 24th of that month,) and in the report and statement of the paymaster general, also herewith transmitted.

Very respectfully, your most obedient servant

B. F. BUTLER, *Secretary of War ad interim.*

Hon. JAMES K. POLK, *Speaker of the House of Representatives.*

WAR DEPARTMENT, *December 9, 1835.*

SIR: By a report just received from Brigadier General Clinch it appears there is reason to apprehend immediate hostilities with the Seminole Indians.

I am instructed by the President to request you to call into the service of the United States, upon the requisition of General Clinch, and to place under his command any portion of the militia of the Territory of Florida which he may find necessary for the suppression of hostilities, and for which he may apply to you.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency JOHN H. EATON, *Governor of Florida, Tallahassee, Florida.*

WAR DEPARTMENT, *January 21, 1836.*

SIR: The recent intelligence which has been received here respecting the state of affairs in Florida has rendered it expedient to order Major General Scott to proceed to that Territory and assume the direction of operations against the Seminole Indians, and also against the Creek Indians, should these latter have engaged in hostilities, as from recent information there is some reason to apprehend.

I am instructed by the President to request you to call into the service of the United States and to place under the command of Major General Scott such portion of the militia of Florida as he may require, to be employed in suppressing the hostilities of the above-mentioned Indians. It is expected that the militia thus called out will serve for at least three months after they arrive at the place of rendezvous, unless sooner discharged.

I beg leave to suggest that the authority thus conferred upon General Scott will enable him to increase, modify, or revoke any requisition which may have been made by General Clinch, in conformity with the letter I had the honor to address to you on the 8th instant. This authority will also supersede the powers intrusted to those officers on the subject as soon as General Scott shall have taken the personal direction of operations.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency J. H. EATON, *Governor of Florida, Tallahassee, Florida.*

WAR DEPARTMENT, *May 16, 1836.*

SIR: I have received your letter of May 4. You will perceive that while Major General Scott is in Florida, charged with the general measures of defence, it would not do for this department to authorize the organization and employment of a force independent of his authority. Still, however, if any portion of the frontier is left without defence, and the inhabitants are exposed to danger, the President will sanction the calling out by you of a force necessary to repel the attacks of the Indians. You may rely upon every disposition being felt here to afford due protection to the inhabitants of Florida, and to reduce the refractory Indians to submission. General Scott, by the last advices, was at St. Augustine, awaiting the orders of the department. He will be authorized, after putting the frontier in a proper state of defence, to turn over the command to General Clinch, and to return to his department, if the state of affairs there will, in his opinion, permit. You will perceive the extreme difficulty of determining here what posts should be abandoned or established when there is a contrariety of opinion between officers of high rank in the country. My own impression respecting general defensive measures is, that healthful positions should be sought along the lines and temporary posts established, with slight defences, for the occupation

of the troops during the summer season; that it is better to have more posts, with fewer men in each, than it is to have few posts with large garrisons; that the Indians will scarcely collect in large masses or attack fortified positions, but that they will spread themselves along the frontiers, in small parties, doing all the mischief they can. The troops should at all times be upon the alert, and there should be mounted men employed, acquainted with the nature of the country and the habits of the Indians, who can instantly follow any marauding parties that may strike upon the settlements. It is indispensable that the Indians should be pursued. If they find that their expeditions are successful, and that they are not followed to their fastnesses, they will lay waste the whole frontier. Certainly, where an Indian can go a white man can follow. It is necessary, however, for this purpose, that a corps of spies and guides should be formed and kept continually in motion. Whenever a hostile party is discovered, their trail should be followed, and the necessary force, infantry and mounted men, kept within supporting distance of these spies. Vigilance, activity, and decision are essentially necessary to secure the object in view.

From your representation, I am under the impression that a very small force at Tampa Bay will be sufficient, and that the other troops had better be stationed upon the line of the frontier settlements. I shall transmit to General Scott copies of your letter and this answer, that he may know the views of the department. He will be authorized to keep in service such mounted men as may be necessary for defensive operations during the summer season.

From what is understood here of the climate, men not accustomed to it cannot with safety carry on military operations. If this be so, the regular troops ought not to be required to do any more than defend their positions, overawe the Indians, and pursue any war parties that may make their appearance, and perhaps, also, occasionally ranging through the more healthful parts of the country.

I mentioned in a preceding letter that there was a bill pending before Congress for raising a volunteer force, and that as soon as it passed definitive measures would be taken on the subject of your proposition to embody a force of this description. Congress has not finally acted on this matter; but in the meantime you are authorized to take preparatory steps for raising one thousand volunteers, to be employed whenever required in operations against the Seminole Indians. I send you a copy of the bill for your information; but you will please observe that, as it has not passed, no definitive measures can be taken upon this subject, nor assurances given. The men may be enrolled and the company officers selected, so as to be ready to be embodied the moment the bill passes. They should be organized, with respect to officers, non-commissioned officers, and privates, agreeably to the existing militia laws of the United States. The question respecting the appointment of superior officers will be determined as soon as the law passes. All this will be considered as the mere voluntary act of the individuals, and will not subject the government to any expense whatever until the necessary legal provision is made. It is merely preparatory to an organization.

I have shown this letter to the President, who has authorized me to express to you his approbation of it.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee.*

P. S.—The President suggests that whenever the Indians' ponies and beef cattle cannot be taken for the use of the army they should be shot.

WAR DEPARTMENT, *May 17, 1836.*

SIR: I have just received your letter of the 6th instant, with its enclosures. Having already written to you very fully on the subject of the defence of Florida, I have nothing more to add at present.

As the Indians are actually committing depredations upon the settlements, you are certainly right in taking adequate measures for protection; and the President will sanction the employment of whatever militia force may be required for this service, until other arrangements are made.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee.*

WAR DEPARTMENT, *May 19, 1836.*

SIR: Your letter of the 8th instant has just been received. The volunteer law has not yet passed, but I think it will in a day or two; and in the meantime I trust you are making all the arrangements necessary for the employment of the requisite force as soon as the measure is sanctioned by Congress. I enclose you a copy of a letter received from the Secretary of the Navy, by which you will see that a naval force has been ordered to the coast for the purposes specified in your letter. It will be necessary for you to correspond with Commodore Dallas, and to suggest to that officer such a course of proceeding as may be demanded by the public interest.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee.*

WAR DEPARTMENT, *May 21, 1836.*

SIR: I have just received your letter of the 10th instant. The volunteer bill has not yet passed, and the department is not able to authorize you to organize permanently any of that species of force. I still, however, hope that it will pass within a day or two. I can but repeat what I have already said to you.

This department will sanction the employment of any force which you may find necessary to protect the inhabitants of Florida, until measures can be adopted for renewing offensive operations against the Seminoles, or until arrangements shall have been completed by General Scott for the security of the frontier.

A letter has this day been received from General Scott, by which it appears that he has lost no time in making a proper disposition of his force, with a view to the defence of the country, until the state of the season may render it proper again to order the regular troops to take the field.

I have directed the Quartermaster General's department to instruct Captain Shannon to pay any expenditures which may be incurred by you in protecting the settlements. You are at liberty to authorize the construction of block-houses at such points as you may deem proper, where a small force may be stationed, and to which the inhabitants may resort for safety. Captain Shannon will not only procure such supplies as are required, and which properly belongs to the quartermaster's department, but all such as relate to subsistence. Immediate arrangements will also be made for the payment from time to time of the men thus called out.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee.*

WAR DEPARTMENT, *May 23, 1836.*

SIR: The law for raising volunteers has passed Congress, but has not yet been presented to the President for his approval. It will be signed by him without delay, and I will transmit you a copy the moment it can be printed. The general features remain unaltered, except in the appointment of the officers. These in all cases will be approved agreeably to the laws of the State or Territory where the volunteers are raised. I trust you are losing no time in endeavoring to engage volunteers, so as to have them legally organized on the receipt of the law. Further instructions will be given with respect to their employment during the summer season as soon after the law is signed as these can be prepared.

No delay has taken place here in considering every suggestion made by you, and in answering your various letters. The defence of the Territory is an object of deep interest with the government. Major General Jesup has proceeded to take the direction of the measures necessary for the reduction of the Creek Indians. He has been instructed at the commencement of his operations to station a force at the southern point of the Creek country, so as to cut off all communication between the Seminole and Creek Indians; and also immediately to remove the whole of the Creek Indians from that part of the country, preparatory to their general emigration. It is hoped that this movement will prevent any co-operation between the hostile parties of these tribes. Without the adoption of such a plan, the measures in Alabama might drive the Creek Indians into Florida.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I enclose for your information the copy of a letter this day addressed to General Clinch. Should General Scott leave, or have left, the Territory, and should General Clinch not continue in service, you are then authorized to assume the command of the regular forces and militia serving in Florida, and to employ the same in the best manner for the defence of the country and the speedy subjugation of the Indians.

I acknowledged some time since the receipt of your letter proposing a summer campaign for the reduction of the Indians. In the event of the command devolving upon you, under the circumstances above stated, you are authorized to organize an expedition for this purpose. You will please, however, to advert to the considerations stated in the letter to General Clinch, with respect to the service of the troops and the dangers of the climate, and you must form your judgment on a view of the whole circumstances. In these suggestions the President fully concurs; and it is his desire that the operations should be conducted as vigorously as possible. I enclose herewith a copy of two acts of Congress: one entitled "An act to provide for the payment of volunteers and militia corps in the service of the United States;" and the other, "authorizing the President of the United States to accept the services of volunteers, and to raise an additional regiment of dragoons or mounted riflemen." I am instructed by the President to request that you will cause to be raised in the Territory of Florida 1,000 volunteers, to be called immediately into the service of the United States. The act of Congress provides that the officers shall be appointed agreeably to the laws of the State or Territory where they are raised. Where corps already organized tender their services, they will be accepted with their present organization; where this is not the case, and the men are to be engaged individually, they will, in the first instance, be arranged into companies, and then into battalions, regiments, and a brigade. Where existing corps do not tender their services, the basis of the organization will be the present militia laws of the United States. These are the acts of Congress of May 8, 1792; of January 2, 1795; of March 2, 1803; of April 18, 1814, and of April 20, 1816. An abstract accompanies this letter, showing the mode of organization and the number and rank of the officers. You will conform in your arrangements to the principle of these laws as herein explained; taking into view the acts of Congress of May 8, 1792, in the third section of which the organization is limited to where the same may be convenient; and also the fourth section of the act of May 21, 1836, a discretionary power appears to be vested in the President on the subject of organization generally. It must, therefore, be controlled by the number of men and by other circumstances. You will organize your companies so as to contain fifty privates each. The officers, non-commissioned officers, and musicians will be regulated by the above acts of Congress. You will organize the companies immediately into battalions, placing five companies in each battalion. These battalions will form two regiments and one brigade. Should circumstances not enable you to raise the whole number specified, you must organize those who may volunteer upon those principles.

It is scarcely necessary that I should urge upon you the most prompt action upon this subject. Orders will be issued to Captain Shannon to muster the men into service as fast as the companies are formed. You will immediately employ them in the defence of the country, until General Scott or General Clinch shall make permanent arrangements for their service. The necessary orders will be given to the Quartermaster's, Subsistence, and Pay departments to provide the funds for any disbursements that may be required, as fast as necessary. Authority having already been given to you for procuring arms and ammunition, it is not necessary again to renew the order. Instructions will also be given for issuing the necessary camp equipage.

It is proper to observe that the provision in the 2d section of the act of May 21, 1836, "which allows to volunteers a commutation for clothing when called into actual service," must be construed to give them a claim for such commutation from that time, which will be paid to them at the same time and in the same manner as they receive their monthly pay. No other construction can be given to the law, as it is impossible to tell, until the end of the service, the whole amount of commutation which may be due to a volunteer. The pay of these volunteers will not commence until they are called into service and they have reached the place of rendezvous, and they will in all cases be engaged to serve for twelve months thereafter, unless sooner discharged.

My letter to General Clinch will have advised you of the arrangements with respect to the Tennessee volunteers. I beg, in addition, that you would keep up a constant communication with General Jesup, that he may be able to take his ulterior measures with a full knowledge of existing circumstances.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida*

WAR DEPARTMENT, *July 28, 1836.*

SIR: I have received your letter of the 15th instant, with the general order of General Scott of July 2, directing the Tennessee volunteers to be mustered into the service for three months.

I have the honor to state, in reply, that the troops were directed, in the first instance, to be received for twelve months; but, at the instance of Governor Cannon, they were mustered for six months. For a shorter term the law would not permit them to be accepted.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

His Excellency R. K. CALL, *Governor of Florida, Tallahassee, Florida.*

WAR DEPARTMENT, *January 8, 1836.*

SIR: Hostilities have been commenced by the Seminole Indians in Florida; and although there is just reason to believe that the regular and militia force employed there will be sufficient to subdue the Indians, still it is possible that their numbers and situation may enable them to carry on a protracted warfare.

Under these circumstances, the President has directed me to request you, should Brigadier General Clinch, commanding the troops in Florida, find it necessary to resort to the State of South Carolina for additional force, to call into service, upon his requisition, and place under his command, such number of militia as he may require.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency GEORGE McDUFFIE, *Governor of South Carolina, Columbia, S. C.*

WAR DEPARTMENT, *January 17, 1836.*

SIR: I am instructed by the President to request you to call into the service of the United States, upon the requisition of Brigadier General Eustis, and to place under his order, such militia force as he may deem necessary to be employed in subduing the Seminole Indians in Florida.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency GEORGE McDUFFIE, *Governor of South Carolina, Columbia, S. C.*

WAR DEPARTMENT, *January 21, 1836.*

SIR: The recent intelligence which has been received here respecting the state of affairs in Florida has rendered it expedient to order Major General Scott to proceed to that Territory and to assume the direction of the operations against the Seminole Indians, and also against the Creek Indians, should these latter have engaged in hostilities, as, from recent information, there is some reason to apprehend.

I am instructed by the President to request you to call into the service of the United States, and to place under the command of General Scott, such portion of the militia of the State of South Carolina as he may require, to be employed in suppressing the hostilities of the above-mentioned Indians. It is expected that the militia thus called out will serve for at least three months after their arrival at the place of rendezvous, unless sooner discharged.

I beg leave to suggest that the authority thus conferred upon General Scott will enable him to increase, modify, or revoke any requisition which may have been made by Generals Clinch or Eustis, in

conformity with the letters which I had the honor to address to you on the 8th and 17th instant. This authority will also supersede the powers intrusted to those officers on this subject as soon as General Scott shall have taken the personal direction of operations.

I am, sir, very respectfully, your obedient servant,

His Excellency GEORGE McDUFFIE, *Governor of South Carolina, Columbia, S. C.*

LEWIS CASS.

WAR DEPARTMENT, *January 8, 1836.*

SIR: Hostilities have been commenced by the Seminole Indians in Florida, and although there is just reason to believe that the regular and militia force employed there will be sufficient to subdue the Indians, still it is possible that their numbers and situation may enable them to carry on a protracted warfare.

Under these circumstances, the President has directed me to request you, should Brigadier General Clinch, commanding the troops in Florida, find it necessary to resort to the State of Georgia for additional force, to call into service, upon his requisition, and place under his command such number of militia as he may require.

Very respectfully, your most obedient servant,

His Excellency WILLIAM SCHLEY, *Governor of Georgia, Milledgeville, Ga.*

LEWIS CASS.

WAR DEPARTMENT, *January 21, 1836.*

SIR: The recent intelligence which has been received here respecting the state of affairs in Florida has rendered it expedient to order Major General Scott to proceed to that Territory and assume the direction of the operations against the Seminole Indians, and also against the Creek Indians, should these latter have engaged in hostilities, as, from recent information, there is some reason to apprehend.

I am instructed by the President to request you to call into the service of the United States, and to place under the command of Major General Scott, such portion of the militia of Georgia as he may require, to be employed in suppressing the hostilities of the above-mentioned Indians. It is expected that the militia thus called out will serve for at least three months after they arrive at the place of rendezvous, unless sooner discharged.

I beg leave to suggest that the authority thus conferred upon General Scott will enable him to increase, modify, or revoke any requisition which may have been made by General Clinch, in conformity with the letter I had the honor to address to you on the 8th instant. This authority will also supersede the powers intrusted to those officers on this subject as soon as General Scott shall have taken the personal direction of operations.

I am, sir, very respectfully, your obedient servant,

His Excellency WILLIAM SCHLEY, *Governor of Georgia, Milledgeville, Ga.*

LEWIS CASS.

WAR DEPARTMENT, *May 13, 1836.*

SIR: I have had the honor to receive your letter of the 2d instant, respecting the state of affairs among the Creek Indians, and the necessity of providing a force to suppress any disturbances that may occur among them; and, in answer, I beg leave to inform you that orders have this day been given for six companies of artillery to move from New York and Fort Monroe to the Creek country in Alabama, with a view to suppress any disturbances that may arise among these Indians. This force, I trust, will be sufficient. But should hostilities be actually commenced by the Indians upon the inhabitants of Georgia, or are so certainly meditated as to leave no doubt of their intentions, the President will sanction the employment of whatever force may be found necessary for their suppression. With a view to make permanent arrangements on the subject, the department has been awaiting the passage of a bill now pending before Congress, which provides for the employment of a volunteer force. It is not practicable to send any more regular troops into that quarter. And there is such an expense and uncertainty attending the operations of the ordinary militia called out for three months, that the President is very desirous to avoid that measure, if practicable. Definitive arrangements will be made upon this subject as soon as the bill passes and the appropriations are made.

General Scott is probably at this time at St. Augustine, and will be able to take any additional measures that may be necessary.

I am, sir, very respectfully, your obedient servant,

His Excellency WILLIAM SCHLEY, *Governor of Georgia, Milledgeville, Ga.*

LEWIS CASS.

WAR DEPARTMENT, *May 19, 1836.*

SIR: Brevet Brigadier General Jesup has this day been assigned to the command, by the direction of the President, of the troops of the United States, and the militia who have been, or may be, called into service for the suppression of the hostilities among the Creek Indians. He will proceed immediately to the scene of operations, with ample instructions for his government, and all the means that appear necessary for successful operation. The President requests that you would call out, and place under his command,

such militia force as General Jesup may require. It is desirable that, as far as practicable, these should be volunteers, and engaged for six months, unless sooner discharged. But if it is necessary to resort to drafts, I presume the term of service cannot be extended beyond three months. General Jesup will be required to communicate fully from time to time with you, and I will thank you to give him the benefit of such suggestions as occur to you. Should Major General Scott, under the instructions heretofore given to him, proceed to the Creek country, he will have authority to assume the command; and, in that event, I have to request that you would give effect to any requisition that he may make upon you for a militia force.

A bill is pending before Congress which provides for the raising of a volunteer force. Should it pass previously to the organization of any force under these instructions, it would perhaps be more expedient to raise the troops required under this expected act. If it becomes a law within a short time I will transmit it to you, with such observations as may appear necessary.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency WILLIAM SCHLEY, *Governor of Georgia, Milledgeville, Georgia.*

WAR DEPARTMENT, *May 20, 1836.*

SIR: I have had the honor this day to receive your letter of the 12th instant.

My letter to you of yesterday will have advised you of the measures which the President has deemed it necessary to take for the defence of your settlements against the Creek Indians. General Jesup remains, during the day, to complete the necessary arrangements, and will leave here to-night for the scene of operations. I send for your information a copy of his instructions, by which you will see that your views have been anticipated with respect to the proper mode of proceeding, and that the President has deemed it essential that the Creek Indians should now be removed, whether willing or unwilling to go. Should any accident delay General Jesup, the President will sanction any measures you may find it necessary to take for the protection of the inhabitants.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency WM. SCHLEY, *Governor of Georgia, Milledgeville, Georgia.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I have the honor to enclose herewith copies of two acts of Congress: one entitled "An act to provide for the payment of volunteers and militia corps in the service of the United States;" and the other, "authorizing the President of the United States to accept the service of volunteers, and to raise a regiment of dragoons or mounted riflemen." I am instructed by the President to request that you would cause to be raised in the State of Georgia two thousand volunteers (privates) to be placed immediately in the service of the United States. The act of Congress provides that the officers shall be appointed agreeably to the laws of the State or Territory where they are raised. Where corps already organized tender their services they will be accepted with their present officers and organization. Where this is not the case, and the men are to be engaged individually, they will, in the first instance, be arranged into companies, then into battalions, regiments, brigades, and a division. Where existing volunteer corps do not tender their services, the basis of the organization will be the present militia laws of the United States. These are the acts of Congress of May 8, 1792; of January 2, 1795; of March 2, 1803; of April 18, 1814; and of April 20, 1816. An abstract accompanies this letter, showing the mode of organization and the number and rank of the officers. You will conform in your arrangements to the principles of these laws as herein explained; taking into view the act of Congress of May 8, 1792, in the third section of which the organization directed is limited to where the same may be convenient; and also the fourth section of the act of May 21, 1836, a discretionary authority appears to be vested in the President upon the subject of organization generally. It must, therefore, be controlled by the number of men required and by other circumstances. Each company will consist of fifty privates and of the number of officers, non-commissioned officers, and musicians, designated in the abstract. You will organize the companies, as fast as raised, into battalions—five companies forming a battalion. Two of these battalions will then constitute a regiment; two regiments a brigade; two brigades a division. Should circumstances not enable you to raise the whole number specified, you must organize those who may volunteer upon these principles. It is to be hoped, however, that from the number of militia now in service the requisite force can be raised without difficulty or loss of time. One half of the whole number you raise may be mounted, and the other half infantry.

Major General Jesup will be instructed to have them mustered into service, and have them supplied with the necessary camp equipage, arms, &c. I need not urge upon you the necessity of the most prompt attention to this subject.

It is proper to observe that the provision in the second section of the act of May 21, 1836, which allows to volunteers a commutation for clothing, when called into actual service, must be construed to give them a claim to such commutation from that time, which will be paid to them at the same time and in the same manner they receive their monthly pay. No other construction can be given to the law, as it is impossible to ascertain, until the end of the service, the whole amount of commutation which may be due to a volunteer.

The pay of these volunteers will not commence until they are called into service and they have reached the place of rendezvous; and they will in all cases be engaged to serve for twelve months unless sooner discharged.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency WM. SCHLEY, *Governor of Georgia, Milledgeville, Georgia.*

WAR DEPARTMENT, *June 20, 1836.*

SIR: I have the honor to enclose a copy of the treaty recently concluded with the Cherokee Indians for a cession of their lands east of the Mississippi river.

As a portion of the territory possessed by them is in the State of Georgia, I transmit, for your information, a copy of the instructions to Brigadier General Wool.

I am directed by the President to request you, should General Wool make a requisition, to call into the service of the United States such militia force from the State of Georgia as he may require.

They will be called out for a term not less than three months, unless sooner discharged, and will be officered agreeably to the militia laws of the United States.

General Wool will cause the necessary measures to be taken for mustering them into the service of the United States.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency WM. SCHLEY, *Governor of Georgia, Milledgeville, Georgia.*

WAR DEPARTMENT, *October 12, 1836.*

SIR: In carrying into effect the provisions of the recent Cherokee treaty, it is found indispensable to keep up a small military force in the country now occupied by those Indians; and the whole of the regular force being required elsewhere, it becomes necessary to resort to the employment of a portion of the volunteer force authorized by the act of the 23d of May last.

The propriety having been suggested to the President, and approved by him, of employing the number of volunteers required to be stationed in each of the different States within whose boundaries the Cherokee country lies from those States, respectively, he directs me to request your excellency to comply with the requisition of General Wool, who has this day been authorized to call upon you for such number of the volunteers, raised in conformity with my letter to you of the 25th of May last, who have been called into the service of the United States and not finally discharged, as it may be necessary to station in the State of Georgia. If all the volunteers who have been in the service of the United States have been finally discharged, you will then please place at the disposal of General Wool the requisite number out of those authorized to be organized by the aforementioned instructions of the 25th of May who have not been called out; and if the whole number mentioned in those instructions have been raised, called out, and finally discharged, I have to request that you will proceed to raise and organize, as soon as practicable, upon the principles heretofore made known to you, the number for which General Wool may make his requisition upon you.

That officer has been fully informed as to the principles upon which these troops are to be organized, and with respect to their employment, and it is presumed that he will correspond with you on these subjects.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

His Excellency WM. SCHLEY, *Governor of Georgia, Milledgeville, Georgia.*

WAR DEPARTMENT, *December 3, 1836.*

SIR: By a letter received within the last few days by the adjutant general of the army from Major General Jesup, it appears that that officer has made a requisition on your excellency for a regiment of volunteers to serve in Florida. The activity and zeal displayed by your excellency, and by the citizens of Georgia generally, on former occasions, in rendering to the government all the aid in your power in the suppression of the Indian hostilities at the south, leave but little doubt that the call of General Jesup has received your prompt attention. Still it seems proper to provide for the contingency of your not feeling yourself authorized to comply with the requisition, by apprising you of the approbation by the President thereof, and of this I have the honor to advise you.

General Jesup's communication does not make known whether he has made any provision for the transportation, subsistence, &c., of these troops; whether he has left it to your excellency to take the requisite measures in these respects, or whether the action of this department will be necessary; and it has therefore been deemed prudent to instruct the proper staff bureaus to inquire into the matter, and adopt such proceedings as may be required for the subsistence and arming and equipping of the corps, and its speedy transportation to Florida.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

His Excellency WM. SCHLEY, *Governor of Georgia, Milledgeville, Georgia.*

WAR DEPARTMENT, *January 8, 1836.*

SIR: Hostilities have been commenced by the Seminole Indians in Florida; and although there is just reason to believe that the regular and militia force employed there will be sufficient to subdue the Indians, still it is possible that their numbers and situation may enable them to carry on a protracted warfare.

Under these circumstances, the President has directed me to request you, should Brigadier General Clinch, commanding the troops in Florida, find it necessary to resort to the State of Alabama for additional force, to call into service upon his requisition, and place under his command, such number of militia as he may require.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa, Alabama.*

WAR DEPARTMENT, *January 21, 1836.*

SIR: The recent intelligence which has been received here, respecting the state of affairs in Florida, has rendered it expedient to order Major General Scott to proceed to that Territory and assume the direction of the operations against the Seminole Indians, and also against the Creek Indians, should these latter have engaged in hostilities, as, from recent information, there is some reason to apprehend.

I am instructed by the President to request you to call into the service of the United States, and to place under the command of Major General Scott, such portion of the militia of Alabama as he may require, to be employed in suppressing the hostilities of the above-mentioned Indians. It is expected that the militia thus called out will serve for at least three months after they arrive at the place of rendezvous, unless sooner discharged.

I beg leave to suggest that the authority thus conferred upon General Scott will enable him to increase, modify, or revoke any requisition which may have been made by General Clinch, in conformity with the letter I had the honor to address to you on the 8th instant. This authority will also supersede the powers intrusted to those officers on this subject as soon as General Scott shall have taken the personal direction of operations.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa, Alabama.*

WAR DEPARTMENT, *May 4, 1836.*

SIR: Major General Gaines, to whom the command of the western border of Louisiana has been assigned, has notified this department that he has called upon your excellency for a battalion of militia; the whole, or as many of them as practicable, to be mounted.

I am instructed by the President to request your excellency to call into the service of the United States the number of militia which have been or may be required by General Gaines, to serve not less than three months after their arrival at the place of rendezvous, unless sooner discharged.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa, Alabama.*

WAR DEPARTMENT, *May 5, 1836.*

SIR: I have the honor to acknowledge the receipt of your letters of April 15th and 18th ultimo, with their enclosures.

Having already, in my letter to you of the 15th of April, communicated the measures which the President had deemed proper to authorize to prevent or suppress any hostile efforts of the Creek Indians in the State of Alabama, it is not necessary that I should repeat what was therein stated. Recent information from Colonel Hogan leads to the belief that these Indians do not meditate disturbances. Should they do so, however, any force which you may find it necessary to call out for the protection of the inhabitants, agreeably to the views presented in my previous communication, will be received into the service of the United States. Until General Scott shall be enabled to direct his personal attention to the affairs of the Creek Indians, the discretion respecting the forces to be employed will be committed to you.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa, Alabama.*

WAR DEPARTMENT, *May 19, 1836.*

SIR: Brevet Brigadier General Jesup has been this day assigned to the command, by the direction of the President, of the troops of the United States, and the militia who have been or may be called into service, for the suppression of hostilities among the Creek Indians. He will proceed immediately to the scene of operations, with ample instructions for his government, and all the means that appear necessary for successful operation. The President requests that you would call out and place under his command such militia force as General Jesup may require. It is desirable that, as far as practicable, these should be volunteers, and engaged for six months, unless sooner discharged. But if it is necessary to resort to drafts, I presume the term of service cannot be extended beyond three months. General Jesup will be required to communicate fully from time to time with you, and I will thank you to give him the benefit of such suggestions as occur to you. Should Major General Scott, under the instructions heretofore given to him, proceed to the Creek country, he will have authority to assume the command; and, in that event, I have to request that you would give effect to any requisition that he may make upon you for a militia force.

A bill is pending before Congress, which provides for the raising a volunteer force. Should it pass previously to the organization of any force under these instructions, it would perhaps be more expedient to raise the troops required under this expected act. If it becomes a law within a short time, I will transmit it to you, with such observations as may appear necessary.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa, Alabama.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I have the honor to enclose herewith copies of two acts of Congress: one entitled "An act to provide for the payment of volunteers and militia corps in the service of the United States;" and the other, "authorizing the President of the United States to accept of the service of volunteers, and to raise a regiment of dragoons or mounted riflemen." I am instructed by the President to request that you would cause to be raised, in the State of Alabama, 2,000 volunteers, (privates,) to be placed immediately in the service of the United States. The act of Congress provides that the officers shall be appointed agreeably to the laws of the State or Territory where they are raised. Where corps already organized tender their services, they will be accepted with their present officers and organization. Where this is not the case, and the men are to be engaged individually, they will, in the first instance, be arranged into companies, then into battalions, regiments, brigades, and a division. Where existing volunteer corps do not tender their services, the basis of the organization will be the present militia laws of the United States. These are the acts of Congress of May 8, 1792; of January 2, 1795; of March 2, 1803; of April 18, 1814; and of April 20, 1816. An abstract accompanies this letter, showing the mode of organization and the number and rank of the officers. You will conform, in your arrangements, to the principles of these laws as herein explained; taking into view the act of Congress of May 8, 1792, in the 3d section of which the organization directed is limited to where the same may be convenient; and also the 4th section of the act of May 21, 1836, a discretionary authority appears to be vested in the President upon the subject of organization generally. It must, therefore, be controlled by the number of men required, and by other circumstances. Each company will consist of 50 privates, and of the number of officers, non-commissioned officers, and musicians designated in the abstract. You will organize the companies, as fast as raised, into battalions—five companies forming a battalion; two of these battalions will then constitute a regiment, two regiments a brigade, and two brigades a division. Should circumstances not enable you to raise the whole number specified, you must organize those who may volunteer upon these principles. It is to be hoped, however, that from the number of militia now in service the requisite force can be raised without difficulty or loss of time. One half of the whole number you raise may be mounted, and the other half infantry.

Major General Jesup will be instructed to have them mustered into service, and have them supplied with the necessary camp equipage, arms, &c. I need not urge upon you the necessity of the most prompt attention to this subject.

It is proper to observe that the provision in the 2d section of the act of May 21, 1836, which allows to volunteers a commutation for clothing when called into actual service, must be construed to give them a claim to such commutation from that time, which will be paid to them at the same time and in the same manner they receive their monthly pay. No other construction can be given to the law, as it is impossible to ascertain, until the end of the service, the whole amount of commutation which may be due to a volunteer.

The pay of these volunteers will not commence until they are called into service and they have reached the place of rendezvous; and they will, in all cases, be engaged to serve for twelve months, unless sooner discharged.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa, Alabama.*

WAR DEPARTMENT, *October 12, 1836.*

SIR: In carrying into effect the provisions of the recent Cherokee treaty, it is found indispensable to keep up a small military force in the country now occupied by those Indians; and the whole of the regular force being required elsewhere, it becomes necessary to resort to the employment of a portion of the volunteer force authorized by the act of the 23d of May last.

The propriety having been suggested to the President, and approved by him, of employing the number of volunteers required to be stationed in each of the different States within whose boundaries the Cherokee country lies, (from those States respectively,) he directs me to request your excellency to comply with the requisition of General Wool, who has this day been authorized to call upon you for such number of the volunteers raised in conformity with my letter to you of the 25th of May last, (who have been called into the service of the United States and not finally discharged,) as it may be necessary to station in the State of Alabama. If all the volunteers who have been in the service of the United States have been finally discharged, you will then please place at the disposal of General Wool the requisite number out of those authorized to be organized by the aforementioned instructions of the 25th of May, who have not been called out; and if the whole number mentioned in those instructions have been raised, called out, and finally discharged, I have to request that you will proceed to raise and organize, as soon as practicable, (upon the principles heretofore made known to you,) the number for which General Wool may make his requisition upon you.

That officer has been fully informed as to the principles upon which these troops are to be organized, and with respect to their employment, and it is presumed that he will correspond with you on these subjects.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa, Alabama.*

WAR DEPARTMENT, *December 3, 1836.*

SIR: By a letter received within the last few days, by the adjutant general of the army, from Major General Jesup, it appears that that officer has made a requisition on your excellency for five additional companies of volunteers. It is deemed proper to advise you of the approval by the President of this requisition, lest you might not feel authorized to comply with it, although the well-known disposition of your excellency, and of the citizens of Alabama generally, leave but little doubt that it has already received your prompt attention.

It has been deemed prudent also to instruct the proper staff bureaus of this department to take all necessary measures for the transportation, subsistence, &c., of these companies, and for their immediate transportation to Florida, as General Jesup's communication does not make known whether he has made any provision in these respects, whether he has left it to your excellency to do so, or whether any action by this department will be required.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

His Excellency C. C. CLAY, *Governor of Alabama, Tuscaloosa, Alabama.*

WAR DEPARTMENT, *April 25, 1836.*

SIR: I am instructed by the President to request that you will call into the service of the United States, upon the requisition of General Gaines, such portion of the militia of the State of Louisiana as that officer may deem necessary for the protection of the western frontier of that State. The term of service will be six months, to be computed from the day they reach their rendezvous, unless sooner discharged.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency E. D. WHITE, *Governor of Louisiana, New Orleans.*

WAR DEPARTMENT, *May 10, 1836.*

SIR: I have requested the quartermaster general to direct an officer of his department to report to your excellency, for the purpose of making the necessary arrangements for the embodying and movement of the forces called for by Major General Gaines, in his letter to you of the — ultimo, which was approved of by the President in my letter of the 4th instant.

This officer will be provided with whatever funds may be required in the performance of his duties. In my previous letter to you I requested that the troops might be called out for the term of six months, unless sooner discharged. This term you will be good enough to consider as applicable to volunteers, of which species of force I presume enough will turn out. Should you find it necessary, however, to resort to drafting, to complete the quota required under the provisions of the act of February 28, 1795, the term of service of the troops thus called out cannot be extended beyond three months.

You will be pleased, therefore, to have the volunteers engaged for the term of six months, unless sooner discharged. But should there be any insuperable objection to this arrangement, they must be accepted for three months after their arrival at the place of rendezvous, with the right, however, to discharge them at any time previously.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency E. D. WHITE, *Governor of Louisiana, New Orleans.*

WAR DEPARTMENT, *July 25, 1836.*

SIR: Major General Gaines has apprised this department that he has made a requisition upon your excellency for a regiment of mounted gunmen for the service of the United States.

Copies of the despatches received from General Gaines have been transmitted to the President of the United States, who will issue such orders upon them as he may think the circumstances require. Meantime I have the honor to inform you that, in order to prevent any inconvenience or delay in the event of the confirmation of General Gaines's requisition by the President, a disbursing officer will be ordered to proceed to the State of Louisiana with the necessary funds.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

His Excellency EDWARD D. WHITE, *Governor of Louisiana, New Orleans.*

WAR DEPARTMENT, *April 25, 1836.*

SIR: I am instructed by the President to request that you will call into the service of the United States, upon the requisition of General Gaines, such portion of the militia of the State of Mississippi as that officer may deem necessary for the protection of the western frontier of that State. The term of service will be six months, to be computed from the day they reach their rendezvous, unless sooner discharged.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency CHARLES LYNCH, *Governor of Mississippi, Jackson, Mississippi.*

WAR DEPARTMENT, *May 10, 1836.*

SIR: I have requested the quartermaster general to direct an officer of his department to report to your excellency, for the purpose of making the necessary arrangements for the embodying and movement of the forces called for by Major General Gaines, in his letter to you of the — ultimo, which was approved of by the President in my letter of the 4th instant.

This officer will be provided with whatever funds may be required in the performance of his duties. In my previous letter to you I requested that the troops might be called out for the term of six months, unless sooner discharged. This term you will be good enough to consider as applicable to volunteers, of which species of force I presume enough will turn out. Should you find it necessary, however, to resort to drafting, to complete the quota required under the provisions of the act of February 28, 1795, the term of service of the troops thus called out cannot be extended beyond three months.

You will be pleased, therefore, to have the volunteers engaged for the term of six months, unless sooner discharged. But should there be any insuperable objection to this arrangement, they must be accepted for three months after their arrival at the place of rendezvous, with the right, however, to discharge them at any time previously.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency CHARLES LYNCH, *Governor of Mississippi.*

WAR DEPARTMENT, *July 25, 1836.*

SIR: Major General Gaines has apprised this department that he has made a requisition upon your excellency for a regiment of mounted gunmen for the service of the United States.

Copies of the despatches received from General Gaines have been transmitted to the President of the United States, who will issue such orders upon them as he may think the circumstances require. Meantime I have the honor to inform you that, in order to prevent any inconvenience or delay in the event of the confirmation of General Gaines's requisition by the President, a disbursing officer will be ordered to proceed to the State of Mississippi with the necessary funds.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

His Excellency CHARLES LYNCH, *Governor of Mississippi, Jackson, Mississippi.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I have the honor to enclose herewith copies of two acts of Congress: one entitled "An act to provide for the payment of volunteer and militia corps in the service of the United States;" and the other, "authorizing the President of the United States to accept the services of volunteers, and to raise a regiment of dragoons or mounted riflemen." I am instructed by the President to request that you will cause to be raised in the State of Arkansas 1,000 volunteers, (privates,) to be called into the service of the United States whenever required. The act of Congress provides that the officers shall be appointed agreeably to the laws of the State or Territory where raised. Where corps already organized tender their services, they will be accepted with their present officers and organization. Where this is not the case, and the men are to be engaged individually, they will, in the first instance, be arranged into companies, then into battalions, regiments, and brigades. Where existing volunteer corps do not tender their services, the basis of the organization will be the present militia laws of the United States. These are the acts of Congress of May 8, 1792; of January 2, 1795; of March 2, 1803; of April 18, 1814; and of April 20, 1816. An abstract accompanies this letter, showing the mode of organization and the number and rank of the officers. You will conform in your arrangements to the principles of these laws as herein explained; taking into view the act of Congress of May 8, 1792, in the third section of which the organization is limited to where the same may be convenient; and also the fourth section of the act of May 21, 1836, a discretionary authority seems to be vested in the President on the subject of organization generally. It must, therefore, be controlled by the number of men and other circumstances. Each company will consist of fifty privates, and of the number of officers, non-commissioned officers, and musicians, designated in the abstract. You will organize the companies, as fast as raised, into battalions—five companies forming a battalion; two of these battalions will then constitute a regiment, and two regiments a brigade. Should circumstances not enable you to raise the whole number specified, you must organize those who may volunteer upon these principles. I trust, however, that the whole force desired can be raised without difficulty or loss of time. One half of it may be mounted men, and the other half infantry. Arrangements will be made for issuing the necessary arms and camp equipage, and for mustering the men into service as soon as they are needed. It is proper to observe that the provision in the second section of the act of May 21, 1836, which allows to volunteers a commutation for clothing, when called into actual service, must be construed to give them a claim to such commutation from that time, which will be paid to them at the same time and in the same manner they receive their monthly pay. No other construction can be given to the law, as it is impossible to ascertain until the end of the service the whole amount of commutation which may be due to a volunteer.

The pay of these volunteers will not commence until they are called into service and they have reached the place of rendezvous; and they will in all cases be engaged to serve for twelve months thereafter, unless sooner discharged.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency W. S. FULTON, *Governor of Arkansas, Little Rock, Arkansas.*

WAR DEPARTMENT, *July 13, 1836.*

SIR: I am instructed by the President to request that whenever General Gaines may call upon you for that purpose, you will call into the service of the United States such portion of the volunteers authorized to be raised by my letter to you of the 25th of May as he may require.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency W. S. FULTON, *Governor of Arkansas, Little Rock, Arkansas.*

WAR DEPARTMENT, *July 20, 1836.*

SIR: In consequence of information received from the acting superintendent of the western territory, I have been instructed by the President to request that you will call into service, upon the requisition of Brevet Brigadier General Arbuckle, such portion as he may deem necessary of the volunteers authorized to be raised by the letter from this department to you of May 25.

This authority to General Arbuckle is not intended to revoke the power given to General Gaines on the 11th instant, of which your excellency was advised on the 13th instant. But you will please to place them under the order of General Gaines or General Arbuckle, as either of these officers may be compelled, by the state of affairs, to make the first application for them. General Arbuckle has been instructed to communicate with General Gaines in relation to this matter.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

His Excellency WILLIAM S. FULTON, *Governor of Arkansas, Little Rock, Arkansas.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I have the honor to enclose herewith copies of two acts of Congress: one entitled "An act to provide for the payment of volunteers and militia corps in the service of the United States;" and the other, "authorizing the President of the United States to accept the services of volunteers, and to raise a regiment of dragoons or mounted riflemen." I am instructed by the President to request that you will cause to be raised in the State of Missouri 1,000 volunteers, (privates,) to be called into the service of the United States whenever required. The act of Congress provides that the officers shall be appointed agreeably to the laws of the State or Territory where raised. When corps already organized tender their services, they will be accepted with their present officers and organization; where this is not the case, and the men are to be engaged individually, they will, in the first instance, be arranged into companies, then into battalions, regiments, and brigades. When existing volunteer corps do not tender their services, the basis of the organization will be the present militia laws of the United States. These are the acts of Congress of May 8, 1792; of January 2, 1795; of March 2, 1803; of April 18, 1814; and of April 20, 1816. An abstract accompanies this letter, showing the mode of organization and the number and rank of the officers. You will conform in your arrangements to the principles of those laws as herein explained; taking into view the act of Congress of May 8, 1792, in the third section of which the organization is limited to where the same may be convenient; and also the fourth section of the act of May 21, 1836, a discretionary authority seems to be vested in the President on the subject of organization generally. It must, therefore, be controlled by the number of men and other circumstances. Each company will consist of fifty privates, and of the number of officers, non-commissioned officers, and musicians designated in the abstract. You will organize the companies, as fast as raised, into battalions—five companies forming a battalion; two of these battalions will then constitute a regiment, and two regiments a brigade. Should circumstances not enable you to raise the whole number specified, you must organize those who may volunteer upon these principles. I trust, however, that the whole force desired can be raised without difficulty or loss of time. One half of it may be mounted men, and the other half infantry. Arrangements will be made for issuing the necessary arms and camp equipage, and for mustering the men into service as soon as they are needed. It is proper to observe that the provision in the second section of the act of May 21, 1836, which allows to volunteers a commutation for clothing when called into actual service, must be construed to give them a claim to such commutation from that time, which will be paid to them at the same time and in the same manner they receive their monthly pay. No other construction can be given to the law, as it is impossible to ascertain, until the end of the service, the whole amount of commutation which may be due to a volunteer.

The pay of these volunteers will not commence until they are called into service and they have reached the place of rendezvous; and they will in all cases be engaged to serve for twelve months thereafter, unless sooner discharged.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency DANIEL DUNKLIN, *Governor of Missouri, Jefferson City, Missouri.*

WAR DEPARTMENT, *July 13, 1836.*

SIR: I am instructed by the President to request that whenever General Gaines may call upon you for that purpose, you will call into the service of the United States such portion of the volunteers authorized to be raised by my letter of the 25th of May as he may require.

This authority is not intended to revoke the power given to General Atkinson to apply for the service of these troops, as announced in my letter to you of June 6, 1836. But you will please to place them under the order of General Gaines or General Atkinson, as either of these officers may be compelled, by the state of affairs, to make the first application for them.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency DANIEL DUNKLIN, *Governor of Missouri, Jefferson City, Missouri.*

WAR DEPARTMENT, *May 4, 1836.*

SIR: Major General Gaines, to whom the command of the western border of Louisiana has been assigned, has notified this department that he has called upon your excellency for a brigade of militia; the whole, or as many of them as practicable, to be mounted.

I am instructed by the President to request your excellency to call into the service of the United States the number of militia which have been or may be required by General Gaines, to serve not less than three months after their arrival at the place of rendezvous, unless sooner discharged.

I am, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency N. CANNON, *Governor of Tennessee.*

WAR DEPARTMENT, *May 9, 1836.*

SIR: I have had the honor to receive your letter of the 28th ultimo, and, in answer, beg leave to state that my letter to you of the 4th instant will have conveyed to you the approbation of the President of the call made upon you by Major General Gaines for a brigade of volunteers or militia. Should you find it necessary to resort to drafting, in order to complete the quota required, I presume that, agreeably to the provisions of the act of February 28, 1795, the term of service of the troops thus called out cannot be extended beyond three months; and this is the term stated in my letter to you of the 4th instant. Where, however, the numbers are supplied by volunteers, I am not aware that there is any legal objection to their term of service reaching six months. And this arrangement is certainly more efficient and economical for the United States, and the President approves of it. They will, however, be liable to be discharged at any time when their services are not wanted.

In order to relieve the difficulties which present themselves in the raising and marching of these troops, the quartermaster general will immediately despatch an officer of his department provided with the necessary funds, and charged with the duty of making the arrangements required upon this occasion.

He will be directed to call upon your excellency, and procure all the information necessary to enable him to perform his duty.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

His Excellency N. CANNON, *Governor of Tennessee.*

WAR DEPARTMENT, *May 25, 1836.*

SIR: I have the honor to enclose herewith a copy of two acts of Congress: one entitled "An act to provide for the payment of volunteers and militia corps in the service of the United States;" and the other, "authorizing the President of the United States to accept the services of volunteers, and to raise an additional regiment of dragoons or mounted riflemen." I am instructed by the President to request that you would cause to be raised in the State of Tennessee 2,500 volunteers, to be called into the service of the United States whenever they may be required. The act of Congress provides that the officers shall be appointed agreeably to the laws of the State or Territory where they are raised. Where corps already organized tender their services, they will be accepted with their present officers and organization. When this is not the case, and the men are to be engaged individually, they will, in the first instance, be arranged into companies, then into battalions, regiments, brigades, and divisions, agreeably to the numbers called out in the United States, respectively. When existing volunteer corps do not tender their services, the basis of the organization will be the present militia laws of the United States. These are the acts of Congress of May 8, 1792; of January 2, 1795; of March 2, 1803; of April 18, 1814; and of April 20, 1816. An abstract accompanies this letter, showing the mode of organization and the number and rank of the officers. You will conform in your arrangements to the principles of these laws as herein explained; taking into view the act of Congress of May 8, 1792, in the 3d section of which the organization directed is limited to where the same may be convenient; and also the 4th section of the act of May 21, 1836, a discretionary authority appears to be vested in the President upon the subject of organization generally. It must, therefore, be controlled by the number of men required, and by other circumstances. The officers will be appointed in strict conformity with these laws, and, so far as practicable, each company will contain 64 privates. Where, however, that number cannot be procured, a less number will be accepted; but in no case will a company consist of less than 50 privates. You will organize the companies immediately into battalions, placing five companies in each battalion. These battalions will then be united into regiments, two battalions forming a regiment; two regiments will form a brigade. Should you organize the whole force into four regiments, in which case the whole number of men may be extended to 2,560, these will form two brigades and one division. But should you find it necessary to organize it into five regiments, then two of these regiments will form a brigade, and the other three will form another. As fast as the companies are filled your organization will go on; and the President requests me to say that he begs you will be as prompt as possible in the arrangement of this whole matter, so as to have the volunteers ready for immediate service. It is desirable that, as nearly as may be, one half of these troops should be raised in East Tennessee, and the other half in West Tennessee. The whole of the West Tennessee quota may be mounted men. One half of the East Tennessee quota may be mounted men, and the other half infantry.

It is proper to observe that the provision in the 2d section of the act of May 21, 1836, which allows to volunteers a commutation for clothing when called into actual service, must be construed to give them a claim for such commutation from that time, which will be paid to them at the same time and same manner as they receive their monthly pay. No other construction can be given to the law, as it is impossible to tell till the end of the service the whole amount of commutation which will be due to a volunteer.

As soon as the West Tennessee brigade is in readiness, it will be called into the service of the United States. Captain Alpha Kingsley, of Nashville, will be authorized to muster them into service. An officer of the army will be immediately ordered to Nashville with the necessary funds to defray all the expenses which may be incurred.

The President is of the opinion that the State of Tennessee has arms enough at Nashville which could be used by these troops. If this be the case, I trust you will arm the men, with them and they shall immediately be replaced by others. I will, however, write to you on this subject again to-morrow, as Colonel

Bomford has gone up to ascertain from the Tennessee delegation whether the State has a supply of arms in depot at Nashville.

At any rate, and to avoid disappointment after the route of the troops is determined, a supply of arms shall be immediately placed at some proper position upon it. I suppose Mount Vernon arsenal is the nearest one from which they can be procured. The commanding officer of the brigade will be required to proceed immediately to the Creek country, and to report himself to Major General Jesup, who has the direction of the operations now carrying on against the Creek Indians.

The pay of the other brigade will commence as soon as they are called into service and have reached the place of rendezvous; and they will in all cases be engaged to serve twelve months thereafter, unless sooner discharged.

Be pleased to advise me of your proceedings.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency N. CANNON, *Governor of Tennessee, Nashville, Tennessee.*

Memorandum of the organization of the militia.

A company of infantry to consist of 1 captain, 1 lieutenant, 1 ensign, or, in lieu thereof, 1 second lieutenant, if the laws of the State or Territory make provision for it; 4 sergeants, 4 corporals, 1 drummer, 1 fifer or bugler; privates, the number stated in the instructions

A battalion to consist of 1 major, 5 companies.

A regiment to consist of 1 colonel, 1 lieutenant colonel, 1 major, 2 battalions.

Regimental staff: 1 adjutant,* 1 quartermaster,* 1 paymaster,* 1 surgeon, 1 surgeon's mate, 1 sergeant major, 1 drum major, 1 fife major.

A brigade to consist of 1 brigadier general, 2 or more regiments, as stated in the instructions.

Brigade staff: 1 brigadier general, 1 aide-de-camp,* 1 brigade major and inspector,* 1 brigade quartermaster.*

A division to consist of 2 brigades.

Division staff to consist of 1 major general, 2 aides-de-camp,* 1 division inspector,* 1 division quartermaster.*

WAR DEPARTMENT, *June 20, 1836.*

SIR: I have the honor to enclose a copy of the treaty recently concluded with the Cherokee Indians for the cession of their lands east of the Mississippi river. As a portion of the territory possessed by them is in the State of Tennessee, I enclose for your information a copy of the instructions to Brigadier General Wool.

I am directed by the President to request you, should General Wool deem any force from the State of Tennessee necessary, in addition to the volunteer force which is to be placed under his orders, to call into the service of the United States, upon his requisition, such an additional militia force from the State of Tennessee as he may require.

They will be called out for a term not less than three months, unless sooner discharged, and will be officered agreeably to the militia laws of the United States.

General Wool will cause necessary measures to be taken for mustering them into the service of the United States.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency N. CANNON, *Governor of Tennessee, Nashville, Tennessee.*

WAR DEPARTMENT, *June 20, 1836.*

SIR: I have had the honor to receive your letter of the 7th instant, on the subject of the quota of volunteers assigned to the State of Tennessee, and I am directed by the President to express to you his gratification at the prompt measures you have adopted in order to raise these troops. As all the calls under the late volunteer act have been made for twelve months, and as it is presumed ere the receipt of this your arrangements for this object will have been completed, the President feels unwilling to reduce the term of service from twelve to six months. Should you, however, have found it necessary, in order to raise this force, to give them any assurances that they should serve but six months, the President will give effect to such assurances, and will approve of that period of service.

It was not my intention, in writing the letter of the 25th ultimo, to call into immediate service the brigade of East Tennessee volunteers.

But, as circumstances have turned out, the measure has been a judicious one, and I am happy to find that you have adopted that course. As you will perceive by the instructions to General Wool, they will be immediately placed in the service of the United States.

I regret it is not in my power to direct the payments to be made to the militia called out by General Gaines. An appropriation for the purpose of meeting those and other expenses was asked of Congress; but, in consequence of the change of circumstances upon the western frontier, the subject was not acted upon, as it was not known that any expense had been or would be incurred. I shall, however, to-day, report the circumstances to the chairman of the Committee of Ways and Means, and request an appropriation for the payment of these claims.

*To be taken from the line, or otherwise, as the State or territorial laws prescribe.

I have to thank you for your readiness in supplying the State arms for the use of the volunteers. They shall be replaced, and whenever you may require.

Should you have commissioned a major general of volunteers, you will please to direct him to take command of the western brigade and proceed with them without delay, and report to the officer of the United States army having the direction of the operations against the Creek Indians. A portion of them will be required to aid in the defence of Florida.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency N. CANNON, *Governor of Tennessee, Nashville, Tennessee.*

WAR DEPARTMENT, *June 24, 1836.*

SIR: I have had the honor to receive your letter of the 13th instant, stating the measures you have taken to raise the volunteers assigned to the State of Tennessee, and I have to thank you for the judicious arrangements you have made. My letter to you of the 20th instant will have obviated the difficulty suggested, respecting the troops of East Tennessee not being called into service.

I supposed, from the perusal of your letter of the 7th, that you had ordered them into service. But in this I was under a misapprehension. Still, however, subsequent circumstances have rendered it proper that they should be immediately called out; and I therefore requested in my letter of the 20th that they should be placed under the command of Brevet Brigadier General Wool, to be employed at present in the Cherokee country.

And I have again to ask that you would call them into the immediate service of the United States, and place them under the command of General Wool, who has received instructions for their employment.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency N. CANNON, *Governor of Tennessee, Nashville, Tennessee.*

WAR DEPARTMENT, *July 25, 1836.*

SIR: Major General Gaines has apprised this department that he has made a requisition upon your excellency for a regiment of mounted gunmen for the service of the United States.

Copies of the despatches received from General Gaines have been transmitted to the President of the United States, who will issue such orders upon them as he may think the circumstances require. Meantime I have the honor to inform you that, in order to prevent any inconvenience or delay in the event of the confirmation of General Gaines's requisition by the President, a disbursing officer will proceed to the State of Tennessee with the necessary funds.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

His Excellency NEWTON CANNON, *Governor of Tennessee, Nashville, Tennessee.*

WAR DEPARTMENT, *July 30, 1836.*

SIR: I have the honor to acknowledge the receipt of your letter of the 9th instant. In conformity with the arrangement communicated to your excellency on the 25th instant, Captain J. P. Taylor has received instructions for making the necessary payments for the volunteers in Tennessee. If that officer shall have returned to Kentucky, Lieutenant S. B. Dusenbury, who is on duty there, has been ordered to repair to Tennessee, and make the necessary disbursements.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

His Excellency N. CANNON, *Governor of Tennessee, Nashville, Tennessee.*

WAR DEPARTMENT, *July 25, 1836.*

SIR: Major General Gaines has apprised this department that he has made a requisition upon your excellency for a regiment of mounted gunmen for the service of the United States.

Copies of the despatches received from General Gaines have been transmitted to the President of the United States, who will issue such orders upon them as he may think the circumstances require. Meantime I have the honor to inform you that, in order to prevent any inconvenience or delay in the event of the confirmation of General Gaines's requisition by the President, a disbursing officer will be ordered to proceed to the State of Kentucky with the necessary funds.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

His Excellency JAMES T. MOREHEAD, *Governor of Kentucky, Frankfort, Kentucky.*

WAR DEPARTMENT, *June 20, 1836.*

SIR: I have the honor to enclose a copy of the treaty recently concluded with the Cherokee Indians for a cession of their lands east of the Mississippi river.

As a portion of the territory possessed by them is in the State of North Carolina, I transmit for your information a copy of the instructions to Brigadier General Wool.

I am directed by the President to request you, should General Wool make a requisition, to call into the service of the United States such militia force from the State of North Carolina as he may require. They will be called out for a term not less than three months, unless sooner discharged, and will be officered agreeably to the militia laws of the United States.

General Wool will cause the necessary measures to be taken for mustering them into the service of the United States.

Very respectfully, your most obedient servant,

LEWIS CASS.

His Excellency R. D. SPAIGHT, *Governor of North Carolina, Raleigh, North Carolina.*

WAR DEPARTMENT, *October 12, 1836.*

SIR: General Wool has this day been instructed to call on you for volunteers, under the act of the 23d of May last, should it become necessary to require from the State of North Carolina a military force to be stationed, during the execution of the provisions of the recent Cherokee treaty, in the section of the Cherokee country lying within the limits of that State. And I am directed by the President to request your excellency to comply with any requisition which General Wool may make for such volunteer force.

I enclose you a copy of the act alluded to, together with an extract from a letter from this department to the governors of the States of Georgia and Alabama of the 25th of May last, and a copy of a memorandum which accompanied it.

Should General Wool apply to you for volunteers, they must be organized according to the principles laid down in the above extract and memorandum, and be required to serve at least twelve months after arriving at the place of rendezvous, unless sooner discharged. The general has been fully informed with respect to the organization of these troops and their employment, and it is presumed will correspond with you on the subject.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

His Excellency R. D. SPAIGHT, *Governor of North Carolina, Raleigh, North Carolina.*

WAR DEPARTMENT, *December 9, 1835.*

SIR: Your letter of the 29th ultimo to the adjutant general has been laid before me.

I am instructed by the President to say to you that the conduct of the Seminole Indians appears to be such as to justify the intention you avow of calling out one hundred mounted men for the protection of the frontiers.

That measure is, therefore, approved. And I have this day addressed a letter to the governor of Florida, requesting him, if any additional military force be necessary, to order it out upon your requisition. But while it is the desire of the President that competent force should be employed to check or repress any hostilities of the Indians, he is also anxious that no greater number of troops be called into service than is requisite, on account of the expense which would attend such a measure; and I trust the number you have stated will be sufficient.

If the Indians have commenced hostilities, or have placed themselves in an attitude that leaves no doubt of their intention to do so, the President instructs me to say to you that he wishes you to bring your whole force to operate immediately upon them, so as to subdue them as quickly as possible. When this shall have been accomplished, you will embark them in the vessels provided, accompanied by the necessary guards, and have them transported immediately, agreeably to the previous arrangements, to the country set apart for them west of the Mississippi.

Should, however, hostilities not have been commenced nor appear to be meditated by the tribe, or any considerable portion of them, but should any murders have been committed by them, which will render them amenable to our laws, you will take prompt measures for the apprehension of the offenders, and will employ the proper force for that purpose, unless they be immediately surrendered upon your demand.

At the request of General Hernandez, of the Florida militia, instructions have been given through the Ordnance office to issue, upon his requisition, five hundred muskets and the necessary accoutrements and ammunition, to be used in the protection of the frontier settlements.

Very respectfully, your most obedient servant,

LEWIS CASS.

Brevet Brigadier General CLINCH, *Fort King, Florida.*

WAR DEPARTMENT, *January 8, 1836.*

SIR: As it is impossible here to foresee how long the Seminole Indians may be able to protract the warfare in which they are engaged, and whether the governor of Florida may have it in his power to furnish you with such militia force as circumstances may require, the President has directed that letters should be written to the governors of South Carolina, Georgia, and Alabama, requesting them to call into service, and place under your command, such additional militia force as you may deem necessary to the vigorous prosecution of the objects in which you are engaged.

This has been done. The measure itself is one of precaution, and not of probable necessity. I have, myself, little doubt but the governor of Florida can furnish you with all the militia force necessary to put an immediate termination to the hostilities of the Indians.

Should it be otherwise, however, you are at liberty to make such requisitions upon the governors of South Carolina, Alabama, and Georgia, as the state of affairs may require.

The President is very desirous that you shall push your operations with the greatest possible vigor. Do not wait to be attacked by the Indians, nor unnecessarily divide your force and allow yourself to be cut up in detail, but embody your whole strength and attack the Indians wherever you may find them.

While you must not withhold any necessary expenditure, you will still use all just and reasonable economy; and, more particularly, you will endeavor to have the public property that may be issued, and which is too apt to be scattered and lost upon these occasions, to be properly received and ultimately accounted for.

Very respectfully, your most obedient servant,

LEWIS CASS.

Brigadier General CLINCH, *Fort King, Florida.*

WAR DEPARTMENT, *January 17, 1836.*

SIR: It was hoped that the arrangements which have been made would have been sufficient to subdue the Seminole Indians in Florida, and at the same time protect the inhabitants from their depredations. Accounts, however, just received from the theatre of operations, exhibit such a lamentable state of things that it is indispensably necessary for the government to take all such additional measures as circumstances may require to put an immediate termination to these hostilities.

The general command in the Territory, as you are aware, is intrusted to Brevet Brigadier General Clinch. The following are the arrangements which have been authorized by this department: General Clinch has, subject to his control, fourteen companies of United States troops. He has been authorized to call upon the governors of South Carolina, Georgia, Alabama, and Florida, for any additional force he may deem necessary. He has also been authorized to order, from the nearest arsenal, any arms and ammunition he may require. The same power has also been extended to the governor of Florida, and instructions have been issued for sending from the arsenal at Augusta, upon the requisition of General Hernandez, of the Florida militia, five hundred muskets, with their accoutrements, and the necessary ammunition. The United States sloop-of-war *Vandalia* has been ordered to co-operate with General Clinch, and her commanding officer has been directed to receive his instructions. Two revenue cutters, one from Mobile and one from Key West, have been directed, in like manner, to receive the orders of General Clinch on the southwest coast of Florida, and the revenue cutter at Charleston has been ordered to proceed, with similar instructions, to the *St. John's*. There are no late official despatches received from General Clinch, but newspaper accounts give information of a severe action having been fought with the Indians, which, however, led to no decisive result, and that the militia force which had been called out was about to return home.

From the position of General Clinch, the communication with him is difficult and uncertain, and it may be that he has not received all the despatches from this department. You are so much nearer the scene of difficulties that correct information will reach you much earlier than here, and you would have it in your power, therefore, to adopt such measures as impending circumstances may require. I have stated the arrangements which have been authorized, that you may have before you a full view of the facts so far as they are known to me.

The proper course of proceeding must now be intrusted to your own discretion, and you will be guided by such information as may have reached you at the time you may receive this letter.

It is, of course, very desirable to this department that the forces to be collected and brought into service should not be in an undue proportion to the circumstances, and thereby occasion serious and unnecessary expense to the government. Still, I would not have you hesitate for a moment in taking the measures hereinafter indicated on account of the expense, if the state of things in Florida should show that the contest is yet protracted, and the inhabitants exposed to Indian depredations. You are authorized to order the garrisons at Charleston and Savannah to proceed immediately to *St. Augustine*. A few men must be left at each place in charge of the works and public property.

A letter has this day been written to the governor of South Carolina, requesting him to call out, upon your requisition, such militia force as you may deem necessary; a duplicate of which is herein enclosed, to be transmitted to him by you, lest the one sent direct from this department might fail.

You are also authorized to accept such volunteer corps as may be desirous of tendering their services for this purpose. You will please to proceed without delay with this force to *St. Augustine*, and there assume the general direction of the operations until you can open a communication with General Clinch, when you will, of course, be subject to such instructions as he may give you. His orders are to allow the Indians no pacification until they are reduced to unconditional subjection, and until they consent to embark in the vessels provided for them for their transportation to the country west of the Mississippi. They will be kept in proper security until they are ready to embark.

These general principles will regulate you so far as you are required to act previously to your communication with General Clinch. You will also take with you such arms and ammunition from Charleston and Augusta as you may deem necessary, both for the regular force and the militia. As a matter of precaution, 60,000 rations were, some time since, directed to be purchased at New York, and they are now on the way to *St. John's*. Should more be required before they can be supplied from the north, you will cause the necessary purchases to be made.

The necessity of acting without delay on this occasion appears so urgent that this letter will probably reach you before the military instructions founded upon it, which will be issued from the proper army bureaus. They will be despatched, however, as soon as they can be prepared. In the meantime you will not hesitate to proceed in all your arrangements; and all the necessary expense which may be incurred under your orders will be met by bills which you are authorized to have drawn upon this department.

You will perceive that the instructions herein given are precautionary. If you shall have ascertained that the Indians are subdued, or that General Clinch has himself called out a sufficient force, you will not then proceed to carry into effect the directions herein given. A copy of this letter has been sent to General Clinch for his information.

Very respectfully, your most obedient servant,

LEWIS CASS.

Brevet Brigadier General A. EUSTIS, *Charleston, South Carolina.*

WAR DEPARTMENT, *January 21, 1836.*

Sir: You will please to repair without unnecessary delay to Florida, and assume the direction of the operations against the Seminole Indians.

I enclose for your information copies of the various instructions which have issued from this department for the suppression of the hostilities of these Indians, and of such other papers as may be necessary to put you in full possession of the state of affairs in that quarter. I enclose also duplicate letters to the governors of South Carolina, Georgia, Alabama, and Florida, requesting them to call into the service of the United States such militia force as you may deem necessary, and advising them that the authority thus conferred upon you will enable you to increase, modify, or revoke any requisition which may have been made in pursuance of the powers granted to Generals Clinch and Eustis to call upon the executives of those States and of the Territory for any militia force. Their powers also to call for such force will cease on your assumption of the command.

It is impracticable here to prescribe the amount of force which ought to be carried into the field; that must depend upon the actual circumstances which you may find existing when you reach the scene of operations. It is, of course, highly desirable that no unnecessary force should be employed, as the expense may be thereby greatly increased; still I would not have you hesitate for a moment in calling out such a number of militia as will enable you with promptitude and certainty to put an immediate termination to these difficulties. The horrors of such a warfare are too great to run any risk in its immediate suppression. This subject is, therefore, committed entirely to your own discretion.

The difficulties with these Indians have arisen from their indisposition to comply with the terms of a treaty concluded some time since with Colonel Gadsden. That treaty provided for their removal west of the Mississippi. But when the period of its execution arrived, it was found that a considerable portion of the Indians were unwilling to remove. As they had ceded their whole country in Florida, it was impossible to permit them to remain there, as they would have become a lawless banditti, liable at all times to commit depredations upon the settlements. After much discussion with the agents of the government, the Indians finally agreed that, if their removal were postponed till this winter, they would voluntarily emigrate. When the arrangements began to be made for carrying this agreement into effect, a spirit of disaffection appeared, which led first to the murder of one or more of our own citizens, and then of some of their own chiefs, who were disposed to carry into effect the agreement that had been made. This state of things was soon followed by open hostilities.

Copies of the earlier communications to and from General Clinch, which are herewith enclosed, will put you in possession of all the necessary facts.

I shall state very generally the measures which have been directed by this department.

General Clinch is in command of the troops in Florida. He had placed at his disposal fourteen companies of the army. But how many of these have actually reached that part of the country, and are now acting with General Clinch, is not known to this department. He was some time since authorized to call upon the governor of Florida for such militia force as he might deem necessary; and, more recently, similar authority was extended to him to call upon the governors of South Carolina, Georgia and Alabama; and a sloop-of-war and two revenue cutters have been ordered to report to General Clinch, and to co-operate with him on the southwest coast of Florida, and another revenue cutter on the eastern coast.

You will perceive by the accompanying copy of a letter to General Eustis that, in consequence of the unofficial, but no doubt authentic statements, which reached here a few days since, respecting the recent action with the Indians and the destruction of the settlements, authority was given to him to call upon the governor of South Carolina for what militia force he might require, and to accept such volunteer corps as might offer; and to proceed with this force, and with the garrisons of Charleston and Savannah to St. Augustine, and there to assume the command, and open a communication with General Clinch. You will also see that General Eustis has detached one company from Charleston to St. Augustine.

In addition to the duplicates herewith enclosed to the several executives above mentioned, another will be transmitted to each of them by mail. On your arrival at Charleston you will probably be able to ascertain the precise state of affairs in Florida, and to take your measures accordingly. These you will please adopt without delay.

Should you deem it important to have a personal communication with the governor of South Carolina or Georgia, you are at liberty so to do; your own route, however, to the scene of operations in Florida must depend upon another circumstance. Letters from Governor Eaton, General Call, and Colonel Gadsden, copies of which are enclosed, leave but little doubt that some of the Creek warriors have joined the Seminoles. To what extent this disaffection may have proceeded we have not here the means of ascertaining; but from the number and position of the Creek Indians, it is highly important, if they evince any disposition to join the hostile Indians in considerable numbers, that the most vigorous measures should be adopted to check this spirit. It is probable that you will be enabled to obtain such intelligence in South Carolina as may enable you to form a correct estimate of the danger to be apprehended from this source; and if there is reason to believe that the Creeks are in a hostile state, or they meditate it, you will then call into the field such militia force as may be necessary to occupy the Creek country in Alabama, and immediately to reduce these Indians to submission. Should, however, there be no cause for alarm on this subject, your undivided efforts will be directed to the Seminoles.

Whatever expenditures may be rendered necessary you will please direct, and the proper staff officers under your command will be furnished with such funds as may be required to meet them. One hundred and twenty thousand rations were some time since ordered as a precautionary measure to the St. John's. Whatever additional supplies may be required from the subsistence department will be procured upon your orders. The arsenals at Augusta, in Georgia, and at Mount Vernon, in Alabama, and the ordnance depot in Charleston, will issue such arms and ammunition as you may find necessary. I have to request that you will ascertain from the various staff departments at this place the arrangements which have been made, and which are necessary for the transportation, pay, subsistence, and operations of the regular force and militia which will be under your command. The great expense and inefficiency of the militia, when called out for too short a time, render it indispensable that no force of that description should be received into service for a shorter period than three months from the time of their arrival at the place of rendezvous, to be disbanded previously if their services should not be so long required.

You will take care to have the militia regularly mustered into service, and that the number of officers is in proper proportion to the number of men.

I have also to request that you will give the necessary instructions for the preservation and accountability of the public property. There is upon these occasions too often so great a waste, particularly when a militia force is brought into the field, that great circumspection should be used.

You will see by some of the accompanying documents that many of the negroes have been captured by the Indians, and that there is reason to apprehend they will be transported to Cuba. I have to ask your particular attention to the measures indicated to prevent the removal of those negroes and to insure their restoration. You will allow no terms to the Indians until every living slave in their possession belonging to a white man is given up.

Governor Eaton has also suggested, as his letter will show, that some of the fishing vessels on the coast of Florida are engaged in co-operating with the Indians. This subject should be immediately investigated, and I refer you for the proper measures to the suggestions contained in the letter of yesterday to General Clinch.

I have also to request that you will communicate freely with Governor Eaton and advise him of your movements. So far as any expense may have been encountered by his direction in the defence of the Territory, which can be met by this department agreeably to the usages of the service, you will be ordered to be paid on the proper vouchers. But if doubts exist as to whether they are legally payable without a specific appropriation therefor, you will refer them here for consideration.

The line dividing your own department from that of General Gaines is at present an imaginary one, and probably would, if run, actually pass through the scene of hostilities. You will pursue your operations, therefore, without regard to any such divisionary line.

General Clinch has been instructed to allow the Indians no pacification till they are unconditionally subdued, and till they consent to an immediate embarkation for the country west of the Mississippi. This point you will particularly advert to, as also to that branch of the instructions to General Clinch which directs him to deliver over to the civil authorities such of the Indians as were guilty of individual outrages before the commencement of hostilities. If the Creeks have engaged or should engage in these hostilities, you will in like manner promptly subdue them, and make it an indispensable condition of peace being granted to them that they depart, as soon as the government can make the proper arrangements, for their country west of Arkansas. In both of these cases it will be proper that a vigilant supervision be exercised over these Indians till their removal, and that they be accompanied by such a force as will keep them quiet. Their arms and ammunition will be taken from them and not restored till they shall have reached their new country; and even then a discretion must be exercised by the military commanding officer in that quarter to withhold them for as long a period as he may think proper if the Indians evince any spirit of disaffection. Colonel Hogan is the principal agent for the removal of the Creek Indians. He will be directed to report to you and to receive your instructions; and he will be able to communicate to you all the necessary information respecting the views of the government on the subject of the removal of these Indians, and their mode of proceeding.

General Clinch will give you similar information concerning the Seminoles, as he has been for some time in communication with them, and understands fully the views of the department. General Thompson, the principal removing agent, has been killed, and General Clinch has been requested to assign an officer to do his duty.

Reposing entire confidence in the arrangements you may make, and in the promptness and vigor of your movements, I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

Major General WINFIELD SCOTT.

WAR DEPARTMENT, *May 16, 1836.*

SIR: I enclose for your information a copy of a letter this day addressed to Governor Call.

The general views of the President as to the measures necessary for the defence of Florida are therein stated, and this letter, together with that to you of May 5 from the adjutant general, will communicate all the information which seems requisite as to the opinions entertained here upon the subject. I have to request that you would make such arrangements as the circumstances call for, so as to afford adequate protection to the settlements until it shall be deemed proper again to renew offensive operations. General Clinch has tendered his resignation, but the President is not willing to accept it, having confidence in his experience and military capacity. You are at liberty to leave Florida and resume the command of your department whenever you think you can do so with a just regard to the public interest. You will turn over the command to Brigadier General Clinch, or, if he leave the service, to the next officer in rank, furnishing such instructions as you shall think proper.

The latest information from the Creek country in Alabama leads to the opinion that the Creek Indians meditate hostilities. The governors of Alabama and Georgia have been authorized to call out such militia as may be necessary, and General Fenwick has been ordered to proceed to that country with six companies of artillery. It is desirable that you should direct your personal attention to that quarter, and, if necessary, assume the command; calling for such militia force, under your instructions of January 21, as you may find necessary.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

Major General W. SCOTT.

[One to St. Augustine, Florida; one to Charleston, S. C.]

WAR DEPARTMENT, *April 25, 1836.*

SIR: Your letter of the 29th ultimo was received at the department a few days since, but I have been prevented by indisposition from giving it an earlier answer.

I enclose for your information a copy of the memorandum of an official conference between the Secretary of State and the Mexican minister, respecting the present state of affairs upon the southwestern borders of the United States. You will consider as a part of your instructions the declaration made by the Secretary of State, and govern yourself accordingly.

It is not the wish of the President to take advantage of present circumstances, and thereby obtain possession of any portion of the Mexican territory. Still, however, the neutral duties, as well as the

neutral rights of the United States, will justify the government in taking all necessary measures to prevent a violation of their territory. Recent events induce the belief that the Mexican forces, as well as the inhabitants of Texas, must be in a high state of excitement. In that portion of the country there are many Indian tribes, whose habitual predisposition to engage in war is well known, as is also their reckless disregard of any of the claims of humanity; and from information which has reached the government there is too much reason to believe that efforts have been made to induce those Indians to join the Mexican troops. It may, therefore, well be, as you anticipate, that these various contending parties may approach our frontiers, and that the lives and property of our citizens may be placed in jeopardy. Should this be the case, the President approves the suggestion you make, and you are authorized to take such position, on either side of the imaginary boundary line, as may be best for your defensive operations. You will, however, under no circumstances, advance further than Old Fort Nacogdoches, which is within the limits of the United States, as claimed by this government. But you will please observe that this permission will not be exercised, unless you should find such an advanced position necessary to afford due security to the frontier, in consequence of the unsettled state of things beyond you.

You will please to explain fully your views and instructions to any armed parties who may be marching towards you; and should they continue to threaten our positions, or to manifest a design of crossing into the United States, you are authorized to attack and repel them.

I have this day, by the direction of the President, requested the governors of Louisiana and Mississippi to call into service any militia force you may find necessary for the protection of the frontiers. This force must be called out for a term not less than six months from the day they reach their rendezvous, to be discharged at any time by the United States. The necessary means will be furnished to the officers of the proper staff departments for such supplies as may be required.

I need hardly say that the duty committed to you is one of great importance, as well as of great delicacy; and I do not doubt it will be so executed as to preserve, on the one hand, the proper safety of the frontier, while, on the other hand, as little cause of offence as possible will be given to any foreign authority. I have to request that you would keep me regularly advised of your proceedings.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

Major General E. P. GAINES, *Fort Jesup, Louisiana.*

WAR DEPARTMENT, *May 9, 1836.*

SIR: I have received a letter from the governor of Tennessee, in which he states that he has taken measures to call out the force required by you; and also states that he will call upon the volunteers to serve for six months, unless sooner discharged. This course is correct, upon the presumption that he will be able to obtain all the force required without resort to drafting. But should not volunteers enough be obtained, so that a call must be made upon the ordinary militia, the term for which they may be required to serve is restricted by law to three months. I have also written to the governors of the other States, upon whom you are authorized to make requisitions, advising them of this view.

The quartermaster general has also been instructed to direct proper officers of his department to report to the several governors upon whom you have made requisitions, in order to provide the necessary means for facilitating the movement of the troops.

I am, sir, very respectfully, your obedient servant,

LEWIS CASS.

Major General GAINES, *Fort Jesup, Louisiana.*

WAR DEPARTMENT, *July 11, 1836.*

SIR: I have received and submitted to the President your letter of June 7, together with the report made to you by Captain Dean.

I am apprehensive from the tenor of this report, as well as from your observations, that the frontier has much to fear from the hostilities of the Indian tribes living in Texas. On this subject it is proper to call your attention to the instructions previously issued to you, and to say to you that if the conduct of the Indians in Texas threatens the frontier whose defence is intrusted to you, and you consider it necessary, with a view to its protection, to advance as far as Nacogdoches, you will do so without hesitation. If the authorities in that country cannot prevent bodies of savages from approaching our frontier in arms, the necessary precautionary measures must be taken by you. This is the view of the President.

Under the late volunteer act the governors of Missouri and Arkansas have been requested to raise each one thousand volunteers—one half mounted and the other half infantry—to be called into service whenever required. Should circumstances render an increase of your force necessary, you are at liberty to call for any of those volunteers that may be required. The executives of Arkansas and Missouri have this day been requested to call into service any portion of this force upon your requisition. The details respecting arms, mustering, &c., are referred to you.

Very respectfully, your most obedient servant,

LEWIS CASS.

Major General EDMUND P. GAINES, *Camp Sabine, Fort Jesup, Louisiana.*

WAR DEPARTMENT, *July 22, 1836.*

SIR: I have the honor to acknowledge the receipt of your letter of June 28, with the enclosed papers. The President has left the city, but copies of these despatches will be sent to him in Tennessee. Meantime the requisite instructions have been given to the proper military bureaus, to take measures to render effective the employment of the troops for which you have made requisitions upon the governors of Kentucky, Tennessee, Mississippi, and Louisiana.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Brevet Major General EDMUND P. GAINES, *Camp Sabine, Fort Jesup, Louisiana.*

WAR DEPARTMENT, *May 19, 1836.*

Sir: By direction of the President you are hereby assigned, as a brevet major general, to the command of the troops of the United States and the militia which may be called into service from Georgia and Alabama for the suppression of hostilities in the Creek country. Intelligence just received from that quarter shows that hostilities have commenced on the part of the Creek Indians against our settlements. You will, therefore, repair without delay to that quarter, and take such measures as you may find necessary for the reduction of the Indians. You will receive from the adjutant general a statement of the regular force which has been ordered to that quarter. In addition to this, the governors of Georgia and Alabama have been authorized to call into the field such of the militia as they might find necessary in the event of actual disturbances among the Indians, or of such a state of things as should leave no doubt that they meditate them.

Letters have this day been addressed to the governors of those States requesting them to call into the field such militia force as you may require. It would be better, on all occasions, that these should be volunteers and that they should engage to serve for six months, unless sooner discharged. If, however, it is necessary to resort to drafting, the term cannot be prolonged by law beyond three months.

You are aware that a bill is pending before Congress for the organization of a volunteer force. Should this pass in time for your operations, it would, no doubt, be better that the troops required should be engaged under it. I have, as you will perceive, stated this view to the governors of Georgia and Alabama, and informed them, as soon as this becomes a law, I will communicate the fact to them, together with such suggestions as may appear necessary.

Your efforts will be directed to the unconditional submission of the Indians. As fast as this is effected; and as any parties of them can be collected, they must be disarmed and sent immediately to their country west of the Mississippi. For this purpose you will employ such officers and military detachments as may be necessary. You will call upon the commissary general of subsistence for a statement of the arrangements that have been made on the subject of the removal of these Indians. Captain Page, of the army, has at present the direction of this matter. A contract with a number of persons in that country has been entered into for subsisting and transporting these Indians. If they are able and willing to go on with their contracts, you will allow them to do so. But immediate action is necessary; and if you experience any delay, you can cause the provisions, means of transportation, &c., to be purchased by the military agents. The great object is to remove them immediately; and to this, other considerations must yield. Captain Page will communicate to you all his instructions, and the regulations of the department, by which you will see the system of administration that has been adopted upon this subject. This will be adhered to whenever a new state of things does not require a change. You will take care that all practical economy is preserved, and that the disbursements are faithfully accounted for. And with respect to your military operations generally, I have to request that you will direct your attention to an economical administration of your military expenditures and a proper preservation and accountability of the public supplies.

Should Major General Scott, under the instructions he has heretofore received, proceed to the theatre of operations, he will, of course, be entitled to the command, and you will serve under him. You will take care to call on the chiefs of the military bureaus for such supplies as you may require; and previous to your departure make all the necessary arrangements, so that you may not experience any delay for the want of funds, munitions of war, or other supplies.

It is very probable that portions of the Creek Indians may not yet have been concerned in active hostilities, although, from the predisposition of the Indians for war, there is every reason to believe they will do so, unless prevented by a timely removal. It will be proper, where this is the case, to treat these Indians with the kindest attention, and to send them off as speedily as practicable, in order to get them out of the reach of the scenes around them. Still, however, they must be removed by a military force if necessary, as all experience has shown that it is difficult, if not impracticable, to keep any considerable part of an Indian tribe at peace, while the residue of it is engaged in war; and, besides, it would be impossible to prevent the hostile warriors from taking shelter among the others; or, indeed, to determine with any reasonable certainty, and for any length of time, who are hostile and who are friendly.

The President has been desirous to ascertain what frauds have been committed upon these Indians in the sale of their lands, with a view to remedy the evil as far as practicable. But this effort, a succinct account of which will be communicated to you by the Commissioner of Indian Affairs, has been now stopped by war. It is still, however, desirable that the friendly part of the Creeks (if, in fact, any of them should remain friendly) should be relieved from the embarrassments under which they have labored, with respect to their lands. I enclose the copy of a letter from Captain Page, by which you will perceive the view of that officer on the subject, and the proposition made by the Upper Creeks. This proposition has been approved, and Captain Page advised of the fact. So far, therefore, as any part of this division of the Creeks shall remain peaceable, you are authorized to sanction the proceeding recommended. But whatever is done must be done without delay, for it is very important that these people should be immediately sent off. You will assure them the government is anxious to do them justice, and that the claims of those who remain at peace, and remove to the country west of the Mississippi, will be duly attended to. A descriptive roll of all these persons will be taken, in order to determine their cases hereafter. It is impossible, for the want of time, to cause abstracts to be prepared showing the sales that have been made by the Creek Indians; and therefore no directions can be given for any definitive proceedings upon that subject. There is no objection, however, in the case of these friendly Indians, to permitting them to sell agreeably to the established regulations, a copy of which you will herewith receive, if the purchaser can satisfy himself that no contract has been heretofore made for the sale of the land. But if this is done, he must do it upon his own responsibility; for if a previous valid contract has been entered into, the first purchaser must hold the land. If the arrangement stated by Captain Page should take effect, you are authorized to select a competent officer (should the Indians desire it) to see that justice is done; and also to appoint a certifying agent to certify contracts, should any be entered into as above mentioned. His duties and compensation will be governed by the prescribed regulations.

If, however, these matters cannot be satisfactorily arranged previous to the departure of the Indians, you will assure the friendly disposed part of them that measures will be taken as early as practicable to see that justice is done to them, and that the land shall be disposed of at its fair value, and the proceeds paid over to them. The moment the annuity bill passes arrangements will be made for paying to the peaceable Creeks their just proportion of it.

I am, sir, very respectfully, your obedient servant,
Brevet Major General THOMAS S. JESUP, *Washington.*

LEWIS CASS.

WAR DEPARTMENT, *July 11, 1836.*

SIR: It has been suggested that a few Creek warriors might be useful to Governor Call, and might be willing to be employed in the contemplated expedition against the Seminole Indians. You will please to correspond with Governor Call on this subject, and if he should desire it, I would thank you to raise a small corps of this description, not exceeding two or three hundred, and send them to Florida. They may be paid and organized as volunteers, but should be placed under the command of some white man, well acquainted with them, and who has their confidence. It is presumed that enough young men would be willing to go without requiring their families to be retained in Alabama until their return. This measure of retaining Indian families ought to be avoided, as the immediate removal of the Indians seems to be indispensably necessary.

Very respectfully, your most obedient servant,

LEWIS CASS.

Major General THOMAS S. JESUP, *Fort Mitchell, Alabama.*

WAR DEPARTMENT, *July 15, 1836.*

SIR: The distance from the scene of your operations renders it impossible for this department to form an opinion as to the amount of force you ought to keep in service, and therefore you must exercise your discretion in relation to the matter. But I beg leave to urge upon you the necessity of your discharging the militia and volunteers as fast as you can dispense with them. I must impress upon you the propriety of reducing your expenses as fast as practicable, consistently with the objects you have to attain. I presume that the regular force with you, including the marines, will be more than sufficient, after hostilities are actually suppressed, to insure the good conduct of the Creeks during the period they may remain before removal. And should it be necessary, portions of this force may be attached either to General Wool or Governor Call, as circumstances may require.

Very respectfully, your most obedient servant,

LEWIS CASS.

Major General THOMAS S. JESUP, *Fort Mitchell, Alabama.*

WAR DEPARTMENT, *July 23, 1836.*

SIR: I have had the honor to receive your letter of the 13th instant. It seems to me proper, in relation to that part in which you intimate an intention to discharge a large portion of the volunteer force, to inform you that other calls have recently been made for military force, and to suggest whether the discharge of any of this description now under your command had not better be delayed until more definite information can be given you. A just regard to economy would seem to indicate the propriety of discharging the militia as soon as their services can be dispensed with. But your knowledge of the circumstances and your experience will enable you to determine these points correctly, and you will do what you think best for the public service.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Brevet Major General THOMAS S. JESUP, *Tuskegee, Alabama.*

WAR DEPARTMENT, *June 20, 1836.*

SIR: You will repair to the Cherokee country without delay, and ascertain the condition and probable designs of the Cherokee Indians. Rumors have reached here that these Indians are meditating hostilities against the United States, and that depredations have actually been committed. It is very desirable that any excitement which exists among them should be allayed; and you are requested to use all proper means, by representation and remonstrance, to allay it. You will please to seek interviews with the principal men, and to urge upon them the necessity of their interfering and prevailing upon their people to remain quiet, and to comply with the treaty stipulations. A treaty has been recently ratified with them, providing liberal sums for their present relief and future support. The moment the necessary appropriations are made, arrangements will be adopted for carrying into effect all these treaty stipulations. In the meantime, as it is probable that the scarcity of provisions among the Cherokees may lead them to commit depredations, you are authorized to issue to such of them as may require this aid, and as evince a friendly disposition, a reasonable quantity of provisions. A copy of the Cherokee treaty is herewith enclosed; by adverting to the 18th article you will find a stipulation for these issues of provisions. The amount for provisions and clothing is limited to seventy-five thousand dollars, but a far less sum than this will be sufficient for the issues required to be immediately made. The purchases, if any, will be made upon the best terms, and will be paid for in bills, to be drawn upon this department, which will be met as soon as the appropriation is made. It is presumed that pork, beef, flour, corn, and salt, are all the articles that it will be found necessary to distribute. You will cause the provisions to be issued and accounted for upon provision returns, corresponding as nearly as may be with the army practice; and you are at liberty to employ such persons as you may find necessary to perform the business under your directions, and to allow them a reasonable compensation for their services.

You will apply at the offices of the adjutant general, the commissary general of subsistence, and the colonel of ordnance; and you will ascertain, in detail, the arrangements that have already been made to meet any difficulties among the Cherokees.

You will find that the governor of Tennessee was some time since requested to raise a body of volunteers under the late volunteer act. A portion of these (the number depending on the organization, and amounting to from one thousand to one thousand two hundred, one-half mounted and one-half infantry) were assigned to East Tennessee. It appears by the governor's letter, received this day, that he is about organizing this force, and that he will call into immediate service the quota assigned to East Tennessee. These troops will rendezvous at Athens on the 7th of July. You will take the immediate command of them, and station them in such parts of the Cherokee country as you may think best. You will find from Governor Cannon's letter that these troops will be supplied with arms. A quantity of arms, ammunition, and provisions were directed some time since to be sent to that quarter, and to be

deposited at Highwassee, under the direction of Major Payne, of the army. These provisions you are authorized, in case of necessity, to issue to the Cherokees in lieu of those above referred to.

Should the Cherokees commence hostilities, you will employ the above-mentioned force in reducing them to unconditional submission; and if you should not deem it sufficient for that purpose, you are authorized to call upon the executives of Tennessee, Georgia, and North Carolina for such additional force as you may judge necessary. I have this day written to the governors of those States, requesting them to call into the service of the United States such militia force as you may require. The volunteers under the late act must serve for one year. The ordinary militia force must serve at least three months after reaching the place of rendezvous, unless such volunteers or militia shall be sooner discharged. Provision has already been made for mustering the brigade of Tennessee volunteers. If that, however, should not have been done, you will have it attended to, and you will likewise cause the other troops to be mustered into service by some competent officer of the United States. I need not insist upon the necessity of all proper economy in your expenditures, and likewise upon the due preservation and accountability of the public property.

Should the conduct of the Cherokees require the application of force, you will proceed to subdue them with as much expedition as possible. When this is effected, their arms will be immediately taken from them, and they will be kept together under proper guards till you can complete your arrangements for their removal west. A copy of the general instructions for the removal of the Indians will be furnished you from the office of the commissary general of subsistence, and you will conform in this duty, as far as possible, to these regulations. Should a portion of the Cherokees remain friendly, you will still require them to deliver up their arms; but they will not be confined, and will be allowed a reasonable time to remove themselves, in conformity with the stipulations of the treaty.

You are aware that General Scott and General Jesup are in the Creek country, conducting the operations against the Creek Indians. Copies of these instructions will be sent to each of them; and they will be requested to communicate fully with you. Should you find that, in addition to the Tennessee volunteers, troops will be required in the Cherokee country, I think it probable that a portion or the whole of them may be furnished from the forces under the command of General Scott; and if so, it may render it necessary for you to call into service any other militia troops. The state of affairs in the Creek country will, I hope, soon render unnecessary the employment there of the whole force now in the field.

The President directs that you be assigned to duty as a brevet brigadier general. During your command as such you will receive the pay and emoluments of a brigadier general, and will be allowed to select an aide-de-camp.

You will immediately consult with the heads of the respective bureaus, and take care that every necessary arrangement is made for furnishing all the supplies that may be required. You will look particularly to the arrangements yourself, so as not to run the risk of any disappointment. The necessary orders upon this subject will be given to these bureaus. I desire that you will keep the department informed of your proceedings.

Very respectfully, your most obedient servant,

LEWIS CASS.

Brigadier General JOHN E. WOOL, *Washington City.*

WAR DEPARTMENT, *July 9, 1836.*

SIR: From information which has been received here, it becomes necessary to inform you that no greater number of troops can be received into the service of the United States from the State of Tennessee than those authorized by the instructions of this department.

The whole number of volunteers fixed by law is ten thousand; and these have been assigned to the several States and Territories in such a manner that any excess in one of them would increase the whole number beyond the amount fixed by the law, and, consequently, beyond the power of the Executive.

The quota assigned to East Tennessee was one thousand; and this must under no circumstances be exceeded. One half of these was required to be mounted, and the other half infantry; and it is very desirable that this proportion should be observed.

Affairs among the Cherokees appear to be much less threatening than when you left here. I am under the impression that five hundred men would be amply sufficient for all the purposes the government has in view. Should this be the case, you will, on receiving this letter, discharge one-half of the force. And should you find no further difficulties which, in your opinion, would require troops to be maintained in the Cherokee nation, you are authorized at any time to discharge the residue. A paymaster will be assigned, and will proceed immediately to make payment to the troops.

Very respectfully, your most obedient servant,

LEWIS CASS.

Brigadier General JOHN E. WOOL, *Athens, Tennessee.*

WAR DEPARTMENT, *July 15, 1836.*

SIR: Despatches from the scene of operations against the Creeks induce the belief that hostilities with those Indians are over. General Scott has informed the department that he has communicated with you, and has offered to detach to your aid a portion of the regular force under his command, should it be necessary. I would not control your decision on the question of the extent of the force to be employed by you, because you are in a situation to form a better opinion upon this point than I am. But I am very anxious you should reduce your expenses as fast as a just regard to circumstances will permit. I am under the impression that, the Creek war being over, the regular force, including the marines, employed there will be sufficient for all the purposes contemplated, both among the Creeks and Cherokees. Should you be of this opinion, I wish you to discharge the volunteer force as soon as it is safe to do so, and as soon as you have received from General Jesup, to whom you will apply, such regular force as you may deem necessary.

Very respectfully, your most obedient servant,

LEWIS CASS.

Brigadier General JOHN E. WOOL, *Athens, Tennessee.*

WAR DEPARTMENT, *July 23, 1836.*

SIR: I have the honor to acknowledge the receipt of your letter of the 12th instant, in which you state that you had received into the service of the United States a larger number of volunteers than was contemplated or authorized by your instructions, and express the hope that this measure will meet the approval of the department and the President.

In relation to a subject of this character, I feel myself at liberty only to say that it will be submitted to the consideration of the higher authorities.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Brevet Brigadier General JOHN E. WOOL, *U. S. Army, Athens, Tennessee.*

WAR DEPARTMENT, *July 26, 1836.*

SIR: Your letter of the 15th instant to the paymaster general respecting the payment of the East Tennessee brigade of volunteers has been laid before me. Enclosed I transmit the copy of the remarks of that officer.

The question whether more than the authorized number of troops can under any circumstances be paid is one involving much difficulty, and has been referred for the decision of the President. Copies of your letter and of General Towson's remarks have been this day forwarded to the President, at Nashville, with a request that he would inform you of his determination. I would respectfully suggest that you communicate your views of the subject to him. Until the President's determination is known, you will please to cause all payments to cease, as it will be impossible previously to decide which shall be paid, if all are not.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Brevet Brigadier General JOHN E. WOOL, *Athens, Tennessee.*

WAR DEPARTMENT, *September 13, 1836.*

SIR: I have the honor to acknowledge the receipt of your letter of the 27th ultimo relative to the Georgia troops stationed in the Cherokee country, which General Jesup has desired you to retain.

If these troops are required neither by yourself nor General Jesup, they should certainly be no longer retained in the service of the United States; and as you inform me that you do not need them in your operations, I beg leave to request that you will ascertain from General Jesup whether their further services will be necessary in the execution of the duties committed to him, and if not, take measures for their immediate discharge.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Brevet Brigadier General JOHN E. WOOL, *Athens, Tennessee.*

WAR DEPARTMENT, *October 12, 1836.*

SIR: I have had the honor to receive, and to submit to the President, your letters of the 12th, 18th, 21st, and 25th ultimo.

It has never been the intention of the department that the military force in the Cherokee country should be withdrawn or reduced, while its presence was necessary for the accomplishment of any objects connected with the treaty.

A proper regard to economy, however, requires that no more should be retained than is sufficient for this purpose.

The marine corps having proceeded to Florida, there is no portion of the regular army that can be placed at your disposal.

The number of volunteers that you may require will, in accordance with the suggestion of Governor Lumpkin, (in which you seem to concur, and which is approved by the President,) be drawn from the States, respectively, in which they are to be stationed. And the President has directed me to request that you will muster, pay, and suffer to return to their homes such portion of the Tennessee troops as, in the opinion of the commissioners and yourself, will not be wanted within the limits of the State while the execution of the treaty is in progress. Having engaged to serve twelve months, unless sooner discharged, they must be distinctly informed that they are liable to be called into service at any time during the period of their original engagement. It would be improper to part with any of the Tennessee troops until ample arrangements are made to guard the other States, unless yourself and the commissioners shall think that less than the whole number can effect this object.

It is apprehended that many if not all the volunteers from Georgia and Alabama, lately in service, have been finally discharged. Should this not be the case, you will call upon the governors of those States, respectively, for as many of these yet liable to serve as may be required within the limits of each. Should they have been discharged, you can then make your requisition for the same number of new troops. As none have yet been in service from North Carolina, those called out for that State will, of course, be new troops.

The letter from this department of the 30th of June last gave you authority to call for militia from the States of Tennessee, Georgia, and North Carolina; but it will now be preferable to make your requisitions for volunteers under the act of Congress of the 23d of May last. I enclose a copy of the act, an extract from a letter of the governors of some of the States, and from which volunteers were called, of a memorandum that accompanied it, in which the principles of the organization of volunteer corps are distinctly laid down, by which you will be guided, so far as they are applicable. The number you may call for will be received into service for twelve months, unless sooner discharged.

This arrangement, however, so far as it respects North Carolina, will not be carried into effect if you and the commissioners should be of opinion that in consequence of the small number of Indians in that State every necessary service can be rendered by the troops from the other States.

I understand, from your letter of the 12th ultimo, that your present impression is that eight hundred men are sufficient for a permanent force for the whole Cherokee country.

This number, therefore, will not be exceeded in carrying out the arrangements indicated in this letter, and I presume it will not be necessary to keep a greater number of Tennessee troops in service until it can be completed. As many of the eight hundred men may be mounted as you and the commissioners may think proper.

In determining upon the various points herein presented, the number and kind of volunteers to be employed, and the stations of the several detachments, I would recommend that you consult the commissioners, whose characters and knowledge of Indian temper and habits, and of the localities of the country, entitle their opinions to great consideration.

You are authorized to have the necessary winter quarters provided for the troops you may call into service.

The declarations made by you to Mr. John Ross, as stated in your letter of the 18th ultimo, will be sustained. The President will not depart from the determination expressed in his letter to you of September 7—"The treaty is to be religiously fulfilled." No delegation sent to this place with a view to obtain new terms, or a modification of those of the existing treaty, will be received or recognized, nor will any intercourse be had with them directly or indirectly, orally or in writing. You will repeat this determination of the President to Mr. Ross, and to all others, in the strongest terms. If any of our own citizens enter the Indian country and incite opposition to the execution of the treaty, you will ascertain whether there is no law of the State which can be brought to bear upon them, and under which they can be removed. If they cannot be reached in this way, it is the opinion of the President that they may be removed under the 6th article of the treaty, in which the United States guarantee that the Cherokees shall "be protected against interruption and intrusion from citizens of the United States who may attempt to settle in the country without their consent." It is not to be presumed that this consent will be given by those of the committee who, acting under the 12th article, and by the terms of that article, are alone authorized to give it.

If any officer of the army should countenance resistance or opposition to the treaty, you will arrest him and order a court of inquiry. If the fact be established, the President will dismiss him from the service; and the commissioners will be instructed to suspend any of the agents employed under the treaty who may be guilty of the like offence.

I am instructed to express the surprise of the President that you permitted the council of the Cherokees to remain in session a moment after it became apparent that it was determined to declare the treaty void. This was the contingency contemplated in the letter of the department of September 3, in which you were instructed to interfere and disperse such assemblage. If, upon any future occasion, the non-execution of the treaty should be discussed in council, you will immediately close its session. You will inform Mr. Ross that the President regards the proceedings of himself and associates in council as in direct contravention of the plighted faith of their people; and a repetition of them will be considered as indicative of a design to prevent the execution of the treaty, even at the hazard of actual hostilities, and they will be promptly repressed.

You will also inform him that if a delegation proceed to the Cherokees west of the Mississippi for the purpose of procuring their co-operation in an attempt to set aside or modify the existing treaty, or to obtain a new one, the acting superintendent of the western Territory will be instructed to enforce the provisions of the 13th section of the intercourse law of 1834, and to employ military aid, if necessary, under the authority of the 23d section.

I annex copies of these sections, which, as well as a copy of this letter, you will deliver to Mr. Ross. The direction you have given to Major Nelson, and your general views respecting the Creeks residing among the Cherokees, meet the concurrence of the President so far as they may affect Creeks settled in the Cherokee country prior to the jurisdiction of the States over the Indian country, and to the treaty with the Creeks of March 24, 1832. Those who have settled there since will be required to join their people west of the Mississippi, and military force will be applied to effect that object, if necessary.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Brig. Gen. JOHN E. WOOL, *Athens, Tennessee.*

HEADQUARTERS OF THE ARMY, *Washington, June 6, 1836.*

SIR: Your letter of the 23d of last month, addressed to the adjutant general, has been referred to me, as well as the communications from General Gaines dated April 12, and that of Captain Duncan of May 13; all of which I have submitted to the Secretary of War. From the statements made in Captain Duncan's communication as to the unfriendly disposition of the Indians on the western frontier, it becomes your duty to direct the officers commanding the different posts within your command to be vigilant and on their guard against surprise or attack. The governor of Missouri has been requested by the War Department to raise 1,000 volunteers—half to be mounted, and the remainder to serve on foot as infantry—for one year out of two, under the late act of Congress. Should any disturbances arise among the Indians, you are authorized to call on the governor for any part of that force that you may find necessary. Copies of the letter to the governor of Missouri from the Secretary of War, and of the law relating to the volunteers, are herewith transmitted to you for your information. You must be careful to cause the volunteers to be mustered which you may require for the public service, according to the rules of the War Department. Should any difficulties arise, you must take the proper measures to meet them. You will keep me advised of all occurrences in reference to the conduct of the Indians. As to the murders mentioned in Captain Duncan's letter, you will consult with General Clark, and adopt such measures as in your judgment may appear most proper to be pursued. I would advise you to cause to be sent to Fort Leavenworth, or some other convenient and suitable point within the settlements, and near the western line of Missouri, arms and ammunition for the use of the volunteers, should they be called out.

I have the honor to be, sir, very respectfully,

A. MACOMB, *Major General, Commanding-in-chief.*

Brig. Gen. ATKINSON, *St. Louis, Missouri.*

WAR DEPARTMENT, *July 20, 1836.*

SIR: The acting superintendent of Indian affairs in the western Territory has represented to the department the necessity, in his judgment, of stationing an increased military force upon the frontiers of Arkansas.

I have been instructed by the President to authorize you, should the state of affairs render it proper, to call into the service of the United States such portion of the volunteer force, which the governor of Arkansas has been requested to raise, as you shall think requisite. This force amounts to one thousand men—one half mounted, the other half infantry. The details respecting mustering, arms, &c., are committed to you. I enclose copies of two acts in relation to the volunteers, and a memorandum in regard to their organization. I have this day requested the governor of Arkansas to comply with your requisitions.

Very respectfully, your most obedient servant,

C. A. HARRIS, *Acting Secretary of War.*

Brev. Brig. Gen. M. ARBUCKLE, *U. S. A., Commanding at Fort Gibson, Arkansas.*

P. S.—As a similar authority was given to General Gaines on the 11th instant, you are requested to correspond with him upon the subject.

C. A. H.

[Memorandum.]

MAY 17, 1836.

The adjutant general will communicate to the various staff bureaus the movement which is directed to be made of six companies of artillery for Fort Mitchell, Alabama, in order that the necessary measures may be taken, by furnishing supplies, &c., so that the views contemplated by the government may be carried into effect.

General Fenwick will be instructed to proceed immediately to Fort Mitchell, and take the command of the troops at that place. His object will be to afford protection to our citizens, and to prevent or suppress any disturbances that may be attempted or meditated by the Creek Indians. For this purpose he will station the troops wherever he may find it expedient; and if the Indians should actually commence hostilities, he will attack and subdue them.

He will report his arrival and instructions to the governors of Georgia and Alabama; and should any militia from either of those States be called into the service of the United States by the governors, under the authority of this department, he will assume the command, and direct the operations.

General Scott will be informed of these measures, and will be authorized to take such other steps as may be required.

LEWIS CASS.

(*Memorandum for Adjutant General.*)

ADJUTANT GENERAL'S OFFICE, *Washington, January 18, 1837.*

In conformity to your instructions, I herewith respectfully submit table A, being a statement of the volunteer and militia force mustered into the service of the United States, during the years 1835 and 1836, by States and Territories, respectively, specifying the terms of service, the time and place of rendezvous, the dates of musters in and out of service, and the time they actually served, so far as can be shown by the muster-rolls, or other returns received at the Adjutant General's office.

According to table A, the ascertained volunteer and militia force which has been mustered into the service of the United States, in 1835 and 1836, may be specified and enumerated as follows:

1835 and 1836.—1. *Florida.*—One general officer, 3 general staff officers, 17 field officers, 106 company officers, 1,324 non-commissioned officers, musicians, and privates, mustered in 31 companies, and amounting to 1,451 in the aggregate.

1836.—2. *South Carolina.*—One general officer, 3 general staff officers, 16 field officers, 101 company officers, 1,823 non-commissioned officers, musicians, and privates, mustered in 26 companies, and amounting to 1,944 in the aggregate.

3. *Louisiana.*—Eight field officers, 41 company officers, 793 non-commissioned officers, musicians, and privates, mustered in 12 companies, and amounting to 842 in the aggregate.

4. *Alabama.*—Three general officers, 25 general staff officers, 70 field officers, 242 company officers, 5,222 non-commissioned officers, musicians, and privates, mustered in 76 companies, and amounting to 5,562 in the aggregate.

5. *Georgia.*—Four general officers, 14 general staff officers, 72 field officers, 395 company officers, 6,689 non-commissioned officers, musicians, and privates, mustered in 101 companies, and amounting to 7,174 in the aggregate.

6. *Tennessee.*—Two general officers, 8 general staff officers, 28 field officers, 314 company officers, 5,451 non-commissioned officers, musicians, and privates, mustered in 79 companies, and amounting to 5,803 in the aggregate.

7. *Mississippi.*—Eight company officers, 115 non-commissioned officers, musicians, and privates, mustered in 2 companies, and amounting to 123 in the aggregate.

8. *Arkansas.*—Four field officers, 28 company officers, 543 non-commissioned officers, musicians, and privates, mustered in 9 companies, and amounting to 575 in the aggregate.

9. *District of Columbia.*—Three company officers, 64 non-commissioned officers, musicians, and privates, mustered in one company, and amounting to 67 in the aggregate.

This enumeration of the volunteer and militia will exhibit in the classification of the aggregates the following numbers, to wit:

Eleven general officers, 53 general staff officers, 215 field officers, 1,238 company officers, 22,024 non-commissioned officers, musicians, and privates, mustered in 337 companies, and amounting to 23,541 in the aggregate.

If the friendly Creek Indians, who were mustered in the service of the United States, to aid in the suppression of Indian hostilities during the summer, be added to the foregoing volunteer and militia

force, to wit: 9 field officers, 79 company officers, 2,456 non-commissioned officers and privates, (aggregate 2,544 Indian force,) the grand aggregate would then be 26,085.

It should not be understood that the volunteer and militia force herein specified exhibits the entire number which may have been mustered into the service of the United States, and been paid, during the year 1836, as it is supposed that there are companies of which muster-rolls have not yet been received at the Adjutant General's office. The true test of exact numbers, as well as the terms during which the militia and volunteers have "actually served," will only be found, it is believed, in the rolls prepared for, and on which the payments have or are to be made.

Table B is a statement of the regular force, including the marines, serving with the army employed in suppressing the hostilities of the Creek Indians in the summer of 1836; by which it will be seen that there were 2 general officers, 6 field officers, 6 officers of the quartermaster's department, 9 medical officers, 2 other staff officers, 55 company officers, 1,117 non-commissioned officers, musicians, and privates; being 16 companies of the army, and 8 of marines; in the aggregate, 1,197 so employed.

Table C is a statement of the greatest volunteer and militia force employed in like manner against the Creeks in Georgia and Alabama during the summer of 1836, according to the muster-rolls and returns received at the Adjutant General's office. By this table it appears that there were 7 general officers, 33 general staff officers, 130 field officers, 535 company officers, 9,830 non-commissioned officers, musicians, and privates, mustered in 143 companies, amounting in the aggregate to 10,540 militia and volunteers so employed. To this number add the 1,197 troops of the army and marine corps, as exhibited in table B, and the greatest force in the service, for the suppression of the hostilities of the Creek Indians in the States of Alabama and Georgia in 1836, appears to have been 11,737 in the aggregate, without counting the 1,806 friendly Creek Indians.

The tables A, B, and C, hereunto annexed, are designed to exhibit in the clearest manner, as far as practicable, the diversified information called for by the resolution of the House of Representatives of the 26th of December, 1836; and whenever any remark is omitted to be inserted in any of the columns of table A, the omission is to be ascribed to the want of official data.

The anomaly as to the dates of muster *in* and *out* of service of the Florida militia, (the former being noted as anterior, instead of being prior,) as seen in the specifications under the appropriate heads of table A, is ascribable to irregularities in the first muster-rolls which were forwarded. These irregularities were reported at the time that payments were required to be made, as seen by the communication of the paymaster general to the Secretary of War, dated the 4th of June, 1836. And with a view to justify the payments, orders were given on the 8th of June to "re-muster" the said volunteers.* The *re-muster* for payment did not take place until *after* the volunteers had been discharged; hence the incongruity of dates touching this matter. The like anomaly as to dates of muster in and out of service of a part of the Alabama troops may be owing to some irregularity which circumstances subsequently required to be corrected; these, however, are not known. In some instances it will be seen by the table that the dates of muster in and out of service are specified as being one; this is to be ascribed to the fact of having received only the rolls which muster *out* of service, and which, furnishing, as they must, the requisite data for payments, exhibit generally, also, the dates of enrolment, as well as the commencement of the *term*; and this last-mentioned fact is regarded as equivalent to, and therefore is assumed as the specification of the "date of muster in service."

I have, on more than one occasion, adverted to the great defect in our practical system touching the accountability of the *personnel*, and the rendition of regular returns exhibiting the volunteer and militia force when in the service of the United States. For want of the requisite information now, which has all along been foreseen, it is scarcely practicable to furnish at this time all that is called for by the resolution of the 26th December. I cannot, for example, state with any exactness the "terms during which the volunteers *actually served*," though the time in many cases, perhaps, may be computed so as to coincide with that specified under the head of "for what period mustered;" or, according to the time counted between the dates of muster *in* and *out* of service; not without exceptions, however, as may be seen in the Florida, and a part of the Alabama troops, explained above, and in the remarks on the first page of table A.

If the salutary "*regulations respecting militia service*," adopted by the War Department the 23d of June, 1832, could have been observed and strictly enforced, much of the irregularity and inconvenience which have embarrassed the service with regard to the mustering, "re-mustering," the payment, and the accountability of the volunteers when in the service of the United States, would, it is believed, have been avoided. This regulation, together with the revised edition of the same, published July 12, 1836, marked G and H, is herewith respectfully submitted as a part of this report. Due regard to the public service, and the observance of proper economy in the employment of such auxiliary force, would seem to require some legislation on this subject. The experience of the last year sufficiently attests the inadequacy of mere regulations, as such; nor should it be supposed that their wholesome provisions will be better observed for the future if devoid of the force of legal restriction.

Respectfully submitted.

R. JONES, *Adjutant General of the Army.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

* See letter of the adjutant general (D) and letters of the paymaster general (E and F) to the Secretary of War and General Maccomb, dated June 4 and 8, 1836.

Statement of the volunteer and militia forces mustered into the service of the United States during the years 1835 and 1836 by States and Territories, respectively, specifying the term of service, the time and place of rendezvous, the date of musters in and out of service, and the time they actually served, so far as the same can be shown by the muster-rolls and other returns of said volunteer and militia forces received at the Adjutant General's office.

The greatest volunteer and militia force employed in suppressing the hostilities of the Creek Indians was in the service of the United States during the month of July. Rolls of twenty-two companies of friendly Creek Indians, who were mustered into the service of the United States during the summer, have been received at this office, which, if added to the foregoing volunteer and militia force, (10,540,) will increase this aggregate volunteer force to 12,346.

R. JONES, *Adjutant General.*

ADJUTANT GENERAL'S OFFICE, *Washington, January 18, 1837.*

D.

ADJUTANT GENERAL'S OFFICE, *Washington, June 8, 1836.*

SIR: The paymaster at Charleston, South Carolina, has been ordered to repair to St. Augustine for the purpose of paying the volunteers who may there be mustered out of the service. As it is desirable that he should be present at the payment, you will, on his arrival there, by direction of the general-in-chief, remuster the Florida militia according to the request of the paymaster general, and in conformity with the instructions of the Secretary of War herewith transmitted.

I am, sir, very respectfully, your obedient servant,

R. JONES, *Adjutant General.*

COMMANDING OFFICER at *St. Augustine, Florida.*

E.

PAYMASTER GENERAL'S OFFICE, *June 4, 1836.*

SIR: The act of the 28th ultimo directs "that the Secretary of War be authorized to cause the militia called out to defend East Florida by Generals Clinch and Hernandez, or by the governor of Middle and West Florida, and such other militia and volunteers as have been received and mustered into the service of the United States and regularly discharged, to be paid in like manner with the volunteers and militia ordered into service under orders from the War Department."

The muster-rolls of the troops called out by General Hernandez have been transmitted to this office, and present the following difficulties: The number of privates mustered is six hundred and five, which is thirty-five less than a full regiment organized agreeably to the act of 1792, while the officers are nearly sufficient for a brigade, as will be seen by the enclosed abstract from the rolls. The questions to be decided before payment can be made are, whether the law will authorize the payment of the militia, as called out by General Hernandez, which will be according to the muster-rolls forwarded. If it does not, whether a new muster must be made, and if made, by whom? If it shall be decided that there must be a new muster, it is respectfully recommended that it be made by the officer commanding the United States troops at St. Augustine, and that the most liberal organization be authorized that the usage which has heretofore prevailed will justify, viz: one brigadier general, one aide-de-camp, one brigade major and inspector, one quartermaster, one colonel, one lieutenant colonel, two majors, fifteen captains, fifteen first lieutenants, fifteen second lieutenants or ensigns, three assistant surgeons, two sergeant majors, two quartermaster sergeants, forty-five sergeants, and sixty corporals. This would be the greatest number of officers that three battalions would be entitled to, according to the organization of the army, which has been followed in some cases in paying the western militia; and as the services of a brigadier general may have been necessary, it is thought an officer of that rank, with his brigade staff, may be allowed*.

Respectfully, &c.,

N. TOWSON, *Paymaster General.*

The SECRETARY OF WAR.

Approved as to remuster and the mode suggested.

L. C.

*The mustering officer should be directed to require of General Hernandez to designate the officers that are to fill the several grades.

F.

PAYMASTER GENERAL'S OFFICE, June 8, 1836.

SIR: I have the honor to lay before you a copy of a letter addressed to the Secretary of War on the subject of paying certain militia commanded by General Hernandez at the commencement of the Florida war.

The muster-rolls furnished the War Department by General Hernandez embraces more officers in proportion to the men than the law authorizes to be paid. You will perceive at the bottom of the letter that the Secretary of War has directed a new muster to be made by the commanding officer of the United States troops at St. Augustine, allowing as many officers as the usage in paying militia will justify. My object in addressing you is to obtain your order to the officer commanding at St. Augustine to carry into effect the instructions of the Secretary of War. I have ordered the paymaster at Charleston to proceed forthwith to St. Augustine and pay those troops, as soon as mustered. It is desirable that he should be present when the muster is made, and I will thank you to instruct the officer to wait his arrival before making it.

Respectfully, &c.,

Major General MACOMB, *Commanding United States Army.*N. TOWSON, *Paymaster General.*

G.

ORDER No. 55.

HEADQUARTERS OF THE ARMY, *Adjutant General's Office, Washington, June 26, 1832.*

The general-in-chief has received from the War Department the subjoined regulations. They are published for general information:

Regulations respecting militia service.

WAR DEPARTMENT, June 23, 1832.

1. Whenever detachments of militia are called into the service of the United States by any officer authorized to make such call, the number of officers, non-commissioned officers, and privates, will be stated, and the proportions between them will be the same as is prescribed by the act of Congress. Requisitions will never be made for companies, regiments, or brigades.

2. Such detachments as are called or received into the service of the United States will be mustered before they are considered in service, by an inspector general, or some other officer of the regular army, to be designated by the officer requiring such militia aid.

3. All supernumerary officers will be rejected, and the organization of each detachment will correspond with the acts of Congress regulating the militia.

4. It shall be the duty of the officer so mustering and inspecting militia detachments to make immediate return thereof to the War Department.

5. No staff officers will be mustered or received into service, except the established regimental staff, and such general officers with their aides-de-camp as may be required to complete the organization of brigades or divisions, where the strength of the detachments renders such organization necessary.

6. Payment will in all cases be made by the district paymasters of the army, and only upon rolls which shall have previously been submitted to the paymaster general, and found by him to be in conformity with the law and the regulations of the department. The many doubtful questions which arise upon the subject of these payments render this course indispensable. Without it the government would be exposed to great loss, and the paymasters themselves to ruinous responsibility.

LEWIS CASS, *Secretary of War.*
R. JONES, *Adjutant General.*

H.

GENERAL ORDER, No. 49.

HEADQUARTERS OF THE ARMY, *Adjutant General's Office, Washington, July 12, 1836.*

The following revised regulations on the subject of returns, reports, and detachments of militia, when called into the service of the United States, are published for general information and the guidance of the several officers concerned:

I. *Post monthly returns.*

1. The commanding officer of every post or separate *station** will transmit to the adjutant general of the army, on the 1st day of *each month*, an exact return, according to the form prescribed, of *all* the troops under his command during the preceding month, specifying the name and station of each officer *present*, and also of each officer *absent*, with *the reason* for and *the time* of his absence.

2. When a post or station is garrisoned by different regiments, or parts of different regiments, the troops will be reported on the monthly return by regiments; but if the troops be of the same regiment, they will be reported by companies.

3. Commissioned officers, at the post, will be accounted for by name, in order of *rank*, and are to be classed and arranged under separate heads as follows:

*The senior officer, serving with any body of troops, *wherever he may be*, will, *on the last day of the month*, forward a return of his command, as required by this paragraph.

1st. "Present at the post." 2d. "Absent." as those who may be on "staff duty," "recruiting service," "ordnance duty," "Military Academy," "topographical duty," "other special duty," "with leave," "without leave," &c.

4. Whenever any change takes place in the position or location of troops, the fact will be reported by the immediate commanders to general and department headquarters, specifying the date of departure of the whole, or any part of the troops, or the date of arrival of the same, as well as all other circumstances connected with the movement. These special reports will always be accompanied by an exact return of the troops, according to the established printed forms. A similar report of such changes will be noted on the next regular monthly return of the post or station.

II. Field returns—active service.

During a campaign, or any active operations in the field, the general or other commanding officer will transmit to the adjutant general regular monthly returns of all the troops under his orders, and sometimes weekly field returns may be necessary in order that the Executive may, at all times, or at short intervals, be made acquainted with the exact condition and strength of his command.

III. Field reports.

Reports relative to battles, or an affair in which a loss may be sustained, will always be accompanied with a separate return of the killed, wounded, and missing, in which the name, rank, and regiment of each individual will be specified, with such remarks set opposite the names, respectively, as may be requisite for the records of the Department of War, or be necessary to establish the just claims of any survivor, who may have been wounded, (taking care to specify the nature of the wound, and the time and place of its occurrence, the name of his captain, colonel, or other officer, &c.,) or of the heirs and representatives of any killed in action.

Absent—on leave.

1. Officers absent with leave are to report their address to the adjutants of their regiments, and to the adjutant general, monthly.

Militia and volunteers.

"Whenever detachments of militia are called into the service of the United States, by any officer authorized to make such call, the number of officers, non-commissioned officers, and privates, will be stated in the requisition, and the proportions between them will be the same as is prescribed by the act of Congress. Requisitions will never be made for companies, regiments, or brigades.

2. "Such detachments as are called or received into the service of the United States will be *mustered* before they shall be considered in service, by an inspector general, or some other officer of the regular army, to be designated by the officer requiring such militia aid.

3. "It shall be the duty of the officer designated to muster and inspect militia detachments to organize them into companies, regiments and battalions, and to forward muster-rolls of each company, and of the field and staff of each organized regiment, *direct* to the adjutant general of the army, Washington; and he will also immediately forward a consolidated return, by regiments and corps, of the force so received into service, for the information of the War Department.

4. "Officers charged with the duty of mustering militia, properly ordered into the service of the United States, preparatory to payment, will take care that the muster-rolls contain all the information that may in any way affect their pay; the distance from the place of residence to the place of rendezvous or organization, and the date of arrival, must be stated in each case; the date and place of discharge, and the distance thence to the place of residence; all stoppages for articles furnished by the government must be noted on the rolls; and in cases of absence at the time of discharge of the company, the cause of absence must be stated. When the necessary information cannot be obtained, the mustering officer will state the cause; otherwise, he will be held accountable for the defect.

5. "No general staff officers will be mustered or received into service, except such general officers, with their aides-de-camp, as may be required to complete the organization of brigades or divisions, when the strength of the detachment renders such organization necessary.

6. "All supernumerary officers will be rejected, and the organization of each department will correspond with the acts of Congress regulating the militia.

7. "Payments will, in all cases, be made by the paymasters of the regular army, and only upon rolls which shall have previously been submitted to the paymaster general, and found by him to be in conformity with law and the regulations of the department."

By order of Major General Macomb.

R. JONES, *Adjutant General.*

PAYMASTER GENERAL'S OFFICE, Washington, February 2, 1837.

SIR: In obedience to your instructions, I have the honor herewith to submit a statement showing the periods for which the volunteers and militia serving under the different calls made by the War Department, since the 1st of July, 1835, have been paid, so far as the rolls have been received at this office

This statement includes one thousand two hundred and ninety-two volunteers more than the adjutant general's, taken from muster-rolls received since the data for his report was furnished.

Several companies have been paid, of which the rolls have not been received, and, of course, are not included in this report.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

[24TH CONGRESS.]

No. 722.

[2D SESSION.]

ANNUAL RETURNS OF THE MILITIA OF THE UNITED STATES FOR THE YEAR 1836.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1837.

WAR DEPARTMENT, *February 6, 1837.*

SIR: In obedience to the requisitions of the first section of the act of Congress of the 2d of March, 1803, entitled "An act in addition to an act entitled 'An act more effectually to provide for the national defence, by establishing a uniform militia throughout the United States,'" I have the honor to transmit herewith abstracts of the general returns of the militia of the United States, and of their arms, accoutrements, and ammunition, for the year 1836.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

HON. JAMES K. POLK, *Speaker of the House of Representatives.*

ADJUTANT GENERAL'S OFFICE, *Washington, February 6, 1837.*

SIR: I respectfully submit herewith the annual general return of the militia force of the United States, and of arms, accoutrements, and ammunition, in duplicate, for the year 1836, required this day to be laid before Congress, in conformity with the act of March 2, 1803, "to provide for the national defence, by establishing a uniform militia."

The general return is compiled from the several returns of the latest date received at the Adjutant General's office.

I am, sir, with great respect, your obedient servant,

R. JONES, *Adjutant General.*

HON. BENJ. F. BUTLER, *Secretary of War ad interim.*

Abstract of the general annual returns of the militia of the United States, by States and Territories, according to the act of March, 1803, for the year 1836.

Abstract of the general annual returns of the militia of the United States, &c.—Continued.

States and Territories.	Returns.		Artillery.			Riflemen.						Aggregate.	Remarks.		
	For what year received.	Date.	Commissioned officers.	Non-commissioned of- ficers, musicians, pri- vates, &c.	Total.	No. of divisions.	No. of brigades.	No. of regiments.	No. of battalions.	No. of companies.	Commissioned officers			Non-commissioned of- ficers, musicians, pri- vates, &c.	Total.
Maine.....	1836	Dec. 31.....	116	1,635	1,751	116	300	5,129	5,429	42,468	
New Hampshire.....	1836	Oct. 26.....	109	1,767	1,876	109	1,631	1,740	27,473		
Massachusetts.....	1836	Dec. 30.....	162	2,761	2,923	146	407	8,631	9,038	44,911	Light infantry and grenadiers included.
Vermont.....	1823	Mar. 20, 1834	83	953	1,036	25,581	
Rhode Island.....	1832	Dec. 31.....	19	207	226	1,377	The adjutant general says there are in the State 15 regiments—91 companies of infantry, and 17 companies of light infantry; the whole number of militia enrolled is probably about 9,600.
Connecticut.....	1836	Dec. 29.....	177	1,794	1,971	23	66	989	1,055	23,826	
New York.....	1836	Dec. 31.....	1,028	11,331	12,359	3	7	25	156	688	8,396	9,084	184,728	The adjutant general reports the aggregate of the militia 193,620.
New Jersey.....	1829	Dec. 2.....	89	1,836	1,925	24	81	1,747	1,828	39,171	
Pennsylvania.....	1833	Feb. 26, 1834	202,281	
Delaware.....	1827	12	176	188	32	511	543	9,229	46,854	
Maryland.....	1836	Dec. 21.....	107	1,536	1,643	2	4	75	50	628	678	101,838	
Virginia.....	1836	Nov. 25.....	207	4,916	5,213	128	64,415	The adjutant general reports the aggregate number of cavalry to be 930; also, the aggregate of artillery, 131.
North Carolina.....	1835	Dec. 24.....	20	25	45	10	50	791	841	51,112	
South Carolina.....	1832	Jan. 25, 1833	94	859	953	21	124	1,361	1,485	48,461	The adjutant general reports the aggregate 48,678. No returns from the second brigade, first division, and first brigade, eighth division. Reference has been had to the returns for the year 1833. An entire default in nine companies in the second brigade of the first division.
Georgia.....	1834	Dec. 3, 1833	6	115	121	1	14,892	The adjutant general reports the aggregate greatly below the real strength of the militia of the State.
Alabama.....	1839	Dec. 20.....	14,808	
Louisiana.....	1839	Jan. 1, 1830	55	719	774	60	784	844	13,724	60,982	The governor reports no returns from several regiments, and says, "if a complete return could be had, our militia would be at least 85,000."
Mississippi.....	1830	Dec. 6.....	6	116	122	71,483	146,428	The adjutant general says the actual strength falls very little short of 200,000.
Tennessee.....	1830	Dec. 31.....	53,913	
Kentucky.....	1836	Dec. 9.....	35	524	559	21	57	1,360	1,417	27,386	The adjutant general says, "after waiting until this late period, I have been only able to receive a return from one division for the year 1834."
Ohio.....	1835	Feb. 29, 1836	134	2,333	2,367	27	11	252	958	15,445	16,403	6,170	2,028	The governor reports the first regiment of infantry imperfect; the second only two companies returned; the fifth and ninth no returns received.
Indiana.....	1832	Jan. 4, 1833	60	620	680	122	2,592	2,714	5,476	827	The adjutant general reports the militia about 4,000 effective men.
Illinois.....	1830	Jan. 1, 1831	11	33	No returns received.	
Missouri.....	1834	Feb. 14, 1835	1,249	The first and second brigades not heard from.
Arkansas.....	1825	Dec. 16.....	1,333,091

ADJUTANT GENERAL'S OFFICE, Washington, February 6, 1837.

R. JONES, Adjutant General of the Army.

24TH CONGRESS.]

No. 723.

[2D SESSION.]

ON CLAIMS OF THE TENNESSEE VOLUNTEERS WHO WERE CALLED INTO SERVICE, BUT WERE EITHER REJECTED, OR RECEIVED AND IMMEDIATELY DISCHARGED, FOR COMPENSATION FOR THE EXPENSES AND LOSSES INCURRED BY THEM IN 1836.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1837.

Mr. ELISHA WHITTLESEY, from the Committee of Claims, to whom was referred "so much of the President's message as relates to such of the Tennessee volunteers as presented themselves at the places of rendezvous in Tennessee, and were not mustered into the service, but rejected;" and who were instructed by a resolution of the House of Representatives, passed on the 16th of December last, "to inquire into the expediency of making suitable compensation for the expenses incurred by the volunteers or militia in equipping for a campaign, and who were received into the service of the United States, but immediately discharged, as may seem just;" and to whom was referred a memorial of the legislature of the State of Tennessee, asking for indemnity for losses sustained and services performed by certain volunteer militia of said State, under the requisitions of General Gaines and of the Secretary of War, during the year 1836; and to whom was referred the petition of Captain Fain and his officers, on behalf of themselves and their company, who volunteered under the proclamation of Governor Cannon of the 6th of June, 1836, were mustered into service, and dismissed without pay; and to whom was referred the petition of Captain Richard Warner and other officers, praying compensation for losses and expenses of a company of Tennessee volunteers commanded by them, which volunteered twice under the proclamation of the governor of the State of Tennessee, but were dismissed, reported:

The memorial of the legislature of the State of Tennessee presents the main facts, and the committee refer to it as an appendix of this report.

The subject of these claims was brought to the attention of the legislature of Tennessee at its late session, by the governor of that State, and by resolutions and memorials, and was referred to a select committee. That committee made a detailed report on the 18th of October last, to which this committee refer in the appendix.

It is proposed, by the bill herewith reported, to make provision for those who volunteered and whose services were accepted, and who were mustered into the service either under General Gaines's first or second call, or under the proclamation of Governor Cannon of June 6, 1836, issued under a requisition of the Secretary of War, dated May 25, 1836; those who volunteered under the proclamation of June 6, and were mustered into the service, and were dismissed or discharged, and those who were under the command of General Wool.

The special committee in Tennessee included all those who were mustered under the first and second orders of General Gaines, and under the proclamation of the 6th of June, in one class—making two divisions, however, in this class, and including in the first division those who were mustered under General Gaines's requisition, and including in the second division those who were mustered into the service under the proclamation of June 6, and dismissed or discharged by General Wool.

The committee having the subject now under consideration, inform the House that if the volunteers under the first and second requisitions of General Gaines were paid according to the laws in force at the times they respectively volunteered, the rule of compensation as to clothing would be different.

General Gaines, on the 8th of April, 1836, requested Governor Cannon to furnish, without delay, a brigade of mounted volunteers, to consist of two or three battalions, to repair to the headquarters of the western department of the army, at Natchitoches, Louisiana, for the protection of that frontier. On the 28th of April Governor Cannon issued his proclamation calling on the militia of Tennessee to volunteer their services. Sixteen companies were mustered into the service under this proclamation.

General Gaines, on the 28th of April, by a letter of that date, informed Governor Cannon that the Indians were peaceably disposed, and desired him to suspend the movements of the volunteers called for by his letter of the 8th. He further informed Governor Cannon, "if the reports of the peaceable disposition of the Indians should be confirmed, he would send an officer of the army to muster the volunteers and discharge them." That duty was performed by Captain Wickliffe, of the United States army. Muster-rolls of the sixteen companies mentioned were returned to the War Department.

Captain Cannon and his company also volunteered at the same time, and their services were accepted; but they failed to reach the place of rendezvous, in consequence of the delay in the mail containing an order to him to repair to Knoxville or Nashville. Captain Darnel and his company, and Captain Totten and his company, volunteered at the same time, but they did not rendezvous at Jackson. The rolls of these three companies have not been returned to the War Office.

The act in force at that time was the act passed on the 19th of March, 1836. The first section of that act provides "that the officers, non-commissioned officers, musicians, artificers, and privates of volunteer and militia corps, who have been in the service of the United States at any time since the first day of November, in the year of our Lord one thousand eight hundred and thirty-five, or may hereafter be in the service of the United States, shall be entitled to and receive the same monthly pay, rations, clothing, or money in lieu thereof, and forage, and be furnished with the same camp equipage, including knapsacks, as are or may be provided by law for the officers, musicians, artificers, and privates of the infantry of the army of the United States."

When that law was passed, and when the troops mentioned volunteered their services, the infantry of the army of the United States were allowed for their clothing according to the period of their service. The value of clothing, for a year, was established, and payment was made on a per diem calculation for the period of actual service.

The necessity of reciting the section mentioned, and of stating the rule of allowance, will be made apparent by a subsequent part of this report.

When General Gaines wrote to Governor Cannon, on the 8th of April, 1836, he also addressed a letter to the Secretary of War, informing him of the requisition he had made on the Governor of Tennessee. The Secretary of War received that letter on the 4th of May, and, under that date, informed Governor

Cannon he was instructed by the President to request his excellency to call into the service of the United States the number of militia which had been, or might be, required by General Gaines to serve not less than three months after their arrival at their places of rendezvous, unless sooner discharged.

Governor Cannon wrote to the Secretary of War on the 28th of April, and apprised him he had complied with the requisition of General Gaines, and had called on the militia to volunteer for six months.

This letter did not arrive at Washington until the 9th of May. On that day the Secretary of War wrote to Governor Cannon acknowledging the receipt of his letter of the 28th of April, and, after adverting to and stating the contents of his letter of May 4, he says: "I presume that, agreeably to the provisions of the act of February 23, 1795, the term of service of the troops thus called out cannot be extended beyond three months, and this is the term stated in my letter to you of the 4th instant; where, however, the numbers are supplied by volunteers, I am not aware that there is any legal objection to their term of service reaching six months; and this arrangement is certainly more efficient and economical for the United States, and the President approves it."

The foregoing, in the opinion of the committee, shows that the volunteers mustered under General Gaines's first call were in the service of the United States, and liable to do duty for the period of six months. It appears from the rolls they were mustered into the service at different periods in May, and were discharged at the following periods, to wit: three companies on the 31st of May; two companies on the 10th of June; seven companies on the 16th of June; and four companies on the 23d of June.

On the 23d of May, 1836, Congress passed an act entitled "An act authorizing the President of the United States to accept the services of volunteers, and to raise an additional regiment of dragoons or mounted riflemen."

The first section authorizes the President of the United States to accept the services of ten thousand volunteers to serve six or twelve months. They were to furnish their own clothes.

The second section, among other things, provided that the said troops, when called into actual service, should be placed on the same footing with similar corps of the United States army, except as to clothing; and, in lieu of clothing, every non-commissioned officer and private should be entitled, when called into actual service, to receive, in money, a sum equal to the cost of the clothing of a non-commissioned officer or private (as the case might be) in the regular troops of the United States.

The Secretary of War, on the 25th, enclosed a copy of the act of the 23d of May to Governor Cannon, and said he was instructed by the President to request that he cause to be raised, in the State of Tennessee, two thousand five hundred volunteers, to be called into the service of the United States when they might be required. In relation to the clothing, he said: "It is proper to observe that the provision in the second section of the act of May 21, [23] 1836, which allows to volunteers a commutation for clothing, when called into actual service, must be construed to give them a claim for such commutation from that time, which will be paid to them at the same time and in the same manner as they receive their monthly pay. No other construction can be given to the law, as it is impossible to tell, till the end of the service, the whole amount of commutation which will be due to a volunteer."

This construction of that part of the act relating to clothing proceeds on the ground that the allowance for clothing was to be in proportion to the period of service; and, in that particular, is in accordance with the act of March 19, 1836, and other acts regulating the infantry of the army of the United States.

In giving a construction to the second section of the act of May 23, 1836, the Attorney General, on the 3d and 8th of November, 1836, decided that the non-commissioned officers and privates, called into service, and accepted under the authority of that act, were entitled to the full amount of pay for their clothing, for the period for which they volunteered, whether for six or twelve months, at the time they so entered the service. It does not appear why the phraseology of the two acts varied, but that there is a variation is too apparent to deny, and this committee concur with the Attorney General in the construction given by him to the said section.

His decision relates to those mustered into actual service. Governor Cannon having received the letter from the Secretary of War, last mentioned, issued his proclamation on the 6th of June, calling on the citizens of Tennessee to volunteer to the number of two thousand five hundred, and accompanied it with the letter from the Secretary of War. He said that "those companies of volunteers heretofore organized and reported, under the proclamation of the 28th of April last, by the requisition of General Gaines, and now under orders to be discharged from that service, will be received, under the present call, by companies, and mustered into the service," &c. He then states that other companies would be received, and designates the places where, and the times when, they will be mustered.

It appears from the copy of a letter written by the Secretary of War on the 20th of June, 1836, that, on the 7th of the same month, Governor Cannon informed the Secretary of War of his proceedings under this law of May 23, and under the requisition of the Secretary of the 25th of the same month; and, in reply, he says: "I have had the honor to receive your letter of the 7th instant on the subject of the quota of volunteers assigned to the State of Tennessee, and I am directed by the President to express to you his gratification at the prompt measures you have adopted in order to raise these troops."

More volunteered under this proclamation than the quota assigned to the State of Tennessee, and Governor Cannon has been censured for not apportioning the requisition to the different regiments of militia, so as to obtain the proper number of troops and no more.

If Governor Cannon had apportioned the number to be raised in each regiment, there would not have been any supernumeraries; but his course was approved at the time by the President.

General Gaines, on the 28th of June, 1836, requested Governor Cannon to furnish him with a regiment of mounted gun men, volunteers if practicable, to consist of ten companies, to be enrolled, and to repair to the headquarters of the western department, at Camp Sabine, in companies or in a body, as might be found most convenient, by way of Little Rock, Arkansas.

On receiving this last-mentioned requisition, Governor Cannon issued his proclamation bearing date on the 20th of July, 1836, and thereby called on Captains Totten, Darnel, Dunlap, Hays, Neely, Curry, Yoakum, Jetton, Rogers, and Turney, to enter the service with their respective companies. In giving these companies the preference to others, he says: "The executive has adopted this course not only in compliance with the request of General Gaines, heretofore communicated, but as an act of justice to those volunteers who were discharged or rejected without adequate compensation for the many sacrifices to which their patriotism had subjected them, and to guard against similar disappointments in future."

Rolls of eight companies, under this requisition, have been returned to the Adjutant General's office. Three only of the captains designated, to wit, Darnel, Neely, and Yoakum, are on these rolls. It is said there were changes in the several companies that volunteered under the first requisition, subse-

quent to the time of their being dismissed, and before they were called on to volunteer again either under the proclamation of the 6th of June, or that of July 20. What number of the same officers or men volunteered under two or more of these requisitions, it is not within the power of the committee at present to determine.

The memorial of the legislature of Tennessee states that "the message of the 8th of October exhibits the numbers that volunteered, organized, and reported under the different calls. But many of the companies reported under every proclamation, and are, therefore, thrice counted."

The President of the United States, under date of August 5, 1836, disapproved of the requisition of General Gaines, and ordered Governor Cannon to dismiss the troops who had volunteered their services under it.

In the letter addressed to Governor Cannon, the President says: "I would barely add further, that the authority given you by the order of the 4th of May having been satisfied by yielding to the requisition of General Gaines, a new authority from the Department of War was necessary to authorize you to comply with that of the 28th of June."

If the committee concurred in the opinion expressed by the President, it would be a subject of doubt with them whether the United States should discharge a debt thus erroneously or illegally incurred; but, on recurring to the order of the 4th of May, it appears to the committee that Governor Cannon's authority was plain and explicit. The Secretary said:

"I am instructed by the President to request your excellency to call into the service of the United States the number of militia which have been, or *may be, required* by General Gaines." And in a subsequent letter he approves of volunteers.

Those who volunteered under the governor's proclamation of the 6th of June and the 20th of July, and were received into actual service, are entitled to pay for clothing under the act of May 23, 1836.

The memorialists complain that they incurred great expenses in equipping themselves for the service, in the purchase of clothing, horses, and accoutrements, and that many of them lost their crops for that season; while others say they abandoned their pursuits and callings, and, being dismissed the service, they were without profitable employment for the remainder of the year.

Under these circumstances, they call on the United States to be just, if they cannot be liberal.

The select committee of the legislature of Tennessee found great difficulty in fixing on any rate of compensation that would not be exceedingly onerous on the State, if anything like a remuneration should be made to the patriotic volunteers for the expenses they had incurred, and for the losses they had sustained. After mature deliberation, they recommended that three months' extra pay, amounting to sixty-nine dollars and seventy-five cents, be allowed to those who were mustered into the service under General Gaines's requisitions, and under the proclamation of the 6th of June.

They say there were four companies who tendered their services to Governor Cannon, at Fayetteville, but were not received, because the requisition was full before they arrived; and that twenty-three companies organized and were reported under the various calls, who did not attend the places of rendezvous, by reason of orders from the governor, or other intelligence that their services were dispensed with by the general government, or by their officers. They recommend that these twenty-seven companies be allowed half as much as those mentioned above, or \$34 87½ each.

It is understood that the bill that accompanied the report of the select committee was not passed into a law, but was superseded by a proposition to submit the subjects contained in the report to the favorable consideration of Congress.

This committee do not doubt the expenses and losses of the volunteers who were received into the service were great, and, to very many of them, embarrassing; but no government has attempted to remunerate all the expenses and losses her citizens or subjects encountered preparatory to a war, or in prosecuting it. These burdens have fallen on different and distinct sections of this country at different periods of its history. The ships of our merchants rotted at the wharves during the existence of the embargo and non-intercourse acts previous to the late war with Great Britain. The commerce of the country was suspended, if not annihilated, and men of wealth were reduced to want. After the war was declared, the whole northern and northwestern frontiers were laid waste. The inhabitants on the Chesapeake and on its tributary waters, and on the southern seaboard, were annoyed by the enemy, and their buildings burnt and their crops destroyed. Those at New Orleans, and in its vicinity, incurred heavy losses. The militia and the citizens in the interior of the country, remote from the march of the invading enemy, with great alacrity repaired to the frontiers, whenever they were threatened by the enemy, or actually in his possession. Tennessee and Kentucky bore their share of the dangers of the war, and won imperishable renown. At a more recent date the inhabitants of Indiana, Illinois, and Michigan have borne the burdens and encountered the dangers of an Indian war. In the instances referred to, the pay of all who entered into the military service of the United States was regulated by law. Thousands left their homes in security, and voluntarily repaired to the nearest scene of danger on every sudden emergency, at the sacrifice of their business, and incurred heavy expenses in their equipments. Very many of them were not paid for the time they spent in the public service; but none were remunerated for their losses or extraordinary expenses.

Patriotism consists in love of country; and the evidence of that is manifested by sacrificing time and property in maintaining her rights, and periling life in her defence.

Whenever these sacrifices are fully remunerated by money, patriotism is sunk in sordid avarice.

The committee will not draw any invidious distinction between the citizens of different States; but it is due to the memorialists to say, they have, to the recent requisitions, promptly responded, by a voluntary tender of their services, not in defence of their own soil, but in defence of remote and distant points. They were tendered under existing laws, and, when accepted, the liabilities and duties of the respective parties were well defined and made known.

The motive that governs the volunteers was a high sense of duty, arising from an ardent love of country. All they can ask is, that the government of the United States pay what it promised. Whatever sacrifices beyond this they have made, are voluntary offerings to the cause of freedom, which money cannot, nor should, compensate.

It has been the policy of the United States to give encouragement to volunteers. When militia-men are called into the service by drafts, families are frequently left in great indigence and want. A poor man cannot hire a substitute; and if he leaves his family in distress from indigence or sickness, he counts the hours when he shall discharge the duty of husband and parent.

Volunteers are generally those without families; or, if otherwise, they leave them in comfortable health, and with the means of support.

These are some of the reasons which have operated in giving a preference to volunteers.

The volunteers under General Gaines's first call incurred the same expense as those who volunteered under the proclamation of the 6th of June, or that of the 20th of July. They volunteered for the same service, and if they had not been dismissed, all would have shared the same perils and dangers.

The committee see no reason why they should not be put on the same footing as to clothing. When they volunteered, both expected to be paid for their clothing by the month, and it is owing to the act of May 23, 1836, and to the construction given by the Attorney General to it, different from the construction of the then Secretary of War, that gives pay for clothing to one class, and withholds it from the other.

It was the evident design of Congress, by directing that the clothing be paid for at the commencement of the service, to compensate the volunteers for extraordinary expenses. These expenses are a part of the contract the moment he enters the service. His time is paid for, according to the period he serves, when pay for clothing is in the nature of bounty.

By paying for the clothing and for the time of service the system is uniform.

The committee applied to the paymaster general for estimates as to those called out under General Gaines's first and second order, and under the proclamation of the 6th of June.

These have been furnished, accompanied by an explanatory letter.

First call by General Gaines: pay, travelling, and expenses that will probably arise.....	\$60, 000
Allowance for clothing.....	40, 000
Volunteers under the proclamation of June 6.....	95, 000
Second call by General Gaines.....	35, 310
	230, 310

A part of the volunteers under the first call volunteered under the subsequent requisitions; and it is the opinion of the committee they should be paid for clothing but once, unless they volunteered more than once, under the act of May 23, 1836; and if they did, they have vested rights, which Congress will not violate.

Governor Cannon, in his message to the legislature of Tennessee, on the 10th of October last, mentions his liabilities to the Union Bank, for money obtained to aid the volunteers to enter the service; and it appears, on referring to the certificate of the cashier, that such liabilities on the 20th of October were \$13,002 38.

The committee wrote to the Secretary of War, on the 28th day of January, to know whether any money was wanted for the quartermaster's department in relation to these volunteers; and if there was, they requested that an estimate be submitted. No answer having been received, the committee are unwilling to delay the report any longer. They will report an appropriation of \$13,500, to repay any money Governor Cannon may necessarily have expended on account of this service.

It appears the executive staff have been necessarily engaged, more or less, during the season, in calling out and organizing the different corps. Paymaster General Towson informed the committee, verbally, it had been usual to pay for such services according to the rank of the appropriate officers of the army of the United States. No estimate for this purpose was submitted, as the time they respectively served is not stated; but the committee recommend that three thousand dollars be appropriated to settle what is due on account of those services.

Those who were mustered into service, and have been reported to the War Department, form a distinct class, and, in the opinion of the committee, should be separately provided for.

ON THE CLAIMS OF THREE COMPANIES OF INDIANA MILITIA CALLED OUT BY AN INDIAN AGENT TO PROTECT CERTAIN INDIAN CHIEFS, WHO HAD SIGNED A TREATY FOR THE CONVEYANCE OF THEIR LAND, FROM THE RESENTMENT OF THE TRIBE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1837.

Mr. ELSHA WHITTLESEY, from the Committee of Claims, to whom was referred the claim of three companies of Indiana militia for their services in protecting certain Indians and others near the Tippecanoe river, on the 19th of September, 1836, reported:

That it appears from a report made to the Secretary of War in October last, by Mr. Pepper, Indian agent, that a meeting of Pottawatomics was held on the 19th of September last, at a place designated, near the Tippecanoe river, in Indiana, to receive their annuities. At that assemblage, for certain causes mentioned in the report, it became necessary, to preserve the peace and to protect certain Indians and others, to call out three companies of militia. The muster-rolls state they were on duty seven days.

The requisition of the Indian agent on Colonel Ewing and his orders to the commandants of the companies are among the papers, and appear to be regular.

The Indians having been assembled under a treaty with the United States, it appears to the committee that they, with all other persons necessarily employed, were to be protected at the expense of the United States.

Relying on the report of Mr. Pepper for a correct statement of the facts, the committee think the exigency authorized the agent to call out a suitable military force, and it appears that the force so called out was not disproportioned to the occasion.

The Secretary of War furnished the committee with all the papers in his possession relative to the claims presented. Among the papers are three muster-rolls, and various bills for forage, victuals at taverns, and other expenses. The bills amount to \$878 89.

The committee think when troops are called into the service of the United States, whether for long or short periods, their pay and allowances should be regulated by existing laws. If they incur extraordinary expenses at taverns, such expenses are not to be allowed against the United States. The committee therefore disallow the bills, with the exception of two of them. One of them is for ammunition and for cleaning guns, and the other is for money paid for expresses and for ammunition. In the last bill ammunition and provisions are blended in the same item.

The committee recommend that \$103 87, the amount of these bills, be appropriated, leaving it to the proper officer to pay so much as he shall think right for ammunition, cleaning of guns, (if that is a proper charge,) and for sending expresses.

They sent the muster-rolls to the paymaster general for his estimates for the pay of the officers and men. They amount to \$785 75, for which, and the expenses mentioned above, the committee report a bill.

INDIAN AGENCY, *Logansport, October, 1836.*

SIR: I have the honor to report that on the 19th day of September, 1836, the Pottawatomies of the Indian agency assembled at the place designated, near the Tippecanoe river, to receive their annuity. There were also on the ground about three hundred northern Indians belonging to the Chicago agency, some of whom had been with the Wabash Indians all summer, and who had been encouraged by that portion of Catholic Indians opposed to emigration to settle and live upon their reserves. These northern and Catholic Indians, headed and advised, as I have great reason to believe, by some white men, insisted that the annuity should be divided amongst the whole number of Indians on the ground; that the proper chiefs of the Wabash Pottawatomies should sell no more land, but reserve what they had for the common use of all. The proper chiefs insisted that the annuity should be paid to the Indians of this agency only; that they had a right to sell all the land belonging to the Pottawatomies in Indiana, and to dispose of the proceeds as they might think proper. The above conflicting views were subjects of frequent and angry debate among the Indians before any council was called. I determined that this would be a favorable opportunity to lay before the chiefs the propositions embraced in your instructions of January, 1836. I therefore assembled them in council; had a full and free interchange of opinions with them; urged them in mild but strong terms to accept of the invitation of their great father to sell all their reserves, and to remove to their country west of the Mississippi.

They replied that their great father had always given them good advice; that they had listened well to his advice for many years; and that they had become convinced that they could not stay much longer in this country; that they would therefore accept the good advice of their great father, and were now ready to sign a treaty for all their remaining land; but they said there were many disaffected men among their own people, as well as among the northern Indians, who threatened to kill the chiefs if they sold the land; and that if they did sell they should look to their great father to protect them from the execution of these threats.

They were told that they should be protected; that the man who raised his hand to strike a chief, for exercising the duties and powers of his office, should be deemed an enemy to the government, and would be pursued, overtaken, and punished, if he ran as far as the west side of the great river. With this assurance the chief signed the treaty, and for a short time there appeared to be less excitement and discontent than before.

On the 24th of September the Indians were called in council to determine in what manner they would receive their annuity. When the council assembled the Wabash Pottawatomies were invited to take their seats together and consult; but one or two of the chiefs seated themselves on the opposite side, with the Chicago Indians, and seemed determined to confound the councils of the proper tribe. I advised the Chicago Indians to leave the ground, assuring them they could receive no portion of the present annuity.

Captain Simonton told the Indians he would protect them while the payment was being made if he were compelled to send to Chicago for troops.

The Chicago Indians and some of the disaffected Indians of this agency immediately raised an impudent shout, mounted their horses, and left the council. The Wabash Indians then continued the council, and informed Captain Simonton that they had decided that the whole annuity for lands formerly sold, and recently ceded, should be paid to the chiefs, and receipted for by them.

The chiefs informed Captain Simonton and myself, in open council, that they intended to apply a part of their money to the payment of their debts, and that they had appointed two persons, viz: Colonel George W. Ewing and Cyrus Taber, to investigate the claims against their tribe, and to assist them in counting and distributing their money. On the following day, in conformity to law and the above decision of the Indians, Captain Simonton paid and delivered the money to the chiefs and took their receipts. Captain Simonton and myself now supposed that we had no other duty to perform than to protect the Indians a sufficient length of time to enable them to distribute the money according to their wishes; and, to afford them such protection, Captain Simonton had selected and employed twenty men, who were placed under the command of Major Andrews, with instructions to prevent the distribution of whiskey to the Indians, to preserve order, and to protect the house in which the money was deposited.

Soon after the two persons appointed by the Indians, as above stated, commenced counting money in the house, the crowd out of doors complained, alleging that, as the commissioners appointed had claims to a very large amount against the Indians, justice would not be done to minor claimants. The tumult increased, and at last a rush was made to the front of the money house by claimants and others, who pushed the guard aside and demanded that the commissioners appointed by the Indians should be turned out, and others appointed in their stead.

Another party of white men insisted that the commissioners should not be interrupted. At the same

time the disaffected Indians, with some white men at their head, assailed the house in the rear, and called aloud to each other to *pull down the house*, and scatter the money to the Indians. Captain Simonton and myself had been at dinner, and when the disturbance arose were some one hundred yards distant from the scene. I arrived in time to hear the language above stated, and immediately attempted to clamber on the top of a cabin adjoining the one in which the money was deposited, and while accomplishing this object one of the logs of the money house was forcibly pulled down. As soon as I reached the top of the house I called the attention of the crowd, harangued them at some length, advising them to desist from the perpetration of lawless acts, and unite in restoring peace.

The angry excitement in the meantime somewhat abated, and a proposition was made, and agreed to by the crowd, that Captain Simonton and myself should adjust the claims against the Indians, and pay out the money. But not having the sanction of law nor instructions from the government to interfere in any manner with the settlement of common debts against the Indians, we declined the charge.

A proposition was then made that we should select disinterested persons as commissioners to perform the duty. This we consented to do, provided the chiefs in whose hands the money had been legally placed requested it. They were consulted, and did so request; whereupon Captain Simonton and myself selected William Polke, Ebenezer Ward, Robert B. Stevenson, Edward V. Cicott, Benjamin Burthelett, and Daniel D. Pratt, to assist the chiefs in adjusting the claims against the Indians, and to apply a part of the annuity to the payment thereof, and distribute the balance to the heads of families.

Some delay was unavoidable in selecting and bringing together the above-named gentlemen, one of whom was distant 30 miles from the ground.

The disbursing agent and myself, at the request of the Indians, consented to take charge of the money until the commissioners could be assembled. At this stage of the business the chiefs were apparently much alarmed, (an Indian will not *say* he is afraid.) They reminded me that protection had been promised; said that a council had been held by the disaffected Indians, and that a man had been appointed to kill certain chiefs designated to the council. There was, indeed, great reason to fear that these threats would be carried into execution, and that the angry excitement that prevailed among the claimants would be renewed whenever the newly selected commissioners commenced investigating and paying their claims.

These well-founded apprehensions forced my mind to the conclusion that justice to the Indians, and a proper respect for the laws, demanded the presence of an adequate military force to suppress the lawless spirit that prevailed in the camp, and to preserve peace and good order during the further progress of the business. I consulted Captain Simonton, whose views corresponded with mine, and despatched an express to the settlement with a requisition for three companies of militia. In consequence of the requisition and regimental order of the colonel of the regiment, three companies, consisting in all of about one hundred men, were promptly brought on to the ground.

My presence being demanded at the payment of the Miamies, the money was now delivered into the possession of the last selected commissioners, and at their request the troops were placed at their disposal. The commissioners, in the discharge of their duty, proceeded to distribute to the heads of families and bands the money retained by them for equal distribution among themselves, after which they adjourned, on the same evening, (September 27,) to Judge Polke's, about three miles distant from the camp, taking the remaining money with them.

The appearance of the troops seemed to effect the object intended. The disaffected among the Indians and white men were awed from further acts of intimidation and lawlessness; and the commissioners, after a session of two days at Judge Polke's, uninterrupted by any attempts to interfere with their decision, proceeded to distribute to claimants, in the proportion agreed on, the remaining money in their hands.

The exigency that produced the requisition for an armed force on the ground could not have been anticipated. The measure, however, it is believed, was not disproportioned to the emergency. It suggested itself to my mind as the only resort to insure protection to the chiefs who had signed the treaty and thrown their protection upon me, and to bring to peaceful termination the adjustment and payment of the claims against the Indians by the commissioners.

I am, sir, with great respect, your obedient servant,

A. C. PEPPER, *Indian Agent.*

HON. SECRETARY OF WAR, *Washington City.*

ADDITIONAL EXPLANATORY ESTIMATES FOR THE SUPPRESSION OF INDIAN HOSTILITIES IN FLORIDA IN 1837.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 14, 1837.

WAR DEPARTMENT, *February 11, 1837.*

SIR: Although there is good reason to hope that the Indian hostilities now existing will be suppressed in a few months, yet, considering the actual condition of things in Florida and on the frontiers of Georgia and Alabama, and the dangers to which our southwestern frontier is exposed, I have deemed it my duty to call for estimates of the expenditures which will be requisite for the purpose of keeping up the present force to the first of December next. They are herewith enclosed, and on the statements therein I beg leave to submit to your committee the propriety of a further appropriation of two millions of dollars for the suppression and prevention of Indian hostilities.

I avail myself of this occasion to call the attention of your committee to the propriety of making some allowance to paymasters engaged in making payments to militia and volunteers, as recommended

by the paymaster general, and in the annual report of the Secretary of War. The paymaster general reports to me that the justice, and, indeed, the necessity of this measure are every day rendered more apparent.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Hon. C. C. CAMBRELENG, *Chairman of the Committee of Ways and Means of the House of Representatives.*

QUARTERMASTER GENERAL'S OFFICE, *Washington, February 10, 1837.*

SIR: In compliance with your direction to me of this date to furnish an estimate of the funds that will be required for the service of the quartermaster's department for the residue of the present year, in preventing and suppressing Indian hostilities, based upon the calculation that the force at present employed on that service will be continued until December next, I have the honor to state that, judging from the experience of the past year, I should estimate that at least eight hundred thousand dollars will be required, in addition to the unexpended balance of the partial appropriation already made, for all the objects due from the quartermaster's department. This estimate is not limited to the war in Florida, but embraces also the operations in the Cherokee country, where a force is still maintained for purposes of prevention.

Of the appropriation of one million, made on my estimate of the 8th of December last, upwards of six hundred thousand dollars have already been remitted to the disbursing officers, leaving a balance of about four hundred thousand dollars in the treasury; and it is estimated that the unexpended balances now in the hands of officers are equal to two hundred thousand dollars; thus giving a total of one million four hundred thousand dollars for the residue of the year, should the estimate now submitted be granted. That sum I am quite sure will be required, should active operations continue through the year.

I have the honor to be, sir, your obedient servant,

T. CROSS, *Major, Acting Quartermaster General.*

Hon. B. F. BUTLER, *Secretary of War ad interim, Washington.*

PAYMASTER GENERAL'S OFFICE, *Washington, February 10, 1837.*

SIR: In obedience to your call of this morning for an estimate of the amount required by the pay department "for the Florida war for the residue of the year 1837, based upon the calculation that the present force may be required until December next," I have the honor to state that the \$2,000,000 appropriated by the act of January 9, 1837, included \$600,000 for the pay department, of which \$490,000 have been placed in the hands of paymasters, and, with the balance, is believed will not be more than sufficient to complete the payment of the volunteers and militia that have been and now are in service to the first of March, leaving ten months of the year 1837 to be provided for.

It appears from the last returns in the Adjutant General's office that there are now in service in Florida 1,340 volunteers—541 in Tennessee and 629 in Arkansas; making the aggregate now in service, so far as reported, 2,510, exclusive of Indians. It is probable that the Indians and volunteers not reported will make the number required to be paid at least 3,000. So far as can be ascertained from the rolls it appears that all the volunteers are mounted, and, of course, the most expensive of all troops. According to this data it will require for the volunteers in Florida, supposing them to serve

to December 31.....	\$469, 000
For the volunteers in Tennessee for the same period.....	189, 350
Those in Arkansas.....	220, 150
And for volunteers not reported, and Indians.....	171, 508

Making together..... 1, 050 000

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

OFFICE OF THE COMMISSARY GENERAL OF SUBSISTENCE, *Washington, February 10, 1837.*

SIR: In reply to the letter of the Hon. Joseph M. White of the 9th instant, and referred to this office, requesting "estimates for the Florida war," I have the honor to state that on November 5, 1836, a general estimate for subsisting the regular troops of the United States, and the militia and volunteers called into that service during the Florida campaign in 1837, was submitted to you, amounting to..... \$913,445 00
By the letter addressed to you December 19, ultimo, an additional sum was asked of..... 218,361 24

Aggregate..... 1,131,806 25

Of this sum, it will require to subsist the regular troops..... 753,433 91
And to subsist the militia and volunteers in the Florida campaign..... 378,372 34

Making the above total of..... 1,131,806 25

So that, if the \$378,372 34 be appropriated for subsisting the militia and volunteers engaged in the Florida war, the residue, \$753,433 91, will have to be appropriated for subsisting the army proper up to December 31, 1837.

Very respectfully, your most obedient servant,

GEO. GIBSON, *Commissary General of Subsistence.*

Hon. B. F. BUTLER, *Secretary of War ad interim.*

24TH CONGRESS.]

No. 726.

[2D SESSION.]

REPORT ADVERSE TO A CLAIM OF THE OFFICERS OF A BRIGADE OF FLORIDA MILITIA,
ON ACCOUNT OF THEIR EXCEEDING IN NUMBER WHAT THE LAWS ALLOW.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 14, 1837.

Mr. ELISHA WHITTLESEY, from the Committee of Claims, to whom were referred the claims of the officers of the second regiment, second brigade, Florida militia, reported:

That the claims are presented by George L. Phillips (who commanded a company in said regiment) for himself and the other officers, in a letter which he addressed to the Hon. Joseph M. White, which is referred to the committee. He states that he was in the command of a company, and at all times ready to do duty; that he was stationed at Picolata and picketed in that place; that he had a full company of riflemen, fifty-three in number; that his men have been paid, but that himself and officers have not been paid. The committee sent the papers to Paymaster General Towson for information; and they requested him to state why the officers were not paid, if the men they commanded had been paid for their services. His answer is received, accompanied by an abstract of the troops of General Hernandez's brigade, Florida militia, and other papers.

General Hernandez's brigade consisted of one brigadier general, four aides, one brigadier inspector, one assistant adjutant general, one brigade quartermaster, one colonel, one lieutenant colonel, two majors, one adjutant, one regimental quartermaster, one paymaster, four surgeons, one sergeant major, one quartermaster sergeant of companies, one sergeant major of companies, two majors commanding companies, eighteen captains, nineteen first lieutenants, twenty-two second lieutenants, thirteen third lieutenants, eighty-three sergeants, sixty-six corporals, four musicians, and six hundred and five privates.

One of these companies had six privates, another had twelve privates, and another fourteen privates. The general's escort consisted of one captain and eleven sergeants, but no privates.

It appears from the letters of Mr. Phillips that he commanded this escort.

General Towson, on an application to order payment to be made to Mr. Phillips, wrote to him on the 18th of August, 1836, as follows: "I am sorry to inform you that it is not in my power to authorize the payment you claim for your services as captain commanding the company that acted as an escort to General Hernandez. I am bound to consider no one entitled to pay as an officer who has not been reported and mustered as such, whatever services he may have rendered. It is not in my power to permit the payment of all of General Hernandez's command who have been *duly mustered*, as the proportion greatly exceeds what the law authorizes."

General Towson thought the command of General Hernandez should be reorganized to conform to the laws of the United States, and that the officers to be paid be designated by General Hernandez. This was approved by the Secretary of War. The committee have been furnished with the copy of a letter from Governor Call, which is important in deciding on the present and similar claims.

The committee approve the course pursued by the paymaster general, and they do not perceive that special legislation is necessary; and they think the settlement of the claim should be left to the proper officers under existing laws.

They refer to General Towson's letter to the committee, and to his letter to the Secretary of War, and to Governor Call's letter, and make the same a part of this report. The following resolution is submitted:

Resolved, That the Committee of Claims be discharged from the further consideration of the papers of George L. Phillips, for himself and others, and that they be laid on the table.

PAYMASTER GENERAL'S OFFICE, Washington, June 4, 1836.

SIR: The act of the 28th ultimo directs "that the Secretary of War be authorized to cause the militia called out to defend East Florida by Generals Clinch and Hernandez, or by the governor of Middle and West Florida, and such other militia and volunteers as have been received and mustered into the service of the United States and regularly discharged, to be paid in like manner with the volunteers and militia ordered into service under orders from the War Department."

The muster-rolls of the troops called out by General Hernandez have been transmitted to this office, and present the following difficulties: The number of privates mustered is six hundred and five, which is thirty-five less than a full regiment organized agreeably to the act of 1792, while the officers are nearly sufficient for a brigade, as will be seen by the enclosed abstract from the rolls. The questions to be decided before payment can be made are, whether the law will authorize the payment of the militia as called out by General Hernandez, which will be according to the muster-rolls forwarded? If it does not, whether a new muster must be made; and if made, by whom? If it shall be decided that there must be a new muster, it is respectfully recommended that it be made by the officer commanding the United States troops at St. Augustine, and that the most liberal organization be authorized that the usage that has heretofore prevailed will justify, viz: one brigadier general, one aide-de-camp, one brigade major and inspector, one quartermaster, one colonel, one lieutenant colonel, two majors, fifteen captains, fifteen first lieutenants, fifteen second lieutenants or ensigns, three assistant surgeons, two sergeants major, two quartermaster's sergeants, forty-five sergeants, sixty corporals. This would be the greatest number of officers that three battalions would be entitled to according to the organization of the army, which has been followed in some cases in paying the western militia; and as the services of a brigadier general may have been necessary, it is thought an officer of that rank, with his brigade staff, may be allowed. The mustering officer should be directed to require of General Hernandez to designate the officers that are to fill the several grades.

Respectfully, your most obedient servant,

N. TOWSON, Paymaster General.

The Hon. SECRETARY OF WAR, *Acting*.

Approved, as to remuster and the mode suggested.

L. C.

TALLAHASSEE, *September 18, 1836.*

SIR: I have received your letter of the 3d instant, and have sent Major Mapes to Newnansville, agreeably to your request, to finish the payments which should have been made by Major Smith. He was ordered by me to proceed to Newnansville on that duty, and he was authorized to call on Colonel Crane for an escort. The reason assigned by him to me for not executing the orders was his ill health, and not that Colonel Crane did not think the object sufficiently important to justify him in sending an escort. Major Smith had sent me a copy of your letter to the Secretary of War, in which you mention the number of officers who might be paid according to the number of men returned by General Hernandez. Knowing, as I did, that a majority of the officers and men who presented themselves for payment had never performed a day's service, I requested Major Smith to pay the officers whom I knew to have served faithfully,* and told him he might regard that request as a positive order if he found it necessary to cover his responsibility; but he left the Territory without paying any of the officers, except Major Putnam. It was no doubt your intention that those only should be paid who had performed actual service, and such are the instructions I have given to Major Mapes; but I fear you will find on inquiry that a large number of the men paid by Major Mapes, though belonging to the regiments ordered out by General Hernandez, never left their homes or performed one day's service during the war.

Very respectfully, your obedient servant,

R. K. CALL.

General N. Towson, *Paymaster General, Washington.*

PAYMASTER GENERAL'S OFFICE, *Washington, February 2, 1837.*

SIR: I have received your letter of the 31st ultimo, together with a communication from George L. Phillips on the subject of his claim for pay for commanding a company of Florida militia. You state that the committee wish to be informed "why, if the privates in the company have been paid, the officers are not entitled to their pay?" To which I have the honor to reply that the act authorizing the payment directs that they shall be "paid in like manner with the volunteers and militia ordered into service under orders from the War Department." The payments here referred to as a guide were made according to the organization given to the militia by the act of 1792, except in a few cases, and in these the organization of the United States infantry was followed. The muster-rolls of the companies transmitted to this place contained a much greater proportion of officers to privates than either organization provides for, as will be seen by the accompanying abstract, and the Secretary of War did not feel authorized to sanction their payment, but directed a remuster to be made.—(See my letter of June 4, approved by him, of which a copy is herewith enclosed.) The number and grade of the officers authorized to be paid were stated, and the mustering officer was instructed to request the commanding officer, General Hernandez, to designate them. This he declined to do; and the paymaster was instructed to pay such as the governor would designate, not exceeding the number authorized by the Secretary of War.

I enclose a copy of a letter from Governor Call, in which he states the principle that he thinks should govern in designating the officers to be paid; and some have been named by him, and paid accordingly. I have since directed the paymaster to request the governor to name all that will be entitled to the pay of officers, according to the decision of the Secretary of War. I am not able to say whether he will include Captain Phillips in the number.

My letter to Captain Phillips, which has been submitted to your committee, was in answer to one from him, in which he states that he was the officer who commanded General Hernandez's escort. You will see by the abstract of the muster-rolls that this escort is stated to consist of one captain and eleven sergeants, making just the number of a sergeant's command, and would not authorize the payment of any higher rank, and but one of that rank.

Respectfully, your obedient servant,

N. TOWSON, *Paymaster General.*

Hon. E. WHITTLESEY, *Chairman Committee of Claims, House of Representatives.*

24TH CONGRESS.]

No. 727.

[2D SESSION.]

ON THE CLAIM OF A BATTALION OF ALABAMA VOLUNTEERS TEMPORARILY CALLED OUT BY THE GOVERNOR TO GUARD AGAINST HOSTILITIES OF THE CREEK INDIANS, IN 1836, UNTIL A MORE PERMANENT FORCE WAS PROVIDED.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 22, 1837.

Mr. ELISHA WHITTLESEY, from the Committee of Claims, having under consideration the subject of the payment to be made to the troops of the State of Alabama while in the service of the United States, reported:

That Samuel D. Holt states he commanded a battalion of four companies, which was called out by Governor Clay to keep the Creek Indians in check until a more permanent force should take the field; that the companies were the Montgomery Guards, the Rifle Rangers, Coosada Volunteers, and the Independent Blues; that they were in actual service from the 11th of May to the 7th of June, 1836, when they were dismissed, their places having been supplied by other troops. He says Paymaster Muhlenberg paid the Montgomery Guards, and several companies in another battalion, but refused to pay his other three companies.

* NOTE BY THE PAYMASTER GENERAL.—Some of these officers have since been paid by another paymaster, and I presume they are the officers referred to in Mr. Phillips's letter.

Application was made to Paymaster General Towson for information whether the said companies could not be paid under existing laws. He answered they could not, and referred to the second section of the act of May 28, 1836, which is as follows:

"That the Secretary of War be authorized to cause the militia called out to defend East Florida by Generals Clinch and Hernandez, or by the governor of Middle and West Florida, and such other militia and volunteers as have been received and mustered into the service of the United States, and regularly discharged, to be paid in like manner with the volunteers and militia ordered into service under orders from the War Department."

General Towson furnished the committee, on another call, with an estimate of the expense of a company for one month, and an estimate of the pay of a major and battalion staff for the same time. The committee recommend an appropriation of a sum sufficient to cover the pay of the three companies and field and staff officers mentioned.

24TH CONGRESS.]

No. 728.

[2D SESSION.]

APPLICATION OF AN ASSISTANT SURGEON OF THE ARMY AT THE CITY OF WASHINGTON FOR ADDITIONAL PAY.

COMMUNICATED TO THE SENATE FEBRUARY 22, 1837.

To the honorable the Senate and House of Representatives of the United States:

The petition of Benjamin King, an assistant surgeon in the army of the United States, most respectfully represents: That on the 1st of June, 1832, he was ordered to the city of Washington to give medical attendance to the officers and enlisted men on duty there and at the United States arsenal at Greenleaf's Point; by being placed on which duty his necessary expenses were very much increased, and that no *extra* compensation has been allowed him therefor. At the time mentioned the pay and rations of an assistant surgeon and of a 2d lieutenant were nearly the same, but by a regulation of the War Department the officers on duty in any of the military bureaus received a per diem of \$1 25. When this allowance was made it was intended to defray the additional expense necessarily attending a residence in Washington, and not as a compensation for *extra* duties performed by them in such bureaus.

Your memorialist has attached hereto a schedule of the pay, rations, forage, allowance for servants, and per diem at that period to all officers on duty in the bureaus below the rank of colonel; from which you will perceive that he (who had *then* served *nearly fourteen years*) received about \$20 per month *less* than the youngest 2d lieutenant on duty in one of the bureaus; and deducting his allowance for forage, (which is no emolument, having necessarily to expend double as much as he receives,) makes his pay and emoluments about \$35 per month, or \$400 a year, *less* than a 2d lieutenant, who may not have served *one* year.

The expenses of an officer in Washington are much greater than at any military post. In a garrison the surgeon could at all times visit his patients without expense or endangering his health; while in Washington, in consequence of the residences of those whom it is his duty to attend being so distant from each other, he is compelled in *bad* and *rainy* weather to incur the expense of hiring a hack, or be much exposed while visiting such patients as are very sick and require constant attention.

At most of the military posts the allowance for forage is sufficient to keep the horses; but in Washington it costs as much to keep *one* horse as is allowed for *two*; while the surgeon on duty there is compelled to keep them to enable him faithfully to perform his *duties*—from the nature and extent of which he has *necessarily* to incur *greater additional expense* than any *other officer* on duty there.

Your memorialist, therefore, prays your honorable bodies to grant him the same per diem that was allowed and paid to officers on duty in the offices of the adjutant general, quartermaster general, chief engineer, chief of ordnance, commissary general of subsistence, and office of the topographical engineers; in support of which, he most respectfully begs leave to refer your honorable bodies to the accompanying report made by the military committee of the House of Representatives on the 10th of February, 1836,* to accompany bill No. 322 of that House; and, as in duty bound, your memorialist will ever pray, &c.

BENJAMIN KING, *Assistant Surgeon*.

A schedule of the monthly pay, rations, allowance for servants, forage, and per diem, in 1832, of officers on duty in Washington city.

	Pay.	Rations.	Forage.	Servants.	Per diem.	Total.
Lieutenant colonel.....	\$75 00	\$30 00	\$32 00	\$29 00	\$37 50	\$203 50
Major.....	60 00	24 00	32 00	29 00	37 50	182 50
Captain and assistant quartermaster.....	60 00	24 00	16 00	14 50	37 50	152 00
Captain.....	40 00	24 00	14 50	37 50	116 00
1st lieutenant.....	30 00	24 00	14 50	37 50	106 00
1st lieutenant and aide-de-camp.....	54 00	24 00	16 00	14 50	108 50
2d lieutenant.....	25 00	24 00	14 50	37 50	101 00
Assistant surgeon.....	40 00	12 00	16 00	14 50	82 50

* See antecedent No. 639 of this class.

From the above schedule it will be seen that the youngest 2d lieutenant on duty in a bureau in Washington receives \$18 50 per month, or \$222 per year, more than the assistant surgeon; and deducting the allowance for forage to the latter, (which is no emolument, as the expense of keeping horses is double the amount allowed,) makes the pay and emoluments of a 2d lieutenant \$414 a year more than that of the assistant surgeon, who had served *fourteen years*—the allowance for fuel and quarters to both being the same.

BENJAMIN KING, *Assistant Surgeon United States Army.*

WAR DEPARTMENT, *February 18, 1837.*

SIR: In reply to your communication of the 3d of December last, in relation to the memorial of Assistant Surgeon King, I have the honor to state that the statement of facts contained therein appears to be correct, and that they would seem to constitute equitable grounds for such an allowance as is prayed for.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

HON. THOMAS H. BENTON, *Chairman of the Military Committee of the Senate.*

The memorial is herewith returned.

24TH CONGRESS.]

No. 729.

[2d SESSION.]

ON THE CLAIM OF AN OFFICER TO PAY AS AN AIDE-DE-CAMP WHILE SERVING A BREVET BRIGADIER GENERAL IN THAT CAPACITY.

COMMUNICATED TO THE SENATE FEBRUARY 24, 1837.

Mr. BENTON, from the Committee on Military Affairs, to whom was referred the petition of Lieutenant T. L. Alexander, of the 6th infantry, aide-de-camp to Brevet Brigadier General Atkinson, being on actual duty according to his brevet rank, reported:

That they have referred the petition to the Secretary of War *ad interim* for his opinion thereupon, and have received from him a written communication, covering a detailed report from Adjutant General Jones; from both of which it appears that the pay of an aide-de-camp, which has been withheld from Lieutenant Alexander, has been so withheld under the terms of a general order of May 7, 1827; and that pay to aides under the like circumstances has been made before that order as far back as the year 1799, and also in several instances since that order; and it is also shown that on May 29, 1817, the then Secretary of War, on the special reference to him of a case arising under the laws, and particularly the act of March 3, 1814, decided in favor of the right of brevet brigadier generals to employ an aide, when in actual command, according to their brevet rank. Upon these reports the committee are of opinion that no legislation in the case is necessary, and that the aide-de-camp, Alexander, being employed by a brevet brigadier who had a right to an aide when in actual command according to his brevet commission, has a right to receive the pay of an aide while so employed.

The committee report the following resolution:

Resolved, That they be discharged from the further consideration of the case.

WAR DEPARTMENT, *February 20, 1837.*

SIR: In addition to the matters stated in the reports of the adjutant general and Second Auditor, which I have the honor to enclose, it is proper to state that the regulation of August 7, 1828, is in the following words:

"Officers having the rank of general by brevet will not hereafter appoint aides-de-camp in consequence of holding such rank, without the permission of the War Department. Whenever a brevet general requires an aide-de-camp, he will, through the proper channel, communicate the necessity of such aide, with his reasons for desiring it, that the Secretary of War may be enabled to determine on the propriety of granting it."

The accuracy of this regulation being drawn in question, the Secretary of War, by a letter of March 18, 1834, to the Attorney General, requested of that officer his opinion on the following question:

"Are generals by brevet authorized to appoint aides-de-camp?"

The Attorney General's reply to this question was as follows:

"The act of April 16, 1818, 'regulating the pay and emoluments of brevet officers,' declares that 'the officers of the army who have brevet commissions shall be entitled to, and receive the *pay* and *emoluments* of their brevet rank when on duty, and having a command according to their brevet rank, and at no other time' This act, as well as the fourth section of the act of July 6, 1812, to which it is supplementary, gives to brevet officers, in certain cases, the *pay* and *emoluments* of their brevet rank. These are all the special privileges conferred on them by law, and the right to appoint aides-de-camp is neither *pay* nor an

emolument. Besides, the fifth section of the act of March 2, 1821, 'to reduce and fix the military peace establishment of the United States,' expressly declares that there shall be 'one major general, with two aides-de-camp, and two brigadier generals, each with one aide-de-camp;' and when this provision is considered in reference to the former arrangement which it reduced and altered, and in connexion with the title of the act in which it is found, I think it must be understood as prohibiting the appointment of aides-de-camp in any other case."

But notwithstanding the regulation and opinion above stated, it would seem from the report of the adjutant general that in several cases aides have been allowed to generals by brevet; and it is most obvious that the services required of such general officers when commanding according to their brevet rank cannot well be performed without the assistance of an aide-de-camp.

The claim of Lieutenant Alexander was submitted to me before he applied to Congress, and the discrepancy between the regulation and opinion above stated and the practice in certain cases was brought to my notice. But I did not feel myself at liberty to disregard the written rule made by the department and the opinion I had myself given in another place; and the claim was therefore withdrawn.

I would recommend the enactment of a general provision covering, not only Lieutenant Alexander's case, but other like cases past and future.

The papers transmitted by you are herewith returned.

Very respectfully, your most obedient servant,

B. F. BUTLER, *Secretary of War ad interim.*

Hon. THOS. H. BENTON, *Chairman of Military Committee, Senate.*

TREASURY DEPARTMENT, *Second Auditor's Office, February 7, 1837.*

The Second Auditor, to whom was referred the letter of the Hon. T. H. Benton, chairman of the Military Committee, of the 6th instant, to the Secretary of War, with the petition of Lieutenant T. L. Alexander, for pay, &c., as aide-de-camp, has the honor to state that the claim of Lieutenant Alexander was disallowed by virtue of a regulation of the War Department dated August 4, 1828, which says that "Officers having the rank of generals by brevet will not hereafter appoint aides-de-camp in consequence of holding such rank, without permission of the War Department. Whenever a brevet general requires an aide-de-camp, he will, through the proper channel, communicate the necessity of such aid, with his reasons for desiring it, that the Secretary of War may be enabled to determine on the propriety of granting it." Lieutenant Alexander was appointed by Brevet Brigadier General Atkinson since the date of the order, and did not furnish the permission of the War Department, required by the regulation.

W. B. LEWIS.

The SECRETARY OF WAR.

Special report in the case of Lieutenant T. L. Alexander, 6th infantry, the aide-de-camp to Brevet Brigadier General Atkinson, United States army, being on actual duty according to his brevet rank; respectfully submitted in obedience to the orders of the Secretary of War.

ADJUTANT GENERAL'S OFFICE, *Washington, February 13, 1837.*

Prior to the publication of General "Order" No. 42, dated August 7, 1828, major generals and brigadier generals by brevet, when on duty and exercising command according to their brevet rank, were deemed to be entitled to the services of the like number of aides-de-camp provided for by law in cases of general officers of like grade under the organic law of the peace establishment. Accordingly, each major general by brevet was formerly allowed two aides-de-camp, and each brevet brigadier general having a command according to his brevet commission was allowed one aide-de-camp; and the right to compensation in each case was never questioned, but was regularly accorded prior to and since the decision of the proper authority of May 29, 1817. The practice of the service in this particular, anterior to the order of 1828, was supposed to be in strict accordance with the circumstances of brevet "command," the proprieties and the usage of the military service, and in no degree at variance with the spirit, if not the letter, of the law. The rank by brevet being, by authority of the President, *operative under the law*, and the law making provision for aides-de-camp in the cases of general officers, it is not seen that, because the law is silent as to the contingent appointment and compensation of aides-de-camp in cases of *brevet* general officers, it necessarily denies their right to the services of such staff officers when on duty and actually in command in virtue of their commissions by brevet. And the laws which justify the paying of three major and five brigadier generals by brevet, as now happens to be the case, justify also the employing and paying the corresponding aides-de-camp, so far as any question arising out of any imagined restrictions of the organic law may be supposed to conflict with the right.

In tracing the records it is seen that the vigilant sentinel of the treasury, the Third Auditor, on the 27th May, 1817, addressed a letter to the Secretary of War, requesting instructions which happen to bear directly upon the present subject of inquiry, and so much thereof, together with the Secretary's decision, as relate thereto are here respectfully cited:

"TREASURY DEPARTMENT, *Third Auditor's Office, May 27, 1817.*

"SIR: In the examination of the paymaster's accounts it appears that constructions have been given to that section of the act of Congress of the 3d March, 1814, which relates to the emoluments of brevetted officers which, in my opinion, require the sanction of the War Department before they can be admitted. I therefore submit the following questions, to which I solicit such answers as may be deemed conclusive in the settlement of those accounts:

"Is a brevetted major general entitled, by virtue of his brevet, to two aides-de-camp, and a brevetted brigadier general to one aide? and if so, are they, when not in separate command, entitled to them? In other words, do the terms of the act which give to a brevetted officer his brevet pay and emoluments under certain circumstances authorize him to employ aides-de-camp at the pay and emoluments attached to such officers?" * * * *

To which the Secretary of War, on the 29th May, 1817, made the following reply:

“WAR DEPARTMENT.

“Brevetted major and brigadier generals, when in *actual* command by virtue of their brevet commissions, are entitled to the same number of aides-de-camp that a major general or brigadier general may by law be entitled to employ.

“The right to employ aides, and, of course, the pay and emoluments of the aides-de-camp, will cease whenever the general is not in the actual command by virtue of his brevet commission.” * * *

The foregoing decision confirmed the previous practice of the service, inclusive of the 29th May, 1817; and the rule, being then definitely established by the Executive, has ever since been maintained, without deviation, up to the date of the “*Order*” of August 7, 1828. This decision is well sustained by the proceedings in Congress, as far back as 1798, in the analogous case of Captain Moses White, the aide-de-camp of *Brevet* Brigadier General Hazen, who asserted his claim to the pay, &c., provided by law for the aide-de-camp of brigadier general in the line of the army. The committee to whom the petition was referred made the following favorable report in the case on the 4th February, 1799:

“By a resolution of Congress, on 29th June, 1781, General Hazen was ‘appointed a brigadier in the army of the United States by brevet.’ It appears from the certificate of General Hazen that the petitioner acted as aide-de-camp during the time for which he prays compensation.

“The only doubt which appears to have arisen respecting the propriety of allowing this claim is understood to have been because General Hazen held the rank of brigadier by brevet commission only.

* * * “If a brigadier held the *rank and command*, whether he was a volunteer or held it by courtesy, or received no pay, they (the committee) apprehend, by established custom, he was entitled to his staff officers, and they to the customary allowances for their services. The Secretary of the Treasury, in his report on the part of the petitioner’s claim, states that he had not been able ‘to discover any resolution of Congress by which the claim could be decided, but that there were precedents in practice in favor of it as applied to brigadiers by *commission*; that, if this practice were to govern, the circumstances of brevet appointments would not, in the opinion of the Secretary, constitute a ground of difference to the prejudice of the petitioner, inasmuch as *the brigadier is understood to have the actual command of a brigade* at the time; in which case the principles of the service with regard to an aide-de-camp would apply as fully to him as to the brigadier in commission.’

“The committee concur with the Secretary in the opinion above expressed, and think that the petitioner ought to receive compensation for his services as aide-de-camp.” And the committee so reported by resolution.

The claim of Aide-de-Camp *Alexander* is even stronger than the one above cited; for the brigadier general by *brevet* with whom he has been serving was not only on *actual* duty according to his brevet commission, but his service as such is otherwise established by the fact of his having received the corresponding pay under the contingent provisions of the act of April 16, 1818. And the lieutenant’s claim is yet more firmly established by the additional fact that the former aides of *Brevet* Brigadier General Atkinson, (Lieutenants McRee and A. S. Johnson, the predecessors of Lieutenant *Alexander*,) received each his pay as aide-de-camp, inclusive of the 30th of October, 1833, when Lieutenant Johnson resigned his staff appointment.

The records and the practice show that the new rule published in “*Order*” No. 42, of August 7, 1828, has not been uniform in its operation. Thus the aide-de-camp of *Brevet* Brigadier General Brady, commanding at Detroit, receives his pay as aide-de-camp.

The second aide of *Brevet* Major Generals Gaines and Scott, each being on duty according to his brevet rank, is not allowed his pay as such. But, if it be unlawful to allow pay to *two* aides in the case of a brevet *major* general, how can it be lawful to allow pay to the *one* aide of a brevet *brigadier*? And the practice, under any rule, which accords the pay to the aide-de-camp of the inferior grade by brevet, and at the same time denies it to the aide of the superior, under like circumstances of command, would seem to be devoid of equal justice to the parties, as it is assuredly adverse to the interest of the service.

In answer to his application for the allowance of pay to his aide-de-camp, Lieutenant *Sewall*, *Brevet* Brigadier General Arbuckle, commanding on the southwestern frontiers, was informed on the 10th day of March, 1836, by order of the general-in-chief, that “the law does not authorize the appointment of more aides-de-camp than are recognized in the law fixing the peace establishment. All such officers must be considered as acting aides-de-camp;” and the pay was then accordingly denied him.

And in answer to his reiterated application in behalf of the same aide, Lieutenant *Sewall*, the same *brevet* brigadier general was informed on the 27th of May, 1836, that the Secretary of War had indorsed his application as follows:

“Let General Arbuckle be allowed an aide-de-camp whenever he is in the field and in command of a brigadier general.” And then Lieutenant *Sewall* was allowed his pay as an aide.

When *Brevet* Brigadier General Wool was ordered on command in the Cherokee nation, in June, 1836, the Secretary of War directed that he be allowed an aide-de-camp, who should be entitled to pay as such, &c., &c.

The records of the department show that, between the years 1814 and 1821, the late *Brevet* Brigadier General Moses Porter, colonel of the regiment of light artillery, was allowed the services of an aide, and that Lieutenant *Anthony* and other officers who were his aides received the pay and emoluments as such.

The subject, involving as it does the general principles on which must rest the validity of Lieutenant *Alexander*’s claim to compensation as an aide-de-camp, having been thus briefly examined, the adjutant general deems it to be within the scope of his duties on this occasion respectfully to recommend the reconsideration of the regulation of 1828, the recognition of the then ancient usages of the service, and that the special regulation of May 29, 1817, for the guidance of the accounting officers of the treasury with respect to the aides-de-camp serving with general officers by *brevet*, be now reinstated. The municipal regulation of May, 1817, it is manifest, was the result of deliberate inquiry, originating in the judicious forecast of one of the intelligent and disinterested law officers of the Treasury Department; and the decision was then as maturely made, it would seem, by the Secretary of War *ad interim*, at a time when there were no conflicting interests to be reconciled, and when, too, the service was well provided with a general staff—there being then for duty with the general officers on the frontiers and elsewhere *twelve* officers of the adjutant general’s and inspector’s departments; but now and for years past there has been no adequate staff for field service. The public interest has suffered for the want of such officers; and

general officers in the field have been destitute of that assistance which the good of the service required. Hence, in the absence of a proper staff, greater is the occasion to allow the pay to the aides-de-camp of general officers by *brevet* when *actually* on duty according to the brevet commission; for, if the aide be denied the allowances, his services would not be obtained, nor could he adequately perform the incumbent duties of an aide in the field without being mounted, &c.

Due regard, therefore, to the exigencies of the public service, as well as to the former well-established usages and uniformity of practice, seem now to indicate the expediency of rescinding "Order" No. 42, of August 7, 1828. And equal justice demands that, as in other like cases, Lieutenant *Alexander* be allowed *his* pay and emoluments as the aide of Brevet Brigadier General Atkinson.

Respectfully submitted by order of the Secretary of War.

R. JONES, *Adjutant General*.

Hon. B. F. BUTLER, *Secretary of War ad interim*.

24TH CONGRESS.]

No. 730.

[2D SESSION.]

ON THE EXPEDIENCY OF PURCHASING THE PATENT RIGHT OF A PACK-SADDLE FOR
CONVEYING THE SICK AND WOUNDED, ETC.

COMMUNICATED TO THE SENATE FEBRUARY 25, 1837.

Mr. WALL, from the Committee on Military Affairs, to whom was referred the petition of Captain Hezekiah L. Thistle, of Louisiana, now residing in Pennsylvania, reported:

That the petitioner sets forth in his petition that he is the inventor of a patented improvement in a saddle, designed for the safe, convenient, and expeditious transportation of sick or wounded persons, and also as a pack-saddle; that its peculiar fitness for our troops, especially in Indian wars, has recommended it to the favorable consideration of the War Department, and that a number have been ordered by that department, and are now in use in Florida; and that a disposition has been manifested by the department to make them a standing and important part of the outfit of the army, proper and extraordinary, on all occasions; and such, too, is the decided and unanimous opinion of all the practical officers of the army; that it is well known that the removal of the sick and wounded constitutes one of the most serious impediments in military movements during war. In the swamps and thickets of the Indian country, and of all new countries, carriages cannot be used, and litters are wholly unavailable, independent of their tedious action, while safety lies wholly in rapidity; that this mode of conveyance is the most rapid, ready, safe, and convenient for the removal of the sick or wounded; while the cheapness of the transportation, the readiness of its application, the slight reduction of soldiers necessary to give it full effect, (since in most cases the sick or wounded soldier can guide his horse without any aid,) and the certainty of removing all from the field of action, and keeping those *hors du combat* under the protection of the active force, whether in slow or rapid motion, must be obvious to all; that these improvements are confined to warlike operations, so that the only reward its inventor can hope to enjoy must flow from the government, and, therefore, prays that Congress would make provision to compensate him for the service he has rendered, and the use of his patented improvement for the army of the United States.

The committee have examined the documents accompanying the petition, and it appears that several distinguished and experienced officers of the army have expressed a very decided opinion in favor of the utility of the improvement of the petitioner, and its value to our troops operating on and beyond the frontier, where, from the want of roads, wheel carriages can but rarely pass; also, that the military board has examined it, and, in pursuance of their recommendation, the Secretary of War procured fifty of the said saddles for the use of the troops of the United States now in the field, which are now in practical employment in Florida, as an experiment. The result of this experiment is not known, and the committee are of opinion that, until that time, any action by Congress would be premature. Should experience prove its utility and value, in accordance with the opinions of the petitioner and the officers above referred to, it will then well deserve the favorable consideration of Congress. The committee, therefore, submit the following resolution:

Resolved, That the committee be discharged from the further consideration of the petition.
